Maclean's University Rankings, 2019

IT'S YOUR TIME TO SHINE

The University of Lethbridge is a community of inspiring lights united by one common purpose — you.

Oki, welcome to Sacred Buffalo Stone! The first time you step foot on campus, you'll see we offer something unique. Surrounded by breathtaking natural beauty, we are consistently one of Canada's top-ranked universities and leading research institutions.

With more than 8,700 students from more than 100 countries, uLethbridge is large enough to deliver world-class teaching and research, yet small enough to provide a personalized student experience.

At uLethbridge, you'll learn to think about issues from all angles as you prepare for the careers of tomorrow. Your professors are renowned researchers who invite you, even as early as your first year, to take part in their work! You'll have many opportunities to discover the world and explore work experiences before you graduate, while receiving the support you need to succeed throughout your educational journey.

It's an especially exciting time at uLethbridge. We've just opened the doors to our new Science Commons building with the first students starting classes in Fall 2019. This is the most advanced facility of science research and education in Canada and we're saving a seat just for you!

Your future is bright at uLethbridge. We can't wait for you to join us!

LEARN TO THI

ulethbridge.ca/future-student/wusc

NK

In a competitive world, the **ability to think critically, innovate and solve problems is the key to success.** At uLethbridge, you gain an in-depth education in your chosen field, a broader awareness of the world, and the skills to apply that knowledge. **This is liberal education.**

With liberal education you learn HOW to think, not WHAT to think. It teaches you think critically, innovate and solve problems and encourages you to be an active community member and global citizen.

For one group of uLethbridge students, the 2015 Syrian refugee crisis was the catalyst for action. A group of students, led by Elise Pundyk and Grace Wirzba, formed a uLethbridge chapter of the World University Service Canada (WUSC), WUSC ULeth, to make a positive difference in the lives of refugees.

Through bake sales, bottle drives, special events and donations from businesses and community members, the club raised enough money to bring a refugee student to Lethbridge for one year; Abdullah Mouslli, a Syrian refugee living in Jordan, began his studies in Fall 2016. Since then, two additional students have joined uLethbridge.

WUSC ULeth approached the Students' Union and, in a 2017 referendum, students voted to add \$2 each semester to their fees in support of refugee

students. A donor also established an endowment to provide financial support to refugee students beyond their first year.

"The impact of WUSC ULeth is long term," says Abdullah. "When you educate someone, you don't just give them food for today, you give them food for a lifetime. Moving to Lethbridge was a huge step for me. If I had stayed in Syria, I don't think I would have the belief in myself to do something better tomorrow. Now I can have hope."

"The student refugee program brings together students of all backgrounds, from all areas of study, under a common purpose. It enables us to truly see how our work makes a difference."

Elise Pundyk (photo: left)
Bachelor of Fine Arts - Art Student
Major: Art History/Museum Studies

From our **extraordinary campus and facilities**, to student supports, academic programs, small class sizes and beyond, **students are central to all we do at uLethbridge.**

We will assist your transition to university with events like Ahead of the Herd and New Student Orientation. Most importantly, we'll continue to support you throughout your time at uLethbridge.

Originally from Calgary, Doyin Adepoju chose uLethbridge because he was struck by our community of support when visiting his sister. "uLethbridge is unlike any other university; there is a stronger sense of community here because of the friendships you build and the professors you meet. I knew it would be a great experience."

Doyin was studying computer science when he discovered his passion for entrepreneurship. He added a second degree in general management to gain a broad-based understanding of business.

Eager to apply this knowledge and to make the most of his campus connections, Doyin started an entrepreneur club. He chose the name AN\$ (Abs and Money) Entrepreneurship Club because he believes an entrepreneur must be mentally, physically and financially fit to maintain the drive necessary to start a business.

The club is open to students in all programs and its goal is to teach students entrepreneurial skills, assist them in developing a network of connections and prepare them for life as entrepreneurs post-graduation.

"We bring in speakers and host workshops with people from different industries. Students also get practical experience by entering competitions such as the Chinook Entrepreneur Challenge as a club," says Doyin.

Although his role as president of the AN\$ Entrepreneurship Club and a challenging course load keeps Doyin on his toes, he is also an accomplished sprinter on the Pronghorns Track and Field team.

"I wanted to start a club that's truly about making a difference in people's lives. It's not just for University students, people in the community are welcome to join and participate as well. We have more than 300 members, pushing themselves and going further than they ever thought possible."

Bachelor of Management Student
Majors: Computer Science and
General Management

CLEAR YOUR HEAD, FILL YOUR MIND

ulethbridge.ca/future-student/doyin

At uLethbridge, our **students play a key role in the discoveries they learn about in the classroom.** By participating in the investigative journey, your learning goes beyond the theory to practical application.

As you participate in research, your creativity grows and your confidence to handle future academic challenges skyrockets. You gain critical thinking and communication skills that will help you in advanced studies or the workplace. You'll also have the opportunity to work with some of the world's most accomplished researchers.

Sydnee Calhoun (photo: left) and Luke Saville (photo: middle) are part of uLethbridge's celebrated iGEM (International Genetically Engineered Machine) team. iGEM is an annual synthetic biology competition involving teams of high school and post-secondary students from around the world.

"Typically, our iGEM team chooses its project based on something that will impact our local and global community, usually something that is either health or environment related," says Sydnee.

Students choose and carry out projects with faculty members' guidance. iGEM projects are transdisciplinary, combining areas such as biology, chemistry, computer science, marketing, mathematics, and social studies.

“Being part of the iGEM team is really a good complement to a liberal education,” says Luke. “You have everyone from sciences to fine arts contributing to a project. Since joining iGEM, I’ve definitely improved my presentation and computer skills, my ability to work in a team, and it’s really helped my communication skills.”

In 2018, the team developed a way to deliver small molecules to specific targeted cells.

This project has wide-ranging implications from pharmaceutical applications to fighting invasive aquatic species like Zebra and Quagga mussels, one of the biggest threats facing Alberta’s natural lake ecosystems and fisheries. Sydnee, Luke and other iGEM members presented their findings at the annual iGEM competition in Boston, MA, where their team captured a gold medal.

For their next project, Ulethbridge’s iGEM team is working on developing a form of insulin that could be taken orally, making it more affordable and easier to administer than injections.

TAKE YOUR EDUCATION OUTSIDE THE CLASSROOM

"It was an amazing experience to see the world and explore its diversity; I returned to uLethbridge with greater appreciation for global awareness. I look forward to applying my new discoveries to my future education and career."

Mackenzie Salmon (photo: right)
Bachelor of Science Student
Major: Kinesiology

Developing **life success doesn't only happen in the classroom.** At uLethbridge, inspiring opportunities can be found in unusual places. For three uLethbridge students, that meant taking to the high seas for a once-in-a-lifetime learning experience spanning three months and 11 countries.

Prachi Sanghavi, Amanda Sakundiak and Mackenzie Salmon (photo: left to right) took part in the Semester at Sea program, which lets students see the world, learn from leading faculty, earn academic credit, and engage in hands-on projects at each port.

The trio joined more than 450 other students from around the world (including five from Canada) on the MV World Odyssey, a 10-deck cruise ship with nine classrooms. Their journey took them to Germany, Spain, Ghana, South Africa, Mauritius, India, Myanmar, Vietnam, China, and Japan before ending in the U.S.A.

Amanda and Mackenzie took part as the first recipients of a Brawn Family Foundation scholarship, while Prachi covered her own expenses. It was a life-altering experience for each of them.

"The experience broadened my understanding of what we take for granted and allowed us to experience different ways of living, none of which are better or worse, but just different," says Amanda.

"People always ask what was my favourite country was and I always say I don't have one. I just had a lot of favourite moments and memories," added Prachi. "I saw the Taj Mahal and the Great Wall of China, but it was experiences like going to a small village in the Mekong Delta in Vietnam and getting to know the people, their traditions and values that I'll always remember."

ulethbridge.ca/future-student/sea

EXPERIENCE MATTERS

Get a head-start on the path to your future. **Gain first-hand experience, develop new skills and learn to apply your knowledge** so you are prepared for the world outside the classroom.

Experience Matters

Graduate with real-life skills and strong personal values for a fulfilling life and career.

The value of your post-secondary journey cannot be fully captured through a list of academic courses and grades. To fill this gap, uLethbridge is launching Experience Matters, a comprehensive database of activities you can use to track participation and highlight the skills gained during your degree. When you graduate, you'll have a record you can share with future employers. The activities included may take

place on- or off-campus and cover a variety of educational opportunities emphasizing research, creativity and innovation, community service, global citizenship, leadership, certifications and workshops.

Venture outside the classroom into workplace co-operative experiences, community volunteering, student leadership activities, study abroad, among others to develop 21st-century competencies (aka skills) and earn an official, uLethbridge-verified record of your high-impact experiences. Show employers what sets you apart.

Examples of activities included in Experience Matters are found below and on the next page:

Applied studies

Receive credit for learning gained through a volunteer or employment experience of your choice.

Co-operative education

The co-operative education program offers work experiences for EVERY major at both the undergraduate (CAFCE accredited) and graduate levels. We are the only university in Alberta to do this!

Local, regional, national or international work experiences are available in areas directly related to your degree. uLethbridge students have completed work terms at EA Games, the Canadian Space Agency, Environment Canada, Husky, the Smithsonian Museum in Washington and in areas related to environmental sustainability, Indigenous relations, research and development, to name a few.

More ways to enhance your university experience:

Be agile

Agility is a campus-wide opportunity open to all students. It encourages you to explore new ideas through hands-on experiences. Put your learning into action with Agility-sponsored courses, workshops and events.

You'll have access to resources like collaborative spaces, wall-to-wall white boards, a 3-D printer, reference books and other prototyping tools.

Agility collaborates with uLethbridge professors to bring far-out projects to life, like sending a balloon to the edge of space. Participate in unique learning experiences, from robotics to the future of food, inside and outside the classroom, allowing you to transform your imagination into reality.

Clubs and ULSU

The uLethbridge Students' Union (ULSU) has a seat at the decision-making table on campus as well as with the provincial government to advocate for current and future students. Also check out the many other student clubs and co-curricular activities to join.

Independent studies

If you have a passion to study a particular theme or topic but don't find a course offered in that area, you can develop your own research project with the professor of your choice. Independent studies are self-directed and your grade will be based on a major research paper or project.

Perform, produce and showcase

Whether you're performing on stage, showing your work at a gallery or producing a new album, students are part of the cultural fabric of southern Alberta and beyond.

All uLethbridge students can audition for a theatre production, sing in our choir or play with the University Wind Orchestra, Global Drums/Percussion Ensemble, Opera Workshop, Jazz Ensemble and more.

Practicums

Education students receive 27-weeks of off-campus practicum experience, teaching in multiple settings, such as elementary and secondary schools. That's more than twice the amount of time required for teacher certification in Alberta! You will leave your practicum confident and prepared for almost any classroom situation.

Preceptorships

To bridge the gap between the classroom and clinic, nursing students receive a 13-week clinical work experience under the guidance of an experienced registered nurse.

Study abroad and exchanges

Does heading to Australia, Germany, Japan, South Korea, Mexico, the United Kingdom or the United States interest you? uLethbridge has exchange programs, summer study tours and international internships letting you gain academic credit and see the world.

Think globally

We live in a global society with complex problems. The world needs people who think critically and act responsibly. Our Global Citizenship student cohort offers a unique opportunity for Arts & Science students to connect first-year courses around a common theme with a group of like-minded students.

If working with others to improve the world as global citizens appeals to you, join this small group of curious and motivated students and enjoy an enhanced first-year university experience.

Work with diverse populations

Students in the Faculty of Health Sciences have a number of opportunities to engage with communities locally and around the world.

In previous years, nursing students went to Uganda; addictions counselling students completed internships in Europe, Africa, Australia and the United States (at well-known clinics like the Betty Ford Center); and public health students worked with major organizations like Alberta Health Services and Diabetes Canada.

Our Global Health & Arts for Change Field Study in Malawi, Africa, is offered through the Faculties of Fine Arts and Health Sciences. Students conduct culturally relevant health-promotion activities that help fight malaria, tuberculosis and, HIV and AIDS.

Hess Donation

In 2017, the University of Lethbridge Art Gallery received an exceptional bequest of \$5 million from the Estate of the late Dr. Margaret (Marmie) Perkins Hess. The diverse collection of more than 1,000 pieces helps to tell a story of Canadian and International Art in the 20th Century. Students can work with this incredible collection through internships.

ulethbridge.ca/future-student/experience

CANADA'S MOST ADVANCED FACILITY FOR SCIENCE RESEARCH & EDUCATION

The Science Commons, the new science and academic building at the University of Lethbridge, is now open, and we're saving a seat just for you!

Here, you will work alongside faculty members and students from across disciplines as you tackle society's most perplexing issues together.

With open and flexible lab spaces, astronomers, biochemists, biological scientists, chemists, neuroscientists, physicists and psychologists will collaborate like never before, examining questions from different perspectives, shining new light on problems and possibilities, and discovering innovative solutions.

As a uLethbridge student, you'll work in state-of-the-art spaces and your learning will be supported by the tools, equipment and resources to help you thrive. With the help of faculty researchers, entrepreneurs and industry mentors, you'll be able to take your ideas and turn them into productive businesses.

This amazing facility is where discoveries of the future will take place — and you will help make them happen. Whether you want to be a researcher, innovator or leader, your bright future will ignite at uLethbridge.

The Science Commons is home to leading research centres and institutes recognized around the globe, including the Alberta RNA Research and Training Institute; the Alberta Terrestrial Imaging Centre; the Canadian Centre for Behavioural Neuroscience; Canadian Centre for Research in Advanced Fluorine Technologies; Institute for Space Imaging Science and the Southern Alberta Genome Sciences Centre.

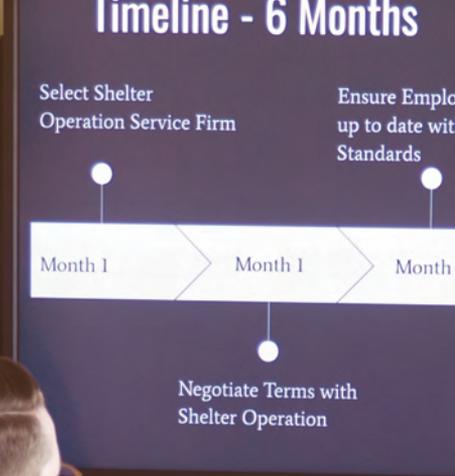

A scientist in a white lab coat and safety glasses is focused on adjusting a piece of laboratory equipment. He is wearing blue gloves and looking intently at the device. In the background, other people in lab coats are visible, suggesting a busy laboratory environment. The lighting is bright, highlighting the clean and professional setting.

"I'm excited for our students to take advantage of everything this remarkable facility has to offer — they are the scientific leaders of tomorrow and uLethbridge will equip them to successfully tackle future challenges."

Dr. Paul Hayes

Professor and Tier I Board of Governors
Research Chair in Organometallic Chemistry

uLethbridge is home to many extraordinary facilities. Read more on pages 44-45.

DHILLON

SCHOOL OF BUSINESS

At the Dhillon School of Business, our focus is on the future, particularly yours. That means whether you choose to study in Lethbridge or Calgary, we're committed to helping you develop skills for a rapidly changing world.

Here, the quality of your education is backed by our AACSB accreditation* and your experience will be marked by our personal approach built on active and experiential learning, professional development and exposure to emerging technology. Your experiences here will set you apart from others in the business landscape and push you to become an authentic business leader. Gain valuable business skills with these immersive experiential learning opportunities.

Student Professional Development

Designed to provide you with incredible personal and professional growth. You'll develop knowledge and skills through workshops on topics like emotional intelligence and Excel; attending business networking events; and participating in case competitions that let you apply theories learned in class to actual business problems.

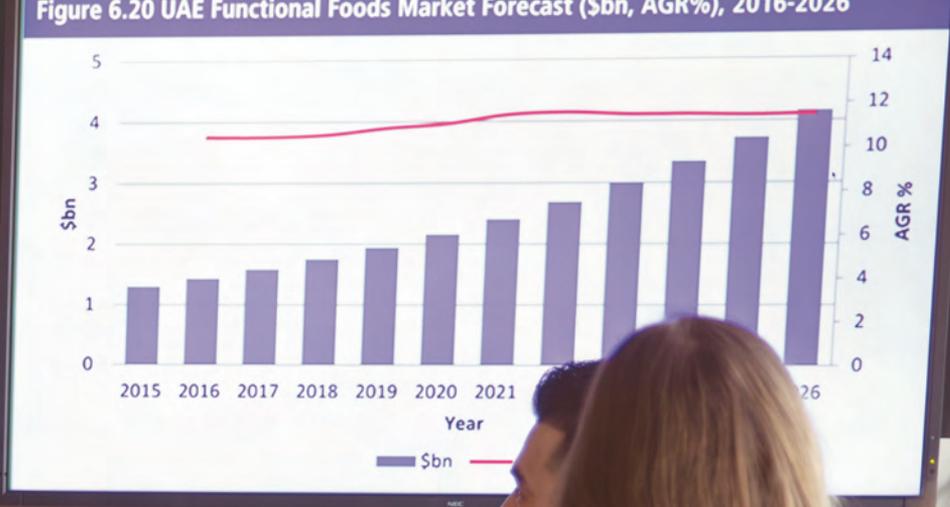

Student Managed Investment Fund

Gain hands-on experience managing an investment portfolio with access to over \$150,000 of real money.

You'll also have professional guidance and industry tools and technology available to you through our Lethbridge or Calgary Campus' Centre for Financial Market Research and Teaching, the best equipped academic trading centres in western Canada.

Co-operative Education

Try out possible careers and gain valuable work experience with paid local or national employment opportunities. You'll also have access to customized career development tools and assistance.

Experience is the Dhillon difference

Integrated Management Experience

Give back to the community while applying theories you've learned in the classroom. This cohort program gives you the chance to solve real business problems for a non-profit company in the community.

International Opportunities

Immerse yourself in an incredible adventure through work study programs in Hungary and Malaysia, or summer and full-semester exchanges at more than 46 partner universities worldwide.

Living and Learning Community

This exciting new offering provides students with a guaranteed bed in Housing (application and deadlines apply) and exclusive access to leadership development opportunities, guest speakers and networking events, academic advising, and other student activities — many taking place within the residences on campus.

*AACSB accreditation and why it matters to you

The Association to Advance Collegiate Schools of Business (AACSB) International is the world's largest

global business education network of which **only six per cent of the best business schools worldwide are accredited.** Students who graduate from an AACSB-accredited school are contenders for jobs from top, global organizations who only hire from AACSB-accredited schools, they are often offered more competitive salaries, they have a better chance of getting into graduate programs, and they have more employers interested in them after graduation.

(JUST A FEW)

SHINING STUDENTS

ulethbridge.ca/future-student/our-stories

When Carson Foggin came to uLethbridge, he wasn't sure what he wanted to do with his life. Four years later, the recent grad is charting a path towards a legal career.

"I chose uLethbridge because of its location, affordable tuition, and for the wide range of courses and programs," he says. "Because it's a smaller institution, professors here were better able assist me because they knew me and my goals."

Through his time in the Indigenous Studies program and volunteer work as a youth mentor, Carson became interested in legal issues around Indigenous rights and treaty negotiations, prompting him to become a lawyer.

As Carson heads to the University of Alberta for law school, he has this advice for new university students.

"I think many students begin their educational journey with their plans set in stone, which is fine. However, you may become passionate about something different than what you had originally anticipated so don't be scared to change your plans."

"uLethbridge gave me confidence that I could do well at whatever I studied. Being able to study and excel in different courses helped me realize that law school could be a reality for me."

Carson Foggin (BA '19)
Major: Indigenous Studies

"I've really appreciated being able to apply what I've learned in the classroom to my clinical practice."

Sydney Aos

Bachelor of Nursing
Student, Major: Nursing

When Sydney Aos decided to pursue a career in nursing, she knew where she wanted to go for her studies and why.

"I picked uLethbridge because it offered an amazing nursing program and great learning tools like the Simulation Health Centre labs."

Sydney says one of the main draws of the program is the opportunities to combine theory and practice, both in classroom and lab settings and through work experiences.

"The amount of clinical hours we get to experience helps to create better, and more experienced nurses."

Though earning her nursing degree is her immediate goal, Sydney says her future plans go beyond the nursing program.

"Many of my instructors have pushed me and taught me the importance of being a great nurse and given me the skills to do that," says Sydney. "They have also inspired me to set a goal to eventually get my master's degree."

Richard Lee-Thai

Bachelor of Music/Bachelor of Education
Student, Majors: Music/Music Education

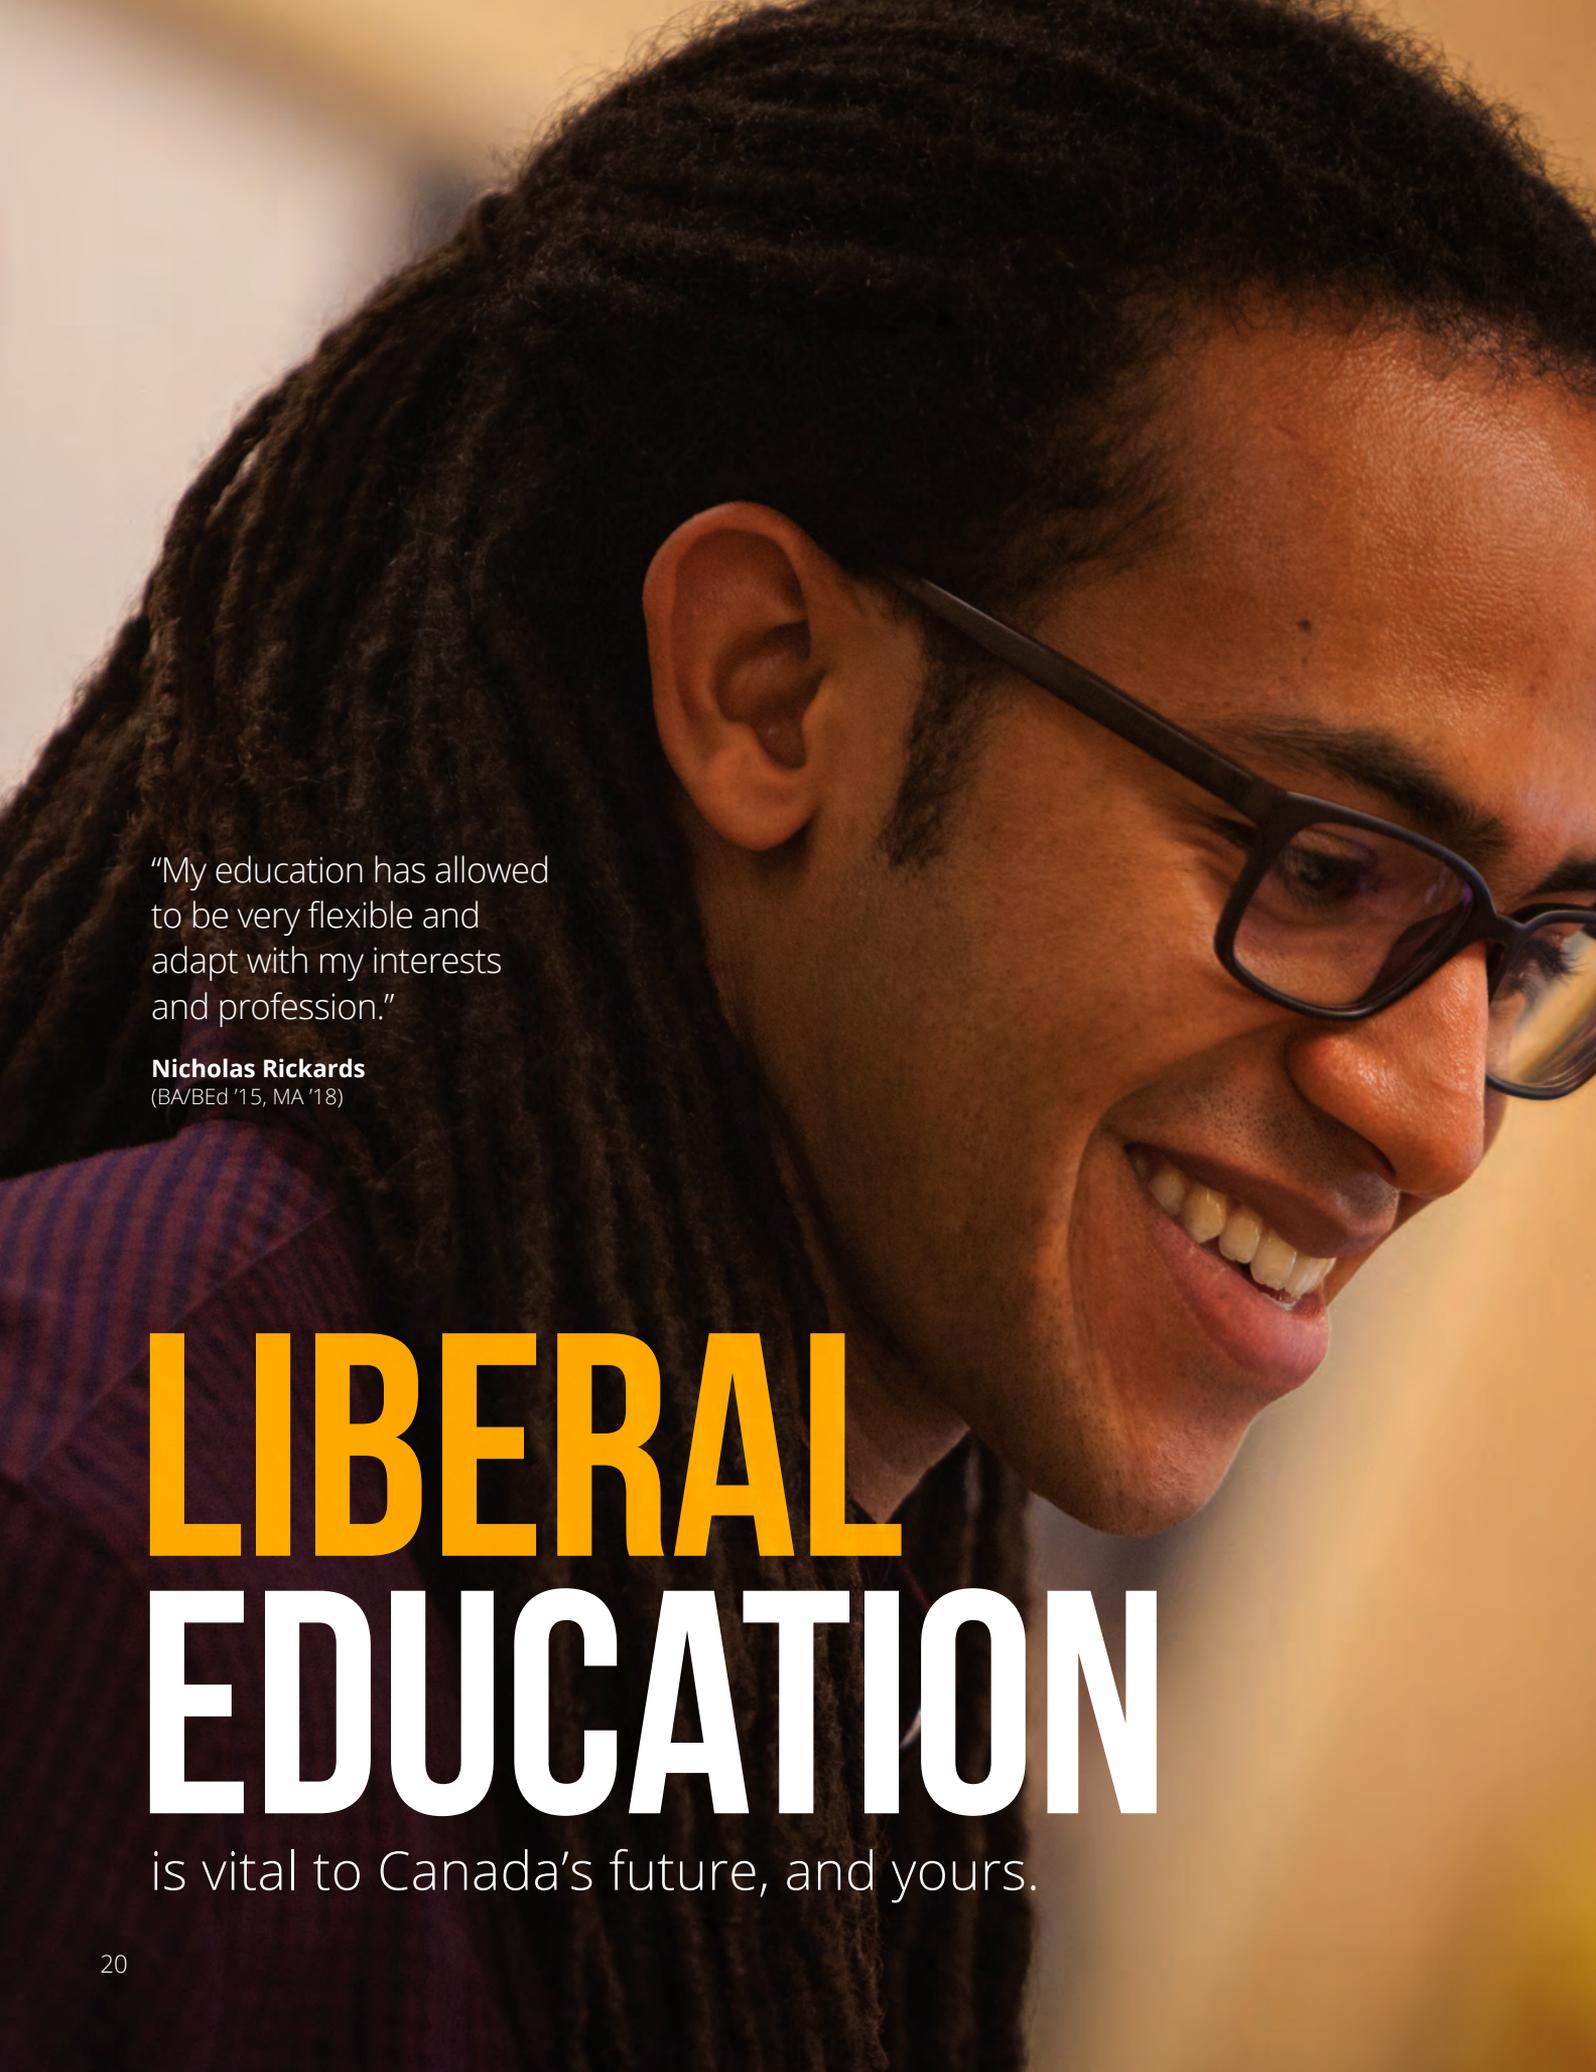

After Richard Lee-Thai came to uLethbridge to study music, he didn't just look for a community: he created one.

Richard founded Humans of ULeth, a social media storytelling/photo journalism project, in October 2018. Modelled after the popular blog *Humans of New York*, Humans of ULeth features portraits and short, candid stories of uLethbridge students, staff and faculty.

"I've always had an interest in photography and writing and I was trying to find how I could bring those skills and passion here. I started with people who I knew. The first person I interviewed was one of my music classmates and then my residence assistants and it's branched out from there."

The project has taken on a life of its own with hundreds of followers on Facebook and Instagram and a growing team behind it.

"A big thing for next year is we want to bring our digital platform into the physical world and host some community building events. That's what we're trying to do with this project: promote human connection through storytelling."

"My education has allowed
to be very flexible and
adapt with my interests
and profession."

Nicholas Rickards
(BA/BEd '15, MA '18)

LIBERAL EDUCATION

is vital to Canada's future, and yours.

Half of Canadian jobs will require a major skills shift in the next 10 years as technological advancements change the way we work.* The ability to communicate, solve problems, think critically and collaborate will enable you to navigate a rapidly changing labour market.

“As we have seen in the last decade, it is very important that graduates are able to adapt to changing economies, as well as a change in personal interest,” says recent uLethbridge graduate Nicholas Rickards. “With a liberal education, your program is diversified and you gain great skills applicable to any profession. It also enables you to become an engaged and critical-thinking student and citizen.”

A middle school teacher in Lethbridge, Nicholas has combined his passions — working with young people and writing. He went on to complete a Master of Arts at uLethbridge and is currently writing a chapter for a book. “It has all come together really well and I am excited to see where it takes me!”

Dinah Davis (BSc '02)

Vice-President (Research and Development) Arctic Wolf Networks; Founder, codelikeagirl.io

“I always loved mathematics and problem solving. It would have been very easy for me to go to a non-liberal education school and only take math and computing courses with nothing else in the mix. However, I don't think I would have been nearly as successful as I am today. Not only did uLethbridge expose me to many different ideas and ways of seeing the world, it also put me in contact with many people outside my discipline. This made me a more empathetic person who can relate to many types of people, not just the logical thinkers of the world. I think this above all things has given me an edge in the technology industry.”

After graduating from uLethbridge, Dinah continued her education by completing a Master of Mathematics Degree in Cryptography, the practice of secure digital communication. She is currently the vice-president of research and development at Arctic Wolf Networks, a cyber security start-up. In addition to her professional responsibilities, she is a passionate advocate for young women in technology-related fields and founded codelikeagirl.io to actively empower women to become leaders in the industry.

How can a liberal education help you?

It's what employers want

According to a study of Canada's largest employers, when evaluating entry-level hires employers value soft skills over technical knowledge. The soft skills most often listed as desirable by employers include relationship-building, communication and problem-solving skills, analytical and leadership abilities — attributes developed and honed through studies in the social sciences and humanities.

Business Council of Canada and Aon Hewitt, Developing Canada's future workforce: A survey of large private-sector employers, 2016 (Universities Canada)

It's what 55% of the world's professional leaders have

The social sciences and humanities together make up more than half of bachelor's degrees among current professional leaders with higher education qualifications, across 30 countries and all sectors. Younger leaders (under 45 years of age) are more likely to hold a degree in social sciences or the humanities.

British Council, Educational Pathways of Leaders: An international comparison, 2015 (Universities Canada)

OKI! WELCOME TO SACRED BUFFALO STONE

uLethbridge pays respect to the Blackfoot people — past, present and future — while recognizing and honouring their rich cultural heritage, beliefs and relationship to the land. Our Blackfoot name is Iniskim, meaning Sacred Buffalo Stone, and was gifted to the University by Elder Bruce Wolf Child in 2002.

Since we opened our doors in 1967, Indigenous culture has been woven into the fabric of the University, enriching programming, teaching and research, and creating a university where students find community, support and success.

Home to one of the first Indigenous Studies departments in Canada, uLethbridge is committed to including First Nations, Métis and Inuit peoples in our plans and actions. We are revitalizing our curriculum and

are pleased to offer Indigenous-focused majors in every area of study.

The First Nations, Métis and Inuit Students' Association is one of the longest-serving student clubs at uLethbridge. It is made up of primarily Indigenous students, with a small group of non-Indigenous members, as well.

Students interact with members from across Canada, including chiefs, business people, elders and more. We also have the Tatsikiistamik Student Lounge where Indigenous students can gather and socialize, meet other students or study.

We offer a variety of services for Indigenous students including more than 20 Smudge Rooms on campus, elders, enrolment advising, Indigenous mentors, and the Ikaisskini Indigenous Gathering Place.

INNOVATIVE OFFERINGS

Combined Degrees

Combined degrees programs at uLethbridge give you the opportunity to graduate with two degrees in less time than it would for you to take them separately.

You will get a strong foundation of knowledge and skills in two areas, gaining an advantage in a competitive job market. To be admitted to a combined degrees program, you must meet the minimum requirements of both programs.

Double Majors

Students taking a Bachelor of Arts, Bachelor of Science or Bachelor of Management can request to add a second major within their current program. Double majors let students expand their knowledge base in two different but complementary areas. To add a second major, students must complete the minimum requirements for both majors and both majors need to be within the same degree. Interested students are encouraged to consult with their academic advisors for more information.

Early Start

Through Early Start, students enrolled in a Bachelor of Arts or Bachelor of Science program can take a liberal education course for credit before the start of the Fall 2020 term. It promotes success and eases the transition from high school to university, while giving you credit towards your degree. Get to know the Lethbridge Campus, meet fellow students and your professors, and familiarize yourself with the resources we offer.

Experience Matters

Experience Matters is a comprehensive database that tracks your curricular (your courses), co-curricular (learning experiences that complement your course work) and extra-curricular (activities unrelated to your course work) experiential learning opportunities. When you graduate, you will have a uLethbridge-verified record of your activities.

You'll also learn to articulate the value and impact of your experiences to future employers and highlight the range of skills developed during your degree.

Living and Learning Communities

This exciting opportunity provides students enrolled in a Bachelor of Fine Arts or Music program, or a Bachelor of Management program with a guaranteed bed in Housing (general Housing application and deadlines apply) and exclusive access to leadership development opportunities, guest speakers, networking events, academic advising, and other student activities — many taking place within residences on campus.

Living in residence also gives you a smooth transition to university. You have a built-in community to enhance academic performance and social success; you'll make friends, find study partners, develop resilience and fine-tune your interpersonal skills.

New! BFA New Media/ BSc Computer Science

Starting Fall 2020, uLethbridge will offer a Bachelor of Fine Arts - New Media/Bachelor of Science with a major in Computer Science. This combined degrees program will allow you to complete two degrees in less time than it would take to take each of them separately.

Learn to tackle difficult problems using a variety of high-tech tools and technical know-how. A solid grounding in liberal education means you will be able to translate your solutions for people of differing technical abilities. By the time you graduate, you'll have the creative, critical and technical skills necessary to manage emerging technologies in a wide range of workplaces.

¹ Saskatchewan: Fransakois/Immersion students may use one of Français Fransakois A30 or B30 or Français Immersion in combination with either one of the English Language Arts courses. While either of Pre-Calculus 30 or Foundations of Mathematics 30 may be used as an academic course for admission, Pre-Calculus 30 is required as a

prerequisite for courses in certain programs.

² Only one course in a particular language will be used for admission purposes, e.g., in Alberta, only one of French Language Arts 30-1 or French as a Second Language 30-3Y will be used.

³ World Geography CGU4U or Canadian and World Issues CGW4U; History Identity & Culture CHI4U or The West & the World CHY4U; Law CLN4U; Canadian & World Politics CPW4U; Aboriginal Issues in Global Context NDW4M or Aboriginal Gov. Emerging Direc NDG4M.

The following are the general admission requirements for applicants presenting credentials from Canadian high schools. Your published (final) Grade 11 grades will be used to determine conditional admission to uLethbridge. Final Grade 12 grades will be reviewed and must meet admission requirements prior to the appropriate document deadlines. To ensure success in academic study, all applicants, regardless of citizenship or country of origin, must meet the English language proficiency (ELP) requirements through recognized study or a valid standardized test score.

⁴ Any distinct Fine Arts subject can be used as an approved course.

For information about additional admission pathways including First Nations' Transition Program, Mature Students, and International Students, please contact our Admissions office. Individual programs may have additional requirements or higher standards. For details visit: ulethbridge.ca/ross/admissions/program-availability.

POST-SECONDARY STUDENTS

For admission to the University of Lethbridge as a post-secondary student, most programs require an admission grade point average (GPA)* of at least 2.0 on our 4.0 scale, although some programs may be competitive.

Depending on the number of transferable courses you have completed, we may also review your high school transcripts when considering your application for admission.

Individual courses may transfer as unspecified credit. Academic advisors can help determine how the credit can be applied to your specific program of study.

Students interested in transferring to uLethbridge should keep as much material from their courses as possible. Course outlines, textbook names and editions, and class notes could all be requested for the transfer credit assessment. For more information, please visit the transfer equivalencies database at:

ulethbridge.ca/ross/admissions/undergrad/transfer-credit

Contact Admissions at 403-382-7134 or admissions@uleth.ca.

As a comprehensive university, uLethbridge offers a number of programs at the graduate level. If you are interested in learning more about our School of Graduate Studies, visit:

ulethbridge.ca/graduate-studies

* GPA: Diploma GPA for diploma holders, Degree GPA for degree holders, or all transferable courses for other transfer applicants.

Number of Transferable Courses	High School Transcript Required	Min. Average Required	Transferable Courses – GPA Required	Min. GPA Required*
1-5	Yes	65%	Yes	2.0
6+	Yes	N/A	Yes	2.0

** Your high school marks are not used to determine your admission GPA, but may be necessary for prerequisite purposes. If you are not sure whether six of your courses will transfer, you should also arrange for your high school transcript to be sent to Admissions.

INFORMATION FOR POST-DIPLOMA STUDENTS

Post-diploma programs are designed to build on the foundation you obtained through your approved diploma program and give you core academic skills in that subject. Post-diploma degrees are typically 20 courses in length and consist of selected upper-year courses in your subject area, as well as courses to meet the liberal education requirements. Find out if your diploma matches to a post-diploma program at uLethbridge by visiting ulethbridge.ca/postdiploma.

Some programs may be competitive or have additional admission requirements. If you think your program may be eligible to link up with a uLethbridge degree, but you do not see your diploma on the list, please contact Admissions at admissions@uleth.ca.

ADDITIONAL REQUIREMENTS

Many of our programs have additional admission requirements that need to be met before you start your degree. To see if your program of interest has additional admission requirements, please visit: ulethbridge.ca/ross/admissions/undergrad/additional-admission-requirements

Our recruitment team would be happy to help you navigate our programs, admission requirements and answer all of your questions about uLethbridge! To set up an appointment in-person, via Skype or FaceTime, or by phone, contact inquiries@uleth.ca or 403-329-2762.

ADVANCED PLACEMENT (AP) AND INTERNATIONAL BACCALAUREATE (IB)

Applicants who have credit through either an AP or IB program should review the uLethbridge Transfer Credit Database for up-to-date information. ulethbridge.ca/ross/admissions/undergrad/transfer-credit

SOME THINGS TO KNOW:

- Our **education program** is one of the leading programs in the country. You'll receive 27- weeks of off-campus practicum experience, teaching in multiple settings, such as elementary AND secondary schools (unique to uLethbridge). Your professors are teachers who have all taught in K-12 classrooms and balance theory with practice.
- Our **digital audio arts** major, the most comprehensive degree program of its kind in Western Canada, combines academic courses and a classical music conservatory with experiences in audio engineering, music production and sonic arts.
- The **addictions counselling** program is the only baccalaureate program of its kind in Canada.
- The **Dhillon School of Business** has received Chartered Professional in Human Resources (CPHR) accreditation for the Bachelor of Management in Human Resources Management and Labour Relations program. The CPHR designation is the only designation recognized by nine provinces across Canada and is aligned with the United States' Society for Human Resource Management — the largest HR organization in the world.
- Our innovative **Aboriginal health** program examines the factors that contribute to Indigenous health, strength and resilience in Canada. Students develop their skills in a community setting by engaging in a practicum in partnership with rural and urban Indigenous communities.

ADDITIONAL ADMISSION ROUTES

The First Nations' Transition Program (FNTTP)

The First Nations' Transition Program (FNTTP) is a first-year credit program providing Indigenous students who don't meet the general entrance requirements of uLethbridge an opportunity to find success at university. The FNTTP provides core skills in a supportive environment attending to Indigenous ways of knowing and learning. It is also open to Indigenous students returning to university after an absence and, as space allows, to those who qualify for general admission but want the supports provided by the group. Successful completion of the FNTTP allows you to enter into most uLethbridge programs. This is a full-time university program that may qualify for loans and other sources of funding.

This eight-month (two-term), first-year experience program runs from September to April. It provides a strong foundation of courses that can be credited to the majority of programs at uLethbridge. The deadline to apply to the FNTTP is August 31.

ulethbridge.ca/future-student/first-nations-transition-program

Mature Student Admission

Mature student admission may be available to applicants who are 21-years of age or older and who do not meet our general admission standards. Life achievement may be considered if it has provided you with skills relevant to university success.

ulethbridge.ca/future-student/mature-student

International Students

uLethbridge is home to more than 800+ international students from over 100 countries.

For the most part, applicants who have completed secondary qualifications in other countries will be considered for admission under the high school admission route. However, visit our website for requirements specific to your country.

ulethbridge.ca/ross/admission-information/intl/intreq

Non-native English speakers need to pass an English-language proficiency test or take English for Academic Purposes (EAP) before they can enroll in classes. Learn more at: **ulethbridge.ca/ross/admissions/elr**

The application deadline for international students is May 15 and a study permit is required.

We are here to help you adapt to campus life socially, academically and culturally.

ulethbridge.ca/future-student/international-requirements

Dual Admission

Dual admission agreements with the College of the Rockies and Medicine Hat College mean students can easily transfer to uLethbridge. Students are admitted to uLethbridge while still attending college, and benefit from continuing student registration privileges, certainty regarding program requirements, transferability of courses and access to uLethbridge student services.

ulethbridge.ca/ross/admissions/undergrad/dual-admission

CAL CAM

“Online, evening and weekend courses fit perfectly with my schedule and allowed me to be closer to my family and friends as I finished my education. The smaller class sizes provide the opportunity for rich discussions and strong relationships to form.”

Stephanie Nash

Bachelor of Health Sciences After Degree Student, Major: Public Health

**Calgary Campus Access Award
Value: \$1,000**

This award is available to the first 100 students offered admission for Fall 2020 at our Calgary Campus. Minimum admission average and enrolment in part- or full-time studies is required.

GARY IPUS

Evening and weekend classes

Keep your weekdays free to work or take care of business.

Connecting the University of Lethbridge with Calgary's East Village and the downtown core, the Calgary Campus offers flexible programs developed with the working professional in mind. Our space and delivery methods are designed for maximum flexibility with your personal schedule.

If you are looking to upgrade your skill set and credentials to advance your career, our uLethbridge Calgary Campus is well-suited for the working adult. We know your life is complicated; you need a comprehensive learning experience to up-skill as quickly as possible and improve your job prospects. We offer face-to-face instruction evening and weekends, and have some courses offered exclusively online.

For a current list of programs available on our Calgary Campus, visit our website.

ulethbridge.ca/future-student/calgary

Admission Routes

As its delivery methods and student supports are more suited to the adult learner, our Calgary Campus does not provide a typical university experience. Students who are looking to apply directly from high school should explore opportunities on our Lethbridge Campus.

Post-Diploma

If you have a business- or health-related college diploma, you can earn a bachelor's degree in as little as two years. If you have an academic diploma in a non-business field, you may be able to complete a Bachelor of Management (BMgt) in as few as 25 courses, or a Bachelor of Health Sciences (BHSc) in as few as 20 courses.

Transfer

If you've completed at least eight transferable courses, talk to us about transferring your credits toward a uLethbridge degree.

Second Degree

Already have a degree? You may be able to complete a BMgt degree in as few as 15 courses.

Open Studies

Current uLethbridge students and the general public can take courses on our Calgary Campus in a selection of subjects including fine arts, humanities, management, sciences and social sciences.

Student Supports

Students at our Calgary Campus have access to services including academic advisors who can help you plan your program and provide advice on changing your major; enrolment advising to help you explore your interests and choose a major; study skills presentations; and learning supports such as exam accommodations and assistive technologies.

University of Lethbridge Calgary Campus

Suite S6032, 345 - 6th Avenue SE

calgary.campus@uleth.ca

YOUR FUTURE IS IN YOUR HANDS!

Academic Advising

Assists with course selection, program planning and program changes as well as registration for courses not offered via online registration. Each Faculty has its own academic advisors. Future and first-year students can arrange enrolment advising appointments through Enrolment Services.

Accommodated Learning Centre

Provides individual learning plans, exam accommodations, assistive technologies, alternate format textbooks and funding assistance as well as personalized supports.

Counselling and Career Services

Offers no-cost counselling in two areas: career development and personal growth. Our career development team empowers students and alumni in their career decision-making by providing one-on-one career advising, events and resources. Individual counselling is confidential and can help students with a variety of personal issues from adjusting to university life, anxiety, relationship issues and more.

Indigenous Mentors Program

Funded through a generous donation from Scotiabank, we offer two types of mentoring: youth and alumni. One pairs a current uLethbridge Indigenous student with an Indigenous youth from the local community where participants spend time engaging in social activities. The other pairs a current uLethbridge Indigenous student with an Indigenous alum who offers guidance and support.

Ilikaisskini Indigenous Gathering Place

Students who self-identify as First Nations, Métis or Inuit at uLethbridge receive guidance, encouragement and support in the transition to university life and beyond.

Health Centre

Provides convenient access to quality health care on campus. Whether you are from the Lethbridge area or are moving to attend uLethbridge, you won't need to worry about finding a doctor while on campus. The Health Centre provides a wide range of services including illness or injury treatment and health exams as well as mental health supports. Our diverse team includes physicians, psychiatrists, nurses, behaviourists, dietitian and administrative staff.

International Centre

All uLethbridge students can participate in international experiences and opportunities including study abroad and exchanges, summer study tours and international internships. International students receive support in all aspects of campus life as uLethbridge students and visitors to our country.

Registrar's Office

This is the centre of your academic journey on campus. The Registrar's Office serves students in a number of ways including: admissions, course registration, timetabling, student records, academic calendar, program planning guides, transcripts and more.

Scholarships and Student Finance

Whether it's through awards, bursaries, funding consultations, advice on budgeting, scholarships or student loans, our office is open to support the financial side of your education.

Student Mentors

Student mentors are uLethbridge students who provide guidance and support to new students as they transition to university life. Every new student is assigned a mentor who communicates via Mentor Mail and personal emails.

Tutoring and Learning Strategies

Whether you need a little help with a particular course or just want some tips and tricks to make studying more efficient, we provide peer-run group tutoring and learning strategies to help you make the grade.

Writing Centre

Provides practical writing support that supplements in-class instruction and helps you understand a wide variety of writing assignments. This is a free service for uLethbridge students.

Visit our website for a comprehensive list of our student support services.

ulethbridge.ca/student-support-services

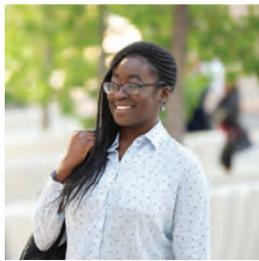

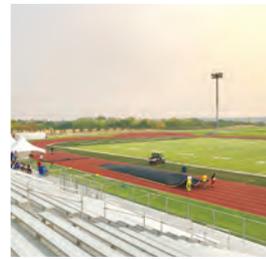

We're ranked #3 in student services!

Maclean's University Rankings, 2019

From faculty to staff, administration, alumni, Board and Senate members: we are all here to support your success.

#ULETH

Things to know:

School Motto:

Fiat Lux, Latin, meaning Let There Be Light

School Colours:

blue and gold

uLethbridge's Blackfoot name:

Iniskim, meaning Sacred Buffalo Stone

Mascot:

Luxie the Pronghorn, the fastest land mammal in the Western Hemisphere

School Tradition: stroke the pronghorn statue outside the University Library for good luck before exams

Established: 1967

SHINE:

It's a glowing passion for work and for play. It's the spark of creativity and discovery, and the burning desire to do. It's constantly raising the bar.

It's what we do, each and every day.

STUD

EVENT LIFE

With student club events, fine arts productions, cultural celebrations, athletic activities and just hanging out with friends, campus is bustling all year long.

Stay fit, have fun!

We have many opportunities for students to take part in recreational activities like curling, fencing, karate, fitness classes and wellness programs. There are also several intramural programs to choose from, including favourites like dodge ball, floor hockey and Ultimate Frisbee.

Prairie Baseball Academy (PBA)

With a partnership that's nearly 30-years strong, we are proud to be associated with one of the best baseball academies in Canada. The PBA attracts players from across Canada. Learn more about the PBA at prairiebaseball.ca

University of Lethbridge Students' Union (ULSU)

The uLethbridge Students' Union is your voice at the University and at all levels of government. It also provides student health and dental plans in addition to organizing some of the best events of the year — cabarets and karaoke at the Zoo (our campus pub), Fresh Fest and various awareness weeks to name a few! Any student can run for an executive or representative position. Learn more at ulsu.ca

Student clubs

Whether dance, business, model UN, Greek life (fraternities and sororities) or other interests, student clubs are the best way to get involved and have fun outside of class hours. There are nearly 100 student clubs on campus that provide social and athletic activities, travel, religious fellowship, and charitable and cultural support. If the club you want doesn't exist, it's easy to start one! clubs.ulsu.ca

UVolunteer

UVolunteer is a partnership between the University of Lethbridge and Volunteer Lethbridge. There are many ways to be involved; apply as a volunteer, choose your placements and record your volunteer hours. You can also take an applied study and gain course credit while volunteering with an organization. Your activities may also be included in Experience Matters (page 12). Imagine the possibilities!

volunteerlethbridge.com/uvolunteer

Welcome to **PRONGHORN CO**

Strong, swift and enduring — the spirit of the pronghorn is legendary. It's a spirit that lives within us all.

Whether competing on the court, in the boardroom, on the ice or in the laboratory, uLethbridge students proudly wear our blue and gold.

Pronghorn Varsity Teams

Basketball (men's and women's teams)

Hockey (men's and women's teams)

Rugby (women's team)

Soccer (men's and women's teams)

Swimming (combined team)

Track and field (combined team)

Competitive Clubs

Golf (men's and women's teams)

Ringette (women's team)

Curling (men's and women's teams)

Field Lacrosse (men's team)

Coaches recruit the majority of Pronghorn student athletes prior to the start of the season. However, each varsity team will hold an open try-out in the weeks leading up to their season. Visit gohorns.ca to see the schedule and to get in contact with a Pronghorn coach.

The Herd

Show your Pronghorn pride. Join the Herd, a student-led spirit squad that passionately supports our teams throughout the year. Meet new people, gain free admission to every Pronghorns game and cheer on our teams. Go Horns!

ulethbridge.ca/future-student/athletics

COUNTRY

OUR CITY

Alberta

Edmonton

Calgary

Lethbridge

A group of four young women are gathered in a city setting. One woman on the left is standing and talking on a mobile phone while holding a coffee cup. Two women are sitting on a low wall in the foreground, also holding coffee cups and smiling. A fourth woman stands on the right, wearing glasses and a cardigan, holding a coffee cup. In the background, there is a large tree, a blue car, and a rack of many bicycles. The scene is brightly lit, suggesting a sunny day.

Lethbridge is a city best known for its bright sunshine and warm, windy days.

But we're also a growing community of more than 100,000 people with a vibrant arts and culture scene, world-class sports and recreation facilities, and spectacular scenery. Indoors or outdoors, on campus and off, you'll find plenty of things to do in Lethbridge.

Walk or run the coulee trails into the Oldman River valley under the shadow of the iconic High Level Bridge. Visit downtown for one of the many festivals that take place in Galt Gardens, hit an art opening at the Southern

Alberta Art Gallery, check out a band, or grab a coffee with friends. Take in a blockbuster movie or an arthouse film. Cheer on the Pronghorns, the Hurricanes or the Bulls, or join one of the many recreational sports leagues in town, like the Lethbridge Curling Club at the new ATB Centre.

Here, where the Rocky Mountains meet the prairies, you'll find a close-knit but welcoming community where ideas flourish under the big Alberta sky.

STUDENT HOUSING

HOME SWEET HOME

Welcome to your home away from home. We believe residence is about more than accommodation: it's about building community, sharing experiences and having fun — essential in helping to ensure a smooth transition to university.

Living in residence is a great option, especially during your first year*. Studies show that students who live on campus are more likely to have a successful academic experience. Why? In a word, access.

As a resident, your home is steps away from social, exercise and recreational spaces, classes, professors' offices, student services, study spaces, and academic programming.

You have a built-in community that enhances academic performance and social success. You'll make lifelong friends, find study partners and fine-tune your interpersonal skills.

Residents belong to the largest student club on campus, the Organization of Residence Students (ORS). Each section in residence has residence assistants (RAs) who build community by coordinating fun social events (think Residence Wars), educational opportunities and everyday interactions like section dinners and hanging out in the common room. They also uphold the community standards, can assist with roommate disagreements and will connect you with the many services the University has to offer.

Our RAs are trained in emergency response, mental health first aid, and standard first aid, not because you'll need it, but because we like to be prepared.

Campus Safety

We take security very seriously. We have Closed-Circuit Television in public areas; residence is regularly patrolled by Security Services; we offer services like Safe Walk (where a safety team member accompanies you to and from anywhere on campus) and personalized electronic key fobs, so only you have access to your room. We also offer a Working Alone Web System (allows you to log in and make Security Services aware of your location when working alone on campus); and a key-tag service in case you lose your keys on or off campus.

What's in a name?

To honour our relationships with local First Nation communities, the early student housing developments at uLethbridge are named after some of the signatories of Treaty 7, signed September 22, 1877. The communities are Kainai, Piikani, Siksika and Tsuu T'ina.

**While all students are welcome to apply, priority for on-campus housing is given to non-local students.*

ulethbridge.ca/future-student/housing

MONEY MATTERS

Apply for On-Campus Housing

Apply early since residence is not guaranteed and is in high demand. Applications open September 15, 2019. You can apply for residence after you have applied to uLethbridge and received your student identification number. To apply, visit ulethbridge.ca/housing

All our residence accommodations are fully furnished, so expect to find a bed (with storage space beneath), a desk and a place to hang your clothes. Wireless internet and all utilities are included. Residence facilities also include study rooms and social spaces.

You are considered a New University student if you:

- enter straight from high school, or
- take less than one year off following high school

Apply online to stay in the traditional-style dorms in University Hall (UHall), or one-, two-, four-, or six-bedroom apartments in Aperture Park.

You are considered a Transfer or Mature student if you:

- enter after studying at another post-secondary institution, or
- take two or more years off following high school

You can apply online to live in a studio or four-bedroom apartments in Mount Blakiston House or the two- or four-bedroom townhomes in Siksika House, Tsuu T'ina House and Sarcee Residence Village.

Approved 2019/20 fees (per term):

New University student

- Traditional: \$1,644 – \$2,900
- Apartment: \$2,908 – \$4,724

Transfer and Mature student

- Apartment/townhome (furnished): \$2,908– \$4,796

ulethbridge.ca/housing/room-rates

Dining Plans

We understand that this is a transition year and may be the first time you are living away from home. With a dining plan, your transition to university is likely to be smoother as you have access to nutritious meals with

minimal effort. Plus, you won't have to worry about grocery shopping, cooking every meal or doing dishes!

New University students living in residence are required to purchase a minimum Commuter dining plan.

Approved 2019/20 dining plans (per academic year):

- Sampler: \$1,820
- Commuter: \$3,665 (New University student option)
- Standard: \$4,245 (New University student option)

Big eater? Consider one of the larger options and know you can add money at any point throughout the year. Like to cook? Consider one of the smaller options as there are shared kitchen spaces in the dorms and full kitchens in the apartments where you can prepare some food yourself.

Not a first-year student? Even though all of our apartments and townhomes include a full kitchen, if you're not interested in doing the shopping, cooking and dishes, purchase a dining plan!

UPass

UPass gives undergraduate students enrolled at uLethbridge unlimited access to local transit during each term they are registered for classes. It is an environmentally friendly, cost-effective and safe way to navigate Lethbridge.

Resident Parking

Resident parking permits are in very high demand and sell out quickly. The Online Check-In System is the best way to obtain a resident parking permit. These permits are allocated on a first-come, first-served basis prior to the fall term. If you require a parking pass, plan to purchase online via the Online Check-In System. Once the system is closed, you should plan to purchase a pass via Campus Mobility Services as they are available. Students have the option of purchasing yearly and eight-month permits, with eight-month permits being the most popular. There is short-term parking in various lots on campus at pay-and-park dispensers.

Students living in residence who have a vehicle must purchase a resident parking pass.

Off-Campus Housing

One of the benefits of living in a city divided by a river is that the entire west side, where uLethbridge is located, features extensive off-campus housing close to campus. Since the majority of our students live on the west side, it's practically an extension of residence. When you're out and about, you're bound to run into other students (or even your professors) at local grocery stores, restaurants or parks.

The University of Lethbridge provides a list of off-campus housing to assist students in finding accommodations. Visit our website for more information about rental listings available around Lethbridge. ulethbridge.ca/future-student/living-off-campus

Educational Costs

These amounts are based on a typical course load for one year — five classes per semester or 10 courses over the academic year.

	Canadian Students	International Students
Tuition and Fees	\$5,838 (2019/20) ¹	\$18,743 (2019/20) ¹
Health and Dental	\$279 ²	\$279 ²
UPass	\$164 ³	\$164 ³
Books and Supplies	\$1,250 (\$125 per course)	\$1,250 (\$125 per course)
Total	\$7,449	\$20,354

¹ Costs are subject to change. ² Refundable with proof of health insurance; otherwise fee is mandatory. ³ Fee is mandatory unless you meet one of the conditions of opting out. UPass total is for both fall and spring terms.

Loans and Grants

Funding for Canadian students is also available in the form of student loans and grants. Both the federal and provincial governments offer financial aid to students who qualify. Your government loan remains interest-free as long as you remain a full-time student.

Banks and other private financial institutions also lend money to help students fund their education. Contact our Scholarships & Student Finance staff at fin.aid@uleth.ca for more info, or contact your bank for further information on private student loans.

Apply for Scholarships

Ensure you apply for as many scholarships as possible! uLethbridge has hundreds of awards, scholarships and bursaries available with many different criteria. Don't count yourself out! Visit page 42 for more information.

Hundreds of scholarships, awards and bursaries are handed out to new and continuing students every year.

Last year, **45% of new high school grads received a financial award averaging \$1,800.**

Grade 11 Year

June 30: Grade 11 Merit Award

\$800 for average of 80% or higher in Grade 11
\$500 for average of 75-79.9% in Grade 11

Note: Five Grade 11 courses are used to determine the award average and will follow the same formula as general admission (English 20-1, three academics and a fifth distinct course)

**Online award application must be submitted in your Grade 11 year.*

Grade 12 Year

December 15: Board of Governors' Admission Scholarship

Admission: \$1,000 for actual admission average of 80% or higher. Completed application for admission required by December 15 to be considered.**

March 15: High School Entrance and Leadership Awards

Up to \$6,000 awarded to qualifying students

**Online awards application required.*

Post-Secondary Transfer Awards

June 15: Transfer Awards

Up to \$1,500 awarded to qualifying new transfer students (includes post-diploma applicants) based on various criteria. **Online award application required.*

- canlearn.ca
- higheredpoints.com
- studentaid.alberta.ca
- scholarshipscanada.com
- univcan.ca
- yconic.com

Awards for Indigenous Students*

Value: \$250 - \$5,000

More than 20 awards are available specifically for Indigenous students. These are granted primarily on academic achievement although other criteria may also be considered. Eligibility may vary based on the program, year of study or Indigenous heritage. **Online award application required.*

ulethbridge.ca/ross/student-finance/fnmi-awards

**All awards applications must be completed/submitted through the Bridge. Use your student log in at bridge.uleth.ca*

***Board of Governors' scholarship rewards applicants new to post-secondary (attending directly from high school or who have not attended any other post-secondary institutions before applying to uLethbridge) who apply early. These awards can be combined with uLethbridge High School Entrance and Leadership Scholarships and the Grade 11 Merit Award. Remember to apply early to maximize the value of your scholarships.*

“Because of scholarships, I can continue to excel in school as I work toward a future medical degree and toward my dream of becoming a Team Canada hammer thrower. I also have time to give back to my community without having to stress about finances.”

Madeline Szabo

Bachelor of Science Student
Major: Neuroscience

SCHOLARSHIPS

ulethbridge.ca/future-student/awards

The Science Commons, the newest facility at uLethbridge, adds state-of-the-art learning and research spaces to campus. Learn more on page 14.

Where you learn shapes how you learn. Whatever your program, our world-class facilities will inspire you.

OUR FACILITIES

The **Alberta Water and Environmental Science Building** puts researchers and their students at the centre of southern Alberta's living and learning laboratory where they study critical water and environmental issues like climate change.

The **Centre for Financial Market Research and Teaching** is a 48-station facility on both Lethbridge and Calgary campuses and the best-equipped academic trading room in western Canada. With direct connections to global financial markets, it gives students experience in derivatives and equities trading and commodity-risk management.

At the **University Centre for the Arts** you can enjoy interesting shows, art exhibitions, theatre productions and musical performances all year long.

The **Simulation Health Centre** provides nursing students with exceptional hands-on learning experiences. The lifelike mannequins simulate birth, have heart attacks and even respond to medication, enabling students to practise their skills and critical decision-making in a safe and interactive way.

Studio One (a world-class recording studio), new **Pro Tools Editing Suite, Digital Cinema Suites** (professional editing and finishing rooms), individual art studios for senior students, and **University Recital Hall** (acoustically-tuned performance space) are just a few of the extraordinary fine arts learning spaces.

The **University of Lethbridge Art Gallery (ULAG)** houses one of the most significant art collections in Canada, made up of more than 16,000 works. Through exhibitions, events, public programs, internships in the Hess Collection, satellite and online galleries, the ULAG collection is an important teaching and research tool.

The **University Library** houses approximately one million holdings. In addition to providing you with resources to help with your projects, assignments and research, the library boasts some of the best study spaces on campus: a nearby Starbucks and a spectacular view.

With a climbing wall, fitness centre, triple gymnasium and an indoor 200-metre track, the **1st Choice Savings Centre for Sport and Wellness** is your place to stay fit and have fun!

**SEVEN
SIMPLE
STEPS**
TO APPLY

1. Pick a program

Variety is important, so we offer more than 150 programs for you to choose from. Learn more at ulethbridge.ca/future-student/programs

Not sure what's right for you?

Let us know and we will arrange for you to be a student-for-a-day.

Call 403-329-2762 or book online:

ulethbridge.ca/future-student/request

2. Review admission requirements

Find out if you have the requirements for your program of choice.

ulethbridge.ca/future-student/admission-reqs

If you want to double-check, give us a call at 403-329-2762 or send an email to inquiries@uleth.ca

3. Check for additional program requirements

Some programs have requirements in addition to the University's general admission requirements. For example, students in the Dhillon School of Business must have Mathematics 30-1, and students in the Faculty of Fine Arts may need to submit a portfolio or complete an audition. Learn more about your program's additional requirements:

ulethbridge.ca/ross/admissions/undergrad/additional-admission-requirements

4. Apply online

It's easy, and you'll be one step closer to becoming a student. The cost to apply is \$125 for domestic students and \$140 if you are an international student or have transcripts from a country other than Canada.

Visit ulethbridge.ca/future-student/application to submit your online application.

Registrar's Office – Admissions
University of Lethbridge
4401 University Drive W.
Lethbridge, AB T1K 3M4
admissions@uleth.ca
Fax: 403-329-5159

Note: All completed applications submitted to uLethbridge before December 15 will automatically be considered for the Board of Governors' Admission Scholarship, worth a maximum of \$1,000.

5. Apply for residence

Our residences are in high demand, so if you're interested, apply online as soon as possible. ulethbridge.ca/future-student/housing

If you plan on living off campus, you can check out the listings on our off-campus housing website.

ulethbridge.ca/offcampushousing

6. Apply for awards

We have a number of scholarships and awards with deadlines ranging from December 15 to June 30.

With the exception of the Board of Governors' Scholarship and the Calgary Campus Access Award, all awards require a separate application. It may take a bit of effort, but you're worth it!

ulethbridge.ca/future-student/awards

7. Send us your grades

When you apply online and have been a student in Alberta, your final grades will be sent to us automatically. If you studied outside of Alberta, you will need to have your transcript sent to Admissions.

IT'S YOUR TIME TO SHINE

We are a community of inspiring lights who shine brighter together.

We can't wait to meet you, show you around campus and introduce you to our students, faculty and staff.

Let us know when you would like to visit. We will help you create a schedule for your visit and contact you with the details.

1. Take a campus tour

One of our tour guides will show you around campus, highlighting uLethbridge's many features and facilities.

2. Be a student-for-a-day

We will pair you with a student volunteer in the program you're interested in. You'll attend classes, labs and even go for lunch, our treat. Student-for-a-day is currently available on the Lethbridge Campus only.

Book your tour or student-for-a-day online: ulethbridge.ca/future-student/request

3. Book an enrolment advising appointment

Have all your questions about admission, programs and more answered in a one-on-one session in-person, over the phone, in your community or online.

Email inquiries@uleth.ca to set up a meeting. You may also want to combine a meeting with a campus tour. We would be happy to coordinate this for you — just let us know!

ulethbridge.ca/future-student/request

Additional opportunities to learn about uLethbridge:

Open House | October 26

We open our Lethbridge Campus to all future students and their families! Tour campus, interact with our dedicated staff, faculty and current students and find out if uLethbridge is right for you! Learn about the extraordinary student opportunities and support services as well as our programs, combined degrees and innovative courses. Our Admissions staff is on hand to help with the application process.

Experience Fine Arts Day Date TBD

Students in grades 11 and 12 can tour fine arts facilities; meet professors, advisors and students; get advice on admissions, portfolio and auditions; and sample fine arts programming through workshops in a variety of subject areas available at uLethbridge.

Our University's Blackfoot name is Iniskim, meaning Sacred Buffalo Stone. The University is located in traditional Blackfoot Confederacy territory. We honour the Blackfoot people and their traditional ways of knowing in caring for this land, as well as all Aboriginal peoples who have helped shape and continue to strengthen our University community.
