

# BULLETIN OF THE UNIVERSITY

2020-21

This bulletin is intended to provide only general information concerning Brown University and is not in any manner contractually binding. The information contained herein is subject to revision and change at any time.

#### EQUAL OPPORTUNITY AND NONDISCRIMINATION

Brown University does not discriminate on the basis of sex, race, color, religion, age, disability, status as a veteran, national or ethnic origin, or sexual orientation in the administration of its educational policies, admission policies, scholarship and loan programs, or other school-administered programs.

#### CORRESPONDENCE

The general mailing address for the University is Brown University, Providence, Rhode Island 02912. Correspondence sent to that address may be expected to reach the proper department, but, in order to avoid delay, information and inquiries concerning the items below should be addressed as noted. Addresses for other offices are available on the World Wide Web at [www.brown.edu](http://www.brown.edu).

#### ITEM

#### ADDRESS TO

Matters directly in charge of or concerning the general interests of

The Corporation

President, Box 1860

The University

President, Box 1860

The College

Dean of the College, Box 1828

The Graduate School

Dean of the Graduate School, Box 1867

The Warren Alpert School of Medicine

Dean of Medicine and Biological Sciences, Box G

Alumnae and Alumni

Director of Alumni Relations, Box 1859

Inquiries from applicants for Admission

For undergraduate study, the College Admission Office, Box 1876

For graduate study, the Graduate School

Admission Office, Box 1867

For study in the Warren Alpert Medical School of Brown University Medical School Office of Admissions and Financial Aid, Box G-A212

Inquiries regarding the University Bulletin Registrar, Box K

Brown University courses are conducted in ZIP-Code 02912 (undergraduate and graduate courses) and 02903 (Warren Alpert Medical School and the School of Professional Studies).

# Foreword

---

Brown University is a leading Ivy League institution and the only major research university in the nation where undergraduates are the architects of their own course of study. Brown is distinguished by its unique undergraduate academic program, a world-class faculty, outstanding graduate and medical students, and a tradition of innovative and rigorous multidisciplinary study.

The University's mission—to serve the community, the nation, and the world by educating and preparing students (in the words of the College charter) to “discharge the offices of life with usefulness and reputation”—is fulfilled through a strong partnership of students and teachers.

The seventh oldest university in America, Brown was established in 1764 as Rhode Island College in the town of Warren, Rhode Island, and enrolled its first students in 1765. In 1770 the College moved to its present location, and in 1804 it was renamed Brown University to honor a \$5,000 donation from local merchant Nicholas Brown. Today the University's main campus covers nearly 140 acres on a historic residential hill overlooking downtown Providence, a vibrant city of some 170,000 people and the capital of Rhode Island.

Brown draws men and women from all over the United States and many other countries. Distinguished by their academic excellence, creativity, self-direction, leadership, and faculty known for its prize-winning multidisciplinary scholarship and dedication to teaching. By providing a rich undergraduate experience together with strong graduate and medical programs, the University fosters internal and external discovery at every level of the academic enterprise.

Brown is internationally known for its dynamic undergraduate curriculum, implemented by faculty vote in 1969. Undergraduates must pass 30 courses and complete the requirements for a concentration, or major, in order to receive a bachelor's degree. The curriculum does not require distribution or core courses outside the concentration. More than 2,000 undergraduate courses support just under 80 concentrations, many of them interdisciplinary, and a wide variety of independent studies.

At the heart of the Brown curriculum are three basic principles: that students are active participants in learning; that acquiring analytical and critical skills is as important as mastering factual knowledge; and that learning requires opportunities for experimentation and cross-disciplinary synthesis.

The Graduate School at Brown is a national leader in the creation and dissemination of new knowledge. In 2003, Brown celebrated the centennial of the Graduate Department, formally established in 1903 to confer advanced degrees.

The Warren Alpert Medical School, which awarded its first M.D. degrees in 1975, is renowned for innovation in medical education and for its programs in family medicine and primary care. The Warren Alpert Medical School now enrolls some 400 students, most of whom are accepted through Brown's unique Program in Liberal Medical Education (PLME), which combines undergraduate study with professional studies in medicine.

Beginning in 2002, fortified by vigorous leadership, prudent planning, and new ideas, the University launched an exciting program for academic enrichment to enlarge its faculty by 100 members over the next five to ten years, improve support for graduate students, and invest in libraries, information technology, and academic facilities. As part of this extensive program of improvements, the University instituted a need-blind undergraduate admission process to ensure all worthy applicants access to the University, regardless of their ability to pay.

Brown University is accredited by the New England Association of Schools and Colleges. In addition, the Warren Alpert Medical School is accredited by the Liaison Committee on Medical Education. The School of Engineering has received accreditation from the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology for its bachelor of science programs in civil, chemical, electrical, materials, and mechanical engineering.

## Academic Freedom

Consonant with Brown's tradition concerning academic freedom, the faculty and Corporation, in 1966, adopted the following statement of principles:

Academic freedom is essential to the function of education and to the pursuit of scholarship in universities.

Therefore, Brown University, mindful of its historic commitment to scholarship and to the free exchange of ideas, affirms that faculty and students alike shall enjoy full freedom in their teaching, learning, and research.

Brown University also affirms that faculty and students shall have freedom of religious belief, of speech, of press, of association and assembly, of political activity inside and outside the University, the right to petition the authorities, public and university, to invite speakers of their choice to the campus, and that students and faculty as such should not be required to take any oath not required of other citizens. The time, place, and manner of exercising these rights on campus shall be subject to reasonable regulation only to prevent interference with the normal functions of the University.

## Nondiscrimination Policy

Brown University does not discriminate on the basis of sex, race, color, religion, age, disability, status as a veteran, national or ethnic origin, sexual orientation, gender identity or gender expression, in administration of its educational policies, admissions policies, scholarship and loan programs, or other school-administered programs. For further information on Brown's Nondiscrimination policy as it relates to Title IX please visit: <https://www.brown.edu/about/administration/title-ix/policy>

## The Family Educational Rights and Privacy Act of 1974

The Family Educational Rights and Privacy Act of 1974 (P.L. 93–380) extends to a student the right of access to his or her education records maintained at the University. Education records are those records maintained by or for Brown University that directly relate to an individual who is or has been in attendance (enrolled) at Brown University and for whom Brown maintains educational records. Information and notification as to the type of record; the accessibility of and policies for maintaining, reviewing and expunging the record; and the procedure for inspecting, reviewing, obtaining copies of, or challenging the record are established and promulgated by the appropriate executive officers. Further information may be obtained on the Office of the Registrar's website (<http://www.brown.edu/about/administration/registrar/student-information-rightsferpa>). For the University's complete definition of directory information and disclosure please visit <https://www.brown.edu/about/administration/registrar/student-information-rightsferpa>.

## IMAGE USE

Brown University often captures photographic images and video of campus life, events, ceremonies, and other activities to advance the mission of the institution.

The University is not prohibited from capturing and using student images through photography or video for University purposes unless a student has requested that the University maintain the confidentiality of that student's directory information, per FERPA. By enrolling at Brown University, students not requesting directory withholding authorize the use and reproduction by the University, or parties authorized by the University, of any photographs taken while at Brown without compensation.

Faculty, staff, visitors to campus, and participants in University-sponsored events beyond campus also may have their images captured for news or promotional purposes.

All photographic prints and digital image and video files shall constitute Brown University property and be used to advance the University's educational objectives.

- Jack A. Elias, *Senior Vice President for Health Affairs and Dean of Alpert Medical School*
- Eric S. Estes, *Vice President for Campus Life and Student Services*
- Eileen Goldgeier, *Vice President and General Counsel*
- Sergio Gonzalez, *Senior Vice President for University Advancement*
- Marguerite Joutz, *Chief of Staff and Assistant to the President*
- Lawrence E. Larson, *Dean of Engineering*
- Bess Marcus, *Dean of the School of Public Health*
- Kevin McLaughlin, *Dean of the Faculty*
- Jill C. Pipher, *Vice President for Research*
- Karen H. Sibley, *Vice President for Strategic Initiatives/ Dean, School of Professional Studies*
- William T. Thirsk, *Chief Digital and Information Officer*
- Michael White, *Vice President for Finance and Chief Financial Officer*
- Rashid Zia, *Dean of the College*

## Officers Emeriti

- Vartan Gregorian, *President Emeritus*
- Ruth J. Simmons, *President Emerita*

# Faculty

---

**This information is provided by the Office of the Dean of the Faculty and is current as of February 2020 for appointments scheduled to be effective for the 2020-21 Academic Year.**

Roy K. Aaron  
Professor of Molecular Pharmacology, Physiology and Biotechnology;  
Professor of Orthopaedics

Christopher A. Abadi  
Clinical Assistant Professor of Medicine

Cristina Abbona-Sneider  
Senior Lecturer in Italian Studies

Brian G. Abbott  
Professor of Medicine, Clinician Educator

J. Dawn Abbott  
Professor of Medicine

Aliyyah Abdur-Rahman  
Associate Professor of American Studies and English

Ruhul Abid  
Associate Professor of Surgery (Research)

Ahmad Aboulgheit  
Visiting Scholar in Surgery

Dan Abramovich  
L. Herbert Ballou University Professor of Mathematics

Ross Abrams  
Adjunct Professor of Radiation Oncology

Ana M. Abrantes  
Professor of Psychiatry and Human Behavior

J. Gary Abuelo  
Associate Professor of Medicine

Yam Acharya  
Assistant Professor of Medicine, Clinician Educator

Felicia Nimue Ackerman  
Professor of Philosophy

Charles A. Adams  
Associate Professor of Surgery

Eli Y. Adashi  
Professor of Medical Science

Benjamin Adler  
Clinical Instructor in Family Medicine

Ruth Adler Ben Yehuda  
Distinguished Senior Lecturer in Judaic Studies

Alyn L. Adrain  
Clinical Assistant Professor of Medicine

Katelyn Cawley Affleck  
Clinical Instructor in Psychiatry and Human Behavior

Kailash C. Agarwal  
Professor Emeritus of Medical Science (Research)

Saurabh Agarwal  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Liza M. Aguiar  
Assistant Professor of Pediatrics; Assistant Professor of Surgery

Edward James Ahearn  
University Professor Emeritus of Comparative Literature and French Studies

David C. Ahern  
Clinical Assistant Professor of Psychiatry and Human Behavior

Kerry Ahern  
Teaching Associate in Obstetrics and Gynecology

Jasjit Singh Ahluwalia  
Professor of Behavioral and Social Sciences; Professor of Medicine

Faiz Ahmed  
Associate Professor of History

Khaja Ahmed  
Clinical Associate Professor of Medicine

Sun Ho Ahn  
Associate Professor of Diagnostic Imaging

Nagib Ahsan  
Assistant Professor of Medicine (Research)

Mark Ainsworth  
Francis Wayland Professor of Applied Mathematics

Carlos Aizenman  
Professor of Neuroscience

Anna Aizer  
Professor of Economics

Engin D. Akarli  
Joukowsky Family Distinguished Professor Emeritus of Modern Middle Eastern History

Umer Akbar  
Associate Professor of Neurology

Edward Akelman  
Vincent Zecchino, MD Professor of Orthopaedic Surgery

Paul A. Akerman  
Clinical Assistant Professor of Medicine; Clinical Assistant Professor of Surgery

Ali Akhtar  
Clinical Assistant Professor of Medicine

Nadje S. Al-Ali  
Robert Family Professor of International Studies

Rawya Al-Jabari  
Clinical Assistant Professor of Psychiatry and Human Behavior

Anwar Al-Kassar  
Visiting Scholar in Surgery

Hisham Al-Omari  
Research Associate in Emergency Medicine

Motasem A. Al-Yacoub  
Adjunct Assistant Professor of Neurology

Ana Albuja  
Assistant Professor of Neurology, Clinician Educator; Assistant Professor of Pediatrics, Clinician Educator

Paul E. Alexander  
Clinical Associate Professor Emeritus of Psychiatry and Human Behavior

Stephon H. Alexander  
Professor of Physics

Holly L. Alexandre  
Clinical Assistant Professor of Family Medicine

Tanya Ali  
Associate Professor of Medicine, Clinician Educator

Jason M. Aliotta  
Associate Professor of Medicine, Clinician Educator

Emily Allen  
Assistant Professor of Pediatrics, Clinician Educator

James P. Allen  
Charles Edwin Wilbour Professor of Egyptology

Justine J. Allen  
Adjunct Instructor in Ecology and Evolutionary Biology

Rebecca H. Allen  
Associate Professor of Medical Science; Associate Professor of Obstetrics and Gynecology

Susan Masterson Allen  
Professor Emerita of Health Services, Policy and Practice

Onesimo T. Almeida  
Professor of Portuguese and Brazilian Studies

Khaldoun Almhanna  
Associate Professor of Medicine, Clinician Educator

Nasser Alrajeh  
Visiting Scholar in Emergency Medicine

Amer AlSamman  
Assistant Professor of Medicine, Clinician Educator

Elizabeth L. Altenhein  
Clinical Assistant Professor of Surgery

Renee Altimari  
Teaching Associate in Medical Science

Leticia Alvarado  
Assistant Professor of American Studies

Ruben Alvero  
Adjunct Professor of Obstetrics and Gynecology

Brian K. Alverson  
Professor of Medical Science; Professor of Pediatrics

Elissavet Amanatidou  
Distinguished Senior Lecturer in Classics

Siraj Amanullah  
Associate Professor of Emergency Medicine; Associate Professor of Health Services, Policy and Practice; Associate Professor of Pediatrics

Joseph F. Amaral  
Professor Emeritus of Surgery

Ali Amin  
Associate Professor of Pathology and Laboratory Medicine

Laura Margarita Amorese-O'Connell  
Assistant Professor of Medicine, Clinician Educator

Dima Amso  
Associate Professor of Cognitive, Linguistic and Psychological Sciences

Gowri Anandarajah  
Professor of Family Medicine, Clinician Educator; Professor of Medical Science, Clinician Educator

Scott H. AnderBois  
Assistant Professor of Cognitive, Linguistic and Psychological Sciences

Melvin Andersen  
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Amanda S. Anderson  
Andrew W. Mellon Professor of Humanities and English

Douglas D. Anderson  
Professor Emeritus of Anthropology

James A. Anderson  
Professor Emeritus of Cognitive, Linguistic and Psychological Sciences

Janet Anderson  
Clinical Instructor in Psychiatry and Human Behavior

Jared Anderson  
Assistant Professor of Emergency Medicine, Clinician Educator

Wanni W. Anderson  
Adjunct Professor Emerita of Anthropology

Peter R. Andreas  
John Hay Professor of International Studies and Political Science

Nikolaos Andreatos  
Research Associate in Medicine

Oleg Andreev  
Adjunct Professor of Radiation Oncology

Diane J. Angelini  
Professor Emerita of Obstetrics and Gynecology, Clinician Educator

Marla Cathleen Angermeier  
Clinical Associate Professor of Dermatology

Nadeem Anis  
Assistant Professor of Medicine, Clinician Educator

Sarah Anis  
Clinical Instructor in Surgery

David C. Anthony  
Associate Professor of Family Medicine

Douglas Anthony  
Professor of Neurology; Professor of Pathology and Laboratory Medicine

Jennifer L. Anthony  
Clinical Assistant Professor of Psychiatry and Human Behavior

Valentin Antoci  
Assistant Professor of Orthopaedics

Michelle Stozek Anvar  
Associate Professor of Medicine, Clinician Educator

Eirini Apostolidou  
Assistant Professor of Medicine

Rex W. Appenfeller  
Clinical Assistant Professor of Medicine

Marcella Aquino  
Associate Professor of Pediatrics, Clinician Educator

Patricia Arant  
Professor Emerita of Slavic Studies

Christian Arbelaez  
Associate Professor of Emergency Medicine

Denise M. Arcand  
Clinical Assistant Professor of Family Medicine

Michel A. Arcand  
Clinical Assistant Professor of Orthopaedics

Reginald Archambault  
Professor Emeritus of Education

Richard C. Archambault  
Clinical Assistant Professor of Psychiatry and Human Behavior

Lisa Archie  
Teaching Associate in Medical Science

Andrea E. Arena  
Clinical Assistant Professor of Family Medicine

Sarah A. Arias  
Assistant Professor of Psychiatry and Human Behavior (Research)

Michael F. Arney  
Associate Professor of Psychiatry and Human Behavior (Research)

Paul B. Armstrong  
Professor of English

Herbert D. Aronow  
Associate Professor of Medicine

Nomy Arpaly  
Professor of Philosophy

Ivan Michael Arreguin-Toft  
Lecturer in International and Public Affairs

James A. Arrighi  
Professor of Diagnostic Imaging; Professor of Medical Science; Professor of Medicine

Kalaiyaran Arumugam  
Visiting Scholar

Wael Asaad  
Sidney A. Fox and Dorothea Doctors Fox Associate Professor of Ophthalmology and Visual Science

David Ashley  
Assistant Professor of Family Medicine, Clinician Educator

Daniel K. Asiedu  
Clinical Assistant Professor of Medicine

Akwi Asombang  
Assistant Professor of Medicine, Clinician Educator

Karen E. Aspry  
Associate Professor of Medicine, Clinician Educator

Sami Assad  
 Clinical Instructor in Family Medicine  
 Annlouise R. Assaf  
 Adjunct Professor of Health Services, Policy and Practice  
 Nicholas Asselin  
 Assistant Professor of Emergency Medicine, Clinician Educator  
 Elizabeth R. Aston  
 Assistant Professor of Behavioral and Social Sciences (Research)  
 Michael K. Atalay  
 Associate Professor of Diagnostic Imaging; Associate Professor of Medicine  
 Eleftheria Atalla  
 Research Associate in Medicine  
 Naureen Attiullah  
 Clinical Associate Professor of Psychiatry and Human Behavior  
 Walter J. Atwood  
 Professor of Medical Science; Professor of Neurology  
 Jeannine Audet  
 Clinical Assistant Professor of Pediatrics  
 Geri M. Augusto  
 Gerard Visiting Associate Professor of International and Public Affairs and Africana Studies  
 Megan Auld  
 Teaching Associate in Pediatrics  
 Jesse T. Ault  
 Assistant Professor of Engineering  
 James H. Austin  
 Adjunct Assistant Professor of Health Services, Policy and Practice  
 Ozkan Aydemir  
 Instructor in Pathology and Laboratory Medicine (Research)  
 Dotun B. Ayobade  
 Assistant Professor of Africana Studies  
 Pooja Aysola  
 Clinical Instructor in Medical Science  
 Rama Ayyala  
 Assistant Professor of Diagnostic Imaging, Clinician Educator  
 Armin Azar  
 Clinical Assistant Professor of Psychiatry and Human Behavior  
 Ariella Azoulay  
 Professor of Comparative Literature and Modern Culture and Media  
 Christopher Azzoli  
 Associate Professor of Medicine, Clinician Educator  
 Rebecca Babcock Fenerci  
 Assistant Professor of Psychiatry and Human Behavior (Research)  
 Timothy Babineau  
 Professor of Surgery, Clinician Educator  
 Deborah Bacani  
 Teaching Associate in Pediatrics  
 Stephen Bach  
 Assistant Professor of Computer Science  
 Michelle R. Bach-Coulibaly  
 Senior Lecturer in Theatre Arts and Performance Studies  
 James M. Badger  
 Clinical Associate Professor of Psychiatry and Human Behavior  
 David Badre  
 Professor of Cognitive, Linguistic and Psychological Sciences  
 R. Bahar  
 Professor of Computer Science; Professor of Engineering  
 Harrison Bai  
 Assistant Professor of Diagnostic Imaging, Clinician Educator  
 Peng Bai  
 Visiting Scholar in Surgery  
 David B. Baier  
 Adjunct Professor of Ecology and Evolutionary Biology  
 Muhammad Baig  
 Assistant Professor of Medicine, Clinician Educator  
 Genie L. Bailey  
 Clinical Associate Professor of Psychiatry and Human Behavior  
 Jeffrey A. Bailey  
 Mencoff Family Associate Professor of Translational Research, Associate Professor of Pathology and Laboratory Medicine  
 Kevin E. Baill  
 Clinical Assistant Professor of Psychiatry and Human Behavior  
 Grayson L. Baird  
 Assistant Professor of Diagnostic Imaging (Research)  
 James C. Baird  
 Professor Emeritus of Chemistry  
 James Marshall Baker  
 Professor Emeritus of Music  
 Katherine Carey Baker  
 Teaching Associate in Medicine  
 Paul Baker  
 Assistant Professor of Psychiatry and Human Behavior, Clinician Educator  
 Sasha H. Bakhru  
 Adjunct Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology  
 Lauren Elaine Bakios  
 Clinical Instructor in Surgery  
 Ethan M. Balk  
 Associate Professor of Health Services, Policy and Practice (Research)  
 Thomas F. Banchoff  
 Professor Emeritus of Mathematics  
 Christina A. Bandera  
 Assistant Professor of Surgery, Clinician Educator  
 Priya Banerjee  
 Clinical Assistant Professor of Pathology and Laboratory Medicine  
 Natalie Banet  
 Assistant Professor of Pathology and Laboratory Medicine  
 Mohammad Banki  
 Clinical Assistant Professor of Surgery  
 Priya Bansal  
 Adjunct Instructor in Medicine  
 Rajnish Bansal  
 Clinical Assistant Professor of Medicine  
 Hannah Bansil  
 Clinical Assistant Professor of Surgery  
 James Barbeau  
 Associate Professor of Pathology and Laboratory Medicine, Clinician Educator  
 Barbara Bardenheier  
 Assistant Professor of Health Services, Policy and Practice  
 Barbara E. Barker  
 Associate Professor Emerita of Pathology and Laboratory Medicine  
 David H. Barker  
 Assistant Professor of Psychiatry and Human Behavior (Research)  
 Gilad Barnea  
 Sidney A. Fox and Dorothea Doctors Fox Professor of Ophthalmology and Visual Science  
 Nancy P. Barnett  
 Professor of Behavioral and Social Sciences; Professor of Psychiatry and Human Behavior  
 James O. Barnhill  
 Professor Emeritus of Theatre Arts and Performance Studies

- Thomas Barrett  
Assistant Professor of Orthopaedics
- Christine E. Barron  
Professor of Pediatrics, Clinician Educator
- Peter Michael Barth  
Assistant Professor of Medicine, Clinician Educator
- Thomas B. Bartnikas  
Manning Assistant Professor of Pathology and Laboratory Medicine
- Mathieu Bartoletti  
Investigator in Molecular Biology, Cell Biology and Biochemistry
- Luca Bartolini  
Assistant Professor of Neurology; Assistant Professor of Neurosurgery;  
Assistant Professor of Pediatrics
- Keith Richard Bartolomei  
Clinical Assistant Professor of Medicine
- Omer Bartov  
John P. Birkelund Distinguished Professor of European History
- Jay M. Baruch  
Associate Professor of Emergency Medicine
- Shahzad Bashir  
Aga Khan Professor of Islamic Humanities
- Francis Basile  
Clinical Associate Professor of Medicine
- Orazio J. Basile  
Clinical Assistant Professor Emeritus of Dermatology
- Laura R. Bass  
Associate Professor of Hispanic Studies
- Virginia Bass  
Clinical Instructor in Surgery
- William C. Bastan  
Clinical Instructor Emeritus in Pathology and Laboratory Medicine
- Amit Basu  
Associate Professor of Chemistry
- Kevin G. Bath  
Joukowsky Family Assistant Professor of Cognitive, Linguistic and  
Psychological Sciences
- Cynthia Battle  
Professor of Psychiatry and Human Behavior
- Beth W. Bauer  
Senior Lecturer Emerita in Hispanic Studies
- Josef Bautista  
Clinical Assistant Professor of Medicine
- Kelly Baxter  
Teaching Associate in Medicine
- George P. Bayliss  
Associate Professor of Medicine
- Yuri Bazilevs  
E. Paul Sorensen Professor of Engineering
- Alexander T. Bazilevskiy  
Visiting Scientist in Earth, Environmental, and Planetary Sciences
- Samuel I. Beale  
Professor Emeritus of Biology
- Rachel E. Beard  
Assistant Professor of Surgery
- Anneliese Beaubrun  
Assistant Professor of Medicine, Clinician Educator
- Francesca L. Beaudoin  
Associate Professor of Emergency Medicine
- Bruce M. Becker  
Professor of Behavioral and Social Sciences; Professor of Emergency  
Medicine
- Sara J. Becker  
Associate Professor of Behavioral and Social Sciences; Associate  
Professor of Psychiatry and Human Behavior
- Curt G. Beckwith  
Associate Professor of Medicine
- Linda Beetlestone  
Teaching Associate in Obstetrics and Gynecology
- Lindsey B. Beffa  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator
- Lucas Beffa  
Clinical Assistant Professor of Medical Science
- Jose Behar  
Professor Emeritus of Medicine
- Solmaz Behtash  
Clinical Assistant Professor of Family Medicine
- M. David Beitle  
Clinical Assistant Professor of Obstetrics and Gynecology
- Michael D. Beland  
Professor of Diagnostic Imaging
- Michael J. Belanger  
Clinical Assistant Professor of Orthopaedics
- Santosh Belbase  
Assistant Professor of Medicine, Clinician Educator
- Peter A. Belenky  
Assistant Professor of Molecular Microbiology and Immunology
- Christina Bellanti  
Clinical Assistant Professor of Psychiatry and Human Behavior
- Michelle Beller  
Clinical Instructor in Medical Science
- Elsa Belmont Flores  
Visiting Lecturer in Language Studies
- Natalia Belosludtseva  
Clinical Assistant Professor of Medicine
- G. Jesse Bender  
Adjunct Associate Professor of Pediatrics
- Judith L. Bender  
Professor of Biology
- Gabriele Benelli  
Senior Research Associate in Physics
- Angela (Angie) Bengtson  
Assistant Professor of Epidemiology
- Tanya J. Benitez  
Assistant Professor of Behavioral and Social Sciences (Research)
- Kristen Benito  
Associate Professor of Psychiatry and Human Behavior (Research)
- Richard J. Bennett  
Professor of Biology
- Talya Benoff  
Clinical Assistant Professor of Psychiatry and Human Behavior
- Reda Bensmaia  
University Professor Emeritus of French Studies and Comparative  
Literature
- Theophilus A. Benson  
Assistant Professor of Computer Science
- Judith D. Bentkover  
Professor of the Practice of Health Services, Policy and Practice
- Elizabeth Benz  
Assistant Professor of Surgery, Clinician Educator
- Scott E. Benzuly  
Assistant Professor of Anesthesiology, Clinician Educator
- Nathan Barry Beraha  
Clinical Assistant Professor of Pediatrics

Lionel Bercovitch  
Professor of Dermatology

Rod Beresford  
Professor of Engineering

Geoffrey H. Berg  
Clinical Assistant Professor of Medicine

Mary Clare Bergen  
Teaching Associate in Medicine

Jacob R. Berger  
Associate Professor of Neurology, Clinician Educator

Judith Berger  
Teaching Associate in Psychiatry and Human Behavior

Arnaldo Berges  
Clinical Assistant Professor of Psychiatry and Human Behavior

Kristina Berglund  
Assistant Professor of Medicine, Clinician Educator

Justin Berk  
Assistant Professor of Medicine, Clinician Educator; Assistant Professor of Pediatrics, Clinician Educator

Nathaniel A. Berman  
Rahel Varnhagen Professor of International Affairs, Law, and Modern Culture and Religious Studies

Veronica Bernardo  
Clinical Assistant Professor of Medical Science

Jonathan Bernheimer  
Clinical Instructor in Pediatrics

Douglas B. Bernon  
Clinical Assistant Professor of Psychiatry and Human Behavior

Scott David Berns  
Clinical Professor of Health Services, Policy and Practice; Clinical Professor of Pediatrics

Michael Bernstein  
Assistant Professor of Behavioral and Social Sciences; Assistant Professor of Diagnostic Imaging

Susan Bernstein  
Professor of Comparative Literature

David M. Berson  
Sidney A. Fox and Dorothea Doctors Fox Professor of Ophthalmology and Visual Science

Arthur A. Bert  
Clinical Professor of Surgery

Eric Berthiaume  
Clinical Assistant Professor of Medicine

Richard G. Bertini  
Clinical Assistant Professor Emeritus of Orthopaedics

Jonathan M. Bertman  
Clinical Assistant Professor of Family Medicine

Mark D. Bertness  
Professor Emeritus of Ecology and Evolutionary Biology

Sarah A. Besky  
Charles Evans Hughes Assistant Professor of Anthropology and International and Public Affairs

Laurel D. Bestock  
Associate Professor of Archaeology and the Ancient World and Egyptology and Assyriology

Meghan Beucher  
Assistant Professor of Emergency Medicine, Clinician Educator; Assistant Professor of Pediatrics, Clinician Educator

Lalit Beura  
Assistant Professor of Molecular Microbiology and Immunology

Timothy R. T. Bewes  
Professor of English

Apoorva Bhandari  
Investigator in Cognitive, Linguistic and Psychological Sciences

Michael A. Bharier  
Clinical Assistant Professor of Dermatology

Harikrasha Bhatt  
Assistant Professor of Medicine, Clinician Educator

Reena A. Bhatt  
Clinical Assistant Professor of Surgery

Roma D. Bhuta  
Assistant Professor of Pediatrics, Clinician Educator

Piero Biancani  
Professor Emeritus of Medicine (Research)

David Bica  
Clinical Assistant Professor of Family Medicine; Clinical Assistant Professor of Orthopaedics

David S. Bick  
Clinical Instructor in Surgery

Roberta Bickford  
Professor Emerita of History of Art and Architecture

Katie Brooks Biello  
Associate Professor of Behavioral and Social Sciences; Associate Professor of Epidemiology

Lucien J. E. Bienenstock  
Associate Professor of Applied Mathematics; Associate Professor of Neuroscience

Lisa L. Biggs  
Assistant Professor of Africana Studies

Rosemarie Bigsby  
Clinical Professor Emeritus of Pediatrics

Bahar Bilgen  
Assistant Professor of Orthopaedics (Research)

Courtney C. Bilodeau  
Assistant Professor of Medicine, Clinician Educator

Mark Birkenbach  
Associate Professor of Pathology and Laboratory Medicine

Ariel Birnbaum  
Assistant Professor of Medicine, Clinician Educator

Christine Anne Biron  
Esther Elizabeth Brintzenhoff Professor of Medical Science, Professor of Molecular Microbiology and Immunology

Navaneel Biswas  
Clinical Assistant Professor of Medicine

Silvana Bitton  
Teaching Associate in Obstetrics and Gynecology

Karen Blackmer  
Clinical Assistant Professor of Family Medicine

Robert A. Blair  
Joukowsky Family Assistant Professor of Political Science and International and Public Affairs

William Robert Blair  
Clinical Instructor in Family Medicine

Dawna A. Blake  
Clinical Assistant Professor of Medicine

Angela Blanchard  
Senior Fellow in International and Public Affairs

Brad D. Blankenhorn  
Assistant Professor of Orthopaedics

Mutlu Konuk Blasing  
Professor Emerita of English

Joaquin Blaum  
Assistant Professor of Economics

Andrew S. Blazar  
Clinical Professor Emeritus of Obstetrics and Gynecology

Steven L. Blazar  
Clinical Assistant Professor of Orthopaedics

Thomas A. Bledsoe  
Clinical Associate Professor of Medicine

Cynthia Bliss  
Clinical Assistant Professor of Pediatrics

Joseph M. Bliss  
Associate Professor of Pediatrics

Stanley Hoyt Block  
Clinical Associate Professor Emeritus of Pediatrics

Erika L. Bloom  
Adjunct Assistant Professor of Medicine

Donald S. Blough  
Professor Emeritus of Cognitive, Linguistic and Psychological Sciences

Janet A. Blume  
Associate Professor of Engineering

Sheila E. Blumstein  
Albert D. Mead Professor Emerita of Cognitive, Linguistic, and Psychological Sciences

Mark M. Blyth  
William R. Rhodes Professor of International Economics

Beth C. Bock  
Professor of Behavioral and Social Sciences; Professor of Psychiatry and Human Behavior

John P. Bodel  
W. Duncan MacMillan II Professor of Classics

Sheenagh M. Bodkin  
Clinical Assistant Professor of Medicine

Deborah Boedeker  
Professor Emerita of Classics

John R. Boekamp  
Clinical Associate Professor of Psychiatry and Human Behavior

Kim Boekelheide  
Professor of Medical Science

Julie Boergers  
Associate Professor of Pediatrics, Clinician Educator; Associate Professor of Psychiatry and Human Behavior, Clinician Educator

Barrymore A. Bogues  
Asa Messer Professor of Humanities and Critical Theory, Professor of Africana Studies

Christina L. Boisseau  
Assistant Professor of Psychiatry and Human Behavior (Research)

Dale S. Bond  
Professor of Psychiatry and Human Behavior (Research)

Kunal Bonde  
Visiting Research Scholar in Pediatrics

Sheila Bonde  
Professor of Archaeology and the Ancient World; Professor of History of Art and Architecture

Shalini Boodram  
Assistant Professor of Neurosurgery, Clinician Educator

Tanya Booker  
Associate Professor of Obstetrics and Gynecology, Clinician Educator

Atsuko Suga Borgmann  
Senior Lecturer in East Asian Studies

Jeffrey Borkan  
Professor of Family Medicine; Professor of Medical Science

Belinda Borrelli  
Adjunct Professor of Behavioral and Social Sciences

Brian E. Borsari  
Adjunct Professor of Behavioral and Social Sciences

David A. Borton  
Assistant Professor of Engineering

Christina Bortz  
Assistant Professor of Medicine, Clinician Educator

Michel-Andre R. Bossy  
Professor Emeritus of Comparative Literature; Professor Emeritus of French Studies

Andrew G. Bostom  
Associate Professor of Family Medicine

Leslie A. Bostrom  
Professor of Visual Art

Ghada Bourjeily  
Professor of Medicine

David B. Bouslough  
Associate Professor of Emergency Medicine, Clinician Educator

Wayne D. Bowen  
Upjohn Professor of Pharmacology

Allan Francis Bower  
Professor of Engineering

Lisa D. Bowie  
Clinical Assistant Professor of Family Medicine

Kathleen Cote Bowling  
Clinical Associate Professor of Obstetrics and Gynecology

Jerrold L. Boxerman  
Professor of Diagnostic Imaging

Amy M. Boyer  
Clinical Assistant Professor of Medicine

Brittney Starr Boykin  
Clinical Instructor in Psychiatry and Human Behavior

Joan M. Boylan  
Senior Research Associate in Pediatrics

Lisa D. Boyle  
Clinical Assistant Professor of Obstetrics and Gynecology

Madalene Irene Boyle  
Clinical Instructor in Emergency Medicine

Michelle A. Boyle  
Clinical Assistant Professor of Family Medicine

Kiera Boyle-Toledo  
Clinical Assistant Professor of Psychiatry and Human Behavior

Jordan M. Braciszewski  
Adjunct Assistant Professor of Behavioral and Social Sciences

Gwynne Bragdon  
Clinical Assistant Professor of Orthopaedics

Elizabeth Brainerd  
Professor of Biology; Professor of Medical Science

Nancy H. Brand  
Clinical Assistant Professor of Psychiatry and Human Behavior

Elizabeth Brannan  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Peter C. Brasch  
Clinical Assistant Professor of Surgery

Joseph M. Braun  
Associate Professor of Epidemiology

Lundy Braun  
Professor of Africana Studies; Professor of Medical Science

Debra Bravman  
Teaching Associate in Medical Science

James A. Brcak  
Clinical Assistant Professor of Psychiatry and Human Behavior

Rimini Breakstone  
Assistant Professor of Medicine, Clinician Educator

Michelle Audrey Breda  
Assistant Professor of Medicine, Clinician Educator

Michael A. Breen  
Visiting Scholar in Mathematics

Paul Breiding  
Clinical Assistant Professor of Medicine

Andrew S. Brem  
Professor Emeritus of Pediatrics

Tracy Breton  
Visiting Professor of English

Corey L. Brettschneider  
Professor of Political Science

Kenneth S. Breuer  
Professor of Engineering

Judson Brewer  
Associate Professor of Behavioral and Social Sciences

Clyde L. Briant  
Otis Everett Randall University Professor of Engineering

Rayane Brinck Teixeira  
Research Associate in Surgery

Luke Brindamour  
Clinical Assistant Professor of Medicine

Patricia Brinegar  
Teaching Associate in Family Medicine

Vanessa M. Britto  
Assistant Professor of Medicine, Clinician Educator

Justin Broackes  
Professor of Philosophy

Dan W. Brock  
Professor Emeritus of Philosophy

Alexander S. Brodsky  
Assistant Professor of Pathology and Laboratory Medicine (Research)

Cheryl Brodsky  
Clinical Assistant Professor of Obstetrics and Gynecology

Jeffrey M. Brody  
Associate Professor of Diagnostic Imaging, Clinician Educator

Julia G. Brody  
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Cynthia J. Brokaw  
Chen Family Professor of China Studies, Professor of History, Professor of East Asian Studies

Fred A. Brocco  
Clinical Assistant Professor of Obstetrics and Gynecology

Laurent Brossay  
Professor of Molecular Microbiology and Immunology

E. Christine Brousseau  
Assistant Professor of Obstetrics and Gynecology

Andrew Browder  
Professor Emeritus of Mathematics

Barry Brown  
Teaching Associate in Medical Science

Benjamin P. Brown  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Edward M. Brown  
Clinical Associate Professor Emeritus of Psychiatry and Human Behavior

Erica Dawn Brown  
Assistant Professor of Medicine, Clinician Educator

Joanna D. Brown  
Clinical Associate Professor of Family Medicine

Kristen Brown  
Teaching Associate in Pediatrics

Larry K. Brown  
Professor of Psychiatry and Human Behavior

Linda L. Brown  
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics

Marisa A. Brown  
Adjunct Lecturer in Public Humanities

Phil Brown  
Adjunct Professor of Pathology and Laboratory Medicine

Rebecca Brown  
Clinical Assistant Professor of Medicine

Steven A. Brown  
Clinical Associate Professor of Surgery

Walter A. Brown  
Clinical Professor Emeritus of Psychiatry and Human Behavior

William D. Brown  
Associate Professor of Neurology, Clinician Educator; Associate Professor of Pediatrics, Clinician Educator

Karen R. Browning  
Clinical Assistant Professor of Obstetrics and Gynecology

Robert J. Brulle  
Visiting Professor of Environment and Society

Matthew A. Brumbaugh  
Clinical Assistant Professor of Medicine

Nicholas P. Bruno  
Clinical Assistant Professor of Dermatology

Elizabeth Johnson Bryan  
Associate Professor of English

Richard G. Bryan  
Clinical Assistant Professor of Surgery

Margaret Bublitz  
Assistant Professor of Medicine; Assistant Professor of Psychiatry and Human Behavior

Cristian Buc Calderon  
Visiting Scholar in Cognitive, Linguistic and Psychological Sciences

David Buchta  
Lecturer in Classics

George B. Buczko  
Clinical Associate Professor of Surgery

Mari Jo Buhle  
Professor Emerita of American Studies

Stephen L. Buka  
Professor of Epidemiology

Christopher Bull  
Senior Lecturer in Engineering

Richard D. Bungiro  
Senior Lecturer in Molecular Microbiology and Immunology

Michaela Bunker  
Teaching Associate in Medical Education

Andrew E. Burchard  
Clinical Assistant Professor of Surgery

Michael D. Burgard  
Clinical Assistant Professor of Psychiatry and Human Behavior

Frederick W. Burgess  
Clinical Professor Emeritus of Surgery

Evan Burke  
Clinical Instructor in Anesthesiology

Robert T. Burke  
Associate Professor Emeritus of Pediatrics, Clinician Educator

Alexandra C. Burns  
Clinical Instructor in Psychiatry and Human Behavior

Jeffrey M. Burock  
Clinical Assistant Professor of Psychiatry and Human Behavior

Aaron Burr  
Teaching Associate in Medical Science

Dayna Burrell  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Stuart Burrows  
Associate Professor of English

Douglas M. Burt  
Clinical Assistant Professor of Medicine

Rebecca D. Burwell  
Mead Professor of Cognitive, Linguistic and Psychological Sciences

Stephen S. Bush  
Associate Professor of Religious Studies

John E. Buster  
Professor Emeritus of Obstetrics and Gynecology

James Butera  
Clinical Associate Professor of Medicine

Stephen Butler  
Clinical Assistant Professor of Family Medicine

Melissa A. Buttaro  
Clinical Assistant Professor of Psychiatry and Human Behavior

Kristin Cadieux  
Teaching Associate in Medicine

Blake Cady  
Professor Emeritus of Surgery

Jonathan F. Cahill  
Associate Professor of Neurology

Terrence F. Cahill  
Clinical Associate Professor of Obstetrics and Gynecology

Shubing Cai  
Adjunct Assistant Professor of Health Services, Policy and Practice

Joseph M. Caiati  
Assistant Professor of Anesthesiology, Clinician Educator

Rachael L. Caiati  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Nathan Calabro-Kailukaitis  
Assistant Professor of Medicine, Clinician Educator

Luisa Cala Cala  
Assistant Professor of Pediatrics, Clinician Educator

Anthony Angelo Caldamone  
Professor of Pediatrics; Professor of Surgery

David Caldarella  
Clinical Assistant Professor of Orthopaedics

Angela Caliendo  
Professor of Medicine

Joseph F. Callaghan  
Clinical Assistant Professor Emeritus of Surgery

Keith Callahan  
Clinical Associate Professor of Family Medicine

Joseph M. Calo  
Professor Emeritus of Engineering

Amy Cameron  
Assistant Professor of Psychiatry and Human Behavior

Karen T. Cammuso  
Clinical Assistant Professor of Psychiatry and Human Behavior

Christopher A. Campagnari  
Clinical Assistant Professor of Family Medicine

Christopher P. Campanile  
Clinical Associate Professor of Family Medicine

Andrew G. Campbell  
Professor of Medical Science

Tyler Campbell  
Assistant Professor of Diagnostic Imaging, Clinician Educator

William Campbell  
Teaching Associate in Pediatrics

Tina Campt  
Owen F. Walker Professor of Humanities and Professor of Modern Culture and Media

Giovanni Camussi  
Adjunct Professor of Medicine

Madeline Cancian  
Clinical Instructor in Surgery

David E. Cane  
Vernon K. Kriebel Professor Emeritus of Chemistry and Professor Emeritus of Molecular Biology, Cell Biology, and Biochemistry

Lauryln B. Cannistra  
Clinical Associate Professor of Medicine

Carmine J. Capalbo  
Clinical Associate Professor Emeritus of Surgery

Joseph C. Cappelleri  
Adjunct Professor of Biostatistics

Geoffrey Capraro  
Associate Professor of Emergency Medicine, Clinician Educator; Associate Professor of Pediatrics, Clinician Educator

Tara A. Capuano  
Teaching Associate in Obstetrics and Gynecology

Alexios Carayannopoulos  
Associate Professor of Neurosurgery, Clinician Educator

Cassandra L. Carberry  
Associate Professor of Obstetrics and Gynecology, Clinician Educator

Gene A. Cardarelli  
Clinical Associate Professor of Radiation Oncology

Eden R. Cardozo  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Chelsy Caren  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Claude Carey  
Professor Emerita of Slavic Studies

Kate B. Carey  
Professor of Behavioral and Social Sciences

Michael Carey  
Professor of Behavioral and Social Sciences; Professor of Psychiatry and Human Behavior

Paul Carmichael  
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Mark Carol  
Adjunct Assistant Professor of Radiation Oncology

Charles C. J. Carpenter  
Professor Emeritus of Medicine

Linda L. Carpenter  
Professor of Psychiatry and Human Behavior

Jennifer F. Carr  
Senior Research Associate in Molecular Biology, Cell Biology and Biochemistry

Antonio Carreno  
Professor Emeritus of Hispanic Studies

Jennifer J. Carroll  
Adjunct Assistant Professor of Medicine

Mary A. Carskadon  
Professor of Psychiatry and Human Behavior

E. Jane Carter  
Associate Professor of Medicine

Rebecca Louise Carter  
Assistant Professor of Anthropology and Urban Studies

Joseph E. Caruolo  
Clinical Assistant Professor Emeritus of Surgery

Angelina C. A. Carvalho  
Professor Emerita of Medicine

Holly A. Case  
Associate Professor of History

Mary Lynn Casey  
Teaching Associate in Family Medicine

William J. Cashore  
Professor Emeritus of Pediatrics

Jeannine Alexandra Casselman  
Teaching Associate in Family Medicine

John A. Cassese  
Assistant Professor of Diagnostic Imaging, Clinician Educator; Assistant Professor of Pediatrics, Clinician Educator

Caroline Castiglione  
Professor of History; Professor of Italian Studies

Sarah Casulli  
Research Associate in Medicine

Bruce Caswell  
Professor Emeritus of Engineering

Colleen Cavanaugh  
Clinical Assistant Professor of Obstetrics and Gynecology

Timothy Cavanaugh  
Clinical Assistant Professor of Family Medicine

Celeste Caviness  
Assistant Professor of Psychiatry and Human Behavior (Research)

John H. Cayley  
Professor of Literary Arts

Mark A. Celio  
Assistant Professor of Behavioral and Social Sciences (Research)

Joseph Centofanti  
Clinical Assistant Professor of Neurology

Ugur Cetintemel  
Professor of Computer Science

Chung-Ja M. Cha  
Assistant Professor Emerita of Pediatrics (Research)

Stephen L. Chabot  
Clinical Assistant Professor of Family Medicine

John A. Chaffey  
Clinical Assistant Professor of Medicine

Abdullah Chahin  
Assistant Professor of Medicine, Clinician Educator

Jiajue Chai  
Assistant Professor of Environment and Society (Research)

Sandy Chai  
Assistant Professor of Dermatology, Clinician Educator

Laurence P. Chait  
Adjunct Assistant Professor of Health Services, Policy and Practice

Thano A. D. Chaltas  
Associate Professor of the Practice of Engineering

Alison Biercevicz Chambers  
Assistant Professor of Medicine (Research)

Mary-Kathryn Chambers  
Teaching Associate in Pediatrics

Kei Hang Katie Chan  
Adjunct Assistant Professor of Epidemiology

Melody T. Chan  
Manning Assistant Professor of Mathematics

Philip A. Chan  
Associate Professor of Behavioral and Social Sciences; Associate Professor of Medicine

Rabin F. Chandran  
Associate Professor of Family Medicine, Clinician Educator

Jiang Chang  
Visiting Scientist in Earth, Environmental, and Planetary Sciences

Kevin J. Chang  
Adjunct Associate Professor of Diagnostic Imaging

Manchin Chang  
Clinical Assistant Professor of Medicine

Victoria C. Chang  
Assistant Professor of Neurology, Clinician Educator

Wen-I Chang  
Assistant Professor of Pediatrics, Clinician Educator

Prabjot Channa  
Associate Professor of Surgery, Clinician Educator

Colin C. D. Channer  
Assistant Professor

Kimberle C. Chapin  
Professor of Medicine; Professor of Pathology and Laboratory Medicine

Heather A. Chapman  
Assistant Professor of Pediatrics, Clinician Educator

Laura L. Chapman  
Associate Professor of Emergency Medicine, Clinician Educator; Associate Professor of Pediatrics, Clinician Educator

Tina L. Charest  
Clinical Instructor in Family Medicine

Amos Charles  
Clinical Associate Professor of Medicine

Eugene Charniak  
University Professor of Computer Science

Eric Chason  
Professor of Engineering

Yael Chatav Schonbrun  
Clinical Assistant Professor of Psychiatry and Human Behavior

Elizabeth Chattillion  
Clinical Assistant Professor of Psychiatry and Human Behavior

Ahmed A. Chaudhary  
Clinical Assistant Professor of Radiation Oncology

Anjulika Chawla  
Associate Professor of Pediatrics, Clinician Educator

Kenneth Chay  
Professor of Economics

Joseph Chazan  
Clinical Professor Emeritus of Medicine

Ayesha Cheema-Hasan  
Adjunct Assistant Professor of Pediatrics

Erika L. Cheesbro  
Teaching Associate in Family Medicine

Ross E. Cheit  
Professor of International and Public Affairs and Professor of Political Science

Elizabeth S. Chen  
Associate Professor of Health Services, Policy and Practice; Associate Professor of Medical Science

Kaijun Chen  
Assistant Professor

Kenneth K. L. Chen  
Assistant Professor of Medicine, Clinician Educator; Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Ou Chen  
Assistant Professor of Chemistry

Qian Chen  
Michael G. Ehrlich, MD Professor of Orthopedic Research, Professor of Medical Science

Ray Hung Chen  
Research Associate in Pediatrics

Wenhui Chen  
Lecturer in East Asian Studies

Xiaodi Chen  
Assistant Professor of Pediatrics (Research)

Shibin Cheng  
Associate Professor of Pediatrics (Research)

Vicky Cheng  
Assistant Professor of Medicine, Clinician Educator

John F. Cherry  
Joukowsky Family Professor of Archaeology and Classics

Amy Ellen Chew  
Lecturer in Ecology and Evolutionary Biology

Kimberley Chiappone  
Clinical Instructor in Psychiatry and Human Behavior

Melissa Chin  
Assistant Professor of Medicine, Clinician Educator

Tamara Chin  
Associate Professor of Comparative Literature; Associate Professor of East Asian Studies

Nathaniel Chishinga  
Research Associate in Medicine

Eunyoung Cho  
Associate Professor of Dermatology

Adam Chodowski  
Professor of Emergency Medicine (Research)

Bum-Rak Choi  
Associate Professor of Medicine (Research)

Nitsan Chorev  
Harmon Family Professor of Sociology

Gaurav Choudhary  
Associate Professor of Medicine

Sapna Chowdhry  
Clinical Assistant Professor of Medicine

David P. Christensen  
Royce Family Professor of Teaching Excellence, Professor of Philosophy

Fredric V. Christian  
Clinical Assistant Professor of Medicine

Mirena Christoff  
Distinguished Senior Lecturer in Language Studies

Paul P. Christopher  
Associate Professor of Psychiatry and Human Behavior

David J. Chronley  
Clinical Assistant Professor of Pediatrics

Stavroula Chrysanthopoulou  
Assistant Professor of Biostatistics

Antony Chu  
Assistant Professor of Medicine

Ming-Yu Wang Chu  
Professor Emerita of Medicine (Research)

Shih-Hsi Chu  
Professor Emeritus of Molecular Pharmacology, Physiology and Biotechnology (Research)

Yuankui Chu  
Research Associate in Medicine

Howard P. Chudacoff  
George L. Littlefield Professor of American History

Thomas H. Chun  
Professor of Emergency Medicine; Professor of Pediatrics

Chun-Shiang Chung  
Assistant Professor of Surgery (Research)

Erica Chung  
Associate Professor of Pediatrics, Clinician Educator

Russell M. Church  
Edgar L. Marston Professor Emeritus of Psychology

Doreen M. Ciancaglini  
Adjunct Assistant Professor of Pediatrics

Lydia R. Ciarallo  
Assistant Professor of Emergency Medicine, Clinician Educator; Assistant Professor of Pediatrics, Clinician Educator

Deus Cielo  
Associate Professor of Neurosurgery, Clinician Educator

Sybil Cineas  
Associate Professor of Medical Science, Clinician Educator; Associate Professor of Medicine, Clinician Educator; Associate Professor of Pediatrics, Clinician Educator

William Cioffi  
J. Murray Beardsley Professor of Surgery

Mark Cladis  
Brooke Russell Astor Professor of Humanities, Professor of Religious Studies

Wayne C. Clairborne  
Clinical Associate Professor Emeritus of Obstetrics and Gynecology

Kalin Clark  
Clinical Assistant Professor of Psychiatry and Human Behavior

Mark Andrew Clark  
Clinical Assistant Professor of Family Medicine

Melissa A. Clark  
Professor of Health Services, Policy and Practice; Professor of Obstetrics and Gynecology

Nathaniel Edgett Clark  
Instructor in Molecular Biology, Cell Biology and Biochemistry (Research)

Seth Alan Clark  
Assistant Professor of Medicine, Clinician Educator; Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Michelle A. Clayton  
Associate Professor of Comparative Literature; Associate Professor of Hispanic Studies

Steven C. Clemens  
Associate Professor of Earth, Environmental, and Planetary Sciences (Research)

Jeffrey D. Clement  
Clinical Assistant Professor of Medicine

Richard Clements  
Assistant Professor of Surgery (Research)

Rodney J. Clifton  
Rush C. Hawkins University Professor Emeritus of Engineering

David R. Cloutier  
Clinical Assistant Professor of Surgery

Brian Clyne  
Associate Professor of Emergency Medicine; Associate Professor of Medical Science

Roger Cobb  
Professor Emeritus of Political Science

Alicia Cohen  
Assistant Professor of Family Medicine (Research); Assistant Professor of Health Services, Policy and Practice (Research)

Andrew Cohen  
Professor of Medicine

Eric Cohen  
Assistant Professor of Orthopaedics

Steven Irvin Cohen  
Clinical Assistant Professor of Surgery

Uriel Cohen Priva  
Assistant Professor of Cognitive, Linguistic and Psychological Sciences

Jamieson V. Cohn  
Associate Professor of Emergency Medicine, Clinician Educator

Anthony G. Cokes  
Professor of Modern Culture and Media

Andrew E. Colarusso  
Assistant Professor of the Practice of Literary Arts

Mauro Colavita  
Clinical Assistant Professor of Obstetrics and Gynecology

Suzanne M. Colby  
Professor of Behavioral and Social Sciences; Professor of Psychiatry and Human Behavior

Arlene M. Cole  
Assistant Professor of the Practice of Music

Brian J. Cole  
Professor of Mathematics

Annette W. Coleman  
Stephen T Olney Professor Emerita of Natural History

John R. Coleman  
Professor Emeritus of Biology

Jeffrey D. Colgan  
Richard Holbrooke Associate Professor of Political Science and International Studies

Charlene Collibee  
Assistant Professor of Psychiatry and Human Behavior (Research)

Bradley J. Collins  
Clinical Associate Professor of Medicine

Jonathan E. Collins  
Assistant Professor of Education

Matthew J. Collins  
Adjunct Assistant Professor of Family Medicine

Samantha Collum  
Clinical Assistant Professor of Psychiatry and Human Behavior

Vicki L. Colvin  
Vernon K. Kriebel Professor of Chemistry and Engineering

Ruth Melanie Colwill  
Professor of Cognitive, Linguistic and Psychological Sciences

Anthony B. Comeau  
Research Associate in Molecular Pharmacology, Physiology and Biotechnology

Jonathan P. Conant  
Associate Professor of History

Gina Connerton  
Teaching Associate in Pediatrics

Jeannine M. Connolly  
Clinical Assistant Professor of Obstetrics and Gynecology

Michael Connolly  
Assistant Professor of Medical Education, Clinician Educator; Assistant Professor of Surgery, Clinician Educator

Francis Connor  
Clinical Associate Professor of Surgery

Barry William Connors  
L. Herbert Ballou University Professor of Neuroscience

Erika Constantine  
Associate Professor of Emergency Medicine, Clinician Educator; Associate Professor of Pediatrics, Clinician Educator

Maria Constantinou  
Clinical Assistant Professor of Medicine

John M. Conte  
Clinical Assistant Professor of Medicine

Harold J. Cook  
John F. Nickoll Professor of History

Linda J. Cook  
Professor of Political Science; Professor of Slavic Studies

David B. Cooper  
Professor Emeritus of Engineering

George Cooper  
Clinical Associate Professor Emeritus of Surgery

Leon N. Cooper  
Thomas J. Watson, Sr. Professor of Science (Research)

Reid F. Cooper  
Professor of Earth, Environmental, and Planetary Sciences

Janet Cooper Nelson  
Teaching Associate in Medical Science

Robert Coover  
T.B. Stowell University Professor Emeritus of Literary Arts

Joan K. Copjec  
Professor of Modern Culture and Media

A. Michael Coppa  
Clinical Instructor in Obstetrics and Gynecology

Denise Coppa  
Adjunct Associate Professor of Pediatrics

Keith A. Corl  
Assistant Professor of Medicine

William M. Corrao  
Clinical Professor of Medicine

Stephen Correia  
Associate Professor of Psychiatry and Human Behavior

Cynthia A. Corriveau  
Teaching Associate in Family Medicine

Garth Rees Cosgrove  
Adjunct Professor of Neurosurgery

Geanina O. Costea  
Clinical Associate Professor of Psychiatry and Human Behavior

Richard A. Cottiero  
Clinical Associate Professor of Medicine

Travis Cotton  
Clinical Assistant Professor of Surgery

Karen L. K. Coulombe  
Assistant Professor of Engineering; Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology

Donald R. Coustan  
Professor Emeritus of Obstetrics and Gynecology

Maria Coutinho  
Clinical Assistant Professor of Pediatrics; Clinical Assistant Professor of Psychiatry and Human Behavior

Hugh P. Cowdin  
Clinical Assistant Professor of Anesthesiology

Christopher Cox  
Clinical Instructor in Medical Science

Mara G. Coyle  
Professor of Pediatrics, Clinician Educator

Joseph S. Coyne  
Adjunct Professor of Health Services, Policy and Practice

Thomas F. Crain  
Assistant Professor of Medicine, Clinician Educator

Robert Crausman  
Clinical Professor of Medicine

Lorin A. Crawford  
RGSS Assistant Professor of Biostatistics

Robbert J. Creton  
Professor of Medical Science (Research); Professor of Pathology and Laboratory Medicine (Research)

Joseph Crisco  
Henry F. Lippitt Professor of Orthopedics

G. Valentin Cristescu  
Clinical Assistant Professor of Medical Science

Patricia A. Cristofaro  
Assistant Professor of Medicine, Clinician Educator

John J. Cronan  
Charles and Elfriede Collis-Frances Weeden Gibson Professor of Diagnostic Imaging

Beth Cronin  
Clinical Associate Professor of Obstetrics and Gynecology

Charles Cronin  
Assistant Professor of Medicine, Clinician Educator

Nicole Croteau  
Teaching Associate in Pediatrics

James P. Crowley  
Professor Emeritus of Medicine

Marjorie L. Crozier  
Clinical Assistant Professor of Psychiatry and Human Behavior

Aristides Cruz  
Assistant Professor of Orthopaedics

Susan Cu-Uvin  
Professor of Health Services, Policy and Practice; Professor of Medicine; Professor of Obstetrics and Gynecology

Dragos Cucu  
Clinical Assistant Professor of Medicine

Catherine A. Cummings  
Clinical Professor of Emergency Medicine

Stephen Cummings  
Clinical Assistant Professor of Family Medicine

Melissa Curran  
Teaching Associate in Pediatrics

Lewis Perry Curtis  
Professor Emeritus of History

Marlene Cutitar  
Clinical Assistant Professor of Surgery

David Cutts  
Professor of Physics

Vaclav Cvrcek  
Visiting Scholar in Slavic Studies

Michele G. Cyr  
Professor of Medical Science; Professor of Medicine

John K. Czerwein  
Clinical Assistant Professor of Orthopaedics

Adam J. Czynski  
Assistant Professor of Pediatrics, Clinician Educator

Anelyssa D'Abreu  
Associate Professor of Neurology

Erika D'Agata  
Professor of Medicine

Daniel J. D'Amico  
Lecturer in Economics

Catherine D'Avanzato  
Clinical Assistant Professor of Psychiatry and Human Behavior

Viren A. D'Sa  
Associate Professor of Pediatrics, Clinician Educator

Constantine Michael Dafermos  
Alumni-Alumnae University Professor of Applied Mathematics

Albert E. Dahlberg  
Professor Emeritus of Medical Science

Lori Daiello  
Associate Professor of Health Services, Policy and Practice (Research); Associate Professor of Neurology (Research)

Karen Daigle  
Clinical Professor of Pediatrics

Arthur D. Daily  
Clinical Associate Professor Emeritus of Dermatology

Deepan Dalal  
Assistant Professor of Medicine, Clinician Educator

Pedro Dal Bo  
Professor of Economics

Julie M. Daley  
Teaching Associate in Obstetrics and Gynecology

Kristy L. Dalrymple Gaudiano  
Associate Professor of Psychiatry and Human Behavior, Clinician Educator

Colleen A. Dalton  
Associate Professor of Earth, Environmental, and Planetary Sciences

Brian P. Daly  
Clinical Assistant Professor of Psychiatry and Human Behavior

Suzanne C. Dambek  
Clinical Instructor in Medical Science

Pamela Dana-Snyder  
Clinical Instructor in Medical Science

Eileen M. Danaher  
Clinical Assistant Professor of Surgery

Sarah d'Angelo  
Assistant Professor of Theatre Arts and Performance Studies

Alan H. Daniels  
Associate Professor of Orthopaedics

Jerry Delmar Daniels  
Associate Professor Emeritus of Engineering

Valery A. Danilack  
Assistant Professor of Epidemiology (Research); Assistant Professor of Obstetrics and Gynecology (Research)

Katelyn Dannheim  
Assistant Professor of Pathology and Laboratory Medicine

Jerome B. Darbon  
Assistant Professor of Applied Mathematics

Eric M. Darling  
Associate Professor of Engineering; Associate Professor of Medical Science; Associate Professor of Orthopaedics

Manuel F. Dasilva  
Associate Professor of Orthopaedics

Karla Da Silva Braga  
Visiting Scholar in Surgery

Georgios D. Daskalopoulos  
Professor of Mathematics

Ingrid Daubar  
Senior Research Associate in Earth, Environmental, and Planetary Sciences

Sarah Davenport  
Clinical Assistant Professor of Family Medicine

Kristin C. Davidoff  
Clinical Instructor in Psychiatry and Human Behavior

Kristopher Davignon  
Assistant Professor of Anesthesiology, Clinician Educator

Denise L. Davis  
Senior Lecturer in Gender Studies

Jennifer D. Davis  
Associate Professor of Psychiatry and Human Behavior, Clinician Educator

Lawrence M. Davis  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Robert Paul Davis  
Professor Emeritus of Medical Science

Sarah M. Davis  
Assistant Professor of Obstetrics and Gynecology

Thamara Davis  
Clinical Assistant Professor of Psychiatry and Human Behavior

Laura H. Dawson  
Clinical Instructor in Pediatrics

Michelle Rose Dawson  
Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology

Jayne Daylor  
Teaching Associate in Family Medicine

Alexandra M. Deaconescu  
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry

Thomas L. Dean  
Professor Emeritus of Computer Science

Dedda De Angelis  
Senior Lecturer Emerita in Italian Studies

Sara Deasley  
Teaching Associate in Pediatrics

Lynne deBenedette  
Senior Lecturer in Slavic Studies

Carol L. DeBoer-Langworthy  
Senior Lecturer in English

Jeri B. Debrohun  
Associate Professor of Classics

Normand L. Decelles  
Clinical Instructor in Medical Science

Geoffroy De Clippel  
Professor of Economics

Nishi Dedania  
Assistant Professor of Medicine, Clinician Educator; Assistant Professor of Pediatrics, Clinician Educator

Colleen E. Deems  
Teaching Associate in Pediatrics

Catherine Degood  
Adjunct Assistant Professor of Family Medicine

Christopher L. de Graffenried  
Assistant Professor of Molecular Microbiology and Immunology

Laura Deihl  
Clinical Assistant Professor of Psychiatry and Human Behavior

Christopher A. Deister  
Research Associate in Neuroscience

Lindsay Delaire  
Teaching Associate in Obstetrics and Gynecology

Shontay Delalue  
Adjunct Assistant Professor of American Studies

Suzanne M. De La Monte  
Professor of Neurosurgery; Professor of Pathology and Laboratory Medicine

Sarah Delaney  
Associate Professor of Chemistry

Ronald A. De Lellis  
Professor Emeritus of Pathology and Laboratory Medicine

Lauren DeLeon  
Clinical Assistant Professor of Medicine

Paul V. Del Guercio  
Clinical Assistant Professor of Family Medicine

Ian P. Dell'Antonio  
Professor of Physics

Alison DeLong  
Associate Professor of Biology

Stacie L. Demarais  
Teaching Associate in Family Medicine

Linda Rose Demello  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Phyllis A. Dennery  
Sylvia Kay Hassenfeld Professor of Pediatrics

Allen M. Dennison  
Clinical Assistant Professor of Medicine

David Denofrio  
Adjunct Associate Professor of Medicine

Gildasio S. De Oliveira  
Professor of Anesthesiology; Professor of Health Services, Policy and Practice

Sean C. L. Deoni  
Associate Professor of Diagnostic Imaging (Research); Associate Professor of Pediatrics (Research)

Monique E. De Paepe  
Professor of Pathology and Laboratory Medicine

Judith Depue  
Clinical Professor Emerita of Psychiatry and Human Behavior

Leo Depuydt  
Professor of Egyptology and Assyriology

Diane DerMarderosian  
Associate Professor of Pediatrics, Clinician Educator

Angela DeRobertis  
Clinical Assistant Professor of Radiation Oncology

Salomi Desai  
Research Associate in Orthopaedics

Andre DeSouza  
Assistant Professor of Medicine

Theresa M. Desrochers  
Rosenberg Family Assistant Professor of Brain Science

Allan Mark Deutsch  
Clinical Associate Professor Emeritus of Diagnostic Imaging

Alexis M. Devine  
Teaching Associate in Medical Science

Roberta DeVito  
Assistant Professor of Biostatistics

Ashok Raj Devkota  
Clinical Assistant Professor of Medicine

Suvekchha Devkota  
Clinical Instructor in Medical Science

Saud Dhillon  
Clinical Assistant Professor of Medicine

Joseph Anthony Diaz  
Associate Professor of Medical Science; Associate Professor of Medicine

Zobeida Diaz  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Alexander Diaz De Villalvilla  
Clinical Assistant Professor of Medicine

Christy Dibble  
Clinical Associate Professor of Medicine

Elizabeth Dibble  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Meadow Dibble  
Visiting Scholar in Slavery and Justice

Lisa DiCarlo  
Lecturer in Sociology

Margaret A. DiCarlo  
Clinical Assistant Professor of Psychiatry and Human Behavior

Daniel P. Dickstein  
Professor of Pediatrics; Professor of Psychiatry and Human Behavior

Susan Dickstein  
Associate Professor of Pediatrics (Research); Associate Professor of Psychiatry and Human Behavior (Research)

Elizabeth R. Didie  
Clinical Associate Professor of Psychiatry and Human Behavior

Gerald J. Diebold  
Professor of Chemistry

Dinusha W. Dietrich  
Clinical Assistant Professor of Pediatrics

Amy Bach Dilello  
Clinical Associate Professor of Psychiatry and Human Behavior

Ann Dill  
Professor Emerita of Sociology

Christopher Dimarco  
Assistant Professor of Dermatology, Clinician Educator

Emily Dimon  
Teaching Associate in Medical Science

Sara DiNardo  
Clinical Assistant Professor of Surgery

Sylviane Anna Diouf  
Visiting Scholar in Slavery and Justice

Thomas Dipetrillo  
Associate Professor of Radiation Oncology

Jamie L. DiPietro  
Clinical Instructor in Psychiatry and Human Behavior

Clemence Disdier  
Research Associate in Pediatrics

Stephen Dizio  
Clinical Assistant Professor of Psychiatry and Human Behavior

Joseph DiZoglio  
Clinical Assistant Professor of Obstetrics and Gynecology

Don S. Dizon  
Professor of Medicine

Linda Doberstein  
Clinical Assistant Professor of Pediatrics

Kimberly A. Dodd  
Assistant Professor of Medicine, Clinician Educator

Thomas W. Doepner  
Associate Professor of Computer Science (Research)

Emily I. Dolan  
Associate Professor of Music

Lisa Ruth Domagalski  
Clinical Assistant Professor of Obstetrics and Gynecology

Fulvio Domini  
Professor of Cognitive, Linguistic and Psychological Sciences

John E. Donahue  
Associate Professor of Neurology; Associate Professor of Pathology and Laboratory Medicine

John P. Donahue  
Clinical Assistant Professor of Surgery

Abigail Donaldson  
Associate Professor of Pediatrics, Clinician Educator

Deidre L. Donaldson  
Clinical Assistant Professor of Family Medicine

Lindsay E. Donat  
Assistant Professor of Surgery, Clinician Educator

Walter E. Donat  
Clinical Associate Professor of Medicine

Linda L. Donegan  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Hongjie Dong  
Professor of Applied Mathematics

Xiaoqun Dong  
Assistant Professor of Medicine (Research)

Kathleen R. Donise  
Associate Professor of Psychiatry and Human Behavior, Clinician Educator

Edward Donnelly  
Assistant Professor of Neurology, Clinician Educator

John P. Donoghue  
Henry Merritt Wriston Professor of Neuroscience

Gary S. Dorfman  
Professor Emeritus of Diagnostic Imaging

David M. Dosa  
Associate Professor of Health Services, Policy and Practice; Associate Professor of Medicine

Edmund T. Dosremedios  
Clinical Assistant Professor of Orthopaedics

Preston Wayne Douglas  
Clinical Instructor in Medical Science

Chelsea Douglass  
Teaching Associate in Pediatrics

Beshara B. Doumani  
Joukowsky Family Distinguished Professor of Modern Middle Eastern History

Joseph L. Dowling  
Clinical Associate Professor Emeritus of Surgery

Richard J. Doyle  
Clinical Assistant Professor of Family Medicine; Clinical Assistant Professor of Medical Science

Dawn Drake  
Teaching Associate in Surgery

Jonathan Drake  
Assistant Professor of Neurology

James Dreier  
Judy C. Lewent and Mark L. Shapiro Professor of Philosophy

Thomas Drew  
Clinical Associate Professor Emeritus of Medicine

Aaron Mark Drucker  
Adjunct Assistant Professor of Dermatology

Fenghai Duan  
Associate Professor of Biostatistics

Ying Duan  
Visiting Scholar

Kristina M. Duarte  
Assistant Professor of Family Medicine, Clinician Educator

Melanie Dubard  
Clinical Assistant Professor of Psychiatry and Human Behavior

Patrycja Dubielecka-Szczerba  
Assistant Professor of Medicine

Brian E. Duff  
Clinical Associate Professor of Surgery

Christine M. Duffy  
Associate Professor of Medicine, Clinician Educator

Susan Duffy  
Professor of Emergency Medicine; Professor of Pediatrics

Raymond G. Dufresne  
Professor of Dermatology

Akilah Dulin  
Associate Professor of Behavioral and Social Sciences

Luba Dumenco  
Assistant Professor of Medical Science, Clinician Educator; Assistant Professor of Pathology and Laboratory Medicine, Clinician Educator

Dorothy M. Dumont  
Assistant Professor of the Practice of Epidemiology

Nancy R. Dunbar  
Senior Lecturer Emerita in Theatre Arts and Performance Studies

Marc J. Dunkelman  
Fellow in International and Public Affairs

Eugene M. Dunne  
Assistant Professor of Psychiatry and Human Behavior

Shira I. Dunsiger  
Assistant Professor of Behavioral and Social Sciences (Research)

George J. Du Pont  
Clinical Assistant Professor of Surgery

Anderson Hunter Dupree  
Professor Emeritus of History

Paul G. Dupuis  
IBM Professor of Applied Mathematics

Frank Durand  
Professor Emeritus of Hispanic Studies

Laura Green Durand  
Professor Emerita of French Studies

Kristin H. Dwyer  
Assistant Professor of Emergency Medicine

Elizabeth Dyer  
Teaching Associate in Family Medicine

Robert K. Dyer  
Clinical Assistant Professor of Dermatology

Anani Dzdzienny  
Associate Professor of Africana Studies; Associate Professor of Portuguese and Brazilian Studies

J. Donald Easton  
Professor Emeritus of Neurology

Erica Eaton  
Assistant Professor of Psychiatry and Human Behavior

Craig P. Ebersson  
Associate Professor of Orthopaedics

Sasha-Mae C. Eccleston  
Assistant Professor of Classics

Robert Eden  
Clinical Assistant Professor of Pediatrics

Timothy H. Edgar  
Senior Fellow in International and Public Affairs

Muhammad Edhi  
Research Associate in Neurosurgery

Laura M. Edmonds  
Assistant Professor of Medicine, Clinician Educator

David Edmonson  
Associate Professor of Obstetrics and Gynecology, Clinician Educator; Associate Professor of Surgery, Clinician Educator

Lee Edstrom  
Professor Emeritus of Surgery

Joely V. Edwards  
Clinical Assistant Professor of Medical Science

Wendy Edwards  
Professor of Visual Art

James F. Egan  
Professor of English

Pamela Egan  
Assistant Professor of Medicine, Clinician Educator

Renee Ross Eger  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Gauti B. Eggertsson  
Professor of Economics

Thomas K. Egglin  
Associate Professor of Diagnostic Imaging

David Egilman  
Clinical Professor of Family Medicine

Amy Egolf  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Carsten Eickhoff  
Assistant Professor of Computer Science; Assistant Professor of Medical Science

Ibrahim Eid  
Clinical Instructor in Medical Science

Charles Eil  
Clinical Associate Professor of Medicine

Yul D. Ejnes  
Clinical Associate Professor of Medicine

Elizabeth E. Eklund  
Research Associate in Pathology and Laboratory Medicine

Wafik S. El-Deiry  
Mencoff Family University Professor, Professor of Pathology and Laboratory Medicine

Christopher Elco  
Assistant Professor of Dermatology; Assistant Professor of Pathology and Laboratory Medicine

Lana G. Elhalabi  
Clinical Assistant Professor of Psychiatry and Human Behavior

Salaheldin Elhamamsy  
Clinical Assistant Professor of Medicine

Jack A. Elias  
Frank L. Day Professor of Biology

Heinrich Elinzano  
Associate Professor of Medicine, Clinician Educator; Associate Professor of Neurology, Clinician Educator

Jonathan Elion  
Clinical Associate Professor of Medicine

Sadie Elisseou  
Assistant Professor of Medicine, Clinician Educator

Sleiman El Jamal  
Assistant Professor of Neurology

Claudia Elliott  
Senior Lecturer in International and Public Affairs

Gregory C. Elliott  
Professor of Sociology

Alexandra Grace Ellis  
Research Associate in Health Services, Policy and Practice

Tina M. Ellis  
Clinical Instructor in Anesthesiology

Fadya El Rayess  
Associate Professor of Family Medicine, Clinician Educator

Martin Elson  
Clinical Assistant Professor of Surgery

Anashua Rani Ghose Elwy  
Associate Professor of Psychiatry and Human Behavior

Rinchen-Tzo Emgushov  
Clinical Assistant Professor of Medicine

John S. Emigh  
Professor Emeritus of English; Professor Emeritus of Theatre Arts and Performance Studies

Timothy M. Empkie  
Clinical Associate Professor of Family Medicine

Iuliana Veronica Ene  
Assistant Professor of Molecular Microbiology and Immunology (Research)

Esther Entin  
Clinical Associate Professor Emerita of Family Medicine

Yoash R. Enzer  
Clinical Associate Professor of Dermatology; Clinical Associate Professor of Surgery

Alan Epstein  
Clinical Assistant Professor of Medicine

Lynn C. Epstein  
Clinical Professor Emerita of Behavioral and Social Sciences; Clinical Professor Emerita of Psychiatry and Human Behavior

Mel H. Epstein  
Professor Emeritus of Neurosurgery

Nathan B. Epstein  
Professor Emeritus of Psychiatry and Human Behavior

Gary P. Epstein-Lubow  
Associate Professor of Health Services, Policy and Practice; Associate Professor of Medical Science; Associate Professor of Psychiatry and Human Behavior

Allan Erickson  
Associate Professor Emeritus of Medicine

Shannon Marie Erisman  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Sebhat Erqou  
Assistant Professor of Medicine

Shaunna Escobar  
Clinical Instructor in Family Medicine

Kevin A. Escudero  
Assistant Professor of American Studies

Matthew A. Esposito  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Eric S. Estes  
Adjunct Assistant Professor of American Studies

David Estlund  
Lombardo Family Professor of the Humanities, Professor of Philosophy

Elkin O. Estrada  
Clinical Assistant Professor of Medicine

Peter T. Evangelista  
Associate Professor of Diagnostic Imaging, Clinician Educator

Alexander J. Evans  
Assistant Professor of Earth, Environmental, and Planetary Sciences

Andrew R. Evans  
Assistant Professor of Orthopaedics

Erin Whitney Evans  
Assistant Professor of Psychiatry and Human Behavior (Research)

Samuel K. Evans  
Assistant Professor of Medicine, Clinician Educator

Tarra B. Evans  
Clinical Assistant Professor of Surgery

Svetlana Evdokimova  
Professor of Comparative Literature; Professor of Slavic Studies

Chanee D. Fabius  
Adjunct Assistant Professor of Health Services, Policy and Practice

Laura E. Fabricant  
Clinical Instructor in Psychiatry and Human Behavior

Paul Fadale  
Professor of Orthopaedics

Mark J. Fagan  
Professor Emeritus of Medicine

William G. Fairbrother  
Professor of Biology

Miled Faiza  
Senior Lecturer in Language Studies

M. Khurram Faizan  
Associate Professor of Pediatrics, Clinician Educator

Peter L. Falb  
Professor Emeritus of Applied Mathematics

Justin R. Fallon  
Professor of Medical Science; Professor of Psychiatry and Human Behavior

Jiji Fan  
Assistant Professor of Physics

Jack A. Fanning  
Assistant Professor of Economics

Katherine E. Faricy-Anderson  
Assistant Professor of Medicine

Dimitrios Farmakiotis  
Assistant Professor of Medicine

Jesse Farmer  
Visiting Scientist in Earth, Environmental, and Planetary Sciences

Joseph Farnam  
Clinical Assistant Professor of Medical Science

Elisabeth K. Farnum  
Clinical Assistant Professor of Family Medicine

David S. Farrell  
Clinical Associate Professor of Dermatology

Loren D. Fast  
Associate Professor Emeritus of Medicine

Paja L. Faudree  
Associate Professor of Anthropology

Anne Fausto-Sterling  
Nancy Duke Lewis Professor Emerita of Biology

Nicolas Lux Fawzi  
Associate Professor of Molecular Pharmacology, Physiology and Biotechnology

Deirdre M. Fearon  
Associate Professor of Emergency Medicine, Clinician Educator; Associate Professor of Pediatrics, Clinician Educator

Joanne R. Featherston  
Teaching Associate in Medical Science

Jeffrey Feden  
Associate Professor of Emergency Medicine, Clinician Educator

Leslie Ann Feil  
Clinical Assistant Professor of Psychiatry and Human Behavior

Roman Feiman  
Assistant Professor of Cognitive, Linguistic and Psychological Sciences

Allan Maurice Feldman  
Professor Emeritus of Economics

Dmitri Feldman  
Professor of Physics

Martin P. Feldman  
Clinical Instructor Emeritus in Surgery

Oriel FeldmanHall  
Assistant Professor of Cognitive, Linguistic and Psychological Sciences

Lewis Oscar Felix Raj Lucas  
Research Associate in Medicine

Edward R. Feller  
Clinical Professor of Health Services, Policy and Practice; Clinical Professor of Medical Science

Pedro F. Felzenszwalb  
Professor of Engineering

Jun Feng  
Associate Professor of Surgery

Zhanlian Feng  
Adjunct Assistant Professor of Health Services, Policy and Practice

Mary L. Fennell  
C.V. Starr Professor Emerita of Commerce, Organizations, and Entrepreneurship and Professor Emerita of Sociology

Mary Anne Fenton  
Clinical Associate Professor of Medicine

Denise Fernandes  
Assistant Professor of Medicine, Clinician Educator

Fred F. Ferri  
Clinical Professor of Medicine

Sarah J. Fessler  
Clinical Assistant Professor of Family Medicine

Elena K. Festa  
Senior Lecturer in Cognitive, Linguistic and Psychological Sciences

Masako Ueda Fidler  
Professor of Slavic Studies

Vlastimil Fidler  
Visiting Scientist in Chemistry

Alison E. Field  
Professor of Epidemiology; Professor of Pediatrics

Thalia L. Field  
Adele Kellenberg Seaver Professor of Creative Writing

Kristin Fielding  
Clinical Assistant Professor of Family Medicine

Jonathan B. Fine  
Visiting Assistant Professor of German Studies

Jacalyn Finerty  
Teaching Associate in Obstetrics and Gynecology

John W. Finigan  
Clinical Assistant Professor of Pediatrics

Elana B. Finn  
Teaching Associate in Family Medicine

Ruth Lauren Firmin  
Clinical Instructor in Psychiatry and Human Behavior

Elnaz Firoz  
Assistant Professor of Dermatology, Clinician Educator

Bruce E. Fischer  
Clinical Assistant Professor of Medicine

Joshua E. Fischer  
Clinical Assistant Professor of Medicine

Karen M. Fischer  
Professor of Earth, Environmental, and Planetary Sciences

Linford D. Fisher  
Associate Professor of History

Whitney Charles Fisher  
Assistant Professor of Emergency Medicine, Clinician Educator

Richard Fishman  
Professor Emeritus of Visual Art

Kathi Fisler  
Professor of Computer Science (Research)

James L. Fitzgerald  
St. Purander Das Distinguished Professor Emeritus of Classics

Melissa Fitzgerald  
Teaching Associate in Pediatrics

Patricia Jeanne Flanagan  
Professor of Pediatrics

Timothy P. Flanigan  
Professor of Health Services, Policy and Practice; Professor of Medicine

B. Allen Flaxman  
Clinical Professor Emeritus of Dermatology

Alexander Fleischmann  
Provost's Associate Professor of Brain Science

Braden C. Fleming  
Lucy Lippitt Professor of Orthopaedics

Wendell H. Fleming  
University Professor Emeritus, Professor Emeritus of Applied Mathematics and Mathematics

Andrea E. Flores  
Assistant Professor of Education

Libertad Thelma Flores  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Michael W. Flores  
Research Associate in Health Services, Policy and Practice

Ellen Flynn  
Clinical Assistant Professor of Medicine; Clinical Assistant Professor of Psychiatry and Human Behavior

Leanne Flynn  
Teaching Associate in Pediatrics

Mary M. Flynn  
Associate Professor of Medicine, Clinician Educator

Pamela S. P. Foa  
Senior Fellow in Gender Studies

John L. Foggie  
Associate Professor of Emergency Medicine, Clinician Educator

Stephen Merriam Foley  
Associate Professor of Comparative Literature; Associate Professor of English

Rodrigo Fonseca  
Associate Professor of Computer Science

Michelle M. Forcier  
Professor of Pediatrics, Clinician Educator

Sara R. Ford  
Associate Professor of Pediatrics, Clinician Educator

Edwin N. Forman  
Professor Emeritus of Pediatrics

Julie Forrest  
Clinical Assistant Professor of Psychiatry and Human Behavior

Donald W. Forsyth  
James Manning Professor Emeritus of Earth, Environmental and Planetary Science

Glenn G. Fort  
Clinical Associate Professor of Medicine

David J. Fortunato  
Clinical Associate Professor of Medicine

Andrew D. Foster  
George S. and Nancy B. Parker Professor of Economics

Aryandokht Fotros  
Clinical Instructor in Psychiatry and Human Behavior

Rachel L. Fowler  
Associate Professor of Emergency Medicine, Clinician Educator

Gregory A. Fox  
Clinical Assistant Professor of Pediatrics

Baylor Fox-Kemper  
Associate Professor of Earth, Environmental, and Planetary Sciences

A. Raymond Frackelton  
Adjunct Associate Professor of Pathology and Laboratory Medicine (Research)

Laura L. Frakey  
Clinical Assistant Professor of Psychiatry and Human Behavior

Caren L. Francione  
Clinical Assistant Professor of Psychiatry and Human Behavior

Greta Francis  
Associate Professor of Psychiatry and Human Behavior

Tyler V. Franconi  
Visiting Assistant Professor of Archaeology and the Ancient World

Heather M. Frank  
Clinical Assistant Professor of Psychiatry and Human Behavior

Michael J. Frank  
Edgar L. Marston Professor of Psychology

Hamish S. Fraser  
Associate Professor of Medical Science

Elisabeth A. Frazier  
Clinical Assistant Professor of Psychiatry and Human Behavior

Arthur Frazzano  
Clinical Associate Professor Emeritus of Family Medicine

Lisa M. Freda  
Clinical Assistant Professor of Psychiatry and Human Behavior

Meghan Elizabeth Fredette  
Assistant Professor of Pediatrics, Clinician Educator

Alisa Freed  
Clinical Assistant Professor of Family Medicine

Linn F. Freedman  
Adjunct Professor of the Practice of Computer Science

Jennifer B. Freeman  
Professor of Psychiatry and Human Behavior (Research)

Nancy J. Freeman  
Clinical Associate Professor of Medicine

Sarah Freeman  
Assistant Professor of Medicine, Clinician Educator

Richard N. Freiman  
Associate Professor of Medical Science

Katharine French  
Assistant Professor of Medicine, Clinician Educator

Lambert B. Freund  
Professor Emeritus of Engineering

Scott A. Frickel  
Professor of Environment and Society and Sociology

David L. Fried  
Clinical Assistant Professor of Medicine

Herbert M. Fried  
Professor Emeritus of Physics

Rachel M. Friedberg  
Distinguished Senior Lecturer in Economics

John N. Friedman  
Professor of Economics; Professor of International and Public Affairs

Joseph H. Friedman  
Professor of Neurology

Gary N. Frishman  
Professor of Obstetrics and Gynecology

John A. Froehlich  
Professor of Orthopaedics, Clinician Educator

Carolyn Fruci  
Clinical Instructor in Medical Science

Lina M. Fruzzetti  
Professor of Anthropology

Helen Fuchs  
Assistant Professor of Medicine (Research)

Miguel Fuentes  
Clinical Instructor in Medical Science

John P. Fulton  
Clinical Associate Professor of Behavioral and Social Sciences

Christopher M. Furey  
Assistant Professor of Family Medicine, Clinician Educator

Karen L. Furie  
Samuel I. Kennison, M.D., and Bertha S. Kennison Professor of Clinical Neuroscience

Martin Furman  
Clinical Associate Professor of Psychiatry and Human Behavior

Michael Furman  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Elizabeth Fussell  
Associate Professor of Population Studies (Research)

Matthew Fuxjager  
Assistant Professor of Ecology and Evolutionary Biology

Yves Gabellini  
Visiting Scientist in Physics

Ari S. Gabinet  
Senior Fellow in International and Public Affairs

Emily Aurora Gadbois  
Assistant Professor of Health Services, Policy and Practice

Joseph R. Gaeta  
Clinical Assistant Professor Emeritus of Medicine

Barbara Miller Gaines  
Clinical Instructor in Pediatrics

Jeffrey Gaines  
Clinical Assistant Professor of Emergency Medicine

Sarah A. Gaines  
Associate Professor of Emergency Medicine, Clinician Educator

Richard J. Gaitskell  
Hazard Professor of Physics

Omar Galarraga  
Associate Professor of Health Services, Policy and Practice

Janine Galione  
Clinical Instructor in Psychiatry and Human Behavior

Harris M. Galkin  
Clinical Assistant Professor of Obstetrics and Gynecology

Anthony L. Gallo  
Clinical Assistant Professor of Psychiatry and Human Behavior

Katharina M. Galor  
Visiting Associate Professor of Judaic Studies

Oded Galor  
Herbert H. Goldberger Professor of Economics

Forrest Gander  
Adele Kellenberg Seaver '49 Professor Emeritus of Creative Writing, Professor Emeritus of Literary Arts, and Professor Emeritus of Comparative Literature

Leela Gandhi  
John Hawkes Professor of the Humanities and English

Niel Gandhi  
Clinical Assistant Professor of Family Medicine

Michele R. Gange  
Clinical Assistant Professor of Obstetrics and Gynecology

Perna Ganjoo  
Clinical Assistant Professor of Medicine

Oren Ganor  
Adjunct Assistant Professor of Medical Science

Kim M. Gans  
Adjunct Professor of Behavioral and Social Sciences

Theresa Claire Ganz  
Assistant Professor of Visual Art

Huajian Gao  
Walter H. Annenberg Professor Emeritus of Engineering

Laurie Anne Garabedian  
Clinical Instructor in Family Medicine

Stephanie Garbern  
Assistant Professor of Emergency Medicine

Abbe L. Garcia  
Associate Professor of Psychiatry and Human Behavior, Clinician Educator

Dioscaris Garcia  
Assistant Professor of Orthopaedics (Research)

Maria Luisa Garcia-Moliner  
Associate Professor of Pathology and Laboratory Medicine, Clinician Educator

Enza Carolina Garcia Arreaza  
Visiting Fellow in Literary Arts

Cynthia T. Garcia Coll  
Charles Pitts Robinson and Palmer Barstow Professor Emerita of Education

Monica Adriana Garcia Solache  
Assistant Professor of Medicine (Research)

Adrian Gardner  
Adjunct Assistant Professor of Medicine

Rebekah L. Gardner  
Associate Professor of Medicine

Ilana F. Gareen  
Associate Professor of Epidemiology (Research)

Veenu Garewal  
Clinical Assistant Professor of Medicine

Joseph Garland  
Associate Professor of Medicine, Clinician Educator

Ana C. Garnecho  
Assistant Professor of Pediatrics, Clinician Educator

Eric J. Gartman  
Assistant Professor of Medicine

Generoso G. Gascon  
Professor Emeritus of Neurology; Professor Emeritus of Pediatrics

Mason C. Gasper  
Assistant Professor of Neurology, Clinician Educator

Jennifer S. Gass  
Professor of Obstetrics and Gynecology; Professor of Surgery

Jonathan Gastel  
Clinical Instructor in Orthopaedics

Sylvester James Gates  
Ford Foundation Professor of Physics

Stephen M. Gatesy  
Professor of Biology; Professor of Medical Science

Emily C. Gathright  
Assistant Professor of Psychiatry and Human Behavior

Constantine A. Gatsonis  
Henry Ledyard Goddard University Professor of Statistical Sciences

Brandon A. Gaudiano  
Associate Professor of Behavioral and Social Sciences; Associate Professor of Psychiatry and Human Behavior

Sara Washburn Fuller Geffert  
Assistant Professor of Medicine, Clinician Educator

Sergei Gelfand  
Visiting Scholar in Mathematics

Arthur I. Geltzer  
Clinical Associate Professor Emeritus of Surgery

John A. Gelzhiser  
Clinical Assistant Professor of Medicine

Stuart Geman  
James Manning Professor of Applied Mathematics

Becky L. Genberg  
Adjunct Assistant Professor of Health Services, Policy and Practice

Alicia Genisca  
Assistant Professor of Emergency Medicine, Clinician Educator; Assistant Professor of Pediatrics, Clinician Educator

Bethany J. GentileSCO  
Associate Professor of Medical Science, Clinician Educator; Associate Professor of Medicine, Clinician Educator

Olakunle George  
Professor of English

Susan A. Gerbi  
George D. Eggleston Professor of Biochemistry

Jonathan Gershon  
Clinical Assistant Professor of Psychiatry and Human Behavior

Linda Gershon  
Teaching Associate in Medical Science

Siavash Ghoreishi  
Clinical Instructor in Medical Science

Deepraj Ghosh  
Research Associate in Molecular Pharmacology, Physiology and Biotechnology

Bradford Martin Gibbs  
Lecturer in Economics

Frantz J. Gibbs  
Associate Professor of Emergency Medicine, Clinician Educator

Sharon E. Gibson  
Clinical Associate Professor of Surgery

Basilis Gidas  
Professor of Applied Mathematics

James Giddings  
Clinical Instructor in Emergency Medicine

Donald B. Giddon  
Clinical Professor Emeritus of Behavioral and Social Sciences

Arnoldas Giedrimas  
Assistant Professor of Medicine, Clinician Educator

Jeanette G. Giedrimas  
Assistant Professor of Medicine, Clinician Educator

David R. Gifford  
Clinical Associate Professor of Health Services, Policy and Practice; Clinical Associate Professor of Medicine

Holly C. Gil  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Joseph Gil  
Assistant Professor of Orthopaedics

Bruno J. Giletti  
Professor Emeritus of Earth, Environmental, and Planetary Sciences

Mary Louise G. Gill  
David Benedict Professor of Classics and Philosophy

Fizza S. Gillani  
Assistant Professor of Medicine (Research)

Peter Joseph Gillen  
Clinical Assistant Professor of Psychiatry and Human Behavior

Dana Gionta  
Clinical Instructor in Psychiatry and Human Behavior

Wilfredo Giordano-Perez  
Clinical Assistant Professor of Family Medicine

Marcoandrea Giorgi  
Assistant Professor of Surgery, Clinician Educator

Jeannine Giovanni  
Clinical Assistant Professor of Medical Science

Daren Girard  
Clinical Assistant Professor of Medical Science

Nicole D. Gleyzer  
Clinical Instructor in Surgery

Denise Glickman  
Clinical Assistant Professor of Medicine

Stephen E. Glinick  
Clinical Associate Professor of Dermatology

Mary Gluck  
Dorot Professor of History and Judaic Studies

Lauren A. Goddard  
Clinical Assistant Professor of Family Medicine

Moses Goddard  
Adjunct Associate Professor of Molecular Pharmacology, Physiology and Biotechnology

Ritu Goel  
Clinical Instructor in Surgery

Anupriya Gogne  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Reginald Y. Gohh  
Professor of Medicine

Andrea Gold  
Clinical Assistant Professor of Psychiatry and Human Behavior

Richard L. Gold  
Associate Professor of Diagnostic Imaging, Clinician Educator

Amy P. Goldberg  
Associate Professor of Pediatrics, Clinician Educator

Elizabeth M. Goldberg  
Associate Professor of Emergency Medicine; Associate Professor of Health Services, Policy and Practice

William Arthur Golden  
Clinical Assistant Professor of Medicine

Amy Goldfarb  
Clinical Assistant Professor of Medicine

Meryl Goldhaber  
Clinical Instructor in Medical Science

Roberta E. Goldman  
Clinical Professor of Family Medicine

Calvin Goldscheider  
Professor Emeritus of Sociology and Ungerleider Professor Emeritus of Judaic Studies

Frances K. Goldscheider  
University Professor Emerita and Professor Emerita of Sociology

Andrea Goldschmidt  
Assistant Professor of Psychiatry and Human Behavior (Research)

Ariel Goldschmidt  
Clinical Assistant Professor of Pathology and Laboratory Medicine

Franklin Franklin Goldsmith  
Assistant Professor of Engineering

Lisa J. Goldstein  
Clinical Assistant Professor of Pathology and Laboratory Medicine

Dragan Golijanin  
Associate Professor of Surgery

Sanda A. Golopentia  
Professor Emerita of French Studies

Natalia Golova  
Associate Professor of Pediatrics, Clinician Educator

Vladimir Golstein  
Associate Professor of Slavic Studies

Spencer Golub  
Professor of Comparative Literature; Professor of Slavic Studies; Professor of Theatre Arts and Performance Studies

Eva M. Gomez Garcia  
Lecturer in Hispanic Studies

Eugenio Goncalves de Araujo  
Visiting Scholar in Surgery

Ernesto Gonzalez  
Clinical Instructor in Medical Science

Nicole Gonzalez Van Cleve  
Associate Professor of Sociology

Katherine R. Goodman  
Professor Emerita of German Studies

Thomas G. Goodwillie  
Professor of Mathematics

Emily Goodwin  
Clinical Instructor in Anesthesiology

Kimberly G. Goodyear Chavanne  
Assistant Professor of Behavioral and Social Sciences (Research); Assistant Professor of Psychiatry and Human Behavior (Research)

Dana A. Gooley  
Professor of Music

Vidya Vellore Gopinath  
Assistant Professor of Medicine, Clinician Educator

Pamina Gorbach  
Adjunct Professor of Medicine

Alan L. Gordon  
Clinical Associate Professor Emeritus of Psychiatry and Human Behavior

Norman M. Gordon  
Clinical Associate Professor of Neurology

Paul C. Gordon  
Associate Professor of Medicine, Clinician Educator

George E. Goslow  
Professor Emeritus of Biology

Carin A. Got  
Clinical Instructor in Anesthesiology

Christopher J. Got  
Assistant Professor of Orthopaedics

Cheryl Gottesman  
Clinical Assistant Professor of Medicine

Alma Gottlieb  
Visiting Scholar in Anthropology

Lisa Gould  
Clinical Associate Professor of Medicine

Philip Gould  
Israel J. Kapstein Professor of English

Richard Allan Gould  
Professor Emeritus of Anthropology

Alexander H. Gourevitch  
Associate Professor of Political Science

Barbara Gourlay  
Senior Lecturer in Language Studies

Pedro Luis Gozalo  
Professor of Health Services, Policy and Practice (Research)

Dina Gozman  
Assistant Professor of Emergency Medicine, Clinician Educator

Janet Grace  
Professor Emerita of Psychiatry and Human Behavior

Steven N. Graff  
Clinical Assistant Professor of Orthopaedics

Chelsea E. Graham  
Clinical Instructor in Family Medicine

Cornelius O. Granai  
Professor of Obstetrics and Gynecology

David J. Grand  
Associate Professor of Diagnostic Imaging

Thierry Francois Grandou  
Visiting Scientist in Physics

Cameron Grant  
Teaching Associate in Family Medicine

Scott J. Gratz  
Research Associate in Neuroscience

Stephen Richards Graubard  
Professor Emeritus of History

Stefan Gravenstein  
Professor of Health Services, Policy and Practice; Professor of Medicine

Theresa A. Graves  
Assistant Professor of Surgery, Clinician Educator

Bradford Clayton Gray  
Clinical Assistant Professor of Surgery

Marissa Lynne Gray  
Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology (Research)

Andrew Green  
Professor of Orthopaedics

Carol Green  
Clinical Instructor in Family Medicine

Emily P. Green  
Assistant Professor of Medical Science

James N. Green  
Carlos Manuel de Cespedes Professor of Modern Latin American History and Portuguese and Brazilian Studies

Benjamin D. Greenberg  
Professor of Psychiatry and Human Behavior

David M. Greenberg  
Clinical Assistant Professor of Surgery

Samuel H. Greenblatt  
Professor Emeritus of Neurosurgery

A. Gerson Greenburg  
Professor Emeritus of Surgery

Amy R. Greenwald  
Professor of Computer Science

Daniel Greenwald  
Assistant Professor of Medicine, Clinician Educator

Steven T. Gregory  
Associate Professor of Medical Science (Research)

Angela Grenander-Raufi  
Clinical Instructor in Medical Science

Nicole L. Grenier  
Assistant Professor of Dermatology, Clinician Educator

Mark W. Greve  
Clinical Associate Professor of Emergency Medicine

Jerome B. Grieder  
Professor Emeritus of East Asian Studies; Professor Emeritus of History

Robert T. Griffith  
Clinical Associate Professor of Pediatrics

Diana Grigsby  
Associate Professor of Behavioral and Social Sciences

Ricky Grisson  
Assistant Professor of Pathology and Laboratory Medicine

Kathryn J. Grive  
Assistant Professor of Obstetrics and Gynecology (Research)

Jan C. Groblewski  
Assistant Professor of Pediatrics, Clinician Educator; Assistant Professor of Surgery, Clinician Educator

L. Peter Gromet  
Professor Emeritus of Earth, Environmental, and Planetary Sciences

Andrey A. Gromov  
Assistant Professor of Physics

Nicholas Grumbach  
Clinical Assistant Professor of Medicine; Clinical Assistant Professor of Pediatrics

Helen G. Grundman  
Visiting Scholar in Mathematics

Philip A. Gruppuso  
Professor of Medical Science; Professor of Pediatrics; Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Yingjie Guan  
Assistant Professor of Medicine (Research)

Pradeep R. Guduru  
Professor of Engineering

Charlotte Sophie Guetta  
Research Associate in Neurosurgery

Maria Guglielmo  
Assistant Professor of Neurosurgery

Fusun Gundogan  
Professor of Pathology and Laboratory Medicine

Rachel L. Gunn  
Assistant Professor of Behavioral and Social Sciences

Yan Guo  
Professor of Applied Mathematics

Gaurav Gupta  
Clinical Assistant Professor of Surgery

Zachary Guralnik  
Visiting Scientist in Physics

Matthew Guterl  
Professor of Africana Studies and American Studies

Kate M. Guthrie  
Professor of Behavioral and Social Sciences; Professor of Psychiatry and Human Behavior

Tracey Guthrie  
Associate Professor of Medical Science, Clinician Educator; Associate Professor of Psychiatry and Human Behavior, Clinician Educator

Joshua D. Gutman  
Clinical Assistant Professor of Family Medicine

Roe Gutman  
Associate Professor of Biostatistics

Matthew C. Gutmann  
Professor of Anthropology

Thomas E. Gutmacher  
Clinical Assistant Professor of Family Medicine

Paul D. Guyer  
Jonathan Nelson Professor of Humanities and Philosophy

- Ruth Guyer  
Clinical Assistant Professor of Medicine
- Johnny Guzman  
Associate Professor of Applied Mathematics
- Tsewang Gyurme  
Clinical Assistant Professor of Medicine
- Hyunju Ha  
Visiting Lecturer in East Asian Studies
- Richard Alan Haas  
Associate Professor of Diagnostic Imaging, Clinician Educator; Associate Professor of Neurology, Clinician Educator; Associate Professor of Neurosurgery, Clinician Educator
- Fadlallah G. Habr  
Associate Professor of Medicine, Clinician Educator
- Jason B. Hack  
Professor of Emergency Medicine
- Charles Hackett  
Assistant Professor of Family Medicine, Clinician Educator
- Robert B. Hackey  
Adjunct Professor of International and Public Affairs
- James E. Haddow  
Professor Emeritus of Pathology and Laboratory Medicine
- Wendy S. Hadley  
Associate Professor of Psychiatry and Human Behavior (Research)
- Sarah E. Hagin  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator
- Chi-Ming Hai  
Professor of Medical Science
- Lisa Haines  
Clinical Instructor in Medical Science
- Philip Haines  
Assistant Professor of Medicine
- Sheila A. Haley  
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (Research)
- Jacquelyn Halliday  
Teaching Associate in Obstetrics and Gynecology
- Amy R. Halt  
Clinical Assistant Professor of Psychiatry and Human Behavior
- Mohamad Hamdi  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator
- Yannis Hamilakis  
Joukowsky Family Professor of Archaeology and Professor of Modern Greek Studies
- Geoffrey R. Hamilton  
Clinical Assistant Professor of Medicine
- Francoise N. Hamlin  
Associate Professor of Africana Studies and History
- Fatma Hammad  
Assistant Professor of Medicine, Clinician Educator
- Brittany Star Hampton  
Professor of Medical Science; Professor of Obstetrics and Gynecology
- Jae Hee Han  
Assistant Professor of Religious Studies
- Johanna M. Hanink  
Associate Professor of Classics
- Cynthia M. Hanna  
Clinical Assistant Professor of Obstetrics and Gynecology
- Katrine Hansen  
Associate Professor of Pathology and Laboratory Medicine
- Erica J. Hardy  
Assistant Professor of Medicine, Clinician Educator; Assistant Professor of Obstetrics and Gynecology, Clinician Educator
- Danielle Harik  
Clinical Instructor in Family Medicine
- Uma Harinarayanan  
Clinical Assistant Professor of Medical Science
- Thomas J. Haronian  
Clinical Associate Professor of Emergency Medicine
- David T. Harrington  
Professor of Surgery
- Elizabeth O. Harrington  
Professor of Medicine
- Bruno Harris  
Professor Emeritus of Mathematics
- Daniel M. Harris  
Assistant Professor of Engineering; Clinical Instructor in Family Medicine
- Tim Harris  
Munro, Goodwin, Wilkinson Professor of European History
- Abigail D. Harrison  
Associate Professor of Behavioral and Social Sciences (Research)
- Emily C. Harrison  
Clinical Assistant Professor of Family Medicine
- Jill S. Harrison  
Assistant Professor of the Practice of Health Services, Policy and Practice
- Matthew T. Harrison  
Associate Professor of Applied Mathematics
- Pamela A. Harrop  
Clinical Assistant Professor of Medicine
- Jason D. Harry  
Hugh Pearson Professor of the Practice of Technology and Entrepreneurship, Professor of the Practice of Engineering
- Alison Rachel Hart  
Assistant Professor of Diagnostic Imaging, Clinician Educator
- Anne C. Hart  
Professor of Neuroscience
- Katherine Hart  
Clinical Instructor in Pediatrics
- Stephanie Hartselle  
Clinical Associate Professor of Psychiatry and Human Behavior
- Susan Ashbrook Harvey  
Willard Prescott and Annie McClelland Smith Professor of History and Religion
- Joseph I. Harwell  
Clinical Associate Professor of Medicine; Clinical Associate Professor of Pediatrics
- Dana D'Alessandro Haseotes  
Teaching Associate in Medical Science
- Alla O. Hassan  
Lecturer
- Brendan E. Hasset  
Professor of Mathematics
- Justine Hastings  
Professor of Economics; Professor of International and Public Affairs
- Meredith K. Hastings  
Associate Professor of Environment and Society and Earth, Environmental, and Planetary Sciences
- Nobuhiko Hata  
Adjunct Professor of Radiation Oncology
- Kazuki Hatayama  
Research Associate in Pediatrics

Beverly Haviland  
Senior Lecturer in American Studies; Visiting Associate Professor of American Studies

Katheleen Hawes  
Clinical Assistant Professor of Pediatrics

Edward Hawrot  
Alva O. Way Professor of Medical Science

Roman A. Hayda  
Professor of Orthopaedics

Alexander J. Haynes  
Lecturer in Theatre Arts and Performance Studies

Kenneth Haynes  
Professor of Classics; Professor of Comparative Literature

Anthony Richard Hayward  
Professor of Pediatrics (Research)

Geoffrey Hayward  
Assistant Professor of Anesthesiology, Clinician Educator

Barrett Hazeltine  
Professor Emeritus of Engineering

Yixin He  
Visiting Scholar in Surgery

James W. Head  
Louis and Elizabeth Scherck Distinguished Professor Emeritus of the Geological Sciences

Eugene H. Healey  
Clinical Assistant Professor Emeritus of Surgery

Dwight B. Heath  
Professor Emeritus of Anthropology

Richard Kimberly Heck  
Professor of Philosophy

Daithi J. Heffernan  
Associate Professor of Surgery

Benjamin P. Hein  
Assistant Professor of History

William C. Heindel  
Professor of Cognitive, Linguistic and Psychological Sciences

Ulrich Heintz  
Professor of Physics

Heidi Heitkamp  
Senior Fellow in International and Public Affairs

Stephen L. Helfand  
Professor of Biology

Molly Heller  
Teaching Associate in Medical Science

Patrick G. Heller  
Lyn Crost Professor of Social Sciences, Professor of International and Public Affairs and Sociology

Jennifer Hellmuth  
Clinical Assistant Professor of Psychiatry and Human Behavior

David L. Henann  
James R. Rice Assistant Professor of Solid Mechanics

J. Vernon Henderson  
Professor Emeritus of Population Studies

Gabriel Hendricks  
Research Associate in Medicine

Paget Henry  
Professor of Africana Studies and Sociology

Angelita Hensman  
Assistant Professor of Pediatrics (Research)

Jaroslav T. Hepel  
Associate Professor of Neurosurgery; Associate Professor of Radiation Oncology

Timothy D. Herbert  
Henry L. Doherty Professor of Oceanography

Thaddeus W. Herliczek  
Associate Professor of Diagnostic Imaging, Clinician Educator

Maurice P. Herlihy  
An Wang Professor of Computer Science

Brendan Hermalyn  
Visiting Scientist in Earth, Environmental, and Planetary Sciences

Arnold Herman  
Clinical Associate Professor of Surgery

Debra S. Herman  
Clinical Associate Professor of Psychiatry and Human Behavior

Karl Herman  
Assistant Professor of Medicine, Clinician Educator

John F. Hermance  
Professor Emeritus of Earth, Environmental, and Planetary Sciences

Laurenz Hermann  
Lecturer Emeritus in Engineering

Jennifer Herren  
Clinical Assistant Professor of Psychiatry and Human Behavior

Melvin Hershkowitz  
Clinical Assistant Professor Emeritus of Medicine

Paul C. Hess  
Professor Emeritus of Earth, Environmental, and Planetary Sciences

Jane Hesser  
Teaching Associate in Psychiatry and Human Behavior

Nadine Hewamudalige  
Clinical Instructor in Family Medicine

Scott Hewitt  
Teaching Associate in Family Medicine

Peter Heywood  
Professor of Biology

Lauri A. Hicks  
Adjunct Assistant Professor of Medicine

Pamela C. High  
Professor of Pediatrics, Clinician Educator

Ellen B. Hight  
Clinical Assistant Professor of Family Medicine

Christopher S. Hill  
William Herbert Perry Faunce Professor of Philosophy

Heather Hill  
Visiting Scholar

Ross Hilliard  
Assistant Professor of Medicine, Clinician Educator

Mary M. Hillstrom  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Leon J. A. Hilton  
Assistant Professor of Theatre Arts and Performance Studies

Nadine T. Himelfarb  
Assistant Professor of Emergency Medicine, Clinician Educator

Thomas Hines  
Clinical Instructor in Medical Science

Emily Hipchen  
Senior Lecturer in English

Sachiko Hiramatsu  
Lecturer in East Asian Studies

Eriko Hironaka  
Visiting Scholar in Mathematics

Daniel A. Hirschman  
Assistant Professor of Sociology

- Laurence M. Hirshberg  
Clinical Assistant Professor of Psychiatry and Human Behavior
- Greg Hirth  
Professor of Earth, Environmental, and Planetary Sciences
- Priyadarshini S. Hirway  
Teaching Associate in Pediatrics
- Kathleen C. Hittner  
Clinical Professor Emerita of Surgery
- Douglas C. Hixson  
Professor Emeritus of Medicine (Research); Professor Emeritus of Pathology and Laboratory Medicine (Research)
- Lynn T. Ho  
Clinical Assistant Professor of Family Medicine
- Leigh R. Hochberg  
Professor of Engineering
- Ameya Hodarkar  
Clinical Assistant Professor of Medicine
- James Hodson  
Teaching Associate in Family Medicine
- Laurie Hoffman  
Assistant Professor of Pediatrics, Clinician Educator
- Diane Hoffman-Kim  
Associate Professor of Engineering; Associate Professor of Medical Science
- Jeffrey Hoffstein  
Professor of Mathematics
- Dawn B. Hogan  
Assistant Professor of Family Medicine, Clinician Educator
- Dennis Hogan  
Robert E. Turner Distinguished Professor Emeritus of Population Studies
- Erin Hogan  
Clinical Assistant Professor of Medicine
- Joseph W. Hogan  
Carole and Lawrence Sirovich Professor of Public Health, Professor of Biostatistics
- Mary H. Hohenhaus  
Assistant Professor of Medicine, Clinician Educator
- Horacio B. Hojman  
Clinical Associate Professor of Psychiatry and Human Behavior
- Jamie Hollenbeck  
Clinical Assistant Professor of Psychiatry and Human Behavior
- William H. Hollinshead  
Assistant Professor of the Practice of Epidemiology
- Peter Amberg Hollmann  
Clinical Assistant Professor of Family Medicine
- R. Ross Holloway  
Elisha Benjamin Andrews Professor Emeritus and Professor Emeritus of Central Mediterranean Archaeology
- Justin A. Holmer  
Associate Professor of Mathematics
- Andrew W. Holowinsky  
Associate Professor Emeritus of Molecular Biology, Cell Biology and Biochemistry
- Joshua Nathanael Honeyman  
Assistant Professor of Pediatrics; Assistant Professor of Surgery
- Qijun Hong  
Senior Research Associate in Engineering
- Bonnie H. Honig  
Nancy Duke Lewis Professor of Modern Culture and Media and Political Science
- Cathleen S. Hood  
Clinical Assistant Professor of Family Medicine
- Juliet Hooker  
Professor of Political Science
- Elizabeth M. Hoover  
Associate Professor of American Studies
- Philip Terrence Hopmann  
Professor Emeritus of Political Science
- Frederic G. Hoppin  
Professor Emeritus of Medicine; Professor Emeritus of Physiology
- Jeffrey D. Horowitz  
Clinical Instructor in Medical Science
- Diana M. Horrigan  
Senior Lecturer in Molecular Pharmacology, Physiology and Biotechnology
- Christopher D. Houck  
Associate Professor of Pediatrics (Research); Associate Professor of Psychiatry and Human Behavior (Research)
- Stephen D. Houston  
Dupee Family Professor of Social Science, Professor of Anthropology
- Elisabeth D. Howard  
Associate Professor of Obstetrics and Gynecology, Clinician Educator
- Margaret M. Howard  
Professor of Medicine, Clinician Educator; Professor of Psychiatry and Human Behavior, Clinician Educator
- Chanelle J. Howe  
Associate Professor of Epidemiology
- Peter W. Howitt  
Professor Emeritus of Economics
- Erik Alexander Hoy  
Clinical Assistant Professor of Medical Science
- James P. Hoye  
Clinical Assistant Professor of Family Medicine
- Kelly L. Hoye  
Clinical Assistant Professor of Family Medicine
- Din-Yu Hsieh  
Professor Emeritus of Applied Mathematics
- Yu-Wen Hsu  
Lecturer in Mathematics
- Lung-Hua Hu  
Senior Lecturer in East Asian Studies
- Evelyn Hu-Dehart  
Professor of American Studies; Professor of History
- Austin Huang  
Adjunct Assistant Professor of Medicine
- Chang Huang  
Visiting Scholar in Environment and Society
- Chiung-Kuei Huang  
Assistant Professor of Medicine (Research)
- Guangyu Huang  
Visiting Scientist
- Jeff Huang  
Assistant Professor of Computer Science
- Jessica Huang  
Clinical Assistant Professor of Family Medicine
- Yongsong Huang  
Professor of Earth, Environmental, and Planetary Sciences
- Yu-Wen Alvin Huang  
GLF Translational Assistant Professor of Molecular Biology, Cell Biology and Biochemistry
- Jia-Lin Huang Hsieh  
Visiting Lecturer in East Asian Studies
- Christian Huber  
Associate Professor of Earth, Environmental, and Planetary Sciences

Neha Hudepohl  
 Assistant Professor of Psychiatry and Human Behavior, Clinician Educator  
 Emilia Huerta-Sanchez  
 Assistant Professor of Ecology and Evolutionary Biology  
 John F. Hughes  
 Professor of Computer Science  
 Jaclyn White Hughto  
 Assistant Professor of Behavioral and Social Sciences; Assistant  
 Professor of Epidemiology  
 Janice Hulme  
 Adjunct Associate Professor of Family Medicine  
 Michael Jan Hulstyn  
 Professor of Orthopaedics  
 Anne L. Hume  
 Adjunct Professor of Family Medicine  
 Jeffrey I. Hunt  
 Professor of Psychiatry and Human Behavior  
 Laird B. Hunt  
 Professor of Literary Arts  
 Vincent R. Hunt  
 Professor Emeritus of Family Medicine  
 Heather L. Hunter  
 Clinical Assistant Professor of Psychiatry and Human Behavior  
 Linda A. Hunter  
 Associate Professor of Obstetrics and Gynecology, Clinician Educator  
 Marianne V. Hurley  
 Teaching Associate in Medicine  
 Robert H. Hurt  
 Professor of Engineering  
 Brett Hurteau  
 Clinical Assistant Professor of Family Medicine  
 Debra Hurwitz  
 Teaching Associate in Family Medicine  
 Zilla H. Hussain  
 Assistant Professor of Medicine, Clinician Educator  
 Omar N. Hyder  
 Assistant Professor of Medicine, Clinician Educator  
 Sarah Marie Hyder  
 Assistant Professor of Medicine, Clinician Educator  
 Harry Iannotti  
 Clinical Assistant Professor of Surgery  
 Edward A. Iannuccilli  
 Clinical Professor Emeritus of Medicine  
 Daniel Enrique Ibarra  
 Visiting Assistant Professor of Environment and Society  
 Farhat Ibrahim  
 Clinical Assistant Professor of Medicine  
 Molly Ierulli  
 Adjunct Assistant Professor of Comparative Literature  
 Lynn E. Iler  
 Clinical Assistant Professor of Dermatology  
 James Ingraham  
 Clinical Assistant Professor of Psychiatry and Human Behavior  
 Robert M. Insoft  
 Professor of Pediatrics, Clinician Educator  
 Julianne Ip  
 Clinical Professor of Family Medicine; Clinical Professor of Medical  
 Science  
 John Isaac  
 Clinical Assistant Professor of Medical Science  
 Amanda Isenberg  
 Teaching Associate in Medical Science  
 Sorin Istrail  
 Julie Nguyen Brown Professor of Computational and Mathematical  
 Science  
 Jose Itzigsohn  
 Professor of Sociology  
 Mikhail A. Ivanov  
 Visiting Scientist in Earth, Environmental, and Planetary Sciences  
 Joseph A. Izzi  
 Assistant Professor of Orthopaedics, Clinician Educator  
 Brian W. Jack  
 Adjunct Associate Professor of Family Medicine  
 Brendan Jacka  
 Investigator in Epidemiology  
 Cynthia L. Jackson  
 Associate Professor of Pathology and Laboratory Medicine  
 Fred V. Jackson  
 Lecturer in Ecology and Evolutionary Biology  
 Ivor M. D. Jackson  
 Professor Emeritus of Medicine  
 Margot Jackson  
 Associate Professor of Sociology  
 Jules Jacob  
 Visiting Scholar in Molecular Pharmacology, Physiology and Biotechnology  
 Elizabeth S. Jacobs  
 Associate Professor of Emergency Medicine, Clinician Educator;  
 Associate Professor of Pediatrics, Clinician Educator  
 Nancy J. Jacobs  
 Professor of History  
 David C. Jacobson  
 Professor of Judaic Studies  
 Pauline I. Jacobson  
 Professor of Cognitive, Linguistic and Psychological Sciences  
 Marc A. Jaffe  
 Clinical Assistant Professor of Obstetrics and Gynecology  
 Amanda M. Jamieson  
 Assistant Professor of Molecular Microbiology and Immunology  
 Judy L. Jang  
 Assistant Professor of Medicine, Clinician Educator  
 Robert H. Janigian  
 Clinical Associate Professor of Surgery  
 Christine Marie Janis  
 Professor Emerita of Ecology and Evolutionary Biology  
 Matthew D. Jankowich  
 Associate Professor of Medicine  
 John H. Jannotti  
 Adjunct Assistant Professor of Computer Science  
 Tim Janssen  
 Assistant Professor of Behavioral and Social Sciences (Research)  
 Sandra Japuntich  
 Assistant Professor of Psychiatry and Human Behavior (Research)  
 Julia Jarcho  
 Associate Professor of Theatre Arts and Performance Studies  
 Alexander Jaworski  
 June G. Zimmerman Assistant Professor of Brain Science  
 Bryan S. Jay  
 Clinical Assistant Professor of Diagnostic Imaging  
 Gregory D. Jay  
 Professor of Emergency Medicine; Professor of Medicine; Professor of  
 Engineering (Research)  
 Robert Ravenelle Jay  
 Professor Emeritus of Anthropology

Mahesh V. Jayaraman  
 Professor of Diagnostic Imaging; Professor of Neurology; Professor of Neurosurgery  
 Chathuraka T. Jayasuriya  
 Assistant Professor of Orthopaedics (Research)  
 Thomas W. Jean  
 Assistant Professor of Medicine, Clinician Educator  
 Elissa Jelalian  
 Professor of Pediatrics; Professor of Psychiatry and Human Behavior  
 Nathaniel J. Jellinek  
 Clinical Assistant Professor of Dermatology  
 Derek Randall Jenkins  
 Assistant Professor of Orthopaedics  
 Ernestine G. Jennings  
 Clinical Assistant Professor of Psychiatry and Human Behavior  
 Ilse M. Jenouri  
 Clinical Associate Professor of Emergency Medicine  
 Euy-Myoung Jeong  
 Assistant Professor of Medicine (Research)  
 Teresa Jeraldo  
 Clinical Instructor in Medical Science  
 Jennifer Jeremiah  
 Associate Professor of Medicine, Clinician Educator  
 Beth A. Jerskey  
 Adjunct Assistant Professor of Psychiatry and Human Behavior  
 Antal Jevicki  
 Professor of Physics  
 Sharon Mullane Jezard  
 Clinical Assistant Professor of Family Medicine  
 Yongwen Jiang  
 Assistant Professor of the Practice of Epidemiology  
 Liwei Jiao  
 Lecturer in East Asian Studies  
 Atin Jindal  
 Assistant Professor of Medicine, Clinician Educator  
 Gaurav Jindal  
 Assistant Professor of Diagnostic Imaging, Clinician Educator  
 Wu Jing  
 Visiting Scholar in Diagnostic Imaging  
 Louis Frederick Jodry  
 Senior Lecturer in Music  
 Gerwald Jogl  
 Associate Professor of Biology  
 Conrad E. Johanson  
 Professor Emeritus of Neurosurgery  
 Benjamin Johnson  
 Clinical Associate Professor of Psychiatry and Human Behavior  
 Eileen G. Johnson  
 Clinical Assistant Professor of Psychiatry and Human Behavior  
 Jennie Elizabeth Johnson  
 Assistant Professor of Medicine, Clinician Educator  
 Jennifer E. Johnson  
 Associate Professor of History; Adjunct Associate Professor of Psychiatry and Human Behavior  
 Lenworth N. Johnson  
 Professor of Surgery  
 Mark A. Johnson  
 Royce Family Associate Professor of Teaching Excellence and Associate Professor of Biology  
 Mathew Johnson  
 Professor of the Practice of Sociology  
 Michael P. Johnson  
 Clinical Assistant Professor of Medicine  
 Robert G. M. Johnston  
 Clinical Associate Professor of Psychiatry and Human Behavior  
 Christopher Joncas  
 Clinical Instructor in Medical Science  
 Ferdinand Jones  
 Professor Emeritus of Cognitive, Linguistic and Psychological Sciences  
 Rich Jones  
 Professor of Neurology; Professor of Psychiatry and Human Behavior  
 Stephanie R. Jones  
 Associate Professor of Neuroscience  
 Thomas O. Jones  
 Professor of the Practice of Theatre Arts and Performance Studies  
 Yong S. Jong  
 Adjunct Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology  
 Hannes Jonsson  
 Adjunct Professor of Chemistry  
 Plakyil J. Joseph  
 Clinical Assistant Professor of Medicine  
 David Josephson  
 Professor Emeritus of Music  
 Djuro Josic  
 Adjunct Professor of Medicine (Research)  
 Tyler Jost  
 Watson Institute Assistant Professor of China Studies  
 Martha S. Joukowsky  
 Professor Emerita of Archaeology and the Ancient World  
 Nina R. Joyce  
 Assistant Professor of Epidemiology  
 Lynne Joyrich  
 Professor of Modern Culture and Media  
 Annmarie Jurczak  
 Clinical Assistant Professor of Obstetrics and Gynecology  
 Anatoli Kabakov  
 Assistant Professor of Medicine (Research)  
 David Kadmon  
 Clinical Assistant Professor of Family Medicine  
 Carl Kaestle  
 University Professor Emeritus of Education, History and Public Policy  
 Christopher W. Kahler  
 Professor of Behavioral and Social Sciences  
 Charles B. Kahn  
 Clinical Professor Emeritus of Medicine  
 Coppelia H. Kahn  
 Professor Emerita of English  
 Jeremy A. Kahn  
 Professor of Mathematics  
 Sewell I. Kahn  
 Clinical Assistant Professor Emeritus of Medicine  
 Nidhi Kaihnsa  
 Prager Assistant Professor of Applied Mathematics  
 Mustafa Kaisi  
 Assistant Professor of Medicine, Clinician Educator  
 Jerome Lionel Kalifa  
 Assistant Professor of Medicine (Research)  
 Elizabeth Kalife  
 Assistant Professor of Pathology and Laboratory Medicine  
 Loree Kalliainen  
 Associate Professor of Surgery, Clinician Educator

Eva Kallin  
Associate Professor Emerita of Mathematics

Brett D. Kalmowitz  
Clinical Assistant Professor of Medicine

Amber Kaltenstein  
Clinical Assistant Professor of Psychiatry and Human Behavior

Aziza Azadali Kamani  
Clinical Assistant Professor of Medicine

Seny F. Kamara  
Associate Professor of Computer Science

Achyut Kamat  
Clinical Professor of Emergency Medicine

Shuba Kamath  
Assistant Professor of Pediatrics, Clinician Educator

Elena Kamenetsky  
Clinical Assistant Professor Emerita of Neurology

Agnes B. Kane  
Professor of Medical Science

Rami Kantor  
Professor of Medicine

Barbara T. Kao  
Clinical Assistant Professor of Pediatrics

Hung-Teh Kao  
Associate Professor of Psychiatry and Human Behavior (Research)

Stephen R. Kaplan  
Clinical Professor Emeritus of Medicine

Nicolaos Kapouleas  
Professor of Mathematics

Naga Padmini Karamchedu  
Research Associate in Orthopaedics

Galina Karashchuk  
Assistant Professor of Pathology and Laboratory Medicine (Research)

Rebecca Karb  
Assistant Professor of Emergency Medicine

Naz Karim  
Assistant Professor of Emergency Medicine

Debra Karinski  
Teaching Associate in Pediatrics

Kabita Karki  
Clinical Assistant Professor of Medicine

Sture Karl Fredrik Karlsson  
Professor Emeritus of Engineering

George E. Karniadakis  
Charles Pitts Robinson and John Palmer Barstow Professor of Applied Mathematics

Caroline A. Karp  
Senior Lecturer Emerita in Environment and Society; Senior Lecturer Emerita in International and Public Affairs

Tyler R. Kartzinel  
Assistant Professor of Ecology and Evolutionary Biology and Environment and Society

Vania Kasper  
Assistant Professor of Pediatrics, Clinician Educator

Robert W. Kates  
University Professor Emeritus

Daniel J. Katz  
Senior Lecturer in Mathematics

Emily R. Katz  
Associate Professor of Pediatrics, Clinician Educator; Associate Professor of Psychiatry and Human Behavior, Clinician Educator

Tamar Katz  
Associate Professor of English

Ying-Mao Kau  
Professor Emeritus of Political Science

Julie Kauer  
Adjunct Professor of Molecular Pharmacology, Physiology and Biotechnology

Donald G. Kaufman  
Clinical Assistant Professor Emeritus of Medicine

Joel M. Kaufman  
Clinical Professor of Neurology

Craig Kaufmann  
Clinical Associate Professor of Psychiatry and Human Behavior

Karla Renea Kaun  
Robert and Nancy Carney Assistant Professor of Neuroscience, Assistant Professor of Neuroscience

William E. Kaye  
Professor Emeritus of Medicine; Professor Emeritus of Surgery

Syed Hammad Kazmi  
Assistant Professor of Medicine, Clinician Educator

William Keach  
Professor Emeritus of English

Alexis Kearney  
Assistant Professor of Emergency Medicine, Clinician Educator

Edward Keating  
Clinical Associate Professor of Medical Science; Clinical Associate Professor of Medicine

W. Scott Keigwin  
Clinical Assistant Professor of Family Medicine

Gabor I. Keitner  
Professor of Psychiatry and Human Behavior

Martin B. Keller  
Professor Emeritus of Psychiatry and Human Behavior

Joan Kelley  
Teaching Associate in Medical Science

James R. Kellner  
Peggy and Henry D. Sharpe Assistant Professor of Environmental Studies

Carrie Leah Kelly  
Assistant Professor of Pediatrics, Clinician Educator

Colleen R. Kelly  
Associate Professor of Medicine

Susan M. Kelly  
Clinical Associate Professor of Psychiatry and Human Behavior

Karl T. Kelsey  
Professor of Epidemiology; Professor of Pathology and Laboratory Medicine

Vasileios Kemerlis  
Assistant Professor of Computer Science

Joshua Kemp  
Assistant Professor of Psychiatry and Human Behavior (Research)

Kathleen Kemp  
Assistant Professor of Psychiatry and Human Behavior (Research)

Michael D. Kennedy  
Professor of Sociology

Shannon R. Kenney  
Assistant Professor of Psychiatry and Human Behavior (Research)

Karen L. Kerman  
Associate Professor of Neurology, Clinician Educator; Associate Professor of Pediatrics, Clinician Educator

David I. Kertzer  
Paul R. Dupee, Jr. University Professor of Social Science, Professor of Anthropology

Youenn Yves J. Kervennic  
Senior Lecturer Emeritus in French Studies

Martin J. Kerzer  
 Clinical Assistant Professor of Family Medicine  
 Haneesh Kesari  
 Assistant Professor of Engineering  
 Marianna Kessimian  
 Clinical Assistant Professor of Psychiatry and Human Behavior  
 Noubar Kessimian  
 Associate Professor Emeritus of Pathology and Laboratory Medicine,  
 Clinician Educator  
 Anita Susan Kestin  
 Clinical Assistant Professor of Family Medicine  
 Elizabeth Kettle  
 Teaching Associate in Obstetrics and Gynecology  
 Rajamohammed Khader  
 Research Associate in Medicine  
 Nancy Khalek  
 Associate Professor of Religious Studies  
 Jacques Khalip  
 Professor of English  
 Mohammad Saud Khan  
 Assistant Professor of Medicine, Clinician Educator  
 Pervez A. Khatib  
 Clinical Assistant Professor of Family Medicine  
 Razib Khaund  
 Clinical Assistant Professor of Medicine  
 Hussain Khawaja  
 Assistant Professor of Medicine, Clinician Educator  
 Nabil Y. Khoury  
 Professor Emeritus of Obstetrics and Gynecology  
 Humera Khurshid  
 Associate Professor of Medicine, Clinician Educator  
 Stephen E. Kidd  
 Associate Professor of Classics  
 Zia Kidwai  
 Clinical Assistant Professor of Medicine  
 Douglas P. Kiel  
 Adjunct Professor of Epidemiology  
 Susan M. Kiene  
 Adjunct Professor of Behavioral and Social Sciences  
 Louise Sadler Kiessling  
 Professor Emerita of Family Medicine; Professor Emerita of Pediatrics  
 Boram Kim  
 Research Associate in Pediatrics  
 Daniel Kim  
 Associate Professor of American Studies; Associate Professor of English  
 Eunsuk Kim  
 Associate Professor of Chemistry  
 Hae Won Kim  
 Visiting Scholar in Molecular Pharmacology, Physiology and Biotechnology  
 Hyewon Kim  
 Visiting Scientist in Chemistry  
 Hyun K. Kim  
 Assistant Professor of the Practice of Epidemiology  
 Jin Ho Kim  
 Senior Research Associate in Engineering  
 Kerri Kim  
 Clinical Associate Professor of Psychiatry and Human Behavior  
 Kyung-Suk Kim  
 Professor of Engineering  
 Seunghyun Kim  
 Associate Professor of Engineering (Research)

Susan J. Kim  
 Clinical Assistant Professor of Medicine  
 Tae Yun Kim  
 Research Associate in Medicine  
 Elizabeth Wambui Kimani-Murage  
 Adjunct Assistant Professor of Epidemiology  
 Brian Andrew Kimble  
 Clinical Associate Professor of Medical Science; Clinical Associate  
 Professor of Medicine  
 Benjamin B. Kimia  
 Professor of Engineering  
 Boyd P. King  
 Clinical Associate Professor Emeritus of Medicine  
 Dawn King  
 Senior Lecturer in Environment and Society  
 Michael King  
 Adjunct Professor of Radiation Oncology  
 Angus I. Kingon  
 Barrett Hazeltine University Professor of Entrepreneurship and  
 Organizational Studies, Professor of Engineering  
 Jon M. Kingsdale  
 Adjunct Associate Professor of Health Services, Policy and Practice  
 Stephen A. Kinzer  
 Senior Fellow in International and Public Affairs  
 Kathleen Kirchmeier-Kroessler  
 Clinical Instructor in Medical Science  
 Elizabeth D. Kirk  
 Professor Emerita of English  
 Malcolm M. Kirk  
 Clinical Assistant Professor of Medicine  
 Peter Kirk  
 Clinical Instructor in Medical Science  
 Jonathan Kittredge  
 Clinical Instructor in Medical Science  
 Christopher Ryan Klaus  
 Clinical Assistant Professor of Family Medicine  
 Eric E. Klein  
 Professor of Radiation Oncology  
 Erika Klein  
 Clinical Assistant Professor of Obstetrics and Gynecology  
 Lutz Heinz Klein  
 Research Associate in Archaeology and the Ancient World  
 Michael D. Klein  
 Clinical Assistant Professor of Family Medicine  
 Philip Klein  
 Professor of Computer Science  
 Dominic Kleinhenz  
 Assistant Professor of Orthopaedics, Clinician Educator  
 Marc P. Klemp  
 Visiting Scholar in Population Studies  
 Julius William Kling  
 Professor Emeritus of Cognitive, Linguistic and Psychological Sciences  
 James R. Klinger  
 Professor of Medicine  
 Adam Klipfel  
 Clinical Assistant Professor of Surgery  
 Margaret G. Klitzke  
 Clinical Assistant Professor of Psychiatry and Human Behavior  
 Caroline J. Klivans  
 Associate Professor of Applied Mathematics  
 Edward Kloza  
 Senior Research Associate in Pathology and Laboratory Medicine

Thomas W. Kniesche  
Associate Professor of German Studies

Brian G. Knight  
Professor of Economics

George B. Knight  
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Jeanne Knight  
Teaching Associate in Medicine

Robert E. Knisley  
Clinical Associate Professor Emeritus of Medicine

Leo Kobayashi  
Professor of Emergency Medicine

Susan L. Koelliker  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Paul Koffer  
Clinical Assistant Professor of Radiation Oncology

Daphne Koinis-Mitchell  
Professor of Pediatrics (Research); Professor of Psychiatry and Human Behavior (Research)

Fatih Kokdere  
Visiting Scholar in Psychiatry and Human Behavior

Aravind Kokkiralal  
Assistant Professor of Medicine, Clinician Educator

Jonathan Kole  
Clinical Assistant Professor of Psychiatry and Human Behavior

Uma Kolli  
Clinical Assistant Professor of Family Medicine

R. James Koness  
Clinical Assistant Professor of Surgery

George D. Konidaris  
John E. Savage Assistant Professor of Computer Science

David Konstan  
John Rowe Workman Distinguished Professor Emeritus of Classics and Professor Emeritus of Comparative Literature

Sheryl Kopel  
Research Associate in Psychiatry and Human Behavior

Matthew A. Kopp  
Clinical Associate Professor of Emergency Medicine

Nicole Korbly  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Andrei L. Korotkov  
Senior Research Associate in Physics

Kenneth S. Korr  
Associate Professor Emeritus of Medicine

Michael P. Koster  
Associate Professor of Pediatrics, Clinician Educator

J. Michael Kosterlitz  
Harrison E. Farnsworth Professor of Physics

Jordan A. Kostiuk  
Tamarkin Assistant Professor of Mathematics

Renu O. Kothari  
Clinical Assistant Professor of Psychiatry and Human Behavior

Ashok K. Koul  
Distinguished Senior Lecturer in Language Studies

Savvas M. Koushiappas  
Associate Professor of Physics

Altug Koymen  
Clinical Assistant Professor of Obstetrics and Gynecology

Margaret K. Kozel  
Assistant Professor of Pediatrics, Clinician Educator

Ross S. Kraemer  
Professor Emerita of Religious Studies

Matthew A. Kraft  
Associate Professor of Education

Thomas A. Krahn  
Clinical Associate Professor of Medicine

Naomi R. Kramer  
Clinical Assistant Professor of Medicine

Peter D. Kramer  
Clinical Professor Emeritus of Psychiatry and Human Behavior

Daniel Kranitz  
Clinical Assistant Professor of Medical Science

Tim Klas Kraska  
Adjunct Associate Professor of Computer Science

Sharon R. Krause  
William R. Kenan, Jr. University Professor of Political Science

Virginia A. Krause  
Professor of French Studies

Shepard Krech  
Professor Emeritus of Anthropology

Alicja U. Kreczko  
Clinical Assistant Professor of Obstetrics and Gynecology

Jill A. Kreiling  
Associate Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Robin A. Kremendorf  
Assistant Professor of Pediatrics, Clinician Educator

Mikhail Kreslavsky  
Senior Research Associate in Earth, Environmental, and Planetary Sciences

Emily Kress  
Assistant Professor of Philosophy

Andrea Kretzschmar  
Clinical Assistant Professor of Psychiatry and Human Behavior

Shriram Krishnamurthi  
Professor of Computer Science

Kay Dian Kriz  
Professor Emerita of History of Art and Architecture

Peter K. Kriz  
Associate Professor of Orthopaedics, Clinician Educator; Associate Professor of Pediatrics, Clinician Educator

George Kroumpouzou  
Clinical Associate Professor of Dermatology

Joachim Israel Krueger  
Professor of Cognitive, Linguistic and Psychological Sciences

Magdalena Krzystolik  
Adjunct Associate Professor of Surgery

Indrek Kulaots  
Senior Lecturer in Engineering

Sharvan K. Kumar  
Professor of Engineering

Erin E. Kunkel  
Clinical Instructor in Obstetrics and Gynecology

Caroline C. Kuo  
Associate Professor of Behavioral and Social Sciences (Research)

Sylvia Kuo  
Senior Lecturer in Economics

Audrey Kupchan  
Clinical Assistant Professor of Medicine

Arlet G. Kurkchubasche  
Professor of Pediatrics, Clinician Educator; Professor of Surgery, Clinician Educator

Jayne A. Kurkjian-Siegel  
Clinical Assistant Professor of Psychiatry and Human Behavior

- Habibe Kurt  
Assistant Professor of Pathology and Laboratory Medicine
- Jonathan David Kurtis  
Stanley M. Aronson Professor of Pathology and Laboratory Medicine
- Harold J. Kushner  
Professor Emeritus of Applied Mathematics and Engineering and L.  
Herbert Ballou University Professor Emeritus
- James A. Kuzner  
Associate Professor of English
- Helena Kwakwa  
Research Associate in Medicine
- Daniel K. Kwan  
Clinical Assistant Professor of Surgery
- Donald Labbe  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator
- W. Curt Lafrance  
Professor of Neurology; Professor of Psychiatry and Human Behavior
- Linda L. LaGasse  
Associate Professor of Pediatrics (Research); Associate Professor of  
Psychiatry and Human Behavior (Research)
- Shuiqing Lai  
Visiting Scholar in Epidemiology
- David H. Laidlaw  
Professor of Computer Science
- Andrew J. W. Laird  
John Rowe Workman Distinguished Professor of Classics and Humanities
- Edward M. Laird  
Assistant Professor of Physics (Research)
- Farah L. Laiwalla  
Assistant Professor of Engineering (Research)
- Chandan N. Lakhiani  
Associate Professor of Pediatrics, Clinician Educator
- Ashley Lakin  
Assistant Professor of Family Medicine, Clinician Educator
- Edward V. Lally  
Professor of Medicine
- Michelle A. Lally  
Associate Professor of Health Services, Policy and Practice; Associate  
Professor of Medicine
- Alexis Nicole Lamb  
Clinical Assistant Professor of Psychiatry and Human Behavior
- Jennifer L. Lambe  
Associate Professor of History
- Vita Lamberson  
Assistant Professor of Pediatrics, Clinician Educator
- Jennifer F. Lambert  
Clinical Associate Professor of Psychiatry and Human Behavior
- Robert E. Lambiase  
Associate Professor Emeritus of Diagnostic Imaging
- Jon K. Lambrecht  
Clinical Assistant Professor of Medicine
- Chad E. Lamendola  
Clinical Assistant Professor of Family Medicine
- Steven Lampert  
Clinical Assistant Professor of Medicine
- Sarah Rose Lamport  
Teaching Associate in Medicine
- Anthony Lancaster  
Herbert H. Goldberger Professor Emeritus of Economics
- Guy Lancellotti  
Clinical Assistant Professor of Medical Science
- Carol Landau  
Clinical Professor of Medicine; Clinical Professor of Psychiatry and Human  
Behavior
- Brian G. Lander  
Assistant Professor of History and Environment and Society
- Alan Landman  
Associate Professor of Mathematics
- George P. Landow  
Professor Emeritus of English; Professor Emeritus of History of Art and  
Architecture
- Shoshana M. Landow  
Associate Professor of Dermatology, Clinician Educator
- Greg Landsberg  
Thomas J. Watson, Sr. Professor of Physics
- Arthur Landy  
University Professor Emeritus of Medical Science
- Thomas P. Lang  
Clinical Assistant Professor of Surgery
- Kirsten Langdon  
Assistant Professor of Psychiatry and Human Behavior (Research)
- Elizabeth Lange  
Clinical Associate Professor of Pediatrics
- Kendra Lanni  
Teaching Associate in Psychiatry and Human Behavior
- Robert E. Lanou  
Professor Emeritus of Physics
- Candace S. Lapidus  
Assistant Professor of Medical Science, Clinician Educator
- Louis R. Lapierre  
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry
- Rafael I. La Porta  
Robert and Nancy Carney Professor of Economics
- Elizabeth A. Laposata  
Clinical Associate Professor of Pathology and Laboratory Medicine
- Jessica Laprise  
Teaching Associate in Obstetrics and Gynecology
- Abbot Laptok  
Professor of Pediatrics
- Rebecca Laptok  
Associate Professor of Pediatrics, Clinician Educator; Associate Professor  
of Psychiatry and Human Behavior, Clinician Educator
- Jerome M. Larkin  
Associate Professor of Medicine, Clinician Educator
- Charles Larmore  
W. Duncan MacMillan Family Professor of the Humanities, Professor of  
Philosophy
- Christine Larose  
Clinical Instructor in Medical Science
- Erica N. Larschan  
Associate Professor of Molecular Biology, Cell Biology and Biochemistry
- Lawrence E. Larson  
Sorensen Family Dean of Engineering, Professor of Engineering
- Lucia Larson  
Associate Professor of Medicine
- Margaret Lartey  
Adjunct Associate Professor of Medicine
- Sanam Lathief  
Clinical Assistant Professor of Medicine
- Syed A. Latif  
Professor of Pathology and Laboratory Medicine, Clinician Educator
- David Lattimore  
Professor Emeritus of East Asian Studies

Joseph Lau  
Professor Emeritus of Health Services, Policy and Practice

Vanessa Laurent  
Clinical Instructor in Psychiatry and Human Behavior

Joseph R. Lauro  
Clinical Associate Professor of Emergency Medicine

Danya M. Lavin  
Visiting Scholar in Molecular Pharmacology, Physiology and Biotechnology

Kelley Lavine  
Teaching Associate in Pediatrics

Ronald G. Lawler  
Professor Emeritus of Chemistry

Charles Lawrence  
Professor of Applied Mathematics

W. Dwayne Lawrence  
Professor Emeritus of Pathology and Laboratory Medicine

M. Barton Laws  
Associate Professor of Health Services, Policy and Practice

Bruce A. Lazarus  
Adjunct Assistant Professor of Family Medicine

Elizabeth Lazarus  
Associate Professor of Diagnostic Imaging

Pedro Germano Leal  
Research Associate in Latin American and Caribbean Studies

Harish Lecamwasam  
Assistant Professor of Anesthesiology, Clinician Educator

Beatrice E. Lechner  
Associate Professor of Pediatrics

Benjamin Lederer  
Clinical Assistant Professor of Psychiatry and Human Behavior

Athene Ka Wing Lee  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Eunjeong Lee  
Research Associate in Neuroscience

George Lee  
Clinical Assistant Professor of Medicine

Jonghwan Lee  
Assistant Professor of Engineering

Jung-Eun Lee  
Assistant Professor of Earth, Environmental, and Planetary Sciences

Kiho Lee  
Research Associate in Medicine

Robert George Lee  
Associate Professor of American Studies

Ruby Lee  
Clinical Assistant Professor of Psychiatry and Human Behavior

Sung-Hee Rhim Lee  
Clinical Assistant Professor of Obstetrics and Gynecology

Michelle J. Lefebvre  
Clinical Assistant Professor of Pediatrics

Craig T. Lefort  
Assistant Professor of Surgery (Research)

Lorenzo Leggio  
Adjunct Professor of Behavioral and Social Sciences

Mark P. Legolvan  
Associate Professor of Pathology and Laboratory Medicine, Clinician Educator

Jeremy Lehnen  
Visiting Associate Professor of Gender Studies

Leila M. Lehnen  
Associate Professor of Portuguese and Brazilian Studies

Jessaca B. Leinaweaver  
Professor of Anthropology

Philip E. Leis  
Professor Emeritus of Anthropology

Mary D. Lekas  
Clinical Professor Emerita of Surgery

Neal S. Leleiko  
Professor of Pediatrics

Myles Lennon  
Dean's Assistant Professor of Environment and Society and Anthropology

Louis A. Leone  
Professor Emeritus of Medicine

Leonard H. Lesko  
Charles Edwin Wilbour Professor Emeritus of Egyptology

Kathleen Lester  
Teaching Associate in Medical Science

Emily A. Leveen  
Assistant Professor of Medicine, Clinician Educator

Rachel Levenson-Acker  
Clinical Instructor in Pediatrics

Frank S. Levin  
Professor Emeritus of Physics

William A. Levin  
Clinical Associate Professor of Medicine

Adam Levine  
Associate Professor of Emergency Medicine

Daniel J. Levine  
Clinical Associate Professor of Medicine

Laura Levine  
Clinical Associate Professor of Medical Science; Clinical Associate Professor of Psychiatry and Human Behavior

Scott M. Levine  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Todd P. Levine  
Clinical Associate Professor of Psychiatry and Human Behavior

Paul David Levinson  
Associate Professor of Medicine

Alexander Levitsky  
Professor of Slavic Studies

Allison M. Levy  
Digital Scholarship Editor, Visiting Scholar in Italian Studies

Dore J. Levy  
Professor of Comparative Literature; Professor of East Asian Studies

Mitchell M. Levy  
Professor of Medicine

Sarah Simone Levy  
Clinical Assistant Professor of Surgery

William J. Lewander  
Professor of Emergency Medicine; Professor of Pediatrics

Carol T. Lewis  
Professor of Pediatrics, Clinician Educator

David C. Lewis  
Professor Emeritus of Behavioral and Social Sciences; Professor Emeritus of Medicine

Thomas A. Lewis  
Professor of Religious Studies

William Lewis-de los Angeles  
Assistant Professor of Pediatrics, Clinician Educator

Adam Lewkowitz  
Assistant Professor of Obstetrics and Gynecology

Victoria Leytin  
Assistant Professor of Emergency Medicine, Clinician Educator

Dan Li  
 Research Associate in Medicine  
 Geng Li  
 Visiting Research Scholar in Surgery  
 Jia Leo Li  
 Assistant Professor of Physics  
 Jie Li  
 Senior Research Associate in Epidemiology  
 Jin Li  
 Professor of Education  
 Jinying Li  
 Assistant Professor of Modern Culture and Media  
 Ji Su Li  
 Associate Professor of Medicine (Research)  
 Jungang Li  
 Tamarkin Assistant Professor of Mathematics  
 Nan Li  
 Assistant Professor of Epidemiology (Research)  
 Xiaofei Li  
 Research Associate in Medicine  
 Xin Li  
 Assistant Professor of Neurosurgery, Clinician Educator  
 Zhuqing Li  
 Visiting Associate Professor of East Asian Studies  
 Yan Liang  
 Professor of Earth, Environmental, and Planetary Sciences  
 Junhui Liao  
 Visiting Scientist in Physics  
 N. Peter Libbey  
 Clinical Associate Professor of Pathology and Laboratory Medicine  
 Tiffany Libby  
 Clinical Assistant Professor of Dermatology  
 Jonah M. Licht  
 Clinical Assistant Professor of Medicine  
 Rashmi Shetty Licht  
 Clinical Assistant Professor of Surgery  
 Stephen Lichtenbaum  
 Roland George Dwight Richardson University Professor Emeritus of Mathematics  
 David P. Lichtenstein  
 Clinical Assistant Professor of Psychiatry and Human Behavior  
 Paul B. Lieberman  
 Professor of Psychiatry and Human Behavior, Clinician Educator  
 Philip Lieberman  
 George Hazard Crooker University Professor Emeritus  
 Michael Liebowitz  
 Clinical Instructor in Medical Science  
 Stacey P. Lievens  
 Clinical Assistant Professor of Obstetrics and Gynecology  
 Jason Lillis  
 Assistant Professor of Psychiatry and Human Behavior (Research)  
 Yow-Pin Lim  
 Adjunct Associate Professor of Pathology and Laboratory Medicine  
 Julie C. Lima  
 Assistant Professor of Health Services, Policy and Practice  
 David J. Lin  
 Visiting Scientist in Engineering  
 James G. Linakis  
 Professor of Emergency Medicine; Professor of Pediatrics  
 Evelyn Lincoln  
 Professor of History of Art and Architecture; Professor of Italian Studies  
 Monica Linden  
 Senior Lecturer in Neuroscience  
 David G. Lindquist  
 Associate Professor of Emergency Medicine, Clinician Educator  
 David P. Lindstrom  
 Professor of Sociology  
 Xinsheng Sean Ling  
 Professor of Physics  
 Crystal D. Linkletter  
 Adjunct Assistant Professor of Biostatistics  
 Drew A. Linsley  
 Senior Research Associate in Cognitive, Linguistic and Psychological Sciences  
 James Lippincott  
 Clinical Assistant Professor of Family Medicine  
 Melanie J. Lippmann  
 Associate Professor of Emergency Medicine, Clinician Educator  
 Diane Lipscombe  
 Thomas J. Watson, Sr. Professor of Science, Professor of Neuroscience  
 Lewis P. Lipsitt  
 Professor Emeritus of Cognitive, Linguistic and Psychological Sciences  
 George Philip Lisi  
 Assistant Professor of Molecular Biology, Cell Biology and Biochemistry  
 Marcia Liss  
 Clinical Instructor in Psychiatry and Human Behavior  
 Robert Burr Litchfield  
 Professor Emeritus of History  
 Nancy T. Littell  
 Clinical Assistant Professor of Medicine  
 Elizabeth Little  
 Assistant Professor of Diagnostic Imaging, Clinician Educator  
 Michael L. Littman  
 Professor of Computer Science  
 Jerome J. Liu  
 Clinical Instructor in Psychiatry and Human Behavior  
 Joseph T. C. Liu  
 Professor Emeritus of Engineering  
 Judy Shih-Hwa Liu  
 Sidney A. Fox and Dorothea Doctors Fox Associate Professor of Ophthalmology and Visual Science  
 Lirong Liu  
 Research Associate in Medicine  
 Paul Liu  
 Professor of Surgery  
 Richard Liu  
 Associate Professor of Psychiatry and Human Behavior (Research)  
 Shengjin Liu  
 Visiting Scientist in Chemistry  
 Simin Liu  
 Professor of Epidemiology; Professor of Medicine; Professor of Surgery  
 Tao Liu  
 Associate Professor of Biostatistics  
 Yajun Liu  
 Research Associate in Orthopaedics  
 Yuhong Liu  
 Research Associate in Surgery  
 Z. Liu  
 Assistant Professor of Diagnostic Imaging, Clinician Educator  
 Zhihong Liu  
 Adjunct Professor of Medicine  
 Albert C. Lo  
 Adjunct Associate Professor of Neurology

Ruby Lo  
Assistant Professor of Surgery, Clinician Educator

Debra J. Lobato  
Professor Emerita of Psychiatry and Human Behavior

Richard M. Locke  
Provost, Schreiber Family Professor of Political Science and International and Public Affairs

Gregory R. Lockhart  
Professor of Emergency Medicine, Clinician Educator; Professor of Pediatrics, Clinician Educator

Susanna Loeb  
Professor of Education; Professor of International and Public Affairs

John Logan  
Professor of Sociology

Elizabeth Lokich  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Kristin Lombardi  
Assistant Professor of Pediatrics, Clinician Educator

Michelle Lombardo  
Clinical Instructor in Family Medicine

Michele M. Lomme  
Associate Professor of Pathology and Laboratory Medicine, Clinician Educator

Cynthia L. Loncar  
Associate Professor of Pediatrics, Clinician Educator; Associate Professor of Psychiatry and Human Behavior, Clinician Educator

Richard Long  
Clinical Associate Professor of Family Medicine

Richard H. Longabaugh  
Professor Emeritus of Psychiatry and Human Behavior

Regina Longo  
Lecturer in Modern Culture and Media

NicoleLooper  
Tamarkin Assistant Professor of Mathematics

Laura Lopez Sanders  
Assistant Professor of Sociology

Salvatore J. Loporchio  
Clinical Assistant Professor of Surgery

Mary L. Lopresti  
Assistant Professor of Medicine, Clinician Educator

Matthew Lee Lorenz  
Assistant Professor of Medicine, Clinician Educator; Assistant Professor of Pediatrics, Clinician Educator

Eric B. Loucks  
Associate Professor of Behavioral and Social Sciences; Associate Professor of Epidemiology; Associate Professor of Medicine

Sydney Louis  
Professor Emeritus of Neurology

Ana P. Lourenco  
Associate Professor of Diagnostic Imaging

Glenn C. Loury  
Merton P. Stoltz Professor of Social Sciences, Professor of Economics

Christine M. Low  
Associate Professor of Pediatrics, Clinician Educator; Associate Professor of Psychiatry and Human Behavior, Clinician Educator

David Lowe  
Professor of Physics

Elizabeth A. Lowenhaupt  
Associate Professor of Medical Science, Clinician Educator; Associate Professor of Pediatrics, Clinician Educator; Associate Professor of Psychiatry and Human Behavior, Clinician Educator

David J. Lowry-Duda  
Senior Research Associate in Institute for Computational and Experimental Research in Mathematics

Huafei Lu  
Research Associate in Medicine

Qing Lu  
Associate Professor of Medicine

Yi Lu  
Clinical Assistant Professor of Medicine

Steven D. Lubar  
Professor of American Studies; Professor of History

Jonathan D. Lubin  
Professor Emeritus of Engineering; Professor Emeritus of Mathematics

Phillip R. Lucas  
Clinical Associate Professor of Orthopaedics

Melissa Ludwig  
Clinical Assistant Professor of Psychiatry and Human Behavior

Stephanie N. Lueckel  
Assistant Professor of Surgery, Clinician Educator

Andrew Luhrs  
Assistant Professor of Surgery, Clinician Educator

Natalia Lukankina  
Assistant Professor of Pediatrics, Clinician Educator

Rishi R. Lulla  
Alan G. Hassenfeld Associate Professor of Pediatrics

Gary K. Lundstrom  
Clinical Instructor in Diagnostic Imaging

Xi Luo  
Adjunct Associate Professor of Biostatistics

Mark Lurie  
Associate Professor of Epidemiology

Joan E. Lusk  
Associate Professor Emerita of Chemistry

Krista Lussier  
Clinical Assistant Professor of Psychiatry and Human Behavior

Denyse Lutchmansingh  
Clinical Assistant Professor of Medicine

Christopher Luttmann  
Clinical Assistant Professor of Medicine

Amanda Lynch  
Sloan Lindemann and George Lindemann, Jr. Distinguished Professor of Environmental Studies

Matthew Lynch  
Assistant Professor of Medicine, Clinician Educator

Anna A. Lysyanskaya  
Professor of Computer Science

Li Ma  
Investigator in Molecular Biology, Cell Biology and Biochemistry

Wenzhuo Ma  
Visiting Scholar in Surgery

Zhenhui Ma  
Visiting Scientist in Chemistry

Celia P. MacDonnell  
Adjunct Associate Professor of Family Medicine

John J. Machata  
Clinical Assistant Professor of Family Medicine

James Mackillop  
Adjunct Professor of Behavioral and Social Sciences

Joanna V. Maclean  
Assistant Professor of Medicine, Clinician Educator; Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Laszlo Madaras  
Adjunct Assistant Professor of Family Medicine

Jennifer A. Madden  
Adjunct Lecturer in Theatre Arts and Performance Studies

D. Audoen Maddock  
Clinical Assistant Professor of Obstetrics and Gynecology

Hajime Maeda  
Research Associate in Pediatrics

Susanna R. Magee  
Clinical Associate Professor of Family Medicine

Henry G. Magendantz  
Clinical Associate Professor Emeritus of Obstetrics and Gynecology

Molly Magill  
Associate Professor of Behavioral and Social Sciences (Research)

James F. Maguire  
Adjunct Associate Professor of Medical Science

Karan Mahajan  
Assistant Professor of Literary Arts

James O. Maher  
Clinical Assistant Professor of Orthopaedics

Katherine Mahon  
Clinical Assistant Professor of Medicine

Martha B. Mainiero  
Professor of Diagnostic Imaging

Marta B. Majczak  
Clinical Assistant Professor of Psychiatry and Human Behavior

Henry F. Majewski  
Professor Emeritus of French Studies

Nirav Makwana  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Sara Maleki  
Assistant Professor of Pathology and Laboratory Medicine

Tariq K. Malik  
Clinical Associate Professor of Medicine

Sterling L. Malish  
Clinical Assistant Professor of Medicine

Bertram F. Malle  
Professor of Cognitive, Linguistic and Psychological Sciences

John Mallet-Paret  
George Ide Chase Professor of Physical Science, Professor of Applied Mathematics

Steven A. Mallozzi  
Clinical Assistant Professor of Medicine

Patrick M. Malone  
Professor Emeritus of American Studies

Maria C. Mancebo  
Assistant Professor of Psychiatry and Human Behavior (Research)

Alexis A. Mancini  
Clinical Instructor in Surgery

David E. Mandelbaum  
Professor Emeritus of Pediatrics

Adam Mani  
Research Associate in Neuroscience

James Manis  
Clinical Associate Professor Emeritus of Medicine

Nayana Manjunath  
Clinical Assistant Professor of Obstetrics and Gynecology

Holly Manning  
Clinical Instructor in Psychiatry and Human Behavior

Margaret M. Mannix  
Associate Professor of Pediatrics, Clinician Educator; Associate Professor of Psychiatry and Human Behavior, Clinician Educator

Anthony Lynn Mansell  
Professor Emeritus of Pediatrics

Christopher Mantsounga  
Research Associate in Medicine

Jessica C. Manyan  
Assistant Professor of Family Medicine, Clinician Educator

Pierre R. Manzo  
Clinical Assistant Professor of Family Medicine

Quanfu Mao  
Research Associate in Pathology and Laboratory Medicine

Elizabeth Maranzano  
Clinical Instructor in Pediatrics

Abigail Marcaccio  
Associate Professor of Psychiatry and Human Behavior, Clinician Educator

Beth G. Marcaccio  
Clinical Assistant Professor of Obstetrics and Gynecology

John R. Marcaccio  
Clinical Assistant Professor Emeritus of Surgery

Vincent F. Marcaccio  
Clinical Assistant Professor of Medicine

Bess H. Marcus  
Professor of Behavioral and Social Sciences

Peter S. Margolis  
Clinical Assistant Professor of Medicine

Seth Aaron Margolis  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Francesca Mari  
Visiting Lecturer in Literary Arts

Louis J. Marino  
Clinical Associate Professor of Psychiatry and Human Behavior

Humphrey J. Maris  
Professor Emeritus of Physics

Hon Fong Louie Mark  
Clinical Professor Emerita of Pediatrics

Michael Marosits  
Teaching Associate in Medical Science

Donald J. Marsh  
Frank L. Day Professor Emeritus of Biology

Richard L. Marsh  
Professor of Ecology and Evolutionary Biology (Research)

Brandon David Lewis Marshall  
Associate Professor of Epidemiology

John Marshall  
Professor of Medical Science

Lowry Marshall  
Professor Emerita of Theatre Arts and Performance Studies

Carmen J. Marsit  
Adjunct Associate Professor of Epidemiology

John Bradley Marston  
Professor of Physics

Edward W. Martin  
Professor of Medicine, Clinician Educator

Kyle Denison Martin  
Adjunct Assistant Professor of Emergency Medicine

Rosemarie Ann Martin  
Assistant Professor of Behavioral and Social Sciences

Saul A. Martin  
Clinical Assistant Professor Emeritus of Psychiatry and Human Behavior

Susan Martin  
Clinical Instructor in Medical Science

Augusto Rafael Martinez  
 Assistant Professor of Pediatrics, Clinician Educator

Monica M. Martinez  
 Stanley J. Bernstein Assistant Professor of American Studies

Ronald L. Martinez  
 Professor of Italian Studies

Felipe I. Martinez-Pinzon  
 Assistant Professor of Hispanic Studies

Margot Martinez Moreno  
 Research Associate in Neurosurgery

Stephanie Maryeski  
 Clinical Assistant Professor of Medicine

Andrew Maslow  
 Professor of Anesthesiology, Clinician Educator

Carole Maso  
 Professor of Literary Arts

Katherine A. Mason  
 Vartan Gregorian Assistant Professor of Anthropology

Katherine E. Mason  
 Associate Professor of Pediatrics

Lauren Massingham  
 Assistant Professor of Pediatrics

Nadine R. Mastroleo  
 Adjunct Associate Professor of Behavioral and Social Sciences

Harry Matelski  
 Clinical Assistant Professor of Medicine

Thais P. Mather  
 Assistant Professor of Medical Science; Assistant Professor of Molecular  
 Microbiology and Immunology

Cara A. Mathews  
 Assistant Professor of Obstetrics and Gynecology

Donnah Mathews  
 Assistant Professor of Medicine, Clinician Educator

Robert C. Mathiesen  
 Professor Emeritus of Slavic Studies

Edith Mathiowitz  
 Professor of Engineering; Professor of Medical Science

Christopher M. Matkovic  
 Clinical Assistant Professor of Psychiatry and Human Behavior

Sherry Matook  
 Teaching Associate in Pediatrics

Amy Marie Matson  
 Assistant Professor of Emergency Medicine, Clinician Educator

Linzi Matta  
 Teaching Associate in Medical Science

Mirabelle Mattar  
 Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Kristen A. Matteson  
 Associate Professor of Obstetrics and Gynecology

Anastasios Matzavinos  
 Assistant Professor of Applied Mathematics

Jennifer L. Maude  
 Clinical Assistant Professor of Medicine

Martin R. Maxey  
 Professor of Applied Mathematics; Professor of Engineering

Donald R. Maxson  
 Professor Emeritus of Physics

Catherine Margaret May  
 Teaching Associate in Family Medicine

Kenneth Hugh Mayer  
 Adjunct Professor of Epidemiology; Adjunct Professor of Medicine

Laura A. Mayer  
 Clinical Instructor in Psychiatry and Human Behavior

Roger Mayer  
 Professor Emeritus of Modern Culture and Media; Professor Emeritus of  
 Visual Art

Sarah Mayer-Brown  
 Clinical Assistant Professor of Psychiatry and Human Behavior

Elizabeth Mayhall  
 Clinical Instructor in Obstetrics and Gynecology

Michaela Maynard  
 Research Associate in Medicine

Nabila Mazumder  
 Assistant Professor of Medicine, Clinician Educator

Peter J. Mazzaglia  
 Associate Professor of Surgery, Clinician Educator

Grace Mbuthia  
 Visiting Scholar in Epidemiology

Kristina McAteer  
 Assistant Professor of Emergency Medicine, Clinician Educator

Kathleen M. McCarten  
 Professor Emerita of Diagnostic Imaging, Clinician Educator; Professor  
 Emerita of Pediatrics, Clinician Educator

Andrew K. McCarthy  
 Teaching Associate in Surgery

James R. McCartney  
 Associate Professor Emeritus of Psychiatry and Human Behavior

Thomas McCauley  
 Clinical Assistant Professor of Surgery

James L. McClain  
 Professor Emeritus of History

Katherine Donovan McCleary  
 Clinical Assistant Professor of Family Medicine

Donald E. McClure  
 Professor Emeritus of Applied Mathematics

F. Dennis McCool  
 Professor of Medicine

Maureen McCourt  
 Teaching Associate in Pediatrics

Charles E. McCoy  
 Clinical Associate Professor of Medicine

Ellen M. McCreedy  
 Assistant Professor of Health Services, Policy and Practice

Rose McDermott  
 David and Marianna Fisher University Professor of International Relations

Charles J. McDonald  
 Professor Emeritus of Medical Science

Emily McDonald  
 Assistant Professor of Pathology and Laboratory Medicine (Research);  
 Assistant Professor of Pediatrics (Research)

James McDonald  
 Clinical Assistant Professor of Medical Science

Stefan McDonough  
 Adjunct Professor of Molecular Pharmacology, Physiology and  
 Biotechnology

Kelly Ann McGarry  
 Professor of Medicine

Stephen T. McGarvey  
 Professor of Epidemiology

John E. McGeary  
 Associate Professor of Psychiatry and Human Behavior

Heather A. McGee  
 Clinical Assistant Professor of Medical Science

Karen L. Mcgoldrick  
Clinical Assistant Professor of Obstetrics and Gynecology

John McGonigle  
Clinical Assistant Professor of Family Medicine

Edward D. Mcgookin  
Clinical Associate Professor of Family Medicine; Clinical Associate Professor of Pediatrics

Andrew P. McGrath  
Clinical Assistant Professor of Pediatrics

Susan McGregor  
Teaching Associate in Medical Science

Patrick J. McHugh  
Professor of the Practice of Engineering

James T. McIlwain  
Sidney A. and Dorothea Doctors Fox Professor Emeritus of Ophthalmology and Visual Science

Kevin M. McKay  
Clinical Associate Professor of Psychiatry and Human Behavior

Robin L. McKinney  
Assistant Professor of Pediatrics, Clinician Educator

Elizabeth McLaughlin  
Clinical Instructor in Psychiatry and Human Behavior

Kevin McLaughlin  
Dean of the Faculty, George Hazard Crooker University Professor of English

Nicole McLaughlin  
Assistant Professor of Psychiatry and Human Behavior (Research)

Kathryn McLean  
Teaching Associate in Pediatrics

Rebecca Mclean  
Clinical Assistant Professor of Psychiatry and Human Behavior

Paul N. Mcmillan  
Clinical Associate Professor Emeritus of Pathology and Laboratory Medicine

Joseph M. McNamara  
Assistant Professor of Pediatrics, Clinician Educator

Lynn Mnicoll  
Associate Professor of Medicine, Clinician Educator

Laura H. McPeake  
Associate Professor of Emergency Medicine, Clinician Educator

Naemi McPherson  
Visiting Lecturer in East Asian Studies

Elizabeth L. McQuaid  
Professor of Pediatrics; Professor of Psychiatry and Human Behavior

Robert G. McRae  
Clinical Assistant Professor of Surgery

Savannah McSheffrey  
Clinical Assistant Professor of Psychiatry and Human Behavior

Colleen McSweeney  
Teaching Associate in Pediatrics

Ryan A. McTaggart  
Associate Professor of Diagnostic Imaging, Clinician Educator; Associate Professor of Neurology, Clinician Educator; Associate Professor of Neurosurgery, Clinician Educator

Richard Alan Meckel  
Professor of American Studies

Antone A. Medeiros  
Professor Emeritus of Medicine

Carroll A. Medeiros  
Clinical Assistant Professor of Obstetrics and Gynecology

Fatima Medeiros  
Teaching Associate in Family Medicine

Brian W. E. Meeks  
Professor of Africana Studies

Anthony E. Mega  
Associate Professor of Medicine, Clinician Educator; Associate Professor of Surgery, Clinician Educator

Samaei Mehrnoosh  
Research Associate in Emergency Medicine

Niharika D. Mehta  
Associate Professor of Medicine, Clinician Educator

Barbara J. Meier  
Senior Lecturer in Computer Science

Francisco Amado Mejia Ortiz  
Adjunct Professor of Medicine

Teddy Mekonnen  
Assistant Professor of Economics

Michael J. Mello  
Professor of Emergency Medicine; Professor of Health Services, Policy and Practice; Professor of Medical Science

Sara C. Melucci  
Teaching Associate in Medical Science

A. Sattar N. Memon  
Clinical Associate Professor Emeritus of Medicine

Kristina C. Mendicino  
Associate Professor of German Studies

Govind Menon  
Professor of Applied Mathematics

Mridula Menon  
Clinical Assistant Professor of Medicine

Judith S. Mercer  
Adjunct Professor of Pediatrics

Derek Merck  
Assistant Professor of Diagnostic Imaging (Research); Assistant Professor of Engineering (Research); Assistant Professor of Radiation Oncology (Research)

Lisa H. Merck  
Adjunct Associate Professor of Diagnostic Imaging; Adjunct Associate Professor of Emergency Medicine; Adjunct Research Associate in Neurosurgery

Basma Merhi  
Assistant Professor of Medicine, Clinician Educator

Robert D. Meringolo  
Clinical Associate Professor Emeritus of Medicine

Alisa J. Merolli  
Clinical Assistant Professor of Medicine

Stephanie Merrim  
Professor of Comparative Literature; Professor of Hispanic Studies

Christopher H. Merritt  
Associate Professor of Emergency Medicine; Associate Professor of Pediatrics

Rory J. Merritt  
Assistant Professor of Emergency Medicine

Brian Mertes  
Professor of the Practice of Theatre Arts and Performance Studies

Geralyn M. L. Messerlian  
Professor of Obstetrics and Gynecology; Professor of Pathology and Laboratory Medicine

Dino Messina  
Associate Professor of Medicine, Clinician Educator

Molly Zipporah Meth  
Clinical Instructor in Psychiatry and Human Behavior

Jane Metrik  
Associate Professor of Behavioral and Social Sciences (Research); Associate Professor of Psychiatry and Human Behavior (Research)

Markus Meuwly  
Adjunct Professor of Chemistry

David R. Meyer  
Professor Emeritus of Sociology; Professor Emeritus of Urban Studies

Norm Meyrowitz  
Adjunct Professor of the Practice of Computer Science

Pascal Michailat  
Associate Professor of Economics

Stelios Michalopoulos  
Associate Professor of Economics

Dominique S. Michaud  
Adjunct Professor of Epidemiology

Ian Michelow  
Associate Professor of Pediatrics

Ralph P. Miech  
Associate Professor Emeritus of Medical Science

Michael E. Migliori  
Professor of Surgery, Clinician Educator

Stephen J. Migliori  
Assistant Professor of Surgery, Clinician Educator

Brian Mikolasko  
Assistant Professor of Medicine, Clinician Educator

Maria D. Mileno  
Associate Professor of Medicine

Edward A. Miller  
Adjunct Professor of Health Services, Policy and Practice

Elizabeth Miller  
Assistant Professor of Philosophy

Kenneth Raymond Miller  
Professor of Biology

Kimberly V. Miller  
Assistant Professor of Surgery, Clinician Educator

Kiri M. Miller  
Professor of American Studies; Professor of Music

Margaret Miller  
Associate Professor of Medicine

Marsha Miller  
Clinical Assistant Professor of Family Medicine

Mary Elizabeth Miller  
Adjunct Assistant Professor of Behavioral and Social Sciences

Susan C. Miller  
Professor of Health Services, Policy and Practice

Ralph E. Milliken  
Associate Professor of Earth, Environmental, and Planetary Sciences

Richard P. Millman  
Professor of Medicine; Professor of Pediatrics

Whitney Mills  
Assistant Professor of Health Services, Policy and Practice (Research)

Steven Milman  
Clinical Assistant Professor of Surgery

Matthew J. Mimiaga  
Professor of Behavioral and Social Sciences; Professor of Psychiatry and Human Behavior

Taro Minami  
Associate Professor of Medicine, Clinician Educator

Diane E. Minasian  
Clinical Assistant Professor of Family Medicine

Thomas J. Miner  
Professor of Surgery

Jane Miniutti  
Clinical Assistant Professor of Family Medicine

Bradley Evan Minter  
Assistant Professor of Medicine, Clinician Educator

Robert Miranda  
Professor of Behavioral and Social Sciences; Professor of Psychiatry and Human Behavior

Biswajit Mishra  
Research Associate in Medicine

John P. Miskovsky  
Clinical Assistant Professor of Medicine

Ashish Misri  
Clinical Assistant Professor of Medicine

Cristina L. Mitchell  
Clinical Assistant Professor of Family Medicine

Vesna F. Mitrovic  
Professor of Physics

Srilakshmi Mitta  
Assistant Professor of Medicine, Clinician Educator

Sreemati Mitter  
Kutayba Alghanim Assistant Professor of Middle Eastern History and International and Public Affairs

James Mitterando  
Clinical Assistant Professor of Family Medicine

Daniel M. Mittleman  
Professor of Engineering

Jennifer Adelson Mitty  
Clinical Associate Professor of Medicine

John Modell  
Professor Emeritus of Education; Professor Emeritus of Sociology

Jeffrey S. Moffit  
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Susan L. Moffitt  
Associate Professor of International and Public Affairs and Political Science

Leslie C. Mohlman  
Clinical Instructor in Pediatrics

Anthony Molho  
Professor Emeritus of History

Janine Molino  
Assistant Professor of Orthopaedics (Research)

Sean F. Monaghan  
Assistant Professor of Surgery

Barbara Monahan  
Senior Lecturer Emerita in Slavic Studies

Jack M. Monchik  
Clinical Professor Emeritus of Surgery

Mollie A. Monnig  
Assistant Professor of Behavioral and Social Sciences

Michael Monsour  
Clinical Assistant Professor of Medicine

Julie Monteagudo  
Assistant Professor of Surgery

Karine P. Monteiro  
Assistant Professor of the Practice of Epidemiology

Kristina A. Monteiro  
Assistant Professor of Medical Science

Lois A. Monteiro  
Professor Emerita of Behavioral and Social Sciences

Iris Montero  
Visiting Assistant Professor of Hispanic Studies

James E. Monti  
Clinical Associate Professor of Emergency Medicine

- Peter M. Monti  
Donald G. Millar Distinguished Professor of Alcohol and Addiction Studies,  
Professor of Behavioral and Social Sciences
- Christine E. Montross  
Associate Professor of Medical Science; Associate Professor of Psychiatry  
and Human Behavior
- Sydney Moon  
Clinical Assistant Professor of Medical Science; Clinical Assistant  
Professor of Psychiatry and Human Behavior
- Christopher I. Moore  
Professor of Neuroscience
- Kym Moore  
Professor of Theatre Arts and Performance Studies
- Terri Moore  
Teaching Associate in Pediatrics
- Finnian M. Moore-Gerety  
Visiting Assistant Professor of Religious Studies
- Debra J. Moorhead  
Assistant Professor of Family Medicine, Clinician Educator
- Vincent Mor  
Florence Pirce Grant University Professor, Professor of Health Services,  
Policy and Practice
- John H. Moran  
Clinical Associate Professor of Pediatrics
- Lindsey Moran  
Teaching Associate in Surgery
- Laura Moreau  
Teaching Associate in Pediatrics
- Melissa Moreau  
Teaching Associate in Pediatrics
- Carla C. Moreira  
Clinical Assistant Professor of Surgery
- Kathleen Moren  
Teaching Associate in Family Medicine
- Daniel Moreno De Luca  
Assistant Professor of Psychiatry and Human Behavior
- George W. Morgan  
Professor Emeritus of Applied Mathematics
- James L. Morgan  
Professor of Cognitive, Linguistic and Psychological Sciences
- Jeffrey R. Morgan  
Professor of Engineering; Professor of Medical Science
- Thomas F. Morgan  
Clinical Assistant Professor of Neurology
- Jesse B. Morin  
Visiting Lecturer in Chemistry
- James A. Morone  
John Hazen White Professor of Public Policy, Professor of Political  
Science and Urban Studies
- David J. Morris  
Professor Emeritus of Pathology and Laboratory Medicine
- Gillian A. Morris  
Clinical Instructor in Family Medicine
- Julie Morris  
Clinical Assistant Professor of Psychiatry and Human Behavior
- Alan R. Morrison  
Assistant Professor of Medicine
- Paul E. Morrissey  
Professor of Surgery
- Eric M. Morrow  
Mencoff Family Associate Professor of Biology
- Douglass H. Morse  
Hermon Bumpus Professor Emeritus of Biology
- Edelgard Morse  
Senior Lecturer Emerita in Chemistry
- Theodore F. Morse  
Professor Emeritus of Engineering
- Charles I. Morton  
Lecturer in Chemistry
- John Rollin Morton  
Clinical Assistant Professor of Family Medicine
- Jeffrey C. Moser  
Assistant Professor of History of Art and Architecture
- David Moss  
Clinical Assistant Professor of Orthopaedics
- Steven F. Moss  
Professor of Medicine
- James A. Mossman  
Research Associate in Ecology and Evolutionary Biology
- Albert S. Most  
Professor Emeritus of Medicine
- Ourida Mostefai  
Professor of Comparative Literature and French Studies
- Nicholas Alexander Mostovych  
Research Associate in Engineering
- Samir G. Moubayed  
Clinical Associate Professor Emeritus of Obstetrics and Gynecology
- Anthony Moulton  
Clinical Professor of Medical Science
- Abdelmoniem Moustafa  
Assistant Professor of Medicine, Clinician Educator
- Kimberly L. Mowry  
Robin Chemers Neustein Professor of Biomedicine
- Leah Moynihan  
Teaching Associate in Obstetrics and Gynecology
- Patience Moyo  
Assistant Professor of Health Services, Policy and Practice
- Susannah L. Mozley  
Clinical Assistant Professor of Psychiatry and Human Behavior
- Elias I. Muhanna  
Associate Professor of Comparative Literature
- Nadia Mujahid  
Assistant Professor of Medicine, Clinician Educator
- Jon A. Mukand  
Clinical Assistant Professor of Orthopaedics
- Jeffrey M. Muller  
Professor of History of Art and Architecture
- David Mumford  
Professor Emeritus of Applied Mathematics
- Jeremy R. Mumford  
Assistant Professor of History
- Mary K. Mumford-Haley  
Teaching Associate in Emergency Medicine
- Fabiola Munarin  
Assistant Professor of Engineering (Research)
- Reshma Munbodh  
Assistant Professor of Radiation Oncology
- Anarina Le Murillo  
Assistant Professor of Pediatrics (Research)
- Brian L. Murphy  
Clinical Associate Professor of Diagnostic Imaging

Cara M. Murphy  
Assistant Professor of Behavioral and Social Sciences

Donald R. Murphy  
Clinical Assistant Professor of Family Medicine

John A. Murphy  
Clinical Assistant Professor Emeritus of Obstetrics and Gynecology

Judy I. Murphy  
Assistant Professor of Medicine, Clinician Educator

Matthew Murphy  
Assistant Professor of Medicine, Clinician Educator

Melissa M. Murphy  
Clinical Assistant Professor of Medical Science

David W. Murray  
Lecturer in Earth, Environmental, and Planetary Sciences

Rolland D. Murray  
Associate Professor of English

Nicholas Musisca  
Assistant Professor of Emergency Medicine, Clinician Educator

John F. Mustard  
Professor of Earth, Environmental, and Planetary Sciences; Professor of Environment and Society

Ann W. Mwangi  
Adjunct Assistant Professor of Biostatistics

Kevin M. Mwenda  
Assistant Professor of Population Studies (Research)

Deborah L. Myers  
Professor of Obstetrics and Gynecology

James R. Myers  
Clinical Associate Professor of Medicine

Wade Myers  
Professor of Psychiatry and Human Behavior

Aye Myint-u  
Clinical Assistant Professor of Psychiatry and Human Behavior

Evangelia Mylona  
Research Associate in Medicine

Eleftherios E. Mylonakis  
Charles C.J. Carpenter, MD Professor of Infectious Diseases

Paul T. Myoda  
Associate Professor of Visual Art

David Mysels  
Clinical Instructor in Psychiatry and Human Behavior

Drayton Nabers  
Associate Professor of English

Ali Naboush  
Assistant Professor of Medicine, Clinician Educator

Jennifer Judd Nadeau  
Clinical Assistant Professor of Psychiatry and Human Behavior

Alexander M. Nading  
Senior Fellow in International and Public Affairs

Katsuya Nagaoka  
Research Associate in Medicine

Drew Nagle  
Assistant Professor of Medicine, Clinician Educator

Richa Nahar  
Assistant Professor of Medicine, Clinician Educator

Paul E. Nahme  
Dorot Assistant Professor of Judaic Studies

Tanbir Najrana  
Assistant Professor of Pediatrics (Research)

Sawako Nakayasu  
Assistant Professor of Literary Arts

Namrata Nandakumar  
Clinical Assistant Professor of Surgery

Deepa Nankani  
Assistant Professor of Medicine, Clinician Educator

Anthony M. Napoli  
Associate Professor of Emergency Medicine

Meenakshi Narain  
Professor of Physics

Take Naseri  
Adjunct Associate Professor of Epidemiology

Justin M. Nash  
Adjunct Professor of Family Medicine

Christopher Shawn Nasin  
Clinical Assistant Professor of Family Medicine

Matt Nassar  
Assistant Professor of Neuroscience

Jack Nassau  
Clinical Associate Professor of Psychiatry and Human Behavior

Swetha Nataraj  
Clinical Instructor in Medical Science

Eric T. Nathan  
David S. Josephson Assistant Professor of Music

Andrew T. Nathanson  
Clinical Professor of Emergency Medicine

Gerard Nau  
Associate Professor of Medicine, Clinician Educator

Jennifer J. Nazareno  
Assistant Professor of Behavioral and Social Sciences

Chima D. Ndumele  
Adjunct Assistant Professor of Health Services, Policy and Practice

Rebecca A. Nedostup  
Associate Professor of East Asian Studies; Associate Professor of History

Alan Needleman  
Professor Emeritus of Engineering

Marguerite A. Neill  
Associate Professor of Medicine

Peter Gale Nelson  
Senior Lecturer in Literary Arts

Ron J. Nelson  
Professor Emeritus of Music

Tim Nelson  
Assistant Professor of Computer Science (Research)

Lina R. Nemchenok  
Clinical Assistant Professor of Medicine

Nicola Neretti  
Associate Professor of Molecular Biology, Cell Biology, and Biochemistry

Dawn K. Nero  
Clinical Assistant Professor of Psychiatry and Human Behavior

Sonia Nesbitt  
Research Associate in Pediatrics

Elizabeth M. Nestor  
Clinical Professor of Emergency Medicine

Charles E. Neu  
Professor Emeritus of History

David P. Neumann  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Dietrich Neumann  
Professor of History of Art and Architecture; Professor of Italian Studies

Laura S. Nevel  
Clinical Assistant Professor of Obstetrics and Gynecology

Chad P. Nevola  
 Clinical Assistant Professor of Pediatrics  
 Rebecca Newland Kilch  
 Assistant Professor of Psychiatry and Human Behavior (Research)  
 Karen A. Newman  
 Owen F. Walker Professor Emerita of Humanities and Professor Emerita of Comparative Literature and English  
 Michael Newstein  
 Adjunct Assistant Professor of Medicine  
 Christopher Newton  
 Clinical Assistant Professor of Surgery  
 Huy Quang Nguyen  
 Tamarkin Assistant Professor of Mathematics  
 Guy R. Nicastrì  
 Clinical Associate Professor of Family Medicine; Clinical Associate Professor of Surgery  
 Linda Nici  
 Professor of Medicine, Clinician Educator  
 Douglas R. Nickel  
 Andrea V. Rosenthal Professor of History of Art and Architecture  
 Claire Nicogossian  
 Clinical Instructor in Psychiatry and Human Behavior  
 Pura Nieto Hernandez  
 Distinguished Senior Lecturer in Classics  
 Eduardo A. Nillni  
 Professor Emeritus of Medicine (Research); Professor Emeritus of Molecular Biology, Cell Biology and Biochemistry (Research)  
 Rabin Niroula  
 Assistant Professor of Medicine, Clinician Educator  
 Christian Parcher Nixon  
 Assistant Professor of Pathology and Laboratory Medicine (Research)  
 Arthur W. Noel  
 Clinical Assistant Professor of Diagnostic Imaging  
 Corinna Noel  
 Clinical Instructor in Family Medicine  
 Julia E. Noguchi  
 Assistant Professor of Medical Science, Clinician Educator  
 Patricia A. Nolan  
 Adjunct Associate Professor of Health Services, Policy and Practice  
 Courtney Noonan  
 Clinical Instructor in Obstetrics and Gynecology  
 Natalie Rita Noonan  
 Clinical Instructor in Psychiatry and Human Behavior  
 Caroline M. Nordlund  
 Lecturer in International and Public Affairs  
 Georg Noren  
 Professor Emeritus of Neurosurgery  
 Darlene Noret  
 Teaching Associate in Medicine  
 Andriy Norets  
 Associate Professor of Economics  
 Alyssa Lynne Norris  
 Assistant Professor of Psychiatry and Human Behavior  
 Amanda Noska  
 Assistant Professor of Medicine  
 Melissa Brooks Nothnagle  
 Associate Professor of Family Medicine  
 Richard B. Noto  
 Professor of Diagnostic Imaging, Clinician Educator  
 Kate B. Noveau  
 Teaching Associate in Family Medicine  
 Andrew Nowak  
 Clinical Assistant Professor of Medicine  
 Lisa Noyes-Duguay  
 Clinical Assistant Professor of Medicine  
 Evangelia Ntzani  
 Adjunct Assistant Professor of Health Services, Policy and Practice  
 Sara Nuciforo  
 Clinical Assistant Professor of Medicine  
 Judith Nudelman  
 Clinical Associate Professor Emeritus of Family Medicine  
 Nicole R. Nugent  
 Associate Professor of Emergency Medicine; Associate Professor of Psychiatry and Human Behavior  
 Tara E. Nummedal  
 Professor of History; Professor of Italian Studies  
 Arto V. Nurmikko  
 L. Herbert Ballou University Professor of Engineering  
 John W. O'Bell  
 Associate Professor of Medicine, Clinician Educator  
 Jennifer A. O'Brien  
 Assistant Professor of Medicine, Clinician Educator  
 Jill A. O'Brien  
 Assistant Professor of Medicine, Clinician Educator  
 Morgan O'Connell  
 Teaching Associate in Medical Science  
 Bonnie O'Connor  
 Professor Emerita of Pediatrics, Clinician Educator  
 Kate O'Connor-Giles  
 Provost's Associate Professor of Brain Science  
 Diane Mellyn O'Donoghue  
 Visiting Professor of Public Humanities  
 Kathleen A. O'Heelan  
 Clinical Assistant Professor of Family Medicine  
 Carol O'Shea  
 Clinical Instructor in Medical Science  
 Thomas P. O'Toole  
 Professor of Health Services, Policy and Practice; Professor of Medicine  
 Elena Oancea  
 Associate Professor of Medical Science  
 Olga Obraztsova  
 Clinical Assistant Professor of Psychiatry and Human Behavior  
 C. Brandon Ogbunu  
 Assistant Professor of Ecology and Evolutionary Biology  
 Patricia M. Ogera  
 Clinical Assistant Professor of Pathology and Laboratory Medicine  
 Hwamee Oh  
 Assistant Professor of Psychiatry and Human Behavior  
 William Oh  
 Sylvia Kay Hassenfeld Professor Emeritus of Pediatrics  
 Rachel Ojserkis  
 Clinical Instructor in Psychiatry and Human Behavior  
 Michal Oklot  
 Associate Professor of Slavic Studies  
 Anthony J. Oldcorn  
 Professor Emeritus of Italian Studies  
 G. Richard Olds  
 Adjunct Professor of Pathology and Laboratory Medicine  
 Alvaro Olivares  
 Clinical Associate Professor of Psychiatry and Human Behavior  
 Graham J. Oliver  
 Professor of Classics; Professor of History

Karen Oliver  
Clinical Associate Professor of Psychiatry and Human Behavior

Matthew Thomas Oliver  
Assistant Professor of Obstetrics and Gynecology

Thomas Ollila  
Assistant Professor of Medicine

Adam Olszewski  
Associate Professor of Medicine

Saul Olyan  
Samuel Ungerleider, Jr. Professor of Judaic Studies

Warren Ong  
Clinical Assistant Professor of Psychiatry and Human Behavior

Nwamaka Onwugbenu  
Clinical Assistant Professor of Obstetrics and Gynecology

Steven M. Opal  
Clinical Professor of Medicine

Don Operario  
Professor of Behavioral and Social Sciences

Zsolt Orban  
Clinical Assistant Professor of Medicine

Lindsay M. Orchowski  
Associate Professor of Psychiatry and Human Behavior (Research)

Marion E. Orr  
Frederick Lippitt Professor of Public Policy, Professor of Political Science and Urban Studies

Jay M. Orson  
Clinical Associate Professor Emeritus of Pediatrics

Julio C. Ortega  
Professor of Hispanic Studies

Roberto Ortiz  
Clinical Assistant Professor of Medicine; Clinical Assistant Professor of Pathology and Laboratory Medicine

Itohan I. Osayimwese  
Associate Professor of History of Art and Architecture

Adena Osband  
Associate Professor of Surgery, Clinician Educator

Ed Osborn  
Associate Professor of Music; Associate Professor of Visual Art

Camilo Osorio  
Visiting Research Scholar in Orthopaedics

Wendy A. Ossman  
Clinical Assistant Professor of Psychiatry and Human Behavior

Emily F. Oster  
Royce Family Professor of Teaching Excellence and Professor of Economics

Brian R. Ott  
Professor of Neurology

Joyce Ou  
Associate Professor of Pathology and Laboratory Medicine

Nathalie Oulhen  
Assistant Professor of Molecular Biology, Cell Biology and Biochemistry (Research)

Frank L. Overly  
Professor of Emergency Medicine; Professor of Pediatrics

Emily A. Owens  
Assistant Professor of History

Jayanti J. Owens  
Mary Tefft and John Hazen White, Sr. Assistant Professor of International and Public Affairs and Sociology

Timothy Owens  
Teaching Associate in Psychiatry and Human Behavior

Adetokunbo A. Oyelese  
Associate Professor of Neurosurgery, Clinician Educator

Calvin E. Oyer  
Clinical Associate Professor Emeritus of Pathology and Laboratory Medicine

Margaret Paccione-Dyszlewski  
Clinical Assistant Professor of Psychiatry and Human Behavior

Jan Mateusz Pacewicz  
Associate Professor of Sociology and Urban Studies

Domenico Pacifici  
Professor of Engineering; Associate Professor of Physics

Rafael E. Padilla  
Clinical Assistant Professor of Anesthesiology

Nitin P. Padture  
Otis Everett Randall University Professor of Engineering

Monika Page  
Clinical Instructor in Medical Science

Talbot Page  
Professor Emeritus of Economics; Professor Emeritus of Environment and Society

David C. Paine  
Professor of Engineering

Bobby Pakzad-Hurson  
Jonathan M. Nelson Assistant Professor of Economics and Entrepreneurship

Prasanta Pal  
Investigator in Epidemiology

Daniella Palermo  
Clinical Instructor in Psychiatry and Human Behavior

Frank Paletta  
Clinical Assistant Professor of Surgery

Adam D. Pallant  
Associate Professor of Pediatrics, Clinician Educator

David Paller  
Senior Research Associate in Orthopaedics

Christopher D. Palmer  
Clinical Assistant Professor of Medicine

Rohan Palmer  
Assistant Professor of Psychiatry and Human Behavior (Research)

G. Tayhas R. Palmore  
Elaine I. Savage Professor of Engineering

Glenn E. Palomaki  
Professor of Pathology and Laboratory Medicine (Research)

Bai-Chuan Pan  
Professor Emeritus of Medicine (Research)

Orestis Panagiotou  
Assistant Professor of Health Services, Policy and Practice (Research)

Nikhil Panda  
Assistant Professor of Medicine

Sonali Pandya  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator; Assistant Professor of Surgery, Clinician Educator

Xiaoming Pang  
Research Associate in Surgery

Altin Pani  
Clinical Assistant Professor of Surgery

Efstratios Papaioannou  
Professor of Classics

George D. Papandonatos  
Professor of Biostatistics (Research)

Rebecca K. Papas  
Assistant Professor of Psychiatry and Human Behavior (Research)

John P. Papay  
Associate Professor of Education

Stacey Pappas  
Clinical Assistant Professor of Family Medicine

Stephanie Parade  
Associate Professor of Psychiatry and Human Behavior

Angela D. Paradis  
Adjunct Assistant Professor of Epidemiology

Michael A. Paradiso  
Sidney A. Fox and Dorothea Doctors Fox Professor of Ophthalmology and Visual Science, Professor of Neuroscience

Laura C. Parajon  
Adjunct Instructor in Family Medicine

Gyan Pareek  
Professor of Medicine; Professor of Surgery

Alfred F. Parisi  
Professor Emeritus of Medicine

Min Kyung Park  
Research Associate in Dermatology

Andrea Parker  
Clinical Assistant Professor of Surgery

Benjamin W. Parker  
Assistant Professor of English

Donna R. Parker  
Associate Professor of Epidemiology (Research); Associate Professor of Family Medicine (Research)

Robert K. Parker  
Clinical Assistant Professor of Surgery

Stephen Parman  
Associate Professor of Earth, Environmental, and Planetary Sciences

Edgar M. Parmentier  
Professor Emeritus of Earth, Environmental, and Planetary Sciences

Katherine Partridge  
Clinical Instructor in Psychiatry and Human Behavior

John R. Parziale  
Clinical Professor of Orthopaedics

George Pasquarello  
Clinical Assistant Professor of Orthopaedics

Eric M. Patashnik  
Julis-Rabinowitz Professor of Public Policy and Political Science

Amit Patel  
Clinical Instructor in Surgery

Dhiren Patel  
Clinical Instructor in Family Medicine

Khyati Patel  
Clinical Assistant Professor of Medicine

Nimesh R. Patel  
Assistant Professor of Pathology and Laboratory Medicine

Rajendra Patel  
Clinical Instructor in Medical Science

Samir M. Patel  
Clinical Assistant Professor of Psychiatry and Human Behavior

Sandhya Patel  
Clinical Instructor in Psychiatry and Human Behavior

Abigail Patenaude  
Teaching Associate in Pediatrics

Amrit Pathak  
Clinical Assistant Professor of Medicine

Rachit Patil  
Assistant Professor of Neurology, Clinician Educator; Assistant Professor of Neurosurgery, Clinician Educator; Assistant Professor of Pediatrics, Clinician Educator

Johann Patlak  
Clinical Instructor in Anesthesiology

John C. Patrick  
Assistant Professor of Radiation Oncology

Robert L. Patrick  
Associate Professor of Medical Science

Susanne J. Patrick-MacKinnon  
Clinical Instructor in Medical Science

James T. Patterson  
Ford Foundation Professor Emeritus and Professor Emeritus of History

Robert B. Patterson  
Clinical Professor of Surgery

William R. Patterson  
Distinguished Senior Lecturer in Engineering

Subhash Paudel  
Clinical Assistant Professor of Medicine

Alfred A. Paul  
Clinical Assistant Professor of Surgery

Mark Raymond Paulos  
Clinical Assistant Professor of Medicine

Benoit J. Pausader  
Associate Professor of Mathematics

Adam R. Pautz  
Professor of Philosophy

Ellie Pavlick  
Assistant Professor of Computer Science

Vasile Pavlov  
Research Associate in Surgery

Christina Paxson  
President, Professor of Economics and International and Public Affairs

E. Scott Paxton  
Assistant Professor of Orthopaedics

Deborah N. Pearlman  
Associate Professor of the Practice of Epidemiology

Teri B. Pearlstein  
Professor of Medicine; Professor of Psychiatry and Human Behavior

Allan E. Pearson  
Professor Emeritus of Engineering

David W. Pearson  
Clinical Assistant Professor Emeritus of Psychiatry and Human Behavior

Clayton Peimer  
Adjunct Professor of Orthopaedics

Robert A. Pelcovits  
Professor of Physics

Heather Pelletier  
Clinical Assistant Professor of Psychiatry and Human Behavior

Salley Pels  
Associate Professor of Pediatrics, Clinician Educator

Stephanie Penchuk  
Clinical Instructor in Pediatrics

Jian Peng  
Research Associate in Medicine

Kurt D. Pennell  
250th Anniversary Professor of Engineering

Frank A. Pensa  
Clinical Associate Professor of Obstetrics and Gynecology

Gita S. Pensa  
Associate Professor of Emergency Medicine, Clinician Educator

John R. Pepperell  
Research Associate in Pathology and Laboratory Medicine

Vincent Pera  
Clinical Assistant Professor of Medicine

Marc Jonathan Perkel  
Clinical Instructor in Psychiatry and Human Behavior

Marc A. Perlman  
Associate Professor of Music

Carmen Perrino  
Assistant Professor of Pathology and Laboratory Medicine

Keisha-Khan Y. Perry  
Associate Professor of Africana Studies

Samuel E. Perry  
Associate Professor of Comparative Literature; Associate Professor of East Asian Studies

Georges Peter  
Professor Emeritus of Pediatrics

Christopher Peters  
Clinical Assistant Professor of Medicine

Jessica R. Peters  
Assistant Professor of Psychiatry and Human Behavior (Research)

Andrew A. Peterson  
Associate Professor of Engineering

Heidi H. Peterson  
Clinical Assistant Professor of Family Medicine

Randolph R. Peto  
Adjunct Assistant Professor of Health Services, Policy and Practice

Gianna Petrone  
Assistant Professor of Emergency Medicine, Clinician Educator

John A. Pezzullo  
Associate Professor of Diagnostic Imaging, Clinician Educator

Noah S. Philip  
Associate Professor of Psychiatry and Human Behavior

Benjamin Z. Phillips  
Clinical Instructor in Medical Science

Katharine A. Phillips  
Adjunct Professor of Psychiatry and Human Behavior

Ralph Philosophe  
Adjunct Instructor in Obstetrics and Gynecology

Maureen Phipps  
Professor Emerita of Obstetrics and Gynecology

Chanika Phornphutkul  
Professor of Pathology and Laboratory Medicine, Clinician Educator; Professor of Pediatrics, Clinician Educator

Carle M. Pieters  
Professor Emerita of Earth, Environmental, and Planetary Sciences

Sarah Catherine Pillemer  
Clinical Instructor in Psychiatry and Human Behavior

Jessica Pineda  
Assistant Professor of Family Medicine, Clinician Educator; Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Hsiung Ping-Chen  
Visiting Scholar in American Studies

Francine Pingitore  
Assistant Professor of Pediatrics, Clinician Educator; Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Megan Pinkston-Camp  
Assistant Professor of Medicine, Clinician Educator; Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Jill Catherine Pipher  
Elisha Benjamin Andrews Professor of Mathematics

Karin Pirhofer Walzl  
Visiting Scholar in Environment and Society

Latha R. Pisharodi  
Professor of Pathology and Laboratory Medicine, Clinician Educator

Mark M. Pitt  
Professor Emeritus of Economics

Carlos A. Pittella  
Senior Research Associate in Portuguese and Brazilian Studies

Jeronimo Pizarro  
Visiting Scholar in Portuguese and Brazilian Studies

Martha A. Pizzarello  
Clinical Assistant Professor of Obstetrics and Gynecology

Peter A. Pizzarello  
Clinical Assistant Professor of Family Medicine

Robert Plante  
Teaching Associate in Psychiatry and Human Behavior

Wendy A. Plante  
Clinical Associate Professor of Psychiatry and Human Behavior

Jessica S. Plavicki  
Assistant Professor of Pathology and Laboratory Medicine

Gabriel J. Pleasants  
Clinical Instructor in Family Medicine

Kemp W. Plumb  
Assistant Professor of Physics

Jonathan C. Pober  
Assistant Professor of Physics

Alan D. Podis  
Clinical Assistant Professor Emeritus of Surgery

Dieter Pohl  
Clinical Instructor in Surgery

Patricia Poitevien  
Assistant Professor of Pediatrics, Clinician Educator

Lee Alexander Polikoff  
Assistant Professor of Pediatrics, Clinician Educator

Ethan M. Pollock  
Professor of History

David S. Pomerantz  
Clinical Assistant Professor of Dermatology

Michael A. Pomerantz  
Clinical Assistant Professor of Medicine

Soneath Pond  
Clinical Assistant Professor of Medicine

Carol Jean Poore  
Professor Emerita of German Studies

Christian Pope  
Clinical Instructor in Obstetrics and Gynecology

Athena Poppas  
Professor of Medicine

Stephen Porder  
Professor; Professor of Ecology and Evolutionary Biology

David C. Portelli  
Clinical Professor of Emergency Medicine

Barbara Porton  
Assistant Professor of Psychiatry and Human Behavior (Research)

Roy M. Poses  
Clinical Associate Professor of Medicine

Michael T. Poshkus  
Clinical Assistant Professor of Medicine

Alex T. Poterack  
Lecturer in Economics

Daniel F. Potter  
Professor of the Practice of Data Science

N. Stevenson Potter  
Associate Professor of Neurology, Clinician Educator; Associate Professor of Neurosurgery, Clinician Educator

Jai-Me Potter-Rutledge  
Teaching Associate in Medical Science

Ron Matthew Potvin  
Adjunct Lecturer in Public Humanities

Frederic Pouille  
Senior Research Associate in Neuroscience

Marilyn M. Powers  
Clinical Assistant Professor of Obstetrics and Gynecology

Thomas R. Powers  
Professor of Engineering; Professor of Physics

Shankar Kasinadhuni Prasad  
Adjunct Assistant Professor of Political Science

Warren L. Prell  
Henry L. Doherty Professor Emeritus of Oceanography

Jane Preotle  
Assistant Professor of Emergency Medicine, Clinician Educator; Assistant Professor of Pediatrics, Clinician Educator

Franco Preparata  
An Wang Professor Emeritus of Computer Science

Amanda B. Pressman  
Associate Professor of Medicine, Clinician Educator

Robert W. Preucel  
James Manning Professor of Anthropology

Ann Back Price  
Clinical Assistant Professor of Psychiatry and Human Behavior

Lawrence H. Price  
Professor of Psychiatry and Human Behavior

Victor E. Pricolo  
Clinical Professor of Medical Science

Jennifer M. Primack  
Assistant Professor of Psychiatry and Human Behavior (Research)

Barry M. Prizant  
Visiting Scholar in Theatre Arts and Performance Studies

Jason A. Protass  
Assistant Professor

Jeffrey Proulx  
Assistant Professor of Behavioral and Social Sciences (Research); Assistant Professor of Psychiatry and Human Behavior (Research)

Sherri Provencal  
Clinical Assistant Professor of Psychiatry and Human Behavior

Michael Grier Prucha  
Assistant Professor of Emergency Medicine, Clinician Educator

Joseph Michael Pucci  
Professor of Classics; Professor of Comparative Literature

Albert J. Puerini  
Clinical Assistant Professor of Family Medicine

Louis J. Pugliese  
Teaching Associate in Family Medicine

Samuel Punshon-Smith  
Prager Assistant Professor of Applied Mathematics

M. Yakub A. Puthawala  
Clinical Associate Professor of Radiation Oncology

Michael C. J. Putnam  
Professor Emeritus of Classics

Louis Putterman  
Professor of Economics

Zhenchao Qian  
Professor of Sociology

Yingli Qu  
Visiting Scholar in Epidemiology

C. Brandon Qualls  
Clinical Assistant Professor Emeritus of Psychiatry and Human Behavior

Kevin E. Quashie  
Professor of English

M. Ruhul Quddus  
Professor of Pathology and Laboratory Medicine

Matthew I. Quesenberry  
Assistant Professor of Medicine

Peter J. Quesenberry  
Paul Calabresi, M.D. Professor of Oncology, Professor of Medicine

Anne E. Quinn  
Teaching Associate in Medical Science

Jose Bernardo Q. Quintos  
Professor of Pediatrics, Clinician Educator

Abrar Qureshi  
Professor of Dermatology; Professor of Epidemiology

Kurt A. Raaflaub  
Professor Emeritus of Classics

Joseph S. Rabatin  
Associate Professor of Medicine, Clinician Educator

Melinda Alliker Rabb  
Professor of English

Steve Rabson  
Professor Emeritus of East Asian Studies

Gregory Rachu  
Assistant Professor of Medicine, Clinician Educator

Glenn Radice  
Professor of Medicine

Dale F. Radka  
Clinical Assistant Professor of Psychiatry and Human Behavior

Eric Radler  
Clinical Assistant Professor of Medicine

Keith W. L. Rafal  
Clinical Assistant Professor of Family Medicine

Jason Rafferty  
Clinical Assistant Professor of Psychiatry and Human Behavior

Md Momotazur Rahman  
Associate Professor of Health Services, Policy and Practice

Herbert Rakatansky  
Clinical Professor Emeritus of Medicine

Christina A. Raker  
Research Associate in Obstetrics and Gynecology

William Rakowski  
Professor Emeritus of Behavioral and Social Sciences

Sohini Ramachandran  
Associate Professor of Biology

Rohini Ramadas  
Tamarkin Assistant Professor of Mathematics

Kavita Ramanan  
Roland George Dwight Richardson University Professor of Applied Mathematics

Richard M. Rambuss  
Nicholas Brown Professor of Oratory and Belles Lettres, Professor of English

Richmond Ramirez  
Clinical Assistant Professor of Family Medicine

Dixa Ramirez D'Oleo  
Assistant Professor of American Studies and English

Allison Ramler  
Clinical Instructor in Medical Science

Donald A. Ramos  
Clinical Assistant Professor of Obstetrics and Gynecology

Bharat Ramratnam  
Associate Professor of Medicine

Stacy Ramsey  
Teaching Associate in Obstetrics and Gynecology

Naveed Rana  
Assistant Professor of Medicine, Clinician Educator

David M. Rand  
Stephen T. Olney Professor of Natural History

David E. Rangel  
Assistant Professor of Education

Paras Ranjitkar  
Clinical Assistant Professor of Medicine

Megan L. Ranney  
Associate Professor of Emergency Medicine; Associate Professor of Health Services, Policy and Practice

Shyam Rao  
Assistant Professor of Neurology

Vinay Rao  
Assistant Professor of Medicine, Clinician Educator

Charles R. Rardin  
Professor of Obstetrics and Gynecology

Steven A. Rasmussen  
Mary E. Zucker Professor of Psychiatry and Human Behavior

Lucille A. Rathier  
Clinical Associate Professor of Psychiatry and Human Behavior

Rajendrasinh Rathod  
Clinical Assistant Professor of Obstetrics and Gynecology

Rachel Ratz-Lubashevsky  
Visiting Scholar in Cognitive, Linguistic and Psychological Sciences

Alexander G. Raufi  
Assistant Professor of Medicine

Emily K. Rauscher  
Associate Professor of Sociology

Stephanie A. Ravillon  
Senior Lecturer in French Studies

Thangam Ravindranathan  
Associate Professor of French Studies

Roger D. Raymond  
Clinical Assistant Professor of Medicine

Christine E. Rayner  
Clinical Assistant Professor of Psychiatry and Human Behavior

James R. Rayner  
Clinical Assistant Professor of Emergency Medicine

Fatima Raza  
Assistant Professor of Medicine, Clinician Educator

Sakeena Raza  
Assistant Professor of Medicine, Clinician Educator

Jonathan Readey  
Senior Lecturer in English

John L. Reagan  
Assistant Professor of Medicine

Sherief Reda  
Professor of Engineering

Hemakumar Reddy  
Research Associate in Molecular Biology, Cell Biology and Biochemistry

Marc Redfield  
Professor of Comparative Literature; Professor of English

Rebecca Reece  
Assistant Professor of Medicine, Clinician Educator

Cheryl Reed  
Teaching Associate in Medical Science

Joseph D. Reed  
Professor of Classics; Professor of Comparative Literature

John P. Reeder  
Professor Emeritus of Religious Studies

Laurie Beth Reeder  
Clinical Assistant Professor of Medical Science

Robert A. Reenan  
Professor of Biology

Lauren Reeves  
Clinical Instructor in Psychiatry and Human Behavior

Maria Regan  
Teaching Associate in Psychiatry and Human Behavior

Anthony M. Reginato  
Associate Professor of Dermatology; Associate Professor of Medicine

Bernard M. Reginster  
Professor of Philosophy

Richard A. Regnante  
Clinical Assistant Professor of Medicine

Katelynn T. Rei  
Teaching Associate in Family Medicine

Ravit Reichman  
Associate Professor of English

Jonathan S. Reichner  
Professor of Surgery (Research)

Sheridan Reiger  
Assistant Professor of Medicine, Clinician Educator

Shmuel Reis  
Adjunct Professor of Family Medicine

Steven P. Reiss  
Professor of Computer Science

Amy G. Remensnyder  
Professor of History

Elizabeth Renaud  
Associate Professor of Pediatrics, Clinician Educator; Associate Professor of Surgery, Clinician Educator

Britta Renzulli  
Teaching Associate in Surgery

Yana K. Reshetnyak  
Adjunct Professor of Radiation Oncology

Murray Resnick  
Adjunct Professor of Pathology and Laboratory Medicine

Joel W. Revill  
Adjunct Assistant Professor of History

Katharine Conrad Reynolds  
Clinical Instructor in Psychiatry and Human Behavior

Geoffrey W. Ribbans  
Professor Emeritus of Hispanic Studies

Anthony R. Ricci  
Clinical Assistant Professor of Medicine

Candace M. Rice  
Assistant Professor of Archaeology and the Ancient World and Classics

Donald Rice  
Clinical Assistant Professor of Medicine

Louis B. Rice  
Professor of Molecular Microbiology and Immunology

Harlan G. Rich  
Associate Professor of Medical Science; Associate Professor of Medicine

Norman Robert Rich  
Professor Emeritus of History

Peter Damian Richardson  
Professor Emeritus of Engineering; Professor Emeritus of Physiology

Holly A. Richendrfer  
Research Associate in Emergency Medicine

Katherine Richman  
Assistant Professor of Medicine, Clinician Educator

Marc H. Richman  
Professor Emeritus of Engineering

Gerhard H. Richter  
Professor of Comparative Literature and German Studies

Michelle L. Rickerby  
Clinical Professor of Psychiatry and Human Behavior

Kenneth C. Rickler  
Clinical Associate Professor Emeritus of Neurology; Clinical Associate Professor Emeritus of Psychiatry and Human Behavior

Mark S. Ridlen  
Associate Professor Emeritus of Diagnostic Imaging, Clinician Educator

Lauren Rieger  
Teaching Associate in Medical Science

Lukas B. Rieppel  
Assistant Professor of History

Jeffrey S. Riese  
Associate Professor of Pediatrics, Clinician Educator

Abdalla Rifai  
Associate Professor Emeritus of Pathology and Laboratory Medicine

Timothy B. Riker  
Lecturer in Language Studies

Mark A. Ringiewicz  
Clinical Assistant Professor of Family Medicine

Matteo Riondato  
Visiting Scientist in Computer Science

William M. Risen Jr  
Professor Emeritus of Chemistry

Patricia M. Risica  
Associate Professor of Behavioral and Social Sciences; Associate Professor of Epidemiology

Daniel C. Ritchie  
Assistant Professor of Computer Science

Dannie C. Ritchie  
Clinical Assistant Professor of Family Medicine

Jason Ritt  
Assistant Professor of Neuroscience (Research)

Dale A. Ritter  
Senior Lecturer in Biology

Massimo Riva  
Professor of Italian Studies

Mark J. Rivard  
Professor of Radiation Oncology

David Rivera  
Clinical Assistant Professor of Surgery

Jorge Rivera  
Clinical Assistant Professor of Surgery

Maricruz Rivera-Hernandez  
Assistant Professor of Health Services, Policy and Practice

Tina Rizack  
Clinical Associate Professor of Medicine

Sophia Rizk  
Clinical Assistant Professor of Medicine

Philip R. Rizzuto  
Clinical Professor of Surgery

Catherine A. Roberts  
Visiting Scholar in Applied Mathematics

J. Timmons Roberts  
Ittleson Professor of Environmental Studies

Thomas Roberts  
Professor of Ecology and Evolutionary Biology

James F. Robertson  
Clinical Assistant Professor of Medicine

Henry J. Robidoux  
Clinical Associate Professor Emeritus of Surgery

Harold Robinson  
Teaching Associate in Medical Science

Jerome R. Robinson  
Assistant Professor of Chemistry

Leslie Robinson-Bostom  
Professor of Dermatology

Katina M. Robison  
Associate Professor of Obstetrics and Gynecology

Seth E. Rockman  
Associate Professor of History

Randy Rockney  
Professor of Family Medicine; Professor of Medical Science; Professor of Pediatrics

Daniel A. Rodriguez  
Manning Assistant Professor of History

Jael Rodriguez  
Assistant Professor of Medicine, Clinician Educator

Marina Rodriguez  
Clinical Assistant Professor of Medicine

Pablo Rodriguez  
Clinical Associate Professor of Obstetrics and Gynecology

Ralph E. Rodriguez  
Professor of American Studies; Professor of English

Brooke Genkin Rogers  
Assistant Professor of Medicine (Research)

Jamison E. Rogers  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Melvin L. Rogers  
Associate Professor of Political Science

Ralph Rogers  
Assistant Professor of Medicine, Clinician Educator

Jeffrey M. Rogg  
Associate Professor of Diagnostic Imaging

Damaris Jane Rohsenow  
Professor of Behavioral and Social Sciences (Research)

Rachel Rojanski  
Associate Professor of Judaic Studies

Felipe A. Rojas Silva  
Associate Professor of Archaeology and the Ancient World and Egyptology and Assyriology

Walter Rok  
Adjunct Professor of Medical Science

Peter Andrew Roman  
Clinical Instructor in Medical Science

Drew Romanelli  
Teaching Associate in Obstetrics and Gynecology

Thomas D. Romeo  
Clinical Assistant Professor Emeritus of Health Services, Policy and Practice

Donna M. Rondeau-Marzullo  
Teaching Associate in Medicine

Thomas Roodhouse  
Clinical Instructor in Medical Science

Ellen Frances Rooney  
Royce Family Professor of Teaching Excellence, Professor of English and Modern Culture and Media

Jodi Roque  
Clinical Assistant Professor of Family Medicine

Christopher Rose  
Professor of Engineering

Robin L. Rose  
Associate Professor of the Practice of Executive Master in Science & Technology Leadership

Tricia Rose  
Chancellor's Professorship of Africana Studies

Christoph Rose-Petruck  
Professor of Chemistry

Michael I. Rosen  
Professor Emeritus of Mathematics

Philip Rosen  
Professor Emeritus of Modern Culture and Media

Jennifer A. Rosenbaum  
Clinical Assistant Professor of Family Medicine

Noah K. Rosenberg  
Adjunct Assistant Professor of Emergency Medicine

Mindy S. Rosenbloom  
Clinical Assistant Professor of Psychiatry and Human Behavior

Karen Rosene Montella  
Professor Emerita of Medicine

Jacob Karl Rosenstein  
Assistant Professor of Engineering

David M. Rosler  
Senior Research Associate in Engineering

Albert M. Ross  
Clinical Associate Professor of Pediatrics

RaMell Ross  
Assistant Professor of Visual Art

Thomas Ross  
Clinical Assistant Professor of Medical Science

Fernanda Rossatto  
Research Associate in Medicine

Fred A. Rotenberg  
Assistant Professor of Anesthesiology, Clinician Educator

Harold D. Roth  
Professor of Religious Studies and East Asian Studies

Julie L. Roth  
Associate Professor of Medical Science; Associate Professor of Neurology

Toni M. Roth  
Clinical Assistant Professor of Radiation Oncology

Frank G. Rothman  
Professor Emeritus of Biology

Boris Rotman  
Professor Emeritus of Medical Science

Sharon I. Rounds  
Professor of Medicine; Professor of Pathology and Laboratory Medicine

Stephen N. Rous  
Clinical Professor Emeritus of Surgery

Dwight J. Rouse  
Professor of Epidemiology; Professor of Obstetrics and Gynecology

Joseph W. Rován  
Professor of Music

Emily S. Rowland  
Clinical Assistant Professor of Medical Science; Clinical Assistant Professor of Psychiatry and Human Behavior

Kareen Rozen  
Associate Professor of Economics

Ranna Rozenfeld  
Professor of Pediatrics

Boris L. Rozovsky  
Ford Foundation Professor Emeritus of Applied Mathematics

Amity Rubeor  
Assistant Professor of Family Medicine, Clinician Educator

Patricia E. Rubertone  
Professor of Anthropology

Lowell J. Rubin  
Clinical Assistant Professor Emeritus of Psychiatry and Human Behavior

Ruthann A. Rudel  
Research Associate in Pathology and Laboratory Medicine

Carole Rudman  
Teaching Associate in Pediatrics

James L. Rudolph  
Professor of Health Services, Policy and Practice; Professor of Medicine

Dietrich Rueschemeyer  
Professor Emeritus of Sociology

Stephanie Marie Ruest  
Assistant Professor of Emergency Medicine; Assistant Professor of Pediatrics

Barbara M. Ruf  
Clinical Instructor in Psychiatry and Human Behavior

Jessica Ruffolo  
Clinical Assistant Professor of Psychiatry and Human Behavior

Richard J. Ruggieri  
Clinical Assistant Professor of Medicine

Charles M. Ruhl  
Clinical Assistant Professor of Surgery

Laura Ruoff  
Clinical Assistant Professor of Psychiatry and Human Behavior

Elizabeth Rush  
Visiting Lecturer in English

Kerri Rush  
Teaching Associate in Family Medicine

James M. Russell  
Royce Family Professor of Teaching Excellence, Professor of Earth, Environmental, and Planetary Sciences

Lorna B. Russell  
Clinical Assistant Professor of Medicine

Philip Christian Russell  
Clinical Assistant Professor of Psychiatry and Human Behavior

Patricia M. Russo-Magno  
Clinical Assistant Professor of Medicine

Geoffrey R. Russom  
Professor Emeritus of English

Malcolm J. Rutherford  
Professor Emeritus of Earth, Environmental, and Planetary Sciences

Matthew T. Rutz  
Associate Professor of Egyptology and Assyriology

Maureen Ryall  
Assistant Professor of Pediatrics, Clinician Educator

Natasha R. Rybak  
Assistant Professor of Medicine, Clinician Educator

Heather Rybasack-Smith  
Assistant Professor of Emergency Medicine, Clinician Educator

Beth A. Ryder  
Associate Professor of Medical Science, Clinician Educator; Associate Professor of Surgery, Clinician Educator

Harl Edgar Ryder  
Professor Emeritus of Economics

Carl Saab  
Professor of Neuroscience (Research); Professor of Neurosurgery (Research)

Alberto Saal  
Professor of Earth, Environmental, and Planetary Sciences

Andrew Saal  
Clinical Assistant Professor of Family Medicine

Ammar Saati  
Clinical Assistant Professor of Medicine

Walid S. Saber  
Clinical Assistant Professor of Medicine

Daniel C. Sacchetti  
Assistant Professor of Neurology

Henry T. Sachs  
Clinical Assistant Professor of Psychiatry and Human Behavior

Kenneth S. Sacks  
Professor of History

Ara Sadaniantz  
Clinical Associate Professor of Medicine

Noha Sadek  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Neil F. Safier  
Associate Professor of History

Howard Safran  
Professor of Medicine

Caitlin Saint-Aubin  
Clinical Assistant Professor of Obstetrics and Gynecology

Ian J. Saldanha  
Assistant Professor of Epidemiology; Assistant Professor of Health Services, Policy and Practice

Ziad Saleh  
Assistant Professor of Radiation Oncology

Jared M. Saletin  
Assistant Professor of Psychiatry and Human Behavior

Amy Lynn Salisbury  
Associate Professor of Pediatrics; Associate Professor of Psychiatry and Human Behavior

Matthew T. Salisbury  
Clinical Assistant Professor of Family Medicine

Robert A. Salk  
Clinical Assistant Professor of Obstetrics and Gynecology

Philip Salko  
Clinical Assistant Professor of Family Medicine; Clinical Assistant Professor of Orthopaedics

Jennifer Salm  
Clinical Instructor in Pediatrics

Elena Salmoirago-Blotcher  
Associate Professor of Epidemiology; Associate Professor of Medicine

Arthur R. Salomon  
Associate Professor of Biology; Associate Professor of Chemistry

Jason Salter  
Clinical Assistant Professor of Family Medicine

Sundaresan T. Sambandam  
Clinical Assistant Professor of Medicine

Cara J. Sammartino  
Adjunct Associate Professor of Health Services, Policy and Practice

Prakash Sampath  
Clinical Associate Professor of Neurosurgery

Elizabeth Samuels  
Assistant Professor of Emergency Medicine

John Sanacore  
Clinical Assistant Professor of Pediatrics

Martha Cristina Sanchez  
Assistant Professor of Medicine, Clinician Educator

Juan Sanchez-Esteban  
Associate Professor of Pediatrics

Jennifer A. Sanders  
Associate Professor of Pathology and Laboratory Medicine (Research); Associate Professor of Pediatrics (Research)

Bjorn Sandstede  
Royce Family Professor of Teaching Excellence, Professor of Applied Mathematics

Jerome Sanes  
Professor of Neuroscience

Maheep Sangha  
Clinical Assistant Professor of Medicine

Michael Santos  
Assistant Professor of Medicine, Clinician Educator

Janice Santos Cortes  
Assistant Professor of Surgery, Clinician Educator

Kelley Sanzen  
Clinical Assistant Professor of Medicine

Sufala Sapers  
Clinical Instructor in Medical Science

Paul E. Sapir  
Clinical Assistant Professor Emeritus of Psychiatry and Human Behavior

Shivali Sarawgi  
Clinical Instructor in Psychiatry and Human Behavior

Jennifer Sardella  
Teaching Associate in Pediatrics

Sylvester Sarfraz  
Assistant Professor of Medicine, Clinician Educator

Neil Sarkar  
Associate Professor of Health Services, Policy and Practice; Associate Professor of Medical Science

Yuka Sasaki  
Professor of Cognitive, Linguistic and Psychological Sciences (Research)

Michael L. Satlow  
Professor of Judaic Studies and Religious Studies

John E. Savage  
An Wang Professor Emeritus of Computer Science

Daniel L. Savitt  
Clinical Associate Professor of Emergency Medicine

David A. Savitz  
Professor of Epidemiology; Professor of Obstetrics and Gynecology; Professor of Pediatrics

Janine T. Anderson Sawada  
Professor of Religious Studies and East Asian Studies

Dov F. Sax  
Professor of Ecology and Evolutionary Biology; Professor of Environment and Society

Syeda M. Sayeed  
Clinical Assistant Professor of Medicine

Adele C. Scafuro  
Professor of Classics

Thomas J. Scaramella  
Clinical Assistant Professor Emeritus of Psychiatry and Human Behavior

Keith Scarfo  
Assistant Professor of Neurosurgery

Frank John Schaberg  
Associate Professor Emeritus of Surgery, Clinician Educator

Monica J. Schaberg  
 Clinical Assistant Professor Emerita of Pediatrics

Jay S. Schachne  
 Clinical Assistant Professor of Medicine

Kate J. Schapira  
 Senior Lecturer in English

Heather T. Schatten  
 Assistant Professor of Psychiatry and Human Behavior (Research)

Joanna Schatz  
 Clinical Instructor in Medical Science

Joshua B. Schechter  
 Associate Professor of Philosophy

Margaret Scheffler  
 Assistant Professor of Pediatrics, Clinician Educator

Susanne Schennach  
 Professor of Economics

Barbara Schepps  
 Professor Emerita of Diagnostic Imaging, Clinician Educator

Andrew K. Scherer  
 Associate Professor of Anthropology

Thomas G. Schestag  
 Professor of German Studies

Anna Schierberl Scherr  
 Clinical Assistant Professor of Psychiatry and Human Behavior

Fred Jay Schiffman  
 Sigal Family Professor of Humanistic Medicine, Professor of Medicine

Wendy J. Schiller  
 Professor of Political Science

Juliane Schlag  
 Research Associate in Environment and Society

Lauren K. Schlanger  
 Assistant Professor of Medicine, Clinician Educator

Justin Schleifer  
 Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Christopher H. Schmid  
 Professor of Biostatistics

Sarah B. Schmidhofer  
 Clinical Assistant Professor of Medical Science; Clinical Assistant  
 Professor of Psychiatry and Human Behavior

Scott T. Schmidt  
 Associate Professor of Surgery, Clinician Educator

Albert R. Schmitt  
 Professor Emeritus of German Studies

Phillip J. Schmitt  
 Clinical Assistant Professor of Medical Science

Richard Schmitt  
 Professor Emeritus of Philosophy

Franklin Schneider  
 Clinical Assistant Professor of Medicine

Mark K. Schneider  
 Adjunct Assistant Professor of Health Services, Policy and Practice

Rebecca Schneider  
 Professor of Theatre Arts and Performance Studies

Christoph Schorl  
 Assistant Professor of Biology (Research)

Teresa L. Schraeder  
 Clinical Associate Professor of Family Medicine

Andrew M. Schrank  
 Olive C. Watson Professor of Sociology and International and Public  
 Affairs

David Schreiber  
 Clinical Assistant Professor of Medicine

Nidia A. Schuhmacher  
 Senior Lecturer in Hispanic Studies

Gretchen Schultz  
 Professor of French Studies

Peter H. Schultz  
 Professor Emeritus of Earth, Environmental, and Planetary Sciences

Mark Barry Schupack  
 Professor Emeritus of Economics

Jessica S. Schuster  
 Assistant Professor of Pediatrics (Research)

Jeremiah Schuur  
 Frances Weeden Gibson-Edward A. Iannuccilli, MD Professor of  
 Emergency Medicine

Jennifer L. Schwab  
 Teaching Associate in Pediatrics

Eric B. Schwam  
 Clinical Assistant Professor of Medical Science

Carl Schwartz  
 Assistant Professor of Anesthesiology, Clinician Educator

James M. Schwartz  
 Clinical Assistant Professor of Family Medicine

Richard E. Schwartz  
 Chancellor's Professorship of Mathematics

Robert Schwartz  
 Professor Emeritus of Pediatrics

Stuart T. Schwartz  
 Clinical Associate Professor of Medicine

Malte Schwarzkopf  
 Assistant Professor of Computer Science

Robert H. Schwengel  
 Clinical Assistant Professor of Medicine

Michelle Schwer  
 Assistant Professor of Radiation Oncology, Clinician Educator

Francis H. Scola  
 Clinical Professor Emeritus of Diagnostic Imaging

Erin Scott  
 Teaching Associate in Medical Science

H. Denman Scott  
 Professor Emeritus of Health Services, Policy and Practice; Professor  
 Emeritus of Medicine

Lori Scott-Sheldon  
 Professor of Behavioral and Social Sciences; Professor of Psychiatry and  
 Human Behavior

Christina Scully  
 Clinical Assistant Professor of Medical Science; Clinical Assistant  
 Professor of Psychiatry and Human Behavior

Ivona Sediva  
 Associate Professor of Pediatrics, Clinician Educator

John M. Sedivy  
 Hermon C. Bumpus Professor of Biology

George M. Seidel  
 Professor Emeritus of Physics

Ronald Seifer  
 Professor of Psychiatry and Human Behavior

Lewis C. Seifert  
 Professor of French Studies

Robert O. Self  
 Mary Ann Lippitt Professor of American History

Gregg J. Selke  
 Clinical Assistant Professor of Psychiatry and Human Behavior

- Frank W. Sellke  
Karl E. Karlson, MD and Gloria A. Karlson Professor of Cardiothoracic Surgery, Professor of Surgery
- Jason K. Sello  
Adjunct Professor of Chemistry
- Vijairam Selvaraj  
Assistant Professor of Medicine, Clinician Educator
- Sonia Seng  
Clinical Assistant Professor of Medicine
- Elif Sengun  
Research Associate in Medicine
- Thomas E. Sepe  
Clinical Professor of Medicine
- Roberto Serrano  
Harrison S. Kravis University Professor of Economics
- Thomas R. Serre  
Associate Professor of Cognitive, Linguistic and Psychological Sciences
- Kurush Setna  
Clinical Assistant Professor of Medicine
- Christopher Takakazu Seto  
Associate Professor of Chemistry
- Mark Seto  
Senior Lecturer in Music
- Russell Settipane  
Clinical Professor of Medicine
- Hadiya Altera Teferra Sewer  
Visiting Scholar in Slavery and Justice
- Attila A. Seyhan  
Adjunct Associate Professor of Pathology and Laboratory Medicine (Research)
- Linda C. Shafer  
Adjunct Assistant Professor of Psychiatry and Human Behavior
- Holly M. Shaffer  
Assistant Professor of History of Art and Architecture
- Ankur Shah  
Assistant Professor of Medicine, Clinician Educator
- Nishant R. Shah  
Assistant Professor of Health Services, Policy and Practice; Assistant Professor of Medicine
- Nishit Shah  
Associate Professor of Surgery, Clinician Educator
- Samir A. Shah  
Clinical Professor of Medicine
- Bahram Shah-Hosseini  
Clinical Assistant Professor of Obstetrics and Gynecology
- Reza Shah-Hosseini  
Clinical Associate Professor Emeritus of Obstetrics and Gynecology
- Linda B. Shalon  
Associate Professor of Pediatrics, Clinician Educator
- Robert M. Shalvoy  
Associate Professor of Orthopaedics, Clinician Educator
- Peter R. Shank  
Professor Emeritus of Medical Science
- Gerald M. Shapiro  
Professor Emeritus of Music
- Jason M. Shapiro  
Associate Professor of Medicine, Clinician Educator; Associate Professor of Pediatrics, Clinician Educator
- Jesse M. Shapiro  
Eastman Professor of Political Economy
- Michael Shapiro  
Professor Emeritus of Slavic and Semiotic Studies
- Katherine M. Sharkey  
Associate Professor of Medicine; Associate Professor of Psychiatry and Human Behavior
- Satish C. Sharma  
Professor of Medicine
- Surendra Sharma  
Professor of Pathology and Laboratory Medicine (Research); Professor of Pediatrics (Research)
- Meghan Sharp  
Clinical Instructor in Psychiatry and Human Behavior
- Sunil K. Shaw  
Assistant Professor of Pediatrics (Research)
- Laura Shawhughes  
Assistant Professor of Medicine, Clinician Educator
- Lisa B. Shea  
Clinical Associate Professor of Psychiatry and Human Behavior
- Edward P. Sheehan  
Clinical Assistant Professor of Psychiatry and Human Behavior
- Thomas Sheeran  
Clinical Associate Professor of Psychiatry and Human Behavior
- Michael F. Sheff  
Associate Professor Emeritus of Pathology and Laboratory Medicine (Research)
- Fadi Shehadeh  
Research Associate in Medicine
- David Sheinberg  
Professor of Neuroscience
- Stephen J. Sheinkopf  
Associate Professor of Pediatrics; Associate Professor of Psychiatry and Human Behavior
- Brian W. Sheldon  
Professor of Engineering
- Douglas G. Shemin  
Associate Professor of Medicine
- Kai Sheng  
Visiting Instructor in Molecular Biology, Cell Biology and Biochemistry
- Amitai Shenhav  
Assistant Professor of Cognitive, Linguistic and Psychological Sciences
- Stephanie A. Shepard-Umaschi  
Assistant Professor of Psychiatry and Human Behavior (Research)
- Bryan E. Shepp  
Professor Emeritus of Psychology and Cognitive and Linguistic Sciences
- Charles B. Sherman  
Clinical Associate Professor of Medicine
- Naoko Shibusawa  
Associate Professor of American Studies; Associate Professor of History
- Renee R. Shield  
Clinical Professor of Health Services, Policy and Practice
- Sarah-Kim Shields  
Assistant Professor of Diagnostic Imaging, Clinician Educator
- Elena Shih  
Manning Assistant Professor of American Studies
- Dan Shilo  
Assistant Professor of Diagnostic Imaging, Clinician Educator
- Alexei Shimanovsky  
Assistant Professor of Medicine, Clinician Educator
- Yeonjong Shin  
Prager Assistant Professor of Applied Mathematics
- Cullen Shipman  
Clinical Assistant Professor of Family Medicine
- Susan E. Short  
Professor of Sociology

Rajesh Shrestha  
Clinical Assistant Professor of Medicine

Suvash Shrestha  
Clinical Assistant Professor of Medicine

John Shroeder  
Professor Emeritus of English

Vadim Shteyler  
Clinical Assistant Professor of Medicine

Chi-Wang Shu  
Stowell University Professor of Applied Mathematics

Priscilla Shube  
Clinical Assistant Professor of Family Medicine

Anita Shukla  
Assistant Professor of Engineering; Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology

Jamila H. Siamwala  
Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology (Research)

Karen H. Sibley  
Adjunct Lecturer in Education

Afreen Siddiqui  
Clinical Associate Professor of Surgery

Santina L. Siena  
Clinical Assistant Professor Emerita of Obstetrics and Gynecology

Mark Sigman  
Krishnamurthi Family Professor of Urology, Professor of Surgery

Eleni A. Sikelianos  
Professor of Literary Arts

Marie A. Sillice  
Assistant Professor of Psychiatry and Human Behavior (Research)

Hilary Silver  
Professor Emerita of Sociology; Professor Emerita of Urban Studies

Michael A. Silver  
Clinical Assistant Professor of Psychiatry and Human Behavior

Rebecca B. Silver  
Associate Professor of Pediatrics, Clinician Educator; Associate Professor of Psychiatry and Human Behavior, Clinician Educator

Fredric Joel Silverblatt  
Professor Emeritus of Medicine

Harvey Fox Silverman  
Professor of Engineering

John Michael Silverman  
Professor Emeritus of Modern Culture and Media

Joseph H. Silverman  
Professor of Mathematics

Howard Silversmith  
Clinical Instructor in Medical Science

Joanne M. Silvia  
Clinical Assistant Professor of Family Medicine

Leonor Simas-Almeida  
Distinguished Senior Lecturer in Portuguese and Brazilian Studies

Louis R. Simeone  
Clinical Assistant Professor of Orthopaedics

John Simeral  
Assistant Professor of Engineering (Research)

Andrea Megela Simmons  
Professor of Cognitive, Linguistic and Psychological Sciences

James A. Simmons  
Professor of Biology

James E. Simmons  
Assistant Professor of Medicine, Clinician Educator

Roxanne Simmons  
Clinical Instructor in Pediatrics

Shannon Leigh Simmons  
Assistant Professor of Medicine, Clinician Educator

Meera Varma Simoes  
Clinical Assistant Professor of Obstetrics and Gynecology

Peter R. Simon  
Associate Professor of the Practice of Epidemiology

Daniel Simoneau  
Teaching Associate in Family Medicine

Boris Sinayuk  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Don B. Singer  
Professor Emeritus of Pathology and Laboratory Medicine

Joseph B. Singer  
Clinical Instructor in Medical Science

Tisha Melinda Singer  
Clinical Instructor in Medical Science

Arun Singh  
Clinical Professor Emeritus of Surgery

Purna Singh  
Mahatma Gandhi Associate Professor of Political Science and International and Public Affairs

Ritambhara Singh  
Assistant Professor of Computer Science

Alan D. Sirota  
Professor Emeritus of Psychiatry and Human Behavior, Clinician Educator

Lawrence Sirovich  
Professor Emeritus of Applied Mathematics

Michael Sisitsky  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Latha Sivaprasad  
Clinical Associate Professor of Medicine

Caroline Sizer  
Assistant Professor of Neurosurgery, Clinician Educator

David B. Skarbek  
Associate Professor of Political Science

Luisa Skoble  
Adjunct Assistant Professor of Psychiatry and Human Behavior

Caroline Skudlarek-Prete  
Clinical Assistant Professor of Obstetrics and Gynecology

Sydney A. Skybetter  
Lecturer in Theatre Arts and Performance Studies

Carolyn Slack  
Teaching Associate in Obstetrics and Gynecology

Jeffrey M. Slaiby  
Assistant Professor of Surgery, Clinician Educator

John G. Slattery  
Clinical Assistant Professor of Family Medicine

Brett Slingsby  
Assistant Professor of Pediatrics, Clinician Educator

Steven A. Sloman  
Professor of Cognitive, Linguistic and Psychological Sciences

Ada Smalbegovic  
Assistant Professor of English

Daniel Jordan Smith  
Charles C. Tillinghast, Jr. Professor of International Studies

Duncan Smith  
Professor Emeritus of German Studies; Professor Emeritus of Modern Culture and Media

Elizabeth G. Smith  
Teaching Associate in Medical Science

Heather Smith  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Jessica L. Smith  
Associate Professor of Emergency Medicine, Clinician Educator

Katherine F. Smith  
Assistant Professor of Ecology and Evolutionary Biology (Research)

Kerry Smith  
Associate Professor of East Asian Studies; Associate Professor of History

Laurence C. Smith  
John Atwater and Diana Nelson University Professor of Environmental Studies

Matthew Joseph Smith  
Clinical Assistant Professor of Family Medicine; Clinical Assistant Professor of Orthopaedics

Megan Smith  
Teaching Associate in Medical Science

Richard M. Smith  
Clinical Assistant Professor of Psychiatry and Human Behavior

Robert A. Smith  
Clinical Instructor Emeritus in Health Services, Policy and Practice

Stephen R. Smith  
Professor Emeritus of Family Medicine

Victoria P. Smith  
Senior Lecturer in Hispanic Studies

Romina P. Smulever  
Clinical Assistant Professor of Psychiatry and Human Behavior

Susan Smulyan  
Professor of American Studies

Victoria Snegovskikh  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Zachary Sng  
Associate Professor of Comparative Literature; Associate Professor of German Studies

Peter Snyder  
Professor of Neurology; Professor of Surgery

Richard O. Snyder  
Professor of Political Science

Eui Young So  
Instructor in Medicine (Research)

Gregory M. Soares  
Associate Professor of Diagnostic Imaging

David M. Sobel  
Professor of Cognitive, Linguistic and Psychological Sciences

Mindy Sobota  
Associate Professor of Medicine, Clinician Educator

Patricia I. Sobral  
Distinguished Senior Lecturer in Portuguese and Brazilian Studies

Silvia Sobral  
Senior Lecturer in Hispanic Studies

Clarence H. Soderberg  
Clinical Associate Professor Emeritus of Surgery

Neel R. Sodha  
Assistant Professor of Surgery

Rachel Soemedi  
Instructor in Medical Science (Research)

Robert Sokolic  
Assistant Professor of Medicine

Jane Sokolosky  
Distinguished Senior Lecturer in German Studies; Distinguished Senior Lecturer in Language Studies

Alexander W. Sokolovsky  
Assistant Professor of Behavioral and Social Sciences

Shalini Solanki  
Clinical Assistant Professor of Family Medicine

Patricia M. Solga  
Clinical Assistant Professor of Orthopaedics

Jon S. Solis  
Clinical Assistant Professor of Dermatology

David A. Solomon  
Clinical Associate Professor Emeritus of Psychiatry and Human Behavior

John J. Solomon  
Clinical Assistant Professor of Family Medicine

Sukanya Somasundar  
Clinical Assistant Professor of Family Medicine

Christopher Song  
Assistant Professor of Medicine, Clinician Educator

Joo-Hyun Song  
Associate Professor of Cognitive, Linguistic and Psychological Sciences

Julie H. Song  
Professor of Diagnostic Imaging, Clinician Educator

Young Song  
Assistant Professor of Medicine, Clinician Educator

Maria Soriano-Pisaturo  
Assistant Professor of Medicine, Clinician Educator

Ernest Sosa  
Professor Emeritus of Philosophy

Collette Sosnowy  
Assistant Professor of Medicine (Research)

Peter Soukas  
Associate Professor of Medicine, Clinician Educator

Jennifer M. Souza  
Clinical Assistant Professor of Family Medicine

Daniel Spade  
Assistant Professor of Pathology and Laboratory Medicine

Henry Curtis Spalding  
Professor of the Practice of Environment and Society

Carrie E. Spearin  
Lecturer in Sociology

Joel S. Spellun  
Clinical Assistant Professor of Medicine

Daniel B. Spencer  
Associate Professor of Psychiatry and Human Behavior, Clinician Educator

Megan B. Spencer  
Clinical Assistant Professor of Psychiatry and Human Behavior

Patricia K. Spencer  
Clinical Associate Professor Emerita of Diagnostic Imaging

Kenneth F. Sperber  
Clinical Assistant Professor of Family Medicine

Sarah Spinette  
Teaching Associate in Pediatrics

Anthony Spirito  
Professor of Psychiatry and Human Behavior

Kathryn T. Spoehr  
Professor of Cognitive, Linguistic and Psychological Sciences

Luther Spoehr  
Senior Lecturer Emeritus in Education

Christopher M. Spofford  
Research Associate in Psychiatry and Human Behavior

Marcus B. Spradlin  
Professor of Physics

Stacey Springs  
Research Associate in Health Services, Policy and Practice

Emily B. Spurrell  
Clinical Assistant Professor of Psychiatry and Human Behavior

Vikas Srivastava  
Assistant Professor of Engineering

Dariusz R. Stachurski  
Associate Professor of Pathology and Laboratory Medicine, Clinician Educator

Michael Staebler  
Clinical Assistant Professor of Orthopaedics

Jensy Stafford  
Assistant Professor of Family Medicine, Clinician Educator; Assistant Professor of Medicine, Clinician Educator

Misty Michelle Stafford  
Clinical Instructor in Psychiatry and Human Behavior

Lars Stangenberg  
Assistant Professor of Surgery, Clinician Educator

Lawrence K. Stanley  
Distinguished Senior Lecturer in English

Laura Stanton  
Clinical Assistant Professor of Psychiatry and Human Behavior

Jami Star  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Barton L. St Armand  
Professor Emeritus of American Studies; Professor Emeritus of English

Richard Statman  
Clinical Instructor in Medical Science

Kara Stavros  
Assistant Professor of Neurology, Clinician Educator

Pamela Steadman-Wood  
Clinical Associate Professor of Psychiatry and Human Behavior

Brett S. Stecker  
Clinical Assistant Professor of Family Medicine

Dale W. Steele  
Professor of Emergency Medicine; Professor of Health Services, Policy and Practice; Professor of Pediatrics

John M. Steele  
Professor of Egyptology and Assyriology

Irina Ioana Stefan  
Visiting Scientist in Physics

Tracy L. Steffes  
Associate Professor of Education; Associate Professor of History

Barry S. Stein  
Professor Emeritus of Surgery

Derek M. Stein  
Associate Professor of Physics

John J. Stein  
Senior Lecturer in Neuroscience

Lynda Stein  
Adjunct Professor of Behavioral and Social Sciences

Michael D. Stein  
Adjunct Professor of Medicine

Steven H. Stein  
Clinical Assistant Professor of Family Medicine

Mark F. Steinbach  
Senior Lecturer in Music

Meredith Steinbach  
Professor Emerita of Literary Arts

Bryce Steinberg  
Stephen Robert Assistant Professor of Economics and International and Public Affairs

Michael P. Steinberg  
Barnaby Conrad and Mary Critchfield Keeney Professor of History and Music

Edward S. Steinfeld  
Dean's Professor of China Studies, Professor of Political Science

Jon A. Steingrimsson  
Assistant Professor of Biostatistics

Margaret M. Steinhoff  
Professor Emerita of Pathology and Laboratory Medicine

Sevak Stepanian  
Clinical Assistant Professor of Anesthesiology

Jodi Stephenson  
Clinical Instructor in Psychiatry and Human Behavior

Edward S. Sternick  
Professor Emeritus of Radiation Oncology

Tanya Stevens  
Investigator in Neuroscience

T. Christine Stevens  
Visiting Scholar in Mathematics

Babette Taylor Stewart  
Lecturer Emerita in Medical Science

Michael H. Stewart  
Senior Lecturer in English

Suzanne Stewart-Steinberg  
Professor of Comparative Literature and Italian Studies

Kory M. Stiffler  
Assistant Professor of Physics (Research)

Beth Stoddard  
Teaching Associate in Pediatrics

Barbara S. Stonestreet  
Professor of Pediatrics

Stanley K. Stowers  
Professor Emeritus of Religious Studies

Julie A. Strandberg  
Distinguished Senior Lecturer in Theatre Arts and Performance Studies

Richard Mark Stratt  
Newport Rogers Professor of Chemistry

Walter A. Strauss  
L. Herbert Ballou University Professor of Mathematics

Rochelle S. Strenger  
Clinical Associate Professor of Medicine

Christoph Stretz  
Assistant Professor of Neurology

Barbara Stricker  
Adjunct Instructor in Obstetrics and Gynecology

Laura Stroud  
Professor of Behavioral and Social Sciences; Professor of Psychiatry and Human Behavior

Gregory L. Stuart  
Adjunct Professor of Psychiatry and Human Behavior

Ashley R. Stuckey  
Associate Professor of Medical Science; Associate Professor of Obstetrics and Gynecology

Newell Maynard Stultz  
Professor Emeritus of Political Science

Mariah Stump  
Assistant Professor of Medicine, Clinician Educator

Angela Stupinski  
Teaching Associate in Family Medicine

Chau-Hsing Su  
Professor Emeritus of Applied Mathematics

- Lulei Su  
Lecturer in East Asian Studies
- Shova Subedi  
Assistant Professor of Pediatrics, Clinician Educator
- Rose Rosengard Subotnik  
Professor Emerita of Music
- Mark C. Suchman  
Professor of Sociology
- J. William Suggs  
Professor Emeritus of Chemistry
- Elizabeth Loring Sullivan  
Clinical Assistant Professor of Obstetrics and Gynecology
- Francis M. Sullivan  
Clinical Associate Professor of Emergency Medicine
- Frank W. Sullivan  
Clinical Associate Professor Emeritus of Psychiatry and Human Behavior
- James C. Sullivan  
Clinical Assistant Professor of Medicine
- James K. Sullivan  
Clinical Associate Professor of Psychiatry and Human Behavior
- Jamie Sullivan  
Clinical Instructor in Family Medicine
- Patrick Sullivan  
Assistant Professor of Emergency Medicine, Clinician Educator
- Rachel A. Sullivan  
Assistant Professor of Surgery, Clinician Educator
- Yuri Sulyma  
Tamarkin Assistant Professor of Mathematics
- Margaret A. Sun  
Clinical Assistant Professor of Family Medicine
- Shouheng Sun  
Vernon K. Kriebel Professor of Chemistry
- Selim Suner  
Professor of Emergency Medicine; Professor of Engineering; Professor of Surgery
- C. James Sung  
Professor of Pathology and Laboratory Medicine
- Vivian W. Sung  
Professor of Obstetrics and Gynecology
- Jacques G. Susset  
Clinical Professor Emeritus of Surgery
- Marybeth Sutter  
Assistant Professor of Family Medicine, Clinician Educator
- Elizabeth M. Sutton  
Associate Professor of Emergency Medicine, Clinician Educator;  
Associate Professor of Medical Science, Clinician Educator
- Eric Suuberg  
C.V. Starr Professor of Technology Entrepreneurship, Professor of Engineering
- Sylvester C. Sviokla  
Clinical Assistant Professor of Medicine
- Shailender Swaminathan  
Adjunct Assistant Professor of Health Services, Policy and Practice
- Sharon M. Swartz  
Professor of Biology; Professor of Engineering
- Lisa Michelle Swartz Topor  
Associate Professor of Pediatrics
- Joseph D. Sweeney  
Professor of Medicine; Professor of Pathology and Laboratory Medicine
- Lynn A. Sweeney  
Clinical Associate Professor of Emergency Medicine
- Patrick J. Sweeney  
Professor Emeritus of Obstetrics and Gynecology
- Jeanne W. Swen  
Clinical Assistant Professor of Family Medicine
- Cole Swensen  
Professor of Literary Arts
- Robert M. Swift  
Professor of Behavioral and Social Sciences; Professor of Psychiatry and Human Behavior
- Susan Swords  
Clinical Assistant Professor of Medicine
- Jeffrey B. Syme  
Clinical Assistant Professor of Family Medicine
- Erica M. Szabados  
Clinical Assistant Professor of Neurology
- Joanne P. Szczygiel  
Assistant Professor of Medicine
- Peter Marc Szendy  
David Herlihy University Professor of Comparative Literature
- Daria A. Szkwarko  
Clinical Assistant Professor of Family Medicine
- Joanna Szmydynger-Chodobska  
Associate Professor of Emergency Medicine (Research)
- Ramin Tabaddor  
Clinical Assistant Professor of Family Medicine; Clinical Assistant Professor of Orthopaedics
- Angela M. Taber  
Clinical Assistant Professor of Medical Science; Clinical Assistant Professor of Medicine
- Hiroshi Tajima  
Lecturer in East Asian Studies
- Clarisse Yefon Tallah  
Clinical Instructor in Family Medicine
- Roberto Tamassia  
Plastech Professor of Computer Science
- Dominick Tammaro  
Professor of Medicine
- Chung-I Tan  
Professor of Physics
- Kumiko Tanaka  
Clinical Instructor in Obstetrics and Gynecology
- Jay X. Tang  
Professor of Engineering; Professor of Physics
- Jie Tang  
Associate Professor of Medicine, Clinician Educator
- Jin Bo Tang  
Adjunct Professor of Surgery
- Xiaoli Tang  
Assistant Professor of Medicine (Research)
- Barbara I. Tannenbaum  
Distinguished Senior Lecturer in Theatre Arts and Performance Studies
- Nina Tannenwald  
Senior Lecturer in Political Science
- Umadevi Tantravahi  
Professor of Pathology and Laboratory Medicine, Clinician Educator
- Jun Tao  
Assistant Professor of Medicine (Research)
- Nikos Tapinos  
Associate Professor of Neurosurgery (Research)
- Nicholas Tarantino  
Assistant Professor of Psychiatry and Human Behavior (Research)

Leigh Tarentino  
Associate Professor of Visual Art

John M. Tarro  
Clinical Assistant Professor of Surgery

Karen T. Tashima  
Professor of Medicine

Marc Tatar  
Professor of Biology

Charlene A. Tate  
Clinical Associate Professor of Neurology

Katherine Tate  
Professor of Political Science

Gabriel Taubin  
Professor of Computer Science; Professor of Engineering

Andrea Taubman  
Teaching Associate in Medical Science

Katie F. Tavares-Medeiros  
Teaching Associate in Family Medicine

Elizabeth Taylor  
Distinguished Senior Lecturer in English

Julie S. Taylor  
Adjunct Professor of Family Medicine

Kurt Teichert  
Senior Lecturer in Environment and Society

Gladys H. Telang  
Associate Professor of Dermatology

Albert Edward Telfeian  
Professor of Neurosurgery, Clinician Educator

Adam J. Teller  
Professor of History; Professor of Judaic Studies

Stefanie A. Tellex  
Associate Professor of Computer Science

Joan M. Teno  
Adjunct Professor of Health Services, Policy and Practice

Dmitry Terentyev  
Associate Professor of Medicine (Research)

Elmo Terry-Morgan  
Associate Professor of Africana Studies and Theatre Arts and Performance Studies

Paul F. Testa  
Assistant Professor of Political Science

Tracy O'Leary Tevyaw  
Clinical Professor of Psychiatry and Human Behavior

Neil Thakral  
Assistant Professor of Economics and International and Public Affairs

Christopher G. Thanos  
Adjunct Assistant Professor of Pathology and Laboratory Medicine

Nagendran Tharmalingam  
Research Associate in Medicine

Simone Thavaseelan  
Associate Professor of Surgery, Clinician Educator

Walter R. Thayer  
Professor Emeritus of Medical Science

Meena Theva  
Assistant Professor of Obstetrics and Gynecology, Clinician Educator

Anthony G. Thomas  
Clinical Assistant Professor of Medicine

Crystal A. Thomas  
Lecturer in Education

Edward S. Thomas  
Clinical Assistant Professor of Medicine

Graham Thomas  
Associate Professor of Psychiatry and Human Behavior (Research)

Kali S. Thomas  
Associate Professor of Health Services, Policy and Practice

Sarah Ann Thomas  
Assistant Professor of Psychiatry and Human Behavior (Research)

Sarah L. Thomas  
William A. Dyer, Jr. Assistant Professor of Humanities, Assistant Professor of Hispanic Studies

Valerie A. Thomas  
Clinical Assistant Professor of Medicine

Vinod Thomas  
Clinical Assistant Professor of Medicine

Alysha D. Thompson  
Clinical Assistant Professor of Psychiatry and Human Behavior

Bradford B. Thompson  
Associate Professor of Neurology; Associate Professor of Neurosurgery

Louisa I. Thompson  
Instructor in Psychiatry and Human Behavior

M. Diane Thompson  
Teaching Associate in Family Medicine; Teaching Associate in Medical Science

Nancy L. Thompson  
Professor Emerita of Medicine (Research); Professor Emerita of Pathology and Laboratory Medicine (Research)

Leslie Thornton  
Professor Emerita of Modern Culture and Media

Bianca Thorpe  
Clinical Assistant Professor of Family Medicine

Steven Threlkeld  
Adjunct Associate Professor of Emergency Medicine

Sarah Thurman  
Clinical Assistant Professor of Radiation Oncology

Shiqiang Tian  
Clinical Assistant Professor of Orthopaedics

Xiaobing Tian  
Assistant Professor of Pathology and Laboratory Medicine (Research)

Jennifer Tidey  
Professor of Behavioral and Social Sciences; Professor of Psychiatry and Human Behavior

David Robbins Tien  
Clinical Associate Professor of Surgery

Peter L. Tilkemeier  
Adjunct Professor of Medicine

Robert Tilton  
Clinical Assistant Professor of Psychiatry and Human Behavior

Chelsea Timlin  
Lecturer in Language Studies

Andrea Tirocchi  
Teaching Associate in Medical Science

Jeff T. Titon  
Professor Emeritus of Music

Cristina Toba  
Clinical Assistant Professor of Psychiatry and Human Behavior

John F. Todaro  
Clinical Associate Professor of Psychiatry and Human Behavior

Ellen R. Tohn  
Assistant Professor of the Practice of Epidemiology

Elizabeth Toll  
Professor of Medicine, Clinician Educator; Professor of Pediatrics, Clinician Educator

John O. Tomasi  
Romeo Elton Professor of Natural Theology, Professor of Political Science

David R. Tomlinson  
Clinical Assistant Professor of Family Medicine

James H. Tompkin  
Assistant Professor

Andrew J. Tompkins  
Clinical Instructor in Surgery

Steven A. Toms  
Professor of Medicine; Professor of Neurosurgery

Iris L. Tong  
Associate Professor of Medicine

Shuping Tong  
Professor of Medicine (Research)

Gerald J. Toomer  
Professor Emeritus of Classics; Professor Emeritus of History of Mathematics

Maria Toprani  
Teaching Associate in Medical Science

Philip A. Torgan  
Clinical Associate Professor Emeritus of Medicine

Christina C. Tortolani  
Adjunct Assistant Professor of Psychiatry and Human Behavior

Kimani C. Toussaint  
Professor of Engineering

Francine Touzard Romo  
Assistant Professor of Medicine, Clinician Educator

Alison Tovar  
Adjunct Associate Professor of Behavioral and Social Sciences

Caitlin M. Towey  
Teaching Associate in Family Medicine

Gregory J. Towne  
Assistant Professor of Anesthesiology, Clinician Educator

Nicholas William Townsend  
Professor Emeritus of Anthropology

Mark A. Tracy  
Adjunct Assistant Professor of Molecular Pharmacology, Physiology and Biotechnology

Thomas F. Tracy  
Adjunct Professor of Surgery

Peter G. Trafton  
Professor Emeritus of Orthopaedics

Cao Tran  
Assistant Professor of Medicine

Tanya B. C. Tran  
Clinical Assistant Professor of Psychiatry and Human Behavior

Michelle Ann Travis  
Teaching Associate in Surgery

Sergei Treil  
Professor of Mathematics

Geoffrey Tremont  
Associate Professor of Psychiatry and Human Behavior

Andrew S. Triebwasser  
Assistant Professor of Anesthesiology, Clinician Educator

Scott A. Friedman  
Clinical Associate Professor of Radiation Oncology

Thomas Trikalinos  
Associate Professor of Health Services, Policy and Practice

Anubhav Tripathi  
Professor of Engineering; Professor of Molecular Pharmacology, Physiology and Biotechnology

Arti Tripathi  
Research Associate in Molecular Biology, Cell Biology and Biochemistry

Vikash Tripathi  
Research Associate in Surgery

Tovah Tripp  
Assistant Professor of Medicine, Clinician Educator

Amal N. Trivedi  
Professor of Health Services, Policy and Practice; Professor of Medicine

Wilson Truccolo  
Pablo J. Salame Goldman Sachs Associate Professor of Computational Neuroscience

Margaret Tryforos  
Assistant Professor of Family Medicine, Clinician Educator

Victor Tsai  
Associate Professor of Earth, Environmental, and Planetary Sciences

Hing Bun Peter Tsang  
Visiting Scientist in Physics

Zoe Tseng  
Adjunct Instructor in Medicine

Bena M. Tshishiku  
Assistant Professor of Mathematics

William G. Tsiaras  
Clinical Professor of Surgery

Robert J. Tubbs  
Associate Professor of Emergency Medicine

Christopher Tucci  
Teaching Associate in Surgery

Joseph R. Tucci  
Adjunct Professor of Medicine

Gregory S. Tucker  
Professor of Physics

Joshua Tucker  
Associate Professor of Music

Jan Tullis  
Professor Emerita of Earth, Environmental, and Planetary Sciences

Terry E. Tullis  
Professor Emeritus of Earth, Environmental, and Planetary Sciences

Glenn A. Tung  
Professor of Diagnostic Imaging

Allan R. Tunkel  
Professor of Medical Science; Professor of Medicine

Matthew A. Turner  
Professor of Economics

Mark Turshen  
Clinical Assistant Professor of Family Medicine

Sumner B. Twiss  
Professor Emeritus of Religious Studies

Jean E. Twomey  
Clinical Assistant Professor of Pediatrics; Clinical Assistant Professor of Psychiatry and Human Behavior

Denise A. Tyler  
Adjunct Assistant Professor of Health Services, Policy and Practice

John H. Tyler  
Professor of Economics; Professor of Education

David K. Udris  
Lecturer in Modern Culture and Media

Lisa A. Uebelacker  
Professor of Psychiatry and Human Behavior

Lori A. Underhill  
Assistant Professor of Pediatrics (Research)

Jody Ann Underwood  
Clinical Associate Professor of Medicine; Clinical Associate Professor of  
Psychiatry and Human Behavior

William S. Unger  
Clinical Associate Professor of Psychiatry and Human Behavior

Eliezer Upfal  
Rush C. Hawkins University Professor of Computer Science

Jeremy Usatine  
Tamarkin Assistant Professor of Mathematics

Anny Usheva  
Associate Professor of Surgery (Research)

Wilson F. Utter  
Clinical Associate Professor Emeritus of Pediatrics

Ayşe Uzgören Baran  
Visiting Scientist in Chemistry

Dilber Ece Uzun  
Assistant Professor of Pathology and Laboratory Medicine

Daniel Vaca  
Robert Gale Noyes Assistant Professor of Humanities

Jason Vachon  
Clinical Assistant Professor of Medical Science

Shipra Vaishnav  
Manning Assistant Professor of Molecular Microbiology and Immunology

Jamsheed Vakharia  
Clinical Assistant Professor of Surgery

Gregorio Valdez  
Associate Professor of Molecular Biology, Cell Biology and Biochemistry

James Valente  
Clinical Instructor in Surgery

Jonathan Valente  
Associate Professor of Emergency Medicine; Associate Professor of  
Pediatrics

Luiz Fernando Valente  
Professor of Comparative Literature; Professor of Portuguese and  
Brazilian Studies

James M. Valles  
Professor of Physics

Mascha van 't Wout  
Assistant Professor of Psychiatry and Human Behavior (Research)

Margaret M. Van Bree  
Professor of the Practice of Health Services, Policy and Practice

Andries van Dam  
Thomas J. Watson Jr. University Professor of Technology and Education,  
Professor of Computer Science

Jacob Vandenberg  
Assistant Professor of Behavioral and Social Sciences (Research);  
Assistant Professor of Medicine (Research)

Herman H. Vandenberg  
Professor Emeritus of Molecular Pharmacology, Physiology and  
Biotechnology; Professor Emeritus of Pathology and Laboratory Medicine

Axel Van De Walle  
Professor of Engineering

Peter Van Dommelen  
Joukowsky Family Professor of Archaeology and Professor of  
Anthropology

Stephen Van Kirk-Friedman  
Clinical Instructor in Medical Science

Gerrit Van Schalkwyk  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

Parker VanValkenburgh  
Assistant Professor

Audra Van Wart  
Assistant Professor of Medical Science

Leah K. Vanwey  
Professor of Environment and Society and Sociology

Mercedes Vaquero  
Professor of Hispanic Studies

Sara Vargas  
Assistant Professor of Psychiatry and Human Behavior (Research)

Carlos E. Vargas-Irwin  
Assistant Professor of Neuroscience (Research)

Ashutosh Varshney  
Sol Goldman Professor of International Studies and Political Science

Charles A. Vaslet  
Assistant Professor of Pathology and Laboratory Medicine (Research)

Rosalind M. Vaz  
Professor Emerita of Pediatrics, Clinician Educator

Alejandro Vazquez  
Clinical Assistant Professor of Surgery

Robert Y. Velasco  
Assistant Professor of Medicine, Clinician Educator

Corey E. Ventetuolo  
Associate Professor of Health Services, Policy and Practice; Associate  
Professor of Medicine

Alice-Lee Vestner  
Assistant Professor of Medical Science, Clinician Educator; Assistant  
Professor of Psychiatry and Human Behavior, Clinician Educator

Michael P. Vezeridis  
Professor of Surgery

Eric Victor  
Lecturer in Chemistry

Nelson H. Vieira  
University Professor Emeritus of Portuguese and Brazilian Studies

Marguerite B. Vigliani  
Clinical Professor Emerita of Obstetrics and Gynecology

Rendueles Villalba  
Clinical Associate Professor of Psychiatry and Human Behavior

Meera Sushila Viswanathan  
Associate Professor Emerita of Comparative Literature; Associate  
Professor Emerita of East Asian Studies

John S. Vitelli  
Clinical Assistant Professor of Medicine

Sivamainthan Vithianathan  
Professor of Surgery, Clinician Educator

Patrick M. Vivier  
Professor of Emergency Medicine; Professor of Health Services, Policy  
and Practice; Professor of Pediatrics

Yasmin Vobis  
Professor of the Practice of History of Art and Architecture

Benjamin S. Vogel  
Clinical Assistant Professor Emeritus of Obstetrics and Gynecology

Paula A. Vogel  
Professor Emerita of Theatre Arts and Performance Studies

Lidia A. Vognar  
Assistant Professor of Medicine, Clinician Educator

Betty R. Vohr  
Professor of Pediatrics

Rajiv Vohra  
Ford Foundation Professor of Economics

Anastasia Volovich  
Professor of Physics

Annette E. Von Dem Bussche  
Adjunct Assistant Professor of Pathology and Laboratory Medicine  
(Research)

Valerie Vorderstrasse  
Clinical Instructor in Psychiatry and Human Behavior

Michael Vorenberg  
Associate Professor of History

Matthew D. Vrees  
Clinical Associate Professor of Surgery

Roxanne Vrees  
Assistant Professor of Obstetrics and Gynecology

Jonathan K. Waage  
Professor Emeritus of Biology

Jill M. Wagner  
Teaching Associate in Medical Science

Michelle Elizabeth Wakeley  
Clinical Instructor in Surgery

Hedy S. Wald  
Clinical Professor of Family Medicine

Nicholas John Wald  
Adjunct Professor of Pathology and Laboratory Medicine

Bernard K. Waldrop  
Brooke Russell Astor Emeritus Professor of the Humanities

Joanna Walker  
Assistant Professor of Dermatology, Clinician Educator

John Walker  
Adjunct Professor of Medical Science

Katherine Walker  
Teaching Associate in Medical Science

Barry W. Wall  
Clinical Professor of Psychiatry and Human Behavior

Michael T. Wallach  
Associate Professor Emeritus of Diagnostic Imaging, Clinician Educator

Anya Rader Wallack  
Professor of the Practice of Health Services, Policy and Practice

Edward G. Walsh  
Assistant Professor of Neuroscience (Research)

Eric Ferguson Walsh  
Clinical Assistant Professor of Orthopaedics

Mary Colleen Walsh  
Clinical Assistant Professor of Family Medicine

Anne S. Walters  
Clinical Professor

Michael R. Walther  
Clinical Assistant Professor of Psychiatry and Human Behavior

Jack R. Wands  
Jeffrey and Kimberley Greenberg-Artemis and Martha Joukowsky  
Professor of Gastroenterology, Professor of Medicine

Guifang Wang  
Visiting Research Scholar in Surgery

Hui Wang  
Associate Professor of Applied Mathematics

Hye-Sook Wang  
Associate Professor of East Asian Studies

Lai-Sheng Wang  
Jesse H. and Louisa D. Sharp Metcalf Professor of Chemistry

Li-Qiong Wang  
Senior Lecturer in Chemistry

Li Juan Wang  
Professor of Pathology and Laboratory Medicine

Lingzhen Wang  
Professor of East Asian Studies

Lu Wang  
David S. Josephson Assistant Professor of Music

Shunping Wang  
Associate Professor of Obstetrics and Gynecology, Clinician Educator

Xiaotian Wang  
Assistant Professor of Surgery (Research)

Yang Wang  
Senior Lecturer in East Asian Studies

Yanjin Wang  
Visiting Scholar in Applied Mathematics

Yihong Wang  
Associate Professor of Pathology and Laboratory Medicine

Yong Wang  
Visiting Scientist in Earth, Environmental, and Planetary Sciences

Harold R. Ward  
Professor Emeritus of Chemistry; Professor Emeritus of Environment and  
Society

Nicholas S. Ward  
Associate Professor of Medicine

Robert Ward  
Assistant Professor of Diagnostic Imaging, Clinician Educator

Robert P. Ward  
Visiting Lecturer in English

Kay B. Warren  
Charles C. Tillinghast, Jr. '32 Professor Emerita of International Studies

Marianne Warren  
Teaching Associate in Medical Science

Otis U. Warren  
Associate Professor of Emergency Medicine, Clinician Educator

William H. Warren  
Chancellor's Professor of Cognitive, Linguistic and Psychological Sciences

Sarita S. Warrier  
Assistant Professor of Medical Science; Assistant Professor of Medicine

Takeo Watanabe  
Fred M. Seed Professor of Cognitive and Linguistic Sciences

Richard Watson  
Adjunct Instructor in Surgery

Samuel S. Watson  
Lecturer in Data Science

David E. Wazer  
Professor of Radiation Oncology

Ashley E. Webb  
Richard and Edna Salomon Assistant Professor of Molecular Biology, Cell  
Biology and Biochemistry

Thompson Webb  
Professor Emeritus of Earth, Environmental, and Planetary Sciences

Banice M. Webber  
Clinical Associate Professor Emeritus of Radiation Oncology

Peter M. Weber  
Professor of Chemistry

Kristin M. Webster  
Research Associate in Neuroscience

Lei Wei  
Associate Professor of Orthopaedics (Research)

Marilyn Weigner  
Clinical Associate Professor of Medicine

David N. Weil  
James and Meryl Tisch Professor of Economics

Daniel M. Weinreich  
Associate Professor of Ecology and Evolutionary Biology

Arnold Louis Weinstein  
Richard and Edna Salomon Distinguished Professor of Comparative Literature

Debbie Weinstein  
Associate Professor of American Studies

Lauren M. Weinstock  
Associate Professor of Psychiatry and Human Behavior

Martin A. Weinstock  
Professor of Dermatology; Professor of Epidemiology

Margaret M. Weir  
Wilson Professor of International and Public Affairs and Political Science

Risa Weisberg  
Adjunct Professor of Psychiatry and Human Behavior

Marjorie E. Weishaar  
Clinical Professor of Psychiatry and Human Behavior

Arnold-Peter Weiss  
Professor of Orthopaedics

Rebecca B. Weitz-Shapiro  
Associate Professor of Political Science

Jennifer Greene Welch  
Associate Professor of Pediatrics

Leslie Welch  
Associate Professor of Cognitive, Linguistic and Psychological Sciences

Raymond H. Welch  
Clinical Assistant Professor Emeritus of Dermatology

Mary Beth Welesko  
Teaching Associate in Medicine

Gregory A. Wellenius  
Adjunct Associate Professor of Epidemiology

Benoit T. Welsch  
Senior Research Associate in Earth, Environmental, and Planetary Sciences

Joel K. Weltman  
Clinical Professor Emeritus of Medicine

Jane Wen  
Clinical Assistant Professor of Medicine

Sicheng Wen  
Assistant Professor of Medicine (Research)

Linda C. Wendell  
Associate Professor of Medical Science; Associate Professor of Neurology; Associate Professor of Neurosurgery

Katharine D. Wenstrom  
Professor of Medical Science

John Wermer  
Professor Emeritus of Mathematics

Erika Werner  
Associate Professor of Epidemiology; Associate Professor of Obstetrics and Gynecology

Lee V. Wesner  
Clinical Assistant Professor of Anesthesiology

Gary M. Wessel  
Professor of Biology

Conrad W. Wesselhoeft  
Professor Emeritus of Surgery, Clinician Educator

Robert J. Westlake  
Professor Emeritus of Psychiatry and Human Behavior

Judith B. Westrick  
Clinical Assistant Professor of Pediatrics

Terrie T. Wettle  
Professor of Health Services, Policy and Practice

Rachel Wetts  
Acacia Assistant Professor of Environment and Society and Sociology

Gary G. Wharton  
Clinical Associate Professor of Obstetrics and Gynecology

Kristi A. Wharton  
Professor of Biology

Aaron Paul Wheeler  
Assistant Professor of Medicine, Clinician Educator

Carol A. Wheeler  
Professor of Obstetrics and Gynecology, Clinician Educator

Claudia Wheeler  
Assistant Professor of Neurosurgery, Clinician Educator

William M. Whelihan  
Clinical Associate Professor Emeritus of Psychiatry and Human Behavior

Emily M. White  
Clinical Associate Professor of Obstetrics and Gynecology

Jordan C. White  
Assistant Professor of Family Medicine; Assistant Professor of Medical Science

Michael White  
Robert E. Turner Distinguished Professor of Population Studies, Professor of Sociology

Tara L. White  
Assistant Professor of Behavioral and Social Sciences (Research)

Wendy White  
Adjunct Associate Professor of Health Services, Policy and Practice

Esther K. Whitfield  
Associate Professor of Comparative Literature; Associate Professor of Hispanic Studies

Courtney Whitmore  
Teaching Associate in Pediatrics

Ira Whitten  
Assistant Professor of Anesthesiology, Clinician Educator

Annie J. Wiart  
Senior Lecturer Emerita in French Studies

John Edgar Wideman  
Asa Messer Professor Emeritus of Africana Studies and Literary Arts

Doreen L. Wiggins  
Clinical Assistant Professor of Obstetrics and Gynecology; Clinical Assistant Professor of Surgery

Caroline S. Wilkel  
Clinical Assistant Professor of Dermatology

Joanne E. Wilkinson  
Associate Professor of Family Medicine

David M. Williams  
Associate Professor of Behavioral and Social Sciences; Associate Professor of Psychiatry and Human Behavior

Geoffrey L. Williams  
Teaching Associate in Molecular Biology, Cell Biology and Biochemistry

Kenneth Williams  
Professor of Emergency Medicine, Clinician Educator

Lea Everard Williams  
Professor Emeritus of History

Paul Gregory Williard  
Professor of Chemistry

Andre C. Willis  
Associate Professor of Religious Studies

Matthew D. Willis  
Assistant Professor of Psychiatry and Human Behavior, Clinician Educator

David R. Wills  
Professor of French Studies

Larry Wills  
Visiting Professor of Religious Studies and Judaic Studies

- Don B. Wilmeth  
Professor Emeritus of Theatre Arts and Performance Studies
- Ira B. Wilson  
Professor of Health Services, Policy and Practice
- Jeffrey M. Wilson  
Clinical Assistant Professor of Family Medicine

Research Associate in Medicine

Andrew R. Zullo  
Assistant Professor of Epidemiology; Assistant Professor of Health  
Services, Policy and Practice

Edward Zuroweste  
Adjunct Assistant Professor of Family Medicine

# General Regulations

## General academic requirements

### Undergraduate degrees:

Information regarding general academic degree requirements are listed under 'The College' section of the University Bulletin as well as on the respective websites of the Office of the Registrar (<http://www.brown.edu/about/administration/registrar/degree-guidelines-0/college>) and the Dean of the College ([http://brown.edu/Administration/Dean\\_of\\_the\\_College/degree](http://brown.edu/Administration/Dean_of_the_College/degree)).

### Advanced degrees:

Information regarding Advanced degree requirements for specific academic programs are listed on the Graduate School (<http://www.brown.edu/academics/degree-granting>) website. Information regarding general and overall guidelines for advanced degrees are also listed on the Office of the Registrar (<http://www.brown.edu/about/administration/registrar/degree-guidelines-0/graduate-school>) website.

## Enrollment and course registration

Instructions about enrollment will be sent via e-mail prior to the opening of each semester to all students. To complete enrollment, all requirements of the pertinent administrative offices of the University must be met, including registration for courses, payment of accounts, and arrangements for housing as appropriate. Fees will be charged for failure to meet established deadlines. All students must complete enrollment in order to be eligible to remain at the University.

Students are urged to note carefully the instructions provided at registration in order to assure eligibility for enrollment, proper registration in courses, and to avoid unnecessary payment of Late Registration and Change of Course fees. All registration materials and/or processes are considered official university documents. Any falsification of signatures or other tampering with such forms/processes constitutes a violation of the Academic Code.

All registration-related deadlines for each semester are listed in the 'Academic Calendar' section of the Bulletin and also on the Office of the Registrar website as well as answers to common registration-related questions.

For the full text on the Academic Regulations and Instructions for Registration, see the Registrar's Office web site at:

<http://www.brown.edu/about/administration/registrar/course-enrollment/registration>

For a tutorial on registration, see:

<https://ithelp.brown.edu/kb/articles/746-students-search-and-register-for-courses-on-courses-brown>

To access the most up-to-date course information *including credit bearing summer session offerings* (\*The course information in the PDF versions of the *University Bulletin* and *Course Announcement Bulletin* is current as of February 2020), see:

<http://selfservice.brown.edu/menu> and select 'Courses@Brown (<https://cab.brown.edu>)'

## Course Credit

The semester course is the unit of credit. This is defined as a course taken for the duration of one semester and, for purposes of evaluation, may be considered the approximate equivalent of four semester hours.

Brown follows the Federal standard that defines a credit hour as an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutional established equivalence that reasonably approximates not less than: (1) One hour of classroom or direct faculty instruction and a minimum of two hours of out of class student work each week for approximately fifteen weeks for each semester, or the equivalent amount of work over a different amount of

time (i.e. Summer/Winter Sessions); or (2) At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours. Additionally, transfer credit must equate to the four semester hour standard except for three credit courses taken at the Rhode Island School of Design.

## Course Numbering

Courses numbered 0001-0999 are strictly for Undergraduate credit (Graduate students may enroll in such courses with the permission of the instructor and the Graduate School.)

Courses numbered between 1000-1999 are for both Undergraduate and Graduate credit depending on the level of the student's degree program.

Courses numbered between 2000-2999 are for Graduate credit (Undergraduate students may enroll in such courses and may be applied towards their Undergraduate degree requirements by permission of the instructor.)

Courses numbered above 3000 are strictly for credit in the Alpert Medical School. Certain MD level courses may be taken for credit for Undergraduate students enrolled in the PLME program, but such courses do not count towards quantity, concentration, or Latin honors requirements for the Baccalaureate degree.

## Maximum Course Load and Auditing

No student enrolled in The College or the Graduate School may enroll for more than five Brown credits in a semester. A degree candidate paying full tuition (4 or more enrollment units per semester) and is enrolled in less than five academic credits may be permitted to audit (*see below section on auditing*) additional course(s). At no time may a student be registered for more than 5 credits/courses including audits.

## Enrollment Without Academic Credit

*Auditing.* An auditor is a student who is registered in a course without earning academic credit upon successful completion under the following conditions: (1) the student must be properly registered for it; (2) the student must pay the usual course fee except as indicated in the next paragraph; (3) the student is entitled to all instruction in the course, including conferences, the criticism of papers, tests, and examinations.

Any student registered on a full-time basis may be permitted to audit additional courses in any semester without charge. The total number of course registrations, including audits, may not exceed five credits. Non-degree or student paying less than four enrollment units of tuition may choose to audit if they so choose, but the student does so with the understanding that they will pay the equivalent rate as if registered for academic credit.

With the concurrence of the instructor, the fact that a course has been audited shall be entered on the permanent record of any student electing this privilege. The status of a course in which a student has registered may not be changed from audit to credit after the fourth week of classes or from credit to audit after midsemester.

*Vagabonding.* A "vagabond" is a student who, with the permission of the instructor involved, visits a given course occasionally or regularly without payment of fee. It is understood that such a student shall be entitled to participate in classes and activities, including discussions, conferences, and papers, *only* at the pleasure of the instructor.

## Attendance, Grading, Examinations

### Attendance

It is in the interest of every student to attend all sessions of the classes in which registered, and each student has an obligation to contribute to the academic performance of all by full participation in the work of each class; however, within such limits as are necessary for the general welfare, a student benefits also from exercising discretion and assuming responsibility for his or her educational progress.

Accordingly, unless the instructor imposes attendance requirements, students are not limited with respect to the number of absences from a

course. When, in the instructor's opinion, a student is abusing the privilege of voluntary attendance, the appropriate dean's office should be notified so that appropriate action may be taken.

A student is always fully responsible for any course work missed because of absences and will be assigned failing grades in final examinations missed without excuse from the dean's office.

No student organization shall make any appointment for undergraduates which conflicts with college exercises unless permission has been obtained from the dean.

## Grading System

At the end of each semester final grades are given in semester courses. In all courses, except those designated by the instructor as *Mandatory Satisfactory/No Credit*, a student may, in consultation with the advisor, elect to be graded on a basis of either *Satisfactory/No Credit* or *A, B, C/No Credit*. A student must for every course taken indicate by the end of the fourth week of the semester which basis for grading is elected.

Any student regularly enrolled in a course, no matter whether for *A, B, C/No Credit* or for *Satisfactory/No Credit*, may request from the instructor a more detailed written evaluation of his or her work. (See Course Performance Report below.) Such supplemental evaluations are intended primarily for the information of the student and do not replace departmental evaluations.

*No Credit*. This grade is given when courses are not satisfactorily completed. The notation *No Credit*, and the description of the course in which it is given, are not entered on the official academic transcript.

1. Courses may be designated to be graded on a *Mandatory Satisfactory/No Credit* basis for all students enrolled on the initiative of the instructor. The designation of a course by an instructor to be graded *S/NC* only must be announced no later than the first day of classes and entails the responsibility for providing Course Performance Report forms to all students who request them. An asterisk shall accompany the listing on the transcript of any course that has been designated by the instructor to be graded on the basis of *S/NC* only, with an appropriate explanation of the symbol provided.
2. In exceptional circumstances, a course may be left incomplete (except for a regularly scheduled final examination—see paragraph 3 below), with the instructor's consent. In such cases, a grade of *INC* will be assigned provided that the student has filed a request for extension of time to complete the work of the course and the instructor has consented to such a request. Unless an earlier date is specified by the instructor, grades of *INC* must be made up as follows: for Semester I, by midsemester of Semester II; for Semester II or the for-credit 7 week Summer Session, by the first day of Fall semester. Extensions beyond semester in which the course left incomplete was taken may be granted by the instructor who will indicate this in writing to the registrar. A course not completed by the designated time will be assigned a grade of *NC* unless the instructor indicates that sufficient work has been completed to justify course credit by submitting, as appropriate, a grade change from *INC* to *A, B, C, or S*. A grade of *NC* assigned in accordance with these procedures may be changed subsequently, but no later than one calendar year after the end of the semester in which the course was taken.
3. If a student is absent from a regularly scheduled final examination for a course, the instructor should submit either an *INC* or an *NC*. If the absence from the examination is excused by the dean, the student will be permitted to take a Special Examination and the original grade will be made into an *ABS* temporarily. The Special Examination will be administered by the Office of the Registrar in accordance with the provisions in the Faculty Rules for such examinations, unless other arrangements are agreed to by the instructor and the student, and communicated to the registrar. If the absence from the final examination is not excused by the dean, the student will receive no credit for the course.

*Year Courses*: A year course is one in which both halves must be passed in order to get credit for the entire year. The grade at the end of the first semester is normally a temporary one. Neither semester may be elected independently without special permission. The final grade submitted at the end of the course covers the work of the entire year and is recorded as the

final grade for both semesters. It is normally expected that the second half of a year course will be completed in the second semester of the same academic year in which the first half was taken. If the second half of the year course is not completed at the end of that academic year, the grade for the first semester will become a *No Credit*. If the student completes the second part of the year course during a later academic year, he or she may need to notify the Registrar's Office, in order to reactivate the first part of the course.

In registering for the second half of a year course, students must register for credit if the first half was taken for credit. Similarly, if registered for audit in the first half, the second half of the course registration must also be as an audit. Exceptions must be approved by both the academic department and the Committee on Academic Standing.

*Repeating Courses*: Unless a course is explicitly approved by either the College Curriculum Council or Graduate Council as being able to be repeated for credit, Once course credit has been earned with an initial passing grade *A, B, C, or Satisfactory (S)* or through Transfer Credit it cannot be officially registered for again for in an effort to improve one's initial grade.

*Grade Requirements for Advanced Degrees*: A minimum grade of either *Satisfactory or C* in a 1000 or 2000 level course carries credit toward all advanced degrees. Individual departments may, subject to the approval of the Graduate Council, set higher grade requirements.

Advanced degree candidates may be required to register in courses primarily for undergraduates (numbered 1–999); these courses do not carry advanced degree credit. On occasion, however, and with approval of the student's department and the dean, a student may register for such a course with extra work for advanced degree credit. This course then has the same standing as a 1000-level course and an *EX* is noted on the transcript. This provision for extra work does not apply to courses of the level of 1–999 taken for graduate credit by students in MD program.

*Course Performance Reports*: Any undergraduate student regularly enrolled in a course, no matter whether for *A, B, C/No Credit* or for *Satisfactory/No Credit*, may request from the instructor a more detailed written evaluation of the student's work by way of a Course Performance Report (*Note: This form is available online for currently enrolled undergraduates via Advising SideKick (ASK)*). Course performance reports provide valuable information to students about their success in meeting course learning objectives, especially for courses graded *S/NC*. The instructor may decline to submit such a form if they feel they have inadequate information to do so. The deadline for requesting a Course Performance Report is the day before the final exam period begins in the semester of enrollment in the course (Refer to Academic Calendar for relevant deadlines). Late Course Performance Reports may be requested after the deadline and before a student graduates, but the instructor is not obligated to complete a late report. Students may not request a Course Performance Report after completing their degree requirements (although they may contact an instructor directly for a letter of recommendation or a reference at any time). Copies of Course Performance Reports are made available to: (1) the student, (2) the dean's office, and (3) the student's concentration advisor. While not part of the official record, Course Performance Reports may be sent out from the University at the student's request as part of an official transcript request as long as the student provides such copies to the Office of the Registrar when making the initial transcript request.

*Transcripts*: Requests for transcripts must be made either in writing by completing a Transcript Order Form, or electronically. For further information please visit the Office of the Registrar's website (<http://www.brown.edu/about/administration/registrar/academic-transcript-requests>). Transcripts will be issued only if all financial obligations to the University have been met.

An official transcript consists of a copy of the permanent record listing courses passed and grades received. A statement is added to all transcripts explaining the grading system and indicating that the student may elect to include other material with the official transcript. The student should choose this material in consultation with his or her advisor. The University will mail this material in one envelope along with the official transcript.

## Examinations

A final, written examination (at the end of each semester) shall be given in each course numbered under 2000 unless the instructor of a particular course decides to use some other mode of final evaluation. If the written examination is not to be used, the mode of final examination which is to be used shall be made known to the students in the course no later than midterm and, in addition, the department and the registrar shall be informed.

**Final Examination Schedule:** A pre-defined period at the close of each semester is provided for final examinations for those courses for which such an examination is scheduled. Two examination periods are scheduled for each day. The examination group is determined by, in most cases, the offering time associated with the course (indicated by the figure in parentheses) and also as displayed on Banner Web. The schedule for 2020-2021 is as follows:

Semester I, 2020-2021

Date	9 am Group	2 pm Group
Dec. 12 Sat	6	8
Dec. 13 Su	10	9
Dec. 14 M	4	13
Dec. 15 T	14	11
Dec. 16 W	16	18
Dec. 17 Th	2	1
Dec. 18 F	17	7
Dec. 19 Sat	15	12
Dec. 21 M	5	3

Semester II, 2020-2021

Date	9 am Group	2 pm Group
May 12 W	1	5
May 13 Th	7	11
May 14 F	10	13
May 15 Sat	6	17
May 17 M	8	18
May 18 T	3	16
May 19 W	15	2
May 20 Th	12	9
May 21 F	4	14

**Exam Excuses:** The Office of the Dean of the College is solely responsible for determining whether a student's absence from a final examination is excused. To ensure equitable treatment of all students, students are excused from exams only for family or medical emergencies. Please note that students' travel plans are never an excuse for missing a final exam. Faculty wishing to grant a student an exam excuse may contact the appropriate academic deans authorized to grant exam excuses. In emergency situations, students who are unable to contact their professors must contact the Office of the Dean of the College, which will determine whether or not an exam excuse is warranted. Course instructors are notified of exam excuses granted by the Dean of the College Office.

Consistent with Brown's policy on nondiscrimination, students who are unable to take a final examination due to religious observance may arrange to take their final at an alternate time. Students who cannot take a final exam on the scheduled date due to a religious observance must inform the instructors of any conflicts within the first four weeks of the term. In such cases, instructors are expected to offer a final exam on an alternate date within the same semester, noting the policy in the Faculty Rules that final examinations may be given only during the final examinations period. For further information on exams and religious observance please visit <https://www.brown.edu/academics/college/support/faculty/religiousobservance>.

Make-up exams for approved exam excuses for medical or family emergencies are administered by the Registrar in the second week of the subsequent fall or spring term. The Registrar's Office informs students by email of the date, time, and location of make-up exams.

Placement and Achievement Tests in Foreign Languages. Placement tests in the foreign languages are given during Orientation Program in the fall and during the first week of classes in each semester.

All students, before taking college courses in a foreign language in which they have presented entrance credit, must take either a placement test at Brown University or, preferably, a College Board Language Achievement Test in secondary school. Students with outstanding performance on these tests, or on the Advanced Placement Tests of the College Entrance Examination Board, may be admitted to advanced courses without the usual course prerequisites.

## Student Code of Conduct

### Academic Code Violations

All cases of academic dishonesty among undergraduates, graduate, or medical students, as defined in the Academic Code at Brown University, shall be referred to the dean of the College, Graduate School, or Medical School, or his or her designated representative. A student accused of such an offense shall be notified in writing as soon as possible of the specific charge or charges against him or her before his or her case is considered. The student shall be given the opportunity of a hearing before the designated representative of the dean of the College, Graduate School, or Medical School, and two members of the faculty, at which all relevant facts may be presented. A student shall have the right to appeal any decision to the dean of the College, Graduate School, or Medical School within five business days after receipt of the official letter outlining the case and the decision reached.

### Code of Student Conduct

Brown strives to sustain a learning environment that supports individual exploration. Central to this effort are the four primary Principles of the Brown University Community: individual integrity, respect for others, respect for University resources, and respect for the values of teaching, learning and scholarship. Our community believes that adherence to these principles supports the overall academic mission of the University. Violations of these principles will be handled through the procedures governing the Academic Code and the Code of Student Conduct. These procedures are designed to address behaviors that impede the educational activity of the University or that infringe upon the rights of others.

Student Conduct cases are administered by the Office of Student Conduct & Community Standards.

Specific hearing procedures can be found online at [www.brown.edu/randr](http://www.brown.edu/randr).

# Academic Calendar

## Summer 2020

March 30 - June 24, 2020	Mon. - Wed.	Registration for Summer courses for continuing Brown undergraduates opens at 9:00 a.m. on Monday March 30 and remains open until Wednesday June 24 at 5:00 p.m.
June 22, 2020	Mon.	Summer Session begins.
June 24, 2020	Wed.	Last day to change courses. (All students MUST be in their registered courses by Thursday, June 25.)
July 3, 2020	Fri.	Independence Day holiday. No University exercises.
July 6, 2020	Mon.	Last day to change grade options.
Aug 1 - 4, 2020	Sat. - Tues.	Reading period.
August 4, 2020	Tues.	Last day to drop a course. Last day to initiate a Course Performance Report via ASK.
Aug 5 - Aug 7, 2020	Wed. - Fri.	Final examination period.
August 7, 2020	Fri.	Summer Session ends.

## Fall 2020

Aug. 1, 2020	Sat.	Last day for payment of charges.
Sep. 1, 2020	Tues	Beginning of Graduate School Orientation.
Sep. 3, 2020	Thurs.	Beginning of College Orientation.
Sept. 4, 2020	Fri.	Registration of new students for the first semester opens at 4:30 PM through midnight Tuesday 9/8/2020.
Sept. 8, 2020	Tues.	Opening Convocation at 4:00 p.m.
Sept. 9, 2020	Wed.	Classes of the first semester begin. Web registration begins at 8:00 a.m.
Sept. 9, 2020	Wed.	First day of RISD Fall Session.
Sept. 11, 2020	Fri.	Theses/Dissertations of candidates for Masters and Ph.D. degrees due.
Sept. 16, 2020	Wed.	Last day to register for a Fall RISD course without a fee or change a grade option for a Fall RISD course - (5:00 p.m. deadline).
Sept. 22, 2020	Tues.	Last day to add a course without a fee. (5:00 p.m. deadline.) Banner Web will be taken down for approximately one hour. Once relaunched, all course adds require Instructor override and will be charged a late fee of \$15 per course.
Oct. 1, 2020	Thurs.	Deadline for students currently on non-medical leave to apply for readmission for Semester II.
Oct. 6, 2020	Tues.	Last day to add a course (includes late fee), change from audit to credit, or change a grade option declaration (5:00 p.m. deadline).
Oct. 12, 2020	Mon.	Indigenous Peoples' Day. No University exercises.
Oct. 13, 2020	Tues.	Date by which sophomores entering their 5th semester must file their concentration declaration forms via ASK to avoid having a No Concentration hold placed against their Banner registration (5:00 pm deadline).

Oct. 16, 2020	Fri.	Mid-semester deadline. Last day to change from credit to audit in a course (5:00 p.m. deadline).
Oct. 26 - Nov. 6, 2020	Mon.- Fri.	Advising period for spring pre-registration begins and will end on November 6. Students in their first through third semesters will need to procure their advising PIN from their advisor in order to register.
Nov. 5, 2020	Thurs.	Date by which advisors must approve sophomore submitted concentrations in ASK to avoid having a No Concentration hold placed against the student's Banner registration. (5:00 pm deadline).
Nov. 10, 2020	Tues.	Registration opens for Semester II, 2020-21 for undergraduate students semester level 07 and above and all continuing graduate students at 8:00 a.m. Registration remains open until Tuesday, November 17.
Nov. 11, 2020	Wed.	Registration opens for Semester II, 2020-21 for undergraduate students semester levels 05-06 at 8:00 a.m. (Students are unable to register for 5th semester unless approved concentration is filed). Registration remains open until Tuesday, November 17.
Nov. 12, 2020	Thurs.	Registration opens for Semester II, 2020-21 for continuing undergraduate students semester levels 03-04 at 8:00 a.m. Registration remains open until Tuesday, November 17.
Nov. 13, 2020	Fri.	Registration opens for Semester II, 2020-21 for continuing undergraduate students semester levels 01-02 at 8:00 a.m. Registration remains open until Tuesday, November 17.
Nov. 13, 2020	Fri.	Deadline for submission of proposals for College Curriculum Council-approved undergraduate group study projects (GISPs), independent study projects, and internships for credit) for Semester II.
Nov. 13, 2020	Fri.	Students on serious warning who wish to drop a course after this date must meet with an academic dean for advising and to obtain a drop code.
Nov. 14 - Nov. 17, 2020	Sat. - Tues.	Registration for Semester II, 2020-21 continues until Tuesday, November 17.
Nov. 25 - Nov. 29, 2020	Wed. - Sun.	Thanksgiving recess beginning Wednesday at noon.
Nov. 30, 2020	Mon.	Classes resume.
Dec. 1, 2020	Tues.	Deadline for undergraduates to declare a leave for Semester II.
Dec. 5, 2020	Sat.	Midyear Completion Celebration at 4:00 p.m. in Salomon De Ciccio Family Auditorium. Reception to follow in Sayles Hall.
Dec. 4, 2020	Fri.	Last day of Fall RISD classes.
Dec. 7 - 11, 2020	Mon. - Fri.	Reading Period (optional and at the discretion of the instructor.)

Dec. 11, 2020	Fri.	Classes end for courses not observing the Reading Period. Last day to drop a course (5:00 p.m. deadline) or to request an incomplete from an instructor.	Jan. 26, 2021	Tues.	Registration of new students for the second semester (4:00 pm to midnight).
Dec. 11, 2020	Fri.	UG CONCENTRATIONS: Last day for advisors to approve second or third concentrations in ASK for students in their penultimate semester (typically the 7th semester) who are declaring a second/third concentration(5:00 p.m. deadline). *Any declarations not advisor approved and recorded in Banner by the Office of the Registrar by the 5:00 p.m. deadline will not be honored. Last day to initiate a Course Performance Report via ASK.	Jan. 27, 2021	Wed.	Classes of the second semester begin. Web registration begins at 8:00 am.
Dec. 11, 2020	Fri.	UG CERTIFICATES: Last day for students in their ante-penultimate (typically 6th) semester to declare an undergraduate certificate in ASK.	Feb. 9, 2021	Tues.	Last day to add a course without a fee. (5:00 p.m. deadline) Banner web will be taken down for approximately one hour. Once relaunched, all course adds require Instructor override and will be charged a late fee of \$15 per course.
Dec. 12, 2020	Sat.	Last day for approved 7th (or penultimate) semester undergraduates in eligible concentrations to submit writing completed in the concentration in ASK to complete part II of the writing requirement. Concentration advisors must approved submitted writing in ASK by the last day of the semester.	Feb. 10, 2021	Wed.	Last day of Winter RISD classes.
Dec. 12 - 21, 2020	Sat. - Mon.	Final Examination Period.	Feb. 13 - 16, 2021	Sat. - Tues.	Long weekend. No University exercises.
<b>Winter 2021</b>			Feb. 17, 2021	Wed.	Classes resume.
Nov. 18 - Dec. 2, 2020	Wed. - Wed.	Registration for Wintersession courses (begins at 9:00 A.M.).	Feb. 18, 2021	Thurs.	First day of RISD Spring Session.
Dec. 2, 2020	Wed.	Last day to register for a Wintersession course (5:00 p.m. deadline).	Feb. 24, 2021	Wed.	Last day to add a course (includes late fee), change from audit to credit, or change a grade option declaration (5:00 p.m. deadline).
Dec. 15, 2020	Tues.	Wintersession tuition due.	Feb. 25, 2021	Thurs.	Last day to register for a Spring RISD course without a fee or change a grade option for a Spring RISD course (5:00 p.m. deadline).
Dec. 22, 2020	Tues.	Wintersession online courses begin.	March 12, 2021	Fri.	Mid-semester deadline. Last day to change from credit to audit in a course (5:00 p.m. deadline).
Jan. 3, 2021	Sun.	Residence halls open (for students registered for Wintersession classes only).	Mar. 27 - Apr. 4, 2021	Sat. - Sun.	Spring Recess.
Jan. 4, 2021	Mon.	Wintersession begins (On-Campus and Destination courses).	March 29, 2021	Mon.	Date by which sophomores entering their 5th semester must file their concentration declaration forms via ASK to avoid having a No Concentration hold placed against their Banner registration. (5:00 pm deadline).
Jan. 11, 2021	Mon.	Last day to change a grade option declaration.	April 1, 2021	Thurs.	Deadline for students currently on non-medical leave to apply for readmission for Semester I.
Jan. 18, 2021	Mon.	Martin Luther King, Jr. holiday. No University exercises.	April 5, 2021	Mon.	Classes resume.
Jan. 19, 2021	Tues.	Last day to drop a course or request an incomplete from an instructor. Last day to initiate a Course Performance Report via ASK.	April 5, 2021	Mon.	Advising period for fall pre-registration begins. Students in their first through third semesters will need to procure their advising PIN from their advisor in order to register.
Jan. 22, 2021	Fri.	Final examinations. Wintersession ends.	April 8, 2021	Thurs.	Date by which advisors must approve sophomore submitted concentrations in ASK to avoid having a No Concentration hold placed against the student's Banner registration. (5:00 pm deadline).
<b>Spring 2021</b>			April 9, 2021	Fri.	Deadline for submission of proposals for College Curriculum Council-approved undergraduate group study projects (GISPs), independent study projects, and internships for credit) for Semester I.
Jan. 1, 2021	Fri.	Last day for payment of charges.	Apr. 13, 2021	Tues.	Students on serious warning who wish to drop a course after this date must meet with an academic dean for advising and to obtain a drop code.
Jan. 7, 2021	Thurs.	First day of RISD Winter Session.			
Jan. 14, 2021	Thurs.	Last day to register for a Winter RISD course without a fee or change a grade option for a Winter RISD course (5:00 p.m. deadline).			
Jan. 15, 2021	Fri.	Theses/Dissertations of candidates for Masters and Ph.D. degrees due.			
Jan. 18, 2021	Mon.	Martin Luther King, Jr. holiday. No University exercises.			

April 19, 2021	Mon.	Registration opens for Semester I, 2021-22 for undergraduate students semester level 07 and above and all continuing graduate students at 8:00 a.m. Registration remains open until Monday, April 26.
April 20, 2021	Tues.	Registration opens for Semester I, 2021-22 for undergraduate students semester levels 05-06 at 8:00 a.m. (Students are unable to register for 5th semester unless approved concentration is filed). Registration remains open until Monday, April 26.
April 21, 2021	Wed.	Registration opens for Semester I, 2021-22 for continuing undergraduate students semester levels 04 and below at 8:00 a.m. Registration remains open until Monday, April 26.
Apr. 22 - Apr. 26 2021	Thurs. - Mon.	Registration for Semester I, 2021-22 continues until Monday, April 26.
April 30, 2021	Fri.	Reading Period begins and will end on May 11 (optional and at the discretion of the instructor).
May 1, 2021	Sat.	Deadline for undergraduates to declare a leave for Semester I. Theses of candidates for Masters and Ph.D. degrees in May due.
May 11, 2021	Tues.	Reading Period ends.
May 11, 2021	Tues.	Classes end for courses not observing the Reading Period. Last day to drop a course (5:00 p.m. deadline) or to request an incomplete from an instructor.
May 11, 2021	Tues.	UG CONCENTRATIONS: Last day for advisors to approve second or third concentrations in ASK for students in their penultimate semester (typically the 7th semester) who are declaring a second/third concentration(5:00 p.m. deadline). *Any declarations not advisor approved and recorded in Banner by the Office of the Registrar by the 5:00 p.m. deadline will not be honored. Last day to initiate a Course Performance Report via ASK.
May 11, 2021	Tues.	UG CERTIFICATES: Last day for students in their ante-penultimate (typically 6th) semester to declare an undergraduate certificate in ASK.
May 12, 2021	Wed.	Last day for approved 7th (or penultimate) semester undergraduates in eligible concentrations to submit writing completed in the concentration in ASK to complete part II of the writing requirement. Concentration advisors must approved submitted writing in ASK by the last day of the semester.
May 12 - 21, 2021	Wed. - Fri.	Final Examination Period. (No exams on Sunday May 16).
May 19, 2021	Wed.	Last day of Spring RISD classes.
May 30, 2021	Sun.	Commencement.

# The College

---

## Admission

In order to receive information about admission to the undergraduate college, please visit our website to register online: [www.brown.edu/Administration/Admission](http://www.brown.edu/Administration/Admission). Requests for applications for admission to undergraduate study should be addressed to:

College Admission Office  
Brown University  
Box 1876  
Providence, Rhode Island 02912  
(401) 863-2378

The application deadline for the regular admission process is January 1 of the year of desired entrance to Brown. An early plan is available for students who wish to receive December notification. Early Decision candidates must apply as early in the fall of the senior year of high school as possible but in any case by November 1.

## Subject Requirements

Brown's commitment to fostering a liberal education assumes that a candidate for admission will profit most from pursuing a comprehensive college preparatory program. A strong background in English (both literature and writing), foreign languages, mathematics, science, and history will enable students to benefit from the intellectual opportunities offered by Brown University. Brown considers the programs listed below to be a desirable secondary school preparation.

*English*—four years with significant emphasis on writing, continued through the senior year;

*Mathematics*—at least three years of college preparatory mathematics, preferably continued through the senior year;

*Foreign Language*—at least three years, preferably continued through the senior year;

*Laboratory Science*—at least two years of laboratory science above the freshman-year level. Prospective science or engineering students should take both physics and chemistry, and as advanced a level of mathematics as possible;

*History*—at least two years, including American History;

*The Arts*—at least one year of study in music or art;

*Elective Subjects*—at least one year of elective academic subjects;

*Information Technology*—facility with computers is recommended for all applicants.

Exceptions may be made. The Board of Admission encourages the growth of innovative programs and welcomes applications from students of varying educational backgrounds who have shown outstanding intellectual promise. Exceptionally able students who are well-prepared to enter college before completion of secondary school may also be admitted, although such cases are unusual.

## College Entrance Examination Board Tests

It is the responsibility of each applicant to take the appropriate tests and to see that they are officially reported to the Board of Admission by January 1. A final decision on the application cannot be made until official scores have been received. Applicants can satisfy our testing requirements in one of two ways: (1) Either the SAT with Essay, or (2) the ACT with Writing. We recommend, but do not require, the submission of two SAT Subject Tests of your choice. Applicants to the Program in Liberal Medical Education are strongly recommended to take one subject test in either Biology, Chemistry or Physics. We highly recommend that international applicants or students whose first language is not English take the Test of English as a Foreign language (TOEFL), or the IELTS, and arrange for Brown to receive the official results.

## Advanced Placement Examinations

Brown participates in the Advanced Placement (AP) Program of the College Entrance Examination Board. The program's aims are "to give able students challenging educational experiences in school, and to increase for these able students the opportunity to take advanced work in college." Students enrolled in secondary schools participating in this program may take the appropriate examinations given in May and have the scores sent to Brown University. Placement is determined by the appropriate academic department of Brown University, which may review the examination booklets and other materials. Policies placement vary from department to department. Students will be notified of their eligibility for such placement upon matriculation at Brown prior to their first semester and asked whether they wish to accept or decline transcript notation(s) of advanced placement credit (when indicated by department policy for a subject). Subjects in which advanced placement credit may be granted include American History; Art History; Biology; Economics; Environmental Science; European History; French; German; Italian; Latin; Mathematics, Physics; Spanish; and World History. Placement beyond certain introductory courses also may be granted in Chemistry, Computer Science, and Psychology. For more complete information on the Advanced Placement program please consult <https://www.brown.edu/academics/college/degree/policies/advanced-placement>.

*Advanced Placement credits may not be applied to the minimum 30 course credits needed to earn a Brown degree.*

## Advanced Standing for Pre-Matriculation Work (i.e. Exam/Test Credits and College Courses)

Non-transfer students may not receive more than one semester of Advanced Standing for work completed prior to Brown without approval for an exception by petition to the Committee on Academic Standing. Upon attaining sophomore standing at Brown, a student who wishes to be considered for one semester of Advanced Standing based on pre-Brown work must present a minimum of three-six AP credits, official certification under various international educational systems, and/or transfer-eligible pre-Brown college course credits from an accredited institution to apply for advanced standing (carrying 4 enrollment units), or 4 Brown summer and/or winter course credits to apply for a semester of 'effective' advanced standing (carrying 0 enrollment units). Questions concerning advanced standing guidelines and procedures should be addressed to the College's advanced standing dean. The deadline to apply for Advanced Standing for students is the last day of classes of their fifth semester. Applying requires prior declaration of intent to apply to the College's advanced standing dean, an advising conversation with the dean, and a comprehensive, feasible degree completion plan. Students not requesting Advanced Standing (and enrollment credit) from the College by this deadline may not do so subsequently, except by petitioning the Committee on Academic Standing. For further information please visit <https://www.brown.edu/academics/college/degree/policies/advanced-standing>.

### Transfer Admission from Other Colleges

Only a limited number of transfer students can be accepted each year. A maximum of two years of study elsewhere is transferable; extension (in most cases) and correspondence courses are not transferable, nor are courses outside the realm of defined academic disciplines (nursing, radio electronics and/or broadcasting, or business administration, to name a few). Students who wish to be considered as transfer candidates should write or call The College Admission Office for additional information, application forms, and procedures.

## Special and Visiting Students

Each year, a small number of students enrolled at other colleges spend a semester or a year as "visitors" enrolled full-time at Brown to pursue course work (toward credit at their own college) not offered at their own institution. Other students may be accepted on a non-matriculated basis for a limited number of courses and are classified as special students.

## Resumed Undergraduate Education Program

The Resumed Undergraduate Education (RUE) Program is a small, highly competitive program ideal for students who interrupted or delayed their formal education due to family commitments, financial concerns, health issues, military service, employment opportunities, or simply a compelling need to explore other paths. Applicants must have earned a high school diploma or equivalent and have been out of high school for six or more years by the time of proposed enrollment at Brown.

Interested people should write to:

The Resumed Undergraduate Education Program  
The College Admission Office, Box 1876  
Brown University, Providence, Rhode Island 02912  
or call (401) 863-2378.

## Requirements for Baccalaureate Degrees

### Baccalaureate Degree Programs

At Brown, two baccalaureate degrees are awarded—the Bachelor of Arts (A.B.) and the Bachelor of Science (Sc.B.). The degree awarded is determined by a student's chosen concentration program. All Brown undergraduates must complete the requirements for either an A.B. or a Sc.B. in order to earn the baccalaureate degree at Brown.

The Sc.B. degree recognizes a science concentration that demonstrates both breadth and depth in science beyond the minimum required for the A.B. degree in the same field. An Sc.B. program normally follows these guidelines:

1. The concentration program, with the exception of Engineering, shall require no more than ten courses in any one department. The total number of concentration courses required shall not exceed twenty (twenty-one for Engineering).
2. At least one semester course of independent study, research, or design in the concentration discipline must be included.
3. Additional electives must be chosen to meet the quantity requirement for all baccalaureate degrees. In cases, where the student may successfully complete the Sc.B. degree on the basis of one concentration as well as an additional concentration associated with an A.B. degree, only one degree (Bachelor of Science) is awarded upon graduation. \*See below for requirements associated with combined degrees.

### Degrees with Distinction

Baccalaureate degrees may be awarded with distinction (*magna cum laude*) to those students whose percentage of quality grades -- grades of "A" or "S with Distinction" -- in courses taken at Brown puts them in the top 20% of the entire undergraduate graduating class. The Registrar will provide an opportunity for students to indicate that they do not wish to be considered for a degree with distinction.

### Quantity and Progress Requirements

In order to graduate with a Brown baccalaureate degree, a student must successfully complete at least 30 course credits (equivalent to 120 semester hours), 15 of which must be taken at Brown. A maximum of 4 summer and/or Brown Wintersession courses may be applied toward this requirement. Approved study at another institution may also count toward the 30-course credit degree requirement.

The standard semester course load at Brown is four courses. Full-time students are permitted to enroll in a maximum of five courses/credits in a given semester; students may take three courses in a semester as long as doing so will not bring them below the level of good academic standing. A student may not enroll in fewer than three courses in any semester without written permission from a designated academic dean. Resumed Undergraduate Education students may study on either a full-time or less than full-time basis with permission from the RUE academic dean.

### Residence Requirement

With the exception of students admitted to the Resumed Undergraduate Education (RUE) Program, every candidate for a baccalaureate degree

must be in residence at Brown for at least four semesters as a full-time student. Credits from Brown Exchange programs, Brown Approved Alternative Study Abroad programs, and the Brown Summer School do not apply to the residency requirement. Students in the RUE Program must be in residence for the equivalent of four full-time semesters. RUE students may study on a less than full-time basis, if they have secured permission from the RUE academic dean and presented a viable degree completion plan. Every student must spend sufficient time in concentration studies to permit faculty evaluation of his or her concentration.

### Writing Requirement

Learning to write well is a developmental process that occurs over time. Brown students are therefore required to work on their writing at least twice: once in their first two years of study, and a second time in semesters 5-7 (or the penultimate semester). Students must complete an approved course at Brown in their first two years of study. Exceptions are made for transfer students, who may meet this part of the requirement with an approved course in the subjects of either COLT, ENGL, or LITR from their prior institution, and for students in the Brown|RISD Dual Degree program who are required to take at least one writing designated course at Brown.

In semesters 5-7 (or the penultimate semester), all students must demonstrate that they have worked on their writing a second time in a course they have taken at Brown (study away courses are ineligible). Students may take another approved course to meet this part of the requirement, or if approved by a participating concentration, they may upload a substantial piece of writing developed within the concentration. Writing completed in courses taken away from Brown will not meet Part 2 of the writing requirement. Learn more about the University Writing Requirement (<https://www.brown.edu/academics/college/degree/curriculum/writing-requirement>).

### Concentration Requirement

An academic concentration is the focal point for a student's undergraduate educational experience at Brown. It is an in-depth study centering on a discipline or disciplines, a problem or a theme, or a broad question. Concentrations aid intellectual development by encouraging conceptual and methodological study on a sophisticated level. A concentration may coincide in some ways with specific prerequisite training for professional goals, but professional training is not the central aspect of the concentration process. Rather, the concentration is designed to foster students' command of an area of knowledge and ability to use a concentration's concepts and methods in a coherent manner.

Brown offers standard concentrations that lead to either the Sc.B. or the A.B. degree. In keeping with the philosophy of the open curriculum, students may design an independent concentration if standard concentration offerings do not match their interests. Independent concentration proposals are sponsored by at least one faculty member and must be reviewed and approved by a subcommittee of the College Curriculum Council.

A listing of departmental and interdepartmental concentration programs that are currently available may be found at: <http://www.brown.edu/academics/college/concentrations/>. The programs have been approved and are subject to periodic review by the College Curriculum Council. Guidelines for preparing an independent concentration proposal are on the Dean of the College website.

All students (with the exception of incoming junior transfers) must request, in writing, admission to a concentration program no later than the middle of their fourth semester, before pre-registering for semester five (usually spring semester of sophomore year). The written proposal should outline the student's major objectives in choosing the concentration, while also listing the specific courses to be taken. This proposal functions as a kind of contract, and is signed jointly by the student and the concentration advisor for the relevant department or program. Once the contract has been signed, the departmental concentration advisor becomes the student's advisor for the remainder of his or her time at Brown.

Students may complete as many as three concentrations during a regular four-year program; Brown does not offer minors. A student who satisfactorily completes more than one concentration program may have

that fact indicated on his or her permanent record. In order to accomplish this, the student must have filed a declaration for each concentration and had it "advisor approved" by the last day of classes in the student's penultimate semester (for most students this is seventh semester). Sponsorship and authorization of each concentration program shall follow the usual procedures.

No student will be permitted to register for his or her fifth semester unless a declaration of concentration has been filed. Exceptions are made for incoming junior transfers and for students in the Brown|RISD Dual Degree program. Students failing to complete registration on time because of the failure to file a concentration declaration will be subject to the same action taken by the University for all cases of late registration (**see Financial Information** (p. 818)).

**Honors in the Concentration:** Students whose work in the field of concentration has demonstrated superior quality and culminated in an honors thesis of distinction are awarded departmental honors at Commencement. The designation "Honors" is included on the student's transcript and diploma. No distinctions are made among quality levels of honors work. Students considering honors work should consult their departmental, interdepartmental, or independent concentration advisor.

Recommendations for honors are due in early May preceding Commencement. Brown does not grant honors retroactively. Therefore, students who consider taking a grade of Incomplete in a thesis project should understand that they will not receive honors unless the thesis is completed in time to be evaluated by faculty readers and a recommendation submitted before graduation.

## Enrollment Requirement

By decision of the Corporation, prior to the awarding of a baccalaureate degree each student is required to accumulate eight semesters, or 32 units, of enrollment credit. The eight-semester enrollment requirement is separate from and in addition to any other degree requirements. A semester of enrollment credit can be earned by studying full-time at Brown for a semester, by transferring in a full semester's worth of work from an approved program of study at another institution, and as aforementioned from select pre-matriculation exam or test credits such as from the Advanced Placement (AP) program and from some international certification programs such as the British A-Levels and the International Baccalaureate. Brown Summer or Winter courses do not count toward the enrollment requirement unless students successfully earn four summer/winter course credits at Brown. (See section below on Tuition Regulations Relating to Brown Summer/Winter Session Courses.)

## Requirements for Combined Degree Programs

### Combined A.B./Sc.B. Degree

Students who wish to earn a combined A.B. and Sc.B. degree may do so in a five-year program in which work for both degrees proceeds concurrently. Students who elect this five-year plan will usually arrange their programs of study so that they may change to either degree candidacy alone prior to the fourth year.

Requirements for this degree program are as follows:

- Declaration of intent. A formal application approved by the appropriate dean must be filed with the Registrar no later than the student's fifth semester of study.
- Satisfactory completion of the Sc.B. requirements for a standard concentration program in the life sciences, physical sciences or mathematics, or an approved independent Sc.B. program spanning one or more of these areas.
- Satisfactory completion of the A.B. requirements for a standard or independent concentration in the humanities or social sciences.
- A minimum of 38 courses passed. Transfer credits are awarded according to the University's standard rules and regulations.
- At least three years in residence.
- Ten semesters, or 40 units, of enrollment credit. At least six of the ten semesters must be completed in residence at Brown. The ten-semester enrollment requirement is separate from and

in addition to any other degree requirements. A semester of enrollment credit can be earned by studying full-time at Brown for a semester, by transferring in a full semester's worth of work from an approved program of study at another institution, and as aforementioned from select pre-matriculation exam or test credits such as from the Advanced Placement (AP) program and from some international certification programs such as the British A-Levels and the International Baccalaureate. Brown Summer or Winter courses do not count toward the enrollment requirement unless students successfully earn four summer/winter course credits at Brown. (See section below on Tuition Regulations Relating to Brown Summer/Winter Session Courses.)

*Note: The Brown Corporation has enacted a provision allowing students in the five-year A.B.-Sc.B. program who complete all academic requirements in nine semesters to terminate their studies at that point, provided the Committee on Academic Standing (CAS) approves the breadth and quality of the student's program. In that case, the enrollment requirement will be reduced to nine semesters. This provision is subject to review by the Corporation's Academic Council.)*

## Concurrent Program Leading to a Baccalaureate Degree and a Master's Degree

Subject to the prior approval of the department involved, the Graduate Council, and the Committee on Academic Standing, exceptionally capable students may be permitted, in their junior year, to enter a graduate program of study leading to the earning of both baccalaureate and master's degrees at the end of eight or nine semesters. Students who are granted this permission complete a minimum of 36 course credits\* within eight or nine semesters (The Concurrent Baccalaureate and Master of Arts in Teaching (MAT) is completed in 10 semesters). Specific requirements for both degrees must be met, although some courses may be used for credit toward both degrees. Normally, no more than two courses counted toward the undergraduate concentration may be used to fulfill the requirements of the graduate degree. The program includes at least two 2000-level courses, not including any 2000-level courses counted for the independent project or thesis.

*\*Effective May 2, 2017 the required number of credits for the concurrent degree was raised from 34 to 36. Any students accepted into concurrent program after May 2, 2016 must complete 36 credits.*

In cases where the requirements for an advanced degree are partially completed by students in meeting the requirements for a baccalaureate degree, graduate credit for such work may be allowed upon formal admission to the Graduate School. The Graduate Council shall, in consultation with the department involved, determine the remaining requirements to be satisfied for the advanced degree.

The Committee on Academic Standing follows certain guidelines in considering requests for admission to this combined degree program. Interested students should obtain a copy of these guidelines at the Office of the Registrar prior to filing an application.

## Five-Year Baccalaureate–Master's Degree Program

With the approval of the Graduate Council, academic departments may establish integrated programs leading to the successive awarding of the bachelor's and the master's degrees. In such programs, a student may offer up to two courses taken during undergraduate study at Brown in partial fulfillment of the requirements for the master's degree. In all cases, the equivalent of at least six semester courses must be taken in-residence at Brown University.

A student must apply for admission to a 5th Year program no later than the end of the third week of his or her penultimate semester of undergraduate study. Admission to the Graduate School for the fifth year will ordinarily be a matter of course; however, such admission must be applied for at the proper time and decided on in the regular way. Students interested in this program should consult with the Associate Dean for Academic Affairs in the Graduate School.

## Brown-Rhode Island School of Design Dual Degree Program

In this five-year program, students complete a baccalaureate degree at Brown and a Bachelor of Fine Arts (B.F.A.) degree at RISD. The Brown degree earned by students in the program will ordinarily be an A.B. degree. Earning a Bachelor of Science degree is not prohibited, but doing so is difficult because Sc.B. programs are more credit heavy than A.B. programs. For this reason, permission to pursue an Sc.B. in this program is granted on a case-by-case basis. The RISD degree will in all cases be a bachelor of fine arts (B.F.A.) degree. Other degrees offered at RISD ordinarily take five years and thus are excluded from the program.

To gain admission to the program, students must apply to and be admitted by both schools. Because of the program's strict requirements, only students applying to enter as first-year students are eligible. Approximately 15 students matriculate in the program each year. Once admitted to the program, students must complete 156 credit hours, at least 60 of which (15 courses) must be taken at Brown. This requirement does not include courses earned on Brown sponsored exchange or approved study abroad programs nor Brown summer/winter session courses.

## Program in Liberal Medical Education

Each year, Brown's Program in Liberal Medical Education (PLME) matriculates approximately fifty first-year students who will pursue an undergraduate degree and professional studies in medicine in a single eight-year program. As undergraduates, PLME students may choose to work toward an A.B. or Sc.B. degree in the sciences, or toward an A.B. in the humanities, social sciences, or behavioral sciences. The undergraduate experience is designed to prepare students for the last four years of the program, which constitute the medical school years and culminate in the MD degree.

To apply to the PLME program, students submit the standard Brown application. Candidates considered admissible by the College Admission Office are reviewed by the PLME Advisory Board. Applicants not admitted to PLME are still considered candidates to the College for the Bachelor of Arts or Bachelor of Science degree.

## Academic Advising Programs

A strong network of advisors and mentors helps students engage fully and successfully with Brown's open learning environment. Brown's advising programs are designed to facilitate these relationships and provide students with maximum opportunity to formulate and achieve their educational objectives. Students are expected to take the initiative in seeking out and working with advisors to make the best use of their time at Brown.

To ensure that students have the guidance and support they need to make informed choices, the University assigns each first-year student two advising partners: an academic advisor. The academic advisor provides long-term institutional perspective on educational options while generally informing, sometimes encouraging, and occasionally challenging students. The student Meiklejohn provides an experienced perspective on the ins and outs of course registration, course reputations, prerequisites, and the like.

As first-year students transition to the sophomore year, they are encouraged to stay with their first-year advisors so that they can benefit from the continuity and depth of a two-year advising relationship. Most do stay with the same advisor, although some select a different faculty member or administrator. The efforts of assigned sophomore advisors are augmented by Randall Advisors and Sophomore Deans in the Dean of the College Office. These advising resources constitute the foundation of "sophomore advising" at Brown and help students navigate the critical second year of undergraduate study.

Students declare a concentration in their fourth semester of study. Concentration advisors help with this process by explaining the dimensions of their academic disciplines, reading and providing feedback on students' concentration declaration essays, and advising students during their final two years at Brown. Faculty of individual departments and

programs that administer concentrations often serve as informal advisors to their concentrators.

A broad network of academic, co-curricular, and personal counseling complements the work of assigned advisors. Throughout the year, deans in the College and in the Office of Student Life provide one-on-one consultation to all students who request it. Additional support is available from the Tutoring Program, the Curricular Resource Center, the Sarah Doyle Women's Center, the Brown Center for Students of Color, the Career Development Center, the professional staff in University Health Services, and the chaplains. Peer advising includes Brown's Meiklejohn advising program, residential peer leaders, minority peer counselors, women's peer counselors, Transfer and RUE peer counselors, Career Center peer advisors, health careers peer advisors, and athlete peer advisors.

## Academic Support Services

A number of programs support undergraduates' academic success and help them take full advantage of the curriculum.

- The Office of Co-Curricular Advising and Tutoring organizes academic coaching, group tutoring, and individualized tutoring. Group tutoring is offered for select courses in chemistry, economics, math, and physics. Individual tutoring is available by application.
- The Curricular Resource Center provides advising, facilitation and reference materials for students wishing to design their own courses (ISPs and GISPs), to craft independent concentrations, and to explore options for time away from Brown.
- Student and Employee Accessibility Services (SEAS) coordinates and facilitates services for students, faculty, and staff with physical, psychological, and learning disabilities.
- The Math Resource Center assists students in introductory mathematics courses.
- The Science Center offers academic support, tutoring, science-related activities, and a network of faculty and peer advisors familiar with Brown's science curricula. Through various events and workshops, the Center works to increase the Brown community's understanding of science.
- The Writing Center provides individual and group writing support to any member of the Brown community. Writing Center staff members help students with all stages of the writing process, from finding a topic through drafting, revising, and final editing. Writing Center associates also offer workshops for groups of students on various writing topics.

## Academic Standing

The Brown Faculty and Corporation set the minimum standards students must meet in order to earn the baccalaureate degree. Undergraduate students are normally expected to take 4 courses each semester for a total of 32 courses in 8 semesters and will ordinarily complete 8 courses in every 2 consecutive semesters. Students *must* earn a minimum of 30 course credits in 8 semesters. (Successful course completion means a course completed with a grade of A, B, C, or S.)

To remain in good academic standing, Brown students must satisfactorily complete at least three courses (meaning earn 3 course credits) by the end of the first semester, seven courses by the end of the second semester, eleven courses by the end of the third, fifteen by the end of the fourth, eighteen by the end of the fifth, twenty-two by the end of the sixth, twenty-six by the end of the seventh, and thirty courses (again meaning 30 course credits) to graduate after eight semesters. In addition, students making satisfactory academic progress will complete a minimum of seven courses in any two consecutive semesters. Prior to summer 2016, academic standing was determined only on the basis of courses completed at Brown. Effective Summer 2016, academic standing is determined on the basis of courses completed at Brown or via approved transfer credit noted on the transcript AFTER a student has been matriculated as a degree candidate. Any pre-Brown matriculation credit, such as Advanced Placement (AP) credit, IB credit, college credits for transfer students, etc. do not figure in the determination of academic standing.

Undergraduates who, in the judgment of the Committee on Academic Standing, have unsatisfactory scholastic records may be placed in one of three categories—Academic Warning, Serious Warning, or Academic Suspension. Academic Suspension or Dismissal (second suspension) includes a permanent transcript notation. The Committee's judgment will depend on the extent of a student's academic deficiency as defined by rules approved by the Faculty on February 5, 1991:

*Academic Warning* cautions a student that his or her record is below the standard for graduation.

*Serious Warning* notifies a student that, unless the record improves, he or she will be subject to academic suspension at the end of the semester.

*Academic Suspension* may be ordered when the Committee finds that a student's academic record falls more than two credits below the number expected for the student's semester level.

Students on Academic Warning and Serious Warning are required to obtain special academic advising from an assigned dean.

## Guidelines for Study Elsewhere

Students who wish to transfer credit for study completed at a regionally accredited, degree-granting, two or four-year institution, may do so with prior approval of the appropriate departments and the Dean of the College Office on behalf of the Committee on Academic Standing (CAS). The rules governing transfer credit for study away from Brown are complex. One set of rules governs study abroad; another applies to Domestic and/or Home Country Study Away. Yet another set of rules applies to summer study transfer credits. This section describes the policies and procedures that are most commonly called into play when matriculated students wish to have credits from elsewhere added to their Brown transcript.

Students may receive up to eight course credits for work undertaken during one academic year. In a semester credit hour system, one Brown course is considered the equivalent of four semester hours. In a quarter credit hour system, one Brown course is considered the equivalent of six quarter hours. For that reason, the number of course credits received for study away from Brown may not be equal to the number of courses taken. For example, a student taking three four-semester-hour courses, all properly approved for Brown transfer credit, will receive the equivalent of three Brown course credits. However, a student taking three four-quarter-hour courses, all properly approved for Brown transfer credit, will receive the equivalent of two Brown course credits. It is the student's responsibility to clarify in advance any concerns regarding the amount of transfer credit that may be awarded.

In order to be considered for transfer credit, courses must be completed with a grade of C or better (C- does not qualify), and an official transcript must be received by Brown's Office of the Registrar from the host institution. This transcript will be retained by the University. All transfer credit must receive appropriate department faculty approval and Committee on Academic Standing approval via the Dean of the College Office. Students should also keep all records from their work away, including: course syllabi, exams, papers, notes, projects, and portfolios, in the event that post-approval is required from the relevant academic department at Brown.

The Brown transcript will indicate the name of the host institution, the time period during which the student studied there, as well as the courses taken and/or unassigned credits at Brown. In the case of Brown sponsored exchange and approved study abroad programs during the academic year, all course work is reflected with the actual course title and a grade of 'S.' Students applying to graduate and professional schools are often asked to provide official transcripts from all institutions at which they have been enrolled. In such cases, the student will need to request copies of their transcripts from the study-away institution.

## Domestic Study Away

Students planning to study elsewhere in their home country of citizenship should obtain an instruction sheet and a preliminary transfer credit approval form from the Dean of the College website. Students should then work out a program and present it to their concentration advisor and/or other appropriate faculty members for approval. When the preliminary

transfer credit form is returned to the study away dean, that dean will approve it on a tentative basis for the CAS or advise the student to petition the CAS, in which case instructions for that petition will be made available. Students should also keep all records from their work away, including, course syllabi, exams, papers, notes, projects, and portfolios, in the event that post-approval is required from an academic department at Brown.

## Study Away during the Summer

Two avenues of study are available to undergraduate students interested in summer work. They may take courses in Brown's 7 week Summer Session, or apply for transfer credit from other summer programs—either domestic or international—that meet certain conditions. Whether studying in the U.S. or abroad, students must study at accredited, degree granting institutions. Extension division courses are generally not allowed. Students should obtain preliminary approval for summer study away from Brown by the Committee on Academic Standing and appropriate faculty.

Students may count as many as four summer courses from all sources (or their equivalent, if summer courses carrying fewer than 4 credits were transferred to Brown) toward the baccalaureate degree. In addition, Brown Wintersession courses count towards the 4 maximum allotment (Winter session courses from other institutions are NOT transferable). No more than the equivalent of two Brown courses will be transcribed for any given summer of enrollment. Summer transfer credit may not be used to advance a student's date of graduation. Students interested in summer study elsewhere should consult staff in the Dean of the College office or the Office of International Programs (OIP), as appropriate.

## International Study

Brown's Office of International Programs (OIP) coordinates all study abroad undertaken by Brown students either on Brown sponsored programs or on Brown approved programs. At present, Brown sponsors programs in France, Spain, Cuba, Czech Republic, Italy, Germany, Denmark, Sweden, The United Kingdom, Tanzania, Japan, Barbados, Brazil, India. Students interested in study abroad should check with OIP as far in advance of any intended study as possible. Brown students of any nationality are not allowed to study abroad in countries where there is a travel ban by the U.S. State Department.

The College Curriculum Council (CCC) has established the following guidelines for study abroad by Brown students:

To receive credit for international study, students must spend at least one semester enrolled in a international institution of higher learning, subject to the same rules and regulations as the host institution's regular students. There are two exceptions: where the language of study is one in which sufficient proficiency is unlikely to be achieved by the average Brown undergraduate, but the student should study the language while in the country; and where the usual assessment procedures may not be appropriate, in which case special arrangements may have to be made. Students may *not* study on itinerant programs (i.e., those which travel through many sites rather than being based in one primary site). Nor may they study at institutions created for overseas study for Americans, with special exceptions: for study of a specific area and/or field research unavailable at Brown or better pursued at an international site OR in sites where "the average Brown student" cannot study alongside local students because of the language, e.g., Keio, Denmark, Sweden, Czech Republic.

Exceptions include Syracuse-in-Florence, for art history students; ICCS in Rome for classics students; programs that provide a structured "field studies" curriculum appropriate for students in such fields as development studies, environmental studies, ecology, geological studies, etc.; and programs providing for studies pursued at Brown but often not found in regular university programs overseas, such as studio art or theater arts. Prerequisites for such programs will be stated and must include previous course work pertinent to the intended study abroad.

## International Study and Brown Curriculum

International study should complement the student's program of study at Brown. This should be ascertained by the Office of International Programs (OIP) in consultation with the CCC subcommittee on International Study, the Committee on Academic Standing (CAS), and regional advisory committees.

## Non-Brown programs

Brown's Office of International Programs works closely with key academic departments to develop a list of programs approved for international study. This list includes all Brown-sponsored programs and programs administered by institutions other than Brown in each region. All such programs should conform to the above guidelines for international study. Students do not need CAS approval for study on these programs. The list will be reviewed every two years, and any new Brown-sponsored programs are added immediately.

## For Programs Not on the List

Students may petition for approval to study on other programs but should be sure to check the international study guidelines to see if the proposed program meets the criteria. Grounds for exceptions include: the desire to study in a country where there is no approved program; or the desire to study at an institution known for excellence in a specific field. Students must submit a written rationale, a tentative list of courses, and a supporting statement by a faculty member who is familiar with the program or who has expertise in the field of study being pursued. The proposal will be evaluated by the appropriate regional committee; CAS will make the final decision.

OIP reports annually on petition actions to the CCC subcommittee on international study.

Students planning to study abroad must be in good academic standing. They must be able to demonstrate competency in a foreign language, if one is involved in the international study opportunity. Brown program applications are reviewed by faculty committees. Prior approval of the Committee on Academic Standing is required for all students intending to study abroad on non-Brown programs not on the approved list for transfer credit. Prior approval of departments must also be secured for credit towards concentration.

Information and counseling about international study is provided by the OIP staff and student peer counsellors as well as by department advisers.

Students planning to study abroad should visit the OIP Resource Library, meet with an OIP advisor, and with their concentration advisor. Students may receive up to eight course credits for work undertaken during one academic year. Normally no more than four concentration credits will be allowed. Credit cannot be obtained until the student has successfully completed the work and obtained documentation of what has been accomplished. Approval for concentration credit must be obtained from the appropriate concentration advisor. This credit is usually granted after the student presents documentation including evidence of work completed in the course(s) to the departmental concentration advisor.

Official transcripts should be sent to the Registrar. When other forms of evaluation or other documentation are to be used, these should be brought by the student to the Office of International Programs. Students not on Brown sponsored programs may be asked to take such materials to faculty advisers for review and final approval.

For students not on Brown sponsored programs, validation of credit may be carried out on a course by course basis. If the nature and quality of a student's work in a specific course cannot be sufficiently determined on the basis of the available documentation, the department in question may give the student an oral or written validating examination. Validation should be completed as soon as possible after the student returns to Brown, normally no later than midsemester.

Time spent on study abroad does not apply to the four semester residency requirement for the degree. All students are asked to write to the Office of International Programs about returning to Brown. Such notification should be received no later than December 1 for return in the spring semester and no later than May 1 for return for the fall semester.

Credit may be awarded for summer study abroad, particularly for language study. Students considering this option should consult with the Office of International Programs.

## The Summer Session

Brown's Summer Session offers courses on campus and at international sites during the summer. Summer classes meet for six weeks; exams

and final work are completed during the seventh week of the program. Brown students take summer courses to enhance their degree work or to maintain their progress toward degree completion. Summer Session courses are open to all Brown students and to students from other institutions by application.

Governed by Faculty Rules, Brown's Summer Session maintains guidelines that are similar to those followed during the academic year. The courses are equivalent to academic year offerings, are approved by the College Curriculum Council, and, as of summer 2000, count toward official determination of academic standing.

Brown undergraduates may complete up to two courses in any given summer, and may apply a total of four summer courses toward their bachelor's degree (Brown Winter Session courses are also included in the 4 max allotment). Brown Summer Session courses at the 1000-level may count toward graduate degrees. A special Corporation rule allows undergraduates who have completed four Summer/Winter Session courses at Brown to request one semester of enrollment credit (*Note: This provision does not extend to students enrolled in the Five Year Brown-RISD Dual Degree Program*). Undergraduate fees for summer courses are set annually by the Corporation at a rate lower than the per-course fee during the academic year.

For more information, contact Brown's School of Professional Studies, Box T, Providence, RI 02912 (401) 863-7900, or visit [www.brown.edu/academics/summer-session/](http://www.brown.edu/academics/summer-session/).

Each year's Summer Session calendar is posted on the Brown Registrar's web site, <http://brown.edu/about/administration/registrar/home>, as well as at the site above.

## Brown Winter Session

In 2016-2017 Brown Launched a Wintersession pilot for Brown undergraduate degree candidates. In accordance with Brown Summer session rules, students can count no more than 4 summer/winter session courses and may also apply for a waiver of one semester of enrollment credit if 4 Brown Summer/Winter courses are completed (*Note: This provision does not extend to students enrolled in the Five Year Brown-RISD Dual Degree Program*).

For more information and guidelines as they relate to Brown's Wintersession please visit <https://www.brown.edu/academics/college/special-programs/wintersession/brown-wintersession>

## Curricular Programs

### Community-Based Learning and Research

Community-Based Learning and Research (CBLR) courses connect academic inquiry with real-world learning experiences, enabling students to integrate and transfer their learning to contexts beyond the classroom. CBLR-designated courses: (i) Involve collaboration with one or more community partners to investigate an important social challenge or problem; (ii) Incorporate in-depth community-based experiences (typically undertaken outside of the classroom) into the learning and/or research objectives of the course; (iii) Provide structured opportunities for reflecting on the relationship between classroom learning and real-world experience, with the goals of deepening the understanding of course content and exploring questions of identity, agency, and social responsibility; and (iv) Create products or outcomes that are shared with the community partner and/or broader public.

### DIAP Courses: Race, Gender, and Inequality

In support of the University's broader Diversity and Inclusion Action Plan, DIAP Courses on Race, Gender, and Inequality examine issues of structural inequality, racial formations and/or disparities, and systems of power.

They may investigate:

(i) the ways different forms of power and privilege construct racial and identity formations in the U.S. and/or globally; the cultural, political, and intellectual responses to this racialization;

(ii) the production of categories of ethnicity, race, gender, sexual orientation, class, religion, ability, citizenship status, and geography (and their intersections);

(iii) the structures, institutions, practices, and attitudes that enable, maintain, or mitigate domestic and/or global disparities in health, income, education outcomes, media representations, etc.; and/or

(iv) the production of knowledge and difference in the context of discourses on race, power, and privilege

A complete list of each semester's DIAP courses may be viewed in Courses@Brown by choosing "DIAP Courses: Race, Gender, Inequality" in the Curricular Programs field.

## First Year Seminars

First-year seminars ensure close contact between first-year students and faculty members while simultaneously offering a rigorous introduction to the concepts and methods of a particular subject area or department. Seminars have few if any prerequisites and are offered in all areas of the curriculum, from anthropology to physics to literary arts. Students receive regular feedback on the work they produce for the seminars, and seminar faculty often serve as informal mentors for their students long after the class has ended.

A complete list of each semester's seminars may be viewed in Courses@Brown by choosing "First-Year Seminar" in the Curricular Programs field. Registration for first-year seminars takes place during the summer prior to students' matriculation to Brown. Depending on availability, first-year students may also add seminars to their course schedules during pre-registration and shopping periods.

## Sophomore Seminars

Sophomore seminars bring together ideas, perspectives, and approaches that are not normally seen side by side in a given course or program. Embracing a range of intellectual perspectives, many of the seminars focus specifically on issues of social justice, identity, and difference. Limited to twenty students each, the seminars help students develop the skills, knowledge, and values they need to progress toward more advanced learning in a discipline or field.

A complete list of each semester's SOPH seminars may be viewed in Courses@Brown by choosing "Sophomore Seminar" in the Curricular Programs field.

## Writing-Designated Courses

Brown students are expected to work on writing in their general studies and in the concentration. Students may begin to fulfill this expectation by taking at least one course that carries the WRIT designation. WRIT courses are offered across the curriculum and help students develop the ability to write well in styles appropriate to different academic disciplines.

A complete list of each semester's WRIT courses may be viewed in Courses@Brown by choosing "Writing-Designated Courses" in the Curricular Programs field.

# The Graduate School

---

The Graduate School oversees graduate education at Brown University, which prepares students for distinguished careers in research, teaching, and as experts in the public and private sectors. Master's students are trained to assess information and trends in their fields and to create original works. Doctoral students perform research at the highest level, advancing knowledge in their fields.

The rigors of research, analysis, debate, performance, and publication prepare our graduates to help solve local, national, and international problems.

Brown University offers more than 80 graduate programs through the Graduate School. Brown has a friendly scale and collaborative culture. With more than 2,500 graduate students and more than 700 full-time faculty members, Brown offers exceptionally close mentoring in its doctoral and terminal master's programs.

The Graduate School website (<http://www.brown.edu/academics/gradschool>) serves as the primary source of information on doctoral programs (<http://www.brown.edu/academics/gradschool/phd-programs>) and master's programs (<http://www.brown.edu/academics/gradschool/masters-programs>) including a distinct page (also contained with this Bulletin) for each program in terms of application and completion requirements. The Graduate School website also explains the general application (<http://www.brown.edu/academics/gradschool/application-information>) process as well as provides the link to the online application.

Information on general rules and regulations (<https://www.brown.edu/academics/gradschool/academics/rules-regulations>) are detailed on the Graduate School site. The Graduate School Handbook, dissertation guidelines, and master's thesis guidelines can all be found in that section. Additional regulations with regards to overall requirements and tuition regulations can also be found on the Office of the Registrar's (<http://www.brown.edu/about/administration/registrar/degree-guidelines-0/graduate-school>) website.

# The Division of Biology and Medicine

The Division of Biology and Medicine is home to five academic departments, fourteen clinical departments, and is affiliated with seven diverse teaching hospitals (<http://brown.edu/academics/medical/about/hospitals>) in and around Providence. At the Division's core is the Warren Alpert Medical School and the five academic departments in Biology (which includes study at the undergraduate and graduate levels).

For more information on Brown's many research centers, institutes, programs, and other initiatives in the health and life sciences found within the Division of Biology and Medicine, please visit <http://biomed.brown.edu/research/cip>.

For further summary information on the academic units within the Division, please follow the below links:

- The Warren Alpert Medical School of Brown University (p. 89)
- Biology (Undergraduate) (p. 103)
- Biology (Graduate) (p. 122)
- Neuroscience (p. 128)

## The Warren Alpert Medical School of Brown University

### Dean

Jack A. Elias

### Admissions

Students interested in the study of medicine at the Warren Alpert Medical School of Brown University may apply through a variety of admission routes designed to create a highly qualified and diverse medical student body.

The majority of the 120 matriculants in the first-year class apply through the American College Application Service (AMCAS). Approximately (40%) of the first-year class enroll from Brown's eight-year combined Bachelor's-medical degree Program in Liberal Medical Education. These students are joined by students entering through special programs at institutions with which the medical school has formed linkages (postbaccalaureate and early identification). These admission routes are described below.

### AMCAS Admission

Qualified students or graduates of accredited colleges or universities in the United States or Canada may apply to Alpert Medical School (AMS) through the AMCAS route. Individuals must first complete and submit the electronic AMCAS application, found on the website of the American Association of Medical Colleges (<https://www.aamc.org>), and indicate that they wish to apply to the Warren Alpert Medical School of Brown University. Applicants must also complete a web-based secondary application (forwarded by AMS Office of Admissions) and submit an application fee to be considered an eligible candidate for admission.

The AMCAS applicant pool for the most recent entering class (MD 2016) was competitive, with over 3300 applicants vying for 57 seats (of 120). The applicant pool was impressive in geographic scope and size, including residents of 49 states, the District of Columbia, the Commonwealth of Puerto Rico, and a number of foreign countries (predominantly Canada, China, and South Korea).

Additional information and related admission requirements may be found at <http://www.brown.edu/academics/medical/admission>. The Office of Admissions may be contacted by email ([MedSchool\\_Admissions@brown.edu](mailto:MedSchool_Admissions@brown.edu)) or telephone (401) 863-2149. Letters and other correspondence should be mailed to the Office of Admissions, Box G-M, Brown University, Providence, RI 02912-9706.

### Program in Liberal Medical Education (PLME)

The Program in Liberal Medical Education is an eight-year continuum of liberal arts and medical education leading to both the bachelor's and M.D. degrees. The PLME is open to high school graduates who have applied to and are simultaneously admitted to Brown for their undergraduate studies. The PLME seeks highly qualified and strongly motivated high school students who are committed to a career in medicine at an early age and who also wish to pursue another area of academic interest to an advanced level of scholarship within the framework of a broad liberal education.

From a large (approximately 2,000) and highly qualified applicant pool, roughly 50 students matriculate annually. For additional information regarding the PLME, access the website at <http://www.brown.edu/academics/medical/plme/> or contact the College Admission Office, Brown University, Box 1876, Providence, RI 02912-9706; (401) 863-2378.

### Postbaccalaureate Linkage Programs

The Postbaccalaureate (PB) Linkages are cooperative ventures between Alpert Medical School and the Premedical PB Programs at Bryn Mawr College, Columbia University, Johns Hopkins University, and Goucher College. Postbaccalaureate students enrolled in these programs may be offered admission to the medical school during the spring semester of their first year of study, thus allowing them to enter the medical school in the next class.

Selection occurs by a nomination process in which the premedical advisor selects candidates meeting established eligibility criteria (e.g., age, postbac grade point average). The number of PB students in each medical school class depends upon the number of places available as well as the caliber of the applicant pool. PB students nominated for admission must apply to AMCAS and complete an AMS secondary application. The MCAT is not required for admission. Timelines for this process are distributed to PB Program Directors on a yearly basis. Completed applications are reviewed by a subcommittee of the Admissions Committee, which selects nominees for interviews. The interviews follow the same protocol as that for AMCAS applicants and the same evaluation form is used.

### The Early Identification Program (EIP)

The Early Identification Program (EIP) provides selected students at cooperating institutions with a place at Alpert Medical School upon continued academic progress and college graduation. This route provides opportunities for a medical career to two groups:

- Rhode Island residents enrolled at Providence College, Rhode Island College, and the University of Rhode Island; and
- Students enrolled at Tougaloo College, a historically black, liberal arts institution in Mississippi.

Eligible students are identified by their premedical advisor in the sophomore year of college, participate in selected PLME activities, and enroll in medical school after receiving the bachelor's degree. Generally, up to two students may be admitted annually from each school. For more information and application procedures, please contact the premedical advisor at the participating institutions. For more information access the website at <http://www.brown.edu/academics/medical/admission/other-routes-of-admission>

### Definition of Rhode Island Residency for Medical School Admission

An individual is considered a Rhode Island resident if he or she graduated from a Rhode Island high school and if the individual's parent(s) have lived in Rhode Island for the previous two calendar years, as documented by federal tax returns. For dependent students, the custodial parent(s) must claim the student as a dependent on his or her federal tax returns for the prior two years. Individuals who are independent (i.e., not living with parents and filing individual federal tax returns for the previous two years) must have at least one parent residing in Rhode Island for the previous two years, as documented by federal tax returns.

### Selection Factors

Students admitted to Alpert Medical School must attain competence in the sciences basic to medicine at a sufficient level to provide adequate

preparation for medical school. Applicants are expected to demonstrate competence by successfully completing the following premedical course requirements at a college or university in the United States or Canada: one semester of organic chemistry; and two semesters of physics, inorganic chemistry, and social and behavioral sciences. The Medical College Admission Test (MCAT) is required for AMCAS route applicants.

All applicants are selected on the basis of academic achievement, faculty evaluations, evidence of maturity, motivation, leadership, integrity, and compassion. For the PLME, Brown seeks highly qualified and strongly motivated students who wish to pursue an area of academic interest to an advanced level of scholarship within the framework of a liberal premedical education.

In order to be eligible for consideration, candidates must present a minimum cumulative grade point average of 3.00 (on a 4.00 scale) in courses taken as a matriculated student at an undergraduate college. Applicants who have attended graduate school must achieve a cumulative grade point average of 3.00 (on a 4.00 scale) in courses taken in graduate school. Applicants must have completed requirements for the baccalaureate degree before matriculating into the medical school. All applicants must be capable of meeting the competency requirements expected of all graduates. Technological compensation can be made for some disabilities in certain competency requirements. Candidates accepted for admission who will need special accommodations cannot be admitted unless those supportive services are available, as determined by the Dean of Medicine and Biological Sciences. The processes for assessing whether applicants will be able to meet the competency requirements for the M.D. degree are described in *Technical Standards for Medicine*, listed below.

In keeping with the mission of Brown University, the office of admissions recognizes the importance of diversity to the success of the medical school. Dimensions of diversity include, but are not limited to: race, ethnicity, religious affiliation, gender identity, sexual orientation, veteran status, age, socioeconomic status and geographic background. Multicultural perspectives enrich educational understanding, improve outreach to the community, enhance trust and communication, and facilitate development of culturally appropriate clinical and research programs.

## Technical Standards for Medicine

### **Process for Assessing Whether Applicants Meet Technical Standards for Medicine:**

1. No inquiry will be made on the application forms concerning disability. Brown's policies regarding technical abilities and skills necessary to meet the competency requirements are included with the letter of admission, and students are asked at that time to contact the Associate Dean for Medical Education if they have any concerns about their ability to meet these standards.
2. Applicants who are identified as having a disability through volunteered information, supporting credentials, or interviews will have an assessment of their ability to meet competency requirements only after a determination is made of their admissibility to the medical program.
3. Those applicants with disabilities deemed admissible to the Medical School will be requested to have submitted on their behalf appropriate documentation in regard to the disability from a qualified health professional. The health professional will be asked to provide an opinion on the candidate's ability to meet the competency requirements for the M.D. degree. The applicant may also be requested to respond to that question.
4. The responses will be submitted to a committee appointed by the Dean of Medicine and Biological Sciences. This committee may ask for a review of the supporting documentation by appropriate members of the faculty in regard to the applicant's meeting the competency requirements. The committee will ascertain what accommodations, if any, the medical program would need to make in order that the applicant might be able to meet the competency requirements, and assess the feasibility of any needed accommodations.
5. The committee will review the information received to determine if the applicant will be able to meet the competency requirements, with

reasonable accommodations on the part of the medical program, if necessary.

6. The committee will recommend to the Dean of Medicine and Biological Sciences acceptance of applicants who can meet the competency requirements or will recommend nonacceptance if they cannot.

### **Process for Assessing Student's Ability to Continue in the Medical School Should Disability Occur After Matriculation at Brown University:**

1. A student who develops a disability after matriculation at Brown University may be identified to the Medical Student Affairs Office through a variety of sources, e.g., reporting of accident or illness by peers, family, friends, or faculty and subsequent follow-up with health professionals managing the care.
2. If the degree to which the student has become disabled raises questions related to meeting the competency requirements after a review by the Associate Dean for Medical Education, a meeting of an ad hoc committee will be set up to discuss the situation. The student will be asked to meet with the committee members, unless the disability is so severe that the student needs to be represented by another individual. In some cases, it might be more appropriate to have a health professional, not directly involved in the care, serve as a consultant to the committee on the issues surrounding the disability.
3. The ad hoc committee will develop a recommendation as to the student's ability to successfully pursue a medical education based on his or her ability to meet the competency requirements of the medical program. These educational accommodations will be discussed with the appropriate course directors to be certain that there is agreement on how the student will be managed. If facilities accommodations are recommended, the committee will discuss these with the appropriate individuals to be certain that the needs for the disabled student can be provided. The committee's recommendations will be discussed with the student or his or her representative in the event that the student cannot attend.
4. When the recommendation is that the disabled student can meet the medical program's competency requirements, the committee will develop a report on any educational program accommodations that, if made, will still meet the competency requirements.
5. Should the decision of the committee be to recommend to the dean that the student be dropped from enrollment in the medical program, the normal due process appeals mechanism will be in effect, and the Student Affairs Office will work with the individual as appropriate on potential alternative career options. For students in the Program in Liberal Medical Education continuum, being dropped from the program due to inability to meet competency requirements for medical education does not necessitate the withdrawal of the student from the undergraduate college if that phase of the student's education has not been completed.

## Advanced Scholarship

Medical students who wish to earn an advanced degree (M.A., Sc.M., M.P.H., Ph.D.), must meet the requirements of the Graduate School. Numerous academic departments at Brown offer graduate programs. All graduate studies are carried out under the supervision of a faculty member of a graduate program at Brown University and are subject to the specific requirements of that program in addition to the general guidelines given below. Students should discuss their interests and goals with a director of a graduate program in planning any study that might lead to an advanced graduate degree.

## Educational Programs

### Program in Liberal Medical Education

The Program in Liberal Medical Education (PLME) offers a unique opportunity to combine undergraduate education and professional studies in medicine into an eight-year program.

The PLME is not an accelerated medical program. Rather, it encourages students to take advantage of the breadth of a liberal arts education, to

take charge of their education, and to become active learners. At Brown, creative students need not sacrifice the benefits of a rich liberal arts education in order to gain admission to medical school.

The PLME provides great flexibility in curriculum planning. During the early years, students take courses related to their chosen concentration and to obtain a broad liberal education. In addition, students take courses designed to meet the competencies required for admission to Alpert Medical School. This begins with courses in the natural, social and behavioral sciences, and mathematics, which provide a foundation for later medical science and clinical courses.

Students may choose to work towards an A.B. or Sc.B. degree in the sciences, or to fulfill the requirements for an A.B. in the humanities, social sciences or behavioral sciences. Several interdisciplinary concentrations such as Public Policy and International Relations are also available. The expected duration of the program is eight years. The last four years of the program culminate in the M.D. degree.

Brown's entire faculty is available to PLME students. This access to faculty throughout the University fosters collaborative teaching and research among scholars and students from widely divergent disciplines. Although the program is characterized by the unique breadth of educational opportunities available to students, it has great strength in the conventional biomedical sciences accompanied by in depth research opportunities as well.

## The Medical Curriculum

The Alpert Medical School curriculum has been designed and implemented with the intention of creating an integrated, contemporary, compassionate, and flexible program of learning for our students. Our approach to medical education is predicated on the vision that tomorrow's physician must be a lifelong learner who is scientifically and clinically enlightened, patient and service-centered, and who understands the economic underpinnings of the US health care system. Our goal is to train physicians who will provide informed and compassionate care while at the same time serving as leaders and change agents for the health care system. To achieve the latter goal, we aim to train physicians who will be leaders at all levels.

These educational goals are pursued through a curriculum with the following structure. During Years 1 and 2, students enroll in four sequential semesters of Integrated Medical Sciences (IMS-I through -IV) and Doctoring-I through -IV. The elective Scholarly Concentrations Program is introduced to students during Year 1. Year 3 allows students to explore core disciplines and related specialties through the completion of required clerkships in medicine, surgery, pediatrics, obstetrics & gynecology, psychiatry, and family medicine. The transition from the third year to the fourth year takes place in May, after which time students have the opportunity to develop a program of elective rotations aimed at finalizing a career choice, and obtaining and preparing for a residency in their chosen field.

Alpert Medical School continues to employ a competency-based curriculum that was officially launched in 1996 for the graduating MD Class of 2000. The rationale behind the competency-based curriculum stems from the need to define the outcomes of the educational process: what are the desirable qualities of a medical school graduate, and what constitutes the essential knowledge base that will enable a graduate to make a successful transition to his or her chosen medical field?

All students are expected to gain competency in the Nine Abilities (see below) and knowledge base by graduation. Each course within the core curriculum of the Medical School identifies which abilities and parts of the knowledge base it addresses. Students may also meet the competency requirements through individualized study, group independent study projects (GISPs), or alternative courses that might be arranged as part of collaborative learning opportunities.

### Nine Abilities:

1. Effective communication
2. Basic clinical skills
3. Using basic science in the practice of medicine
4. Diagnosis, prevention, and treatment
5. Lifelong learning

6. Professionalism
7. Community health promotion and advocacy
8. Moral reasoning and clinical ethics
9. Clinical decision making

## MD/PhD Program

Students interested in careers in academic medicine may want to consider dual MD/PhD training. Applications are only accepted from current PLME and Alpert Medical School students. Other interested individuals must apply to the MD program (<http://brown.edu/academics/medical/admission>). Consideration for PhD training will take place during years 1, 2 or 3 of medical school.

Our approach to dual MD/PhD training offers curriculum flexibility. Students may begin their graduate work after Year 2 or Year 3 of medical school. Components of the requirements for the MD may be incorporated into the graduate years, and graduate work can provide partial fulfillment of the Year 4 requirements for the MD.

PLME students in their undergraduate years and medical students in years 1, 2 or 3 must meet with the Associate Dean for Medical Education to discuss entry into the MD/PhD program. Selection is based on past research accomplishments, a clear commitment to a research career, and academic achievement at Brown. Students without substantial research experience will be advised to garner such experience before making an application to the program. Applications will be considered not only by the Associate Dean but also by representatives of the graduate program(s) of interest to the student.

Learn more about the MD/PhD Program (<https://www.brown.edu/academics/medical/education/other-programs/md-phd>) at : <https://www.brown.edu/academics/medical/education/other-programs/md-phd/>

## MD/MPH Program

Students interested in the MD/MPH program must apply separately to Alpert Medical School and to Brown University's Graduate School. Regardless of the route of admission to the medical school— PLME, Standard, EIP, Postbaccalaureate, Advanced Standing—all students are eligible to apply for the MPH during the first three years at the Alpert Medical School.

There is no formal path for non-Brown medical students to enroll in the 5-year MD/MPH Program. However, medical students from other schools are welcome to apply to the MPH Program through the standard route and they may request that up to 4 courses from their medical school curriculum count toward the MPH degree.

Learn more about the MD/MPH Program (<https://www.brown.edu/academics/public-health/mph/dual-degrees>) at: <https://www.brown.edu/academics/public-health/mph/dual-degrees>

## MD/MPA Program

Brown University, the Warren Alpert Medical School, and the Master of Public Affairs (MPA) at the Watson Institute have developed a dual-degree program aimed at creating the next generation of leaders in medicine and health care policy.

### About the Joint Degree

The MD/MPA program is a joint, integrated, four-year program in which select students receive both a Doctorate of Medicine (MD) and a Master of Public Affairs (MPA). This is the first integrated program of its kind in the U.S., where students are able to complete their degree program in four years and take courses taught by both medical school and public policy faculty. *You can earn your Master of Public Affairs without adding another year to your MD studies.*

In this program you will:

- Learn how to analyze the intersections of medicine and public policy;
- Be prepared to take leadership positions in government, both nationally and internationally, research centers, or health care delivery organizations, and
- Gain the knowledge, skills and content expertise necessary to lead health care policy change in a rapidly evolving health care system.

Learn more about the MD/MPA (<https://www.brown.edu/graduateprograms/mdmpa>) Program at: <https://www.brown.edu/graduateprograms/mdmpa>

## Primary Care - Population Medicine Combined MD-ScM Program

The Primary Care-Population Medicine (PC-PM) program is an innovative, dual-degree curriculum that focuses on preparing students for a career in medicine while providing comprehensive, longitudinal training in population medicine.

The program will prepare medical students for leadership roles in health care on the local, state, or national level in areas ranging from primary care clinical service to research, education, and health policy.

This four-year program, **the first of its kind in the United States**, results in the awarding of both a Doctor of Medicine and a Master of Science in Population Medicine.

Learn more about the Primary Care - Population Medicine Combined MD-ScM Program (<https://www.brown.edu/academics/medical/education/other-programs/primary-care-population-medicine>) at: <https://www.brown.edu/academics/medical/education/other-programs/primary-care-population-medicine/>

## SCM in Medical Physics

Medical Physics is one of the select non-MD specialties recognized by the American Board of Medical Specialties. Medical Physicists contribute to maintaining and improving the quality, safety and cost-effectiveness of healthcare services through patient-oriented activities requiring expert action, and optimized clinical use of medical devices, such as CT and MRI scanners, linear accelerators, and treatment planning systems, including patient risk and protection.

Activities are based on current best evidence or the Medical physicists' own scientific research when the available evidence is not sufficient. The career path eventually leads to residency training and certification by the American Board of Radiology.

Students will write a publishable thesis and engage in practical experience, both of which are essential to securing a residency. This is also the key metric of success for students and ultimately the program, in addition to students' academic success beyond residency and board certification. In addition, the program will be distinctive in that students will have a full semester to undertake their research and work closely with faculty.

Learn more about the SCM in Medical Physics Program at: <https://www.brown.edu/med-physics-graduate-program/>

## Brown Gateways to Medicine, Health Care, and Research

The Gateways Program at the Warren Alpert Medical School of Brown University provides academically promising, motivated students new pathways to careers in the health sciences. Small class sizes and a robust mentoring system mean you'll get individualized attention as you pursue your academic and career goals.

Through **Gateways**, you can:

- Improve your credentials for entry into medical school or other health professional schools;
- Gain a solid foundation in the basic science coursework typically undertaken by first-year medical students; and
- Test your aptitude for a variety of careers in health sciences.

Learn more about the Gateways Program (<https://www.brown.edu/academics/medical/education/other-programs/gateways>) at : (<https://www.brown.edu/academics/medical/education/other-programs/gateways/master-science-medical-sciences>) <https://www.brown.edu/academics/medical/education/other-programs/gateways/>

**The Gateways Program offers two courses of study:**

## Master of Science in Medical Sciences

In this one-year, full-time program, you will complete 8.5 required courses culminating in a Master of Science (ScM) in Medical Sciences from Brown University. Courses include all four of the basic science courses and two of the three organ system courses undertaken by first-year medical students at Alpert Medical School. You'll also complete a unique seminar course series about pressing issues in today's health care system, such as social determinants of disease, population health, interdisciplinary teamwork, quality improvement, and health care communication. Integrated into this course series will be a longitudinal service learning experience at a community healthcare site and an associated community-based capstone project.

Learn more about the ScM in Medical Sciences program (<https://www.brown.edu/academics/medical/education/other-programs/gateways/master-science-medical-sciences>) at: <https://www.brown.edu/academics/medical/education/other-programs/gateways/master-science-medical-sciences>

## Certificate in Medical Science

For this one-year certificate program, you will complete 6 required courses: all four of the basic science courses and two of the three organ system courses undertaken by first-year medical students at Alpert Medical School. You'll also have the freedom to independently pursue other areas of interest during this academic year, including part-time research opportunities and/or a 3-week, full-time immersion experience.

Learn more about the Certificate in Medical Science program (<https://www.brown.edu/academics/medical/education/other-programs/gateways/certificate-medical-science>) at: <https://www.brown.edu/academics/medical/education/other-programs/gateways/certificate-medical-science>.

For additional information regarding Alpert Medical School please visit the website at: <http://brown.edu/academics/medical/>

## Courses

### Biology

**BIOL 3001. Clerkship in Medicine.**  
Twelve weeks.

**BIOL 3005. Clerkship in Medicine - LIC.**  
No description available.

**BIOL 3010. Systemic Pathology.**  
First-semester systemic pathology course building on the general principles of disease introduced in general pathology IMS-1. Objectives include learning the classification of systemic disease according to basic pathological mechanisms, describing and explaining the functional and structural changes produced by the most common diseases, and enhancing the ability to diagnose and treat patients. Runs in parallel with pathophysiology BIOL 3500; covers four organ system segments: cardiovascular, renal, and pulmonary and supporting structures.

**BIOL 3015. Individualized Clerkship in Medicine.**  
No description available.

**BIOL 3020. Nephrology.**  
No description available.

**BIOL 3025. Longitudinal in Renal Disease.**  
No description available.

**BIOL 3030. Clinical Nephrology.**  
No description available.

**BIOL 3035. Clinical Nephrology.**  
No description available.

**BIOL 3040. Clinical Dermatology.**  
No description available.

**BIOL 3050. Gastroenterology.**  
No description available.

**BIOL 3060. Gastroenterology.**

No description available.

**BIOL 3065. Infectious Disease.**

No description available.

**BIOL 3070. Infectious Disease.**

No description available.

**BIOL 3073. Infectious Disease - Newport.**

No description available.

**BIOL 3075. Infectious Disease.**

No description available.

**BIOL 3080. HIV/AIDS.**

No description available.

**BIOL 3090. Allergy and Clinical Immunology Seminar.**

The pathophysiology, diagnosis, and treatment of allergic and immunological diseases. Particularly addresses the following diseases: asthma, rhinitis, sinusitis, urticaria, anaphylaxis, primary immunodeficiencies, food allergy, allergic reactions to medications, atopic eczema and insect-sting allergy. Molecular, cellular, and genetic components of allergy and other immunologic inflammation guide consideration of the diagnosis, clinical management, and prevention of allergic and other immunological diseases.

**BIOL 3100. Cardiology.**

No description available.

**BIOL 3110. Clinical Adult Cardiology.**

No description available.

**BIOL 3120. Coronary Care Unit.**

No description available.

**BIOL 3130. Community General Cardiology.**

No description available.

**BIOL 3140. Cardiology.**

No description available.

**BIOL 3165. Med/Peds Infectious Diseases.**

No description available.

**BIOL 3170. Urgent Care.**

No description available.

**BIOL 3180. Hospice and Palliative Medicine.**

No description available.

**BIOL 3190. Palliative Care - RIH.**

No description available.

**BIOL 3200. Tropical Medicine in East Africa.**

No description available.

**BIOL 3205. International Critical Care at Tuebingen.**

No description available.

**BIOL 3207. International Exchange in Japan.**

No description available.

**BIOL 3210. Hospice and Palliative Medicine.**

No description available.

**BIOL 3215. Internal Medicine Night Float.**

No description available.

**BIOL 3220. Endocrinology.**

No description available.

**BIOL 3230. Hematology Oncology.**

No description available.

**BIOL 3240. Clinical Hematology/Oncology.**

No description available.

**BIOL 3260. Hematology Oncology.**

No description available.

**BIOL 3270. Hematology.**

No description available.

**BIOL 3280. Allergy.**

No description available.

**BIOL 3290. Pulmonary Diseases.**

No description available.

**BIOL 3300. Pulmonary Diseases.**

No description available.

**BIOL 3310. Pulmonary Diseases.**

No description available.

**BIOL 3315. Pulmonary - Inpatient - MH.**

No description available.

**BIOL 3320. Pathophysiological Concepts in Internal Medicine.**

No description available.

**BIOL 3325. Critical Care Elective.**

No description available.

**BIOL 3326. Concussion and Brain Injury Rehabilitation.**

No description available.

**BIOL 3330. Subinternship in Medicine.**

No description available.

**BIOL 3331. Subinternship in Medicine - MH.**

No description available.

**BIOL 3332. Subinternship in Medicine - MHRI.**

No description available.

**BIOL 3333. Subinternship in Medicine - RIH.**

No description available.

**BIOL 3334. Subinternship in Medicine - VAMC.**

No description available.

**BIOL 3340. Subinternship in Medical Intensive Care (MICU).**

No description available.

**BIOL 3350. Subinternship in Critical Care Medicine.**

No description available.

**BIOL 3370. Subinternship in Intensive Care Medicine (ICU).**

No description available.

**BIOL 3390. Psychiatry in Medical Practice.**

No description available.

**BIOL 3400. Medical Consultation - OB/Gyn.**

No description available.

**BIOL 3405. Medical Consult in OB/Gyn and Periop Med.**

No description available.

**BIOL 3410. Internal Medicine in the Dominican Republic.**

No description available.

**BIOL 3415. Clinical Medicine in Nicaragua.**

No description available.

**BIOL 3420. Physical Medicine + Rehabilitation.**

No description available.

**BIOL 3460. College Health Longitudinal.**

No description available.

**BIOL 3470. Issues Concerning Deaf Patients in Healthcare.**

Students will gain understanding of the basics of communication with and among the Deaf, including ASL, lip-reading, current technologies, and the use of interpreters.

**BIOL 3480. Nuclear, Biological, Chemical Weapons of Mass Destruction Domestic Preparedness Training Seminar.**

No description available.

**BIOL 3490. Cardiology.**

No description available.

**BIOL 3500. Cardiovascular Medicine - Outpatient and Inpatient Practice.**

No description available.

**BIOL 3505. Medical and Interventional Pain Management.**

No description available.

**BIOL 3510. Clinical Reasoning and Human Errors in Medicine.**

No description available.

**BIOL 3551. Advanced Clinical Mentorship in Renal.**

No description available.

**BIOL 3552. Advanced Clinical Mentorship in Dermatology.**

No description available.

**BIOL 3553. Advanced Clinical Mentorship in Cardiology.**

No description available.

**BIOL 3554. Advanced Clinical Mentorship in Endocrinology.**

No description available.

**BIOL 3555. Advanced Clinical Mentorship in Med/Peds Primary Care.**

No description available.

**BIOL 3556. Advanced Clinical Mentorship in Infectious Disease.**

No description available.

**BIOL 3557. Advanced Clinical Mentorship in Comprehensive HIV Care.**

No description available.

**BIOL 3558. Advanced Clinical Mentorship in Adult Oncology.**

No description available.

**BIOL 3559. Advanced Clinical Mentorship in Hematology/Oncology.**

No description available.

**BIOL 3560. Advanced Clinical Mentorship in Pulmonary Disease.**

No description available.

**BIOL 3561. Advanced Clinical Mentorship in Rheumatology.**

No description available.

**BIOL 3562. Advanced Clinical Mentorship in Internal Medicine.**

No description available.

**BIOL 3563. Advanced Clinical Mentorship in Gastroenterology.**

No description available.

**BIOL 3564. Advanced Clinical Mentorship in Functional Neurosurgery.**

No description available.

**BIOL 3565. Advanced Clinical Mentorship in Neurology.**

No description available.

**BIOL 3566. Advanced Clinical Mentorship in Orthopedic Surgery.**

No description available.

**BIOL 3567. Advanced Clinical Mentorship in Anesthesiology.**

No description available.

**BIOL 3568. Advanced Clinical Mentorship in Ophthalmology.**

No description available.

**BIOL 3569. Advanced Clinical Mentorship in Surgery.**

No description available.

**BIOL 3570. Advanced Clinical Mentorship in Pediatric Surgery.**

No description available.

**BIOL 3571. Advanced Clinical Mentorship in Urology.**

No description available.

**BIOL 3572. Advanced Clinical Mentorship in Hand Surgery.**

No description available.

**BIOL 3573. Advanced Clinical Mentorship in ENT.**

No description available.

**BIOL 3574. Advanced Clinical Mentorship in Pancreatic Surgery.**

No description available.

**BIOL 3575. Advanced Clinical Mentorship in Pediatric Neurology.**

No description available.

**BIOL 3576. Advanced Clinical Mentorship in Pediatrics.**

No description available.

**BIOL 3577. Advanced Clinical Mentorship in OB/Gyn.**

No description available.

**BIOL 3578. Advanced Clinical Mentorship in Outpatient Psychiatry.**

No description available.

**BIOL 3579. Advanced Clinical Mentorship in Child Psychiatry.**

No description available.

**BIOL 3580. Advanced Clinical Mentorship in Clinical Rehabilitation Medicine.**

No description available.

**BIOL 3581. Advanced Clinical Mentorship in Emergency Medicine.**

No description available.

**BIOL 3582. Advanced Clinical Mentorship in Pediatric Emergency Medicine.**

No description available.

**BIOL 3583. Advanced Clinical Mentorship in Family Medicine.**

No description available.

**BIOL 3584. Advanced Clinical Mentorship Vascular and Interventional Radiology.**

No description available.

**BIOL 3585. Advanced Clinical Mentorship in Radiation Oncology.**

No description available.

**BIOL 3586. Advanced Clinical Mentorship Independent Study.**

No description available.

**BIOL 3587. Advanced Clinical Mentorship in Primary Care/Behavioral Medicine.**

No description available.

**BIOL 3588. Advanced Clinical Mentorship in Plastic Surgery.**

No description available.

**BIOL 3589. Advanced Clinical Mentorship in Refugee Health.**

No description available.

**BIOL 3590. Advanced Clinical Mentorship in Radiology.**

No description available.

**BIOL 3591. Advanced Clinical Mentorship in Pediatric Endocrinology.**

No description available.

**BIOL 3592. ACM in Pathology.**

No description available.

**BIOL 3640. Doctoring 1.**

No description available.

**BIOL 3641. Integrated Medical Sciences I.**

No description available.

**BIOL 3642. IMS 1 - Scientific Foundations of Medicine.**

No description available.

**BIOL 3643. IMS-1 Histology.**

No description available.

**BIOL 3644. IMS-1 Human Anatomy I.**

No description available.

**BIOL 3645. IMS-1 General Pathology.**

No description available.

**BIOL 3650. Doctoring 2.**

No description available.

**BIOL 3651. Integrated Medical Sciences II - Comprehensive.**

No description available.

**BIOL 3652. IMS-2 Brain Sciences.**

No description available.

**BIOL 3653. IMS-2 Microbiology/Infectious Diseases.**

No description available.

**BIOL 3654. IMS-2 Endocrine Sciences.**

No description available.

**BIOL 3655. Human Anatomy II.**

No description available.

**BIOL 3656. Health Systems Science.**

No description available.

**BIOL 3657. Health Systems and Policy II.**

No description available.

**BIOL 3660. Doctoring 3.**

No description available.

**BIOL 3661. Integrated Medical Sciences III - Comprehensive.**

No description available.

**BIOL 3662. IMS-3 Cardiovascular.**

No description available.

**BIOL 3663. IMS-3 Pulmonary.**

No description available.

**BIOL 3664. IMS-3 Renal.**

No description available.

**BIOL 3665. IMS-II Supporting Structures.**

No description available.

**BIOL 3666. Integrated Medical Sciences III - Systemic Pathology.**

No description available.

**BIOL 3667. Integrated Medical Sciences III - System-Based Pharmacology.**

No description available.

**BIOL 3670. Doctoring 4.**

No description available.

**BIOL 3671. Integrated Medical Sciences IV - Comprehensive.**

No description available.

**BIOL 3672. IMS-4 Hematology.**

No description available.

**BIOL 3673. IMS-4 Gastroenterology.**

No description available.

**BIOL 3674. IMS-3 Human Reproduction.**

No description available.

**BIOL 3675. Integrated Medical Sciences IV - Systemic Pathology.**

No description available.

**BIOL 3676. Integrated Medical Sciences IV - System-Based Pharmacology.**

No description available.

**BIOL 3691. System-Based Pharmacology.**

No description available.

**BIOL 3750. Neurology.**

No description available.

**BIOL 3760. Clinical Neurology.**

No description available.

**BIOL 3770. Clinical Neurology.**

No description available.

**BIOL 3775. Subinternship in Neurocritical Care.**

No description available.

**BIOL 3780. Comprehensive Elective in Neurology.**

No description available.

**BIOL 3785. Subinternship in Neurology.**

No description available.

**BIOL 3790. Aging and Dementia.**

No description available.

**BIOL 3795. Elective Clerkship in Neurology.**

No description available.

**BIOL 3800. Neurosurgery.**

No description available.

**BIOL 3815. Subinternship in Neurosurgery.**

No description available.

**BIOL 3890. Culture, Patient, Advocacy and the Community.**

This course focuses on the knowledge, skills, and attitudes required for effective patient advocacy with an emphasis on the role of culture in developing advocacy partnerships with patients, families, peers and community service providers. Specifically, it examines the relationships between race, ethnicity, social factors, economic factors and health status indicators. The course will provide opportunities to build self-awareness, to develop greater insight into the social and community contexts of health care and patient advocacy, and to refine physician-patient communication skills.

**BIOL 3900. Core Clerkship in Surgery.**

Six weeks.

**BIOL 3905. Individual Clerkship in Surgery.**

No description available.

**BIOL 3910. Introduction to Surgical Oncology.**

No description available.

**BIOL 3915. Clerkship in Surgery - LIC.**

No description available.

**BIOL 3920. Surgery of the Alimentary Tract.**

No description available.

**BIOL 3930. Physical Medicine and Rehabilitation.**

No description available.

**BIOL 3940. Subinternship in Surgical Intensive Care (SICU).**

No description available.

**BIOL 3950. Outpatient Management of Musculoskeletal Problems.**

No description available.

**BIOL 3960. Orthopedic Surgery.**

No description available.

**BIOL 3965. Physical Medicine and Rehabilitation (PM&R): Outpatient.**

No description available.

**BIOL 3970. Orthopedic Surgery in the Community.**

No description available.

**BIOL 3975. Primary Care Orthopedics.**

No description available.

**BIOL 3980. Hand and Upper Extremity Surgery.**

No description available.

**BIOL 3985. Orthopedic Surgery and Sports Medicine.**

No description available.

**BIOL 3990. Pediatric Orthopedic Surgery.**

No description available.

**BIOL 4000. Outpatient Orthopedics.**

No description available.

**BIOL 4010. Anesthesiology.**

No description available.

**BIOL 4011. Anesthesiology - MH.**

No description available.

**BIOL 4012. Anesthesiology - RIH.**

No description available.

**BIOL 4013. Anesthesiology - WIH.**

No description available.

**BIOL 4020. Pediatric Anesthesiology.**

No description available.

**BIOL 4025. Subinternship in Anesthesiology.**

No description available.

**BIOL 4030. Ophthalmology.**

No description available.

**BIOL 4040. Ophthalmology in a Missionary Hospital.**

No description available.

**BIOL 4070. Ophthalmology.**

**BIOL 6501. Medical Chinese Elective.**

Students will attain a working knowledge of Chinese relevant to medical practice in order to better communicate with and serve Chinese-speaking patients. Open to students who are proficient in the Mandarin dialect of Chinese.

**BIOL 6502. Intermediate Medical Spanish.**

The course is designed for students to gain beginning-level competence in Medical Spanish that will enable them to communicate more effectively with Spanish-speaking patients and their families. Specifically, the students will develop critical Spanish lexicon and language skills for conducting the medical interview. Prerequisite: Background in Spanish. Grading: S/NC

**BIOL 6503. Poverty, Health and Law.**

No description available.

**BIOL 6504. Health Care in America.**

No description available.

**BIOL 6505. Introduction to Multidisciplinary Fetal Medicine.**

An 8-session elective seminar for 2nd year medical school students. Emphasis is placed on the multidisciplinary approach to medical problems. The course concentrates on those conditions for which fetal and/or neonatal intervention may be indicated, from gene therapy to fetal surgical intervention.

**BIOL 6506. Science and Power: A Bioethical Inquiry.**

No description available.

**BIOL 6507. Elective in Mindfulness Training.**

No description available.

**BIOL 6508. Gender and Sexuality in Healthcare: Caring for All Patients.**

The goal of the course is to provide medical students with the knowledge needed to effectively and competently work with a growingly diverse patient (and colleague) population. Contemporary medical school curricula are lacking in the instruction and discussion of patients of all genders and sexualities. This elective will address this need. The course will consist of eight 2-hour sessions, with guest speakers lecturing for the first hour and small group discussion happening for the second hour. Students are required to keep a journal of their experiences as their final assignment for the class. The class will be graded S/NC.

The topics range from LGBTQ Teenagers to Institutionalized Homophobia to Hormone Therapy, led by experts in each field.

**BIOL 6509. Introduction to Surgical Subspecialties.**

No description available.

**BIOL 6510. Topics in Medicine - An International Perspective at University of Rostock, Germany.**

No description available.

**BIOL 6511. Comparative Medical Ethics at University of Tuebingen, Germany.**

No description available.

**BIOL 6512. Modern Genetics: Ethics, Policy, and the Doctor-Patient Relationship.**

No description available.

**BIOL 6513. (Play)writing and Medicine.**

No description available.

**BIOL 6514. Integrative Medicine: From Alternative to Mainstream.**

This elective seminar for 1st and 2nd year medical school and PLME students will introduce them to the world of complementary and alternative forms of healing (CAM) and place it into a framework of an Integrative medicine.

**BIOL 6515. Humanities as Medical Instruments.**

No description available.

**BIOL 6516. Race, Health Disparities, and Biomedical Interpretations.**

No description available.

**BIOL 6517. Diseases, Doctors and Divas.**

No description available.

**BIOL 6518. Design and Health.**

No description available.

**BIOL 6519. Leadership in the Health Professions.**

No description available.

**BIOL 6520. Artists and Scientists as Partners.**

No description available.

**BIOL 6521. Advanced Spanish.**

No description available.

**BIOL 6522. The Healer's Art.**

No description available.

**BIOL 6524. Introduction to Sports Medicine.**

No description available.

**BIOL 6525. Sex Ed by Brown Med.**

No description available.

**BIOL 6526. Neuroimaging of Mindfulness + Contemplative Practice.**

No description available.

**BIOL 6527. Physician as Medical Illustrator.**

No description available.

**BIOL 6528. Art and Healing.**

No description available.

**BIOL 6529. Addiction Medicine.**

No description available.

**BIOL 6530. Homeless Communities Health Outreach.**

No description available.

**BIOL 6533. Sex and Gender Based Medicine.**

No description available.

**BIOL 6534. Neurological Surgery.**

No Description Available.

**BIOL 6535. Biomedical Informatics.**

No description available.

**BIOL 6536. Clinical Practice of Chinese Medicine.**

No description available.

**BIOL 6537. Practical Skills in EMS and Disaster Response.**

No description available.

**BIOL 6539. Medical Journalism.**

No description available.

**BIOL 6540. Medicine, Knowledge, and Social Justice: Theory and Practice.**

No description available.

**BIOL 6542. Medical Portuguese.**

No description available.

**BIOL 6543. Introduction to Podcasting for Medical Education.**

No description available.

**BIOL 6544. Introduction to Medical Arabic.**

No description available.

**BIOL 6593. Medical Journalism.**

No description available.

**BIOL 6650. Medical Students Outreach to Mothers to Be (MOMS).**

No description available.

**BIOL 6651. The Bionic Human Elective.**

No description available.

**BIOL 6652. Wilderness Medicine Preclinical Elective.**

The Wilderness Medicine elective is designed to instill the basic survival skills training necessary for environments outside the hospital, both urban and wild. It combines didactic lectures on such topics as toxicology and travel medicine with field skills sessions & workshops (e.g. suturing, splinting). These sessions also include mock medical scenarios, such as near drownings, for the students to handle. It includes off-campus consultation with experts to review their medical emergency procedures. A final project consisting of writing about a popular wilderness myth and its voracity is required.

**BIOL 6653. Refugee Health and Advocacy.**

No description available.

**BIOL 6654. Adventures in Ophthalmology and Virtual Surgery.**

No description available.

**BIOL 6655. Health and Structures of Oppression.**

No description available.

**BIOL 6656. Physician Leadership: Essential Skills for Tomorrow's Health Care Leaders.**

No description available.

**BIOL 6657. Sexual Health.**

No description available.

**BIOL 6658. Medical Impact of Translational and Basic Science.**

No description available.

**BIOL 6659. Entrepreneurship in Medicine.**

## Medical Education

### **MED 2010. Health Systems and Policy I.**

This course will explore how multiple social determinants influence individual and population health; the laws and policies that shape the social environments in which patients live; and the role of physicians in advocating for systems and policy changes that will reduce health disparities and improve population health outcomes.

### **MED 2030. Research Methods in Population Medicine.**

The thesis requirement for the Master of Science degree in Population Medicine is an integral component of the Primary Care-Population Medicine program at Brown University. This course will have students develop and demonstrate the necessary research skills to formulate a population medicine research question and then design, conduct and write a manuscript presenting a research study that will satisfy the thesis requirements. The course itself has three parts:

An introductory primary on biostatistics A research methodology seminar series A journal club in which the biostatistics and research methodology will be integrated in the analysis and critique of studies related to population medicine

### **MED 2040. Health Systems and Policy II.**

This course will offer an overview of the critical issues in U.S. healthcare and public health policy. It will also provide future leaders in population medicine with a foundation for analyzing healthcare reform and public health efforts and for identifying the role of physicians in driving and shaping future policy reforms to improve the healthcare system and population health.

### **MED 2045. Quantitative Methods.**

In this course, students will be introduced to fundamental concepts in clinical epidemiology and basic statistics, as they relate to population and clinical research. This course is intended to teach students both the basic knowledge required to develop and interpret clinical studies as well as the skills in order to conduct basic statistical analyses.

### **MED 2046. Leadership in Health Care.**

This course emphasizes practical application of teamwork and leadership skills across multiple settings. Leadership in Health Care is a master's level course for second year medical students enrolled in the Primary Care-Population Medicine (PC-PM) program. Through interactive classroom sessions, field work in health care advocacy, and a team-based "leadership action project", students will develop foundational leadership skills. The first formal leadership course at Alpert Medical School, Leadership in Health Care will contribute to the PC-PM program's ultimate goal of preparing physician leaders who will improve the quality of health care and wellness of the population.

### **MED 2050. Population and Clinical Medicine I.**

This is the first semester of Population and Clinical Medicine, a two-semester course focused on the integration of population medicine and clinical practice. In this course, students will focus on topics integral to clinical medicine, but expand beyond the patient into the population and beyond. Given the importance of population health interventions for impacting the health of vulnerable and underserved patients, the course will focus on issues affecting these populations.

### **MED 2060. Population and Clinical Medicine II.**

This is the second semester of Population and Clinical Medicine, a two-semester course focused on the integration of population medicine and clinical practice. In this course, students will focus on topics integral to clinical medicine, but expand beyond the patient into the population and beyond. Given the importance of population health interventions for impacting the health of vulnerable and underserved patients, the course will focus on issues affecting these populations.

### **MED 2070. Health Systems Science III.**

This course is designed to further explore the themes of the Primary Care-Population Medicine Program and prepare students for the next steps in their professional careers. The course is designed to be a capstone and employs integrated, developmental, evolutionary educational spirals - providing the knowledge, attitudes and skills at the right time in the right format, and building on the first three years of the program. Course threads include Health Systems Science Advanced Content, Skill Building, Preparation for Next Career Stages, and Master's Thesis Workshopping.

### **MED 2110. Introduction to Medical Sciences and Patient Care.**

This 2-week intensive course introduces students to the wide variety of topics explored in the Master's of Medical Sciences program, with a focus on patient care aspects. The course combines seminar classroom instruction with field work/immersion at community healthcare sites. Topics covered include: biopsychosocial model of healthcare; intersection between science, social science and humanities in healthcare; introduction to community health centers; professionalism in healthcare; basic healthcare communication skills; quality improvement skills; and strategies for mastery of basic science knowledge. Students will be assessed using multiple methods including: seminar participation, reflective essays/field notes, attendance at field-work sites, & assessment from community mentors.

### **MED 2120. Patient Care in Complex Systems I.**

This is the second of a three course series for Master of Medical Sciences students. This course introduces students to the variety of complex factors affecting health, imparting both theoretical knowledge and practical skills. Teaching methods: interactive seminars and experiential learning at community healthcare sites with members of multidisciplinary teams. Topics covered: healthcare systems, social determinants of health, roles of interdisciplinary healthcare team members, quality improvement, and epidemiology. Students will begin developing a project at their clinical sites which will be implemented in spring semester. Student assessment includes: seminar participation, reflective essays, attendance at field-work sites, and assessment from community mentors. Pre Requisites: MED 2110

**MED 2130. Patient Care in Complex Systems II.**

This is the third of a 3 course sequence for Master of Medical Science students. Students will continue their study of both theoretical and practical aspects of healthcare through an interactive seminar series, continued service learning at their longitudinal community healthcare site, and completion of their community project. Seminar topics: care of vulnerable populations, environmental health, population health, new models of healthcare delivery, ethical issues in healthcare, whole-person health, cultural humility, complementary and alternative medicine, and patient advocacy. Students assessment includes: seminar participation, reflective essays, attendance at field work sites, assessment from community mentors, and quality of project and presentation. Pre Requisites: MED 2110 and MED 2120.

**MED 2140. Human Histology.**

Human Histology provides an in-depth examination of the basic architecture of the body. Fundamental to this understanding is the cell and how during early development cells in the aggregate undergo specialization as tissues, which are the building blocks of the body. This course focuses first on the biology of the four basic tissues (epithelium, connective tissue, muscle and nerve) and second, how they contribute to the functional anatomy of all organs and systems. We will emphasize characteristic developmental, structure-function and regulatory relationships within normal cells and tissues, which in turn are the foundation for the understanding of pathological alteration.

**MED 2150. General Pathology.**

Pathology is the study of the causes, mechanisms, and consequences of disease. In General Pathology students study in detail the cell and tissue alterations that lead to the production of human diseases. To uncover such alterations, morphological observations are correlated with studies involving molecular biology, biochemistry, and genetics. In studying the pathogenesis of human disease we pay close attention to epidemiological parameters, population health, aging, and to environmental and occupational health problems. General Pathology been integrated, whenever possible, with other courses in the Fall Semester of the Gateways Program, in order to maximize learning opportunities.

**MED 2160. Human Anatomy 1.**

This course explores the anatomical organization of the human body, viewing anatomical structures as a product of development and functional demand. Human Anatomy provides an opportunity for students of diverse backgrounds, interests, and goals to emerge with an understanding of the human body as a cornerstone of medical science. The course uses a combination of lectures, on-line modules, and mandatory laboratory sessions examining human cadaver dissections, to impart broad conceptual and in-depth knowledge of this subject.

**MED 2170. Scientific Foundations of Medicine.**

Scientific Foundations of Medicine is an integrated cross-disciplinary course that introduces the fundamental basic science principles relevant to the study of health, disease mechanisms and clinical medicine. As such the course consists of six blocks of core topics that incorporate foundational principles of molecular biology, cellular and metabolic biochemistry, nutritional science, cell physiology, inheritance patterns, mechanisms of genetic disorders, and immunology. Grounding in these scientific principles gives students insight into the biological complexity and genetic diversity that underlies disease processes.

**MED 2180. Brain Sciences and Neurological Disease.**

Brain Sciences is composed of several interrelated components - Head Anatomy, Neurobiology, Neuropathophysiology, Neuropathology and Neuropharmacology. The intent of the course is to encourage the integration of underlying neuroanatomy and basic science principles with an understanding of the presentation and management of neurological diseases. Course leaders from each of these disciplines have worked closely together in order to present the material in a cohesive and logical framework that promotes the sequential acquisition of new information based upon a substantive understanding of the previous material.

**MED 2190. Microbiology and Infectious Disease.**

Microbiology and Infectious Disease is an integrated course that introduces the basic biological principles, pathogenesis and host response, disease presentation, epidemiology, control and treatment of parasites, viruses, fungi and bacteria that cause human disease. Emphasis is placed on the most clinically significant and best characterized pathogens in each group. The Microbiology component of the course explores the characteristics of disease-causing microorganisms, mechanisms of transmission, immunity, and how specific microbial pathogens cause disease. Microbial disease states in multiple organ systems are addressed in the Infectious Disease component of the course with a focus on common infectious diseases and their clinical presentation.

**MED 2210. Radiological Physics and Dosimetry.**

This course will cover the fundamental physics behind radiation production and interaction, including a review of pertinent mathematics, classical mechanics, and nuclear physics. Topics to be covered within basic radiation physics: radioactive decay, radiation producing devices, characteristics of the different types of radiation (photons, charged and uncharged particles), mechanisms of their interactions with materials, and essentials of the determination of absorbed doses, by measurement and calculation, from ionizing radiation sources used in medical physics (clinical) situations.

**MED 2220. Radiation Protection & Instrumentation.**

This course examines principles of radiation protection with application to the hospital setting in radiation oncology, diagnostic imaging, and nuclear medicine. Designs of facilities and quality management programs are examined. Radiation safety practices are reviewed for involved hospital staff, patients, and the general public. This includes various radiation sources: electronically-generated photons and electrons, sources of sealed radioactivity, and unsealed sources of radioactivity. Additionally, the practice of radiation measurements as performed by the medical physicist is taught. This aspect includes associated dosimetry protocols, instrumentation, and clinical contexts. A practicum permits hands-on opportunities to assimilate the theoretical basis and rationale for radiation measurements

**MED 2250. Radiation Therapy Physics.**

This course will provide a comprehensive survey of basic radiotherapy physics, fundamental radiation therapy, and contemporary radiation therapy. The basic principles of radiotherapy treatment modalities, radiation detection, dose calibration methods, and image-based treatment planning will be reviewed. Topics to be covered include external beam radiation therapy (photons, protons, and electrons), brachytherapy, and special procedures. Image guidance methods will be discussed as well as patient and machine quality assurance.

**MED 2260. Physics of Medical Imaging.**

The course provides the necessary physics background that underpins day-to-day medical imaging physics activities. It is aimed primarily at new entrants to the profession, but should be of benefit to postgraduate students, postdoctoral research workers, physicist-managers, representatives of allied commercial organizations and anyone wishing to deepen or re-establish their understanding of the physics of medical imaging. Overviews of specialized or research related topics, such as positron emission tomography and magnetic resonance spectroscopy are given.

**MED 2980. Independent Study in Population Medicine.**

For students enrolled in the Primary Care-Population Medicine program at Alpert Medical School, this course is structured to allow students to conduct research focused on population health with a mentor at Brown University.

## Program in Liberal Medical Education

### PLME 0200. Primetime Bioethics.

Is it ethical to design a perfect baby? Who should get these organs? Is it ever okay to be dishonest with patients for their own good? These questions and more will be tackled in this discussion-based course that uses episodes of popular medical television shows to highlight topics in medical ethics. Students will watch 1-2 episodes of TV shows and read related articles and chapters on biomedical ethics and ethics theory. The goal is to give students the background with which to approach the ethical topics. This course may be most beneficial to students pursuing a career in medicine.

### PLME 0400. Introduction to Medical Illustration.

This semester course explores the field of medical illustration and its many facets. Depiction of diseases, anatomy, medical practices and surgical procedures has been around since antiquity. Not only has medical illustration evolved over the centuries, it has played the role of historian, documenting the beliefs and knowledge of its time. Today, medical illustration is as present as ever despite the advent of other methods of medical documentation, including photography and videography.

### PLME 0550. Italian and American Health Care: a Cultural, Historical and Practical View.

This program has been developed for Brown PLME students and first year Italian medical students to familiarize the future physicians with the much-debated theme of health care delivery and policies. Students will focus on medicine beyond science through the critical study of how socioeconomic and cultural factors impact this field. Students will compare the Italian and American systems, focusing on historical structures and current issues in health care regulation. Enrollment limited to 10.

### PLME 1000. PLME Senior Seminar in Scientific Medicine.

This course is an interdisciplinary and integrative science course that will supplement the preparation of both PLME and pre-medical students for the study of medicine in the 21st century. The course will use a case-based approach to relevant and contemporary subjects in medicine and health care, such as: biological systems and their interactions; diagnosis and therapy optimization; and the humanistic aspects of patient care. The course is intended for seniors interested in attending medical school but will preferentially enroll PLME students. Prerequisite: PLME competency in Biology, Chemistry (inorganic and organic), Physics, and introductory calculus. Enrollment limited to 40. S/NC

## Biology (Undergraduate)

### Associate Dean of Biology and Chair

Edward Hawrot

### Director of Undergraduate Affairs

Katherine F. Smith

The Undergraduate Program in Biology offers courses at all levels of biological organization: molecular, cellular, organismal and population, and concentration programs with varying degrees of multidisciplinary or specialty foci.

There is a vast range of collaborative opportunities for independent study and research under the mentorship of the faculty. Faculty maintain research programs at the cutting edge of their fields including biochemistry, biophysics, cell biology, developmental biology, ecology, evolution, genetics, immunology, molecular biology, neurobiology, physiology, anatomy, artificial organs, microbiology, virology, experimental pathology, and pharmacology. The close administrative relationship with the Alpert Medical School offers additional opportunities for blending fundamental biology and clinical sciences in research projects at the Brown-affiliated hospitals.

The Office of Biology Undergraduate Education is a full service academic resource center, serving a key role for students of the life sciences here. The Office provides individualized advising for students at all levels; oversees student- faculty research collaborations, holds special events and maintains a variety of programs that support and enrich student life.

For further information, please visit: <http://www.brown.edu/academics/biology/undergraduate-education/>

## Biology Concentration Requirements

The Biology concentration invites students to study, in depth and in breadth, the science of life and living matter. Whether pursuing the Bachelor of Arts (A.B.) or Science (Sc.B.) in biology, students can expect to learn broadly in the discipline through a selection of courses in three areas: cell and molecular biology, structure and function, and organismal biology. In addition, students pursuing the Sc.B. complete a thematic track through which they gain an in-depth understanding of a particular subfield such as, Immunopathology, Ecology and Evolutionary Biology, Physiology/Biotechnology, Cell and Molecular Biology, Physical Sciences. The concentration also emphasizes practical skills and experimental design. Concentrators are required to take at least 3 courses with a laboratory or fieldwork component. Within all of these requirements, students have a high degree of flexibility and choice. Broad research opportunities are also available across several departments within the basic sciences as well.

### Standard program for the A.B. Biology

The concentration program for the A.B. in Biology consists of four prerequisite courses in math, chemistry, and a statistics course as well as ten courses in biological sciences, including at least one course in each of the following three areas: Area 1: Cell/Molecular Biology, Area 2: Structure/Function, and Area 3: Organismal Biology.

The Biology A.B. Concentration Worksheet ([https://www.brown.edu/academics/biology/undergraduate-education/sites/brown.edu/academics/biology/undergraduate-education/files/uploads/Biology%20AB%20Worksheet\\_0.pdf](https://www.brown.edu/academics/biology/undergraduate-education/sites/brown.edu/academics/biology/undergraduate-education/files/uploads/Biology%20AB%20Worksheet_0.pdf)) may be a useful tool for course planning.

#### Prerequisites: <sup>1</sup>

CHEM 0330	Equilibrium, Rate, and Structure
CHEM 0350	Organic Chemistry
MATH 0090	Introductory Calculus, Part I (or placement. MATH 0050/MATH 0060 may be substituted for MATH 0090.)
One of the following:	
MATH 0100	Introductory Calculus, Part II (or placement)
MATH 0170	Advanced Placement Calculus (or equivalent placement)

Or a statistics course, to be approved by the concentration advisor.

#### Ten Core Courses: <sup>2,3,4</sup>

BIOL 0200	The Foundation of Living Systems (Required course; AP credit or similar IB or A-levels accepted, placement test available.)	1
<b>Area 1 (Cell/Molecular Biology)</b>		
BIOL 0280	Biochemistry	1
BIOL 0470	Genetics	
BIOL 0500	Cell and Molecular Biology	
BIOL 0510	Introductory Microbiology	
BIOL 0530	Principles of Immunology	
BIOL 1050	Biology of the Eukaryotic Cell	
BIOL 1310	Developmental Biology	
BIOL 1515	Conservation in the Genomics Age	
BIOL 1810	21st Century Applications in Cell and Molecular Biology	
BIOL 1865	Toxicology	
NEUR 1020	Principles of Neurobiology	
<b>Area 2 (Structure/Function)</b>		
BIOL 0400	Biological Design: Structural Architecture of Organisms	1

BIOL 0410	Invertebrate Zoology
BIOL 0440	Inquiry in Plant Biology: Analysis of Plant Growth, Reproduction and Adaptive Responses
BIOL 0800	Principles of Physiology
BIOL 1120	Biomaterials
BIOL 1155	Hormones and Behavior
BIOL 1310	Developmental Biology
BIOL 1330	Biology of Reproduction
BIOL 1800	Animal Locomotion
BIOL 1865	Toxicology
BIOL 1880	Comparative Biology of the Vertebrates
NEUR 0010	The Brain: An Introduction to Neuroscience

**Area 3 (Organismal Biology) 1**

BIOL 0210	Diversity of Life
BIOL 0350	The Fossil Record: Life through Time on Earth
BIOL 0380	The Ecology and Evolution of Infectious Disease
BIOL 0410	Invertebrate Zoology
BIOL 0420	Principles of Ecology
BIOL 0430	The Evolution of Plant Diversity
BIOL 0480	Evolutionary Biology
BIOL 1480	Terrestrial Biogeochemistry and the Functioning of Ecosystems
BIOL 1515	Conservation in the Genomics Age
BIOL 1800	Animal Locomotion
BIOL 1880	Comparative Biology of the Vertebrates
ENVS 0490	Environmental Science in a Changing World

Six additional courses chosen from BIOL and/or NEUR offerings for concentrators. The Core may include up to two related sciences, with advisor approval. The Core must also include a Senior Capstone. 6

SENIOR CAPSTONE: \*Only applies to students who have declared in Fall 2019 or later.\* To be fulfilled via ONE of the following:

1. One of the following approved courses: BIOL 1100, 1250, 1515, 1555, 1565, 1575, 1600, 1820, 1970A.
2. One semester of independent research/independent study (BIOL 1950 or BIOL 1960).
3. A senior Honors thesis in Biology; Students can register for BIOL 1950 or BIOL 1960 or both.

Please visit the BUE webpage for more information.

Total Credits 10

<sup>1</sup> AP scores of 4 or 5 may substitute Math courses.

<sup>2</sup> Biology courses for concentration credit include those numbered between 0100 - 2999. Exclusions: BIOL 1070, 1920 series courses, and BIOL 1980 can only be used as related sciences with advisor approval and do not fulfill advanced course requirements.

<sup>3</sup> At least two biology and/or neuroscience courses must be at the advanced level (between 1000-2999). Senior Capstone can be used towards one advanced requirement. At least three of the Biology and/or Neuroscience courses must include laboratory or fieldwork. BIOL 1950/BIOL 1960, (Directed Research) may be included, but is not required. If a lab project, this can count for one of the three lab course requirements, and one advanced course.

<sup>4</sup> No substitutions per above Area list. If a course is listed in more than one area, it may be used to fulfill one area only; the other area must be fulfilled by a different course.

**Honors:** Honors in biology requires a thesis and presentation based on a research project (conducted via BIOL 1950/BIOL 1960), and quality

grades in the concentration. Guidelines and information on faculty research are available in the Office of Biology Undergraduate Education or found at <http://www.brown.edu/academics/biology/undergraduate-education/>.

**Standard Program for the Sc.B. Biology**

The concentration program for the Sc.B. in Biology consists of seven prerequisite courses in math, chemistry, and physics as well as thirteen to fourteen courses in biological sciences, including courses in each of the following three areas: Area 1: Cell/Molecular Biology, Area 2: Structure/Function, and Area 3: Organismal Biology, and the three-course Track. The biological sciences requirement also requires research (BIOL 1950/BIOL 1960), which should reflect the advanced cluster.

Students pursuing a ScB in Biology have the option to substitute a course for CHEM 0360 (Organic Chemistry) in their background core. For students pursuing the Marine Biology track, an upper level course in Geological Sciences may replace CHEM 0360. For students pursuing all other tracks, BIOL 0280 (Introductory Biochemistry) may serve as the replacement course. Please note that approval from the concentration advisor is required for these background course substitutions. If the student has already declared, then a revised concentration plan must be submitted and approved via the ASK system. If BIOL 0280 is used as a substitute for CHEM 0360, it cannot be counted as a core course or as an Area 1 course. Students planning to apply to medical or graduate school should seek additional advising (such as from the Health Careers Office) in crafting their course plan.

The Biology Sc.B. Concentration Worksheet (<https://www.brown.edu/academics/biology/undergraduate-education/sites/www.brown.edu/academics/biology/undergraduate-education/files/uploads/Biology%20ScB%20Worksheet.pdf>) may be a useful tool for course planning.

**Prerequisites: <sup>1</sup>**

MATH 0090	Introductory Calculus, Part I (or placement. MATH 0050/MATH 0060 may be substituted for MATH 0090)
-----------	--

One of the following:

MATH 0100	Introductory Calculus, Part II (or placement)
-----------	---

MATH 0170	Advanced Placement Calculus (or an equivalent placement)
-----------	--

Or a statistics course, to be approved by the concentration advisor.

CHEM 0330	Equilibrium, Rate, and Structure (or IB credit)
-----------	---

CHEM 0350	Organic Chemistry
-----------	-------------------

CHEM 0360	Organic Chemistry
-----------	-------------------

or BIOL 0280	Biochemistry
--------------	--------------

PHYS 0030	Basic Physics A (or equivalent. PHYS 0050 PHYS 0070, or ENGN 0030 may be substituted for PHYS 0030.)
-----------	--

PHYS 0040	Basic Physics B (or equivalent. PHYS 0060 or ENGN 0040 may be substituted for PHYS 0040.)
-----------	---

**Core Courses: <sup>2,3,4</sup>**

BIOL 0200	The Foundation of Living Systems (or placement)	1
-----------	---	---

**Area 1 (Cell/Molecular Biology) 1**

BIOL 0280	Biochemistry
-----------	--------------

BIOL 0470	Genetics
-----------	----------

BIOL 0500	Cell and Molecular Biology
-----------	----------------------------

BIOL 0510	Introductory Microbiology
-----------	---------------------------

BIOL 1310	Developmental Biology
-----------	-----------------------

BIOL 1515	Conservation in the Genomics Age
-----------	----------------------------------

BIOL 1810	21st Century Applications in Cell and Molecular Biology	
BIOL 1865	Toxicology	
NEUR 1020	Principles of Neurobiology	
<b>Area 2 (Structure/Function)</b>		<b>1</b>
BIOL 0400	Biological Design: Structural Architecture of Organisms	
BIOL 0410	Invertebrate Zoology	
BIOL 0440	Inquiry in Plant Biology: Analysis of Plant Growth, Reproduction and Adaptive Responses	
BIOL 0800	Principles of Physiology	
BIOL 1120	Biomaterials	
BIOL 1155	Hormones and Behavior	
BIOL 1310	Developmental Biology	
BIOL 1330	Biology of Reproduction	
BIOL 1800	Animal Locomotion	
BIOL 1865	Toxicology	
BIOL 1880	Comparative Biology of the Vertebrates	
NEUR 0010	The Brain: An Introduction to Neuroscience	
<b>Area 3 (Organismal Biology)</b>		<b>1</b>
BIOL 0210	Diversity of Life	
BIOL 0350	The Fossil Record: Life through Time on Earth	
BIOL 0380	The Ecology and Evolution of Infectious Disease	
BIOL 0410	Invertebrate Zoology	
BIOL 0420	Principles of Ecology	
BIOL 0430	The Evolution of Plant Diversity	
BIOL 0480	Evolutionary Biology	
BIOL 1480	Terrestrial Biogeochemistry and the Functioning of Ecosystems	
BIOL 1515	Conservation in the Genomics Age	
BIOL 1800	Animal Locomotion	
BIOL 1880	Comparative Biology of the Vertebrates	
ENVS 0490	Environmental Science in a Changing World	
Six additional courses chosen from BIOL and/or NEUR offerings for concentrators. The Core may include up to two related sciences, with advisor approval. The Core must also include research.		<b>6</b>
<b>RESEARCH:</b> <sup>5</sup>		
Typically, two courses in Core are advanced level research (BIOL 1950,1960).		
<b>TRACK:</b>		
The advanced thematic track consists of three additional biological sciences courses (not including BIOL 1950/1960 research) that form a Track. Tracks include: Immuno/ Pathobiology; Ecology and Evolutionary Biology; Physiology and Biotechnology; Neurobiology; Physical Sciences; Marine Biology; Cell and Molecular Biology; Biomedical Informatics. At least two track courses, and preferably all three, must be above 1000-level. Track courses should form a cohesive grouping approved by an advisor and/or Associate Dean of Biology, Katherine Smith		<b>3</b>
<b>Biomedical Informatics - BIOL 1565 is required for this track along with 2 additional courses from the following:</b>		
BIOL 1555	Methods in Informatics and Data Science for Health	
BIOL 1575	Evaluation of Health Information Systems	
BIOL 1595	Artificial Intelligence in Biomedicine	
<b>Cell and Molecular Biology</b>		
BIOL 1050	Biology of the Eukaryotic Cell	

BIOL 1270	Advanced Biochemistry	
BIOL 1300	Biomolecular Interactions: Health, Disease and Drug Design	
BIOL 1310	Developmental Biology	
BIOL 1330	Biology of Reproduction	
BIOL 1540	Molecular Genetics	
BIOL 1545	Human Genetics and Genomics	
BIOL 1810	21st Century Applications in Cell and Molecular Biology	
BIOL 1970A	Stem Cell Biology	
<b>Ecology and Evolutionary Biology</b>		
BIOL 1420	Experimental Design in Ecology	
BIOL 1430	Population Genetics	
BIOL 1435	Computational Methods for Studying Demographic History with Molecular Data	
BIOL 1440	Marine Biology	
BIOL 1450	Community Ecology	
BIOL 1465	Human Population Genomics	
BIOL 1470	Conservation Biology	
BIOL 1475	Biogeography	
BIOL 1480	Terrestrial Biogeochemistry and the Functioning of Ecosystems	
BIOL 1495	500 Million Years of Land Plants	
BIOL 1515	Conservation in the Genomics Age	
BIOL 1800	Animal Locomotion	
BIOL 1880	Comparative Biology of the Vertebrates	
<b>Immunobiology</b>		
BIOL 1250	Host-microbiome Interactions in Health and Disease	
BIOL 1290	Cancer Biology	
BIOL 1520	Innate Immunity	
BIOL 1550	Biology of Emerging Microbial Diseases	
BIOL 1560	Virology	
BIOL 1600	Development of Vaccines to Infectious Diseases	
<b>Marine Biology</b>		
BIOL 1440	Marine Biology	
GEOL (EEPS) listings 1000 level or above. Must be a coherent set of courses that are above the introductory level and approved by advisor		
<b>Neurobiology</b>		
BIOL 1100	Cell Physiology and Biophysics	
BIOL 1110	Topics in Signal Transduction	
BIOL 1190	Synaptic Transmission and Plasticity	
BIOL 1260	Physiological Pharmacology	
NEUR listings 1000 level or above		
<b>Physiology and Biotechnology</b>		
BIOL 1090	Polymer Science for Biomaterials	
BIOL 1100	Cell Physiology and Biophysics	
BIOL 1110	Topics in Signal Transduction	
BIOL 1120	Biomaterials	
BIOL 1140	Tissue Engineering	
BIOL 1150	Stem Cell Engineering	
BIOL 1190	Synaptic Transmission and Plasticity	
BIOL 1300	Biomolecular Interactions: Health, Disease and Drug Design	
<b>Physical Sciences</b>		

Must be a coherent set of courses drawn from the Physical Sciences; courses must be above the introductory level and approved by advisor

Total Credits 13

- 1 AP scores of 4 or 5 may substitute Math courses.
- 2 Biology courses for concentration credit include those numbered between 0100-2999. Exclusions: BIOL 1070, 1920 series courses, and BIOL 1980 can only be used as related sciences with advisor approval and do not fulfill advanced course requirements.
- 3 At least two biology and/or neuroscience courses must be at the advanced level (between 1000-2999). At least three of the biology and/or neuroscience courses must include laboratory or fieldwork. BIOL 1950/ BIOL 1960 can count for one of the three lab course requirements and one advanced course.
- 4 No substitutions per above Area list. If a course is listed in more than one area, it may be used to fulfill one area only; the other area must be fulfilled by a different course.
- 5 If substantial research is carried out away from Brown, it must be approved by an appropriate Brown BioMed faculty member but does not carry course credit toward the Core program.

**Honors:** Honors in biology requires a thesis and presentation based on a research project (usually conducted via BIOL 1950/BIOL 1960), and quality grades in the concentration. Guidelines and information on faculty research are available in the Office of Biology Undergraduate Education or at <http://www.brown.edu/academics/biology/undergraduate-education/>.

**Stipulations for Biology Programs:**

1. For double concentrations, no more than two courses may overlap (i.e., be used to meet requirements of both programs). This includes prerequisite courses.
2. No more than two semesters of directed research may be used as concentration credits. Each does count as an individual core towards the program, but only carry one lab credit towards the three required.
3. A limited number of transfer or study abroad courses may be used within the program, subject to approval of advisor, and Associate Dean of Biology, Katherine Smith.

## Health & Human Biology Concentration Requirements

Health and Human Biology is an interdisciplinary concentration that provides a rigorous foundation in the biological sciences with substantive course work in humanities and social sciences within a subfield of Human Health and Disease. The program includes: background courses, biology core courses, a set of theme courses, and a Senior Capstone activity. Background courses provide the essential foundations in chemistry, mathematics, methods, and basic biology. These support the Biology core, which is comprised of a flexible menu of intermediate and advanced courses. A required portion of the Biology core is Genetics, a cornerstone of human biology and its interface with other fields. The Biology core underscores the related coursework within the Health and Disease Theme. The Theme courses are social science and humanities courses that form a cohesive, thoughtful grouping. Theme groupings must be approved by the advisor. A required senior capstone course or activity builds on the program's focus.

### Program Requirements

**REQUIRED BACKGROUND:**

Four (4) courses including:

MATH 0090	Introductory Calculus, Part I (or equivalent placement)	1
OR		
MATH 0050 & MATH 0060	Analytic Geometry and Calculus and Analytic Geometry and Calculus	
OR		
MATH 0100 or MATH 0170	Introductory Calculus, Part II or Advanced Placement Calculus	

CHEM 0330	Equilibrium, Rate, and Structure	1
BIOL 0200	The Foundation of Living Systems	1
Statistics course chosen with advisor's help.		1

**CORE PROGRAM:**

In addition to the stated background in Chemistry, Math, Biology and Statistics, five (5) Biology plus four (4) coherently-grouped Theme courses, plus a Senior-Year Capstone course or project. (See description of Capstone at link below this table).

**BIOLOGY:**

Five (5) courses, including: 5

Genetics, which can be fulfilled in the following ways:

BIOL 0470	Genetics
-OR-	
BIOL 0480 & BIOL 0500	Evolutionary Biology and Cell and Molecular Biology
-OR-	
BIOL 0480 & BIOL 0510	Evolutionary Biology and Introductory Microbiology
-OR-	
BIOL 0480 & BIOL 0280	Evolutionary Biology and Biochemistry

Select one course in structure/function/development such as:

BIOL 0400	Biological Design: Structural Architecture of Organisms
BIOL 0800	Principles of Physiology
BIOL 1310	Developmental Biology
BIOL 1800	Animal Locomotion
BIOL 1880	Comparative Biology of the Vertebrates
NEUR 0010	The Brain: An Introduction to Neuroscience

One course in organismal/population biology such as:

BIOL 0380	The Ecology and Evolution of Infectious Disease
BIOL 0410	Invertebrate Zoology
BIOL 0420	Principles of Ecology
BIOL 0480	Evolutionary Biology
BIOL 1470	Conservation Biology
BIOL 1880	Comparative Biology of the Vertebrates
ENVS 0490	Environmental Science in a Changing World

Or a course from the NEUR 1940 series

Two Biology or Neuroscience courses. At least one must be at the advanced level.

**THEME: With the advisor's assistance, a theme is chosen and a cohesive set of courses are selected from outside of Biology and Neuroscience. See Notes below:** 4

**SENIOR CAPSTONE ACTIVITY: Must be conducted during the senior year, fulfilled by one of the following, and related to the students learning goals in the concentration:** 1

- 1) Advisor approved senior seminar or advanced course related to the theme
- 2) One semester of independent research/independent study (BIOL 1950 or BIOL 1960); in the case of a senior honors thesis, both BIOL 1950 and BIOL 1960 can be used as the capstone.
- 3) An appropriate internship with a scholarly context can be used if coupled with a semester of independent study mentored by a Brown faculty member.

Total Credits 14

**THEME:**

- Approved courses must be above the introductory level and at least one must be 1000-level or above.
- No more than TWO courses from a given department may be included in the theme portion.
- Students will then select from FOUR theme options: 1) Health Behavior, 2) Environmental Health, 3) Global/International Health, 4) Social Context of Health and Disease.

**CAPSTONE:** See <https://www.brown.edu/academics/biology/undergraduate-education/undergraduate/health-and-human-biology> for more information on the Capstone Activity.

**HONORS:** See more information about Honors at <https://www.brown.edu/academics/biology/undergraduate-education/honors-biological-sciences>.

## Applied Mathematics-Biology Concentration Requirements

The Applied Math - Biology concentration recognizes that mathematics is essential to address many modern biological problems in the post genomic era. Specifically, high throughput technologies have rendered vast new biological data sets that require novel analytical skills for the most basic analyses. These technologies are spawning a new "data-driven" paradigm in the biological sciences and the fields of bioinformatics and systems biology. The foundations of these new fields are inherently mathematical, with a focus on probability, statistical inference, and systems dynamics. These mathematical methods apply very broadly in many biological fields including some like population growth, spread of disease, that predate the genomics revolution. Nevertheless, the application of these methods in areas of biology from molecular genetics to evolutionary biology has grown very rapidly in with the availability of vast amounts of genomic sequence data. Required coursework in this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The students will focus in particular areas of biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations.

### Standard program for the Sc.B. degree

Required coursework in this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The students will focus in particular areas of biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations. Applied Math – Biology concentrators are prepared for careers in medicine, public health, industry and academic research.

#### Required Courses:

*Students are required to take all of the following courses.*

MATH 0090	Introductory Calculus, Part I	1
MATH 0100	Introductory Calculus, Part II	1
or MATH 0170	Advanced Placement Calculus	
MATH 0180	Intermediate Calculus (or equivalent placement)	1
MATH 0520	Linear Algebra	1
or MATH 0540	Honors Linear Algebra	
CHEM 0330	Equilibrium, Rate, and Structure <sup>1</sup>	1
PHYS 0030	Basic Physics A	1
or PHYS 0050	Foundations of Mechanics	
Select one of the following sequences:		2
APMA 0350 & APMA 0360	Applied Ordinary Differential Equations and Applied Partial Differential Equations I	
APMA 0330 & APMA 0340	Methods of Applied Mathematics I, II and Methods of Applied Mathematics I, II	
APMA 1650	Statistical Inference I	1
or APMA 1655	Statistical Inference I	
APMA 1070	Quantitative Models of Biological Systems	1

APMA 1080	Inference in Genomics and Molecular Biology	1
or NEUR 2110	Statistical Neuroscience	
BIOL 0200	The Foundation of Living Systems (or equivalent)	1

#### Additional Courses

In addition to required courses listed above, students must take the following:

Two additional courses in Applied Math or Biology. At least one of these must be a directed research course, e.g. a senior seminar or independent study in Applied Math or a directed research/independent study in Biology. For example: <sup>1</sup>		2
A course from the APMA 1930 series		
A course from the APMA 1940 series.		
APMA 1970	Independent Study	
BIOL 1950	Directed Research/Independent Study	
BIOL 1960	Directed Research/Independent Study	

We strongly recommend that Applied Mathematics-Biology concentrators take one of the following programming courses on or before their first semester as a concentrator: APMA 0160, CSCI 0040, CSCI 0150, CSCI 0170, CSCI 0190, CLPS 0950. Those who do can use it as their second Applied Math or Biology course.

Four classes in the biological sciences agreed upon by the student and advisor. These four courses should form a cohesive grouping in a specific area of emphasis, at least two of which should be at the 1000-level. Some example groupings are below:		4
---	--	---

#### Areas of Emphasis and Suggested Courses:

Some areas of possible emphasis for focusing of elective courses are listed below. Given the large number of course offerings in the biosciences and neuroscience, students are free to explore classes in these areas that are not listed below. However, all classes must be approved by the concentration advisor. APMA 1910 cannot be used as an elective.

#### Biochemistry

BIOL 0280	Biochemistry
BIOL 1270	Advanced Biochemistry
CHEM 0350/0360	Organic Chemistry
CHEM 1230	Chemical Biology

#### Biotechnology and Physiology

BIOL 0800	Principles of Physiology
BIOL 1100	Cell Physiology and Biophysics
and/or appropriate bioengineering courses, such as:	
BIOL 1090	Polymer Science for Biomaterials
BIOL 1120	Biomaterials
BIOL 1140	Tissue Engineering
BIOL 1150	Stem Cell Engineering
BIOL 1210	Synthetic Biological Systems

#### Ecology, Evolution, and Genetics

BIOL 0410 & BIOL 0480	Invertebrate Zoology and Evolutionary Biology
BIOL 0420 & BIOL 0430	Principles of Ecology and The Evolution of Plant Diversity
BIOL 0470	Genetics
BIOL 1420	Experimental Design in Ecology
BIOL 1430	Population Genetics
BIOL 1465	Human Population Genomics
BIOL 1540	Molecular Genetics

#### Neuroscience

APMA 0410	Mathematical Methods in the Brain Sciences
-----------	--

Neurosciences courses: See <https://www.brown.edu/academics/neuroscience/undergraduate/neuroscience-concentration-requirements>

BIOL 1100	Cell Physiology and Biophysics
BIOL 1110	Topics in Signal Transduction
BIOL 1190	Synaptic Transmission and Plasticity

Total Credits 18

<sup>1</sup> Students whose independent study is expected to be in an experimental field are strongly encouraged to take APMA 1660, which covers experimental design and the analysis of variance (ANOVA), a method commonly used in the analysis of experimental data.

## Honors

**Requirements and Process:** Honors in the Applied Math-Biology concentration is based primarily upon an in-depth, original research project carried out under the guidance of a Brown (and usually Applied Math or BioMed) affiliated faculty advisor. Projects must be conducted for no less than two full semesters, and student must register for credit for the project via APMA 1970 or BIOL 1950/BIOL 1960 or similar independent study courses. The project culminates in the writing of a thesis which is reviewed by the thesis advisor and a second reader. It is essential that the student have one advisor from the biological sciences and one in Applied Mathematics. The thesis work must be presented in the form of an oral presentation (arranged with the primary thesis advisor) or posted at the annual Undergraduate Research Day in either Applied Mathematics or Biology. For information on registering for BIOL 1950/BIOL 1960, please see <https://www.brown.edu/academics/biology/undergraduate-education/undergraduate-research>

Excellence in grades within the concentration as well as a satisfactory evaluation by the advisors are also required for Honors. The student's grades must place them within the upper 20% of their cohort, in accordance with the university policy on honors. Honors recipients typically maintain a Grade Point Average of 3.4 or higher in the concentration. However, in the case of outstanding independent research as demonstrated in the thesis and supported by the Thesis Committee, candidates with a GPA between 3.0 and 3.4 will be considered and are encouraged to apply.

The deadline for applying to graduate with honors in the concentration are the same as those of the biology concentrations. However, students in the joint concentration must inform the undergraduate chair in Applied Mathematics of their intention to apply for honors by these dates.

## Biochemistry & Molecular Biology Concentration Requirements

How does life work at the molecular level? This question is at the core of the concentration program Biochemistry and Molecular Biology. In earlier years of this discipline, the focus was on structure and function of proteins, nucleic acids, lipids, carbohydrates and small molecules such as vitamins. Today the logical approach and tools of biochemical science are being expanded to new areas in neuroscience, developmental biology, immunology, pharmacology and synthetic biology (the design of analogs of biological systems). Training in biochemistry begins with a foundation in mathematics, physics, chemistry and biology. Some courses offered in other departments, including engineering, geology and computer science, are also useful. A key component of this program is the year of hands-on research carried out in collaboration with a faculty member here at Brown. Faculty sponsors are drawn from both the Chemistry Department and the Division of Biology and Medicine, and include basic science and clinical faculty.

### Standard program for the Sc.B. degree

**Students must take twenty courses in biology, chemistry, mathematics, and physics, including the following core requirements, some of these may be fulfilled with AP credits. Students are expected to take courses that will count toward the concentration ABC/NC. Students should discuss the S/NC option with their concentration advisor if circumstances warrant**

**consideration. Students should not register S/NC for a concentration course without advisor pre-approval.**

Three courses in mathematics including two courses in MATH 0090/0100 or MATH 0170/0180 with a third class in statistics, math, or computer science <sup>1</sup> 3

Two courses in physics, typically: <sup>1</sup> 2

PHYS 0030	Basic Physics A
or PHYS 0050	Foundations of Mechanics
or ENGN 0030	Introduction to Engineering
PHYS 0040	Basic Physics B
or PHYS 0060	Foundations of Electromagnetism and Modern Physics
or ENGN 0040	Dynamics and Vibrations

Three courses in physical and organic chemistry: 3

CHEM 0330	Equilibrium, Rate, and Structure
CHEM 0350/0360	Organic Chemistry

One course in biophysical or related chemistry, such as: 1

CHEM 0500	Inorganic Chemistry
-----------	---------------------

Four courses in biochemistry: <sup>2</sup> 4

BIOL 0280	Biochemistry
BIOL 0285	Inquiry in Biochemistry: From Gene to Protein Function

Plus two of three upper level biochemistry courses:

BIOL 1270	Advanced Biochemistry
or CHEM 1230	Chemical Biology
or CHEM 1240	Biochemistry

Select two semester courses of independent research approved by a concentration advisor: 2

BIOL 1950/1960	Directed Research/Independent Study
----------------	-------------------------------------

-or-

CHEM 0970/0980	Undergraduate Research
----------------	------------------------

### Suggested Elective Courses:

Students are required to take five courses from the chart below or, with approval from a concentration advisor, from any science or mathematics course relevant to biochemistry, cell and molecular biology. <sup>3</sup> 5

### Applied Mathematics Electives:

APMA 0330	Methods of Applied Mathematics I, II
APMA 0410	Mathematical Methods in the Brain Sciences
APMA 0650	Essential Statistics

### Biology Electives:

BIOL 0030	Principles of Nutrition
BIOL 0150D	Techniques in Regenerative Medicine: Cells, Scaffolds and Staining
BIOL 0170	Biotechnology in Medicine
BIOL 0190R	Phage Hunters, Part I
BIOL 0190S	Phage Hunters, Part II
BIOL 0200	The Foundation of Living Systems
BIOL 0380	The Ecology and Evolution of Infectious Disease
BIOL 0415	Microbes in the Environment
BIOL 0440	Inquiry in Plant Biology: Analysis of Plant Growth, Reproduction and Adaptive Responses
BIOL 0470	Genetics
BIOL 0500	Cell and Molecular Biology
BIOL 0510	Introductory Microbiology
BIOL 0530	Principles of Immunology
BIOL 0800	Principles of Physiology
BIOL 1050	Biology of the Eukaryotic Cell

BIOL 1090	Polymer Science for Biomaterials
BIOL 1100	Cell Physiology and Biophysics
BIOL 1110	Topics in Signal Transduction
BIOL 1120	Biomaterials
BIOL 1150	Stem Cell Engineering
BIOL 1200	Protein Biophysics and Structure
BIOL 1210	Synthetic Biological Systems
BIOL 1260	Physiological Pharmacology
BIOL 1290	Cancer Biology
BIOL 1300	Biomolecular Interactions: Health, Disease and Drug Design
BIOL 1310	Developmental Biology
BIOL 1330	Biology of Reproduction
BIOL 1520	Innate Immunity
BIOL 1540	Molecular Genetics
BIOL 1560	Virology
BIOL 1600	Development of Vaccines to Infectious Diseases
BIOL 2110	Drug and Gene Delivery
BIOL 2350	The Biology of Aging

**Chemistry Electives:**

CHEM 0500	Inorganic Chemistry
CHEM 1140	Physical Chemistry: Quantum Chemistry
CHEM 1150	Physical Chemistry: Thermodynamics and Statistical Mechanics
CHEM 1220	Computational Tools in Biochemistry and Chemical Biology
CHEM 1230	Chemical Biology
CHEM 1240	Biochemistry
CHEM 1450	Advanced Organic Chemistry
CHEM 2420	Organic Reactions

**Computer Science Electives:**

CSCI 0080	A First Byte of Computer Science
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science
CSCI 0160	Introduction to Algorithms and Data Structures
CSCI 0170	Computer Science: An Integrated Introduction
CSCI 0180	Computer Science: An Integrated Introduction
CSCI 1810	Computational Molecular Biology

**Education Electives:**

EDUC 1110	Introductory Statistics for Education Research and Policy Analysis
-----------	--

**Engineering Electives:**

ENGN 0410	Materials Science
-----------	-------------------

**Neuroscience Electives:**<sup>4</sup>

NEUR 0010	The Brain: An Introduction to Neuroscience
NEUR 0650	Biology of Hearing
NEUR 1020	Principles of Neurobiology
NEUR 1030	Neural Systems
NEUR 1040	Introduction to Neurogenetics
NEUR 1670	Neuropharmacology and Synaptic Transmission
NEUR 1740	The Diseased Brain: Mechanisms of Neurological and Psychiatric Disorders

**Physics Electives:**

PHYS 0160	Introduction to Relativity, Waves and Quantum Physics
-----------	---

**Public Health Electives:**

PHP 1501	Essentials of Data Analysis	
Total Credits		20

- Note that the mathematics and physics requirements may be satisfied by Advanced Placement credit.
- BIOL 0285 is required for the class of 2022 onward. Students in the classes of 2019-2021 are required to take only three courses in biochemistry yet may take BIOL 0285 as an elective.
- Students in the classes of 2019-2021 are required to take six electives. The five elective requirement applies to the class of 2022 and after.
- or any NEUR course in Cell, Genetics, Molecular Biology, or Development.

**Honors Requirements for Biochemistry**

All ScB Biochemistry concentrators are candidates for Honors; no separate application is necessary.

The requirements for Honors in Biochemistry are:

\* A strong grade record in concentration courses. This means a grade point average for the concentration that is higher than 3.25.

\* Two semesters of Independent Study (CHEM 0970, CHEM 0980 or equivalent). Guidelines and requirements associated with Independent Study are in the Undergraduate Concentration Handbook which can be found at the department website (<http://www.brown.edu/academics/chemistry/undergraduate>).

\* A Thesis in a form approved by the research advisor, and recommended by the research advisor. Additional information about thesis guidelines will be provided by the Concentration Advisor in the first half of the fall semester.

**Biomedical Engineering Concentration Requirements**

The Sc.B. program in Biomedical Engineering is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>. It is jointly offered by the School of Engineering and the Division of Biology and Medicine as an interdisciplinary concentration designed for students interested in applying the methods and tools of engineering to the subject matter of biology and the life sciences. The education objectives of the Biomedical Engineering program are to prepare graduates: (1) to be employed in careers of useful service to society, including scientific and technical areas within medicine, industry, and health care delivery; (2) to demonstrate the ability to apply the basic principles of engineering and science, as well as problem solving skills and critical thinking, to a broad spectrum of biomedical engineering problems; (3) to demonstrate their ability to work in teams, and to effectively communicate and understand the broad social, ethical, economic and environmental consequences of their lifelong education. The student outcomes of this program are the ABET (1) - (7) Student Outcomes as defined by the "ABET Criteria for Accrediting Engineering Programs (available online at <http://www.abet.org/accreditation-criteria-policies-documents/>)." The Biomedical Engineering concentration shares much of the core with the other engineering programs, but is structured to include more courses in biology and chemistry, and a somewhat different emphasis in mathematics.

The requirements regarding Mathematics, Advanced Placement, Transfer Credit, Substitutions for Required Courses, and Humanities and Social Science Courses are identical to those of the Sc.B. degree programs in Engineering. Please refer to the Engineering section of the University Bulletin for explicit guidelines.

The Biomedical Engineering concentration shares much of the core with the other engineering programs, but is structured to include more courses in biology and chemistry, and a somewhat different emphasis in mathematics.

**Standard program for the Sc.B. degree****1. Core Courses**

ENGN 0030	Introduction to Engineering	1
or ENGN 0031	Honors Introduction to Engineering	
ENGN 0040	Dynamics and Vibrations	1
ENGN 0510	Electricity and Magnetism	1
or ENGN 0520	Electrical Circuits and Signals	
ENGN 0720	Thermodynamics	1
ENGN 0810	Fluid Mechanics	1
CHEM 0330	Equilibrium, Rate, and Structure	1
CHEM 0350	Organic Chemistry	1
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	1
or MATH 0170	Advanced Placement Calculus	
or MATH 0100	Introductory Calculus, Part II	
MATH 0200	Intermediate Calculus (Physics/Engineering)	1
or MATH 0180	Intermediate Calculus	
or MATH 0350	Honors Calculus	
APMA 0330	Methods of Applied Mathematics I, II	1
or APMA 0350	Applied Ordinary Differential Equations	
APMA 1650	Statistical Inference I	1
or BIOL 0495	Statistical Analysis of Biological Data	
or PHP 1510	Principles of Biostatistics and Data Analysis	
or APMA 1655	Statistical Inference I	

**2. Upper Level Biomedical Engineering Curriculum**

ENGN 1110	Transport and Biotransport Processes	1
ENGN 1210	Biomechanics	1
ENGN 1230	Instrumentation Design	1
ENGN 1490	Biomaterials	1
BIOL 0800	Principles of Physiology	1

**3. Additional Biomedical Engineering Electives (Complete at least 3 courses from the following groups):**

Select one or two of the following:

ENGN 1220	Neuroengineering	
ENGN 1510	Nanoengineering and Nanomedicine	
ENGN 1520	Cardiovascular Engineering	
ENGN 1930B	Biomedical Optics	
ENGN 2910S	Cancer Nanotechnology	
ENGN 2912R	Implantable Devices	
BIOL 1140	Tissue Engineering	
CSCI 1810	Computational Molecular Biology	
or CSCI 1820	Algorithmic Foundations of Computational Biology	
ENGN 0500	Digital Computing Systems	
ENGN 1740	Computer Aided Visualization and Design	
ENGN 2911R	Analytical Modeling for Biomechanical and Biomedical Systems	
ENGN 2625	Optical Microscopy: Fundamentals and Applications	
BIOL 1150	Stem Cell Engineering	
BIOL 2110	Drug and Gene Delivery	

At least one or two more courses from:

BIOL 0280	Biochemistry	
BIOL 0470	Genetics	
BIOL 0500	Cell and Molecular Biology	
BIOL 0510	Introductory Microbiology	
BIOL 0530	Principles of Immunology	
BIOL 1100	Cell Physiology and Biophysics	

BIOL 1555	Methods in Informatics and Data Science for Health	
BIOL 2010	Quantitative Approaches to Biology	
APMA 1070	Quantitative Models of Biological Systems	
CHEM 0360	Organic Chemistry	
CLPS 1520	Computational Vision	
or CLPS 1590	Visualizing Vision	
ENGN 2910G	Topics in Translational Research and Technologies	
NEUR 1020	Principles of Neurobiology	
NEUR 1440	Mechanisms and Meaning of Neural Dynamics	
PHYS 1610	Biological Physics	
BIOL 1810	21st Century Applications in Cell and Molecular Biology	

**4. Capstone Design**<sup>1</sup>

ENGN 1930L	Biomedical Engineering Design and Innovation	1
ENGN 1931L	Biomedical Engineering Design and Innovation II	1

5. General Education Requirement: At least four approved courses must be taken in the humanities and social sciences.

Total Credits 21<sup>1</sup> In some cases, Independent Study may be substituted subject to Concentration Advisor approval**Biophysics Concentration Requirements**

Biophysics is a quantitative science that requires a significant level of competence in physics, chemistry, mathematics, and biology. These areas therefore form the required background coursework for this program, and serve as a springboard to an advanced focus, developed in consultation with a concentration advisor. Advanced foci may include structure-function relations of macromolecules, biomechanics of cell cytoskeleton, biotechnology for drug and gene delivery, molecular mechanisms of membrane transport, sensory signal transduction, for examples. The program also requires a capstone research project that reflects this focus and may be drawn from collaborative research opportunities offered by faculty in biology, chemistry, or physics departments.

Additional detailed information about the field of Biophysics may be found at: <http://www.biophysics.org/AboutUs/Biophysics/tabid/517/Default.aspx>.**Standard program for the Sc.B. degree****Requirements**Select one of the following Series: 2

PHYS 0050 & PHYS 0060	Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics	
PHYS 0070 & PHYS 0160	Analytical Mechanics and Introduction to Relativity, Waves and Quantum Physics	
PHYS 0470	Electricity and Magnetism	1
CHEM 0330	Equilibrium, Rate, and Structure	1
CHEM 0350	Organic Chemistry	1
CHEM 0360	Organic Chemistry	1

Select one of the following:

CHEM 0400	Biophysical and Bioinorganic Chemistry	
CHEM 1140	Physical Chemistry: Quantum Chemistry	
PHYS 1530	Thermodynamics and Statistical Mechanics	
PHYS 1610	Biological Physics	
MATH 0100	Introductory Calculus, Part II (or equivalent)	1
MATH 0180	Intermediate Calculus (or equivalent)	1

BIOL 0200	The Foundation of Living Systems	1
Select two additional biology courses chosen with approval of the advisor. Examples include courses in:		2
<b>Cell Biology</b>		
BIOL 0500	Cell and Molecular Biology	
BIOL 1050	Biology of the Eukaryotic Cell	
BIOL 1200	Protein Biophysics and Structure	
<b>Physiology</b>

Total Credits		19

## Computational Biology Concentration Requirements

Computational biology involves the analysis and discovery of biological phenomena using computational tools, and the algorithmic design and analysis of such tools. The field is widely defined and includes foundations

in computer science, applied mathematics, statistics, biochemistry, molecular biology, genetics, ecology, evolution, anatomy, neuroscience, and visualization.

Students may pursue a Bachelor of Arts or a Bachelor of Science. Students pursuing the ScB have the option of electing a concentration in Computational Biology with one of three focus areas: Computer Sciences, Biological Sciences, or Applied Mathematics & Statistics. Both programs require a senior capstone experience that pairs students and faculty in creative research collaborations.

## Standard program for the A.B. degree

<b>Prerequisites:</b>		2
MATH 0100	Introductory Calculus, Part II	
or MATH 0170	Advanced Placement Calculus	
BIOL 0200	The Foundation of Living Systems	
<b>General Core Requirements: Biology</b>		2
BIOL 0470	Genetics	
BIOL 0280	Biochemistry	
or BIOL 0500	Cell and Molecular Biology	
<b>General Core Requirements: Chemistry</b>		1
CHEM 0330	Equilibrium, Rate, and Structure	
or CHEM 0350	Organic Chemistry	
<b>General Core Requirements: Computer Science</b>		2
CSCI 0150 & CSCI 0160	Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures	
OR		
CSCI 0170 & CSCI 0180	Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction	
OR		
CSCI 0190 & CSCI 0180 & CSCI 0320 & CSCI 0330 & CSCI 1010	Accelerated Introduction to Computer Science and Computer Science: An Integrated Introduction and Introduction to Software Engineering and Introduction to Computer Systems and Theory of Computation	
<b>General Core Requirements: Probability &amp; Statistics</b>		1
APMA 1650	Statistical Inference I	
OR		
CSCI 1450	Probability for Computing and Data Analysis	
OR		
MATH 1610	Probability	
<b>Comp Bio Core Course Requirements</b>		4
CSCI 1810	Computational Molecular Biology	
APMA 1080	Inference in Genomics and Molecular Biology	
AND two of the following:		
CSCI 1820	Algorithmic Foundations of Computational Biology	
BIOL 1430	Population Genetics	
BIOL 1465	Human Population Genomics	
CSCI 1420	Machine Learning	
APMA 1690	Computational Probability and Statistics	
APMA 1660	Statistical Inference II	
Additional course with Director approval		
Total Credits		12

**University Writing Requirement:**

As part of Brown's writing requirement, all students must demonstrate that they have worked on their writing both in their general studies and their concentration. There are a number of ways for Computational Biology concentrators to fulfill these requirements:

- Enrolling in an independent study: CSCI 1970, BIOL 1950, APMA 1970
- Writing an Honors Thesis
- Taking a "WRIT" course in the final two years

### Capstone Experience

Students enrolled in the computational biology concentration will complete a research project in their senior year under faculty supervision. The themes of such projects evolve with the field and the technology, but should represent a synthesis of the various specialties of the program. The requirements are either one semester of reading and research with a CCMB Faculty member or approved advisor, or a 2000-level Computational Biology course.

## Standard program for the Sc.B. degree

### Prerequisites

MATH 0100	Introductory Calculus, Part II (or equivalent)	1
or MATH 0170	Advanced Placement Calculus	
BIOL 0200	The Foundation of Living Systems (or equivalent)	1

### General Core Course Requirements: Biology

BIOL 0470	Genetics (prerequisite BIOL 0200 or equivalent)	1
BIOL 0280	Biochemistry	1
or BIOL 0500	Cell and Molecular Biology	

### General Core Requirements: Chemistry

CHEM 0330	Equilibrium, Rate, and Structure	1
or CHEM 0350	Organic Chemistry	

### General Core Requirements: Computer Science

CSCI 0150 & CSCI 0160	Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures	2-4
OR		
CSCI 0170 & CSCI 0180	Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction	
OR		
CSCI 0190 & CSCI 0180 & CSCI 0320 & CSCI 0330	Accelerated Introduction to Computer Science and Computer Science: An Integrated Introduction and Introduction to Software Engineering and Introduction to Computer Systems	
CSCI 0220	Introduction to Discrete Structures and Probability	1

### General Core Requirements: Probability & Statistics

APMA 1650	Statistical Inference I	1
or CSCI 1450	Probability for Computing and Data Analysis	
or MATH 1610	Probability	

### General Core Requirements: Computational Biology

CSCI 1810	Computational Molecular Biology	1
APMA 1080	Inference in Genomics and Molecular Biology	1

### Capstone Experience

BIOL 1950/1960	Directed Research/Independent Study	1
CSCI 1970	Individual Independent Study	

### Six courses in one of the following three tracks:

### Computer Science Track:

Three of the following:	
CSCI 1230	Introduction to Computer Graphics
CSCI 1270	Database Management Systems
CSCI 1410	Artificial Intelligence
CSCI 1550	Probabilistic Methods in Computer Science
CSCI 1570	Design and Analysis of Algorithms
or other Computer Science courses approved by the concentration advisor	
Three of the following:	
CSCI 0330	Introduction to Computer Systems
or CSCI 0320	Introduction to Software Engineering
CSCI 1820	Algorithmic Foundations of Computational Biology
PHP 2620	Statistical Methods in Bioinformatics, I
APMA 1660	Statistical Inference II
BIOL 1430	Population Genetics
BIOL 1465	Human Population Genomics
APMA 1690	Computational Probability and Statistics

### Biological Sciences track

At least four courses comprising a coherent theme in one of the following areas: Biochemistry, Ecology, Evolution, or Neurobiology.	
AND select two courses from the following:	
CSCI 1820	Algorithmic Foundations of Computational Biology
PHP 2620	Statistical Methods in Bioinformatics, I
APMA 1660	Statistical Inference II
BIOL 1430	Population Genetics
BIOL 1465	Human Population Genomics
APMA 1690	Computational Probability and Statistics

### Applied Mathematics & Statistics Track:

At least three courses from the following:	
APMA 1660	Statistical Inference II
APMA 1690	Computational Probability and Statistics
CSCI 1410	Artificial Intelligence
APMA 0340 & APMA 0330	Methods of Applied Mathematics I, II and Methods of Applied Mathematics I, II
OR	
APMA 0360 & APMA 0350	Applied Partial Differential Equations I and Applied Ordinary Differential Equations
At least three of the following:	
BIOL 1430	Population Genetics
CSCI 1820	Algorithmic Foundations of Computational Biology
PHP 2620	Statistical Methods in Bioinformatics, I
APMA 1070	Quantitative Models of Biological Systems
BIOL 1465	Human Population Genomics

Total Credits 18-20

### Honors:

In order to be considered a candidate for honors, students will be expected to maintain an outstanding record, with no "C's" in concentration courses and with a minimum of an "A-" average in concentration courses. In addition, students should take at least one semester, and are strongly encouraged to take 2 semesters, of reading and research with a CCMB faculty member or approved advisor. Students must submit to a public defense of their theses to be open to the CCMB community.

- Students seeking honors are advised to choose a Thesis Advisor prior to the end of their Junior year

- Students must complete the Registration form for Comp Bio and submit it to [CCMB@BROWN.EDU](mailto:CCMB@BROWN.EDU)

Any deviation from these rules must be approved by the director of undergraduate studies, in consultation with the student's advisor.

## Courses

### **BIOL 0030. Principles of Nutrition.**

Introduces the basic principles of human nutrition, and the application of these principles to the specific needs of humans, and the role of nutrition in chronic diseases. Provides an overview of the nutrients and their use by the human body. Also examines the role of nutrients in specific functions and disease states of the body. Not for biology concentration credit. Enrollment limited to 100.

### **BIOL 0040. Nutrition for Fitness and Physical Activity.**

Reviews the role of nutrition in physical activity and health. It is designed to provide the student with the information and skills needed to translate nutrition and physical activity recommendations into guidelines for both the athlete for maximal performance and the non-athlete to improve both health and body weight. Students will learn the use of the energy yielding nutrition in physical activity and how food choices can influence both athletic performance and long-term health through the effect on risk factors for chronic diseases. Prerequisite: BIOL 0030. Enrollment limited to 20. Instructor permission required.

### **BIOL 0060. Introduction to Human Physiology.**

An introduction to human physiology aimed primarily at undergraduates who have minimal to no Biology background or who are not concentrating in biology. Acquire a basic understanding of the physiological mechanisms that allow for the running of each major organ systems. Topics include basic cardiovascular, respiratory, urinary, digestive, endocrine, and neuromuscular function, as well as aspects of reproduction and exercise physiology. Not for biology concentration credit. Lab.

### **BIOL 0080. Biotechnology Management.**

An examination of the pharmaceutical, biotechnology, and medical product industries: what they are, how they function, whence they originate, and various perspectives on why some succeed and others fail. Pathways from lab-bench to marketplace are described as are the pervasive influences of the FDA, patent office, and courts. Extensive reading; emphasis on oral presentation. Primarily intended for students planning a career in biomedical industry. Not for biology concentration credit. Students MUST register for the lecture section and the conference. Enrollment limited to 20.

### **BIOL 0100. Living Biology at Brown and Beyond.**

This unique first-year seminar taught by Dean Smith has 3 goals: 1) introduce students to the people, projects, and opportunities in Biology at Brown, 2) foster and cultivate student STEM identities and interests, 3) arm students with personal, professional and academic skills to help them succeed in Biology at Brown (and beyond). Students will visit faculty research labs, learn novel lab skills, engage in active research talks from Professors, read and discuss timely books like 'The Immortal Life of Henrietta Lacks', and more. LivBio is especially tailored to students from historically underrepresented groups, but open to all.

### **BIOL 0110. Fake Math: Analyzing the Misuse of Quantitative Concepts.**

From the Scarecrow in the Wizard of Oz to the White House, quantitative errors are made and put forth. This course will present, discuss, and challenge students to analyze misused quantitative concepts. These errors will be taken from misapplied logic; inappropriate use of numbers; graphical inaccuracies and manipulations; cognitive illusions; self-fulfilling prophecies; the wrong-but-often-relied-upon Law of Small Numbers; conditional probability; correlation, confounding, and causality; hazards of data mining; circular reasoning; and basic misuses of statistics. Introductory concepts of classical logic, probability, and statistics will be presented and reviewed, and examples of their misuse will be discussed and evaluated.

### **BIOL 0140A. Topics in Science Communications: Science Journalism Practicum.**

Participants will understand how to read scientific research papers to interpret their findings and communicate these to a broader lay audience; analyze and understand best practices in science writing and the challenges of covering science for mass media; interviewing; fair and balanced coverage in reporting; give and receive peer feedback. Not for concentration credit in Biological Sciences programs. Enrollment limited to 10. Instructor permission required. S/NC

### **BIOL 0140B. Communicating Science: Biological Illustration.**

This Sophomore Seminar is an immersion practicum that conjoins art and science. Employing a series of techniques, students will learn the protocols of scientific rendering in an intensive hands-on approach. Field trips will include the RISD Nature Lab, the Brown Greenhouse, and John Hay collection of biomedical and botanical folios. Media will include graphite/ carbon dust; pen and ink (stipple, line); coquille board; scratch-board, colored pencil, watercolor and polymer clay. Course will be driven by project presentations focused on communicating science through illustration. Not for concentration credit in Biological Sciences programs. Instructor permission required; enrollment 10 students. 1/2 credit.

### **BIOL 0140C. Communicating Science: Animating Science.**

Taught by RISD/Brown professors with the Science Ctr and Creative Mind Initiative, this course explores the pedagogy of using visual media to convey scientific concepts. The goal is to assess the quality of existing material and design new material that fill an educational need and makes science engaging and accessible. Lectures, labs, discussions, critiques and speakers. Teams collaborate on a series of short exercises leading to the creation of videos/animations explaining scientific concepts. Projects evaluated on accuracy, clarity of explanation, educational value, viewer engagement and creativity. Not for concentration credit in Biological Sciences programs. Enrollment limited to 12; instructor permission.

### **BIOL 0140K. Conservation Medicine.**

How have fruit bats contributed to the emergence of Nipah virus in Malaysia? Is an infectious cancer going to drive the Tasmanian Devil to extinction? Will a warmer world be a sicker world? We will consider these and additional topics at the intersection of global change biology and infectious disease emergence in this course. The course should be of interest to pre-med, general biology and environmental studies concentrators seeking interdisciplinary learning classroom experience. This will satisfy "Area 3" organismal biology concentration requirement for Biology/Health-Human Biology. Expected background: BIOL 0200 or equivalent placement. Enrollment limited to 12 sophomores. Instructor permission required.

### **BIOL 0150A. Techniques and Analyses using DNA-Based Biotechnology.**

Students will study and practice a range of methods used in molecular biology while examining the ways in which those tools are used in research and in the development of medical treatments. This experience, combined with the reading and discussion of selected papers from the primary literature, fosters development of a skill set critically important for the modern day biology student. Expected background: high school Biology course. Enrollment limited to 10 first year students. Instructor permission required. Half-credit course. S/NC.

### **BIOL 0150B. Statistical Computing for Biology.**

Modern biological research is a data rich endeavor, necessitating strong quantitative and computational skills to interpret the results of experimental and observational studies. In this course we will explore the application of statistics and modeling in biological research and environmental science. Topics covered will include basic probability, experimental design, sampling, hypothesis testing and mathematical models for prediction. No prior statistics knowledge is assumed. Enrollment limited to 10 first year and sophomore students. Instructor permission, based on a portfolio review. This is a half-credit course. S/NC

**BIOL 0150C. Introduction to Ethnopharmacology.**

Plant secondary metabolites are currently the subject of much research interest when investigating new target compounds for potential medicine from natural products. New leads for drugs and phytomedicines from plants and plant parts have been increasing at a rapid rate especially by the pharmaceutical industry. Many plants have been selected and collected for their specific secondary compounds and healing powers by ethnobotanists in the field. Students will gain hands on experience identifying medicinal plants, laboratory equipment, sampling procedures, field tests and extraction techniques of secondary metabolites by high throughput screening methods. Enrollment limited to 10 FYS. Instructor permission required.

**BIOL 0150D. Techniques in Regenerative Medicine: Cells, Scaffolds and Staining.**

Regenerative Medicine, also known as Tissue Engineering, is the process of creating living, functional tissues to repair or replace native tissue or organ functions that have been lost due to disease or congenital defects. As such, it is a prominent scientific discipline that can either "stand alone" or complement material-based research efforts in the areas of device design, drug delivery, diagnostics and pharmaceuticals. Students will develop proficiencies in basic cell culture techniques, early stage tissue regeneration strategies and histochemical characterization of mammalian cell constructs. Enrollment limited to 10 first year students. Instructor permission required. Half-credit course. S/NC.

**BIOL 0160. Plants, Food, and People.**

Examines the selection, breeding, cultivation and uses of food plants. Discusses the effects on agriculture of pathogens, climate change, and loss of biodiversity. Considers whether enough food can be produced for a world population of potentially 10 billion, while sustaining biodiversity and environmental quality. Course will include two papers and assistance from Writing Fellows; feedback from first paper will be available when writing second paper. Enrollment limited to 50.

**BIOL 0170. Biotechnology in Medicine.**

Introduces undergraduates to the main technological advances currently dominating the practice of medicine. Provides an overview of the objectives, techniques, and problems related to the application of biomedical technology to the diagnosis and treatment of disease and the contemporary health care industry. Topics include: pharmaceutical development and formulation; organ replacement by prosthesis and transplantation; medical imaging; tissue engineering, therapeutic cloning, regenerative medicine; stem cells; societal, economic, and ethical issues. This course does carry Biology concentration credit.

**BIOL 0180. The Biology of AIDS.**

AIDS represents an example of the vulnerability of humans to new infectious agents. We will review some human infectious diseases including small pox yellow fever and influenza, and then explore AIDS/HIV. First characterized in 1981, AIDS became the leading cause of death in U.S. males aged 25-44 within a decade. We will examine what factors make HIV such a potent pathogen. The course is intended for students beginning in biology. Expected: BIOL 0200, or equivalent placement. This course *does* carry Biology concentration credit.

**BIOL 0190E. Botanical Roots of Modern Medicine.**

This course will explore a variety of medicinal plants found throughout the world, the diverse cultures that use them in their daily lives and the scientific underpinnings of their medicinal uses. In conjunction with readings, students will gain a hands-on approach in lab, observing, identifying and growing these plants. Enrollment limited to 19. Students MUST register for the lecture section and the lab.

**BIOL 0190F. Darwinian Medicine.**

Explores evolutionary explanations of why we get sick, and how this can shape, or misshape, our interpretations of medicine. Draws on evolutionary genetics, population biology, molecular biology and physiology. This course will build on evolutionary biology and then focus on disease processes such as infection, aging, cancer, allergy, diabetes, and obesity. Enrollment limited to 19 first year students.

**BIOL 0190P. Pride and Prejudice in the Development of Scientific Theories.**

We will examine how the pace and shape of scientific progress is affected by the social/cultural context and the "personality" of the individual. We will look into how the interplay between society and the individual affects how scientific theories arise, are presented, are debated and are accepted. The course will initially focus on Charles Darwin and his theory of Natural Selection using the biography of Adrian Desmond and James Moore, "Darwin: The Life of a Tormented Evolutionist." Enrollment limited to 19 first year students.

**BIOL 0190Q. Climate Change and Species Extinction.**

In this course students will go beyond the headlines and delve into the science to explore the impact of climate change on species extinction. Students will explore the integration of science and technology through traditional textbooks, primary literature, open source databases, simulations, and discussions. Students will investigate the impact of climate change on species distribution, ecology, and behavior through interactive, inquiry-based, collaborative classroom investigations. Students will learn to integrate information from a variety of sources and disciplines and share their ideas through classroom discussion, written assignments, and oral presentations. Enrollment limited to 19 first year students.

**BIOL 0190R. Phage Hunters, Part I.**

A research-based lab class for freshmen; both semesters are required in the sequence. Students will isolate and characterize a bacteriophage viruses found in the soil. Lab work includes isolation and purification of your own phage, DNA isolation and restriction mapping, and EM characterization of your phage. Several phages will be selected for genome sequencing over winter break, and are annotated in the spring. One hour lecture, discussion, and 3 hours lab per week. Expected: AP Biology or equivalent, and HS chemistry. Instructor permission required. Admittance based on review of applications in the first class. Limited to 19 freshmen.

**BIOL 0190S. Phage Hunters, Part II.**

A research-based laboratory/class for freshmen; both semesters are required. Students will isolate and characterize a bacteriophage viruses found in the soil. Lab work includes isolation and purification of your own phage, DNA isolation and restriction mapping, and EM characterization of your phage. Several phages will be selected for genome sequencing over Winter Recess, and annotated in the spring. One hour of lecture/discussion, and 3 hours lab per week. Expected: AP Biology or equivalent, HS chemistry, and permission of the instructor. Students are expected to take fall and spring courses in the sequence. Enrollment limited to 19 first-year students. Instructor permission.

**BIOL 0190T. Bioinformatics: A Practical Introduction.**

The amount of biological sequence data has grown at an exponential pace and spurred the development of computational tools that allow biologists to use this information. Students will become familiar with useful bioinformatics tools used by researchers. The course will introduce concepts of information transfer in biological molecules, storage in public databases, and how to use tools to access this information and organize it meaningfully. We will explore tools for studying whole genomes, including high-throughput sequencing data to assemble genomes and mapping subsets. Students will gain hands-on experience using these tools. Expected: AP credit or equivalent placement for BIOL 0200.

**BIOL 0190U. The Lives of Plants.**

This course examines the lives of plants through their development, structure, function, reproduction, and responses to environmental conditions. Enrollment limited to 19 first year students.

**BIOL 0200. The Foundation of Living Systems.**

A broad overview of biological systems, emphasizing patterns and processes that form the basis of life. Explores essentials of biochemistry, molecular, and cellular biology and their relationship to the larger issues of ecology, evolution, and development. Examines current research trends in biology and their influence on culture. Appropriate for all students interested in biology. Serves as a gateway course to much of the intermediate and advanced curriculum. Placement tests are offered (contact Jody\_Hall@brown.edu); AP scores of 4 or 5 are equivalent to BIOL 0200, and place a student out of this course. Students will be assigned to a lab time during the second week of class.

**BIOL 0210. Diversity of Life.**

This course will explore biological diversity – the number of taxa, and the functions, and processes that support life – from the perspectives of ecology and evolutionary biology. It will draw on examples and case studies from the geological record, functional morphology, the evolution of organ systems in vertebrates, genomics, behavior and sexual selection in birds and invertebrates. Overarching themes will emphasize that taxonomic diversity is an emergent property of complex life on Earth, and the importance of diversity of biological functions and processes in generating and maintaining taxonomic diversity. The course is open to all students.

**BIOL 0280. Biochemistry.**

Lectures and recitation sections explore the mechanisms involved in the principles of macromolecular structure and function, the organization and regulation of pathways for intermediary metabolism, and the transfer of information from genes to proteins. It is expected that students have taken CHEM 0350 or are taking it concurrently.

**BIOL 0285. Inquiry in Biochemistry: From Gene to Protein Function.**

In this inquiry-based research course, students work in teams to formulate and test a hypothesis about how a change in genetic sequence affects enzyme function. Students will cultivate skills in scientific visualization, experimental design, data analysis, and laboratory techniques in molecular biology and biochemistry. In discussion, students will learn scientific writing through peer editing and iterative revisions to write a full scientific paper. This course is WRIT designated and will prepare students for writing an honors thesis. Expected: Students have previously taken or be concurrently enrolled in BIOL 0280. Enrollment in one lab section and one discussion section is required.

**BIOL 0300. Endocrinology.**

A basic examination of endocrinology with emphasis on hormone biosynthesis, mechanism of action, physiological roles, and endocrine pathology. Topics include: mechanism of action of steroid, amine, and peptide hormones; neuroendocrinology; reproductive endocrinology; and endocrinology of metabolism and calcium homeostasis. It is expected that students have taken BIOL 0200 (or equivalent) and CHEM 0350.

**BIOL 0320. Vertebrate Embryology.**

Introduction to the developmental anatomy of vertebrate embryos, including humans, in an evolutionary context, through lecture, discussion and microscope slide study. Gametogenesis through germ layers and their organ system derivatives. Expected: BIOL 0200, or equivalent placement, or AP Biology score of 4 or 5. Limited to 18 freshmen and 18 sophomores. Students MUST register for the lecture section and the lab.

**BIOL 0350. The Fossil Record: Life through Time on Earth.**

Course is designed for students with prior background in geology or evolutionary biology and who want to learn more about the fossil record, the origins of modern biodiversity and ecosystem structure, and interaction between organisms, and the geological and chemical cycles on the Earth. Lectures will cover major time periods during which animals and plants lived, as well as focusing on major transitions in the evolution of life on Earth. This course will fulfill requirements in both the geology/biology and evolutionary biology concentrations. Expected: BIOL 0210, GEOL 0240 or equivalent. Instructor permission, enrollment limited to 20 sophomores/juniors; register for course/lab.

**BIOL 0380. The Ecology and Evolution of Infectious Disease.**

Infectious diseases remain among the leading causes of death worldwide, and this burden is disproportionately borne by children living in low- and middle-income countries. Thus management of infectious disease remains a critical intellectual challenge in the 21st century. This course will develop and apply ecological and evolutionary theory to infectious microbes (and their hosts) via the detailed examination of a number of case studies. This will be accomplished by a combination of lectures, discussions, and readings drawn mainly from the primary literature. Assessment will be based on biweekly problem sets, two midterms and one final exam. Expected: BIOL 0200 or equivalent.

**BIOL 0390. Vertebrate Evolution and Diversity.**

An overview of vertebrate evolution that not only covers historical events, but also introduces various scientific concepts and modes of thought. Topics include past and present biodiversity, convergent evolution, biogeography, competition, continental drift, climatic change over time, the notion of evolution as progress, and a whole-animal approach to understanding evolutionary events. Enrollment limited to 50.

**BIOL 0400. Biological Design: Structural Architecture of Organisms.**

Many questions about the workings of living creatures can be answered by joining math, physics, and biology. We will identify basic physical science concepts that help biologists understand the structure and function of animals, plants, and microorganisms, and use these to study how the physical world constrains and facilitates the evolution of the extraordinary design and diversity of organisms. For first and second year students; others by permission. Recommended background: BIOL 0200, or equivalent. Enrollment limited to 40. Instructor permission required.

**BIOL 0410. Invertebrate Zoology.**

A survey of invertebrate animals emphasizing evolutionary patterns and ecological relationships. Functional morphology, physiology, reproduction, development, and behavior of invertebrates will be examined. Laboratory exercises and two separate day-long field trips provide firsthand experience with the animals. Expected: BIOL 0200 or equivalent. Enrollment limited to 44. Students MUST register for the lecture section and a lab.

**BIOL 0415. Microbes in the Environment.**

Examines the diversity of microbial life in the environment. Surveys key services that microbes perform on land and sea, including biodegradation of contaminants in the environment and ecosystem processes related to climate change. Examines biological interactions of symbioses, quorum sensing, and antibiotic production in a ecological context. Explores the genomic mechanisms explaining phylogeny and life history strategies in microbes. Demonstrate knowledge of the diversity of microbes in the environment and benefits in an ecological/evolutionary context. Lecture based, two fieldtrips to expand appreciation for microbial ecology. BIOL 0200 or equivalent placement; CHEM 0330. Enrollment limited to 20 sophomores, juniors and seniors.

**BIOL 0420. Principles of Ecology.**

The principles, concepts, and controversies involved in the study of the distribution and abundance of plant and animal populations and their integration into natural communities. Emphasizes interactions among organisms and the hierarchical nature of ecological processes affecting individuals, populations, and communities. Expected: BIOL 0200 (or equivalent) and MATH 0090. Lectures and weekly discussion.

**BIOL 0430. The Evolution of Plant Diversity.**

Examines the evolutionary history of plants from a phylogenetic perspective. Introduces the science of phylogenetics - how to infer phylogenies and how to use them to understand organismal evolution. Highlights major trends in plant evolution over the past 400 million years. Lectures survey major plant lineages, with special focus on flowering plants. Weekly labs, field trips, and assignments stress basic plant anatomy and morphology, identification, and learning the local flora. Expected: BIOL 0200 (or equivalent placement).

**BIOL 0440. Inquiry in Plant Biology: Analysis of Plant Growth, Reproduction and Adaptive Responses.**

This course focuses on what plants do and how they do it. Introduces the biology of plants, their growth and development, structural features, and their cellular and organismal responses to key stimuli. Examines physiological, reproductive and developmental strategies throughout the plant life cycle and in relation to environmental challenges. During laboratory section meetings, students pursue inquiry-based group research projects addressing novel questions about mechanisms that control plant growth and development. Laboratory section is required. Prerequisites: One Brown course with laboratory section in either Biology or Chemistry. Enrollment limited to 24 students.

**BIOL 0455. Coastal Ecology and Conservation.**

Will enable to students to master fundamental ecological concepts and understand how this knowledge can be used to inform coastal conservation and management. Case studies from New England and elsewhere, field trips to rocky shores, salt marshes and coastal ecosystems enable students to develop scientific skills and experience the challenges of coastal conservation science. The course is aimed at freshmen and sophomores. Expected background: BIOL 0200 or equivalent placement. Enrollment limited to 10 students, and written permission required. Email (Mark\_Bertness@brown.edu) to receive course application (due May 1). Admitted students register for the course in September.

**BIOL 0460. Insect Biology.**

Focuses on characteristics that make insects unique and why more insect species have been described than all other organisms combined; the opportunity to investigate diversity and adaptation; their abundance, small size, and short lifespans; their importance as agents of biocontrol pollination, agricultural pests, and disease vectors. Expected: BIOL 0200 or equivalent. Enrollment limited to 20. Students MUST register for lecture AND lab. Primarily for freshmen and sophomores.

**BIOL 0470. Genetics.**

Genetic phenomena at the molecular, cellular, organismal, and population levels. Topics include transmission of genes and chromosomes, mutation, structure and regulation of the expression of the genetic material, elements of genetic engineering, and evolutionary genetics. One laboratory session and one discussion session per week. (Students should not plan to take BIOL 0470 after 1540.) Expected: BIOL 0200 (or equivalent placement). Students will be assigned to Lab sections the first week of class.

**BIOL 0480. Evolutionary Biology.**

A broad introduction to the patterns and processes of evolution at diverse levels of biological organization. Topics covered include natural selection, adaptation, speciation, systematics, macroevolution, mass extinction events, and human evolution. Weekly discussion sections involve debates on original research papers. Occasional problem sets involve computer exercises with population genetics and phylogeny reconstruction. Expected: BIOL 0200 (or equivalent placement).

**BIOL 0495. Statistical Analysis of Biological Data.**

A first course in probability distributions and the use of statistical methods for biological data. Topics covered will include describing data, statistical inference (hypothesis tests and confidence intervals), analyzing associations, and methods for categorical data (contingency tables and odds ratios). Methods will be applied to data drawn from areas of biological inquiry. For statistics or related science credit in Biology programs. Expected background: BIOL 0200 or equivalent, math equivalent to MATH 0100. This course is for related science credit only in Biological Sciences concentration programs. Enrollment limited: 40 undergraduates-20 juniors and 20 sophomores. Registration for seniors requires permission from the instructor.

**BIOL 0500. Cell and Molecular Biology.**

This course examines the structure and function of the basic unit of an organism, the cell. An experimental approach is used to examine cellular functions, ranging from gene transcription, cell division and protein secretion, to cell motility, and signal transduction. Relevance to health and disease will be considered. Expected: BIOL 0200 (or equivalent placement).

**BIOL 0510. Introductory Microbiology.**

Introduces role of microbes in our understanding of biology at the cellular and molecular level. Focuses on microbial significance for infectious disease, public health, genetics, biotechnology, and biogeochemical cycles. Laboratory involves basic microbiological techniques and selection and manipulation of microbes. Expected: BIOL 0200 (or equivalent placement). Students MUST register for the lecture section, conference, and the lab. For spring 2021 only, this course will be limited to sophomores, juniors, and seniors. In spring 2022 and beyond, enrollment will once again be open to first-year students.

**BIOL 0530. Principles of Immunology.**

Introduction to experimental and theoretical foundations of immunology. Focuses on concepts, landmark experiments and recent advances. Topics include innate and adaptive immunity; structure/function of antibody molecules and T cell receptors; regulation of immune responses through cellular interactions. Applications of concepts to medically significant issues (vaccines, transplantation, inflammation, autoimmunity, cancer, HIV/AIDS) are discussed. Interpretative analysis of experimental data is emphasized. Expected background: BIOL 0200 or equivalent placement credit.

**BIOL 0600. Genetic Screening in Model Organisms.**

Using gene silencing (RNAi) in the nematode *C. elegans*, students will identify genetic modifiers of proteins with roles in aging by reverse genetics. Analyzing the effect of knocking down genes on the level of aging-related proteins tagged with fluorophores (GFP, RFP, etc.). Students will use function-specific RNAi libraries (transcription factors, kinases, etc) established in our lab. Students will evaluate the effect of genetic modifiers on proteostasis and lifespan, also familiarize *C. elegans* work and appreciating the use of model organisms, the students will master microscopy, genetic crosses, gene silencing, and molecular and biochemical readout assays such as qPCR and immunoblotting.

**BIOL 0800. Principles of Physiology.**

Introduction to the function and integration of organ systems with an emphasis on human physiology. Includes basic concepts in cell and organ system physiology as well as fundamentals of modern trends in physiological science. Emphasizes the application of physical and chemical principles to organ function at both the cellular and systemic levels. Expected: BIOL 0200 or equivalent.

**BIOL 0860. Diet and Chronic Disease.**

This course addresses the relationship of food to the development and treatment of chronic diseases. Chronic diseases discussed are obesity, dyslipidemia/heart disease, diabetes mellitus, cancers and osteoporosis. Dietary recommendations for these diseases are critically assessed. Geared toward students interested in nutrition, medicine, and public health. Prerequisites: BIOL 0030, plus permission of the instructor. Enrollment limited to 20.

**BIOL 0920A. Controversies in Medicine.**

Why and how do controversies in medicine emerge at specific moments in time? Why do scientists come to different conclusions based on the same data? Does it matter how we interpret controversies? This sophomore-level seminar critically analyzes contemporary controversies in medicine and public health. Using a case study approach, we will examine the social and political assumptions that inform important controversies. Questions related to the relationship between science, media, activism, and health inequality will be woven into the case studies. Enrollment limited to 20 sophomores. (For theme, not biology, credit in Health and Human Health and Biology only.)

**BIOL 0940A. Viral Epidemics.**

This sophomore seminar will examine epidemics (outbreaks) of viral infections from a historical perspective. We will also cover current literature and up to the minute news accounts of infectious disease related outbreaks occurring around the globe. The major focus will be on virus related diseases but any microbial outbreak in the news will be explored. The seminar will cover basic aspects of microbial pathogenesis so students can gain an appreciation of microbial host interactions. Essential writing skills will also be developed. Enrollment limited to 20 sophomore students.

**BIOL 0940B. Sophomore Seminars in Biology: Life in a Shell.**

This Sophomore seminar is an examination of broad themes in whole animal physiology with an emphasis on environmental adaptations. The foundation of the course will be the instructor's recent book "Life in a Shell: A Physiologist's View of Turtle." A consideration of this iconic animal's novel biological traits will lead into comparisons with our own biology and that of other animals. Topics: respiration, circulation, metabolic rate, buoyancy control, overwintering, migration, reproduction, and bone structure and function. Relevant original research papers will be used. Mandatory S/NC; enrollment of 20 students; override required. Expected: BIOL 0200 or equivalent placement credit.

**BIOL 0940C. Sophomore Seminar: Insect Biology.**

Focuses on characteristics that make insects unique and why more insect species have been described than all other organisms combined; the opportunity to investigate diversity and adaptation; their abundance, small size, and short lifespans; their importance as agents of biocontrol pollination, agricultural pests, and disease vectors. Expected: BIOL 0200 or equivalent. Enrollment limited to 12 sophomores only. Students MUST register for lecture AND lab.

**BIOL 0940D. Rhode Island Flora: Understanding and Documenting Local Plant Diversity.**

This Sophomore Seminar focuses on species level identification of plants in Rhode Island and will cover the dominant plant species in each of the state's main habitats including coastal wetlands and uplands, freshwater wetlands, peatlands, upland forests, and disturbed areas. Students will learn to identify plants using online interactive keys as well as more technical dichotomous keys and will also cover basic ecological processes in each habitat including the interaction of soils, geology, and hydrology. Materials related to plant morphology, plant taxonomy, plant evolution, understanding phylogenetic trees, and botanical illustration. Instructor permission required.

**BIOL 0940E. Precision Medicine or Privileged Medicine? Addressing Disparities in Biomedical Research.**

This course examines the biomedical research behind precision medicine, disparities in the inclusiveness of this research, and implications of these disparities for the relevance of precision medicine innovations for people and places in Rhode Island. We will focus on these four questions: What new knowledge is making precision medicine possible? Who has been the focus of the biomedical research generating this knowledge, and why? How might inclusiveness of this research impact healthcare disparities in Rhode Island? What is needed to improve the design and outcomes of precision medicine research so that it provides benefits and mitigates harms for all?

**BIOL 0940G. Antibiotic Drug Discovery: Identifying Novel Soil Microbes to Combat Antibiotic Resistance.**

This is a Course-based Undergraduate Research Experience (CURE) class that will provide students with the chance to propose, design and conduct their own research projects. Antibiotic resistance is a major global health threat. Pharmaceutical companies are less likely to fund research and development of new antibiotics due to their relative low profitability. As bacteria become more resistant to antibiotics, it is critical that we have a robust pipeline ready to combat these pathogens. The main focus of the course will be for students to discover new antibiotics in soil bacteria that can be used to treat infectious disease.

**BIOL 0945. Toolbox for Scientific Research.**

Why is scientific research important? What is the scientific method? What are hypotheses and theories? How do scientists identify research questions, design experiments, fund research, and communicate results? This sophomore seminar is designed for students who want to understand and engage in scientific research in biology. Through active learning seminars, group discussions, and meetings with scientists, students will gain a deeper understanding and an appreciation for the principles, practice, and culture of scientific research. The course will also help develop practical and transferable skills to succeed in research and give students an opportunity to connect with research groups at Brown.

**BIOL 0960. Independent Study in Science Writing.**

BIOL 0960 (fall/spring) is a half credit Independent Study in Science Writing course incorporating a nontechnical science journalism component into the Biology curriculum. Assignments may include investigative or analytical reviews, or feature articles on ethical or social impacts of new discoveries in the biological sciences. BIOL 0960 requires the submission of a formal project proposal completed collaboratively by the student and faculty mentor (see the Biology Undergraduate Education research page for details). BIOL 0960 is not for concentration credit in the biological sciences programs.

**BIOL 1040. Ultrastructure/Bioimaging.**

This course examines microscopy and image analysis in the life sciences. Theoretical and practical aspects of microscopy will be discussed. Students will obtain hands-on experience with electron microscopy, light microscopy, fluorescence microscopy, and confocal microscopy. Students will learn to display images in 3D. Advanced undergraduates. Instructor permission required.

**BIOL 1050. Biology of the Eukaryotic Cell.**

Examines organelles and macromolecular complexes of eukaryotic cells with respect to structural and functional roles in major cellular activities. Emphasizes experimental basis for knowledge in modern cell biology using original literature, and discusses validity of current concepts. For advanced undergraduates and beginning graduate students. Complementary to BIOL 1270 and 1540. Prerequisites: BIOL 0280 or 0470 or 0500, or instructor permission. Graduate students register for BIOL 2050.

**BIOL 1070. Biotechnology and Global Health.**

This course examines contemporary biotechnologies used to combat the predominant, worldwide problems in human health. Global health will be addressed from the scientific and engineering perspectives while integrating public health policy, health systems and economics, medical and research ethics, and technology regulation and management. This course is intended for graduate and advanced undergraduate students in biology, engineering, or related fields who have an interest in global health initiatives. Expected background: BIOL 0200 and BIOL 0800, or equivalents. Preference will be granted to graduate students in the Biotechnology and Biomedical Engineering programs. Only for related course credit in Biology. Enrollment limited to 20. Instructor permission required.

**BIOL 1090. Polymer Science for Biomaterials.**

Basic principles of polymer science and its application in medicine. Topics include basic polymerization chemistry, kinetics of polymerization and depolymerization with emphasis on bioerodible polymers, characterization of polymers by physical methods, bulk and surface properties, behavior of polymers in solutions, crystallization, gelation, and liquid crystals. Hands-on experience with polymer characterization. Expected: CHEM 0350. Enrollment limited to 25.

**BIOL 1100. Cell Physiology and Biophysics.**

Current topics in cell physiology, with an emphasis on membrane-mediated interactions between cells and their environment. Topics may include: ion channel structure, function and regulation; intracellular regulatory molecules; mechanisms of sensory transduction; membrane receptors and second messenger systems; vesicle secretion; and cytoskeletal regulation of cell function. Lectures, discussion, and student presentations of the current literature. Expected: BIOL 0800 or NEUR 0010. Instructor permission required. Registration overrides will not be given out until after the first one or two classes. Enrollment limited to 30, and admission is based on seniority -- graduate students, seniors, then juniors. (Not for first and second-year undergraduates.)

**BIOL 1110. Topics in Signal Transduction.**

Signal transduction is one of the most rapidly developing fields in biomedical sciences. Defects in signaling pathways can be responsible for diseases such as cancer, diabetes, cardiovascular disorders and psychoses. This course offers students an overview of the molecular pathways that allow cells to receive and process signals from their external environment, with an emphasis on the emerging state-of-the-art techniques used in their study. Expected background: BIOL 0200, 0280, 0470, or 0500. Enrollment limited to 20 juniors and seniors. Instructor permission required.

**BIOL 1120. Biomaterials.**

A biomaterial is defined as a material suitable for use in medical implants that come in direct contact with patients' tissues. These include polymers, metals, and ceramics, and materials obtained from biological sources or through recombinant biotechnology. Goal: to provide comprehensive coverage of biomaterial science and technology. Emphasizes the transition from replacement to repair strategies. For advanced undergraduates and graduate students. Prerequisite: BIOL 0800 or instructor permission.

**BIOL 1140. Tissue Engineering.**

Tissue engineering is an interdisciplinary field that incorporates progress in cellular and molecular biology, materials science, and engineering, to advance the goal of replacing or regenerating compromised tissue function. Using an integrative approach, we will examine tissue design and development, manipulation of the tissue microenvironment, and current strategies for functional reconstruction of injured tissues. Expected: CHEM 0330, plus BIOL 0500 or 0800. Enrollment limited to 20. Instructor permission required.

**BIOL 1150. Stem Cell Engineering.**

Stem cell engineering focuses on using adult, embryonic, and induced pluripotent stem cells to repair damaged or diseased tissues. This course will examine the role of stem cells in development, tissue homeostasis, and wound healing, as well as how they can be used for tissue engineering and cell-based regenerative therapies. We will also discuss the ethical, legal, and regulatory issues that accompany current and emerging stem cell engineering endeavors. The course will use an inverted lecture and classroom discussion format to effectively deliver relevant information. Emphasis is placed on oral and written communication skills applied to assignments, tests, and individual projects. As an additional part of this course, students will receive hands-on training in how to culture cells and assess samples for stemness characteristics in a group laboratory setting.

**BIOL 1155. Hormones and Behavior.**

This class will explore the hormonal basis of animal behavior. We will assess this relationship at the molecular, cellular, physiological, and evolutionary levels, focusing on a wide range of species beyond humans. Our goal is to understand the diverse mechanisms by which hormones act throughout the animal body to mediate what individuals do in their natural environment. We will explore how selective forces shape these mechanisms to not only arrive at common behavior traits, but also unique and unusual traits that allow species to thrive in harsh or extreme environments.

**BIOL 1160. Principles of Exercise Physiology.**

Application of the basic principles of physiology to the study of the response mechanisms of the human body during exercise. Topics include muscle and neural control, energy metabolism, cardiovascular and respiratory effects, endocrinology, principles of training, and special topics (e.g., diving, high altitude, and microgravity). Student presentations based on scientific articles are included. Expected: BIOL 0800 or written permission of the instructor.

**BIOL 1180. Comparative Animal Physiology.**

Comparative approach to the function and regulation of animal systems with an emphasis on vertebrates. Topics include circulation, gas exchange, neuromuscular function, excretion, acid-base and ion regulation, and temperature regulation. Considers the unity and diversity of physiological processes in animals differing both in phylogeny and environmental adaptation. Original papers are discussed. Expected: BIOL 0800 or equivalent.

**BIOL 1190. Synaptic Transmission and Plasticity.**

Synapses are the means by which the nervous system communicates. In this seminar-style course, we will explore the molecular and physiological underpinnings of synaptic transmission. We will then examine ways in which synapses can modulate their strength during development, learning, after addictive drugs, and other adaptive processes. Readings are ONLY from primary literature. Course recommended for juniors and seniors. Required: NEUR 1020. Enrollment limited to 20. Instructor's permission required, attendance at class on the first day is mandatory.

**BIOL 1200. Protein Biophysics and Structure.**

Structural Biology is the science to determine 3-dimensional structures of biomacromolecules (i.e. proteins, RNA, and DNA). These structures enable biologists to understand and explore their function. Since proteins, RNA, and DNA are the primary molecules of life, structural biology enables us to understand and influence these molecular machineries which form the basis of all biological processes. Throughout the class, the students will see examples of biologically important proteins and protein complexes that will allow them to correlate structure and biological function. Prerequisite: BIOL 0280.

**BIOL 1210. Synthetic Biological Systems.**

A multidisciplinary course that combines science and engineering providing a solid foundation in a cutting edge field of biological engineering. Synthetic biology is a mixture of biology, chemistry, engineering, genetic engineering and biophysics. It builds on recent work in systems biology which involves the modeling of biological systems, but goes further in that it involves the construction and standardization of biological parts, that fit together to form more complex systems. Expected: at least four courses beyond BIOL 0200, CHEM 0330, PHYS 0300, ENGN 0300, MATH 0900, or CSCI 0040.

**BIOL 1220. Synthetic Biological Systems in Theory and Practice.**

A multidisciplinary laboratory, lecture, and discussion based course that combines several areas of science and engineering providing a foundation in the cutting edge field of synthetic biological engineering. The field of synthetic biology is centered around trying to make biology easier to engineer. It builds on recent work in systems biology which involves the modeling of biological systems, but goes further in that it involves the construction and standardization of biological parts that fit together making complex systems. This course will combine classes, guest lectures and discussion lab visits to give students the best possible tools for understanding and applying research in synthetic biology. Expected: at least two courses in any of the key disciplines (biology, chemistry, physics, math, engineering, computer science) beyond the introductory level, and permission of the instructor.

**BIOL 1222A. Current Topics in Functional Genomics.**

A technological revolution in genomics has exponentially increased our ability to gather biological data. A host of new methods and types of analysis has arisen to accommodate this dramatic shift in data collection. The broad scope of inquiry has ushered in an era of "system-wide" approaches and brute-force strategies where rare signals can be detected and studied. In this seminar we will cover papers that embody this new approach. Students typically have taken an advanced undergraduate-level course in biology.

**BIOL 1250. Host-microbiome Interactions in Health and Disease.**

Will focus on current understanding of how various microbiomes communicate and interact with the host and the factors that influence these interactions. We will discuss how the new technologies such as metagenomics and metabolomics have enhanced our understanding of host-microbiome interactions in health and disease. Students will have the opportunity to participate in discussions on how to apply recent discoveries to disease processes, health restoration and maintenance. The course will help students develop skills in critical thinking and in reading and evaluating original scientific literature. Expected: students with a background in basic microbiology (BIOL 0530 or its equivalent). 20 enrollment.

**BIOL 1260. Physiological Pharmacology.**

Covers the physiology of human disease (e.g., Heart failure and arrhythmia; cancer signaling pathways with a focus on breast cancer; neurological disorders such as schizophrenia and Parkinson's disease) and discusses the pharmacology of the drugs used to treat disease. A group of the most commonly prescribed drugs is discussed in terms of their fundamental modes of action and clinical importance. Expected: BIOL 0800.

**BIOL 1270. Advanced Biochemistry.**

An advanced course in biochemistry, biochemical methods, and reading of the primary literature, featuring systematic coverage of the biochemistry of the central dogma, including DNA (replication, repair, recombination), RNA (regulation and mechanism of transcription, processing, turnover), and proteins structure, synthesis, modification, degradation, mechanisms of action, function). Expected: BIOL 0280, CHEM 0350, 0360. Graduate students register for BIOL 2270.

**BIOL 1290. Cancer Biology.**

Provides a conceptual understanding of molecular events underlying development of human cancer. Focused on genetic changes leading to malignant transformation of cells. Covers cell cycle control, DNA damage, mutagenesis, cancer predisposition syndromes, oncogenic viruses, tumor immunology, metastasis, cancer chemotherapy and drug resistance. Lecture plus discussion of primary literature. Prerequisites: BIOL 0280 OR BIOL 0470 OR BIOL 0500.

**BIOL 1300. Biomolecular Interactions: Health, Disease and Drug Design.**

Interactions between the molecules of life—proteins, RNA, DNA, membrane components—underlie all functions necessary for life. This course focuses on how nature controls these interactions, how these interactions can go awry in disease, and how we can learn the rules of these interactions to design drugs to treat disease. Students will review the physical basis of molecular interactions, learn classic and state-of-the-art high-resolution and high-throughput tools used to measure interaction, and survey the experimental and computational strategies to harness these interactions using a case study in rational drug design. Prerequisite: Introductory Biochemistry (BIOL 0280). Enrollment limited to 20; instructor permission.

**BIOL 1310. Developmental Biology.**

Covers the molecular and cellular events of development from fertilized egg to adult. Genetic basis of body form, cell fate specification and differentiation, processes controlling morphogenesis, growth, stem cells and regeneration will be examined. Differential gene regulation, intercellular signaling and their evolutionary conservation will be central to discussion of mechanisms governing developmental processes. Additional topics: developmental plasticity, impact of epigenetic and environmental factors, and basis of disease gleaned from developmental biology research. Live embryos will complement and reinforce concepts covered in class. Enrollment limited to 36. Expected: BIOL 0200 (or equivalent), and one course in genetics, cell biology or embryology.

**BIOL 1330. Biology of Reproduction.**

This course is an advanced, seminar-based course. Primary literature is emphasized to complement the format of extensive student seminar presentations. It is essential that students have a strong background in biology in order to gain the most from this course. The emphasis of the course is student seminar presentation and extensive discussion on the material. This is often the first opportunity for students to present/discuss science in a seminar format. Expected background: a course in Cell Biology (e.g. BIOL 0500 or 1050), and two additional Biology courses above the introductory (BIOL 0200) level. Enrollment limited to 20.

**BIOL 1410. Evolutionary Genetics.**

This course will focus on selected topics in molecular population genetics, molecular evolution, and comparative genomics. Classic and current primary literature at the interface of evolution and genetics will be discussed in a seminar format. The laboratory involves wet-lab exercises (allozymes, PCR- RFLP, sequencing), plus computer labs using DNA analysis packages. Students will prepare a final grant proposal on specific research interests. Expected: BIOL 0470 or 0480. Students MUST register for the lecture section and the lab. Enrollment limited to 20.

**BIOL 1420. Experimental Design in Ecology.**

An overview and discussion of the basic principles used to design lab and field experiments in ecology and environmental science. Topics include: replication and statistical power, appropriate use of factorial designs, nonparametric methods, post hoc tests, natural versus manipulative experiments, experimental artifacts and impact study design. Discussions based on primary literature and a new text. Expected: BIOL 0420.

**BIOL 1425. Phylogenetic Biology.**

This course is the study of the evolutionary relationships between organisms, and the use of evolutionary relationships to understand other aspects of organism biology. This course will provide a detailed picture of the statistical, mathematical, and computational tools for building phylogenies and using them to study evolution. Enrollment is by instructor permission. Students will present scientific papers in class and complete a final project consisting of their own phylogenetic analysis. Expected Background: Evolutionary Biology and quantitative methods (such as statistics, computation, or math). Open to juniors, seniors, and graduate students. Enrollment limited to 16.

**BIOL 1430. Population Genetics.**

Population genetics considers the genetic basis of evolution: temporal changes in the genetic composition of populations in response to processes such as mutation, natural selection and random sampling effects. Starting from first principles, this course will develop a theoretical understanding of these dynamics. We will also explore the application of these tools to genomic-scale data in order to quantify the influence of various evolutionary processes at work in natural populations. Assessments will be based on problem sets, two midterm exams and one final exam. Prerequisites: MATH 0100 and one of BIOL 0470 or 0480, or permission.

**BIOL 1435. Computational Methods for Studying Demographic History with Molecular Data.**

This course broadly covers the field of population genetics and genomics, and focuses on how inferences about demographic history can be made from genetic variation observed across populations today. The main question we will endeavor to answer in class is "How can we infer demographic history in a population using next-generation sequencing data?" Students will also learn how to apply computational tools/methods to infer demographic history using both simulated and real DNA sequencing data.

**BIOL 1440. Marine Biology.**

An examination of current topics in the ecology of marine organisms and communities. Current literature and ideas are analyzed in a seminar format (5hr/week). A class research project provides hands-on experience with designing and interpreting experimental field work. Prerequisites: BIOL 0410 and 0420. Instructor's permission required.

**BIOL 1450. Community Ecology.**

This course will explore foundational concepts in community ecology, and will draw on examples and case studies from marine and terrestrial ecosystems, including species-rich tropical rain forests and coral reefs, the marine intertidal and benthic environments, and species-poor forests and grasslands of the temperate zone. Overarching themes will emphasize theoretical frameworks to understand the evolutionary origins and maintenance of this biological diversity. This will be accomplished using traditional lectures, weekly student-led discussions, readings of the primary literature, and class activities. Expected background: BIOL 200 or equivalent placement; and BIOL 0420; OR instructor permission.

**BIOL 1465. Human Population Genomics.**

An introduction to human genomics and the evolutionary forces that shape observed genetic variation across humans today. Topics will include the relationship among humans and other primates, human population genetics and genomics, and examples of the concomitant evolution of both cultural traits and domesticated organisms. Assignments include a class presentation and reviewing papers on a selected topic. Expected background: BIOL 0470 or 0480, and BIOL 0495, PHP 2500, or equivalent. Enrollment limited to 25. Instructor permission required.

**BIOL 1470. Conservation Biology.**

Conservation Biology is the scientific study of the phenomena that affect the maintenance, loss, and restoration of biological diversity. Topics covered include: 1) the impacts of global warming, species invasions, and habitat destruction on biodiversity, 2) strategies developed to combat these threats, and 3) a consideration of key economic and ethical tradeoffs. Special attention will be paid to current debate and controversy within this rapidly emerging field of study. Readings will include the primary literature. A term-paper will be required. Prerequisite: BIOL 0420 or instructor permission. Enrollment limited to 30.

**BIOL 1475. Biogeography.**

Will provide an overview of the field of biogeography--the study of geography of living organisms. Class meetings will be split between lectures and discussions. Each discussion will expose students to foundational papers, which set the context for the field's development, and more recent papers, which show where the field is headed. Each student will conduct a short (but time consuming) original research project on some topic in biogeography. Prerequisites: BIOL 0420 and 0480. Expected: one taxonomy-based course (e.g., BIOL 0410, 0430, or 0460). Enrollment limited to 15 juniors, seniors, and graduate students. Instructor permission required.

**BIOL 1480. Terrestrial Biogeochemistry and the Functioning of Ecosystems.**

Three fundamental multidisciplinary questions will be addressed: How do ecosystems work? What limits the growth of life on Earth? How are humans altering the framework in which all life exists? Earth is basically a closed chemical system, and the reactions that support life are fueled by sunlight. But added to this chemistry and physics is the tremendous influence of life. Life created an oxygen atmosphere; the evolution of biological nitrogen fixation exponentially increased how many organisms could exist, and the soils that support human food production developed only by biologically-mediated processes. Throughout Earth's 4.5 billion-year history changes in Earth's basic biogeochemical processes have been fairly slow. Under our inattentive stewardship, we have almost instantaneously altered all of the major element cycles. We will focus heavily on what these changes mean for life on Earth. Instructor permission required.

**BIOL 1485. Climate Change Health and Ecology.**

Explore the linkages between climate change and health. Students will come to appreciate the topic through the foundations of the primary disciplines relevant to the field including global health, environmental change, disease ecology, and others. Climate-health linkages will be learned through weekly case studies addressed collectively through student-centered lectures, discussion of the primary literature, groups activities and guest lectures from campus faculty on topics ranging from climate migration to infectious disease range shifts. Expected background: BIOL 0475, or BIOL 1470, or PHP 1070, or PHP 1920, or equivalent experience with instructor's permission. Enrollment limited to 12 juniors and seniors.

**BIOL 1495. 500 Million Years of Land Plants.**

Explores the evolution of terrestrial plants and the ecosystems they structure. Introduces the fossil record of plants and basic patterns of plant diversification on land. Highlights major trends in the evolution of plant morphology, anatomy, and ecology. Lectures survey the diversity and community structure of different geological time periods. Weekly discussion sections, field trips, and assignments examine major evolutionary trends, particularly with regard to climatic changes over time. Expected: BIOL 0400, BIOL 0430, (or equivalent placement). Enrollment limited to 15 students; instructor permission; register for section and conference.

**BIOL 1500. Plant Physiological Ecology.**

An in-depth look at plant ecological strategy, focusing on the anatomical and physiological adaptations of plants to particular environments. Additional topics include plant-animal interactions, historical biogeography, and community assembly processes. A comparative, phylogenetic approach is emphasized. Lectures present a broad overview of topics, and discussions focus on current outstanding problems. Lab exercises provide hands-on experience in designing experiments, measuring plant performance, and scientific writing. Required laboratory hours to be arranged by the instructor. Expected: BIOL 0430 or BIOL 0440. Enrollment limited to 15.

**BIOL 1515. Conservation in the Genomics Age.**

The course will introduce students to the rapidly developing field of molecular ecology, emphasizing its importance for conservation biology. Students will explore key principles in evolutionary ecology based on readings, lectures, and discussions. Participants will also gain practical experience with ecological, genomic, and computational methods in the lab. This course is intended for advanced undergraduate and graduate students. Suggested prerequisites include Principles of Ecology (0420); Evolutionary Biology (0480) or Genetics (0470); the Lab Techniques Workshop for Biology Students provided by MDL; or similar with permission. Students will obtain permission from the professor to enroll.

**BIOL 1520. Innate Immunity.**

Innate immunity is the initial response to microbes that prevents infection of the host. It acts within minutes to hours, allowing the development of the adaptive response in vertebrates. It is the sole mechanism of defense in invertebrates such as insects. The components and mechanisms dictating this response are explored. Prerequisite: BIOL 0530. Enrollment limited to 30. Graduate students must obtain instructor permission.

**BIOL 1540. Molecular Genetics.**

Even in this era when whole genome DNA sequencing has become routine, there are still thousands of eukaryotic genes with unknown functions. Genetic screens for mutations that alter pathways of interest remain the premier approach to understanding gene function in the context of the organism. In Molecular Genetics students will learn the key concepts involved in designing and interpreting genetic screens using the powerful tools available in model animal, plant, and fungal organisms. Students will also learn how to understand and analyze results presented in the primary scientific literature. Furthermore, students will gain an appreciation of how the field of genetics has changed through discoveries and technological advances made over the past 50 years. Graduate students should register for BIOL 2540.

**BIOL 1545. Human Genetics and Genomics.**

This course will exemplify the power of genetically informed approaches to understanding human biology. It is intended for advanced undergraduate students and graduate students; prerequisites include BIOL0470 or equivalent. The course is based in lectures, reading material (textbook and primary literature), and in-class discussions. Course topics include: medical genetics and genomics; methods to study human genotypes and related phenotypes; industry-related topics; and ethical and societal implications of genome science. It will benefit students with career interests in basic science, medicine, biotechnology, or science policy. Enrollment is limited to 20 students; selection will be based on seniority, prerequisites, and registration order.

**BIOL 1550. Biology of Emerging Microbial Diseases.**

Emerging diseases influence the health of human populations in less developed countries and are expected to have similar effects worldwide. Rising incidence of "new" diseases underscores the need for knowledge of infection mechanisms and their outcomes. Focuses on biochemical, genetic, cellular and immunological events of emerging pathogens and host responses. Expected: BIOL 0470 or BIOL 0530.

**BIOL 1555. Methods in Informatics and Data Science for Health.**

The goal of this course is for students to develop a solution that uses data science and informatics approaches to address a biomedical or health challenge. This course will teach informatics and data science skills needed for public health and biomedicine research. Emphasis will be given to algorithms used within the context of biomedical research and health care, including those used in biomolecular sequence analysis, electronic health records, clinical decision support, and public health surveillance. This course has been developed as a Course-based Undergraduate Research Experience (CURE), where students will gain experience with the scientific method, its application, and presentation.

**BIOL 1560. Virology.**

Emphasizes the understanding of molecular mechanisms of viral pathogenesis. Begins with a general introduction to the field of virology and then focuses on the molecular biology of specific viruses that are associated with human disease. Lectures based on current literature. Prerequisite: BIOL 0280, 0470, or 0530, or instructor permission.

**BIOL 1565. Survey of Biomedical Informatics.**

Survey course provides overview of field of biomedical informatics. Topics include computer science, healthcare, biology, social science. This course is designed to be complementary to BIOL 1555. Emphasis given to understanding the organization of biomedical information, effective management of information using computer technology, impact of such technology on biomedical research, education, patient care. Major aim explores the process of developing and applying computational and information science techniques for assessing current information practices, determining information needs of health care providers and patients, developing interventions or supporting clinical practice using informatics, and evaluating the impact of informatics solutions from a biomedical perspective.

**BIOL 1575. Evaluation of Health Information Systems.**

This course covers the field of evaluation of health information systems (HIS) in a range of roles and environments, in the US and worldwide. It includes topics in health information system (HIS) design and deployment, healthcare workflow, quantitative and qualitative evaluation methods and socio-technical environment for HIS. Emphasis is given to understanding the range of evaluation questions that can be asked, identifying the key stakeholders, understanding available evaluation techniques, and designing rigorous but achievable studies. Examples will include Open Source systems, medical Apps, and economic evaluation, the role of evaluation frameworks and theories, and notable HIS successes and failures. Recommended: past or concurrent enrollment BIOL 1565 or a public health course covering clinical research.

**BIOL 1595. Artificial Intelligence in Biomedicine.**

This course will teach the fundamental theory and methods of artificial intelligence (AI) alongside their application to the biomedical domain. It will give a representative overview of traditional methods as well as modern developments in the areas of (deep) machine learning, natural language processing and information retrieval. The course is designed to be accessible to non-computer science audiences and will not require extensive prior programming experience. The course will be accompanied by practical assignments applying the discussed techniques in a biomedical context. Understanding of formal theoretical knowledge will be assessed in a final exam. The course is designed for students concentrating in domains such as Computational Biology and Applied Mathematics-Biology; or Neuroscience concentrators who have completed a course in introductory statistics (e.g., BIOL 0495).

**BIOL 1600. Development of Vaccines to Infectious Diseases.**

Provides background steps involved in vaccine development, from conceptualization to production to deployment. Considers infectious diseases and associated vaccines in context of community health. Appropriate for students wanting to gain an understanding of vaccine science. Provides a foundation for advanced courses in immunology and infectious disease, biomedical research, or medical/graduate studies. Activities include a weekly section meeting for discussion of relevant primary literature, and a final project of the student's choice in the form of an in-class presentation, a research paper or an approved alternative format. Expected: BIOL 0200 or equivalent placement; BIOL 0530, and at least one additional biology course.

**BIOL 1800. Animal Locomotion.**

How and why do animals run, jump, swim and fly? Physiology, anatomy, ecology, and evolutionary history all influence, and are influenced by, the way animals move around. We will integrate analyses from many levels of biological organization - from molecular motors, through bone-muscle systems, to biogeography - with methods and approaches from mechanics, fluid dynamics, and robotics. Expected: BIOL 0800 and PHYS 0030. Instructor permission required.

**BIOL 1810. 21st Century Applications in Cell and Molecular Biology.**

Twenty-first century applications in cell and molecular biology focuses on the structure and function of macromolecules and cells and how they are altered in disease and therapy. This course will explore physical principles underlying cell function, along with biophysical approaches for solving problems of cell and molecular biology. Cutting-edge molecular and cellular-based therapeutics will be discussed throughout this course; this includes viral gene delivery constructs, novel platforms for tissue engineering, CRISPR genome editing, and immune checkpoint therapy. This course is particularly suitable for undergraduate students interested in basic medical research, graduate school, or research-based careers in biotechnology or pharmaceutical industry.

**BIOL 1820. Environmental Health and Disease.**

Humans live, work, and play in complex chemical environments. BIOL1820 examines how environmental exposures impact human health and contribute to disease. The course covers basic concepts in toxicology, epidemiology, and safety assessment, and is divided into 4 sections: radiation, lead, perfluorinated chemicals, and endocrine disruptors. For each section, students will examine the molecular mechanisms that mediate toxicity, learn how toxicant exposure impacts physiology, evaluate exposure risk, and discuss issues of environmental justice. Prerequisites: introductory level biology and chemistry. BIOL 1820 is designed for junior and senior undergraduates, and is open to others with permission.

**BIOL 1850. Environmental and Genetic Toxicology.**

Human disease is produced by complex interactions between inherited genetic predisposition and environmental exposures. These interactions will be explored at the molecular, cellular, and systemic levels. Prototype diseases will include hereditary disorders of hemoglobin, hypercholesterolemia, birth defects, and cancer. Expected: Cell Biology.

**BIOL 1870. Techniques and Clinical Applications in Pathobiology.**

A methodology course featuring laboratory and lecture instruction in established and leading-edge technologies. Examples: flow cytometry (multi-parameter analysis, cell sorting); molecular biology (PCR, real time PCR, in situ hybridization, microarrays, DNA sequencing, bioinformatics); digital imaging (image acquisition, processing and analysis); confocal microscopy; histology and immunohistochemistry (confocal, immunohistochemistry).

**BIOL 1880. Comparative Biology of the Vertebrates.**

The biology, structure, and evolutionary history of the vertebrates considered phylogenetically, emphasizing evolution of the major body systems. Stresses an evolutionary approach to the correlation of structure and function with environment and mode of life. Labs include dissection of several different vertebrates and comparative osteological material. Emphasis of course is on critical thinking rather than memorization of material. Recommended: BIOL 0320 or 0800. First year students must obtain instructor permission to register. Enrollment limited to 32. Students MUST register for the lecture section and the lab.

**BIOL 1890. Human Histology.**

This course will provide an in-depth treatment of the "stuff we are made of" and the wonderful logic of its organization. This course focuses first on the biology of the four basic tissues (epithelium, connective tissue, muscle and nerve) and second, how they contribute to the functional anatomy of all organs and systems. For Pfizer students only.

**BIOL 1920C. Social Contexts of Disease.**

What shapes our understandings of disease, and what makes a disease real? How might we explain the demise of formerly prevalent diseases and the arrival of others? How do politics, technologies, and institutions affect conceptions of disease and structure their treatment? Will examine the impact of social context on patients' experiences of disease, including clinical, scientific, and public health approaches. Will consider disease in relation to social relationships, power of the state to regulate disease, and cultural care of the body. Enrollment limited to 20 students; instructor permission required; serves as Capstone in Health and Human Biology. Not for concentration credit.

**BIOL 1941A. Plants in a Changing Planet.**

Plants are the foundation of Earth's ecosystems and essential to human survival and civilization. This seminar will examine the physiological, ecological, and evolutionary responses of plants to rapid environmental change, and the consequences for agriculture and the structure and function of natural systems. Expected background: at least one of the following courses - BIOL 0420, 0430, 0440, 0480, or ENV 0490.

**BIOL 1950. Directed Research/Independent Study.**

Directed research/independent study in biological sciences: basic science, social studies of biomedical science, and clinically-oriented projects, mentored by individual faculty members in the Division of Biology and Medicine. Sites include campus and hospital based facilities. Projects can serve as the basis for Honors theses, or to fulfill research requirements in a Bio-Med concentration program. Students planning to use 1950/1960 to fulfill a concentration requirement must receive approval from the concentration advisor. No more than two (2) semesters of BIOL 1950/1960 may be used toward a concentration program in the biological sciences. Faculty from outside the Division may supervise projects for bio-med program concentrators, but should do so using their Department's own Independent Study course number.

**BIOL 1960. Directed Research/Independent Study.**

Directed research/independent study in biological sciences: basic science, social studies of biomedical science, and clinically-oriented projects, mentored by individual faculty members in the Division of Biology and Medicine. Sites include campus and hospital based facilities. Projects can serve as the basis for Honors theses, or to fulfill research requirements in a Bio-Med concentration program. Students planning to use 1950/1960 to fulfill a concentration requirement must receive approval from the concentration advisor. No more than two (2) semesters of BIOL 1950/1960 may be used toward a concentration program in the biological sciences. Faculty from outside the Division may supervise projects for bio-med program concentrators, but should do so using their Department's own Independent Study course number.

**BIOL 1970A. Stem Cell Biology.**

Senior seminar course will provide an interactive forum by which up to twenty seniors (and qualified juniors with permission) will explore the biology of stem cells from their humble beginnings in the embryo to their potential use in regenerative medicine. The potency and regulation of embryonic and adult stem cell populations derived from diverse organisms will be contrasted with laboratory-derived human stem-like cells for biomedical applications. Critical reading of classical and modern literature in the field of stem cell biology will form the basis of student-led presentations, papers and ethical forums. Expected: biochemistry, genetics and/or cell biology. Instructor permission; 20 students.

**BIOL 1980. HIV/AIDS in Diverse Settings: Focus on Israel.**

Participants in this winter session course will explore HIV/AIDS within the context of Israel's diverse society, unique demographics and universal healthcare. While in Israel, students will visit clinics, hospitals, and universities, engage with health care providers, experts in the field and populations with HIV. By the end of the course students will gain research skills and an understanding of this pandemic, its management and challenges in Israel, and how this important disease is modulated through risk factors, healthcare systems, medical innovations, and socio-economic factors. There is no need for prior experience in any associated discipline or any knowledge of Hebrew.

Course is by Application only. Application deadline is OCT 2, 2019. Course schedule: January 2-4, 2020 - daily seminars at Brown (including student and guest lectures); January 4-13 - tour in Israel; January 14 - rest day; January 15-17 - daily seminars at Brown.

**BIOL XLIST. Courses of Interest to Biology Concentrators.**

## Biology (Graduate)

### Associate Dean of Biology

Edward Hawrot

### Associate Dean of Graduate and Postdoctoral Studies

Elizabeth O. Harrington

### Graduate Biological Sciences Education

The Division of Biology and Medicine offers multiple programs of advanced graduate study leading to the degrees of A.M., Sc.M., and Ph.D. These programs are thematically based: Biotechnology; Molecular Biology, Cell Biology, and Biochemistry; Molecular Pharmacology and Physiology; Pathobiology; Ecology and Evolutionary Biology; Computational Molecular Biology; Neuroscience; and Biomedical Engineering.

The research network at Brown features advanced facilities situated on campus and at partner institutions which encourages discovery and innovation with state-of-the-art equipment and resources including: Genomics Core (<http://www.brown.edu/Research/CGP/core/equipment>) and Proteomics Facility ([http://biomed.brown.edu/epscor\\_proteomics](http://biomed.brown.edu/epscor_proteomics)), Bioimaging facility ([http://www.brown.edu/Facilities/Leduc\\_Bioimaging\\_Facility](http://www.brown.edu/Facilities/Leduc_Bioimaging_Facility)), Mouse Transgenic and Knockout Core ([http://www.brown.edu/Departments/Molecular\\_Biology/transgenic](http://www.brown.edu/Departments/Molecular_Biology/transgenic)), Animal Care Facilities (<http://biomed.brown.edu/ancare>), Plant Environmental Center (<http://www.brown.edu/academics/ecology-and-evolutionary-biology/plant-environmental-center>), Water Flume (<http://www.brown.edu/Departments/EEB/research/morphology.htm>), RI BioBank (<http://biomed.brown.edu/rhode-island-biobank>), Molecular Pathology Core (<https://www.brown.edu/research/projects/superfund/cores/core-d>), Computational Biology Core (<https://www.brown.edu/academics/computational-molecular-biology/home>). More information about the Division's Research Facilities can be found here: <http://biomed.brown.edu/research/facilities>.

Students entering graduate programs generally have appropriate preparatory course work as well as significant research experience. Courses are chosen with the advice of program counselors, and may include, in addition to divisional offerings, courses offered by other university departments. As a part of the doctoral training most students will be required to participate in the teaching of one or more courses related to the program.

For further information on Graduate Study in the Biological Sciences at Brown, please visit the Office of Graduate and Postdoctoral Studies website: <http://biomed.brown.edu/grad-postdoc/>

## Biotechnology Graduate Program

The Biotechnology graduate program offers the Master of Arts (A.M.), Master of Science (Sc.M.), and Doctor of Philosophy (Ph.D.) degrees and is designed for students interested in a range of topics related to the field

of biotechnology including **drug & gene delivery, drug discovery, and cell therapy.**

The educational objectives of the program are to promote an understanding of: 1.) the designs and materials used in novel cell and drug delivery systems; 2.) the molecular, cellular and animal sciences of drug discovery & drug development; and 3.) the development and testing of cell-based therapies for the treatment of diseases. We also offer courses on the business and management of biotechnology. Active areas of research include: bioadhesive drug delivery systems, mesenchymal stem cells, alternatives to animal testing, nerve guidance channels, cartilage regeneration, cardiac arrhythmias, micro-vesicles, anti-microbials, insulin regulation, neuroactive & neuroprotective agents and cell delivery & encapsulation strategies.

For further information on admission and program requirements, please visit: <http://www.brown.edu/academics/gradschool/programs/biomed-biotechnology-0>

## Ecology and Evolutionary Biology Graduate Program

The graduate program in Ecology and Evolutionary Biology (EEB) is intended for highly qualified students who plan to pursue a career that includes research or teaching in ecology and/or evolutionary biology. EEB is committed to an inclusive community that benefits from the diverse backgrounds, experiences and motivations of all our members. We tailor our training programs to meet each student's needs and interests while providing a strong background in ecology, evolutionary biology and related disciplines. All students are expected to attain proficiency in ecological and evolutionary theory, quantitative research methods, statistical analysis, writing, and oral presentation. Depending on the student's interests, they may also be expected to demonstrate proficiency in other areas such as functional morphology or genetics and genomics. This proficiency may be attained through coursework, seminars, independent reading, and laboratory and field programs. The Ecology and Evolutionary Biology program offers a Doctor of Philosophy (Ph.D.) degree as well as a 5th year Master of Science (Sc.M.) degree for students who would like to continue the research they started as an undergraduate at Brown. The Master of Science degree is also available for participants in Brown's Open Graduate Education Program.

For further information on admission and program requirements, please visit: <http://www.brown.edu/academics/gradschool/programs/biomed-ecology-and-evolutionary-biology>

## Pathobiology Graduate Program

The Pathobiology Graduate Program is an interdisciplinary and interdepartmental program broadly devoted to understanding mechanisms of human disease. The program offers a Doctor of Philosophy (Ph.D.) degree as well as a 5th year Master of Arts (A.M.) degree. The four major research and teaching thematic areas are: I) Immunology & Infectious Disease, II) Environmental Pathology, III) Cancer biology, and IV) Aging. Training may be obtained in diverse areas of immunopathology, microbial diseases, pulmonary and chemical pathology, toxicology, cancer biology, extracellular matrix biology, hepatology, and aging.

For further information on admission and program requirements, please visit: <http://www.brown.edu/academics/gradschool/programs/biomed-pathobiology>

## Molecular Biology, Cell Biology, and Biochemistry Graduate Program

The graduate program in Molecular Biology, Cell biology, and Biochemistry (MCB) is intended for highly qualified students who plan to pursue a career that includes research in biology or medical sciences. The MCB Program offers a Doctor of Philosophy (Ph.D.) degree as well as 5th Year Master of Arts (A.M.) and Master of Science (Sc.M.) degrees. The program is interdisciplinary, focusing on molecular and cellular aspects of developmental and cell biology, genetics, genomics and gene expression, aging, signal transduction, oncogenesis, immunology, biochemistry,

structural biology, proteomics, cell signaling, molecular modeling, DNA/RNA protein interactions, epigenetics, and virology.

For further information on admission and program requirements, please visit: <http://www.brown.edu/academics/gradschool/programs/biomed-molecular-biology-cell-biology-and-biochemistry>

## Molecular Pharmacology and Physiology Graduate Program

The graduate program in Molecular Pharmacology and Physiology offers advanced training appropriate for academic and research careers in the fields of biology and medical sciences that include: 1) neuropharmacology, neurophysiology and neural circuit function; 2) receptor and ion channel pharmacology, physiology and signal transduction; 3) structures and interactions of biological molecules and their roles in disease; 4) translational and clinical applications of pharmacology & physiology; 5) chemical biology, biophysics and their applications; and 6) cancer biology and therapeutics. Programs of study and research are developed individually in consultation with the student's advisor and advisory committee and are designed to ensure expertise in the student's principal field. The Molecular Pharmacology & Physiology Program offers a Doctor of Philosophy (Ph.D.) degree, as well as a 5th-Year Master of Science (Sc.M.) degree for students who would like to continue the research they started as undergraduates at Brown.

For more information on admission and program requirements, please visit: <http://www.brown.edu/academics/gradschool/programs/biomed-molecular-pharmacology-and-physiology>

## Biomedical Engineering Graduate Program

The Biomedical Engineering (BME) program provides cutting-edge, interdisciplinary, graduate-level education at the interface of engineering, biology, and medicine. The program features an interdisciplinary approach in three, complementary research areas: I) Mechanobiology, II) Neuroengineering, and III) Regenerative Engineering. Research in these areas is advancing the understanding of fundamental problems in engineering, biology, and medicine, while developing new therapies to improve the quality of life for people with medical problems. The program is distinguished by its quantitative rigor and strong collaborative connections among academic science, clinical medicine, and industry. The BME graduate program is designed for students with backgrounds in engineering, physics, or applied mathematics that seek additional education and training in the biological sciences.

The Biomedical Engineering program offers both the Master of Science (Sc.M) degree and the Doctor of Philosophy (Ph.D) degree.

For more information on admission, please visit: <http://www.brown.edu/academics/gradschool/programs/biomedical-engineering>

For more information on program requirements, please visit: <https://www.brown.edu/academics/biomedical-engineering/academics/graduate-program>

## Courses

### BIOL 2000A. Current Topics in MCDB - RNA Regulation: Beyond the Central Dogma.

The central dogma of molecular biology has long held that the primary role of RNA is to serve as an intermediary to convert the information stored in DNA into functioning proteins. However, it is now clear that RNA does not merely play a passive role in the information transfer process from DNA to protein. This course will focus on the many roles played by RNA molecules in both normal cellular processes and disease states. Papers from the primary literature will be chosen to explore this topic, primarily through student-led discussions. Open to graduate students and advanced undergraduates with appropriate coursework.

**BIOL 2000B. Topics in MCDB: How Protein Structure Informs Biological Function.**

This course covers various aspects of structural and functional biology from primary to quaternary structure and deals with the 3D structure of proteins and nucleic acids and 3D structure determination. Course will be a mixture of lecture and class discussion/presentations. Students typically have taken an advanced undergraduate-level course in biology or biochemistry. Advanced undergraduates with permission. Enrollment limited to 20 students.

**BIOL 2000C. Molecular Recognition and Signaling in Self and Non-self Interactions.**

This course will cover cell signaling mechanisms that allow discrimination between self and non-self interactions in various biological contexts. Self/non-self signaling pathways from several model systems will be examined and their relevance to development and defense will be considered. Topics will include signaling in intra- and inter-species reproductive interactions, signaling in the establishment of symbioses, signaling upon predator attack, signaling in pathogen interactions, and co-evolution of pathogenic and resistance effectors. After one introductory lecture/discussion session led by the instructors, the remaining meetings will be student led and will focus on current primary literature. Open to advanced undergraduates with appropriate coursework.

**BIOL 2000D. Current Topics in Molecular, Cellular, Developmental Biology Biochemistry.**

Protein synthesis is a fundamental cellular process mediated by ribosomes. This course will focus on progress in understanding: ribosome structure and function, ribosome biogenesis and export, quality control, ribosome degradation, and interface of ribosomes with other cellular pathways. Students will present research publications on a given topic and lead a discussion examining the experimental approach and findings of each publication. Enrollment limited to 20. Intended for graduates and advanced undergraduates with instructor permission.

**BIOL 2000E. Topics in MCDB: The Genomics Revolution and its Impact on Genetics, Medicine and Society.**

A technological revolution in genomics has exponentially increased our ability to gather biological data. A host of new methods and types of analysis has arisen to accommodate this dramatic shift in data collection. The broad scope of inquiry has ushered in an era of "system-wide" approaches and brute-force strategies where rare signals can be detected and studied. In this seminar we will cover papers that embody this new approach. Enrollment limited to 20 graduate students. Advanced undergraduates with appropriate course preparation and permission from instructor.

**BIOL 2010. Quantitative Approaches to Biology.**

Graduate level introduction to quantitative and computational methods in modern biology. Topics include Programming, Modeling, Algorithms, Bioinformatics, Applied Statistics, Structural Biology, Molecular Dynamics, Enzyme Kinetics, and Population and Quantitative Human Genetics. Preference is given to graduate students in Molecular Biology, Cell Biology and Biochemistry and Molecular Pharmacology, Physiology, and Biotechnology. Limited to 20 students. Instructor permission required.

**BIOL 2015. Conservation in the Genomics Age.**

The course will introduce students to the rapidly developing field of molecular ecology, emphasizing its importance for conservation biology. Students will explore key principles in evolutionary ecology based on readings, lectures, and discussions. Participants will also gain practical experience with ecological, genomic, and computational methods in the lab. This course is intended for advanced undergraduate and graduate students. Suggested prerequisites include Principles of Ecology (0420); Evolutionary Biology (0480) or Genetics (0470); the Lab Techniques Workshop for Biology Students provided by MDL; or similar with permission. Students will obtain permission from the professor to enroll.

**BIOL 2018. Management Strategies in Biotechnology.**

This course, taken the second semester, goes in depth into the numerous strategies in biotechnology. Significant differences in the strategies of small companies versus large companies, and device companies versus drug companies will be discussed with ample use of biotechnology case studies. At the end of this course, the successful student will: Understand the process of managerial decision making in the pharma/biotech industry Understand the basic principles of Decision Science, the application of quantitative analysis (modeling) to inform managerial decision making Gain exposure to basic frameworks and tools used by management consultants to define strategic options

**BIOL 2020. Biotechnology Science and Industry.**

This course provides a comprehensive overview of the primary functional roles and steps involved in developing and commercializing a novel technology/scientific breakthrough within the biotechnology industry. This course is particularly suitable for students interested in pursuing a career within a biotechnology company, or for those interested in developing an in-depth knowledge of how the science of biotechnology becomes real world products. Pre Requisites: Foundations of Living Systems (BIOL0020), Principles of Physiology (BIOL0080), and Principles of Economics (ECON0110)/equivalent or instructor's permission is required.

**BIOL 2030. Foundations for Advanced Study in the Life Sciences.**

A double-credit graduate course on multidisciplinary experimental approaches to biological questions. Focusing on primary literature, lectures and discussions cover the mechanisms and regulation of basic cellular processes involving nucleic acids (synthesis, structure, maintenance and transmission) and proteins (synthesis, maturation, function) and their integration into more complex circuits (signaling, organelle biogenesis and inheritance, cell cycle control). Required for PhD students in the MCB Graduate Program; all others must obtain instructor permission. Enrollment is limited to graduate students.

**BIOL 2040. Ultrastructure/Bioimaging.**

This course examines microscopy and image analysis in the life sciences. Theoretical and practical aspects of microscopy will be discussed. Students will obtain hands-on experience with electron microscopy, light microscopy, fluorescence microscopy, and confocal microscopy. Students will learn to display images in 3D. For graduate students and advanced undergraduates. Instructor permission required.

**BIOL 2050. Biology of the Eukaryotic Cell.**

(Undergraduate students should register for BIOL 1050.)

**BIOL 2075. Evaluation of Health Information Systems.**

This course covers the field of evaluation of health information systems (HIS) in a range of roles and environments, in the US and worldwide. It includes topics in health information system (HIS) design and deployment, healthcare workflow, quantitative and qualitative evaluation methods and socio-technical environment for HIS. Emphasis is given to understanding the range of evaluation questions that can be asked, identifying the key stakeholders, understanding available evaluation techniques, and designing rigorous but achievable studies. Examples will include Open Source systems, medical Apps, and economic evaluation, the role of evaluation frameworks and theories, and notable HIS successes and failures.

**BIOL 2089. The Importance of Intellectual Property in Biotechnology.**

This course delves into the various roles of intellectual property in biotechnology. In addition to providing a solid foundation in the fundamentals of intellectual property, the course will use case studies in biotechnology to explore in depth the interplay between specific scientific breakthroughs and intellectual property. An understanding of the science of biotechnology is critical for advanced understanding of the value and possibilities of biotechnology intellectual property.

**BIOL 2110. Drug and Gene Delivery.**

Topics in drug delivery systems including history of the field, advantages of controlled release technology, stabilization and release of proteins, fabrication methods, regulatory considerations, economic aspects, patents and intellectual property rights, and more. Prepares students for research in industry and academia, and offers information for consultants in the field. Expected: BIOL 1090, 1120; CHEM 0350, 0360.

**BIOL 2117. Human Physiology.**

For Brown-Pfizer Master of arts Program students. Provides an introduction to basic human physiological concepts along with more advanced coverage of selected systems. We'll start with topics of diffusion, cell physiology and the basis of cell membrane potential and then cover the nervous, endocrine, musculoskeletal, cardiovascular, respiratory, renal and gastrointestinal systems. We'll focus on normal human physiology and at times incorporate discussions of exercise physiology, pathophysiology, and specific physiologic scenarios to build toward the goal of understanding complex integration of function between cells, tissues and organ systems. Readings will consist of textbook chapters along with primary literature covering selected topics.

**BIOL 2121. The Biochemistry of Signaling and Regulation from Prokaryotes to Eukaryotes.**

Proteins are the engines of life. Determining how they function from a biophysical and biochemical perspective enables us to understand how they work and how we can direct and alter their activities. Proteins participate in cellular signaling pathways that are important regulators of cellular function and are often misregulated in disease. This course introduces various aspects of biochemistry involved in the analysis of cellular signaling pathways that regulate disease. Open to 12 graduate students and advanced undergraduates. Prerequisite: Students must have taken several advanced undergraduate-level courses in biology.

**BIOL 2125. Bioinformatics for Evidence to Improve the Discovery, Development and Use of Medicines.**

This course explores evidence used in decisions for discovery, development and use of medicines. Goals are i) learn issues and decision criteria for stakeholders in biomedical innovation, ii) understand challenges and emerging opportunities to improve the evidence used to make decisions over the life of a therapeutic, iii) apply this learning to develop a novel call for proposals for multi-stakeholder projects that integrate molecular and clinical knowledge for improving discovery, development and/or use of medicines for Parkinson's disease or pancreatic cancer. Preference is given to graduate students in MPPB, Biotechnology and BME. Other qualified students may enroll with instructor's permission.

**BIOL 2130. Techniques in Molecular and Cell Science.**

This course provides hands-on laboratory training in state-of-the-art techniques in molecular and cellular sciences, and reinforces this training with didactic lectures that stress key principles, the quantitative approach and the most exciting applications of these technologies in the context of current research. Areas covered include cell culture, tissue engineering, DNA cloning, gene therapy, quantitative assays, microscopy and image analysis.

Enrollment is limited to 12; written permission required. Permission will be granted after the first class. Students MUST register for the lecture section and a lab.

**BIOL 2135. Pharmacokinetics and Drug Design.**

Consists of the absorption, distribution, metabolism, and elimination of drugs. These factors, including dosage, determine the concentration of drugs at its sites of action, and intensity of effects. Will examine models describing the relationship between plasma drug concentrations and therapeutic drug effect. Will acquire biologic sampling techniques, analytic methods for measurement of drugs and metabolites, and procedures facilitating data used in designing drugs and dosage regimens. Prerequisite: BIOL 0800 or equivalent. Enrollment limited to 20. Preference given to graduate students in Biotechnology and BME, especially Masters students. Graduate students (PhD and ScM) from other programs enroll if permission of instructor is granted.

**BIOL 2140. Principles in Experimental Surgery.**

An introduction to the principles and practice of surgery, sterile technique, anesthesia, and laboratory animal care. Intended to provide highly supervised, hands-on experience in techniques for humane handling and surgical management of experimental animal subjects. Emphasizes surgical technique, anesthesia technique, and laboratory animal medicine. Prerequisite: BIOL 0800. Limited to five (5) Graduate students only. Instructor permission required. Students MUST register for the lecture section and the lab.

**BIOL 2145. Molecular Targets of Drug Discovery.**

This course emphasizes the role of cell physiology in the identification of drug targets and the development of novel drugs. Specific protein drug targets such as G-protein coupled receptors will be examined in detail from identifying a target to development of drugs for that target and the physiological consequences. Prerequisite: BIOL 0800. Enrollment limited to 20. Preference is given to graduate students in Biotechnology and BME, especially Masters students. Graduate students from other programs may enroll if permission of the instructor is granted.

**BIOL 2150. Scientific Communication.**

Focused on the effective dissemination of scientific information in the molecular biosciences. Students will develop the skills necessary to effectively communicate scientific ideas, experiments, and results relating to their PhD dissertation projects through activities common to the profession including writing a grant proposal and presenting research work orally. Each of the activities will be dissected into key components and developed through interactive discussions and peer review. Required for most second-year PhD students in the MCB Graduate Program. Other qualified students may enroll with instructor's permission.

**BIOL 2156. Special Topics in Biotechnology Writing.**

This course is open to Biotechnology Masters students not involved in lab-based research. Students choose from a list of topics and faculty mentors in the field of biotechnology. Teams conduct in-depth research and writing, with the goal of producing a final report and presentation equivalent to a professional consultant's report. Students meet weekly with mentor to monitor progress. Prerequisite: BIOL 0280 and 1120; CHEM 0350/0360 or equivalent. Enrollment limited to 20 students. Instructor permission required. Course is offered in both, Semester 1 and 2, and may be repeated once for credit.

**BIOL 2160. Analytical Methods in Biotechnology.**

This course will cover principles and practical applications of important analytical tools used in the field of Biotechnology. Topics covered include spectroscopy, chromatography, and physical and chemical methods of characterization of a variety of molecules used for therapeutic applications. The molecules will range in size from traditional drugs with molecular weights of less than 1000, peptides and proteins as well as siRNA and industrial polymers. This course is suitable for students intending on pursuing a career in biomedical research in academia or industry. Prerequisites: BIOL 0280, BIOL 1120, CHEM 0350/0360, or equivalent course. Enrollment limited to 20 Masters students in Biotechnology and BME.

**BIOL 2167. In Vitro Models for Disease.**

This course will use case studies to examine high burden diseases, their pathophysiology, treatment, and the models used to study the disease. Literature will be used to discuss the current models for the disease and the associated limitations of each of these models. The course will also cover the use of animals in research and how new in vitro models could be used to decrease their use. This course is intended for graduate students in biology, engineering, or related fields. Prerequisites: BIOL 0200 and 0800, or equivalent. Enrollment limited to 20 graduate students.

**BIOL 2170. Molecular Pharmacology and Physiology.**

Fundamental concepts in pharmacology and physiology from the cellular/molecular level to organ systems. Required of first-year graduate students in Molecular Pharmacology and Physiology.

**BIOL 2180. Experiential Learning Industry, ELI.**

Experiential Learning in Industry is restricted to biomedical engineering (BME) Sc.M. and biotechnology (Biotech) Sc.M. students, permission also required. The course is an extended in-depth learning experience in an industry environment related to the discipline of BME and Biotech. Industry environments include; medical device, pharmaceutical or biotechnology and industries that provide BME and Biotech relevant services to the aforementioned companies including patent law, licensing, regulatory and consulting. Students will pursue Experiential Learning in Industry during one summer plus one semester or during two semesters for which they will receive credit towards their degree. This course is restricted to BME and Biotech Masters students only. Students must have successfully completed the first year of the BME Masters Program. Slots are limited so permission is required.

**BIOL 2190. MPP Professional Development Seminar.**

Professional development seminar required of all first year graduate students in the Molecular Pharmacology and Physiology Graduate Program, and open to graduate students in other programs. Topics include grants and funding, effective oral presentation skills, alternative careers in science, and others. All students will be required to present a research seminar during the scheduled class time.

Instructor permission required for graduate students outside the Molecular Pharmacology and Physiology Graduate Program. Not intended for undergraduate students.

**BIOL 2200A. Molecular Biology and Chemistry.**

A critical evaluation of contemporary research in biochemistry, molecular biology, and structural biology. Intensive reading and discussion of the current literature, critical analysis, and student presentations in seminars. Advanced undergraduates with permission. Enrollment limited to 20.

**BIOL 2200B. Post-Transcriptional Regulations of Gene Expression.**

Enrollment limited to 20.

**BIOL 2200D. Current Topics in Biochemistry: Biochemical Genomics.**

A critical evaluation of current research in biochemistry and molecular biology focusing on the mechanism and regulation of transcription. Intensive reading, critical analysis, and discussion of the relevant literature in the context of student presentations in seminars. Advanced undergraduates with permission of the instructor. Enrollment limited to 20 students. Instructor permission required.

**BIOL 2210A. Molecular Mechanisms in Site-Specific Recombination and DNA Transposition.**

Enrollment limited to 20.

**BIOL 2210C. Current Topics in Molecular Biology: Cellular Quality Control Mechanisms.**

Protein synthesis is a fundamental cellular process that is dependent upon the rapid and accurate synthesis of ten to twenty thousand ribosomes per generation to carry out the equally rapid and accurate synthesis of protein. Progress in understanding Ribosome structure and function, Ribosome evolution, Ribosome biogenesis and coordination of cell growth with cell division will be explored using the current literature with weekly student seminars and a final research proposal.

**BIOL 2222B. Current Topics in Functional Genomics.**

A technological revolution in genomics has exponentially increased our ability to gather biological data. A host of new methods and types of analysis has arisen to accommodate this dramatic shift in data collection. The broad scope of inquiry has ushered in an era of "system-wide" approaches and brute-force strategies where rare signals can be detected and studied. In this seminar we will cover papers that embody this new approach. Students typically have taken an advanced undergraduate-level course in biology.

**BIOL 2230. Biomedical Engineering and Biotechnology Seminar.**

Biomedical engineering and biotechnology are interdisciplinary fields that incorporate progress in biomedical sciences, the physical sciences, and engineering. To achieve success in these fields requires facility with interdisciplinary oral communication – this is the specific and practical focus of this course. Each week, students will give research presentations and receive feedback from the audience to help improve their public speaking skills.

**BIOL 2240. Biomedical Engineering and Biotechnology Seminar.**

See Biomedical Engineering and Biotechnology Seminar (BIOL 2230) for course description.

**BIOL 2245. Blood Substitutes: Principles and Therapeutics Development.**

Blood serves many critical functions including respiratory gas transport, homeostasis and host defense. Plasma and cellular components of blood, their functional mechanisms, pathophysiologic consequences when deficient and current treatments will be reviewed. Finally, development of blood component substitutive therapeutics (blood substitutes) based on protein and cellular engineering technologies (biotherapeutics) will be discussed. Open to Graduates students and Juniors and Seniors who meet the pre-requisites BIOL 0800 and BIOL 0280 or with instructor's permission.

**BIOL 2260. Physiological Pharmacology.**

The objective of this course is to present drugs in the context of the diseases they are used to treat. A list of the Common medically prescribed drugs will be discussed in terms of their fundamental modes of action and clinical importance. Pertinent background biochemistry, physiology, and pathology is provided, e.g., the electrophysiology of the heart is discussed as a background to anti-arrhythmic drugs. Course is relevant for students interested in medicine journalism, law, government, precollege teaching, biomedical research, and pharmacy. Expected: background in physiology. For graduate students ONLY register for BIOL 2260 (enrollment limit 15); all others BIOL 1260.

**BIOL 2270. Advanced Biochemistry.**

(Undergraduate students should register for BIOL 1270.)

**BIOL 2290A. Mechanisms of Virus Entry, Replication, and Pathogenesis.**

This course will focus on the interactions between viruses and host cells that contribute to invasion, manipulation of viral and cellular gene expression, and manipulation of the host's response to infection. We will address interactions between viruses infecting humans, as well as those of plants, fungi, and bacteria. Students will be evaluated on their ability to critically analyze data in published manuscripts, including presentations of primary papers, classroom discussion, and completion of a research proposal. Expected: at least two of the following: BIOL 1050, 1270, 1520, 1540, 1560. Advanced undergraduates with permission of the instructor.

**BIOL 2290B. Mechanisms of Protein Synthesis and Impact on Human Disease.**

This course will examine mechanisms central to the regulation of protein synthesis in both prokaryotes and eukaryotes. Targeting protein synthesis through ribosomes is a proven drug target commonly used to treat many infectious diseases. The regulation of protein synthesis in eukaryotes is critical for myriad human conditions including aging and cancer, including the recently discovered role of microRNAs. This course will explore the common and unique mechanisms of regulation of protein synthesis between prokaryotes and eukaryotes and the importance of understanding these mechanisms for human health. For graduate students and advanced undergraduates with permission.

**BIOL 2290C. Neuronal Signaling meets the RNA World.**

The concept of one gene, one protein is nowhere more violated than in protein encoding genes expressed in the nervous system. We will cover a variety of post-transcriptional processing events which serve to generate protein diversity in the nervous system including alternative splicing, trans-splicing, and RNA editing. We will also address non-coding RNAs and their roles, in particular, in regulating nervous system function. Since it is clear that nervous system complexity is not a function of gene number across large phylogenetic distances, the course will be aimed at instilling a greater understanding of how the regulation of shared "toolkit" genes results in organismal complexity. Advanced undergraduates with permission of the instructor.

**BIOL 2290D. Small RNA Regulation of Germ Cells and Development.**

Enrollment limited to 20.

**BIOL 2290E. Signal Transduction.**

This seminar course will provide a broad introduction to basic mechanisms of cell signaling from the extracellular environment to the nucleus of a cell, and to the mechanisms that regulate signal transmission. Topics of discussion will include: processing and modification of signaling molecules; signal recognition/ligand binding; co-receptors and receptor trafficking; intracellular relays; transduction to the nucleus; regulation of signal intensity and duration; feedback controls. Signal transduction pathways from several model systems will be examined and their relevance to development and disease will be considered. Senior undergraduates with permission of the instructors. Enrollment limited to 20.

**BIOL 2300. Biomolecular Interactions: Health, Disease, and Drug Design.**

Interactions between the molecules of life—proteins, RNA, DNA, membrane components—underlie all functions necessary for life. This course focuses on how nature controls these interactions, how these interactions can go awry in disease, and how we can learn the rules of these interactions to design drugs to treat disease. Students will review the physical basis of molecular interactions, learn classic and state-of-the-art high-resolution and high-throughput tools used to measure interaction, and survey the experimental and computational strategies to harness these interactions using a case study in rational drug design. Prerequisite: Introductory Biochemistry. Enrollment limited to 20; instructor permission.

**BIOL 2310. Developmental Biology.**

Covers the molecular and cellular events of development from fertilized egg to adult. Genetic basis of body form, cell fate specification and differentiation, processes controlling morphogenesis, growth, stem cells and regeneration are examined. Differential gene regulation, intercellular signaling and evolutionary conservation are central to discussion of mechanisms governing developmental processes. Additional topics: developmental plasticity, impact of epigenetic and environmental factors, and basis of disease gleaned from developmental biology research. Live embryos complement and reinforce concepts covered in class. Expected: BIOL0200 (or equivalent), and one course in genetics, embryology, cell biology or molecular biology. Enrollment limited to 36. (Undergraduate students register for BIOL 1310.)

**BIOL 2320E. Genetic Control of Cell Fate Decisions.**

A cell's fate is acquired in a process whereby largely uncommitted progenitor cells are instructed down a commitment path that ultimately results in a specific cell type with distinct molecular and physiological properties. This process is critical for the establishment of all cell types and tissues and is poised to be a critical topic in cell-based therapeutic strategies. We will investigate the intrinsic and extrinsic mechanisms that manifest at the genetic level to impart cell fate decisions on progenitors. Advanced undergraduates with permission of the instructor.

**BIOL 2340. Neurogenetics and Disease.**

Genetic mutations provides a powerful approach to dissect complex biologic problems. We will focus on fascinating discoveries from "forward genetic" studies – moving from nervous system phenotype to genetic mutation discovery. There will be an emphasis of neurologic disease phenotypes and the use of novel genomic methods to elucidate the central molecular and cellular causes for these conditions. The course will emphasize the use of "reverse genetics" – engineered mutations in model systems – to dissect nervous system function and disease mechanisms. Disorders to be covered include autism, intellectual disability, schizophrenia, epilepsy. Enrollment limited to 20. Instructor permission required.

**BIOL 2350. The Biology of Aging.**

Aging is a fundamental biological process. It is the major risk factor for age-related diseases such as cancer, cardiovascular disease, stroke, osteoporosis, arthritis and Alzheimer's, just to name a few. As life expectancy has increased in the 20th century, these diseases have become the leading causes of death. Recent research has identified universal mechanisms that regulate organismal aging and impact all organ systems. Several gene networks that can regulate the rate of aging and multiple age-related diseases have already been discovered. These mechanisms are conserved throughout evolution and many key insights have been garnered from simple model organisms. Manipulation of these networks has been achieved by diet, genetic engineering, and most recently, with drugs. The goal of modern medicine is to increase healthy survival, as opposed to simply longevity. It is now generally acknowledged that increasing health span – the fraction of our life spans free of frailty and debilitating chronic disease – has become a realistic goal. This course will examine the new concept of "geroscience" – the molecular, cellular, and genetic foundations of the biology of aging, and how this knowledge can be applied to therapies for age-associated diseases. Course material will be based on the primary research literature. Prerequisites are a background in cell biology, molecular biology and genetics - such as BIOL0470, BIOL0280, BIOL0200, and BIOL0800.

**BIOL 2430. Topics in Ecology and Evolutionary Biology.**

Current literature in ecology, behavior, and evolutionary biology is discussed in seminar format. Topics and instructors change each semester. Representative topics have included: structuring of communities, biomechanics, coevolution, quantitative genetics, life history strategies, and units of selection. Expected: courses in advanced ecology and genetics.

**BIOL 2440. Topics in Ecology and Evolutionary Biology.**

See Topics In Ecology And Evolutionary Biology (BIOL 2430) for course description.

**BIOL 2450. Exchange Scholar Program.****BIOL 2528. Innovation and Commercialization in Medical Devices, Diagnostics, and Wearables.**

This course provides a comprehensive overview of concepts and steps involved in developing and commercializing novel technology/scientific breakthroughs for medical devices, diagnostics and wearables. This course is particularly suitable for students interested in pursuing a career within a medical device segment, or creating innovation-based companies, as well as for those interested in developing an in-depth knowledge of evolution of medical devices from research concepts to products in the market.

**BIOL 2540. Molecular Genetics.**

Even in this era when whole genome DNA sequencing has become routine, there are still thousands of eukaryotic genes with unknown functions. Genetic screens for mutations that alter pathways of interest remain the premier approach to understanding gene function in the context of the organism. In Molecular Genetics students will learn the key concepts involved in designing and interpreting genetic screens using the powerful tools available in model animal, plant, and fungal organisms. Students will also learn how to understand and analyze results presented in the primary scientific literature. Furthermore, students will gain an appreciation of how the field of genetics has changed through discoveries and technological advances made over the past 50 years. Undergraduate students should register for BIOL 1540.

**BIOL 2545. Human Genetics and Genomics.**

This course will exemplify the power of genetically informed approaches to understanding human biology. It is intended for advanced undergraduate students and graduate students; prerequisites include BIOL0470 or equivalent. The course is based in lectures, reading material (textbook and primary literature), and in-class discussions. Course topics include: medical genetics and genomics; methods to study human genotypes and related phenotypes; industry-related topics; and ethical and societal implications of genome science. It will benefit students with career interests in basic science, medicine, biotechnology, or science policy. Enrollment is limited to 20 students; selection will be based on seniority, prerequisites, and registration order.

**BIOL 2560. Advanced Virology.**

The emphasis of this course will be on understanding the molecular mechanisms of viral pathogenesis. It will begin with a general introduction to the field of virology, a basic review of the immune response to viruses, and then focus primarily on the molecular biology of specific viruses that are associated with clinical human disease. Lectures will be based on the current literature and provide historical context. Students will become familiar with primary literature and produce their own original research proposal by the end of the semester.

**BIOL 2595. Artificial Intelligence in Biomedicine.**

This course will teach the fundamental theory and methods of artificial intelligence (AI) alongside their application to the biomedical domain. It will give a representative overview of traditional methods as well as modern developments in the areas of (deep) machine learning, natural language processing and information retrieval. The course is designed to be accessible to non-computer science audiences and will not require extensive prior programming experience. The course will be accompanied by practical assignments applying the discussed techniques in a biomedical context. Understanding of formal theoretical knowledge will be assessed in a final exam.

**BIOL 2640A. Viral Immunology.**

Viral Immunology is an advanced topics course in Microbiology and Immunology which will be focused on viral immunology. Weekly meetings will cover different issues concerning defense against viral infections and pathology related to viral infection, with focus on viral-host interactions. Topics will be selected to present either important basic concepts in the context of immune responses and/or major challenges in controlling viral infections. Recent advances in understanding virus-host interactions, host responses to viruses, cytokine regulation of immune responses or cytokine-mediated pathology during viral infections will be emphasized. The 2020 organizational meeting is set for Wednesday, Jan. 22 at 3:00PM (BMC 6th Floor Conference Room - Room 603). There is also a requirement for a previous immunology course.

**BIOL 2640B. Microbial Pathogenesis.**

Examines microbial pathogens and the underlying mechanisms by which infectious organisms cause diseases. Bacterial, fungal, protozoal and viral pathogens will be studied using tools of modern biology. Also examined are the host's immune responses to infection and disease. Areas covered include mechanisms of pathogen internalization and survival, immune responses, signal transduction and pathophysiology. Expected: BIOL 0510, 0530, or 1550.

**BIOL 2640C. The Immune System.**

Introduction to the experimental and theoretical foundations of immunology and the function of the mammalian immune system. Focuses on concepts, landmark experiments and recent advances. Topics include innate and adaptive immunity; structure/function of antibody molecules and T cell receptors; and regulation of immune responses through cellular interactions. Application of concepts to medically significant issues (vaccines, transplantation, hypersensitivity, autoimmunity, cancer, immunodeficiency) is discussed. Interpretative analysis of experimental data is emphasized. Activities include written assignments that analyze a hypothetical immune system and a final paper addressing an immunological topic of the student's choosing. For Pfizer students only.

**BIOL 2850. Introduction to Research in Pathobiology.**

Introduces incoming pathobiology graduate students with research opportunities in the laboratories of program faculty. Consists of seminars with individual faculty members in the graduate program in pathobiology. Required background reading of recent papers lead to a discussion of current research in the faculty member's laboratory. Additional discussions include safety and ethical issues in research. Open only to first-year graduate students in the program in pathobiology.

**BIOL 2860. Molecular Mechanisms of Disease.**

BIOL 2860 is designed for graduate students and focuses on the underlying causes of human disease. The course will explore the mechanistic basis of phenylketonuria, thalidomide toxicity, and cystic fibrosis. Students should have a solid background in the life sciences with an understanding of the fundamental principles of molecular biology, genetics, biochemistry, and cell biology. Emphasis will be placed on the development of presentation skills and research design. Readings will be assigned from Robbins Basic Pathology 10th Edition (2018), Junqueira's Basic Histology Text & Atlas 14th Edition (2016), primary literature, and reviews. Both textbooks are available online through the library website.

**BIOL 2865. Toxicology.**

Toxicology is the science that describes the adverse biological effects of exogenous chemical and physical stressors, including environmental, industrial, and agricultural chemicals and pharmaceuticals. This course will introduce the principal biological processes that determine an organism's response to a toxicant, including absorption, distribution through a biological system, metabolism, elimination, and effects at the site(s) of action. We will discuss modern challenges in toxicology, such as assessing toxicity of mixtures and testing some of the thousands of untested chemicals in commerce. The material will be presented in lecture and student-led discussions, with readings from the toxicology literature.

**BIOL 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**BIOL 2980. Graduate Independent Study.**

Independent study projects at the graduate level. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**BIOL 2985. Graduate Seminar.**

Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course.

**BIOL 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**BIOL 2995. Thesis.**

Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course.

## Neuroscience

### Chair

David M. Berson

Neuroscience is the scientific study of the nervous system, including its development, functions, and pathologies. It is an interdisciplinary field that encompasses neurobiology (anatomy, physiology, biochemistry, molecular biology, genetics), elements of psychology and cognitive science, and mathematical and physical principles involved in modeling neural systems.

The Department of Neuroscience offers an undergraduate concentration leading to the Sc.B. degree and a graduate program leading to the Ph.D. degree. These programs include courses offered by the department and by several allied departments. The Department of Neuroscience has modern facilities for conducting research in a broad range of areas from molecular mechanisms to behavior and undergraduate students are encouraged to pursue research projects.

For additional information, please visit: <http://neuroscience.brown.edu/>

### Neuroscience Concentration Requirements

Neuroscience is an interdisciplinary field that seeks to understand the functions and diseases of the nervous system. It draws on knowledge from neurobiology as well as elements of psychology and cognitive science, and mathematical and physical principles involved in modeling neural systems. Through the Neuroscience concentration, students develop foundational knowledge through courses in biology, chemistry, and mathematics as well as three core courses in neuroscience. They are also required to develop facility with research methodologies (through courses in statistics and laboratory methods) before moving into specific topics in the field (e.g., visual physiology, neurochemistry and behavior, and synaptic transmission and plasticity). Members of the Neuroscience faculty are affiliated with the Brown Institute for Brain Science, a multidisciplinary program that promotes collaborative research about the brain. Prospective concentrators should contact Elyse\_Netto@brown.edu in order to have a faculty advisor assigned to them.

### Standard program for the Sc.B. degree

The concentration combines a general science background with a number of specific courses devoted to the cellular, molecular, and integrative functions of the nervous system. The concentration allows considerable flexibility for students to tailor a program to their individual interests. Elective courses focus on a variety of areas including molecular mechanisms, cellular function, sensory and motor systems, neuropharmacology, learning and memory, animal behavior, cognitive function, bioengineering, theoretical neuroscience and computer modeling.

The concentration in neuroscience leads to an Sc.B. degree. The following background courses, or their equivalent, are required for the degree:

**Background Courses:**

MATH 0090	Introductory Calculus, Part I	1
-----------	-------------------------------	---

MATH 0100	Introductory Calculus, Part II	1	NEUR 0680	Introduction to Computational Neuroscience	1
PHYS 0030	Basic Physics A	1	NEUR 1040	Introduction to Neurogenetics	1
PHYS 0040	Basic Physics B	1	NEUR 1440	Mechanisms and Meaning of Neural Dynamics	1
BIOL 0200	The Foundation of Living Systems	1	NEUR 1540	Neurobiology of Learning and Memory	1
CHEM 0330	Equilibrium, Rate, and Structure	1	NEUR 1560	Developmental Neurobiology	1
CHEM 0350	Organic Chemistry	1	NEUR 1600	Experimental Neurobiology	1
<b>Core Concentration Courses:</b>			NEUR 1630	Open-Source Big Data Neuroscience Lab	1
NEUR 0010	The Brain: An Introduction to Neuroscience	1	NEUR 1600	Experimental Neurobiology	1
NEUR 1020	Principles of Neurobiology	1	NEUR 1630	Open-Source Big Data Neuroscience Lab	1
NEUR 1030	Neural Systems	1	NEUR 1650	Structure of the Nervous System	1
<b>One critical reading course</b>			NEUR 1660	Neural Computation in Learning and Decision-Making	1
NEUR 1440	Mechanisms and Meaning of Neural Dynamics	1	NEUR 1670	Neuropharmacology and Synaptic Transmission	1

NEUR 1680	Computational Neuroscience	1	BIOL 1545	Human Genetics and Genomics	1
NEUR 1970	Independent Study	1	COST 1020	Cognitive Neuroscience of Meditation	1
CLPS 1194	Sleep and Chronobiology Research	1	<b>Total Credits</b>		<b>53</b>
CLPS 1490	Functional Magnetic Resonance Imaging: Theory and Practice	1	1 Independent study and honors research projects are encouraged.		
CLPS 1491	Neural Modeling Laboratory	1	<b>Neuroscience Graduate Program</b>		
CLPS 1492	Computational Cognitive Neuroscience	1	The program in Neuroscience offers graduate study leading to the Doctor of Philosophy (Ph.D.) degree. The program is designed to educate and train scientists who will become leaders in the field and contribute to society through research, teaching and professional service. The core of the training involves close interaction with faculty to develop expertise in biological, behavioral, and theoretical aspects of neuroscience. Graduate research and training are carried out in the laboratories of the program's faculty. These faculty trainers lead outstanding well-funded research programs that use cutting edge technology to explore the nervous system.		
BIOL 0800	Principles of Physiology	1	For more information on admission and program requirements, please visit: <a href="http://www.brown.edu/academics/gradschool/programs/biomed-neuroscience">http://www.brown.edu/academics/gradschool/programs/biomed-neuroscience</a>		
BIOL 1880	Comparative Biology of the Vertebrates	1			
<b>Four electives related to neuroscience</b> <sup>1</sup>			4		
Four courses that will enhance your understanding of the field of neuroscience. While electives need not be from the neuroscience department, the following list are common courses taught by Neuroscience and other departments that are often used as electives. We encourage students to explore the broader course catalog and consult with their concentration advisor to explore the full range of electives, rather than limiting themselves to this list:					
NEUR 0650	Biology of Hearing	1			

## Courses

### **NEUR 0010. The Brain: An Introduction to Neuroscience.**

Introduction to the mammalian nervous system with emphasis on the structure and function of the human brain. Topics include the function of nerve cells, sensory systems, control of movement and speech, learning and memory, emotion, and diseases of the brain. No prerequisites, but knowledge of biology and chemistry at the high school level is assumed.

### **NEUR 0650. Biology of Hearing.**

Examines the sensory and perceptual system for hearing: the external, middle, and inner ears; the active processes of the cochlea; sound transduction and neural coding; neural information processing by the auditory system; and the nature of auditory perception and its biological substrate. Prerequisite: an introductory course in Neuroscience, Cognitive Science, Physics, Engineering or Psychology.

### **NEUR 0680. Introduction to Computational Neuroscience.**

An introductory class to computational neuroscience. Students will learn the main tools of the trade, namely differential equations, probability theory and computer programming, as well as some of the main modern neural-modeling techniques. Assignments will include the writing of simple Matlab code.

### **NEUR 0700. Psychoactive Drugs and Society.**

Will examine psychoactive drugs from two perspectives: (1) biological mechanisms of drug action and (2) the impact of psychoactive drug use on society and society attitudes towards psychoactive drug usage. Drugs to be discussed will include alcohol, opiates, cocaine, marijuana, LSD, nicotine and caffeine, as well as drugs used therapeutically to treat psychiatric disorders. This course will benefit students who are interested in exploring both the biological and social aspects of psychoactive drug use. Prerequisite: NEUR 0010 or equivalent.

### **NEUR 1020. Principles of Neurobiology.**

A lecture course covering fundamental concepts of cellular and molecular neurobiology. Topics include structure of ion channels, synaptic transmission, synaptic development, molecular mechanisms of synaptic plasticity, learning and memory and neurological diseases. Prerequisite: NEUR 0010. Strongly recommended: BIOL 0200 or equivalent.

### **NEUR 1030. Neural Systems.**

This lecture course examines key principles that underlie the function of neural systems ranging in complexity from peripheral receptors to central mechanisms of behavioral control. Prerequisite: NEUR 0010 or the equivalent. First year and Graduate students require instructor approval.

### **NEUR 1040. Introduction to Neurogenetics.**

Recent advances in molecular biology and molecular genetics have allowed researchers to test specific hypotheses concerning the genetic control of behavior and neurological disease. This course will familiarize you with the relatively new and exciting field of neurogenetics. We will cover basic topics, new ideas, and unsolved problems in neurogenetics primarily through the two assigned texts. However, neurogenetics is essentially a "frontier" area in neuroscience, and the best way to approach this topic is by scientific literature, which will be covered in some lectures.

### **NEUR 1440. Mechanisms and Meaning of Neural Dynamics.**

We humans can shift our attention, perceive new objects, make complex motions, and adjust each of these behaviors within fractions of a second. Neurons and systems of neurons vary in their activity patterns on millisecond to second time scales, commonly referred to as "neural dynamics." This course addresses mechanisms underlying this flexibility and its potential meaning for information processing in the brain. The course integrates biophysical, computational, single neuron and human studies. In addition to lectures and readings, students will learn how to build computational models to simulate neural dynamics at various scales from single neurons to networks, using Matlab and the Human Neocortical Neurosolver. Computational modeling will be taught hands-on in an interactive lab session each week. Please request override through Courses@Brown.

### **NEUR 1520. Exploring Neural Data.**

While a large part of being a neuroscientist involves performing experiments to collect data, the reality of studying the brain is that you can often collect way more data than you know what to do with! In this course, we will discuss data analytic challenges in neuroscience. We will provide real data sets for hands-on student activities. By the end of the course, students will have the basic tools and techniques to begin to work with neuroscience data themselves. Topics will include spike train, EEG and behavioral analyses. The course will emphasize basic computer programming skills in Python.

### **NEUR 1540. Neurobiology of Learning and Memory.**

Exploration of learning and memory from the molecular to the behavioral level. Topics will include declarative and procedural memory formation and storage, associative and non-associative learning, cellular and molecular mechanisms for learning, and disorders affecting learning and memory. Examples will be drawn from numerous brain areas and a variety of model systems, including humans. Students will gain experience interpreting experiments from primary literature. Prerequisite: NEUR 1020.

### **NEUR 1560. Developmental Neurobiology.**

The course will explore core concepts of developmental biology in the context of the developing nervous system. Topics will include: neuronal specification, cell migration, axon guidance, synapse formation, and neural plasticity. Students will gain experience with the primary literature and learn about cellular and molecular mechanisms of brain development and the tools and model organisms used to study them. Request override through C@B. The decision will be made based on a variety of factors including: seniority, concentration requirement, etc.

### **NEUR 1600. Experimental Neurobiology.**

Intensive laboratory experience in neuroscience appropriate for students with basic background in Neurobiology. Learn and employ the classical neurophysiological techniques of extracellular recording, intracellular recording and receptive field mapping using a variety of animal species. Experiments will include recording of sensory signals in the cockroach leg; frog sciatic nerve and sciatic nerve/muscle preparation and intracellular recording of neurons in Aplysia. Instruction on and practice of effective science writing is another component to this course. Labs are supplemented by informal lectures. Enrollment limited to 18. Please request override through C@B. Overrides will not be given until after the first course meeting.

### **NEUR 1630. Open-Source Big Data Neuroscience Lab.**

Recent technological developments have transformed neuroscience research, enabling us to generate comprehensive 'big data' sets that are often shared freely amongst the neuroscience community. This lab course will explore strategies to effectively use such open-sourced neuroscience data sets. Students will identify fundamental open questions in brain science and develop strategies to mine open-source sequencing, imaging and connectivity data to address their research questions.

### **NEUR 1650. Structure of the Nervous System.**

Combined lecture and laboratory course on the anatomy of the central nervous system. Lectures survey the circuitry of the major neural systems for sensation, movement, cognition, and emotion. Laboratory exercises (Mon. 10:30-12:30) include brain dissections, microscopy of neural tissue, and discussion of clinical cases. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030. Please request an override through C@B. Please keep in mind that decisions on overrides may not be made until the first meeting of the course.

### **NEUR 1660. Neural Computation in Learning and Decision-Making.**

Your brain is constantly making decisions, receiving feedback about those decisions, and learning from that feedback. In this course we will examine the neuroscience underlying these processes from a computational perspective. The course will involve reading scientific papers from cognitive neuroscience, building and testing the computational models that have been developed to synthesize this literature, and, as a final project, extending an existing model of learning or decision making and characterizing its behavior. A primary goal for the course is to develop the tools and motivation to translate verbal theories of behavior into formal and testable computational models.

**NEUR 1670. Neuropharmacology and Synaptic Transmission.**

Synaptic transmission will be studied from a biochemical and pharmacological point of view. We will explore the factors regulating neurotransmitter synthesis, storage, release, receptor interaction, and termination of action. Proposed mechanisms of psychoactive drugs and biochemical theories of psychiatric disorders will be examined. Prerequisites: NEUR 0010 and BIOL 0200 or the equivalent.

**NEUR 1680. Computational Neuroscience.**

A lecture and computing lab course providing an introduction to quantitative analysis of neural activity and encoding, as well as modeling of neurons and neural systems. Emphasizes Matlab-based computer simulation. Prerequisites: NEUR 0010, 1020 or 1030; APMA 1650 or equivalent; APMA 0330 or 0350 or equivalent. Experience with Matlab desirable. Please request an override through C@B. Please keep in mind that decisions on overrides may not be made until the first meeting of the course.

**NEUR 1740. The Diseased Brain: Mechanisms of Neurological and Psychiatric Disorders.**

The goals of this course are to illustrate what basic science can teach us about neurological disorders and how these pathologies illuminate the functioning of the normal nervous system. Consideration will be given to monoallelic diseases (e.g. Fragile X Syndrome, Duchenne Muscular Dystrophy and Tuberous Sclerosis) as well as genetically complex disorders, such as Autism, Schizophrenia and Alzheimer's Disease. Emphasis will be on the cellular and molecular basis of these disorders and how insights at these levels might lead to the development of therapies. Prerequisites: NEUR 1020. BIOL 0470 suggested.

**NEUR 1750. Brain Rhythms in Cognition, Mental Health and Epilepsy.** "Everything in the universe has a rhythm, everything dances." – Maya Angelou.

The brain, too, dances. Its rhythms are the result of millions of neurons coordinating each other's activity. This course will explore how these rhythms are generated, how they relate to our perception and cognition, and how they can be used to better understand and diagnose psychiatric and neurological disorders. Our readings in this seminar will range from historical reviews of brain rhythms to modern primary literature employing cutting-edge experimental neuroscience techniques. Prerequisite: NEUR 0010 or the equivalent.

**NEUR 1930A. Cognitive Neuroscience: Motor Learning.**

This critical reading course will investigate the behavioral and neural mechanisms of motor learning. Readings will focus on work done with neuroimaging, neural recording and neuropsychological approaches that have addressed how the brain organizes and controls different forms of motor learning including simple conditional, practice-related changes and sensory-motor associations. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030, or equivalent.

**NEUR 1930B. From Neurophysiology to Perception.**

This seminar will use readings from the research literature to explore the neural basis of perception. There will be an emphasis on vision, though other sensory modalities may be discussed. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030, or equivalent.

**NEUR 1930C. Development of the Nervous System.**

The course will explore core concepts of developmental biology in the context of the developing nervous system. Topics will include: neuronal specification, cell migration, axon guidance, synapse formation, and neural plasticity. Students will gain experience with the primary literature and learn about cellular and molecular mechanisms of brain development and the tools and model organisms used to study them. Sign-up sheet in Sidney Frank Hall, Room 315 beginning on the first day of registration.

**NEUR 1930D. Cells and Circuits of the Nervous System.**

Selected topics on the biology of neurons and neuronal networks emphasizing original research literature about the membrane physiology, transmitter function, synaptic plasticity, and neural interactions of different vertebrate central nervous systems. Appropriate for graduates and undergraduates with strong neuroscience background. Offered alternate years. Previously offered as NEUR 2150.

**NEUR 1930E. Great Controversies in Neurobiology.**

This upper-level course examines some of the great controversies in the history of neurobiology. Reading material is drawn primarily from the primary scientific literature, so students are expected to already be familiar with reading scientific papers. Each theme will focus on a particular controversy, examining experimental evidence supporting both sides of the issue. Prerequisites: NEUR 0010 and NEUR 1020. Sign-up sheet in Sidney Frank Hall, Room 315 beginning on the first day of registration. Instructor permission required.

**NEUR 1930F. Brain Interfaces for Humans.**

Seminar course will cover developing and existing neurotechnology to restore lost human neurological functions. It will cover stimulation technologies to restore hearing, vision and touch, recording technologies to return function for persons with paralysis. The course will also cover devices to modulate brain function (e.g. deep brain stimulators). We will discuss early brain technologies, the present state neural sensors and decoders and future technology developments (e.g. brain-machine hybrids, human augmentation), as well as ethical implications. A final paper will be required. Instructor permission required. Prerequisites: NEUR 0010, NEUR 1020, and NEUR 1030; 1 year of physics, calculus. Enrollment restricted to 20 Neuroscience Concentrators and Graduate Students. Sign-up sheet in Sidney Frank Hall, Room 315 beginning on the first day of registration.

**NEUR 1930G. Disease, Mechanism, Therapy: Harnessing Basic Biology for Therapeutic Development.**

The recent surge in understanding the cellular and molecular basis of neurological disease has opened the way for highly targeted drug discovery and development. In this course we will use several case studies to illuminate how mechanistic insights are being translated into novel therapeutic approaches. Please request an override through C@B. Please keep in mind that decisions on overrides may not be made until the first meeting of the course.

**NEUR 1930H. Neurological Disorders: Neural Dynamics + Neurotechnology.**

A seminar course on neural dynamics and therapeutic approaches based on open-/closed-loop Brain-Computer Interfaces (BCIs) and neuromodulation for neurological and neuropsychiatric disorders. Topics include: (1) Disorders of consciousness: loss-of-consciousness in generalized epileptic and psychogenic seizures; closed-loop seizure control; Coma, medically induced coma and general anesthesia; Neuromonitoring of consciousness; (2) BCIs for auditory/visual/somatosensory disorders; (3) Movement disorders: BCIs for restoring movement/communication; adaptive-DBS for Parkinson's disease and essential tremor. (4) Neuropsychiatric disorders: DBS for major depression and obsessive compulsive disorder. To sign up, add this course to your cart. Enrollment is based on a variety of factors such as: seniority, concentration requirement.

**NEUR 1930I. Neural Correlates of Consciousness.**

This course will consider the neuroscience of consciousness from a variety of perspectives, using examples from behavior, neurophysiology, neuroimaging and neurology. The course content will focus on primary literature, using review articles for background. Students will lead discussions. Sign-up required by Google Docs (link below). Please keep in mind that overrides may not be given until after the first meeting. Overrides are given based on seniority, concentration requirements, etc. Strongly Recommended: NEUR 1030. Enrollment limited to 15.

**NEUR 1930J. C2S Neurotech: From Concept to Startup- Translating Neurotechnology.**

To provide an understanding of the process of translating neurotechnology concepts into applications that can benefit people with nervous system disorders. Emphasizing principles useful to (1) recognize viable neuroscience concepts that can be applied to human nervous system disorders and (2) implement the essential engineering and clinical steps to translate concepts into real world, useful solutions. This is for students interested in translational neuroscience research in academia or in entrepreneurship and commercialization of neurotech innovations. Please request override via Courses@Brown.

**NEUR 1930N. Region of Interest: An In-Depth Analysis of One Brain Area.**

An in-depth exploration of one region of the brain. Topics will include: cell types and properties; synaptic properties; plasticity; connections to other brain areas; sub-divisions within the area; the region's role in sensation and perception; the region's role in action and behavior; the region's role in learning and memory; and diseases and disorders. Students will gain a deeper understanding of concepts and principles that apply throughout the brain. Students will gain experience with primary literature and learn about techniques for studying the area. Topic Spring 20: TBD. Request overrides through C@B. Overrides will not be given until after first meeting.

**NEUR 1930Z. Cells and Circuits of the Nervous System.**

Selected topics on the biology of neurons and neuronal networks emphasizing primary research literature about neuronal excitability, synaptic mechanisms and plasticity, and diverse sensory, motor, and cognitive functions of neural circuits in vertebrate brains. Offered alternate years. Limit 15. To sign up, add this course to your primary cart. Enrollment decision will be made based on seniority, concentration requirement, etc.

**NEUR 1940B. Deep Learning Methods in Neuroethology.**

Critical readings class will examine neural mechanisms for natural behavior (neuroethology) through reading classic studies and following current research. The course will emphasize the application of deep learning methods to movement patterns, spatial orientation, and social communication. DeepLabCut is one of several new programs that empower students and researchers to take advantage of deep learning methods for behavioral neuroscience. The course will teach how to replace single-parameter data analysis with deep learning methods to identify underlying patterns. Prerequisites are Introductory Neuroscience (NEUR0010) and prior training in Matlab or computer programming languages. Request override through C@B.

**NEUR 1940C. Topics in Visual Physiology.**

Selected topics in visual physiology are examined through a close and critical reading of original research articles. Emphasizes the anatomical and physiological bases of visual function. Appropriate for graduate students and undergraduates with a strong neuroscience background. Offered in alternate years. (Previously offered as NEUR 2120.)

**NEUR 1940D. Higher Cortical Function.**

This reading course examines a series of high-level neurocognitive deficits from the perspectives of popular science and basic neuroscience. Prerequisite: NEUR 1030. Instructor permission required. Sign-up sheet in Sidney Frank Hall, Room 315 beginning on the first day of registration.

**NEUR 1940E. Molecular Neurobiology: Genes, Circuits and Behavior.**

In this seminar course, we will discuss primary research articles, both recent and classical, covering topics ranging from the generation of neuronal diversity to the control of behavior by specific neural circuits. Instructor permission required; enrollment limited to 15. Sign-up sheet in Sidney Frank Hall, Room 315 beginning on the first day of registration.

**NEUR 1940G. Drugs and the Brain.**

This is a seminar course devoted to the reading and analyzing of original research articles dealing with the interaction between drugs and the brain. This will include drugs used to analyze normal brain function, as well as drugs of abuse and drugs used for therapeutic purposes. This course is intended for undergraduate and graduate students with a strong background in neuropharmacology. To express interest, please add this course to your primary cart. The decision will be made based on a variety of factors including, but not limited to seniority, concentration requirement. Limited to 15.

**NEUR 1940I. Neural Correlates of Consciousness.**

This course will consider the neuroscience of consciousness from a variety of perspectives, using examples from behavior, neurophysiology, neuroimaging and neurology. The course content will focus on primary literature, using review articles for background. Students will lead discussions. Sign-up sheet in Sidney Frank Hall, Room 315 beginning on the first day of registration. Prerequisite: NEUR 0010, 1020, and 1030. Enrollment limited to 15. Instructor permission required.

**NEUR 1970. Independent Study.**

Laboratory-oriented research in neuroscience, supervised by staff members. A student, under the guidance of a neuroscience faculty member, proposes a topic for research, develops the procedures for its investigation, and writes a report of the results of his or her study. Independent study may replace only one required course in the neuroscience concentration. Prerequisites include NEUR 0010, 1020 and 1030. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Permission must be obtained from the Neuroscience Department.

**NEUR 2010. Graduate Proseminar in Neuroscience.**

A study of selected topics in experimental and theoretical neuroscience. Presented by neuroscience faculty, students, and outside speakers. A required course for all students in the neuroscience graduate program.

**NEUR 2020. Graduate Proseminar in Neuroscience.**

See Graduate Pro-Seminar In Neuroscience (NEUR 2010) for course description.

**NEUR 2030. Advanced Molecular and Cellular Neurobiology I.**

Focuses on molecular and cellular approaches used to study the CNS at the level of single molecules, individual cells and single synapses by concentrating on fundamental mechanisms of CNS information transfer, integration, and storage. Topics include biophysics of single channels, neural transmission and synaptic function. Enrollment limited to graduate students.

**NEUR 2040. Advanced Molecular and Cellular Neurobiology II.**

This course continues the investigation of molecular and cellular approaches used to study the CNS from the level of individual genes to the control of behavior. Topics include patterning of the nervous system, generation of neuronal diversity, axonal guidance, synapse formation, the control of behavior by specific neural circuits and neurodegenerative diseases. Enrollment is limited to graduate students.

**NEUR 2050. Advanced Systems Neuroscience.**

Focuses on systems approaches to study nervous system function. Lectures and discussions focus on neurophysiology, neuroimaging and lesion analysis in mammals, including humans. Cognitive neuroscience approaches will become integrated into the material. Topics include the major sensory, regulatory, and motor systems. Enrollment limited to graduate students.

**NEUR 2060. Advanced Systems Neuroscience.**

Focuses on cognitive approaches to study nervous system function. Lectures and discussions focus on neurophysiology, neuroimaging and lesion analysis in mammals, including humans. Computational approaches will become integrated into the material. Topics include the major cognitive systems, including perception, decisions, learning and memory, emotion and reward, language, and higher cortical function. Instructor permission required.

**NEUR 2110. Statistical Neuroscience.**

A lecture and computing lab course for senior undergraduate and graduate students with background in either systems neuroscience or applied math/biomedical engineering on the statistical analysis and modeling of neural data, with hands-on Matlab(Octave)/Python-based applications to real and simulated data. Topics will include signal processing, hypothesis testing and statistical inference, modeling of multivariate time series and stochastic processes in neuroscience and neuroengineering, neural point processes, time and spectral domain analyses, and state-space models. Example datasets include neuronal spike trains, local field potentials, ECoG/EEG, and fMRI. Sign-up sheet in Sidney Frank Hall, Room 315 beginning on the first day of registration. Instructor permission required.

**NEUR 2120. Topics in Visual Physiology.**

Selected topics in visual physiology are examined through a close and critical reading of original research articles. Emphasizes the anatomical and physiological bases of visual function. Primarily for graduate students with a strong background in neuroscience and a working knowledge of the anatomy and physiology of the mammalian visual system. Offered in alternate years. Instructor permission required.

**NEUR 2160. Neurochemistry and Behavior.**

Examines behavior from a neurochemical perspective via readings and discussions based on original research articles. Intended primarily for graduate students with a strong background in neurochemistry and neuropharmacology and advanced undergraduates with an appropriate background. Offered alternate years. Sign-up sheet in Sidney Frank Hall, Room 315 beginning on the first day of registration.

**NEUR 2920. Behavior: A Genetic and Molecular Perspective.**

Many of the cellular and molecular mechanisms that underlie behavior are conserved across species. This seminar course draws on work in invertebrate and vertebrate species to examine the genes and molecules that have been implicated in diverse behaviors. Topics to be discussed include circadian rhythms, pair bonding, migration, and aggression. Each week, students will read two to three papers from the primary literature and actively participate in class discussion. Prerequisites: NEUR 0010 and NEUR 1020 (undergraduate students) or NEUR 2030 (graduate students). Enrollment limited to 13. Instructor permission required.

**NEUR 2930C. Historical Foundations of the Neurosciences.**

Two year sequence starting Fall 2010; students register for one year at a time. The first year (2010-2011) will examine the history of basic neuroscientific concepts from the late Greeks (Galen) to the later 19th century, up to Cajal (neuron doctrine) and Sherrington (reflexes and integration). Since the seminar meets only monthly, it must be taken in the Fall and Spring semesters to receive a semester's credit. For credit, a substantial paper (approximately 15 pages) is required at the end of the Spring semester. Primarily for graduate students in neuroscience, cognitive science, and psychology. Others may be admitted after discussion with the instructor. Auditors are welcome if they share in the rotating duty of presenting seminars. Sign-up sheet in Sidney Frank Hall, Room 315 beginning on the first day of registration.

**NEUR 2930E. Bench to Bedside: Unraveling Diseases of the Nervous System.**

Enrollment restricted to graduate students.

**NEUR 2930F. Disease, Mechanism, Therapy: Harnessing Basic Biology for Therapeutic Development.**

The recent surge in understanding the cellular and molecular basis of neurological disease has opened the way for highly targeted drug discovery and development. In this course we will use several case studies to illuminate how mechanistic insights are being translated into novel therapeutic approaches. Instructor permission required. Enrollment limited to 15 Graduate students. Sign-up sheet in Sidney Frank Hall, Room 315 beginning on the first day of registration.

**NEUR 2940A. Advanced Molecular Neurobiology.**

No description available.

**NEUR 2940G. Historical Foundations of the Neurosciences II.**

Continuation of a two year sequence focusing on the conceptual foundations in the history of neuroscience, from the late nineteenth century to the present. Primarily for graduate students in neuroscience, cognitive science, and psychology, but senior undergraduates may be admitted with written permission from the instructor. Seminar meets monthly, and must be taken for the full year to receive one semester credit.

**NEUR 2940H. Ethics and Skills Workshop.**

The ethics and skills workshops will be lead by faculty trainers in the Neuroscience Graduate Program. We will cover the following or similar topics over a two year period: Plagiarism, scientific accuracy, data ownership, expectations of advisory committees and mentors, authorship disagreements, and conflicts among lab members. Enrollment restricted to graduate students.

**NEUR 2940I. Neural Correlates of Consciousness.**

Will consider the neuroscience of consciousness from a variety of perspectives, using examples from behavior, neurophysiology, neuroimaging and neurology. The course content will focus on primary literature, using review articles for background. Students will lead the discussions. Primarily for graduate students. Senior undergraduates neuroscience concentrators and others may be admitted after discussion with the instructor. Instructor permission required. S/NC

**NEUR 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**NEUR 2980. Graduate Independent Study.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. S/NC

**NEUR 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

# The School of Engineering

---

## Dean

Lawrence E. Larson

The mission of Brown University's School of Engineering is to educate future leaders in the fundamentals of engineering in an environment of world-class research. We stress an interdisciplinary approach and a broad understanding of underlying global issues. Collaborations across the campus and beyond strengthen our development of technological advances that address challenges of vital importance to us all.

Along with our associations with the other scholarly disciplines – biology, medicine, physics, chemistry, computer science, the humanities and the social sciences – our co-operations bring unique solutions to challenging problems. The School focuses on unique and innovative clustering of faculty; in terms of research groups, engineers of all types team together with non-engineers to tackle some of the biggest problems facing engineering and science today. Our talents and expertise lie in the interdisciplinary domain where the seemingly diverse disciplines converge.

The School of Engineering offers courses and programs leading to the Bachelor of Science (Sc.B.), the Bachelor of Arts (A.B.), the Master of Science (Sc.M.), and the Doctor of Philosophy (Ph.D.).

For additional information, please visit the School's website at: <http://brown.edu/academics/engineering>

## Engineering Concentration Requirements

The concentration in Engineering equips students with a solid foundation for careers in engineering, to advance the knowledge base for future technologies, and to merge teaching, scholarship, and practice in the pursuit of solutions to human needs. The concentration offers one standard Bachelor of Arts (A.B.) program and eight Bachelor of Science (Sc.B.) degree programs. Of these, the Sc.B. programs in biomedical, chemical, computer, electrical, materials, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>). The Sc.B. degree program in environmental engineering is not currently accredited by the Engineering Accreditation Commission of ABET, but will seek accreditation during the 2020-21 academic year. The engineering physics program is also offered, but is not accredited by ABET. Other programs leading to the Sc.B. or A.B. degrees in Engineering may be designed in consultation with a faculty advisor. These programs must meet the general requirements for concentration programs in the School of Engineering. Students interested in an individualized program should consult with an Engineering faculty member willing to serve as an advisor and obtain the approval of the Engineering Concentration Committee. Engineering students with a particular interest in using their technical skills for the public benefit might also consider the Engaged Scholars Program (<https://www.brown.edu/academics/engineering/undergraduate-study/engaged-scholars-program>).

Please note that all student concentration forms must be approved by the Engineering Concentration Committee, which reviews them for compliance with all relevant program and accreditation requirements.

## Mathematics

Mathematics 0190, 0200 is the preferred sequence of courses to be taken in the freshman year. Students who would prefer a more introductory level calculus course may start in MATH 0100 and take MATH 0200 or MATH 0180 in second semester. Students without one year of secondary school level preparation in calculus should take MATH 0090, MATH 0100 in their first year, and should begin their sequence of engineering courses with ENGN 0030 in sophomore year. The courses APMA 0330 & APMA 0340 (Methods of Applied Math I, II) can be taken in the sophomore year as well.

## Advanced Placement

Students who have taken Advanced Placement courses in high school and/or have shown proficiency through advanced placement examinations are often able to start at a higher level than suggested by the standard programs below. However, please note that Advanced Placement credit cannot be used to satisfy any concentration requirements. For example, our Sc.B. programs specify that students must take 4 semesters of math while enrolled here at Brown, beginning with MATH 0190 or MATH 0170.

If a student comes in with advanced placement credit (e.g. placing out of MATH 0190 or MATH 0200), he/she is strongly recommended to take a higher level math course as a replacement. Examples of such courses are MATH 0520 (Linear Algebra), MATH 1260 (Complex Analysis), MATH 1610 (Probability), MATH 1620 (Statistics), APMA 1170 (Numerical Analysis), APMA 1210 (Operations Research), or APMA 1650 (Statistical Inference). However, the student with advanced placement credit for MATH 0190 or MATH 0200 also has the option of replacing the math course with an advanced-level science course, subject to the approval of the concentration advisor.

## Transfer Credit

Students who have successfully completed college courses elsewhere may apply to the University for transfer credit. (See the "Study Elsewhere" section of the University Bulletin for procedures, or contact the Dean of the College.) Transfer courses that are used to meet Engineering concentration requirements must be approved by the student's concentration advisor, and must be described briefly on the student's electronic concentration form. Transfer courses that are determined by the concentration advisor to be substantially equivalent to a required Brown course automatically fulfill concentration requirements. In rare cases, students may petition the concentration committee to use courses that do not have an equivalent offered at Brown to meet a concentration requirement. Substitutions of this nature can only be approved if the student's overall program meets published educational outcomes for the concentration and has sufficient basic science, mathematics, and engineering topics courses to meet relevant accreditation requirements. Students should consult their concentration advisor for assistance with drafting a petition. The decision whether to award concentration credit is made by majority vote of the Engineering Concentration Committee.

## Substitutions for Required Courses

A student may petition the Concentration Adviser to substitute a course in place of a requirement. Such substitutions can only be approved if the student's modified program continues to meet the published educational outcomes for the concentration, and has sufficient basic science, mathematics, and engineering topics courses to meet accreditation requirements. If the substitution involves taking an equal or higher level course in substantially the same area, whether at Brown or elsewhere, it can be approved by the Concentration Adviser. (For courses taken elsewhere, the credit must be officially transferred.) Students wishing to make substitutions of a broader nature should consult their Concentration Adviser for assistance with drafting their petition to the Engineering Concentration Committee, which may be approved by a majority vote.

## Standard Program for the A.B. degree:

Candidates for the Bachelor of Arts (A.B.) degree with a concentration in Engineering must complete at least eight approved Engineering courses. The eight courses must include at least two 1000-level Engineering courses. Of these 1000-level courses, one must be a design or independent study course and the other an in-classroom experience. The set of Engineering courses must be chosen with careful attention to the prerequisites of the 1000-level courses. Please note that this A.B. degree program is not accredited by ABET.

Not all engineering courses may be used to satisfy the engineering course requirement for the A.B. degree. For example, the following courses cannot be used to satisfy the engineering course requirement for the A.B. degree: ENGN 0020, ENGN 0090, ENGN 0900, ENGN 0930A, ENGN 0930C, ENGN 1010. Therefore, the program of study must be developed through consultation with the concentration advisor.

The A.B. program also requires preparation in Mathematics equivalent to MATH 0200 and APMA 0330, as well as at least one college-level science course from the general areas of chemistry, life sciences, physics, or geological sciences. Remedial courses, such as CHEM 0100, cannot be used to satisfy this requirement. A programming course is also recommended, but not required. The entire program is subject to approval by an Engineering Concentration Advisor and the Chair of the Engineering Concentration Committee.

## Standard programs for the Sc.B. degree

All Bachelor of Science (Sc.B.) program tracks build upon a common core of engineering knowledge and skills applicable across all engineering disciplines. The goal of this engineering core curriculum is to prepare to practice engineering in an age of rapidly changing technology. Two-thirds of this four-year program consists of a core of basic mathematics, physical sciences and engineering sciences common to all branches of engineering, including a thorough grounding in programming and technical problem solving. This core provides our graduates with the basis of theory, design, and analysis that will enable them to adapt to whatever may come along during their careers.

At the same time, the core courses assist students in making informed choices in determining their areas of specialization, at the end of their sophomore year. To this end, first-year students are given an introduction to engineering - featuring case studies from different disciplines in engineering as well as guest speakers from industry. This aspect of the program is different from that at many other schools where students are expected to select a specific branch of engineering much earlier in their academic program.

In addition, all Sc.B. programs in Engineering must be complemented by at least four courses in humanities and social sciences. The minimum four-course humanities and social sciences requirement for the Sc.B. in Engineering cannot be met by advanced placement credit.

## Special Concentrations

In addition to the standard programs described above, students may also petition the Engineering Concentration Committee to pursue a special engineering Sc.B. degree of their own design. Such special Sc.B. programs are not ABET-accredited. Students with a special concentration will receive an Sc.B. degree in engineering, but a specific area of specialization will not be noted on their transcript. A special Sc.B. concentration is intended to prepare graduates for advanced study in engineering or for professional practice, but in an area that is not covered by one of the existing Sc.B. programs. Accordingly, special concentration programs are expected to consist of a coherent set of courses with breadth, depth and rigor comparable to an accredited degree. A total of 21 engineering, mathematics, and basic science courses are required. The program must include at least 3 courses in mathematics, at least 2 courses in physical or life sciences; and at least 12 courses in engineering. At least five of the engineering courses must be upper level courses, and one must be a capstone design course or independent study, which must be advised or co-advised by a member of the regular engineering faculty. Note that not all engineering courses may be used to meet Sc.B. requirements: for example, the courses not allowed to count toward the A.B., will not qualify. Petitions should be prepared in consultation with an engineering faculty adviser, who will submit the petition to the Engineering Concentration Committee. Petitions must include: (i) a statement of the objectives of the degree program, and an explanation of how the courses in the program meet these objectives; (ii) course descriptions for any courses in the program that are not part of standard ScB engineering concentrations; (iii) a detailed description of any independent study courses used for concentration credit, signed by the faculty adviser for this course; and (iv) an up-to-date internal transcript.

## Professional Tracks

While we do not give course credit for internships, we officially recognize their importance via the optional Professional Tracks. The requirements for the professional tracks include all those of the standard tracks, as well as the following: Students must complete two full-time professional experiences, lasting two to four months each (or two part-time experiences of equivalent total effort), doing work that is related to their concentration

programs. Such work is normally done within an industrial organization, but may also be done at a university under the supervision of a faculty member. For the work to be considered related to a concentration program, the job responsibilities must make use of the material from one or more courses of the concentration (regardless of whether the student has taken those courses or not at the time of the internship). On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts:

- Describe the organization you worked in and the nature of your responsibilities.
- Which courses were put to use in your work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your work experience?
- What are the topics from these courses that would have helped you if you had been more familiar with them?
- What topics would have been helpful in preparation for this work experience that you did not learn at Brown?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did something you would like to continue doing once you graduate? Explain.
- Would you recommend your work experience to other Brown students? Explain.

The reflective essays are subject to the approval of the student's concentration adviser.

Entry to the Professional Track requires a simple application form to be completed by the student and approved by the Concentration Advisor at the time of the concentration declaration. If the student has not yet declared a concentration, the form may be approved by the Chair of the Concentration Committee. The Concentration Advisor will certify that all Professional Track students have completed the necessary internships and will grant approval for the associated reflective essays. All other requirements remain identical to those in the standard tracks in the concentrations.

## Chemical Engineering Track:

The Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. The education objectives of the Chemical Engineering program are to prepare graduates: (1) to pursue productive scientific and technical careers, beginning with entry-level engineering positions in industry, or graduate study in chemical engineering or related fields; or to successfully pursue other careers that benefit from the analytical or quantitative skills acquired through the Brown ChE Program; (2) to effectively apply the principles of chemical engineering, problem-solving skills, and critical and independent thinking, to a broad range of complex, multidisciplinary technological and societal problems; (3) to communicate effectively, both orally and in writing, to professionals and audiences of diverse backgrounds, and to pursue technical approaches and innovations that address the needs of society in an ethical, safe, sustainable, and environmentally responsible manner. The student outcomes of this program are the ABET (1)- (7) Student Outcomes as defined by the "ABET Criteria for Accrediting Engineering Programs" (available online at <http://www.abet.org/accreditation-criteria-policies-documents/>).

### 1. Core Courses:

ENGN 0030	Introduction to Engineering	1
or ENGN 0031	Honors Introduction to Engineering	
ENGN 0040	Dynamics and Vibrations	1
ENGN 0410	Materials Science	1
ENGN 0510	Electricity and Magnetism	1
ENGN 0520	Electrical Circuits and Signals	1
ENGN 0720	Thermodynamics	1
ENGN 0810	Fluid Mechanics	1

BIOL 0200	The Foundation of Living Systems	1
CHEM 0330	Equilibrium, Rate, and Structure	1
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	1
or MATH 0170	Advanced Placement Calculus	
MATH 0200	Intermediate Calculus (Physics/Engineering)	1
or MATH 0180	Intermediate Calculus	
or MATH 0350	Honors Calculus	
APMA 0330	Methods of Applied Mathematics I, II	1
or APMA 0350	Applied Ordinary Differential Equations	
APMA 0340	Methods of Applied Mathematics I, II	1
or APMA 0360	Applied Partial Differential Equations I	
2. Upper-Level Chemical & Biochemical Engineering Curriculum		
ENGN 1110	Transport and Biotransport Processes	1
ENGN 1120	Reaction Kinetics and Reactor Design <sup>1</sup>	1
ENGN 1130	Chemical Engineering Thermodynamics <sup>1</sup>	1
ENGN 1710	Heat and Mass Transfer	1
CHEM 0350	Organic Chemistry	1
Advanced Chemistry elective course <sup>2</sup>		
CHEM 0360	Organic Chemistry	1
or CHEM 0400	Biophysical and Bioinorganic Chemistry	
or CHEM 0500	Inorganic Chemistry	
or CHEM 1140	Physical Chemistry: Quantum Chemistry	
Advanced Natural Sciences elective course <sup>3</sup>		
3. Capstone Design Course		
ENGN 1140	Chemical Process Design	1

\*In addition to program requirements above, students must take four courses in the humanities and social sciences.

Total Credits 21

<sup>1</sup> Note: ENGN 1120 and 1130 are only offered in alternate years.  
<sup>2</sup> An advanced chemistry course approved by concentration advisor; the following courses are pre-approved for this requirement.  
<sup>3</sup> An advanced course in the natural sciences approved by the concentration advisor. For suggestions of acceptable courses that fulfill this requirement, please see the concentration advisor.

### Computer Engineering Track:

The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. The education objectives of the Computer Engineering program are to prepare graduates: (1) to pursue distinctive multidisciplinary scientific and technical careers beginning with either entry-level computer engineering positions in industry or graduate study in computer engineering and related fields; (2) to participate on multidisciplinary teams that cooperate in applying problem-solving skills and critical and independent thinking to a broad range of projects that can produce the technical innovations aimed at satisfying the future needs of society. The student outcomes of this program are the ABET (1) - (7) Student Outcomes as defined by the "ABET Criteria for Accrediting Engineering Programs" (available online at <http://www.abet.org/accreditation-criteria-policies-documents/>).

The Computer Engineering concentration shares much of the core with the other engineering programs, but is structured to include more courses in computer science, and a somewhat different emphasis in mathematics.

**1. Core Courses:**

ENGN 0030	Introduction to Engineering	1
or ENGN 0031	Honors Introduction to Engineering	
ENGN 0040	Dynamics and Vibrations	1
ENGN 0510	Electricity and Magnetism	1
ENGN 0520	Electrical Circuits and Signals	1
APMA 1650	Statistical Inference I	1
or APMA 1655	Statistical Inference I	

or CSCI 1450	Probability for Computing and Data Analysis	
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	1
or MATH 0170	Advanced Placement Calculus	
MATH 0200	Intermediate Calculus (Physics/Engineering)	1
or MATH 0180	Intermediate Calculus	
or MATH 0350	Honors Calculus	
APMA 0330	Methods of Applied Mathematics I, II	1
or APMA 0350	Applied Ordinary Differential Equations	
or APMA 1170	Introduction to Computational Linear Algebra	
or APMA 1710	Information Theory	
or CSCI 0220	Introduction to Discrete Structures and Probability	
or CSCI 1570	Design and Analysis of Algorithms	
or MATH 1260	Complex Analysis	
CHEM 0330	Equilibrium, Rate, and Structure <sup>1</sup>	1
or ENGN 0410	Materials Science	
or NEUR 0010	The Brain: An Introduction to Neuroscience	
Select one of the following series (other CSCI courses subject to approval):		
CSCI 0150 & CSCI 0160	Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures	
CSCI 0170 & CSCI 0180	Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction	
CSCI 0190	Accelerated Introduction to Computer Science (and one additional CSCI course subject to approval)	

**2. Upper-Level Computer Engineering Curriculum:**

ENGN 1570	Linear System Analysis	1
ENGN 1630	Digital Electronics Systems Design	1
ENGN 1640	Design of Computing Systems	1
MATH 0520	Linear Algebra	1
or MATH 0540	Honors Linear Algebra	
One advanced Computer Engineering foundations course:		
ENGN 1580	Communication Systems	1
ENGN 1600	Design and Implementation of Digital Integrated Circuits	
ENGN 1610	Image Understanding	
ENGN 1620	Analysis and Design of Electronic Circuits	
ENGN 2530	Digital Signal Processing	

One advanced Computer Science course with significant systems programming: 1

CSCI 0330	Introduction to Computer Systems	
or CSCI 0320	Introduction to Software Engineering	
or CSCI 1230	Introduction to Computer Graphics	
or CSCI 1380	Distributed Computer Systems	
or CSCI 1670	Operating Systems	
or CSCI 1680	Computer Networks	

Select three upper-level electives from the list below (other ENGN or CSCI courses subject to approval). At least one must be an ENGN course and at least one must be a CSCI course. <sup>2</sup> 3

ENGN 1220	Neuroengineering	
ENGN 1450	Properties and Processing of Electronic Materials	
ENGN 1560	Optics	
ENGN 1580	Communication Systems	
ENGN 1590	Introduction to Semiconductors and Semiconductor Electronics	

ENGN 1600	Design and Implementation of Digital Integrated Circuits
ENGN 1610	Image Understanding
ENGN 1620	Analysis and Design of Electronic Circuits
ENGN 1680	Design and Fabrication of Semiconductor Devices
ENGN 1690	Photonics Devices and Sensors
ENGN 1930B	Biomedical Optics
ENGN 1931A	Photovoltaics Engineering
ENGN 1931F	Introduction to Power Engineering
ENGN 1931I	Design of Robotic Systems
ENGN 1931Y	Control Systems Engineering
ENGN 1931Z	Interfaces, Information and Automation
ENGN 2520	Pattern Recognition and Machine Learning
ENGN 2530	Digital Signal Processing
ENGN 2560	Computer Vision
ENGN 2610	Physics of Solid State Devices
ENGN 2620	Solid State Quantum and Optoelectronics
ENGN 2910A	Advanced Computer Architecture
ENGN 2911X	Reconfigurable Computing for Machine/Deep Learning
ENGN 2912B	Scientific Programming in C++
ENGN 2912E	Low Power VLSI System Design
CSCI 0320	Introduction to Software Engineering
CSCI 1230	Introduction to Computer Graphics
CSCI 1270	Database Management Systems
CSCI 1300	User Interfaces and User Experience
CSCI 1320	Creating Modern Web & Mobile Applications
CSCI 1380	Distributed Computer Systems
CSCI 1410	Artificial Intelligence
CSCI 1480	Building Intelligent Robots
CSCI 1570	Design and Analysis of Algorithms
CSCI 1600	Real-Time and Embedded Software
CSCI 1660	Introduction to Computer Systems Security
CSCI 1670	Operating Systems
CSCI 1680	Computer Networks
CSCI 1730	Design and Implementation of Programming Languages
CSCI 1760	Multiprocessor Synchronization
CSCI 1900	csciStartup

### 3. Capstone Design <sup>3</sup> 1

ENGN 1650	Embedded Microprocessor Design
or ENGN 1000	Projects in Engineering Design I
or ENGN 1001	Projects in Engineering Design II

4. General Education Requirement: At least four approved courses must be taken in humanities and social sciences

Total Credits 21

<sup>1</sup> Or Biology course beyond BIOL 0200 subject to Concentration Advisor approval

<sup>2</sup> Subject to approval by the concentration advisor, the third upper-level elective may optionally be chosen from another department such as CLPS, NEUR, PHYS, or CHEM if it has a significant quantitative physical science emphasis.

<sup>3</sup> Subject to approval by the concentration advisor, an independent study course (ENGN 1970/ENGN 1971) may be used to fulfill the Engineering Capstone Design requirement. To qualify for such approval, the independent study project must: (1) contain a significant and definable design component; (2) be based on the knowledge and skills acquired in earlier course work, (3) incorporate appropriate engineering standards; and (4) address multiple realistic constraints.

## Electrical Engineering Track:

The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. The education objectives of the Electrical Engineering program are to prepare graduates: (1) to pursue distinctive multidisciplinary scientific and technical careers beginning with either entry-level electrical engineering positions in industry or graduate study in electrical engineering and related fields; (2) to participate on multidisciplinary teams that cooperate in applying problem-solving skills and critical and independent thinking to a broad range of projects that can produce the technical innovations aimed at satisfying the future needs of society. The student outcomes of this program are the ABET (1) - (7) Student Outcomes as defined by the "ABET Criteria for Accrediting Engineering Programs" (available online at <http://www.abet.org/accreditation-criteria-policies-documents/>).

### 1. Core Courses:

ENGN 0030	Introduction to Engineering	1
or ENGN 0031	Honors Introduction to Engineering	
ENGN 0040	Dynamics and Vibrations	1
ENGN 0410	Materials Science	1
ENGN 0510	Electricity and Magnetism	1
ENGN 0520	Electrical Circuits and Signals	1
ENGN 0720	Thermodynamics	1
ENGN 0310	Mechanics of Solids and Structures	1
or ENGN 0810	Fluid Mechanics	
or CSCI 0160	Introduction to Algorithms and Data Structures	
or CSCI 0180	Computer Science: An Integrated Introduction	
CHEM 0330	Equilibrium, Rate, and Structure	1
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	1
or MATH 0170	Advanced Placement Calculus	
MATH 0200	Intermediate Calculus (Physics/Engineering)	1
or MATH 0180	Intermediate Calculus	
or MATH 0350	Honors Calculus	
APMA 0330	Methods of Applied Mathematics I, II	1
or APMA 0350	Applied Ordinary Differential Equations	
APMA 0340	Methods of Applied Mathematics I, II	1
or APMA 0360	Applied Partial Differential Equations I	
or APMA 1650	Statistical Inference I	
or APMA 1710	Information Theory	
or MATH 0520	Linear Algebra	
or MATH 0540	Honors Linear Algebra	
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science <sup>2</sup>	1
or CSCI 0040	Introduction to Scientific Computing and Problem Solving	
or CSCI 0111	Computing Foundations: Data	
or CSCI 0170	Computer Science: An Integrated Introduction	
or CSCI 0190	Accelerated Introduction to Computer Science	
or APMA 0160	Introduction to Scientific Computing	
or ENGN 1931Z	Interfaces, Information and Automation	

### 2. Upper-Level Electrical Engineering Curriculum

ENGN 1570	Linear System Analysis	1
ENGN 1620	Analysis and Design of Electronic Circuits	1
ENGN 1630	Digital Electronics Systems Design	1

PHYS 0790 Physics of Matter 1  
or PHYS 1410 Quantum Mechanics A

**3. Electrical Engineering Specialization - Complete at least three courses from the following groups:** 3

At least one advanced Electrical Engineering foundations course:

ENGN 1230 Instrumentation Design  
ENGN 1580 Communication Systems  
ENGN 1590 Introduction to Semiconductors and Semiconductor Electronics  
ENGN 1600 Design and Implementation of Digital Integrated Circuits  
ENGN 1610 Image Understanding  
ENGN 1640 Design of Computing Systems

Up to two other Electrical Engineering Courses<sup>3</sup>

ENGN 1220 Neuroengineering  
ENGN 1560 Optics  
ENGN 1650 Embedded Microprocessor Design  
ENGN 1680 Design and Fabrication of Semiconductor Devices  
ENGN 1690 Photonics Devices and Sensors  
ENGN 1930B Biomedical Optics  
ENGN 1931A Photovoltaics Engineering  
ENGN 1931F Introduction to Power Engineering  
ENGN 1931I Design of Robotic Systems  
ENGN 1931Y Control Systems Engineering  
ENGN 1931Z Interfaces, Information and Automation

Up to one interdisciplinary engineering science course:

CLPS 1491 Neural Modeling Laboratory  
CLPS 1520 Computational Vision  
CSCI 0330 Introduction to Computer Systems<sup>4</sup>  
ENGN 1370 Advanced Engineering Mechanics  
ENGN 1450 Properties and Processing of Electronic Materials  
NEUR 2110 Statistical Neuroscience  
PHYS 1420 Quantum Mechanics B

**4. Capstone Design: At least one course from the following:** 1

ENGN 1650 Embedded Microprocessor Design  
or ENGN 1000 Projects in Engineering Design I  
or ENGN 1001 Projects in Engineering Design II

**5. General Education Requirement: At least four approved courses must be taken in humanities and social sciences**

Total Credits 21

<sup>1</sup> Or 1000-level Applied Mathematics or Mathematics course subject to Concentration Advisor Approval

<sup>2</sup> ENGN 1931Z may replace CSCI 0150 or meet an elective requirement, but not both.

<sup>3</sup> Or 2000-level Electrical Engineering graduate course (such as ENGN 2500, ENGN 2520, ENGN 2530, ENGN 2560, ENGN 2912K).

<sup>4</sup> Or Computer Science course beyond CSCI 0150/CSCI 0170 subject to Concentration Advisor approval

<sup>5</sup> Subject to approval by the concentration advisor, an independent study course (ENGN 1970/ ENGN 1971) may be used to fulfill the Engineering Capstone Design requirement. To qualify for such approval, the independent study project must: (1) contain a significant and definable design component; (2) be based on the knowledge and skills acquired in earlier course work, (3) incorporate appropriate engineering standards; and (4) address multiple realistic constraints.

## Environmental Engineering Track:

Brown's Environmental Engineering program was launched in 2013. The first graduates completed the program with the Sc.B. degree in

Environmental Engineering in Spring 2017. The program has graduated Sc.B. degree recipients every year since then. The program will seek accreditation from the Engineering Accreditation Commission of ABET during Brown's upcoming review period in 2020-2021 when the rest of the School of Engineering's existing accredited programs will be reviewed. The education objectives of the program are: (1) to prepare students to pursue scientific or technical careers, starting with entry-level positions in industry, or in graduate study in environmental engineering; (2) to develop critical thinking and problem-solving skills that yield sustainable solutions to complex environmental problems for the protection of human health and the environment. The student outcomes of this program are intended to be those enumerated in items (1) - (7) Student Outcomes as defined by the "ABET Criteria for Accrediting Engineering Programs" (available online at <http://www.abet.org/accreditation-criteria-policies-documents/>).

### 1. Core Courses:

ENGN 0030 Introduction to Engineering 1  
or ENGN 0031 Honors Introduction to Engineering  
ENGN 0040 Dynamics and Vibrations 1  
ENGN 0410 Materials Science 1  
ENGN 0490 Fundamentals of Environmental Engineering 1  
ENGN 0510 Electricity and Magnetism 1  
or ENGN 0520 Electrical Circuits and Signals  
ENGN 0720 Thermodynamics 1  
ENGN 0810 Fluid Mechanics 1  
BIOL 0200 The Foundation of Living Systems 1  
CHEM 0330 Equilibrium, Rate, and Structure 1  
MATH 0190 Advanced Placement Calculus (Physics/ Engineering) 1

or MATH 0170 Advanced Placement Calculus  
MATH 0200 Intermediate Calculus (Physics/ Engineering) 1  
or MATH 0180 Intermediate Calculus  
or MATH 0350 Honors Calculus  
APMA 0330 Methods of Applied Mathematics I, II 1  
or APMA 0350 Applied Ordinary Differential Equations  
APMA 0650 Essential Statistics 1  
or APMA 1650 Statistical Inference I

### 2. Advanced Science Courses

EEPS 1370 Environmental Geochemistry 1  
or EEPS 1310 Global Water Cycle  
or EEPS 1330 Global Environmental Remote Sensing  
or EEPS 1520 Ocean Circulation and Climate  
or EEPS 1580 Quantitative Elements of Physical Hydrology  
or EEPS 1960B Special Topics in Geological Sciences: Physical Hydrology

BIOL 0420 Principles of Ecology 1  
or BIOL 0480 Evolutionary Biology  
or BIOL 1470 Conservation Biology

### 3. Upper-Level Environmental Engineering Curriculum (5 Credits)

ENGN 1340 Water Supply and Treatment Systems - Technology and Sustainability 1

ENGN 1931P Energy and the Environment 1

Three advanced Engineering courses from the list below:<sup>1</sup> 3

ENGN 1110 Transport and Biotransport Processes  
ENGN 1120 Reaction Kinetics and Reactor Design  
ENGN 1130 Chemical Engineering Thermodynamics  
ENGN 1710 Heat and Mass Transfer  
ENGN 1860 Advanced Fluid Mechanics  
ENGN 1930U Renewable Energy Technologies  
ENGN 1931A Photovoltaics Engineering

ENGN 1931F	Introduction to Power Engineering	
ENGN 1931R	Chemistry of Environmental Pollution	
ENGN 2911P	Fate and Transport of Environmental Contaminants	
4. Capstone Design <sup>2</sup>		1
ENGN 1150	Environmental Engineering Design	
* In addition to program requirements above, students must take four courses in the humanities and social sciences.		
Total Credits		21

<sup>1</sup> Or any other advanced Engineering course approved by the concentration advisor

<sup>2</sup> Subject to approval by the concentration advisor, an independent study course (ENGN1970/1971) may be used to fulfill the Engineering Capstone Design requirement. To qualify for such approval, the independent study project must: (1) contain a significant and definable design component; (2) be based on the knowledge and skills acquired in earlier course work, (3) incorporate appropriate engineering standards; and (4) address multiple realistic constraints. To request approval, please complete the online form available at: <http://www.brown.edu/academics/engineering/undergraduate-study>

## Materials Engineering Track:

The Materials Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. The education objectives of the Materials Engineering program are to prepare graduates: (1) to pursue multidisciplinary scientific and technical careers beginning with entry-level engineering positions in industry or graduate study in materials science and engineering and related fields; (2) to apply an engineering problem-solving approach combined with a broad appreciation for the liberal arts to inform and develop their understanding of current societal needs and values to achieve leadership positions in their chosen fields of endeavor. The student outcomes of this program are the (1) - (7) Student Outcomes as defined by the "ABET Criteria for Accrediting Engineering Programs" (available online at <http://www.abet.org/accreditation-criteria-policies-documents/>).

### 1. Core Courses:

ENGN 0030	Introduction to Engineering	1
or ENGN 0031	Honors Introduction to Engineering	
ENGN 0040	Dynamics and Vibrations	1
ENGN 0410	Materials Science	1
ENGN 0510	Electricity and Magnetism	1
ENGN 0520	Electrical Circuits and Signals	1
ENGN 0720	Thermodynamics	1
ENGN 0310	Mechanics of Solids and Structures	1
or ENGN 0810	Fluid Mechanics	
CHEM 0330	Equilibrium, Rate, and Structure	1
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	1
or MATH 0170	Advanced Placement Calculus	
MATH 0200	Intermediate Calculus (Physics/Engineering)	1
or MATH 0180	Intermediate Calculus	
or MATH 0350	Honors Calculus	
APMA 0330	Methods of Applied Mathematics I, II	1
or APMA 0350	Applied Ordinary Differential Equations	
APMA 0340	Methods of Applied Mathematics I, II	1
or APMA 0360	Applied Partial Differential Equations I	
or MATH 0520	Linear Algebra	
or APMA 1210	Operations Research: Deterministic Models	
or APMA 1650	Statistical Inference I	
CHEM 0350	Organic Chemistry	1
or CSCI 0040	Introduction to Scientific Computing and Problem Solving	

or CSCI 0111	Computing Foundations: Data	
or CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
or CSCI 0170	Computer Science: An Integrated Introduction	
or CSCI 0190	Accelerated Introduction to Computer Science	
or ENGN 1230	Instrumentation Design	
or ENGN 1740	Computer Aided Visualization and Design	
or ENGN 1750	Advanced Mechanics of Solids	
or APMA 0160	Introduction to Scientific Computing	
2. Upper-Level Materials Engineering Curriculum		
ENGN 1410	Physical Chemistry of Solids	1
ENGN 1420	Kinetics Processes in Materials Science and Engineering	1
ENGN 1440	Mechanical Properties of Materials	1
PHYS 0790	Physics of Matter	1
or CHEM 0350	Organic Chemistry	
or CHEM 1140	Physical Chemistry: Quantum Chemistry	
Three of the following: <sup>1</sup>		3
ENGN 1450	Properties and Processing of Electronic Materials	
ENGN 1470	Structure & Properties of Nonmetallic Materials	
ENGN 1475	Soft Materials	
ENGN 1480	Metallic Materials	
ENGN 1490	Biomaterials	
3. Capstone Design <sup>2</sup>		
ENGN 1000	Projects in Engineering Design I	1
or ENGN 1001	Projects in Engineering Design II	
or ENGN 1930L	Biomedical Engineering Design and Innovation	
* In addition to program requirements above, students must take four courses in the humanities and social sciences.		
Total Credits		21

<sup>1</sup> These courses are taken in either the junior or senior year. Note that ENGN 1450, ENGN 1475, ENGN 1470 and ENGN 1480 are typically offered in alternate years.

<sup>2</sup> Subject to approval by the concentration advisor, an independent study course (ENGN1970/1971) may be used to fulfill the Engineering Capstone Design requirement. To qualify for such approval, the independent study project must: (1) contain a significant and definable design component; (2) be based on the knowledge and skills acquired in earlier course work, (3) incorporate appropriate engineering standards; and (4) address multiple realistic constraints. To request approval, please complete the online form available at: <http://www.brown.edu/academics/engineering/undergraduate-study>

## Mechanical Engineering Track:

The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. The education objectives of the Mechanical Engineering program are to prepare graduates: (1) to pursue scientific and technical careers beginning with either graduate study in mechanical engineering and related fields or mechanical engineering positions in industry; (2) to work on interdisciplinary teams that make use of the engineering problem solving method and a broad background in the liberal arts to address societal needs. The student outcomes of this program are the (1) - (7) Student Outcomes as defined by the "ABET Criteria for Accrediting Engineering Programs" (available online at <http://www.abet.org/accreditation-criteria-policies-documents/>).

### 1. Core Courses:

ENGN 0030	Introduction to Engineering	1
or ENGN 0031	Honors Introduction to Engineering	
ENGN 0040	Dynamics and Vibrations	1
ENGN 0310	Mechanics of Solids and Structures	1

ENGN 0410	Materials Science <sup>1</sup>	1
ENGN 0510	Electricity and Magnetism	1
ENGN 0520	Electrical Circuits and Signals	1
ENGN 0720	Thermodynamics	1
ENGN 0810	Fluid Mechanics	1
CHEM 0330	Equilibrium, Rate, and Structure	1
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	1
or MATH 0170	Advanced Placement Calculus	
MATH 0200	Intermediate Calculus (Physics/Engineering)	1
or MATH 0180	Intermediate Calculus	
or MATH 0350	Honors Calculus	
APMA 0330	Methods of Applied Mathematics I, II	1
or APMA 0350	Applied Ordinary Differential Equations	
APMA 0340	Methods of Applied Mathematics I, II <sup>2</sup>	1
or APMA 0360	Applied Partial Differential Equations I	
CSCI 0040	Introduction to Scientific Computing and Problem Solving	1
or CSCI 0111	Computing Foundations: Data	
or CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
or CSCI 0170	Computer Science: An Integrated Introduction	
or CSCI 0190	Accelerated Introduction to Computer Science	
or APMA 0160	Introduction to Scientific Computing	
or ENGN 1931Z	Interfaces, Information and Automation	
<b>2. Upper-Level Mechanical Engineering Curriculum: Complete at least 6 courses from the following groups:</b>		<b>6</b>
Mechanical Systems: At least one course from:		
ENGN 1300	Structural Analysis	
ENGN 1370	Advanced Engineering Mechanics	
ENGN 1750	Advanced Mechanics of Solids	
Fluids/Thermal Systems: At least one course from:		
ENGN 1860	Advanced Fluid Mechanics	
ENGN 1700	Aerospace Fluid Mechanics	
ENGN 1710	Heat and Mass Transfer	
Capstone: At least one course from the following must be taken in the final two semesters: <sup>3</sup>		
ENGN 1000	Projects in Engineering Design I	
or ENGN 1001	Projects in Engineering Design II	
ENGN 1930T	Aircraft Design	
ENGN 1930M	Industrial Design	
ENGN 1931D	Design of Mechanical Assemblies	
ENGN 1380	Design of Civil Engineering Structures	
ENGN 1720	Design of Thermal Engines	
ENGN 1760	Design of Space Systems	
Design Electives: Up to two courses from:		
ENGN 1230	Instrumentation Design	
ENGN 1740	Computer Aided Visualization and Design	
Bioengineering Electives: Up to two courses from:		
ENGN 1210	Biomechanics	
ENGN 1220	Neuroengineering	
ENGN 1490	Biomaterials	
Robotic and Control Systems Electives: up to two courses from:		
ENGN 1931I	Design of Robotic Systems	
ENGN 1931Y	Control Systems Engineering	
Engineering Analysis and Computation Electives: up to two courses from:		
ENGN 1840	Numerical Methods in Engineering	
ENGN 1950	Advanced Engineering Optimization	

Energy and Environmental Engineering Electives: up to two courses from:	
ENGN 1930U	Renewable Energy Technologies
ENGN 1931P	Energy and the Environment
Interdisciplinary Electives: up to one course from: <sup>4</sup>	
ENGN 1620	Analysis and Design of Electronic Circuits
or ENGN 1340	Water Supply and Treatment Systems - Technology and Sustainability
or ENGN 1440	Mechanical Properties of Materials
or ENGN 1470	Structure & Properties of Nonmetallic Materials
or ENGN 1570	Linear System Analysis
or ENGN 1931F	Introduction to Power Engineering
or ENGN 1931X	Instrumentation for Research: A Biomaterials/Materials Project Laboratory
or ENGN 1931Z	Interfaces, Information and Automation
<b>3. Upper Level, Advanced Science Course: at least one course from: <sup>5</sup></b>	
PHYS 0790	Physics of Matter
or BIOL 0800	Principles of Physiology
or CHEM 0350	Organic Chemistry
or CHEM 1140	Physical Chemistry: Quantum Chemistry
or EEPS 1450	Structural Geology
or EEPS 1370	Environmental Geochemistry

**4. General Education Requirement: At least four approved courses must be taken in humanities and social sciences**

Total Credits 21

- <sup>1</sup> ENGN 1490 may be substituted if taken in Sophomore year.
- <sup>2</sup> Other advanced courses in mathematics or applied mathematics may be substituted with approval of the concentration advisor.
- <sup>3</sup> Subject to approval by the concentration advisor, an independent study course (ENGN 1970/ENGN 1971) may be used to fulfill the Engineering Capstone Design requirement. To qualify for such approval, the independent study project must: (1) contain a significant and definable design component; (2) be based on the knowledge and skills acquired in earlier course work, (3) incorporate appropriate engineering standards; and (4) address multiple realistic constraints.
- <sup>4</sup> ENGN 1931Z may replace CSCI 0040 or meet an elective requirement, but not both.
- <sup>5</sup> Other non-introductory courses in physics, chemistry, neuroscience, geology, or biology may be substituted with the permission of the concentration advisor.

## Engineering and Physics Concentration Requirements

The Sc.B. program in Engineering and Physics is sponsored jointly by the School of Engineering and the Department of Physics. The program is designed to ensure that students take a significant portion of the usual curriculum in Engineering and in Physics, obtain substantial laboratory experience, and take several upper-level elective courses, focusing on applied science. Students may take either the standard Physics or Engineering programs during their freshman and sophomore years and then switch to this combined program. The Sc.B. degree program in Engineering and Physics is not accredited by ABET.

The following standard program assumes that a student begins mathematics courses at Brown with MATH 0170 or its equivalent. Students who begin in MATH 0200 can substitute an additional science, engineering or higher-level mathematics course for the MATH 0170 or MATH 0190 requirement. To accommodate the diverse preparation of individual students, variations of the following sequences and their prerequisites are possible with permission of the appropriate concentration advisor and the instructors involved. We recommend that each student's degree program be submitted for prior approval (typically in semester four) and scrutinized for compliance (in semester seven) by one faculty member

from the Department of Physics and one faculty member from the School of Engineering.

Select one of the following two course sequences: 2

ENGN 0030 & ENGN 0040	Introduction to Engineering and Dynamics and Vibrations (ENGN 0031 may be substituted for ENGN 0030)	
PHYS 0050 & PHYS 0060	Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics	
PHYS 0070 & PHYS 0160	Analytical Mechanics and Introduction to Relativity, Waves and Quantum Physics	
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	1
or MATH 0170	Advanced Placement Calculus	
MATH 0200	Intermediate Calculus (Physics/Engineering)	1
or MATH 0180	Intermediate Calculus	
or MATH 0350	Honors Calculus	
Select three additional higher-level math, applied math, or mathematical physics (PHYS 0720) courses.		3
CSCI 0040	Introduction to Scientific Computing and Problem Solving	1
or APMA 0160	Introduction to Scientific Computing	
or CSCI 0111	Computing Foundations: Data	
or CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
or CSCI 0170	Computer Science: An Integrated Introduction	
or CSCI 0190	Accelerated Introduction to Computer Science	
ENGN 0510	Electricity and Magnetism	1
or PHYS 0470	Electricity and Magnetism	
ENGN 1560	Optics	1
or PHYS 1510	Advanced Electromagnetic Theory	
PHYS 0500	Advanced Classical Mechanics	1
or ENGN 1370	Advanced Engineering Mechanics	
PHYS 1410	Quantum Mechanics A	1
PHYS 1420	Quantum Mechanics B	1
PHYS 1530	Thermodynamics and Statistical Mechanics	1
or ENGN 0720	Thermodynamics	
ENGN 1620	Analysis and Design of Electronic Circuits	1
CHEM 0330	Equilibrium, Rate, and Structure	1
or ENGN 0310	Mechanics of Solids and Structures	
or ENGN 0810	Fluid Mechanics	
or PHYS 1600	Computational Physics	
ENGN 0410	Materials Science	1
or ENGN 1690	Photonics Devices and Sensors	
or PHYS 0560	Experiments in Modern Physics	
PHYS 1560	Modern Physics Laboratory	1
or ENGN 1590	Introduction to Semiconductors and Semiconductor Electronics	
or an approved 2000-level engineering or physics course.		
A thesis under the supervision of a physics or engineering faculty member:		1
PHYS 1990	Senior Conference Course	
or ENGN 1970	Independent Studies in Engineering	
or ENGN 1971	Independent Study in Engineering	

\* Students are also encouraged to take courses dealing with the philosophical, ethical, or political aspects of science and technology.

Total Credits 19

## Biomedical Engineering Concentration Requirements

The Sc.B. program in Biomedical Engineering is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>. It is jointly offered by the School of Engineering and the Division of Biology and Medicine as an interdisciplinary concentration designed for students interested in applying the methods and tools of engineering to the subject matter of biology and the life sciences. The education objectives of the Biomedical Engineering program are to prepare graduates: (1) to be employed in careers of useful service to society, including scientific and technical areas within medicine, industry, and health care delivery; (2) to demonstrate the ability to apply the basic principles of engineering and science, as well as problem solving skills and critical thinking, to a broad spectrum of biomedical engineering problems; (3) to demonstrate their ability to work in teams, and to effectively communicate and understand the broad social, ethical, economic and environmental consequences of their lifelong education. The student outcomes of this program are the ABET (1) - (7) Student Outcomes as defined by the "ABET Criteria for Accrediting Engineering Programs (available online at <http://www.abet.org/accreditation-criteria-policies-documents/>). The Biomedical Engineering concentration shares much of the core with the other engineering programs, but is structured to include more courses in biology and chemistry, and a somewhat different emphasis in mathematics.

The requirements regarding Mathematics, Advanced Placement, Transfer Credit, Substitutions for Required Courses, and Humanities and Social Science Courses are identical to those of the Sc.B. degree programs in Engineering. Please refer to the Engineering section of the University Bulletin for explicit guidelines.

The Biomedical Engineering concentration shares much of the core with the other engineering programs, but is structured to include more courses in biology and chemistry, and a somewhat different emphasis in mathematics.

### Standard program for the Sc.B. degree

#### 1. Core Courses

ENGN 0030	Introduction to Engineering	1
or ENGN 0031	Honors Introduction to Engineering	
ENGN 0040	Dynamics and Vibrations	1
ENGN 0510	Electricity and Magnetism	1
or ENGN 0520	Electrical Circuits and Signals	
ENGN 0720	Thermodynamics	1
ENGN 0810	Fluid Mechanics	1
CHEM 0330	Equilibrium, Rate, and Structure	1
CHEM 0350	Organic Chemistry	1
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	1
or MATH 0170	Advanced Placement Calculus	
or MATH 0100	Introductory Calculus, Part II	
MATH 0200	Intermediate Calculus (Physics/Engineering)	1
or MATH 0180	Intermediate Calculus	
or MATH 0350	Honors Calculus	
APMA 0330	Methods of Applied Mathematics I, II	1
or APMA 0350	Applied Ordinary Differential Equations	
APMA 1650	Statistical Inference I	1
or BIOL 0495	Statistical Analysis of Biological Data	
or PHP 1510	Principles of Biostatistics and Data Analysis	
or APMA 1655	Statistical Inference I	

#### 2. Upper Level Biomedical Engineering Curriculum

ENGN 1110	Transport and Biotransport Processes	1
ENGN 1210	Biomechanics	1
ENGN 1230	Instrumentation Design	1
ENGN 1490	Biomaterials	1

BIOL 0800	Principles of Physiology	1
-----------	--------------------------	---

**3. Additional Biomedical Engineering Electives (Complete at least 3 courses from the following groups):**

Select one or two of the following:		
ENGN 1220	Neuroengineering	
ENGN 1510	Nanoengineering and Nanomedicine	
ENGN 1520	Cardiovascular Engineering	
ENGN 1930B	Biomedical Optics	
ENGN 2910S	Cancer Nanotechnology	
ENGN 2912R	Implantable Devices	
BIOL 1140	Tissue Engineering	
CSCI 1810	Computational Molecular Biology	
or CSCI 1820	Algorithmic Foundations of Computational Biology	
ENGN 0500	Digital Computing Systems	
ENGN 1740	Computer Aided Visualization and Design	
ENGN 2911R	Analytical Modeling for Biomechanical and Biomedical Systems	
ENGN 2625 Optical Microscopy: Fundamentals and Applications		
BIOL 1150	Stem Cell Engineering	
BIOL 2110	Drug and Gene Delivery	

At least one or two more courses from:

BIOL 0280	Biochemistry	
BIOL 0470	Genetics	
BIOL 0500	Cell and Molecular Biology	
BIOL 0510	Introductory Microbiology	
BIOL 0530	Principles of Immunology	
BIOL 1100	Cell Physiology and Biophysics	
BIOL 1555	Methods in Informatics and Data Science for Health	
BIOL 2010	Quantitative Approaches to Biology	
APMA 1070	Quantitative Models of Biological Systems	
CHEM 0360	Organic Chemistry	
CLPS 1520	Computational Vision	
or CLPS 1590	Visualizing Vision	
ENGN 2910G	Topics in Translational Research and Technologies	
NEUR 1020	Principles of Neurobiology	
NEUR 1440	Mechanisms and Meaning of Neural Dynamics	
PHYS 1610	Biological Physics	
BIOL 1810	21st Century Applications in Cell and Molecular Biology	

**4. Capstone Design**<sup>1</sup>

ENGN 1930L	Biomedical Engineering Design and Innovation	1
ENGN 1931L	Biomedical Engineering Design and Innovation II	1

5. General Education Requirement: At least four approved courses must be taken in the humanities and social sciences.

Total Credits	21
---------------	----

<sup>1</sup> In some cases, Independent Study may be substituted subject to Concentration Advisor approval

## Entrepreneurship Concentration Requirements

Offered by the Nelson Center for Entrepreneurship, in partnership with Brown's School of Engineering, the Certificate in Entrepreneurship equips students with an understanding of the fundamental building blocks of the entrepreneurial process: i) understanding and validating an unmet need;

ii) developing a value proposition that addresses an unmet need; and iii) designing a sustainability model that allows the value proposition to be delivered repeatedly at scale. Two core courses introduce students to foundational entrepreneurial concepts. Two elective courses will extend students' foundational work into areas of particular interest. Finally, students will complete an entrepreneurship practicum that enables them to apply what they have learned in the classroom to a real-world project of interest.

As with all undergraduate certificates (<https://www.brown.edu/academics/college/degree/undergraduatecertificates>), students must be enrolled in or have completed at least two courses toward the certificate at the time they declare in ASK, which must be no earlier than the beginning of the fifth semester and no later than the last day of classes of the antepenultimate (typically the sixth) semester, in order to facilitate planning for the entrepreneurship practicum. Students must submit a proposal for their practicum project by the end of the sixth semester.

Excluded Concentrations: Business, Entrepreneurship, & Organizations (BEO)

## Certificate Requirements

Core Courses:

ENGN 0090	Management of Industrial and Nonprofit Organizations	1
-----------	--	---

ENGN 1010	The Entrepreneurial Process: Innovation in Practice	1
-----------	---	---

Elective Courses (choose two):		2
--------------------------------	--	---

BIOL 2089	The Importance of Intellectual Property in Biotechnology	
-----------	--	--

CSCI 1900	csciStartup	
-----------	-------------	--

ECON 1490	Designing Internet Marketplaces	
-----------	---------------------------------	--

ECON 1730	Venture Capital, Private Equity, and Entrepreneurship	
-----------	---	--

ENGN 0020	Transforming Society-Technology and Choices for the Future	
-----------	--	--

ENGN 0900	Managerial Decision Making	
-----------	----------------------------	--

ENGN 0110	Lean LaunchPad	
-----------	----------------	--

ENGN 1931Q	Entrepreneurial Management in Adversity	
------------	---	--

ENGN 1931W	Selling & Sales Leadership in the Entrepreneurial Environment	
------------	---	--

IAPA 1803E	Social Entrepreneurship	
------------	-------------------------	--

SOC 1260	Market Research in Public and Private Sectors	
----------	---	--

Practicum:		1
------------	--	---

Students must complete an Entrepreneurship Practicum (EP), an experiential semester course that enables them to apply what they have learned in the classroom to real-world projects. Students will apply the entrepreneurial process to a challenge or problem that is important to them, perhaps evolving from one of their other courses. The Practicum will act as a laboratory to identify and develop an impactful solution to that problem.

Total Credits	5
---------------	---

<sup>1</sup> Students must submit a proposal for their practicum project by the end of the sixth semester.

## Engineering Graduate Program

The School of Engineering directly offers graduate programs leading to the Master of Science (Sc.M.) degree; the Master of Science in Innovation Management and Entrepreneurship (Sc.MIME); and the Doctor of Philosophy (Ph.D.) degree.

In addition, the School of Engineering in collaboration with the Division of Biology and Medicine offers an interdisciplinary graduate program leading to the Master of Science (Sc.M.) and Doctor of Philosophy (Ph.D.) in Biomedical Engineering.

For more information on admission and program requirements for the Sc.M. or Ph.D. in Engineering, please visit the following website: <http://www.brown.edu/academics/gradschool/programs/engineering>

## Master of Science (Thesis Option)

- Candidates must complete a coherent plan of study based in engineering or engineering science consisting of nine graduate or advanced level courses and an acceptable thesis, which is normally sponsored by a member of the engineering faculty.
- The program must include ENGN 2010 and ENGN 2020 (Mathematical Methods in Engineering and Physics) or their equivalent (must be 2000 level)
- For some programs, ENGN 2010 and/or ENGN 2020 can be replaced by an alternate/applied mathematics course or 2000 - level engineering/science course. This substitution can only be made with the approval of the appropriate Graduate Representative and the Director of Graduate Studies. The final program must contain at least one advanced mathematics/applied mathematics course.
- Two additional 2000-level engineering courses other than ENGN 2980 (Special Projects: Reading Research and Design) must be included.
- Three additional 2000-level engineering courses other than ENGN 2980 (Special Projects: Reading Research and Design) must be included. Courses in engineering management (PRIME) are not acceptable for use as one of the 2000-level engineering classes.
- The remaining courses may include up to two ENGN 2980 class and up to three 1000-level Engineering, other approved science classes or PRIME classes. Students should choose courses in consultation with the student's advisor to develop a coherent program.
- The proposed program of study must be approved by the Director of Graduate Programs in the School of Engineering.

For students in the Master of Science in Engineering program (thesis option,) the approved course sequence is 2-2-2-2, where the student takes two courses in each semester. However, the program strongly recommends a sequence of 3-2-2-1 where the student takes 3 courses the first semester, 2 the second, 2 the third, and 1 the fourth. **Any deviation from this schedule can result in additional tuition.**

Note: students enrolled in the Ph.D. program, including first-year fellowship students, should understand that an application to receive a non-thesis Sc.M. in engineering must be approved by the student's research advisor.

### Master of Science (Thesis Option)

PHYS 2020	Mathematical Methods of Engineers and Physicists	1
or ENGN 2010	Mathematical Methods in Engineering and Physics I	
ENGN 2020	Mathematical Methods in Engineering and Physics II	1
Two additional 2000 level Engineering courses (other than ENGN 2980)		2
Three additional Engineering or approved science courses (not more than two 1000 level courses)		3
ENGN 2980	Special Projects, Reading, Research and Design	1
Total Credits		8

## Master of Science (Non-Thesis Option)

- Candidates must complete a coherent plan of study based in engineering or engineering science consisting of eight graduate or advanced level courses.

- The program must include ENGN 2010 and 2020 (Mathematical Methods in Engineering and Physics) or their equivalent (must be 2000 level)
- For some programs, ENGN 2010 and/or ENGN 2020 can be replaced by an alternate/applied mathematics course or 2000 - level engineering/science course. This substitution can only be made with the approval of the appropriate Graduate Representative and the Director of Graduate Studies. The final program must contain at least one advanced mathematics/applied mathematics course.
- Three additional 2000-level engineering courses other than ENGN 2980 (Special Projects: Reading Research and Design). Courses in engineering management (PRIME) are not acceptable for use as one of the 2000-level engineering classes.
- The remaining courses may include one ENGN 2980 class and up to three 1000-level Engineering, other approved science classes or PRIME classes. Students should choose courses in consultation with the student's advisor to develop a coherent program.
- The proposed program of study must be approved by the Director of Graduate Programs in the School of Engineering.

For students in the Master of Science in Engineering program (non-thesis option,) the approved course sequence is 3-3-2, meaning the student takes 3 courses the first semester, 3 the second, and 2 the third. **Any deviation from this schedule can result in additional tuition and/or penalties.**

**Note:** students enrolled in the Ph.D. program, including first-year fellowship students, should understand that an application to receive a non-thesis Sc.M. in engineering must be approved by the student's research advisor.

### Master of Science (Non-Thesis Option)

PHYS 2020	Mathematical Methods of Engineers and Physicists	1
or ENGN 2010	Mathematical Methods in Engineering and Physics I	
ENGN 2020	Mathematical Methods in Engineering and Physics II	1
Two additional 2000 level ENGN courses (other than ENGN_2980)		2
Four additional Engineering or approved science courses (up to 3 may be 1000-level ENGN)		4
Total Credits		8

## Master of Science (Non-Thesis Professional Track Option)

- Candidates must complete a coherent plan of study based in engineering or engineering science consisting of eight graduate or advanced level courses.
- The program must include ENGN 2010 and 2020 (Mathematical Methods in Engineering and Physics) or their equivalent (must be 2000 level).
- For some programs, ENGN 2010 and/or ENGN 2020 can be replaced by an alternate/applied mathematics course or 2000 - level engineering/science course. This substitution can only be made with the approval of the appropriate Graduate Representative and the Director of Graduate Studies. The final program must contain at least one advanced mathematics/applied mathematics course.
- Three additional 2000-level engineering courses other than ENGN 2980 (Special Projects: Reading Research and Design). Courses in engineering management (PRIME) are not acceptable for use as one of the 2000-level engineering classes.

- The remaining courses may include one ENGN 2980 class and up to three 1000-level Engineering, other approved science classes or PRIME classes. Students should choose courses in consultation with the student's adviser to develop a coherent program.
- A paid or unpaid internship is a required component of the program. All internships must be pre-approved by the School of Engineering. Assistance in obtaining internships will be provided by the School and Brown CareerLAB.
- The proposed program of study must be approved by the Director of Graduate Programs in the School of Engineering.
- For students in the Master of Science in Engineering program (non-thesis option,) the approved course sequence is 3-3-2, meaning the student takes 3 courses the first semester, 3 the second, and 2 the third. **Any deviation from this schedule can result in additional tuition and/or penalties.**

**Professional Track Internship Information**

Internships are traditionally utilized during the first summer of the Sc.M. program. You should however start early (January is generally recommended) to try and find a suitable internship. Please refer to the CareerLAB guidelines and recommendations (<https://www.brown.edu/campus-life/support/careerlab>) for resume preparation, interviewing, and general procedures about which you should be aware when deciding on an internship.

The following resources will help you search for an opportunity that fits your goals:

- The School of Engineering distributes a weekly undergraduate and graduate newsletter that contains many internship opportunities, both at Brown and elsewhere. Email distribution of the newsletter occurs every Monday throughout the academic year.
- Handshake at Brown (<https://brown.joinhandshake.com/login>) (a password protected site) contains a database of jobs (not necessarily engineering related).
- Brown has an AfterCollege (<https://www.aftercollege.com/career-networks/brown-university>) page that lists both full-time positions and internships
- The School of Engineering runs a Career and Internship Fair toward the end of fall semester or early in the spring semester of each year. Check the School of Engineering calendar for announcements.
- BrownConnect (<https://brownconnect.brown.edu>) is a networking tool that allows you to contact Brown alumni for advice, networking, and mentoring. The database includes their companies, titles, and is searchable by key words.

Fill out the internship approval form (<https://www.brown.edu/academics/engineering/sites/brown.edu.academics.engineering/files/uploads/Internship%20Approval%20Form.pdf>) and submit it to Associate Dean Jennifer Casasanto (Jennifer\_Casasanto@Brown.edu) before the end of the semester (or earlier if you are intending to get CPT approval from OISSS). You should NEVER begin work before your internship is approved.

**Master of Science (Non-Thesis Professional Track Option)**

PHYS 2020	Mathematical Methods of Engineers and Physicists	1
or ENGN 2010	Mathematical Methods in Engineering and Physics I	
ENGN 2020	Mathematical Methods in Engineering and Physics II	1
Two additional 2000-level Engineering courses (other than ENGN_2980)		2
Four additional Engineering or other approved science courses (up to three 1000-level Engineering courses)		4
Internship (paid or unpaid) approved by the School of Engineering		
<b>Total Credits</b>		<b>8</b>

-

**Master of Science: Program in Innovation Management and Entrepreneurship (PRIME)**

**Program in Innovation Management and Entrepreneurship (PRIME) requirements**

ENGN 2110	Business Engineering Fundamentals I	1
ENGN 2120	Business Engineering Fundamentals II	1
ENGN 2125	Engineering Management + Decision Making	1
ENGN 2150	Technology Entrepreneurship and Commercialization I	1
ENGN 2160	Technology Entrepreneurship and Commercialization II	1
ENGN 2180	Globalization Immersion Experience and Entrepreneurship Laboratory	1
Two 1000-level or above electives. Must be approved by PRIME advisor.		2
<b>Total Credits</b>		<b>8</b>

For more information on admission and program requirements for the Program in Innovation Management and Entrepreneurship Engineering (PRIME), please visit the following website: <http://www.brown.edu/academics/gradschool/programs/innovation-management-and-entrepreneurship-engineering>

**Other Sc.M. Requirements**

International students must be full-time at all times throughout their academic program, with few exceptions.

**Courses**

**ENGN 0020. Transforming Society-Technology and Choices for the Future.**

This course will address the impact that technology has on society, the central role of technology on many political issues, and the need for all educated individuals to understand basic technology and reach an informed opinion on a particular topic of national or international interest. The course will begin with a brief history of technology.

**ENGN 0030. Introduction to Engineering.**

ENGN 0030 introduces students to the engineering profession and the important role engineers play in society. The course content begins with engineering design, followed by the analysis of static structures. Topics also include Computer Aided Design, basic Matlab programming, professional ethics, and social responsibility. Students complete group training modules and design projects in the Brown Design Workshop, led by an undergraduate mentor. ENGN 0030 provides the foundation for further study in engineering. It should be taken by students considering concentrating in engineering, interested in the entrepreneurship curriculum, and curious about engineering and design. Students should be enrolled in MATH 0100 or higher.

**ENGN 0031. Honors Introduction to Engineering.**

ENGN0031 introduces students to the engineering profession and the important role engineers play in society. The course content begins with engineering design, followed by the analysis of static structures. Topics also include CAD and extensive Matlab programming, professional ethics, and social responsibility. Students complete group training modules and design projects in the Brown Design Workshop. ENGN0031 provides the foundation for further study in engineering. Students pursuing Mechanical, Electrical or Materials Engineering who complete the Honors course may substitute an approved Engineering or Computer Science course in place of CSCI 0040. Students should be enrolled in MATH 0170 or higher.

**ENGN 0040. Dynamics and Vibrations.**

A broad introduction to Newtonian dynamics of particles and rigid bodies with applications to engineering design. Concepts include kinematics and dynamics of particles and rigid bodies; conservation laws; vibrations of single degree of freedom systems; and use of MATLAB to solve equations of motion and optimize engineering designs. Examples of applications are taken from all engineering disciplines. Lectures, recitation, and team design projects, including use of Brown Design Workshop. Prerequisite: ENGN 0030. Corequisite: MATH 0200 or MATH 0180.

**ENGN 0090. Management of Industrial and Nonprofit Organizations.**

Exposes students to the concepts and techniques of management. Topics include marketing, strategy, finance, operations, organizational structure, and human relations. Guest lecturers describe aspects of actual organizations. Lectures and discussions.

**ENGN 0110. Lean LaunchPad.**

The Lean LaunchPad (LLP) is a Wintersession course on how to build a startup using lean startup tools and frameworks. It is a hands-on, intensive, experiential course designed for student teams who are serious about pursuing a startup. The course teaches development of relationships with customers, suppliers, communications providers and other enablers of the business with immediate feedback, requiring students to get out of the building and test their business hypotheses through multiple in person meetings. The Business Model Canvas is the scorecard for contact effectiveness and for development of the ecosystem of contacts which will make the business viable.

**ENGN 0120A. Crossing the Consumer Chasm by Design.**

Technologies have shaped human life since tools were sticks and flints to today's hydrocarbon powered, silicon managed era. Some spread throughout society; bread, cell phones, airlines, but most never do; personal jet packs, Apple Newton, freeze dried ice cream.

Space Tourism, the Segway, electric cars: Can we predict which ones will cross the chasm to broad application? Can we help them to by combining design, engineering, marketing, communications, education, art, and business strategies?

Student teams identify potential new products, conceptualize, package, and define their business mode. By plotting their course across the chasm, we confront the cross-disciplinary barriers to realizing benefits from technology.

Enrollment limited to 18 first year students. Instructor permission required.

**ENGN 0120B. Crossing the Space Chasm Through Engineering Design.**

Five decades of human activity in space has provided the world community with benefits including instant global communications and positioning, human and robotic exploration of the moon, planets and sun, and a perspective of earth which continues to inform and influence our relationship with our environment.

Unlike other technical revolutions of the 20th century space has not transitioned to a commercial, consumer market commodity. Rather its users and applications remain primarily large and institutional.

To experience the challenges of engineering design and of changing an industrial paradigm, we will work in one or several groups to identify a use of space, and a plan for its implementation, that could help transition space from its status as a niche technology. Through the process of design, we will confront the technical, economic, societal and political barriers to obtaining increased benefits from technologies in general, and space in particular, and to making new technologies beneficial to a wider range of users. Enrollment limited to 18 first year students. Instructor permission required.

**ENGN 0120C. Power: From Early Engines to the Nuclear-Powered Artificial Heart.**

Mechanical and electrical power have been source of major changes in civilization in last 250 years. This course starts from introduction to animal muscle power and harnessing nature to steam and later sources of power and applications, examining not only the technologies but also the people who developed them and the social and political impacts, ranging up to the nuclear-powered artificial heart. Enrollment limited to 19 first year students.

**ENGN 0120D. Strategies for Creative Process: Design Topics.**

There is no one simple methodology for creative thinking. Creative thinking is a critical response to the world around us - to our curiosities and interests, to the questions our observations generate, to the ways we frame problems, and to the strategies we develop for translating what we imagine into objects and experiences. Working as artist/designers, making things within a studio environment, we will examine various approaches for the development and refinement of our creative processes as we establish a technical and conceptual foundation for the design and fabrication of objects and experiences. Enrollment limited to 15 first year students.

**ENGN 0130. The Engineer's Burden: Why Changing the World is Difficult.**

We will examine the assertion that most of the changes that have improved people's lives are essentially technological and then we will look at the difficulties in creating sustainable and beneficial change. Topics of interest include unintended consequences, failure to consider local culture, and engineering ethics. Many, but not all, of the examples will have a third world context. The engineering focus will be on infrastructure--housing, water and sanitation, transportation, and also mobile devices as used in health care and banking.

**ENGN 0230. Surveying.**

Theory and practice of plane surveying; use of the tape, level, transit, stadia, and plane table; triangulation and topography. Lectures, field work, and drafting. Recommended for students interested in civil engineering. Hours arranged. Time required, about 10 hours. Audit only.

**ENGN 0310. Mechanics of Solids and Structures.**

Mechanical behavior of materials and analysis of stress and deformation in engineering structures and continuous media. Topics include concepts of stress and strain; the elastic, plastic, and time-dependent response of materials; principles of structural analysis and application to simple bar structures, beam theory, instability and buckling, torsion of shafts; general three-dimensional states of stress; Mohr's circle; stress concentrations. Lectures, recitations, and laboratory. Prerequisite: ENGN 0030.

**ENGN 0410. Materials Science.**

Relationship between the structure of matter and its engineering properties. Topics: primary and secondary bonding; crystal structure; atomic transport in solids; defects in crystals; mechanical behavior of materials; phase diagrams and their utilization; heat treatment of metals and alloys; electrical and optical properties of materials; strengthening mechanisms in solids and relationships between microstructure and properties. Lectures, recitations, laboratory.

**ENGN 0490. Fundamentals of Environmental Engineering.**

This course presents a broad introduction to environmental engineering, and will help students to explore environmental engineering as an academic major and as career option. The course covers topics in environmental engineering: chemistry fundamentals, mass balance, air pollution, water pollution, sustainable solid waste management and global atmospheric change. The course is essential for the environmental engineering students who are planning to take more advanced courses in environmental engineering. This course is also for the students in other engineering disciplines and sciences, who are interested in environmental constraints on technology development and practice, which have become increasingly important in many fields.

**ENGN 0510. Electricity and Magnetism.**

Fundamental laws of electricity and magnetism and their role in engineering applications. Concepts of charge, current, potential, electric field, magnetic field. Resistance, capacitance, and inductance. Electric and magnetic properties of materials. Electromagnetic wave propagation. Lectures, recitation, and laboratory. Prerequisites: ENGN 0030 or PHYS 0070; ENGN 0040 or PHYS 0160 (previously 0080); MATH 0180 or 0200; and APMA 0330 or 0350 (may be taken concurrently).

**ENGN 0520. Electrical Circuits and Signals.**

An introduction to electrical circuits and signals. Emphasizes the analysis and design of systems described by ordinary linear differential equations. The frequency domain is introduced early and stressed throughout. Other topics include circuit theorems, power transfer, transient analysis, Fourier series, Laplace transform, a brief intro to diodes and transistors, and a little control theory. There is a lecture on engineering ethics. Laboratories apply concepts to real problems in audio and controls. Lectures, recitation, and laboratory. Prerequisite: MATH 0180 or MATH 0200, courses may be taken concurrent to ENGN 0520.

**ENGN 0720. Thermodynamics.**

An introduction to macroscopic thermodynamics and some of its engineering applications. Presents basic concepts related to equilibrium and the zeroth, first and second laws for both closed and open systems. Examples include analysis of engines, turbines, and other engineering cycles, phase equilibrium and separation processes, chemical reactions, surface phenomena, magnetic and dielectric materials. Lectures, recitations, and laboratory. Prerequisites: ENGN 0030 or ENGN 0040 or equivalent; ENGN 0410 or CHEM 0330. An understanding of intermediate calculus is recommended, such as MATH 0180 or MATH 0200.

**ENGN 0810. Fluid Mechanics.**

Properties of fluids, dimensional analysis. Fluid statics, forces on submerged surfaces, kinematics. Conservation equations. Frictionless incompressible flows, Euler's equations, Bernoulli's equation: thrust, lift, and drag. Vorticity and circulation. Navier-Stokes equation, applications. Laminar and turbulent boundary layers, flow separation. Steady one-dimensional compressible flow. Sound, velocity, flow with area change, normal shocks. Lectures, laboratory. Prerequisites: MATH 0180 or 0200, ENGN 0040 or PHYS 0050 or PHYS 0070, APMA 0330 or APMA 0350 (can be concurrent).

**ENGN 0860. Boat Building Design & Culture.**

This course introduces the study of the design, engineering, work, material culture and history through the construction of a traditional workboat, a Maine Peapod. As the class builds the boat, we'll gain hands-on understanding of issues of engineering, design, skill, and workmanship. We will do historical research and visit museums to gain insight into the history of small craft and their builders/users from the nineteenth century to the present. Throughout the course, we will consider philosophical issues of tradition, creativity, and knowledge in engineering and making. Three longer writing assignments and an ongoing journal will connect hands-on work and research.

**ENGN 0900. Managerial Decision Making.**

Ways of making effective decisions in managerial situations, especially situations with a significant technological component; decision analysis; time value of money; competitive situations; forecasting; planning and scheduling; manufacturing strategy; corporate culture. Lectures and discussions. Prerequisite: ENGN 0090 or MATH 0100.

**ENGN 0930A. Appropriate Technology.**

Our goal for this course is that you leave it with the ability to think and act rationally and concretely on issues of technology and the human condition. We will provide background on useful technologies (e.g. wind, solar, hydro), techniques to fabricate them, and an opportunity to explore the obstacles to their implementation.

**ENGN 0930C. DesignStudio.**

DESIGNSTUDIO is a course open to students interested in learning through making. Working in a studio environment, we will iteratively design, build, and test projects, as we imaginatively frame design problems, and develop novel strategies for addressing those problems. We will explore design thinking, creative collaboration, exploratory play, ideation, iteration, woodworking, prototyping, CNC milling and laser cutting – in addition to other strategies that enhance our creative processes – as we establish a technical and conceptual foundation for the design and fabrication of objects and experiences. Enrollment limited to 16. Instructor permission required.

**ENGN 0930L. Biomedical Engineering Design and Innovation.**

This course is an incubator for innovative ideas in biomedical design. Students across all disciplines are invited to collaborate with biomedical engineers to enhance the development of design solutions that address clinical and public health concerns. Students will form teams with their peers and a clinical advisor, identify and define a design project to meet a clinical need, and engage in the design process throughout the semester. Engineering concentrators should register for ENGN1930L.

**ENGN 0931. Internet of Everything.**

The Internet can be visualized as Internet of information, Internet of people, Internet of places and most importantly the Internet of "things." Internet of Everything includes these four paradigms. In this class, we will learn about how these four ideas can come together to make a difference in the world. We will study the underlying infrastructure that supports Internet, the TCP/IP model, addressing and routing. Experiments and projects in the class would include a tree on the Internet communicating with the sprinkler system only when it is thirsty. Privacy and ethical issues will also be addressed.

**ENGN 0931L. Biomedical Engineering Design and Innovation II.**

This course is an incubator for innovative ideas in biomedical design. Students across all disciplines are invited to collaborate with biomedical engineers to enhance the development of design solutions that address clinical and public health concerns. Student teams formed in the previous semester will continue develop a design project based on an unmet clinical need with a clinical advisor, gaining hands-on process experience and generating innovative solutions. Engineering concentrators should register for ENGN 1931L.

**ENGN 1000. Projects in Engineering Design I.**

Fall semester projects in design for concentrators in electrical, materials, and mechanical engineering. Students work in teams on projects that are defined through discussions with the instructor. An assembled product or detailed design description is the goal of the semester's effort. Students may elect to combine ENGN 1000 with ENGN 1001 to work on a year-long project with permission of the instructor. Students electing to pursue this option must take ENGN 1000 and ENGN 1001 in the same academic year, and must submit a project proposal no later than October 1. Instructor permission required.

**ENGN 1001. Projects in Engineering Design II.**

Spring semester projects in design for concentrators in electrical, materials, and mechanical engineering. Students work in teams on projects defined through discussions with instructor. An assembled product or detailed design description is the goal of semester's effort. Students may elect to combine ENGN 1000 with ENGN 1001 to work on a year-long project with permission of the instructor. Students electing to pursue this option must take ENGN 1000 and ENGN 1001 in the same academic year and must have submitted a project proposal by October 1 of the previous Fall semester. Instructor permission required.

**ENGN 1010. The Entrepreneurial Process: Innovation in Practice.**

Entrepreneurship is innovation in practice: transforming ideas into opportunities, and, through a deliberate process, opportunities into commercial realities. These entrepreneurial activities can take place in two contexts: the creation of new organizations; and within existing organizations. This course will present an entrepreneurial framework for these entrepreneurial processes, supported by case studies that illustrate essential elements. Successful entrepreneurs and expert practitioners will be introduced who will highlight practical approaches to entrepreneurial success. Enrollment limited to 35.

**ENGN 1110. Transport and Biotransport Processes.**

Aim: To develop a fundamental understanding of mass transport in chemical and biological systems. The course includes: mechanism of transport, biochemical interactions and separations; mass transport in reacting systems; absorption; membrane and transvascular transport; electrophoretic separations; pharmacokinetics and drug transport; equilibrium stage processes; distillation and extraction. Other features: design concepts; modern experimental and computing techniques; laboratory exercises. Prerequisite: Junior level or higher standing.

**ENGN 1120. Reaction Kinetics and Reactor Design.**

Mechanisms, driving forces, and rate expressions of homogeneous and heterogeneous chemical and biochemical systems. Kinetics described from the potential energy surface to reaction networks. Basic concepts in reactor design and idealized reactor models. Chemostats and enzymatic reactors. Optimization. Temperature and energy effects in reactors. Catalysts and coupled transport effects. Prerequisite: ENGN 0720 or equivalent. Offered in alternate years.

**ENGN 1130. Chemical Engineering Thermodynamics.**

Application of the first and second laws of thermodynamics and conservation of mass to the analysis of chemical and environmental processes, phase and chemical equilibria and partitioning of species in multiphase, nonreactive and reactive systems. Thermodynamic properties of fluid mixtures-correlation and estimation. Applications and examples drawn from chemical processing and environmental problems. Prerequisite: ENGN 0720 or equivalent. Offered in alternate years.

**ENGN 1140. Chemical Process Design.**

Chemical process synthesis, flow charting, and evaluation of design alternatives. Process equipment sizing as determined by rate phenomena, economics, and thermodynamic limitations. Introduction to optimization theory. Applications of these principles to case studies. Prerequisites or Corequisites: ENGN 1110, 1120, 1130.

**ENGN 1210. Biomechanics.**

Foundations. Diffusion and convection. Material properties of bone and muscle. Cardiac mechanics. Circulation: steady and unsteady flow, compliant tubes. Macro- and microrheology of blood. Thrombosis and hemostasis. Respiration and ventilation. Convective transport of solutes. Thermal response and control. Locomotion, swimming, and flight. Prerequisite: APMA 0330 or equivalent. Lectures and laboratory.

**ENGN 1220. Neuroengineering.**

Course Goals: To develop an advanced understanding of how signals are generated and propagated in neurons and neuronal circuits, and how this knowledge can be harnessed to design devices to assist people with neurologic disease or injury. Fundamental topics in neuronal and neural signal generation, recording methods, and stimulation methods. Clinical/ Translational topics include multiple clinically available and emerging neurotechnologies. Prerequisites: NEUR 0010 and ENGN 0510; or instructor permission, which may be provided after discussion with course faculty.

**ENGN 1230. Instrumentation Design.**

Sensors for pressure, temperature, blood flow, muscle and neural activity. Amplifiers, filters, and A/D-D/A converters. The use of computers in monitoring and controlling physiological processes. Feedback controllers for temperature, flow rate, and experimental stimuli. Intended as a design course primarily for biomedical engineers. Lab times to be arranged.

**ENGN 1300. Structural Analysis.**

Classical and modern methods of analysis for statically indeterminate structures. Development of computer programs for the analysis of civil, mechanical, and aerospace structures from the matrix formulation of the classical structural theory, through the direct stiffness formulation, to production-type structural analysis programs. Introduction to Finite Element Methods (FEM) and Isogeometric Analysis (IGA). Prerequisite: ENGN 0310.

**ENGN 1310. Planning and Design of Systems.**

No description available.

**ENGN 1340. Water Supply and Treatment Systems - Technology and Sustainability.**

This course provides a comprehensive overview of engineering approaches how to protect water quality. Class begins with brief introduction to hydrological cycle. More in detail groundwater flows (Darcy eq.-n) and flows into wells are examined. Principles of hydraulics are presented. Open channel and river flows, flood routing and preventing are presented. Freshwater and wastewater treatment technologies, together with advanced water treatment processes evaluated. Course ends with the visit to a local wastewater treatment plant. Prerequisites: CHEM 0100 or CHEM 0330 and MATH 0170 or MATH 0190 or MATH 0350 or MATH 0180 or MATH 0200. Course is not available for Freshmen.

**ENGN 1360. Soil Mechanics and Principles of Foundation Engineering.**

Classification and identification of geological materials; mechanical and physical properties and methods of testing. Elements of the analysis of stress and strain in rock and soil masses; theories of failure, theory of seepage. Problems of building foundations; consolidation and settlement; stability of earth slopes and embankments. Includes geotechnical laboratory. Prerequisite: ENGN 0310.

**ENGN 1370. Advanced Engineering Mechanics.**

A unified study of the dynamics of particles, rigid bodies, and deformable continua. Generalized coordinates and Lagrange's equations; variational principles; stability of equilibrium; vibrations of discrete systems and of elastic continua, and wave propagation. Prerequisites: ENGN 0040, APMA 0340, or equivalent.

**ENGN 1380. Design of Civil Engineering Structures.**

This course provides an introduction to the design of steel and reinforced concrete structures using ultimate strength methods. Lectures will cover key concepts of design theory, building codes, and standards using examples from real structures. Students will apply concepts through computer labs, homework problems, and a design project. Lectures plus lab. Prerequisite: ENGN 1300.

**ENGN 1400. Analytical Methods in Biomaterials.**

Analytical methods and instrumentation currently used to characterize biomaterials. Specific methods/instrumentation covered include: molecular scale analysis (NMR, FTIR, UV-Vis spectroscopy); surface analysis (AFM, SEM, XPS, contact angle goniometry, ellipsometry, quartz crystal microbalance, electrochemistry, grazing angle IR); bulk analysis (DSC, mechanical testing) and biological analysis (bioassays, fluorescence and confocal microscopy). Prerequisites: CHEM 0330, CHEM 0350, ENGN 0040 and BIOL 0200. Enrollment limited to 40.

**ENGN 1410. Physical Chemistry of Solids.**

Application of physical chemistry and solid state chemistry to the structure and properties of engineering solids as used in solid state devices, ceramics, and metallurgy. Equilibrium and free energy of heterogeneous systems, thermodynamics of solutions, chemical kinetics, diffusion, catalysis and corrosion, solid state transformations. Case studies taken from industrial practice. Prerequisites: ENGN 0410, 0720.

**ENGN 1420. Kinetics Processes in Materials Science and Engineering.**

This course introduces the basic principles and formulations that describe kinetic processes in materials science and engineering. These are divided into the following principle types of mechanisms: solid state diffusion, reactions at surfaces and interfaces, and phase transformations. The final section of the course applies these principles to several relevant materials processing systems. Prerequisites: ENGN 0410, 0720, 1410 or equivalent.

**ENGN 1440. Mechanical Properties of Materials.**

Begins with basic concepts of mechanical properties common to all materials, with some emphasis on dislocation theory. Particular attention is given to the relationship between mechanical properties and microstructures. The different types of mechanical tests that are used in each of these fields are analyzed. Lectures plus laboratories. Prerequisite: ENGN 0410.

**ENGN 1450. Properties and Processing of Electronic Materials.**

Focus on fundamental properties, processing, and characterization of electronic materials for microelectronic, large area, and thin film device applications. Processing Si into modern integrated circuits, e.g., VLSI, USLI, will be described in terms of materials science of unit processes (oxidation, lithography, diffusion, ion implantation, thin film deposition) used in device fabrication. Review relationship between properties of different materials classes (metals, semiconductors, insulators) and band structure. Concepts used to explain the operation of a p-n junction and simple MOS structures. Laboratory will focus on depositing materials via vapor phase synthesis methods and measuring fundamental electronic properties of materials using transport measurements.

**ENGN 1470. Structure & Properties of Nonmetallic Materials.**

A study of the structure and properties of nonmetallic materials such as glasses, ceramics, and polymers. The crystal structure of ceramics, and the noncrystalline networks and chains of glasses and polymers, and the generation of microstructures and composites are considered. The physical and mechanical properties of glasses, ceramics, polymers, and composites, and their dependence on structure, are developed. Prerequisite: ENGN 0410

**ENGN 1480. Metallic Materials.**

The central theme is to familiarize students with typical microstructures in metals and alloys, their origin, and factors that control stability. The role of processing (primary and secondary) in influencing microstructures will be demonstrated. The ability to change microstructure through composition and processing to obtain a "desired" microstructure that provides specific properties will be highlighted with examples in different alloy systems including Al, steels, and Ni-based. Factors that control stability and shape of second phase particles will be discussed for L/S and S/S processing. The consequences of microstructural changes on physical and mechanical properties will be illustrated. Prerequisite: ENGN 0410, ENGN 1410.

**ENGN 1490. Biomaterials.**

Biomaterials science, the study of the application of materials to problems in biology and medicine, is characterized by medical needs, basic research, and advanced technological development. Topics covered in this course include materials used in bone and joint replacement, the cardiovascular system, artificial organs, skin and nerve regeneration, implantable electrodes and electronic devices, drug delivery, and ophthalmology.

**ENGN 1510. Nanoengineering and Nanomedicine.**

Students in this course will develop a fundamental understanding of nanoengineering and its applications in medicine. We will discuss nanomaterials synthesis, fabrication, and characterization. Medical applications of these materials will include drug delivery, imaging and diagnostics, and tissue engineering approaches. Nanotoxicology will also be discussed. Research methods in nanoengineering and nanomedicine will be emphasized (i.e., critical analysis of scientific literature, effective oral and written communication). Students will also have the opportunity to gain an introduction to several nanoengineering research tools available on campus. This course is for engineering and science graduate students and advanced upper-level engineering undergraduates.

**ENGN 1520. Cardiovascular Engineering.**

In this course, students will learn quantitative physiological function of the heart and vascular system, including cardiac biomechanics and vascular flow dynamics, through lectures and discussion of current scientific literature. A systems approach will integrate molecular biophysics, cell biology, tissue architecture, and organ-level function into a quantitative understanding of health and disease. Discussion topics will include cardiovascular devices, pre-clinical regenerative therapies, stem cell ethics, and clinical trials.

**ENGN 1560. Optics.**

A first course on electromagnetic waves and photonics. Topics to be covered include basic wave phenomena with an emphasis on geometric optics, the interaction of light with matter, scattering, and interference and diffraction effects. Also covered will be a selected number of more advanced topics including laser physics, nonlinear optics, transmission lines, and antennas.

**ENGN 1570. Linear System Analysis.**

Analysis of discrete and continuous electrical signals and systems in both time and frequency domains. Modulation, sampling, spectral analysis, analog and digital filtering. Fourier, Laplace and z-transforms, the state-space approach, stability of linear systems. Prerequisite: ENGN 0520.

**ENGN 1580. Communication Systems.**

We will learn basic communication and information theory, but with examples drawn from a variety of areas not normally considered communication. Basic knowledge of Laplace/Fourier transforms and frequency domain is essential (ENGN 0520 or equivalent required). Linear Systems (ENGN 1570), Probability (APMA 1650 or MATH 1610), Linear Algebra (MATH 0520 or 0540) and E&M (ENGN 0510) are helpful but not required. Analog modulation, digitization, signal space, digital modulation and noise, information theory, selected topics in modern communication/information network theory and applications to biology and physics as time and interest permit. Depending on preparation, we may also pursue final projects.

**ENGN 1590. Introduction to Semiconductors and Semiconductor Electronics.**

An introduction to the physics of fundamental electronic processes that underlie the operation of semiconductor devices on a microscopic scale. Basic electronic properties of semiconductors and effects at interfaces heterogeneous media, such as pn junctions and hetero-structure barriers and quantum wells. These junctions, barriers and wells are used as building blocks for devices, focusing on bipolar and field-effect transistors. Modern trends in micro- and opto-electronic devices are discussed. A brief fabrication lab will introduce pn junction fabrication technology. Prerequisites: ENGN 0410 and 0510.

**ENGN 1600. Design and Implementation of Digital Integrated Circuits.**

This course will cover digital design and implementation concepts required for successful tape-out of integrated circuits. The first part covers the fundamentals of Very Large-Scale Integration (VLSI) design, including transistor analysis, standard cell layout, and cell characterization techniques. The second part covers use of design automation tools to complete a full design to tape-out. In the second part, hardware design using Verilog will be first discussed, and then will follow with the use of techniques and tools: logic synthesis, circuit timing and power, and placement and routing. The class will feature a number of labs and a large design project.

**ENGN 1610. Image Understanding.**

Image processing is a technology experiencing explosive growth; it is central to medical image analysis and transmission, industrial inspection, image enhancement, indexing into pictorial and video databases, e.g., WWW, and to robotic vision, face recognition, and image compression. This senior-level undergraduate course covers theoretical underpinnings of this field and includes a series of practical MATLAB image processing projects. ENGN 1570 is recommended but not required.

**ENGN 1620. Analysis and Design of Electronic Circuits.**

Elementary device physics and circuit characteristics of semiconductor diodes, bipolar junction transistors (BJTs), and field effect transistors (FETs). Analysis and design of practical circuits using discrete semiconductor devices. Constraint on and techniques for linear integrated circuit (IC) design and the use of linear ICs as circuit building blocks. Laboratory. Prerequisites: ENGN 0510, 0520 or equivalent.

**ENGN 1630. Digital Electronics Systems Design.**

Fundamentals of digital logic design including: Boolean algebra, gates, truth tables, logic families, flip-flops, finite state machines, memory, and timing. More advanced topics include A-D conversion, binary arithmetic, CPU organization, programmable logic (CPLDs and FPGAs), and VHDL. Extensive laboratory requirement. Not open to first year students; permission required for sophomores.

**ENGN 1640. Design of Computing Systems.**

This course introduces the main concepts and techniques for designing computing systems. Topics covered include assembly language, instruction set design, pipelining, superscalar and VLIW processor design, memory subsystem design, and I/O interfacing. Laboratory topics include programmable logic devices, hardware definition languages, and implementation of a bootable version of the pipelined MIPS processor. Laboratory emphasizes design optimizations with respect to speed and design area. Prerequisite: ENGN 1630 or passing of a quiz on basic digital logic concepts, or instructor permission.

**ENGN 1650. Embedded Microprocessor Design.**

This is a combined lecture and design project course offering experience in the open-ended design of an electronic product or system employing an embedded microprocessor by small-group design teams. Activity includes product specification, circuit design, programming, printed circuit layout, construction, packaging, and economic assessment. Teams are expected to produce functional products. Lecture topics will be adjusted to reflect the chosen design problems. Emphasis is placed on the criteria for choosing processors and on the interfaces and programming requirements of the system. Primarily for senior concentrators. Experience with C programming is helpful but not required. Prerequisite: ENGN 1630 or permission of the instructor.

**ENGN 1680. Design and Fabrication of Semiconductor Devices.**

Contemporary practice in the design and fabrication of semiconductor devices. The realization of basic electronic device functions on the semiconductor platform is a central theme in a coordinated lecture and laboratory course. Topics include microcircuit photolithography; layout and design scaling rules for integrated circuits; and techniques in semiconductor and thin film processing as they apply to ULSI circuit manufacturing. Prerequisite: ENGN 1590 or permission.

**ENGN 1690. Photonics Devices and Sensors.**

Science and engineering principles of photonics and optoelectronic devices that provide foundation to a broad range of technologies from lasers to detectors, from cameras to computer displays, from solar cells to molecular sensing, from internet to quantum cryptography, and to new lighting sources for illuminations in the city and in biomedical treatments. Topical content: Light as waves in media, on surfaces, and through micro and nanostructures; interference and waveguiding; light generation by spontaneous emission, stimulated emissions, photodetection, infrared and night visions, LED, lasers, optical amplifiers and modulators, etc. Prerequisite: ENGN 0510 or equivalent.

**ENGN 1700. Aerospace Fluid Mechanics.**

Advanced fluid mechanics focusing on the physics, concepts, theories, and models of aerodynamics, turbomachinery, and space propulsion. Topics will focus on airfoil and wing theory; laminar and turbulent boundary layers; sub- and supersonic aerodynamics. Introduction to rocket propulsion and advanced space propulsion. Lectures, labs, computation and design projects. Prerequisites: ENGN 0720 and ENGN 0810.

**ENGN 1710. Heat and Mass Transfer.**

Steady 1D and 2D heat conduction with heat generation. Transient heat conduction. Forced convection, heat convection during external and internal flows. Natural convection. Heat Exchangers. Thermal radiation, Kirchhoff's law, the perfect emitter, radiation intensity and surface emissive power, real surface radiation; view factors for black and gray surfaces. Diffusion mass transfer. Lectures and labs. Prerequisite: ENGN 0810.

**ENGN 1720. Design of Thermal Engines.**

Students will work in groups on semester long engine design projects. Projects are to incorporate: formulation of design problem statements and specifications, consideration of alternative solutions, detailed design descriptions, development and use of design methodology, development of student creativity and use of acquired engineering skills, while including realistic constraints such as economic factors, safety, reliability, ethics, social impact, etc. Lectures, laboratory, and computer-aided design projects with oral and written reports. Lectures to cover: thermodynamics, heat transfer, fluid dynamics, kinematics/dynamics, lubrication, combustion, fuels, and pollution of thermal engines. Prerequisites: ENGN 0720 and 0810.

**ENGN 1740. Computer Aided Visualization and Design.**

Provides instruction in the application of computers to the design methods in engineering. Hands-on experience in use of CAD/CAE software packages for geometric modeling, visualization, and drafting. Emphasis on applications to solids and structural problems. Independent design projects are carried out. Course counts as an ABET upper-level design course for mechanical and civil engineering concentrators. Prerequisite: ENGN 0310.

**ENGN 1750. Advanced Mechanics of Solids.**

Continuum mechanics of solids and its application to the mechanical response of machine and structural elements. Tensor descriptions of deformation and internal forces in solids; field equations. Elastic and elastic-plastic material models; failure criteria. Analytical techniques and energy methods for elastic solids; implementing the finite element method for elastic solids. Beam and plate theory. Stress waves and vibrations in solids. Use of commercial finite element software. Prerequisite: ENGN 0310, APMA 0330.

**ENGN 1760. Design of Space Systems.**

Working in design groups, students conceive a space mission and design all of the elements necessary for its execution including launch and orbit / trajectory, space and ground systems, including analysis of structure, thermal, radio link, power and mass budgets, attitude control and dynamics. Each group builds a hardware project to demonstrate a core element of their mission design. Prerequisites: Engineering core curriculum or equivalent

**ENGN 1840. Numerical Methods in Engineering.**

Numerical analysis techniques related to solving systems of linear algebraic equations, matrix eigenvalue problems, nonlinear equations, polynomial approximation and interpolation, numerical integration and differentiation, ordinary and partial differential equations. Programming in Matlab. Pre-req: ENGN0040, CSCI 0040 or equivalent programming ability. APMA 0330, APMA 0340 or equivalent.

**ENGN 1855. Design Principles and Process.**

This course, through substantial projects, deepens student's understanding of the design principles and processes and develops their skill at synthesizing artifacts that are appropriate responses to situations in specific contexts. It asks students to acquire new knowledge of a physical and social context and to integrate this new knowledge with their world model to create artifacts that produces a positive change in the context.

**ENGN 1860. Advanced Fluid Mechanics.**

Aims to give students a deeper and more thorough grounding in principles and applications of fluid mechanics. Topics include review of dimensional analysis and conservation principles; viscous flows with application to microfluidics; lubrication analysis for bearing design; laminar boundary layers; wave motion; and interfacial phenomena (e.g., drops and bubbles). Lectures, assignments, computational projects, and laboratory. Prerequisites: ENGN 0810.

**ENGN 1900. Construction of the Entrepreneurial Enterprise Framework: From Decision Making to Opportunity Creation.**

Students examine and engage with the decision making process in the modern enterprise, including investment, negotiation, and opportunity creation. This is done in an entrepreneurial context. Teams research and present orally and in writing on major class themes. Case studies, Socratic discussion models, readings, guest lectures, rhetoric and writing fellows support for videotaped oral and written business plans are utilized. Enrollment limited to 35.

**ENGN 1930A. 3D Photography.**

By 3D photography we refer to a number of processes that use cameras and lights to capture the shape and appearance of 3D objects. In this course we will first study and build basic 3D techniques and systems, and then cover several closely related methods based on signal processing techniques, constrained energy minimization, and the solution of diffusion differential equations to smooth, denoise, edit, compress, transmit, simplify, and optimize very large polygonal models. Applications include computer animation, game development, electronic commerce, heritage preservation, reverse engineering, and virtual reality.

**ENGN 1930B. Biomedical Optics.**

Biomedical optics is a rapidly growing field with applications in medicine, biology, and neuroscience. The course covers principles and applications of wave optics for biomedical imaging. The principles include refraction, reflection, scattering, diffraction and interference. The applications include Michelson interferometry and optical coherence tomography (OCT). OCT is the emerging technology for 3D imaging, considered by the American Institute for Medical and Biological Engineering (AIMBE) as the latest innovation milestone in the history of biomedical engineering. Throughout the course, we will also learn various numerical analysis techniques with working examples in MATLAB. Prerequisites: Undergraduate level ENGN 0510 Minimum Grade of S

**ENGN 1930D. Large Scale Engineering Design Project.**

Provides a major design experience for civil, mechanical, and, with approval, environmental engineering students. This experience involves an open-ended design problem that requires teamwork and the integration of understanding developed in upper-level courses in the engineering concentrations. Intended for students in their senior year.

**ENGN 1930F. Entrepreneurship and Good Work: Engineering Dreams.**

In this course, students examine the concepts of creation, organization, promotion, management and risk of ownership, to wit: entrepreneurship. This is done in the context of 'good work'. Using a combination of relevant case studies, readings, guest lectures and discussion, each participant builds a theory and framework to explore what defines innovative and meaningful engagement during one's working years. Enrollment limited to 24. Written permission required.

**ENGN 1930G. Entrepreneurship I.**

Teams of students from Engineering, COE and other technical and non-technical disciplines form simulated high tech startup companies working on mentor-defined opportunities, from conception to commercialization. Intellectual property, marketing, definition of a product requirements document, human factors (including team building), safety and environmental concerns, and legal concerns are emphasized. Students in the COE Technology Management Track should complete ENGN 1010 prior to this course. Enrollment in the course is limited and students must fill out a formal application (though COE tech track seniors are automatically approved). The course meets TR from 2:30-3:50, and other outside meeting hours will be arranged.

**ENGN 1930H. Entrepreneurship II.**

Please see ENGN 1930G for course description. Enrollment limited to 24.

**ENGN 1930I. Ethics and Professionalism.**

Issues of ethics and professionalism for the engineer and for members of other professions. The principal objectives are to examine the responsibility a person accepts when practicing his or her profession and to provide opportunities for students to explore the ethical aspects of their profession, become comfortable and confident discussing and using value systems, and practice effective expression of ideas in oral and written form.

**ENGN 1930K. High-Performance Sensors and Multimedia.**

Design, construction, and programming of embedded systems with system-on-chip processors, and audio/visual sensors for real-time applications. Design and implementation of distributed audio/visual applications. Hands-on project oriented hardware/software course.

**ENGN 1930L. Biomedical Engineering Design and Innovation.**

This course is the culmination "capstone" of the biomedical engineering educational experience. The primary objective of this course is to recall and enhance design principles introduced through the engineering core curriculum and to apply this systematic set of engineering design skills to biomedical engineering projects. Students will form teams with their peers and a clinical advisor, identify and define a design project to meet a clinical need, and engage in the design process through the course of the semester. For seniors only. Non-engineering concentrators should register for ENGN 0930L.

**ENGN 1930M. Industrial Design.**

Brown engineering and RISD industrial design faculty lead product development teams through a design cycle. Engineers explore industrial design, designers gain some insight into engineering, and both groups can apply their skills to challenging problems. Frequent presentations, field trips, critiques, and labs. Preference given to seniors. Prerequisites: completion of engineering core. Enrollment limited to 15 students.

**ENGN 1930N. Introduction to Magnetic Resonance Imaging and Neuroimaging.**

Magnetic resonance imaging (MRI) is a powerful tool for investigating the biological structure and functional dynamics across an incredibly broad spatial and temporal scale. This course will provide an understanding of the basic physical principles of magnetic resonance; including signal generation, detection and contrast mechanisms; as well as image acquisition techniques and reconstruction methods. This course is aimed at undergraduate and graduate students from a variety of disciplines, including: Engineering, Computer Science, Applied Mathematics, Physics, Cognitive Science and Neuroscience as well as medical students and residents. Students should have a basic understanding of matrix mathematics and familiarity with the concepts of magnetism and waves.

**ENGN 1930O. MicroElectroMechanical Systems (MEMS).**

Integrated analysis and design of MicroElectroMechanical Systems (MEMS), which are highly integrated micron-scale devices used in many applications: sensors, energy (engines), optics, bioengineering, chemical processing, etc. Provides an introduction to the science and art of design, fabrication, performance, and use of MEMS in all disciplines of engineering.

**ENGN 1930P. Solid Biomechanics.**

Applications of mechanics to biological systems over a range of scales, including microscopic scales of cells and cellular components, intermediate scales of tissues and muscles, and macroscopic scales of organs, joints, locomotion, and whole organisms. Dimensional analysis and scaling; elasticity, viscoelasticity, poroelasticity applied to tissue mechanics; models for muscle contraction; mechanics of the cytoskeleton, biopolymers, cell membranes, and cell adhesion. Prerequisites: ENGN 0040 or equivalents, APMA 0330.

**ENGN 1930R. Molecular and Cell Biology for Engineers.**

Applications of mechanics to biological systems over a range of scales, including microscopic scales of cells and cellular components, intermediate scales of tissues and muscles, and macroscopic scales of organs, joints, locomotion, and whole organisms. Dimensional analysis and scaling; elasticity, viscoelasticity, poroelasticity applied to tissue mechanics, models for muscle contraction; mechanics of the cytoskeleton, biopolymers, cell membranes, and cell adhesion. Prerequisites: ENGN 0040 or equivalents, APMA 0330.

**ENGN 1930S. Land Use and Built Environment: An Entrepreneurial View.**

Through the use of readings, group discussions, students presentations and guest lectures, students examine and challenge the analytical and structural frameworks which underlie and support public and private land and use the urban and suburban built environments. Students build an understanding and theory of how social, political, governmental and economic forces interact with society's present and future physical space needs.

**ENGN 1930T. Aircraft Design.**

The process of aircraft conceptual design as practiced in industry: requirements definition to initial sizing, configuration layout, analysis, sizing, optimization, and trade-off studies. Concepts and calculation methods for aerodynamics, stability and control, propulsion, structures, weights, performance, and cost; coverage of conventional and unconventional design methods drawing from knowledge gained in engineering science courses, synthesized towards novel imaginative aircraft designs guided by participants' interests. Prerequisite: the level of senior in engineering studies.

**ENGN 1930U. Renewable Energy Technologies.**

Renewable Energy Technology examines energy conversion, transport, and storage with the goal of devising courses of action that transform the current state of energy use into one that relies more fully on renewable resources and efficient processes. The course will give priority to photovoltaics, wind, and hydro conversion technologies and to the electrical grid for energy transport. From year-to-year other topics will be explored based on the wishes of the participants. Research, discussion, projects, and presentations will be the primary learning methods. The engineering core and thermodynamics are suggested preparation for this course.

**ENGN 1930W. The Art and Science of Light.**

This studio course explores artificial light from both artistic and scientific perspectives. Laboratory demonstrations on optics and new light emitting materials will be counterbalanced by presentations on the historical and contemporary integration of these materials within the fields of architecture, industrial design, and sculpture. Students will be asked to reimagine the light bulb by developing artistic design alternatives to conventional lighting. Extensive outside work is expected. Written permission required.

**ENGN 1930X. Entrepreneurship and New Ventures: A Socratic Approach to Innovation Analysis and Application.**

Taught via Socratic method, this course will use case studies that explore essential elements of the entrepreneurial process: Defining Entrepreneurship; Recognizing Opportunities and Developing Business Models; Assembling The Team; Raising Financial Resources; Managing Uncertainty; Managing the Growing Venture; and Realizing Value. Guests will include successful entrepreneurs and expert practitioners who will highlight practical approaches to entrepreneurial success.

Please note that beginning with the *very first class*, students MUST read the session's case study and supplemental readings, to be ready for participation in discussions. For the first day's assignment, please contact Professor Warshay directly at Daniel\_Warshay@brown.edu. Enrollment limited to 35.

**ENGN 1930Y. Social Enterprises.**

This course will combine reading, discussion, field work, and guest talks by practitioners and theorists to delve into the workings of a variety of social enterprise models. Prerequisites: Social Entrepreneurship (ENGN1930Q) or comparable experience and an existing relationship with a social enterprise.

**ENGN 1930Z. Robot Design.**

Overview of robots used in material handling, transportation and automated manufacturing. Sensors: force transducers, tachometers, orientation and joint angle detectors; video. Kinematics of a multidimensional robot arm. Inverse kinematics: optimal arm path generation. Automatic control: negative feedback, stability, proportional and integral compensation. Motor sizing, drive trains, navigation and locomotion. Labs: design and construction of a robot, with arm; use of embedded C programming for robot control. Enrollment limited to 24.

**ENGN 1931A. Photovoltaics Engineering.**

This seminar course will provide an overview of the operation, design, characterization, and manufacturing of photovoltaic solar cells and panels. The course will span a range from the fundamental physics of solar cell operation to highly applied, industrially relevant engineering topics. Recommended prerequisites: Good knowledge of basic physics and electromagnetism concepts; proficiency in ENGN 0510 or PHYS 0470; This course is designed for undergraduate and graduate students in Physics, Chemistry and Engineering interested in the field of alternative energy with a focus in photovoltaics. Enrollment limited to 20.

**ENGN 1931D. Design of Mechanical Assemblies.**

An introduction to the design and development of mechanical assemblies suitable for production over a range of volumes, from prototypes to high volume manufacture. The course is intended to present an overview of basic machine components and manufacturing processes from the perspective of a design engineer in a contemporary industrial setting. The objective of which being to provide students the background necessary to create mechanical assemblies from blank-page concepts through to production ready designs. Coursework will include both theoretical and experimental exercises as well as two group projects working on a mechanical assembly produced via high volume manufacture. Prerequisite: ENGN 0310, 1740. Enrollment limited to 20.

**ENGN 1931E. Writing Science.**

This seminar focuses on communicating scientific and technical information to a lay audience in ways that engage and inform. The focus is on writing about new findings, scientific disputes and policy debates, along with producing profiles, feature articles, op-eds and blog posts. Students who complete this seminar will learn how to turn a collection of facts into a story, ways of explaining complex topics in simple terms, and how to differentiate between crucial technical details and clutter. Proficiency in English is assumed. Permission from the instructor is required. Preference will be given to seniors and graduate students. Enrollment limited to 15.

**ENGN 1931F. Introduction to Power Engineering.**

An introduction to the generation, distribution and use of electrical energy in three-phase balanced systems. Topics include: properties of magnetic fields and materials; magnetic reluctance circuits; phasors and the properties of balanced three-phase voltage and current lines; generators; transformers and transmission lines; induction motors; brushless DC motors; power semiconductor switches; and the properties of solar photovoltaic sources and microinverters. Laboratory project. Prerequisites: ENGN 0510 and 0520.

**ENGN 1931I. Design of Robotic Systems.**

Designing kinetic systems (i.e., systems requiring movement or motion) relies on both mechanical and electrical engineering. These systems include everything from mobile robots for rescue operation to electrically powered moving sculptures. Through a series of projects, students combine knowledge of electronic circuit design, sensors, actuators, motors, microcontrollers, control theory, and programming to build interactive art and robotic systems. Projects culminate in the design of a creative kinetic system that incorporates several of the principles learned in class. Some programming experience is helpful but not required. Prerequisites: ENGN 0040 and (ENGN 0520 or ENGN 1230 or ENGN 1630 or some hardware experience). Otherwise, seek instructor approval.

**ENGN 1931J. Social Impact of Emerging Technologies – The Role of Scientists and Engineers.**

The role of engineering sciences in an ever-changing technology-driven world. Students will develop basic working knowledge of selected contemporary technologies that help identify and forecast future prospects while discerning future disruptions. Emphasis on the importance of ethical and social responsibilities that technologists must shoulder in answering societal challenges and contributing to policy making and corporate leadership. How do we create beneficial technologies yet anticipate their potential social costs, such as workforce automation or overdependence on the internet? Will we give up brains as our last private space? Who will control the data / technology ecosystem that influences our decisions?

**ENGN 1931K. Cell-Material Interactions in Tissue Engineering.**

Students study how materials are used in cell-based biological applications focusing on engineered tissues and translational applications. Hybrid materials can be designed to elicit specific cellular interactions, including cell adhesion, mechanosensing, biochemical signaling, and electrical conduction. Primary scientific literature provides examples of design principles as applied to natural and synthetic materials in cell-based assays, engineered tissues, and in vivo implantation. Students participate in class discussions of scientific literature, lead discussion through oral presentation and group engagement, and write literature summaries including a final project (either a primary research manuscript or literature review). Pre Requisites: Recommended: Physiology/Cell & Molecular Biology, Biomaterials/Materials Science.

**ENGN 1931L. Biomedical Engineering Design and Innovation II.**

This course is part two of the culmination "Capstone" of the biomedical engineering educational experience. The primary objective of this course is to recall and enhance design principles introduced through the engineering core curriculum and to apply this systematic set of engineering design skills to biomedical engineering projects. Student teams formed in the previous semester will continue develop a design project based on an unmet clinical need with a clinical advisor, gaining hands-on process experience and generating innovative solutions. For seniors only. Non-engineering concentrators should register for ENGN 0931L.

**ENGN 1931M. Industrial Machine Vision.**

This course will offer advanced undergraduate and master's students a practical introduction to industrial applications of machine vision and will provide theoretical, hands-on experience with automation and visual inspection technologies. Computer Vision, the automated analysis of images and video sequences, began as a research subject within computer science and engineering and has become an accepted technology with industrial applications. Current industry applications of machine vision: Electronics, metal, automotive, wood, plastics, paper, textiles, films, food manufacturing, biomedicine. Common functions: Recognition of features or components, guidance of assembly, robotic arms or vehicles, welding, dispensing; and inspection, measurement, detection of defects.

**ENGN 1931N. Building Entrepreneurial Ecosystems for Economic Inclusion.**

Entrepreneurial ecosystems represent recent developments for fostering economic development as leaders globally aspire to build successful ecosystems in their cities and regions. These ecosystems are entrepreneurs in relationships of exchange and mutual reciprocity within the institutional and cultural environment of entrepreneur support organizations (ESO), infrastructures, and resources. This course will examine the emergence of entrepreneurial ecosystems in different cities and the roles, functions, and goals of ESOs. Students will visit local ESOs to learn about ecosystems and inclusive economic development.

**ENGN 1931P. Energy and the Environment.**

This course explores all the energy forms, but will focus on energy sources from which the majority of "useful" energy originates at the present time. Basic heat transfer problems related to energy efficiency are presented. Rankine and Brayton power cycles are introduced. Cycle modifications supporting energy efficiency are explored. Carbon footprint calculations are illustrated. Traditional and cutting-edge technologies for carbon capture and storage presented. Emissions such as SO<sub>x</sub>, NO<sub>x</sub>, and PM and their capture technologies investigated. The Earth climate model examined. The course features three 1-page long scientific summary writings and the tour to the Manchester Street Power Station.

**ENGN 1931Q. Entrepreneurial Management in Adversity.**

Companies get into trouble all the time -- making wrong products for the market, failing to meet sales quotas. This course examines actions a company must take in adverse conditions. There is never enough time to hire consultants, do research, hire new employees. Top Management must make decisions, often with insufficient data and alternative 'sub-optimal' options. Primary objectives are to understand analysis and rapid action when faced with adversity; identify the cause of adversity, building solutions to prevent recurrence or give management the skills to solve problems; and develop recommendations and action plans to 'sell' to the Board of Directors.

**ENGN 1931T. Entrepreneurship Practicum: Starting, Running, and Scaling Ventures.**

Starting and running a venture is one of the most rewarding and frustrating endeavors a manager faces. While good ideas abound, the hallmark of the entrepreneur is the ability to translate ideas into action. This course is experiential, project-based, and designed to help entrepreneurs turn ideas into real ventures. Students should have already identified a problem whose solution may serve as the basis for a venture. Some may have embarked upon venture-building already. This course will help them work in a structured way, with supportive mentorship and content, to make significant progress on the venture and increase chances for success.

**ENGN 1931W. Selling & Sales Leadership in the Entrepreneurial Environment.**

Is there any skill more important to entrepreneurs than sales? Startups only have two problems: sales and all else. The entrepreneur starts with a product or service and must convince an embryonic team to join a firm before there is a product, financing or customers; and convince investors the idea is sound, doable, and profitable; and convince customers to rely on a company with no track record. Sales skills are essential. Entrepreneurs sell an intangible and must make it feel immensely tangible. Until company/product become tangible, sales responsibility never stops. Entrepreneurs are key sales figures and face of the company.

**ENGN 1931X. Instrumentation for Research: A Biomaterials/Materials Project Laboratory.**

This course is designed to prepare students for research in biomaterials/materials science by focusing on a project that yields a testable product/device. Advanced equipment/instrumentation will be used to fabricate and evaluate materials required for each project and to test the performance of the product/device that uses these materials. Example projects that illustrate the course plan include building a microfluidic-based medical sensor or fabricating a polymer-based battery. These examples require materials synthesis (polymerization or hydrothermal), materials characterization (SEM, X-ray diffraction), device fabrication (microfabrication, assembly under inert/sterile atmosphere), and product testing (biological assays, electrochemical methods). Student interests will determine other projects. Completion of Laboratory Safety and Hazardous Waste Training offered by EHS.

**ENGN 1931Y. Control Systems Engineering.**

Control Systems is an Engineering discipline that applies control theory to analyze and design systems with desired response behavior. The objective of this course is to introduce the student to the topic of feedback control design with applications on many diverse systems. The course will cover the fundamentals of classical control theory such as modeling, simulation, stability, controller design and digital implementation. It will also address basic aspects of state-space and modern control theory. The course is open to all Engineering majors and will make use of existing simulation packages such as Matlab/Simulink.

**ENGN 1931Z. Interfaces, Information and Automation.**

Laboratory-intensive course to help students develop and implement simple computer programs in Python to control, query, and integrate discrete (traditionally isolated) systems, ranging from automobiles to websites. Assignments will provide hands-on practice using programmatic interfaces to control both physical and virtual systems. Topics include physical interfaces and communication protocols (e.g., GPIB, RS-232, USB) as well as accessing online resources (e.g., SOAP and RESTful web services) and building hybrid systems for data acquisition and analysis. Formal programming experience is not required, but familiarity with either MatLab or Python (at the level of CSCI 0040 or higher) would be very helpful.

**ENGN 1932B. Engineering Practice.**

This course will cover issues faced by engineers which can contribute to the success or failure of engineering projects. Practical solutions will be discussed along with successful and unsuccessful efforts to address these issues. Topics include: good and bad designs, ethical issues, failure analysis, role of research, factory and plant practices, supply chain management and technology diffusion. Additionally, discussion will involve human factors.

Course will be taught in a seminar mode, meeting once per week. Enrollment capped at 15 students and limited to those in their Junior or Senior year.

**ENGN 1932C. C2S Neurotech: From Concept to Startup- Translating Neurotechnology (NEUR 1930J).**

Interested students must register for NEUR 1930J.

**ENGN 1950. Advanced Engineering Optimization.**

Engineers persistently aim to create new structures, machines, and devices to leverage physical principles to man's advantage. Stemming from recent concerns over the environmental impact of technology and increased market competition, there is heightened focus on increasing efficiency. Therefore, future engineers must come up with designs that are not only functional but also optimal.

The course will present the mathematical theory of engineering optimization. Review of optimization theory and techniques from calculus. Calculus of variations. Necessary and sufficient conditions for optimality. Bioinspired engineering: optimal designs found in nature. Projects involving design and fabrication of optimal engineering systems will be encouraged.

**ENGN 1970. Independent Studies in Engineering.**

Independent Study in Engineering. Instructor permission required after submitting online proposal ([https://docs.google.com/a/brown.edu/forms/d/e/1FAIpQLSeXzgX19sKcq7xrL9ca5jrZ4Md\\_NqFYe70hn5l8aYyO77MhqA/viewform](https://docs.google.com/a/brown.edu/forms/d/e/1FAIpQLSeXzgX19sKcq7xrL9ca5jrZ4Md_NqFYe70hn5l8aYyO77MhqA/viewform)). Section numbers vary depending on concentration. Please check Banner for the correct section number and CRN to use when registering for this course.

**ENGN 1971. Independent Study in Engineering.**

Independent Study in Engineering. Instructor permission required after submitting online proposal ([https://docs.google.com/a/brown.edu/forms/d/e/1FAIpQLSeXzgX19sKcq7xrL9ca5jrZ4Md\\_NqFYe70hn5l8aYyO77MhqA/viewform](https://docs.google.com/a/brown.edu/forms/d/e/1FAIpQLSeXzgX19sKcq7xrL9ca5jrZ4Md_NqFYe70hn5l8aYyO77MhqA/viewform)). Section numbers vary depending on concentration. Please check Banner for the correct section number and CRN to use when registering for this course.

**ENGN 2010. Mathematical Methods in Engineering and Physics I.**

An introduction to methods of mathematical analysis in physical science and engineering. This course focuses on analytical techniques in mathematics. It includes series solution for differential equations, Fourier series and Fourier transform for solving partial differential equations, analytical maximum and minimum problems, calculus of variations and complex functions, and complex calculus.

**ENGN 2020. Mathematical Methods in Engineering and Physics II.**

This course focuses on numerical solutions of common problems encountered in engineering and physical sciences, and provides both theoretical underpinnings and practical use of such methods, relying on physical problems from engineering and physical sciences wherever possible. This course covers: 1) Matrix operations, including linear algebra, eigenvalue problems, vector calculus, etc. 2) Solving physical equations numerically: converting physical governing equations into numerically solvable problems to user-defined accuracy, focusing primarily on numerical integration methodologies. 3) Advanced numerical methods: introductions to Bayesian statistics (via Markov chain / Monte Carlo), machine learning (simple regression / classification algorithms), principle component analysis, and design of experiments.

**ENGN 2110. Business Engineering Fundamentals I.**

The course examines core concepts in distinct areas through three modules: (1) intellectual property and business law, (2) technical marketing and (3) finance. All aspects of intellectual property will be treated, models on how to analyze markets will be discussed, culminating in a finance module which utilizes accounting fundamentals and models to perform financial analysis.

**ENGN 2120. Business Engineering Fundamentals II.**

The course examines core concepts in distinct areas through three modules: (1) organizations, leadership, and human capital, (2) implementing radical technology change, and (3) engineering ethics. Organization, leadership and human capital focuses on the attributes of effective leadership and the tactical operation of start-up companies, implementing radical technological change centers on disruptive technologies and their adaptation in the marketplace, and ethics treats the issues that arise in small start-up organizations with an emphasis on the interface of ethics and environmental, health and safety issues.

**ENGN 2125. Engineering Management + Decision Making.**

The primary objective of the course is to train students on tools, skills, and behaviors required for effective management of complex engineering, research, and business development projects. Although the course will be framed in the context of early-stage technology companies, the skills and principles will be applicable to businesses of any size and maturity. The course is organized around three actionable themes: project management, team management, and decision making.

**ENGN 2130. Innovation and Technology Management.**

Examines core concepts through four modules: (1) Industry Dynamics of Technological Innovation, (2) Formulating Technological Innovation Strategy, (3) Implementing Technological Innovation Strategy, and (4) Early Commercialization and Deployment. Industry Dynamics of Innovation will explore some drivers of technology innovation. Implementing Technological Innovation Strategy explores execution issues concerning the flow of technology and innovation from concept to physical product or service. Early Commercialization and Deployment will focus on more salient strategic and operational issues related to commercial readiness and roll-out of a technology-based product or service. Emphasis will be on technology oriented entrepreneurial enterprises, but exploration also includes larger more established organizations.

**ENGN 2140. Innovation and Technology Management II.**

Explores concepts relevant to the management of operations in industrial enterprises with an emphasis on technology-oriented firms. Topics fall into three basic modules: (1) Capacity Planning, (2) Industrial Engineering, and (3) Materials & Resource Engineering. Capacity Planning will focus on capacity considerations in manufacturing and service organizations. Industrial Engineering will examine optimizing plant and process layouts. Materials & Resource Engineering will cover various aspects of planning and scheduling material, labor, and work center capacity. Inventory management techniques will also be introduced and examined as will concepts such as materials requirements planning and aggregate planning.

**ENGN 2150. Technology Entrepreneurship and Commercialization I.**

ENGN 2150 and the spring ENGN 2160 form a sequence that develops the skills for technology-based entrepreneurship. It teaches creation of viable high-growth-potential new ventures from emerging science and technology. It is from emerging S&T that a high percentage of new jobs are created, both by existing large companies and through the formation of new companies. You will examine S&T for new opportunities, create novel product or service concepts from these sources and determine whether these concepts truly represent new business opportunities. Pedagogy is a combination of lectures and "experiential learning", with work undertaken as a two-semester project. Enrollment limited to 30 graduate students in the IMEE program.

**ENGN 2160. Technology Entrepreneurship and Commercialization II.**

ENGN 2160 and the prerequisite fall course 2150 form a course sequence that develops the knowledge of, and embeds the skills for, technology-based entrepreneurship. While 2150 has helped you to examine science and technology sources, and create a portfolio of opportunities from these, this course continues by developing selected opportunities into a compelling business case for the creation of a high growth potential new venture. Once again, learning is by a combination of lectures and "experiential learning", with work undertaken as a guided two-semester project. Prerequisite: ENGN 2150. Enrollment limited to 30 graduate students in the IMEE program.

**ENGN 2180. Globalization Immersion Experience and Entrepreneurship Laboratory.**

In this course, students will gain a better understanding of the political, social and cultural dynamics that influence entrepreneurial enterprises in different world regions. Meetings will be arranged with high technology companies and their venture arms, academic incubators, investment professionals, legal professionals, government officials, entrepreneurs, and other university faculty and students. The semester becomes a global entrepreneurship and innovation "laboratory" where students experience and take part in guest lectures from experts working in other countries. Classroom discussions, student presentations, papers and readings will be used to focus and further understand the globalization dynamic and its relationship to entrepreneurship. Prerequisite: ENGN 2110. Enrollment limited to graduate students in the PRIME program.

**ENGN 2210. Continuum Mechanics.**

An introduction to the mathematical foundations of continuum mechanics. Vectors and tensors, properties and basic operations. Kinematics of deformation. Conservation laws, thermodynamics. Stress. Constitutive equations. Elastic, viscous, and viscoelastic response. Linearization. Simple problems in finite and linear elasticity, and in Navier-Stokes flows. Creep and relaxation in linear viscoelasticity.

**ENGN 2220. Mechanics of Solids.**

A unified introduction to the engineering mechanics of elastic, plastic, and time-dependent solid materials and structures. Stress and equilibrium. Kinematics of deformation, strain, and compatibility. Tensor representation and principal values. Principle of virtual work. Formulation of stress-strain relations in elasticity, plasticity, and viscoelasticity. Uniqueness. Extremum and minimum principles, including energy methods.

**ENGN 2240. Linear Elasticity.**

General theorems in linear elasticity. Basic singular solutions. Boussinesq-Papkovich and Galerkin representations. Curvilinear coordinates. Cavity, inclusion, crack and contact problems. States of plane strain, plane stress, and axial symmetry. Complex variable techniques. Torsion. Thermoelasticity.

**ENGN 2260. Stress Waves in Solids.**

Elastic wave propagation theory with an introduction to waves in viscoelastic and plastic media. Waves in unbounded media, half spaces, layered media, plates, rods, and beams. Solutions to transient problems. Relation of theory to experiment. Stress waves and fracture.

**ENGN 2270. Advanced Elasticity.**

Large elastic deformation. Controllable deformations of incompressible materials. Initial stress problems. Elastic stability. Additional topics may include membrane theory, fiber-reinforced materials, second-order elasticity.

**ENGN 2280. Topics in Continuum Mechanics.**

Devoted to one or more advanced topics in continuum mechanics not covered in detail by the regular courses. Examples are: nonlinear viscoelastic constitutive equations, strain gradient and micropolar theories of elasticity, coupled mechanical and thermal or electromagnetic phenomena, and continuum thermodynamics.

**ENGN 2290. Plasticity.**

Theory of the inelastic behavior of materials with negligible time effects. Experimental background for metals and fundamental postulates for plastic stress-strain relations. Variational principles for incremental elastic-plastic problems, uniqueness. Upper and lower bound theorems of limit analysis and shakedown. Slip line theory. Representative problems in structural analysis, metal forming, indentation, strain and stress concentrations at notches, and ductile failure.

**ENGN 2320. Experimental Mechanics.**

The design and evaluation of experiments in solid mechanics. Considers methods for experimental stress analysis and for the mechanical testing of materials. Topics covered include photoelasticity, creep and relaxation tests, high-speed testing, stress wave propagation, fatigue, and fracture. Techniques, instrumentation, and recording systems for the static and dynamic measurement of mechanical parameters such as forces, displacements, velocities, accelerations, and strains.

**ENGN 2340. Computational Methods in Structural Mechanics.**

Fundamentals of the finite element method of structural analysis. Nodal points, element design, and consistent formulation for assumed functions. Principle of virtual work, formulation of element stiffness and master stiffness matrices. Relation to variational and minimum principles. Linear elastic analysis for static problems; direct and iterative procedures. Nonlinear static analysis with piecewise linearization; elastic-plastic behavior, large geometry changes. Time dependent behavior.

**ENGN 2370A. Thin Films.**

No description available.

**ENGN 2370B. Topics in Solid and Structural Mechanics.**

Devoted to one or more advanced topics in solid and structural mechanics not covered in detail by the regular courses, such as: numerical methods in solid mechanics, theory of optimal design, shell structures and instability, or other topics of interest to the staff or visitors.

**ENGN 2380. Fracture Mechanics.**

The mechanics of brittle and ductile fracture in structural materials. Elastic stress fields near cracks, theories of brittle fracture, elastic fracture mechanics. Techniques of stress analysis. Elastic-plastic analysis of crack extension. Plastic instability. Fatigue, creep, and dynamic fracture. Dislocation mechanisms, cleavage, ductile fracture by void growth. Transitional behavior, rate sensitivity, running cracks. Fracture toughness and fatigue testing and structural design considerations.

**ENGN 2400. Electron Microscopy in Materials Science.**

Theory of electron optics and principles of transmission electron microscopy, including dynamical theory of electron diffraction and image contrast. Applications to materials analysis including defect, boundary, and phase analysis. Analytical electron microscopy including convergent beam diffraction, energy dispersive x-ray analysis, and energy loss spectroscopy. Intensive laboratory exercises.

**ENGN 2410. Thermodynamics of Materials.**

Conditions for equilibrium and stability. First and higher order phase transformations. Critical phenomena. Order-disorder transitions. Principles of phase diagram calculation and construction for binary and ternary phase diagrams. Solution models. Chemical reactions for gases and pure phases. Thermodynamics of surfaces and interfaces. Statistical thermodynamics with representative applications.

**ENGN 2420. Kinetic Processes and Mechanisms in Materials Science.**

Continuum and atomistic descriptions of diffusion in solids. Reactions involving surfaces and interfaces, including evaporation, adsorption, grain growth, and coarsening. Phase transformation kinetics, including nucleation, growth, solidification, spinodal decomposition, and martensitic transformations. Analysis of systems with multiple kinetic mechanisms (typical examples include oxidation, crystal growth, and sintering). Prerequisite: background in basic thermodynamics. Recommended: ENGN 1410 or 2410 or equivalent.

**ENGN 2430. Deformation Behavior of Materials.**

Linear elasticity as applied to isotropic and anisotropic materials; yield criteria including Von Mises, Tresca, Mohr-Coulomb, and Hill. Plastic deformation and slip. Dislocation theory. Mechanisms of hardening. Microstructural models of ductile, intergranular, and cleavage fracture. Toughening mechanisms. Creep. Fatigue. Prerequisites: ENGN 0410 and ENGN 1440 or equivalent.

**ENGN 2440. Strength of Solids.**

Mechanical behavior of solids as interpreted through atomistic mechanisms. Theory and characteristics of dislocations in continuous and crystalline media. Intrinsic and extrinsic stacking faults, extended dislocations, point defects, nodes and networks, disclinations, crystal boundaries. Applications of dislocation theory to single and polycrystal plasticity, work-hardening, stress-corrosion, creep, fatigue, hardening mechanisms, etc.

**ENGN 2450. Exchange Scholar Program.****ENGN 2490A. Crystal Structures and Crystallography.**

The study and experimental analysis of solid structures from crystallography and crystal chemistry viewpoints. Electronic structure of the atom as related to core level chemical analysis techniques in material science, atomic arrangements in solids, form crystallography, crystal symmetry and symmetry of finite objects, and experimental techniques in x-ray diffraction.

**ENGN 2490B. To Be Determined.****ENGN 2500. Medical Image Analysis.**

Explosive growth in medical image analysis has enabled noninvasive methods to diagnose and treat diseases. The course will first discuss the fundamentals of formation of medical images such as CT, MRI, ultrasound, and nuclear imaging; then consider clinical constraints and discuss methods in image guided therapy/surgery, techniques to detect, delineate, measure, and visualize medical organs and structures.

**ENGN 2501. Digital Geometry Processing.**

Three-dimensional geometric models are fundamental for applications in computer vision, computer graphics, medical imaging, computer aided design, visualization, multimedia, and many other related fields. This course includes the study of basic data structures and algorithms for representing, creating, manipulating, animating, editing, and analyzing digital geometry models, such as point clouds and polygon meshes, as well as state-of-the-art material from the current scientific literature. This is a project oriented course with several programming assignments and a final project. Students are expected to have successfully completed an introductory computer graphics/vision course or have an equivalent background. Instructor permission required. Open to seniors and graduate students.

**ENGN 2502. 3D Photography.**

In 3D Photography, cameras and lights are used to capture the shape and appearance of 3D objects represented as graphical models for applications such as computer animation, game development, electronic commerce, heritage preservation, reverse engineering, and virtual reality. This course covers 3D capture techniques and systems, surface representations and data structures, as well as methods to smooth, denoise, edit, compress, transmit, simplify, and optimize very large polygonal models. Instructor permission required.

**ENGN 2520. Pattern Recognition and Machine Learning.**

This course covers fundamental topics in pattern recognition and machine learning. We will consider applications in computer vision, signal processing, speech recognition and information retrieval. Topics include: decision theory, parametric and non-parametric learning, dimensionality reduction, graphical models, exact and approximate inference, semi-supervised learning, generalization bounds and support vector machines. Prerequisites: basic probability, linear algebra, calculus and some programming experience.

**ENGN 2530. Digital Signal Processing.**

An introduction to the basics of linear, shift invariant systems and signals and doing real processing of signal on a digital computer. Quantization and sampling issues are introduced. Discrete time and DFT properties, fast DFT algorithms, and spectral analysis are discussed. IIR and FIR digital filter design is a focus; stochastic and deterministic signals are introduced. MATLAB exercises are a significant part of the course.

**ENGN 2540. Audio and Speech Processing.**

Signal-processing and machine-learning techniques for speech, music and other audio signals is the topic. The basics for speech production and hearing are introduced. PDEs and simplified vocal-tract models are derived for speech and acoustic propagation models are described. LPC, DFT/cepstral audio analysis methods are discussed as well as the modern method for speech synthesis. Basic dynamic programming and hidden Markov modeling are introduced. Microphone-array methods are presented. Coding methods for speech and music are included. Real-time issues are considered. A project and presentation are important in grading. Offered every other year.

**ENGN 2560. Computer Vision.**

An interdisciplinary exploration of the fundamentals of engineering computer vision systems (e.g., medical imaging, satellite photo interpretation, industrial inspection, robotics, etc.). Classical machine vision paradigms in relation to perceptual theories, physiology of the visual context, and mathematical frameworks. Selections from Gestalt psychology, Gibsonian approach primate visual pathways, edge-detection, segmentation, orientation-selectivity, relaxation-labeling, shading, texture, stereo, shape, object-recognition.

**ENGN 2570. Applied Stochastic Processes.**

The study of stochastic processes and a number of applications central to electrical engineering. Analysis of continuous and discrete time Gaussian and second order stochastic processes. Stochastic calculus. Innovations and spectral representations. Markov random fields. Applications to Kalman filtering, the detection of signals in the presence of noise, and two-dimensional image processing. MATLAB projects. Prerequisite: an undergraduate level course in probability or statistics.

**ENGN 2600. Electronic Processes in Semiconductors.**

Electronic processes primarily in semiconductors with tetrahedral bonding (Si, Ge, GaAs compounds). Topics include phonon spectra, band structure, impurity states, electron and hole distributions, optical properties, electron plasma, scattering processes, excess and hot carriers, semiconductor-metal transitions, one-and two-dimensional electron gas, and amorphous semiconductors. Prerequisite: ENGN 1590 and Intro Quantum Mechanics or equivalent.

**ENGN 2610. Physics of Solid State Devices.**

Current and proposed semiconductor devices: bipolar transistors (silicon and heterojunction); field effect transistors (MOSFETs, heterostructure, and submicron FETs); hot-electron and quantum-effect devices; and photonic devices (LEDs, semiconductor lasers, and photodetectors). Prerequisites: ENGN 1590 or equivalent introductory device course; some quantum mechanics helpful but not required.

**ENGN 2620. Solid State Quantum and Optoelectronics.**

Incorporates the study of interaction of radiation with matter emphasizing lasers, nonlinear optics, and semiconductor quantum electronics. Q-switching and mode-locking, electro- and acousto-optic interactions, harmonic generation and parametric processes, self-focusing and phase modulation, stimulated Raman and Brillouin scattering, ultrashort pulse generation, nonlinear processes of conduction electrons in semiconductors, bulk and surface polaritons. Prerequisite: ENGN 2600 or equivalent.

**ENGN 2625. Optical Microscopy: Fundamentals and Applications.**

This course is intended to provide an introduction to optical microscopy for engineering and science students. Topics ranging from basic brightfield and fluorescence microscopy to Nobel-prize winning advanced optical microscopy methods will be discussed. The course will also provide students with the opportunity to acquire hands-on training on various microscopy platforms including the confocal laser scanning microscope and the multiphoton microscope, as well as basic sample preparation.

**ENGN 2630. Electro-Optical Properties of Materials and Biomolecules.**

Fundamental ideas and principles relevant to the understanding of the electrical and optical properties of materials and bio-molecules are emphasized. The mathematics is deliberately kept to a minimum. Topics include metals, semiconductors dielectric materials, magnetic materials, superconductors, carbon nanotubes, DNA, photosynthesis and redox proteins. Prerequisites: ENGN 0510 and PHYS 0470.

**ENGN 2640. Classical Theoretical Physics II (PHYS 2040).**

Interested students must register for PHYS 2040.

**ENGN 2660. Physics and Technology of Semiconductor Heterostructures.**

Covers, largely from an experimental point of view, topics of current interest in semiconductor heterostructure physics and technology; magnetotransport in two-dimensional electron gas; integer and fractional quantum Hall effects; resonant tunneling and superlattice transport; optical and transport properties of quantum wires and dots; heterostructure-based devices; other topics of student interest. Prerequisites: PHYS 1410 or equivalent quantum mechanics and ENGN 1590 or introductory device course helpful but not required.

**ENGN 2730. Advanced Thermodynamics I.**

Fundamental principles of macroscopic equilibrium; thermodynamic stability; Gibbs relations and chemical thermodynamics; applications to various systems, including fluids, solids, and magnetic and dielectric materials. Fundamental principles of macroscopic nonequilibrium thermodynamics (irreversible processes). Entropy production; Curie's principle; Onsager-Casimir reciprocal relations; applications to transport and relaxation phenomena in continuous systems.

**ENGN 2740. Advanced Thermodynamics II.**

Introduction to the statistical mechanics of equilibrium phenomena for classical and quantum-mechanical systems. Ensemble theory; fluctuations; statistical interpretation of the laws of thermodynamics; applications to ideal gases, chemical equilibrium, simple crystals, magnetic and dielectric materials, radiation, and condensation phenomena.

**ENGN 2750. Chemical Kinetics and Reactor Engineering.**

This course focuses on the fundamentals of chemical kinetics with engineering applications. Topics include: quantum chemistry, statistical thermodynamics, and transition state theory; tight versus loose transition states; the kinetics of gases, liquids, and surfaces; adsorption, desorption, surface diffusion; enzyme kinetics and biological processes; formation, solution, and interpretation of elementary mechanisms; global versus local sensitivity analysis; uncertainty quantification; and the coupling between fluid dynamics and chemical reactions.

**ENGN 2760. Heat and Mass Transfer.**

Convection. Laminar flow: boundary layer equations and similarity solutions; solution techniques for arbitrary wall temperature distribution; development of flow in tubes. Turbulent flow: semiempirical methods of solution for turbulent shear layers. Natural convection. Separated flow. Condensation and evaporation. Fundamentals of heat and mass transfer for chemically reacting flows. Radiation. Basic concepts and properties of solids and gases.

**ENGN 2770. Atomistic Reaction Engineering.**

Covers the principles of operation of heterogeneous catalysis and advanced reaction engineering with an emphasis on catalysis theory. Includes electronic structure calculations, linear scaling relations, free energy relations, surface reactivity, rate theory, and electrocatalytic concepts. Applications of study in this course will focus on catalysts for energy conversion. Students should have a background in chemical reactions and thermodynamics.

**ENGN 2810. Fluid Mechanics I.**

Formulation of the basic conservation laws for a viscous, heat conducting, compressible fluid. Molecular basis for thermodynamic and transport properties. Kinematics of vorticity and its transport and diffusion. Introduction to potential flow theory. Viscous flow theory; the application of dimensional analysis and scaling to obtain low and high Reynolds number limits.

**ENGN 2820. Fluid Mechanics II.**

Introduction to concepts basic to current fluid mechanics research: hydrodynamic stability, the concept of average fluid mechanics, introduction to turbulence and to multiphase flow, wave motion, and topics in inviscid and compressible flow.

**ENGN 2880A. Chemical Reaction Engineering.**

Elements of chemical rate processes; steady-state and transient behavior of continuous-flow chemical reactors; uniqueness, multiplicity, and stability in chemical reactor systems and individual catalyst particles; heterogeneous chemical reactor analysis focusing packed beds (continuum and discrete models) and fluidized beds (deterministic and stochastic models).

**ENGN 2910A. Advanced Computer Architecture.**

This class focuses on advanced computer architecture concepts, including super-scalar processor design, out-of-order execution, branch prediction, multi-core processors, memory hierarchy consistency, GPU architectures, and architecture of large-scale systems such as data centers and supercomputers. Class work expected to include HWs, Labs, and projects. Prerequisite: ENGN 1640 or permission of instructor.

**ENGN 2910B. Advanced Process in Materials: Thin Film Processing and Characterization.**

No description available.

**ENGN 2910C. Advanced Processing of Materials.**

This course will present a detailed consideration of processing of specific types of materials. In this particular offering, electronic materials will be the focus of the discussion. Detailed state of the art methods of processing will be described and the relationship between processing and the resulting properties will be discussed.

**ENGN 2910D. Engineering and Design I.**

No description available.

**ENGN 2910E. Complex Fluids.**

Complex fluids comprise a large class of "soft" microstructured materials which are encountered extensively in engineering applications and biological systems. This course will explore the interrelation between the microscale physics, microstructure and macroscopic properties of complex fluids. Topics include surfactants and self-assembly, intermolecular forces and stability of colloidal suspensions, polymer solutions, ordered phases and liquid crystals, electrokinetic phenomena, rheology.

**ENGN 2910F. Nano and Micro Mechanics of Solid Interfaces.**

This course covers the topics: Mechanics of intermolecular forces and surface forces; Adhesion and friction of hydrophobic and hydrophilic surface complexes; Mechanics aspect of chemical etching and chemical reactions on solid surfaces; Interface energetics and kinetics with anisotropic elasticity and diffusion equations; Micromechanics of grain boundaries and interface fracture Nano and micro mechanics of single asperity and rough-surface contact friction.

**ENGN 2910G. Topics in Translational Research and Technologies.**

To improve human health, engineering and scientific discoveries must be explored in the context of application and translated into human/societal value. Translational research is creating a fundamental change in the way basic science and engineering research has operated for decades, breaking down the literal and figurative walls that separate basic scientists/engineers and clinical researchers. Such discoveries typically begin at "the bench" with basic research--and in the case of medicine--then progress to the clinical level, or the patient's "bedside." This seminar course will utilize case studies to demonstrate to students how the translational research unfolds. Lectures will be delivered by clinicians, medical researchers, engineers, and entrepreneurs, with case studies focused on topics ranging from value creation, IRB, HIPAA, FDA approval, etc.

**ENGN 2910H. Flat Panel Display.**

No description available.

**ENGN 2910I. Mechanics of Entropic Forces in Biological Adhesion.**

Course will cover fundamental concepts of entropic force and its significance in mechanical systems involving "soft matter". A prominent example is cell adhesion which plays a central role in cell migration, spreading, differentiation and growth. For such problems, the importance of mechanics and mechanical forces has been widely recognized and are currently under intensive research. This course is also aimed to stimulate live discussions on potential research topics and opportunities at the interface between solid mechanics and biological mechanics, with emphasis on cell-substrate, cell-cell and cell-particle interaction. Fundamental concepts to be discussed include Brownian motion, fluctuation, diffusion, dissipation, ligand-receptor bonds, single molecule mechanics, stochastic dynamics of binding/rebinding, elasticity, stress fibers, cytoskeleton, focal adhesion and endocytosis.

**ENGN 2910J. Mechanics and Surface Science of Nanostructures.**

Thermodynamics ideas applied to surfaces - surface energies and crystal shapes, concepts of surface stress and stiffness. Surface processes in epitaxial growth. Morphological stability and evolution of surface based nanostructures. Atomistic approaches to surface energetics and kinetics. Elastic interactions of defects on surfaces. Strain driven self-assembly. Surface processes in thin film electronic devices.

**ENGN 2910K. Cell Mechanics.**

Course is designed for students with a strong background that want to learn more about mathematical and mechanical descriptions of the cell and its functions. It will include an overview of cell biology emphasizing locomotion, mitosis (cell division), intracellular transport, cellular mechanotransduction, and biological material properties. The course will draw examples from recent theoretical and experimental research investigations, and teach quantitative tools commonly used by engineers in the field.

**ENGN 2910L. Chemical and Transport Processes in the Environment.**

This course will cover fundamental properties and processes that are important for the fate and transport of chemicals in the environment. Topics will include acid/base speciation, complexation, sorption, phase-partitioning, and solution chemistry. Emphasis will be placed on natural and engineered environmental systems, including a range of environmentally relevant media (e.g. water, air, soil/sediments, plants, organisms). Conceptual understanding of chemical structure and its role in environmental transport will be highlighted, while quantitative approaches will be used to solve problems.

This course is relevant for graduate students interested in environmental pollution chemistry. Undergraduates need permission of the instructor to register.

**ENGN 2910M. Biosensors and Applied Microfluidics.**

This course will acquaint students with two modules: 1) new approaches to detection and quantification of biological molecules for diverse purposes ranging from medical diagnostics to food safety to defense, 2) processes at the microscale which can be translated into applications. The topics will include sensing platforms, devices, instrumentation, biomolecular engineering of probe molecules, quantitative evaluation, separations, sample stacking, DNA/protein sizing and diagnostic devices for use in developing countries. Lectures, assignments, a group design project and a laboratory will acquaint students with the state-of-the-art in biosensors and applied microfluidics. The course is relevant to physicists, chemists, biologists and engineers.

**ENGN 2910N. Molecular and Cellular Biomechanics.**

Mechanics and statistical mechanics applied to biological systems. Topics will include semiflexible polymers (DNA, microtubules, actin, flagella), membranes, and molecular motors. We will cover fundamentals including Brownian motion, random walks, diffusion, the fluctuation-dissipation theorem, and electrostatics of ions in solutions.

**ENGN 2910O. Atomistic Simulation in Mechanics and Physics.**

Random numbers in molecular simulations, Monte Carlo methods applied to equilibrium systems, Kinetic Monte Carlo methods, Molecular dynamics with simple potentials - equilibrium properties in various ensembles (ENV,NVT,NPT,N $\sigma$ T) and non-equilibrium properties. Simulations with three-body potentials and EAM potentials. Molecular statics. Introduction to quantum mechanical methods, Application to the above methods to defect interactions in solids, structure of surfaces, crystal growth and structure of nanostructures.

**ENGN 2910P. Nano-system Design.**

The goal of this course is to provide a broad understanding of the many fields that are involved in electronic nanotechnology. The material will focus on considering how new basic devices intended to replace silicon-based transistors, such as single-molecule organic switches and nanotube electron conduits, will impact VLSI, computer architecture, and how we may design systems to take advantage of the opportunities they offer. Class will include a mix of lectures and discussion on assigned reading of recent publications. Students will be responsible for leading and participating in these discussions. A course project will also be required. Prerequisites: ENGN 1640 and 1600 are helpful, but not required.

**ENGN 2910Q. Chemically Reacting Flow.**

This course focuses on problems in chemical engineering that involve both transport and chemical reaction. The emphasis will be on numerical methods for practical problems. The students will learn to use the open-source code Cantera. Examples will draw from combustion chemistry, porous media, and electrochemistry.

**ENGN 2910S. Cancer Nanotechnology.**

This course will integrate engineering and biomedical approaches to diagnosing and treating cancer, particularly using nanotechnology and BioMEMS. Topics will include the extracellular matrix and 3D cell culture, cancer cell invasion in microfluidic devices, heterotypic interactions, cancer stem cells and the epithelial-mesenchymal transition, angiogenesis and drug targeting, circulating tumor cells and biomarker detection, as well as molecular imaging and theranostics. Recommended coursework includes ENGN 1110 (Transport and Biotransport), ENGN 1210 (Biomechanics) and ENGN 1490 (Biomaterials) or equivalents

**ENGN 2910T. Physics of Materials.**

No description available.

**ENGN 2910U. Quantum, Statistical and Continuum Mechanics.**

No description available.

**ENGN 2910V. Simulation Methods in Physics and Mechanics.**

No description available.

**ENGN 2910W. Synthesis of VLSI Systems.**

Promotes understanding of the algorithms used in designing many of today's CAD tools used for VLSI. Topics include synthesis of two-level and multi-level logic, logic testability and automatic test pattern generation, technology mapping, and sequential synthesis. Also introduces efficient manipulation algorithms for logic functions (based on Binary Decision Diagrams). Prerequisite: ENGN 1630. ENGN 1600 is helpful.

**ENGN 2910X. Video Processing.**

This special topic course will address the rapidly evolving technologies involved in representing and processing video data, including compression, tracking and 3-D modeling. The course will involve projects to implement live and file-based video processing algorithms as well as periodic quizzes. Projects will be carried out primarily in C++.

**ENGN 2910Z. Small Wonders: The Science, Technology, and Human Health Impacts of Nanomaterials.**

Survey course focusing on nanomaterials as enabling components in emerging nanotechnologies. Covers scaling laws for physicochemical properties, synthesis routes, manipulation and characterization tools, and example applications in sensors, composites, advanced energy devices, and nanomedicine. Impacts of nanomaterials on environment and health, including the interactions between nanoscale structures and biological molecules, cells, and whole organisms. Undergraduate enrollment by permission.

**ENGN 2911A. Nanoelectronics.**

Review and analysis of novel and exotic electronic devices, and proposals for extending scaling into the nanometer regime. Contemporary research and development in areas such as nonclassical CMOS; single-electron and nanocrystal memories; 1D nanotube and nanowire transistors, qubits, quantum dots, spin transistors, molecular electronics; and the realization of such elements in arrays and biologically inspired networks.

**ENGN 2911B. Electrical and Optical Properties of Materials and Biomolecules.**

Fundamental ideas and basic principles relevant to the understanding of the electrical and optical properties of solid-state materials and biomolecules are emphasized. Topics, including metals, semiconductors, dielectric materials, magnetic materials, superconductors, carbon nanotubes, DNA, and redox proteins, are selected in order to explain the operation of devices having current or future applications in engineering.

**ENGN 2911C. Digital Integrated Circuit Testing and Hardware Security.**

Testing of digital integrated circuits has historically focused on the detection and diagnosis of manufacturing defects. However, in the past few years, testing for security has become an important hot topic. This class will cover testing fundamentals along with new approaches for the detection of hardware Trojans (malicious circuitry inserted into a design by an adversary). Related topics in hardware security and authentication, including physically unclonable functions, will also be discussed. Prerequisite: ENGN 1630 or equivalent or permission of instructor.

**ENGN 2911D. Engineering and Design II.**

No description available.

**ENGN 2911E. New Frontiers of Solid Mechanics in Nano- and Bio-Research.**

Course will cover fundamental concepts and methods in continuum, atomistic and statistical modeling of nanoscale and hierarchical materials in engineering and biology. Various systems and phenomena, including thin films, nanocrystalline materials, fracture, hierarchical tissue structures of bone and gecko, cell adhesion and endocytosis, carbon nanotubes and biomolecular assembly, are selected to stimulate discussions at the forefront of solid mechanics research.

**ENGN 2911F. Topics in Emerging and Breakthrough Technologies.**

No description available.

**ENGN 2911G. Physical Design of Digital Integrated Circuits.**

This class investigates the physical principles and algorithmic methodologies that are used in physically designing and implementing state-of-the-art digital circuits and high-performance processors. We'll also survey the main available design implementation tools in the market and examine new directions for innovative solutions.

**ENGN 2911H. Computer Architecture.**

No description available.

**ENGN 2911J. Computational Electromagnetics.**

This course will introduce numerical techniques for solving practical and theoretical problems in optical science. Using MatLab and Mathematica, students will develop a toolkit for physical optics and build an intuition for wave propagation (e.g. transfer matrices), Fourier optics (beam propagation methods, normal mode analysis), light emission/absorption (surface- and cavity-enhanced lifetimes) as well as general finite difference schemes (frequency and time domain). Prerequisites: ENGN 0510 or PHYS 0470; APMA 0330 or APMA 0350; MATH 0520 or MATH 0540; or equivalent courses.

**ENGN 2911K. Biological Impacts of Nanomaterials.**

This course will emphasize advancements nanomaterials have made in several fields. In doing so, this course will cover fundamentals of nanomaterial synthesis and biological responses of nanomaterials if ingested, inhaled, or implanted. Biological concepts (immune response, cellular toxicity, etc.) will be combined with engineering concepts (manufacturing and property control) to understand the relationship between manufacturing and biological impacts of nanomaterials.

**ENGN 2911L. Environmental Technologies and Human Health.**

No description available.

**ENGN 2911P. Fate and Transport of Environmental Contaminants.**

Physical, chemical and biological processes governing the fate and transport of contaminants in the environment. Topics to be covered include solute transport, sorption processes, mass transfer, non-aqueous phase liquid (NAPL) entrapment and dissolution, abiotic and biotic transformations. A portion of the course will involve the use of analytical and numerical models to assess the impact of coupled processes on contaminant fate and transport.

**ENGN 2911R. Analytical Modeling for Biomechanical and Biomedical Systems.**

Students will develop fundamental understanding of important statistical, physical and mathematical modeling methods for biomedical engineering applications. Topics covered will include factorial design and analysis of experiments, modeling of infectious disease spread and dynamics, drug delivery, and cell and tissue mechanics. Students will learn statistical methods, factorial design of experiments, transport models, numerical methods, nonlinear and time dependent response, soft material modeling and applications of these methods in the biomedical systems. Students will also gain experience in critical analysis of scientific literature and effective oral and written communication. Prerequisite: APMA 0330 or equivalent.

**ENGN 2911T. Ultrafast Optical Phenomena.**

This course covers the generation, propagation, and measurement of short laser pulses, of duration less than one picosecond. Concepts include mode locking, the effects of dispersion, optical pulse amplification, and time-domain non-linear optical phenomena. Intended as an introduction to ultrafast phenomena for graduate students or advanced undergraduates; a basic understanding of electromagnetic waves and of quantum mechanics is assumed.

**ENGN 2911X. Reconfigurable Computing for Machine/Deep Learning.**

Driven by recent innovations in Field-Programmable Gate Arrays (FPGAs), reconfigurable computing offers unique ways to accelerate key algorithms. FPGAs offer a programmable logic fabric that provides the necessary hardware and communication assets to exploit parallelism opportunities arising in various algorithms. By mapping algorithms directly into programmable logic, FPGA accelerators can deliver 10X-100X performance increases over generic processors for a large range of application domains. The class will describe FPGA architectures, reconfigurable systems, languages, and design tools. We will in particular focus on accelerating key emerging algorithms in machine and deep learning. The class requires basic hardware and programming languages knowledge.

**ENGN 2911Y. Verification, Test, Synthesis.**

This course will provide an overview of algorithms and techniques in electronic design automation relating to the synthesis, verification, and test of digital integrated circuits. Some topics covered will include synthesis of two-level and multi-level circuits, logic minimization, representations of combinational and sequential circuits for design automation, ordered binary decision diagrams, equivalence checking, verification coverage, assertions, and automatic test pattern generation. Classic techniques and recent state-of-the-art research advances will both be discussed.

**ENGN 2911Z. Principles of Nano-Optics.**

The goal of this course is to help students build an intuition for light-matter interactions at the nanoscale, especially when optically active elements are located near complex surfaces. The course will begin with a review of the theoretical foundations of macroscopic electrodynamics, but will continue on to discuss specific experimental techniques for investigating microscopic behavior. Topics will include near-field optical microscopy, quantum dots and single molecule spectroscopy, surface plasmon polaritons, local density of states, and photonic crystals.

**ENGN 2912A. Toxicity of Nanoparticles.**

This course will emphasize advancements nanoparticles have made in several medical fields such as preventing, diagnosing, and treating various diseases. This course will integrate fundamental knowledge of toxicity into such applications. In particular, the course will cover current results in terms of nanoparticle applications and potential toxicity. Toxicity in such organs as the lungs, blood, kidneys, liver etc. will be emphasized. Biological concepts will be combined with engineering concepts to understand the relationship between manufacturing and nanoparticle toxicity.

**ENGN 2912B. Scientific Programming in C++.**

Introduction to the C++ language with examples from topics in numerical analysis, differential equations and finite elements. As a prerequisite, some programming knowledge, e.g., MATLAB projects. The course will cover the main C++ elements: data types; pointers; references; conditional expressions; streams; templates; Standard Template Library (STL); design and debugging techniques.

**ENGN 2912C. Future Directions in Computing: From Bio and Quantum to Nano and 3D.**

Silicon-based electronics is the foundation of computing devices. The computer industry is reaching an important milestone, where physical limits arising from using optical lithography manufacturing techniques can stop the evolution of computational power as predicted by Moore's law. In this class, we explore some of the alternatives that can be used for future computing devices. Topics covered include: quantum computing, bio-based computing, spin-based computing, nanotube-based computing, computing with light and 3D chips.

**ENGN 2912D. Networks and Network-on-Chip Design.**

Network-on-Chip communication fabrics are a very recent approach to multi-core system-on-chip design. This class will cover state-of-the-art research in the design and test of network-on-chip communication hardware and will compare these on-chip communication networks to more traditional networks. Additional aspects of system-of-chip design and test will also be explored. Prerequisites: ENGN 1630 and ENGN 1640 or equivalent experience in digital design.

**ENGN 2912E. Low Power VLSI System Design.**

This course deals with the design of digital systems for low power dissipation. Issues that will be addressed include CMOS power dissipation, analysis and design tools used for lower power digital circuits, design methodologies for low power CMOS circuits, low power architecture designs, and a discussion on future challenges in low power digital design. Prerequisites: familiarity with basic MOSFET structure and computer architecture principles; some circuit analysis helpful.

**ENGN 2912F. Soft Matter.**

This course is a special topics graduate course on soft matter, treating polymers, liquid crystals, surfactants, and colloids. The different topics will be unified by a common approach using statistical mechanics.

**ENGN 2912H. Interfacial Phenomena.**

This course is an introduction to mechanics of material interfaces. Particular cases considered are liquid surfaces (surface tension, contact line slip, electro-wetting, etc), lipid membranes, and thin elastic plates and shells. The course will cover detailed analyses of statics and dynamics of these interface. Classical and modern research papers related to these topics will form the motivation for the discussion. A unified treatment of these apparently disparate interfaces is presented to conclude the course. Prerequisites: ENGN 2010, 2020, 2210, or 2810.

**ENGN 2912I. Selected Topics in Physics of Locomotion (PHYS 2610E).**

Interested students must register for PHYS 2610E.

**ENGN 2912J. Asymptotic and Perturbation Methods.**

In this introductory course to perturbation methods, topics covered are inspired by problems in solid mechanics (e.g. ridges and kinks in thin plates), fluid mechanics (e.g. viscous boundary layers), electrical circuits (van der Pol oscillator), and include regular and singular perturbations, methods of strained coordinates, multiple scales, averaging, WKB, Laplace's method and the method of steepest descent for approximating integrals, and solutions of partial differential equations. Prerequisite: ENGN 2010 and 2020.

**ENGN 2912K. Mixed-Signal Electronic Design.**

ADCs, DACs, switched-capacitor circuits, noise and distortion. Circuit simulation and system design projects. Examples will be used from various biological sensing and instrumentation applications and recent scientific literature. Prerequisite: ENGN 1620 and 1630, or instructor permission. Enrollment limited to 20.

**ENGN 2912L. Topics in Bioelectronics.**

Seminar course covering subjects related to interactions between electronic and biological systems. Material includes energy harvesting, low-power electronic circuit design, biosensors and signal integrity, neuromorphic hardware, low-power wireless communications, and electrochemical methods. Emphasis on critical reading, technical analysis, presentation, and discussion. Design project.

**ENGN 2912M. Introduction to Quantum Computing and Physical Basics of Computing.**

Inspired by Richard Feynman's lectures in computation, this course explores how physical principles/limits have been shaping paradigms of computing, with a particular focus on quantum computing. Topics include but are not limited to: Physical limits of computing, coding and information theoretical foundations, reversible computing, with a particular focus on quantum computing. Open to Junior level and above.

**ENGN 2912P. Topics in Optimization.**

This course will cover various topics in discrete and continuous optimization. Topics include graph algorithms, dynamic programming, linear programming, convex optimization and coarse-to-fine methods. Prerequisites: basic theory of algorithms (at the level of an undergraduate algorithms course) and linear algebra.

**ENGN 2912Q. Coherence of Light in Nanooptics and Plasmonics.**

This class is a special topics graduate course focusing on advanced concepts in optics, including spatial and temporal coherence of optical fields, higher-order coherence phenomena in space-time domain, coherence effects at the nano- and micro-scale, optical and plasmonic interferometry using partially coherent sources. The subject is aimed at graduate and undergraduate students interested in optical communications, propagation of laser beams in biological or turbulent media, optical microscopy and imaging, as well as medical diagnostics. The concepts of "flipped teaching" and "learning by teaching" will be explored. Knowledge of advanced electricity and magnetism concepts is required.

**ENGN 2912R. Implantable Devices.**

This course will expose students to topics across the electrical and biological sciences through lecture, design, and laboratory exercises. Students will learn basic governing concepts of implantable device design, including those of tissue interfaces, power delivery, data transmission, hermetic packaging and biocompatibility, and in vivo evaluation through appropriate animal models including design of surgical approach. Teams will be formed early in the course and maintained throughout the semester. Successful teams will invent, design, build, and implant their unique device. Teams will have access and exposure to the Technology Ventures Office through guest lectures and individual meetings.

**ENGN 2912W. Two Phase Flows.**

Introduction of two-phase flows. Flow maps. Conservation Equations. Two-phase homogenous flows. Drift flux models. Interfacial dynamics. Motion of single particles, drops or bubbles. Bubble growth and collapse. Cavitation. Dusty gases. Granular flows. Sprays. The student who successfully completes this course will be able to understand the principles to two phase fluid mechanics; be able to start reading specialized literature of the subject; recognize the areas of active research; and develop research projects in this general area. Prerequisites: Advanced undergraduate fluid mechanics (e.g., ENGN 1860); graduate fluid mechanics course (e.g., ENGN 2810).

**ENGN 2920A. Complex Fluids: Particles and Interfaces.**

Introduces disperse systems (colloidal suspensions, emulsions, surfactant solutions, blood) with special attention to the thermodynamics and mechanics of interfaces. The course will bridge the physico-chemical and mechanical perspectives in the study of these materials. The intended audience is graduate students in Engineering, Physics, Chemistry, and Applied Mathematics. Prerequisite: We will sometimes use material from ENGN 2010/2020, such as differential equations, Fourier and Laplace transforms, elementary differential geometry, basic probability, vector calculus. Knowledge of basic solid/fluid mechanics will be helpful.

**ENGN 2920B. Mechanics of Energy Storage Materials.**

This course introduces the students to the mechanics aspects of battery materials and some of the current research problems. It will consist of a series of lectures by experts from academia and industry, which will cover the state of the art in lithium ion batteries, the role of mechanics in advancing the field, experimental studies, continuum modeling, ab initio modeling and practical design issues. There will be approximately one lecture each week (150 min); each lecture will focus on a specific aspect of battery materials, giving an in-depth treatment of scientific problems, the current state of understanding and future challenges.

**ENGN 2920D. Environmental Technologies and Human Health.**

This course explores interdisciplinary approaches to environmental safety and health drawing from Brown University faculty and other affiliated experts. Topics include history of environmental regulation and waste management; origin and chemistry of pollutants; fundamentals of toxicology, biological impacts of exposure and risk assessment; pollutant dispersion, transport and bioaccumulation; and remediation technologies. The overarching theme is the interactive role of life sciences, physical sciences, and social sciences in the development of solutions to manage or avoid the adverse human health impacts of legacy, current, and emerging technologies. Enrollment limited to 30.

**ENGN 2920E. Theory of Heterogeneous Materials.**

Heterogeneous materials appear in nature (polycrystals, wood, bone, blood), physical systems (un)stable colloidal suspensions) or in engineering applications (fiber-reinforced materials, reinforced rubber in tires). They usually exhibit remarkable physical properties superior to the properties of individual components. Despite being comprised at the microscopic length scale of multiple domains with different physical properties, these materials behave as homogeneous materials and can be assigned macroscopic (effective) physical material-like properties for practical purposes. The course will cover classical and recent analytical, numerical methods for computation of various physical properties (viscous/thermal/dielectric, viscoelastic, thermoelastic, piezoelectric, electrostrictive) of heterogeneous materials that exhibit (non)linear and/or coupled behaviors.

**ENGN 2930. Atomistic Modeling of Materials.**

This class describes the fundamentals of statistical mechanics with a focus on both traditional analytic methods and modern atomistic simulations methods. The class is divided in two parts. (i) Techniques used to calculate interactions at the atomic level are first covered, from simple interatomic potentials to quantum mechanical first-principles methods. (ii) Simulations techniques to sample atomic degrees of freedom for obtaining macroscopic quantities are then discussed, such as Monte Carlo and Molecular Dynamics. The tools presented in class are illustrated with ongoing examples that illustrate how these methods work in concert. Enrollment limited to 40 graduate students.

**ENGN 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**ENGN 2980. Special Projects, Reading, Research and Design.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ENGN 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**ENGN 2991. Characterizing Nanomaterial Structure.**

Characterizing nanomaterial structure is challenging as it requires multiple methods drawn from disciplines ranging from materials engineering to colloidal chemistry. This class will present analysis tools and will focus on their specific application to nanostructures, specifically those prepared via solution-phase chemistry. Material will be structured into four modules on (a) dimensions and morphology (b) internal structure (c) surface chemistry and (d) molecular analysis. Case studies will illustrate best practices for analyzing and reporting characterization data. This course provides students an opportunity to compare different methodologies as well as select not just sufficient, but appropriate, tools for a nanomaterial analysis problem.

Through teaching and research, the Brown University School of Public Health trains future public health leaders, advances knowledge on pressing health challenges, and enhances population health and well-being for all. Our students *learn* public health by *doing* public health.

The School's mission is based upon its commitment to serve the community, the nation, and the world by training future public health leaders and discovering and communicating innovative approaches to addressing public health challenges. Our commitment extends to enhancing population health and overall well-being by working with the broader public health community to:

- Advance knowledge on population health through an understanding of risk and protective factors throughout the human lifespan
- Develop evidence about effective medical and public health interventions
- Evaluate and disseminate strategies to encourage healthy behaviors
- Improve health care by identifying effective policies and practices

Accredited by the Council on Education for Public Health (CEPH) in 2016, the School offers programs in the following degrees: Master of Public Health (MPH); PhD in Behavioral and Social Health Sciences; AM, ScM and PhD in Biostatistics; ScM and the Certificate in Clinical and Translational Research; PhD in Epidemiology; ScM in Global Public Health; and PhD in Health Services Research. The School of Public Health offers two undergraduate concentrations: AB in Public Health and ScB in Statistics.

The School's small size and low student-to-faculty ratio translates to personal attention. From assistance in selecting coursework to advice on submitting grant proposals, faculty advisors in the School of Public Health work closely with students as they move through their studies.

For additional information regarding the School of Public Health and its programs of study and areas of research visit: [brown.edu/academics/public-health/about](http://brown.edu/academics/public-health/about)

## Public Health Concentration Requirements

Public Health is an interdisciplinary concentration through which students examine a variety of health issues, including population health and disease, health policy, cross-cultural and international aspects of health, the organizational and social structures through which health services are delivered and received, and the public health system. Courses in the concentration allow students to explore the ways in which the social, political, behavioral and biological sciences contribute to the understanding of patterns of population distributions of health and disease. The concentration also provides students with courses in basic research methods and statistics necessary for problem solving and critical thinking

in the emerging emphasis on evidence-based health care and public health.

### Requirements Effective Beginning Class of 2021

#### 1. Core Courses: (non-substitutable; 4 required for honors, 5 for non-honors)

PHP 0310	Health Care in the United States	1
	This course is best taken as a freshman or sophomore.	
PHP 0320	Introduction to Public Health	1
	This course is a prerequisite to the Fundamentals of Epidemiology (PHP 0850) and is best taken as a freshman or sophomore.	
PHP 0850	Fundamentals of Epidemiology	1
	This course is best taken by end of junior year before PHP 1910, Senior Seminar.	
PHP 1501	Essentials of Data Analysis	1
	This course is best taken by end of junior year before PHP 1910, Senior Seminar.	
PHP 1910	Public Health Senior Seminar	1
	This course is required for all non-honors seniors. PHP 0320 and PHP 0310 are required prerequisites.	

#### 2. Environmental Health and Policy (Select one of the following):

PHP 1101	World of Food: Personal to Global Perspectives on Nutrition, Agriculture and Policy	1
PHP 1700	Current Topics in Environmental Health	
PHP 1710	Climate Change and Human Health	
AMST 1700I	Community Engagement with Health and the Environment	
BIOL 1820	Environmental Health and Disease	
ENVS 0705	Equity and the Environment: Movements, Scholarship, Solutions	
ENVS 1580	Environmental Stewardship and Resilience in Urban Systems	

#### 3. Health, Health Care Systems and Policy (Select one of the following):

PHP 0650	From Manufacturer to Patient: Why is the Cost of Prescription Drugs So Darn High?	1
PHP 1070	The Burden of Disease in Developing Countries	
PHP 1100	Comparative Health Care Systems	
PHP 1500	Global Health Nutrition	
PHP 1520	Emergency Medical Systems: An Anatomy of Critical Performance	
PHP 1530	Case Studies in Public Health: The Role of Governments, Communities and Professions	
PHP 1802S	Human Security and Humanitarian Response: Increasing Effectiveness and Accountability	
PHP 1820	Designing Education for Better Prisoner and Community Health	
ECON 1360	Health Economics	
IAPA 1804E	Health Policy Challenges	

#### 4. Social and Behavioral Science for Prevention (Select one of the following):

PHP 1010	Doctors and Patients- Clinical Communication in Medicine	1
PHP 1400	HIV/AIDS in Africa: A Multidisciplinary Approach to Support HIV/AIDS Care and Treatment Programs	
PHP 1540	Alcohol Use and Misuse	

PHP 1600	Obesity in the 21st Century: Causes, Consequences and Countermeasures
PHP 1610	Tobacco, Disease and the Industry: cigs, e-cigs and more
PHP 1680U	Intersectionality and Health Inequities
PHP 1880	Meditation, Mindfulness and Health
PHP 1885	Measuring Mindfulness
PHP 1890	The Craving Mind
PHP 1920	Social Determinants of Health
PHP 2355	Designing and Evaluating Public Health Interventions
POLS 1740	Politics of Food

**5. Biology (Select one of the following) 1**

Note that AP Biology does not exempt students from this requirement. Most students will likely take BIOL 0200. Students who place out of BIOL 0200 with AP credit can choose one of the other four (4) courses.

BIOL 0200	The Foundation of Living Systems
BIOL 0470	Genetics
BIOL 0510	Introductory Microbiology
BIOL 0530	Principles of Immunology
BIOL 0800	Principles of Physiology

**6. Humanities/Fine Arts/Humanistic Social Sciences Course for Public Health (Select one of the following) 1**

AFRI 0550	African American Health Activism from Emancipation to AIDS
AFRI 1060W	Policy, Culture and Discourse that Shape Health and Access to Healthcare
AFRI 1060Z	Race, Sexuality, and Mental Disability History
AMST 1600C	The Anti-Trafficking Savior Complex: Saints, Sinners, and Modern-Day Slavery
AMST 1601	Health and Healing in American History
COST 0100	Introduction to Contemplative Studies
ENGL 1030C	Writing Science
ETHN 1750B	Treaty Rights and Food Fights: Eating Local in Indian Country
ETHN 1890J	Native American Environmental Health Movements
GNSS 0090C	Reproductive Health: Science and Politics
GNSS 0120	Introduction to Gender and Sexuality Studies
GNSS 1961H	Literary Imaginations of the Law: Human Rights and Literature
HISP 0490A	Spanish for Health Care Workers
HISP 0750Q	Health, Illness and Medicine in Spanish and Spanish American Literature and Film
HIST 0150H	Foods and Drugs in History
HIST 0270B	From the Columbian Exchange to Climate Change: Modern Global Environmental History
HIST 0286A	History of Medicine I: Medical Traditions in the Old World Before 1700
HIST 1080	Humanitarianism and Conflict in Africa
HIST 1830M	From Medieval Bedlam to Prozac Nation: Intimate Histories of Psychiatry and Self
HIST 1977I	Gender, Race, and Medicine in the Americas
HIST 1960Q	Medicine and Public Health in Africa
HIST 1972H	U.S. Human Rights in a Global Age
HMAN 1970G	International Perspectives on NGOs, Public Health, and Health Care Inequalities

LACA 1503H	Sexuality, Human Rights and Health: Latin American Perspective and Brazilian Experiences
PHIL 0060	Modern Science and Human Values
PHIL 0260	Philosophy of Social Science
PHIL 0390	Global Justice
POBS 1501E	Histories of Global Health from Lusophone Africa: Biomedical Actions in Angola, Mozambique, Guinea
TAPS 1281W	Artists and Scientists as Partners

**7. General Electives (Class of 2021: Select two) 2**

General electives may be selected from: A. All PHP and BIOL course offerings; B. the approved content area electives (#2, #3, #4, and #5) listed above; or C. the approved general electives listed below. No more than one (1) BIOL course can count as a general elective.

PHP 0030	Health of Hispaniola
PHP 0050	Pain and the Human Condition: Exploring the Science, Medicine, and Culture of Pain
PHP 1400	HIV/AIDS in Africa: A Multidisciplinary Approach to Support HIV/AIDS Care and Treatment Programs
PHP 1680I	Pathology to Power: Disability, Health and Community
AFRI 1060W	Policy, Culture and Discourse that Shape Health and Access to Healthcare
AMST 1601	Health and Healing in American History
AMST 1906P	Food in American Society and Culture
ANTH 0110	Anthropology and Global Social Problems: Environment, Development, and Governance
ANTH 0300	Culture and Health
ANTH 1020	AIDS in Global Perspective
ANTH 1242	Bioethics and Culture
ANTH 1300	Anthropology of Addictions and Recovery
ANTH 1310	International Health: Anthropological Perspectives
BIOL 0030	Principles of Nutrition (Human Biology/Physiology course)
BIOL 0040	Nutrition for Fitness and Physical Activity
BIOL 0140K	Conservation Medicine
BIOL 0180	The Biology of AIDS
BIOL 0190E	Botanical Roots of Modern Medicine
BIOL 0200	The Foundation of Living Systems (Human Biology/Physiology course)
BIOL 0470	Genetics (Human Biology/Physiology course)
BIOL 0530	Principles of Immunology (Human Biology/Physiology course)
BIOL 0800	Principles of Physiology (Human Biology/Physiology course)
BIOL 0860	Diet and Chronic Disease
BIOL 0920A	Controversies in Medicine (Human Biology/Physiology course)
BIOL 1920C	Social Contexts of Disease
CLPS 0700	Social Psychology
CLPS 1700	Abnormal Psychology
CLPS 1783	Nudge: How to Use Social Psychology to Create Social Change
ECON 0510	Development and the International Economy
EDUC 0800	Introduction to Human Development and Education

ENVS 0110	Humans, Nature, and the Environment: Addressing Environmental Change in the 21st Century
ENVS 0490	Environmental Science in a Changing World
ENVS 1105	Introduction to Environmental GIS
ETHN 1890J	Native American Environmental Health Movements
GNSS 0090C	Reproductive Health: Science and Politics
HMAN 1970G	International Perspectives on NGOs, Public Health, and Health Care Inequalities
NEUR 0010	The Brain: An Introduction to Neuroscience (Human Biology/Physiology course)
NEUR 0700	Psychoactive Drugs and Society
IAPA 1700E	Nonprofit Organizations
IAPA 1700F	Engaged Research Engaged Publics
IAPA 1803E	Social Entrepreneurship
POLS 1740	Politics of Food
SOC 0230	Sex, Gender, and Society
SOC 0300B	Environment and Society
SOC 0300E	HIV/AIDS: Politics, Culture and Society
SOC 0300F	Unequal From Birth: Child Health From a Social Perspective
SOC 0300K	Inequalities and Health
SOC 1250	Perceptions of Mental Illness
SOC 1315	Macro-Organizational Theory: Organizations in Social Context
SOC 1410	Aging and the Quality of Life
SOC 1540	Human Needs and Social Services
SOC 1550	Sociology of Medicine
SOC 1870D	Aging and Social Policy
SOC 1871H	Social Perspectives on HIV/AIDS
SOC 1871N	Military Health: The Quest for Healthy Violence
STS 0700B	Science and Social Controversy
STS 1700C	Science and Technology Policy in the Global South
UNIV 0090	Meditation and the Brain: Applications in Basic and Clinical Science
Total Credits	12

## Honors:

An Honors track is available for students who qualify. Honors track students do not enroll in PHP1910, Senior Seminar, during the Fall semester of their senior year, but rather are required to enroll in PHP 1980 PHP 1980 PHP 1980PHP 1980 for both semesters of their senior year to conduct research and write the honors thesis. Thus, thirteen courses are required for completion of the concentration requirements for an honors track student. As is required of all seniors, honors track students are expected to complete a Public Health Communications Module project as part of Fall semester of PHP1980. Please visit <https://www.brown.edu/academics/public-health/undergraduate/curriculum> for details or email Elizabeth Mellen ([elizabeth\\_mellen@brown.edu](mailto:elizabeth_mellen@brown.edu)) for more information.

**Study Abroad/Study Away:** Up to four courses taken elsewhere (study abroad or other transfer) may be applied to non-core courses (up to two per semester abroad). Meet with a concentration adviser to discuss and provide a syllabus for each course to be considered for transfer to your concentration plan.

## Statistics Concentration Requirements

The Bachelor of Science degree in Statistics is designed to provide foundations that include basic statistical concepts and methodologies, and to expose students to the role of statistical thinking and analysis in interdisciplinary research and in the public sphere. To ensure deep rigorous understanding of the foundations and main methods of analysis in statistics, the program is composed of three parts: a) foundations in mathematics and computing, combined with an introduction to statistical thinking and practice; b) four core courses on the fundamentals of statistical theory and data analysis; and c) more advanced material covering important areas of statistical methodology. A capstone project involving substantial data analysis or focused on methodology/theory is required. Students also have opportunities to acquire practical experience in study design, data management, and statistical analysis by working as undergraduate research assistants in projects in one of the participating academic departments or Research Centers at Brown.

The Concentration is based on several premises: that statistics is a scientific discipline in its own right, with specialized methodologies and body of knowledge; that it is essentially concerned with the art and science of data analysis; and that it is best taught in conjunction with specific, substantive applications. To this end, the Concentration is designed to provide foundations that include basic statistical concepts and methodologies, and to expose students to the role of statistical thinking and analysis in interdisciplinary research and in the public sphere. The Concentration prepares students for careers in industry and government, for graduate study in statistics or biostatistics and other sciences, as well as for professional study in law, medicine, business, or public administration. The undergraduate concentration guide is available here (<https://www.brown.edu/academics/public-health/biostatistics/undergraduate-statistics-concentration>).

The Undergraduate Concentration in Statistics is administered by the Department of Biostatistics and leads to a Sc.B. degree. To ensure deep rigorous understanding of the foundations and main methods of analysis in statistics, the program is composed of three parts. The first part entails foundations in mathematics and computing, combined with an introduction to statistical thinking and practice. The second part includes four core courses that provide a comprehensive account of the fundamentals of statistical theory and data analysis. The third part delves into more advanced material covering important areas of statistical methodology. In addition to the formal coursework, students are required to complete a capstone project that involves a substantial data analysis or a methodological/theoretical project. Students also have opportunities to acquire practical experience in study design, data management, and statistical analysis by working as undergraduate research assistants in projects in one of the participating academic Departments or Research Centers at Brown. **Please note that only the required Calculus courses may be accepted with P/F grades. All other required courses must be taken for a grade.**

The program requires **thirteen** one-semester courses. The required courses are as follows:

<b>LEVEL I: Foundations in Mathematics - Calculus</b>		2
MATH 0100	Introductory Calculus, Part II	
MATH 0180	Intermediate Calculus	
<b>LEVEL I - Foundations in Mathematics - Linear Algebra</b>		1
MATH 0520	Linear Algebra	
<b>Computing</b>		1
APMA 0160	Introduction to Scientific Computing	
or CSCI 0040	Introduction to Scientific Computing and Problem Solving	
<b>Introduction to Statistical Thinking and Practice</b>		1
PHP 1501	Essentials of Data Analysis	
<b>With the approval of the Director of the Statistics Concentration, one of the following courses may serve as replacement:</b>		
SOC 1100	Introductory Statistics for Social Research	
ECON 1620	Introduction to Econometrics	

APMA 0650	Essential Statistics	
BIOL 0495	Statistical Analysis of Biological Data	
EDUC 1110	Introductory Statistics for Education Research and Policy Analysis	
CLPS 0900	Statistical Methods	
<b>LEVEL II - Core Courses in Theory and Data Analysis</b>		<b>2</b>
APMA 1650 or APMA 1655	Statistical Inference I	
APMA 1660	Statistical Inference II	
<b>OR</b>		
MATH 1610	Probability	
MATH 1620	Mathematical Statistics	
<b>Introduction to Biostatistics</b>		<b>1</b>
PHP 1510	Principles of Biostatistics and Data Analysis	
<b>OR</b>		
PHP 2510	Principles of Biostatistics and Data Analysis	
<b>LEVEL III: Advanced Courses in Statistical Methods</b>		<b>2</b>
PHP 1560	Statistical Programming in R	
<b>OR</b>		
PHP 2560	Statistical Programming with R	
<b>AND</b>		
PHP 1511	Applied Regression Analysis	
<b>OR</b>		
PHP 2511	Applied Regression Analysis	
<b>Capstone Project</b>		<b>1</b>
PHP 1970	Independent Study	
<b>Electives in Social Science and Biostatistics (Students must choose 2)</b>		<b>2</b>
SOC 1120	Market and Social Surveys	
SOC 1340	Principles and Methods of Geographic Information Systems	
SOC 2230	Techniques of Demographic Analysis	
CSCI 1420	Machine Learning	
CSCI 1810	Computational Molecular Biology	
CSCI 1820	Algorithmic Foundations of Computational Biology	
CSCI 1951A	Data Science	
PHP 0850	Fundamentals of Epidemiology	
PHP 2030	Clinical Trials Methodology	
PHP 2120	Introduction to Methods in Epidemiologic Research	
PHP 2200	Intermediate Methods in Epidemiologic Research	
PHP 2515	Fundamentals of Probability and Statistical Inference	
PHP 2520	Statistical Inference I	
PHP 2530	Bayesian Statistical Methods	
PHP 2550	Practical Data Analysis	
PHP 2580	Statistical Inference II	
PHP 2602	Analysis of Lifetime Data	
PHP 2601	Linear Models	
PHP 2604	Statistical Methods for Spatial Data	
PHP 2610	Causal Inference and Missing Data	
PHP 2620	Statistical Methods in Bioinformatics, I	
APMA 1070	Quantitative Models of Biological Systems	
APMA 1080	Inference in Genomics and Molecular Biology	
APMA 1200	Operations Research: Probabilistic Models	

APMA 1690	Computational Probability and Statistics	
APMA 1710	Information Theory	
APMA 1740	Recent Applications of Probability and Statistics	
APMA 1860	Graphs and Networks	
APMA 2610	Recent Applications of Probability and Statistics	
ENGN 2520	Pattern Recognition and Machine Learning	
CLPS 1292	Introduction to Programming for the Mind, Brain and Behavior	
CLPS 1492	Computational Cognitive Neuroscience	
ECON 1360	Health Economics	
ECON 1630	Mathematical Econometrics I	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
MATH 1810A	Applied Algebraic Topology	
Other Analytical/Computational/ Statistical courses with the approval of the Director of the Statistics Concentration		
<b>Total Credits</b>		<b>13</b>

Prospective students will be able to obtain Advanced Placement credit for the requirements in mathematics. Students who have already completed an introductory course in statistics will be granted permission to proceed to Level II core courses if they meet the prerequisites in mathematics and computing.

**PHP 0100:** As part of the capstone course or thesis, students should complete an online course, PHP 0100, at their own pace. This course is a requirement and is meant to give a broad overview of public health and it allows students to see different areas in public health where statistics is being used. The course does not require any additional credit and is completed as part of the independent study, PHP 1970/1980. Students who are in a double concentration in public health are exempt from this course.

**Senior Thesis:** A senior honors thesis is not a requirement for graduation, but concentrators who choose to write one are required to write a manuscript that describes a major project of statistical data analysis that they performed or a simulation study to evaluate the performance of a statistical method. Students that decide to write an honor thesis will generally integrate their capstone project into their thesis. Generally, writing a senior thesis includes two semesters of independent study (PHP 1980), the capstone project may serve as one of those.

**Honors:** Statistics requires the completion of a senior thesis and a superior record in the program.

**Study Abroad/Study Away:** Up to two courses taken elsewhere (study abroad or other transfer) may be applied to required courses. Meet with a concentration adviser to discuss; provide a syllabus for each course to be considered for transfer to your concentration plan.

The program is administered by the Department of Biostatistics, located at 121 South Main Street, 7th floor.

For additional information please contact: Roe Gutman, Box G-S-121-7; Telephone: 401-863-2682; Fax: 401-863-9182; e-mail: [rgutman@stat.brown.edu](mailto:rgutman@stat.brown.edu)

## Master of Public Health Graduate Program

The Brown MPH has a singular purpose: to train leaders in public health who are armed with the skills to conduct research, bring about policy change, and positively affect the health of populations. The program includes an internship, a thesis, and the option of customizing your MPH with one of several concentrations.

The MPH Program has a 14 course requirement (12 standard courses and 2 half courses). In addition to the core courses listed below (4 standard and 2 half courses), MPH students must complete 5 concentration courses and 3 general MPH electives. For further information on program

curriculum, please visit: <https://www.brown.edu/academics/public-health/ MPH/curriculum>.

## MPH Program Core Course Requirements

### MPH Core Course Requirements

Students must complete one of the following 2 course sequences in Biostatistics and Applied Data Analysis:

Sequence 1:

PHP 2507	Biostatistics and Applied Data Analysis I
PHP 2508	BioStatistics and Data Analysis II

Sequence 2:

PHP 2510	Principles of Biostatistics and Data Analysis
PHP 2511	Applied Regression Analysis

Students must complete one of the following Epidemiology courses:

PHP 2120	Introduction to Methods in Epidemiologic Research
PHP 2150	Foundations in Epidemiologic Research Methods

Students must complete the following course:

PHP 2355	Designing and Evaluating Public Health Interventions
----------	--

Students must complete the following two half credit courses:

PHP 2071	Applied Public Health: Systems and Practice
PHP 2072	Applied Public Health: Policy, leadership and communication

A five-year integrated Undergraduate/MPH (UG/MPH) program is also offered. This rigorous program in professional public health education is open to Brown undergraduates in any concentration. Students accepted into the program will complete the degree requirements for both their undergraduate degree and an MPH degree in a five-year period. Students must take 13 total course credits toward the MPH (5.5 during their first four years and 7.5 courses in the fifth year). For more information, please visit: <https://www.brown.edu/academics/public-health/ MPH/ugmph>.

## Dual Degree Program: Master of Public Health (MPH) and Master of Public Affairs (MPA)

The School of Public Health and the Watson Institute for International and Public Affairs also offer a dual-degree Master of Public Health (MPH) and Master of Public Affairs (MPA) program. Emphasizing a learning by doing approach, this rigorous, program will offer highly qualified applicants the opportunity to gain training in public health and public policy to prepare them to address the critical health policy issues in the United States and throughout the world. The dual degree program starts in summer and includes 21 courses (13 full courses and 8 half courses) as well as an internship, a Global Policy Experience (required, non-credit) and a master's thesis. Students will benefit from the rich academic resources at the Watson Institute and the School of Public Health, as well as their extensive applied learning programs in Rhode Island, as well as throughout the United States and the world.

Program and admissions information can be found here: <https://www.brown.edu/academics/public-health/ MPH/ MPH-mpa>

## Biostatistics Graduate Program

The graduate programs in Biostatistics offers comprehensive course work leading to a Master of Science (Sc.M.); a Master of Arts (A.M.) degree for students in the 5th-year Master's program and Brown's Open Graduate Education Program; and the Doctor of Philosophy (Ph.D.) degrees. The graduate programs in Biostatistics are designed to provide training in theory, methodology, and practice of statistics in biology, public health, and medical science. The programs provide comprehensive training in theory and methods of biostatistics, but is highly interdisciplinary and requires students to acquire expertise in a field of application. The Ph.D.

program is intended to enable graduates to pursue independent programs of research.

Full details for the Biostatistics Doctoral Program can be found at <https://www.brown.edu/academics/public-health/ biostats/academics/doctoral-program>.

The Sc.M. program provides training for application of advanced methodology in professional and academic settings. The Department of Biostatistics offers a 5th-Year Master's (<https://www.brown.edu/academics/public-health/ biostats/academics/masters-program/5th-year>) (A.M. degree) which is available to Brown Undergraduates. Required courses for the Biostatistics Master's degree program are listed below. Additional details can be found on the Department's webpage: <https://www.brown.edu/ biostatistics>

For more information on admission and program requirements, please visit <https://www.brown.edu/academics/public-health/ admissions>

### Required Courses

PHP 2515	Fundamentals of Probability and Statistical Inference (OR )	1
PHP 2520	Statistical Inference I	
PHP 2514	Applied Generalized Linear Models	1
PHP 2516	Applied Longitudinal Data Analysis	.5
PHP 2517	Applied Multilevel Data Analysis	.5
PHP 2550	Practical Data Analysis	1
PHP 2560	Statistical Programming with R	1
PHP 2610	Causal Inference and Missing Data	1
PHP 2650	Statistical Learning and Big Data	1

### Electives (3 Courses)

PHP 2030	Clinical Trials Methodology	1
PHP 2530	Bayesian Statistical Methods	1
PHP 2580	Statistical Inference II	1
PHP 2601	Linear Models	1
PHP 2602	Analysis of Lifetime Data	1
PHP 2605	Generalized Linear Models	1
PHP 2620	Statistical Methods in Bioinformatics, I	1
PHP 2980	Graduate Independent Study and Thesis Research	1-5
PHP 2120	Introduction to Methods in Epidemiologic Research	1
PHP 2561	Methods in Informatics and Data Science for Health	1
CSCI 1420	Machine Learning	1
CSCI 1470	Deep Learning	1
CSCI 1570	Design and Analysis of Algorithms	1
CSCI 1810	Computational Molecular Biology	1

## Behavioral and Social Health Sciences Graduate Program

The Doctor of Philosophy (Ph.D.) program in Behavioral and Social Health Sciences is an interdisciplinary graduate program that trains graduate students who are interested in (a) analyzing the complex behavioral and social determinants of public health, (b) developing interventions to change behaviors and improve social contexts related to public health, and (c) employing behavioral and social science theory and methods to understand contemporary health problems and to develop interventions that improve the health of individuals and populations. The program puts substantive focus on diet, physical activity and obesity; alcohol/drug use and misuse; smoking/tobacco use and misuse; HIV and sexual health risk behaviors; chronic disease prevention and management; global health; LGBTQI+ health; mindfulness in health; and health disparities and culture.

For more information on admission and program requirements, please visit:

<http://www.brown.edu/academics/gradschool/programs/behavioral-and-social-health-sciences>

The Department is no longer accepting applications for the Sc.M. in Behavioral and Social Health Sciences. Students interested in studying Health Behavior at the master's level are strongly encouraged to apply to our research-intensive MPH program.

## Master's in BSHS Required Core Courses

### Master's in BSHS Required Core Courses

PHP 2300	Research Methods in Behavioral Science
PHP 2340	Behavioral and Social Science Theory for Health Promotion
PHP 2360	Developing + Testing Theory-Driven, Evidence Based Psychosocial and Behavioral Health Interventions
PHP 2380	Health Communication
PHP 2390	Quantitative Methods for Behavioral and Social Sciences Intervention Research

### Electives: Must take 3 from this list <sup>1</sup>

PHP 1070	The Burden of Disease in Developing Countries
ANTH 1300	Anthropology of Addictions and Recovery
PHP 1320	Survey Research in Health Care
PHP 1400	HIV/AIDS in Africa: A Multidisciplinary Approach to Support HIV/AIDS Care and Treatment Programs
PHP 1500	Global Health Nutrition
PHP 1530	Case Studies in Public Health: The Role of Governments, Communities and Professions
PHP 1540	Alcohol Use and Misuse
PHP 1600	Obesity in the 21st Century: Causes, Consequences and Countermeasures
PHP 1740	Principles of Health Behavior and Health Promotion Interventions <sup>2</sup>
PHP 1880	Meditation, Mindfulness and Health
PHP 1920	Social Determinants of Health
PHP 2030	Clinical Trials Methodology
PHP 2040	Survey Research Methods
PHP 2060	Qualitative Methods in Health Research
PHP 2080	Public Health Law and Ethics
PHP 2120	Introduction to Methods in Epidemiologic Research
PHP 2130	Human Biology for Public Health
PHP 2170	Injury As A Public Health Problem
PHP 2220A	Epidemiology of Violence and Its Consequences
PHP 2220C	Perinatal Epidemiology: Women and Infants' Health during Pregnancy in a Global Context
PHP 2325	Place Matters: Exploring Community-Level Contexts on Health Behaviors, Outcomes and Disparities
PHP 2365	Public Health Issues in LGBT Populations
PHP 2370	Etiology of Substance Use Disorders
PHP 2371	Psychosocial and Pharmacologic Treatment of Substance Use Disorders
PHP 2400	The U.S. Health Care System: Case Studies in Financing, Delivery, Regulation and Public Health
PHP 2980	Graduate Independent Study and Thesis Research <sup>3</sup>

<sup>1</sup> Additional electives may be considered and are subject to approval by the BSS curriculum committee. Students wishing to take an elective that is not listed should consult with their adviser and complete a Curriculum Appeal Form.

<sup>2</sup> This course has substantial overlap with PHP 2360; please consult your adviser.

<sup>3</sup> Students have the option of enrolling in a Graduate Independent Study as an elective course under the instruction of their thesis adviser. Please choose the section that has your adviser listed as the instructor and have an override code ready in order to register.

## Clinical and Translational Research Graduate Program

The Master of Science in Clinical and Translational Research (CTR) is designed primarily for physicians, doctorally-trained basic scientists, and students in doctoral programs or medical school. The goal of the Master's in Clinical and Translational Research Program is to train clinicians and basic scientists to extend basic scientific research into the clinical arena, ultimately leading to improvements in individual and population health. By translating basic research into improved clinical outcomes, researchers and clinicians are able to provide new treatments to patients more efficiently and quickly.

Full details on the Master of Science in Clinical and Translational Research, including the most up to date list of course requirements, can be found at <https://www.brown.edu/academics/public-health/ctr/masters>

For more information on admission, please visit: <https://www.brown.edu/academics/public-health/admissions>

## Master's in CTR Requirements

### Master's in CTR Requirements

Intro to Research Methods (Students must complete one of the following two courses)

PHP 2120 Introduction to Methods in Epidemiologic Research

PHP 2150 Foundations in Epidemiologic Research Methods

Biostatistics and Applied Data Analysis (Students must complete one of the following 2 courses sequences)

Sequence 1:

PHP 2507 Biostatistics and Applied Data Analysis I (Sequence 1:)

PHP 2508 BioStatistics and Data Analysis II

Or

Sequence 2:

PHP 2510 Principles of Biostatistics and Data Analysis

PHP 2511 Applied Regression Analysis

Advanced Research Methods (Students must complete two of the following courses)

PHP 1560 Statistical Programming in R

PHP 2030 Clinical Trials Methodology

PHP 2040 Survey Research Methods

PHP 2060 Qualitative Methods in Health Research

PHP 2180 Interpretation and Application of Epidemiology

PHP 2410E Medicare: A Data Based Policy Examination

PHP 2415 Introduction to Evidence-based Medicine

PHP 2430 Analysis of Population Based Datasets

PHP 2465A Introduction to Health Decision Analysis

Scientific Writing (Students must complete the following course)

PHP 2090 Research Grant Writing for Public Health

Topics in CTR (Students must enroll in this half credit course two times to fulfill the one credit requirement)

PHP 2470	Topics in Clinical, Translational and Health Services Research
----------	--

Students must complete two CTR electives found at <https://www.brown.edu/academics/public-health/education-training/masters/clinical-and-translational-research/scm-ctr-electives>

The Certificate in Clinical and Translational Research is designed for trainees who need a more structured and intensive experience than can be obtained from taking one or two courses as a special student, but do not need or are not in a position to pursue the full Master's Degree. Students in the Certificate Program in Clinical and Translational Research must complete four courses. Full details on the Certificate in CTR can be found at <https://www.brown.edu/academics/public-health/ctr/certificate>.

## Certificate in CTR Course Requirements

### Certificate in CTR Course Requirements

Research Methods (Students must complete one of the following courses)

PHP 2120	Introduction to Methods in Epidemiologic Research
----------	---

PHP 2150	Foundations in Epidemiologic Research Methods
----------	---

PHP 2300	Research Methods in Behavioral Science
----------	--

Biostatistics and Applied Data Analysis (Students must complete both of the following courses)

PHP 2507	Biostatistics and Applied Data Analysis I
----------	---

PHP 2508	BioStatistics and Data Analysis II
----------	------------------------------------

Students must complete one elective from the list found at <https://www.brown.edu/academics/public-health/ctr/certificate>

## Epidemiology Graduate Program

The graduate program in Epidemiology offers comprehensive course work leading to the Doctor of Philosophy (Ph.D.) degree. Using sophisticated study designs, statistical analyses, field investigations, and laboratory techniques, epidemiology students investigate the multiple causes of a disease, disease distribution (geographic, ecological, and social), methods of transmission, and measures for control and prevention.

The Department is no longer accepting applications for the Sc.M. in Epidemiology. Students interested in studying Epidemiology at the master's level are strongly encouraged to apply to our research-intensive MPH program.

For more information on admission and program requirements, please visit: <http://www.brown.edu/academics/gradschool/programs/epidemiology-0>

## Master's in Epidemiology Required Courses:

### Master's in Epidemiology Required Courses:

PHP 2150	Foundations in Epidemiologic Research Methods
----------	---

PHP 2200	Intermediate Methods in Epidemiologic Research
----------	--

PHP 2130	Human Biology for Public Health
----------	---------------------------------

### AND at least two of the following:

PHP 2030	Clinical Trials Methodology
----------	-----------------------------

PHP 2040	Survey Research Methods
----------	-------------------------

PHP 2180	Interpretation and Application of Epidemiology
----------	--

PHP 2220B	Nutritional Epidemiology
-----------	--------------------------

PHP 2250	Advanced Quantitative Methods in Epidemiologic Research
----------	---

PHP 2260	Applied Epidemiologic Data Analysis
----------	-------------------------------------

PHP 2430	Analysis of Population Based Datasets
----------	---------------------------------------

PHP 2440	Introduction to Pharmacoepidemiology
----------	--------------------------------------

PHP 2455A	Health Services Research Methods I
-----------	------------------------------------

PHP 2455B	Health Services Research Methods II
-----------	-------------------------------------

PHP 2465A	Introduction to Health Decision Analysis
-----------	--

PHP 2520	Statistical Inference I
----------	-------------------------

PHP 2530	Bayesian Statistical Methods
----------	------------------------------

PHP 2540	Advanced Methods for Multivariate Analysis
----------	--

PHP 2550	Practical Data Analysis
----------	-------------------------

PHP 2560	Statistical Programming with R
----------	--------------------------------

PHP 2601	Linear Models
----------	---------------

PHP 2602	Analysis of Lifetime Data
----------	---------------------------

PHP 2603	Analysis of Longitudinal Data
----------	-------------------------------

PHP 2610	Causal Inference and Missing Data
----------	-----------------------------------

PHP 2620	Statistical Methods in Bioinformatics, I
----------	--

### Required Biostatistics Courses:

PHP 2510	Principles of Biostatistics and Data Analysis
----------	---

PHP 2511	Applied Regression Analysis
----------	-----------------------------

The remaining courses can be selected from among various offerings in Public Health, Sociology, Environmental Studies or related disciplines with approval from the student's academic advisor.

## Health Services Research Graduate Program

The graduate program in Health Services Research offers comprehensive course work leading to the Doctor of Philosophy (Ph.D.) degree. The program seeks to develop scientists experienced in the use of state-of-the-art experimental and non-experimental research methods to investigate how people obtain access to health care, the components and impacts of health care costs, and what happens to patients as a result of care. Health services research aims to identify the most effective ways to organize, manage, finance, and deliver high quality care to benefit population health.

For more information on admission and program requirements, please visit: <https://www.brown.edu/graduateprograms/health-services-research-phd>

## Global Public Health Graduate Program

As with all educational programs in the School of Public Health, our Global Public Health ScM students learn public health by doing public health. Course work comes alive during an international fieldwork experience that fosters deep engagement and understanding of a global public health location. Academic and hands-on experiences culminate with a thesis project. Most full-time students complete the degree in two years, fulfilling the fieldwork requirement during the summer between academic years 1 and 2. The degree may be completed on a part-time basis.

- 12 courses, including 9 required courses and 3 electives
- 8-week international fieldwork experience
- Thesis project

For further information on admission and program requirements, please visit: <https://www.brown.edu/academics/gradschool/programs/global-public-health>

PHP 2710	Interdisciplinary Perspectives on Disability and Death in the Global South	1
----------	--	---

PHP 2730	Including the Excluded: Global Health Ethics	1
----------	--	---

PHP 2507	Biostatistics and Applied Data Analysis I	1
----------	---	---

PHP 2120	Introduction to Methods in Epidemiologic Research	1
----------	---	---

PHP 2720	Implementing Public Health Programs and Interventions in the Global South	1
----------	---	---

PHP 2740	Learning Global Health by Doing Global Health: Global Health Thesis Seminar	1
PHP 2508	BioStatistics and Data Analysis II	1
PHP 2750	Communicating and Disseminating Global Public Health Research	1
PHP 2760	Critical Perspectives in Global Health	1
Plus 3 electives		3
Total Credits		12

## Courses

### PHP 0030. Health of Hispaniola.

Two developing countries, Dominican Republic and Haiti, have widely differing health outcomes despite centuries of shared experience on the Caribbean Island of Hispaniola. This course will examine the history, politics, economics, culture, international relations, demography, and geography, as well as epidemiology and health services, to demonstrate that multiple factors, both recent and long-standing, determine the present health of these populations. Enrollment limited to 19 first year students. Instructor permission required.

### PHP 0040. Addiction: The Causes, Cures and Consequences of Substance Abuse in Modern Society.

Addiction has been recognized by the psychological and medical community as a chronic, physical disease, affecting the body in ways which mirror the mechanisms of other neurological disorders. However, despite definitive research suggesting the genetic and physical roots of addiction disorders, the disease of addiction still faces significant prejudice from laws and societies seeking to place blame upon addicts themselves. Stereotypes and misconceptions that cast addicts as morally corrupt deviants lacking in will power still pervade cultural and political discourse, creating and maintaining powerful stigmas that prohibit addicts and their families from seeking care. Enrollment limited to 19 first year students.

### PHP 0050. Pain and the Human Condition: Exploring the Science, Medicine, and Culture of Pain.

Pain is a universal human experience, yet it is highly subjective. For most, pain represents an occasionally unpleasant, self-limited experience. However, for others, chronic pain persists beyond the recovery from an injury or as a result of a chronic health condition. Persons with chronic pain often describe their pain as permeating every aspect of their lives. While an active area of research, pain remains a significant challenge to the individual seeking treatment, the health care provider and society. This multidisciplinary course introduces students to scientific, medical, and public health aspects of pain and explores personal narratives and cultural meanings of pain. Enrollment limited to 19 first year students.

### PHP 0100. First year seminar: Statistics is everywhere.

Statistics is the universal language behind data-enabled decision making. Examples include Google's page ranking, Amazon's customer recommendations, weather prediction, medical care and political campaign strategy. This seminar will expose students to a variety of problems encountered in the media, in science and in life for which solutions require analysis of and drawing inferences from data. We will introduce basic concepts such as randomness, probability, variation, statistical significance, accuracy, bias and precision. The course will discuss statistical problems from reading assignments and material identified by the students. We will use simulation to illustrate basic concepts, though previous programming experience is not required.

### PHP 0310. Health Care in the United States.

Introduction to the health care delivery system. An overview of the U.S. health care financing, delivery and regulatory system. Considers the interaction between paying for and providing and assuring the quality of health services; changes in one component of the system inevitably affect the others. Addresses the balance between employer funded health insurance, publicly funded health insurance and the consequences of not being insured. Seven discussion sections arranged during the semester. Open to undergraduates only.

### PHP 0320. Introduction to Public Health.

An introductory overview of the U.S. Public Health System with an emphasis on the core functions of public health, challenges and strategies for working with communities, and specific health issues that impact the health of the population. Presents a comprehensive overview of the environmental and behavior factors associated with health promotion and disease prevention.

### PHP 0650. From Manufacturer to Patient: Why is the Cost of Prescription Drugs So Darn High?.

In 2015, estimates of drug spend in the United States was about \$457 billion and could be as high as \$610 billion by 2021. The reasons for the continued escalating costs of prescription drugs are unclear. In this course we will examine the complex chain of discounts, rebates and markups that impact the price of a prescription drug from the manufacturer's list price to the time it is dispensed to the patient. We will examine the role of major stakeholders in the drug supply chain including the manufacturer, wholesalers and distributors, pharmacy benefit managers and health plans. PHP 0310, Healthcare in the United States, is a prerequisite. Students who feel they have adequate background but have not taken PHP 0310 should contact instructor for override. Students must have basic knowledge of terms associated with managed care and healthcare issues routinely written about or featured in the news.

### PHP 0850. Fundamentals of Epidemiology.

As the cornerstone of public health, a strong foundation in epidemiology provides students with the ability to investigate, clarify and criticize claims of disease causation. This course provides students with a foundation in basic epidemiologic concepts and methods. Key measures of disease occurrence and effects used in epidemiology will be discussed; strengths and weaknesses of alternative epidemiologic study designs will be examined. Interpreting epidemiologic evidence to inform public health policy and practice will be emphasized throughout the course.

Open to Public Health concentrators and others by permission; Class limit 80.

### PHP 1010. Doctors and Patients- Clinical Communication in Medicine.

Communication is central to medical practice and interpersonal relationships between patients and physicians can be powerful curative agents. This course reviews theory and research on physician-patient communication. Lectures, readings, discussions and exercises are enhanced by direct observation in clinical settings. Appropriate for students interested in communication sciences, health psychology, health education, pre-med and other clinical training, and medical anthropology. NOTE: Classes are on Mondays and Wednesdays 4-630 pm - two FRIDAY classes are scheduled at the beginning and end of the semester. Remaining class time fulfilled through clinical shadowing scheduled when students and doctors are available. Contact instructor for schedule.

### PHP 1050. Science and Power - The Corruption of Public Health.

This course seeks to expand the study of bioethics beyond its usual boundaries by engaging students in a semester-long discussion about health, science, ethics, and power. We will focus on corporate influence and corruption in medicine and other topics that relate to medical and public health decision making. The topics we focus on include: the use of human research subjects, the corporate use and corruption of science, health and development, and the science of gender and reproduction. We use readings, movies and YouTube presentations in bioethics, cultural theory, public health and history as a basis for addressing these questions.

### PHP 1070. The Burden of Disease in Developing Countries.

Defines and critically examines environmental, epidemiologic, demographic, biomedical, and anthropological perspectives on health and disease in developing countries. Emphasis on changes in the underlying causes of morbidity and mortality during economic development. Focuses on the biosocial ecology of diseases. Required major term paper worth 50% of final grade is scholarly centerpiece of course. Weekly discussion sections and small group research projects supplement the two exams and term paper. Guest lecturers cover different diseases and public health perspectives. Enrollment limited to 65.

**PHP 1100. Comparative Health Care Systems.**

Focuses on principles of national health system organization and cross-national comparative analysis. Emphasizes application of comparative models to the analysis of health and health-related systems among nations at varying levels of economic development and health care reform. Addresses research questions related to population health and systems' performance. Questionnaire completion required for Freshman and Sophomore students. Enrollment limited to 30.

**PHP 1101. World of Food: Personal to Global Perspectives on Nutrition, Agriculture and Policy.**

This course explores food and nutrition in the US and around the world through the lens of public health, economics, and agriculture. The online setting intentionally requires students to engage in and learn about their own community from perspectives likely not previously noticed. Students will read from many sources; will review documentary films; and will write for several audiences.

At the completion of this course, students will:

- Describe how nutrients are consumed through foods
- Explore food consumption in the US and abroad
- Describe US agricultural production techniques
- Propose policy changes to the current food system

**PHP 1160. The Global Burden of Mental Illness: A Public Health Approach.**

Provides an introduction to the classification, epidemiology, etiology, treatment and potential prevention of psychiatric disorders from a population perspective. Reviews the magnitude and social burden associated with mental disorders worldwide and opportunities to enhance prevention and treatment.

Covers concepts and methods used to study mental illness at the population level, including definitions of "normality" and "pathology", current classification systems and measurement approaches to assess psychopathology and severity and cross-cultural issues.

Covers the prevalence, risk factors, and etiology of major disorders of children, adolescents and adults, including autism spectrum disorders, attention deficit disorders, mood and anxiety disorders, schizophrenia and substance use disorders. PHP 0850 OR prior coursework in psychology, epidemiology, sociology or related fields.

**PHP 1320. Survey Research in Health Care.**

An introduction to the methodology of survey research as it is conducted by social scientists and epidemiologists. Provides an overview of all aspects of study design and instrument development as well as an introduction to statistical analysis of survey data. Prerequisite: PHP 0320. Students should fulfill the department's statistics requirement prior to taking, or concurrently with, this course.

**PHP 1400. HIV/AIDS in Africa: A Multidisciplinary Approach to Support HIV/AIDS Care and Treatment Programs.**

The course is intended to challenge students from different disciplines to develop strategies to address the challenges of establishing and sustaining HIV/AIDS care and treatment programs in Africa. The course will begin with a general introduction to HIV/AIDS to provide a foundation wherein students will obtain a basic scientific and sociological understanding of the disease. Discussion topics on: the impact of AIDS, introducing antiretroviral therapy in Africa, monitoring and evaluating ARV therapy scale up and developing a country wide plan for a national laboratory system to support HIV/AIDS care and treatment will be facilitated through the use of case studies. Enrollment limited to 25 juniors and seniors. Graduate students with permission of instructor.

**PHP 1500. Global Health Nutrition.**

The course focuses on nutritional status influences on population health of low and middle income countries. It covers both 1) undernutrition, including protein-calorie malnutrition and specific micronutrient deficiencies; and 2) overnutrition, including obesity. It covers morbidity and mortality associated with under- and overnutrition. Nutritional aspects of maternal and child health and the association of nutritional exposures early in life and later adult health are emphasized. Specific areas include nutritional status measurement, including body size and composition, dietary intake and physical activity, as well as household, community, and national, socioeconomic and political factors. Prerequisite: PHP 1070, 2120, 2150, or BIOL 0030.

**PHP 1501. Essentials of Data Analysis.**

This course covers the basic concepts of statistics and the statistical methods commonly used in the social sciences and public health with an emphasis on applications to real data. The first half of the course introduces descriptive statistics and the inferential statistical methods of confidence intervals and significance tests. The second half introduces bivariate and multivariate methods, emphasizing contingency table analysis, regression, and analysis of variance. This is designed to be a first course in Statistics. The course is intended for Public Health or Statistics concentrators. Others can register with instructor's permission. There are no prerequisites.

**PHP 1510. Principles of Biostatistics and Data Analysis.**

This course is intended to provide a basic foundation in the methods and applications of biostatistics, and is geared towards the students whose fields of study include a substantial statistical or quantitative component. Ideally, this course is the first in a two-part sequence (the sequel being PHP 1511/2511: Applied Regression ), designed to provide students in the public health, biological and life sciences with broad-based exposure to modern methods of biostatistical inference, in addition to an understanding of underlying mathematical principles and motivations.

**PHP 1511. Applied Regression Analysis.**

This course provides a survey of regression techniques for outcomes common in public health data including continuous, binary, count and survival data. Emphasis is on developing a conceptual understanding of the application of these techniques to solving problems, rather than to the numerical details. Extensive use of the computer will be made for analysis of datasets.

**PHP 1520. Emergency Medical Systems: An Anatomy of Critical Performance.**

Problems and issues surrounding delivery of emergency medical services in U.S. Topics: cost of illness; rationing health care; living wills; malpractice and its effects; effects of alcohol and other risk behavior. Priority to public health concentrators and PLME students pursuing MPH degree. Enrollment limited to 60.

**PHP 1530. Case Studies in Public Health: The Role of Governments, Communities and Professions.**

This course provides an integrated knowledge of the public health's development, policy, practice and infrastructure and its relationship to medical care, social services and the environment. The matrix approach juxtaposes public health content (e.g., infectious disease) and public health tools (e.g., behavioral theory, policy/advocacy/epidemiology/quality improvement/program planning) using case studies. It aims to strengthen students' capacity to apply a population-based viewpoint to public health practice. Prerequisite: PHP 0320. Enrollment limited to 40.

**PHP 1540. Alcohol Use and Misuse.**

Reviews the epidemiology of alcohol use, abuse, and dependence and examines its neurobiological and behavioral underpinnings. Covers etiology including physiological, genetic, psychological and social cultural influences, and prevention, brief intervention and treatment considerations. Course background in psychology, sociology, or public health is recommended. Recommended prerequisites: PHP 0320 and CLPS 0010. Enrollment limited to 20 juniors, seniors, and graduate students.

**PHP 1560. Statistical Programming in R.**

Statistical computing is an essential part of analysis. Statisticians need not only be able to run existing computer software but understand how that software functions. Students will learn fundamental concepts - Data Management, Data types, Data cleaning and manipulation, databases, graphics, functions, loops, simulation and Markov Chain Monte Carlo through working with various statistical analysis. Students will learn to write code in an organized fashion with comments. This course will be taught in a "flipped" format. Students will watch a series of videos and work through some simple coding examples before coming to class.

**PHP 1600. Obesity in the 21st Century: Causes, Consequences and Countermeasures.**

The scope of obesity knowledge is too large to cover during one single course, therefore we will focus primarily on obesity-related health outcomes, assessment of obesity, obesity epidemiology, social and behavioral correlates of obesity, obesity and stigma, policy and interventions across population groups. The readings for this course are multi-disciplinary in nature and integrate epidemiological, biological, sociological, political and philosophical perspectives. This course is specific to the United States and thusly all readings will reflect this contextual focus. Enrollment limited to 30.

**PHP 1610. Tobacco, Disease and the Industry: cigs, e-cigs and more.**

This class will help students gain knowledge about tobacco use and cigarette smoking, nicotine addiction, novel new products, and the tobacco industry. We will cover the link between smoking, disease, and death; smoking prevalence and nicotine dependence; novel products such as e-cigarettes and Modified Risk Tobacco Products; the role of the tobacco industry; behavioral and pharmacological smoking cessation treatments; community, organizational, and media campaigns; tobacco policy; and, global tobacco control. The course is designed as a seminar course emphasizing class discussion and debate, as well as in-depth discussion of the assigned readings. Suggested prerequisites PHP 0850, PHP 2120, or PHP 2150

**PHP 1680I. Pathology to Power: Disability, Health and Community.**

This course offers a comprehensive view of health and community concerns experienced by people with disabilities. Guest speakers, and hands on field research involving interactions with people with disabilities will facilitate the students gaining a multi-layered understanding of the issues faced by people with disabilities and their families.

**PHP 1680J. The Race To Inner Space: Conflating Science, Politics, and Economics To Promote Brain Health.**

Provides an understanding of how funds are raised and spent for disease-targeted research; Provides hands-on experience and exposure to public and private decisionmakers influencing healthcare policy related to diseases of the brain; Provides an understanding of issues, challenges, and opportunities related to neurological and psychiatric illness parity with other illnesses; Identifies lessons learned from health care research funding policy successes and failures; and, Identifies directions for future brain health policy research related to the measurement of program effectiveness and comparative effectiveness, economic benefit. Permission of primary instructor (J. Bentkover) required. Enrollment limited to 24 juniors, seniors, and graduate students.

**PHP 1680K. Introduction to Conducting Clinical Research.**

This course is intended to help students become familiar with the design and implementation of clinical research, including ethical and logistical processes related to collecting data and interpretation of published medical literature. In addition to weekly sessions, the course requires 4-6 hours weekly in the Emergency Department at Rhode Island Hospital enrolling patients in clinical trials. As students will be directly exposed to patient and clinical care, the course is limited to 12 students for the semester. Interested students should contact the course director to be considered for enrollment. Not open to first year students. Instructor permission required.

**PHP 1680M. The Epidemiology of Violence and its Consequences.**

Overview of the epidemiology of intentional injury within the social context. Selected topics include homicide, suicide, child abuse, intimate partner and family violence, sexual assault, elder mistreatment and officially sanctioned violence. Methodological challenges for epidemiologists, and the role of guns and substance use are examined. Intended as a junior/senior level course. Prerequisite: PHP 2120 or equivalent. Enrollment limited to 10.

**PHP 1680S. Bioethics at the Bedside.**

This course explores a variety of topics in biomedical ethics. Each class will begin with a vignette, short film, or speaker, followed by a short lecture. A large portion of class time will then be devoted to class discussion/debate. The course has four parts: introduction to medical ethics in which we consider what value we assign to individuals within various ethical constructs; discussion of bioethical issues at the beginning and end of life; examination of the duty of physicians; and selection of additional topics exploring ethical issues that arise from the social, economic, and cultural differences between physician and patient. Enrollment limited to 30.

**PHP 1680T. Translation, Diffusion and Cultural Relevance of Health Promotion Interventions.**

Course content covers three key aspects of disease prevention/health promotion programs: (1) how "basic" behavioral and social science research is tested for effectiveness in real-life settings (translation); (2) how programs with demonstrated effectiveness, in one or more local settings, are introduced and adopted more broadly (diffusion); and (3) how cultural relevance is involved in both translation and diffusion. Translation and Diffusion are the two main sections of the semester. Cultural relevance is a theme integrated into each part of the course. Appropriate for BSSI, MPH, and advanced undergraduate students with coursework in public/community health. Open to juniors, seniors graduate students.

**PHP 1680U. Intersectionality and Health Inequities.**

This course examines health inequities in the U.S from an intersectionality perspective. Intersectionality is both a theory and methodology focused on the power dynamics between oppression and privilege and how various axes of social categories and systems interrelate on various and simultaneous levels. This framework critically examines how systemic injustice and social inequality transpires on a multidimensional basis. This course provides a broad overview of health disparities in the U.S., specifically, examining them through intersecting structural and social factors (e.g., race and ethnicity; gender; immigration status; socioeconomic position; age; sexual orientation; and the promise and limitations of public policy).

**PHP 1700. Current Topics in Environmental Health.**

This course is designed to introduce students to the field of environmental health, and demonstrate how environmental health is integrated into various aspects of our lives, both directly and indirectly. Topics to be covered include: toxic metals, vector-borne disease, food safety, water quality, radiation, pesticides, air quality, hazardous waste, risk assessment, and the role of the community in environmental health. Several topics will be presented by guest speakers so that students can learn from the expertise of professionals in the field. Enrollment limited to 65.

**PHP 1710. Climate Change and Human Health.**

Global climate change is occurring and these changes have the potential to profoundly influence human health. This course provides students with a broad overview of the diverse impacts of projected climate change on human health, including effects of changing temperatures, extreme weather events, infectious and non-infectious waterborne threats, vector-borne disease, air pollution, the physical and built environment and policies to promote mitigation and adaptation. Students will explore multiple sides of controversial issues through lively and informed class discussions, writing exercises, and participation in a series of end-of-term debates. Enrollment is limited to 20 students.

**PHP 1800. TRI-Lab Seminar on Healthy Early Childhood Development: A Team Approach.**

This seminar, open by invitation only to participants in the TRI-Lab program, will investigate a range of topics related to the healthy development of children from pregnancy through school entry, including the prevalence and determinants of major health and developmental concerns of infants and young children as well as key state and federal programs designed to address them. Readings, lectures, discussions, and in-class exercises will be used to foster collaborative inquiry by students, faculty, and community participants. Students will develop projects aimed at advancing or refining solutions to key healthy early childhood development challenges in Rhode Island.

**PHP 1802S. Human Security and Humanitarian Response: Increasing Effectiveness and Accountability.**

Disasters, natural and anthropogenic, pose significant threats to human security. Effective humanitarian action is important for both short and long-term responses to complex emergencies. The array of factors contributing to the economic and human losses experienced in both natural disasters and complex humanitarian emergencies are vast and complicated, and the strategies employed to mitigate and heal the damage caused by these disturbances must be equal to the task. This course covers diverse topics including the role of NGOs, UN agencies, local governments, peacekeepers and military in humanitarian response; economic impact of humanitarian aid; the evidence base for humanitarian interventions.

**PHP 1820. Designing Education for Better Prisoner and Community Health.**

This course will provide the needed background and context for understanding the multiple issues and challenges facing prisoners and the national justice and health systems that impact their fate. In addition to contextual background, students in this course will attain the knowledge and skills needed to develop a final practical, real world health communication/ intervention project that addresses one or more health literacy challenges facing people who are incarcerated. Students interested in taking the course must contact the professor directly for information about obtaining an override.

**PHP 1850. TRI-Lab Seminar on Healthy Food Access: A Team Approach.**

The Healthy Food Access Lab will investigate community-based approaches to increasing access to healthy food and reducing obesity and overweight and food insecurity and hunger. It will provide students with an integrative scholarship experience that combines in-class and field-based learning opportunities with the development of applied, community-based research projects addressing a range of healthy food access challenges facing Providence and Rhode Island.

**PHP 1852. TRI-Lab Seminar on Healthy Food Access: A Team Approach (Part 2).**

The Healthy Food Access TRI-Lab brings together interdisciplinary groups of students, faculty and community practitioners to engage on the issue of healthy food access. Students will deepen their understanding of this issue, and develop and refine collaborative knowledge and potential solutions. They will investigate community-based approaches to increasing access to healthy food and reducing obesity and overweight and food insecurity and hunger. It will provide students with an integrative scholarship experience that combines in-class and field-based learning opportunities with the development of applied, community-based research projects addressing a range of healthy food access challenges facing Providence and Rhode Island.

**PHP 1854. The Epidemiology and Control of Infectious Diseases.**

Course objectives are to introduce students to methods and concepts in the study and control of infectious diseases. By the end of this course, students will have a solid foundation in the distribution, transmission, and pathogenesis of major infectious diseases that affect human populations. We will investigate methods to design and evaluate public health strategies to prevent or eliminate infectious diseases, including: outbreak investigation, disease surveillance, infection control, screening, and vaccination. The course is open to undergraduate students who have completed PHP 0320 or PHP 0850, and to graduate students who have completed or are concurrently enrolled in either PHP 2120 or PHP 2150.

**PHP 1880. Meditation, Mindfulness and Health.**

This course provides an overview on the relation of meditation and mindfulness (the ability to attend in a nonjudgmental way to one's own physical and mental processes during ordinary, everyday tasks) with various health outcomes and disease risk factors such as depression, anxiety, diet, substance use, and cardiovascular disease. Mechanisms by which mindfulness may influence health will be addressed. The course will assess studies in the field for methodological rigor, and students will be taught strengths and weaknesses of current research. Students will be taught various mindfulness practices including direct experience with mindfulness meditation.

**PHP 1890. The Craving Mind.**

We are creatures of habit. Driven by biological processes set up to help us survive, our minds are constantly craving experiences and substances—from smartphones to romance to alcohol—and this craving leads to habit formation. This course will explore the behavioral and mental processes that foster craving and consequent habit formation, the impact these have on individual and societal health, and how we can “hack” our own neurobiological reward circuitry using practices such as mindfulness, to foster greater health and wellbeing.

**PHP 1900. Epidemiology of Disorders and Diseases of Childhood and Young Adulthood.**

Students will learn about diseases and disorders of childhood and young adulthood, including allergies, autism, eating disorders, obesity, endometriosis, and migraines. Students will learn how these disorders are defined, how many youth are impacted, and the age-appropriate epidemiologic methods to study disorders and diseases during childhood, adolescence, and young adulthood, respectively. For the final project, students will pick a disease or disorder of interest that occurs during childhood, adolescence, or young adulthood, synthesize the results from multiple epidemiological studies, and concisely present this information in both a written report and an oral presentation.

**PHP 1910. Public Health Senior Seminar.**

This dynamic course will provide an overarching public health capstone experience. Students will gain an in-depth knowledge by utilizing and strengthening oratory skills, written skills, and skills needed to work in teams. The instructor is formally trained in Internal Medicine, public health, health policy and clinical epidemiology, with experience which will be brought to the classroom. Topics will span public health successes, things that didn't work, and things that need more work and effort. This seminar course will emphasize class discussion, interaction and debate regarding differing perspectives on each topic area, as well as in-depth discussion of the assigned readings.

**PHP 1920. Social Determinants of Health.**

The course provides an overview of social determinants of health. Examples of topics include health effects of educational attainment, social integration, neighborhood socioeconomic characteristics, racial discrimination, gender, income inequality, childhood socioeconomic circumstances, parental neglect, and job strain. Mixed teaching methods are used, including small group discussions, problem-based learning and guest lectures. Open to graduate students and advanced undergraduates.

**PHP 1960. Epidemiology of Chronic Disease.**

This course is aimed at providing students with an introduction to the epidemiology of chronic disease. The topics in this course will review major chronic diseases; review descriptive data on population differences and time trends in incidence, prevalence and mortality; summarize mechanisms of pathogenesis; discuss major risk factors and address methodological issues in establishing causality; address potential opportunities for disease prevention and control. Students will be expected to present a selected topic on a current topic, providing opportunities to discuss cutting-edge research areas in the field.

**PHP 1964. Cancer Epidemiology and Prevention.**

This course is aimed at enhancing the knowledge and skills central to the application of epidemiologic methods to cancer screening, prevention, and control. We will exam cancer incidence and trends in the U.S. and globally, interpret their implication for cancer etiology, and critically analyze current evidence regarding the role of various major risk factors on human cancer risks. The class will focus on the impact of major environmental, occupational, and lifestyle risk factors on cancers of high public health significance.

**PHP 1970. Independent Study.**

A special project may be arranged in consultation with an individual faculty sponsor. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHP 1980. Honors Thesis Preparation.**

Two semesters of PHP 1980, Honors Thesis Preparation, will be devoted to the development and implementation of an Honors project, and of the writing of the Honors Thesis for the Public Health Concentration.

**PHP 1994. Case Studies in Maternal and Child Health.**

This course examines current topics in maternal and child health in the United States by addressing the question: How can the communities we serve become the healthiest place for children? This is not a survey course covering all topics. Rather the course will focus on particular topics each year. In this first year of the course, the focus is on the major causes of mortality and how to address them. We will have a particular focus on Rhode Island.

**PHP 1999. Public Health Nutrition: Concepts and Controversies.**

Provides an introduction to the concepts and scope of public health nutrition with a focus mainly on the U.S. Students will gain an understanding of the science behind national dietary recommendations and learn about dietary assessment methods, determinants of food intake, and interventions to improve diet. The course will emphasize ways in which environment and policy can influence nutritional status of diverse populations. It will also focus on controversial topics in nutrition and will employ hands-on activities such as self-dietary assessment, debates, op-eds, and individual presentations of nutrition topics of interest. Enrollment limited to 25 juniors, seniors, and graduate students.

**PHP 2018. Epidemiology of Cardio-Metabolic Health.**

This course surveys the entire landscape of the nutritional, biochemical, and genetic aspects of cardiometabolic health addressing issues of obesity, diabetes, metabolic syndrome, and their micro- and macro-vascular complications. Students will learn about both the descriptive and analytical epidemiology of these seemingly distinct but clearly clustered disorders including the so-called metabolic syndrome comprehensively and in-depth. International comparison of prevalent data in different social contexts will also be reviewed, so that strategies for prevention by either changing our cultures or natures can be appreciated and debated with a better understanding of the related issues confronted by public health and medical professionals.

**PHP 2019. Measurement Issues in Health Care.**

Provides a theoretical and practical basis for measurement in health care. Introduces measurement theory, scale development, and criteria to be considered when choosing measures in clinical practice and research. Practical exercises include questionnaire development and a written research protocol for the development and validation of a new measure. Prerequisites: PHP 2120, 2130.

**PHP 2020. Disability Over the Life Course.**

An overview of the epidemiology of physical and cognitive disability in America, associated patterns of medical and social service use, and current as well as "ideal" population-specific systems of formal and family care. Also explores medical, social, and psychological needs associated with the stage of life in which disability is experienced. Prerequisites for advanced undergraduates are PHP 0310 or SOC 1550, and introductory statistics.

**PHP 2030. Clinical Trials Methodology.**

We will examine the modern clinical trial as a methodology for evaluating interventions related to treatment, rehabilitation, prevention and diagnosis. Topics include the history and rationale for clinical trials, ethical issues, study design, protocol development, sample size considerations, quality assurance, statistical analysis, systematic reviews and meta-analysis, and reporting of results. Extensively illustrated with examples from various fields of health care research. Recommended prerequisites: introductory epidemiology and statistics. Pre-requisites: (PHP 2120 or PHP 2150) and either PHP 2508, 2510, or 2520. Open to graduate students only.

**PHP 2040. Survey Research Methods.**

Emphasizes the theory of sampling and survey methods and their application to public health research. Topics include: survey design and planning; principles of sampling and survey terminology; questionnaire construction; protection of human subjects; data collection (including interviewing and data coding procedures); and application, presentation, and evaluation of results. Suggested prerequisites: PHP 2120, and PHP 2508 or 2510. Open to graduate students only.

**PHP 2060. Qualitative Methods in Health Research.**

Introduces qualitative approaches to data collection and analysis in health research. Methods covered include: participant observation, key-informant interviews, focus groups, innovative data collection strategies, and non-obtrusive measures. Students will use applied projects to develop skills in: qualitative data collection and management, interviewing, transcript analysis using computerized software, triangulation between qualitative and quantitative data, and report preparation for qualitative studies. Enrollment limited to 20 graduate students.

**PHP 2065. Qualitative Methods: Theoretical and Methodological Frameworks in Health Research.**

The intention of the course is to discuss core and innovative theoretical and methodological frameworks in how we conduct and analyze qualitative data, including related concerns of data representation, ethics and strategies for determining rigor in qualitative inquiry. Major approaches include ethnography, grounded theory/situational analysis, phenomenology, community based and community driven participatory research, and critical race and feminist frameworks. Students will expand their capacity to critically understand the various ways in which health-related phenomena can be explored, analyzed and interpreted. It is geared for students interested in gaining a broader understanding of theoretical frameworks related to qualitative research methods.

**PHP 2070. Public Health/Community Service Internship.**

The course is an introduction to the history, organization, resources, concepts and issues of public health and health care. Students will be matched according to their interests in a related practical experience in a health-related organization, with the expectation that they complete a project or produce a product of public health utility. This gives students an opportunity to critically apply knowledge and skills learned in didactic sessions. Instructor permission required.

**PHP 2071. Applied Public Health: Systems and Practice.**

Applied Public Health is a two-semester sequence of courses designed to give students the skills and experiences they need to master understanding public health and health care systems, policy in public health, leadership, communication, interprofessional practice, and systems thinking. This will be achieved through a combination of lectures, in class exercises, homework assignments, and practical experience in a public health setting. The first course in the sequence (PHP 2071) is taken in the Spring of your first year.

**PHP 2072. Applied Public Health: Policy, leadership and communication.**

Applied Public Health is a two-semester sequence of courses designed to give students the skills and experiences they need to master understanding public health and health care systems, policy in public health, leadership, communication, interprofessional practice, and systems thinking. This will be achieved through a combination of lectures, in class exercises, homework assignments, and practical experience in a public health setting. The second course (PHP 2072) is taken in the Fall of your second year.

**PHP 2075. MPH Analytic Internship.**

The primary objective of this course is to gain hands-on experience in using data to address public health questions. Concepts from previous courses will be re-enforced as students work through the steps of addressing a public health question. Both data analysis and data interpretation will be emphasized in the context of a public health question. STATA 8.0 will be used to analyze data. Prerequisites: PHP 2120, and either PHP 2500 or 2510. Open to graduate students in the MPH program only.

**PHP 2080. Public Health Law and Ethics.**

The protection and preservation of the public's health are quintessential goals of government. Equally critical is the need to respect individual rights and morals in American society. The classic conundrum of public health law and ethics is the extent to which government may restrain or impinge citizens' interests, directly or indirectly, to promote the health and safety of the community. This course, Public Health Law and Ethics, explores the inherent tensions between promoting the public's health and protecting the legal and ethical rights and interests of individuals.

**PHP 2090. Research Grant Writing for Public Health.**

This course focuses on providing knowledge and experience in creating high quality public health research grant applications. Course objectives include developing significant and innovative scientific hypotheses, learning principles of effective written communication, and developing a research grant application suitable to submit for funding. Designed for Public Health School PhD students, post-doctoral fellows, and Masters students with advanced degrees (e.g. MD, PhD). Prerequisite: PHP 2120 or PHP 2150 or instructor permission.

**PHP 2120. Introduction to Methods in Epidemiologic Research.**

Epidemiology quantifies patterns and determinants of human population health, with a goal of reducing the burden of disease, injury, and disability. An intensive first course in epidemiological methods, students learn core principles of study design and data analysis through critiques of published epidemiological studies as well as hands on practice through weekly exercises and assignments. This is a graduate-level course aimed at masters and PhD students. The course is not open to first year students or sophomores but may be available for advanced undergraduates with the instructor's permission.

**PHP 2130. Human Biology for Public Health.**

This course provides basic principles of human biology and its applications to public health. Examples of biology topics include the cardiovascular system, endocrine system, immune system, nervous system, genetics, cancer, cardiovascular disease, HIV/AIDS, and depression. Examples of applied topics include strengths and weaknesses of using biomarkers, accuracy and precision of biological measures, quality assurance and quality control methods for using biomarkers for public health research. Mixed teaching methods are used, including small group discussions, problem-based learning and guest lectures. Prerequisite: PHP 2120 (may be taken concurrently) or instructor permission. Enrollment limited to 20 graduate students.

**PHP 2150. Foundations in Epidemiologic Research Methods.**

The overall objective of this course is to provide students with a strong foundation in epidemiologic research methods. This is the first of a two- or four-course sequence in epidemiologic methods aimed at students who expect to eventually conduct their own epidemiologic research. There will be a strong quantitative focus in this course. By the end of the foundations course, students should be sufficiently familiar with epidemiologic research methods to begin to apply these methods to their own work. Prerequisite: PHP 2507 or 2510 (either may be taken concurrently); the typical student will also have some introductory knowledge of epidemiology.

**PHP 2160. The Global Burden of Mental Illness: A Public Health Approach.**

Provides an introduction to the classification, epidemiology, etiology, treatment and potential prevention of psychiatric disorders from a population perspective. Reviews the magnitude and social burden associated with mental disorders worldwide and opportunities to enhance prevention and treatment.

Covers concepts and methods used to study mental illness at the population level, including definitions of "normality" and "pathology", current classification systems and measurement approaches to assess psychopathology and severity and cross-cultural issues.

Covers the prevalence, risk factors, and etiology of major disorders of children, adolescents and adults, including autism spectrum disorders, attention deficit disorders, mood and anxiety disorders, schizophrenia and substance use disorders.

**PHP 2170. Injury As A Public Health Problem.**

Injury causes significant morbidity and mortality in the U.S and across the globe. However, injuries – both violent and non-violent – are eminently preventable. The overarching objective of this course is to enable students to understand the epidemiology of injury and violence, as well as strategies to improve public health through injury prevention. Prerequisite: PHP 2120 or 2150 (may be taken concurrently) or instructor permission. Enrollment limited to 20 graduate students.

**PHP 2180. Interpretation and Application of Epidemiology.**

This course builds upon the foundation of introductory epidemiology and a basic understanding of quantitative and conceptual methods, with a focus on the interpretation of the strength and meaning of epidemiologic findings. The goal is to help students develop critical thinking skills in order to become more sophisticated interpreters of epidemiologic evidence for guiding policy, clinical practice, and individual decisions, combining subject matter knowledge and epidemiologic methods to wisely evaluate the available research findings. We will focus on judging causality and identifying gaps that future research would need to fill to strengthen our understanding. Prerequisite required or permission of instructor.

**PHP 2200. Intermediate Methods in Epidemiologic Research.**

This second course in epidemiologic methods reinforces the concepts and methods taught in PHP 2150, with in-depth instruction in issues of study design, assessing threats to study validity including confounding and selection bias, and analyzing data with standard regression models. The course emphasizes hands-on learning and includes a combination of didactic lectures, discussions of methodologic papers, and a required laboratory component where students will learn to apply the concepts learned in class to real-world problems. Prerequisites: PHP 2150 and either 2510 or 2507, or permission of the instructor. Co-requisite: PHP 2511 or 2508.

**PHP 2220A. Epidemiology of Violence and Its Consequences.**

Overview of the epidemiology of intentional injury within the social context. Selected topics include homicide, suicide, child abuse, intimate partner and family violence, sexual assault, elder mistreatment and officially sanctioned violence. Methodological challenges for epidemiologists, and the role of guns and substance use are examined. Prerequisite: PHP 2120 or knowledge of elementary epidemiologic methods. Enrollment limited to 10.

**PHP 2220B. Nutritional Epidemiology.**

This course provides a comprehensive and systematic review of contemporary issues in human nutrition that require the application of epidemiologic principles and quantitative methods. Substantive topics range from the assessment of molecular etiologies for health and disease outcomes to evidence-based development of clinical guidelines and public health policies for foods and dietary supplements. This course is designed for graduate trainees in public health or the division of biology and medicine, visiting fellows, and advanced undergraduates who want to understand or conduct research in human nutrition and dietary assessment related to health and diseases.

**PHP 2220C. Perinatal Epidemiology: Women and Infants' Health during Pregnancy in a Global Context.**

This course introduces students to major topics that affect the health of women and their infants during pregnancy and the perinatal period. We will address issues relevant to both high and low-resource settings, but will pay particular attention to low-resource settings. The course covers pregnancy loss and pregnancy outcomes, chronic and infectious diseases during pregnancy, and key methodological issues when studying health outcomes during the perinatal period. The course will include course lectures, informal discussions with experts, and student-led discussions and journal clubs. Student will complete a course paper and brief presentation on a selected research topic. This course is open to masters and PHD students in any concentration or program who have taken an introductory epidemiology course such as PHP 2120 or PHP 2150, and, with instructor permission, to undergraduate students who have taken PHP 0850.

**PHP 2220D. Reproductive Epidemiology.**

This course provides an overview of topics related to reproductive epidemiology, including substantive epidemiologic information, methodologic issues pertinent to reproductive health, and maternal and child health services and programmatic topics. The first half of class sessions will be lecture-based, while the second half will involve the discussion of a published research study in a journal club format, and students are expected to actively participate in class discussions. After several introductory lectures, students will select topics and will be responsible for organizing a presentation and discussion under the instructors' supervision.

**PHP 2220E. Topics in Environmental and Occupational Epidemiology.**

This course introduces students to the epidemiological study of historical and contemporary environmental/occupational agents, focusing on study design, biases, and methodological tools used to evaluate and extend the evidence linking exposures to human disease. The course will discuss applications, strengths, and limitations of different study designs and their use in studying specific environmental agents. Didactic lectures and student-led discussions will be used to provide students with a basic understanding of and the tools to apply/extend their knowledge of specific environmental agents (endocrine disruptors) and special topics (children's neurodevelopment). Prerequisite: PHP 2120, PHP 2150, or equivalent. Undergrads with PHP 0850 and instructor's permission.

**PHP 2220G. Methodological and Practical Issues in Global Health Research.**

This seminar-style course will develop critical thinking and writing about global health research among graduate students interested in population health. Reading and writing assignments are on key conceptual, methodological and practical issues. It is interdisciplinary in nature but will reflect public health and epidemiologic perspectives on measures of population health, health disparities, interactions of effects on health, and implementation research. It is suitable for graduate students in the public health sciences, social sciences, pathobiology and public policy. Prior training in epidemiologic methods and global health, or their equivalents, are expected. Recommended prerequisite: PHP 2120. Open to graduate and medical students only.

**PHP 2220H. The Epidemiology, Treatment and Prevention of HIV.**

The purpose of this seminar is to use HIV as an example to introduce students to a variety of methodological issues in the epidemiologic study of infectious diseases. While we will study the treatment and prevention of HIV in detail, emphasizing the current state of knowledge and critiquing the most recent literature, this course aims to use HIV as an example to better understand the variety of methodological issues in global and domestic infectious disease epidemiology today. Enrollment limited to 25 students. Prerequisites: PHP 0850 or PHP 1854 (undergraduates); PHP 2120 or 2150 and PHP 2508 or 2511 (graduate students).

**PHP 2222. Genetics, Human Population and Diseases.**

The purpose of this course is: 1) to introduce students to genetics, genomics and various designs of genetic studies of human diseases, and 2) to discuss selected topics in challenges and advances in human genetic studies. Some prior knowledge with genetics or epidemiology is preferred. This course may be most appropriate for second-year MPH, ScM, or PhD students, as well as first-year graduate students and advanced undergraduate students with previous exposure to introductory epidemiology and biostatistics. Prerequisite: introductory-level statistical analyses and epidemiology courses, such as PHP 2507 or 2510, and 2120 or 2150. Undergraduates need permission of instructor to register.

**PHP 2230. Epidemiology of Infectious Diseases.**

This course will introduce students to the field of infectious disease epidemiology. Topics will include a history of infectious diseases, epidemiology and control of infectious diseases, analytic methods, study design, outbreak investigations, and epidemic modeling. Prerequisite: PHP 2120 or PHP 2150 and PHP 2507 or 2510, or with permission of instructor. Enrollment limited to 25 students.

**PHP 2240. Methods of Environmental Epidemiology.**

In this course, students will understand, implement, and interpret the design and analysis tools commonly used in environmental epidemiology. Topics to be discussed include cohort, time-series, case-crossover, and panel study designs, modeling of flexible dose-effect relationships, consequences of measurement error and missing data, and analyses of effects of exposures with unknown latencies. Although these methods will be presented in the context of estimating the health effects of environmental exposures, many of these methods are readily applied to other fields. Prerequisite: PHP 2200 or instructor permission. Open to graduate students only.

**PHP 2250. Advanced Quantitative Methods in Epidemiologic Research.**

This course provides students with conceptual and quantitative tools based on counterfactual theory to make causal inference using data obtained from observational studies. Causal diagrams will be used to provide alternative definitions of and inform correcting for common biases. Non-, semi-, and fully parametric methods for addressing these biases will be discussed. These methods include standard regression, instrumental variables, propensity scores, inverse probability weighting, and marginal structural models. Settings when such methods may not be appropriate will be emphasized. Prerequisite: PHP 2200 and 2511; or PHP 2200 and 2508; or instructor permission. Enrollment limited to 25 graduate students.

**PHP 2260. Applied Epidemiologic Data Analysis.**

This course will lead students through the process of writing a journal-style manuscript based on performing applied epidemiologic data analysis using statistical software (i.e., SAS). This course is best suited for students who already have a research idea in mind and data in hand prior to the start of the course or are able to develop a research question based on de-identified publicly available population-based datasets that will be recommended in the course. Course enrollment is restricted to graduate students.

**PHP 2300. Research Methods in Behavioral Science.**

This course provides students with fundamental principles of behavioral and social research methodology for understanding the determinants of public health problems, and for executing and testing public health interventions. We will focus on experimental methods, observational studies, and qualitative approaches. We will develop skills in understanding and interpreting data—both quantitative and qualitative. Throughout the course we will emphasize ethical, cultural, and professional issues for designing public health interventions. Prior coursework in research methodology and quantitative methods is recommended but not required. Open to graduate students and advanced undergraduates. Enrollment limited to 15.

**PHP 2310. Physical Activity and Public Health.**

This course examines physical activity and health with an emphasis on the development of behavioral interventions to increase physical activity. Students gain knowledge of the impact of physical activity on health outcomes as well as differences in physical activity among subpopulations. They are introduced to behavioral theories, intervention design approaches, measurement issues, and methods that are relevant to physical activity. Through seminar discussions, a group project, and presentations, students engage with the material and gain skills in the development and evaluation of behavioral interventions. Students with an interest in behavioral interventions and physical activity will benefit from taking the course. Recommended prerequisites: PHP 1740, 2320, or 2360. Enrollment limited to 20. Open to graduate students and seniors concentrating in Community Health.

**PHP 2320. Environmental and Policy Influences on the Obesity Epidemic.**

This course examines environmental influences on the obesity epidemic with an emphasis on the impact of the built environment and policy on physical activity. Through seminar discussions, literature reviews, policy briefs, and presentations, students will engage with the material and gain skills in the development of policy and environmental change strategies to impact physical inactivity and poor diet. Students with an interest in environmental change and policy to prevent obesity and increase physical activity will benefit from taking this course. Enrollment limited to 25.

**PHP 2325. Place Matters: Exploring Community-Level Contexts on Health Behaviors, Outcomes and Disparities.**

As with many health-related outcomes, the prevalence of ill health is unequally distributed across populations, with certain community features playing significant roles in shaping health. In this course, we will explore the features of place and the associations with health behaviors and health outcomes. The readings for this course are multi-disciplinary in nature and integrate epidemiological, biological, sociological, political and philosophical perspectives. This course is specific to the United States. The course activities will culminate with neighborhood audits, presentations, and policy briefs. Due to the course structure and activities, it is limited to 12 graduate students.

**PHP 2330. Behavioral and Social Approaches to HIV Prevention.**

This course examines concepts, approaches, and empirical findings from behavioral and social research to prevent HIV transmission. Students will become familiar with behavioral theories, social epidemiological principles, intervention design, and debates within the field of HIV prevention. A particular focus of this course is on the linkages between science and HIV prevention practice/policy. Students will conduct weekly readings, engage actively in seminar discussions, and participate in small-group presentations and research activities. Prior coursework in public health research methodology is recommended. Prerequisites: Graduate student or senior public health concentrator. Enrollment limited to 15 advanced undergraduate, graduate and medical students.

**PHP 2340. Behavioral and Social Science Theory for Health Promotion.**

This course will help students become familiar with behavioral and social science theories commonly used for planning disease prevention/health promotion interventions. In addition to review of specific theories, topics to be discussed include: how theories are developed and tested; challenges and potential pitfalls in using theory for intervention planning; and creation of causal diagrams based on concepts from theories. Undergraduates need permission of instructor; priority will be for Public Health concentrators. Enrollment limited to 25.

**PHP 2345. Affect, Emotion, and Health Behavior.**

The purpose of this class is to learn about and discuss theory and research on affective determinants of health-related behaviors across multiple behavioral domains. The common thread through the entire course is that health-related behavior is the dependent variable and affect or emotion is the putative determinant. That is, this is a course about how affect and emotion influences health-related behavior. Although we will, in some instances, discuss the effects of health-related behavior on affect and emotion, emotion and mood are NOT considered to be the outcome of interest.

**PHP 2350. Economics of Medical Therapies: Health Policy and Practice.**

Introduces methods and applications of decision analysis, cost-effectiveness analysis, and benefit-cost analysis in public health policy and practice, including health care technology assessment, medical decision making, and health resource allocation. Examines technical features of these methods, problems associated with implementing them, and advantages and pitfalls in their application in setting public health policy. Open to juniors, seniors, and graduate students.

**PHP 2355. Designing and Evaluating Public Health Interventions.**

Previously listed as PHP 1740. Examines health behavior decision-making and elements for design of health promotion interventions. Covers theories of health behavior (focusing on primary and secondary prevention), principles of intervention design, and reading of research literature. Emphasizes psychological, social, and proximate environmental influences on individuals' health-related behaviors. Restricted to undergraduates in the AB/MPH program, and graduate students. Prerequisite: PHP 0320 or equivalent. Enrollment limited to 35.

**PHP 2360. Developing + Testing Theory-Driven, Evidence Based Psychosocial and Behavioral Health Interventions.**

This is a graduate-level course designed to provide students with the knowledge and research skills necessary to develop and ultimately test a theory-driven, evidence-based psychosocial or health behavior change intervention. Drawing on research, theory, and practice, students learn how to conduct formative research to inform the content, structure, and format of an intervention, set goals/objectives, develop intervention materials/messages, and evaluate outcomes – all while taking into account factors such as gender, sexuality, race/ethnicity, poverty, culture, social-support/social-capital, etc. Research methods that are relevant for examining efficacy, including study-design, power/sample size calculations, fidelity monitoring, randomization, control conditions, measures selection/assessment, data collection, etc. are covered.

**PHP 2361. Proseminar in Health Behavior Intervention Research.**

This course is required for doctoral students in Behavioral and Social Health Sciences. Students will consider advanced topics related to designing, implementing, and evaluating behavioral and social interventions to promote health. The course is designed as a proseminar, emphasizing discussion of primary readings and presentations by experienced intervention researchers.

**PHP 2365. Public Health Issues in LGBT Populations.**

This seminar is designed for graduate students interested in health disparities and determinants of health in LGBT populations (also referred to as sexual and gender minority populations). Students will become familiar with key epidemiological reports, behavioral and social science theories/frameworks, intervention studies, and scientific debates related to the determinants of and disparities affecting the health of LGBT and sexual and gender minority populations. The course will focus primarily on US populations, but will also include global LGBT and sexual and gender minority populations. Readings and discussion will be considered in light of social, policy, and cultural contexts that frame the lives of LGBT populations.

**PHP 2370. Etiology of Substance Use Disorders.**

This course will help students become familiar with behavioral, genetic, neurobiological, and cultural factors related to the onset and course of substance use disorders. In addition to review of specific theories, empirical evidence supporting models will be covered as will the integration of evidence across models. Priority will be given to postdoctoral fellows. BSHS students should take the class for a grade (ABC/NC), special students/postdocs should choose S/NC grade option

**PHP 2371. Psychosocial and Pharmacologic Treatment of Substance Use Disorders.**

Intended to provide an overview of the history of the treatment of substance use disorders; assessment methods designed to determine progress in substance use treatment; and the current most common types of psychosocial and pharmacologic treatments for substance use. Enrollment limited to 20 graduate and medical students. Instructor permission required.

**PHP 2380. Health Communication.**

This class will explore Health Communication, with a focus on behavioral and social science interventions delivered through health communication programs. The course is structured so that basic building blocks (i.e., definitions of health communication, public health context for health communications interventions, theories of health communication and health behavior change) are presented sequentially early in the semester. Students will synthesize knowledge and demonstrate their understanding of the role of health communication through a final research project. Seniors with concentration in Public Health may enroll with instructor's permission. Enrollment limited to 20 graduate and medical students.

**PHP 2390. Quantitative Methods for Behavioral and Social Sciences Intervention Research.**

This course provides broad coverage of the quantitative methods used in behavioral intervention research ranging from descriptive data analysis to longitudinal methods. Students will learn to conduct, interpret, and write up a range of statistical procedures including basic psychometrics, t-tests and ANOVAs, correlations, and multiple regression. Students also will be introduced to more advanced techniques used for longitudinal data analysis in order to understand their common uses in behavioral intervention research. The course provides students in the Master's program in Behavioral and Social Health Sciences the requisite skills to conduct analyses of behavioral data as part of their Master's Thesis. Enrollment limited to 15 graduate students in the BSHS Master's program and the MPH program.

**PHP 2400. The U.S. Health Care System: Case Studies in Financing, Delivery, Regulation and Public Health.**

Reviews the development of the health care delivery, financing and regulatory control systems in the U.S. and reviews the literature on the relationship between health system structure and the services used and health outcomes that populations experience. A case-study approach is used to understand the inter-relationship between financing, delivery and regulatory components of the health system and their implication for public health by drawing on epidemiological, economic, political and sociological principals. Prerequisites: Graduate standing or PHP 0310 and instructor permission.

**PHP 2410E. Medicare: A Data Based Policy Examination.**

This course will explore the role of Medicare as America's health insurer for the elderly and disabled through the use of real Medicare insurance claims data, examining how Medicare policy changes in financing and regulation have affected the delivery and receipt of medical services. At the end of the course students will: 1) know the history of important Medicare policy changes; 2) be able to construct aggregated patient case mix acuity adjusted measures of provider quality using insurance claims data; 3) be able to conduct policy analyses using Medicare claims data that are sensitive to standardized coding schemes. Enrollment limited to 15 graduate students. Prerequisite: PHP 2120, 2508, or 2510. Instructor permission required.

**PHP 2415. Introduction to Evidence-based Medicine.**

Unbiased assessments of the scientific literature by means of research synthesis methods are critical for formulating public health policy, counseling patients or prioritizing future research. We focus on the methods and uses of systematic reviews and meta-analyses and their applications in medicine and health policy. After course completion, and with some direction, students will be able to undertake a basic systematic review or meta-analysis. Enrollment limited to 15. Prerequisites: PHP 2120, 2150, or 2460; and PHP 2507/08 or 2510/11 (2508 and 2511 may be taken concurrently); and clinical background or training in basic concepts in medicine (must discuss with instructor).

**PHP 2425. Doing Public Health: Getting It Done in the Real World.**

This course covers topics that MPH graduates will encounter in public health work and engages students with important challenges in public health practice. Class sessions will be as real-world as possible. We will choose a major current public health problem in RI and develop a coalition of agencies. Each student will learn about a different agency, develop its role in addressing the problem as a part of the coalition, and design a proposal for intervention, interacting with experienced public health practitioners, interviewing agency staff, gathering data, writing proposals, drafting budgets etc. Assignments will foster good communication within organizations and coalitions.

**PHP 2429. Prevention: Medicine, Public Health, Law and Policy.**

Explores the role of law and policy in promoting prevention in medicine and public health and in reducing health disparities and health care costs. Themes will include: the limits of legal authority in public health promotion and in regulating health behaviors; promoting prevention through healthcare reform; and the use of medical and public health evidence in policymaking. Case study topics include obesity, gun violence, distracted driving, lead poisoning and injury prevention. Includes students from the disciplines of medicine, public health, law and public policy. Students will participate in an interdisciplinary experiential learning project at a public health agency or organization.

**PHP 2430. Analysis of Population Based Datasets.**

Epidemiologic and health services research often conducts analysis using existing population-based datasets. Benefits include representative sampling frames, timeliness, and lower costs. Information technology makes it possible to link some databases providing richer sources of information. There are several technical and methodological concerns when conducting this type of "secondary analyses." Students will download, link, and analyze several data sets to understand the advantages of these data for health policy analysis as well as understand and apply different analytic methods. Prerequisites: PHP 2120; PHP 2508 (may be taken concurrently) or PHP 2510 or similar. Open to graduate and medical students only.

**PHP 2436. Conflicting Priorities? Prescription Profits + the Public's Health.**

The US spends more on pharmaceuticals than any other nation, reflecting higher use of medications and higher prices. US pharmaceutical firms are leaders in innovation and drug development. The purpose of this course is to provide an introduction to the study of the biopharmaceutical industry using an economic and policy analysis framework. This course is intended to broaden students' understanding of the health policy process as it relates to pharmaceuticals. Students should have completed at least one year of biostatistics (PHP 2510 and PHP 2511) or equivalent coursework. Consent of the instructor may be sought as well.

**PHP 2440. Introduction to Pharmacoepidemiology.**

The course will focus on substantive topics in pharmacoepidemiology, including relevant principles of pharmacology, inference from spontaneous case reports, study design considerations, premarketing pharmacoepidemiology, common data sources for pharmacoepidemiologic studies, drug utilization review, adherence, and the development, implementation, and assessment of therapeutic risk management policies. The course will also focus on issues in pharmacovigilance, including the legal and historical basis of pharmacovigilance, evaluation of individual adverse drug events, signal detection, active safety surveillance, and medication errors. A clinical background is not required. Prerequisites are PHP 2507, PHP 2508, PHP 2510, or PHP 2511, AND PHP 2120 or PHP 2150, or permission.

**PHP 2445. Minding the Gap: The U.S. Healthcare Safety Net.**

The right to access affordable, quality health care in the US is not guaranteed. During our nation's history, a patchwork quilt of programs, referred to collectively as the safety net, has been crafted to address health care needs for a wide range of people who fall through the cracks. This course examines its structure, function, and effects. We introduce key features of the safety net: access, cost, quality, and outcomes. We pay particular attention to the nation's largest program, Medicaid. We highlight the unique challenges facing vulnerable groups: legal and illegal immigrants, homeless populations, veterans, and people with disabilities.

**PHP 2450. Measuring and Improving the Quality of Health Care.**

The quality of health care in the United States is in urgent need of improvement. This course will focus on the science of measuring and improving the quality of health care. Topics will include quality assessment, patient safety, medical errors, public reporting, financial incentives, organizational change, and health care disparities. Students will engage in a team-based quality improvement project. Open to graduate and medical students only.

**PHP 2451. Exchange Scholar Program.****PHP 2455A. Health Services Research Methods I.**

Health services researchers use theories, models, and data to understand the health care system, assess the effectiveness of interventions (at multiple levels of the healthcare system), and inform health policy decisions. This course reviews the application of statistical and epidemiological principles to the design and analysis of health services research studies. The goal is to familiarize students with common study designs and methods in health services research, so that they can critically review the published literature and use these approaches in their own research.

**PHP 2455B. Health Services Research Methods II.**

This course covers commonly used statistical (regression) models for health services research, including survival analysis; examines the problem of missing data and strategies for addressing it; and provides a basic introduction to causal inference methods for time-varying exposures (including non-adherence). The goal is to familiarize students with important methods in applied work, so they can critically review the published literature and use the methods in their own research. The topics covered should be of interest to students in Health Services, Policy + Practice, Epidemiology, Economics, and beyond. Pre Requisites: Successful completion of PHP 2455A or instructor permission. Interested students who have not taken PHP 2455A should contact [issa\\_dahabreh@brown.edu](mailto:issa_dahabreh@brown.edu) to make arrangements. Those with adequate background in basic health services research or epidemiologic methods and regression analysis will be able to gain from this course, even if they have not taken PHP 2455A.

**PHP 2460. Research Methods in Clinical, Translational and Health Services Research.**

This course will take an applied approach to understanding research methods used in health research. Students will explore concepts, gain knowledge and develop skills in the following areas: 1. Developing and refining research questions; 2. Designing research projects and appropriately implementing research methodologies; 3. Understanding the strengths and weaknesses of different study designs in addressing specific research questions, including an understanding of threats to validity; 4. Identifying Data Sources, including primary and secondary sources; 5. Understanding research ethics, including IRB processes and HIPAA regulations. Students must be accepted to the Clinical and Translational Research Summer Institute to enroll.

**PHP 2465A. Introduction to Health Decision Analysis.**

Many decisions in health are value-laden, involve competing objectives, or must be made under uncertainty. Health decision analysis is a structured approach to thinking through such decisional problems. This course introduces decision analysis and cost-effectiveness analysis for public health and clinical problems. It covers basic theory for decisionmaking; principles and techniques for mathematical modeling; and implementation, by analyzing archetypical decisional problems in health. Pre Requisites: Some facility with mathematical notation and basic concepts in probability (advanced undergraduate students can enroll after instructor approval). Recommended course: DATA 1010, MATH 1610, or APMA 1690.

**PHP 2470. Topics in Clinical, Translational and Health Services Research.**

Through a combination of mini-courses and seminars, students will explore concepts, gain knowledge and develop skills in a variety of public health areas. To receive a half credit for this course, students will be required to successfully complete 70 units. Units must be pre-determined by the course instructor and the unit instructor. Units are generally based on the number of in-person contact hours and the number of outside of class/homework hours required for a mini-course or seminar. Students must receive special permission from the instructor or be accepted to the Clinical and Translational Research Summer Institute to enroll.

**PHP 2480. Selected Topics in Global Health Economics.**

This course will survey selected topics in global health economics. It is designed to introduce students to specific issues, theory and practice of health economics at the global level. The first part of the course will survey research papers on econometric methods in global health including: field experiments, instrumental variables, propensity score matching and regression discontinuity. The second part will discuss current topics such as: conditional economic incentives for providers and consumers, social health insurance, public goods, and externalities. Prerequisites: PHP 2511 and ECON 1110, or equivalent. Enrollment limited to 8 graduate students. Instructor permission required.

**PHP 2490. Methods in Pharmacoepidemiology.**

This course will cover applications of epidemiologic methods to the study of medical interventions (drugs, vaccines, devices, and procedures), focusing on advanced methods. We will use formal frameworks of causal inference. The course will focus on substantive topics in pharmacoepidemiology, including design and analytic strategies to overcome the limitations of common data sources. Other topics include the assessment of therapeutic risk management policies. Although a clinical background will be useful, it is not required. Prerequisites: PHP 2120, or PHP 2150 and 2200; and PHP 2507, 2510, or 2520; and PHP 2508 or 2511; or instructor permission. Enrollment limited to 20.

**PHP 2500. Introduction to Biostatistics.**

The first in a two-course series designed for students who seek to develop skills in biostatistical reasoning and data analysis. Offers an introduction to basic concepts and methods of statistics as applied to diverse problems in the health sciences. Methods for exploring and presenting data; direct and indirect standardization; probability; hypothesis testing; interval estimation; inference for means and proportions; simple linear regression, etc. Statistical computing is fully integrated into the course. Not open to freshmen or sophomores.

**PHP 2501. Introduction to Multivariate Regression.**

The first in a series of two-half semester courses on regression methods, designed for students who seek to develop biostatistical reasoning and data analysis skills. This course provides an introduction to multiple linear and logistic regression models as applied to diverse problems in the health sciences. PHP 2500 or equivalent is a prerequisite.

**PHP 2502. Regression Analysis Discrete and Event Time Data.**

The second course in the sequence on Introductory Biostatistics methods. This course will focus on regression methods (multiple linear regress, ANOVA, ANCOVA) and their natural extensions such as Logistic and Poisson regression in applications to diverse problems in the health sciences. Additionally, this course will cover regression methods for time to event data such as Cox regression for survival data. PHP 2500 or equivalent is a prerequisite.

**PHP 2507. Biostatistics and Applied Data Analysis I.**

The objective of the year-long, two-course sequence is for students to develop knowledge, skills and perspectives necessary to analyze data to answer public health questions. The year-long sequence focuses on statistical principles as well as the applied skills necessary to answer public health questions using data, including: data acquisition, data analysis, data interpretation and the presentation of results. Using lectures, labs and small group discussions, we focus on evaluating data sources, refining research questions, univariate and bivariate analyses, and presentation of initial results. Prerequisite: understanding of basic math concepts and terms. Enrollment limited to 50 students. Instructor permission required.

**PHP 2508. BioStatistics and Data Analysis II.**

Biostatistics and Applied Data Analysis II is the second course in a year-long, two-course sequence designed to develop the skills and knowledge to use data to address public health questions. The sequence is completed in one academic year, not split across two years. The courses focus on statistical principles as well as the applied skills necessary to answer public health questions using data, including: acquisition, analysis, interpretation and presentation of results. This spring semester course focuses on regression, interpretation of results, and communication of results. Prerequisite: PHP 2507. Enrollment limited to 50. Instructor permission required.

**PHP 2510. Principles of Biostatistics and Data Analysis.**

Intensive first course in biostatistical methodology, focusing on problems arising in public health, life sciences, and biomedical disciplines. Summarizing and representing data; basic probability; fundamentals of inference; hypothesis testing; likelihood methods. Inference for means and proportions; linear regression and analysis of variance; basics of experimental design; nonparametrics; logistic regression. Open to advanced undergraduates with permission from the instructor.

**PHP 2511. Applied Regression Analysis.**

Applied multivariate statistics, presenting a unified treatment of modern regression models for discrete and continuous data. Topics include multiple linear and nonlinear regression for continuous response data, analysis of variance and covariance, logistic regression, Poisson regression, and Cox regression. Prerequisite: APMA 1650 or PHP 2510. Open to advanced undergraduates with permission from the instructor.

**PHP 2514. Applied Generalized Linear Models.**

This course provides a survey of generalized linear models (GLMs) for outcomes including continuous, binary, count, survival and correlated data. This course will work through the basic theories of GLMs. Emphasis will be on understanding the implications of this theory and the applications to solving real data problems. Extensive use of computer programming will be required to analyze the data in this class. This course is designed for graduate and advanced undergraduate students who will be analyzing data and want to develop a practical hands on toolkit as well as understanding of the theoretical underpinnings of regression.

**PHP 2515. Fundamentals of Probability and Statistical Inference.**

This course will provide an introduction to probability theory, mathematical statistics and their application to biostatistics. The emphasis of the course will be on basic mathematical and probabilistic concepts that form the basis for statistical inference. The course will cover fundamental ideas of probability, some simple statistical models (normal, binomial, exponential and Poisson), sample and population moments, nite and approximate sampling distributions, point and interval estimation, and hypothesis testing. Examples of their use in modeling will also be discussed.

**PHP 2516. Applied Longitudinal Data Analysis.**

This course provides a survey of longitudinal data analysis. Topics will range from exploratory analysis, study design considerations, GLM for longitudinal data, covariance structures, generalized linear models for longitudinal data, marginal models and mixed effects. Data and examples will come from medical/pharmaceutical applications, public health and social sciences.

This course is designed for graduate and advanced undergraduate students who will be analyzing data and want to develop a practical hands on toolkit as well as understanding of the theoretical underpinnings of regression. Students in this class will need an understanding of how to work with Stata. Prereq is: PHP 2511 or PHP 2514; PHP 2508 with Permission from Instructor.

**PHP 2517. Applied Multilevel Data Analysis.**

This course provides a survey of multilevel data analysis. Topics will range from structure of multilevel data, basic multilevel linear models, multilevel GLM, Model testing and evaluation and missing data imputation. Data and examples will be drawn from medical, public health and social sciences. Students will be using real data throughout this course.

This course is designed for graduate and advanced undergraduate students who will be analyzing data and want to develop a practical hands on toolkit for multilevel analysis. Students in this class will need an understanding of how to work with R. Prereq is: PHP 2511 OR PHP 2514; PHP 2508 with Permission from Instructor.

**PHP 2520. Statistical Inference I.**

First of two courses that provide a comprehensive introduction to the theory of modern statistical inference. PHP 2520 presents a survey of fundamental ideas and methods, including sufficiency, likelihood based inference, hypothesis testing, asymptotic theory, and Bayesian inference. Measure theory not required. Open to advanced undergraduates with permission from the instructor.

**PHP 2530. Bayesian Statistical Methods.**

Surveys the state of the art in Bayesian methods and their applications. Discussion of the fundamentals followed by more advanced topics including hierarchical models, Markov Chain Monte Carlo, and other methods for sampling from the posterior distribution, robustness, and sensitivity analysis, and approaches to model selection and diagnostics. Features nontrivial applications of Bayesian methods from diverse scientific fields, with emphasis on biomedical research. Prerequisites: APMA 1650, PHP 2510, PHP 2511, or equivalent. Open to advanced undergraduates with permission from the instructor.

**PHP 2540. Advanced Methods for Multivariate Analysis.**

Survey of modern statistical methods for analysis of multivariate and high-dimensional data. Topics include inference for multivariate normally distributed data, methods for data reduction, classification and clustering, multiple comparisons for high-dimensional data, analysis of multidimensional contingency tables, and functional data analysis. Applications to diverse areas of scientific research, such as genomics, biomarker evaluation, and neuroscience will be featured. Prerequisites: APMA 1650 and 1660; or PHP 2520. Open to advanced undergraduates with permission from the instructor.

**PHP 2550. Practical Data Analysis.**

Covers practical skills required for successful analysis of scientific data including statistical programming, data management, exploratory data analysis, simulation and model building and checking. Tools will be developed through a series of case studies based on different types of data requiring a variety of statistical methods. Modern regression techniques such as cross-validation, bootstrapping, splines and bias-variance tradeoff will be emphasized. Students should be familiar with statistical inference as well as regression analysis. The course will use the R programming language.

**PHP 2560. Statistical Programming with R.**

Statistical computing is an essential part of analysis. Statisticians need not only be able to run existing computer software but understand how that software functions. Students will learn fundamental concepts – Data Management, Data types, Data cleaning and manipulation, databases, graphics, functions, loops, simulation and Markov Chain Monte Carlo through working with various statistical analysis. Students will learn to write code in an organized fashion with comments. This course will be taught using both R and Julia languages in a flipped format.

**PHP 2561. Methods in Informatics and Data Science for Health.**

The goal of this course is for students to develop a solution that uses data science and informatics approaches to address a biomedical or health challenge. This course will teach informatics and data science skills needed for public health and biomedicine research. Emphasis will be given to algorithms used within the context of biomedical research and health care, including those used in biomolecular sequence analysis, electronic health records, clinical decision support, and public health surveillance. This course has been developed as a Course-based Undergraduate Research Experience (CURE), where students will gain experience with the scientific method, its application, and presentation.

**PHP 2570. Health Data Science Case Studies.**

This course is designed to introduce students to the practice of data science in health related fields via presentation and in-depth discussion of case studies of current or recently completed projects. The case studies will be selected to highlight important areas of research and health policy analysis. It is intended for students with advanced training in data science methods and computing at the level of courses offered in the Biostatistics Masters Program. Prerequisites include PHP 2514, PHP 2515, PHP 2550 and PHP 2560, or equivalent, or instructor permission.

**PHP 2580. Statistical Inference II.**

This sequence of two courses provides a comprehensive introduction to the theory of modern inference. PHP 2580 covers such topics as non-parametric statistics, quasi-likelihood, resampling techniques, statistical learning, and methods for high-dimensional Bioinformatics data. Prerequisite: PHP 2520. Open to advanced undergraduates with permission from the instructor.

**PHP 2601. Linear Models.**

This course will focus on the theory and applications of linear models for continuous responses. Linear models deal with continuously distributed outcomes and assume that the outcomes are linear combinations of observed predictor variables and unknown parameters, to which independently distributed errors are added. Topics include matrix algebra, multivariate normal theory, estimation and inference for linear models, and model diagnostics. Prerequisites: APMA 1650 or 1660, or taking PHP 2520 concurrently.

Note: The course will cover fundamental and advanced topics in linear models, and concepts related to the generalized linear models will not be covered during the course.

**PHP 2602. Analysis of Lifetime Data.**

Comprehensive overview of methods for inference from censored event time data, with emphasis on nonparametric and semiparametric approaches. Topics include nonparametric hazard estimation, semiparametric proportional hazards models, frailty models, multiple event processes, with application to biomedical and public health data. Computational approaches using statistical software are emphasized. Prerequisites: PHP 2510 and 2511, or equivalent. Open to advanced undergraduates with permission from the instructor.

**PHP 2603. Analysis of Longitudinal Data.**

Comprehensive coverage of methods for drawing inference from longitudinal observations. Theoretical and practical aspects of modeling, with emphasis on regression methods. Topics include: multilevel and marginal models; estimation methods; study design; handling dropout and nonresponse; methods for observational data (e.g. time-dependent confounding, endogeneity, selection bias). SAS and S-Plus software are used. Prerequisite: Statistical inference (APMA 1650- 1660 at minimum), regression (PHP 2511), working knowledge of matrix algebra (e.g. MATH 0520). Open to advanced undergraduates with permission from the instructor.

**PHP 2604. Statistical Methods for Spatial Data.**

This course covers a variety of topics for spatial data, including data visualization, Bayesian hierarchical models, spatial models, as well as the computation techniques and statistical software to implement these models. Examples of applications will include, but are not limited to, spatial modeling of data from epidemiology, environmental studies and social sciences. Prerequisites: APMA 1650-1660 or PHP 2510-2511, and MATH 0520; some experience with scientific computing.

**PHP 2605. Generalized Linear Models.**

This course will focus on the theory and application of generalized linear models (GLM), a unified statistical framework for regression analyses. Specifically, we will focus on using GLMs to model the categorical outcomes. The GLM for categorical outcomes include logistic regression, proportional odds model, and Poisson regression. Maximum likelihood estimation and inference will be introduced in the GLM context. The students are expected to have knowledge of probability and inference (at the level of APMA 1650, APMA 1660, or PHP 2520), knowledge of matrix algebra (at the level of MATH 0520), knowledge of regression analysis (at the level of PHP 2511) and knowledge of R.

**PHP 2610. Causal Inference and Missing Data.**

Systematic overview of modern statistical methods for handling incomplete data and for drawing causal inferences from "broken experiments" and observational studies. Topics include modeling approaches, propensity score adjustment, instrumental variables, inverse weighting methods and sensitivity analysis. Case studies used throughout to illustrate ideas and concepts. Prerequisite: MATH 1610 or PHP 2511 or PHP 2580.

**PHP 2620. Statistical Methods in Bioinformatics, I.**

Introduction to statistical concepts and methods used in selected areas of bioinformatics. Organized in three modules, covering statistical methodology for: (a) analysis of microarray data, with emphasis on application in gene expression experiments, (b) proteomics studies, (c) analysis of biological sequences. Brief review and succinct discussion of biological subject matter will be provided for each area. Available software will be introduced. Intro level statistics (PHP 2507/2508 or PHP 2510/2511) recommended. Other students should contact instructor. Intro to software R and Bioconductor tools provided in lab. Open to advanced undergraduates with permission from the instructor.

**PHP 2630. Statistical Foundations of Data Science.**

Data Science is a broad and rapidly emerging field concerned with extraction of meaningful knowledge from data. This course provides an integrated survey of statistical methods and principles that are fundamental to these goals: causal inference, machine learning and prediction, data-driven decision making, quantification of uncertainty, and simulation-based modeling of complex systems. Many of the readings will be drawn from source literature in statistics and computer science. The course will be conducted in seminar style and will be project-based. Students will complete up to 4 data analysis projects using methods discussed in class.

**PHP 2650. Statistical Learning and Big Data.**

This course introduces modern statistical tools to analyze big data, including three interconnected components: computing tools, statistical machine learning, and scalable algorithms. It introduces the principal techniques: extract and organize data from complex sources, explore patterns, frame statistical problems, build computational algorithms, and disseminate reproducible research. Topics include web data extraction, database management, exploratory data analysis, dimension reduction, convex optimization algorithms, high-dimensional linear/nonlinear models, tree/ensemble methods, and predictive modeling. These techniques are illustrated using big data examples from many scientific disciplines. This course is open to graduate students and advanced undergraduate students pursuing degrees in science, technology, engineering, or mathematics. Students should have taken: either one course from: PHP 2510, PHP 2511, PHP 2550, APMA 2610; OR one course from: APMA 1690, APMA 1720, APMA 1930B, CSCI 0150, CSCI 0170; AND one course from: MATH 0520, MATH 0540. Students may ask permissions from the instructor for waiving this requirement. Students are also required to have some experience with any scripting language.

**PHP 2680. Research Methods in Biostatistics.**

This course is designed to cover essential elements of preparing for a career in research in biostatistics. The course will cover: methods of statistical research, with a focus on problem solving in real applications; key elements of communicating research, including writing for academic publication, writing and collaborating on grant proposals, and preparing and delivering oral presentations; and professional and research ethics, with emphasis on ethics of statistical practice in multidisciplinary collaborations. Enrollment limited to 15 graduate students in Biostatistics. Students must be in research phase of program of study.

**PHP 2690A. Advanced Topics in Biostatistics.**

Introduction to applications of statistics and the way statisticians collaborate in interdisciplinary research. Guest lecturers from industry, government and academia will describe how statisticians fit into their environment. Techniques for effective collaboration and oral and written presentation of work including interviewing, writing proposals, giving talks, working with a team and consulting as an individual will be taught. Designed for graduate students (Masters or PhD) who would like to learn how to collaborate on projects with non-statisticians. Permission of the instructor is required to enroll for the course.

**PHP 2690B. Introduction to Bayesian Inference: Hierarchical Models and Spatial Analysis.**

Intended as a first introduction to Bayesian inference. Relevant theoretical background will be reviewed, and the Bayesian paradigm will be introduced, including choice of prior distributions and calculation of posterior distributions. Main emphasis will be on how to use Bayesian thinking to develop models for data with complex structure. Hierarchical models, meta-analysis, Bayesian design and shrinkage estimation will be covered. The benefits of hierarchical modeling will be applied to spatial data analysis as a special topic. Students will be introduced to Bayesian computing and WinBUGS, which is a necessary skill for many modern analyses. Prerequisites: PHP 2510 and 2511, or equivalent. Additional exposure to statistical inference, statistical computing, and a course in calculus would be useful. Open to graduate students only.

**PHP 2710. Interdisciplinary Perspectives on Disability and Death in the Global South.**

The course fosters interdisciplinary critical and integrative thinking and writing about the leading causes of disease, disability and death in low and middle income countries, and potential solutions to prevent and ameliorate these burdens of disease. The first part focuses on measures of population health, health disparities, multi-causal and multi-level thinking, social epidemiology, community interventions and implementation research. These topics provide the fundamental intellectual frameworks for global public health. The second part presents scholars from key disciplinary areas contributing to global health research and practice from many academic units at Brown University. To conclude students present their potential research ideas.

**PHP 2720. Implementing Public Health Programs and Interventions in the Global South.**

This course will focus on the theory and methods related to increasing the impact of evidence-based public health interventions and the effectiveness of healthcare delivery in diverse resource-limited settings across the globe. This course will focus on the influence of social, structural, political, and organizational processes on the development, adaptation, implementation, and evaluation of public health interventions in the Global South. We will review the emerging field of implementation science and critically analyze approaches for the evaluation of ongoing global public health programs.

**PHP 2730. Including the Excluded: Global Health Ethics.**

This course explores the ethics of global public health engagement. Global health implementation is fraught with ethical conundrums. These ethical conundrums include the process of generating rigorous evidence, championing health as a human right, engaging global partners in meaningful collaborations, and implementing complex programs in low-resource settings. These ethical challenges are driven by North-South inequities and by differences in socioeconomic backgrounds, culture, language, and other intersectional identities. This course introduces scholars to global health ethics as a framework for tackling health disparities, grappling in a scholarly and practical way with the complex fabric of global health research, policy, and practice.

**PHP 2740. Learning Global Health by Doing Global Health: Global Health Thesis Seminar.**

This course prepares students for constructive engagement in cross-cultural research. The course aims to familiarize students with global funding priorities and research approaches, and to ask questions about meaningful cross-cultural engagement. Part I (Weeks 1-5) covers global health research priorities and writing a small grant proposal. Part II (Weeks 6-12) focuses on acquiring skills and knowledge to plan and implement a global health project, including strategies for community and stakeholder engagement, the challenges and opportunities of cross-cultural research, and tools for project implementation. This course is a research fieldwork preparation seminar intended to prepare students for global field-based research.

**PHP 2950. Doctoral Seminar in Public Health.**

The purpose of this seminar is to facilitate discussions of current scientific literature in epidemiology, biostatistics, health services, behavioral and health sciences, and public health in general. The main goal is to expose students to current methodological issues and controversies, in an effort to integrate knowledge across disciplines. This seminar is only open to doctoral students in Epidemiology, Behavioral and Social Health Sciences, Biostatistics and Health Services Research.

**PHP 2980. Graduate Independent Study and Thesis Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHP 2981. Graduate Independent Study and Thesis Research (half-credit).**

Half-credit independent study research course consisting of 90 credit hours of supervised independent work. Intended for master's students. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHP 2985. MPH Independent Study for Thesis Preparation and Research.**

This optional half credit course may be taken up to two times during preparation for the MPH degree. It provides MPH students with self-directed thesis research and preparation time under the guidance of a thesis advisor. Prior to taking this course the student and advisor must reach agreement as to what constitutes satisfactory completion of the course (e.g., completion of a satisfactory literature review, attainment of specific thesis benchmarks, or completion of the thesis). Please check Banner for the correct section number and CRN to use when registering for this course.

**PHP 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**PHP XLIST. Courses of Interest to Concentrators in Community Health.**

# School of Professional Studies

The Brown University School of Professional Studies administers programs including:

- Executive and Professional
  - IE Brown Executive MBA
  - Executive Master in Cybersecurity
  - Executive Master of Healthcare Leadership
  - Executive Master in Science and Technology Leadership

For further information visit: <http://www.brown.edu/academics/professional/>

## Executive Masters Programs

### Executive Master in Cybersecurity

The Brown University Executive Master in Cybersecurity (EMCS) is a 18-month program for professionals designed to cultivate high-demand, cross-industry executives with the unique and critical ability to devise and execute integrated, comprehensive cybersecurity strategies for nations and industries across the globe.

Leveraging Brown's culture of interdisciplinary and cybersecurity excellence, the program fosters industry leaders prepared to address cybersecurity's global, technical, human, and policy challenges. The program convenes world-class thought leaders from Brown's top-ranked Department of Computer Science and Watson Institute for International and Public Affairs, as well as accomplished practitioners driving advances in cybersecurity.

EMCS forges visionary leaders ready to deploy successful strategies for cybersecurity that address:

- Technologies such as big data, cloud, mobile, Internet of Things
- Social trends including social networks, globalized workforce
- Human factors
- Economic tradeoffs and risk management
- Policy and privacy
- Effective leadership

For further information including admission criteria and tuition and fees please visit: <http://www.brown.edu/academics/professional/cybersecurity/>

### Executive Master of Healthcare Leadership

The Brown University Executive Master of Healthcare Leadership prepares visionary leaders to transform healthcare. This 18-month intensive degree program is designed for clinicians, executives, and senior administrators who have significant responsibility in the healthcare industry; including those from health care delivery, public health, drug and product manufacturing, health care consulting, health management systems, insurance, patient advocacy, and from legal, policy and regulatory settings. It is a blend of on-campus and online learning that allows participants to work full time while pursuing an advanced degree.

The faculty and participants in the program have a depth of experience in the healthcare industry and are fully engaged in addressing the gaps and constraints of the current system. The course of study is tailored to this industry and leadership development is purposefully considered in the healthcare context.

### Course of Study

- Quality Improvement and the Healthcare Learning Organization
- Data-Driven Decision Making: The Structure, Conduct, Review, and Evaluation of Research
- Financial Decisions in the Changing Healthcare Landscape
- Healthcare Policy: Yesterday, Today, and Tomorrow

- Information-Powered Patient Care: Electronic Health Records, Health Information Technology, and Medical Information Systems
- Leadership and Marketing Skills for Healthcare Transformation
- Navigating the Regulatory Maze
- Strategic Planning and Value Creation in Integrated Healthcare
- The Critical Challenge: Capstone Project

For further information including admission criteria and tuition and fees please visit: <http://www.brown.edu/academics/professional/healthcare-leadership/>

### Executive Master in Science and Technology Leadership

The Brown University Executive Master in Science and Technology Leadership transforms engineering, science, and technology professionals into leaders prepared to drive innovation in today's complex, rapidly evolving, global markets. This 16-month program of online and residential learning is for experienced professionals who are ready to go beyond their technical expertise, broaden their impact, and achieve greater success.

Through coursework and teamwork, students develop their capacity for:

- **Strategic Thinking and Decision Making** to anticipate and adapt to changing market needs, technological advances, and increased global competition
- **Global Value Creation** to identify and use sources of innovation in varied corporate and national settings to create products with global value
- **Innovation** to develop technologies that shape the future and change the world
- **Leadership and Communication** to lead and inspire diverse, cross-functional teams, and influence stakeholders in and across organizations

For further information including admission criteria and tuition and fees please visit: <http://www.brown.edu/academics/professional/emst/>

## Courses

### Cybersecurity

#### EMCS 2000. Introduction to Computer Security.

This course teaches principles of computer security from an applied viewpoint and provides hands-on experience with security threats and countermeasures. The course additionally covers principles and skills useful for making informed security decisions and for understanding how security interacts with the world around it. Topics include general security principles, cryptography, authentication authorization, identity, access management, operating systems security, network security, web security, and applications security. The course aims to balance theory and practice.

#### EMCS 2010. Applied Cryptography and Data Privacy.

This course begins by introducing the fundamentals of cryptography. In particular, we cover the concepts of provable security and other cryptographic methods and study basic cryptographic tools such as encryption, digital signature schemes and zero-knowledge proofs. We then explore a broad range of cryptographic applications, such as data privacy, secure communications, cryptographic access control, cryptographic currencies and privacy preserving technologies. The teaching style emphasizes the use of the right cryptographic tools to solve security and privacy challenges, and pitfalls that may arise in deploying cryptographic methods in real-life systems. Projects address applications of cryptography to application domains familiar to the students.

**EMCS 2020. Advanced Topics in Computer Security.**

This course covers selected advanced topics in computer security by providing a deeper coverage of subjects introduced in previous courses, such as authentication, encryption, operating system security, and network security, and introducing new subjects, such as cloud security, mobile security, blockchain technologies, and machine learning applications to security. The course incorporates real-life examples that motivate the deployment of advanced cyber defense measures. As part of the course assignments, students explore connections between cyber threats and defenses taught in the course and their own critical challenge projects.

**EMCS 2200. Global Cyber Challenges: Law, Policy and Governance.**

This course will examine the problems confronting the United States and the international community in addressing network and computer insecurity while upholding privacy, civil liberties and other fundamental values. We will examine cybersecurity as a problem that can be addressed from a policymaker's perspective. We will look at a variety of legal and policy frameworks as they relate to cybersecurity and cyber conflict, modeling ways they may be employed to address cybersecurity problems.

**EMCS 2210. Privacy and Personal Data Protection.**

Students will learn about and gain practical experience with: the development of modern privacy law around the world; the current US legal and regulatory framework, including protection of personal health, financial, educational, workplace, and other personal data; protection of personal data and privacy around the world, including the new European Union General Data Protection Regulation; the relevant institutions, such as the Federal Trade Commission and the Data Protection Authorities; personal data breaches; the privacy and autonomy of the individual in relation to the state, as well as corporations; standards; Privacy by Design; and emerging issues arising from technological developments.

**EMCS 2400. Effective Leadership.**

This course prepares students to assume greater responsibility roles in their organizations by developing and reinforcing critical skills for a cybersecurity leader. Course topics include professional development, team building, communication, ethics and power, change management, conflict resolution, and cyber game simulation.

**EMCS 2420. Management of IT Systems and Cybersecurity.**

This course analyzes the practical challenges facing executives of business organizations in managing information technology systems and cyber risks. It focuses on the costs and tradeoffs that are involved in all security and privacy decisions. The teaching style is based on role modeling and students are coached on how to develop operational skills and apply their security background to strategic planning and day-to-day decision making. Projects aim at increasing the students' confidence about the security decisions they make and at deepening their understanding of globally-accepted security best practices and heuristics.

**EMCS 2430. Human Factors: People and Software.**

Security is not solely, or sometimes even primarily, a technical problem; rather, human aspects are at least as important, especially the ways they interact with the technologies. The course communicates this point from many perspectives, ranging from behavioral issues to user interfaces to personnel management and more. Students will emerge with a richer understanding of the strengths and weaknesses of human agents, and thus how they are central to both the occurrence of and of solutions to cybersecurity problems. Projects include case studies on security as it relates to: business workflows, tradeoffs with usability, and the detection of insider threats.

**EMCS 2600. The Future of Cybersecurity: Technology and Policy.**

This course examines advanced and emerging cybersecurity technology and policy issues. We explore operational security, product development and acquisition, securing enterprise computing, and human factors. We also examine corporate issues that are likely to arise at the national and international levels. These include regulation, breach reporting requirements, and loss of critical services. We also examine Internet governance regimes and norms for states and global ICT companies. Finally, we discuss emerging issues such as moving targets defense, national encryption policies, secure computation, Internet sovereignty, and unusual types of threat. Students are encouraged to reflect on the interactions between policy and technology.

**EMCS 2800. Critical Challenge Project.**

Independent project under the direction of a faculty member.

**Health Care Leadership****EMHL 2000. Strategic Planning and Value Creation in Integrated Healthcare.**

In this course, participants explore the meaning of value creation in healthcare organizations—how it relates to high performance, how it varies and is measured in different healthcare segments, and how it is embodied in the structure and performance of their own organizations. A holistic High Performance Model of enterprise value creation is presented, including strategic planning, process improvement, and resource and organizational alignment. The model is discussed from the perspectives of a variety of healthcare organizations—with the goal of applying the model to create value for the participants' own organizations.

**EMHL 2010. Healthcare Policy: Yesterday, Today, and Tomorrow.**

In this course, students appraise past and current political, legal, technological, and economic U.S. healthcare policy developments. Students critically examine the implementation of alternative methods of health services delivery and financing within multiple global healthcare systems. Participants question assumptions, think creatively, and consider integrated patient care solutions to prepare for change and new paradigms within the global healthcare sector.

**EMHL 2020. Leadership and Marketing Skills for Healthcare Transformation.**

In this course, students develop the management, marketing, and leadership skills needed to guide organizational change and refine their personal leadership style to lead in today's rapidly-changing health care landscape. Particular focus is placed on negotiation, conflict management, collaboration, and team building skills. Participants create a robust plan for their continuous development as a leader. Students also learn how to harness the power of social media to develop their brand and their organization's influence in the marketplace.

**EMHL 2030. Data-Driven Decision Making: The Structure, Conduct, Review, and Evaluation of Research.**

This course will provide an overview of the methods and applications of the therapy economics, biostatistics and epidemiology in healthcare sector decision-making. Specific topics include: the application of therapy economics and economic evaluation to treatments, pharmacoeconomics and technology assessment; the assessment and interpretation of published epidemiological studies; institutional oversight of epidemiological research programs; the four key steps of statistical analysis (identification of scientific programs or problems of interest, collection of the required data, analysis and summary of data, and generation of a conclusion).

**EMHL 2040. Navigating the Regulatory Maze.**

This course explores the culture of decision making as well as the structure and role of key US and international regulatory bodies. Students explore how health care is regulated with an eye towards understanding how existing regulations improve quality, enhance access, and control cost. The topics of risk management, public health, and product/drug regulation are emphasized.

### **EMHL 2050. Info-Powr Patient Care: Electr. Health Records, Healthcare Info Techn. + Medical Information Systems.**

This course will provide an overview of the major aspects of information technology (IT) as they relate to both the causes of and the solutions to current problems in healthcare. Issues of standardization, integration, communication and patient engagement will be stressed, and the types of strategic planning for and governance of information systems will be explored. During the course students will be presented with real problems in the field of HIT and explore possible solutions.

### **EMHL 2060. Quality Improvement and the Healthcare Learning Organization.**

In this course, students explore the quality improvement drivers, principles, systems, and tools that help create a healthcare learning organization. Students discover how quality improvement creates value, how to demonstrate the value of quality improvement to their colleagues, and how to ultimately develop a culture of learning within their organization. Students compare the learning needs of healthcare organizations to those in other industries. Students design and implement a quality improvement project within their own organization, and develop a "learning organization roadmap" for their organization.

### **EMHL 2070. Financial Decisions in the Changing Healthcare Landscape.**

This course focuses on the area of financial management as applied to international health organizations. The course emphasizes the application of principles and concepts of international health financial management to global health providers that represent innovative new structures and organizations, such as Accountable Care Organizations (ACOs) that offer integrated patient care. Students will gain competencies in the application of financial analysis tools and techniques internationally and in the interpretation of data for sound decision-making through case assignments and a class project to analyze the financial results of high performing healthcare organizations serving global markets.

### **EMHL 2080. The Critical Challenge: Capstone Project.**

In this project, supervised by Executive Master of Healthcare Leadership (EMHL) faculty, students identify a critical challenge within healthcare and then work collaboratively to integrate knowledge from various perspectives and healthcare sectors and to apply relevant skills to develop possible solutions to their challenge. Students draw upon knowledge and skills from coursework with particular emphasis on collaborating across healthcare sectors, considering ethical implications, communicating effectively and developing creative and viable solutions. Upon completion of this project, students will be able to successfully integrate knowledge of healthcare policy, strategic planning, regulation, management, marketing, healthcare research, quality improvement, finance and information technology to address a critical challenge within healthcare. Project outcomes should prove applicable to professional practice. This course spans two semesters.

### **EMHL 2090. Leadership and Professional Development.**

The new leadership and professional development course supports 12 of our EMHL leadership competencies. As a result of participating in this class, students will expand their knowledge of leadership theories, in particular adaptive leadership theory, strengthen the interpersonal skills associated with the effective use of authority and leadership and increase their awareness of their impact on others. They will be consistently challenged to apply this knowledge and skills to their work environment.

## **Science and Technology Leadership**

### **EMSL 2000. Effective Leadership: Theory and Practice.**

The goal of this course is to enable participants to forge their own model for effective leadership, applying principles revealed through the study of literature, history, philosophy, politics, and contemporary leadership theory. We will identify the knowledge and competencies required to develop a robust identity as a leader. The course will then explore how leadership and strategy intersect and examine how leaders engage followers to unite around shared purpose and vision. Finally, we will review the ethical implications of leadership actions within an international context and establish the practices necessary to avoid the pitfalls of toxic leadership.

### **EMSL 2010. Persuasive Communication.**

This course will provide students with theory, practice opportunities and individualized coaching to help them enhance their oral and written communication skills. Students will focus on persuasive communication, including verbal and nonverbal communication, the relationship between a presenter's goal and the goals/perspectives of the audience, and the rhetorical elements of logos, ethos and pathos. Students will learn how to create compelling business presentations using data visualization to garner people's attention and stimulate action. This course includes the practice of writing as a method for thinking and learning, which develops students' capacity for reflection and awareness of one's self and others.

### **EMSL 2020. Leadership and Professional Development.**

This half credit course is a critical component of EMSTL. All readings, assignments and in class activities are focused on the four areas essential for leadership development: self-awareness, understanding leadership theory, skill development and the application of learning to the work environment. As a result of participating in this class, students will expand their knowledge of leadership theories, in particular adaptive leadership theory, strengthen the interpersonal skills associated with the effective use of authority and leadership and increase their awareness of their impact on others. They will be consistently challenged to apply this knowledge and skills to their work environment.

### **EMSL 2200. Economic Perspectives on Strategic Decision Making.**

This course will develop students' strategic thinking skills by providing a theoretical framework for modeling rational decision-making, with extensions to interactive decision-making (game theory); decision-making under uncertainty; and behavioral approaches to decision-making. The course will also study applications of the theory to profit maximization by individual firms under different market structures such as perfect competition and oligopoly.

### **EMSL 2210. Finance and Business Strategy.**

The goal of this course is to learn the fundamentals of financial accounting, investment decision-making, and business strategy. The course will cover basic accounting concepts, including revenue recognition, inventory, long-lived assets, present value, long-term liabilities, and financial statements. We will study how accounting information is used in forecasting, operating, and measuring an enterprise. The course will explore how managerial accounting concepts are used to develop budgets and evaluate results and how to implement short- and long- term corporate strategy. Finally, the course will examine how strategic management is formulated in a multi-faceted environment of social, political, economic, and legal entities.

### **EMSL 2220. Psychological Perspectives on Strategic Decision Making.**

This course will introduce students to elements of social and cognitive psychology as they relate to business and leadership. The course's premise is that there is a science of relevance, in contrast to the view that great leaders draw their success entirely from charisma, intuition, and good luck. The course will introduce two major perspectives on judgment and decision-making: the heuristics-and-biases paradigm and the ecological-rationality paradigm. The course will also explore the two great (and interrelated) challenges of interpersonal behavior: trust and power. Lastly, the course will cover the relevance of research on creativity and happiness to business and leadership.

### **EMSL 2400. Entrepreneurial Leadership in Innovative Firms.**

Entrepreneurial managers are creators of fundamental and radical change. This change may manifest as a new product, process, technology, business model or organization, or a new industry. Entrepreneurial activities are responsible for moving society towards a new state that was previously only an idea. This is a position of power, but also responsibility. Entrepreneurial managers can play a crucial leadership role in society – by conceptualizing and materializing radical innovations bringing about large-scale social and technological change. Leadership can take various organizational forms and can occur in multiple sectors, underscoring the general management foundations of this course on entrepreneurship and innovation.

**EMSL 2410. Innovation and Technology Development.**

Technological trends and marketplace derive marketing strategy for technology development and management. Technology leaders use innovative models with effective product management to serve market needs. The course provides examples and case studies from biotechnology, environmental and energy technologies, information and communications technologies, and nanotechnology to learn about and gain practical experience applying new innovation models; engaging the constellation of innovation stakeholders; fostering a culture of continuous innovation; leveraging innovation, science, and technology policies; protecting intellectual property; overseeing effective product management; responding to technology trends and trajectories; and understanding regulations and external factors that affect technology development.

**EMSL 2420. Technology Leadership in a Changing Environment.**

This course examine factors that contribute to successful technology leadership in today's fast-paced and ever-evolving environment. Students use case studies from a wide range of industries to learn about, and gain practical experience in, the issues that ultimately determine the success (or failure) of highly technical undertakings. The alignment of marketing, technology and project execution is examined in both its best case and worst-case implementation. Through the lens of organizational effectiveness, value creation, addressing market needs and meeting customer expectations, students examine best practices used to engage the array of stakeholders that are crucial to positive outcomes.

**EMSL 2600. Unlocking Value Globally.**

This course examines how firms can mobilize worldwide knowledge to create commercial value and promote technological leadership. We will consider how this has been achieved by firms historically in a variety of national settings. We will also consider whether and how contemporary technological change – i.e., advances in data analytics, sensing, automation, and cognitive computing – has changed the nature of cross-border learning and innovation. Throughout the course, we will examine how processes at the firm level interact with societal institutions, governmental policies, and other ostensibly non-market forces.

**EMSL 2610. South Korea: Rise of a Technology Leader.**

This course is designed to develop innovative technology leaders who can more effectively operate in global settings by acquiring a better understanding of local and regional innovation ecosystems and their success factors. It aims to help students develop those capacities by providing an opportunity to evaluate all aspects of the Korean innovation ecosystem including government policy, Korean multinationals, consumers and culture. Korea was chosen because of the country's recognized position as a technology leader and its rapid evolution from poverty. Students will apply critical, comparative, analytic skills and develop cultural awareness through academic lectures, interactions with leaders at local companies (e.g. Samsung Electronics, Hyundai/Kia Motors, Naver and others) and cultural field trips.

**EMSL 2700. Data Analytics and Machine Learning for Digital Enterprises.**

This course prepares students to understand fundamentals of Big data and Machine Learning and apply those concepts to some on a real-world application. In particular, big data analytics and machine learning can be used to evaluate information quickly and effectively for your company in order to achieve a competitive advantage. It can be used to predict customer's behaviors and patterns, increase efficiency, improve customer experiences, and ultimately, boost profits for your business.

**EMSL 2800. Critical Challenge Project.**

The Critical Challenge Project (CCP) is central to the Executive Master in Science & Technology Leadership program curriculum. The project identifies a critical organizational challenge, drawing from students' own professional experience or future aspirations. Under the direction of an advisor, students analyze the critical challenge from multiple perspectives and through the insights developed throughout the program and create a comprehensive plan for addressing it. The course provides opportunities to students to apply personal leadership skills to business landscape which is adaptable to changing market needs, technological advances, and increased global competition. Successful CCPs present evidence of incorporation of learning accomplished through program courses, substantial research and stakeholder understanding and effective proposals for outcomes and solutions to be implemented in order to receive a grade of S and credit for the CCP course.

## IE Brown Executive MBA

Brown University School of Professional Studies and the IE Business school in Madrid, Spain offer a 15 month joint Executive MBA degree program to Senior managers, professionals, and entrepreneurs with significant work experience.

Combining IE's strength in interdisciplinary management education and Brown's excellence in the humanities, social, biological and physical sciences, the two schools have created the new IE Brown Executive MBA to develop informed, globally-minded, and innovative leaders.

The program provides senior managers with the opportunity to develop and broaden their management and leadership skills in an intensive, international environment. The program brings together faculty from the IE and Brown, integrating leading management thinking with wider perspectives from the humanities, social sciences, engineering, and life sciences.

For more information on the program and admissions process please visit <https://professional.brown.edu/emba/>.

## Courses

**EMBA 2000. Entrepreneurial Opportunities in Developing Regions.**

This course utilizes team-based experiential learning methods for the further development of skills in business opportunity creation. It builds upon the courses on entrepreneurial management and ethnographic research methods to investigate a business opportunity that participant teams create within, or stemming from, a developing region. The course leverages field work in a specific complex developing regional economy that serves as a proxy for such developing regions more broadly. Upon completion of the course, participants should be able to develop business opportunities in complex, developing regions and have a greater appreciation of the potential and challenges these regions represent.

**EMBA 2020. Corporate Innovation Process.**

This course considers the unique barriers to innovation that must be overcome within established firms as well as the techniques and best practices utilized by exemplar firms in executing successful innovation strategies. The business environment is evolving rapidly and established firms must innovate to survive and prosper. Executives note that corporate innovation is extremely or very important to their firm's strategic growth. Challenges to innovation execution considered in this class include human capital alignment, organization of the innovation process, and encouragement of collaboration and risk taking within the enterprise.

**EMBA 2100. Ethnographic Research Methods.**

This course develops basic skills in learning to use ethnographic research methods, the hallmark of anthropology and a crucial methodology for analyzing why people behave the way they do. Concentration is on the two key elements of ethnographic methodology: participant observation and interview techniques. Students apply these techniques in assigned course project work.

**EMBA 2110. Society & Culture in the Age of Globalization.**

This course is designed to draw on analytical tools from sociology and anthropology to make sense of the rapidly changing nature of global society. In the past 3 decades the flows of commodities, ideas, people, norms and resources across international borders has accelerated exponentially. Driving these dynamics are not only market forces, but also social networks, cultural diffusions and institutional transformations. As a complement to the courses on political economy and global governance, this course focuses on the social structures, institutional forms, political processes and cultural practices that mediate the encounter of the global and the national.

**EMBA 2200. The Spirit of Entrepreneurship.**

Historians argue that capitalism, especially its main engine entrepreneurship, took hold and flourished in the West not because of the promise of wealth it contained, but because of the appeal of a distinctive ethical outlook—new ideas about the value of work, business, and the acquisition of wealth that constitute the “spirit of capitalism.” The objective of this module is to trace the development of this new ethical outlook animating capitalist entrepreneurship—the “spirit of entrepreneurship”—from its Reformist beginnings into our own day.

**EMBA 2210. Shared History of Slavery & Capitalism.**

Over five meetings, we'll study specific aspects of the history of the Atlantic slave trade and the plantation regimes of the Americas. At the same time, we will explore key principles of historical reasoning and argumentation: the reliance upon evidence to support interpretation; the appreciation of contingency and the specificity of time and place; skepticism towards claims of the universality of experience and the inevitability of outcomes. Finally, in seeking to unravel the paradoxical relationship of free markets to unfree people, we will bring historical perspective to questions about commodities and liberties that remain urgent in the current global economy.

**EMBA 2220. The Political Economy of Development.**

The goal of this unit is to introduce executives in the MBA Program to the politics economic & social development, with a focus on both long-run historical determinants of development and the more recent effects of globalization and neoliberal reforms on economic growth and inequality. To put these issues in context, the unit addresses debates about development in Latin America and Sub-Saharan Africa.

**EMBA 2230. The Imprint of Time, Space, and Place on our Bodies: Understanding Health Disparities.**

Health is a fundamental human right regardless of where one is born or the social conditions one is born into. Disparities remain for the most vulnerable populations & communities, even with developed low-cost, evidence-based strategies. This course interrogates health disparity conundrums; explore social determinants of health through experiential learning; highlight pathologies of power driven by historical, political, and economic forces through discussion and debate, and using case-based learning; examine opportunities for achieving health equity, guided by social justice approach and utilizing a capabilities paradigm; define ethical challenges in tackling health disparities due to power differentials across countries, communities, populations.

**EMBA 2300. Globalization and the Arts.**

This course will exemplify the role of the humanities in high-level practical education. The humanities are understood here as way of understanding the human condition in its depth and variation. Humanistic understanding is essential to the negotiation of the globalized world and its challenges. How do the increased exchange, access, and flow of persons, products, and markets associated with globalization negotiate cultural, political, and social difference, particularity, and inequality? How do global systems negotiate between shared benefit and exploitation? Between cultural exchange and innovation on the one hand and the preservation of heritage on the other?

**EMBA 2310. Natural Collections: Responses of Biodiversity, Industrialization and Change.**

This course explores questions about biodiversity loss and maintenance. The appropriation, exploitation and introduction to different landscapes of various plant and animal products are linked in recent history to the intertwined projects of imperialism and the enlightenment. For these reasons, containing nature is also about products and markets. The relationship between human control over nature, natural resource decline, and entrepreneurial and public sector strategies to protect the environment are considered. The course questions the ways and circumstances in which biodiversity is valued and examines the role of various social organizations in managing the environment and its resources.

**EMBA 2320. Trends in Global Architecture and Urbanism Today.**

This course introduces students to current questions in global architecture. After a survey of the history and motivations behind the internationalization of architectural forms, we examine current debates about sustainable architecture and smart urban growth, global urban problems and potential solutions to mass housing, and the application of new technologies such as “smart materials” in architecture. Questions of local vs. global building traditions are considered. Students gain a new understanding of their built environment and will be able to “read” and analyze buildings they encounter, engaging meaningfully with questions about formal, functional and material choices.

**EMBA 2400. Global Markets.**

This course investigates the institutions and regulations governing our global economy. Recent events have shown that traditional national regulations (or lack thereof) are no longer adequate yet international accords over aid, trade, labor standards and a host of other issues are fiercely and frequently contested by competing interests. The results of these debates, and the resulting economic systems and policies will determine winners and losers in the new global economy. Understanding the interaction between this political-economic-regulatory environment and individual firms and industries is key to determining both the possibilities for and constraints on global business in today's fast changing economy.

**EMBA 2410. The Rise of China.**

This course examines the drivers of China's emergence as a global power, and the consequences of that emergence for international business practitioners. Employing perspectives from comparative politics, international relations, and economics, the course explores the connections between China's domestic institutional transformation, its system of governance, and its increasingly powerful indigenous firms. To what extent have Chinese firms become innovative? How have they become innovative – indeed, how have they even basic growth at all – in a home environment dominated by persistent corruption and unfettered state power? The course examine specific strategies international business practitioners can employ to navigate the Chinese environment.

**EMBA 2500. Cultivating Conditions for Innovation & Creativity.**

What insights can an artist bring to business? When we cultivate a discerning sensitivity to the contexts in which we operate, we are more likely to identify possibilities that others miss. A critical awareness fertilizes the imagination. A creative outlook can enrich how we see the world. These ideas that spring from the imagination can be refined into concrete outcomes. By fostering a keen understanding of how our own personal creative process works, we will explore how art provides strategies for the creation of value. We will examine these strategies as we discover ways in which creative processes facilitate innovation.

**EMBA 2510. Influencing Through Communication.**

This course is designed to make students more aware of the elements of effective communication (both verbal and non-verbal) to enhance their own communications and to more critically evaluate communications of others. During this practical course, students will learn elements of classical rhetorical theory and current perspectives on persuasion. The objective of this course is to teach students the elements of effective and persuasive communication to enable them to achieve concise, effective communication in all modes, especially presentations and public speaking.

**EMBA 2520. Public Speak Your Mind and Your Heart.**

What you say, how you say it, and how you make it relevant to the audience, can turn an idea into a power horse. And many ideas are dumped daily because their originators do not present them in a dynamic and convincing way. Presentation skills rank among the most practical for financial managers: nothing will give you a more immediate competitive edge than the ability to communicate orally in a fluent and confident manner.

**EMBA 2530. Key Reflection Project.**

The Key Reflection Project (KRP) is a culminating academic project where students integrate and apply the knowledge acquired during the program to examine an idea or solve a challenging problem that is within their area of influence or personal interest. The project must mirror the spirit and learning objectives of the program, which are based on the awareness of social complexities and critical analysis of business issues. The pedagogical objective is for students to practice the application of the multidisciplinary learnings of the IE Brown program to real and complex problems that they face in their own workplaces.

**EMBA 2540. Global Trends Seminar Series.**

This seminar aims to foster awareness and discussion on trending issues that have an impact on managerial work. The Series will concentrate on two highly imbricated fields: Global Leadership Awareness and Technology Trends. Students will be exposed to insights and discussion from speakers that will share their ideas about the state of the art of geopolitics, emerging AI developments and social implications of the integration of technology in the world of work. The seminars will take place either during the residential periods in Madrid and Providence or via webinars during the online periods.

**EMBA 2550. Thinking About Thinking About Management.**

The complexity involved in corporations nowadays is daunting, as issues related to globalization are adding to the classic issues of corporate and competitive strategy. This course has two main objectives. First, it provides an organizational theory perspective and thereby complements the previous courses of strategy and management. Second, it seeks to develop your critical thinking through specific reading of the material assigned and continuous connections with practical examples.

**EMBA 2600. Financial Accounting.**

This course will emphasize the understanding of how financial statements are created and how accounting decisions affect these statements. The course will teach the theory emphasizing the use of accounting as a tool for decision-making and problem solving. The objective of the course is not to memorize accounting rules and perform "bookkeeping" activities. However students will have to practice some bookkeeping in order to understand deeper issues that go beyond it. Students will also learn the problems associated with accounting subjectivity and flexibility while evaluating the appropriateness of accounting policies and estimates.

**EMBA 2610. Financial Management.**

This course focuses on the fundamentals of corporate finance. The objective of corporate financial theory is to maximize the value of the business. In this context financial decisions can be broken down in two basic decisions (1) how much to invest and what assets to invest in, and (2) how to raise the necessary cash. This course provides a framework to answer the first question: how the firm should make the investment, or capital budgeting decision, in order to increase shareholder value.

**EMBA 2620. Cost Control.**

Students, as future managers, will utilize the output of cost systems (the primary internal information systems in a firm). Students will gain an understanding of cost accounting systems, including a familiarization with: the goals of cost accounting systems; the fundamental features and design of cost accounting systems; and the various uses of the data provided by cost accounting decisions. A sound understanding of these issues is necessary to interpret cost accounting system outputs; to transform them from data to information and knowledge. Without this understanding, cost accounting data is often mis-interpreted and/or mis-applied leading to erroneous decision making.

**EMBA 2700. Managerial Economics.**

Managerial Economics provides students with a framework to understand the main economic variables and dynamics that affect business activity. Understanding the microeconomy is the first stepping-stone toward achieving a full grasp of the economic world that surrounds us. Most of the world's countries rely on free markets to make most of their economic decisions, and those markets automatically answer the key economic questions (What will we produce? How will we produce it? At what price? Who will get it?) through the operation of supply and demand. The course will review the basic concepts of supply, demand, market failures and externalities to provide a broad perspective on how free markets work. It will then move on to elasticity and market structures and their impact on profitability. The objective is to give students a firm understanding of how supply and demand at the micro-level determine the basic parameters of doing business.

**EMBA 2710. The African Economy.**

The African economy sessions will begin with an overview of the continent, focusing in particular on sub-Saharan Africa and eventually centering on South Africa. In an interactive videoconference lecture, the development challenges and their possible solutions will be reviewed along with the growth prospects for economies and markets in the region in coming years.

**EMBA 2810. Managing Communities of Work.**

The objectives of this course are to enable participants to: discuss the psychological, social and strategic contexts in which HR processes and principles operate; describe and appraise the social and strategic benefits of "general management" expending time and resources on "employee issues"; analyze and critique people-based processes relying on their psychological, social and strategically oriented business merits; assess the relevance of HR policies the impact on business outcomes as a function of factors such as the market, the industry or the culture of the organization; and, reflect upon emerging people topics in today's organizations, which impact the managerial profession.

**EMBA 2820. Marketing Management.**

This course is designed to provide students with a deep understanding of the fundamental principles of marketing and marketing strategy making. The focus will be on getting to know the basic techniques of defining and segmenting a target market for goods or services, building a brand with a meaningful positioning, and then integrating product, price, promotion and distribution to offer a superior marketing mix leading to a long-term competitive advantage. Finally, students will be given an insight into consumer behavior and brand management, as well as understanding the role played by different marketing tools such as marketing research.

**EMBA 2830. Operations & Supply Chain Management.**

This course provides an introduction to the basic aspects of the operation of the firm by presenting an integrated vision of those concepts and techniques and an understanding of the new role of operations and supply chain management in the overall strategy of the firm. The course structure initially addresses issues related to operations strategy, followed by a focus on systems and supply chain management. The course closes with a consideration of operations in practice.

**EMBA 2840. Competitive & Corporate Strategy.**

This introductory course to the area of strategic management aims to provide students with a thorough understanding of the internal and external factors that shape a firm's ability to create value. Students will be familiarized with tools to analyze industries, firm resources and competitive interactions, both on the individual business and the corporate level. Perhaps most importantly, the courses strive to instill a strategic mindset that will enable students to go beyond a simple application of tools to derive a deep understanding of firm competitive behavior in order to enhance their own firm's performance in any given situation.

**EMBA 2850. Technology & Innovation Strategy.**

The course introduces the critical elements of designing and developing digital products and services. Course participants will be able: to analyze digital transformation and its affect on society, industries and individuals; to develop an appreciation of the importance of information technology; to identify and understand the economic and technological factors at the heart of the digital revolution; to manage and lead product and service innovation initiatives; to apply concepts, tools and techniques to design appropriate digital business models; to strategically manage digital transformation of a business; and to understand the implications of emerging IT trends.

**EMBA 2860. Strategy at the Intersection of Business & Society.**

This course builds on the principles of strategic management to build an understanding of the impact of society on firm strategy and to learn to shape, accordingly, superior business strategies. The course addresses: stakeholder strategy (creating shared value); issue management (how social movements impact firm strategy); links between social performance and financial performance; communicating corporate strategy in line with social expectations in a social media era; and staying competitive in a global and digital era.

**EMBA 2870. Cross-Cultural Biases.**

Fundamentally, we work with other people and have a profound influence on others. This course aims to enhance students' global leadership capabilities by: 1) cultivating deeper cross-cultural sensitivity, awareness, & competencies. 2) bringing awareness to the biases (both individual & cultural level) that we each hold; and 3) offering opportunities for critical reflection on how awareness of & strategies for working around these biases make us more effective global leaders.

**EMBA 2900. Entrepreneurial Management for Executives.**

This course provides a forum for the in-depth examination of mindsets, methods, and managerial activities that follow the entrepreneurial process from opportunity recognition to growing new ventures, whether as startups or within existing businesses. In particular the course will examine the role of finding a fit between one's passions, skills and markets in the pursuit of opportunities and facilitate an understanding of the stages in the entrepreneurial process: opportunity recognition, customer discovery and market validation, solution validation and crafting of the business model.

**EMBA 2930. Leading People, Teams and Organizations.**

This course focuses on advancing students' understanding of how to lead and manage with the aim of increasing personal and organizational effectiveness. It is designed to address several fundamental aspects of managing and leading people. These include understanding and influencing group behavior and performance, working with and managing people on a one-on-one basis, and leading, motivating and aligning people behind a common vision or direction. This course places a particular emphasis on increasing students' self-awareness as leaders and their ability to address the challenges of leading change in organizations.

**EMBA 2940. Motivation Science.**

Course objectives include: learning how motivation works from recent conceptual and empirical advances in psychology and using this knowledge to make motivation work for you—in your own performance and as a motivator of others. Most people believe that the best way to motivate others is by using “carrots and sticks” (incentives), which is based on the classic assumption that what motivates people is to approach pleasure and avoid pain (the hedonic principle). Motivation however is more than “carrots and sticks”, and, importantly, there are many different kinds of motivational mechanisms that underlie people's choices and what influences them.

# Departments, Centers, Programs and Institutes

## Africana Studies

### Chair

Brian W. E. Meeks

Located in the historic Churchill House on the campus of Brown University, the Department of Africana Studies is the intellectual center for faculty and students interested in the artistic, historical, literary, and theoretical expressions of the various cultures of Africa and the African Diaspora. Central to the intellectual work of the department is the close collaboration of artists and scholars in examining relationships between academic and artistic knowledge about the world and human experience. Our commitment to rigorous scholarship and robust student and community development is grounded in a truly global understanding of the reach and implications of the Africana World.

For additional information, please visit the department's website: [http://brown.edu/Departments/Africana\\_Studies/](http://brown.edu/Departments/Africana_Studies/)

### Africana Studies Concentration Requirements

The concentration in Africana Studies critically examines the artistic, historical, literary, and theoretical expressions of the peoples and cultures of Africa and the African Diaspora. Central to the work of students and faculty in the concentration is the close collaboration of artists, scholars, and writers in examining relationships between academic and artistic knowledge about the world and human experience. Concentrators work closely with faculty members in developing new knowledge about the world and human existence through the critical and comprehensive study of the peoples and cultures of Africa and the African Diaspora. Concentrators are encouraged to study abroad in Africa, the Caribbean, and/or Latin America and to acquire language competency in a language other than English spoken in Africa and the diaspora.

Africana Studies presents a different conceptual paradigm that connects the global black experience. Africana Studies engages issues about historical and contemporary responses to local and global crises. It engages with how people of color create their own knowledge culturally and politically. It is oftentimes a critique of how forms of knowledge are produced. Concentrators acquire a host of interdisciplinary skills that allow them to ask questions about the world around them, and forms of knowledge production while developing critical analytical skills. Our concentrators deploy these skills in other classes, enriching their own general intellectual development.

In order to develop requisite competency in the discipline of Africana Studies, concentrators must complete eight (8) semester-long courses offered by or cross-listed with the Department. Six (6) courses must have an AFRI prefix or be offered by Africana Studies core faculty. Two (2) courses can be cross-listed. In some cases, Concentrators may petition the Department to accept other appropriate courses. Of these 8 courses, the following Africana Studies courses are **required**:

- AFRI 0090 An Introduction to Africana Studies
- AFRI 1360 Africana Studies: Knowledge, Texts and Methodology—Senior Capstone Seminar (Spring ONLY)

**Please note: *Beginning with the class of 2021***, the concentration will be comprised of a total of 9 courses, which will include a **required** junior seminar to be offered during the second semester. Students studying abroad during the second semester of their junior year will be required to take the seminar during their senior year. If there is a documented conflict with another concentration's senior seminar, students should consult with the DUS.

The Department strongly encourages foreign study in Africa, the Caribbean, and Latin America, during the student's junior year of

concentration. Although the Africana Studies Department actively supports programs in South Africa, Tanzania, Ethiopia, Brazil, and the English-Speaking Caribbean, at least six (6) courses must be completed in the department and taught by core faculty.

The Department also encourages the acquisition of language competencies, in addition to English, which are spoken in Africa and the diaspora. Since no continental African language is currently offered at Brown, concentrators who study abroad and acquire certified competency in any African language are welcome to petition the department for competency credit.

**For more information about the concentration, please contact Professor Françoise Hamlin** (Francoise\_Hamlin@brown.edu), **Director of Undergraduate Studies.**

### Honors in Africana Studies

Africana Studies' concentrators with outstanding academic records (demonstration of excellent research and writing skills from course selections to grades) may be admitted to the department's Honors Program.

Students interested in pursuing honors should identify a faculty sponsor in Africana Studies (chosen from Core Faculty or affiliated faculty after Chair agreement) in their 6th semester and begin working on their thesis project during the summer before their senior year. By the end of the sixth semester, while working in consultation with a faculty advisor, the student must submit a rough draft of the project proposal. **Please visit the department website for proposal guidelines.** This preliminary plan should include a timeline for completion of the thesis and is not to exceed one (1) typewritten page. This plan should also include a bibliography that students have developed with their thesis advisor to guide their summer reading.

By the end of the summer, the Honor's candidate should be familiar with the secondary works in the field. (Secondary readings should be extensive and be incorporated into the final proposal, due **Monday, September 14, 2020**.) The student should also identify a second reader at this point.

The final work plan/proposal, not to exceed three (3) typewritten pages, should incorporate the summer research findings and updates to the completion deadline. The final proposal must be approved and signed by a committee, comprised of the faculty advisor who is to direct the Honor's thesis, the second reader, and the concentration advisor. By the end of week three of the first senior semester, the thesis advisor should inform the Director of Undergraduate Studies by email that the proposal has been approved.

The Honor's candidate should complete at least one chapter of distinguished quality while enrolled in an independent study with their faculty advisor during the first semester of the senior year. Students must enroll in at least one, preferably two, semesters of independent study to work on their thesis.

For students completing graduation requirements by the end of **Semester I (Fall)**, a first complete draft of the thesis should be completed by **Friday, November 6, 2020**. Final drafts must be submitted by **Friday, November 27, 2020**. For students completing graduation requirements by **Semester II (Spring)**, a first complete draft of the thesis should be submitted by **Friday, March 12, 2021**. The final draft of the thesis should be submitted by **Friday, April 16, 2021**. Students must submit bound copies of the final thesis to the department and to each of their readers, along with an electronic copy of the completed thesis to the Academic Department Manager. All students are expected to formally present their thesis projects in the Department of Africana Studies on **Monday, April 26, 2021** at a time to be determined. After this presentation, a department committee will make recommendations for honors to the Director of Undergraduate Studies and students will receive notification of the recommendation.

### Africana Studies Graduate Program

The department of Africana Studies offers a graduate program leading to the Ph.D. in Africana Studies. For more information on admission and program requirements, please visit the website: <http://www.brown.edu/academics/gradschool/programs/africana-studies-0>

## Courses

### **AFRI 0090. An Introduction to Africana Studies.**

This course introduces students to the vibrant and contested field of Africana Studies by critically exploring and analyzing the links and disjunctures in the cultural, political, and intellectual practices and experiences of people of African descent throughout the African diaspora. Beginning with a critical overview of the history, theoretical orientations, and multiple methodological strategies of the discipline, the course is divided into three thematic units that examine intellectuals, politics, and movements; identity construction and formation; and literary, cultural, and aesthetic theories and practices in the African diaspora.

### **AFRI 0110B. The Last Professors.**

Addresses the profound effects of contemporary economic, political, and social changes on the role and function of the university in the 21st century. A primary concern of the seminar is to critically analyze how and in what ways the transformations in the broader society challenge, constrain, and, at times, frustrate critical intellectual activity. The seminar will draw on a broad and diverse set of readings ranging from classic statements by Cardinal Newman and W.E.B. DuBois to contemporary critical analyses by Henry Giroux and Adolph Reed, Jr. Enrollment limited to 19 first year students.

### **AFRI 0110C. Autobiography of the Civil Rights Movement.**

Most of the rich written history of the civil rights movement originates from first-hand accounts documented in oral histories and autobiographies. This interdisciplinary course plots the milestones of the civil rights movement through the lens of several autobiographies. The aim is to critique autobiography as a historical document as well as use it to tell the stories of the civil rights movement. We will compare and contrast different texts, analyze content and map a history of the era. Students will work with a writing fellow to develop one critical paper and one autobiographical paper. Enrollment limited to 19 first year students.

### **AFRI 0120. Philosophy of Race and Gender.**

Prejudice of many kinds, such as racism and sexism is so embedded in our modern social institutions, and so traditional and pervasive that we often fail to notice it. Furthermore, race and gender have been used repeatedly to explain differences. This course is a rigorous examination of the philosophical meanings of race and gender, from a variety of historical, anthropological and feminists perspectives.

### **AFRI 0160. Twentieth-Century Africa.**

An introduction to recent African history, the course combines chronological and topical approaches. It is organized around the major epochs of colonialism, decolonization and post-colonial independence, but within those periods, we will concentrate on themes such as health, environment, development, the state and artistic expression. Readings draw heavily on primary sources. Three exams and two projects, including group work.

### **AFRI 0170. Afro-American History and Society Before 1800.**

Focuses on the history of Africans and persons of African descent in the part of North America that now constitutes the U.S. Centers on the 18th century, but gives some attention to the 17th and 19th centuries as well. Most of the readings are devoted to the English colonies, but some concern themselves with Dutch, French, and Spanish settlements.

### **AFRI 0190. Caribbean History and Society Before 1800.**

Examines some of the themes important in the multiracial societies of the Caribbean from the 17th through the early years of the 19th century. Explores Creole societies, plantation economies, ethnicity, maroon societies, class and racial divisions, acculturation, syncretic religions, and patterns of slave resistance. Danish, Dutch, English, French, and Spanish settlements are studied.

### **AFRI 0200. Modern Caribbean History and Society.**

This course will critically examine five themes in modern Caribbean history and society: What is the Caribbean? Nationalism, religion, economic development, and popular culture. These themes will be discussed with reference to the different geographical, racial, cultural and political spaces, which comprise the Caribbean.

### **AFRI 0210. Afro Latin Americans and Blackness in the Americas.**

This course focuses on the position of Blacks in the national histories and societies of Latin America from slavery to the present-day. Emphasis is on a multidisciplinary engagement with issues and the exposure of students to the critical discussion of national images and realities about blackness and Africa-descended institutions and practices. The role of racial issues in national and transnational encounters and the consequences of migration of people and ideas within the hemisphere are explored.

### **AFRI 0220. From Emancipation to Obama: Journeys in African American History.**

This course explores African American History through the lens of black freedom struggles. The struggles take all forms, between black and white from local to national levels, within and between black communities, and between men and women. This course assumes some familiarity with basic U.S. History and will utilize a variety of primary sources from autobiographical material to visual art and music as well as the usual monographs and articles. Aside from reading, students will be required to work with a writing fellow on 2 papers. There are also 2 exams.

### **AFRI 0280. Race, Slavery, Modernity and Knowledge.**

This course will review some of the central texts that constitute the different meanings of modernity and discuss how these texts became part of our framework for thinking about modernity, the human self and its different representations. The course will also engage texts that make attempts to complicate the meanings of modernity through a set of engagements with the issues of slavery, colonialism and race. Some key words in the course are: modernity, knowledge production, double-consciousness, social construction of race, racial slavery, coloniality.

### **AFRI 0500. Globalization, Media and Culture.**

This course is designed to examine the changing global landscape and its impact on society, culture and will draw on analytical tools from the social sciences to make sense of the rapidly changing nature of global society. In the past three decades the flows of commodities, ideas, people, norms, resources across international borders has accelerated exponentially. Driving these dynamics are not only market forces, but also the media, social networks, cultural diffusions, institutional transformations. This course focuses on the social structures, institutional and organizational forms, political processes and cultural practices that mediate the encounter of the global and the national.

### **AFRI 0550. African American Health Activism from Emancipation to AIDS.**

This historical survey course examines African American activism and social movements from Emancipation to the contemporary period through the lens of African American access to health resources. By paying close attention to how social and cultural aspects of medicine impact access and quality of care by race, gender, and sexuality, the course examines how segregation, poverty, incarceration, and policing shaped activism and healthcare. The course develops a sense of how African American activists crafted responses to different historical crises including Reconstruction, Jim Crow, Civil Rights, and the War on Drugs by the demands they made for specific resources.

### **AFRI 0560. Psychology of the Black Experience.**

This course is designed to facilitate understanding of African American psychological experiences. We begin by critically reviewing historical approaches to the psychological study of Black people. We then shift to an examination of the themes, and research currently being generated by those involved in the quest for scholarly self-definition and for redefinition of the psychological fabric of the Black experience.

### **AFRI 0570. 20th Century Black Feminist Thought and Practice in the U.S.**

This course will explore the ways that black women in the U.S. have experienced racial and gendered discrimination as well as what sorts of strategies (e.g., political, intellectual, narrative, and creative) black women have devised in response. We will be especially concerned with elements of African-American feminist thought and its articulation in writings, music, literature and practice/activism in the 20th century U.S. Enrollment limited to 80.

**AFRI 0580. Black Theology.**

"In this era of Black Power... theology cannot afford to be silent." This lecture course will plumb the depths of James H. Cone's statement by critically interrogating the cultural, political, and theoretical dimensions of the development and evolution of Black Theology. The course will consider the nature and task of theology with particular reference to its contested role in American public life, the complex relation between theology, race, and radical politics, and the connections and disjunctures between Black Theology and the fields of history, literature, and philosophy.

**AFRI 0600. Race, Gender, and Urban Politics.**

This course will introduce students to the methods and practice of studying black urban life with a primary focus on US cities. We will critically examine the urban cultural studies debates concerned with race, gender, class and sexuality. The approach of the course will be interdisciplinary, drawing upon works from anthropology, literature, history, music, and film. Topics include tourism, immigration, poverty, popular culture, gentrification, violence, and criminalization.

**AFRI 0610. Black Student Protest from Jim Crow to the Present.**

This is a history-driven class about black student protest. It puts this history in direct dialogue with other kinds of student protests over the long twentieth century. The point of the class is to ground conversations about contemporary protest culture in an historical context that extends well beyond Brown, that moves into the deep history of higher education and education more generally, and that reveals the intersection of protest with other global, national, and local plotlines. It is, as well, meant to think about how all of these histories have been represented popularly and politically in the very recent past.

**AFRI 0620. African-American Life in the City.**

This course examines the social and cultural history of black urban communities by examining the foundation of black communities in Chicago, New York and Los Angeles. We will examine how migration and the intersections of race, class, culture and gender shape life in urban places, reveal the structural forces that define black urban communities, and explore urban African-American expressive forms. Enrollment limited to 45.

**AFRI 0630. Drama and War in Africa: New Voices.**

This course is an historical, political and topical examination of the subject of War on the African continent as seen through the lens of artistic response. Class discussions will be based on the different Stage, Screen and Radio Dramas that will serve as course materials. We will analyze reflections by African artists and scholars on the violent conflicts that have characterized the region's recent history, as well as closely related international perspectives, such as those evident in *Hotel Rwanda* and *The Last King of Scotland*. We will also explore how political actors have used performative techniques, and will specifically examine the ways that other members of society (especially women and children) deal with such crises. Canonical African dramatists like Fugard, Ngugi, Soyinka and Ousmane will be referred to, but emphasis will be laid upon the New Voices emerging from a range of African nations, including Rwanda, Uganda, Congo, Senegal, Sudan and South Africa, that have engaged with the subject of war.

**AFRI 0640. Contemporary Issues in African Politics and Culture: Thinking Africa Differently.**

Using an interdisciplinary methodology this course will examine three current issues in African societies: War, Violence and Sovereignty; the Politics of Gender in the African postcolony and the meanings of History, Trauma and Public Memory in some African societies. We will undertake this examination by "thinking about Africa differently," that is by thinking about these three issues outside of the dominant set of images, tropes and ideas that have conventionally constructed a particular version of Africa.

**AFRI 0660. Activist Scholarship: Research and Writing for Social Change.**

How can research advance the global social justice struggle? This course will emphasize the idea that education has never been a politically neutral undertaking. Students' research can have social impact in the university and beyond. We will engage a variety of disciplinary fields to theorize key concepts such as intersectionality of oppression and resistance, power, hegemony, social justice, and activist research. Students will be required to carry out an original research project that tackles a pressing societal problem we face today.

**AFRI 0670. Global Black Radicalism.**

The decade from the mid-Sixties until the mid-Seventies witnessed the rise of Black Radicalism as a global phenomenon. The emergence of Black Power in the US, Brazil and the Caribbean, the consolidation of liberation struggles in Portuguese Africa and the rise of a Black Consciousness trend in Apartheid South Africa all represent key moments. What led young activists to embrace "Black Power?" What led to the emergence of Marxist movements in Portuguese Africa? What events in the Caribbean gave ascendancy to radical tendencies? And what forces contributed to the decline of these movements? This course seeks to answer these questions.

**AFRI 0700. Freedom Films.**

"Freedom Films" is a First Year Seminar which will focus on historical documentary films related to the Southern Civil Rights Movement of the 1960s. We will analyze how these films reflect, change, and inform our views of the traditional Civil Rights Movement and how some offer contrasting narratives of that movement. We will also examine how and in what ways the films accurately and adequately reflect the historical realities of the Southern Civil Rights Movement based on readings and research. Enrollment limited to 19 first year students.

**AFRI 0710A. Racial and Gender Politics in Contemporary Brazil.**

Brazil is commonly understood as an example of a "racially democratic" nation, but as scholars have recently shown, racism permeates all aspects of Brazilian society. This course traces the development of the theorization of race, racial identity and race relations in contemporary Brazil. The approach of the course will be interdisciplinary, drawing upon works from anthropology, literature, history, music, and film. Topics will include colonialism and enslavement, nationalism, social activism and popular culture. We will also consider how Brazilian social relations differ from or conform to other racialized patterns in other nation-states in the Americas. Particular attention will be placed on the interrelationship between race, gender, class, and nation.

**AFRI 0710B. Ethics of Black Power.**

In his now classic text *Blood in My Eye*, George Jackson writes "All revolution should be love inspired". This course will plumb the depths of Jackson's remark by critically interrogating the ethical dimensions of the Black Power concept and the cultural, ideological, and political interventions influenced by the conceptual revolution. We will assess the ethical parameters of the various ideological tendencies that influenced the conceptual formulation and political articulation of Black Power including Black Nationalism, Feminism, Liberalism, Marxism-Leninism-Maoism and Pan-Africanism.

**AFRI 0760A. Rastafari Studies.**

This course will introduce students to the theoretical frameworks, methods, and practice based application of engaging with the Rastafari movement. We'll critically examine literature produced about Rastafari & the community-based activism of the movement in the context of African & African Diasporic movements from the 1930s to the present. Approach of the class is interdisciplinary and thematic, drawing upon works from Africana studies, literature, history, music, and film. Students will be able to engage with Rastafari guest speakers and read the most recent literature in Rastafari studies. Special emphasis will be placed on gendered anti-Black racism and Rastafari woman's community activism.

**AFRI 0760B. Raggae, Rastafari and Revolution.**

Bob Marley in the song *Revolution* declares, "Revolution Reveals." Beginning from this frame this course will examine the history of Rastafari since it was formed in the late 1930s as an Afro-Caribbean religious practice. It will examine how the emergence of raggae music in Jamaica in the late 1960s mixed and then became one central ingredient of what has been called "conscious music" in the period of the flowering of anti-colonial and black radicalism in the 20th century. The course will explore how raggae music became a form of subaltern language rethinking questions of nation and history in the Caribbean and Africa.

**AFRI 0830. How Structural Racism Works.**

This lecture course is an exploration of structural racism: the normalized and legitimized range of policies, practices, and attitudes that routinely produce cumulative and chronic adverse outcomes for people of color. With a special focus on African-Americans in the post Civil Rights Era, we will explore how structural racism "works" intersectionally and in compounded ways in housing, criminal justice, education, employment, and media. We will also consider cultural, political and social challenges to structural racism as well as the the role and impact of colorblind ideology and behavioralism as dominant countervailing explanations for racial disparities.

**AFRI 0850. The Politics of Gender in the Caribbean Novel.**

This course will examine 20th Century Caribbean Literature as a genre, which poses challenges to colonialism and raises profound questions of sovereignty. It will examine how Contemporary Caribbean Literature contributes to the world of literature in general.

**AFRI 0880. Hip Hop Music and Cultures.**

This course will explore both the history of the emergence of Hip Hop and the heated debates that surround it: aesthetics, censorship, sexism, violence, musical theft, originality, authenticity, the politics of cross-racial exchanges, urban black nihilism, and corporate influences on culture. These debates will be framed by our consideration of urban black life, African-American cultural formations, gender, representation, technology, commodification, pleasure and politics. Enrollment limited to 200.

**AFRI 0890. Narratives of Power.**

Close readings and critical discussion of some of the most influential discussions of power in the past two centuries. Seeks to develop an appreciation of the complexity and elusiveness of discourses of power.

**AFRI 0950. History, Literature and the Caribbean Novel.**

This course examines the ways in which literature is influenced by major historical events with special reference to the literatures of the Caribbean. Students will undertake a critical examination of the fictional representation of Europe's encounter with Africa and Asia in the Americas.

**AFRI 0980. Fela Kuti: African Freedom from Afrobeat to Afrobeats.**

Miles Davis famously described Fela Kuti (1938-1997) as "the future of music." Beyoncé's attempt "to do something that sounds like Fela" saw her compose an unpublished 20-track album. Arguably Africa's most prolific and controversial artist of the twentieth century, Fela continues to be invoked as musical genius and as icon of popular struggle. This course invites students to explore the complexities of Fela's art and activism. We mobilize his life/work as a springboard for examining emergent debates about African identity—from postcolonial masculinity to the creative logics of African cities, from contemporary African youth culture to the gendered politics of cultural memory.

**AFRI 0990. Black Lavender: Black Gay/Lesbian Plays/Dramatic Constructions in the American Theatre.**

Study of plays with African-American LGBTQ+ content, primarily manuscripts, with a focus on thesis paper development. Creative writing option. Participation in the Black Lavender Experience required. Cross-listed with TAPS. Gender and Sexuality.

**AFRI 1010C. Race, Gender, Ethics and Environmental Justice.**

African Americans, Gender, Ethics and Environmental Justice examines the role of African Americans in the larger environmental history conversation. It utilizes a gendered lens to investigate how African American interpreted their natural surroundings and contributed to the development of 20th century American environmental consciousness. This course is reading and writing intensive.

**AFRI 1020A. Black Cultural Studies.**

No description available.

**AFRI 1020B. Freedom in Africana Political Thought.**

This course will be a comparative analysis of freedom as a central value in political thought. It will do this by comparing the knowledge and practices of freedom to slaves in the Haitian Revolution, the ideas of freedom in the Civil Rights Movement, and then finally, the conceptions of freedom in South Africa. Enrollment limited to 30.

**AFRI 1020C. The Afro-Luso-Brazilian Triangle.**

Examines three historical components of the South Atlantic in terms of history, culture, and contemporary political and economic consequences. European colonialism in Africa and Brazil constitutes the baseline for this exploration, but the long and tardy nature of Portuguese colonialism in Africa in comparison with other European colonial powers, especially in its post-World War II manifestations, is our starting point. Enrollment limited to 40.

**AFRI 1020D. Race, Rights and Rebellion.**

Provides an in-depth examination of different kinds of social movements. Emphasis will be placed on the theoretical and methodological distinctions among the various kinds of social protests and social movement actors. From anti-slavery revolts to struggles for independence to anti-apartheid movements, key concepts will include power, resistance, subaltern, hegemony, identity politics and consciousness.

**AFRI 1020E. Race and Visual Culture.**

This is a sophomore seminar on race and visual media, including everything from high art on canvas to lowbrow film, from the comic book superhero Blank Panther to the Black Panther Party, from the avant-garde to the burlesque, from the web to graffiti to homemade t-shirts. People who sign up for the class should be prepared to read a lot and talk a lot, to regularly get to the RISD museum, to watch a lot of stuff on OCRA, and to maybe take a field trip or two to Boston's MFA and some similar sort of place. Curiosity is required.

**AFRI 1030. Contesting the Carceral State.**

This course introduces students to the study of crime and justice through Black, feminist, queer and prison abolitionist frameworks, with a particular focus on narratives by people of African descent in the U.S. since 1965.

**AFRI 1040. Decolonized Bodies, Spirit Bodies: Tracing the Indigenous Knowledge of Africans.**

This course is a comprehensive study of the indigenous bodies of knowledge of rituals as they permeate the wholeness of the existence of African people referencing Yoruba nation of West Africa. It will integrate visual art methods with Rites and Reason Theatre's Research-to-Performance Method, where students will explore and trace the hidden legacies of the indigenous people of Africa in visual arts, music, dance, fashion, poetry, story-telling as a way of understanding the impacts of slavery, colonialism and decolonization of indigenous knowledge. Students will have the opportunity to study selected enduring indigenous festivals, organize and stage performance as knowledge production.

**AFRI 1050A. Advanced RPM Playwriting.**

Third level of RPM Playwriting; for students that have successfully completed RPM Playwriting and Intermediate RPM Playwriting (workshop). Instructor permission.

**AFRI 1050B. Africana Feminism.**

No description available.

**AFRI 1050D. Intermediate RPM Playwriting.**

Second level of RPM Playwriting; for students that want to continue developing their RPM plays or want to begin a new project (workshop).

**AFRI 1050E. RPM Playwriting.**

Research-to-Performance Method (RPM) Playwriting guides students through the process of developing new plays that are informed by scholarly research (workshop).

**AFRI 1050G. Narrating the Radical Self.**

How black women in the United States and elsewhere have written about their lives in autobiographies will be the focus of this course. We will discuss black women's use of autobiographical writing to document their own individual experiences in political movements as well as to provide key insights into how black people throughout the black diaspora have organized in recent history. Enrollment limited to 20.

**AFRI 1050H. Introduction to Post-Colonial African and African Diasporic Theatre.**

This class will explore plays/theatrical works and ideologies of a selected group of playwrights from Africa, the Caribbean, and the United States. Exploring Culture, Creativity and Theatre practices, the course will focus on the ways in which these artists have syncretically responded to varied forms of colonization and creolization. This class will also pay attention to the Post Colonial Social and historical context that continues to impact and influence these modes of artistic production.

**AFRI 1050K. Special Topics in RPM Playwriting: Playwriting Strategies From Contemporary Black Theatre.**

A study of Aristotle's Poetics in relation to Dubois' four principles of black theatre and Audre Lorde's essay "The Master's Tools." What makes black theatre "black"? We will analyze plays from the 20th Century African-American canon as sites of aesthetic resistance to "normative" American Theatre; and write our own one-act plays based upon our discoveries. Prerequisite: Course is restricted to students who have taken any Africana Studies RPM Playwriting course, Theatre Arts Introduction to Playwriting, Literary Arts Intermediate or Advanced playwriting courses, or has playwriting experience.

**AFRI 1050L. RPM Playwriting: Advanced and Staging.****AFRI 1050M. Roots of African American Fiction: Oral Narrative through Richard Wright.**

This course will employ a variety of narrative forms -- oral folktales, WPA narratives, slave narratives, short stories by European and American writers -- will also investigate the multiple traditions of African American fiction.

**AFRI 1050P. Art and Civic Engagement: Creativity/Reality.**

The primary objective of this course is to learn about and reflect upon public art and communities. This course will use selected public art and artists' ideologies as a framework for exploring culture, creativity, politics and practices and focus on the ways in which these public art works and artists' responses to varied forms of internal and external operators and stimuli successfully and unsuccessfully give voice to aspects of the environment, history, culture, social justice, health, politics and the imagination. This course will also pay attention to arts organizations, government agencies, history, power relations, human resources as well as leadership and the political that continues to influence public modes of artistic production.

**AFRI 1050Q. New Narratives in African American History: The Art and Craft of Poetic and Creative Non-Fiction.**

This seminar examines various examples of creative and poetic non-fiction, pertaining to race and the African American experience. While touching upon historic examples and precedent, emphasis will be on contemporary works, including the genres of poetry, drama, the narrative, the memoir, the travelogue and the personal essay. The course will explore what these works offer to the knowledge, popularization and perception of black history and to the shaping of cultural dialogue on blackness and race. Enrollment limited to 25.

**AFRI 1050R. The History of Afro Futurism and Black Science Fiction.**

Any class called The History Of Afro Futurism and Black Science Fiction automatically begs the question -- "Well, what isn't futuristic about being Black in America?" The entire history of Black America can be seen as a fundamentally futurological and science fictional enterprise -- a perpetual biding on hope and struggling for change endeavor that frequently employs far flung visions of tomorrow and other more oblique speculative stratagems in pursuit of outcomes barely foreseeable in the near-present. Enrollment limited to 25.

**AFRI 1050S. Comparative Slavery and Slave Revolts: Slave Rebellion in the Americas, 1725-1865.**

This course explores the history of slave revolts in North and South America and the Caribbean. It examines how acts of resistance transformed the lives of enslaved Africans and their relationships with white Americans, Europeans, and free and enslaved people of African descent. We will consider in what ways geography shaped the aims of a slave rebellion, how is a successful slave revolt determined, and what are the implications of slave unrest and its aftermath in local slave societies and in the Americas? This class will focus on insurrections in Jamaica, Saint Domingue (Haiti), the United States, Cuba, and Brazil.

**AFRI 1050T. Slave Resistance and Moral Order in Environmental History.**

This course is designed to examine the avenues by which enslaved persons redefined and re-appropriated the natural landscapes that kept them in bondage into direct forms of cultural and political resistance during the antebellum period. We will investigate rice production in South Carolina, the Dismal Swamp, maroon societies, Negro Spirituals, and the Black Judeo-Christian ethic to understand how the natural environment and the institution of slavery shaped slave resistance in the United States. This course is reading and writing intensive.

**AFRI 1050V. Rhythm and Resistance.**

This course will investigate the crucial cultural and political contributions of the African Diaspora in the formation of the contemporary Americas through an analysis of the rhythms they have produced in different national settings. We will use these rhythms as a guide to understand the peoples, places and conditions under which they were created and sustained. Through classroom discussion and historical and music-analysis students will understand the relationship of these rhythms to larger issues like nationalism, migration, colonialism, globalization, the politics of sexuality, gender and race and to understand the different meanings and practices of resistance.

**AFRI 1050W. Transnational Hispaniola: Haiti and the Dominican Republic.**

This course will examine the historical, political, and cultural development of the island of Hispaniola, currently divided in the countries of Haiti and the Dominican Republic. In this course we will call into question popular narratives that portray Haiti and the Dominican Republic as locked in an ahistorical, continuous conflict and explore the island's long history of Haitian-Dominican collaborations and networks. Over time, the two countries have developed different understandings of race, ethnicity, and national identity. This course will therefore engage in a comparative survey of the interwoven dynamics of race and national construction in the making of both nations.

**AFRI 1050X. Slavery, Materiality, and Memorialization.**

The institution of slavery ended in the Americas in the 19th century, but its official conclusion says little about the ways in which its legacies are materially present and memorialized today. This course is designed to place the material aspects of slavery in conversation with less tangible dimensions of how slavery is or isn't remembered and publicly acknowledged. Students will be introduced to the social and economic dimensions of transatlantic slavery, conduct archival research, and visit sites in the Providence area in order to inspire critical dialogue about how the material realities of slavery affect our past, present, and future.

**AFRI 1060A. Africa Since 1950.**

This seminar offers a survey of post-colonial African history, while probing the challenges of writing post-colonial history. Readings and discussions will focus on histories that bridge the colonial and post-colonial periods. How robust are these periods? What can historians draw from post-colonial theory? How can historical narratives account for both the colonial legacy and post-colonial dynamism. Enrollment limited to 20; instructor permission required. Students with a background in African history or contemporary African social science will be given priority. Interested students should email the professor at Nancy\_Jacobs@brown.edu.

**AFRI 1060C. Contemporary African Philosophy.**

An examination of some of the most influential work on problems of identity and being, theology and theodicy, time and history, method and evaluation, race and racism, postcoloniality and liberation in contemporary African philosophy. Readings include the work of Anthony Appiah, Frantz Fanon, Kwame Gyekye, Pauline Hountondji, D. A. Masolo, John Mbiti, Kwame Nkrumah, Léopold Senghor, Tsenay Serequeberhan, among others.

**AFRI 1060D. Harlem Renaissance.**

Explores the literature, music, and art of the so-called Harlem Renaissance, within the context of broader transformations in African American and American culture and politics in the decade of the 1920s. Readings include books by Langston Hughes, Zora Neale Hurston, Nella Larsen, Alain Locke, Wallace Thurman, and Claude McKay; contemporary essays, reviews and manifestoes; and recent critical studies.

**AFRI 1060E. West African Writers and Political Kingdom.**

Do West African writers have a role to play in the changing political landscape of their countries? An examination of the ways and means through which a select group of West African writers have dealt with issues that relate to the role of the state in the management of individual and group relations, the politics of gender, civil and military relations, and the construction of new forms of civil society. Enrollment limited to 20.

**AFRI 1060F. Philosophy and Race.**

This advanced seminar in Africana philosophy will examine critical texts and thinkers that articulate the problems, methods, and techniques for interrogating the interrelationships between the discourse of philosophy and modern conceptions of race. The seminar will move to consider contemporary engagements in this area by drawing on readings and thinkers from analytical, continental, feminist, marxist, and pragmatist philosophical traditions.

**AFRI 1060G. Black Radical Tradition.**

This advanced seminar in Africana philosophy will explore the contours of insurgent forms of Africana social and political philosophy. With a temporal focus on the twentieth century, we will concern ourselves with explicating the dominant themes, theoretical orientations, and methodological understandings that in/form constructions and articulations of the varieties of Africana feminism/womanism, black nationalism, Marxism-Leninism-Maoism, Pan-Africanism, and radical democracy. Enrollment limited to 20.

**AFRI 1060H. Racial Frontier in South African History.**

This seminar will focus on racial categories in South Africa. We will explore dynamic categories of race from the 17th through 20th centuries. Topics include the relationship of race and class; racial violence; the transmission of culture and knowledge across racial boundaries; intimate relations over racial boundaries; segregation; and race and nation. We will give attention to critiquing the ways that historians have represented race and the ways that conceptions of the category have evolved within the discipline, but the emphasis will be on recent scholarship. Students will be expected to participate actively in the seminar, to write one book review, and one research paper. Enrollment limited to 20.

**AFRI 1060I. Africana Philosophy of Religion.**

Who, or rather, what is God to the oppressed? This advanced seminar in Africana philosophy will examine the various theories, methods, and arguments that engage perennial questions that arise when contemplating God. The seminar will focus on questions of philosophical method and theological exposition while also being critically attuned to modes of social and cultural analysis and critique, particularly those perspectives inspired by forms of critical theory, feminist theory, and Marxist theory. Limited enrollment.

**AFRI 1060K. African Literature After Achebe: Emerging African Writers.**

In this course we will analyze how contemporary, emerging and marginally-read African writers contest the traditional and widely-held interpretations, understanding and assumptions of African literature. We will read and think about African literature in the contemporary post-colonial and post apartheid moment in Africa. Authors discussed include Dambudzo Marechera, Zoe Wicomb and Binyavanga Wainaina, among others.

**AFRI 1060L. Varieties of American Philosophical Experience.**

In contrast to Pragmatist and European-oriented views of American philosophy, this course will emphasize the colonial dimensions and features of American philosophy that emerged out of the colonial soil of early America. Out of this soil sprang extended debates between Native Americans, Euro-Americans and African Americans over the legitimacy of the hegemony that Euro-Americans were establishing over increasing portions of North America. This course views American philosophy as having within it two opposing traditions that have been engaged in ongoing angry dialogues: the dominant or Prosperian tradition of Euro-Americans and the subjugated or Caliban tradition of Native Americans and African Americans.

**AFRI 1060M. African Environmental History.**

This seminar will be devoted to the study of the environment and power in the history of sub-Saharan Africa. The goals for this class are that you learn more about the history of Africa, about the ways that relations with the environment shaped its human history, about the construction of environmental knowledge and its repercussions, and about historical research.

This course also has an applied dimension. Eight African environmental professionals visiting Brown through the Watson Scholars of the Environment (WISE) program will also participate in the class. In their final course project, students will conduct research of use to the WISE fellows on historical cases related to their training at Brown. (For more information see [http://www.watsoninstitute.org/ge/watson\\_scholars/](http://www.watsoninstitute.org/ge/watson_scholars/)).

This course qualifies as a capstone seminar in the history department. Enrollment limited to 20 students. Instructors permission required. Interested students should email the instructor at [Nancy\\_Jacobs@brown.edu](mailto:Nancy_Jacobs@brown.edu) with a description of their interests and background.

**AFRI 1060Q. The New Science of Race: Racial Biomedicine in the 21st Century.**

This course draws on film, news media, scientific discourse, and social theory to engage biomedicine's most controversial investigations of race and the social scientific questions they have provoked. The course asks: How is contemporary science imagining, constructing, and producing knowledge about race? What are the social, political, and cultural implications of this knowledge? Students will be introduced to important science studies methods that we will apply to historical and contemporary research agendas. No prior knowledge of science or racial theory is required. Enrollment preference will be given to juniors and seniors. Limited to 20.

**AFRI 1060R. Comparative Africana Literatures and Criticism.**

Caribbean, African American and African literature has been called engaged literature with explicit commitments to memory, history and ways to think about the political. This course will explore a set of writers, their novels, critical essays and their practices of criticism. It will examine anti-colonial, post-colonial writers as well as African American writers who in the words of Toni Morrison, "rip that veil drawn over proceedings to terrible to relate." We will in this course read the works of George Lamming, Patrick Chamoiseau, Toni Morrison, Richard Wright, Edwidge Danticat, Yvonne Vera, Zoe Wicomb and Njabulo Ndebele.

**AFRI 1060T. South Africa since 1990.**

South Africa transformed after 1990, but the past remains powerful. This seminar explores the endurance and erosion of the apartheid legacy, as expressed in historical and fictional narratives. We begin with transition to majority rule and continue with the administrations of Mandela, Mbeki, and Zuma, connecting the formative histories of these leaders with the changing dynamic of politics. We end with narratives about the ways that ordinary people experienced new times. The syllabus includes scholarly works in history and politics, biography, fiction and film. Two short writing assignments and a major research paper. Enrollment limited to 20 juniors and seniors.

**AFRI 1060U. An Introduction to Africa.**

Africa invokes myriad images in the global imagination. It figures in debates on the evolution of humans; in the formation of capitalism, and even as a counterpoint to discourses on human progress. This course interrogates how "Africa" gets mobilized in popular discourse in the US and beyond. How might we reconcile the idea of Africa with contemporary conditions of the African continent? We will not only examine Africa through a broad range of disciplinary perspectives; but also become familiar with social, cultural, political and economic diversity of the African continent. We will engage the disciplines of history, economics, politics, cultural studies and gender studies among others.

**AFRI 1060V. Black Transnationalism.**

This seminar will explore the complex dynamics of black transnationalism during the 20th century, focusing on the circulation of ideas and practices by Africans and African-descended communities; how they were contested and reconfigured as they flowed back and forth. Particular attention will be paid to some less-examined archives, interpretations and perspectives; ideas of black women activist-scholars; aesthetic practices, sonic regimes and religion; insights and experiences of those who lived diaspora. Seminar readings and discussions will introduce and "trouble" some key theoretical issues in the notion of black transnationalism, e.g. diaspora, Pan-Africanism, globality, translocalism, identity, articulation, and solidarity. Enrollment limited to 20.

**AFRI 1060W. Policy, Culture and Discourse that Shape Health and Access to Healthcare.**

The global discourse on health and access to healthcare are shaped by narratives that often conflate health with being about the healthcare system rather than about where we live, the policies, the politics, and narratives/discourse that shape them. Global health also tends to promote a perspective that it is about those people over there and has nothing to do with us here. This course will create a platform that ties the global to the local. We will discuss how political and cultural discourse on race, class, and gender create the conditions that allow social inequalities to thrive.

**AFRI 1060X. African Development.**

Course takes an interdisciplinary approach to introduce contemporary development issues in Africa. Drawing on literature from political sciences, economics, sociology and history, it explores the challenges of development in the continent since independence, as well as investigates the influences of governance, institutions, conflicts and external forces in Africa's development trajectories. This is an applied course that would utilize both theoretical and policy analytical approaches to examine the political and socioeconomic dynamism in contemporary Africa. This course is guided by questions, such as: Why have most African countries remained underdeveloped, poor and susceptible to conflicts (many of which seem intractable)?

**AFRI 1060Y. Sex, Violence and the Policing of Black Struggle.**

This seminar considers some of the historical dimensions and diverse manifestations of the relationship between sex and violence across the eras of black social movement in order to inquire into the nature of a society structured in antiblackness. We consider violence, gender, sex, and freedom across an interdisciplinary terrain, dealing with problems of representation, punishment, policing, and self-determination. The real significance of iconic black lives lost to policing in recent days and years lies within this realm of sexual violence, beyond an examination of law and policing.

**AFRI 1060Z. Race, Sexuality, and Mental Disability History.**

This seminar investigates the fraught entanglement of mental disability with race and homosexuality beginning with late 19th Century ideas of scientific racism and the invention of the homosexual body in African American communities. By tracking changes in Psychiatry and Psychology through the 1960s and 1970s, the course examines the impact of the Civil Rights and Gay Rights movements on sustaining contemporary mental health diagnosis of "gender dysphoria" associated with Trans people. The course will further examine several approaches to queer, trans, and gay history from the fields of color critique, black feminism, and disability studies. Enrollment limit is 20.

**AFRI 1065. Performing Africa.**

Course engages storytelling, photography, movement as creative strategies with which to probe the idea of Africa. We'll explore historical and contemporary discourses that have shaped understandings of Africa in the West; examine the social and imaginative worlds constructed by African artists; study performative pieces that explore the multifaceted realities of what it means to be African today. Course asks students to imagine themselves as creators and curators, rather than merely consumers or critics, of African images. We'll engage the possibilities and limits of several performance strategies in appreciating a diverse continent with such a contested global image. Performance experience not required.

**AFRI 1070. RPM: Traditional and Contemporary Elements of Intertribal Indigenous Theater in America.**

Utilizes Rites and Reason Theater's research-to-performance method of developing new play scripts to examine the development and relationship of the colonial Euro-American art form, theatre, to its existence within the Indigenous intertribal (Native American Indian) communities in America.

**AFRI 1075. Providence Housing Ecosystem, Development, Displacement and Gentrification.**

This course will exam what are the influences and power dynamics that shape where we live. We will focus on Providence. From the perspective of marginalized communities often with limited power, we will consider how to change these dynamics. We will consider how government planning policies and housing speculators, impact housing stability, create value and shape the environment in which we live. We will consider the relationship-based channels which encourage social cohesion across neighborhoods and/or social disruption and upheaval caused by market-rate housing and development policies, as well as the discourse on housing and development that influence housing speculation forces.

**AFRI 1080. The Life and Work of W. E. B. Du Bois.**

From the publication of *The Souls of Black Folk* in 1903 until his death in Ghana sixty years later, W. E. B. Du Bois remained one of America's most penetrating analysts of what he called "the color line." Students read and discuss a selection of Du Bois's writings from his career as journalist, essayist, sociologist, historian, poet, political leader, and pioneering Pan-Africanist. Prerequisite: one course in AC, AF or US History.

**AFRI 1090. Black Freedom Struggle Since 1945.**

Lecture course that examines the extended history of the mass civil rights movement in the U.S. Starting at World War II, we consider the roles of the courts, the federal and state governments, organizations, local communities, individuals and various activist strategies in the ongoing struggle for African American equality, focusing on African American agency, particularly in the South, but also in Boston, Mass. Sources include photographs, documentaries, movies, letters, speeches, autobiographies, and secondary readings. Requirements: Weekly readings, documentary viewings, 4 short papers, 2 exams.

**AFRI 1100A. Comparative Identity Politics in Africa.**

This course is a comparative analysis of identity politics in Kenya, Nigeria and South Africa. Africa is a heterogeneous region with ethnic and religious diversity. The course will introduce students to social identity theory and processes of identity politics and discuss how identity processes unfold in difference areas of political discourse.

**AFRI 1100B. The Caribbean: Cultures, Politics, Histories and Literature.**

The Caribbean archipelago has brought forth a new awareness of the region not as a fixed entity of islands as previously viewed; rather, it is a diverse group of islands that are not only geographically linked but share a common history of slavery and colonialism. This course aims to present students with an opportunity to delve into substantive multidisciplinary (social science and literary) texts that seek to analyze, expose and deconstruct forces that continue to shape the Caribbean.

**AFRI 1100C. Racial Slavery and Empire in an Age of Global Capital.**

This course challenges students to think critically about the interrelations between global capital, racial slavery, and imperialism in historical perspective. We will focus particularly on the 19th century with readings addressing the British and U.S. imperial worlds. Centrally, the course asks students to engage with the significance of racial slavery in its economic and colonial entanglements in the making of the modern world.

**AFRI 1100X. Black Speculative Fiction: World-Making and Alternative Universes, Science Fiction and Fantasy.**

This class surveys the genre, including the work of George Schuyler, Nalo Hopkinson, Samuel R. Delaney, N.K. Jemison, Octavia Butler, Coslon Whitehead, and Tananarive Due, along with everything related, from comic books to album covers to filmic re-writings of canonical science fiction and fantasy works. The goal is to understand the history of the genre, its relationship to histories of anti-blackness and ideologies of black liberation, and its contributions to speculative fiction more broadly.

**AFRI 1110. Voices Beneath the Veil.**

VBV is an interdisciplinary exploration of African-American history and cultures through the analyses of Black authored plays from 1858 to the present. The course focuses on the development of a thesis paper, which includes an incremental re-writing process.

**AFRI 1112. Contemporary African American Theatre.**

This Africana Studies course moves thematically rather than chronologically through recent developments in African American theatre. It takes up core questions regarding Black aesthetics, representation, and the responsibility of theatre artists to themselves and to Black communities in the wake of the 1950-1960s Civil Rights Movement. Spanning the 1980s to the present, the course focuses on some of the most widely recognized African American theatre and performance artists and encourages students to develop their own talents as researchers, creative writers, and critical cultural producers. Pre-req: AFRI 1110: Voices Beneath the Veil or permission from the instructor.

**AFRI 1120. The Folk: African American Folk Traditions and Cultural Expressions.**

A research, development, and performance workshop designed to explore, examine, and articulate various folk traditions and cultural expressions of African Americans. The course examines the unique history and heritage of African Americans through the creative manifestations of their cultures, e.g., storytelling, dance, music, poetry, and style. The emphasis of the course is on creative writing and in-class performances informed by research and analysis.

**AFRI 1140. Women, the State and Violence.**

Examines the role of black women in 20th-century political movements, including with the turn-of-the-century antilynching campaigns, the southern civil rights movement, the black liberation movement, and contemporary educational activism for human rights. Central concerns include history of American radicalism and analyses of antiracist experiences, and the politics stemming from African American women's leadership. Prerequisites: AF 150 and/or AF 125.

**AFRI 1150. Afro-Caribbean Philosophy.**

An introduction to the field of Afro-Caribbean philosophy. The first half focuses on the history of the field, identifying its African background and surveying some of its major schools, such as the Afro-Christians, the poeticists, the historicists, and existentialists. The second half consists of a more intensive comparative focus on the ontologies and epistemologies of two of these schools.

**AFRI 1160. Public Health in Africa: History, Politics, and Practice.**

Examines the ways in which medical knowledge has been produced in sub-Saharan Africa. Treats all medical discourses and practices-including biomedicine and "indigenous" and pluralist medicines-as culturally-based systems of knowledge production. Explores the political economy of health and disease and the role of medicine and medical practices (hygiene, epidemiology, demography) in producing and maintaining power in both the colonial and postcolonial periods.

**AFRI 1170. African American Women's History.**

Recovers black women's history and renegotiates American history. Throughout the seminar, discussions will analyze the various tensions that complicate black women's lives, from accommodation to resistance, or gender issues versus racial issues, or the class tensions that pervade the African American community. Through the series of readings loosely hinged around themes and concepts, students will gain knowledge and understanding of the rich social, intellectual, political and economic networks and activities that African American women undertook on a daily basis in order to survive, progress and uplift. The course encourages the development of a broader and more comprehensive grasp of the complexities American, racial and gender histories. Must have taken at least one Women's History course and one U.S. history course. Enrollment limited to 20.

**AFRI 1180. Visual Cultures of the Afro-Americas.**

This course will examine how the visual modalities of power operate to ascribe, authenticate, and contest meaning within the Afro-Americas, understood here to include Afro-Caribbean, Afro-Latin American and African-American cultures. We will query the complex histories and technologies that constitute the social life of vision in the Afro-Americas, while cognizant of the fact that the field of visuality cannot be understood from single point of view. We will consider images made of and images made by peoples of African descent throughout the Americas as we attend to the reception, interpretation and reproduction of images, as well fields of invisibility. Enrollment limited to 20 juniors and seniors.

**AFRI 1190. Haiti: A New World, A Free World.**

Course examines the dual Haitian Revolution as a pivotal moment in the making of the modern world. It reviews the various historical interpretations of Haitian events, examines how these events contribute to or troubles our ideas about modern politics and notions of freedom as well as our conceptions of revolution. Course engages in these issues by working through three archives: Vodou Religion; The Art of the Revolution and the conventional historiography about the revolution, and will be tied to a joint Brown/RISD exhibition on Haitian Art. Enrollment limited to 15 juniors/seniors concentrating in Africana Studies, Visual Art, History; 15 RISD students.

**AFRI 1190A. Framing Haiti: History, Culture, Politics + Literature.**

In broadest terms, the objective of this multidisciplinary course will be to introduce students to the varied "nature" of the Haitian society and its fluid and dynamic culture, and then attempt to make historical and socio-anthropological sense of the country in relation to the region as a whole (particularly to the United States and Dominican Republic). Throughout the course we will discuss the dynamics of power in the realm of governance, with particular emphasis placed on the notion of struggle for sovereignty and the culture of resistance (through the arts) that forms the fundamental character of the national culture.

**AFRI 1200. Gospel Music from the Church to the Streets.**

Black gospel music has informed popular music artists including Beyoncé, Elvis, and Chance the Rapper. This course surveys African American gospel music as it is implemented for worship, evangelism, and popular consumption. Beyond analysis of key musical and lyrical characteristics of gospel, this class gives attention to the religious and sociocultural contexts that inform gospel composition and performance. Gospel music is integrally connected to the worship traditions of black American Pentecostals, Baptists, and Methodists. Consequently, this course is also a musical introduction to African American Christianity. Classes include interactive demonstrations in addition to discussion of audio/video recordings and required texts.

**AFRI 1210. Afro-Brazilians and the Brazilian Polity.**

Explores the history and present-day conditions of Afro-Brazilians, looking specifically at the uses of Africana in contemporary Brazil, political and cultural movements among Afro-Brazilians, domestic politics and its external dimensions, and Brazilian race relations within a global comparative framework. Texts from a variety of disciplines. A reading knowledge of Portuguese is not required but students so advantaged should inform the instructor.

**AFRI 1250. Women in the Civil Rights Movement.**

This seminar focuses on women in the civil rights movements, spanning the years of 1955-1968. This course examines issues of gender, race, sexuality, social protest, nonviolent civil disobedience and self-defense during the height of activism against apartheid in the United States and for civil rights.

**AFRI 1260. The Organizing Tradition of the Southern Civil Rights Movement.**

This seminar aims to fill in some of the gaps of the official canon by emphasizing that the modern (1954-1966) southern civil rights movement was not as it is mainly portrayed, a movement of mass protest in public spaces led by charismatic leaders; but rather, a movement of grassroots community organizing - quiet day-to-day work. Enrollment limited to 40.

**AFRI 1275. Memory, Movements, and Mississippi.**

This course explores the history of Mississippi through the lens of race, culture, and politics focusing on the mass of movements for civil rights to the present. Students will understand the complexities and contradictions of race, politics, and memory in the United States and have opportunities to articulate these intricacies in assignments – building communication skills for future work. Students will also advance critical reading skills and analytical writing, discussion, and oral presentation skills applicable beyond an academic setting. It accompanies the experiential component and the January trip to the state through the Bonner Program. Instructor override required.

**AFRI 1280. Writing About Race in the Post Civil Rights Era.**

This seminar is an explanation of the transformation of racial policies, relations and rhetorics since the end of the civil rights era in the United States. We will examine the complex ways race has remained central to US society and yet has dramatically shifted- examining terms such as: color-blind society; integration; political race, racialized (and gendered) community formation. Enrollment limited to 20.

**AFRI 1330. Africana Studies Junior Seminar.**

This junior seminar course is designed to support students' growth as academic writers and will prepare them to better complete their culminating senior thesis projects. While specifically geared towards Africana Studies concentrators, the class is open to any undergraduate student who has successfully completed AFRI 0090: An Introduction to Africana Studies and at least four semesters of coursework overall towards the Bachelor's degree. Course materials will delve deeply into the history, spaces, peoples and cultures of the African Diaspora, exploring a selection of critical writings, performance pieces, fiction and non-fiction works by leading scholars and artists.

**AFRI 1360. Africana Studies: Knowledge, Texts and Methodology.**

This course will explore the issues of Africana Studies as a discipline by engaging in a series of critical readings of the central texts, which laid the protocols of the discipline. The course will also raise issues of knowledge production and methodologies. This course is a senior capstone seminar. Open to all senior Africana Studies concentrators; others by instructor permission only. Enrollment limited to 25.

**AFRI 1410. Africans and the West: Studies in the History of Ideas.**

This course will examine the political thought of a selection of Africana thinkers from the period of slavery to the 20th century. It will examine the political thought of thinkers like, Franz Fanon, Ida B. Wells, Cugoano, CLR James, W.E.B. DuBois and Rastafari. The course will be an exploration of black radical intellectual tradition and its different meanings.

**AFRI 1440. Theorizing the Black Diaspora.**

This seminar will focus on the theorization of the black diaspora as a way to explore the various articulations of colonialism, gendered racism and resistance against that racism throughout African-descendant communities. Course readings will highlight the scholarship of black women who have contributed to the internationalization of radical black vis-a-vis theories of diaspora, transnationalism, transformative politics, identity formation, and community.

**AFRI 1470. Southern African History.**

This course examines major themes of the history of southern Africa from the earliest times until 1994, with a heavy emphasis on historiographical debates. Our discussions of the South African past will always be informed by a consideration of the approach of the scholars who have interpreted and presented it as history. Our major questions concern the origins of historical change and the creation of racial groups. We will probe the significance of race in South African history but also the limitations of its explanatory power. Readings are arranged at three levels. First, we will be reading primary sources, to gain experience in working with the evidence that informs historical work. Second, we will be working through a concise textbook that summarizes the major themes of South African history. Third, we will be reading specialized scholarly books and articles, chosen to illustrate recent discussions about the interpretation of South Africa's past. The course will meet twice a week for lecture and discussion groups will meet once a week.

**AFRI 1500. Incarceration, Education, and Political Literacy.**

This seminar (w/out audits) in politics and social justice is open to juniors/seniors. Captivity has become a critical political- social phenomenon in U.S. democracy, given that the United States has over two million people in prison/jails/INS detention centers. This two-part, one-year long course examines and maps (using cyber technology) captivity and criminality in the United States, focusing on race, gender, politics and literacy. Students are strongly urged to take both semesters; the second semester course as practicum, with training in cyber-technology and community-based learning/literacy, is open only to those who complete the fall course (Pt I) and the grade option for the second part of the course will be S/NC. Pre-Semester writing assignment required; see syllabus on WebCt for details.

**AFRI 1500A. Black Life in the Post-Industrial City.**

This course explores key themes in African American life in post-industrial U.S. cities. Relying on scholarly and historical sources and films, we will examine the complicated interplay of race, class, ethnicity, and gender dynamics in the transformation of black urban life in the late twentieth-century, the structures that have defined black urban life, and various expressive cultures and modes of resistance that have emerged out of the urban context. While not required, it is beneficial for students to have a working knowledge of twentieth century American history, and African American history in particular.

**AFRI 1500B. Black Women Thinkers: Alternative Genealogies of Black Radical Thought.**

This seminar examines contributions of Black women as major thinkers within the Black radical tradition, and provides a critical genealogy of Black feminist activists, writers and scholars contributing to social movements in the 20th century. Throughout the course, we will ask the following questions: What methods do Black women use to form critical thought? How is Black women's knowledge disappeared and devalued within academic and activist contexts? Finally, how can we recover and center those histories within our work? Assignments include short writing assignments, a final paper, and a collaborative digital humanities project. Introduction to Africana Studies preferred.

**AFRI 1540. Black Popular Cultures.**

This course is an historical and topical examination of the development of black popular cultures. We will explore the debates about popular culture and specifically examine the ways that race (as well as gender, sexuality and class) shape these debates. In addition we will explore specific black popular cultural practices (music, dance, film, radio, theater, etc.) as well as the larger contexts for their production and reception. Instructor permission required.

**AFRI 1580. Contemporary African Women's Literature.**

The aim of the course is to introduce students to novels like Head's *A Question of Power*, El Saadawi's *God Dies by the Nile*, Adochie's *Half of a Yellow Sun* and other major prose works by contemporary African women writers. It will present the African woman as a writer, her environment and her commitments. The emphasis is on the writing of continental African women, but will include works of other women writers. For a brief but necessary historical background to the course, it will be introduced with selections from Margaret Busby's *Daughters of Africa*. Enrollment limited to 25.

**AFRI 1600. History, Nation, Popular Culture and Caribbean Politics.**

Examines Jamaican popular music as an ideological site of resistance to Creole nationalist versions of Caribbean history and politics. It grapples with the meanings of race, history, and nation-state as contested notions in Jamaican/Caribbean society tracing an alternative genealogy of Caribbean history and politics.

**AFRI 1620. Black New Orleans: A Research Seminar.**

Examines the development of a unique African/ American cultural and political identity in New Orleans. The seminar focuses on the development of the Faubourg Tremé, the oldest free black community in the United States, and covers the period from 1718 until 1899. Topics include: slavery and resistance; relations between enslaved and free blacks; social and political agitation; and the resulting early development of the nation's Civil Rights movement and legislation. There is discussion also of the formation and continued tradition of artists' and artisans' guilds; Creole language (e.g., Creole slave songs, proverbs); NOLA relationship to the Caribbean and Latin America. Enrollment limited to 20.

**AFRI 1630. Modernist Africana Poetry of the Americas.**

Focus on origins of Modernism among Africana authors of the Americas, with emphasis on the poetry, poetics and poetry movements of Brazil and Latin America, the Caribbean and US from 1888 through the first half of the 20th century. Begins with an overview of innovations wrought by Rubén Darío of Nicaragua, arguably the first modernist poet, and continues with the Harlem Renaissance of the 1910's and 20's; the Brazilian writers at the center of the Week of Modern Art of 1922; Caribbean writers of the Negritude and Négritude movements; concludes with the work of such US and Anglophone Caribbean poets as Gwendolyn Brooks, Robert Hayden and Martin Carter. Enrollment limited to 20.

**AFRI 1640. Development, Dependency, and Decline in Africa, 1950-2025.**

This course on the history of Africa begins as European empire unraveled after the Second World War and ends with a look toward the future. Development was high on the international and national agenda in the mid-twentieth century, but the most conspicuous outcome of the following decades was dependency and decline. Yet the story is more mixed than has been represented in American headlines; it was not one of pre-determined and constant failure. More than ever, at the beginning of this new millennium, conditions across the continent have diverged. What are current signs for future development or continuing crisis?

**AFRI 1710A. Political Visions and Community Formations.**

This course aims to consider the depths of connection between forms of racialized, gender, class and sexual oppression vis a vis the creation and maintenance of community and intimate social bonds among the oppressed. We will read sociologists, historians and others who have worked at this intersection and musicians and writers such as: Morrison, Bambara, Baldwin, Hill-Collins, Hansberry, soul and neosoul artists. Instructor permission required. Enrollment limited to 20.

**AFRI 1750. Eastern African History.**

A lecture course examining the history of Eastern Africa from earliest times until 1963. The area includes the Great Lakes region, the Horn of Africa, Madagascar, and the East African Coast. The major topics are: precolonial interactions, the development of states and stateless societies, contact with other Indian Ocean people, the slave trade, colonial rule, and independence movements.

**AFRI 1800. Race, Empire and Modernity.**

Taking Cicero's notion of empire as "ways of life", this course will survey the history of empires as forms of rule. It will explore how race has been deployed in the various types of empire. The course will pay particular attention to empires in modernity since 1492. The course will think about the various technologies of rule and their discourses of power.

**AFRI 1820. Contemporary African Political Philosophy.**

This course examines some contemporary responses to the human condition in Africa. Topics will include Democracy, human rights, instability, social justice, identity, community and solidarity. These topics will be approached through the works of Canonical figures such as Leopold Senghor, K. Nkrumah, Frantz Fanon, Steve Biko and the recent analytical (T. Kiros), Hermeneutical (T. Serequeberhan), Existential (L. Gordon) Historicism and poeticism (P. Henry) and Postcolonial Mislocation (M. Diawara).

**AFRI 1850. The Civil Rights Movement: History and Legacy.**

Explores the origins, conduct and complex legacy of the Civil Rights Movement. Topics include: historical roots of the movement; the campaign against legal segregation; the birth of S.N.C.C.; Black Power; the impact of the Cold War, Vietnam and the coming of African independence; and the movement's impact on other political struggles, including movements among women, Latinos, and Native Americans.

**AFRI 1920. Health Inequality in Historical Perspective.**

Seminar takes a historical perspective to explore causes of health inequality in the US. Draws on studies from the 19th century-present. Examines socio-political and economic context of health/disease, focusing on how race, class, and gender shape the experience of health, disease causality, and public health responses. Includes health consequences of immigration, incarceration, race-based medicine, the Chicago heatwave, and Katrina. Enrollment restricted to 20, second and third-year students.

**AFRI 1930. Race, Difference and Biomedical Research: Historical Considerations.**

This advanced seminar places the current debate over race, health, and genetics in historical context. An overarching goal is to understand how the social world informs the scientific questions we ask, design of research studies, and interpretation of findings. How have the theories and practices of biomedical science and technology produced knowledge of "race" and racial difference historically? How does race relate to gender and class? What are the implications of this debate for understanding health inequality? Previous coursework in Africana Studies preferred. Enrollment limited to 20; instructor permission.

**AFRI 1950. Philosophy, Literature and the Caribbean Novel.**

This is a thematic course on the philosophical and literary themes which emerge from the Caribbean novel and writing in general.

**AFRI 1955. History and Memory in Africana Literature.**

Focuses on the close reading of nine works by writers of African descent - encompassing a variety of eras, forms and genres, stretching from the slave narrative to more contemporary settings. The thrust is to examine how each writer wrestles with issues of history and memory, with particular attention to the sometimes explicit, sometimes implicit interest in ideas and modes of expression that are rooted in African culture. Enrollment limited to 20 sophomores, juniors, and seniors; preference given to Africana Studies and English concentrators.

**AFRI 1968. 1968: A Year in Review.**

In 1968 students' walked-out at Brown, leading to the 1969 creation of the Rites and Reason Theatre and later the formation of Afro-American Studies, now the Department of African Studies/Rites and Reason Theatre. 1968 was also a global year of contention, confrontation and change, with consequences that continue to resonate into the present. This class harnesses the multiple narratives and studies of our faculty across the campus and alumni who took part in the 1968 walk-out. Classes blend lecture and discussion. Speakers assign appropriate reading to coincide with their topics. Requirements include mandatory participation to planned anniversary events.

**AFRI 1970. Independent Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**AFRI 2001. Theories of Africana Thought: Intellectual History and Critical Theory.**

This course will be a close reading of the various ideas, theories and practices of the thinkers, writers, artists and activists whose work and practices have constituted an Africana intellectual tradition. In conducting this review we will examine questions around the formation and the history of thought and intellectual traditions in general. We will also think about the various fields of knowledge which have shaped Africana thought. The course therefore will spend some time working through the different meanings of intellectual work and critical thought and theory. Enrollment limited to 12 graduate students.

**AFRI 2002. Theories of Africana Thought: Literary and Expressive Cultures.**

A preoccupation of Africana Studies involves the central, highly contested role of the notion of what constitutes black culture in the modern world. To what degree can we claim aesthetic and other distinctions between black cultures in the Diaspora and other western cultural practices and expressive forms? What role did enslavement, forced migration and segregation play in shaping Africana culture in the modern west? These cultural debates play a central role in literary, musical, philosophical, aesthetic, historical and sociological analyses of the culture of people of African descent frame this graduate course.

**AFRI 2100. Race and the Modern World.**

Race and the Modern World is a team taught interdisciplinary graduate seminar that critically examines the intersections of ideas, institutions, ideologies, and practices that have defined race and processes of racialization in the modern era. The seminar will closely examine the theoretical and methodical issues in the critical study of race; the politics and political theories of race; the imbrications of discourses of race, culture, and public life; the political economy of race; and the intellectual history of the discourse of race with an emphasis on the university as a key site in the production of racial knowledge. Enrollment limited to 20.

**AFRI 2101. Methods in Africana Studies.**

This graduate seminar brings together various methodological and theoretical approaches to interpreting Africana life, culture, thought, and politics. Placing special emphasis on emergent scholarship that shapes and reshapes the discipline of Africana Studies, we examine a selection of humanistic and social scientific studies of various local, national, and international contexts. Texts demonstrate the ways in which innovative interdisciplinary methods are crucial for understanding the complexity of the Africana world. We will give attention to the strategies scholars utilize to formulate their research questions, design their methodologies, and create new ideas that contribute to the advancement of Africana Studies scholarship.

**AFRI 2102. Interdisciplinary Methods and Africana Studies.**

This graduate seminar focuses on interdisciplinary methodology and Africana Studies. The seminar explores how students and scholars in Africana Studies use interdisciplinary methods developed in the social sciences and the humanities in novel and innovative ways. Students will critically examine key methodological issues in Africana Studies and how and in what ways these issues are similar to and differ from such disciplines as economics, history, sociology, and literature. Prerequisite: a prior undergraduate or graduate level methods in Humanities or Social Sciences. Enrollment limited to 20.

**AFRI 2104. Theorizing the Black Diaspora.**

This seminar will focus on the theorization of the black diaspora as a way to explore the various articulations of colonialism, gendered racism and resistance against that racism throughout African-descendant communities. Course readings will highlight the scholarship of black women who have contributed to the internationalization of radical black vis-a-vis theories of diaspora, transnationalism, transformative politics, identity formation, and community. This course is open to upper level concentrators in Africana Studies by permission of instructor. Enrollment limited to 20.

**AFRI 2450. Exchange Scholar Program.****AFRI 2502. Race and Nation in the Spanish Caribbean.**

For five centuries, the Caribbean has stood at a crucial crossroads in the unfolding history of the Americas, Europe, and the African diaspora. This seminar engages in a comparative survey of the interwoven dynamics of race and national construction in the making of the Spanish-speaking Caribbean. The focus of the seminar will be placed on the on-going centrality of race in these island nations. Drawing on a range of readings in history, music, poetry and anthropology, this course will explore the overlapping historical contexts of Cuba, Puerto Rico, and the Dominican Republic.

**AFRI 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**AFRI 2980. Graduate Level Independent Reading and Research.**

A program of intensive reading and research. Section numbers may vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**AFRI 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**AFRI XLIST. Courses of Interest to Concentrators in Africana Studies.**

## American Studies

### Chair

Matthew Guterl

The Department of American Studies at Brown remains committed to the interdisciplinary study of the American experience, drawing on a range of methodologies and practices to understand American society and cultures. As one of the oldest departments of American Studies, Brown's program has an almost seventy year history of activist teaching faculty fully engaged in research; prize-winning and productive graduate students who now teach their own students around the world; and curious and exciting undergraduates who use their educations in a wide range of fields from medicine to law; from social work to library science. In 2005, in collaboration with the Center for Public Humanities (<http://www.brown.edu/academics/public-humanities>), that administers the degree program, American Studies began an A.M. in Public Humanities, based on our revitalized undergraduate curriculum that fosters a publicly engaged scholarship and the John Nicholas Brown Center's mission to support and strengthen the work of arts and cultural organizations that strive to preserve, interpret, and make the humanities, meaningful and accessible. Faculty and students have together pioneered new avenues in transnational research, exploring the role of the United States in the world and the importance of the world in the United States, and expanded our research and teaching into digital scholarship.

For additional information, please visit the department's website: <https://www.brown.edu/academics/american-studies/>

## American Studies Concentration Requirements

The concentration in American Studies seeks to understand American society and cultures as emerging from historical and contemporary processes at work in local, national, and global contexts. Concentrators study four broad themes: social structure and the practices of identity, space and place, production and consumption of culture, and science, technology, and everyday life. The concentration is predicated on the ideal of scholarly engagement with the public, so students take junior seminars that engage some aspect of the public humanities such as public policy, memorialization, community studies or civic engagement. Study abroad is supported and encouraged.

Interested students may contact the director of undergraduate studies.

A concentrator in American Studies will be able to:

- Analyze texts, contexts, and data from multiple disciplinary and historical perspectives
- Synthesize research as verbal, visual and/or digital presentations
- Explore the theory and/or practice of the engagement of scholarship with a broader public
- Understand how American society and cultures have been and are being shaped by global flows of people, goods and ideas
- Experiment with new media as critical tools for scholarship

Concentrators have gone on to a vast variety of careers, including law, public humanities, politics, public service, academics, business, creative arts, and medicine.

#### Requirements:

Each concentrator will take 10 upper-level courses, four of which must be seminars, including a Junior Seminar (an AMST 1700 level course) and a Senior Seminar (AMST 1900 level course). Students may take as many AMST 1900 level courses as they wish, however for the course to count as a senior seminar it must be taken during the senior year.

Each concentrator will create an individual FOCUS consisting of at least three courses in consultation with the Concentration Advisor. The focus is the flexible core of the concentration. Here each student builds a coherent and dynamic interdisciplinary structure of related courses that develops his or her compelling interest in some aspect of American experience. Courses from outside of AMST and ETHN can be counted for credit within the concentration if they relate to the concentrator's focus area.

All seniors are required to do a capstone electronic portfolio.

Some concentrators may elect to do an Honors Thesis and are encouraged to take AMST 1800, the Honors Seminar, in the Spring of their Junior year. Students pursuing honors are required to take two independent study courses (AMST 1970) in their senior year, in addition to the regular concentration requirements (for a total of 12 credits), in order to write their honors thesis.

## Requirements for the American Studies Concentration

Junior Seminar: A course from the AMST 1700 Series, for example: 1

AMST 1700B	Death and Dying in America
AMST 1700C	Slavery in American History, Culture and Memory
AMST 1700D	Race and Remembering
AMST 1700F	American Publics
AMST 1700I	Community Engagement with Health and the Environment

Senior Seminar: A course from the AMST 1900 series taken during the senior year, for example: 1

AMST 1900A	The Problem of Class in America
AMST 1900B	America and the Asian Pacific: A Cultural History
AMST 1900C	Narratives of Slavery
AMST 1900D	America as a Trans-Pacific Culture
AMST 1900F	Transnational Popular Culture
AMST 1900G	Movements, Morals, and Markets
AMST 1900I	Latina/o Cultural Theory
AMST 1900J	Race, Immigration and Citizenship
AMST 1900K	China in the American Imagination
AMST 1900L	Cold War Culture The American Culture in the Cold War
AMST 1900N	Ethnicity, Identity and Culture in 20th Century New York City
AMST 1900O	Filipino American Cultures
AMST 1900P	Essaying Culture
AMST 1900Q	From Perry to Pokemon: Japan in the United States, the United States in Japan

AMST 1900R	Gender, Race, and Class in the United States	
AMST 1900S	Green Cities: Parks and Designed Landscapes in Urban America	
AMST 1900U	Immigrant Radicals: Asian Political Movements in the Americas 1850-1970	
AMST 1900V	Immigrants, Exiles, Refugees, and Citizens in the Americas	
AMST 1900W	Latina Literature: The Shifting Boundaries of Identity	
AMST 1900X	Latina/o Religions: Encounters of Contestations and Transformations	
AMST 1900Y	Latino New York	
AMST 1900Z	Latinos and Film	
Two additional upper-level seminars taken from the AMST 1700, AMST 1800, or AMST 1900 series		2
Six upper-level lectures or seminars numbered between AMST 1000 and AMST 1900, including those AMST 1900s listed above. Some examples of past seminars include:		6
AMST 1250G	Topics in Material Culture Studies: The Arts and Crafts Movement in America 1880-1920	
AMST 1596	Education Beyond the Classroom Walls: Teaching and Learning in Cultural Institutions	
AMST 1600D	Sports in American Society	
AMST 1601	Health and Healing in American History	
AMST 1611M	Trauma and the Shame of the Unspeakable: The Holocaust, American Slavery, and Childhood Sexual Abuse	
AMST 1901D	Motherhood in Black and White	
AMST 1902Z	Radio: From Hams to Podcasts	
AMST 1904V	Decolonizing Minds: A People's History of the World	
AMST 1905N	War and the Mind in Modern America	
AMST 1905Q	Laboring Women: Work, Reproduction, and Leisure since Reconstruction	
AMST 1906H	Beauty Pageants in American Society	
AMST 1906I	Decolonizing Museums: Collecting Indigenous Culture in Taiwan and North America	
Ungraded Capstone ePortfolio		
Total Credits		10

## Honors

AMST 1970	Independent Reading and Research (Students pursuing honors in the concentration are required to take two semesters of Independent Study to produce the Honors Thesis)
-----------	---

## WHAT we study

American Studies at Brown is concerned with four broad themes:

- **Social Structures and the Practices of Identity:** How do communities and individuals come to define themselves, and how do others define them, in terms of, among other categories, nation, region, class, race, ethnicity, gender, sex, religion, age and sexuality? How do organizations and institutions function socially and culturally? What are the roles of social movements, economic structures, politics and government?
- **Space and Place:** How is space organized, and how do people make place? This includes the study of natural and built environments; local, regional, national and transnational communities; and international and inter-regional flows of people, goods, and ideas.

- **Production and Consumption of Culture:** How do people represent their experiences and ideas as culture? How is culture transmitted, appropriated and consumed? What is the role of artists and the expressive arts, including literature, visual arts and performance?
- **Science, Technology, and Everyday Life:** How does work and the deployment of science and technology shape American culture? How do everyday social practices of work, leisure and consumption provide agency for people?

## HOW we study

American Studies at Brown emphasizes four intersecting approaches that are critical tools for understanding these themes:

- **Cultural and Social Analysis:** Reading and analyzing different kinds of texts, including literary, visual, aural, oral, material objects and landscapes. Examining ethnic and racial groups, institutions, organizations and social movements.
- **Global/International Contextualization:** Comprehending the United States as a society and culture that has been shaped by the historical and contemporary flows of people, goods and ideas from around the world and in turn, learning about the various ways in which America has shaped the world.
- **New Media Understandings:** Understanding the creation of new forms of discourse, new ways of knowing and new modes of social organization made possible by succeeding media revolutions. Using new media as a critical tool for scholarship.
- **Publicly Engaged Scholarship:** Connecting the theory and the practice of publicly-engaged research, understanding and presentation, from community-based scholarship to ethnography, oral history, and museum exhibits. Civic engagement might include structured and reflective participation in a local community or communities or the application of general theoretical knowledge to understanding social issues.

## Ethnic Studies Concentration Requirements

Ethnic Studies is an interdisciplinary, comparative concentration that examines the construction of race and ethnicity in social, cultural, historical, political, and economic contexts. Concentrators develop individual programs based on areas of focus in consultation with faculty advisors, drawing from courses in the humanities and social sciences. Typical areas of focus are social issues (such as inequality, education, or health), cultural production and the representation of racial groups, processes of racialization, the historical formation of transnational communities and of diaspora, and the history of particular ethnic or racial groups.

The Ethnic Studies concentration (<https://www.brown.edu/academics/american-studies/ethnic-studies>) at Brown emphasizes the histories of diverse racial groups within and across the borders of the United States, including examining issues of diaspora, migration, social movements, and the political economies of social inequality and racial formation. Concentrators strive for intellectual fluency in a range of critical approaches to race and ethnicity across disciplines, and demonstrate this fluency through the composition or creation of a significant piece of original research or creative work.

Brown University established an Ethnic Studies concentration in 1996, originally within the Center for the Study of Race and Ethnicity in America (<https://www.brown.edu/academics/race-ethnicity>) (CSREA). In the Fall of 2013, as part of changes to the CSREA and to better support students, Ethnic Studies joined a long established Brown department, American Studies (<https://www.brown.edu/academics/american-studies/home>).

Many American Studies faculty members (<https://www.brown.edu/academics/american-studies/people>) work in the areas of race and ethnicity and have held joint appointments in Ethnic and American Studies while American Studies PhD students (<https://www.brown.edu/academics/american-studies/graduate-students>) have done some of the most exciting Ethnic Studies research on campus.

As an academic field, Ethnic Studies is rooted in the protests of the 1960s and 1970s, out which emerged the very first Latino/a Studies,

Asian American Studies, African American Studies, and Native American studies programs. Organized around straightforward political goals – the enrichment through diversification of the curriculum and the systematic, multi-disciplinary, and the often comparative study of racial and ethnic inequality – Ethnic Studies has become an important feature of major research universities.

Faculty, both core and affiliated, create and participate in groundbreaking Ethnic Studies scholarship. Areas of faculty research include borderlands history, Latina/o literary studies and visual culture, indigenous movements, migration and African American cultural studies as well as the intersecting fields of gender and sexuality, queer theory and critical race theory. Students can focus their study on specific populations (e.r. Latina/os, Asian Americans) and choose a thematic interest including such current examples as: "social issued affecting radicalized groups" (students have looked at health disparities or educational inequality); "the study of cultural production or cultural representations;" "the theory of a particular racial or ethnic group;" and " the study of comparative processes of radicalization."

## Requirements

ETHN 1000	Introduction to American/Ethnic Studies	1
Any two courses from the ETHN 1200 "Topics in Ethnic Studies" or ETHN 1750 "Advanced Topics in Ethnic Studies" sequence, or similar electives in AMST, as approved by the advisor		2
ETHN 1200B	Contemporary Indigenous Education in North America	
ETHN 1200D	Latinx Literature	
ETHN 1750A	Immigrant Social Movements: Bridging Theory and Practice	
ETHN 1750B	Treaty Rights and Food Fights: Eating Local in Indian Country	
ETHN 1750D	Transpacific Asian American Studies	
ETHN 1750E	Transpacific Popular Culture	
Four classes that address the student's focus area and that prepare them for the capstone experience. At least two of these classes must bear an ETHN designation. Of the other two classes, only one may be a Department Independent Study Project (DISP). If a student pursues that option, the class must be undertaken with core faculty, all of whom are listed on the department website, and it must be offered under an ETHN course number. Please consult the following guidelines for designing a DISP. Please note a Department Independent Study Project Form and a draft syllabus will be due to the Director of Undergraduate Studies no later than two weeks into the semester the DISP takes place.		4
ETHN 1650	Methods and Approaches in Ethnic Studies	1
American Studies seminar in the AMST 1700 series		1
AMST 1700D	Race and Remembering	
AMST 1700F	American Publics	
AMST 1700I	Community Engagement with Health and the Environment	
AMST 1700K	Race in the Americas: A Hemispheric Perspective	
ETHN 1900	Ethnic Studies Senior Seminar	1
Total Credits		10

Courses taken toward the fulfillment of concentration requirements must be at or above the 1000 level. At the advisor's discretion, a student may count a single course below the 1000 level towards their requirements. This class must be taught by a core faculty member listed on the department's website and may be offered through another department.

## Honors:

Admittance to the Ethnic Studies Honors Program requires:

1. A 3.5 GPA in concentration courses
2. A 3.0 overall GPA

3. The standard concentration (<https://www.brown.edu/academics/american-studies/ethn-studies-requirements-prior-7117>)
4. AMST/ETHN 1800 the Honors Seminar in the sixth semester
5. An Honors Thesis Proposal and an application for the Ethnic Studies Honors Program (see below for link to application)
6. Two independent studies, taken in the 7th and 8th semester, with the Director of your honors thesis
7. A completed project, delivered the third week of April if student is a May graduate (the first Monday of December if the student is a May graduate)
8. A recommendation for honors from both readers

Students must define their honors project in a proposal by early May (in accordance with the due dates established in the honors seminar, AMST/ETHN 1800) or near the end of their sixth semester. The proposal is comprised of a five-page, double-spaced project description along with a bibliography of relevant sources. More details on the proposal can be found here (<https://www.brown.edu/academics/american-studies/american-studies-honors-thesis-prospectus>).

This proposal must be submitted for approval to the Director of Undergraduate Studies (DUS) along with the application for the Ethnic Studies Honors Program form on the same date that it is submitted in the honors seminar. The proposal should identify the problem, or question the student will focus on, and suggest approaches and possible hypotheses or outcomes. Students need to work with two professors – a director and a reader. At least one should be Ethnic Studies faculty. The proposal should name a confirmed director (who must sign your application form) and a likely second reader (who will need to confirm their participation at the beginning of your 7th semester). If a student wants to work with two professors, neither of whom is Ethnic Studies faculty, then they should have a third reader who will read the final draft or consult on the final project and approve it for honors in the field. Students deciding not to do an honors thesis after completing the Honors Seminar will receive credit for the course and still be able to count it as a seminar in the concentration.

Concentrators studying abroad during the second semester of the junior year, when the Honors Seminar is offered, may waive the Honors Seminar with permission of the DUS prior to the beginning of the senior year. Such a waiver of the Honors Seminar will be predicated on the submission of a detailed plan for the honors project approved by a faculty director with a confirmed second reader submitted to the DUS in the first two weeks of the senior year.

An updated thesis proposal, confirming a second thesis reader, will be due for all thesis writers within the first two weeks of the senior year.

In their seventh and eighth semesters, students seeking honors will enroll in an independent study class (ETHN 1910) with their director during which they will follow through on the plan devised in the spring of their junior year. Students and thesis directors should plan on at least a monthly meeting to discuss the research, writing and revision of sections of the thesis. In addition to meeting with their director, students should also plan to meet their second reader during this time. Guidelines for thesis directors and readers can be found here (<https://www.brown.edu/academics/american-studies/american-studies-honors-thesis-directors-and-readers>).

In their eighth semester, the deadline for a finished full draft of their project is the third Friday in April (for May graduates) or the first Monday in December (for December graduates). Students should turn in a pdf of a completed (proofread, formatted, fully written) draft to their readers by that day. Of course, students will turn chapters to the director and reader before that, according to their recommendations, but the third Friday of April (or first Monday in December) is the absolute deadline to turn in a pdf of the final draft.

A signed and bound copy of the thesis is due to the department one week after submission of the pdf where it will be available for one year and then sent to the Hay Library.

All official readers must recommend the project for honors, indicated by their signature on your cover sheet and the director's written report.

When written as formal research papers, honors theses are generally between 50-100 pages. When there is a creative or public component,

students should work closely with their faculty team to determine the appropriate length of the written accompaniment.

Students will make a public presentation of their work to the Ethnic Studies faculty during the first week of May for May graduates and mid December for December graduates.

## American Studies Graduate Program

The department of American Studies offers graduate programs leading to the Master of Arts (A.M.) in American Studies, and the Doctor of Philosophy (Ph.D.) in American Studies.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/american-studies>

In collaboration with the JNBC, who administers the degree program, the department of American Studies also offers the Master of Arts (A.M.) in Public Humanities.

For more information regarding admission and Public Humanities program requirements please visit: <http://www.brown.edu/academics/gradschool/programs/public-humanities>

## Courses

### American Studies

#### AMST 0150B. Boston: A City Through Time.

This interdisciplinary seminar for first year students will examine the City of Boston from its seventeenth-century origins to the present day. Among the topics covered will be architecture, city planning, physical expansion, political leadership, urban renewal, historical preservation, park development, racial and ethnic tensions, and suburban sprawl. Includes a Boston tour. Enrollment limited to 19 first year students.

#### AMST 0150C. Bodies of Knowledge: Gender, Race and Science.

This course examines how science and medicine have located racial and sexual differences in the human body and gendered the natural world from the seventeenth through the twentieth centuries, with a focus on the nineteenth and twentieth centuries. We will consider historical changes in the production of scientific knowledge about gender, race, and sexuality, as well as debates about who participates in scientific work.

#### AMST 0150D. The West in the American Imagination.

No region has such a purchase on Americans' collective imagination as the West. No region is so drenched in misrepresentation and mythology. In this seminar, we will use fiction, film, and works of history to explore the American West as both historical reality and wellspring of collective myth. Enrollment limited to 19 first year students.

#### AMST 0150E. Skill: From Flint-knapping to the Maker Movement.

What does it mean to be skilled? How do mechanical and material knowledge, expertise in the use of tools, and physical ability allow us to make and repair things? How do actions, words, images and artifacts embody skills? How do skills fit into social and cultural settings? How have ideas about skills changed over time?

In this course we will read the writings of skilled craftspeople, scholars, and cultural critics; observe skilled practitioners in a variety of areas; learn new skills, and write about them.

#### AMST 0150F. What Does A Woman Want?.

This course is an introduction to psychoanalysis and its vexed and productive relationships to women and feminism. Freud asked his famous question: "What does a woman want?" after years of clinical practice and theoretical speculation. Woman's desire remained a mystery to him, but the attempt to solve it has given rise to a rethinking of human sexuality, of gender, of social structures, and of creativity. We will read foundational texts by Freud and by feminist disciples and critics of psychoanalysis theories. The literary texts will be read as critiques of theoretical positions, as well as examples of particular historical constructions of gender. The course is broadly interdisciplinary and explores the boundaries and intersections of different disciplinary practices and frameworks. Enrollment limited to 19 first year students.

**AMST 0150I. Race, Sex, and Biology: A Cultural History of Differences.**

Are your race, gender, and sexual orientation biologically pre-determined? This course traces the history and cultural implications of theories of racial and sexual differences. We examine three "scientific" theories -- Darwinism, eugenics, and genetics -- in popular culture, public policies and social movements, and consider how these social constructs both empowered and disempowered women, homosexuals, and racial minorities. Enrollment limited to 19 first year students.

**AMST 0150J. The Boy Problem.**

Focusing on the beginning, middle, and especially concluding decades of the 20th century, this course examines the ways in which both expert and popular discourse in the US have conflated male adolescence with social pathology and have constructed an image of the teenage boy as both symptomatic of and responsible for the nation's ills. Particular attention will be paid to issues of gender, race, and class. Primary source readings and original research will be emphasized. Enrollment limited to 19 first year students.

**AMST 0150K. Culture, Communities, and Change.**

Studying varied organizations such as museums, community arts groups, rock bands, and dance companies, this seminar works on three levels. Students consider the role of cultural production in local, national, and international economies and lives; think about methods for studying creative communities; and write the "biographies" of Providence cultural organizations. Issues of tourism, representation, hierarchy, urban space, and social change as well as questions about who puts culture to work and the role of cultural workers will be addressed. We will consider public humanities, engaged scholarship and community organizing as methods as we explore the Providence cultural scene. Enrollment limited to 17 first year students.

**AMST 0150L. Object Histories: The Material Culture of Early America (HIST 0550A).**

Interested students must register for HIST 0550A.

**AMST 0150M. 95 North: New York Fictions.**

In this course we will consider humanity's fate in twentieth-century and postmillennial Gotham. Through a broad range of literature and film that treats New York as a destination unto itself, 95 North examines the city's representational status as our nation's de facto capital by focusing on its most undemocratic and antisocial features (e.g., widespread disaffection, racial animus, gentrification, vice, and criminality). Writers include James Weldon Johnson, Saul Bellow, LeRoi Jones, Frank O'Hara, Samuel R. Delany, Jay McInerney, Diana Son, and Teju Cole.

**AMST 0150N. Color Me Cool.**

This seminar is an introduction to graphic novels produced in the U.S. since 1985 and will train you in critically interpreting graphic novels. We will pay close attention to the relationship between the visual and textual components of the novels. While we will draw on many critical reading tools, we will use Scott McCloud's *Understanding Comics* to give us a shared critical vocabulary. I may use one superhero graphic novel as a point of contrast, but the course will focus on graphic novels such as Alison Bechdel's *Fun Home*, Adrian Tomine's *Shortcomings* and the like.

**AMST 0150P. The Teen Age: Youth, Society and Culture in Early Cold War America.**

An interdisciplinary and multimedia exploration of the experiences, culture, and representation of youth in the United States from the end of World War II through the beginning of the Vietnam War. Enrollment limited to 19.

**AMST 0170A. American Slavery On Screen.**

Since the advent of American cinema, antebellum slavery has remained an abiding topic of interest for filmmakers and theatergoers alike. From Thomas Edison's *Uncle Tom's Cabin* (1903) to Steve McQueen's *12 Years A Slave* (2013), our infatuation with the peculiar institution appears be as relevant to our nation's ongoing discussions about race and civic belonging as it was to those antislavery debates that precipitated the Civil War. This course examines the various ideological ends to which cinematic slavery has been put to use.

**AMST 0170C. Race, Class, and Girlhood.**

This seminar provides an introduction to girlhood studies, both historically and theoretically, and positions girls at the center of popular culture analysis. In particular, this course examines the intersections of race, class, and gender in the construction of "girlhood" within the U.S. Through an analysis of different forms of popular culture, students in this course will gain an understanding of the politics of production and consumption and the diverging disclosures around what it means to "be a girl".

**AMST 0170D. Musical Youth Cultures.**

This sophomore seminar explores how and why young people form communities around popular music. We will discuss readings and documentary films about musical subcultures, media circulation, and how young people make music meaningful in their lives. The course requires critical engagement with a variety of popular music genres and cultures, as well as reflection on our own musical production and consumption practices. Major topics include punk, hip-hop, metal, rock, and club music; popular music and intersectional identity (including race, gender, sexuality, ethnicity, and disability); fan communities; activist musical collectives; music-sharing technologies; the politics of style; and ethnographic theory and method.

**AMST 0190A. Selling Love, Selling Sex: Romance in Popular Culture.**

Where do our beliefs about love and romance come from? Is it true that "sex sells"? This course examines representations of love in advertising and popular culture from the 1920s, 1950s, 1980s and the present. We'll compare texts such as *Ladie's Home Journal*, *I Love Lucy*, and *Dynasty* to *Maxim*, *Desperate Housewives*, and *Mad Men*. Enrollment limited to 17 first year students and sophomores.

**AMST 0190B. Histories of Memory/Memories of History.**

This course examines the role of historical narratives in popular culture and politics, using memoir, films, newspapers, political cartoons, and scholarship to think about how such narratives build and break local, national, and transnational communities, serve and interrupt different kinds of political agendas, and reform the way we orient ourselves to the way we live and to those with whom we live. How is the past made? By whom? Topics will include the Holocaust, the Vietnam War, Columbus, memorials, and holidays. Enrollment limited to 17 first year students and sophomores.

**AMST 0190C. American (Mass)culinities: Sexuality, Race and Aesthetics.**

This course explores masculinity in American popular cultures since 1945. Starting with theories of homosociality, racial and gender formation at the turn of the century, to modern and post-modern cultural productions that visualize or narrativize "masculinity" including novels, films, and video. Through frameworks of psychoanalytic theory, queer theory and critical race theory we think about masculinity as narrative, as a set of discourses, an epistemology, an aesthetic and privileged form of Americana. How we understand the politics of race and sexuality through images of male bodies? What it means to decouple masculinity and men? What are the relationships between gender/genre? Enrollment limited to 17 first year students and sophomores.

**AMST 0190D. Popular Music and the City.**

This course will examine the relationship between popular music and its sociocultural context by concentrating on three urban music forms; blues, soul, and hip hop. Readings will focus on: (1) concepts such as audiences, the music industry, cultural infrastructure, and race; (2) processes such as urbanization, demographic change, and the politicization of popular music. Enrollment limited to 17 first year students and sophomores.

**AMST 0190E. It's the End of the World As We Know It: Zombie and Apocalypse Narratives in American Pop Culture.**

Zombie narratives originated as part of racist colonial ideologies prevalent in Haiti and the Caribbean, and have since become a means of social and political critique. This course charts how the zombie has been re-appropriated and redeployed in American culture. Taking an interdisciplinary approach, we examine zombie and apocalypse narratives in film, literature, comics, and video games. Enrollment limited to 17 first year students and sophomores.

**AMST 0190F. Beyond the Tourist Trap: The Past, Present, and Future of Asian American Urban Spaces.**

Beyond the lure of the "exotic" food, cultural festivals, and distinctive architecture of Chinatowns, Little Tokyos, Filipinotowns, Koreatowns, Little Saigons, and Little Indias, Asian American spaces are at once historical remnants of an exclusionary past and the current embodiment of the diversity of ethnic communities. This class seeks to understand such spaces by considering the people involved — those within and outside of the community — and the complex relationships among community groups. Texts will include histories, maps, works by urban planners, and a field trip to Boston's Chinatown. Enrollment limited to 17 first year students and sophomores.

**AMST 0190G. The Fringe is the Fabric: Anti-Immigrant Movements in the United States.**

This course traces nativist anti-immigrant movements and violence in the United States. Starting in the colonial period and ending with contemporary issues, the course demonstrates how anti-immigrant movements occur across place and time and serve to police the boundaries of U.S. citizenship. The course relies on fiction, documentary films and other historical texts to highlight continuing violent conflicts. We focus on the use of "vigilante" violence and put contemporary discussions of immigration in a new frame. Enrollment limited to 17 first year students and sophomores.

**AMST 0190H. Junkies, Robots, and Fight Clubs: Revisioning the "American Dream" in US Popular Culture.**

From fembots to fightclubs, this course explores our obsession with revisions of the American Dream. We examine film and literary translations of three recycled stories—Rags-to-Riches, the Open Road, and Domestic Bliss—to better understand how we narrate the "American" experience and consider how these nationalizing narratives construct race, class, and gender. Films and texts include "Stepford Wives," "Easy Rider," and "Wall Street." Enrollment limited to 17 first year students and sophomores.

**AMST 0190I. Re-Thinking Political Aesthetics: Beauty, Modernity, and Justice in the Americas.**

The United States and the Americas have always been spaces of intertwined artistic, political, and religious expression. Yet, in the growing field of political aesthetics, works of European modernism are prized while examples from the Americas are rarely mentioned. This course examines the philosophical texts used to frame the field of political aesthetics, as well as food in the colonial diet of New Spain, painting during the Civil War, photography and the New Negro movement, jazz and the Beat generation, and other case studies of American expression that engage, complicate and re-construct the relationship between art and politics.

**AMST 0190J. Four-Color Creatures: Race, Gender, and Monstrosity in American Comic Books and Popular Culture.**

This course explores the relationship between race, gender, and monstrosity in American popular culture, particularly in comic books and graphic novels. Utilizing the concept of the monster as a metaphor, we examine the intersection of these discourses to interrogate how monstrosity informs our collective understanding of the other and affects the representation of race and gender in contemporary print ephemera and visual culture. To compliment our understanding of these materials, we engage with scholarship in the emerging fields of Monster Studies and Comic Studies to highlight the way that these artifacts embody larger trends within American society.

**AMST 0190K. The American War/Vietnam War: Politics, Struggle, and the Construction of History in the US/Vietnam.**

What Americans call the "Vietnam War," the Vietnamese remember as the "War of Resistance against the United States for National Salvation." This class seeks to explore multiple American and Vietnamese perspectives on a prolonged conflict that profoundly shaped the nations' political, social, and cultural landscapes. We focus on differences and similarities in Vietnamese and American interpretations of the origins, conduct and denouement of the war. We examine war memories through memoirs, monuments, movies, documentaries, magazines, and newspapers, as well as in foreign and domestic policies. Enrollment limited to 17 first year students and sophomores.

**AMST 0190L. Cry for Justice: Asian American Literature of Social Activism.**

What insights can literary genres, including poetry, fiction, autobiography and memoir, provide into the struggle for social justice and fight for inclusion in the United States? What role can Asian American literature play in addressing and illuminating past and present injustices? With these questions in mind, through reading protest literary works by Asian American authors, this course will examine the hidden history of Asian immigrant radicalism, dismantle stereotypes against Asian Americans, and assert that literature has been and remains a fundamental site for Asian Americans' active resistance to racial, class, gender and sexual oppression.

**AMST 0190M. Ecological (De)colonization: North American Environmental History, Justice, and Sovereignty.**

This course investigates how historical and contemporary issues of resource capitalism, environmental justice, and settler colonialization in the North American context are entangled. Students will come to understand that Indigenous sovereignty, and thus decolonization, is fundamentally concerned with land and water (i.e. the other-than-human environment). Students will receive an introduction to environmental history, learn to use primary sources, develop a theoretical toolkit to approach topics concerning settler colonialism and environmental/climate justice, and explore political and environmental solutions to the problems discussed.

**AMST 0190N. Health as Morality in American Life.**

This course examines the many ways in which the idea of health is morally constructed in American society and culture. Students will investigate health as a moral value and study the ways in which our conceptions of health affect individuals, shape culture, and organize society. Choosing from topics such as addiction, diet, cigarettes, chronic illness, disability, genetic testing, sex, obesity, and others, students will write analyses and create final multimedia projects that unpack the ways in which moral constructions of health shape and are shaped by media, science, history, capitalism, politics, race, gender, and class.

**AMST 0190O. Expressway Worlds: Landscape and Life on the Margins of U.S. Highways.**

This course explores the history, legacy, and material presence of U.S. highways from the mid-twentieth to the present. Bridging diverse fields and ways of knowing, from cultural history to road ecology, it endeavors to defamiliarize a ubiquitous feature of life and landscape in the contemporary United States, the federal highway system, and invites students to critically re-encounter the same.

We will practice seeing, hearing, and feeling the lively traces of human and multi-species habitation in our midst. And we will consider the effects of interstate roads across time and space; on societies, ecologies, and landscapes.

**AMST 0190Q. Archival Interventions: Tracing Knowledge, Power, and Memory through the Archives.**

This course will examine the ways that power, knowledge, and memory are instantiated through a variety of record keeping practices. Through an exploration of analog and digital storage media, the institutions in which they reside, and an engagement with social justice approaches, feminist theory and queer theory, this course will seek to answer the questions: how are categories formed and what are the social ramifications of these choices? How do records enter certain institutions? Who is represented, in what ways, and who is excluded? This course will include guest lectures and field trips to local archives and libraries.

**AMST 0190S. Los Angeles Plays Itself: Culture and Critique in the City of Angels.**

Explores the history of culture produced in and about Los Angeles during the last century, examining representations of the city in literature, film, television, music, and theory. Texts ranging from detective novels to teen dramas to hip-hop songs will reveal the ongoing conversations and conflicts among Los Angeles's diverse inhabitants that have shaped its physical, cultural, and social landscapes. Enrollment limited to 17 first year students and sophomores.

**AMST 0190T. Talking Social Reform: From Populism and Progressivism to Obama and McCain.**

This course argues that two broad "languages" of social reform, coming out of the Populist and Progressive Movements of the late nineteenth century, have shaped the ways in which Americans understand politics. Students consider how the possibilities for contemporary reform and change have been informed by these languages. We will examine political texts discussing the New Deal, the eugenics movement, the Cold War, liberalism, and the New Left, among others. Enrollment limited to 17 first year students and sophomores.

**AMST 0190U. Sports Mediated: Athletics and the Production of Culture in 20th Century America.**

When we watch sports, we're watching more than a game. Newspapers, radio, television, and the internet produce athletic spectacles within certain cultural boundaries determined by profits, as well as by race, gender and class. The course questions how sports media played a generative role in late twentieth century American culture through three case studies: Michael Jordan's rise to sports stardom; the emergence of skateboarding as an "alternative" sport; and controversies surrounding transgender and transsexual athletes. Non-sports fans are welcome and encouraged! Enrollment limited to 17 first year students and sophomores. Instructor permission required.

**AMST 0190V. Reading the City: Literary Tourism in New York, Los Angeles, Santo Domingo and Manila.**

What shapes our conception of a city we haven't visited? Is it the novels we read or the films we watch? How do our ideas change when we tour or live there? This course investigates New York, Los Angeles, Santo Domingo, and Manila through the various social, political and sexual experiences portrayed in novels, creative nonfiction, poetry, and film. Mindful of our own role as reader-tourists, we will compare depictions of reading, visiting, touring, and living in cities especially with regards to issues of identity and its transformation. Enrollment limited to 17 first year students and sophomores.

**AMST 0190W. Displaying Activism Then and Now: Making an Exhibition for Social Justice.**

We will investigate the possibilities for activism and social relevance through museum exhibitions. We will create an exhibition at the John Hay Library that displays historical and contemporary activism, based on student choices of possible movements including queer rights, animal rights, and environmental concerns. Students choose objects, write labels, and act as curators for the exhibit. Enrollment limited to 17 first year students and sophomores.

**AMST 0190X. Gendered Mobility: Migrant Women Workers in a Globalized Economy.**

Today's women workers migrate at a historically unprecedented rate. This class looks at Third World women who migrate for work in global cities. We examine their experiences through the intersectional lens of gender, race, class, and nationality. We also question the social, political, and economic forces that drive migration and draw women workers to specific destinations. Finally, we will look at the multiple inequalities these workers confront and the ways in which they negotiate and challenge them. Enrollment limited to 17 first year students and sophomores.

**AMST 0190Y. Dead or Alive?: The American West in Popular Culture.**

This course traces the imagined Western frontier as seen in television, film, photographs, museum exhibits, art, tourism, amusement parks, performance, video games, and science fiction. It explores these imagined spaces through the lenses of popular and visual culture, placing the West within the larger social, cultural, economic, and political histories of the US. Both real and imagined, these images defined and consolidated the identities of Westerners and those who wanted to be Westerners. Enrollment limited to 17 first year students and sophomores.

**AMST 0190Z. Queering the Archive: History and the Politics of Identity.**

How is history made? Who makes it? Who benefits from how stories of the past are told? How might we queer the making of histories and how could this influence our futures? This course follows feminists, queer theory scholars, and activists in their journeys to critically analyze historical archives and open up queer readings of the past. We will spend time with variety of cultural texts including Cheryl Dunye's film *The Watermelon Woman*, Lara Kramer's performance piece *NGS (Native Girl Syndrome)*, and Octavia Butler's novel *Kindred* to think about historical knowledge production and its relationship to identity formation.

**AMST 0191B. Race and Nation in the U.S.: Belonging, Longing, and Resistance.**

This course examines how representations of race continue to be critical to the formation of the American nation. We will look at cultural and historical texts that grapple with how "race" is used to (1) define who does and does not belong to the U.S., (2) configure feelings of longing for a homeland, and (3) resist dominant narratives of national inclusion through visual art, performance, and stand-up comedy. The course will use Middle Eastern Americans as its primary case study of these larger themes, and will also incorporate many readings that touch on African American and Latinx experiences.

**AMST 0191C. Race and Space: Segregation, Suburbanization, and Sites of Encampment.**

Through a range of historical examples from the 20th century, *Race and Space: Segregation, Suburbanization, and Sites of Encampment* examines how interconnected forms of racial and spatial difference are produced, reproduced, and transformed in various U.S. locales. This class will provide students with a unique opportunity to conduct primary-source research in a number of archives and apply the course themes to local historical issues of race and space. Students will gain exposure to a wide variety of case studies, disciplines, methodologies, and approaches in which scholars are writing, thinking, and publicly displaying issues of race and space.

**AMST 0191D. Cry for Justice: Asian American Literature of Social Activism.**

What insights can literary genres, including poetry, fiction, autobiography and memoir, provide into the struggle for social justice and fight for inclusion in the United States? What role can Asian American literature play in addressing and illuminating past and present injustices? With these questions in mind, through reading protest literary works by Asian American authors, this course will examine the hidden history of Asian immigrant radicalism, dismantle stereotypes against Asian Americans, and assert that literature has been and remains a fundamental site for Asian Americans' active resistance to racial, class, gender and sexual oppression.

**AMST 0191E. Objects as Texts: Materializing Race, Gender, and Sexuality.**

What is the relationship between objects and identity? This course analyzes how material objects reflect and produce representations of identity, which map onto the body. Alongside a survey of cultural studies, feminist theory, and critical race studies scholarship, we will use specific objects—including, sugar, milk, vibrators, and Spanx—as case studies to critically consider how material culture informs and signals identity. With an emphasis on race, gender, and sexuality, we will read objects as texts and explore how materiality shapes politics, performance, and power.

**AMST 0191F. No-No Boy: Experimental Scholarship on Asian-America.**

This unique course seeks to bridge artistic work and scholarship in an exploration of the Asian-American experience. In this course, Julian Saporiti's *No-No Boy*, a concert project which fuses songwriting, video editing and academic research to look at topics such as Japanese Incarceration, Vietnamese Refugees, and the Asian diaspora more broadly in the US, serves not only as a course outline, but also as a model and jumping off point for those interested in using creative practices to pursue scholarly research and reach a public audience.

**AMST 0191G. TV on History: Representations of the American Past on Commercial Television.**

This course explores commercial television's influence on our understanding of the American past and the way that this sense of history, in turn, helps audiences to form cultural and political identities. We will discuss foundational methods for critical analysis of television as we use this inquiry to examine some of the guiding themes of American Studies. This class, which has a significant viewing component, traces the evolution of history-based programming in many genres and considers the message and impact of programs such as Ken Burns' *Civil War*, *Roots*, *Colonial House*, and *Mad Men*. Enrollment limited to 17 first year students and sophomores.

**AMST 0191H. "My Body, My Choice"?: Reproductive Politics in the U.S. since Roe v. Wade.**

From waiting periods to mandatory ultrasounds, a record number of provisions aimed at restricting women's access to abortion were enacted in 24 U.S. states in 2011. Dubbed the "war on women" by numerous observers, these legislative battles evidence the difficulty in determining reproduction's "proper" place in governmental politics. But is there more to this battle than abortion? Beginning with *Roe v. Wade*, this course explores how welfare, labor, citizenship, the family, religion, and activism alter mainstream conceptions of reproductive politics. Using a variety of sources, including films and websites, we will consider what an expansive reproductive freedom might entail. Enrollment limited to 17 first year students and sophomores.

**AMST 0191I. Identities on the Move: South Asian Americans In Popular Culture.**

Interdisciplinary course looks at the migration, representation and cultural productions of the South Asian diaspora in the United States. We'll examine how category of "South Asian" was created as well as the ramifications of such a label: what does it mean to be South Asian in the United States? Through the examination of academic texts, as well as literature, television and film, we'll explore how South Asian Americans navigate the United States while at the same time, maintaining (or, in some cases, disrupting) connections to countries in the South Asian subcontinent. Enrollment limited to 17.

**AMST 0191J. These Are The Breaks? Rethinking Black Performance in the 20th Century.**

In this course students will look critically at cabaret, documentary film, theatre, dance, popular music, and museum exhibitions, rethinking the ways that Black performances have been configured in debates about American identity in the 20th Century. Rather than try to understand Black performance, and performers, in reductive aesthetic and political frameworks, students will read and write about them as heterogeneous and complex. Enrollment limited to 17 first year students and sophomores.

**AMST 0191K. New Jack(ed) Cinema: Negotiating Race, Criminality, and Place in the Hollywood Film.**

This interdisciplinary course engages critically with film to examine issues of race and criminality, and to better understand our collective, spatial, and personal identities. We study a sub-genre of films, from the 1990s, and investigate how these films interact and intersect with other cultural texts and narratives of race, criminality, sexuality, gender, and the American dream. Films studied include "Colors"; "New Jack City"; "Clockers"; "Boyz 'n the Hood"; and "Menace II Society"; while readings come from film studies, sociology, history, memoir, and policy studies. Enrollment limited to 17 first-year students and sophomores.

**AMST 0191L. Are You Creative?: The Rise of a Modern Virtue.**

Are you creative, or, even, a "creative"? Do you plan to be an entrepreneur, a writer, or an artist? Today, "creativity" is championed by education activists, fringe artists, and corporate CEOs alike. This course gives a critical perspective by tracing the biography of an idea through various fields. We will look everywhere for signs of creativity and focus on the relationship between creativity, work, and economic development, taking of Providence, RI, the "Creative Capital" as an example. We will talk to people involved in various aspects of the city's creative strategy to observe the effects of this powerful idea. Enrollment limited to 17 first year students and sophomores.

**AMST 0191M. The Vietnam War and Visual Culture.**

This course examines how our understanding of one of the most mediated armed conflicts of the twentieth century has changed. Why has "Vietnam" become a metaphor for imperial wars and how has it figured in cultural production within and beyond the United States? Considering photographs, films, and personal narratives beginning during the war and continuing into the present, we recognize the fictive and flexible nature of history and how even the worst experiences are made available for collective memory and mass consumption. The course works to decenter the United States and takes into account long-range ramifications and multiple voices. Enrollment limited to 17 first year students and sophomores.

**AMST 0191N. Beyond Entrepreneurs, Adoptees, and G.I. Wives: Korean American Experiences.**

What does it mean to be Korean American? This course explores the historical and contemporary experiences of people of Korean descent in the United States. In the broader context of U.S.-Korean/Asian relations and through the lenses of race, ethnicity, class, and gender, this course will examine the connections and differences in the lives of diverse Korean populations. The composition of these populations ranges from adoptees, military wives, and entrepreneurs to secondary migrants from Latin America. Throughout the semester, students will be familiarized with the central themes in immigration and ethnic studies such as diaspora, transnationalism, racial formation, and community formation. Enrollment limited to 17 first years and sophomores.

**AMST 0191O. Revolting Bodies: Aesthetics, Representation, and Popular Culture.**

Our understanding of ourselves and others are formed by visual images and bodily feelings that are social in origin. They make us feel (un)comfortable, sublime, ridiculous, grotesque. In this course we will examine how the materiality of the body grounds our metaphors about identity and subject formation. This course moves between cultural studies, queer theory, disability studies, science fiction, drama and film asking how representations structure the way we "know" and "see" bodies. Ultimately we will explore how revolting bodies--bodies that disgust, repulse, signal their difference--can become bodies in revolt--bodies that resist and imagine new possibilities.

**AMST 0191P. Beyond Chinatown: The Past, Present, and Future of Asian American Spaces.**

Beyond the "exotic" dishes, cultural festivals, and distinct architecture of Chinatowns, Little Tokyos, Little Manilas/Filipinotowns, Koreatowns, Little Saigons, and Little Indias, Asian American spaces are both historical remnants of racial oppression and the current home of diverse ethnic communities. Using field trips, films, first person accounts and scholarly explorations, this class examines such spaces by considering the people involved—tourists and residents—and how their complex relationship creates urban and suburban ethnic spaces. Students will workshop and revise papers as well as gain a grounding in approaches to Asian American studies, urban studies, and to the study of public spaces. Enrollment limited to 17 first year students and sophomores.

**AMST 0191Q. Disbelieving the Evidence: Popular Opposition to 20th Century Public Health Initiatives.**

Why do Americans reject programs that make them healthier? Many of the most effective public health initiatives in the 20th century encountered deep resistance. This course explores three initiatives (vaccination, fluoride, and black lung) that continue to generate skepticism or outright opposition. Students will practice several different styles of writing intended for different audiences, including an op-ed and a Wikipedia entry. This writing-designated course will appeal to students of public health, politics, and those interested in the social impact of medical research, as well as those wanting practice in science writing. Enrollment limited to 17 first year students and sophomores.

**AMST 0191R. Fat, Messy, and Late: Unregulated Bodies in American Capitalism.**

This course examines disorganized bodies in 19th and 20th century US history and how slenderness, neatness, and timeliness became virtues. Through these lenses we study capitalism working upon individual bodies; the way these "moral virtues" generate forms of self-regulation; and the way these forms of self-regulation perpetuate the status quo. We draw upon history, sociology, anthropology, and critical theory, starting each section in the 19th century and moving to the present. Using our personal experiences, we examine how belief systems become internalized.

This interdisciplinary course welcomes community health and biology concentrators as well as humanities and social science concentrators. Enrollment limited to 17 first year students and sophomores.

**AMST 0191S. Visualizing the Middle East: From National Geographic to the Arab Spring.**

American visual media remains flooded with images, inspiring and hopeful, or horrifying and terrifying, of the peoples and places of the Near East.

By examining National Geographic photography, Hollywood cinema, televised news programs, and images and videos encountered online, we examine how visual culture has both reflected and actively helped shape the relationship between the U.S. and the Near East. Students will experiment with a diverse methods of visual analysis, work with a class Tumblr site, and write and revise a series of essays. Enrollment limited to 17 first year students and sophomores.

**AMST 0191T. American Identities: Memoir and Autobiography in the Twentieth Century.**

How do we think about our own place in history? This writing-intensive seminar examines how individual Americans have explored the relationship between their identity and historical events, and introduces the legitimacy of using individual experiences to understand history. Themes include the gendering of domestic and public space, the formation of identity within families, class alignments, societal expectations of gender/sexuality, how American exceptionalism manifests itself at the individual level, and narrative (un)reliability. Our discussions center on autobiographies, memoirs, and films from authors such as Audre Lorde, Harry Crews, Malcolm X, Alison Bechdel, and Tobias Wolff.

**AMST 0191U. Imagining the American Mind.**

How are theories about our minds and brains represented in American culture? We use literature and film, psychology, neuroscience, philosophy, history and sociology to investigate how we imagine our minds, and the consequences of those representations for our ideas about race and gender, for our social lives and responsibilities, for our means to communicate to one another and, even, to know ourselves. Writing in different formats, students bridge the gap between the humanities and the human sciences. Concentrators in biology and neuroscience consider the cultural history of their research while humanities/social science students explore how culture ties to science.

**AMST 0191V. American Capitalism and Its Critics.**

In the wake of the Great Recession, many Americans have become disenchanted with capitalism, wondering whether the market economy harms more than it helps. This course introduces students to writers, artists, and activists from the past who shared that feeling and in plays, essays, films, and photographs protested the rise of capitalism in the United States. We will explore issues of power, poverty, profit, and equality through in-class discussions and four writing assignments. Students interested in history, art, literature, and economics will learn more about class, capitalism, and the history of American politics.

**AMST 0191W. American Indian Law and Legacies.**

From the U.S. Constitution to MTV and Urban Outfitters, this course traces the history and legacies of American Indian law and policy. Using a case studies approach, students will read legal documents alongside film, television, literature, blogs, poetry, photography, fashion, news articles, manifestos, and Twitter to explore the ways in which American Indian law and policy manifests in the daily lives of contemporary Indian people and Native nations. All students welcome! This course will be of special interest to those studying indigenous histories and cultures, American government, representations/memory, and law.

**AMST 0191X. Troubled Pasts and Visual Cultural: Comparative Models from Providence to Pretoria.**

This course examines the intersections of visual culture, commemorative politics, and individual and collective memories to analyze the politics of memory. We will look at debates over formal and informal engagements with the memory of three traumatic events: the "Dirty War" in Argentina, South African apartheid, and September 11th, 2001 in the US. Looking at the past as contested ground we will explore the challenges, ethics, and controversies around representing these events across a variety of mediums including film, art, music, and memorials. This class will be of interest to students of visual culture, cultural politics, and memory studies.

**AMST 0191Y. Cradle of Democracy?: Race, Childhood, and U.S. National Identity.**

From Elian Gonzalez to Trayvon Martin, children play an important role in political narratives concerning domestic and international affairs. Engaging with a range of texts—including blogs, films, and online exhibits—students will consider how the idea of childhood and the bodies of children have constructed our gendered and racialized sense of self. Such ideas about difference and belonging also emerge through children's material culture, and so students will create a children's book and multimedia website as well as visit the Providence Children's Museum.

**AMST 0191Z. Food and Gender in U.S. Popular Culture.**

Why is salad coded as feminine and steak as masculine? This course examine how gender is constructed and performed in sites across the U.S. food system, taking in farm fields, supermarkets, home kitchens, and restaurants. We explore food production, cooking, feeding, eating, and dieting, through a variety of food texts, including cookbooks, advertisements, and the Food Network. We will engage all of our senses (especially taste!), as we explore how gender intersects with other significant cultural categories and shapes everyday food experiences in the United States.

**AMST 0192A. Unsettled Things: Objects and Knowledge in Nineteenth-Century America.**

This course explores the history of collecting, with a focus on local museum and university collections. College Hill is home to numerous accumulations of things, from Civil War relics to Old Master paintings and fragments of taxidermy. Where did these objects come from? Why were they collected? How have their meanings and uses changed over time? How might we reconsider them today? Students will examine objects; read about collecting and the development of natural history, anthropology, history, and fine art; write research papers that incorporate material culture methodology; and co-curate an exhibition.

**AMST 0192B. Give Me Color: Performing Interraciality in Film and Literature.**

Through a reading of select critical theory, literary texts, and films, students will look critically at the ways in which race has been constructed and figured in U.S. culture post-1945, through the lens of interraciality. Decentering the dominant narrative of black-white interraciality, we will give equal attention to the role that Asian bodies play in complicating this binary. We will also investigate the potentiality of texts to challenge social norms or reclaim injurious identities. Authors include Jhumpa Lahiri, Celeste Ng, and Peter Ho Davies. Visual texts range from *Guess Who's Coming to Dinner* (1967) to *"San Junipero"* (2016)

**AMST 0192C. Race in the Museum.**

From the Smithsonian's National Museum of African American History and Culture to Walt Disney World's EPCOT theme park, this course examines how museums and cultural institutions address issues of race and identity. We will think critically about the display of race and difference in sites of leisure and consider how such institutions can be reclaimed as spaces for dialogue and action. At the end of the course, students will propose an original exhibition plan exploring these issues. This course will be useful for students interested in public history, visual culture, and critical race studies.

**AMST 0192D. Social Memory and the 60s: From Nixon to Nostalgia.**

The 1960s were watershed years in the US. From the Civil Rights movement to the Vietnam War, women's liberation to Woodstock, a series of revolutions occurred during this decade. How do we remember the 1960s? How do we understand its legacies embodied in texts, images, music, memorials, and rituals? This class uses the interdisciplinary methods of memory studies to answer these questions by analyzing primary sources and learning new collaborative research methods. Students interested in sociology, anthropology, and history will find new approaches to enduring questions about how societies remember and forget crucial events and experiences.

**AMST 0192E. 20th Century American Borderlands Place, Politics, and Memories of Transition.**

20th Century American Borderlands: Place, Politics, and Memories of Transition interrogates the shifting relationships among constructions of borders, race, and citizenship in the United States. This course offers a comparative analysis of the ways in which many ethnic groups in the 20th century encountered—and challenged—various geographic and political borderlands. The first half of the course offers a history of the Mexican and Canadian borders; the second half considers sites of “ambiguous belonging” within the United States. Students will consider categories of the “citizen,” the “refugee” and the “immigrant,” and how each is represented within contemporary U.S. contexts. WRIT DIAP

**AMST 0253. Religion, Politics, and Culture in America (HIST 0253).**

Interested students must register for HIST 0253.

**AMST 1010. Introduction to American Studies: American Icons.**

Why do certain American photos, novels, and films become 'iconic'? What does the very word 'icon' mean? Studying a collection of American images, texts, places, and practices, this course investigates the key themes of American Studies.

**AMST 1100X. Black Speculative Fiction: World-Making + Alternative Universes, Science Fiction + Fantasy (AFRI 1100X).**

Interested students must register for AFRI 1100X.

**AMST 1220. Boatbuilding: Design, Making, and Culture.**

This course introduces the study of the design, work, material culture and history through the construction of a traditional workboat. As the class builds the boat we'll gain a hands-on understanding of issues of design, skill, and workmanship. At the same time, we'll do historical research and visit museums to gain insight into the history of small craft and their builders and users from the nineteenth century to the present, and also consider philosophical issues of tradition, creativity, and knowledge in engineering and making. Weekly writing assignments, including a journal, will connect hands-on work and research.

**AMST 1250A. American Folk Art.**

Examines material expressions of folk culture in America from the 18th century to the present. Focuses on the study of regionally idiosyncratic artifacts decorated beyond necessity and emphasizes the importance of the cultural context in which they were made and used. Visits to local burying grounds and museum collections during class and a Saturday field trip. Concludes with an original research project and final paper.

**AMST 1250B. Gravestones and Burying Grounds.**

Students examine gravestones and burying grounds as material evidence of American cultural history. Themes include the forms of written language and visual imagery in colonial New England, changing roles of women and minorities in society, historical craft practices, implications of stylistic change, attitudes towards death and bereavement, and the material evidence of discrete cultural traditions. Includes field trips.

**AMST 1250E. The Neoclassical Ideal in America, 1775-1840.**

This course examines the art, architecture, and domestic furnishing of America in the early national period. It focuses on visual culture as a reflection of the new nation's self image as a democratic and enlightened society. Includes class visits to local burying grounds and museum collections, and a Saturday Boston field trip.

**AMST 1250F. Topics in Material Culture: Houses and Their Furnishings in Early America.**

Old houses and the objects used to furnish them are interpreted as material evidence of domestic life in colonial and early national America. Through slide lectures and field trips, this class examines Providence's historic buildings, museum collections, and public archives as primary documents in the study of cultural history.

**AMST 1250G. Topics in Material Culture Studies: The Arts and Crafts Movement in America 1880-1920.**

In the 1880s an international movement to reform the design of buildings and their furnishings took hold in America. Its proponents wanted to improve visual life in America by advocating the pride and honesty of craftsmanship and by embracing the ideal of unity of design--by which means they hoped to change the way Americans lived and worked. This course examines the architecture, furniture, silver, ceramics, and printed works of the Arts & Crafts Movement in America from 1880 -1920. Understanding and interpreting material life is emphasized through local field trips and first-hand experience with the collections of the RISD Museum.

**AMST 1500A. Research and Transnational Communities: Qualitative Fieldwork Methods.**

This course will equip students with the skills to design and implement their own transnational American Studies or Public Humanities research project. We will consider different qualitative social science research methods including, ethnographic participant observation, formal and informal interview techniques, and survey data analysis. Students will learn how different methodologies lend unique insights into specific research questions, and will be able to identify different methodological bases for empirical findings across diverse transnational social problems. Throughout the course, we will explicitly engage the personal, public, and ethical concerns involved with conducting research with transnational communities, including researcher positionality, privilege, ethics, and responsibility.

**AMST 1500B. Broadway Modern: Race, Gender, Class, and the American Musical.**

[WINTERSESSION] What is musical theatre? What makes the Broadway musical quintessentially "American"? And what do these brightly colored, mesmerizing, beguiling spectacles reveal about the troublesome workings of race and class, gender and sex, nation and world? Searching for answers to these and other questions, students in this course will survey, critique, and theorize the complicated, strange, and often disturbing history of the genre, from its 19th century roots in minstrel performances, Shakespeare, and European opera, through the heyday of the mid-20th century, and, finally, right up to to the current, provocative productions of "Hamilton" and "Shuffle Along."

**AMST 1510. Museum Collecting and Collections.**

This course will explore and examine the methods, practices, and theory of collections management in a museum setting including collections development, museum registration methods, cataloging, collections care, and interpretation. Through readings, discussion, workshops, site visits, and exhibitions, students will explore what it means to be physically and intellectually responsible for museum objects. This course places heavy emphasis on experiential learning and will include several project-based assignments.

**AMST 1520. Technology and Material Culture in America: The Urban Built Environment.**

A slide-illustrated lecture course that examines the development of the urban landscape. Covers American building practices and the effects of human-made structures on our culture. Examines technological and behavioral aspects of architectural design and urban development. Topics include housing, factories, commercial buildings, city plans, transportation networks, water systems, bridges, parks, and waterfronts. A companion course to AMST 1530.

**AMST 1530. Technology and Material Culture in America: The Automobile in American Life.**

Examines the cultural significance of the automobile. Employs materials and methodologies from various disciplines to study this machine and the changes it has produced in our society and our landscape. Slide-illustrated lectures cover such topics as the assembly line, automobile design, roadside architecture, suburbs, auto advertisements, and the car in popular culture.

**AMST 1540. Public Humanities: History, Theory, Practice.**

This course introduces students to the idea of the public humanities, both as a field of scholarly inquiry as well as a set of interrelated professional practices of knowledge production and dissemination around arts, cultural, museum, library, and university institutions. The course focuses on the histories of this field. It considers the field's intellectual underpinnings in conceiving of diverse "publics" and models for inclusivity; sources of authority and strategies for cultivating it; and methods of connecting, building, and engaging communities. Foundational work in understanding communities, power, and knowledge production draws on work from ethnic studies/labor history.

**AMST 1550. Methods in Public Humanities.**

A survey of the skills required for public humanities work. Presentations from local and national practitioners in a diverse range of public humanities topics: historic preservation, oral history, exhibition development, archival and curatorial skills, radio and television documentaries, public art, local history, and more. Enrollment limited to 50.

**AMST 1560. Comparative Cultural Heritage: Hong Kong and New England.**

This 8-week summer course begins with four weeks in Hong Kong, exploring the ways that private individuals, institutions, and government have preserved the city's cultural heritage, examining the conflict and negotiation of economic and political interests in urban renewal and heritage conservation and preservation. The second four weeks are in Providence, where students will explore the history and present-day philosophy and politics of preserving sites and stories from Colonial times to the present, exploring historical archaeology, historic preservation, museum exhibition, and oral history. This is a double credit course. Enrollment limited to nine Brown students and nine from Hong Kong. S/NC

**AMST 1570. Site-Specific Writing in Brown's Historical Spaces.**

Using on-site writing techniques, students will write, workshop, and direct research-based site-specific short plays to be performed by local actors in historic Providence mansions. Class discussion will explore local history (class includes a walking tour), performance texts, and types of site-specific work. Students will emerge having written and directed a research-based work in a National Historical Landmark. Enrollment limited to 13. S/NC

**AMST 1580A. Artists and Scientists as Partners: Theory to Practice (TAPS 1281Z).**

Interested students must register for TAPS 1281Z.

**AMST 1596. Education Beyond the Classroom Walls: Teaching and Learning in Cultural Institutions.**

Explore teaching and learning beyond classroom walls. We will focus on teaching/learning in cultural institutions (museums, historic houses, children's museums). We will begin with our own experiences with this kind of learning, then explore the pedagogical methods, underlying philosophies and learning theories, debates, and goals of informal education today. What kind of learning happens in cultural institutions? How does it compare to learning in schools? Which pedagogical methods are most common in cultural institutions today and how do they align with stated goals? What are the debates within the field and what are our visions for the future of the field?

**AMST 1600B. Global China: Flows, Forces, and Friction.**

This course will provide an overview of contemporary issues surrounding Global China, including the People's Republic of China, Hong Kong, and Taiwan, as well as their regional and global influence through migration, culture, multinational trade, and labor manufacturing. We will study institutions (the government, family, and education), forces of globalization (rural to urban migration, ethnicity and identity, human trafficking, diaspora communities, labor production and consumption, and cultures of resistance (underground music, human rights movements, radical internet blogging, environmental justice activism and Chinese contemporary art).

**AMST 1600C. The Anti-Trafficking Savior Complex: Saints, Sinners, and Modern-Day Slavery.**

How can we understand the global movement to combat human trafficking within critical frameworks on "industrial complexes"? Drawing from scholarship on the prison industrial, non-profit industrial, and white savior complexes this course examines human trafficking through the lens of race, class, gender, and national forms of power and subjectivity. Readings will problematize the so-called saints and sinners of the movement, investigating various global helping projects that exist to stop "modern day slavery."

**AMST 1600D. Sports in American Society.**

This course seeks to understand, analyze, and criticize sport--seen here as one of the primary institutions in the lives of Americans. Working from the basis of sporting events in the Durkheimian sense of symbolic community, we will elevate them to the status of religious and educational institutions in our everyday lives. Using the primary lenses of gender and race this class examines sports at five different levels--professional, Olympic, NCAA, scholastic, and youth--and uses the "Big 3" sports of baseball, basketball, and football to understand how athletics have impacted, and will continue to impact, American Society.

**AMST 1600E. Performance, Politics, and Engagement (TAPS 1680).**

Interested students must register for TAPS 1680.

**AMST 1600F. Blacks and Jews in American History and Culture (JUDS 1753).**

Interested students must register for JUDS 1753.

**AMST 1600G. Contemporary Black Women's Literature (ENGL 1711L).**

Interested students must register for ENGL 1711L.

**AMST 1600H. Monsters in our Midst: The Plantation and the Woods in Trans-American Literature (ENGL 1711N).**

Interested students must register for ENGL 1711N.

**AMST 1600I. American Literary Naturalism: Form and Economics at the Fin de Siècle.**

American naturalism was the first literary movement to consciously grapple with the cultural, political, and economic significance of the transition from a free market system to corporate capitalism. This course explores how naturalist fiction around the turn of the twentieth century responded to and shaped the organization of the economy in ways that remain highly relevant today. By placing economic forms in their cultural contexts and cultural forms in their economic contexts, students will develop tools for understanding the relationship between culture and changing forms of economic organization from the industrial corporation to financial markets.

**AMST 1600J. Believe It or Not: Mediating the Unthinkable, Past and Present.**

How do we respond when confronted with something that seems impossible? When Robert Ripley first invited audiences to "believe-it-or-not" at his Odditorium in 1933, many responded by fainting. However, as modern forms of media and technology perpetually shrink the scope of the implausible, the places we confront the un- (or non-) believable continue to evolve as well. From 9/11 to the #blacklivesmatter and #metoo movements, students will analyze instances that challenge established notions of the unthinkable to explore how social groups come to understand objects, ideas, and events that don't fit within their own experiences and worldview.

**AMST 1601. Health and Healing in American History.**

Surveys the history of American medicine in its social and political contexts, including changing understandings of disease, treatment practices, and medical institutions. Focuses on how gender and race have informed how patients and healers have made sense out of pain and disease.

**AMST 1601A. Migrants, Political Activism and the Racialization of Labor (POBS 1601M).**

Interested students must register for POBS 1601A.

**AMST 1610A. American Advertising: History and Consequences.**

Traces the history of American advertising, particularly in the 20th century, to understand the role advertising plays in our culture. Topics include the rise of national advertising, the economics of the advertising industry, the relation of advertising to consumption, the depiction of advertising in fiction and film, and broadcast advertising.

**AMST 1610C. American Popular Culture.**

This interdisciplinary course examines the history of popular culture in the industrialized United States, drawing on methodologies from different fields, and using a variety of evidence, including minstrel song sheets, amusement parks, television, and romance novels. We look at the audience, the producers and the texts presented by American popular culture both domestically and internationally.

**AMST 1610F. Asian America Since 1945.**

Since the end of WWII the Asian American community has undergone radical transformations. This course will examine the shifting political and cultural status of Asians in America, the demographic revolution in Asian America ushered in with the Immigration Reform Act of 1964, Asian Americans and globalization of the US economy, and Asian Americans in contemporary US race relations.

**AMST 1610G. Asian American History.**

This course focuses on Asian America as a historical subject and on Asian Americans as makers of their own histories. It is loosely chronological but principally organized around the emergence of an Asian American historical voice. Films, personal accounts, and historical analyses will be read. Many of the texts feature photographs, which we will engage primarily as historical documents. Examining the material realities they represent or suggest, we will also probe their political, economic and cultural dimensions. As weapon, commodity and heirloom, photography has been integral to shaping Asian Americans' visibility and therefore their social position in the United States.

**AMST 1610H. Asian Immigration to the Americas.**

Asian America is an extremely diverse community including fifth generation Californians and yesterday's arrivals: Hmong from Laos, Indians from Guyana, Japanese from Brazil, native born Americans, immigrants, refugees, adoptees, doctors, garment workers, physicists, poets, and storekeepers. The patterns of migration and settlement from Asia to the Americas-U.S. and Canada, the Caribbean and Latin America over the past two hundred years are examined.

**AMST 1610I. Beyond Chinatown: Asian Communities in the United States.**

From Manila villages in 18th-century Louisiana, to Punjabi-Mexican families in early 20th-century California, to today's "little Saigons" and Asianam cyberspace, Asian Americans have built a diverse array of communities in the U.S. The historical circumstances, social forces, and political movements that have shaped these communities are examined. Particular attention paid to the dynamics of race, ethnicity, class, gender, and sexuality in the development of these communities.

**AMST 1610J. Body and Soul: Health and Sexuality, 1860-1920.**

Examines the history of women/gender in relation to discourses about sexuality (both physical and mental) in the era of the Civil War through the progressive era. It samples a variety of ideas and movements, including efforts to regulate sexuality and initiatives to advance women into the medical and "helping" professions. Specialization is given to issues of class, race and ethnicity.

**AMST 1610L. Child Welfare in Twentieth-Century America.**

Examines the evolution of child welfare in the United States from its origins in the late 19th century through its purported crisis in the late 20th. Specifically, will trace the history of policies and programs aimed at providing support for dependent children, and at dealing with deviant or delinquent children. Emphasis will be on understanding the social, cultural, and political contexts in which child welfare was formed and transformed during this century.

**AMST 1610M. Childhood and Adolescence in American Literature and Culture.**

A survey of how changing ideas of childhood and the "new" construction of the category of adolescence are mirrored in American fiction and poetry from the Puritans to the present. Among the writers considered are Anne Bradstreet, Harriet Beecher Stowe, Mark Twain, Henry James, and J. D. Salinger. Provides a comparative cultural perspective by studying works by Wordsworth, Dickens, Pater, and Kosinski.

**AMST 1610N. Citizenship, Race, and National Belonging in the Americas.**

What is the relationship between citizenship, national belonging, and ideologies of race in the Americas? In what ways do gender and class differences affect this relationship? Focusing on these questions, this course compares the racial and social experience of the U.S. Latinos with that of the populations in various countries in the hemisphere.

**AMST 1610O. Civil Rights and the Legacy of the 1960s.**

Recent mainstream interpretations of the 1960s tend to neglect the presence and participation of Chicanos and Puerto Ricans in the various movements for civil rights. Using an interdisciplinary approach and drawing on historical, autobiographical and contemporary texts, films, and documentaries, this course examines the Latino experience during the Civil Rights period and explores its legacy today in the lives of Latino and other racial minorities.

**AMST 1610P. Class, Culture, and Politics.**

Surveys the working class and radical movements that have challenged the ruling economic, political, and cultural systems. Major topics include the railroad uprising of 1877, the Knights of Labor, sexual utopianism and spiritualism, black nationalism, the Socialist and Communist parties, women's and gay liberation, and the modern ecology movement. Emphasizes cultures. Prerequisite: At least one semester of a college-level course in U.S. history or literature.

**AMST 1610R. History of Sexuality in the United States.**

This course introduces students to the history of sexuality in America from the colonial era to the present. This is not only a history of gay and lesbian communities. Rather it builds on those histories to create a portrait of how Americans, gay and straight, lived sexual lives in relationship to disciplines of knowledge, cultural and political institutions, and popular culture.

**AMST 1610S. Immigration to the United States from the Sixteenth Century to the Present.**

Explores 350 years of immigration to what is now the U.S. Organization is both chronological and topical. We will reconstruct and compare the major waves of immigration, consider causal theories of migration, examine U.S. immigration policy over time, debate the economic impact of immigration, and discuss the institutions and strategies that immigrants have designed to facilitate adaptation.

**AMST 1610U. Introduction to Latino Studies.**

A survey of the ways that aspects of the histories and cultures of the U.S. and Latin America have contributed to shape public policy issues and to differentiate the experiences of U.S. Latinos. Among the questions guiding class discussions: What are the implications of grouping nationally, racially, and socially heterogeneous populations under one term, such as *Hispanic* or *Latino*? To what extent do "ethnic labels" foster alliances among different ethnic or racial groups?

**AMST 1610V. Introduction to Latino Studies II: Culture and Identity.**

Explores the ways in which gender roles and intergenerational expectations-diversified by race, class, national identity, and citizenship status-shape the varied identities and cultural experiences of Latinos and Latinas in different decades of the post-World War II period in the U.S.

**AMST 1610W. Latino Immigration in the 20th Century.**

The purpose of this course is to examine the political, economic, cultural and social impact of Latina/o immigration in the 20th Century and on Latina/o identity formation. We examine the intimate and personal history of the United States in relation to Latin America, Central America, the Caribbean, and Mexico that established interdependent relationships between nations and its people.

**AMST 1610X. Latino Popular Music and Culture.**

This course explores the various forms of popular culture associated with U.S. Latino communities. It focuses on the production, dissemination, and consumption of mass mediated cultural forms, primarily music, television, film and journalism, but it also examines other cultural expressions such as vernacular art, food, festivals, and folklore. Prerequisite: At least one semester of college-level course in U.S. history or literature.

**AMST 1610Y. Latinos and Film.**

Examines the way Latinos have been constructed-and misrepresented-in Hollywood film from the silent era to the present, and compares these images with contemporary Latino-made films that counteract Hollywood stereotypes with more accurate and complex images of their own histories and cultures. Readings introduce students to film criticism from a Latino perspective. Weekly screenings in and outside class.

**AMST 1610Z. American Popular Culture.**

Popular culture is part of everyday life, but also an important site to examine how American identities have been both shaped and reflected through film, television, music, performance, and fashion. We trace American popular culture from the nineteenth century to the present, paying particular attention to the development of different media, and looking at the production and reception of popular culture, as well as the cultural texts themselves.

**AMST 1611A. Making America: Twentieth-Century U.S. Immigrant/Ethnic Literature.**

Examines the literature of first and second generation immigrant/ethnic writers from 1900 to the 1970's. Attempts to place the individual works (primarily novels) in their literary and sociocultural contexts, examining them as conscious works of literature written within and against American and imported literary traditions and as creative contributions to an ongoing national discourse on immigration and ethnicity.

**AMST 1611C. Pacific Rim in American History.**

This course is a comparative study of Filipino, Chinese, Japanese, Korean and Indian settlement in the United States. It begins in the 1700s when Filipino seamen first settled in what is now Louisiana and Texas and concludes with the end of World War II. Attention will be given to immigration from Asia and its relationship to the development of the capitalist world system, the role that Asian American labor played in class and racial formation in America the political economies of Asian American communities, and the various social movements and legislative efforts to exclude Asians from American society and Asian resistance to exclusion.

**AMST 1611E. Popular Culture in the United States.**

Focusing on popular culture since industrialization, the course will examine particular forms (broadcasting, romance novels, amusement parks, sports) we will as look at the producers of, and the audiences for, those forms. Requirements include three papers based on outside readings and a final.

**AMST 1611F. Race, Gender, and Community in Latina Autobiography.**

Examines how Latinas chronicle their identities in transitions vis-à-vis markers of race and gender. Through autobiography, memoir, literary criticism, and theoretical readings emphasizing the negotiations of self, place and community via social and geographical locations including family, region, and the nation. Engages in critical interpretation of the socio-cultural and political worldviews of Latina self-discovery and self-authorship.

**AMST 1611G. Race, Ethnicity, Religion and Community.**

This course examines the intersection of religion and community for communities of color in the United States. A survey of these communities is guided by the desire to discover the collective stories and memories that socialize social and ethnic identities, and serve as a source of personal and political transformation. Out point of entry for understanding the sacred is at "ground level" perspective.

**AMST 1611H. Religion and Society in the United States.**

Offers a sociological perspective on theories of the relationship between religion and societies that will help us understand and analyze current religious practices and trends, both inside and outside of religious institutions. Students will conduct several observations in religious institutions and create religious rituals of their own.

**AMST 1611J. Sex, Love, Race: Miscegenation, Mixed Race and Interracial Relations.**

This class will explore the conditions and consequences for crossing racial boundaries in North America. We will take a multidisciplinary approach, exploring literary, anthropological, and historical writings along with several feature and documentary film treatments of the subject.

**AMST 1611K. The Century of the Child? Child Welfare in Twentieth-Century America.**

Examines the evolution of U.S. child welfare from its origins in the late 19th century through its purported crisis in the late 20th century. Traces the history of policies and programs aimed at: providing support for dependent children; improving infant and child survival and health; protecting children from exploitation and abuse; and dealing with deviant and delinquent children.

**AMST 1611M. Trauma and the Shame of the Unspeakable: The Holocaust, American Slavery, and Childhood Sexual Abuse.**

The problem of representing traumatic experience has been raised by witnesses and survivors, psychoanalysts, psychologists, sociologists, philosophers, and artists. This course compares three historical situations--The Holocaust, American slavery, and childhood sexual abuse--by reading histories, memoirs, and fictions, and analyzing material cultural artifacts such as memorials. Questions about the relation of individual trauma to collective and cultural trauma will be pursued through readings that will include Freud, Jeffrey Alexander, Judith Herman, Dominique La Capra, Primo Levi, Jill Christman, Harriet Jacobs, Toni Morrison, Gayle Jones and Art Spiegelman.

**AMST 1611O. Early American Film: The Birth of an Industry.**

American film-making from its origins as a technological amusement to the period of classic Hollywood cinema. Particular attention given to representations of gender, race, and ethnicity with comparisons to the evolution of European film. *The Birth of a Nation* (1915) by D. W. Griffith will be a key text in dialogue with African-American director Oscar Micheaux's *Within Our Gates* (1920).

**AMST 1611Q. The Asian American Case: Race, Immigration and the Law.**

The central historical themes are exclusion, citizenship rights, and equal protection. The experience of Chinese and Japanese Americans dominates the historiography but we will use that scholarship to help us think about a wider range of issues across time.

**AMST 1611R. Bourgeois Blues: Class Conflict in African American and Caribbean Literature and Film.**

This course investigates class differentiation and its effects in African-diaspora novels, autobiographies, and films (such as *The Good Negro*, *Brothers and Keepers*, *Crick Crack Monkey*, and *"Sugar Cane Alley"*). Alongside these literary works and films, we will read a wide range of critical/theoretical essays on class and class conflict and the intersection between class and race, gender, sexuality, and nationality.

**AMST 1611U. History of American Technology.**

Technologies reflect and transform American society and culture. This course examines the invention, introduction and use of new machines and systems, with a focus on infrastructure, manufacturing, and information and communication technologies. Special attention paid to labor, business, political and cultural contexts of technological change.

**AMST 1611V. Color Me Cool: A Survey of Contemporary Graphic Novels.**

Surveys a variety of comic books and graphic novels, both mainstream and independent. The emphasis, however, will be on the independent graphic novel. Students will also read history and criticism to understand better the context from which the books emerge and to grasp more firmly their visual and textual aesthetics. Must attend first three lectures to be eligible for enrollment.

**AMST 1611W. Asian Americans and Popular Culture.**

From the Fu Manchu to Lucy Liu, Asian Americans have long been the objects of loathing, terror and desire, in American popular culture. This course looks Asian Americans in popular literature, music, theater, film and television as subjects, producers and consumers.

**AMST 1611X. Narratives of Liberation.**

The theme of human liberation has appeared in literary works from around the world and across centuries. This course will examine a variety of narratives that foreground the attainment of physical, spiritual, and political freedom for individuals and groups. Beginning with the Book of Exodus and traveling through African American slave narratives, British proto-feminist novels, Latin American testimonios, and contemporary films, we will examine how a wide range of writers and filmmakers have conceptualized the goal and the process of liberation in their works. Requirements for the course will include two papers/projects and a final exam.

**AMST 1611Z. The Century of Immigration.**

Examines in depth the period of immigration that stretched from the 1820s through the 1920s and witnessed the migration of over 36 million Europeans, Asians, Canadians, and Latin Americans to the United States. Explores causal theories of migration and settlement, examines the role of family, religion, work, politics, cultural production, and entertainment in immigrant/ethnic communities, and traces the development and impact of federal immigration policy.

**AMST 1612A. Chicago and America.**

This course explores the history of Chicago, but also uses the city as a way to think about issues in American history. Sources include novels, memoirs, popular histories, film, and music.

**AMST 1612B. Celluloid America.**

The American motion picture developed as a unique art form in the late 19th century and its enduring cultural and social significance is irrefutable. In this course, we will explore US history using cinema to explore the cultural values represented within and shaped by the medium. Topics include the invention of the moving image, the rise and fall of the Hollywood studio system, and the emergence and evolution of film genres and styles (i.e. westerns, film noir, musicals, etc.) as a means of economically appealing to the masses and cultivating viewership domestically and abroad.

**AMST 1612C. Growing Up in America.**

This course will consider American narratives of adolescence and coming of age from the nineteenth century to the present. We will examine the archetypal aspects of coming to grips with maturity and the world, class and gender roles, and the invention of "adolescence" as a new psychological category. International perspectives will be provided by reading some British and Japanese works. Authors covered will include Dickens, Melville, Twain, Alcott, Kerouac, Hemingway, Baldwin, Mishima and Tan, among others. Lectures, class discussions and student reports. S/NC

**AMST 1612D. Cities of Sound: Place and History in American Pop Music.**

This course investigates the relationship between popular music and cities. We will look at a number of case studies from the history of music in the twentieth century. We will try to tease out the ways that certain places produce or influence certain sounds and the ways that musicians reflect on the places they come from in their music. Accordingly, we will consider both the social and cultural history of particular cities and regions--New Orleans, Memphis, Chicago, New York, Washington DC, and others--and aesthetic and cultural analyses of various forms of music--including blues, jazz, punk, hip-hop, and others.

**AMST 1612G. Henry James Goes to the Movies.**

This course will focus on some of the novels and stories by James that have been made more than once into films or tv shows - *Washington Square*, *The Turn of the Screw*, *The Portrait of a Lady*, and *The Golden Bowl* - and study the narrative and visual choices as interpretations of James's texts. Critical readings on the art of fiction and the art of film will also be introduced.

**AMST 1612K. Immigrant America and Its Children.**

With a focus on the experiences of the immigrant second generation, this course seeks to expose students to the recent social science literature on contemporary immigration to the United States, including discussions on its origins, adaptation patterns, and long-term effects on American society. We will closely examine patterns of assimilation and adaptation for the children of immigrants, address the challenges they confront when trying to straddle two cultures, describe their ethnic identity formation, and interrogate the effects of their increasing presence on U.S. schools and society in general. The experiences of the second generation will be examined in various institutions including the family, labor market, schools, and community, and we situate these institutions in both national and transnational spheres. The course will consist of lectures by the instructor combined with class discussion of assigned texts. This course will also provide students with an analytic framework to address questions of multiculturalism. The course will also help students develop a better understanding of the dynamics of race, class, gender, and sexuality in society.

**AMST 1612L. Eating Cultures: Food and Society.**

This course will look at various ways to understand the complex role of food in society. We will look at issues of food production and consumption, and how our relationship to food contributes to the political and social structures that we live with. Our approach will be historical and pay special attention to the ways in which communities of color and immigrants have shaped, and have been shaped by, the food they cultivate, harvest, consume, and market. Field trips and readings explore how food creates ways for people to form bonds of belonging while also creating bonds of control and regimes of inequality. Enrollment limited to 20.

**AMST 1612M. Children of Immigrants.**

Gives an overview of the experiences of the children of contemporary immigrants in the United States. It looks at their experiences in key social institutions including schools, the family and ethnic community. The course will examine the integration of immigrant children and how factors of race, class, and gender shape their experiences. To address the integration of immigrant children, the course will look at their process of assimilation, maintenance of transnational ties, and lastly the formation of youth identity.

**AMST 1612N. Political Theatre of the Americas (TAPS 1610).**

Interested students must register for TAPS 1610.

**AMST 1612O. 21st Century American Drama (TAPS 1650).**

Interested students must register for TAPS 1650.

**AMST 1612P. First Nations: the People and Cultures of Native North America to 1800 (HIST 1805).**

Interested students must register for HIST 1805.

**AMST 1612Q. Women / Writing / Power.**

An introduction to American women's writing and to the development of feminist literary practice and theory. This course will cover a broad historical range from the colonial poets Anne Bradstreet and Phillis Wheatley to contemporary writers Toni Morrison, a Nobel Laureate, and Marilynne Robinson, a Pulitzer Prize winner. Attention to the effects of racial, class, and cultural differences will inform this course that will focus on gender and literature.

**AMST 1612R. Race, Inequality, and the American City since 1945.**

This course will explore the dynamics of race and class in American cities during the post-World War II period. The readings and discussions will focus on suburbanization, the decline of central cities, conflict over the use and definition of urban space, urban governance, spatial fortification, and popular dissent. The cities examined will include Buenos Aires, Chicago, Detroit, Liverpool, Los Angeles, New York City, São Paulo, and St. Louis.

**AMST 1612S. Introduction to American Indian Studies (ETHN 1890H).**

Interested students must register for ETHN 1890H.

**AMST 1612T. Slackers and Hipsters: Urban Fictions, 1850-Present.**

Slackers and Hipsters surveys the cult of the cool and disaffected in literature and film over two centuries. Beginning with Melville's "Bartleby the Scrivener," but also sampling works as varied as Chatterjee's English August and Kunkel's Indecision, we'll examine both the aesthetic and political implications of the "slacker" in his/her ironic, apathetic, and peculiarly alienated view of the world.

**AMST 1612V. Sinner, Saints, and Heretics: Religion in Early America (HIST 1511).**

Interested students must register for HIST 1511.

**AMST 1612W. Rethinking Women's Bodies and Rights: Transnational Reproductive Politics.**

This course examines the issues and debates surrounding women's reproduction in the United States and beyond. It pays special attention to how knowledge and technology travel across national/cultural borders and how women's reproductive functions are deeply connected to international politics and events abroad. Topics include: birth control, eugenics, population control, abortion, prostitution, reproductive hazards, genetic counseling, new reproductive technologies, midwifery, breastfeeding, and menstruation. Students will analyze historical and contemporary materials concerning women's reproductive roles, as well as read scholarly studies on reproductive issues in various parts of the world.

**AMST 1612X. Performances in the Asias (TAPS 1270).**

Interested students must register for TAPS 1270.

**AMST 1612Y. Twentieth-Century Western Theatre and Performance (TAPS 1250).**

Interested students must register for TAPS 1250.

**AMST 1612Z. First Nations: the People and Cultures of Native North America to 1800 (HIST 1512).**

Interested students must register for HIST 1512.

**AMST 1700B. Death and Dying in America.**

No description available. Open to juniors and seniors concentrating in American Studies.

**AMST 1700C. Slavery in American History, Culture and Memory.**

Nearly four centuries have passed since the first enslaved Africans arrived in what is today the United States. More than 140 years have passed since American slavery was abolished. Yet slavery remains a palpable presence in the United States. In this interdisciplinary course, we will examine slavery as a problem in American history, culture, and memory, exploring the institution and its legacies in such arenas as history, literature, cinema, visual arts, and heritage tourism. Open to juniors and seniors concentrating in American Studies.

**AMST 1700D. Race and Remembering.**

This junior seminar engages debates in Ethnic Studies, History, Gender Studies, and the Public Humanities that grapple with the relationship between historical narratives, memory, and social relations of power. Students will examine current tensions in national memory. Each year the topic of this course will change to consider racial formation through alternating social and cultural institutions. This semester we will consider the history of racial formation through encounters with the judicial system, with policing practices, with detention, and incarceration. Students will collaborate to make these histories publicly accessible using methods in public humanities.

**AMST 1700F. American Publics.**

Americans worry about the quality of their civic life and fear its decline. This junior seminar examines an important concept, the public sphere, in its popular and political dimensions as well as the challenges to the boundaries of American public life. Who is a citizen and thus eligible to participate? The course pays particular attention to concerns about the impact of new media--print, broadcasting, the internet. Assignments will take students into the community to think about social, cultural, and political publics. Not open to first year students or sophomores. Enrollment limited to 20.

**AMST 1700I. Community Engagement with Health and the Environment.**

This junior seminar explores how local community organizations are taking up issues of health and the environment in culturally relevant contexts. We will examine issues of environmental justice, health disparities and the basic tenets of community based participatory research. We will then partner with a local community organization and, depending on need, assist in the design, implementation, and/or evaluation of a program designed to improve the local environment and/or health status of the community. Enrollment limited to 20 juniors and seniors.

**AMST 1700K. Race in the Americas: A Hemispheric Perspective.**

This junior seminar engages debates in Ethnic Studies, Latin American Studies, sociology and history regarding the role of race in the U.S. and Latin America. Problematizing the depiction of Latin America as a harmonious racially mixed society and the U.S. as racially divided nation, students will look beyond binary frameworks to examine how racial logics are constructed historically, situationally and relationally. Readings highlight the interconnected nature of racial logics across the region, facilitated by immigration and transnational social movements in the context of a shared European colonial past, U.S. imperialism and emergent nationhood.

**AMST 1700N. Public Memory: Testimony, Memorial, Ritual.**

This seminar explores theories and practices of public memory by studying three related topics and media. Questions about the relation of history and memory are pursued by reading verbal testimony. Questions about commemoration are developed by looking at material objects and public spaces. Questions about embodied memory are explored by witnessing trauma, performance, and ritual. Readings will include Freud, Nora, Derrida, Halbwachs, Laub, Savage, Connerton, Taylor and Young. Rhode Island will provide our field for understanding how public memory works in verbal, material, and embodied signs of the past and present.

**AMST 1700X. Global Macho: Race, Gender, and Action Movies.**

Carefully sifting through an oft-overlooked but globally popular genre - the muscle-bound action - this class asks: what sort of racial work does an action movie do? What is the role of women in this genre? How should we scrutinize these supposedly empty trifles of the global popular? How should we think critically about movies that feature - often without apology - a deep, dangerous obsession with masculinity, patriarchy, war, and lawlessness, with violence outside of civil society. In short, from Hollywood to Hong Kong to Rio to Paris to Mexico City, what makes the action movie genre tick?

**AMST 1800. Honors Seminar.**

This seminar is for second-semester junior American Studies and Ethnic Studies concentrators who are interested in writing an honors thesis in their senior year. The outcome of this course will be a proposal for the honors thesis along with a bibliography and a research plan and schedule. Topics covered will be the research methods associated with different disciplines; how to make the thesis interdisciplinary; integrating public projects and new media into a thesis. Open to juniors concentrating in American Studies and Ethnic Studies. Enrollment limited to 20. S/NC

**AMST 1800A. The Cultural and Social Life of the Built Environment (URBN 1870N).**

Interested students must register for URBN 1870N.

**AMST 1900A. The Problem of Class in America.**

Class is everywhere in American life, but rarely discussed explicitly. This course will investigate why this is. How does class operate in American life? Why is it so often obscured? What are the cultural, political and historical forces that have made it such a contested category? We will approach class from a variety of disciplines, including history, cultural studies, and sociology; study the ways class interacts with race and gender; and consider the prospects of class in America in the context of the twenty-first century's widening inequality and globalized economy.

**AMST 1900B. America and the Asian Pacific: A Cultural History.**

From Columbus to the present, Asia has been central to the shaping of American culture. This course will examine the role of trade, migration and cultural exchange across the Pacific in the shaping of American culture and society. Enrollment limited to 20 juniors and seniors.

**AMST 1900C. Narratives of Slavery.**

This course analyzes circum-Atlantic accounts of racial slavery in various forms, including the slave narrative, iconography, historiography, film, and performance. In so doing, it interrogates how factors such as form and/or genre, race, gender, power, and geography influence narrative and knowledge production regarding slavery. Key themes the course addresses include racial slavery as civil and social death, ancient and modern/colonial genealogies of slavery, gendered experiences of bondage, regionalism in U.S. historiography of slavery, and the unspoken and unrepresentable nature of atrocity. The course also examines contemporary narratives that underscore the significance that racial slavery brings to bear upon the present.

**AMST 1900D. America as a Trans-Pacific Culture.**

From Columbus to the present, Asia has been central to the shaping of American culture. This course will examine the role of trade, migration and cultural exchange across the Pacific in the shaping of American culture and society. Enrollment limited to 20 juniors and seniors.

**AMST 1900F. Transnational Popular Culture.**

This course looks at popular culture as a transnational phenomenon. Taking up issues of cultural imperialism, globalization, domestication, and the economics of the culture industry, the course considers the history of cultural flows, from nineteenth century topics such as Chinese opera in the U.S. and Wild West shows in Europe to twenty-first century fast food, anime, sports, Disney, and music. We will consider both the consumers and producers of popular culture in Europe, South America, Asia and Africa, as well as those in the United States. Enrollment limited to 20 juniors and seniors.

**AMST 1900G. Movements, Morals, and Markets.**

This seminar will provide a theoretical and empirical overview of contemporary transnational social movements. Addressing issues ranging from fair-trade and labor exploitation, to environmental protection, to indigenous rights, and LGBTQ advocacy, social movements increasingly draw from morality and the global market in order to achieve their goals. This course critically investigates the ways in which humanitarian action is celebrated, contested, and commodified through art, social enterprise, and various other formal and informal institutional arrangements.

**AMST 1900H. New Media as a Tool for Social and Political Change.**

This course will take a critical, theoretical, and practical approach to the examination of new media as a tool for challenging inequality and working toward goals of social justice. In addition to foundational readings on power, media, social change, network theories, and others, we will also have hands on opportunities to work in audio storytelling, utilizing the resources available at Brown. The goal is for students to leave the course with an understanding of the cultural, political, and personal possibilities and limitations of social and new media in the realms of advocacy and social justice.

**AMST 1900I. Latina/o Cultural Theory.**

Advanced seminar designed to familiarize students with past and present debates in Latina/o Studies. Knowledge of these critical conversations will aid students in making their own contributions to the field as they write their theses and dissertations. We will read such folks as Jose Limon, Mary Pat Brady, Frances Aparicio, and Gustavo Perez Firmat, to name but a few. Enrollment limited to 20 juniors and seniors.

**AMST 1900J. Race, Immigration and Citizenship.**

"Who can become an American?" is a central question in American society. This seminar examines the construction of national identity, citizenship as a legal and cultural status, and the struggle for equal protection of the law. The experience of excluded Asian and Latino immigrants are key to understanding this historical and ongoing process. Enrollment limited to 20 juniors and seniors.

**AMST 1900K. China in the American Imagination.**

Since Columbus, China has occupied a special place in the way America has been imagined and in the ways Americans have imagined their place in the world. This seminar will explore the relationship between China and America from Columbus to the present. While politics and diplomacy play an important role, the emphasis will be on trade, immigration and culture. Enrollment limited to 20 juniors and seniors.

**AMST 1900L. Cold War Culture The American Culture in the Cold War.**

This seminar will explore domestic politics, social movements, family life, sexuality, gender roles and relations, intellectual currents, and popular culture in the United States during the Cold War years. Special topics include adolescence, "conformity", and the rise of television. Sources include historical monographs, memoir, film, and fiction. Enrollment limited to 20 juniors and seniors.

**AMST 1900N. Ethnicity, Identity and Culture in 20th Century New York City.**

Explores the processes by which 20th-century New Yorkers created a self-consciously modern, urban, and ethnic American culture. Focuses on literary and artistic representations of life in 20th-century New York as manifested in works by five ethnic groups of New Yorkers that immigrated or migrated to the city after 1800: Jews, African Americans, Italians, Chinese, and Puerto Ricans. Enrollment limited to 20 juniors and seniors.

**AMST 1900O. Filipino American Cultures.**

Examines the situation of Filipinos in the U.S. Drawing from social history, cultural studies, literature, and visual culture, the readings focus on the Filipino experience in the U.S. through a study of self-representations in various forms such as literature and visual culture. Readings include Campomanes, Rafael, Bulosan, Linmark, and San Juan. Enrollment limited to 20 juniors and seniors.

**AMST 1900P. Essaying Culture.**

This course is interested in the essay as form. As a verb, essay means "to make an often tentative or experimental effort to perform." We will explore through reading and our own writing the poetic, gnomic, and often desultory moves the essay makes as it seeks to understand its cultural objects. Like the novel, the essay is an omnivorous form. It consists of fragments, poetry, personal reflection, lists, rational argument, and much more as it winds its way to understanding. We will be reading a range of essays, as well as theories of the form.

**AMST 1900Q. From Perry to Pokemon: Japan in the United States, the United States in Japan.**

This course traces the cultural interactions between Japan and the United States beginning with Matthew Perry's 1854 voyage. Topics include Japanese scrolls depicting Perry's arrival; paintings, architecture and musical forms that traveled between the two countries; the U.S. occupation of Japan after World War II; the popularity of anime and other Japanese films in the U.S.; and the importance of American popular culture in post-war Japan. Enrollment limited to 20 juniors and seniors.

**AMST 1900R. Gender, Race, and Class in the United States.**

Focuses on the emergent feminist scholarship that both empirically and theoretically analyzes how the intersection of race, class, gender, sexual preference, and age shapes the lives of women, men, and transgendered people in the U.S. Enrollment limited to 20 juniors and seniors.

**AMST 1900S. Green Cities: Parks and Designed Landscapes in Urban America.**

Examines the cultural meaning and public use of greenspace in American towns and cities. Covers city parks and metropolitan park systems; the landscaping of riverfronts, streets, cemeteries, and company property; and the contributions of landscape architects such as Frederick Law Olmstead and Warren Manning to the field of urban planning. Begins in the 17th century with the creation of Boston Common and ends by reviewing the latest greenway plans for Providence. Enrollment limited to 20 juniors and seniors.

**AMST 1900T. Disability: History, Theory, and Bodily Difference.**

This seminar explores the history of disability across cultural, legal, medical, and political dimensions of American life. We will consider the changing meanings of disability, the history of disability activism and communities, representations of disabilities, and the relationship between technology and the body. We will also discuss the intersections between disability and other categories of difference such as gender, race, and sexuality.

**AMST 1900U. Immigrant Radicals: Asian Political Movements in the Americas 1850-1970.**

Between 1854 and 1965, Asian immigrants to the United States and other countries in the Americas were barred from immigration and citizenship. Circuit of ideas and political movements evolved to resist exclusion, disenfranchisement, and discrimination. We will examine: Chinese Americans and the Chinese revolution, the Ghadar movement among Indians of the Diaspora, and the Japanese American left and Japan. Enrollment limited to 20 juniors and seniors.

**AMST 1900V. Immigrants, Exiles, Refugees, and Citizens in the Americas.**

Focuses on populations who leave their homelands within the Americas. Examines the meaning of categories "refugee," "exile," "citizen," and "immigrant" in the postwar period. Explores the experience and reasons of people who leave their homelands, the relations between their countries of origin and their new society, and their access to rights in both countries. Questions the extent of population movements in the Americas as redefining conceptions of citizenship, rights, nation, and national identity in the U.S. Enrollment limited to 20 juniors and seniors.

**AMST 1900W. Latina Literature: The Shifting Boundaries of Identity.**

Focuses on the relationship between national identity and ethnic identity in narratives by and about Mexican American, Puerto Rican, Cuban, Dominican and Central and South American women in the U.S. Texts by and about women from other ethnic and minority groups. Readings from Gloria Anzaldua, Judith Ortiz Cofer, Dolores Prida, Cristina Garcia, Julia Alvarez, among others. Enrollment limited to 20 juniors and seniors.

**AMST 1900X. Latina/o Religions: Encounters of Contestations and Transformations.**

The purpose of this seminar is to survey and review the literature in the new and emerging field of Latina/o Religions. We seek to define the Latina/o religious experience and identify its unique qualities and expressions in relation to other religious movements and expressions in the Americas. Enrollment limited to 20 juniors and seniors.

**AMST 1900Y. Latino New York.**

The Latino population of NYC in the present generation has generated new lines of inquiry for the study of diasporas in contemporary urban settings. This course undertakes an analysis of this experience from diverse interdisciplinary perspectives, with a focus on cultural expressions and representations and with a view toward new ethnographic and historical approaches. Enrollment limited to 20 juniors and seniors.

**AMST 1900Z. Latinos and Film.**

Analyzes the way Latino ethnicities have been constructed-and misrepresented-in Hollywood films from the silent era to the present, and examines contemporary work by Latino directors, producers, screenwriters, and actors who produce films that counteract the negative stereotypes of Hollywood films with more accurate, complex, and positive images of their own histories and cultures. Weekly screenings both in and out of class and readings that introduce a new body of film criticism from a Latino perspective. Enrollment limited to 20 juniors and seniors.

**AMST 1901A. Latinos in Black and White: Race, Ethnicity and Identity in the Americas.**

This seminar looks critically at traditional models of "race relations" in the Americas, the historical development and expressions of "blackness," "brownness" and "whiteness" at regional, national and international levels, and their contemporary articulations and ramifications. A primary focus will be the social and political dimensions of "ethnicity" and "race" in relations between Caribbeans and African Americans in New York City. Enrollment limited to 20 juniors and seniors.

**AMST 1901B. Form Matters: Contemporary Short Fiction.**

Form Matters is an advanced seminar in reading contemporary short fiction, mainly centered on US writers. The class particularly focuses on socially-attuned and historically-minded neo-formalist analyses of literature. Fiction readings will be supplemented with relevant critical readings from both scholars and practicing writers. Students will be expected to engage in rigorous discussion of the material. Goals of the course include introducing you to a relevant critical vocabulary for discussing form, deepening your familiarity with contemporary US short fiction, and improving your oral and written communication skills.

**AMST 1901C. Making America: The Immigrant Experience in Literature.**

Examines the literature produced by immigrants and their children who came to the U.S. between 1865 and 1965. Will place literature in its sociocultural and literary contexts, considering it as a creative contribution to debates on acculturation, generational conflict, intermarriage, racism, gender politics, labor exploitation, and immigrant entrepreneurs. Will read works by authors of Chinese, Irish, Scandinavian, Japanese, Slavic, East European Jewish, Mexican, and Caribbean origin. Enrollment limited to 20 juniors and seniors.

**AMST 1901D. Motherhood in Black and White.**

Focuses on American motherhood with respect to race: under slavery; at the turn of the 20th century; and in contemporary society. Texts include fiction, film, history, feminist and psychoanalytic theory, e.g. "Uncle Tom's Cabin," "Incidents in the Life of a Slave Girl," "Imitation of Life," and "The Reproduction of Mothering." Enrollment limited to 20.

**AMST 1901E. Introduction to Ethnomusicology (MUSC 1900).**

Interested students must register for MUSC 1900.

**AMST 1901F. Orientals: The Representation of Asians in American Popular Culture.**

This is a research seminar designed to explore questions relating to the cultural construction of Asians as a racial group in the United States. The seminar will interrogate the ideas of race, ideology, Orientalism and popular culture. The seminar will then analyze various moments in the formation of dominant images of Asians in American Culture. Enrollment limited to 20 juniors and seniors.

**AMST 1901G. Race and Art in America.**

How do art and space function as a critical practice, a tool of resistance, and a form of self-determination in racialized 20th-century America? This course will introduce students to ways of looking at and analyzing examples of visual, performance, and mixed-media artwork by African American, Asian American, and Chicano artists who resist, challenge, deform, and subvert traditional concepts of art. Enrollment limited to 20 juniors and seniors.

**AMST 1901H. Race and Poststructuralism.**

Poststructuralism continues to be a major preoccupation in the discourse of the academic left, but relatively few courses consider how poststructuralist interrogations of subjectivity and history can help us to think about race in a U.S. context. This seminar begins with an overview of key poststructuralist concepts, then moves to poststructuralist texts which take up race as a primary object, and finally takes up the collision between poststructuralist thought and racial identity politics. Enrollment limited to 20 juniors and seniors.

**AMST 1901I. Race and Sexuality in Contemporary U.S. Film.**

This course aims at producing cultural criticism about the representation of race and sexuality in U.S. films of the 1980s-90s. By examining the circulation of images and ideas about bodies in Hollywood and "independent" production, we consider how cultural norms are constructed. Texts include films, popular film criticism (print and televisual), film theory, and industrial history. Enrollment limited to 20 juniors and seniors.

**AMST 1901J. Race Immigration and the Law: The Asian American Case.**

From 1870 to 1943, Chinese were defined by their "race" as ineligible for citizenship and immigration. Similar prohibitions against Japanese, Filipinos, and Indians followed in the early 20th century. This seminar will examine Asian American struggles against exclusion and how they shaped American definitions of citizenship, race, and constitutional rights. Enrollment limited to 20 juniors and seniors.

**AMST 1901K. Racial Formation in North America.**

No description available. Enrollment limited to 20 juniors and seniors.

**AMST 1901L. Reading Latina/o History through Fiction.**

Examining the imaginative act of writing, the course studies the fictional portrayal of historical subjects, facts, and events. Focuses on how non-fiction is fictionally processed in contemporary Latina and Latino novels. How do "Latino" facts--molded by struggles for civil and human rights and U.S. foreign intervention--speak? How does novelist orient readers toward an understanding of social reality? Enrollment limited to 20 juniors and seniors.

**AMST 1901M. American Roots Music (MUSC 1932).**

Interested students must register for MUSC 1932.

**AMST 1901N. Researching the History of Children and Childhood.**

Explores how to research and interpret the ways that race, class, gender, and region have shaped the social organization, cultural meaning, and experiences of American children and childhood. Focus is on the possibilities and challenges posed by various types of evidence: visual and literary representations, memoirs, child rearing advice, toys and play, children's literature, clothing, and protective and restrictive laws. Enrollment limited to 20 juniors and seniors.

**AMST 1901O. Rivers in the Industrial City.**

Rivers promote industrial development and serve as important resources and cultural amenities for communities that have a substantial manufacturing base. This interdisciplinary seminar looks at the use and abuse of rivers in American industrial cities from the 18th century to the present. Enrollment limited to 20 juniors and seniors.

**AMST 1901P. Musical Youth Cultures (MUSC 1925).**

Interested students must register for MUSC 1925.

**AMST 1901Q. Screening Men: Hollywood Masculinities, 1944-Present.**

Surveys Hollywood representations of dominant masculinity with the aim of interrogating these representations. Considers how such representations have changed over time and how changes may be read in relation to contemporary social, economic, and political pressures. In addition, considers how these texts interact with theoretical issues of representation, identification, and spectatorship. Enrollment limited to 20 juniors and seniors.

**AMST 1901R. Social Movements of the 1960s.**

This course examines U.S. social movements from 1954 through 1974, concentrating on the 1960s. Drawing on primary and secondary sources, we examine such topics as the Civil Rights Movement and the emergence of Black Nationalism, the antiwar movement, the relationship between the New Left and second-wave feminism, and the movement for gay liberation. The course also pays attention to how the 'sixties' are represented in contemporary culture. Enrollment limited to 20 juniors and seniors.

**AMST 1901S. Society and Identity: A Comparative Approach to the Colonial Americas.**

Compares New Spain, the British North American mainland, and the Caribbean from initial colonization in the 16th century to 18th-century wars of independence. Focuses on the complex interplay of class, gender, race, and ethnicity that defined social formations and shaped identities. Reading biographies of ordinary people as well as synthetic histories, engages the past on different levels and connects individual identity and action to broader historical processes. Enrollment limited to 20 juniors and seniors.

**AMST 1901U. The Charm of Anticipated Success: Varieties of the American Dream in U.S. History.**

The American Dream is one of the great myths of our national history--not "myth" in the sense of a falsehood, but rather a widely-held belief whose validity cannot be definitively proved or disproved (like "all men are created equal"). Using sermons, fiction, songs, and other cultural forms, this research seminar explores the complexities of the myth from the time of the Puritans to the present. Enrollment limited to 20 juniors and seniors.

**AMST 1901V. The Contested City: Urban Culture in America, 1880-1940.**

Focusing on the popular culture of American cities, this course examines the evolution, commercialization, uses, and struggles over vaudeville, jazz, and early film, and leisure activities such as dancing, nightclubbing, drinking, and shopping. Consideration will be given to the gendered, class-based, and racialized nature of leisure activities and spaces, reform efforts, and the dynamics of social change. Prerequisite: At least one semester of college-level course in U.S. history or literature. Enrollment limited to 20 juniors and seniors.

**AMST 1901W. The Development of Black Feminism.**

Beginning with the participation of black women in the abolition movement and ranging forward to current black women novelists and feminist theorists, this course will examine the intellectual development of black feminism. We will pay particular attention to black feminism as an area of critical study, and will explore the concepts of representation, ideology, discourse, race, gender, and sexuality. Enrollment limited to 20 juniors and seniors.

**AMST 1901Y. The Making of U.S. Child Welfare.**

Will examine the origin and design, at the beginning of this century, of the U.S. child welfare system. The separation of child from adult welfare, the definition of a special relationship between children and the state; foster care versus institutional care; the juvenile justice system; child labor; infant and maternal welfare; aid to children in families; and school-based welfare are some of the topics to be covered. Enrollment limited to 20 juniors and seniors.

**AMST 1901Z. The Old/New Immigration.**

By comparing and contrasting the migration and adaptation experiences of Russian Jews and southern Italians, explores in depth the massive immigration from eastern and southern Europe that took place between 1880 and 1924. Topics include: the causes and contours of emigration, settlement patterns, adaptation and assimilation, ideologies of left and right, immigration as a gendered experience, immigrant writers and intellectuals, nativism and restriction, and the "new immigration" and national memory. Enrollment limited to 20 juniors and seniors.

**AMST 1902A. The Politics of Asian American Culture.**

From Bret Harte's "Heathen Chinee" to Bill Clinton's John Huang, Asian Americans have been represented as aliens in American culture. The task of Asian American cultural production has been to create a space for an Asian American citizenship. This course looks at autobiography, fiction, drama, film, and cultural criticism to understand how Asian American culture makers have sought to combat imposed stereotypes, subvert structural hegemony, and undermine self-imposed orthodoxies. Enrollment limited to 20 juniors and seniors.

**AMST 1902B. Water is Life/New Currents in the Study of Land, Water and Indigeneity (ETHN 1750H).**

Interested students must register for ETHN 1750H.

**AMST 1902C. Indigeneity, Sustainability and Resistance in Food Politics (ETHN 1750I).**

Interested students must register for ETHN 1750I.

**AMST 1902D. Make a Body Riot: Laughter, Resistance, and African American Literature (GNSS 1961J).**

Interested students must register for GNSS 1961J.

**AMST 1902E. The Second Americans: Narratives and Images of Hispanics in the U.S. 1513-1945.**

Confronts the notion of Latinos as "foreign" by demonstrating historical depth and geographic breadth of the Hispanic/Latino experience in what is now U.S. territory--from colonial Florida, California, and the Southwest, to early 20th-century Puerto Rican and Cuban communities in New York. Explores contrasting Hispanic and Anglo views of the presence of Hispanics via such diverse sources as historical chronicles and autobiographies, Hollywood films, romance novels, and popular music. Enrollment limited to 20 juniors and seniors.

**AMST 1902F. Global America: Gender, Empire, and Internationalism Since 1890 (GNSS 1961I).**

Interested students must register for GNSS 1961I.

**AMST 1902H. Topics in Asian American History and Culture: Diasporas and Transnationalisms.**

This seminar reviews the theoretical literatures on diaspora and transnationalism. We then place Asian migrations to the Americas (North America, Hawaii, the West Indies, Central and Latin America) in the context of migrations out of and within Asia in the 19th and 20th centuries. Finally, we consider transnationalism as an analytical framework for understanding the process of Asian-American community formation. Enrollment limited to 20 juniors and seniors.

**AMST 1902J. Topics in Latino Studies: Racial Ideologies, National Belonging, and Citizenship in the Americas.**

What is the relationship between citizenship, national belonging, and ideologies of race in the Americas? In what ways do gender and class differences affect this relationship? Focusing on these questions, the racial and social experience of U.S. Latinos are compared with that of the populations in various countries in the hemisphere. Theoretical readings and empirical examples. Enrollment limited to 20 juniors and seniors.

**AMST 1902N. Uncovering the Story of Latina/o Identity: Movement, Space and Culture.**

This course examines the multiple ways of knowing and understanding Latina/o cultural identity and expression in the Americas. The story of a Latina/o cultural identity is mapped out as place and sentiment in both historical and contemporary periods. We utilize theory and method from both the social sciences and the humanities to uncover and better understand the story of Latina/o identity and ourselves. Enrollment limited to 20 juniors and seniors.

**AMST 1902O. Urban Borderlands.**

This course analyzes changing patterns of immigration from Latin America to the U.S. by comparatively examining the emergence of various Latino communities and cultures in selected cities. It explores interethnic relations among the various Latino communities, as well as Latinos' interactions with other racial and ethnic groups. The cities to be considered are Los Angeles, New York, Miami, San Antonio, Washington DC, and Providence—the last of which will be explored via student projects in the community. Enrollment limited to 20 juniors and seniors.

**AMST 1902P. Women and American Modernism, 1900-1940.**

No description available. Enrollment limited to 20 juniors and seniors.

**AMST 1902Q. Chicano Studies Seminar.**

Explores the culture and politics of Mexican people in the United States leading up to and through the 1960s and 1970s, and the post-nationalist period that continues to the present. Our approach will be interdisciplinary, including readings and films that explore the history, sexuality, art, music, labor, and gendered identities of this diverse community. Prerequisite: Introduction to America/Ethnic Studies recommended. Enrollment limited to 20 juniors and seniors.

**AMST 1902R. Memory and Forgetting in Popular Culture.**

Is it always good to remember? Does forgetting always imply failure? While it is easier than ever to document and access information, the rise of ephemeral media such as Snapchat indicates a growing desire for the past to remain past, and to not become a burden on the present. This course explores the tension between remembering and forgetting as it is portrayed in film, literature, and technology, to examine what they reveal about our belief in—and anxieties towards—human memory.

**AMST 1902S. Dawnland Voices: Exploring Native New England.**

In this course, we'll explore New England as many stories. In particular, we'll engage the connections and dissonances between the multiple stories that live with the land and its people and the central role that New England plays in the storying of the United States itself. Drawing on a range of texts including academic monographs, primary documents, poetry, and film, we will explore the stories that continue to live with New England as both a physical and incorporeal location. In doing so, we will also explore the complicated relationship that Native Studies has to the field of American Studies.

**AMST 1902T. Henry James and The American Scene.**

A study of James's representation of the American read in the context of the cultural changes of the late nineteenth century: Daisy Miller, *The American*, *The Portrait of a Lady*, *The Golden Bowl* and selections from his travel writings, including *The American Scene*. Writings by James's contemporaries, W. E. B. Du Bois and Thorstein Veblen will also be studied. Enrollment limited to 20 juniors and seniors.

**AMST 1902U. Zombies Pirates Ghosts Witches.**

Zombies, pirates, ghosts, and witches are not only characters in horror films; they are also the strange figures who either did not fit in or resulted from the many socio-racial hierarchies of the Atlantic world. Students learn about the literature and history of the Atlantic Caribbean region through its most subversive and disturbing icons. Texts include Pedro Cabiya and Sarah Lauro on zombies, Maryse Condé and Marlon James on witches, Toni Morrison and Tiya Miles on ghosts, and Michel Philip on pirates. Films include several horror classics, including *White Zombie* (1932), *Candyman* (1992), and *Get Out* (2017).

**AMST 1902V. Visions of a Post-Industrial Society.**

For decades people have predicted the end of industrial society: As factory work is replaced by automation or moved overseas a new society is to emerge based on pure information and creativity. In some ways these predictions have come true, but many of the utopian visions—abundant leisure time, social equality, enlightened leadership, a clean environment—have not. Through a mix of classic fiction, film, and social thought, this class will explore the ways people have imagined the possibilities and pitfalls of a post-industrial society. Who wins and who loses in these future visions and the reality they produce? WRIT

**AMST 1902W. Queering Oral History: Theory and Practice of Building Alternative Archives.**

In this course, students will engage the theory and practice of oral history with an emphasis on queer and trans frameworks. Students will learn about the history and importance of oral history as an alternative method, gain an understanding of LGBTQ history in the U.S., and research LGBTQ oral history projects. In practice, students will train in oral history methods and learn how to build accessible archives for oral histories. The final project of this course involves conducting oral histories with LGBTQ Providence and Brown community members to help build queer archives at Brown and in Providence.

**AMST 1902X. Social Memory and the 1960s: From Nixon to Nostalgia.**

From the Civil Rights movement to the Vietnam War, women's liberation to Woodstock, the 1960s were a time of political and cultural turbulence in the US. This class explores the ways in which the decade persists in American collective memory, and how its legacies have become embodied in modern day texts, images, music, memorials, and rituals. Students will use the interdisciplinary methods of memory studies to address these questions, analyzing both primary and secondary source material. Those interested in sociology, anthropology, and history will find new approaches to enduring questions about how societies remember and forget crucial events and experiences.

**AMST 1902Y. The Black Female Body in American Culture.**

This course on gender and representation will use the black female body as an example of the ways in which images, both verbal and visual, of women of color are utilized within American culture. Through literature, film, visual art, and popular culture, we will consider the legacy of slavery, the persistence of stereotypes, sexual violence, and black women's resistance. Enrollment limited to 20 juniors and seniors.

**AMST 1902Z. Radio: From Hams to Podcasts.**

This course examines the history of radio broadcasting and asks if a consideration of radio's historic flexibility can predict the future of this interesting medium. Readings will focus on the exciting new field of radio studies, emphasizing economics, structures, and listeners. Topics include radio's ability to cross borders, create racial and gender categories, and change programming possibilities. Enrollment limited to 20 juniors and seniors.

**AMST 1903B. Alien-nation: Latina/o Im/migration in Comparative Perspective.**

Explores how Latina/o immigration to the United States has reshaped the meaning of "America" over the last hundred years. We will study Latina/os in comparison to other im/migrants and examine how US immigration policy has created a nation partly composed of "alien" residents, some citizens, others not, who have constructed alternative notions of belonging. Enrollment limited to 20 juniors and seniors.

**AMST 1903E. City of the American Century: The Culture and Politics of Urbanism in Postwar New York City.**

This seminar will investigate the life, history and culture of New York City from World War II to the fiscal crisis of the mid 1970's, with a particular interest in transformations in the built environment of the city and region. We will primarily focus on the cultural representations, intellectual visions, and political struggles that arose around these transformations, but will also consider their effects on everyday life. Enrollment limited to 20 juniors, seniors, and graduate students concentrating in American Studies.

**AMST 1903F. Topics in Asian American History: Migration, Race and Citizenship.**

This seminar will explore the relationship between Asian Americans and the US State in three historical moments; the era of exclusion, WWII internment, and the post-civil rights era. We will look at citizenship as a cultural signifier that organizes race, gender, sexuality and class as well as a legal status. Enrollment limited to 20 juniors and seniors.

**AMST 1903G. Oral History and Community Memory.**

Students in this seminar will conduct oral history interviews and archival research to create an audio and visual history of one Providence neighborhood. Collected materials will be prepared for public presentation as a walking tour and web site. Enrollment limited to 20 juniors, seniors, and graduate students.

**AMST 1903H. Space and Place: Geographies of the Black Atlantic.**

Is the map on an iPhone representative of the space beneath our feet? Does a 'map' have to represent geographic space or can it represent something else? For centuries people have sought to make sense of the geographies of their everyday lives as well as environments out of their purview. In this course, we will engage with a number of approaches to space and place including historical, cultural, ethnographic, literary, geographic, and artistic, focusing on African diasporas and the Black Atlantic. Students will analyze texts, artworks, and web-based projects, and at the end of the course, create their own maps. Enrollment limited to 20 juniors, seniors, and graduate students.

**AMST 1903I. Museum Histories.**

Museums collect and display art and artifacts not only to preserve culture heritage, but also to educate, engage, and entertain. This course examines the history of museums— of art, history, anthropology, natural history, science and technology— to understand their changing goals and their changing place in American society. It also considers the changes within museums, in the work of curation, conservation, education, and social engagement. Students will read museum history and theory, engage with museum archives and other primary sources, and produce a research paper or a digital or public project.

**AMST 1903J. Anthropology and Art.**

Art is a historic topic of inquiry in anthropology. From the early days of collecting and displaying ethnographic relics in cabinets of curiosities to the bustling movements of art and artists in global art markets, anthropologists have sought to understand social life through art, and art through social life. Through readings, discussions, films, digital materials, and artworks, we will learn about artists, art worlds, art practice, and how anthropologists have studied the arts. Course assignments include critical responses to course material, a final research project, and participation in Providence arts events.

**AMST 1903P. Please, Please Me.**

This seminar will investigate theories of pleasure and its representation in a range of fictional texts. What is it that makes a text pleasing and for whom? How do we talk about pleasure and explain it to others? I am especially interested in the representation of pleasure from the 1970s on. Enrollment limited to 20 juniors and seniors.

**AMST 1903Q. Out of Place: Regional Boundaries and their Transgression in Novels, Photography, Public Humanities.**

This class explores the meaning of "region" in contemporary American culture. Focusing primarily on the West, we'll examine the construction and transgression of geographical and ideological regional boundaries. Questions considered include: What does crossing boundaries tell us about the stability and meaning of region? What role do race, gender, and nationality play in moving across regional lines? What do shifting regional identities tell us about the possibilities and problems in ways of transforming identity? Sources include fiction, essays, websites, and photography. We use skills and ideas built over the semester to consider the ways museums and other public sites construct regional boundaries. Enrollment limited to 20 juniors and seniors, with priority given to American Studies concentrators.

**AMST 1903R. Big Business, the Bomb, and Smokey Bear: Cold War Origins of Today's Environmental Movement.**

Beginning with the psychological, cultural, and environmental changes brought by the Atomic Bomb, this seminar traces Americans' growing environmental awareness and concern with corporate power. We will look at classics like Aldo Leopold's *Sand County Almanac* and Rachel Carson's *Silent Spring*, as well as films, poetry, popular texts, and histories complicating traditional notions of the origins and conduct of the contemporary environmental movement. Students will have the opportunity to explore an aspect of environmentalism or the environment in depth through a semester writing project. Enrollment limited to 20 juniors and seniors.

**AMST 1903T. The Materiality of History: Material Culture Theory and Practice.**

Focusing on Native American, early American, and contemporary US material culture, this course develops critical methods for analyzing historic materials, not as silent monuments to the past, but as legible research materials for scholarly work. Who studies "things", and with what methods? From the invisible to the living to the monumental, what are the limits of "thingness"? What is the role of commodification and American consumerism? Through selected readings and site visits, we will identify 'best practices' for integrating artifacts, collectibles, and every day things with documentary research in narrating and exhibiting the past. Enrollment limited to 20 juniors and seniors.

**AMST 1903V. Asian and Latino Immigration.**

This seminar examines the ways in which the histories of Asian and Latino immigration parallel and intersect each other throughout US history. Capitalist development and labor migrations; wars and refugees; immigration policies and changing racial formations will be among the topics we explore. Enrollment limited to 20 juniors, seniors, and graduate students concentrating in American Studies and Ethnic Studies.

**AMST 1903W. The Boy Problem: Male Adolescence as Social Pathology.**

Focusing on the beginning, middle, and especially concluding decades of the 20th century, this course examines the ways in which both expert and popular discourse in the US have conflated male adolescence with social pathology and have constructed an image of the teenage boy as both symptomatic of and responsible for the nation's ills. Particular attention will be paid to issues of gender, race, and class. Primary source readings and original research will be emphasized. Enrollment limited to 20 juniors and seniors.

**AMST 1903X. Style and the Man: Masculinity in Fashion and U.S. History.**

This class will examine the role clothes have played in constructing notions of masculinity and manhood from the mid-19th century to the present. We will take seriously the oft-heard comment, "the clothes make the man," by studying the sartorial circumstances around the formation of men's fashion. These circumstances include class, ethnicity, race, gender, sexuality, and generation. Our study will be episodic and privilege New York and Los Angeles, though other locations will be considered comparatively. Enrollment limited to 20 juniors and seniors concentrating in American Studies.

**AMST 1903Y. American Publics.**

Americans worry about the quality of their civic life and fear its decline. We examine the public sphere's popular and political dimensions as well as challenges to the boundaries of American public life. Who is a citizen and thus eligible to participate? The course pays particular attention to concerns about the impact of new media—print, broadcasting, the internet. Taught simultaneously with the same course at the University of Melbourne, Australia, students will be linked digitally for discussion and collaborative writing. Enrollment limited to 20 juniors and seniors.

**AMST 1903Z. Shrine, House or Home: Rethinking the House Museum Paradigm.**

This seminar will examine historic house museums within the context of American culture from the founding of Mount Vernon in 1853 to their present decline in popularity and relevance. Utilizing sources from a variety of disciplines including literature, women's and family history, and museum and preservation theory and practice, students will re-examine the prevailing historic house museum paradigm and develop interpretation plans for house museums in the Providence area. Enrollment limited to 20. If oversubscribed, priority is given to students in the Public Humanities Programs and Department of American Civilizations. No prerequisites.

**AMST 1904A. Memories, Memorials, Collections and Commemorations.**

To understand how American culture thinks about the past, we will explore a range of texts including museum exhibits, historical society collections, memorials, and civic celebrations. These sites and objects, the material culture of memory, help us understand the construction of national, community and personal identity. Students will also undertake practical projects in memorialization and commemoration, among them designing the program for a new memorial to the Rhode Island slave trade. Enrollment limited to 20 juniors and seniors.

**AMST 1904B. Henry James Goes to the Movies.**

This course will focus on some of the novels and stories by James that have been made more than once into films or tv shows - *Washington Square*, *The Turn of the Screw*, *The Portrait of a Lady*, and *The Golden Bowl* - and study the narrative and visual choices as interpretations of James's texts. Critical readings on the art of fiction and the art of film will also be included. Enrollment limited to 20.

**AMST 1904C. The Pacific Rim in American History.**

Investigates the circuits of people, goods and ideas between Asia and the Americas. Although these flows have been at work for the past half millenium, this course will focus principally on three historical moments: the trading world of the 17th and 18th centuries; colonialisms and their critics in the late 19th and early 20th centuries; and the "American Century" in the late 20th century. Enrollment limited to 20 juniors and seniors.

**AMST 1904D. End of the West: The Closing of the U.S. Western Frontier in Images and Narrative.**

In 1893, Historian Fredrick Jackson Turner declared "the closing of the American frontier," touching off an argument among historians about the meaning and significance of European expansion and settlement in the area west of the Mississippi River. Historians, filmmakers, television producers and photographers have continued the debate in their writings, images, and drama that will be the subject of this class. We will consider the various ways The West has "ended" in popular culture and academia, and consider how these narratives shape our present perceptions of the region and the people and cultures that inhabit and border it. Enrollment limited to 20 juniors and seniors.

**AMST 1904F. The American Experience: The Southeast Asian Refugees/Americans.**

Explores the complexity of the American experience, the displacements and diasporas of the Vietnamese, the Cambodians, the Hmong, the Lao, and the Lu Mien in America through multiplicity of perspectives and interdisciplinary approach. Special emphases are on the reinvention of new lives in New World, the American-born generation, how the American-ness and the sense of "home" are constructed, defined, and contested through literary and cinematic works, self-representations, and cultural productions written and produced by these new Asian Americans themselves. Enrollment limited to 20.

**AMST 1904G. Museums, Identities, Nationhood.**

Will explore the national museum as a cultural institution in a range of contrasting contexts, revealing how these museums have been used to create a sense of national self, deal with the consequences of political change, remake difficult pasts, and confront those issues of nationalism, postcolonialism and multiculturalism which have come to the fore in national politics in recent decades. Enrollment limited to 20 juniors, seniors, and graduate students.

**AMST 1904H. The Teen Age: Youth, Society and Culture in Early Cold War America.**

An interdisciplinary and multimedia exploration of the experiences, culture, and representation of youth in the United States from the end of World War II through the beginning of the Vietnam War. Enrollment limited to 20 sophomores, juniors and seniors.

**AMST 1904I. Art/Place.**

This course surveys the many ways in which contemporary artists respond to, remake, and intervene in places, and teaches students to articulate their own creative responses to place. We will be working intensively in Providence's Jewelry District, collaborating with the nonprofit Artists in Context to create a public artwork, and developing each person's creative practice in response to the narrative and aesthetic prompts of this contested space. The course will culminate in a final exhibition of student projects curated by the students themselves. Enrollment limited to 14.

**AMST 1904J. The Asian American Movement: Communities, Politics and Culture.**

In 1969 students at S.F. State College invented a new social category; they called it Asian America. This seminar begins with an examination the Asian American Movement, its origins and aspirations, its ideological cross currents, its failures and enduring legacies. But the central question we will ask is, what relevance does the Asian American Movement have for struggles for social justice today? Enrollment limited to 20 juniors and seniors.

**AMST 1904K. Power + Water: Material Culture and its Environmental Impact.**

Students explore material culture, its impact upon the environment in the US prior to Industrial Revolution and examine the relationship of this earlier production to current issues of pollution and climate change. In the 18-19th centuries, houses, furniture, whale products were staples of American craft and ingenuity. This material culture tells the story of how gathering raw materials and converting them into usable products came at a severe cost to watersheds, forests, species, humans. These examples show that the seemingly insatiable human urge to control/transform resources into items for consumption leads to serious consequences for the earth's climate and inhabitants.

**AMST 1904L. Cultural Heritage, Curation and Creativity.**

The course examines current theories and practices in cultural heritage work from various international perspectives and places them in dialogue with practices, theories and critical perspectives from the contemporary arts. It offers students the opportunity to participate in a practical and creative cultural heritage project, realizing a curated experience/event/experience within the urban environment of Providence. Questions of material and form; the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Following readings in cultural heritage theory, curatorial studies and critical theory, the course will engage students both intellectually and practically through individual and group curatorial projects. Enrollment limited to 14 juniors and seniors.

**AMST 1904M. Charles Chapin and the Urban Public Health Movement.**

Examines the science, politics, and programs of the 19th and early 20th century urban public health movement. Scope will be national but the focus will be on Providence, particularly during the tenure of Charles Chapin as Superintendent of Health. Will result in the mounting of an exhibit illustrating and explaining one of facet of the movement. Enrollment limited to 20 juniors and seniors.

**AMST 1904N. The Korean War in Color (ENGL 1761V).**

Interested students must register for ENGL 1761V.

**AMST 1904O. Native American Environmental Health Movements (ETHN 1890J).**

Interested students must register for ETHN 1890J.

**AMST 1904P. Queer Relations: Aesthetics and Sexuality (ENGL 1900R).**

Interested students must register for ENGL 1900R.

**AMST 1904Q. Engendering Empire (ETHN 1890K).**

Interested students must register for ETHN 1890K.

**AMST 1904R. New Narratives: New Media: New Museums.**

This course explores the challenges to narrative modes, institutional patterns, and models for studies in material culture that are posed by emerging digital media practices. This course will focus on the example of the collections and resources of the Haffenreffer Museum of Anthropology. Readings in brain science and anthropology that focus on the cognitive and social mechanics of cultural capital formation to project development techniques in simulation and prototyping that derive from movie production, interaction design, game development and architecture. Students from a broad spectrum of arts and science backgrounds, including specifically those from museum curation and computer science, are welcome. Enrollment limited to 15.

**AMST 1904S. Ethnic American Folklore: Continuity and the Creative Process.**

The course investigates how folklore and the oral culture of diverse cultural groups have transformed within their texts and in their creative representations and meanings. It looks into the dynamics of cultural continuity and the creative process involved, from oral narratives, foodscape, family lore, the senses of place, and the senses of home. At the juncture of the oral, the written, the popular, and the high tech, what are the new cultural forms, new cultural products, communication milieu and venues negotiated and contested. Anthropological field research methods and training will be a major emphasis of the course. Enrollment limited to 20.

**AMST 1904T. Women and Work in the 21st Century.**

Debates about women and work seem to be everywhere in American culture, dominated by the question of whether professional women can "have it all." Simultaneously, women—especially women of color—continue to be concentrated in the lowest-level, most poorly-paid jobs. And as more families depend on women's income, the contradictions between waged work and unwaged family work grow more acute. Controversies about women and their labor—waged and unwaged—have a long history in the U.S. This course will explore current debates from historical, sociological, and theoretical perspectives, with particular attention to the impact of race and class. Enrollment limited to 20 sophomores, juniors, seniors.

**AMST 1904V. Decolonizing Minds: A People's History of the World.**

This seminar will explore the knowledge-production and military-financial infrastructures that maintain empires, as well as the means through which people have either resisted or embraced empire. While some attention will be made to the 19th and early 20th century colonial context, the bulk of the course will focus on the Cold War liberal era to the neoliberal regime that continues today. Possible topics include: popular culture and ideology, the Cold War university, area studies, international anti-war networks, transnational labor activism, the anti-colonial radical tradition, and the Arab Spring/ Occupy Movements. Weekly readings; evaluation based on participation and analytical essays. Enrollment limited to 20. No overrides will be given before the semester begins. Please come to the first class meeting if you are interested in taking the course.

**AMST 1904W. Native American Environmental Health Movements (ETHN 1890J).**

Interested students must register for ETHN 1890J.

**AMST 1904X. Imagining And Depicting China In America.**

Geographically remote and less-obviously intertwined politically and culturally, China's distance has fostered an active imaginary, producing rich visual and textual resources. This seminar examines narrative and visual culture over the long period Americans have been fascinated with China and the Chinese, from the 18th century to the present. Visual primary sources are our principal "texts" and include paintings, cartoons, decorative arts, photography, films, fiction, news articles, and government documents. The goal of the course is to interrogate how we envision China and the Chinese today, placing that vision within a critical historical perspective. Enrollment limited to 20.

**AMST 1905A. Crises in American Capitalism.**

We are now in the midst of what is commonly called the Great Recession—the biggest economic crisis since the Great Depression. This course investigates these two crises in American capitalism: how they were caused, resisted, represented, and remembered. Students will be asked to interrogate the meanings of these economic crises, and to consider their various political and cultural uses. Assigned texts will include history, fiction, journalism, film, memoir, and photography. Enrollment limited to 20 sophomores, juniors, and seniors.

**AMST 1905B. Media and Modern Childhood (GNSS 1960S).**

Interested students must register for GNSS 1960S.

**AMST 1905C. Mainstream Journalism in America (through the prism of The New York Times).**

Jefferson is supposed to have said that if he were forced to choose between a free government and a free press he would choose a free press, because without it a free government would not survive. It is certainly true that newspapers, and later the electronic media, have had major impacts on American politics and society. Now these media are in a period of convulsive change; their business model is broken and no one can fix it. This course will consider the growth, evolution, influence and future of these media, particularly The New York Times. Enrollment limited to 20.

**AMST 1905D. African American Musical Theatre (MUSC 1905D).**

Interested students must register for MUSC 1905D.

**AMST 1905E. American Poetry II: Modernism (ENGL 1711A).**

Interested students must register for ENGL 1711A.

**AMST 1905G. Literature and the Problem of Poverty (ENGL 1710K).**

Interested students must register for ENGL 1710K.

**AMST 1905J. American Poetry I: Puritans through the Nineteenth Century (ENGL 1511O).**

Interested students must register for ENGL 1511O.

**AMST 1905M. Whose Heritage?: National Landmarks for Diverse Publics.**

In this course students examine the commemoration of specific sites, private and public, in creating, remembering, and preserving public history. Through theoretical readings, case studies, and workshops, students explore the intersection of people—as individuals, community members, and citizens—with their built environment, historic memory, and narrative. We explore how cultural heritage gets made, who chooses the sites, and whose history gets remembered by writing a U.S. National Park Service Landmark nomination for a local Chinese American site. The course also compares American cultural heritage programs with those of other countries and provides practical experience with National Park Service processes.

**AMST 1905N. War and the Mind in Modern America.**

This course examines how the crucible of war has shaped modern conceptions of human nature. Moving from the Civil War to the present, we will consider questions such as changing theories of combat trauma, evolutionary and social scientific explanations for why people fight wars, and the role of memory in individual and collective understandings of violent conflicts. Students will analyze representations of war in film and literature in addition to reading historical and theoretical texts.

**AMST 1905O. Reading and Righting Histories of Violence.**

This seminar proposes "histories of violence" as a useful framework to interrogate the varied forms of violence that constitute Western liberal modernity. These forms include systems of state power and imperial practices; subjective violence through raced, gendered, and sexualized hierarchies; and narrative violence that prevents histories and voices from emerging through the erasure of archives and narrative silencing. Course readings consider ongoing local and transnational struggles to reckon with the violent histories of slavery, empire, colonialism, nationalism, and democracy. They offer interdisciplinary models for researching and narrating these histories. Class discussions with consider avenues for reckoning with histories of violence.

**AMST 1905Q. Laboring Women: Work, Reproduction, and Leisure since Reconstruction.**

This course examines US women's history from the late 19th century to the present, with a focus on labor broadly defined. It will consider how differences among women (e.g. race, ethnicity, religion, sexuality), as well as their status as women, historically shaped their experiences of work, cultural life, activism, and reproduction.

**AMST 1905R. Theory and Practice of Local History (HIST 1972E).**

Interested students must register for HIST 1972E.

**AMST 1905S. Enslaved! Indians and Africans in an Unfree Atlantic World (HIST 1970B).**

Interested students must register for HIST 1970B.

**AMST 1905T. Imagining Formosa: American Writings on Taiwan.**

American accounts of Taiwan mid-nineteenth century to present are the focus of this seminar. Beginning in 1860, Euro-American merchants, diplomats, missionaries, ethnographers, and explorers began arriving in ever-increasing numbers. We will read representative texts written by these visitors during years of treaty-port imperialism, Japanese colonial rule, martial law, and later democratization, including post colonial criticism and a novel set in 1950's Taipei and a collection of short stories. The island's complex aboriginal and Chinese ethnic population is the subject matter of much of this writing, and we will explore issues of indigeneity and ethnicity.

**AMST 1905V. Digital Communities.**

Community and online engagement have been falsely cast in a dichotomous light -- either a cure-all or a sure failure. Working with local and online communities will shape our understanding and questions about the complexities of groups. We'll learn context, tools, and tricks for building powerful community-based campaigns. Students examine how projects can gain new participants while maintaining their focus and think about the differences in community involvement in on-line spaces and off. In a hands-on project, this class explores how to work together in digital space, to create moving media, and to build a campaign for support and growth.

**AMST 1906H. Beauty Pageants in American Society.**

Beauty pageants are often ridiculed, and even vilified, in American society. Yet their cultural power—from "There She Is" to Toddlers + Tiaras to pageant waves—is undeniable. What accounts for the enduring power of beauty pageants? This course draws on inter-disciplinary scholarship across the social sciences and humanities to examine how and why pageantry and American femininity have become linked in the public consciousness. By the end of this course you will be able to use beauty pageants as a lens to carefully examine gender, race, age, and appearance, and apply that critical thinking to other pop culture phenomena.

**AMST 1906I. Decolonizing Museums: Collecting Indigenious Culture in Taiwan and North America.**

This course addresses "global indignity" in comparing ethnographic collections in Taiwan and North America. How do Anthropology museums maintain and interpret objects collected under English, US, or Japanese colonialism. In hands-on and virtual examination of museum collections, students follow ethnographic artifacts from useful circulation to glass cabinets—and ultimately to art galleries. We explore collecting and representation strategies of "ethnic" objects in relation to colonialism, decolonization, ethnic politics, and nationalism. What are strategies of the post-colonial museum and indigenious-led design?

**AMST 1906J. Race, Gentrification, and the Policing of Urban Space (PLCY 1701W).**

Interested students must register for PLCY 1701W.

**AMST 1906K. Crimes of Gender and Sex: Producing and Imprisoning Criminals in the Age of Mass Incarceration.**

Growing interest in mass incarceration has brought new attention to longstanding critiques of the criminal justice system. This course looks beyond failings such as "tough on crime" sentencing and racist policing to examine criminal justice as a system that defines and produces criminality. Specifically, we will examine criminalization as a social, political, and cultural process that not only makes certain bodies "criminal," but also reinforces dominant beliefs about gender, sexuality, and sex. We will explore theories of criminality, methods of policing and imprisonment, rehabilitation initiatives, and prison activism through an intersectional lens.

**AMST 1906M. Making Knowledge in the Progressive Era: Institutions, Spaces, and Ideas.**

Who makes knowledge? How is it shaped by intellectual, political, and material ambitions and constraints? These current concerns also preoccupied U.S. society at the turn of the 20th century. During the Progressive Era – a time of massive technological change, social upheavals, and racial tensions – educators, researchers, and artists charted new ways of producing and disseminating knowledge. Students will analyze American knowledge cultures by reading fictions, memoirs, and philosophical/scholarly writings by Henry Adams, Jane Addams, Willa Cather, John Dewey, and W.E.B. Du Bois and by exploring other cultural artifacts and media, including visual representations, maps, architectural plans and archives.

**AMST 1906N. Whiteness, Power, and Privilege: The Invention and Persistence of the White Race.**

Terms like whiteness and white privilege have entered the American mainstream in the wake of racial tensions and the rise of movements like Black Lives Matter. This course seeks to situate historically, socially, psychologically, politically, economically, and corporeally what is meant by whiteness and how it affects our daily lives in this country and at a global level. Through engagement with classic texts in critical whiteness studies and select case-studies, students will discuss the invention, development, and power of whiteness. From the advent of race-based slavery to the 2016 Presidential Election, this course explores the meaning and power of whiteness.

**AMST 1906P. Food in American Society and Culture.**

How do we define American food and how does food define Americans? What determines what we eat, how we eat it, and what we believe we should eat? How is food used to construct and declare ethnic, racial, regional, class, and gender identities? How have food and nutrition been employed as signifiers of social justice and injustice and as sites of political struggle? What issues inform current discussions of the economics of local, national, and global food production and consumption? What is meant by eating responsibly? This course will examine these and other related question currently animating food studies.

**AMST 1906Q. The History of Children and Childhood in America.**

We will examine the evolution of childhood—as both a socioculturally constructed concept and a lived experience—from the colonial period to the present. In doing so, we will explore the impact of race, gender, class, and region on those constructions and experiences and consider the interpretive possibilities and challenges offered by various types of evidence: visual and literary representations, memoirs, child rearing advice, toys and play, children's literature, clothing, and protective and restrictive laws.

**AMST 1906R. Law and Transformative Social Change.**

What potential does the law hold to bring about transformative social change in today's society? Relatedly, what strategies and approaches have social movement activists utilized to engage lawyers and the broader legal system? We will answer these questions through an examination of models of activist and public interest lawyering from the Civil Rights, Environment Justice, Immigrant Rights and same sex marriage movements. Readings will draw from sociological, anthropological, legal and historical texts and legal cases with a focus on exploring multiple aspects of a legal decision.

**AMST 1906S. Narratives of Blackness in Latinx and Latin America (ENGL 1761B).**

Interested students must register for ENGL 1761B.

**AMST 1906T. Captive Voices: Atlantic Slavery in the Digital Age (HIST 1970G).**

Interested students must register for HIST 1970G.

**AMST 1906U. Culture as History: Making the 20th Century United States.**

This interdisciplinary course explores selected currents in U.S. cultural history from the late nineteenth century to the end of the twentieth century. Thematic explorations trace the historical development of American cultural forms and practices, showing how transformations in communications, media, and consumption shaped Americans' experience of capitalism and market expansion, ideas of self and society, social conflict around questions of race, class, gender, nationalism and empire, as well as immigration, migration, and social movements of both the left and right. Our broad goal will be to understand how culture came to shape how historical change unfolded in this period.

**AMST 1950. Pursuit of Happiness: Environmental Justice and Indigenous Rights.**

Co-instructors Ron Potvin and Lorén Spears will lead exploration of indigenous cultural survival in the midst of ecological exploitation by the colonizers of Rhode Island and North America. They will address these issues with tours to native heritage sites; meetings with native experts and advocates; historical scholarship; and fiction, poetry, and song. Students will communicate their understanding of course content through writing, creative expression, and multimedia. The class will contribute content to a travelling exhibition organized by the Humanities Action Lab for its 2019 Initiative on Migration, Climate Justice, and Environmental Justice.

**AMST 1970. Independent Reading and Research.**

Required of all honors candidates in the senior year. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. S/NC

**AMST 2010. Introduction to Interdisciplinary Methods.**

Introduction to interdisciplinary studies required of all first-year graduate students in American Studies. Graduate students from other departments may enroll with permission of the instructor.

**AMST 2020E. Introduction to Interdisciplinary American Studies.**

This graduate-level course offers an introduction to the discipline of American Studies through a close reading of four important texts representing different methodologies and theories within the discipline. We will also read a series of seminal articles focused on transnationalism, highlighting the significance of border-crossings to the American experience throughout the semester. The goal of the course is to familiarize students with pedagogical approaches within American Studies, through active seminar discussions, fieldtrips within the community, and work with material and visual media as well as secondary texts.

**AMST 2201. Creativity/Practice/Habit.**

This seminar examines the mutually reinforcing relationship among creativity, practice, and habit. I want to think about creativity writ large, and how we can enhance our creative projects through practice and habit. I am as interested in practitioners writing about their creative habits and practices (e.g. Twyla Tharp's "The Creative Habit" and Anna Deavere Smith's "Letters to a Young Artist") as I am in scholars analyzing creativity and habit (e.g. David Bohm's "On Creativity" and Charles Duhigg's "The Power of Habit"). The ideal student for this course is a creative interested in developing their practice and sharing work in class.

**AMST 2220A. Digital Scholarship.**

This course examines how the social sciences and humanities changed as a result of the information revolution. We will look at changes in museums, publishing, knowledge production, and pedagogy. Students learn digital tools and use them to create new media projects experimenting with public scholarship, digital humanities research, archival tools, and/or classroom possibilities. Digital novices welcome. Enrollment limited to 20.

**AMST 2220B. Culture, Politics and the Metropolitan-Built Environment.**

This interdisciplinary readings seminar will provide graduate students with an introduction to recent scholarly work on 20th century and contemporary cities and suburbs. Readings will be drawn from cultural, political, social, and intellectual history, American Studies, political science, sociology, and ethnography. They will investigate the interconnections between urban and suburban development and the role of ideology, class, gender, race, and globalization in shaping planning, architecture, culture, policy, politics, and social movements. This class is open to students in American Studies, History, Sociology, Political Science, Anthropology, and other disciplines who find themselves interested in multi-disciplinary approaches to the study of cities and suburbs.

**AMST 2220D. Museums in Their Communities.**

This seminar examines in detail aspects the internal workings of museums (of anthropology, art, history, science, etc.) and their place in their communities. Accessions, collections management, conservations, education, exhibition, marketing, research, and museum management are among the topics discussed; the focus varies from year to year. Open to graduate students only.

**AMST 2220E. American Orientalism and Asian American Literary Criticism (ENGL 2760Y).**

Interested students must register for ENGL 2760Y.

**AMST 2220F. The Transnational Practice of U.S. Popular Culture.**

This graduate seminar examines popular culture within a transnational framework, exploring both the founding texts in the field and the latest works by historians, sociologists, anthropologists and communications scholars. Topics include the economics of the culture industry, globalization/cultural imperialism/domestication, audience research, and the history of cultural flows, from circuses to Bollywood. Students can take the class as either a reading or project course. Assignments include a short theoretical paper considering definitions (popular culture v. mass media, for example) and either a research paper/project or an annotated bibliography.

**AMST 2220G. Old Media New Artists: Innovation and Contingency in African American Culture.**

What are the defining characteristics of newness in twentieth-century African American culture? How have black creative artists repurposed their respective disciplines in accordance with and against the shifting proclivities of African American social politics? Through an interdisciplinary focus that considers music, literature, visual arts, and interactive media, this seminar proposes several alternative epistemological frameworks for recognizing the emerging artistry of our time. Enrollment is limited to 20 graduate students.

**AMST 2220I. Skin Deep: Reading Race, Reading Form.**

There is a movement away from symptomatic/paranoid readings of literature. In 2009, Stephen Best/Sharon Marcus pitched this in their call for surface readings, which deals with what is manifest/present in texts, rather than the latent/concealed. I hope to get beyond politically-instrumental readings of literature/to thinking in a sustained fashion about language/form/aesthetics of race. The seminar will divide between reading histories/theories of race (obsession with physical variation as race and technologies of seeing that we use to read race)/working through a range of post-nationalist works of literature/sharpening our understanding of reading as a mean-making event. Limited to Grad Students.

**AMST 2220J. Introduction to Critical Race Theory.**

This graduate seminar will explore the foundations and central tenets of Critical Race Theory, from its origins in Critical Legal Studies, to current applications, debates, and evolutions, with particular attention to CRT's intersections with the field of American Studies. We will also bring in CRT "offshoots" such as TribalCrit, LatCrit, AsianCrit, and DisCrit. CRT posits that racism is endemic to society, but that we must also remain committed to social justice and praxis. How do we navigate these tensions, use CRT to provide a toolkit for navigating scholarship, and work toward social change in the realms of race and racism?

**AMST 2220K. The Body (HIST 2981J).**

Interested students must register for HIST 2981J.

**AMST 2220S. Diasporas and Transnationalism (HIST 2971P).**

Interested students must register for HIST 2971P.

**AMST 2220T. Slavery in the Recent American Imagination.**

This seminar explores the representations of antebellum slavery in contemporary mass culture. Manifestations of popular interest include neo-slave narratives and Broadway shows, plantation weddings and tourist-friendly reenactments, documentary-style television dramas and time-travelling speculative fictions and films, radical artistic interpolations and the destruction or preservation of memorials. What disciplinary and interdisciplinary methodologies can frame an understanding of these representations? What politics of memory enables this fascination? And what, lastly, is the relationship between this material and those aforementioned regimes of enslavement – between the contemporary fascination with antebellum slavery and the very real and continued existence of racialized bound labor?

**AMST 2450. Exchange Scholar Program.****AMST 2500. Museum Interpretation of the American Experience.**

A seminar examining methods of museum interpretation, the ways that museums convey information to the public with exhibits, tours, demonstrations, films, video tapes, slide shows, interactive computer programs, publications, and other techniques. We will visit museums that have an historical or anthropological focus and read theoretical and critical writings on the public interpretation of American material culture.

**AMST 2510. Industrial Archaeology.**

No description available. S/NC

**AMST 2520. American Studies: Professional Issues in American Studies.**

This course explores the mechanics of a doctorate degree in American Studies. We will explore the constitution of our field through the elaboration of field exam lists and narratives, query its pedagogical application in the design of undergraduate syllabi, and begin to outline and enact our participation in the profession both within and beyond the academy. At the end of this class, students will have constructed a portfolio that will assist their progress towards a degree and provide the tools with which to chart pathways once a degree is in hand. S/NC

**AMST 2525. American Studies MA Capstone.**

This course is required for all Masters students in American Studies who are in their final semester. Enrolled students will work with American Studies faculty to complete an interdisciplinary research paper or project of their choice.

**AMST 2540. Methods in Public Humanities.**

This course surveys public humanities work, including cultural heritage preservation and interpretation, museum collecting and exhibition, informal education, and cultural development. It also provides an overview of the contexts of that work in nonprofit organizations, including governance, management, and development.

**AMST 2550A. Asian American Political Movements to 1970.**

This research seminar will examine political movements in Asian immigrant communities in the United States and the Caribbean before the emergence of "Asian America" in the late 1960s.

**AMST 2550B. The Japanese in the Americas.**

A research seminar on the comparative historical experience of Japanese in Hawaii, mainland U.S., Brazil, and Peru. Open to undergraduates with permission of instructor.

**AMST 2550C. Advanced Seminar on Asian American History.**

Advanced seminar on Asian-American history, diaspora studies and globalization.

**AMST 2580. Managing and Evaluating Arts and Culture Institutions.**

Cultural and arts organizations are re-assessing why they exist, who they serve and how they should be structured and supported to do their best work. This course explores how current and emerging field leaders, practicing artists and educators; trustees and donors, philanthropists and public officials answer these questions. Students will investigate how a particular institution is adapting (or not) to new conditions. Students will formulate responses to real world dilemmas from the perspective of Executive Directors, program officers, practicing artists, educators, and community members.

**AMST 2590. Creativity, Community and Controversy in Cultural Policy.**

The art of making good policy lies in making tough choices between competing options to maximize public good. Governments perceive the arts/arts-education as amenities and slash their budgets. However, creative placemaking initiatives, the expansion of the creative economy, the rise of design thinking suggest new ways for policy makers to constructively resolve apparent dilemmas to advance arts policy goals. The course explores public policies that stimulate the arts; how arts advocates make their case to public officials; the benefits of the arts to the communities; and how policy makers in many sectors in the US and internationally leverage/exploit, arts-based solutions.

**AMST 2630. Public Amnesias and Their Discontents: Theories and Practices of Remembering and Forgetting.**

This course considers the consequences of forgetting as one of the challenges and provocations to the work of public humanities. By extending the histories of memory into discourses of "amnesia," we will identify origins, effects, and the possibility of a return for material that has become forgotten or, more significant for us, made forgettable. This class is not about memory loss as an individual neurological condition, but as cultural and civic phenomena: specifically, how material objects in the public sphere become lost from view.

**AMST 2631. Public Humanities on Lockdown: Considerations on the role + design of humanities programs in prisons.**

This course examines the role of education programs in prisons and jails, as well as how other humanities organizations have interacted with the prison-industrial complex. Students will learn about the history of incarceration in the United States, the current state of mass incarceration, and the prison abolition movement. They will also examine different approaches, challenges and ethical considerations in building humanities programs for incarcerated populations. Case studies of prison education and humanities programs and program design and evaluation will be examined throughout the course.

**AMST 2635. Ethical in Public: Humanities as Moments of Encountering.**

Ethics, with its roots in classical imperial thought and premodern European philosophy, emphasized the aspirations to a "good life." But recent ethical responses to racism, genocide, and dispossession are frequently spoken in terms of responsibility, radical difference, vulnerability, and hospitality. This course will introduce students to how these latter ideas might inform "ethical praxis" in Public Humanities, offering three case studies - a museum to victims of political mass murder in Ethiopia, a destroyed Jewish cemetery in Vienna, and two current projects in Providence - as examples of ethically-informed public-facing work.

**AMST 2640. Mechanics of Cultural Policy in America.**

This seminar presents and analyzes contemporary institutional initiatives and policies relating to culture, including public art, tourism, historic preservation, and museums. It demonstrates how political, social, cultural, advocacy, and media organizations from the local to international level shape policies designed to protect and present cultural sites and activities in society. Enrollment limited to 10 graduate students.

**AMST 2650. Introduction to Public Humanities.**

This class, a foundational course for the MA in Public Humanities with preference given to American Studies graduate students, will address the theoretical bases of the public humanities, including topics of history and memory, museums and memorials, the roles of expertise and experience, community cultural development, and material culture. Enrollment limited to 20 graduate students.

**AMST 2651. The Responsive Museum.**

This course considers the many kinds of experiences available to people in art museums. Although art museums have tended to embrace the values of art history, visitors use them in surprising, personally meaningful, powerful ways. Among the topics we will activate: building community, stimulating creativity, evoking memory and associations, learning about the self and others, healing, and crossing cultural boundaries. Enrollment limited to 15 graduate students.

**AMST 2652. Community Documentary and Storytelling.**

This class focuses on ways that documentary methodologies and storytelling help individuals articulate and negotiate issues of race, ethnicity, gender and social class in local and regional communities. Through readings, discussions, and presentations by guest speakers, students will examine written, digital, visual, video/film, and oral presentations and performances as ways to express community stories. We will also consider how such projects can facilitate civic engagement. The class will involve participation in a community documentary project. Enrollment limited to 15 graduate students.

**AMST 2653. Public Art: History, Theory, and Practice.**

The course offers an opportunity for RISD and Brown students to work together to understand the growing interdisciplinary field of public art. We will explore the potential of working in the public realm as artists and/or arts administrators. Topics include: pivotal events and artworks that formed the history of public art from the early 20th century to the present; approaches to site-specificity; ideas of community and audience; current debates around defining the public and public space; temporary vs. permanent work; controversies in public art; memorials, monuments, and anti-monuments; case studies; public art administration models, among others.

**AMST 2654. Designing Heritages: From Archaeological Sensibilities to Relational Heritages.**

Do you believe in the past? This course takes as its starting assumption that pasts are not temporally distant from today. They are contemporary experiences whose structure and mediation impact how we live in our shared world. This course will explore the intellectual history of archaeological thought and the development of heritage theory. While simultaneously exploring practical design skills, it will provide context to contemporary synergies between art, archaeology and heritage studies through interdisciplinary studies of architecture, art history, cultural criticism, heritage studies and archaeological theory. Enrollment limited to 18 seniors and graduate students.

**AMST 2655. Against Invisibility: Asian America/s, Collective Memory and the Public Humanities.**

Asians have been living in North America since the 1600's but four centuries later Asian Americans are still virtually invisible in the narratives that define the nation. What spaces are available to resist invisibility? The seminar will focus on ways in which Asian Americans have used vernacular photography to archive collective memory, resist state surveillances, assert subjectivity, and narrate alternate histories. We will learn to read photographs in their shifting contexts produced in the internment or refugee camp, collected in a family album or used to prove immigration status) and think about the politics of photography in Asian American narratives.

**AMST 2656. Cultural Policy Planning.**

Cultural policy is the aggregate of governmental activities in the arts, humanities, and heritage. This seminar explores its history and public/private context and offers practical insights about how to influence cultural policy design, especially methods to achieve public consensus through planning. Students discuss contemporary issues, examine policy planning principles, and learn practical methods through case study to develop policy recommendations. Enrollment limited to 20 seniors and graduate students.

**AMST 2657. Museum Interpretation Practices.**

Examines current interpretive practices and offers students the opportunity to participate in creating gallery interpretation for the museum context. Questions of material and form; models of attention and perception, the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Throughout the semester students will develop an interpretive practice through a series of workshops, exercises, site visits and critical discussions. Enrollment limited to 14: seven seniors and graduate students, along with seven RISD students.

**AMST 2658. Releasing the Imagination in Public Humanities Practice.**

Designed to stimulate and nourish creative approaches to work in museums and other venues of public humanities practice. Students will be invited into a series of creative adventures drawing on essential skills of close looking, deep listening, persuasive writing, and creative production. Essays from Maxine Greene's "Landscapes of Learning" and "Releasing the Imagination," as well as an array of personal essays, exhibition catalogues, fiction, and research from the fields of education, sociology, and psychology. Enrollment limited to 15 graduate students; undergraduates may be admitted with instructor permission.

**AMST 2659. "Paradigm Dramas" Revisited: American Studies in Historical Perspective.**

The course offers an in-depth exploration of the radical roots and continual transformations of the academic discipline of American Studies within particular historical contexts, beginning in the early 20th century into the present. We will read seminal texts responsible for the formation of defining moments in the discipline's history, including the "myth & symbol school," "American exceptionalism," multiculturalism, post-nationalism and transnational American Studies. Students will produce reviews of current texts and reflect on future possibilities for a mature and globalized American Studies. Enrollment limited to 20 graduate students.

**AMST 2660. Projects in Public Humanities.**

Devoted to one or more advanced projects in Public Humanities not covered in detail by the regular courses. Projects in public humanities provide practical, hands-on project and group project management experience that is essential for careers in museums, historic preservation, and cultural agencies. Students will work with faculty advisor to project completion. Written permission and topic description required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. This course is repeatable for credit. Prerequisite: AMCV 2650 or demonstrated ability of equivalent experience. Instructor permission required.

**AMST 2670. Summer Practicum in Public Humanities.**

Practicums in public humanities provide practical, hands-on training that is essential for careers in museums, historic preservation, and cultural agencies. Students will work with faculty to find appropriate placements and negotiate a semester's or summer work, in general a specific project. Available only to students in the Public Humanities M.A. program.

**AMST 2680. Semester Practicum in Public Humanities.**

Practicums in public humanities provide practical, hands-on training that is essential for careers in museums, historic preservation, and cultural agencies. Students will work with faculty to find appropriate placements and negotiate a semester's or summer work, in general a specific project. Available only to students in the Public Humanities M.A. program.

**AMST 2685. Critical Approaches to Architectural Preservation and Cultural Heritage.**

This course examines the modern fields of preservation and cultural heritage from a historical and critical point of view to better understand their formation, evolution, current condition and the issues integral to their future. We explore such thorny topics as the "invention" of tradition and the relationship between heritage programs and nationalism, the evolution of the global cultural heritage industry, the story of preservation institutions in the United States and abroad, the rise of cultural heritage crimes in conflict zones, public history and memorials at "sites of conscience," and the emergence of digital preservation and "experimental preservation."

**AMST 2686. Creating a 21st Century Art and Design Museum: A Seminar and Laboratory.**

This graduate course could be an essential component of preparing yourself to advance your museum career. It combines a research seminar with travel to meet current museum leaders and a laboratory to shape the program of an emerging museum in a nearby community. By applying your previous experience you can help form the future of museums in this laboratory. This course examines the relevance of the museum concept, its history and current pressure/opportunities for museums to become even more appropriate to promoting scientific and cultural knowledge, understanding the human condition, our environment, and to become places of inspiration for all.

**AMST 2687. History & Heritage Organizations: Collaboration & Critique.**

In this course each student will engage closely with one cultural organization in the state of Rhode Island which has both a public mission and maintains collections related to history and heritage. Each student will write a profile of his/her chosen organization (history, collections, operations, etc.) through interviews and research; s/he will then collaborate with one or more other students to create an online exhibition using combined resources from their respective organizations; finally, s/he will critique the ways in which the organization fulfills or does not fulfill its stated mission in terms of current American Studies and public history frameworks.

**AMST 2688. Digital Archives and Digital Publics.**

This course considers the (perhaps surprisingly) long history of digital archives in the late twentieth and early twenty-first century, surveying various efforts of academic institutions, community organizers, activists, amateurs, and anarchists, examining digitized and "born-digital" materials, reflecting on relationships between ideas of cultural value and forms of materiality, technology, access, and dissemination. Particular attention will be paid to imagined audiences and uses of digital archives: scholarly, political, speculative, creative, memetic, and otherwise. This course provides students with opportunities to learn from archivists (and to visit local special collections on/off-campus) and to develop projects informed by best practices in digital public humanities.

**AMST 2689. Show Me the Money: Philanthropy and Civil Society.**

This course will engage students in the history, policy, practice of philanthropy as a significant dimension of American society/public humanities. A core theme: the relationship between philanthropy and the idea of civil society as the arena in which individuals and organizations contribute to the common good and address civic challenges. The course will: explore the impact and influence of philanthropy over time, examine the dynamics of difference, power, equity; will conclude with an investigation of changing values, trends in philanthropy, including critiques of inequality+practices of impact investing; focus on examples of relevance to public humanities and highlight the RI context.

**AMST 2690. Management of Cultural Institutions.**

This course explores public humanities institutions as an organizational system interacting with broader community systems. Students gain an understanding of the managerial, governance and financial structures of public humanities organizations and how those structures relate to mission, programming and audience. The course is designed to help those who work on the program side of public humanities and cultural non-profits (as educators, librarians, curators, interpreters, exhibit designers, public programming coordinators, and/or grant makers) engage more strategically with planning, organizational behavior, revenue generation, finance, marketing, and governance.

**AMST 2691. Poetry in Service to Schools and the Community.**

Poetry in service to the community honors a connection between poetry and wisdom, assumes that poetry is a wisdom medium (vehicle, vessel, conveyance) toward more enlightened thinking and practice. In this way, it is also an ideal medium for extending our study and practice beyond Brown, conducting workshops in schools, community centers, youth detention facilities and elsewhere. The class emphasizes community building, in teaching pairs and classes and workshops throughout Providence, in Renga and workshop groups. Poetry is the connective tissue; building relationships is at the heart of the practice. Students will write and teach. Enrollment limited to 16.

**AMST 2692. Digital Public Humanities.**

What is "digital humanities" and how does it impact and intersect with the field of public humanities? Digital humanities work involves new approaches to reading, writing, research, publication, and curation: digital tools help us examine digital and non-digital material in innovative ways, and digital modes of communication help us reach new and wider ranges of audiences. This course provides students with the opportunity to create digital projects and utilize digital tools to further their academic and professional interests.

**AMST 2693. Community Arts with Young People.**

Blurring the boundaries between artist and audience, practitioners of community arts have engaged underrepresented audiences who have traditionally relegated to more passive forms of participation, including young people with little access to arts education. This class provides students the opportunity to research and/or to conduct their own community arts projects with young people in Providence. Students will develop a deeper and more critical understanding of theorizing and implementing community arts projects with youth; will examine how to create pedagogic conditions with youth through the arts and humanities, as well as ways to systematically observe, document, and analyze these pedagogies. Enrollment limited to 15.

**AMST 2694. UnSettling Public Humanities.**

This course will decenter experiences and cultural expectations attendant to whiteness, cis-maleness, able-bodiedness, heterosexuality, and middle/upper-classness in the public humanities, and thereby explore the contemporary problems and possibilities of intersectional approaches in the field. What do contemporary paradigms of "diversity," "public engagement," and "cultural organizing" have to teach us about effective and ethical public humanities approaches? Do different, multiply marginalized communities of affinity practice entirely different public humanities? How are cultural interventions changing to accommodate the demands of an increasingly segmented public sphere?

**AMST 2695. Museum as Idea.**

What should museums be in the 21st ce? Are museums of today relevant to cultural historical, scientific, artistic, political and educational purposes? How can they provide more meaningful encounters with objects to inspire curiosity and to honor their creators? How can museums relate to their diverse communities today? Must they own objects to be museums? Growing from the historical basis for museum theory, We'll suggest alternative directions, create platforms for new perspectives. We'll rely on readings, discussion, and meetings with museum leaders, and on independent creative research. All will be challenged to invent their own concept of "museum". Enrollment limited to 12.

**AMST 2696. The Promise of Informal Learning.**

The course will take as its focus "Facilitated informal learning" - learning that happens outside of formal learning environments but is facilitated by an educator. It will explore facilitated informal learning within cultural institutions - museums, historic houses, zoos, libraries, science centers, children's museums. The course will explore the pedagogical methods, underlying philosophies and learning theories, audience, debates, and goals of facilitated informal learning today.

**AMST 2697. Museum Interpretation Practices.**

This course examines current interpretive practices and offers students the opportunity to participate in creating gallery interpretation for the museum context. Questions of material and form; models of attention and perception, the relationship between language and vision; the role of description in interpretation; and what constitutes learning through visual experience will be considered. Throughout the semester students will develop their interpretive practice through a series of workshops, exercises, site visits, and critical discussions. Enrollment limited to 15.

**AMST 2698. Critical Perspectives in Informal Learning.**

This course explores informal learning in multiple settings including art museums, historic houses, children's museums, and science centers. Students will consider definitions of, and goals for informal learning. Together we will investigate questions regarding the possibilities and challenges of informal learning and examine philosophical and practical questions such as: what are our goals – programmatic and pedagogic – as educators? How do we meet the needs of diverse audiences? How do we develop inclusive audience practices? This course will give students a firm grounding in the history and philosophy of informal learning as well as explore contemporary issues in the field.

**AMST 2699. Digital Storytelling.**

This course surveys the current state of digital storytelling, examining topics ranging from digital curation to data journalism to social media activism (and beyond). We will consider the narrative conventions, multimodal dimensions, and mechanics of a wide range of digital stories, carefully examining both the tools available to creators and the theoretical perspectives that motivate their authors. Students will determine best practices for digital storytelling projects through their engagement with course readings, their participation in in-class workshop sessions where we experiment with particular tools and publishing platforms, and their implementation of a digital storytelling project. Enrollment limited to 15.

**AMST 2760Z. African American Literature After 1965: Nationalism and Dissent (ENGL 2760Z).**

Interested students must register for ENGL 2760Z.

**AMST 2920. Independent Reading and Research.**

Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

**AMST 2921. Independent Reading and Research.**

Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

**AMST 2922. Independent Reading and Research.**

Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

**AMST 2923. Independent Reading and Research.**

Section numbers vary by instructor. Search Banner by instructor name to find the correct section number and CRN to use when registering for this course. You will need instructor permission to register and the course may be repeated with different instructors. Open to American Studies graduate students only. S/NC

**AMST 2950. Independent Reading and Research in Public Humanities.**

For MA in Public Humanities Students who wish to do independent reading and research.

**AMST 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**Ethnic Studies****ETHN 0066L. Beyond World Music: Singing and Language (ANTH 0066L).**

Interested students must register for ANTH 0066L.

**ETHN 0090A. The Border/La Frontera.**

We will examine the historical formation, contemporary reality and popular representation of the U.S.-Mexico border from a bilingual (English-Spanish), multicultural (U.S., Mexican, and Latino), and transnational perspective within the framework of globalization. We will explore the construction of border communities, lives and identities on both sides of the international divide, and pay particular attention to the movement of peoples in both directions. We will read materials, watch films, and conduct class discussions in English and Spanish. Comfort and reasonable proficiency in Spanish is required, but native command is not necessary. Enrollment limited to 19 first year students.

**ETHN 0090B. Critical Mixed Race Studies in the Twenty-First Century.**

This course will guide students through an understanding of the historical, contemporary, and ideological rationale behind the constructions of mixed race, and how mixed race theory plays out in history, art, and contemporary media. This course aims to expand the conversations of mixed race beyond the stereotypes of tragic mulattos and happy hapas, instead interrogating what mixed race looks like in the twenty-first century and what historical precedents can explain current phenomena.

**ETHN 0091. An Introduction to Africana Studies (AFRI 0090).**

Interested students must register for AFRI 0090.

**ETHN 0100. Introduction to Cultural Anthropology (ANTH 0100).**

Interested students must register for ANTH 0100.

**ETHN 0100V. Inventing Asian American Literature (ENGL 0100V).**

Interested students must register for ENGL 0100V.

**ETHN 0130. American Heritage: Democracy, Inequality, and Public Policy (SOC 0130).**

Interested students must register for SOC 0130.

**ETHN 0190A. Islands of Empire: Sounds and Silences.**

A mural painted on a cement wall in Old San Juan, Puerto Rico greets you with, "Welcome to the oldest colony." In five words, this small portion of the mural speaks to a legacy of empire and colonialism. This course brings Puerto Rico in dialogue with other past/present U.S. colonies and neocolonies such as Cuba, Dominican Republic, Guam, Philippines, and Hawai'i and their diasporas. Listening to spoken word, murals, music, oral histories, podcasts, and other mediums of sound and silence, we examine themes of race, sovereignty, colonialism, and empire across new geographic re-imaginings.

**ETHN 0190B. Bad Capital: Race, Technology, and Asian/America.**

How do representations of Asians and Asian Americans reinforce systems of Orientalism, capitalism, and colonialism in the U.S. and beyond? Through film, literature, and theory, this course aims to examine representations of Asian/American labor, capital, and consumption against the historical backdrop of the evolving U.S. political economy. Tracing historical representations of post-Emancipation Asian "coolie" laborers to contemporary anxieties surrounding Chinese surveillance, Indian tech outsourcing, and Japanese manufacturing, this course aims to unpack cultural representations of Asian/Americans at the intersections of Orientalism, capitalism, and technology.

**ETHN 0190C. American (Mass)cultinities: Sexuality, Race and Aesthetics (AMST 0190C).**

Interested students must register for AMST 0190C.

**ETHN 0190E. It's the End of the World As We Know It: Zombie and Apocalypse Narratives in Pop Culture (AMST0190E).**

Interested students must register for AMST 0190E.

**ETHN 0190F. Beyond the Tourist Trap: The Past, Present, and Future of Asian American Urban Spaces (AMST 0190F).**

Interested students must register for AMST 0190F.

**ETHN 0190G. The Fringe is the Fabric: Anti-Immigrant Movements in the United States (AMST 0190G).**

Interested students must register for AMST 0190G.

**ETHN 0190X. Gendered Mobility: Migrant Women Workers in a Globalized Economy (AMST 0190X).**

Interested students must register for AMST 0190X.

**ETHN 0191P. Beyond Chinatown: The Past, Present, and Future of Asian American Spaces (AMST 0191P).**

Interested students must register for AMST 0191P.

**ETHN 0201G. Killing them Softly: Satire and Stereotype in African-American Literature (ENGL 0201G).**

Interested students must register for ENGL 0201G.

**ETHN 0210. Blacks in Latin American History and Society (AFRI 0210).**

Interested students must register for AFRI 0210.

**ETHN 0290D. Women, Sex and Gender in Islam (RELS 0290D).**

Interested students must register for RELS 0290D.

**ETHN 0300. Ethnic Writing.**

This course will explore the idea of "ethnic writing" in both theory and practice. Students will examine how writers draw upon race and ethnicity (not always their own) to produce creative works and will then put these ideas in practice in their own writing, including but not limited to fiction, poetry, memoir, and inter-genre work. Interested students should attend the first session prepared for an in-class exercise that will determine attendance. Enrollment limited to 17. Instructor permission required. S/NC.

**ETHN 0301. Culture and Health (ANTH 0300).**

Interested students must register for ANTH 0300.

**ETHN 0510F. Che Guevara, The Man and the Myths (COLT 0510F).**

Interested students must register for COLT 0510F.

**ETHN 0600. Introduction to Native and Indigenous Literatures (ENGL 0511G).**

Interested students must register for ENGL 0511G.

**ETHN 0610. Black Student Protest from Jim Crow to the Present (AFRI 0610).**

Interested students must register for AFRI 0610.

**ETHN 0700E. Postcolonial Literature (ENGL 0700E).**

Interested students must register for ENGL 0700E.

**ETHN 0710B. Ethics of Black Power (AFRI 0710B).**

Interested students must register for AFRI 0710B.

**ETHN 0710F. Being There: Bearing Witness in Modern Times (ENGL 0710F).**

Interested students must register for ENGL 0710F.

**ETHN 0710J. Introduction to Asian American Literature (ENGL 0710J).**

Interested students must register for ENGL 0710J.

**ETHN 0750B. Hispanics in the United States (HISP 0750B).**

Interested students must register for HISP 0750B.

**ETHN 0790B. Native Americans and the Media.**

This course explores the ways in which Indigenous Americans have been constructed in the White American imagination and through self-representation from Frontier phase of American history, through contemporary images in American popular culture and media. Through films created about, and later by, Native people we will explore the evolution of the image of Native American in America culture.

**ETHN 0790C. Theory Into Practice: Service Learning at a Dual Language Charter School.**

Students will explore Dual Language (Two-Way Immersion; Bilingual) education through a variety of activities, using the service-learning model. Students will contribute at least 2 hours per week at the International Charter School (K-5), and another two hours in seminar at Brown University in conversation about readings, service, and politics pertaining to Two-Way Immersion education.

**ETHN 0790D. Race and Remembering.**

This course will explore struggles for power over narrating history and engages current tensions in public history and national memory. Together students will consider ongoing struggles to reckon with the violent histories of slavery, empire, colonialism, nationalism, and democracy in the US. Students will engage questions regarding remembering, forgetting, memorializing, and reckoning with histories of racial formation and violence. What are the methodological and narrative pitfalls of representing these histories? What are the possibilities for reckoning with violent histories? This course will concentrated on the Americas, but will also incorporate global understanding of legacies of narrative and memory.

**ETHN 0810. Belonging and Displacement: Cross-Cultural Identities (POBS 0810).**

Interested students must register for POBS 0810.

**ETHN 0820G. Race and Political Representation (POLS 0820G).**

Interested students must register for POLS 0820G.

**ETHN 0880. Hip Hop Music and Cultures.**

Interested students must register for AFRI 0880 S01 (CRN 27044).

**ETHN 0900. Introduction to Deaf Studies (SIGN 0900).**

Interested students must register for SIGN 0900.

**ETHN 0901I. Body Count: Technologies of Life and Death (MCM 0901I).**

Interested students must register for MCM 0901I.

**ETHN 0901L. African American Media Visibility: Image, Culture, Crisis (MCM 0901L).**

Interested students must register for MCM 0901L.

**ETHN 0980. The Research Process: Qualitative and Ethnographic Methods.**

Paying attention to methodology and research design can enhance the capacity of research in any field and contribute to knowledge production. The purpose of this seminar is to introduce students to a variety of social science research methods with an emphasis on ethnographic, mixed-methods research (research-design, data-collection, and data analysis). Social science research is a craft, and like any other craft, it takes practice to do it well. This seminar emphasizes a "hands-on," "applied," and/or practical approach to learning. The course is suited to students who have an on-going research project they plan to pursue throughout the semester. Enrollment limited to 20.

**ETHN 0990. Black Lavender: Black Gay/Lesbian Plays/Dramatic Constructions in the American Theatre (AFRI 0990).**

Interested students must register for AFRI 0990.

**ETHN 1000. Introduction to American/Ethnic Studies.**

Considers the U.S. as a society whose unifying identity is rooted in ethnic and racial diversity. Explores the historical and contemporary experiences of racial and ethnic groups in this country and analyzes different forms of representation of those experiences, as well as representations of the racial and ethnic stratification in the U.S. imagination.

**ETHN 1020. Race and Language in the United States.**

This course will examine the role of language in the social construction of race, racism and racial identity. We will address the different language issues facing African Americans, Latinos/as, Asian Americans, Native Americans, and speakers of "accented" English. We will explore current issues such as the Oakland Ebonics case, English- Only legislation, bilingualism, and hate speech vs. free speech.

**ETHN 1020C. The Afro-Luso-Brazilian Triangle (AFRI 1020C).**

Interested students must register for AFRI 1020C.

**ETHN 1050. Race in the Americas.**

This class will explore issues of race, racial identity construction, and racism throughout Central and Latin America (including the Caribbean). This is a class in comparative race relations that covers peoples of African, Asian, Native, and European descent. Topics covered include: miscegenation, diaspora, space, socioeconomic inequality, and nation building. Previous coursework in Ethnic Studies or similar suggested.

**ETHN 1051. History of African-American Education (EDUC 1050).**

Interested students must register for EDUC 1050.

**ETHN 1060E. West African Writers and Political Kingdom (AFRI 1060E).**

Interested students must register for AFRI 1060E.

**ETHN 1060I. Africana Philosophy of Religion (AFRI 1060I).**

Interested students must register for AFRI 1060I.

**ETHN 1070. Ethnic Studies Practicum: Strategy, Tactics and Tools for Social Change.**

This is an academic and reflective practicum on the politics and processes of social justice organizing. Students will learn about the historical and political evolution of organizing, the connection between organizing and ideology/vision, concrete tools and tactics used in the strategies of social justice organizing, and elements of running non-profit organizations. This course will require, equally, academic vigor, personal leadership and involvement, and introspective analysis. Students will be required to intern at a local organization in Providence, and reflect on their involvement utilizing the theories and discussions gained through the classroom. This course will also explore connections between local, national, and international movement-building. In keeping with this course's commitment to real-life organizing examples and experience, course instructors and guest speakers are themselves experienced organizers and Executive Directors of social change organizations. This will be a small class with preference given to students with some experience in community, student/youth, and/or labor organizing. Permission of instructors required: contact sara@daretowin.org or koheishihara@gmail.com.

**ETHN 1071. China Modern: An Introduction to the Literature of Twentieth-Century China (EAST 1070).**

Interested students must register for EAST 1070.

**ETHN 1090. Black Freedom Struggle Since 1945 (AFRI 1090).**

Interested students must register for AFRI 1090.

**ETHN 1100. Korean Culture and Film (EAST 1100).**

Interested students must register for EAST 1100.

**ETHN 1110. Voices Beneath the Veil (AFRI 1110).**

Interested students must register for AFRI 1110.

**ETHN 1111. African Issues in Anthropological Perspective (ANTH 1110).**

Interested students must register for ANTH 1110.

**ETHN 1123. Native North Americans in the Twenty-first Century (ANTH 1123).**

Interested students must register for ANTH 1123.

**ETHN 1133. Ethnonationalism- The Asian Arena (ANTH 1133).**

Interested students must register for ANTH 1133.

**ETHN 1170. African American Women's History (AFRI 1170).**

Interested students must register for AFRI 1170.

**ETHN 1200B. Contemporary Indigenous Education in North America.**

In the past, formalized schooling in Indigenous communities was a tool of colonization and cultural genocide, forcing Native peoples to assimilate to western norms, values, and knowledge. However, contemporary Indigenous communities have managed to reclaim and reshape education for Native youth, utilizing innovative methods and technologies, as well as drawing upon generations of traditional and indigenous knowledges to create environments that promote academic achievement alongside culture. In this course we will focus on the ways Native communities are asserting their educational sovereignty, through culturally-relevant/responsive curriculums, language immersion schools, indigenous charter schools, traditional ecological and scientific knowledges, and more.

**ETHN 1200C. Introduction to Asian American Studies.**

This course provides an introduction to major issues and formative historical moments within the field of Asian American Studies. Course readings are highly interdisciplinary drawing from scholarship in history, literature, sociology and political science. This course spans multiple historical moments beginning in the mid-1800s and continuing through the present. Topics covered include Asian immigrant and refugee experiences, the movement for Asian American Studies, the construction of an Asian American pan-ethnic identity, community political mobilization and efforts to combat Islamophobia and anti-Asian violence.

**ETHN 1200D. Latinx Literature.**

This course will introduce students to a broad array of Latina/o literature-fiction, poetry, drama, and graphic novels. While there is a long tradition of Latina/o literature in the United States, we will focus primarily on a period from 1985 to the present. Aimed to familiarize students with debates in the field, the readings will also include critical essays. Enrollment limited to 15.

**ETHN 1200F. The Mexican Revolution (HIST 1333).**

Interested students must register for HIST 1333.

**ETHN 1200G. Introduction to Latina/o/x Cultural Studies.**

This course serves as an introduction to the many discourses that structure and challenge what it means to be Latina/o/x in the United States. Through historically situated critical analysis of Latina/o/x cultural production, including theoretical essays, literature, and film, we will meditate on the major issues that shape the Latina/o/x experience. We will study how *Latinidad*—the sense of being Latina/o/x—is constructed as an identity and how that identity varies across origin, place, and time. Major themes we will explore include the legacies of U.S. colonialism; cultural nationalism, citizenship, immigration and exile; labor and class; race and ethnicity; and gender and sexuality.

**ETHN 1200H. Race, Class, and Ethnicity in the Modern World (SOC 1270).**

Interested students must register for SOC 1270.

**ETHN 1200I. History and Resistance in Representations of Native Peoples.**

Throughout history, Native peoples have been portrayed through a stock set of stereotypes such as savage warriors, Indian princesses, or mystical shamans. These images surround us in advertising, news media, Hollywood, sports mascots, and Halloween costumes. This course will examine the foundations of these representations and their connections to colonization, with a focus on contemporary and ongoing examples, from Johnny Depp's *Tonto*, *Urban Outfitters'* "Navajo" products, to JK Rowling's "History of Magic in North America," with a focus on the ways Native peoples are taking back and reshaping Native representations through activism, social media, art, design, film, and more.

**ETHN 1200J. Asian Americans and the Struggle for Social Justice.**

In 1868, in the largest strike that America had ever seen, ten thousand Chinese workers struck Central Pacific Railroad. One hundred and fifty years later, Asian Americans, now stereotyped as the "model minority," are rendered invisible in current struggles for social justice. Yet as railroad workers, laundrymen, farmworkers, draft resisters, sewing women and nurses, Asian Americans have left us a rich legacy of legal, social and political activism. Particular attention will be paid to solidarities across racial, gender, and national boundaries.

**ETHN 1200K. Introduction to American Indian Studies.**

This class examines the politics, cultures, histories, representations, and study of the Native peoples of North America, with a primary focus on the United States. Although broad in cultural and geographic scope, the course does not attempt to summarize the diverse cultures of the several hundred Native groups of the continent. Instead, we will focus on several key issues in the lives of, and scholarship about, American Indian/Native American/First Nations/Indigenous peoples in the US. The course will consist of lecture on Monday and Wednesday, and once a week section meetings for discussion.

**ETHN 1200L. Introduction to Latinx History.**

The Latinx population in the United States continues to be mischaracterized in popular culture, political debates, and in the media. How can one discuss a group as diverse as Mexican Americans, Dominican Americans, Cuban Americans, Puerto Ricans, and, most recently, Americans from Central America? Students will explore key moments of racial formation and state policies, social phenomena, and social revolutions that influence the daily life of Latinx communities in the US and in US territories. Students will analyze cultural texts and social policies and will develop a facility with key concepts in the field.

**ETHN 1200X. Black Speculative Fiction: World-Making + Alternative Universes, Science Fiction + Fantasy (AFRI 1100X).**

Interested students must register for AFRI 1100X.

**ETHN 1201C. Imagined Networks, Glocal Connections (MCM 1201C).**  
Interested students must register for MCM 1201C.

**ETHN 1210. Afro-Brazilians and the Brazilian Polity (AFRI 1210).**  
Interested students must register for AFRI 1210.

**ETHN 1250. Twentieth-Century Western Theatre and Performance (TAPS 1250).**  
Interested students must register for TAPS 1250.

**ETHN 1251. Violence and the Media (ANTH 1251).**  
Interested students must register for ANTH 1251.

**ETHN 1255. Anthropology of Disasters (ANTH 1255).**  
Interested students must register for ANTH 1255.

**ETHN 1260. The Organizing Tradition of the Southern Civil Rights Movement (AFRI 1260).**  
Interested students must register for AFRI 1260.

**ETHN 1270. Race, Class, and Ethnicity in the Modern World (SOC 1270).**  
Interested students must register for SOC 1270.

**ETHN 1271. Performances in the Asias (TAPS 1270).**  
Interested students must register for TAPS 1270.

**ETHN 1310. African American Politics (POLS 1310).**  
Interested students must register for POLS 1310.

**ETHN 1311. International Health: Anthropological Perspectives (ANTH 1310).**  
Interested students must register for ANTH 1310.

**ETHN 1320. Anthropology and International Development: Ethnographic Perspectives on Poverty/Progress (ANTH1320).**  
Interested students must register for ANTH 1320.

**ETHN 1360. Africana Studies: Knowledge, Texts and Methodology (AFRI 1360).**  
Interested students must register for AFRI 1360.

**ETHN 1411. Nations within States (ANTH 1411).**  
Interested students must register for ANTH 1411.

**ETHN 1421. Ethnic American Folklore: Continuity and the Creative Process (ANTH 1421).**  
Interested students must register for ANTH 1421.

**ETHN 1430. The Psychology of Race, Class, and Gender (EDUC 1430).**  
Interested students must register for EDUC 1430.

**ETHN 1440. Theorizing the Black Diaspora (AFRI 1440).**  
Interested students must register for AFRI 1440.

**ETHN 1500. Mellon Mays Research Seminar.**  
This seminar is a required course for Mellon Mays Fellows with Junior standing. Topics will include research methods; health and wellness in the pursuit of scholarship; barriers to success; and cohort peer review. The outcome of this course will be a completed research plan, literature review and thesis proposal. Open to juniors who have already been accepted into the MMUF program. Instructor permission. Grade option S/NC.

**ETHN 1600C. Cross-Cultural Perspectives on Education: Education and the Portuguese-Speaking World (POBS 1600C).**  
Interested students must register for POBS 1600C.

**ETHN 1611M. Trauma and the Shame of the Unspeakable: The Holocaust, Slavery, Childhood Sexual Abuse (AMST 1611M).**  
Interested students must register for AMST 1611M.

**ETHN 1611W. Asian Americans and Popular Culture (AMST 1611W).**  
Interested students must register for AMST 1611W.

**ETHN 1611Z. The Century of Immigration (AMST 1611Z).**  
Interested students must register for AMST 1611Z.

**ETHN 1623. Archaeology of Death (ANTH 1623).**  
Interested students must register for ANTH 1623.

**ETHN 1624. Indians, Colonists, and Africans in New England (ANTH 1624).**  
Interested students must register for ANTH 1624.

**ETHN 1625. Questions of Remembrance: Archaeological Perspectives on Slavery in the New World (ANTH 1625).**  
Interested students must register for ANTH 1625.

**ETHN 1630. Performativity and the Body: Staging Gender, Staging Race (TAPS 1630).**  
Interested students must register for TAPS 1630.

**ETHN 1650B. Asian Americans and the Racial State: Exclusion and Incarceration.**  
The exclusion of Chinese from naturalization and immigration (from 1870 to 1943) and the wholesale incarceration of Japanese Americans during WWII remain important touchstones for thinking about the Asian American experience and lenses through which to examine current struggles over immigration, mass incarceration and race in North America.

**ETHN 1650C. Fictions of Queer Race.**  
What fictions do we tell ourselves about sexuality and race? Through literature and film, this course introduces students to queer of color critique, a mode of queer theory emphasizing diverse experiences, geographies, and epistemologies that also foregrounds the intersection of sexual and racial constructs. The course highlights important questions about the representational politics and social dynamics of the intersection of sexuality, gender, race, and nationality. What is "queer" art? How can we queer ethnic literature? What is a queer diaspora? How should we articulate coalition building?

**ETHN 1650D. Research and Transnational Communities: Qualitative Fieldwork Methods (AMST 1500A).**  
Interested students must register for AMST 1500A.

**ETHN 1650F. Mapping Violence.**  
Mapping Violence is a research project that aims to expose interconnected histories of violence, the legacies of colonization, slavery, and genocide that intersect in Texas in the early twentieth century. Although often segregated in academic studies, these histories coalesced geographically and temporally. Students in this course will learn interdisciplinary methods combining ethnic studies, history, public humanities and the digital humanities to rethink the limits of archival research, historical narrative, and methods for presenting findings to public audiences. This research intensive seminar will allow students to develop historical research skills and to contribute original research to the Mapping Violence project.

**ETHN 1650G. Reading Closely.**  
We experience the world in and through language, or, as Jacques Derrida famously noted, there is nothing outside of the text. This is a course designed to introduce you to and/or sharpen your close reading skills. The phrase "close reading" has its origins in literary studies, but it is a methodological tool that can help you unlock any number of written texts and oral speech acts. In an era of "fake news" and near constant assertion with little substantiation of arguments, we more than ever need to be close readers of complex and seemingly simple speech acts.

**ETHN 1670. Latino/a Theatre and Performance (TAPS 1670).**  
Interested students must register for TAPS 1670.

**ETHN 1700. The Asian American Experience in Higher Education (EDUC 1700).**  
Interested students must register for EDUC 1700.

**ETHN 1710I. Harlem Renaissance: The Politics of Culture (ENGL 1710I).**  
Interested students must register for ENGL 1710I.

**ETHN 1710J. African Literature in Globalization Time (ENGL 1710J).**  
Interested students must register for ENGL 1710J.

**ETHN 1710M. Nationalizing Narratives: Race, Nationalism, and the 20th-C. American Novel (ENGL 1710M).**  
Interested students must register for ENGL 1710M.

**ETHN 1750A. Immigrant Social Movements: Bridging Theory and Practice.**

What is the impact of legal status on the potential for undocumented individuals' participation in a social movement? Relatedly, how is the heterogeneity of movement participants represented in campaigns and political protest? In this course we will examine the undocumented immigrant movement in the United States today through readings, films and guest lectures from local immigrant rights activists. As part of the course students will be partnered with local community based organizations where they will complete a semester-long internship.

**ETHN 1750B. Treaty Rights and Food Fights: Eating Local in Indian Country.**

In many Native American communities the push to "eat local" is often based on reviving a traditional food culture as well as a way of promoting better health. This class explores the disparate health conditions faced by Native communities, and the efforts by many groups to address these health problems through increasing community access to traditional foods, whether by gardening projects or a revival of hunting and fishing traditions. We will examine the ways in which Native food movements have converged and diverged from general American local food movements, and the struggles they often face in reviving treaty-guaranteed food ways.

**ETHN 1750D. Transpacific Asian American Studies.**

This is an advanced undergraduate seminar that is also open to American Studies and other graduate students for graduate credit. It is designed to help us think about the Pacific as a historical space where the Asian American formation is constructed, as goods, people and ideas circulate across the Pacific. We will explore ways which these historical circuits and exchanges have shaped questions of identity and belonging, taking China and the Americas as our principal points of connection. We will read across a number of fields, including: Asian Studies, American Studies, Asian American Studies, Latin American and Caribbean Studies.

**ETHN 1750E. Transpacific Popular Culture.**

In this seminar we will look at the relationship between American wars of empire, urban uprising, martial arts, and hip hop to illuminate the deep circuits of race, migration, labor and popular culture across the Pacific.

**ETHN 1750G. Introduction to Ethnomusicology (MUSC 1900).**

Interested students must register for MUSC 1900.

**ETHN 1750H. Water is Life/New currents in the Study of Land, Water, and Indigeneity.**

In this course, we'll think conceptually about water. We'll look to work in Native and Indigenous Studies, Pacific Studies, and American Studies to see how reframing popular understandings of water and space can radically alter our engagement with questions of geography, imperialism, colonialism, and globalization. For instance, how is our understanding of settler colonialism limited through a land-focused approach? How might our vision of the global world change when we center island nations? Using literary, theoretical, and historical texts we'll use a focus on water to upend common approaches to space and see what emerges. Registration permission granted based on questionnaire distributed at first class meeting.

**ETHN 1750I. Indigeneity, Sustainability and Resistance in Food Politics.**

This course explores Western and Indigenous understandings of food security/sovereignty, with particular attention to the politics of food and sustainability. In this course, we will study food security from its origins, policy making, to current debates about alternative Indigenous food systems, drawing on many examples and using New Zealand, Peru, and the U.S.A as case studies. The course intends to ground discussion about the contemporary context of food security, including debates over the existing food regimes (neoliberal and capitalism), agrarian/food sovereignty movements, and implications of the right to food from both human and cultural right perspectives.

**ETHN 1750J. American Roots Music (MUSC 1932).**

Interested students must register for MUSC 1932.

**ETHN 1750K. U.S.-Mexico Borderlands (INTL 1803S).**

Interested students must register for INTL 1803S.

**ETHN 1750L. Latina Feminisms.**

This course will serve as a focused and rigorous exploration of Latina feminist cultural production. Our analysis driven seminar discussions will include critical consideration of novels, short stories, film, and performance and visual art largely by and about Latina women. Their work will address topics that include: gendered expectations, non-normative sexuality, race hierarchies, labor, reproductive justice, and gendered violence. Together we will query how cultural objects come to function as salient social and political texts in order to ascertain the contributions and challenges that Latina feminists bring to dominant discourses of race, gender, sexuality, and nationalism, among others.

**ETHN 1750M. Extravagant Texts: Reading the World Through Asian American Literature.**

In this course we study a body of writings that self-consciously move beyond the topics and genres with which Asian American literature has traditionally been associated—that are, in Maxine Hong's Kingston's formulation, "extravagant." We explore works that adopt a transnational or diasporic perspective and that are written in such genres as magical realism, speculative fiction, experimental poetry, and plays. In addition to more conventional concerns like racism or immigration, these works also address such issues as empire, war, environmentalism mixed-race identity, adoption, and sexuality.

**ETHN 1750N. Musical Youth Cultures (MUSC 1925).**

Interested students must register for MUSC 1925.

**ETHN 1750P. Art for an Undivided Earth / Transnational Approaches to Indigenous Art and Activism(ENGL 1711J).**

Interested students must register for ENGL 1711J.

**ETHN 1750Q. The African Atlantic Diaspora: Race, Memory, Identity, and Belonging.**

This course will examine conceptual frameworks on notions of 'Blackness' across the African Atlantic Diaspora. We will examine the ways in which blackness is viewed individually and collectively by groups. In the beginning of the course students will read academic texts, view documentaries and engage in discussions that focus on concepts of race, memory, identity formation and belonging. The course consists of a travel component to Ghana in West Africa. In Ghana students will explore parts of the history that has shaped the present day diasporan community through a series of faculty led workshops, tours and meetings with local organizations.

**ETHN 1750R. Latina/o Cultural Theory (AMST 1900I).**

Interested students must register for AMST 1900I.

**ETHN 1750S. Extravagant Texts: Reading the World Through Asian American Literature.**

In this course we study a body of writings that self-consciously move beyond the topics and genres with which Asian American literature has traditionally been associated—that are, in Maxine Hong's Kingston's formulation, "extravagant." We explore works that adopt a transnational or diasporic perspective and that are written in such genres as magical realism, speculative fiction, and poetry. In addition to more conventional concerns like racism or immigration, these works also address such issues as empire, war, mixed-race identity, environmentalism, adoption, and sexuality.

**ETHN 1750T. U.S.-Mexico Borderlands (INTL 1803S).**

Interested students must register for INTL 1803S.

**ETHN 1750U. The U.S.-Mexico Border and Borderlands: Experiential Learning on the Ground and in the Field.**

In an intensive three week study, in the classroom and most of all, on the ground and in the field, we will attempt to achieve a real and realistic understanding of what exactly is the U.S.-Mexico border and the regions along the border on both sides, the borderlands, stretching from the Pacific to the Atlantic. Focus on Mexicans and Mexican descendants on the border, but also on original native peoples and immigrants from elsewhere (Chinese, Haitians, Iraqis). Preference to upperclass students with no prior encounter with the border. Knowledge of Spanish is desirable but not required. Students in this intensive wintersession course will have pre-course assignments in Dec. and must arrive on campus no later than 1/2 at noon, as the course will begin with dinner on 1/2 and class will begin at 9am on 1/3. Students will leave from Pvd to San Diego on 1/6, and depart late on the 16th. Class will be held in Pvd from noon 1/17 to 5pm on 1/18.

**ETHN 1750V. Ethnic Studies & Education (EDUC 1520).**  
Interested students must register for EDUC 1520.

**ETHN 1750W. The Korean War in Color (ENGL 1761V).**  
Interested students must register for ENGL 1761V.

**ETHN 1750X. Native American Language Loss, Revitalization, and Resiliency.**

This class examines the issues of Native languages, primarily in the United States. The course will study the variety of languages in North America, the factors that have negatively affected the strength and use of native languages in many tribes, the impact of such loss on communities, and the ways in which those communities have worked hard to maintain, revitalize, or reclaim their languages.

**ETHN 1760P. "Extravagant" Texts: Experiments in Asian American Writing (ENGL 1760P).**  
Interested students must register for ENGL 1760P.

**ETHN 1761V. The Korean War in Color (ENGL 1761V).**  
Interested students must register for ENGL 1761V.

**ETHN 1800. Honors Seminar (AMST 1800).**  
Interested students must register for AMST 1800.

**ETHN 1805. First Nations: the People and Cultures of Native North America to 1800 (HIST 1805).**  
Interested students must register for HIST 1805.

**ETHN 1810. Language and Power (ANTH 1810).**  
Interested students must register for ANTH 1810.

**ETHN 1810G. Fiction and History (COLT 1810G).**  
Interested students must register for COLT 1810G.

**ETHN 1811D. Reading Revolution, Representations of Cuba, 1959-The Present (COLT 1811D).**  
Interested students must register for COLT 1811D.

**ETHN 1812V. War, Anti-War, Postwar: Culture and Contestation in the Americas (COLT 1812V).**  
Interested students must register for COLT 1812V.

**ETHN 1870A. Ethnic Los Angeles.**  
This course will focus on the historical and contemporary struggles of people of color in Los Angeles, California, throughout the twentieth century. We will take an interdisciplinary approach, examining films, literature, and history pertaining to the city. There are no prerequisites. Enrollment limited to 20.

**ETHN 1870B. Latino/a Communities Seminar.**  
This seminar's first goal is to introduce students to the social and economic issues that affect contemporary Latino communities. The second goal is to train the students in empirical fieldwork research methods in Ethnic Studies. The seminar searches for ways to link the academy and communities through empirical research that addresses the needs and demands of Latino/a urban communities.

**ETHN 1870C. Native North Americans in the Media: Representations and Self Representations in Film.**

How have Native North American peoples been represented and self-represented in film from the early 1900s to today? Filmmaking is employed to explore the construction and stereotyping of Indigenous peoples of North America in American popular culture, as well as the recent (re)construction of Native identities by American Indian peoples. Specific topics including identity, race, gender, violence, religion and spirituality, cultural appropriation, and Native humor frame the analysis and comparison of American popular and Native representations of Native Americans. The course centers on the screening and discussion of selected movies, complemented by academic and non-academic literature in the form of books, articles, reviews, and other media materials. Completion of introductory courses on Native American peoples and cultures is strongly recommended.

**ETHN 1870D. Chicana/o Fiction.**

This course is a survey of Chicana/o fiction from the 1950s to the present. We will be reading novels as well as stories, with the occasional inclusion of poetry. Our literary texts will be supplemented with secondary sources--history, literary criticism, cultural studies, and the like. The course will also ask students to consider the relationship between Chicana/o literature and other writing in the Americas.

**ETHN 1870E. Queer Latina/o Literature and Theory.**  
Enrollment limited to 20.

**ETHN 1870F. Eating Cultures.**  
Enrollment limited to 20.

**ETHN 1870G. Reading Race: Advanced Seminar in Critical Race Theory.**  
Enrollment limited to 20.

**ETHN 1890A. Seminar on Latino Politics in the United States.**  
Advanced seminar on the politics of Latino communities in the United States. Considers the history of Latino politics; participation, partisanship and office-holding; immigration and citizenship; social movements; public policy; gender and race; and pan-ethnic identity. Advanced undergraduate and graduate students. Includes optional community research project. Some familiarity with Latino studies, U.S. politics, Latin American politics, or ethnic studies would be helpful.

**ETHN 1890B. Native American and European Contact in Early North America, ca. 1600-1750.**

This course will consider contact between Native Americans and Europeans in the early Americas with particular attention to interactions in the greater New England area. Readings stress the diversity of Native lifeways and how contact changed both Natives and Europeans. An equally important theme is to examine the ways in which the history of Native peoples has often been ignored, changed, appropriated, and distorted, as well as reclaimed and re-evaluated over time. Therefore, while the focus is on the seventeenth and eighteenth centuries, the class will also consider how the histories of that time have been told and retold in later eras, including our own. We will also pay attention to the way in which different historians undertake the study of the past. This seminar has no prerequisites, but please be advised that the workload is substantial. If the class is oversubscribed, preference will be given to Ethnic Studies concentrators.

**ETHN 1890C. Business, Culture, and Globalization: An Ethnographic Perspective.**

The exchange of goods, resources, or commodities is commonly understood as business transactions. Business transactions have always been global, but in the new information age, it seems that many can take part in this exchange system. What is termed as "globalization" has become increasingly popular, yet efforts to clearly define what the term actually means continue to change. This course aims at complicating, rather than simplifying, the term and to understand how business transactions unfold in a "global" economy.

**ETHN 1890D. Indigenous Music of the Americas.**

Introduces students to music of indigenous communities in North, Central, and South America, with particular attention to the relation between performance, cultural identity, and social change. We will focus especially on indigenous societies in the Andes, Brazil, and the United States and Canada. The course is designed to explore common links between indigenous history, worldview, and performance throughout the hemisphere, while simultaneously illuminating how distinct experiences of colonization and recovery have fostered unique musical practices.

**ETHN 1890E. Johnny, Are You Queer: Narratives of Race and Sexuality.**

This course is intended as a wide-ranging romp through the fields of queer theory and narratives of race and sexuality. It will move from the 1980s through the present looking at representations of queerness and race in poetry, fiction, creative non-fiction, music, etc. We will investigate the convergences and divergences in the discourses of race and sexuality.

**ETHN 1890F. Bad Boys and Bad Girls in Asian American Literature and Culture.**

From the angry Asian men of the "Aiiieeeee!" anthologies to Margaret Cho's raucous comedy acts, bad boys and bad girls in Asian American literature and culture have been interpreted as helping to shatter the model minority stereotype. This course examines bad subjects, especially in their relations to popular culture, gender, and sexuality. We will investigate what puts the "bad" in bad boys and bad girls, how ideas of "bad" change, and what the bad subject does for readers and writers. Readings and viewings to include Frank Chin, John Okada, Gish Jen, Margaret Cho, *Harold & Kumar Go to White Castle*, *Better Luck Tomorrow*. Enrollment limited to 20.

**ETHN 1890G. Native Americans in the Media: Representation and Self-Representation on Film.**

How have Native North American peoples been represented and self-represented in film? Specific topics include identity, race, gender, violence, religion and spirituality, cultural appropriation, and Native humor frame the analysis and comparison of American popular and Native representations of Native Americans. The course centers on screening and discussing selected movies, complemented by academic and non-academic literature such as books, articles, and reviews. Completion of introductory courses on Native American cultures is recommended, but not necessary. All students are welcome. Enrollment limited to 20.

**ETHN 1890J. Native American Environmental Health Movements.**

American Indian reservations are home to countless sources of environmental contamination, which impact residents' health and ability to maintain cultural practices. In response to this assault, and the numerous scientific studies that often follow, Native communities are taking charge of the research process, and partnering with scientists to explore health affects and remediation possibilities. Through case studies, we will examine how Native communities are pushing to "indigenize" the research process. This class is broadly interdisciplinary, and will be useful for students interested in contemporary issues in Native American communities, and students intending to conduct scientific research in minority communities. Enrollment limited to 20.

**ETHN 1890K. Engendering Empire.**

This class studies the ways in which empire is a gendered construct. We will also keep in mind that gender never exists in isolation, but on the contrary is always on the crossroads with race, class, and ethnicity. How have brown and black women's bodies borne the mark of empire? This class will closely examine the relationship between empire and gender, specifically this class will discuss this relationship as it has developed in the Americas.

**ETHN 1890L. (De)Colonizing Women: Writing the Third Space.**

As women of color, we are in the intersections of race, gender, and class. A feminist movement that does not incorporate analyses of race and class cannot meet our needs. A civil rights movement that does not address gender cannot meet our needs; therefore, we create our own space -- a third space. This course reads the literature, poetry, film and theory of third space feminism in the United States. Enrollment limited to 20.

**ETHN 1890N. Thawing the "Frozen Indian"; American Indian Museum Representation.**

This course examines the role of museums as sites where issues of identity, memory, place, and power intersect. We will review the histories, theories and paradigms that have influenced collecting processes and exhibitions, focusing on representations of Native American Indian peoples. We will explore the ways in which Native people have spoken out against conventional museum practice and have sought to reshape it as a means of decolonizing their history, as well as utilizing museums to their benefit to both preserve and promote Native art and culture. How can non-Native scholars and museum professionals contribute to this effort? Enrollment limited to 15.

**ETHN 1890P. Introduction to Native American Literature.**

This survey course introduces several prominent genres of Native American literary production, including oral traditions, nonfiction essay, novel, short story, and stand-up comedy/performance. Selections are drawn primarily from Native American/Aboriginal writers and performers in the United States and Canada from the nineteenth century to present, including indigenous women from Pacific Islander communities. In addition to genre considerations, particular attention will be given to the social, cultural, and political contexts in which these works were produced.

**ETHN 1890Q. The Hispanic Caribbean and its Diasporas.**

The purpose of this course is to examine the history and cultures of the Hispanic Caribbean. An enduring feature of the region as a whole is its cultural diversity and vitality. Perhaps to a degree unsurpassed among world regions, the Caribbean is a set of immigrant societies, shaped by successive waves of European, Africa and Asian settlers. Through art, music, and literature Caribbean people have not just borrowed from but added to Western civilization and the pan-African heritage. Increasingly, Hispanic Caribbean people are making their voices heard as immigrants in the U.S. and the former colonial metropolises of Europe.

**ETHN 1890S. Youth, Art, Engagement and Social Justice.**

This course is designed for students concerned with the challenges, theoretical models, and best practices of academic research and advocacy relationships. The goals of this course are to navigate the challenges of bridging the gap between the academy, community-based organizations, and social justice research and to accrue experience forging these partnerships. This course has a practice component where students develop a project with a non-profit organization and a portion of each course session is devoted to discussion about progress and challenges of each students project.

**ETHN 1890T. Race, Gentrification, and the Policing of Urban Space (PLCY 1701W).**

Interested students must register for PLCY 1701W.

**ETHN 1890W. Wise Latinas: Women, Gender, and Biography in Latinx History (HIST 1979E).**

Interested students must register for HIST 1979E.

**ETHN 1891A. Introduction to Native and Indigenous Studies.**

This course explores international Indigenous perspectives, experiences and historical impacts of Indigenous peoples around the world in a contemporary global environment. We will examine the complex intercultural dynamics of colonial and post-colonial societies, placing the experience of Native peoples of North America in the larger context of other Indigenous peoples living in settler colonial societies, for example, Maori of Aotearoa – NewZealand and Quechua people of Peru. We will examine Indigenous peoples' connections with territories, resources, and efforts to protect their knowledge systems and sovereignty. Also, through a comparative approach, we will study Indigenous and Western research paradigms.

**ETHN 1892. Race, Class and Gender in Latino Communities.**

Examines the roles of racial, class, and gender identities, in the emergence and consolidation of Latino political power in the United States. We look at Latino racial attitudes and racial hierarchies, as "inherited" from Latin American social systems, and as developed here in the U.S. We explore class politics as they shape Latino social movements, economic conditions, and communities, and we analyze the impact of Latino immigration and union membership on organized labor. We consider gender roles and patriarchy in Latino families, and the roles of intersectionality and feminism in Latino politics. Enrollment limited to 40.

**ETHN 1900A. Alien Nation: US Immigration in Comparative Perspectives.**

Latino/a immigration to the United States has reshaped the meaning of "America" over the last hundred years. We will study Latina/os in comparison to other immigrants and examine how US immigration policy has created a nation partly composed of "alien" residents—some citizens, others not—who have constructed alternative notions of belonging.

**ETHN 1900B. Community, Language and Literacy: A Practicum.**

This course examines adult language and literacy learning and approaches to teaching in community settings. It is designed to support students' work teaching language and literacy to immigrant adults. Working with the Swearer Center and its community partners students will explore theories informing educational practice, and will gain skills and practice in providing language and literacy instruction to adult learners in the community. This practicum specifically addresses issues of language acquisition, acculturation, and broader contexts framing adult education. Enrollment limited to 20.

**ETHN 1900C. Contemporary Latino/a Education in the United States.**

Latino/as are now the second largest group of students in United States schools and, in aggregate, among the most troubled as measured by drop-out rates and grade-level retentions. Yet Latino/a students also perform well in some settings. This course reviews contemporary Latino/a education, focusing on the multiple educational contexts Latino/as encounter, including how non-Latino/a educators regard Latino/a students.

**ETHN 1900D. Latino Communities Seminar.**

Enrollment limited to: 20.

**ETHN 1900E. Senior Seminar in Ethnic Studies.**

No description available.

**ETHN 1900F. Theory, Creativity, Activism.**

This class will bring together much of the literature and discussions conducted throughout your education as an Ethnic Studies major and prepare you for the application of Ethnic Studies in your post-graduate life. I have chosen to emphasize three themes that have been dominant in your Ethnic Studies curriculum: Theory, Creativity, and Activism. We will begin by critically exploring the democratic principles and imperial practices that underlie the "American system" and the political formation of The Third World. Our discussions and readings will include an examination of the contributions and limitations of multiculturalism, postmodernism, anti-colonialism and feminism, and the relevance of (ethnic) "experience" in interpreting and addressing the problems we face as a planetary civil society. The majority of the class will be dedicated to the praxis of Ethnic Studies as a creative and political force within our world today. We will read fiction and non-fiction and view films that articulate the complexities of life in North America and beyond.

**ETHN 1900G. Race and Immigration in the Americas.**

Enrollment limited to: 20.

**ETHN 1900H. What is Ethnic Studies?.**

No description available. Enrollment limited to 20 seniors and graduate students.

**ETHN 1900I. To Be Determined.**

Enrollment limited to 20.

**ETHN 1901. American Empire Since 1890 (HIST 1900).**

Interested students must register for HIST 1900.

**ETHN 1903G. Oral History and Community Memory (AMST 1903G).**

Interested students must register for AMST 1903G.

**ETHN 1903P. Please, Please Me (AMST 1903P).**

Interested students must register for AMST 1903P.

**ETHN 1903V. Asian and Latino Immigration (AMST 1903V).**

Interested students must register for AMST 1903V.

**ETHN 1903X. Style and the Man: Masculinity in Fashion and U.S. History (AMST 1903X).**

Interested students must register for AMST 1903X.

**ETHN 1904J. The Asian American Movement: Communities, Politics and Culture (AMST 1904J).**

Interested students must register for AMST 1904J.

**ETHN 1910. Independent Study.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ETHN 1910D. Faces of Culture (ANTH 1910D).**

Interested students must register for ANTH 1910D.

**ETHN 1920. Senior Thesis.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ETHN 1940. Ethnographic Research Methods (ANTH 1940).**

Interested students must register for ANTH 1940.

**ETHN 1950G. Contemporary Chinese Culture and Media (EAST 1950G).**

Interested students must register for EAST 1950G.

**ETHN 1960D. Feminist Theory/Feminist Activism (GNSS 1960D).**

Interested students must register for GNSS 1960D.

**ETHN 1981C. Minority News: Radical Reporting and Reading (HMAN 1970L).**

Interested students must register for HMAN 1970L.

**ETHN 2070. Music and Identity (MUSC 2070).**

Interested students must register for MUSC 2070.

**ETHN 2220. Urban Politics (POLS 2220).**

Interested students must register for POLS 2220.

**ETHN 2340. Human Development and Urban Education (EDUC 2340).**

Interested students must register for EDUC 2340.

**ETHN 2970C. Rethinking the Civil Rights Movement (HIST 2970C).**

Interested students must register for HIST 2970C.

## Annenberg Institute for School Reform

The Annenberg Institute for School Reform (AISR) is a national policy research and reform-support organization, headquartered at Brown University, that conducts research and collaborates with school districts, communities, and other education stakeholders to improve the conditions and outcomes of urban public schools.

Established in 1993 by education reform leader Theodore (Ted) Sizer, the founder and chair of the then-Brown University-based Coalition for Essential Schools, the organization was renamed shortly thereafter to honor philanthropist, former diplomat, and publisher Walter H. Annenberg, following the Annenberg Foundation's \$50-million gift to endow AISR. A University Corporation-appointed Board of Overseers, chaired by Brown's president, governs the organization.

AISR is currently in a period of transition and refocusing of its mission, which reflects Brown's strategic plan, *Building on Distinction*. Susanna Loeb, an expert in education policy and a professor of education at Stanford University, has been appointed the next director, starting July 1, 2018. Michael Grady currently serves as the Institute's interim executive director.

Several former AISR programs are continuing their work in new organizational homes. On September 1, 2017, Research and Policy and New York-based Community Organizing and Engagement moved to the Metropolitan Center for Research on Equity and the Transformation of Schools at New York University's Steinhardt School of Culture, Education,

and Human Development. On November 13, 2017, New England-Based Community Organizing & Engagement and District & Systems Transformation moved to Roger Williams University's School of Continuing Studies.

AISR's programs and structure under Dr. Loeb's leadership will emphasize closer integration with the University's research and teaching mission and create a hub of scholarship and policy work that engages faculty, students, and practitioner experts addressing the causes, consequences, and mitigation of educational inequality.

In collaboration with Brown's Education Department, AISR established a Master's Program in Urban Policy (UEP) in 2006. The tightly focused, 12-month academic curriculum, integrated with a 9-month internship, is designed to impart a set of core skills and competencies necessary for successful careers in urban education policy. To date, degrees have been conferred on close to 300 graduates. In 2012, AISR's Board of Overseers established the Ruth J. Simmons Urban Education Policy Scholarship, a permanent annual award for UEP Master's degree candidates that honors the University's retired president and former AISR board chair.

AISR also serves as a bridge from Brown to Providence and the state, providing support for the Providence Public School District, the R.I. Department of Education, and the Central Falls School District, and it hosted the Providence Children & Youth Cabinet from 2012 to 2017. In 2008-09, AISR supported the Governor's Urban Education Task Force, a key factor in Rhode Island's successful Race to the Top application. Furthermore, in partnership with the Rhode Island Foundation, AISR sponsored a series of eight forums in 2011-14 focused on "Building a 21st Century Education System" in the Ocean State.

Additional information can be found at: <http://www.annenberginstitute.org/>

## Anthropology

### Chair

Stephen D. Houston

The Department of Anthropology at Brown is a vibrant, award-winning group of scholars in the subfields of cultural anthropology, archaeology, and anthropological linguistics. Our research and teaching cover a wide range of the field, with special strengths in anthropological demography, political anthropology, medical anthropology, language and culture, ethnicity, gender, ancient writing and representation, early urbanism, historical and forensic archaeology, and Latin American studies.

As a discipline, Anthropology works at the crossroads of the social sciences and the humanities, and it works to understand human experience in all of its fullness. Unlike other departments, Anthropology does not restrict itself to a single aspect of human social life, such as the political or the aesthetic. Conversations in our classrooms and seminar rooms attempt to put behavior in the broadest contexts of meaning, power, institutions, and history. They cast a global net, ranging from discussions of the transnational process of foreign aid between Japan and Latin America to the hieroglyphic system of the ancient Mayan people to the relationship between Islamic ethics and organ transplant in Egypt. In a world of increasing specialization and fragmentation of knowledge, Anthropology provides an opportunity to look at the big picture and find it in the locally meaningful. In a world of manifold crises, it provides opportunities for applying the knowledge it produces, and in a world of increasingly global connection, the discipline provides many roadmaps.

For additional information, please visit the department's website: <https://www.brown.edu/academics/anthropology/>

### Anthropology Concentration Requirements

Anthropology is the study of human beings from all times and all places, offering holistic, comparative, international, and humanistic perspective. In studying and interpreting the vast range of similarities and differences in human societies and cultures, anthropologists also seek to understand how people themselves make sense of the world in which they live. The Department of Anthropology at Brown is a vibrant, award-winning group of scholars working primarily in the subfields of cultural anthropology,

archaeology, and anthropological linguistics. The concentration provides students with a broad introduction to the discipline and includes the major subdisciplines of the field: sociocultural anthropology, archaeology, anthropological linguistics, and biological anthropology. The department also allows students to pursue the Engaged Scholars Program (<https://www.brown.edu/academics/college/special-programs/public-service/engaged-scholars-program>). ESP is for students with an interest in making deeper connections between their concentration curriculum and long-term engaged activities such as internships, public service, humanitarian and development work, archaeological excavations, and many other possible forms of community involvement.

**Students who declared a concentration prior to fall 2019 can refer to concentration requirements here:** (<https://bulletin.brown.edu/archive/2018-19>)<https://bulletin.brown.edu/archive/2018-19/the-college/concentrations/anth/>

### General Anthropology Track

Choose one foundational course in sociocultural, linguistic anthropology, or medical anthropology: 1

ANTH 0100	Introduction to Cultural Anthropology
ANTH 0300	Culture and Health
ANTH 0800	Sound and Symbols: Introduction to Linguistic Anthropology

Choose one foundational course in archaeology or biological anthropology: 1

ANTH 0310	Human Evolution
ANTH 0500	Past Forward: Discovering Anthropological Archaeology

Choose one of the following courses in anthropological methodology, to prepare students for further research: 1

ANTH 1201	Introduction to Geographic Information Systems and Spatial Analysis
ANTH 1621	Material Culture Practicum
ANTH 1720	The Human Skeleton
ARCH 1900	The Archaeology of College Hill
ANTH 1940	Ethnographic Research Methods

Five additional courses in anthropology of the student's choosing. At least three of these electives will need to be at the 1000-level to meet the requirements of the concentration. 5

ANTH 1990 Senior Seminar: (Re)Making Anthropology 1

Total Credits 9

### Medical Anthropology Track

ANTH 0300 Culture and Health 1

Two courses in at least two of the four major subfields of anthropology: 2

#### Choose one:

ANTH 0310	Human Evolution
ANTH 0500	Past Forward: Discovering Anthropological Archaeology

#### Choose any one 0000 or 1000-level course in socio-cultural anthropology or linguistic anthropology such as:

ANTH 0100	Introduction to Cultural Anthropology
ANTH 0110	Anthropology and Global Social Problems: Environment, Development, and Governance
ANTH 0800	Sound and Symbols: Introduction to Linguistic Anthropology
ANTH 0805	Language and Migration
ANTH 1111	Anthropology of China
ANTH 1150	Middle East in Anthropological Perspective
ANTH 1240	Religion and Culture
ANTH 1255	Anthropology of Disasters

ANTH 1320	Anthropology and International Development: Ethnographic Perspectives on Poverty and Progress	
ANTH 1848	Ethnography + Social Critique	
ANTH 1940	Ethnographic Research Methods	1
At least one 1000-level course in medical anthropology such as: <sup>1</sup>		1
ANTH 1242	Bioethics and Culture	
ANTH 1300	Anthropology of Addictions and Recovery	
ANTH 1301	Anthropology of Homelessness	
ANTH 1310	International Health: Anthropological Perspectives	
An additional three anthropology courses of the student's choosing. At least two of the electives must be at the 1000-level to meet the general requirements of the concentration.		3
At least one non-anthropology course in the natural sciences, public health, or psychology that focuses on human health to give students basic exposure to the science of human physical and/or mental health. This course is in addition to the nine courses required in ANTH. <sup>2</sup>		1
ANTH 1990	Senior Seminar: (Re)Making Anthropology	1
Total Credits		10

<sup>1</sup> Other appropriate anthropology courses may be used to fulfill this requirement with DUS approval  
<sup>2</sup> Most qualifying courses will bear a BIOL, PHP, or CLPS designation but students can choose any appropriate course to fulfill this requirement with DUS approval.

**Socio-Cultural Anthropology Track**

ANTH 0100	Introduction to Cultural Anthropology	1
One course in archaeology or biological anthropology:		1
ANTH 0310	Human Evolution	
ANTH 0500	Past Forward: Discovering Anthropological Archaeology	
ANTH 1940	Ethnographic Research Methods	1
At least two 1000-level courses that focus on specific aspects of sociocultural methods or theories, or in a particular region:		2
ANTH 1111	Anthropology of China	
ANTH 1150	Middle East in Anthropological Perspective	
ANTH 1240	Religion and Culture	
ANTH 1242	Bioethics and Culture	
ANTH 1255	Anthropology of Disasters	
ANTH 1300	Anthropology of Addictions and Recovery	
ANTH 1301	Anthropology of Homelessness	
ANTH 1310	International Health: Anthropological Perspectives	
ANTH 1320	Anthropology and International Development: Ethnographic Perspectives on Poverty and Progress	
ANTH 1848	Ethnography + Social Critique	
An additional three anthropology courses of the student's choosing. At least one of the electives must be at the 1000-level to meet the general requirements of the concentration.		3
ANTH 1990	Senior Seminar: (Re)Making Anthropology	1
Total Credits		9

**Linguistic Anthropology Track**

ANTH 0800	Sound and Symbols: Introduction to Linguistic Anthropology	1
One additional course in linguistic anthropology from the following:		1

ANTH 0805	Language and Migration	
ANTH 1810	Language and Power	
Two other foundational courses in anthropology:		2
<b>Choose one:</b>		
ANTH 0100	Introduction to Cultural Anthropology	
ANTH 0300	Culture and Health	
<b>Choose one:</b>		
ANTH 0310	Human Evolution	
ANTH 0500	Past Forward: Discovering Anthropological Archaeology	
ANTH 1940	Ethnographic Research Methods	1
ANTH 1990	Senior Seminar: (Re)Making Anthropology	1
An additional three anthropology courses of the student's choosing. At least two of the electives must be at the 1000-level to meet the requirements of the concentration.		3
At least one general course focusing on aspects of linguistic structure. <sup>1</sup>		1
At least one language course (one semester) in any language other than English. <sup>2</sup>		1
Total Credits		11

<sup>1</sup> This course is in addition to the nine courses required in ANTH. Given the teaching commitments of departmental faculty, eligible courses will generally be offered only in departments other than Anthropology. Recommended courses include Introduction to Linguistics (CLPS 0300) or Sociolinguistics (SLAV 1300). Students may also choose another appropriate course to fulfill this requirement with DUS approval.  
<sup>2</sup> This course is in addition to the nine courses required in ANTH. Students interested in studying a language not offered at Brown should consult with Linguistic Anthropology faculty and the DUS.

**Anthropological Archaeology Track**

ANTH 0500	Past Forward: Discovering Anthropological Archaeology	1
ANTH 0100	Introduction to Cultural Anthropology	1
Choose one course in anthropological archaeology methodology: <sup>1</sup>		1
ANTH 1201	Introduction to Geographic Information Systems and Spatial Analysis	
ANTH 1621	Material Culture Practicum	
ARCH 1900	The Archaeology of College Hill	
Choose one course that involves detailed archaeological investigation of a geographic region: <sup>2</sup>		1
ANTH 1031	Classic Mayan Civilization	
ANTH 1126	Ethnographies of Heritage: Community and Landscape of the Mediterranean and Beyond	
ANTH 1505	Vertical Civilization: South American Archaeology from Monte Verde to the Inkas	
ANTH 1624	Indians, Colonists, and Africans in New England	
ANTH 1640	Maize Gods and Feathered Serpents: Mexico and Central America in Antiquity	
ANTH 1650	Ancient Maya Writing	
ANTH 1692	Southwestern Archaeology	
One 1000-level course in anthropology with significant archaeological, material culture, and/or museum studies component. A second geographic area course from the list above may be used to meet this requirement. Other regularly offered courses that meet this requirement include: <sup>3</sup>		1
ANTH 1125	Indigenous Archaeologies	
ANTH 1620	Global Historical Archaeology	

ANTH 1623	Archaeology of Death	
ANTH 1820	Lost Languages: The Decipherment and Study of Ancient Writing Systems	
Three anthropology courses of the student's choosing. At least one of the electives must be at the 1000-level to meet the general requirements of the concentration.		3
ANTH 1990	Senior Seminar: (Re)Making Anthropology	1
Total Credits		9

- This requirement will be waived for students who have completed an archaeological field school. The field school must be approved in advance of its completion for the requirement to be waived. Per the broader requirements of the concentration, students must still complete nine anthropology credits at Brown or via transfer credits. Note that many field schools do not carry credit.
- Other anthropological archaeology courses with significant geographic focus may be used to fulfill this requirement with DUS approval.
- Other anthropology courses with significant archaeological, material culture, or museum studies focus may be used to fulfill this requirement with DUS approval.

## Biological Anthropology Track

ANTH 0310	Human Evolution	1
Choose one foundational course in cultural anthropology, medical anthropology, or linguistic anthropology:		1
ANTH 0100	Introduction to Cultural Anthropology	
ANTH 0300	Culture and Health	
ANTH 0800	Sound and Symbols: Introduction to Linguistic Anthropology	
ANTH 1720	The Human Skeleton	1
Five anthropology courses of the student's choosing. At least three of the electives must be at the 1000-level to meet the requirements of the concentration.		5
At least one non-anthropology course with a biological focus. Any course with a BIOL subject code can be used to fulfill this requirement. Students are especially encouraged to consider a course with a significant content devoted to genetics and/or evolutionary theory. This course is in addition to the nine courses required in ANTH.		1
Choose at least one course in statistics. This course is in addition to the nine courses required in ANTH. Possible courses include:		1
APMA 0650	Essential Statistics	
BIOL 0495	Statistical Analysis of Biological Data	
CLPS 0900	Statistical Methods	
EDUC 1100	Introduction to Qualitative Research Methods	
SOC 1100	Introductory Statistics for Social Research	
PHP 1501	Essentials of Data Analysis	
ANTH 1990	Senior Seminar: (Re)Making Anthropology	1
Total Credits		11

- Other courses may be substituted to meet this requirement with the permission of the DUS.

## Engaged Scholars Program

The Engaged Scholars Program in Anthropology is geared for anthropology concentrators who are especially interested in making deeper connections between their concentration curriculum and long-term engagement with local communities in Providence and beyond. Engaged scholars combine hands-on experiences such as internships, public service, humanitarian and development work with their academic learning in order to develop a deeper understanding of, and appreciation for, social engagement. While most anthropology courses have some sort of 'engaged' element, being an Engaged Scholar in Anthropology means

making a commitment to engaging more actively and intensively with the communities in which a student is living.

### Requirements for Engaged Scholars in Anthropology

Requirement information can be found at the Anthropology website: <https://www.brown.edu/academics/anthropology/undergraduate-program/engaged-scholars-program>

## Honors

Candidates for honors should apply to the concentration advisor by the end of his or her 6th semester, but no later than the 4th week of the 7th semester. An application consists of a brief statement addressing the focus of a proposed thesis and the names and signatures of two faculty members from the Department of Anthropology who have agreed to serve as the student's honors committee—one as honors thesis advisor, the other as a reader. Candidates for honors are required to:

- Fulfill the standard concentration requirements.
- Take two additional courses, usually , which may be used for thesis preparation.
- Have a majority of A's in the concentration.
- Submit an approved honors thesis.

## Field Work

Concentrators interested in archaeology are urged to obtain training in field archaeology by participating in Brown-sponsored field research, or by participating in an archaeological field school elsewhere.

## Anthropology Graduate Program

The department of Anthropology offers a Doctor of Philosophy (Ph.D.) program as well as a Master of Arts (A.M.) program.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/anthropology>

## Courses

### ANTH 0001. Anthropology of Stuff.

Our lives are surrounded by objects we make, gift, sell and buy. What can these objects tell us about who we are as humans? This course will introduce students to material anthropology, exploring what objects can tell us about culture, society and experience. We will talk about gifts, commodities, counterfeits, and copyrights. Students will learn how people make objects, how objects make people, and how the circulation of objects has connected people historically and in the present. Students will also have the opportunity to learn some ethnographic methods to talk about the meaning of objects in the world around them.

### ANTH 0066A. Politics of Race and Culture.

Addressing the subjects of race, culture and ethnicity, focusing on minority groups in the U.S. Seeks to clarify the philosophical and theoretical issues in contemporary America using a cross-disciplinary approach.

### ANTH 0066B. Mythscapes.

An experimental seminar that will combine classroom discussion with visits to field sites within walking distance of the Brown campus. The aim will be to acquaint students with some fundamentals of symbolic analysis and to apply these fundamentals to interpreting the moral and historical messages suffused in the landscapes around us. Readings will include sources on the anthropological interpretation of myth combined with historical sources on Brown and its neighboring communities and institutions. Students will acquire a deeper sense of the mythic qualities of this place and some analytical tools for understanding mythscapes elsewhere. Enrollment limited to 19 first year students.

### ANTH 0066C. Population and Culture.

This seminar for first year students examines the relationship between individuals and population and the impact of culture on population. How do the lives and actions of individuals cumulate to the characteristics of a population? How do the characteristics of a population affect the lives of the people in it? For first year students only.

**ANTH 0066D. Who Owns the Past?**

Examines the role of the past in the present. Using examples from the U.S. and other parts of the world, we will look at how archaeological evidence is implicated in contemporary cultural and political issues. Students will learn that the past is not just the focus of archaeologists' interest and scientific inquiries, but is also a subject romanticized by antiquarians, mobilized in nation-building, marketed for profit, re-enacted as entertainment, consumed by tourists, and glorified in commemoration. Understanding these different and competing valuations, claims, and uses of the archaeological past will provide an introduction to why the past matters in the present and to the future. Enrollment limited to 19 first year students.

**ANTH 0066E. Colonial Cities.**

This course attempts to understand the nature of colonialism in Africa and India. Comparative methodological approach to the study of colonial cities introduces the students to a multiple and interlocking idea and symbols used by colonial power to create in their images, cities which reflect their own image. For first year students only.

**ANTH 0066F. Families and Households.**

This course explores the diversity of families and households, both between cultures and within cultures; changes in family forms over time, changing experiences of family over the life course, the diverse meanings, metaphors, and values of "family"; and current controversies about what families are and what they should be. Enrollment limited to 19 first year students. Instructor permission required.

**ANTH 0066G. Explorers and Cultural Encounters.**

Looks at famous land and sea expeditions, including Marco Polo, Cheng Ho, James Cook, Samuel Hearne, Elisha Kane, Ernest Shackleton and others. Whether the voyage was inspired by a specific intellectual inquiry, mapping, exploration of a new land, establishing a new trade route, friendly alliance, or a colonial expansion, these expeditions changed the views people had about the world, peoples, and places.

**ANTH 0066I. Human Trafficking.**

We will retrace the development and impact of the 2000 UN Protocol to Prevent, Suppress, and Punish Human Trafficking, especially women and children. This set of norms was created as a supplement to the UN Convention against International Organized Crime. This course will deal with the protocol as both a legal as a living document, with a history and ongoing political relevance.

**ANTH 0066J. So You Want to Change the World?**

Examines from an anthropological perspective efforts to address global poverty that are typically labeled as "development." The enterprise of development is considered critically, both with regard to the intentions and purposes that underlie the actions of wealthy countries, donor organizations, and expatriate development workers and with regard to the outcomes for the people who are the intended beneficiaries. Privileging the perspectives of ordinary people in developing countries, but also looking carefully at the institutions involved in development, the course relies heavily on ethnographic case studies that will draw students into the complexity of one of the greatest contemporary global problems: social inequality. Enrollment limited to 19 first year students.

**ANTH 0066K. International Perspectives of Women's Agency and Society.**

This course is designed to address the postcolonial identities and the cross cultural issues of women through anthropology and women's writings. Identifying select cases from Africa and Asia. We will analyze the cross-cultural issues and meaning of gender, the cultural construction of gender, the significant ideology that defines the paradigm through which we come to understand a woman's domain, agency and empowerment, and the modes of behavior in the spheres of everyday life. S/NC only. Reserved for First Year students. Enrollment limited to 19.

**ANTH 0066L. Beyond World Music: Singing and Language.**

An introduction to music and language in cultural context. Drawing on case studies from around the world, we consider how music and language are intimately connected. Topics covered include cannibals' singing in colonial Brazil, music and electoral politics in Texas, working class culture and country music, singing and society in the Amazon, whistle speech and songwriting in indigenous Mexico, Apache identity and popular music, modernity and classical Indian music, music and mass advertising in the United States, and the politics of Zulu music production in South Africa. Reserved for First Year students. Enrollment limited to 19.

**ANTH 0066M. Holy Wars.**

No description available.

**ANTH 0066N. Peoples and Cultures of Greater Mexico.**

This course will focus on the cultural area known as Greater Mexico, incorporating Mexicans resident south of the Rio Grande, as well as the approximately 25 million Mexicans living permanently or for at a time in the United States. Specific topics to be covered in the class include: urban peasants and rural proletarians, recent challenges to gender conventions, national and international migration, nationalism and the changing meanings of the Conquest and colonial periods, land and indigenous rights, everyday violence, machismo, popular culture, and protest and rebellion. Limited to first-year students.

**ANTH 0066O. How to do Things With Gifts: Charity, Corruption and Friendship Across Cultures.**

In all human societies, people exchange goods and services, From Adam Smith onwards, economists have emphasized the central importance of the "free" market, where self-interested individuals strike bargains, and simultaneously expand humanity's "common stock." Yet costly practices-expensive weddings, charitable donations, corporate hospitality-still flourish, which appear designed to build human relationships rather than generate hard profits. And in today's global economy, personal gifts remain an essential part of doing business in places like China, Japan, Nigeria and Saudi Arabia. Where mainstream economic analysis sees inefficiency or corruption, this course explores classic and contemporary alternative understandings of gift-giving's cultural significance.

**ANTH 0066P. Transnational Lives: Anthropology of Migration and Mobilities.**

In an era characterized by globalization, by the increasing and rapid flows of ideologies, information, money, goods, and people across national borders, how do individuals, families, and communities grapple with the new forms of existence brought forth by migration? This course will go beyond macro-economic explanations of why migration happens to explore what migration does: the effects of mobility on a range of practices that include parenting, health, gender roles, marriage, politics, and anthropological research itself. Enrollment limited to 19 first year students.

**ANTH 0066Q. Crisis of Identities in the Global Order.**

The seminar is intended to engage first-year students in discussion and analysis of one of the perplexing questions of the modern age. Why, with globalization and an attendant world-view shaped by the technological revolutions of communication that appeal to commonalities, we find more emphasis on local differences, more conflicts related to identities determined by opposition to "the other"? A concordant question will be: how do different disciplines address the concept of identity? Enrollment limited to 19 first year students.

**ANTH 0066R. Child and Youth Cultures.**

This first year seminar addresses childhood from two linked but distinctive theoretical perspectives. First, what is childhood? Rather than assuming it is a universal category, we will explore how childhood has been constructed differently through history and across cultures, in opposition to infancy, youth, and adulthood. Second, who are children? In contrast to conventional representations of young people as passive objects of socialization, we will review anthropological conceptions of children and youth as social actors with respect to identity formation, cultural expression, and political economy. Enrollment limited to 19 first year students.

**ANTH 0066S. Contemporary Egypt in Revolution.**

On January 25, 2011 protestors in Egypt amassed in Tahrir Square in Cairo with basic demands: Bread, Freedom, Social Equality, and Human Dignity. After hundreds of peaceful protestors were killed at the hands of riot police and hired thugs, eighteen days later, President Hosni Mubarak resigned. Yet since then, hundreds more have been killed, Egypt's revolution continues, and the basic demands are as crucial today as they were at its inception. We will read contemporary Egypt from the perspectives of anthropologists and social historians, and discuss the value of social theory and analysis for understanding current political turmoil. Enrollment limited to 19 first year students. S/NC

**ANTH 0066T. Postcolonial Matters: Material Culture between Colonialism and Globalization.**

This course is about things - 'stuff' - as it is about people past and present and their entanglements in and through colonial situations. It explores colonialism past and present through the combined lenses of postcolonial theory and material culture - the emphasis is thus not so much on literary and figurative representations of colonial conflicts and engagements but rather on the material surroundings of people living those colonial worlds. In other words, this course is about what people did and about the things they used to construct their daily lives in colonial situations across the globe and through time. Enrollment limited to 19 first year students.

**ANTH 0066U. An Archaeology of Native American Art.**

This seminar is an introduction to the art and material culture of the indigenous peoples of North America. The regional coverage includes the continental United States and Canada, focusing on the peoples of Northeast, Midwest, Southwest, Plains, Pacific Northwest, and the Arctic and Subarctic. Topics addressed include art and artifact, function and symbol, innovation and tradition, and museums and representational practices, ethics and repatriation. Special attention will be given to the changing relations between museums and contemporary Native peoples. The seminar will make extensive use of the archaeological and ethnographic collections of the Haffenreffer Museum of Anthropology.

**ANTH 0066V. The Anthropology of Children and Childhood.**

This first year seminar explores childhood and children from an anthropological perspective. First, we will examine the concept of childhood both historically and cross-culturally. Second, we look at the development pathways that cultural communities provide for the children. These pathways are shaped by cultural ecology and history and by the goals of parents, communities and children themselves. Finally, we will review anthropological conceptions of children as social actors who shape their cultures and lives.

**ANTH 0077N. The Anthropology of Gender and Science.**

This seminar examines topics including genetics, reproduction, and evolution, all through the lens of gender/sex systems. The themes of social justice, identity, and difference are central to the course. We will explore: How epidemiology and engendered social justice are often in conflict in the fight against AIDS in Africa; to learn about difference, anthropomorphism, gender, and primatologists' comparisons between humans, bonobos, and chimpanzees; efforts to scare men in the United States about "Low Testosterone," and how they reflect shifting identities as much as reduced hormone levels; and the relationship between gender, Traditional Chinese Medicine, and Western Biomedicine in China.

**ANTH 0100. Introduction to Cultural Anthropology.**

This course provides an introduction to cultural anthropology, surveying its defining questions, methods, and findings. We will examine the history and utility of anthropology's hallmark method, ethnography, the long-term immersion of the researcher in the culture under study. We will compare cultural anthropology's findings and comportment in other cultures to its conclusions and conduct in our own. No prerequisites.

**ANTH 0110. Anthropology and Global Social Problems: Environment, Development, and Governance.**

This course offers students an opportunity to examine and analyze a range of contemporary global social problems from an anthropological perspective. We will explore human-environment entanglements with particular attention to intersecting issues of capitalism, international development, and state and non-state governance. Course materials will look at various kinds of work in, on, and with the environment, asking questions about the possibilities of over-working our landscapes, while addressing the potentials for social and environment justice and sustainability.

**ANTH 0112. Anthropology for Global Leaders.**

This course makes the case that global leaders have much to gain from anthropology, the study of human diversity across geographic and historical contexts. Readings and lectures will introduce students to anthropological thinking about significant global challenges - namely climate change, the internet, and international migration. We will discuss appropriate methods of translating academic knowledge into policy and action. The course will also use anthropological literature to explore what constitutes effective and ethical leadership in a global context. Assignments will encourage students to develop and practice their own leadership skills, including skills of analysis, communication, and group organization.

**ANTH 0125. Violence and the State.**

This course allows students the opportunity to interrogate the relation between violence and the state. Students will be introduced to a variety of analytical frames through which to understand both the concept of violence and that of the state from an anthropological perspective. Through diverse case studies we will consider topics such as what it means to see and be seen by the state, the rationalization of "exceptional" violence, and domination through symbolic violence. The course has no prerequisites, but a foundational course in the social sciences is recommended.

**ANTH 0130. Myths Alive.**

Myth is an important part of the architecture that sustains human culture and society. This course begins w/an account of the principal theoretical positions that've shaped anthropological understandings of myth as a living and guiding force in human communities in ancient times and in the present day. We'll examine the expressions of myth in senses of place, social harmony, inequality, conflict, religious experience, and radical social change in a wide variety of historical and ethnographic settings. We'll draw upon objects from Brown's Haffenreffer Museum to recognize them as materialized representations from mythical worlds.

**ANTH 0200. Culture and Human Behavior.**

The goal is to challenge our beliefs about some taken for granted assumptions about human behavior and psyche by examining cultures with different conceptions of self and cognition. We will examine the issues of the role of nature and nurture in development, the nature of intelligence, coming of age, the association of psychological characteristics with gender and the naturalness of emotions.

**ANTH 0205. Racial Politics of Culture: Race and Indigeneity in Anthropology.**

Taking its title from Lee D. Baker's Anthropology and the Racial Politics of Culture, this course aims to understand anthropological approaches to race and indigeneity. We'll focus on ethnographic work from a range of ethnographic contexts in order to consider the complexities of race and indigeneity as both analytical concepts and ethnographic facts. We will consider how race and indigeneity are situated in the anthropological project. We will look at such issues as race and science, colonialism, race and culture, structural racism, ethnicity, and whiteness.

**ANTH 0250. Gold: The Culture of a “Barbarous Relic”.**

An object of obsession for millennia, gold has recently witnessed a polarizing cultural politics. In congressional testimony former Fed Chair Ben Bernanke labeled it a “barbarous relic.” Meanwhile a growing minority clamor for a return to the gold standard. Whether among medieval alchemists or modern financial wizards, whether in the eyes of Egyptian Pharaohs or Indian peasants, gold’s special qualities have shaped cultural practice. This course explores the shiny yellow metal’s cultural history, from its emergence as an object of desire, to the contemporary rejection of its role as the store of wealth resulting in its demotion to just another commodity.

**ANTH 0300. Culture and Health.**

An introduction to the field of Medical Anthropology. Lecture reading and discussion will examine the social context of health and illness, looking at the diverse ways in which humans use cultural resources to cope with disease and develop medical systems. The course will provide an introduction to the overall theoretical frameworks that guide anthropological approaches to studying human health related behavior. Medical anthropology offers a unique and revealing perspective on the cultural diversity that characterizes human experiences of sexuality, disease, aging, mental illness, disability, inequality and death.

**ANTH 0301. Gender and Politics.**

This course focuses on ideologies of gender and sexuality cross-culturally and how they influence peoples’ involvement in political processes. We begin with a broad working definition of politics-power dynamics and arrangements whereby groups are affected by one another. The course looks at the circumstances under which peoples’ gender and sexual identities are mobilized into social movements, and the conditions and social consequences of public visibility. Our broader aim is to understand ways in which gendered inequalities produce--and are produced by--forms of political exclusion, as well as innovative ways in which people transform existing structures of power.

**ANTH 0302. Anthropology of Gender and Globalization.**

We live in a global world in which the movements of people, goods, and ideas cause productive frictions, transforming the prevailing formations of gender and sexuality. This course examines the intersections of gender and globalization by looking at how globalization shapes cultural constructions and political configurations of gender, and exploring how an ethnographic focus on gender sheds light on various aspects of globalization. Topics covered include anthropological theory of gender and sexuality, gender and global capital, gender and the (colonial) state, and gender and global politics (including gender activism, human rights, and development). Open to undergraduates only.

**ANTH 0310. Human Evolution.**

Examination of theory and evidence on human evolution in the past, present and future. Topics include evolution and adaptation, biocultural adaptation, fossil evidence, behavioral evolution in primates, human genetic variation and contemporary human biological variation.

**ANTH 0400. Growing Up Ethnic and Multicultural.**

Explores the complex issues of growing up as an ethnic, bicultural, or a multicultural person and how these dual or multiple identities affect or interact with individual behavior, priorities, the sense of self, and how individual identity is formulated and defined. Cross-cultural and interdisciplinary approaches combining anthropology, comparative human development, interethnic communication, life history, and literary works are used. Instructor permission required.

**ANTH 0450. Inequality, Sustainability, and Mobility in a Car-Clogged World.**

The global car population is predicted to reach two billion by the year 2020. The social, political, health, and environmental consequences are immense. These, as well as the cultural and political economic explanations for the car population explosion, will be explored in this class, as will alternative futures for transit.

**ANTH 0500. Past Forward: Discovering Anthropological Archaeology.**

This course offers a broad journey through the human past, from material culture crafted by our evolutionary ancestors to the remnants of the recent historic past. To facilitate this journey, the class explores the methods, concepts, and theories that anthropologists employ in the study of past peoples, places, and things. Case studies stretch across the globe. As a hands-on endeavor, archaeology focuses on tangible evidence. In this course, small-group discussion, laboratory, and field exercises will complement lectures, leading to an understanding of how anthropologists study the past and how that knowledge affects the present.

**ANTH 0510. Who Owns the Past?.**

This class examines the relationship between the Western world and African indigenous cultures, heritage, and ideas of the past. By looking at the history of science in reference to the treatment of Africans and African material culture, we will question who owns the rights to an indigenous past.

**ANTH 0515. Pirates! Archaeologies of Piracy in the Atlantic World.**

The figure of the pirate is an all-time favorite in Western imagination. It has inspired some of the most popular narratives of the past, solidly grounded in classic literature and contemporary visual culture. Focusing on the mid-17th century, the golden age of piracy in the Atlantic World, this course will use historical and archaeological data to investigate the way in which the image of the pirate has been constructed in the West, as an embodiment of cultural, legal, moral and sexual transgression, and as an object of both fascination and fear which is still current in the contemporary, global world.

**ANTH 0600. Of Beauty and Violence.**

What is the place of beauty in human experience and how does it find articulation in words? Using an interdisciplinary approach, this course explores the unexpected expressions and uses of beauty in a variety of social and ethnographic contexts marked by violence. We trace the potential of beauty to act at times as a counterweight to violence, sociopolitical crises, and marginalization, but also how it may be used to deepen already existing power structures. This is a writing-intensive course aimed at developing students’ ethnographic writing skills. No prerequisites.

**ANTH 0680. Anthropology of Food.**

An exploration of the human experience of food and nutrition from evolutionary, archaeological, and cross-cultural perspectives. The course will review the various approaches employed by anthropologists and archaeologists to understand diet and subsistence in the past and present. Starting with the evolutionary roots of the human diet in Plio-Pleistocene Africa, we will trace patterns of human subsistence to the present, including the social and health implications of the agricultural revolution. We will then explore modern foodways in cross-cultural perspective, focusing on the interplay of ecology, politics, technology, and cultural beliefs.

**ANTH 0700. Introduction to Modern South Asia.**

Students will be introduced to the social, political, cultural, and religious lives of people from the region known as ‘South Asia’. Course lectures and materials will draw from a broad range of material covering Bangladesh, Bhutan, India, the Maldives, Nepal, Pakistan, and Sri Lanka. This course is designed to get students to think broadly about themes related to social inclusion, state formation, discrimination, ethnic and social conflict, identity politics, and a host of other issues that have defined the region. This course will help students think about how themes, conversations, and course material can connect to their own research interests.

**ANTH 0800. Sound and Symbols: Introduction to Linguistic Anthropology.**

This introduction to the study of language and culture considers how language not only reflects social reality but also creates it. We'll examine specific cases of broad current relevance, in the process learning how an analytical anthropological approach to language use lays bare its often hidden power. We'll consider how language creates and reinforces social inequality and difference, how language promotes and resists globalization, and how language is used creatively in performance, literature, film, advertising, and mass media. We will also consider how language does important social work in specific contexts, such as classrooms, courtrooms, medical settings, and political campaigns.

**ANTH 0805. Language and Migration.**

This course is part of the Engaged Scholars Program and explores the interconnections between language and migration. We will examine talk about migration – in the form of immigration policy and media representations – as well as talk in contexts of migration including experiences such as border crossing, settlement, and schooling. Given the current context of increasing anti-immigrant rhetoric and an escalation of immigration enforcement, this course raises the timely and important question of how experiences of migration and the politics of mobility are shaped by language. Our investigation will combine engaged anthropological approaches with linguistic anthropological theories and methods.

**ANTH 1020. AIDS in Global Perspective.**

Communities around the world are affected in different ways by the HIV-AIDS pandemic. This course is concerned with cross-cultural variation in knowledge, perception, and treatment of AIDS in a global context. Twenty-five years into the global epidemic, how does social and cultural variation influence the continued spread or management of the disease? In addition to reading significant anthropological works related to the meaning of AIDS in cultural context, the course will address major public health initiatives related to the global AIDS pandemic, and offer an anthropological critique of their design, implementation and success. Enrollment limited to 40.

**ANTH 1030. Pre-Columbian Art and Architecture: A World That Matters.**

Survey of ancient art and building in ancient America, with a focus on Mexico, Central America, and the Andes. Underlying concepts include: meaning and method, cosmos and kingship, narrative and symbol, personality and authorship, empire and royal court. Rich collections of the Haffenreffer museum will form the focus of work in the class.

**ANTH 1031. Classic Mayan Civilization.**

Examines the history, culture, and society of the Classic Maya, with special emphasis on Preclassic precursors, dynasties, environmental adaptation, imagery, architecture, urban form, and the Maya Collapse.

**ANTH 1050. Global Sport: Anthropological Perspectives.**

Sport operates within vast networks of political, economic, and social investment. But who controls sport, and how? In this course, we approach sport as a set of labor practices. Modern sport is inseparable from the history of British and European industrialization. With an emphasis on the power of institutions, we analyze why sport has taken certain technical forms and social significances. We investigate the historical and cultural constraints through which the body is disciplined. Students will undertake writing projects about sport and that enable them to experience the challenges and opportunities of transforming athletics into text.

**ANTH 1100. Circumpolar Ethnography.**

An examination of the traditional and modern lifeways of native peoples across the Arctic and subarctic from European Lapland through Siberia, Alaska, Canada, and Greenland. Topics covered are society; ethnic relations; religion (Shamanism); art; and politics, including issues of land claims and home rule.

**ANTH 1110. African Issues in Anthropological Perspective.**

In this course we engage with anthropological literature and films on the diverse ethnicities, cultures, and "traditions" of sub-Saharan Africa. We trace the histories and the processes of cultural, social, and political change, beginning with colonialism and ending with the contemporary period. We will deconstruct and debunk dominant Western ideas of Africa that present it as primitive and characterized by poverty, AIDS, famine, and violence. We will learn about how Africans see and represent themselves through reading ethnographies, engaging with African popular culture, and watching documentary films.

**ANTH 1111. Anthropology of China.**

This course introduces students to contemporary Chinese culture and society, w/a focus on the rapid changes that have taken place during the post-Mao reform era in the People's Republic of China (1978- present). Emphasis will be placed on the importance of historical and global context in developing an understanding of contemporary Chinese culture. Readings and lectures will draw primarily upon recent ethnographic work conducted in the PRC, but readings from the disciplines of history, political science, public health, and contemporary Chinese literature (in translation) will also be incorporated. Topics: family life, urbanization, housing, migration, gender, health/disease, labor, globalization, and cyberculture.

**ANTH 1112. Anthropology of Climate Change.**

Contemporary climate change is a profoundly human issue. This course disaggregates "the human" in climate change, employing an anthropological perspective to ask how people experience changing climates in different ways throughout the world. From receding glaciers to rising seas to unpredictable seasons and periods of drought, the ways people understand, respond to, and experience climate change are shaped by diverse cultures and histories. Topics include environmental change, capitalism, energy, climate justice in indigenous communities, green economies, tropical forests, denial and skepticism, and the visibility of climate change. Articles and ethnographies cover the Global North as well as the Global South.

**ANTH 1119. Andean Anthropology.**

The area studies paradigm continues to provide solid information about "culture areas," and the rich ethnography and archaeology of Andean societies is no exception. Particular strengths emerging from this literature include studies of land use, religious syncretism, textiles, and collateral themes: continuities and recognizable features of "Andean culture" (*lo andino*), gender relations, migration, and politics. Throughout, we will analyze the ways that history, ecology, and the broad notion of reciprocity (*ayni*) cross-cut each of these. The result will be a close and in-depth study of cultural practices within three Andean countries (Peru, Ecuador, and Bolivia), the majority populations of which continue to be indigenous (predominantly Quechua- and Aymara-speaking). These are countries within which recent political and social changes have produced far-reaching transformations. Prerequisite: one course in either Anthropology or Classics.

**ANTH 1120. Peoples and the Cultures of the Americas.**

Examines the diverse cultures and history of the Americas - especially Brazil, Peru, Mexico, and the Caribbean. Topics include the organization of labor, cultural and artistic practices, changing conventions of gender and family, international migration, national and local identities, indigenous rights, and protest and rebellion.

**ANTH 1121. From Coyote to Casinos: Native North American Peoples and Cultures.**

An anthropological overview on the history and cultures of Native North American peoples from the prehistoric times to the present. Where did Native North Americans come from? What were their traditional lives like? What was their relationship with newcomers of European extraction, including anthropologists? What challenges do they face today? Indigenous and anthropological insights will be brought to bear on these and other questions.

**ANTH 1122. American Indian Art and Artifacts.**

Drawing on the rich North American Indian collections of the Haffenreffer Museum of Anthropology, the goal of this course is to examine theoretical approaches to the artifacts of indigenous people and analytical strategies for their research and interpretation. Insights from anthropology, art history, American Indian perspectives, and conservation are explored. Meets at the museum.

**ANTH 1123. Native North Americans in the Twenty-first Century.**

An examination of the process of land alienation of Native Americans through the enactment of federal laws to settle the frontiers and protect the wilderness. Through the use of oral history, ethnographies, film, historical documents, and the public record, the course compares Native American and Euro-American perspectives on the ownership of land and rights to resources.

**ANTH 1124. United States Culture.**

The United States is often described as "multi-cultural". This course examines dominant cultural values such as equality, choice, privacy, and responsibility. It also investigates aspects of the social structure of the United States such as inequality, power, race/ethnicity, kinship, and gender. Individual lives illustrate the ways that people living in the United States negotiate cultural values and confront social institutions. Enrollment limited to 40. Instructor permission required.

**ANTH 1125. Indigenous Archaeologies.**

This is an intro. to Indigenous archaeology, sometimes defined as archaeology "by, for and with Indigenous peoples." These approaches combine the study of the past with contemporary social justice concerns. However, they are more than this. In addition to seeking to make archaeology more inclusive of and responsible to Indigenous peoples, they seek to contribute a more accurate understanding of archaeological record. They thus do not reject science, but attempt to broaden it through a consideration of Indigenous epistemologies. This course covers topics as the history of anthropological archaeology, Indigenous knowledge and science, decolonizing methodologies, representational practices and NAGPRA.

**ANTH 1126. Ethnographies of Heritage: Community and Landscape of the Mediterranean and Beyond.**

Archaeologists study objects and (socio-cultural) anthropologists investigate culture is how stereotype and conventions have long had it. As material culture studies have increasingly blurred these boundaries, the distinction is entirely meaningless when it comes to archaeological heritage. Taking its cue from material culture studies, this course explores how local communities experience the material remains from the past and (re)incorporate them into their contemporary lives.

**ANTH 1130. Peoples and Cultures of Southeast Asia.**

An introduction to the anthropological study of Southeast Asia. Emphasis is placed on understanding the diversity of cultures and societies through both space and time.

**ANTH 1131. Indian Issues in Anthropological Perspective.**

From its role as an emerging economic power, to characterization of outsourcing global media, political discourses, and worldwide popularity of Bollywood, India is undergoing rapid changes, global imagination, and importantly in how Indians think about themselves in an era of globalization. We cover anthropological issues of contemporary India, including Hinduism and Islam, caste, social structure and forms of social relations using ethnographic texts. We will focus on postcolonial India, particularly two decades since liberalization in 1991. We will consider how history, cultural practices and existing social norms continue to shape and change contemporary Indian society and its relation to the world.

**ANTH 1133. Ethnonationalism- The Asian Arena.**

Three Asian countries-China, Thailand, and Myanmar-are unique national arenas to examine and compare specific definitions, representations, and contentions among nationalistic discourse, ethnic legitimization, and ethnonationalism as they are played out in response to cultural politics, national ideology, European colonial expansion, religious identity, and ethnic identity. Nationalistic movements, ethnic nationalism, and transnational politics are explored.

**ANTH 1140. European Ethnography.**

Familiarizes students with the societies and cultures of Europe from an anthropological perspective. Historical material provides for the understanding of current cultural, linguistic, religious, and ethnic variation. Major emphasis on the analysis of a range of contemporary communities from peasant to urban, from East to West, and from North to South.

**ANTH 1150. Middle East in Anthropological Perspective.**

A seminar focusing on anthropological methods of analyzing and interpreting Middle Eastern cultures and societies. Emphasizes the study of kinship, tribal structure, social organization and gender relations, ethnic groups relations, and urban-rural distinctions. Draws upon insights from these topics as a basis for understanding contemporary social, economic, and political dynamics in the region.

**ANTH 1151. Ethnographies of the Muslim Middle East.**

An introduction to ethnographic studies of Middle East, focus on: religion, language, modernity, gender, and political culture. Students will engage in critical examination which anthropologists sought to capture Middle Eastern life, and problems that have pervaded anthropological representation, methodologically and theoretically. You will learn, through the ways anthropologists approach the peoples, ideas, and cultures of the region in ways that complement and contradict the knowledge production of other disciplines, the processes we come to understand cultural difference, and ways this encounter sheds light on our selves and practices. Previous course in Anthropology/ Middle East studies is suggested. Enrollment limited to 25.

**ANTH 1201. Introduction to Geographic Information Systems and Spatial Analysis.**

This course offers an introduction to the concepts and techniques of Geographic Information Systems (GIS). Through weekly lab assignments and work on independent projects, students develop skills in cartography and coordinate systems, spatial database design, image processing, basic spatial analysis, hydrological modeling, and three-dimensional modeling. Discussions and case material draw primarily from the application of GIS in archaeology, anthropology, and cultural geography, including the study of archival materials and the ethics of geographic representation. Provides foundation for upper division coursework in spatial analysis. Software focuses on ESRI products (ArcMap, ArcScene, ArcCatalog, ArcGIS Pro).

**ANTH 1210. Culture and Cognition.**

Are there cultural differences in thought and perception? If so, what are these differences and to what are they attributable? Reviews the history of the controversy on "primitive thought," the influence of culture and environment on perception and concept formation, the development of cognitive operations, and differences in logical processes and decision making in other cultural contexts.

**ANTH 1211. Cross Cultural Perspectives on Children.**

Explores how the behavior and psychological functioning of children are shaped by culture and how different cultures tend to produce children with characteristic personalities, selves, thought patterns and behaviors. Every cultural community provides developmental pathways for children. These pathways are shaped by history and by the goals of parents, communities and children themselves. The course will focus on how human knowledge is transmitted through multiple cultural channels in both informal and formal contexts. **This is a service-learning course** in which students provide a needed service: Mentoring and tutoring Liberian young people in a literacy program. This will serve as a basis for conducting research on this refugee population and the final paper will be the recording of oral histories from teenagers. Enrollment limited to 30.

**ANTH 1212. The Anthropology of Play.**

Play enters all fields, from physics to human development, art to scientific experimentation. In all cultures, play figures centrally in rites of passage, child development, learning, and times of celebration. Central to this course is an understanding of the rules of play, its intentions in work, functions throughout human history, and role in formal education.

**ANTH 1220. Comparative Sex Roles.**

Covers specific cross-cultural issues of gender, cultural roles, the status of women, and their structural position in society. Themes of gender representations in the field of economics, ritual, and politics underline the concerns of the course. Though African and Asian communities are the primary focus, aspects of American society are drawn into consideration when relevant.

**ANTH 1221. Anthropology of Masculinity.**

Contemporary anthropological and historical study of masculine identities and practices throughout the world, focusing on topics such as the cultural economies of masculinity, cultural regions and images of manhood, male friendship, machismo, embodied masculinity, violence, power, and sexual fault lines.

Prerequisite: Prior course in Social Science or instructor's permission required.

**ANTH 1222. Kinships Compared: Relations, Families, and Connections.**

In all cultures people see themselves as related more closely to some people than to others and they usually experience that relation in terms of some shared substance such as blood. Beyond these generalizations there is an enormous variety of ways in which people live in, build, and maintain connections with others - in nuclear and extended families, peer groups, friends, ethnic groups, and so on. This course is about kinship as an idea, as an experience, and as an institution.

In the midst of divorce and blended families, new reproductive technologies, and adoption we will investigate kinship and connection in our own lives, in a range of other cultures, and within the discipline of Anthropology.

**ANTH 1223. Gender, Nature, the Body.**

This course is an interrogation of the ways in which gender difference comes to be conceived of as "natural" in modern science and different cultures. What is the connection between the science of gender difference and the colonial encounter? What are some different ways of imagining gender difference? How are gender inequalities structured and perpetuated by science and political economy? Through careful reading of historical and anthropological texts, we will learn about various ways in which gender systems are constructed and resisted, how science is used to construct gender, and how gender politics influence scientific outcomes and practices.

**ANTH 1224. Human Trafficking, Transnationalism, and the Law.**

Designed to give students an opportunity to engage in transnational research on social issues through an extended case study of a new generation of international norms that identify and combat "human trafficking." The course format combines seminar discussions, lectures, and small group exercises. Students will learn by doing. As we consider legal instruments, UN and U.S. documentary archives, anti-trafficking media such as films and websites, and the prosecution of criminal networks, we will experiment with alternative methodologies for analyzing them. We will study the relation of texts to the social and political contexts of their production and circulation. Enrollment limited to 30.

**ANTH 1227. Science, Activism, and Politics of Gender.**

How did much of the world agree that female genital cutting should be ended? This course explores grassroots and international campaigns in Africa and the West, effects of asylum and criminal laws, and international organizations' attempts to create evidence-based, scientific governance to end cutting. We will focus on ethnographies that problematize these interventions by analyzing their histories, cultural politics, contradictory effects on local communities, and global political ramifications. By examining interventions against cutting, this course offers a methodological and conceptual blueprint for researching local-global production of human rights crises and efforts to resolve them. Enrollment limited to 20. Not open to first year students.

**ANTH 1229. Democracy and Difference: Political Anthropology, Citizenship and Multiculturalism.**

In seemingly endless contexts, the term "democracy" is employed toward a wide range of political and social goals. This course examines the question of cultural citizenship - the right to be different while remaining part of the national community - as observable in places where liberal democracy's focus on the individual citizen clashes with communal wishes for collective representations of difference. By reading case studies from multiple locales, this course examines the attempts of democratic regimes to govern varied populations through the lens of political anthropology.

**ANTH 1230. Political Anthropology.**

Anthropological perspectives on politics, ranging from political processes in small-scale nonliterate societies to those in industrialized states. Special attention is given to the uses of symbolism and ritual in politics. Topics include: how is political legitimacy established and maintained? how are certain political views of the world created? what is the relationship between political change and the reinterpretation of history?

**ANTH 1231. Kings, Courts, and Aristocracy.**

Explores the nature and variety of kingship, royal courts, and aristocracy through comparative evidence, with strong emphasis on historical data, architecture, and archaeology. Test cases will be examined in Mesoamerica, Europe, Africa, and Asia.

**ANTH 1232. War and Society.**

Cross-cultural and historical perspectives on war and its larger social context. Course readings and lectures use political economic, cultural, and feminist approaches to understanding war and its effects on human communities. Case studies will be drawn from several eras and areas of the globe, including wars and post-wars in Guatemala, Sri Lanka, Mozambique, and the current global war on terror.

**ANTH 1233. Ethnographies of Global Connection: Politics, Culture and International Relations.**

Historically, IR and Anthropology examined interactions within and among bounded objects, whether sovereign states or small-scale societies. Increasingly, through, they explore flows, circulations and exchanges across borders, and their impact on different societies. Through case-studies, the course will analyze evolving understandings of "globalization" and "culture," and explore how effectively different genres of research and representation capture their complex interactions.

**ANTH 1234. Anthropology and Utopia.**

Utopia: designs for good societies and efforts to create them; and Anthropology: observation and description of societies. A wide-ranging reading and discussion class that will address such questions as: Does Anthropological description contribute to the design of good societies? Have Anthropologists been looking for Utopia? What does Anthropology suggest is wrong with existing societies? Whose job is it to judge societies? How would Utopias be like to live in? How have people tried to build Utopias? Have they failed completely? Is failure inevitable? Is a better world possible? What would it look like? How would we get there?

**ANTH 1236. Urban Life: Anthropology in and of the City.**

This course examines how anthropologists have worked in the city -- to understand dwelling and lived experience from the center to the margins of society; as well as how anthropologists have contributed to the study of the city -- conceptualizing the city itself in relation to its inhabitants, and working to understand how cities develop, decline, or are sustained. Anchored in key theory, classic texts, and contemporary ethnography, the course traces also the history, present, and possible futures of the discipline. Students learn the methods of urban ethnography, and gain hands-on experience through local field exercises and related writing assignments.

**ANTH 1237. The Just City: Installment I, Comparative Perspectives on Juvenile Justice Reform (URBN 1932).**

Interested students must register for URBN 1932.

**ANTH 1240. Religion and Culture.**

Global events in recent years seem to defy the commonsensical idea that religious traditions would decline or disappear in the modern epoch. We examine classic theories and methods in the study of religion to understand the continuing vitality of spiritual contemplation, asceticism, myths, rituals, magic, witchcraft, experiences of healing, and other ways of thinking and acting that are typically associated with (or against) the concept of religion.

**ANTH 1241. Science and Culture.**

This course is an introduction to methods and topics in the anthropology of science and technology, including: social inequalities in science, race, gender, post-coloniality, and the globalization of bio-technologies. The course will focus on ethnographies and films about science and culture, covering topics such as the social implications of genetic testing, bio-prospecting and the environment, the development of pharmaceuticals, and repercussions of nuclear technologies.

**ANTH 1242. Bioethics and Culture.**

This course examines bioethics from an ethnographic point of view. Topics include pregnancy, death, suicide, disability, medical research, organ transplantation, and population control. We will distinguish between the moral experiences of people faced with difficult choices, and the ethical ideals to which they aspire. We will then ask: how can these perspectives be reconciled? When trying to reconcile these perspectives, how can we account for powerful dynamics of race, gender, class, religion, and cultural difference? Finally, how can we develop a code of ethics that takes these issues into account and also is fundamentally connected to everyday life?

**ANTH 1244. Religion and Secularism: Affinities and Antagonisms.**

Global events in recent years seem to defy simple ideas of the confinements of religion to a wholly private, non-modern or otherworldly domain, in ways that compels scholars across a range of disciplines in the social sciences, critical theory and philosophy to rethink the category of secularism, and the relationship between religion and politics. Is secularism a failed ideal? In what ways are ideas of the secular being contested and reformulated in different global contexts? This course seeks to familiarize students with recent debates on secularism, working towards a more nuance understanding of the relationship between religion and politics.

**ANTH 1250. Film and Anthropology: Identity and Images of Indian Societies.**

The course examines representation of Indian society in film and anthropological literature. We compare how gender, national identity, religious practices, and historical events are portrayed in films and anthropological literature. We will explore the relationship between visual and textual, showing how film reflect and make comprehensible anthropological concepts of Indian culture, and creates different images of the society.

**ANTH 1251. Violence and the Media.**

The role of media in shaping perceptions of violent conflict. Analysis of constructions of the "violent other", "victims", and "suffering", the use of culture, ethnicity, and psychopathology as tropes for articulating the motivations of violent perpetrators. Multiple subject positions and political interests will be considered. Case studies include the Cold War, conflicts, insurgencies urban riots, the genocide, and terrorism. Pre-requisite: a previous course in Anthropology, or permission of the instructor.

**ANTH 1252. Kill Assessment: An Investigation into Death, Genocide and Other Forms of Violence.**

Is violence best understood as a set of "random acts" marginal to society? Or, do societies need violence to make culture systematic and functional? We will address two major issues throughout this course. First, we will discuss different types of violence: physical, material, structural and symbolic violence. Second, we will become familiar with ways that social groups turn violence into an aesthetic object and an artistic project.

**ANTH 1253. The Visual in Anthropology: Documentary Films and Society.**

This lecture course entails an introduction of the history of anthropology complemented with cinematic documentary films. Anthropological text is used to demonstrate continuity between the visual and the written word in select films screened for the course. Weekly topics address the anthropology of exclusive authors to critically juxtapose their work with discussion on either the convergence or discontinuity in the uses of the documentary films. Do films inform us or deviate from our understanding of the written anthropological ethnographies? How do we read culture from the visual? Is culture or the social readable or not?

**ANTH 1255. Anthropology of Disasters.**

This course examines disasters from an anthropological perspective. We focus on how disasters have been defined and understood, and work more broadly to see what they tell us about human conditions, vulnerabilities, and capacities for resilience building, survival, and long-term sustainability. Drawing on and comparing case studies from around the world, we also examine the nature of destructive agents; degrees of impact and injury; rescue, relief, and humanitarian responses; and the often slow and uneven process of recovery and resilience building.

**ANTH 1260. Indigenous People and Nature: Birds.**

An exploration of intersections of indigenous peoples with the natural world; this semester with the avian world. Through a sustained focus on one class of living things, the hope is to gain access to a range of issues concerning the relationship between people and the environment.

**ANTH 1300. Anthropology of Addictions and Recovery.**

The purpose of this course is to consider the uses and misuses alcohol, tobacco and drugs, and approaches to recovery from addictions. We will read some of the major cross cultural, ethnographic, linguistic, and social-political works on addictions. Students will conduct their own anthropological interviews regarding substance misuse and recovery as well as observe a local 12 step recovery meeting in the community. Students will engage in discussions of recovery with community partners. Enrollment limited to 20.

**ANTH 1301. Anthropology of Homelessness.**

Homelessness emerged as a public concern in the United States and in other industrialized countries in the late 1970s as people began encountering people living on the streets, a way of life formerly confined to the skid rows of large cities. In this course, through readings, readings, discussion, and hands on experiences with individuals and families experiencing homelessness, we will uncover the causes, conditions, and responses to homelessness. Each student will spend at least two hours per week in a local homeless-serving community partners in order to gain face to face experiences. The field placements will be facilitated by the professor.

**ANTH 1302. Politics and Symbols.**

It is impossible to understand politics without grasping the key role played by symbols, myth, and ritual. This course examines how political actors manipulate symbols and how they devise and utilize myths and rituals to win support. Through such symbolic activities, political reality is created, and political groups and identities formed. We look at examples throughout the world and throughout history, but pay special attention to the powerful symbols, myths, and rites employed by U.S. President Donald Trump, his supporters, and his opponents.

**ANTH 1305. Medical Humanities: Critical Perspectives on Illness, Healing, and Culture.**

Medicine is arguably the most humanistic of the hard sciences, one that strives to ensure the basic dignity of individuals. In our increasingly globalized world, access to medical care is recognized as a fundamental human right. However, there continues to be considerable debate over the "best" ways to provide medical services to economically and culturally diverse communities across the globe, given the complex ways that people prioritize and perpetuate their health. This seminar explores the multifaceted relationships between biomedicine and cultural understandings of illness, both in the US and worldwide. Instructor permission required. Enrollment limit 25 juniors and seniors.

**ANTH 1310. International Health: Anthropological Perspectives.**

This course explores the distinctive contribution that a critical approach—primarily that of medical anthropology—can make to the rapidly changing field of global health. The course takes a problem-based approach and focuses on “grand challenges”, such as those posed by global pandemics, humanitarian crisis, or the limited reach of child and maternal health programs in “resource-poor” locations. Through ethnographic case studies, we will examine how the concepts and practices associated with global health interventions travel to different parts of the world and interact with local agendas.

**ANTH 1311. Language and Medicine in Practice.**

This course is part of the Engaged Scholars Program and provides a foundation through which to think about how people's use of language shapes and is shaped by the medical sphere. Team taught by a linguistic anthropologist (Faudree) and medical anthropologist (Hamdy), this course provides foundations to understanding the scholarly intersections between language, medicine, and society. At the same time, the course offers a strong pragmatic dimension, as students will engage in volunteer and participant-observation work in clinical settings. Throughout the course we will be bringing our insight and observations of clinical practice to bear on anthropological tools of analysis. The course is limited to 20 students who will be admitted to the class via an application process. Priority given to seniors, those in the Engaged Scholars Program, and Anthropology concentrators.

**ANTH 1320. Anthropology and International Development: Ethnographic Perspectives on Poverty and Progress.**

Examines international development from an ethnographic perspective, looking critically at issues of poverty and progress from local points of view. Course is organized around the premise that culture is central to understanding processes of development. Broad development themes such as public health, agriculture, democracy, and the environment will be explored through readings representing a wide range of regions and cultures.

**ANTH 1321. Impact on Colonialism: Gender and Nationalism in India.**

This course is designed to look into colonial and post-colonial identities within the disciplines of history of literary studies. We will adopt an anthropological approach to those subjects, taking the cultural anthropology and construction of gender as the guideline for the analysis. Topics will include: orientalism, and gender; nationalism and religion.

**ANTH 1322. Human Rights, Social Justice, and Humanitarian Intervention: The Anthropology of Global Aid.**

From child soldiers to starving refugees, Americans are inundated with media images of violent suffering in the developing world. Our politicians frequently present international humanitarian intervention as an unequivocal good, without examining the actual outcomes of aid initiatives. This course uses tools from anthropology to explore the motivations for global aid, along with the concrete--and often unexpected--effects it produces on the ground. Foregrounding an ethnographic approach, we seek to understand the enduring influence of the concept of “rights,” the ways that local populations both welcome and resent humanitarian work, and the successes and failures of international charitable organizations. First-year students require an instructor override to register.

**ANTH 1323. The Culture and Politics of Colonial Cities: Migration, Markets and the Diaspora.**

Two colonial powers (British Empire and Portuguese) form the basis for this comparative approach to unravel and comprehend how colonial policies differed in two regions. Colonial cities have a special mystique, and studying them in the present unravels socio-historical and political connections make the present more meaningful. For post-colonialism, we address migration and Diaspora, the participation of groups under analysis in transnational economy and local and global markets. Focusing on the Diaspora, we seek to tie history and cultural development to the wider issue of Diaspora and the displacement of people, the search for opportunities, migration and the global markets.

**ANTH 1324. Money, Work, and Power: Culture and Economics.**

Economic activities take place within cultural contexts which define appropriate values and goals, and in societies varying in scale, technology, and organization. Looking cross-culturally, and at economic activities in societies such as the United States, this course examines the production, distribution, and consumption of material goods, analyzing these as essentially social activities - properly understood only when we take account of social relations and cultural values. Consequently, the course also investigates the extent to which the words commonly used to describe economic life, such as “market”, “wealth”, “price”, “profit”, “work”, and “money”, are culturally specific rather than universally applicable. At least one previous course in Anthropology or another social science is strongly recommended.

**ANTH 1325. Business and Entrepreneurship in Global Perspective.**

In a world of free trade, government downsizing, and the rapid movement of people and ideas, business and entrepreneurialism have become central to many peoples' economic livelihoods and social identities. Anthropologists have most often treated business and entrepreneurship as reflections of culture and social life, rather than sites of production in their own rights. Corporate workplaces, small businesses, and trade encounters are starting points for understanding myriad different social outcomes: novel forms of intercultural communication, new patterns of transnational labor migration, changing class configurations, and forums through which socially marginalized groups participate in society.

**ANTH 1326. The New Economic Anthropology.**

This course introduces students to the new economic anthropology of capitalism and situates it within the historical development of economic anthropology since the late 19th century. The course begins by introducing students to basic notions of 'economy' as understood in the ancient Mediterranean up through to the present. The course covers early anthropological research into forms of personhood and sociocultural organization that contrasts sharply with the assumed universality of homo economicus. The course focuses on key debates within economic anthropology over the possibility of using 'western' economic categories for analysis and explores some of the alternative frameworks developed by anthropologists.

**ANTH 1330. Women in Socialist and Developing Countries.**

A seminar, jointly taught by a sociologist and an anthropologist, exploring the changing role of women in the former socialist countries of Eastern Europe and developing countries in Africa and Asia. Includes women's position, ideologies, and choices within these societies, and the transitions that are taking place. Contributes to a better understanding of the role of women in our own society.

**ANTH 1400. Race, Culture, and Ethnic Politics.**

A seminar addressing the subjects of race, culture, and ethnicity, focusing on minority groups in the U.S. Seeks to clarify the philosophical and theoretical issues in contemporary America using a cross-disciplinary approach.

**ANTH 1410. Reconstructing Multiraciality.**

An examination of, first, the racial and social history of interracial and interethnic relations in the U.S. and different parts of the world, then, the contemporary American situation and changing trends in these cross-group relationships. Exploratory and interdisciplinary-intended to open a dialogue on multiple issues involved, diachronically as well as synchronically.

**ANTH 1411. Nations within States.**

Examines the interactions between small-scale indigenous societies (often referred to as Fourth World Nations) and the modern states within which they now exist. The relationship is obviously asymmetrical, yet these ethnic or “racial” minorities have the support of world opinion and international organizations. The sociocultural, economic, and political structure of these nations within states is the focus of the course.

**ANTH 1412. Anthropology of State Power and Powerlessness.**

How do we conceptualize state power? Is Power primarily a capacity for force and coercion or a source of welfare and social cohesion? States the world over often do not manage to provide adequate welfare or to maintain a monopoly on violence. How then might we understand state power not only as a capacity but also in its incapacities and vulnerabilities? We engage these paradoxes of state power through classic texts of anthropology and political theory including Foucault, Weber, Hobbes, Locke and Rousseau, in tandem with lively ethnographic analyses of state power in its capacities and incapacities.

**ANTH 1420. Ethnicity, Race, and Gender in the Americas.**

The historical and contemporary ethnography of ethnicity, race, and gender in the Americas. Topics include racism, multiculturalism, affirmative action, immigration, nationalism, acculturation, cultural autonomy, slavery, colonialism, and genocide.

**ANTH 1421. Ethnic American Folklore: Continuity and the Creative Process.**

An investigation of the dynamics of cultural continuity and the creative process involved in ethnic American folklore from oral narratives, life history, to foodways, and the senses of place. How do these cultural forms intersect with ethnicity, gender, group activism, and transnational contacts and exchanges? What are the new cultural forms, communication milieus, and venues negotiated or contested in contemporary America?

**ANTH 1422. The American Experience-Southeast Asian Refugees/Americans.**

Explores the diaspora of the Cambodian, the Hmong, the Lao, and the Vietnamese American from their initial exodus from their war-torn countries to their strategies for reconstructing new lives. Topics include socioeconomic changes, changing family life, gender roles, life choices, and the growing American generation. Materials used include films, songs, and autobiographies written by the refugees/Americans themselves.

**ANTH 1423. Migrants, Political Activism and the Racialization of Labor (POBS 1601M).**

Interested students must register for POBS 1601M.

**ANTH 1450. Living with Conflict.**

Exploration into ways in which cultural groups perceive and approach situations of conflict and how these situations in turn shape cultural practices, beliefs, and norms within the group. Examples are taken from ethnographies of different parts of the world and include a discussion of customs that help mitigate conflict among members of the group as well as conflict between groups.

**ANTH 1470. Illustrating and Interpreting the Past: Visual Representation in Archaeology.**

Archaeologists investigate culture using material artifacts as evidence about the past, but in order to communicate and compare that evidence, they must turn to technologies of reproduction and representation. This course traces the evolution of archaeological illustration, and its contributions to our knowledge of the past, in the context of technological and intellectual change over time. It explores the most up-to-date methods of archaeological illustration and their current place and future directions in the digital humanities. Working with objects from the Haffenreffer Museum of Anthropology, students will acquire experience in traditional and cutting-edge illustration techniques.

**ANTH 1505. Vertical Civilization: South American Archaeology from Monte Verde to the Inkas.**

This course offers an introduction to the archaeology of indigenous south American Civilizations, from the peopling of the continent around 13,000 years ago, to the Spanish Invasion of the 16th Century C.E. Throughout, we seek to understand the often unique solutions that South America indigenous peoples developed to deal with risk and to make sense of the world around them. Course lectures and discussions focus on recent research and major debates. Weekly sections draw on viewings of artifacts and manuscripts from the Haffenreffer Museum and the John Carter Brown Library.

**ANTH 1520.**

**How to Do Things with Maps: Cartography, Power, and Political Imagination, from**  
Maps do not merely represent reality; they both create and exceed it. This course critically examines the history and future of cartography, devoting particular attention to the role that maps and map making have played in the emergence and persistence of social power and political imagination. Among other topics, we consider how maps have shaped property and class relations; state sovereignty and royal authority; colonialism and imperialism; national and ethnic identities; migration and citizenship; and the relationship between humankind and nature, earth and the cosmos. Classes include visits to historic map collections and experimentation with critical mapping techniques. Creative final project.

**ANTH 1530. American Indian Archaeology.**

Traces the development of North American Indian cultures through the comparative study of prehistoric archaeological remains. Topics include the origins of Native Americans, Native American hunting-gathering lifeways, and the rise of the Native American agricultural societies. Emphasizes analyses of subsistence modes, settlement patterns, and symbolic systems.

**ANTH 1540. Power, Profit, and Pillage: The Rise and Fall of Trading Kingdoms in Asia.**

A course survey of the pre- and protohistoric archaeology of the eastern half of Asia. Topics include the origins and evolution of agricultural societies, the emergence of village and urban life, and the rise of states and kingdoms. The early states were often characterized and even reinforced by elaborate symbolic and religious systems expressed through ritual, art, and architecture-topics also covered by the course.

**ANTH 1550. Ancient Environments.**

This course teaches students how scientists investigate ancient environments and climate change and how these are related to ancient people and culture history. Students will learn about methods ranging from pollen and soil analysis to climate reconstruction and ecology. The class will look at a number of archaeological case studies in which climate or environment are believed to have been integral in past cultural developments. Case studies include the Levant, Mesopotamia, Polynesia, the American Southwest, and the Maya area. Students will be evaluated on class participation, weekly writing assignments, and final research papers. Prerequisite: ANTH 0500 or instructor permission.

**ANTH 1551. Techno-Ecologies: Health, Environment and Culture in the Digital Age.**

This course examines how people's health and lived experiences are impacted today by global environments in flux—and how these interconnected ecologies are deeply shaped and scrutinized in turn through various networks of technoscience. Topics will include food and nutrition in post-industrial economies; “conservation medicine” and the health of animals; energy and art; the global health implications of climate change; representations of race and indigeneity amid the “politics of nature”; society and microbiome; oil leaks and water wars; chemical exposures and disease; hybridity and nano-technology; and debates surrounding corporate social responsibility in practice.

**ANTH 1552. Environmental Change: Ethnographic Perspectives.**

What can anthropology's concepts and methods help us understand about the ways people unevenly experience, govern, fuel or contest global environmental changes today? Focusing on sociocultural accounts and ethnographic films, we will examine contemporary realities such as global warming and the anthropology of hydrocarbons; water politics and privatization of nature; pollution and its governance; agricultural change and human health; nuclear disaster; biodiversity and deforestation; the microbiome and society; and the ways environmental science is being produced alongside its emerging markets. Students will learn to put debates about ecological change in dialogue with anthropological thought and tools from the environmental humanities.

**ANTH 1554. The Anthropology of Violence.**

What does it mean to "do" or to "commit" violence? How do we recognize it when it is so ubiquitous? Be it through war, ethnic cleansing, social conflict, revolution, or various forms of interaction, the topic of violence has figured prominently in anthropological scholarship as well as social thought throughout history. This course will explore major theories of violence through engagement with social theory, ethnography, and media. We will use a range of perspectives including biopolitics, feminist critique, and queer theory, and host of examples ranging from communal violence to warfare to sexual violence to explore violence in-depth.

**ANTH 1555. Environmental Anthropology.**

Environmental anthropology is the study of how people interact with environments, past and present. This course explores how humans have affected their environments over time and how environment shapes human culture, employing an interdisciplinary anthropological perspective to illuminate these reciprocal interactions. This course uses a variety of approaches to understand how people interact with environments, employing cultural, biological, linguistic, and archaeological methods. This course covers human adaptation to environmental change from earliest prehistory up to the present day, students will have the opportunity to explore the practical and interpretive dilemmas of environmental challenges of the 21st century and beyond.

**ANTH 1556. Environmentalism and the Politics of Nature.**

This seminar covers fundamental themes and advanced topics in the field of environmental anthropology. Over the course of the semester, we examine the relationship between environmentalism, conservation, and globalization. The geographic focus is the Global South; articles and ethnographies cover cases in Africa, Asia, and Latin America. Topics include indigeneity, wilderness, parks and protected areas, politics of space, development, and ideas of native and invasive species.

**ANTH 1557. Sex, Gender, and Subversion: An Introduction to Queer Anthropology.**

From sex between straight men in fraternities to young girls dedicated to and raised as 'husbands' of a goddess, we will explore practices of gender and sexuality that run counter to heterosexual and cisgender norms. Through ethnographies, media, and lively class discussions, this course offers an introduction to issues of gender and sexual subversion globally as well as basic concepts that animate discussions of queer anthropology/theory. Course materials will impart an understanding of how sexuality and gender intersect with questions regarding race, class, caste, disability, religion, neoliberalism, (post)colonialism, power, and other thematic issues. There are no prerequisites to this course.

**ANTH 1570. American Indian Archaeology.**

This course traces the development of North American Indians and culture through a comparative study of prehistoric archaeological remains. Some of the questions addressed will be: When where and why did people first migrate into North America? Were these people responsible for the mass animal extinction at the end of the last Ice Age? What accounts for the similarities and differences in the politics and adaptations of Native Americans?

**ANTH 1580. ISIS, NAGPRA, and the Academy: Archaeology and Global Issues in Cultural Heritage.**

These days cultural heritage is all over the news. The wars in Syria, Iraq, Afghanistan, Yemen, and Libya have led to the destruction of countless sites and museums, and the looting of artifacts on a massive scale. Cultural heritage is a broad term however, and there are people and institutions around the world that have stakes in how it is defined and managed. How then do archaeologists, museum specialists, and others in the academy define, work with, and protect cultural heritage? This course will explore current themes in cultural heritage with an eye to material culture and ethical action.

**ANTH 1590. Archaeology of the Ancient Near East.**

A survey of archaeological sites in the ancient Near East from the Neolithic period to the early Roman Empire. Archaeology allows us to explore the development of agriculture, cities, and urban-based culture, as well as to make comparisons between cultures and examine issues of trade and commerce. We evaluate sites in relation to theoretical and methodological issues in anthropological archaeology.

**ANTH 1599. Politics of Indigeneity in Brazil (LACA 1503Q).**

Interested students must register for LACA 1503Q.

**ANTH 1600. Hunter-Gatherer Adaptations.**

Addresses the question: to what extent can the concept of the ecosystem, as developed in evolutionary biology, explain variability in human behavior? Examines the literature on contemporary hunting and gathering societies, both human and nonhuman, as well as relevant findings in archaeology and human biology. Background in general biology and anthropology is helpful, but not required.

**ANTH 1620. Global Historical Archaeology.**

The course examines historical archaeology as a multidisciplinary approach to the study of the historic past. Draws in recent research from different parts of the world, including North America, South Africa, Australia, the Caribbean, and South America, to illustrate historical archaeology's contributions to interpreting peoples' everyday lives and the diversity of their experiences in the post-1500 era.

**ANTH 1621. Material Culture Practicum.**

Combines theory with hands-on study of artifacts from historical archaeological contexts in North and Latin America. Students will gain skills and experience in artifact identification, dating, recording, analysis, and interpretation, and will conduct individual or team research projects on material things as products of everyday life and history. Enrollment limited to 15.

**ANTH 1623. Archaeology of Death.**

Examines death, burial, and memorials using comparative archaeological evidence from prehistory and historical periods. The course asks: What insight does burial give us about the human condition? How do human remains illuminate the lives of people in the past? What can mortuary artifacts tell us about personal identities and social relations? What do gravestones and monuments reveal about beliefs and emotions? Current cultural and legal challenges to the excavation and study of the dead are also considered.

**ANTH 1624. Indians, Colonists, and Africans in New England.**

The course explores the colonial and capitalist transformation of New England's social and cultural landscapes following European contact. Using archaeology as critical evidence, we will examine claims about conquest, Indian Extinction, and class, gender and race relations by studying the daily lives and interactions of the area's diverse Native American, African American, and European peoples.

**ANTH 1625. Questions of Remembrance: Archaeological Perspectives on Slavery in the New World.**

Archaeology of slavery, and particularly that of enslaved African-American communities in what came to be the United States, has been one of the fastest growing areas of archaeological research in the last few decades. This course will look into both classic and current literature on the archaeology of Atlantic slavery in order to understand the development of this archaeological subfield, from an initial focus on the living conditions of slaves on plantation sites to later interests in the processes of consolidation of African-American ethnicities. What are current challenges faced by those investigating the material constitution of African Diaspora through time?

**ANTH 1630. The City, the Maroon and the Mass Grave.**

How has archaeology contributed to our understanding of the past in the former Spanish colonies? How has this knowledge been presented and made socially relevant in present-day Latin America? This course proposes a critical insight into the achievements and future challenges of historical archaeology in Spanish speaking America, exploring the diverging trajectories that the discipline has had in different countries of the region, and the way in which archaeological knowledge about the colonial, republican, and contemporary periods has been either ignored or assimilated into the development of specific politics of cultural heritage at the local level.

**ANTH 1640. Maize Gods and Feathered Serpents: Mexico and Central America in Antiquity.**

Mexico and Central America are the cradles of one of the world's most enduring cultural traditions. The modern identity of the region was forged in these ancient traditions and their influence is apparent the world over, particularly in the area of agricultural domesticates (corn, chocolate, and chilies). Their cities (Teotihuacan, Monte Alban, Chichen Itza, etc.) rank among the greatest of the ancient world. This course offers a survey of Pre-Columbian Mexico and Central America, from the early monumental centers of the Olmec to the great Aztec city of Tenochtitlan, and explores how anthropologists and archaeologists investigate Middle America's indigenous past.

**ANTH 1650. Ancient Maya Writing.**

Nature and content of Mayan hieroglyphic writing, from 100 to 1600 CE. Methods of decipherment, introduction to textual study, and application to interpretations of Mayan language, imagery, world view, and society. Literacy and Mesoamerican background of script.

**ANTH 1660. The Ancient Body: Past Ideas about Human Physicality.**

Course addresses the burgeoning literature on the human body, especially the meanings attached to it through time and across cultures. Anthropology, history, and archaeology offer the principal sources of evidence for this introduction to past ideas about the body.

**ANTH 1670. Global Origins of Plant and Animal Domestication.**

A seminar providing the basic information on the prehistory of the Circum Arctic of Northern Fenno Scandinavia, Russia, and North America. Not open to first year students.

**ANTH 1681. Treaty Rights and Food Fights: Eating Local in Indian Country (ETHN 1750B).**

Interested students must register for ETHN 1750B.

**ANTH 1692. Southwestern Archaeology.**

This course is an introduction to the archaeology of the native peoples of the Southwestern United States and Northern Mexico. It discusses the history of the field and examines how it is currently re-engaging with contemporary native peoples. It emphasizes past and present cultural diversity and traces out long-term continuities in beliefs and practices. Special attention is given to comparing and contrasting three formative cultural systems - Chaco, Hohokam, and Paquimé - that linked the Southwest into a series of broad social, political, and ideological networks. Students will be introduced to the Southwestern collections of the Haffenreffer Museum of Anthropology.

**ANTH 1700. Evolutionary Theory and Human Behavior.**

An introduction to the field of human behavioral ecology, the course provides an overview of the application of the theory of natural selection to the study of behavior in an ecological setting. Focus is on anthropological topics related to reproduction such as issues of mating and parenting, sex ratios and sex preferences, and timing of life histories events.

**ANTH 1710. Biological Issues in Human Origins and Variability.**

This course examines the fossil record of human ancestors and evidence for cultural origins in relation to evolutionary theory in biology. We will review studies of living primates as well as modern genetic and DNA research for measures of contemporary human variability. Finally, we will explore forensic applications and case studies.

**ANTH 1720. The Human Skeleton.**

More than simply a tissue within our bodies, the human skeleton is a gateway into narratives of the past—from the evolution of our species to the biography of individual past lives. Through lecture and hands-on laboratory, students will learn the complete anatomy of the human skeleton, with an emphasis on the human skeleton in functional and evolutionary perspective. We'll also explore forensic and bioarchaeological approaches to the skeleton. By the course conclusion, students will be able to conduct basic skeletal analysis and will be prepared for more advanced studies of the skeleton from medical, forensic, archaeological, and evolutionary perspectives.

**ANTH 1764. Campus Culture.**

This course presents an anthropological perspective on American colleges and universities from the past to present. In particular, it will address the emerging relationships between curriculum, governance, funding sources, academic values, and campus life. Readings will include theoretical sources on higher education, historical and ethnographic accounts of particular institutions, and recent essays regarding the purpose, practices and criticism of contemporary colleges and universities.

**ANTH 1800. Sociolinguistics, Discourse and Dialogue.**

An investigation of the study of language and language behavior. Centers on the study of variation in language as seen in the social and cultural context of language use. This course will feature practice in writing fictional and dramatic dialogue based on real-life discourse. Presupposes some familiarity with basic linguistics (ANTH 0800, CLPS 0030, or equivalent).

**ANTH 1810. Language and Power.**

This course considers how language and power relate to each other in social life. We first consider theoretical approaches to the politics of language use, such as Foucault on discursive formations, Bourdieu on language as social capital, and Bakhtin on the oppression inherent in standard languages. We then consider specific issues, including joking as linguistic resistance, language death and revitalization, the cochlear implant debate, and racializing discourses. We end with language use in the U.S. "culture wars," covering such topics as the Ebonics controversy, language and electoral politics, hate speech, and English language legislation.

**ANTH 1820. Lost Languages: The Decipherment and Study of Ancient Writing Systems.**

Humans make many marks, but it is writing that records, in tangible form, the sounds and meanings of language. Creating scripts is momentous; writing facilitates complex society and is a crucial means of cultural expression. This course addresses the nature of writing in past times. Topics include: the technology of script; its precursors and parallel notations; its emergence, use, and "death"; its change over time, especially in moments of cultural contact and colonialism; writing as a physical object or thing; code-breaking and decipherment, including scripts not yet deciphered; and the nature of non-writing or pseudo- or crypto-scripts.

**ANTH 1830. The Pictured Text.**

Writing makes language visible, and thus concerns images. Language also delimits the legibility of imagery. Turning words into images and images into words occurs at great speed around us. This course explores the relation of text and image across world traditions—Chinese, Mayan, Egyptian, Islamic, Greco-Roman, and others, extending up to the present. Topics include: calligraphy, context, scribal practice, the form and shape of writing, including typography, hidden or pseudo-writing, graffiti, and contemporary art.

**ANTH 1848. Ethnography + Social Critique.**

This class will study classic and contemporary anthropological ethnographies – as well as studies from sociology, journalism, and history – that achieve ethnographic results, but will require discussion to determine what they “are.” We will examine the methods involved in research for the books and articles and how the ethnographies were written. Ethnographies will be chosen for their importance in anthropology and other fields, and will cover a broad range of topical and geographic contexts. This class is to study ethnographies more than to make them. Assignments will include practicing certain methods that are often employed by ethnographers.

**ANTH 1870A. Reproductive Health and Sexuality.**

No description available.

**ANTH 1880. From Magic Mushrooms to Big Pharma: Anthropology of Drugs.**

This course considers the social, political, and medical issues associated with illegal and pharmaceutical drugs. Some of the topics we consider are debates over the commercialization and criminalization of hallucinogenic plants such as marijuana, the politics of antiretroviral distribution, the ethics of medical and ethnic tourism, the legacies of colonialism and botanical migrations, "biopiracy" and indigenous knowledge, and critiques of modern food production, including the "locavore movement" and opposition to genetically modified foods. Through it all, we consider how the ways people talk and write about these issues affect concrete realities in daily life. Enrollment limited to 20 juniors and seniors.

**ANTH 1900. History of Anthropology: Anthropological Theories.**

Looks at the way anthropological methods and theories have interlaced through history to understand the dominant concerns in present-day anthropology. What were the important issues that influenced the discipline's history? Who were the significant, and not so well known, historic personalities who shaped anthropological practice and gave it its identity? Enrollment limited to 20.

**ANTH 1901. Anthropology in/of the Museum.**

This course provides an introduction to museums from an anthropological perspective. Topics include politics of representation and the construction of the "Other"; objects, identity, and meaning; collecting and cultural property; and collaboration, community engagement, and indigenous self-representation. Assignments involve work with the Haffenreffer Museum of Anthropology's exhibitions and collections. The course focuses on museums dedicated to natural and cultural history, but establishes theoretical and practical grounding for thinking about and working in other disciplines and other kinds of display institutions. It is suitable for both undergraduate and graduate students. There are no prerequisites; but familiarity with anthropology is presumed.

**ANTH 1910A. Anthropological Approaches to World Issues.**

Capstone seminar for Anthropology concentrators that explores how anthropology can challenge conventional or dominant wisdom about global social problems. Original research project required.

**ANTH 1910B. Anthropology of Place.**

The anthropology of place serves as a unifying theme for the seminar by bridging anthropology's subdisciplines and articulating with other fields of knowledge. Through readings and discussion, students will explore how place permeates people's everyday lives and their engagement with the world, and is implicit in the meanings they attach to specific locales, their struggles over them, and the longings they express for them in rapidly changing and reconfigured landscapes. Enrollment limited to 20.

**ANTH 1910C. Campus Culture.**

Colleges and universities are normative microcosms of the societies they serve. They create, partition, validate and communicate knowledge to rising generations. Their architectures, landscapes, daily routines, yearly cycles, and centennial celebrations are infused with symbolic meanings. Degree awarding ceremonies are among the most attended pilgrimages in our culture. Colleges and universities are gateways to society's essential professions and portals to a succession of alumni/ae bound by tradition. We will look at these institutions, their values, symbols, communities, governance, financial sources, academic structures, tensions, and adaptive strategies through the seeing eye of anthropology. Enrollment limited to 20.

**ANTH 1910D. Faces of Culture.**

The seminar is designed to allow you as anthropology majors to question to debate and examine some of the assumptions of the discipline, and critically explore the multifaceted uses of the concept. We will contextualize the study of culture with the history of anthropology and across other disciplines in the humanities and the social sciences. Limited to 20. Prerequisite: ANTH1900

**ANTH 1910E. Media and the Middle East.**

Media anthropology is a reinvented field within the discipline, emerging from critical engagements with ethnographic film and the crisis of representation of the 1980s. We'll explore the development of an anthropological approach to mass media studies by focusing on research conducted and theories derived from a particular region: the Middle East. Enrollment limited to 20 senior Anthropology concentrators. Prerequisite: ANTH 1621, 1900, 1940, or 1950.

**ANTH 1910F. Social Construction.**

No description available. Enrollment limited to 20.

**ANTH 1910G. Senior Seminar: Politics and Symbols.**

Examination of the key role played by symbols in politics. We examine symbols, myths, and rituals used to win support, create political reality, and form political groups, whether in defense of the status quo or creating movements seeking to overthrow it. The 2016 U.S. presidential, congressional, state, and local political campaigns receive attention. Students, in part working in groups, will engage in original research both on the 2016 American elections and a wide variety of historical and contemporary political developments, from ISIS and the Arab Spring to the American anti-abortion movement. Prerequisites: two previous courses in anthropology.

**ANTH 1910H. Anthropological Approaches to World Issues: Locating Migration.**

Migration is a main way that not only populations change, but also economies, landscapes, cultures, and identities. Drawing on cases from across the globe and through time, we will examine migration through both the global flows of capital and culture and through migrants' lives as they build families, fight for belonging, and transform the built environment. This capstone seminar is designed to further concentrators' engagement with anthropology, its methods, subfields, and its contributions to our knowledge of human experience. Particular emphasis will be on how anthropology aids in understanding the interrelation of global political and economic systems and local experiences.

**ANTH 1940. Ethnographic Research Methods.**

To understand the different theoretical assumptions that shape research efforts; to examine how hypotheses and research questions are formulated; and to appreciate the ethical and scientific dimensions of research by hands-on experience in fieldwork projects. Prerequisite: One Anthropology course.

**ANTH 1941. Context Research for Innovation.**

This course brings design thinking into conversation with anthropological research methods, examining the elements of a comprehensive perspective of context. It introduces students to design research methods, ethnographic methods, and how they work together. Students will learn how to use these methods to identify and engage in 'deep hanging out' with the problem, gap or inefficiency in question. They will then move on to patient, contextualized opportunity identification for meaningful innovation. By the end of the course, students will have developed a process for effective context analysis. This course is relevant for designers of products, services, organizations, and experiences. Enrollment limited to 40.

**ANTH 1950. Archaeological Field Work.**

Training in archaeological lab and field techniques for archaeologists. Topics include the nature of field archaeology, tools of the trade, interdisciplinary field techniques, ethics, excavations methodology, survey and GIS, systematic vs. ad hoc excavation, artifact analysis, site and artifact preservation. Students gain experience as practicing archaeologists through the active investigation of local historical and archaeological sites in the College Hill area.

**ANTH 1970. Individual Research Project.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ANTH 2000. History of Ethnological Theory.**

An examination of the intellectual roots and the development of theory and method in anthropology, from the discipline's origins in the nineteenth century to 1940, with an emphasis on sociocultural anthropology.

**ANTH 2010. Principles of Cultural Anthropology.**

A seminar exploring fundamental theoretical and ethnographic currents in 20th- and 21st-century cultural anthropology.

**ANTH 2015. Cosmopolitan Ethnography.**

Contributes to anthropological understandings of globalism, political and urban anthropology, with a focus on one particular theoretical orientation that may guide research design and/or analysis. In addition to studying this particular philosophy through which they might understand culture, this course offers a model for the adoption of any given theoretical lens that might be taken up, critiqued, and otherwise put to use in cultural analysis.

**ANTH 2020. Methods of Anthropological Research.**

A seminar on the methodological problems associated with field research in social and cultural anthropology. Designed to help students prepare for both summer and dissertation research.

**ANTH 2025. Research Design and Ethnographic Methods in Anthropology.**

The purpose of this seminar is to help graduate students conceptualize ethnographic research, formulate a research problem, develop a research design, consider its ethical implications, design appropriate methodologies and prepared the proposal for IRB approval. The methodologies will be discussed with a view to arriving at a critical understanding of the ethical, political and theoretical issues embedded in them and the way in which they fit into our conception of anthropological practice.

**ANTH 2030. Advanced Field Methods.**

A seminar for advanced graduate students returning from field research or preparing for dissertation field work. Case studies are used for a critical examination of research design and data analysis.

**ANTH 2035. Professional Preparation for Anthropologists.**

This course covers research ethics and politics, writing of proposals, theses, and articles, publishing, public speaking, CVs and resumes, and the job search.

**ANTH 2040. Advanced Social Theory.**

This seminar is for graduate students who have taken ANTH 2000 and ANTH 2010 or equivalent graduate introductory courses in anthropological theory. Topics to be explored in this seminar include contemporary theories of globalization, hybridity, the politics of identity, class, cultural citizenship, democracy, social suffering, structural violence, agency, human rights, militarization, the body, multisited ethnography, and writing culture.

**ANTH 2045. Proposal Writing Workshop for Anthropological Fieldwork.**

This course is designed for third-year graduate students in any subfield of anthropology or closely related fields who are writing grant proposals for dissertation research. Student grant proposals will be pre-circulated and workshopped. Students will gain familiarity with the format for writing successful proposals, with the strategies needed to operationalize them, and with the everyday academic labor of both offering and responding to substantive feedback.

**ANTH 2050. Ethnography.**

Each week this class will study classic and contemporary ethnographies - as well as studies from sociology, journalism, and history - that achieve ethnographic results, but will require discussion to determine what they "are". We will carefully examine the methods involved in research for the books and how the ethnographies were written. Ethnographies will be chosen for their importance in anthropology and other fields, and will cover a broad range of topical and geographic contexts.

**ANTH 2055. Infrastructure, Inequality and Ignorance.**

This seminar provides an introduction to three literatures: those on infrastructure, inequality, and knowledge/ignorance. We will examine the concepts as distinct ones as well as in relation to their overlapping concerns. Cases are drawn from a wide variety of mainly contemporary settings around the world. The emphasis will be on ethnographic and textual approaches to the issues. Appropriate for graduate students from across the social sciences.

**ANTH 2060. Anthropology Dissertators' Seminar.**

This seminar is for post-field graduate students in residence at Brown who are at any stage of writing their dissertations. It is intended to support dissertators by providing a structured community, providing a setting for sharing goals, and workshopping writing.

**ANTH 2100A. Contemporary Ethnography on Latin America and Beyond.**

This graduate seminar addresses contentious and creative issues in anthropology by focusing on the science and art of ethnography. Readings feature new transnational ethnographic writers. Topics: alternative research framing, the relation of field research to writing, representing violence and porous borders in practice.

**ANTH 2100B. People of the Andes.**

No description available.

**ANTH 2110. Critical Perspective: Social and Cultural Issues in Africa.**

Focuses on debates over significant social and cultural issues in Africa. Historical and cultural continuities are premised as a way of understanding political, economic, and religious complexities in present-day Africa.

**ANTH 2120. Critical Locations in the Anthropology of the United States.**

This graduate seminar locates and explores the anthropology of the United States. Students first work to understand the social history of anthropology in the U.S., including its theoretical and methodological contributions, and the range of approaches and examples. The course is then organized thematically as students explore key moments along this trajectory, through a close reading of ethnographic work in various settings. The course places a particular emphasis on scholars, topics, and populations that have been historically understudied and sidelined within the larger inquiry, but that are nonetheless critical for the expanded contribution of anthropological work in this field.

**ANTH 2130. Biopolitics.**

Foucault's concept of biopolitics transformed how anthropologists understand power, agency, modernity, and, more broadly, life itself. As a theoretical tool, it has informed a range of contemporary social science—from intersectional research on reproductive health to theories of the postcolonial state to ethnographies on consumerism. This course will introduce graduate students to the core components and theoretical lineages of biopolitics, and recent ethnographic and archival work that builds on and challenges Foucault's seminal texts. We will highlight the work of Black, indigenous, women, and queer scholars who have sharpened our discipline's apprehension of biopolitics through intersectional, postcolonial, and anti-racist perspectives.

**ANTH 2200A. International Health.**

This graduate seminar (upper-class undergraduates may seek permission from the instructor) focuses on the social and cultural complexity of health problems in developing nations, exploring anthropological approaches to public health. International health issues will be investigated using historical, ecological, epidemiological, political-economic, and ethnomedical perspectives, and the role of "applied" anthropology will be explored.

**ANTH 2210. Analysis of Social Structure.**

This course will discuss the analysis of kinship and the construction of the person cross culturally.

**ANTH 2230. Medical Anthropology.**

This graduate seminar provides a theoretical, methodological, and ethnographic foundation in medical anthropology. The focus will be on sociocultural approaches to the study of the suffering, illness and the body, though the course will also engage with key issues in biocultural approaches to understanding disease processes. Topics will include: social suffering, religion and medicine, local biologies, gender and the body, biotechnology, bioethics, caregiving and doctoring, and the global burden of disease.

**ANTH 2240. Anthropological Approaches to the Body.**

This course is an in-depth exploration of theoretical and analytical approaches to the body in socio-cultural anthropology. Topics covered include: the body as site and sign of the social order; theories of embodiment and the cultivation of the self; bodily order and social ritual; the senses; the relationship between bodily epistemology and socio-political structures; the commodification of the body; technological intervention in the body; the visualization of the bodily interior; and state interventions and regulations of bodily processes.

**ANTH 2250A. Psychology of Gender.**

This course critically examines the role of gender in development and maturation, or the psychological differentiation of males and females, in the context of their socio-cultural environment.

**ANTH 2251. Anthropology of Gender and Sexuality.**

In this course we will engage with writings from the social sciences on sex, gender, and sexuality. We will look at the categories that anthropologists have created to explain bodies, sexual choices, and subjectivities and historicize and interrogate them. We will do close readings of ethnographies to see how sex, sexuality, and gender are theorized and how these ideas are applied to a variety of cultural contexts and how people live their everyday lives. Enrollment limited to 15.

**ANTH 2252. Decolonizing Feminist Anthropology: Theory and Method.**

This course will build upon the momentum gained from the work and engagement of critical, and radical scholars of postcolonialism, feminism, race, cultural studies, sexuality studies, and indigeneous studies in revealing multiple blind spots and various forms of violence associated with the privileging of Eurocentric, liberal, secular, enlightenment, and rationalist ways of seeing the world.

**ANTH 2253. Transnational Feminist Politics and Knowledge Production.**

This interdisciplinary graduate seminar aims to de-center and decolonize discussions about feminism(s) by focusing on transnational feminist politics and knowledge production. Course readings and discussions will engage theoretical and methodological tools associated with transnational feminist politics and decolonizing knowledge. At the same time, the course will provide concrete empirical examples of struggles, strategies and forms of feminist resistances emanating from the Middle East, Latin America, Africa and South Asia. The course will encourage students to ask questions about transnational feminist solidarities and knowledge productions as well as power imbalances, tensions and conflicts within and between feminist groups and initiatives.

**ANTH 2255. Gender, Liberalism, and Postcolonial Theory.**

What makes the concept of gender useful to think with, both within academia and beyond? How does gender relate to the political projects of feminism and liberalism? What explanatory potential do gender and liberalism hold for addressing (or obfuscating) social inequalities, racism, and other forms of oppression? Drawing on multiple disciplines in the social sciences, this course offers students analytical tools to theorize gender, sexuality, and liberalism in the contemporary world. Building on critical interventions of post-colonial theorists, we will explore anthropological contributions to the study of gender, sexuality and liberalism through ethnographic writings. Open to graduate students and seniors.

**ANTH 2260. Politics and Symbolism: At the Interface of Anthropology and History.**

An examination of the theoretical roots of the symbolic analysis of politics and the application of these perspectives to both contemporary and historical study of political life.

**ANTH 2261. Globalisms: Empires and Social Movements.**

This seminar explores globalism in two of its contemporary forms, including empires and global networks of social movements. Focuses on theories of empire and on their implications for anti-war and anti-corporate movements in particular.

**ANTH 2262. Social Analysis, Public Goods and Social Movements.**

This seminar explores some of the political, ethical, and social issues and dilemmas involved in using social analysis to advance public interests.

**ANTH 2263. Colonialism and Neocolonialism.**

A seminar addressing the concepts of colonialism, postcolonialism, and nationalism. The nature of colonial "rule of law," the stages of the dissolution and formation of "African" native states, and the notion of "traditional" power are all examined in a comparative context using Francophone and Anglophone case studies in Africa.

**ANTH 2264. Ethnicity, Race, and Nationalism.**

Study of key issues debated by anthropologists regarding ethnicity, race, and nationalism, with examination of concepts such as identity, cultural citizenship, transnationalism-globalization, gender, home, and acculturation-hybridity.

**ANTH 2270. Ethnography and Women's Literature of Non-Western Societies.**

Interdisciplinary and cross-cultural exploration of representation in ethnographic and literary texts. Confronts the apparent analytical opposition of objectivity and subjectivity and addresses the challenge in the academy of "writing culture." Encourages connections between women writers in the Third World and American minority discourse to deepen understanding of global politics and the poetics of culture.

**ANTH 2300. Anthropological Demography.**

A seminar devoted to the investigation of the interface of anthropology (especially sociocultural anthropology) and demography. A wide variety of demographic topics-fertility, mortality, marriage, migration-are considered, and the links between anthropological and demographic writings on and approaches to these areas are examined.

**ANTH 2301. Interdisciplinary Perspectives on Population.**

Brown University's 10 year of excavations has created a lens through which to examine the complexities of the Nabataeans and their culture. The main information about the Nabataeans comes primarily from their extant monuments. There are also literary and epigraphic sources. This seminar will create a constellation of readable ideas, although we will still be left with many open questions about these people.

**ANTH 2302. Field Methods for Anthropological Demography.**

Concentrates on methods for collecting or producing data that bear on demographic issues and that are suitable for demographic analyses. Topics include: fertility histories, life histories, genealogies, household surveys, networks, and social units. Particular emphasis on the social contexts of data production, local meanings, and discovering appropriate categories and units of analysis.

**ANTH 2303. Anthropology of Fertility and Reproduction.**

A seminar examining the social significance and cultural meanings of human fertility and reproduction, including the social and cultural consequences of different fertility levels, the variety of people involved in decisions about reproduction, the allocation of responsibility for parenthood, and the political implications of contemporary debates about the meanings of biological and social reproduction.

**ANTH 2304. Issues in Anthropology and Population.**

This seminar is intended for graduate students and postdoctoral fellows interested in anthropological approaches to population issues. The overarching theme of the seminar is the contributions that sociocultural anthropology can make to the understanding of population processes.

**ANTH 2310A. Violence, Governance, and Transnationalism.**

This seminar deals with contemporary anthropological approaches to violence, governance, and transnationalism. As faculty and graduate students, we have worked together to identify important ethnographic experiments that provide novel anthropological framings of major global issues. Our goal is to interrogate anthropological writing, explore its relation to field research, and trace anthropological appropriations of contemporary social theory from a variety of sources. Prerequisites: three previous courses in Anthropology.

**ANTH 2310B. Violence, Governance and Transnationalism.**

Deals with contemporary anthropological approaches to intersection of violence, human rights, law, and transnationalism. Readings will focus on the development of a new generation of research in the anthropology of human rights and its implication for rethinking legal anthropology. Anthropology has moved beyond the "cultural relativism" paradigm on to new projects which analyze the appropriation and use of human rights discourse and international norms as political tools for a variety of national and local agendas. Anthropologists have produced ethnographies that focus on the institutional grounding of legal discourse and practice in community and neighborhood politics, social movements, and ethnic nationalist projects. They have studied the radical reworking of rights discourse in different parts of the world and debated the ways in which these technologies for legal redress in the face of violence are politically empowering and/or disempowering in particular historical and cultural circumstances.

**ANTH 2315. Anthropology of State Power and Powerlessness.**

How do we conceptualize state power? Is sovereign power primarily a capacity for force and coercion or a source of welfare and social cohesion? States the world over often do not manage to provide adequate welfare or to maintain a monopoly on violence. How then might we understand state power not only as a capacity but also in its incapacities and vulnerabilities? We engage these paradoxes of power through classic texts of anthropology and political theory including Foucault, Deleuze, Weber, Hobbes, and Rousseau, in tandem with lively ethnographic analyses of state power in its capacities and incapacities.

**ANTH 2320. Ideology of Development.**

An examination of different development theories and their relationship to field application. The analysis of project preparation and implementation is used to question the goals and objectives of Western and indigenous notions of progress and change within a social and economic context. Third World countries are utilized as case studies to address related issues, such as the meaning of development.

**ANTH 2321. Coming to Terms with India: Anthropology of Colonialism and Nationalism.**

This course is designed to look into the impact of colonialism, nationalism and the postcolonial identities of the person in India. In addition to the primacy of the anthropological focus, the seminar will also draw from cultural studies and history. Our engagement will be with topics of nationalism, religion, and caste and class formation during colonial and post colonial rule. Additional topics using the anthropological approach will include orientalism and gender; the location of national minorities within the Indian democracy and the future of fundamentalism; post-colonialism and the emerging new person.

**ANTH 2400. Museums and Material Culture.**

This seminar discusses anthropological approaches to material culture in museum contexts, by developing themes, selecting objects, and preparing a preliminary script for an exhibition in Manning Hall. This year, "Humans and Nature." (ANTH 2400 is followed by ANTH 2410. Students can enroll in each course independently). Instructor permission required.

**ANTH 2410. Exhibitions in Museums.**

The goal of this seminar is to implement in Manning Hall an exhibition script developed in ANTH 2400, on "Humans and Nature" (see that course). Topics discussed and put into practice include: representation of cultures modern museum displays; thematic development; interpretation, handling, and mounting of objects in contextually rich and engaging museum environments; conservation; audience assessment.

**ANTH 2420. Museums in Their Communities.**

This seminar examines in detail the internal workings of museums (of anthropology, art, history, science, etc) and their place in their communities. Accessions, collections management, conservations, education, exhibition, marketing, research, and museum management are among the topics discussed.

**ANTH 2450. Exchange Scholar Program.****ANTH 2500A. Problems in Archaeology: Archaeology of Colonialism.**

Explores the theoretical discourses shaping anthropological approaches and defining archaeological projects on culture contact and colonialism. Attention will be given to examining colonial encounters between Europeans and indigenous peoples as ongoing processes rather than particular historical moments, and to looking at recent efforts at decolonizing archaeological practice.

**ANTH 2500B. Problems in Archaeology: The Archaeology of Empires.**

Empires have been among the most influential political and social formations in global history. This seminar will explore general literature on imperial genesis, consolidation and decline, as well as considering the specific and unique contributions archaeology and art history can offer to the understanding of empire. A variety of case studies will be explored, with selections depending on student interest.

**ANTH 2500C. GIS and Remote Sensing in Archaeology.**

This course will train advanced students in the laboratory methods needed for the successful application of GIS and remote sensing technologies in archaeology. We will conduct an exhaustive literature review of spatial research in archaeology to place GIS and remote sensing within a broader conceptual framework. Each student will design their own geodatabase that they will be able to build upon in future research.

**ANTH 2501. Principles of Archaeology.**

Examines theoretical and methodological issues in anthropological archaeology. Attention is given to past concerns, current debates, and future directions of archaeology in the social sciences.

**ANTH 2510. Circumpolar Archaeology.**

A specialized course dealing with advanced problems in Arctic archaeology. Although primarily oriented toward the northern specialist, the seminar is designed to present, by example, methodological and analytic problems that are applicable to most archaeological areas and to hunting, fishing, and gathering societies.

**ANTH 2520. Mesoamerican Archaeology and Ethnohistory.**

Seminar focusing on current issues in the archaeology and history of Mesoamerica, including Mexico and Northern Central America. Draws on rich resources at Brown, including the John Carter Brown Library.

**ANTH 2530. Archaeology of Tribes and States.**

Explores concepts of complexity and inequality and how these have been used to study the origins and development of complex society. Categories such as tribes, chiefdoms, the state, etc. are evaluated as conceptual tools for understanding the rise of civilizations and early state formation, as well as transformations in later historical contexts.

**ANTH 2540. Historical Archaeology: From Colony to City.**

Examines historical archaeology as a complex field of inquiry that engages multiple sources of evidence and incorporates a wide range of theoretical and methodological approaches. The seminar will consider the range of evidence available to historical archaeologists, and draw on examples from colonies and cities around the world to explore how the richness and diversity of the evidence is used.

**ANTH 2541. Ethnohistory.**

Seminar topic: "Comparative Ethnohistory of the Americas." Examines Indian/European encounters and interactions in North America and Latin America. Explores the conjunction of anthropology and history, combining both theoretical orientations from and methodology of the two disciplines, with particular emphasis on the problems posed by comparative analyses.

**ANTH 2550. Archaeological Research Methods, Theory and Practicum.**

The seminar is designed to help the student development good research and analytical skills in archaeology. By focusing on research design, analytic techniques, the relationship between theory and methodology, and the development of research proposal and/or reports, we shall examine how both scientific and humanistic theoretical concerns can be sources of meaningful archaeological questions, and how these questions can be transformed into viable research problems.

**ANTH 2560. Lived Bodies, Dead Bodies: The Archaeology of Human Remains.**

Bioarchaeology is the study of human remains from archaeological contexts. We will survey the "state of the art" in bioarchaeology, while exploring its relevance and application to the archaeology of complex societies. We will survey a range of bioarchaeological methods and applications, including paleopathology, stable isotope analysis, population affinity/ancient DNA, perimortem trauma, and body modification. In turn, we will explore how bioarchaeology can be used to approach a wide range of archaeological problems relative to complex societies, including subsistence, economy, migration, urbanism, social inequality, conflict and warfare, and identity. Open to graduate students only. S/NC.

**ANTH 2590. Space, Power, and Politics.**

This course critically examines the politics of space and landscape from an interdisciplinary perspective. After reading key texts in political philosophy and cultural geography, we explore themes in recent scholarship including the spatial production of sovereignty, capital, and political subjectivity and the evolving role of digital cartography in public culture and politics. Case studies are drawn from archaeology, art history, ethnography, cultural geography, and history.

**ANTH 2800. Linguistic Theory and Practice.**

An introduction to theoretical and methodological issues in the study of language and social life. We begin by examining semiotic approaches to language. We turn to classical research on language as a structured system - covering such topics as phonology and grammatical categories - but we focus on the implications of such work for broader social scientific and humanistic research. We then consider areas of active contemporary research, including cognition and linguistic relativity, meaning and semantics, pronouns and deixis, deference and register, speech acts and performativity, interaction, verbal art and poetics, reported speech, performance, and linguistic ideology.

**ANTH 2810. Performance Theory.**

Explores the concept of performance as used in several social science and humanities disciplines: linguistics, anthropology, folklore, ethnomusicology, and theater. Also addresses practical problems of conducting research on performance forms. Seminar.

**ANTH 2900. Teaching Practicum.**

No description available.

**ANTH 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**ANTH 2980. Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ANTH 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## Applied Mathematics

### Chair

Yan Guo

### Associate Chair

Kavita Ramanan

The Division of Applied Mathematics at Brown University is one of the most prominent departments at Brown, and is also one of the oldest and strongest of its type in the country. The Division of Applied Mathematics is a world renowned center of research activity in a wide spectrum of traditional and modern mathematics. It explores the connections between mathematics and its applications at both the research and educational levels. The principal areas of research activities are ordinary, functional, and partial differential equations; stochastic control theory; applied probability, statistics and stochastic systems theory; neuroscience and computational molecular biology; numerical analysis and scientific computation; and the mechanics of

solids, materials science and fluids. The effort in virtually all research ranges from applied and algorithmic problems to the study of fundamental mathematical questions. The Division emphasizes applied mathematics as a unifying theme. To facilitate cooperation among faculty and students, some research programs are partly organized around interdepartmental research centers. These centers facilitate funding and cooperative research in order to maintain the highest level of research and education in the Division. It is this breadth and the discovery from mutual collaboration which marks the great strength and uniqueness of the Division of Applied Mathematics at Brown.

For additional information, please visit the department's website: <https://www.brown.edu/academics/applied-mathematics/>

## Applied Mathematics Concentration Requirements

The concentration in Applied Mathematics allows students to investigate the mathematics of problems arising in the physical, life and social sciences as well as in engineering. The basic mathematical skills of Applied Mathematics come from a variety of sources, which depend on the problems of interest: the theory of ordinary and partial differential equations, matrix theory, statistical sciences, probability and decision theory, risk and insurance analysis, among others. Applied Mathematics appeals to people with a variety of different interests, ranging from those with a desire to obtain a good quantitative background for use in some future career, to those who are interested in the basic techniques and approaches in themselves. The standard concentration leads to either the A.B. or Sc.B. degree. Students may also choose to pursue a joint program with biology, computer science or economics. The undergraduate concentration guide is available here (<http://www.brown.edu/academics/applied-mathematics/undergraduate>).

Both the A.B. and Sc.B. concentrations in Applied Mathematics require certain basic courses to be taken, but beyond this there is a great deal of flexibility as to which areas of application are pursued. Students are encouraged to take courses in applied mathematics, mathematics and one or more of the application areas in the natural sciences, social sciences or engineering. Whichever areas are chosen should be studied in some depth.

### Standard program for the A.B. degree.

#### Prerequisites

MATH 0090 & MATH 0100	Introductory Calculus, Part I and Introductory Calculus, Part II
	Or their equivalent

#### Program

Ten additional semester courses approved by the Division of Applied Mathematics. These classes must include: <sup>1</sup>

MATH 0180	Intermediate Calculus	1
MATH 0520	Linear Algebra <sup>2</sup>	1
APMA 0350 & APMA 0360	Applied Ordinary Differential Equations and Applied Partial Differential Equations <sup>3</sup>	2
	Select one course on programming from the following: <sup>4</sup>	1
APMA 0090	Introduction to Mathematical Modeling	
APMA 0160	Introduction to Scientific Computing	
CSCI 0040	Introduction to Scientific Computing and Problem Solving	
CSCI 0111	Computing Foundations: Data	
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
CSCI 0170	Computer Science: An Integrated Introduction	

Five additional courses, of which four should be chosen from the 1000-level courses taught by the Division of Applied Mathematics. APMA 1910 cannot be used as an elective.

Total Credits 10

- <sup>1</sup> Substitution of alternate courses for the specific requirements is subject to approval by the division.
- <sup>2</sup> Concentrators are urged to consider MATH 0540 as an alternative to MATH 0520.
- <sup>3</sup> APMA 0330, APMA 0340 will sometimes be accepted as substitutes for APMA 0350, APMA 0360. APMA 1910 cannot be used as an elective.
- <sup>4</sup> Concentrators are urged to complete their introductory programming course before the end of their sophomore year.

## Standard program for the Sc.B. degree.

### Program

Eighteen approved semester courses in mathematics, applied mathematics, engineering, the natural or social sciences. These classes must include:<sup>1</sup>

MATH 0090 & MATH 0100	Introductory Calculus, Part I and Introductory Calculus, Part II	2
MATH 0180	Intermediate Calculus	1
MATH 0520	Linear Algebra <sup>2</sup>	1
APMA 0350 & APMA 0360	Applied Ordinary Differential Equations and Applied Partial Differential Equations <sup>3</sup>	2
Select one senior seminar from the APMA 1930 or APMA 1940 series, or an approved equivalent.		1
Select one course on programming from the following: <sup>4</sup>		1
APMA 0090	Introduction to Mathematical Modeling	
APMA 0160	Introduction to Scientific Computing	
CSCI 0040	Introduction to Scientific Computing and Problem Solving	
CSCI 0111	Computing Foundations: Data	
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
CSCI 0170	Computer Science: An Integrated Introduction	
Ten additional courses, of which six should be chosen from the 1000-level or higher level courses taught by the Division of Applied Mathematics. APMA 1910 cannot be used as an elective.		10
<b>Total Credits</b>		<b>18</b>

- <sup>1</sup> Substitution of alternate courses for the specific requirements is subject to approval by the division.
- <sup>2</sup> Concentrators are urged to consider MATH 0540 as an alternative to MATH 0520.
- <sup>3</sup> APMA 0330, APMA 0340 will sometimes be accepted as substitutes for APMA 0350, APMA 0360.
- <sup>4</sup> Concentrators are urged to complete their introductory programming course before the end of their sophomore year.

## Applied Mathematics-Biology Concentration Requirements

The Applied Math - Biology concentration recognizes that mathematics is essential to address many modern biological problems in the post genomic era. Specifically, high throughput technologies have rendered vast new biological data sets that require novel analytical skills for the most basic analyses. These technologies are spawning a new "data-driven" paradigm in the biological sciences and the fields of bioinformatics and systems biology. The foundations of these new fields are inherently mathematical, with a focus on probability, statistical inference, and systems dynamics. These mathematical methods apply very broadly in many biological fields including some like population growth, spread of disease, that predate the genomics revolution. Nevertheless, the application of these methods in areas of biology from molecular genetics to evolutionary biology has grown very rapidly in with the availability of vast amounts of genomic sequence data. Required coursework in

this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The students will focus in particular areas of biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations.

## Standard program for the Sc.B. degree

Required coursework in this program aims at ensuring expertise in mathematical and statistical sciences, and their application in biology. The students will focus in particular areas of biology. The program culminates in a senior capstone experience that pairs student and faculty in creative research collaborations. Applied Math – Biology concentrators are prepared for careers in medicine, public health, industry and academic research.

### Required Courses:

*Students are required to take all of the following courses.*

MATH 0090	Introductory Calculus, Part I	1
MATH 0100	Introductory Calculus, Part II	1
or MATH 0170	Advanced Placement Calculus	
MATH 0180	Intermediate Calculus (or equivalent placement)	1
MATH 0520	Linear Algebra	1
or MATH 0540	Honors Linear Algebra	
CHEM 0330	Equilibrium, Rate, and Structure <sup>1</sup>	1
PHYS 0030	Basic Physics A	1
or PHYS 0050	Foundations of Mechanics	
Select one of the following sequences:		2
APMA 0350 & APMA 0360	Applied Ordinary Differential Equations and Applied Partial Differential Equations I	
APMA 0330 & APMA 0340	Methods of Applied Mathematics I, II and Methods of Applied Mathematics I, II	
APMA 1650	Statistical Inference I	1
or APMA 1655	Statistical Inference I	
APMA 1070	Quantitative Models of Biological Systems	1
APMA 1080	Inference in Genomics and Molecular Biology	1
or NEUR 2110	Statistical Neuroscience	
BIOL 0200	The Foundation of Living Systems (or equivalent)	1

### Additional Courses

In addition to required courses listed above, students must take the following:

Two additional courses in Applied Math or Biology. At least one of these must be a directed research course, e.g. a senior seminar or independent study in Applied Math or a directed research/independent study in Biology. For example:<sup>1</sup>

A course from the APMA 1930 series		
A course from the APMA 1940 series.		
APMA 1970	Independent Study	
BIOL 1950	Directed Research/Independent Study	
BIOL 1960	Directed Research/Independent Study	

We strongly recommend that Applied Mathematics-Biology concentrators take one of the following programming courses on or before their first semester as a concentrator: APMA 0160, CSCI 0040, CSCI 0150, CSCI 0170, CSCI 0190, CLPS 0950. Those who do can use it as their second Applied Math or Biology course.

Four classes in the biological sciences agreed upon by the student and advisor. These four courses should form a cohesive grouping in a specific area of emphasis, at least two of which should be at the 1000-level. Some example groupings are below:

### Areas of Emphasis and Suggested Courses:

Some areas of possible emphasis for focusing of elective courses are listed below. Given the large number of course offerings in the biosciences and neuroscience, students are free to explore classes in these areas that are not listed below. However, all classes must be approved by the concentration advisor. APMA 1910 cannot be used as an elective.

<b>Biochemistry</b>	
BIOL 0280	Biochemistry
BIOL 1270	Advanced Biochemistry
CHEM 0350/0360	Organic Chemistry
CHEM 1230	Chemical Biology
<b>Biotechnology and Physiology</b>	
BIOL 0800	Principles of Physiology
BIOL 1100	Cell Physiology and Biophysics
and/or appropriate bioengineering courses, such as:	
BIOL 1090	Polymer Science for Biomaterials
BIOL 1120	Biomaterials
BIOL 1140	Tissue Engineering
BIOL 1150	Stem Cell Engineering
BIOL 1210	Synthetic Biological Systems
<b>Ecology, Evolution, and Genetics</b>	
BIOL 0410 & BIOL 0480	Invertebrate Zoology and Evolutionary Biology
BIOL 0420 & BIOL 0430	Principles of Ecology and The Evolution of Plant Diversity
BIOL 0470	Genetics
BIOL 1420	Experimental Design in Ecology
BIOL 1430	Population Genetics
BIOL 1465	Human Population Genomics
BIOL 1540	Molecular Genetics
<b>Neuroscience</b>	
APMA 0410	Mathematical Methods in the Brain Sciences
Neurosciences courses: See <a href="https://www.brown.edu/academics/neuroscience/undergraduate/neuroscience-concentration-requirements">https://www.brown.edu/academics/neuroscience/undergraduate/neuroscience-concentration-requirements</a>	
BIOL 1100	Cell Physiology and Biophysics
BIOL 1110	Topics in Signal Transduction
BIOL 1190	Synaptic Transmission and Plasticity

Total Credits 18

<sup>1</sup> Students whose independent study is expected to be in an experimental field are strongly encouraged to take APMA 1660, which covers experimental design and the analysis of variance (ANOVA), a method commonly used in the analysis of experimental data.

## Honors

**Requirements and Process:** Honors in the Applied Math-Biology concentration is based primarily upon an in-depth, original research project carried out under the guidance of a Brown (and usually Applied Math or BioMed) affiliated faculty advisor. Projects must be conducted for no less than two full semesters, and student must register for credit for the project via APMA 1970 or BIOL 1950/BIOL 1960 or similar independent study courses. The project culminates in the writing of a thesis which is reviewed by the thesis advisor and a second reader. It is essential that the student have one advisor from the biological sciences and one in Applied Mathematics. The thesis work must be presented in the form of an oral presentation (arranged with the primary thesis advisor) or posted at the annual Undergraduate Research Day in either Applied Mathematics or Biology. For information on registering for BIOL 1950/BIOL 1960, please see <https://www.brown.edu/academics/biology/undergraduate-education/undergraduate-research>

Excellence in grades within the concentration as well as a satisfactory evaluation by the advisors are also required for Honors. The student's

grades must place them within the upper 20% of their cohort, in accordance with the university policy on honors. Honors recipients typically maintain a Grade Point Average of 3.4 or higher in the concentration. However, in the case of outstanding independent research as demonstrated in the thesis and supported by the Thesis Committee, candidates with a GPA between 3.0 and 3.4 will be considered and are encouraged to apply.

The deadline for applying to graduate with honors in the concentration are the same as those of the biology concentrations. However, students in the joint concentration must inform the undergraduate chair in Applied Mathematics of their intention to apply for honors by these dates.

## Applied Mathematics-Computer Science Concentration Requirements

The Sc.B. concentration in Applied Math-Computer Science provides a foundation of basic concepts and methodology of mathematical analysis and computation and prepares students for advanced work in computer science, applied mathematics, and scientific computation. Concentrators must complete courses in mathematics, applied math, computer science, and an approved English writing course. While the concentration in Applied Math-Computer Science allows students to develop the use of quantitative methods in thinking about and solving problems, knowledge that is valuable in all walks of life, students who have completed the concentration have pursued graduate study, computer consulting and information industries, and scientific and statistical analysis careers in industry or government. This degree offers a standard track and a professional track.

### Requirements for the Standard Track of the Sc.B. degree.

#### Prerequisites - two semesters of Calculus, for example

MATH 0090 & MATH 0100	Introductory Calculus, Part I and Introductory Calculus, Part II
MATH 0170	Advanced Placement Calculus

#### Concentration Requirements (17 courses)

Core-Math:		
MATH 0180	Intermediate Calculus	1
or MATH 0350	Honors Calculus	
MATH 0520	Linear Algebra	1
or MATH 0540	Honors Linear Algebra	
or CSCI 0530	Coding the Matrix: An Introduction to Linear Algebra for Computer Science	

#### Core-Applied Mathematics:

APMA 0350	Applied Ordinary Differential Equations	1
APMA 0360	Applied Partial Differential Equations I	1
APMA 1170	Introduction to Computational Linear Algebra	1
or APMA 1180	Introduction to Numerical Solution of Differential Equations	

#### Core-Computer Science:

Select one of the following Series: 2

<b>Series A</b>		
CSCI 0150 & CSCI 0160	Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures	
<b>Series B</b>		
CSCI 0170 & CSCI 0180	Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction	
<b>Series C</b>		

CSCI 0190	Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; (this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level course) )	
Select three of the following intermediate-level courses, one of which must be math-oriented and one systems-oriented. The intermediate courses must cover the requirements of the pathway chosen under additional requirements for CS.		3
CSCI 0220	Introduction to Discrete Structures and Probability (math)	
CSCI 0320	Introduction to Software Engineering (systems)	
CSCI 0330	Introduction to Computer Systems (systems)	
CSCI 1010	Theory of Computation (math)	
CSCI 1450	Probability for Computing and Data Analysis (math)	
or APMA 1650	Statistical Inference I	
Three 1000-level Computer Science courses. Two of these courses and the intermediate courses must satisfy one of the CS pathways. <sup>2</sup>		3
Three 1000-level Applied Mathematics courses approved by the concentration advisor, of which two should constitute a standard sequence or address a common theme. Typical sequences include: APMA 1200/1210 and APMA 1650 or 1655/1660. APMA 1910 cannot be used as an elective.		3
A capstone course: a one-semester course, taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project. The title and abstract of the artifact, along with the student's and faculty-sponsor's names, will be placed in the CS website. The inclusion of a relevant image or system diagram is strongly encouraged. The complete text of the best artifacts of each class will be featured on the CS website. A senior thesis, which involves two semesters of work, may count as a capstone. <sup>3</sup>		1

Note: CSCI 1010 and 1450 may be used either as a math-oriented intermediate courses or as advanced courses. CSCI 1010 was formerly known as CSCI 510: they are the same course and hence only one may be taken for credit. CSCI 1450 was formerly known as CSCI 450: they are the same course and hence only one may be taken for credit. Applied Math 1650 or 1655 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650, 1655, and CSCI 1450.

Total Credits 17

<sup>1</sup> APMA 1650 may only be used if not being used as an Applied Math course.

<sup>2</sup> Pathways may be viewed here: <https://cs.brown.edu/degrees/undergrad/concentrating-in-cs/concentration-requirements-2020/pathways-for-undergraduate-and-masters-students/>

<sup>3</sup> Capstone Options may be found here: <https://cs.brown.edu/degrees/undergrad/concentrating-in-cs/concentration-requirements-2020/capstone/>

## Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs.

Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

## Applied Mathematics-Economics Concentration Requirements

The Applied Mathematics-Economics concentration is designed to reflect the mathematical and statistical nature of modern economic theory and empirical research. This concentration has two tracks. The first is the advanced economics track, which is intended to prepare students for graduate study in economics. The second is the mathematical finance track, which is intended to prepare students for graduate study in finance, or for careers in finance or financial engineering. Both tracks have A.B. degree versions and Sc.B. degree versions, as well as a Professional track option.

### Standard Program for the A.B. degree (Advanced Economics track):

#### Prerequisites:

MATH 0100	Introductory Calculus, Part II
MATH 0520	Linear Algebra

#### Course Requirements:

##### Applied Mathematics Requirements

(a) <sup>1</sup>		
APMA 0350 & APMA 0360	Applied Ordinary Differential Equations and Applied Partial Differential Equations	2

Select one of the following: 1

APMA 0160	Introduction to Scientific Computing (preferred)	
CSCI 0040	Introduction to Scientific Computing and Problem Solving	
CSCI 0111	Computing Foundations: Data	
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
CSCI 0170	Computer Science: An Integrated Introduction	

Select one of the following: 1

APMA 1200	Operations Research: Probabilistic Models	
APMA 1210	Operations Research: Deterministic Models	
APMA 1650 or APMA 1655	Statistical Inference I	1

(b)<sup>1</sup>  
Select one of the following: 1

APMA 1200	Operations Research: Probabilistic Models	
APMA 1210	Operations Research: Deterministic Models	
APMA 1330	Methods of Applied Mathematics	
APMA 1360	Applied Dynamical Systems	
APMA 1660	Statistical Inference II	
APMA 1690	Computational Probability and Statistics	
APMA 1720	Monte Carlo Simulation with Applications to Finance	
APMA 1740	Recent Applications of Probability and Statistics	
MATH 1010	Analysis: Functions of One Variable	
<b>Economics Requirements:</b>		
ECON 1130	Intermediate Microeconomics (Mathematical) <sup>3</sup>	1
ECON 1210	Intermediate Macroeconomics	1
ECON 1630	Mathematical Econometrics I	1
Two 1000-level courses from the "mathematical-economics" group: <sup>4</sup>		2
ECON 1170	Welfare Economics and Social Choice Theory	
ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies	
ECON 1460	Industrial Organization	
ECON 1470	Bargaining Theory and Applications	
ECON 1490	Designing Internet Marketplaces	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1670	Advanced Topics in Econometrics	
ECON 1750	Investments II	
ECON 1820	Theory of Behavioral Economics	
ECON 1850	Theory of Economic Growth	
ECON 1860	The Theory of General Equilibrium	
ECON 1870	Game Theory and Applications to Economics	
One 1000-level course from the "data methods" group: <sup>4</sup>		1
ECON 1301	Economics of Education I	
ECON 1310	Labor Economics	
ECON 1315	Health, Education, and Social Policy	
ECON 1340	Economics of Global Warming	
ECON 1355	Environmental Issues in Development Economics	
ECON 1360	Health Economics	
ECON 1375	Inequality of Opportunity in the US	
ECON 1400	The Economics of Mass Media	
ECON 1430	The Economics of Social Policy	
ECON 1480	Public Economics	
ECON 1510	Economic Development	
ECON 1530	Health, Hunger and the Household in Developing Countries	
ECON 1629	Applied Research Methods for Economists	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1670	Advanced Topics in Econometrics	
ECON 1765	Finance, Regulation, and the Economy	
ECON 1825	Behavioral Economics and Public Policy	
ECON 1830	Behavioral Finance	
One additional 1000-level economics course: <sup>5</sup>		1
<b>Total Credits</b>		<b>13</b>

- 1 No course may be used to simultaneously satisfy (a) and (b).
- 2 APMA 0330 and APMA 0340 may be substituted with advisor approval. APMA 1910 cannot be used as an elective.
- 3 Or ECON 1110 with permission.
- 4 No course may be used to simultaneously satisfy the "mathematical economics" and the "data methods" requirements.
- 5 Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, 1620 and 1960 can be used for university credit and up to two 1970s may be used for university credit.

## Standard program for the Sc.B. degree (Advanced Economics track):

### Prerequisites:

MATH 0100	Introductory Calculus, Part II
MATH 0520	Linear Algebra

### Course Requirements:

#### Applied Mathematics Requirements

(a) <sup>1</sup>		
APMA 0350	Applied Ordinary Differential Equations	2
& APMA 0360	and Applied Partial Differential Equations I <sup>2</sup>	

Select one of the following: 1

APMA 0160	Introduction to Scientific Computing (preferred)
CSCI 0040	Introduction to Scientific Computing and Problem Solving
CSCI 0111	Computing Foundations: Data
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science
CSCI 0170	Computer Science: An Integrated Introduction

Select one of the following: 1

APMA 1200	Operations Research: Probabilistic Models
APMA 1210	Operations Research: Deterministic Models
APMA 1650	Statistical Inference I
or APMA 1655	Statistical Inference I

(b)<sup>1</sup>  
Select two of the following: 2

APMA 1200	Operations Research: Probabilistic Models
APMA 1210	Operations Research: Deterministic Models
APMA 1330	Methods of Applied Mathematics
APMA 1360	Applied Dynamical Systems
APMA 1660	Statistical Inference II
APMA 1690	Computational Probability and Statistics
APMA 1720	Monte Carlo Simulation with Applications to Finance
APMA 1740	Recent Applications of Probability and Statistics
MATH 1010	Analysis: Functions of One Variable

### Economics Requirements:

ECON 1130	Intermediate Microeconomics (Mathematical) <sup>3</sup>	1
ECON 1210	Intermediate Macroeconomics	1
ECON 1630	Mathematical Econometrics I	1
Three 1000-level courses from the "mathematical-economics" group: <sup>4</sup>		3
ECON 1170	Welfare Economics and Social Choice Theory	

ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies	
ECON 1460	Industrial Organization	
ECON 1470	Bargaining Theory and Applications	
ECON 1490	Designing Internet Marketplaces	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1670	Advanced Topics in Econometrics	
ECON 1750	Investments II	
ECON 1820	Theory of Behavioral Economics	
ECON 1850	Theory of Economic Growth	
ECON 1860	The Theory of General Equilibrium	
ECON 1870	Game Theory and Applications to Economics	
One 1000-level course from the "data methods" group: <sup>4</sup>		1
ECON 1301	Economics of Education I	
ECON 1310	Labor Economics	
ECON 1315	Health, Education, and Social Policy	
ECON 1340	Economics of Global Warming	
ECON 1355	Environmental Issues in Development Economics	
ECON 1360	Health Economics	
ECON 1375	Inequality of Opportunity in the US	
ECON 1400	The Economics of Mass Media	
ECON 1430	The Economics of Social Policy	
ECON 1480	Public Economics	
ECON 1510	Economic Development	
ECON 1530	Health, Hunger and the Household in Developing Countries	
ECON 1629	Applied Research Methods for Economists	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1765	Finance, Regulation, and the Economy	
ECON 1825	Behavioral Economics and Public Policy	
ECON 1830	Behavioral Finance	
Two additional 1000-level economics courses <sup>5</sup>		2
Total Credits		16

- <sup>1</sup> No course may be used to simultaneously satisfy (a) and (b).  
<sup>2</sup> APMA 0330 and APMA 0340 may be substituted with advisor approval. APMA 1910 cannot be used as an elective.  
<sup>3</sup> Or ECON 1110 with permission.  
<sup>4</sup> No course may be used to simultaneously satisfy the "mathematical economics" and the "data methods" requirements.  
<sup>5</sup> Students may use either ECON 1070 or ECON 1090 toward the concentration, but not both. Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, 1620 and 1960 can be used for university credit and up to two 1970s may be used for university credit.

### Standard program for the A.B. degree (Mathematical Finance track):

**Prerequisites:**

MATH 0100	Introductory Calculus, Part II
MATH 0520	Linear Algebra

**Course Requirements: 13 Courses: 6 Applied Math and 7 Economics**

**Applied Mathematics Requirements**

(a)

APMA 0350 & APMA 0360	Applied Ordinary Differential Equations and Applied Partial Differential Equations I <sup>1</sup>	2
Select one of the following:		1
APMA 0160	Introduction to Scientific Computing (preferred)	
CSCI 0040	Introduction to Scientific Computing and Problem Solving	
CSCI 0111	Computing Foundations: Data	
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
CSCI 0170	Computer Science: An Integrated Introduction	
APMA 1200	Operations Research: Probabilistic Models	1
APMA 1650 or APMA 1655	Statistical Inference I	1
(b)		
Select one of the following:		1
APMA 1180	Introduction to Numerical Solution of Differential Equations	
APMA 1210	Operations Research: Deterministic Models	
APMA 1330	Methods of Applied Mathematics	
APMA 1360	Applied Dynamical Systems	
APMA 1660	Statistical Inference II	
APMA 1655	Statistical Inference I	
APMA 1690	Computational Probability and Statistics	
APMA 1720	Monte Carlo Simulation with Applications to Finance (preferred)	
APMA 1740	Recent Applications of Probability and Statistics	
MATH 1010	Analysis: Functions of One Variable	
<b>Economics Requirements:</b>		
ECON 1130	Intermediate Microeconomics (Mathematical) <sup>3</sup>	1
ECON 1210	Intermediate Macroeconomics	1
ECON 1630	Mathematical Econometrics I	1
Select two 1000-level courses from the "financial economics" group: <sup>2</sup>		2
ECON 1710	Investments I	
ECON 1720	Corporate Finance	
ECON 1730	Venture Capital, Private Equity, and Entrepreneurship	
ECON 1750	Investments II	
ECON 1760	Financial Institutions	
ECON 1765	Finance, Regulation, and the Economy	
ECON 1780	Advanced Topics in Corporate Finance	
ECON 1830	Behavioral Finance	
Select one 1000-level course from the "mathematical economics" group: <sup>2</sup>		1
ECON 1170	Welfare Economics and Social Choice Theory	
ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies	
ECON 1460	Industrial Organization	
ECON 1470	Bargaining Theory and Applications	
ECON 1490	Designing Internet Marketplaces	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1670	Advanced Topics in Econometrics	
ECON 1750	Investments II	

ECON 1820	Theory of Behavioral Economics	
ECON 1850	Theory of Economic Growth	
ECON 1860	The Theory of General Equilibrium	
ECON 1870	Game Theory and Applications to Economics	
Select one 1000-level course from the "data methods" group: <sup>2</sup>		1
ECON 1301	Economics of Education I	
ECON 1310	Labor Economics	
ECON 1315	Health, Education, and Social Policy	
ECON 1340	Economics of Global Warming	
ECON 1355	Environmental Issues in Development Economics	
ECON 1360	Health Economics	
ECON 1375	Inequality of Opportunity in the US	
ECON 1400	The Economics of Mass Media	
ECON 1430	The Economics of Social Policy	
ECON 1480	Public Economics	
ECON 1510	Economic Development	
ECON 1530	Health, Hunger and the Household in Developing Countries	
ECON 1629	Applied Research Methods for Economists	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1765	Finance, Regulation, and the Economy	
ECON 1825	Behavioral Economics and Public Policy	
ECON 1830	Behavioral Finance	
Total Credits		13

<sup>1</sup> APMA 0330 and APMA 0340 may be substituted with advisor approval. APMA 1910 cannot be used as an elective.

<sup>2</sup> No course may be used to simultaneously satisfy any two or more of the "financial economics," "mathematical economics," and "data methods" requirements.

<sup>3</sup> Or ECON 1110 with permission.

<sup>4</sup> Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, 1620 and 1960 can be used for university credit and up to two 1970s may be used for university credit.

## Standard program for the Sc.B. degree (Mathematical Finance track):

### Prerequisites:

MATH 0100	Introductory Calculus, Part II	
MATH 0520	Linear Algebra	

### Course Requirements: 16 courses: 7 Applied Math and 9 Economics

#### Applied Mathematics requirements:

(a)		
APMA 0350 & APMA 0360	Applied Ordinary Differential Equations and Applied Partial Differential Equations I <sup>1</sup>	2
Select one of the following:		1
APMA 0160	Introduction to Scientific Computing (preferred)	
CSCI 0040	Introduction to Scientific Computing and Problem Solving	
CSCI 0111	Computing Foundations: Data	
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
CSCI 0170	Computer Science: An Integrated Introduction	
APMA 1200	Operations Research: Probabilistic Models	1

APMA 1650 or APMA 1655	Statistical Inference I	1
(b)		
Select two of the following:		2
APMA 1180	Introduction to Numerical Solution of Differential Equations	
APMA 1210	Operations Research: Deterministic Models	
APMA 1330	Methods of Applied Mathematics	
APMA 1360	Applied Dynamical Systems	
APMA 1660	Statistical Inference II	
APMA 1690	Computational Probability and Statistics	
APMA 1720	Monte Carlo Simulation with Applications to Finance (preferred)	
APMA 1740	Recent Applications of Probability and Statistics	
MATH 1010	Analysis: Functions of One Variable	

#### Economics Requirements:

ECON 1130	Intermediate Microeconomics (Mathematical) <sup>3</sup>	1
ECON 1210	Intermediate Macroeconomics	1
ECON 1630	Mathematical Econometrics I	1
Select three 1000-level courses from the "financial economics" group: <sup>2</sup>		3
ECON 1710	Investments I	
ECON 1720	Corporate Finance	
ECON 1730	Venture Capital, Private Equity, and Entrepreneurship	
ECON 1750	Investments II	
ECON 1760	Financial Institutions	
ECON 1765	Finance, Regulation, and the Economy	
ECON 1780	Advanced Topics in Corporate Finance	
ECON 1830	Behavioral Finance	
Select two 1000-level economics" group: <sup>2</sup>		2

ECON 1170	Welfare Economics and Social Choice Theory	
ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies	
ECON 1460	Industrial Organization	
ECON 1470	Bargaining Theory and Applications	
ECON 1490	Designing Internet Marketplaces	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1670	Advanced Topics in Econometrics	
ECON 1750	Investments II	
ECON 1820	Theory of Behavioral Economics	
ECON 1850	Theory of Economic Growth	
ECON 1860	The Theory of General Equilibrium	
ECON 1870	Game Theory and Applications to Economics	
Select one 1000-level course from the "data methods" group: <sup>2</sup>		1
ECON 1301	Economics of Education I	
ECON 1310	Labor Economics	
ECON 1315	Health, Education, and Social Policy	
ECON 1340	Economics of Global Warming	
ECON 1355	Environmental Issues in Development Economics	
ECON 1360	Health Economics	
ECON 1375	Inequality of Opportunity in the US	
ECON 1400	The Economics of Mass Media	

ECON 1430	The Economics of Social Policy
ECON 1480	Public Economics
ECON 1510	Economic Development
ECON 1530	Health, Hunger and the Household in Developing Countries
ECON 1629	Applied Research Methods for Economists
ECON 1640	Mathematical Econometrics II
ECON 1660	Big Data
ECON 1765	Finance, Regulation, and the Economy
ECON 1825	Behavioral Economics and Public Policy
ECON 1830	Behavioral Finance

Total Credits 16

- 1 APMA 0330 and APMA 0340 may be substituted with advisor approval. APMA 1910 cannot be used as an elective.
- 2 No course may be used to simultaneously satisfy any two or more of the "financial economics," "mathematical economics," and "data methods" requirements.
- 3 Or ECON 1110 with permission.
- 4 Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, 1620 and 1960 can be used for university credit and up to two 1970s may be used for university credit.

## Honors and Capstone Requirement

Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and a 3.5 GPA overall.

To graduate with honors, a student must write an honors thesis in the senior year following the procedures specified by the concentration (see Economics Department website).

## Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

## Data Fluency Concentration Requirements

The Certificate in Data Fluency provides a curricular structure to undergraduates in concentrations other than applied mathematics, computational biology, computer science, math, and statistics who wish to gain fluency and facility with the tools of data analysis and its conceptual framework. The driving intellectual question is how we can infer meaning from data whilst avoiding false predictions. The required experiential learning component provides students with the opportunity to apply their data-science skills in their concentration, engage in research that uses

data science, teach data science as an undergraduate teaching assistant, or undertake an internship that has a substantive data-science component.

As with all undergraduate certificates (<https://www.brown.edu/academics/college/degree/undergraduatecertificates>), students must be enrolled in or have completed at least two courses toward the certificate at the time they declare in ASK, which must be no earlier than the beginning of the fifth semester and no later than the last day of classes of the antepenultimate (typically the sixth) semester, in order to facilitate planning for the experiential learning opportunity. Students must submit a proposal for their experiential learning opportunity by the end of the sixth semester.

Excluded Concentrations: Applied Mathematics, Computational Biology, Computer Science, Mathematics, and Statistics (including joint concentrations in these areas)

## Certificate Requirements

Core Courses:

DATA 0080	Data, Ethics and Society	1
CSCI 0111	Computing Foundations: Data	1
or CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
or CSCI 0170	Computer Science: An Integrated Introduction	
or CSCI 0190	Accelerated Introduction to Computer Science	
DATA 0200	Data Science Fluency	1
Elective Course:	Select one follow-up Applied Math, Biostatistics, Computer Science or domain-specific course with a significant data component from the following list (or another course with approval from the certificate advisor):	1
ANTH 1201	Introduction to Geographic Information Systems and Spatial Analysis	
APMA 1650	Statistical Inference I	
BIOL 0495	Statistical Analysis of Biological Data	
BIOL 1555	Methods in Informatics and Data Science for Health	
BIOL 1565	Survey of Biomedical Informatics	
CLPS 0900	Statistical Methods	
CLPS 1291	Computational Methods for Mind, Brain and Behavior	
CSCI 1450	Probability for Computing and Data Analysis	
CSCI 1470	Deep Learning	
CSCI 1951A	Data Science	
DATA 1150	Data Science Fellows	
ECON 1620	Introduction to Econometrics	
ECON 1660	Big Data	
EDUC 1110	Introductory Statistics for Education Research and Policy Analysis	
ENVS 1105	Introduction to Environmental GIS	
EEPS 1320	Introduction to Geographic Information Systems for Environmental Applications	
EEPS 1330	Global Environmental Remote Sensing	
MATH 1610	Probability	
PHP 1501	Essentials of Data Analysis	
PHP 1510	Principles of Biostatistics and Data Analysis	
SOC 1020	Methods of Social Research	
SOC 1100	Introductory Statistics for Social Research	
SOC 1340	Principles and Methods of Geographic Information Systems	

Capstone: 0-1

The required experiential learning component provides students with the opportunity to apply their data-science skills in their concentration, engage in research that uses data science, teach data science as UTAs, or undertake an internship that has a data-science component. The capstone may be completed for credit via an independent study course or not for credit.<sup>1</sup>

Total Credits 4-5

<sup>1</sup> Students must submit a proposal for their practicum project by the end of the sixth semester.

## Applied Mathematics Graduate Program

The department of Applied Mathematics offers graduate programs leading to the Master of Science (Sc.M.) degree and the Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/applied-mathematics>

### Courses

#### APMA 0070. Introduction to Applied Complex Variables.

Applications of complex analysis that do not require calculus as a prerequisite. Topics include algebra of complex numbers, plane geometry by means of complex coordinates, complex exponentials, and logarithms and their relation to trigonometry, polynomials, and roots of polynomials, conformal mappings, rational functions and their applications, finite Fourier series and the FFT, iterations and fractals. Uses MATLAB, which has easy and comprehensive complex variable capabilities.

#### APMA 0090. Introduction to Mathematical Modeling.

We will explore issues of mathematical modeling and analysis. Five to six self-contained topics will be discussed and developed. The course will include seminars in which modeling issues are discussed, lectures to provide mathematical background, and computational experiments. Required mathematical background is knowledge of one-variable calculus, and no prior computing experience will be assumed.

#### APMA 0100. Elementary Probability for Applications.

This course serves as an introduction to probability and stochastic processes with applications to practical problems. It will cover basic probability and stochastic processes such as basic concepts of probability and conditional probability, simple random walk, Markov chains, continuous distributions, Brownian motion and option pricing. Enrollment limited to 19 first year students.

#### APMA 0110. What's the big deal with Data Science?

This seminar serves as a practical introduction to the interdisciplinary field of data science. Over the course of the semester, students will be exposed to the diversity of questions that data science can address by reading current scholarly works from leading researchers. Through hands-on labs and experiences, students will gain facility with computational and visualization techniques for uncovering meaning from large numerical and text-based data sets. Ultimately, students will gain fluency with data science vocabulary and ideas. There are no prerequisites for this course.

#### APMA 0120. Mathematics of Finance.

The current volatility in international financial markets makes it imperative for us to become competent in financial calculations early in our liberal arts and scientific career paths. This course is designed to prepare the student with those elements of mathematics of finance appropriate for the calculations necessary in financial transactions.

#### APMA 0160. Introduction to Scientific Computing.

For students in any discipline that may involve numerical computations. Includes instruction for programming in MATLAB. Applications discussed include solution of linear equations (with vectors and matrices) and nonlinear equations (by bisection, iteration, and Newton's method), interpolation, and curve-fitting, difference equations, iterated maps, numerical differentiation and integration, and differential equations. Prerequisite: MATH 0100 or its equivalent.

#### APMA 0180. Modeling the World with Mathematics: An Introduction for Non-Mathematicians.

Mathematics is the foundation of our technological society and most of its powerful ideas are quite accessible. This course will explain some of these using historical texts and Excel. Topics include the predictive power of 'differential equations' from the planets to epidemics, oscillations and music, chaotic systems, randomness and the atomic bomb. Prerequisite: some knowledge of calculus.

#### APMA 0200. Introduction to Modelling.

This course provides an introduction to the mathematical modeling of selected biological, chemical, engineering, and physical processes. The goal is to illustrate the typical way in which applied mathematicians approach practical applications, from understanding the underlying problem, creating a model, analyzing the model using mathematical techniques, and interpreting the findings in terms of the original problem. Single-variable calculus is the only requirement; all other techniques from differential equations, linear algebra, and numerical methods, to probability and statistics will be introduced in class. Prerequisites: Math 0100 or equivalent.

#### APMA 0330. Methods of Applied Mathematics I, II.

This course will cover mathematical techniques involving ordinary differential equations used in the analysis of physical, biological, and economic phenomena. The course emphasizes established methods and their applications rather than rigorous foundation. Topics include: first and second order differential equations, an introduction to numerical methods, series solutions, and Laplace transformations.

#### APMA 0340. Methods of Applied Mathematics I, II.

Mathematical techniques involving differential equations used in the analysis of physical, biological and economic phenomena. Emphasis on the use of established methods, rather than rigorous foundations. I: First and second order differential equations. II: Applications of linear algebra to systems of equations; numerical methods; nonlinear problems and stability; introduction to partial differential equations; introduction to statistics. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or advanced placement.

#### APMA 0350. Applied Ordinary Differential Equations.

This course provides a comprehensive introduction to ordinary differential equations and their applications. During the course, we will see how applied mathematicians use ordinary differential equations to solve practical applications, from understanding the underlying problem, creating a differential-equations model, solving the model using analytical, numerical, or qualitative methods, and interpreting the findings in terms of the original problem. We will also learn about the underlying rigorous theoretical foundations of differential equations. Format: lectures and problem-solving workshops. Prerequisites: MATH 0100, MATH 0170, MATH 0180, MATH 0190, MATH 0200, MATH 0350 or advanced placement. MATH 0520 (can be taken concurrently).

#### APMA 0360. Applied Partial Differential Equations I.

This course builds on APMA 0350 which covers ordinary differential equations and systems involving a single independent variable. We will look at processes with two or more independent variables formulated as partial differential equations (PDE) using concepts from multivariable calculus. We will see how problems are described quantitatively as PDEs, how seemingly unrelated contexts can result in similar equations; and develop methods for solution using analytical, numerical or qualitative methods. Contexts include first order equations; the second order wave equation and problems involving diffusion processes; steady state balances for systems in two or three dimensions; together with insights from theory.

#### APMA 0410. Mathematical Methods in the Brain Sciences.

Basic mathematical methods commonly used in the neural and cognitive sciences. Topics include: introduction to probability and statistics, emphasizing hypothesis testing and modern nonparametric methods; introduction to differential equations and systems of differential equations, emphasizing qualitative behavior and simple phase-plane analysis. Examples from neuroscience, cognitive science, and other sciences. Prerequisite: MATH 0100 or equivalent.

**APMA 0650. Essential Statistics.**

A first course in probability and statistics emphasizing statistical reasoning and basic concepts. Topics include visual and numerical summaries of data, representative and non-representative samples, elementary discrete probability theory, the normal distribution, sampling variability, elementary statistical inference, measures of association. Examples and applications from the popular press and the life, social and physical sciences. No prerequisites.

**APMA 1070. Quantitative Models of Biological Systems.**

Quantitative dynamic models help understand problems in biology and there has been rapid progress in recent years. The course provides an introduction to the concepts and techniques, with applications to population dynamics, infectious diseases, enzyme kinetics, aspects of cellular biology. Additional topics covered will vary. Mathematical techniques will be discussed as they arise in the context of biological problems. Prerequisites: APMA 0330, 0340 or 0350, 0360, or written permission.

**APMA 1080. Inference in Genomics and Molecular Biology.**

Massive quantities of fundamental biological and geological sequence data have emerged. Goal of APMA1080 is to enable students to construct and apply probabilistic models to draw inferences from sequence data on problems novel to them. Statistical topics: Bayesian inferences; estimation; hypothesis testing and false discovery rates; statistical decision theory; change point algorithm; hidden Markov models; Kalman filters; and significances in high dimensions. Prerequisites: One of following APMA1650, APMA1655, MATH1610, CSCI1450; and one of the following AMPA0160, CSCI0040, CSCI0150, CSCI0170, CSCI0190, CLPS0950, waver for students with substantial computing experience and their acceptance of responsibility for their own computing.

**APMA 1150. Machine Learning for Scientific Modeling: Data-Driven Discovery of Differential Equations(MATH 1150).**

Interested students must register for MATH 1150.

**APMA 1160. An Introduction to Numerical Optimization.**

This course provides a thorough introduction to numerical methods and algorithms for solving non-linear continuous optimization problems. A particular attention will be given to the mathematical underpinnings to understand the theoretical properties of the optimization problems and the algorithms designed to solve them. Topics will include: line search methods, trust-region methods, nonlinear conjugate gradient methods, an introduction to constrained optimization (Karush-Kuhn-Tucker conditions, mini-maximization, saddle-points of Lagrangians). Some applications in signal and image processing will be explored. Basic programming skills at the level of APMA 16 or CSCI 40 are assumed.

**APMA 1170. Introduction to Computational Linear Algebra.**

Focuses on fundamental algorithms in computational linear algebra with relevance to all science concentrators. Basic linear algebra and matrix decompositions (Cholesky, LU, QR, etc.), round-off errors and numerical analysis of errors and convergence. Iterative methods and conjugate gradient techniques. Computation of eigenvalues and eigenvectors, and an introduction to least squares methods.

**APMA 1180. Introduction to Numerical Solution of Differential Equations.**

Fundamental numerical techniques for solving ordinary and partial differential equations. Overview of techniques for approximation and integration of functions. Development of multi-step and multi-stage methods, error analysis, step-size control for ordinary differential equations. Solution of two-point boundary value problems, introduction to methods for solving linear partial differential equations. Students will be required to use Matlab (or other computer languages) to implement the mathematical algorithms under consideration: experience with a programming language is therefore strongly recommended. Prerequisites: APMA 0330, 0340 or 0350, 0360.

**APMA 1190. Finite Volume Method for CFD: A Survey.**

This course will provide students with an overview of the subjects necessary to perform robust simulations of computational fluid dynamics (CFD) problems. After an initial overview of the finite volume method and fluid mechanics, students will use the finite volume library OpenFOAM to explore the different components that make up a modern CFD code (discretization, linear algebra, timestepping, boundary conditions, splitting schemes, and multiphysics) and learn how to navigate a production scale software library.

**APMA 1200. Operations Research: Probabilistic Models.**

Basic probabilistic problems and methods in operations research and management science. Methods of problem formulation and solution. Markov chains, birth-death processes, stochastic service and queueing systems, the theory of sequential decisions under uncertainty, dynamic programming. Applications. Prerequisite: APMA 1650, 1655 or MATH 1610, or equivalent.

**APMA 1210. Operations Research: Deterministic Models.**

An introduction to the basic mathematical ideas and computational methods of optimizing allocation of effort or resources, with or without constraints. Linear programming, network models, dynamic programming, and integer programming.

**APMA 1250. Advanced Engineering Mechanics (ENGN 1370).**

Interested students must register for ENGN 1370.

**APMA 1260. Introduction to the Mechanics of Solids and Fluids.**

An introduction to the dynamics of fluid flow and deforming elastic solids for students in the physical or mathematical sciences. Topics in fluid mechanics include statics, simple viscous flows, inviscid flows, potential flow, linear water waves, and acoustics. Topics in solid mechanics include elastic/plastic deformation, strain and stress, simple elastostatics, and elastic waves with reference to seismology. Offered in alternate years.

**APMA 1330. Methods of Applied Mathematics.**

Review of vector calculus and curvilinear coordinates. Partial differential equations. Heat conduction and diffusion equations, the wave equation, Laplace and Poisson equations. Separation of variables, special functions, Fourier series and power series solution of differential equations. Sturm-Liouville problem and eigenfunction expansions.

**APMA 1340. Methods of Applied Mathematics III, IV.**

See Methods Of Applied Mathematics III, IV (APMA 1330) for course description.

**APMA 1360. Applied Dynamical Systems.**

This course gives an overview of the theory and applications of dynamical systems modeled by differential equations and maps. We will discuss changes of the dynamics when parameters are varied, investigate periodic and homoclinic solutions that arise in applications, and study the impact of additional structures such as time reversibility and conserved quantities on the dynamics. We will also study systems with complicated "chaotic" dynamics that possess attracting sets which do not have an integer dimension. Applications to chemical reactions, climate, epidemiology, and phase transitions will be discussed.

**APMA 1650. Statistical Inference I.**

APMA 1650 is an integrated first course in mathematical statistics. The first half of APMA 1650 covers probability and the last half is statistics, integrated with its probabilistic foundation. Specific topics include probability spaces, discrete and continuous random variables, methods for parameter estimation, confidence intervals, and hypothesis testing. Prerequisite: One year of university-level calculus. At Brown, this corresponds to MATH 0100, MATH 0170, MATH 0180, MATH 0190, MATH 0200, or MATH 0350. A score of 4 or 5 on the AP Calculus BC exam is also sufficient.

**APMA 1655. Statistical Inference I.**

Students may opt to enroll in 1655 for more in depth coverage of APMA 1650. Enrollment in 1655 will include an optional recitation section and required additional individual work. Applied Math concentrators are encouraged to take 1655.

Prerequisite (for either version): MATH 0100, 0170, 0180, 0190, 0200, or 0350.

**APMA 1660. Statistical Inference II.**

APMA 1660 is designed as a sequel to APMA 1650 to form one of the alternative tracks for an integrated year's course in mathematical statistics. The main topic is linear models in statistics. Specific topics include likelihood-ratio tests, nonparametric tests, introduction to statistical computing, matrix approach to simple-linear and multiple regression, analysis of variance, and design of experiments. Prerequisite: APMA 1650, 1655 or equivalent, basic linear algebra.

**APMA 1670. Statistical Analysis of Time Series.**

Time series analysis is an important branch of mathematical statistics with many applications to signal processing, econometrics, geology, etc. The course emphasizes methods for analysis in the frequency domain, in particular, estimation of the spectrum of time-series, but time domain methods are also covered. Prerequisites: elementary probability and statistics on the level of APMA 1650-1660.

**APMA 1680. Nonparametric Statistics.**

A systematic treatment of distribution-free alternatives to classical statistical tests. These nonparametric tests make minimum assumptions about distributions governing the generation of observations, yet are of nearly equal power to the classical alternatives. Prerequisite: APMA 1650 or equivalent. Offered in alternate years.

**APMA 1681. Computational Neuroscience (NEUR 1680).**

Interested students must register for NEUR 1680.

**APMA 1690. Computational Probability and Statistics.**

Examination of probability theory and mathematical statistics from the perspective of computing. Topics selected from random number generation, Monte Carlo methods, limit theorems, stochastic dependence, Bayesian networks, dimensionality reduction. Prerequisites: A calculus-based course in probability or statistics (e.g. APMA1650 or MATH1610) is required, and some programming experience is strongly recommended. Prerequisite: MATH 0100, 0170, 0180, 0190, 0200, or 0350, or equivalent placement.

**APMA 1700. The Mathematics of Insurance.**

The course consists of two parts: the first treats life contingencies, i.e. the construction of models for individual life insurance contracts. The second treats the Collective Theory of Risk, which constructs mathematical models for the insurance company and its portfolio of policies as a whole. Suitable also for students proceeding to the Institute of Actuaries examinations. Prerequisites: Probability Theory to the level of APMA 1650 or MATH 1610.

**APMA 1710. Information Theory.**

Information theory is the study of the fundamental limits of information transmission and storage. This course, intended primarily for advanced undergraduates and beginning graduate students, offers a broad introduction to information theory and its applications: Entropy and information, lossless data compression, communication in the presence of noise, channel capacity, channel coding, source-channel separation, lossy data compression. Prerequisite: one course in probability.

**APMA 1720. Monte Carlo Simulation with Applications to Finance.**

The course will cover the basics of Monte Carlo and its applications to financial engineering: generating random variables and simulating stochastic processes; analysis of simulated data; variance reduction techniques; binomial trees and option pricing; Black-Scholes formula; portfolio optimization; interest rate models. The course will use MATLAB as the standard simulation tool. Prerequisites: APMA 1650 or MATH 1610

**APMA 1740. Recent Applications of Probability and Statistics.**

This course develops the mathematical foundations of modern applications of statistics to the computational, cognitive, engineering, and neural sciences. The course is rigorous, but the emphasis is on application. Topics include: Gibbs ensembles and their relation to maximum entropy, large deviations, exponential models, and information theory; statistical estimation and the generative, discriminative and algorithmic approaches to classification; graphical models, dynamic programming, MCMC computing, parameter estimation, and the EM algorithm. For 2,000-level credit enroll in 2610; for 1,000-level credit enroll in 1740. Rigorous calculus-based statistics, programming experience, and strong mathematical background are essential. For 2610, some graduate level analysis is strongly suggested.

**APMA 1850. Introduction to High Performance Parallel Computing.**

No description available.

**APMA 1860. Graphs and Networks.**

Selected topics about the mathematics of graphs and networks with an emphasis on random graph models and the dynamics of processes operating on these graphs. Topics include: empirical properties of biological, social, and technological networks (small-world effects, scale-free properties, transitivity, community structure); mathematical and statistical models of random graphs and their properties (Bernoulli random graphs, preferential attachment models, stochastic block models, phase transitions); dynamical processes on graphs and networks (percolation, cascades, epidemics, queuing, synchronization). Prereq: APMA 0360 and MATH 0520 and either APMA 1650 or MATH 1610, or equivalents of these, and programming experience. APMA 1200 or APMA 1690 or similar courses recommended.

**APMA 1880. Advanced Matrix Theory.**

Canonical forms of orthogonal, Hermitian and normal matrices: Rayleigh quotients. Norms, eigenvalues, matrix equations, generalized inverses. Banded, sparse, non-negative and circulant matrices. Prerequisite: APMA 0340 or 0360, or MATH 0520 or 0540, or permission of the instructor.

**APMA 1910. Race and Gender in the Scientific Community.**

This course examines the (1) disparities in representation in the scientific community, (2) issues facing different groups in the sciences, and (3) paths towards a more inclusive scientific environment. We will delve into the current statistics on racial and gender demographics in the sciences and explore their background through texts dealing with the history, philosophy, and sociology of science. We will also explore the specific problems faced by underrepresented and well-represented racial minorities, women, and LGBTQ community members. The course is reading intensive and discussion based. To be added to the waitlist for this course, please go to <https://goo.gl/forms/foK0fyGxm5Eu2irA2>

**APMA 1911. Race and Gender in the Scientific Community (MATH 1910).**

Interested students must register for MATH 1910.

**APMA 1930A. Actuarial Mathematics.**

A seminar considering selected topics from two fields: (1) life contingencies—the study of the valuation of life insurance contracts; and (2) collective risk theory, which is concerned with the random process that generates claims for a portfolio of policies. Topics are chosen from *Actuarial Mathematics*, 2nd ed., by Bowers, Gerber, Hickman, Jones, and Nesbitt. Prerequisite: knowledge of probability theory to the level of APMA 1650 or MATH 1610. Particularly appropriate for students planning to take the examinations of the Society of Actuaries.

**APMA 1930B. Computational Probability and Statistics.**

Examination of probability theory and mathematical statistics from the perspective of computing. Topics selected from: random number generation, Monte Carlo methods, limit theorems, stochastic dependence, Bayesian networks, probabilistic grammars.

**APMA 1930C. Information Theory.**

Information theory is the mathematical study of the fundamental limits of information transmission (or coding) and storage (or compression). This course offers a broad introduction to information theory and its real-world applications. A subset of the following is covered: entropy and information; the asymptotic equipartition property; theoretical limits of lossless data compression and practical algorithms; communication in the presence of noise-channel coding, channel capacity; source-channel separation; Gaussian channels; Lossy data compression.

**APMA 1930D. Mixing and Transport in Dynamical Systems.**

Mixing and transport are important in several areas of applied science, including fluid mechanics, atmospheric science, chemistry, and particle dynamics. In many cases, mixing seems highly complicated and unpredictable. We use the modern theory of dynamical systems to understand and predict mixing and transport from the differential equations describing the physical process in question. Prerequisites: APMA 0330, 0340; or APMA 0350, 0360.

**APMA 1930E. Ocean Dynamics.**

Works through the popular book by Henry Stommel entitled *A View of the Sea*. Introduces the appropriate mathematics to match the physical concepts introduced in the book.

**APMA 1930G. The Mathematics of Sports.**

Topics to be discussed will range from the determination of who won the match, through biomechanics, free-fall of flexible bodies and aerodynamics, to the flight of ski jumpers and similar unnatural phenomena. Prerequisite: APMA 0340 or equivalent, or permission of the instructor.

**APMA 1930H. Scaling and Self-Similarity.**

The themes of scaling and self-similarity provide the simplest, and yet the most fruitful description of complicated forms in nature such as the branching of trees, the structure of human lungs, rugged natural landscapes, and turbulent fluid flows. This seminar is an investigation of some of these phenomena in a self-contained setting requiring little more mathematical background than high school algebra.

Topics to be covered: Dimensional analysis; empirical laws in biology, geosciences, and physics and the interplay between scaling and function; an introduction to fractals; social networks and the "small world" phenomenon.

**APMA 1930I. Random Matrix Theory.**

In the past few years, random matrices have become extremely important in a variety of fields such as computer science, physics and statistics. They are also of basic importance in various areas of mathematics. This class will serve as an introduction to this area. The focus is on the basic matrix ensembles and their limiting distributions, but several applications will be considered. Prerequisites: MATH 0200 or 0350; and MATH 0520 or 0540; and APMA 0350, 0360, 1650, and 1660. APMA 1170 and MATH 1010 are recommended, but not required.

**APMA 1930J. Mathematics of Random Networks.**

An intro to the emerging field of random networks and a glimpse of some of the latest developments. Random networks arise in a variety of applications including statistics, communications, physics, biology and social networks. They are studied using methods from a variety of disciplines ranging from probability, graph theory and statistical physics to nonlinear dynamical systems. Describes elements of these theories and shows how they can be used to gain practical insight into various aspects of these networks including their structure, design, distributed control and self-organizing properties. Prerequisites: Advanced calculus, basic knowledge of probability. Enrollment limited to 40.

**APMA 1930M. Applied Asymptotic Analysis.**

Many problems in applied mathematics and physics are nonlinear and are intractable to solve using elementary methods. In this course we will systematically develop techniques for obtaining quantitative information from nonlinear systems by exploiting small scale parameters. Topics will include: regular and singular perturbations, boundary layer theory, multiscale and averaging methods and asymptotic expansions of integrals. Along the way, we will discuss many applications including nonlinear waves, coupled oscillators, nonlinear optics, fluid dynamics and pattern formation.

**APMA 1930P. Mathematics and Climate.**

The study of Earth's climate involves many scientific components; mathematical tools play an important role in relating these through quantitative models, computational experiments and data analysis. The course aims to introduce students in applied mathematics to several of the conceptual models, the underlying physical principles and some of the ways data is analyzed and incorporated. Students will develop individual projects later in the semester. Prerequisites: APMA 0360, or APMA 0340, or written permission; APMA 1650 is recommended.

**APMA 1940A. Coding and Information Theory.**

In a host of applications, from satellite communication to compact disc technology, the storage, retrieval, and transmission of digital data relies upon the theory of coding and information for efficient and error-free performance. This course is about choosing representations that minimize the amount of data (compression) and the probability of an error in data handling (error-correcting codes). Prerequisite: A knowledge of basic probability theory at the level of APMA 1650 or MATH 1610.

**APMA 1940B. Information and Coding Theory.**

Originally developed by C.E. Shannon in the 1940s for describing bounds on information rates across telecommunication channels, information and coding theory is now employed in a large number of disciplines for modeling and analysis of problems that are statistical in nature. This course provides a general introduction to the field. Main topics include entropy, error correcting codes, source coding, data compression. Of special interest will be the connection to problems in pattern recognition. Includes a number of projects relevant to neuroscience, cognitive and linguistic sciences, and computer vision. Prerequisites: High school algebra, calculus. MATLAB or other computer experience helpful. Prior exposure to probability theory/statistics helpful.

**APMA 1940C. Introduction to Mathematics of Fluids.**

Equations that arise from the description of fluid motion are born in physics, yet are interesting from a more mathematical point of view as well. Selected topics from fluid dynamics introduce various problems and techniques in the analysis of partial differential equations. Possible topics include stability, existence and uniqueness of solutions, variational problems, and active scalar equations. No prior knowledge of fluid dynamics is necessary.

**APMA 1940D. Iterative Methods.**

Large, sparse systems of equations arise in many areas of mathematical application and in this course we explore the popular numerical solution techniques being used to efficiently solve these problems. Throughout the course we will study preconditioning strategies, Krylov subspace acceleration methods, and other projection methods. In particular, we will develop a working knowledge of the Conjugate Gradient and Minimum Residual (and Generalized Minimum Residual) algorithms. Multigrid and Domain Decomposition Methods will also be studied as well as parallel implementation, if time permits.

**APMA 1940E. Mathematical Biology.**

This course is designed for undergraduate students in mathematics who have an interest in the life sciences. No biological experience is necessary, as we begin by a review of the relevant topics. We then examine a number of case studies where mathematical tools have been successfully applied to biological systems. Mathematical subjects include differential equations, topology and geometry.

**APMA 1940F. Mathematics of Physical Plasmas.**

Plasmas can be big, as in the solar wind, or small, as in fluorescent bulbs. Both kinds are described by the same mathematics. Similar mathematics describes semiconducting materials, the movement of galaxies, and the re-entry of satellites. We consider how all of these physical systems are described by certain partial differential equations. Then we invoke the power of mathematics. The course is primarily mathematical. Prerequisites: APMA 0340 or 0360, MATH 0180 or 0200 or 0350, and PHYS 0060 or PHYS 0080 or ENGN 0510.

**APMA 1940G. Multigrid Methods.**

Multigrid methods are a very active area of research in Applied Mathematics. An introduction to these techniques will expose the student to cutting-edge mathematics and perhaps pique further interest in the field of scientific computation.

**APMA 1940H. Numerical Linear Algebra.**

This course will deal with advanced concepts in numerical linear algebra. Among the topics covered: Singular Value Decompositions (SVD) QR factorization, Conditioning and Stability and Iterative Methods.

**APMA 1940I. The Mathematics of Finance.**

The mathematics of speculation as reflected in the securities and commodities markets. Particular emphasis placed on the evaluation of risk and its role in decision-making under uncertainty. Prerequisite: basic probability.

**APMA 1940J. The Mathematics of Speculation.**

The course will deal with the mathematics of speculation as reflected in the securities and commodities markets. Particular emphasis will be placed on the evaluation of risk and its role in decision making under uncertainty. Prerequisite: basic probability.

**APMA 1940K. Fluid Dynamics and Physical Oceanography.**

Introduction to fluid dynamics as applied to the mathematical modeling and simulation of ocean dynamics and near-shore processes. Oceanography topics include: overview of atmospheric and thermal forcing of the oceans, ocean circulation, effects of topography and Earth's rotation, wind-driven currents in upper ocean, coastal upwelling, the Gulf Stream, tidal flows, wave propagation, tsunamis.

**APMA 1940L. Mathematical Models in Biophysics.**

Development mathematical descriptions of biological systems aid in understanding cell function and physiology. The course will explore a range of topics including: biomechanics of blood flow in arteries and capillaries, motile cells and chemotaxis, cell signaling and quorum sensing, and additional topics. Formulating and using numerical simulations will be a further component. Students will develop individual projects. Prerequisites: APMA 0360, or APMA 0340, or written permission.

**APMA 1940M. The History of Mathematics.**

The course will not be a systematic survey but will focus on specific topics in the history of mathematics such as Archimedes and integration. Oresme and graphing, Newton and infinitesimals, simple harmonic motion, the discovery of 'Fourier' series, the Monte Carlo method, reading and analyzing the original texts. A basic knowledge of calculus will be assumed.

**APMA 1940N. Introduction to Mathematical Models in Computational Biology.**

This course is designed to introduce students to the use of mathematical models in biology as well as some more recent topics in computational biology. Mathematical techniques will involve difference equations and dynamical systems theory, ordinary differential equations and some partial differential equations. These techniques will be applied in the study of many biological applications such as: (i) Difference Equations: population dynamics, red blood cell production, population genetics; (ii) Ordinary Differential Equations: predator/prey models, Lotka/Volterra model, modeling the evolution of the genome, heart beat model/cycle, transmission dynamics of HIV and gonorrhea; (iii) Partial Differential Equations: tumor growth, modeling evolution of the genome, pattern formation. Prerequisites: APMA 0330 and 0340.

**APMA 1940O. Approaches to Problem Solving in Applied Mathematics.**

The aim of the course is to illustrate through the examination of unsolved (but elementary) problems the ways in which professional applied mathematicians approach the solution of such questions. Ideas considered include: choosing the "simplest" nontrivial example; generalization; and specification. Ways to think outside convention. Some knowledge of probability and linear algebra helpful.

Suggested reading.

"How to solve it", G. Polya

"Nonplussed", Julian Havil

**APMA 1940P. Biodynamics of Block Flow and Cell Locomotion.****APMA 1940Q. Filtering Theory.**

Filtering (estimation of a "state process" from noisy data) is an important area of modern statistics. It is of central importance in navigation, signal and image processing, control theory and other areas of engineering and science. Filtering is one of the exemplary areas where the application of modern mathematics and statistics leads to substantial advances in engineering. This course will provide a student with the working knowledge sufficient for cutting edge research in the field of nonlinear filtering and its practical applications. Topics will include: hidden Markov models, Kalman and Wiener filters, optimal nonlinear filtering, elements of Ito calculus and Wiener chaos, Zakai and Kushner equations, spectral separating filters and wavelet based filters, numerical implementation of filters. We will consider numerous applications of filtering to speech recognition, analysis of financial data, target tracking and image processing. No prior knowledge in the field is required but a good understanding of the basic Probability Theory (APMA1200 or APMA2630) is important.

**APMA 1940R. Linear and Nonlinear Waves.**

From sound and light waves to water waves and traffic jams, wave phenomena are everywhere around us. In this seminar, we will discuss linear and nonlinear waves as well as the propagation of wave packets. Among the tools we shall use and learn about are numerical simulations in Matlab and analytical techniques from ordinary and partial differential equations. We will also explore applications in nonlinear optics and to traffic flow problems. Prerequisites: MATH 0180 and either APMA 0330-0340 or APMA 0350-0360. No background in partial differential equations is required.

**APMA 1970. Independent Study.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**APMA 1971. Independent Study - WRIT.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. This course should be taken in place of APMA 1970 if it is to be used to satisfy the WRIT requirement.

**APMA 2050. Mathematical Methods of Applied Science.**

Introduces science and engineering graduate students to a variety of fundamental mathematical methods. Topics include linear algebra, complex variables, Fourier series, Fourier and Laplace transforms and their applications, ordinary differential equations, tensors, curvilinear coordinates, partial differential equations, and calculus of variations.

**APMA 2060. Mathematical Methods of Applied Science.**

Introduces science and engineering graduate students to a variety of fundamental mathematical methods. Topics include linear algebra, complex variables, Fourier series, Fourier and Laplace transforms and their applications, ordinary differential equations, tensors, curvilinear coordinates, partial differential equations, and calculus of variations.

**APMA 2080. Inference in Genomics and Molecular Biology.**

Sequencing of genomes has generated a massive quantity of fundamental biological data. We focus on drawing traditional and Bayesian statistical inferences from these data, including: motif finding; hidden Markov models; other probabilistic models, significances in high dimensions; and functional genomics. Emphasis is on the application of probability theory to inferences on data sequence with the goal of enabling students to independently construct probabilistic models in setting novel to them. Statistical topics: Bayesian inference, estimation, hypothesis testing and false discovery rates, statistical decision theory. For 2,000-level credit enroll in 2080; for 1,000-level credit enroll in 1080.

**APMA 2110. Real Analysis.**

Provides the basis of real analysis which is fundamental to many of the other courses in the program: metric spaces, measure theory, and the theory of integration and differentiation.

**APMA 2110A. Real Function Theory (MATH 2210).**

Interested students must register for MATH 2210.

**APMA 2120. Hilbert Spaces and Their Applications.**

A continuation of APMA 2110: metric spaces, Banach spaces, Hilbert spaces, the spectrum of bounded operators on Banach and Hilbert spaces, compact operators, applications to integral and differential equations.

**APMA 2120A. Real Function Theory (MATH 2210).**

Interested students must register for MATH 2220.

**APMA 2130. Methods of Applied Mathematics: Partial Differential Equations.**

Solution methods and basic theory for first and second order partial differential equations. Geometrical interpretation and solution of linear and nonlinear first order equations by characteristics; formation of caustics and propagation of discontinuities. Classification of second order equations and issues of well-posed problems. Green's functions and maximum principles for elliptic systems. Characteristic methods and discontinuous solutions for hyperbolic systems.

**APMA 2140. Methods of Applied Mathematics: Integral Equations.**

Integral equations. Fredholm and Volterra theory, expansions in orthogonal functions, theory of Hilbert-Schmidt. Singular integral equations, method of Wiener-Hopf. Calculus of variations and direct methods.

**APMA 2160. Methods of Applied Mathematics: Asymptotics.**

Calculus of asymptotic expansions, evaluation of integrals. Solution of linear ordinary differential equations in the complex plane, WKB method, special functions.

**APMA 2170. Functional Analysis and Applications.**

Topics vary according to interest of instructor and class.

**APMA 2190. Nonlinear Dynamical Systems: Theory and Applications.**

Basic theory of ordinary differential equations, flows, and maps. Two-dimensional systems. Linear systems. Hamiltonian and integrable systems. Lyapunov functions and stability. Invariant manifolds, including stable, unstable, and center manifolds. Bifurcation theory and normal forms. Nonlinear oscillations and the method of averaging. Chaotic motion, including horseshoe maps and the Melnikov method. Applications in the physical and biological sciences.

**APMA 2200. Nonlinear Dynamical Systems: Theory and Applications.**

Basic theory of ordinary differential equations, flows, and maps. Two-dimensional systems. Linear systems. Hamiltonian and integrable systems. Lyapunov functions and stability. Invariant manifolds, including stable, unstable, and center manifolds. Bifurcation theory and normal forms. Nonlinear oscillations and the method of averaging. Chaotic motion, including horseshoe maps and the Melnikov method. Applications in the physical and biological sciences.

**APMA 2210. Topics in Nonlinear Dynamical Systems.**

Topics to be covered in this course may vary depending on the audiences. One of the goals that is planned for this course is to discuss the boundary layers and/or the boundary value problems that appear and play a very important role in the kinetic theory of gases; in particular, in the theory of the Boltzmann equations. Students are encouraged to attend and participate in the kinetic theory program offered by the ICERM institute in the Fall 2011 semester. This course may be taken twice for credit.

**APMA 2230. Partial Differential Equations.**

The theory of the classical partial differential equations, as well as the method of characteristics and general first order theory. Basic analytic tools include the Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential geometry, and the applied sciences. Generally, semester II of this course concentrates in depth on several special topics chosen by the instructor.

**APMA 2240. Partial Differential Equations.**

The theory of the classical partial differential equations, as well as the method of characteristics and general first order theory. Basic analytic tools include the Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential geometry, and the applied sciences. Generally, semester II of this course concentrates in depth on several special topics chosen by the instructor.

**APMA 2260. Introduction to Stochastic Control Theory.**

The course serves as an introduction to the theory of stochastic control and dynamic programming technique. Optimal stopping, total expected (discounted) cost problems, and long-run average cost problems will be discussed in discrete time setting. The last part of the course deals with continuous time deterministic control and game problems. The course requires some familiarity with the probability theory.

**APMA 2410. Fluid Dynamics I.**

Formulation of the basic conservation laws for a viscous, heat conducting, compressible fluid. Molecular basis for thermodynamic and transport properties. Kinematics of vorticity and its transport and diffusion. Introduction to potential flow theory. Viscous flow theory; the application of dimensional analysis and scaling to obtain low and high Reynolds number limits.

**APMA 2420. Fluid Mechanics II.**

Introduction to concepts basic to current fluid mechanics research: hydrodynamic stability, the concept of average fluid mechanics, introduction to turbulence and to multiphase flow, wave motion, and topics in inviscid and compressible flow.

**APMA 2450. Exchange Scholar Program.****APMA 2470. Topics in Fluid Dynamics.**

Initial review of topics selected from flow stability, turbulence, turbulent mixing, surface tension effects, and thermal convection. Followed by focussed attention on the dynamics of dispersed two-phase flow and complex fluids.

**APMA 2480. Topics in Fluid Dynamics.**

No description available.

**APMA 2550. Numerical Solution of Partial Differential Equations I.**

Finite difference methods for solving time-dependent initial value problems of partial differential equations. Fundamental concepts of consistency, accuracy, stability and convergence of finite difference methods will be covered. Associated well-posedness theory for linear time-dependent PDEs will also be covered. Some knowledge of computer programming expected.

**APMA 2560. Numerical Solution of Partial Differential Equations II.**

An introduction to weighted residual methods, specifically spectral, finite element and spectral element methods. Topics include a review of variational calculus, the Rayleigh-Ritz method, approximation properties of spectral and finite element methods, and solution techniques. Homework will include both theoretical and computational problems.

**APMA 2570A. Numerical Solution of Partial Differential Equations III.**

We will cover spectral methods for partial differential equations. Algorithm formulation, analysis, and efficient implementation issues will be addressed. Prerequisite: APMA 2550 or equivalent knowledge in numerical methods.

**APMA 2570B. Numerical Solution of Partial Differential Equations III.**

We will cover finite element methods for ordinary differential equations and for elliptic, parabolic and hyperbolic partial differential equations. Algorithm development, analysis, and computer implementation issues will be addressed. In particular, we will discuss in depth the discontinuous Galerkin finite element method. Prerequisite: APMA 2550 or equivalent knowledge in numerical methods.

**APMA 2580A. Computational Fluid Dynamics.**

The course will focus primarily on finite difference methods for viscous incompressible flows. Other topics will include multiscale methods, e.g. molecular dynamics, dissipative particle dynamics and lattice Boltzmann methods. We will start with the mathematical nature of the Navier-Stokes equations and their simplified models, learn about high-order explicit and implicit methods, time stepping, and fast solvers. We will then cover advection-diffusion equations and various forms of the Navier-Stokes equations in primitive variables and in vorticity/streamfunction formulations. In addition to the homeworks the students are required to develop a Navier-Stokes solver as a final project.

**APMA 2580B. Computational Fluid Dynamics for Compressible Flows.**

An introduction to computational fluid dynamics with emphasis on compressible flows. We will cover finite difference, finite volume and finite element methods for compressible Euler and Navier-Stokes equations and for general hyperbolic conservation laws. Background material in hyperbolic partial differential equations will also be covered. Algorithm development, analysis, implementation and application issues will be addressed. Prerequisite: APMA 2550 or equivalent knowledge in numerical methods.

**APMA 2610. Recent Applications of Probability and Statistics.**

This course develops the mathematical foundations of modern applications of statistics to the computational, cognitive, engineering, and neural sciences. The course is rigorous, but the emphasis is on application. Topics include: Gibbs ensembles and their relation to maximum entropy, large deviations, exponential models, and information theory; statistical estimation and the generative, discriminative and algorithmic approaches to classification; graphical models, dynamic programming, MCMC computing, parameter estimation, and the EM algorithm. For 2,000-level credit enroll in 2610; for 1,000-level credit enroll in 1740. Rigorous calculus-based statistics, programming experience, and strong mathematical background are essential. For 2610, some graduate level analysis is strongly suggested.

**APMA 2630. Theory of Probability.**

Part one of a two semester course that provides an introduction to probability theory based on measure theory. The first semester (APMA 2630) covers the following topics: countable state Markov chains, review of real analysis and metric spaces, probability spaces, random variables and measurable functions, Borel-Cantelli lemmas, weak and strong laws of large numbers, conditional expectation and beginning of discrete time martingale theory. Prerequisites—undergraduate probability and analysis, co-requisite—graduate real analysis.

**APMA 2640. Theory of Probability II.**

Part two of a two semester course that provides an introduction to probability theory based on measure theory. Standard topics covered in the second-semester (APMA 2640) include the following: discrete time martingale theory, weak convergence (also called convergence in distribution) and the central limit theorem, and a study of Brownian motion. Optional topics include the ergodic theorem and large deviation theory. Prerequisites—undergraduate probability and analysis, co-requisite—graduate real analysis.

**APMA 2660. Stochastic Processes.**

Review of the theory of stochastic differential equations and reflected SDEs, and of the ergodic and stability theory of these processes. Introduction to the theory of weak convergence of probability measures and processes. Concentrates on applications to the probabilistic modeling, control, and approximation of modern communications and queuing networks; emphasizes the basic methods, which are fundamental tools throughout applications of probability.

**APMA 2670. Mathematical Statistics I.**

This course presents advanced statistical inference methods. Topics include: foundations of statistical inference and comparison of classical, Bayesian, and minimax approaches, point and set estimation, hypothesis testing, linear regression, linear classification and principal component analysis, MRF, consistency and asymptotic normality of Maximum Likelihood and estimators, statistical inference from noisy or degraded data, and computational methods (E-M Algorithm, Markov Chain Monte Carlo, Bootstrap). Prerequisite: APMA 2630 or equivalent.

**APMA 2680. Mathematical Statistics II.**

The course covers modern nonparametric statistical methods. Topics include: density estimation, multiple regression, adaptive smoothing, cross-validation, bootstrap, classification and regression trees, nonlinear discriminant analysis, projection pursuit, the ACE algorithm for time series prediction, support vector machines, and neural networks. The course will provide the mathematical underpinnings, but it will also touch upon some applications in computer vision/speech recognition, and biological, neural, and cognitive sciences. Prerequisite: APMA 2670.

**APMA 2720. Information Theory.**

Information theory and its relationship with probability, statistics, and data compression. Entropy. The Shannon-McMillan-Breiman theorem. Shannon's source coding theorems. Statistical inference; hypothesis testing; model selection; the minimum description length principle. Information-theoretic proofs of limit theorems in probability: Law of large numbers, central limit theorem, large deviations, Markov chain convergence, Poisson approximation, Hewitt-Savage 0-1 law. Prerequisites: APMA 2630, 1710.

**APMA 2810A. Computational Biology.**

Provides an up-to-date presentation of the main problems and algorithms in bioinformatics. Emphasis is given to statistical/ probabilistic methods for various molecular biology tasks, including: comparison of genomes of different species, finding genes and motifs, understanding transcription control mechanisms, analyzing microarray data for gene clustering, and predicting RNA structure.

**APMA 2810B. Computational Molecular Biology.**

Provides an up-to-date presentation of problems and algorithms in bioinformatics, beginning with an introduction to biochemistry and molecular genetics. Topics include: proteins and nucleic acids, the genetic code, the central dogma, the genome, gene expression, metabolic transformations, and experimental methods (gel electrophoresis, X-ray crystallography, NMR). Also, algorithms for DNA sequence alignment, database search tools (BLAST), and DNA sequencing.

**APMA 2810C. Elements of High Performance Scientific Computing.**

No description available.

**APMA 2810D. Elements of High Performance Scientific Computing II.**

No description available.

**APMA 2810E. Far Field Boundary Conditions for Hyperbolic Equations.**

No description available.

**APMA 2810F. Introduction to Non-linear Optics.**

No description available.

**APMA 2810G. Large Deviations.**

No description available.

**APMA 2810H. Math of Finance.**

No description available.

**APMA 2810I. Mathematical Models and Numerical Analysis in Computational Quantum Chemistry.**

We shall present on some models in the quantum chemistry field (Thomas Fermi and related, Hartree Fock, Kohn Sham) the basic tools of functional analysis for the study of their solutions. Then some of the discretization methods and iterative algorithms to solve these problems will be presented and analyzed. Some of the open problems that flourish in this field will also be presented all along the lectures.

**APMA 2810J. Mathematical Techniques for Neural Modeling.**

No description available.

**APMA 2810K. Methods of Algebraic Geometry in Control Theory I.**

Develops the ideas of algebraic geometry in the context of control theory. The first semester examines scalar linear systems and affine algebraic geometry while the second semester addresses multivariable linear systems and projective algebraic geometry.

**APMA 2810L. Numerical Solution of Hyperbolic PDE's.**

No description available.

**APMA 2810M. Some Topics in Kinetic Theory.**

Nonlinear instabilities as well as boundary effects in a collisionless plasmas; Stable galaxy configurations; A nonlinear energy method in the Boltzmann theory will also be introduced. Self-contained solutions to specific concrete problems. Focus on ideas but not on technical aspects. Open problems and possible future research directions will then be discussed so that students can gain a broader perspective. Prerequisite: One semester of PDE (graduate level) is required.

**APMA 2810N. Topics in Nonlinear PDEs.**

Aspects of the theory on nonlinear evolution equations, which includes kinetic theory, nonlinear wave equations, variational problems, and dynamical stability.

**APMA 2810O. Stochastic Differential Equations.**

This course develops the theory and some applications of stochastic differential equations. Topics include: stochastic integral with respect to Brownian motion, existence and uniqueness for solutions of SDEs, Markov property of solutions, sample path properties, Girsanov's Theorem, weak existence and uniqueness, and connections with partial differential equations. Possible additional topics include stochastic stability, reflected diffusions, numerical approximation, and stochastic control. Prerequisite: APMA 2630 and 2640.

**APMA 2810P. Perturbation Methods.**

Basic concepts of asymptotic approximations with examples with examples such as evaluation of integrals and functions. Regular and singular perturbation problems for differential equations arising in fluid mechanics, wave propagation or nonlinear oscillators. Methods include matched asymptotic expansions and multiple scales. Methods and results will be discussed in the context of applications to physical problems.

**APMA 2810Q. Discontinuous Galerkin Methods.**

In this seminar course we will cover the algorithm formulation, stability analysis and error estimates, and implementation and applications of discontinuous Galerkin finite element methods for solving hyperbolic conservation laws, convection diffusion equations, dispersive wave equations, and other linear and nonlinear partial differential equations. Prerequisite: APMA 2550.

**APMA 2810R. Computational Biology Methods for Gene/Protein Networks and Structural Proteomics.**

The course presents computational and statistical methods for gene and protein networks and structural proteomics; it emphasizes: (1) Probabilistic models for gene regulatory networks via microarray, chromatin immunoprecipitation, and cis-regulatory data; (2) Signal transduction pathways via tandem mass spectrometry data; (3) Molecular Modeling for ligand-receptor coupling and docking. The course is recommended for graduate students.

**APMA 2810S. Topics in Control.**

No description available.

**APMA 2810T. Nonlinear Partial Differential Equations.**

This course introduces techniques useful for solving many nonlinear partial differential equations, with emphasis on elliptic problems. PDE from a variety of applications will be discussed. Contact the instructor about prerequisites.

**APMA 2810U. Topics in Differential Equations.**

No description available.

**APMA 2810V. Topics in Partial Differential Equations.**

The course will cover an introduction of the  $L_p$  theory of second order elliptic and parabolic equations, finite difference approximations of elliptic and parabolic equations, and some recent developments in the Navier-Stokes equations and quasi-geostrophic equations. Some knowledge of real analysis will be expected.

**APMA 2810W. Advanced Topics in High Order Numerical Methods for Convection Dominated Problems.**

This is an advanced seminar course. We will cover several topics in high order numerical methods for convection dominated problems, including methods for solving Boltzman type equations, methods for solving unsteady and steady Hamilton-Jacobi equations, and methods for solving moment models in semi-conductor device simulations. Prerequisite: APMA 2550 or equivalent knowledge of numerical analysis.

**APMA 2810X. Introduction to the Theory of Large Deviations.**

The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change-of-measure, PDE, weak convergence, etc.), and basic examples (e.g., Sanov's and Cramer's Theorems). We then will cover the Wentzel-Freidlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitive control and Monte Carlo methods. Prerequisites: APMA 2630 and 2640.

**APMA 2810Y. Discrete high-D Inferences in Genomics.**

Genomics is revolutionizing biology and biomedicine and generated a mass of clearly relevant high-D data along with many important high-D discrete inference problems. Topics: special characteristics of discrete high-D inference including Bayesian posterior inference; point estimation; interval estimation; hypothesis tests; model selection; and statistical decision theory.

**APMA 2810Z. An Introduction to the Theory of Large Deviations.**

The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change-of-measure, subadditivity, etc.), and elementary examples (e.g., Sanov's and Cramer's Theorems). We then will cover large deviations for diffusion processes and the Wentzel-Freidlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitive control; weak convergence methods; Hamilton-Jacobi-Bellman equations; Monte Carlo methods. Prerequisites: APMA 2630 and 2640.

**APMA 2811A. Directed Methods in Control and System Theory.**

Various general techniques have been developed for control and system problems. Many of the methods are indirect. For example, control problems are reduced to a problem involving a differential equation (such as the partial differential equation of Dynamic Programming) or to a system of differential equations (such as the canonical system of the Maximum Principle). Since these indirect methods are not always effective alternative approaches are necessary. In particular, direct methods are of interest.

We deal with two general classes, namely: 1.) Integration Methods; and, 2.) Representation Methods. Integration methods deal with the integration of function space differential equations. Perhaps the most familiar is the so-called Gradient Method or curve of steepest descent approach. Representation methods utilize approximation in function spaces and include both deterministic and stochastic finite element methods. Our concentration will be on the theoretical development and less on specific numerical procedures. The material on representation methods for Levy processes is new.

**APMA 2811B. Computational Methods for Signaling Pathways and Protein Interactions.**

The course will provide presentation of the biology and mathematical models/algorithms for a variety of topics, including: (1) The analysis and interpretation of tandem mass spectrometry data for protein identification and determination of signaling pathways, (2) Identification of Phosphorylation sites and motifs and structural aspects of protein docking problems. Prerequisites: The course is recommended for graduate students. It will be self-contained; students will be able to fill in knowledge by reading material to be indicated by the instructor.

**APMA 2811C. Stochastic Partial Differential Equations.**

SPDEs is an interdisciplinary area at the crossroads of stochastic processes and partial differential equations (PDEs). The topics of the course include: geneses of SPDEs in real life applications, mathematical foundations and analysis of SPDEs, numerical and computational aspects of SPDEs, applications of SPDEs to fluid dynamics, population biology, hidden Markov models, etc. Prerequisites: familiarity with stochastic calculus and PDEs (graduate level).

**APMA 2811D. Asymptotic Problems For Differential Equations And Stochastic Processes.**

Topics that will be covered include: WKB method: zeroth and first orders; turning points; Perturbation theory: regular perturbation, singular perturbation and boundary layers; Homogenization methods for ODE's, elliptic and parabolic PDE's; Homogenization for SDE's, diffusion processes in periodic and random media; Averaging principle for ODE's and SDE's. Applications will be discussed in class and in homework problems.

**APMA 2811E. A Posteriori Estimates for Finite Element Methods.**

This course gives an introduction to the basic concepts of a posteriori estimates of finite element methods. After an overview of different techniques the main focus will be shed on residual based estimates where as a starting point the Laplace operator is analyzed. Effectivity and reliability of the error estimator will be proven. In a second part of the course, students will either study research articles and present them or implement the error estimates for some specific problem and present their numerical results. Recommended prerequisites: basic knowledge in finite elements, APMA 2550, 2560, 2570.

**APMA 2811F. Numerical Solution of Ordinary Differential Equations: IVP Problems and PDE Related Issues.**

The purpose of the course is to lay the foundation for the development and analysis of numerical methods for solving systems of ordinary differential equations. With a dual emphasis on analysis and efficient implementations, we shall develop the theory for multistage methods (Runge-Kutta type) and multi-step methods (Adams/BDF methods). We shall also discuss efficient implementation strategies using Newton-type methods and hybrid techniques such as Rosenbruck methods. The discussion includes definitions of different notions of stability, stiffness and stability regions, global/local error estimation, and error control. Time permitting, we shall also discuss more specialized topics such as symplectic integration methods and parallel-in-time methods. A key component of the course shall be the discussion of problems and methods designed with the discretization of ODE systems originating from PDE's in mind. Topics include splitting methods, methods for differential-algebraic equations (DAE), deferred correction methods, and order reduction problems for IBVP, TVD and IMEX methods. Part of the class will consist of student presentations on more advanced topics, summarizing properties and known results based on reading journal papers.

**APMA 2811G. Topics in Averaging and Metastability with Applications.**

Topics that will be covered include: the averaging principle for stochastic dynamical systems and in particular for Hamiltonian systems; metastability and stochastic resonance. We will also discuss applications in class and in homework problems. In particular we will consider metastability issues arising in chemistry and biology, e.g. in the dynamical behavior of proteins. The course will be largely self contained, but a course in graduate probability theory and/or stochastic calculus will definitely help.

**APMA 2811H. Survival Analysis.****APMA 2811I. An Introduction to Turbulence Modeling.**

Turbulence is the last mystery of classical physics. It surrounds us everywhere – in the air, in the ocean, in pipes carrying fluids and even in human body arteries. The course helps to understand what makes modeling the turbulence so difficult and challenging. The course covers the following issues: The nature of turbulence, characteristics of turbulence and classical constants of turbulence; Turbulent scales; Navier-Stokes equations, Reynolds stresses and Reynolds-Averaged Navier-Stokes (RANS) equations; RANS turbulence models: algebraic models, one-equation models, two-equation models; Low-Reynolds number turbulence models; Renormalization Group (RNG) turbulence model; Large-Eddy Simulation (LES); Students will be provided with user-friendly computer codes to run different benchmark cases. The final grade is based on two take home projects - computing or published papers analysis, optionally.

**APMA 2811K. Computational/Statistical Methods for Signaling Pathways and Protein Interactions.**

The course will cover the main mathematical/computational models/algorithms for a variety of tasks in proteomics and structural proteomics, including: (1) The analysis and interpretation of tandem mass spectrometry data for protein identification and determination of signaling pathways, (2) Identification of Phosphorylation sites and motifs, and (3) structural aspects of protein docking problems on the basis of NMR data. Open to graduate students only.

**APMA 2811L. Topics in Homogenization: Theory and Computation.**

Topics that will be covered include: Homogenization methods for ODE's, for elliptic and parabolic PDE's and for stochastic differential Equations (SDE's) in both periodic and random media; Averaging principle for ODE's and SDE's. Both theoretical and computational aspects will be studied. Applications will be discussed in class and in homework problems. Prerequisites: Some background in PDE's and probability will be helpful, even though the class will be largely self contained.

**APMA 2811O. Dynamics and Stochastics.**

This course provides a synthesis of mathematical problems at the interface between stochastic problems and dynamical systems that arise in systems biology. For instance, in some biological systems some species may be modeled stochastically while other species can be modeled using deterministic dynamics. Topics will include an introduction to biological networks, multiscale analysis, analysis of network structure, among other topics. Prerequisites: probability theory (APMA 2630/2640, concurrent enrollment in APMA 2640 is acceptable).

**APMA 2811Q. Calculus of Variations.**

An introduction to modern techniques in the calculus of variations. Topics covered will include: existence of solutions and the direct method, Euler-Lagrange equations and necessary and sufficient conditions, one-dimensional problems, multidimensional nonconvex problems, relaxation and quasiconvexity, Young's measures, and singular perturbations. The emphasis of the course will be equal parts theory and applications with numerous examples drawn from topics in nonlinear elasticity, pattern formation, wrinkling thin elastic sheets, martensitic phase transitions, minimal surfaces, differential geometry and optimal control.

**APMA 2811S. Levy Processes.**

Lévy processes are the continuous-time analogues of random walks, and include Brownian motion, compound Poisson processes, and square-integrable pure-jump martingales with many small jumps. In this course we will develop the basic theory of general Lévy processes and subordinators, and discuss topics including local time, excursions, and fluctuations. Time permitting we will finish with selected applications which are of mutual interest to the instructor and students enrolled in the class. Prerequisite: APMA 2640 or equivalent.

**APMA 2811Z. Stochastic Partial Differential Equations: Theory and Numerics.**

This course introduces basic theory and numerics of stochastic partial differential equations (SPDEs). Topics include Brownian motion and stochastic calculus in Hilbert spaces, classification of SPDEs and solutions, stochastic elliptic, hyperbolic and parabolic equations, regularity of solutions, linear and nonlinear equations, analytic and numerical methods for SPDEs. Topics of particular interest will also be discussed upon agreements between the instructor and audience. All three courses APMA 2630, APMA 2640, APMA 2550 are background recommended but not required.

**APMA 2812B. An Introduction to SPDE's.**

An introduction to the basic theory of Stochastic PDE's. Topics will likely include (time permitting) Gaussian measure theory, stochastic integration, stochastic convolutions, stochastic evolution equations in Hilbert spaces, Ito's formula, local well-posedness for semi-linear SPDE with additive noise, weak Martingale solutions to 3D Navier-Stokes, Markov processes on Polish spaces, the Krylov–Bogolyubov theorem, the Doob-Khasminskii theorem, and Bismut-Elworthy-Li formula for a class of non-degenerate SPDE. The presentation will be largely self contained, but will assume some basic knowledge in measure theory, functional analysis, and probability theory. Some familiarity with SDE and PDE is also very helpful, but not required.

**APMA 2820A. A Tutorial on Particle Methods.**

No description available.

**APMA 2820B. Advanced Topics in Information Theory.**

Explores classical and recent results in information theory. Topics chosen from: multi-terminal/network information theory; communication under channel uncertainty; side information problems (channel, source, and the duality between them); identification via channels; and multi-antenna fading channels. Prerequisite: APMA 1710 or basic knowledge of information theory.

**APMA 2820C. Computational Electromagnetics.**

No description available.

**APMA 2820D. Conventional, Real and Quantum Computing with Applications to Factoring and Root Finding.**

No description available.

**APMA 2820E. Geophysical Fluid Dynamics.**

No description available.

**APMA 2820F. Information Theory and Networks.**

No description available.

**APMA 2820G. Information Theory, Statistics and Probability.**

No description available.

**APMA 2820H. Kinetic Theory.**

We will focus on two main topics in mathematical study of the kinetic theory: (1) The new goal method to study the trend to Maxwellians; (2) various hydrodynamical (fluids) limits to Euler and Navier-Stokes equations. Main emphasis will be on the ideas behind proofs, but not on technical details.

**APMA 2820I. Multiscale Methods and Computer Vision.**

Course will address some basic multiscale computational methods such as: multigrid solvers for physical systems, including both geometric and algebraic multigrid, fast integral transforms of various kinds (including a fast Radon transform), and fast inverse integral transforms. Basic problems in computer vision such as global contour detection and their completion over gaps, image segmentation for textural images and perceptual grouping tasks in general will be explained in more details.

**APMA 2820J. Numerical Linear Algebra.**

Solving large systems of linear equations: The course will use the text of Treftan and BAO that includes all the modern concepts of solving linear equations.

**APMA 2820K. Numerical Solution of Ordinary Differential Equations.**

We discuss the construction and general theory of multistep and multistage methods for numerically solving systems of ODE's, including stiff and nonlinear problems. Different notions to stability and error estimation and control. As time permits we shall discuss more advanced topics such as order reduction, general linear and additive methods, symplectic methods, and methods for DAE. Prerequisites: APMA 2190 and APMA 2550 or equivalent. Some programming experience is expected.

**APMA 2820L. Random Processes in Mechanics.**

No description available.

**APMA 2820M. Singularities in Elliptic Problems and their Treatment by High-Order Finite Element Methods.**

Singular solutions for elliptic problems (elasticity and heat transfer) are discussed. These may arise around corners in 2-D and along edges and vertices in 3-D domains. Derivation of singular solutions, characterized by eigenpairs and generalized stress/flux intensity factors (GSIF/GFIFs) are a major engineering importance (because of failure initiation and propagation). High-order FE methods are introduced, and special algorithms for extracting eigenpairs and GSIF/GFIFs are studied (Steklov, dual-function, ERR method, and others).

**APMA 2820N. Topics in Scientific Computing.**

No description available.

**APMA 2820O. The Mathematics of Shape with Applications to Computer Vision.**

Methods of representing shape, the geometry of the space of shapes, warping and matching of shapes, and some applications to problems in computer vision and medical imaging. Prerequisite: See instructor for prerequisites.

**APMA 2820P. Foundations in Statistical Inference in Molecular Biology.**

In molecular biology, inferences in high dimensions with missing data are common. A conceptual framework for Bayesian and frequentist inferences in this setting including: sequence alignment, RNA secondary structure prediction, database search, and functional genomics. Statistical topics: parameter estimation, hypothesis testing, and characterization of posterior spaces. Core course in proposed PhD program in computational molecular biology.

**APMA 2820Q. Topics in Kinetic Theory.**

This course will introduce current mathematical study for Boltzmann equation and Vlasov equation. We will study large time behavior and hydrodynamic limits for Boltzmann theory and instabilities in the Vlasov theory. Graduate PDE course is required.

**APMA 2820R. Structure Theory of Control Systems.**

The course deals with the following problems: given a family of control systems  $S$  and a family of control systems  $S'$ , when does there exist an appropriate embedding of  $S$  into  $S'$ ? Most of the course will deal with the families of linear control systems. Knowledge of control theory and mathematical sophistication are required.

**APMA 2820S. Topics in Differential Equations.**

A sequel to APMA 2210 concentrating on similar material.

**APMA 2820T. Foundations in Statistical Inference in Molecular Biology.**

In molecular biology, inferences in high dimensions with missing data are common. A conceptual framework for Bayesian and frequentist inferences in this setting including: sequence alignment, RNA secondary structure prediction, database search, and tiled arrays. Statistical topics: parameter estimation, hypothesis testing, recursions, and characterization of posterior spaces. Core course in proposed PhD program in computational molecular biology.

**APMA 2820U. Structure Theory of Control Systems.**

The course deals with the following problems: given a family of control systems  $S$  and a family of control systems  $S'$ , when does there exist an appropriate embedding of  $S$  into  $S'$ ? Most of the course will deal with the families of linear control systems. Knowledge of control theory and mathematical sophistication are required.

**APMA 2820V. Progress in the Theory of Shock Waves.**

Course begins with self-contained introduction to theory of "hyperbolic conservation laws", that is quasilinear first order systems of partial differential equations whose solutions spontaneously develop singularities that propagate as shock waves. A number of recent developments will be discussed. Aim is to familiarize the students with current status of the theory as well as with the expanding areas of applications of the subject.

**APMA 2820W. An Introduction to the Theory of Large Deviations.**

The theory of large deviations attempts to estimate the probability of rare events and identify the most likely way they happen. The course will begin with a review of the general framework, standard techniques (change-of-measure, subadditivity, etc.), and elementary examples (e.g., Sanov's and Cramer's Theorems). We then will cover large deviations for diffusion processes and the Wentzel-Freidlin theory. The last part of the course will be one or two related topics, possibly drawn from (but not limited to) risk-sensitive control; weak convergence methods; Hamilton-Jacobi-Bellman equations; Monte Carlo methods. Prerequisites: APMA 2630 and 2640.

**APMA 2820X. Boundary Conditions for Hyperbolic Systems: Numerical and Far Field.****APMA 2820Y. Approaches to Problem Solving in Applied Mathematics.**

TBA

**APMA 2820Z. Topics in Discontinuous Galerkin Methods.**

We will cover discontinuous Galerkin methods for time-dependent and steady state problems. Stability and error estimates of different discontinuous Galerkin methods will be discussed. In particular, we will discuss in depth the local discontinuous Galerkin method. Prerequisite: APMA 2550 or equivalent knowledge of numerical analysis.

**APMA 2821A. Parallel Scientific Computing: Algorithms and Tools.**  
No description available.

**APMA 2821B. To Be Determined.**

**APMA 2821C. Topics in Partial Differential Equations.**

The course will start by reviewing the theory of elliptic and parabolic equations in Holder spaces. Then we will discuss several topics in nonlinear elliptic and parabolic equations, for instance, the Navier-Stokes equation and Monge-Ampere type equations. This course is a sequel to APMA 2810V, but APMA 2810V is not a prerequisite.

**APMA 2821D. Random Processes and Random Variables.**

**APMA 2821E. Topics in Variational Methods.**

This course consists of two parts: a general introduction to variational methods in PDE, and a more focused foray into some special topics. For the former we will cover the direct method in the calculus of variations, various notions of convexity, Noether's theorem, minimax methods, index theory, and gamma-convergence. For the latter we will focus on several specific problems of recent interest, with emphasis on the Ginzburg-Landau energy functional.

**APMA 2821F. Computational Linear Algebra.**

The course will cover basic and advanced algorithms for solution of linear and nonlinear systems as well as eigenvalue problems.

**APMA 2821G. High-Performance Discontinuous Galerkin Solvers.**

Addresses strategies and algorithms in devising efficient discontinuous Galerkin solvers for fluid flow equations such as Euler and Navier-Stokes. The course starts with an introduction to discontinuous Galerkin methods for elliptic and hyperbolic equations and then focuses on the following topics: 1) Serial and parallel implementations of various discontinuous Galerkin operators for curvilinear elements in multiple space dimensions. 2) Explicit, semi-explicit and implicit time discretizations. 3) Multigrid (multi-level) solvers and preconditioners for systems arising from discontinuous Galerkin approximations of the partial differential equations.

**APMA 2821H. Introduction to High Performance Computing: Tools and Algorithms.**

This course will cover fundamental concepts of parallel computing: shared and distributed memory models; metrics for performance measuring; roof-line model for analysis of computational kernels, prediction and improving their performance on different processors; code optimization. We will analyze algorithms maximizing data reuse, and memory bandwidth utilization. Prior experience in coding is a plus. One course meeting will take place at IBM/Research, students will interact with experts in areas of HPC, visualization, social media and more. There will be bi-weekly homework assignments and a final project. Students are encouraged to suggest final project relevant to their research and level of expertise.

**APMA 2821I. Formulation and Approximation of Linear and Non-linear Problems of Solid Mechanics.**

Presents the formulation and approximation by the Finite Element Method (FEM) of linear and non-linear problems of Solid Mechanics. The formulation of problems is based on the Virtual Work Principle (VWP). Increasing complexity problems will be considered such as simple bar under traction, beams, plates, plane problems and solids with linear and hyperelastic materials. All problems are formulated using the same sequence of presentation which includes kinematics, strain measure, rigid body deformation, internal work, external work, VWP and constitutive equations. The approximation of the given problems is based on the High-order FEM. Examples will be presented using a Matlab code.

**APMA 2821J. Some Topics in Kinetic Theory.**

In this advanced topic course, we will go over several aspects of recent mathematical work on kinetic theory. Graduate level PDE is required.

**APMA 2821K. Probabilistic and Statistical Models for Graphs and Networks.**

Many modern data sets involve observations about a network of interacting components. Probabilistic and statistical models for graphs and networks play a central role in understanding these data sets. This is an area of active research across many disciplines. Students will read and discuss primary research papers and complete a final project.

**APMA 2821L. Introduction to Malliavin Calculus.**

The Malliavin calculus is a stochastic calculus for random variables on Gaussian probability spaces, in particular the classical Wiener space. It was originally introduced in the 1970s by the French mathematician Paul Malliavin as a probabilistic approach to the regularity theory of second-order deterministic partial differential equations. Since its introduction, Malliavin's calculus has been extended beyond its original scope and has found applications in many branches of stochastic analysis; e.g. filtering and optimal control, mathematical finance, numerical methods for stochastic differential equations. This course will introduce, starting in a simple setting, the basic concepts and operations of the Malliavin calculus, which will then be applied to the study of regularity of stochastic differential equations and their associated partial differential equations. In addition, applications from optimal control and finance, including the Clark-Ocone formula and its connection with hedging, will be presented.

**APMA 2821M. Some Mathematical Problems in Materials Science.**

We will study a variety of mathematical models for problems in materials science. Mainly we will consider models of phase transformation, static and dynamic. Some of the topics to be treated are: (1) models of phase transformation; (2) gradient flows; (3) kinetic theories of domain growth; (4) stochastic models; (5) free boundary problems. A working familiarity with partial differential equations is required.

**APMA 2821N. Numerical Solution of Ordinary Differential Equations: IVP Problems and PDE Related Issues.**

The course seeks to lay the foundation for the development and analysis of numerical methods for solving systems of ordinary differential equations. With a dual emphasis on analysis and efficient implementations, we shall develop the theory for multistage methods (Runge-Kutta type) and multi-step methods (Adams/BDF methods). The discussion includes definitions of different notions of stability, stiffness and stability regions, global/local error estimation, and error control. We also discuss more specialized topics such as symplectic integration methods, parallel-in-time methods, include splitting methods, methods for differential-algebraic equations (DAE), deferred correction methods, and order reduction problems for IBVP, TVD and IMEX methods.

**APMA 2821O. Topics in Posteriori Error Estimations: Finite Element and Reduced Basis Methods.**

The course will contain two related parts. An introduction of different types of a posteriori error estimations for various finite element methods, certified reduced basis method, where a posteriori error estimations play an important role. Emphasize both the theory and implementation. Related Matlab programs. Residual-type, local-problem type, and recovery-type error estimators for conforming, mixed, non-conforming, and discontinuous galerkin finite element methods for different types of equations. Reduced basis methods, offline-online procedure, greedy algorithm, error estimator, empirical interpolation method, and successive constraint method will be discussed. Goal-Oriented primal-dual approach for both FEM and RBM will be covered. Objective: To learn various theoretical and practical results of adaptive finite element methods and reduced basis methods.

**APMA 2821P. Topics in the Atomistic-to-Continuum Coupling Methods for Material Science.**

Atomistic-to-continuum coupling methods (a/c methods) have been proposed to increase the computational efficiency of atomistic computations involving the interaction between local crystal defects with long-range elastic fields. This course provides an introduction to the fundamentals required to understand modeling and computer simulation of material behavior. This course will first briefly review material from continuum mechanics, materials science including crystals and defects and then move on to advanced topics in development and analysis of a/c coupling methods both in static and dynamic cases. I will also select topics from statistical mechanics and temporal multiscale accelerated molecular dynamics methods (hyperdynamics, parallel replica dynamics).

**APMA 2821R. Topics in the Atomistic-to-Continuum Coupling Methods for Material Science.**

Atomistic-to-continuum coupling methods (a/c methods) have been proposed to increase the computational efficiency of atomistic computations involving the interaction between local crystal defects with long-range elastic fields.

This is an advanced topics course for graduate students. Provides an introduction to the fundamentals required to understand modeling and computer simulation of material behavior. First briefly review material from continuum mechanics, materials science including crystals and defects and then move on to advanced topics in development and analysis of a/c coupling methods both in static and dynamic cases. select topics from statistical mechanics and temporal multiscale accelerated molecular dynamics methods (hyperdynamics, parallel replica dynamics).

**APMA 2821T. Theory of Large Deviations.**

The theory of large deviations is concerned with the probabilities of very rare events. There are many applications where a rare event can have a significant impact (think of the lottery) and it is of interest to know when and how these events occur. The course will begin with a review of the general framework, standard techniques, and elementary examples (e.g., Cramer's and Sanov's Theorems) before proceeding with general theory and applications. If time permits, the course will end with a study of large deviations for diffusion processes.

**APMA 2821U. Kinetic Theory.**

Topics in kinetic theory, particularly concerning Boltzmann equations and related but simpler models (e.g. the Kac model). Key issues include the mathematical derivation of the Boltzmann equation, the Cauchy problem, Boltzmann's H-theorem, and hydrodynamic limits yielding the equations of fluid mechanics. We will be most interested in rigorous results, but will not turn away from formal calculations when these are the only things available. A probabilistic viewpoint will be emphasized. In addition to these "traditional" topics, we will also introduce the Smoluchowski coagulation equation and a similar equation, and some microscopic models described by these in the kinetic limit or exactly. Students should have PDE background equivalent to or exceeding MATH 2370/APMA 2230. Familiarity with probability will be helpful, but we will review this according to the audience's needs.

**APMA 2821V. Neural Dynamics: Theory and Modeling.**

Our thoughts and actions are mediated by the dynamic activity of the brain's neurons. This course will use mathematics and computational modeling as a tool to study neural dynamics at the level of signal neurons and in more complicated networks. We will focus on relevance to modern day neuroscience problems with a goal of linking dynamics to function. Topics will include biophysically detailed and reduced representations of neurons, bifurcation and phase plane analysis of neural activity, neural rhythms and coupled oscillator theory. Audience: advanced undergraduate or graduate students. Prerequisite: APMA 0350-0360 and Matlab programming course. Instructor permission required.

**APMA 2822B. Introduction to Parallel Computing on Heterogeneous (CPU+GPU) Systems.**

This course we will learn fundamental aspects of parallel computing on heterogeneous systems composed of multi-core CPUs and GPUs. This course will contain lectures and hands-on parts. We will cover the following topics: shared memory and distributed memory programming models, parallelization strategies and nested parallelism. We will also learn techniques for managing memory and data on systems with heterogeneous memories (DDR for CPUs and HBM for GPUs); parallelization strategies using OpenMP and MPI; programming GPUs using OpenMP4.5 directives and CUDA. We will focus on programming strategies and application performance. Grading will be based on homework assignments, and final project.

**APMA 2980. Research in Applied Mathematics.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**APMA 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## Business, Entrepreneurship, Organizations (BEO)

The C.V. Starr Program in Business, Entrepreneurship, and Organizations is an interdisciplinary academic program that supports research, teaching and practice in the field of commerce. Its sponsoring departments of Economics and Sociology and the School of Engineering provide a unique scholarly foundation based upon economics, organizational studies, and entrepreneurship and technology management. Without a business school at Brown, the Business, Entrepreneurship and Organizations Program allows faculty and students a unique perspective on the critical issues facing businesses and organizations today.

An important component of BEO is a multidisciplinary, multi-track undergraduate concentration. This program:

- Provides students with a rigorous and synergistic program in the study of commercial activity grounded in Economics, Sociology and Engineering.
- Focuses on the formation, growth, and organization of new ventures, innovation in commercial applications, financial markets and the marketplace, globalization, and management and organizational theory.
- Connects vibrant practice-oriented co-curricular activities to the curriculum, including mentoring by entrepreneurs and other practitioners in the for-profit and not-for-profit sectors, domestic and international internships, the student-run Entrepreneurship Program, and its business plan competition.
- Is supported by interdisciplinary research that provides an academic grounding for the curriculum and keeps it innovative and fresh.
- Culminates senior year with a team-based capstone project focusing on solving a strategic, organizational, financial or marketing challenge with a sponsor company or organization.

For more information, please visit the BEO website (<http://brown.edu/academics/business-entrepreneurship-organizations>).

## Business, Entrepreneurship and Organizations Concentration Requirements

Business, Entrepreneurship and Organizations (BEO) is a multidisciplinary concentration that provides a rigorous and synergistic program in the study of commercial activity grounded in economics, sociology and engineering. BEO focuses on the formation, growth, and organization of new ventures, innovation in commercial applications, financial markets and the marketplace, and management and organizational theory. Concentrators seek to understand the basic principles, approaches and vocabulary relevant to the study of entrepreneurship from the disciplines of economics, organizational sociology and engineering. Building on this multidisciplinary base, students develop specialized expertise in one of the three disciplinary approaches, with special emphasis on critical reasoning and quantitative research methods. In senior year capstone projects, students apply and integrate multi-disciplinary learning by working in groups on real world projects, including the creation of new ventures. BEO students interested in the theory and practice of addressing social challenges might consider the Engaged Scholars Program (<https://www.brown.edu/academics/business-entrepreneurship-organizations/beo-engaged-scholar-program-esp>).

**The Business, Entrepreneurship, and Organizations concentration is open only to students admitted in the fall of 2019 or prior.**

The three tracks of the concentration are as follows:

1. Business Economics
2. Organizational Studies
3. Entrepreneurship and Technology Management

Upon completion of all concentration requirements, students receive the Bachelor of Arts (A.B.) degree in Business, Entrepreneurship and Organizations.

## The Curriculum

**Business Economics Track**

**Foundation Requirements (foundation requirements must be completed before taking the capstone in fall of senior year)**

ECON 0110	Principles of Economics	1
ECON 1110	Intermediate Microeconomics	1
Any two of the following three courses:		2
SOC 0300	Organizations and Society	
SOC 1311	Micro-Organizational Theory: Social Behavior in Organizations	
SOC 1315	Macro-Organizational Theory: Organizations in Social Context	
ENGN 0020	Transforming Society-Technology and Choices for the Future	1
or ENGN 0030	Introduction to Engineering	
ENGN 1010	The Entrepreneurial Process: Innovation in Practice	1

**Math and Statistics Requirements**

MATH 0100	Introductory Calculus, Part II	1
or MATH 0170	Advanced Placement Calculus	
or ECON 0170	Essential Mathematics for Economics	
Or AP BC Calculus score of 4 or higher		
Or IB High-level Math minimum score of 5 (IB Standard-level not accepted)		
ECON 1620	Introduction to Econometrics	1

**Track Requirements**

ECON 0710	Financial Accounting	1
ECON 1210	Intermediate Macroeconomics	1
ECON 1629	Applied Research Methods for Economists	1
ECON 1710	Investments I	1
ECON 1720	Corporate Finance	1
One 1000-level economics course.		1
Capstone: one-semester required (must be taken fall of senior year)		1
BEO 1930C	BEO Capstone I: Business Economics Track	

Total Credits 15

**Organizational Studies Track**

**Foundation Requirements (foundation requirements must be completed before taking the capstone in fall of senior year)**

ECON 0110	Principles of Economics	1
ECON 1110	Intermediate Microeconomics	1
ENGN 0020	Transforming Society-Technology and Choices for the Future	1
or ENGN 0030	Introduction to Engineering	
ENGN 1010	The Entrepreneurial Process: Innovation in Practice	1
Any two of the following three courses:		2
SOC 0300	Organizations and Society	
SOC 1311	Micro-Organizational Theory: Social Behavior in Organizations	
SOC 1315	Macro-Organizational Theory: Organizations in Social Context	

**Math and Statistics Requirements**

MATH 0100	Introductory Calculus, Part II	1
or MATH 0170	Advanced Placement Calculus	
or ECON 0170	Essential Mathematics for Economics	
Or AP BC Calculus with a score of 4 or higher		

Or IB High-level Math with a minimum score of 5 (IB Standard-level is not accepted)

SOC 1100	Introductory Statistics for Social Research	1
or APMA 0650	Essential Statistics	
or ECON 1620	Introduction to Econometrics	

**Track Requirements**

One Introduction to Research Methods course (selected from the following):

SOC 1020	Methods of Social Research	1
----------	----------------------------	---

Two Organization-Relevant Electives (OREs) Not all of the courses listed here will be offered in any given semester, and others are sometimes added. The following are approved examples-please consult with Courses@Brown/Brown.edu/BEO website for current offerings:

ORE courses allow students to deepen and/or broaden their exposure to topics and settings that are either strongly determined by, or strongly determining of, organizational activities and outcomes. An ORE course will have a clear linkage to commerce, organizations and/or entrepreneurship, and it will incorporate organizational phenomena and perspectives in a significant portion of its coursework.

Any from the Advanced Research Methods or Advanced Organization-Studies lists; or

CLPS 1250	Human Factors	
CSCI 1900	csciStartup	
ECON 1760	Financial Institutions	
EDUC 1020	The History of American Education	
EDUC 1040	Sociology of Education	
EDUC 1060	Politics and Public Education	
EDUC 1150	Education, the Economy and School Reform	
EDUC 1650	Policy Implementation in Education	
EDUC 1730	American Higher Education in Historical Context	
IAPA 1700B	Investigating Modes of Social Change	
IAPA 1803E	Social Entrepreneurship	
PHP 2400	The U.S. Health Care System: Case Studies in Financing, Delivery, Regulation and Public Health	

POLS 1150 Prosperity: The Ethics and Economics of Wealth Creation

POLS 1240 Politics, Markets and States in Developing Countries

POLS 1770 Education, Inequality, and American Democracy

SOC 1114 Law and Society

SOC 1115 The Enlightened Entrepreneur: Changemakers, Inspired Protagonists and Unreasonable People

SOC 1871C Sociology of the Legal Profession

One Advanced Organization Studies course (AOS). Not all of the courses listed here will be offered in any given semester, and others are sometimes added. The following are approved EXAMPLES-please consult with the Courses@Brown and the Brown.edu/BEO website for current offerings:

AOS courses directly employ and extend the theories and perspectives introduced by the foundational Organizational Studies courses. They are either taught by core Organization Studies faculty or vetted on a regular basis by the Organization Studies track advisor, to ensure that they thoroughly incorporate Organization Studies perspectives and focus primarily on organizational processes and phenomena.

CLPS 1730	Psychology in Business and Economics	
IAPA 1804E	Health Policy Challenges	

IAPA 1700E	Nonprofit Organizations	
MPA 2020	Public Budgeting and Management	
SOC 1060	Leadership in Organizations	
SOC 1128	Migrants, Refugees and the Mediterranean	
SOC 1870A	Investing in Social Change	
SOC 1870L	The Economic Foundations of Everyday Life	
SOC 18710	Law, Innovation and Entrepreneurship	
SOC 1872H	Sociology of FIRE: Finance, Insurance, + Real Estate	
One Advanced Research Methods course (ARM). Not all of the courses listed here will be offered in any given semester, and others are sometimes added. The following are approved examples-please consult with Courses@Brown and the brown.edu/BEO website for current offerings:		1
ARM courses allow students to deepen and/or broaden their expertise in one or more methods of empirical inquiry.		
ANTH 1940	Ethnographic Research Methods	
ECON 1630	Mathematical Econometrics I	
EDUC 1100	Introduction to Qualitative Research Methods	
MPA 2035	Statistics II for Public Policy Analysis	
IAPA 1700A	Program Evaluation	
MPA 2040	Statistics for Program Evaluation	
SOC 1117	Focus Groups for Market and Social Research	
SOC 1118	Context Research for Innovation	
SOC 1120	Market and Social Surveys	
SOC 1260	Market Research in Public and Private Sectors	
SOC 1340	Principles and Methods of Geographic Information Systems	
Capstone: two-semesters required <sup>1</sup>		2
BEO 1930A & BEO 1940A	BEO Capstone I: Organizational Studies Track and BEO Capstone II: Organizational Studies Track	
Total Credits		15

<sup>1</sup> If a student in the Organizational Studies track completes only the fall semester of the capstone course (BEO 1930A), she/he must take one additional ARM or AOS course.

## Entrepreneurship and Technology Management Track

**Foundation Requirements (foundation requirements must be completed before taking the capstone in fall of senior year)**

ECON 0110	Principles of Economics	1
ECON 1110	Intermediate Microeconomics	1
Any two of the following three courses:		2
SOC 0300	Organizations and Society	
SOC 1311	Micro-Organizational Theory: Social Behavior in Organizations	
SOC 1315	Macro-Organizational Theory: Organizations in Social Context	
ENGN 0030	Introduction to Engineering	1
ENGN 1010	The Entrepreneurial Process: Innovation in Practice	1

### Math and Statistics Requirements

MATH 0200	Intermediate Calculus (Physics/Engineering)	1
-----------	---	---

or APMA 0330	Methods of Applied Mathematics I, II	
SOC 1100	Introductory Statistics for Social Research	1
or APMA 0650	Essential Statistics	
or ECON 1620	Introduction to Econometrics	

### Track Requirements

One gateway course in Engineering or another physical science <sup>1</sup>		1
Five courses that develop expertise in a technical subfield <sup>1, 2</sup>		5
Capstone: two-semesters required (must be taken in fall and spring of senior year)		2
BEO 1930B	BEO Capstone I: Entrepreneurship and Technology Management Track	
BEO 1940B	BEO Capstone II: Entrepreneurship and Technology Management Track	

Total Credits 16

<sup>1</sup> For specific gateway and subfield courses, refer to the BEO website.

<sup>2</sup> Technical subfields include Biotechnology/Biomaterials, Information Technology and Computer Engineering, Energy and the Environment, and others.

## Courses

### BEO 1930A. BEO Capstone I: Organizational Studies Track.

The first in a two-semester Capstone for BEO Organizational Studies track seniors, open to all BEO seniors. Capstone builds upon concepts covered in BEO courses, specifically concepts from SOC 1311 and 1315. Students will synthesize knowledge at several levels: across disciplines, across theoretical understanding and practical application, and across private and public sector experiences of entrepreneurship and innovation. Students will be organized into client-mentored teams for social entrepreneurship and social innovation projects. BEO 1930A (fall) required; 1940A (spring) strongly advised for all Organizational Studies track seniors. Application required to match students to projects. Project team meetings required outside scheduled lectures.

### BEO 1930B. BEO Capstone I: Entrepreneurship and Technology Management Track.

The first in a two-semester Capstone required of BEO Tech track seniors. Student teams from Engineering, BEO and other technical and non-technical disciplines form simulated high tech start-up companies working on mentor-defined opportunities. Concepts reviewed in class include: product commercialization, intellectual property, marketing, product requirements documentation, team building, safety, environmental and legal requirements. BEO Tech track concentrators should complete ENGN 1010 prior to course. Enrollment is limited. Students must complete formal application (BEO Tech track seniors automatically approved). Project team meetings required outside scheduled lectures. Non-BEO concentrators require instructor permission.

### BEO 1930C. BEO Capstone I: Business Economics Track.

Designed for BEO Business Economics track seniors, this capstone is open to all BEO students, and builds upon BEO concepts in economics, finance, strategy and markets. Students form teams to solve existing business problems, simulating groups of consultants. Projects range from recommending appropriate finance for new investments to project evaluation and pricing of new services. Student teams have client-mentors. Students apply analytical frameworks of BEO disciplines to hone writing, presentational, leadership and organizational skills. Application required to match students to projects. Project team meetings required outside scheduled lectures.

### BEO 1940A. BEO Capstone II: Organizational Studies Track.

Continuation of Semester 1, BEO Capstone I: Organizational Studies Track (BEO 1930A). This course involves the completion of team projects begun in fall semester.

**BEO 1940B. BEO Capstone II: Entrepreneurship and Technology Management Track.**

Continuation of Semester 1, BEO Capstone I: Entrepreneurship and Technology Management Track (BEO 1930B). This course involves the completion of team projects begun in fall semester. Non-BEO concentrators require instructor permission.

**BEO 1970. Independent Study.**

Course allows concentrators to complete BEO 1930 as an independent study due to scheduling conflicts.

## Carney Institute for Brain Science

The mission of The Robert J. & Nancy D. Carney Institute for Brain Science (<https://www.brown.edu/academics/brain-science>) is to promote discovery and innovation in brain science by supporting a diverse community of experimentalists, theorists, engineers, and clinicians. The institute does this by recruiting and retaining world-class faculty, creating an outstanding collaborative training environment, seeding innovative projects, supporting collaborative teams, and raising the visibility and reputation of Carney researchers.

With more than 180 affiliated faculty members in 20 departments and clinical units, the Carney Institute is pursuing research that has real-life, human applications, including: brain-computer interfaces to aid patients with spinal injury and paralysis; innovative advances in computational neuroscience to address behavior and mood disorders; development of bioluminescent molecules to detect and control neuronal activity; development new methods for labeling neural circuits; and research into mechanisms of neurodegeneration as part of efforts to identify therapies for neurodegenerative diseases such as ALS, Alzheimer's, and Parkinson's disease. Critical to Carney's research efforts are the contributions of hundreds of graduate and undergraduate researchers and postdoctoral fellows.

The Carney Institute recruits and retains world-class faculty, funds innovative projects, establishes and supports state-of-the-art research facilities, and acquires shared equipment. The Institute also provides expertise and personnel to help faculty members garner and administer multi-investigator grants for research, infrastructure, and training, as well as to manage collaborative research projects.

## Brain Science Graduate Program

Brown University provides a unique environment in which to pursue interdisciplinary brain science graduate training. Research at Brown emphasizes collaborative theoretical and experimental studies of the brain, from the molecular to the behavioral and cognitive levels. It unites researchers who study the fundamental mechanisms of nervous system function and those who seek to create devices with brain-like functions that can assist people. The faculty is also committed to translating fundamental knowledge into practical applications to the diagnosis and treatment of the devastating effects of disease and trauma of the nervous system. Brown is a leader in brain-related research and offers exceptional training and course work for those interested in pursuing careers in brain science.

The Robert J. & Nancy D. Carney Institute for Brain Science (<http://www.brainscience.brown.edu>) partners with eight discipline-based graduate programs. Students interested in interdisciplinary brain science training enter through one of these graduate programs.

Carney-affiliated graduate programs include:

- Applied Mathematics Graduate Program (<https://www.brown.edu/academics/applied-mathematics/graduate-program>)
- Biomedical Engineering Graduate Program (<https://www.brown.edu/academics/biomedical-engineering/academics/graduate-program>)
- Biostatistics Graduate Program (<https://www.brown.edu/academics/public-health/biostats/home>)
- Cognitive, Linguistic, and Psychological Sciences Graduate Programs (<https://www.brown.edu/academics/cognitive-linguistic-psychological-sciences>)
- Computer Science Graduate Program (<http://cs.brown.edu/degrees>)

- Molecular Biology, Cell Biology, and Biochemistry Graduate Program (<https://www.brown.edu/academics/biology/molecular-cell-biochemistry/graduate>)
- Molecular Pharmacology and Physiology Graduate Program (<https://www.brown.edu/academics/molecular-pharmacology-physiology-and-biotechnology/graduate-programs>)
- Neuroscience Graduate Program (<http://neuroscience.brown.edu/graduate>)

Carney offers a number of opportunities for graduate students in any program to stretch beyond their discipline. Carney Institute lunches are held several times per semester and feature broad seminars and informal discussion led by Brown faculty members. Graduate students can also apply for the Carney Institute graduate student awards. The Institute also coordinates management of NIH institutional training grants that span departments and programs, including training grants in vision, fundamental neuroscience, and cognitive and computational neuroscience. The Institute also awards seed funding annually to launch new research projects, and graduate students are often involved in or initiate applications for these grants.

Learn more about the brain science program and admission requirements (<http://www.brown.edu/academics/gradschool/programs/brain-science>).

## Chemistry

### Chair

Lai-Sheng Wang

The Department of Chemistry maintains pedagogical and research strengths in organic, inorganic, theoretical and experimental physical chemistry, analytical chemistry, chemical biology and nanochemistry. Faculty, post-doctoral fellows, graduate and undergraduate students collaboratively pursue interdisciplinary research within the department, enhanced by the partnerships with colleagues in the medicine, biology, geology, physics and engineering.

For additional information, please visit the department's website: <http://www.brown.edu/academics/chemistry/>

## Chemistry Concentration Requirements

The Chemistry concentration offers courses and research opportunities that range from fundamental studies involving the characterization and preparation of synthetic and naturally occurring molecules, to interdisciplinary studies at the interfaces of chemistry with biology, medicine, physics, engineering, and nanoscience. As early as their first year, undergraduates are able to work one-on-one or in small groups with faculty members on cutting edge research projects. The Sc.B. degree provides a thorough foundation for further graduate study or for entry-level technical positions in each area. Students seeking the Sc.B. may either pursue the standard Chemistry concentration or one of the two optional tracks: Chemical Biology or Materials Chemistry. Students may also pursue the A.B. degree in Chemistry, which provides a core education in the discipline.

### Standard program for the A.B. degree

CHEM 0330	Equilibrium, Rate, and Structure	1
CHEM 0350	Organic Chemistry	1
CHEM 0360	Organic Chemistry	1
CHEM 0500	Inorganic Chemistry	1
CHEM 1140	Physical Chemistry: Quantum Chemistry <sup>1</sup>	1
CHEM 1150	Physical Chemistry: Thermodynamics and Statistical Mechanics <sup>1</sup>	1
CHEM 1160	Physical Chemistry Laboratory <sup>1</sup>	1
Two advanced science/math electives. <sup>2</sup>		2
Total Credits		9

<sup>1</sup> Note that the physical chemistry courses (CHEM 1140, CHEM 1150, CHEM 1160) have mathematics and physics prerequisites.

<sup>2</sup> At least one must be a chemistry course. BIOL 0280 is credited as a chemistry elective for chemistry concentration purposes. Non CHEM electives are upper level science/math courses with a significant molecular focus or those that cover tools/techniques that are of utility to a chemist. You should discuss your elective choices with the Concentration Advisor to craft a course of study that is appropriate for your interests.

## Standard program for the Sc.B. degree

The Chemistry Department offers three tracks for the Sc.B. Chemistry Concentration – a Chemistry track, a Chemical Biology track and a Materials Chemistry track. These tracks are not separate concentrations – your degree will still be an Sc.B. in Chemistry. The Chemical Biology track is designed for students who have a strong interest in the interface of chemistry with biology. The Materials Chemistry track is designed for students who have a strong interest in the interface of chemistry with nanoscience and materials science. The expectation is that courses required for the concentration will be taken for a letter grade.

### Concentrating in Chemistry – Three tracks

The required/recommended courses for the three tracks are given below.

#### Chemistry Track:

CHEM 0330	Equilibrium, Rate, and Structure	1
CHEM 0350	Organic Chemistry	1
CHEM 0360	Organic Chemistry	1
CHEM 0500	Inorganic Chemistry	1
CHEM 0970	Undergraduate Research	1
CHEM 0980	Undergraduate Research	1
CHEM 1140	Physical Chemistry: Quantum Chemistry	1
CHEM 1150	Physical Chemistry: Thermodynamics and Statistical Mechanics	1
CHEM 1160	Physical Chemistry Laboratory	1
MATH 0180 or equivalent <sup>3</sup>		1
Two Physics courses		2
Seven electives (at least three must be in Chemistry) <sup>1</sup>		7
<b>Total Credits</b>		<b>19</b>

#### Chemical Biology Track:

CHEM 0330	Equilibrium, Rate, and Structure	1
CHEM 0350	Organic Chemistry	1
CHEM 0360	Organic Chemistry	1
CHEM 0500	Inorganic Chemistry	1
CHEM 0970	Undergraduate Research	1
CHEM 0980	Undergraduate Research	1
CHEM 1140	Physical Chemistry: Quantum Chemistry	1
CHEM 1230	Chemical Biology	1
CHEM 1240	Biochemistry	1
BIOL 0280	Biochemistry	1
MATH 0180 or equivalent <sup>3</sup>		1
Two Physics courses		2
Select three of the following: <sup>4</sup>		3
BIOL 0470	Genetics	
BIOL 0500	Cell and Molecular Biology	
BIOL 0510	Introductory Microbiology	
BIOL 0530	Principles of Immunology	
BIOL 0800	Principles of Physiology	
NEUR 1020	Principles of Neurobiology	
Three other electives <sup>1</sup>		3
<b>Total Credits</b>		<b>19</b>

#### Materials Chemistry Track:

CHEM 0330	Equilibrium, Rate, and Structure	1
CHEM 0350	Organic Chemistry	1
CHEM 0360	Organic Chemistry	1
CHEM 0500	Inorganic Chemistry	1
CHEM 0970	Undergraduate Research	1
CHEM 0980	Undergraduate Research	1
CHEM 1060	Advanced Inorganic Chemistry <sup>2</sup>	1
CHEM 1140	Physical Chemistry: Quantum Chemistry	1
CHEM 1150	Physical Chemistry: Thermodynamics and Statistical Mechanics <sup>2</sup>	1
CHEM 1700	Nanoscale Materials: Synthesis and Applications	1
MATH 0180 or equivalent <sup>3</sup>		1
Two Physics courses <sup>2</sup>		2
One of the following courses		1
BIOL 1090	Polymer Science for Biomaterials (or)	
BIOL 1120/	Biomaterials (or)	
BIOL 1140	Tissue Engineering (or)	
ENGN 1470	Structure & Properties of Nonmetallic Materials (or)	
ENGN 1490	Biomaterials (or)	
Five electives, at least two must be chemistry courses. <sup>1</sup>		5
<b>Total Credits</b>		<b>19</b>

<sup>1</sup> BIOL 0280 is credited as a chemistry elective for the chemistry concentration. Non CHEM electives are upper level science/math courses with a significant molecular focus or those that cover tools/techniques that are of utility to a chemist. You should discuss your elective choices with the Concentration Advisor to craft a course of study that is appropriate for your interests.

<sup>2</sup> For students with a more Engineering bent, the following substitutions can be made - ENGN 0030/ENGN 0040 can be substituted for PHYS; ENGN 0410 can be substituted for CHEM 1060; ENGN 0720 for CHEM 1150.

<sup>3</sup> NOTE: MATH 0180 has additional prerequisites.

<sup>4</sup> NOTE: Many of the BIOL courses have BIOL 0200 as a prerequisite.

In each of these cases, CHEM 0970/CHEM 0980 should be carried out with a faculty member with an appointment in the Chemistry Department. Research with faculty advisors outside Chemistry may be allowed in some special cases. In this event, the student should speak with a concentration advisor to discuss this possibility.

#### Honors Requirements for Chemistry

All ScB Chemistry concentrators, and any AB concentrator who completes the following requirements, are candidates for Honors; no separate application is necessary.

The requirements for Honors in Chemistry are:

\* A strong grade record in concentration courses. This means a grade point average for the concentration that is higher than 3.50.

\* Two semesters of Independent Study (CHEM 0970, CHEM 0980 or equivalent). Guidelines and requirements associated with Independent Study are in the Undergraduate Concentration Handbook which can be found at the department website (<http://www.brown.edu/academics/chemistry/undergraduate>).

\* A Thesis in a form approved by the research advisor, and recommended by the research advisor. Additional information about thesis guidelines will be provided by the Concentration Advisor in the first half of the fall semester.

\* A Poster presentation at the chemistry department's spring undergraduate poster session.

## Biochemistry & Molecular Biology Concentration Requirements

How does life work at the molecular level? This question is at the core of the concentration program Biochemistry and Molecular Biology. In earlier years of this discipline, the focus was on structure and function of proteins, nucleic acids, lipids, carbohydrates and small molecules such as vitamins. Today the logical approach and tools of biochemical science are being expanded to new areas in neuroscience, developmental biology, immunology, pharmacology and synthetic biology (the design of analogs of biological systems). Training in biochemistry begins with a foundation in mathematics, physics, chemistry and biology. Some courses offered in other departments, including engineering, geology and computer science, are also useful. A key component of this program is the year of hands-on research carried out in collaboration with a faculty member here at Brown. Faculty sponsors are drawn from both the Chemistry Department and the Division of Biology and Medicine, and include basic science and clinical faculty.

### Standard program for the Sc.B. degree

**Students must take twenty courses in biology, chemistry, mathematics, and physics, including the following core requirements, some of these may be fulfilled with AP credits. Students are expected to take courses that will count toward the concentration ABC/NC. Students should discuss the S/NC option with their concentration advisor if circumstances warrant consideration. Students should not register S/NC for a concentration course without advisor pre-approval.**

Three courses in mathematics including two courses in MATH 0090/0100 or MATH 0170/0180 with a third class in statistics, math, or computer science <sup>1</sup>	3
Two courses in physics, typically: <sup>1</sup>	2
PHYS 0030 Basic Physics A or PHYS 0050 Foundations of Mechanics or ENGN 0030 Introduction to Engineering	
PHYS 0040 Basic Physics B or PHYS 0060 Foundations of Electromagnetism and Modern Physics or ENGN 0040 Dynamics and Vibrations	
Three courses in physical and organic chemistry:	3
CHEM 0330 Equilibrium, Rate, and Structure CHEM 0350/0360 Organic Chemistry	
One course in biophysical or related chemistry, such as:	1
CHEM 0500 Inorganic Chemistry	
Four courses in biochemistry: <sup>2</sup>	4
BIOL 0280 Biochemistry BIOL 0285 Inquiry in Biochemistry: From Gene to Protein Function	
Plus two of three upper level biochemistry courses:	
BIOL 1270 Advanced Biochemistry or CHEM 1230 Chemical Biology or CHEM 1240 Biochemistry	
Select two semester courses of independent research approved by a concentration advisor:	2
BIOL 1950/1960 Directed Research/Independent Study -or- CHEM 0970/0980 Undergraduate Research	
<b>Suggested Elective Courses:</b>	
Students are required to take five courses from the chart below or, with approval from a concentration advisor, from any science or mathematics course relevant to biochemistry, cell and molecular biology. <sup>3</sup>	5
<b>Applied Mathematics Electives:</b>	
APMA 0330 Methods of Applied Mathematics I, II	

APMA 0410	Mathematical Methods in the Brain Sciences
APMA 0650	Essential Statistics
<b>Biology Electives:</b>	
BIOL 0030	Principles of Nutrition
BIOL 0150D	Techniques in Regenerative Medicine: Cells, Scaffolds and Staining
BIOL 0170	Biotechnology in Medicine
BIOL 0190R	Phage Hunters, Part I
BIOL 0190S	Phage Hunters, Part II
BIOL 0200	The Foundation of Living Systems
BIOL 0380	The Ecology and Evolution of Infectious Disease
BIOL 0415	Microbes in the Environment
BIOL 0440	Inquiry in Plant Biology: Analysis of Plant Growth, Reproduction and Adaptive Responses
BIOL 0470	Genetics
BIOL 0500	Cell and Molecular Biology
BIOL 0510	Introductory Microbiology
BIOL 0530	Principles of Immunology
BIOL 0800	Principles of Physiology
BIOL 1050	Biology of the Eukaryotic Cell
BIOL 1090	Polymer Science for Biomaterials
BIOL 1100	Cell Physiology and Biophysics
BIOL 1110	Topics in Signal Transduction
BIOL 1120	Biomaterials
BIOL 1150	Stem Cell Engineering
BIOL 1200	Protein Biophysics and Structure
BIOL 1210	Synthetic Biological Systems
BIOL 1260	Physiological Pharmacology
BIOL 1290	Cancer Biology
BIOL 1300	Biomolecular Interactions: Health, Disease and Drug Design
BIOL 1310	Developmental Biology
BIOL 1330	Biology of Reproduction
BIOL 1520	Innate Immunity
BIOL 1540	Molecular Genetics
BIOL 1560	Virology
BIOL 1600	Development of Vaccines to Infectious Diseases
BIOL 2110	Drug and Gene Delivery
BIOL 2350	The Biology of Aging
<b>Chemistry Electives:</b>	
CHEM 0500	Inorganic Chemistry
CHEM 1140	Physical Chemistry: Quantum Chemistry
CHEM 1150	Physical Chemistry: Thermodynamics and Statistical Mechanics
CHEM 1220	Computational Tools in Biochemistry and Chemical Biology
CHEM 1230	Chemical Biology
CHEM 1240	Biochemistry
CHEM 1450	Advanced Organic Chemistry
CHEM 2420	Organic Reactions
<b>Computer Science Electives:</b>	
CSCI 0080	A First Byte of Computer Science
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science
CSCI 0160	Introduction to Algorithms and Data Structures

CSCI 0170	Computer Science: An Integrated Introduction
CSCI 0180	Computer Science: An Integrated Introduction
CSCI 1810	Computational Molecular Biology
<b>Education Electives:</b>	
EDUC 1110	Introductory Statistics for Education Research and Policy Analysis
<b>Engineering Electives:</b>	
ENGN 0410	Materials Science
<b>Neuroscience Electives:</b> <sup>4</sup>	
NEUR 0010	The Brain: An Introduction to Neuroscience
NEUR 0650	Biology of Hearing
NEUR 1020	Principles of Neurobiology
NEUR 1030	Neural Systems
NEUR 1040	Introduction to Neurogenetics
NEUR 1670	Neuropharmacology and Synaptic Transmission
NEUR 1740	The Diseased Brain: Mechanisms of Neurological and Psychiatric Disorders
<b>Physics Electives:</b>	
PHYS 0160	Introduction to Relativity, Waves and Quantum Physics
<b>Public Health Electives:</b>	
PHP 1501	Essentials of Data Analysis
Total Credits	20

<sup>1</sup> Note that the mathematics and physics requirements may be satisfied by Advanced Placement credit.

<sup>2</sup> BIOL 0285 is required for the class of 2022 onward. Students in the classes of 2019-2021 are required to take only three courses in biochemistry yet may take BIOL 0285 as an elective.

<sup>3</sup> Students in the classes of 2019-2021 are required to take six electives. The five elective requirement applies to the class of 2022 and after.

<sup>4</sup> or any NEUR course in Cell, Genetics, Molecular Biology, or Development.

## Honors Requirements for Biochemistry

All ScB Biochemistry concentrators are candidates for Honors; no separate application is necessary.

The requirements for Honors in Biochemistry are:

\* A strong grade record in concentration courses. This means a grade point average for the concentration that is higher than 3.25.

\* Two semesters of Independent Study (CHEM 0970, CHEM 0980 or equivalent). Guidelines and requirements associated with Independent Study are in the Undergraduate Concentration Handbook which can be found at the department website (<http://www.brown.edu/academics/chemistry/undergraduate>).

\* A Thesis in a form approved by the research advisor, and recommended by the research advisor. Additional information about thesis guidelines will be provided by the Concentration Advisor in the first half of the fall semester.

## Chemical Physics Concentration Requirements

Chemical Physics is an interdisciplinary field at the crossroads of chemistry and physics and is administered jointly by the two departments. The concentration provides students with a broad-based understanding in fundamental molecular sciences, as well as a background for graduate studies in physical chemistry, chemical physics, or molecular engineering. Concentrators are required to take twenty courses in chemistry, physics, and mathematics, although approved courses in applied mathematics,

biology, computer science, geological sciences, or engineering may be substitutes. Chemical Physics concentrators are also advised to take at least six courses in the humanities and social sciences. Chemical Physics concentrators at all levels (first-year through seniors) are actively involved in research with faculty members in both departments.

## Standard program for the Sc.B. degree

Twenty-one semester courses<sup>1</sup> in chemistry, physics, and mathematics, with a minimum of four semester courses in mathematics. The expectation is that courses required for a concentration in Chemical Physics will be taken for a letter grade. Core courses are:

CHEM 0330	Equilibrium, Rate, and Structure	1
CHEM 0350	Organic Chemistry	1
CHEM 0500	Inorganic Chemistry	1
CHEM 1140	Physical Chemistry: Quantum Chemistry	1
PHYS 0070	Analytical Mechanics	1
PHYS 0160	Introduction to Relativity, Waves and Quantum Physics	1
PHYS 0470	Electricity and Magnetism	1
Select one of the following laboratory courses:		
CHEM 1160	Physical Chemistry Laboratory	1
PHYS 0560	Experiments in Modern Physics	1
PHYS 1560	Modern Physics Laboratory	1
Select one course in statistical mechanics:		
CHEM 1150	Physical Chemistry: Thermodynamics and Statistical Mechanics	1
PHYS 1530	Thermodynamics and Statistical Mechanics	1
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	1
MATH 0200	Intermediate Calculus (Physics/Engineering)	1
MATH 0520	Linear Algebra	1
Seven courses, primarily at the 1000 or 2000 level, in chemistry or physics.		
Select two semesters of independent study:		
CHEM 0970/0980	Undergraduate Research	2
PHYS 1990	Senior Conference Course	2
Total Credits		21

<sup>1</sup> Other approved courses in applied mathematics, biology, computer science, geological sciences, or engineering may be substituted for some of the twenty-one. Students are advised to take at least six courses in the humanities and social sciences.

## Honors Requirements for Chemical Physics

All ScB Chemical Physics concentrators who completes the following requirements are candidates for Honors; no separate application is necessary.

The requirements for Honors in Chemical Physics are:

\* A strong grade record in concentration courses. This means a grade point average for the concentration that is higher than 3.50.

\* Two semesters of Independent Study (CHEM 0970, CHEM 0980, PHYS 1990 or equivalent). Guidelines and requirements associated with Independent Study are in the Undergraduate Concentration Handbook which can be found at the department website (<http://www.brown.edu/academics/chemistry/undergraduate>).

\* A Thesis in a form approved by the research advisor, and recommended by the research advisor. Additional information about thesis guidelines will be provided by the Concentration Advisor in the first half of the fall semester.

\* A Poster presentation at the chemistry department's spring undergraduate poster session.

## Chemistry Graduate Program

The Department of Chemistry offers graduate programs leading to the Master of Arts (A.M.); the Master of Science (Sc.M.); a the Doctor of Philosophy (Ph.D.) degree.

Research in Chemistry stretches from the exploration of physical phenomena of individual molecules, to the creation of new molecules, to material science, and indeed to the foundations of life. The Department of Chemistry reflects this profound importance and diversity by offering excellent research opportunities in areas including organic and inorganic chemistry, chemical biology, analytical chemistry, nanochemistry and theoretical and experimental physical chemistry. In addition, graduate students have the opportunity to participate in interdisciplinary research in molecular biology, chemical engineering and the Institute for Molecular and Nanoscale Innovation. The faculty student ratio is approximately 3:1 with most research groups numbering no more than six graduate students.

For more information on admission and program requirements, please visit the following websites:

<http://www.brown.edu/academics/gradschool/programs/chemistry>

## Courses

### CHEM 0008E. Exploration of the Chemistry of Renewable Energy.

The various types of renewable energy sources will be explored through classroom discussions, activities, and laboratories. Students will learn about the various types of renewable energy sources and the chemistry associated with each. The course will include short laboratories to illustrate the application of the energy sources. Renewable energy will be discussed in relationship to environmental factors and social impact. Active learning strategies will be used throughout the course. For students of all disciplines who are interested in obtaining an understanding of renewable energy.

### CHEM 0080A. First Year Seminar- Energy.

An introductory study of the scientific foundation of energy, fundamental physical, chemical, and thermodynamic aspects of common (fossil, nuclear) as well as novel (fuel cells, solar, wind, etc.) energy sources. Concentrates on scientific principles, but includes discussion on resources and reserves, environmental impact, current usage, and future needs. For students of all disciplines who are interested in obtaining an understanding of scientific principles of energy. Enrollment limited to 19 first year students.

### CHEM 0080B. Molecular Structures in Chemistry and Biology.

This course will consist of a survey of historical developments and concepts of three dimensional structures of molecules. The course will conclude with a survey of the current state of the art of structure determination and 3D structure motifs for small molecules, nanomaterials and biological macromolecules. This freshman only seminar will be strictly limited to a maximum of 19 students.

### CHEM 0080C. Drug Discoveries in the Pharmaceutical Industry.

A Freshman seminar that provides a survey of past and current approaches that enable the discovery and development of therapeutic agents. Topics ranging from target validation to the development of therapeutics (small molecules, biologics, and stem cells) will be discussed. Enrollment limited to 19 first-year students.

### CHEM 0080D. Chemical Ecology: Pheromones, Poisons and Chemical Messages.

This first year seminar will explore how plants and animals use chemicals to send and receive information about mating, identify potential hosts, defend themselves, and establish social networks. We will focus on the chemistry and biochemistry of these signals, with some examples of the behavioral and ecological consequences of chemical signaling. Enrollment limited to 19 first year students.

### CHEM 0080E. Exploration of the Chemistry of Renewable Energy.

The various types of renewable energy sources will be explored through classroom discussions, activities, and laboratories. Students will learn about the various types of renewable energy sources and the chemistry associated with each. The course will include short laboratories to illustrate the application of the energy sources. Renewable energy will be discussed in relationship to environmental factors and social impact. Active learning strategies will be used throughout the course. For students of all disciplines who are interested in obtaining an understanding of renewable energy.

### CHEM 0080F. Kitchen Chemistry.

Have you ever wondered why olive oil is a liquid but butter is solid? Or why bread and cookies rise when baked? This Kitchen Chemistry course is an experimental approach to chemistry, as seen in cooking. We will examine topics such as trans fats, baking soda as a leavening agent in baking, ripening of fruit, artificial sweeteners, GMOs, and enzymatic and non-enzymatic browning of foods. Edible experiments will be used to discuss the science behind recipes. Enrollment limited to 14 first year students. Instructor permission is required.

### CHEM 0090. Kitchen Chemistry.

Kitchen Chemistry is a course that highlights the chemistry underlying food and cooking. We will examine topics such as trans fats, baking soda as a leavening agent in baking, chemical basis for ripening of fruit, pectin as a cellular glue, artificial sweeteners, GMOs, and enzymatic and non-enzymatic browning of foods. In-class demonstrations and edible experiments will be used to discuss the science behind cooking. Content will be discussed using a variety of contexts including primary scientific literature, public policy reports, mainstream media, and food blogs. This class is appropriate for all students interested in chemistry.

### CHEM 0100. Introductory Chemistry.

Explores stoichiometry, atomic and molecular structure, chemical bonding, solutions, gases, chemical reactions, equilibria, thermochemistry. Three hours of lecture, one conference per week, no laboratory section. S/NC.

### CHEM 0120. Chemistry of the Environment.

Focuses on understanding a number of environmental questions from the underlying laws and concepts of chemistry and physics. While some knowledge of math, physics and chemistry are useful, none is assumed. Concepts of chemistry and physics will be developed as needed.

### CHEM 0190. Chemical Ecology: Pheromones, Poisons, and Chemical Messages.

Plants and animals use chemicals to send and receive information about mating, identify potential hosts, defend themselves against enemies and pathogens and establish social networks. We will focus on the chemistry and biochemistry of these signals, with some examples of the behavioral and ecological consequences of chemical signaling.

### CHEM 0330. Equilibrium, Rate, and Structure.

Explores the electronic structure of atoms and molecules, thermodynamics, solution equilibrium, electrochemistry, chemical kinetics, and reaction mechanisms. Course includes lecture and laboratory sections. Laboratory cannot be taken without the lecture. Students who previously passed 0330 lab may be excused from repeating the lab portion of the course. Required background: CHEM 0100 or AP Chemistry 4 or CHEM Placement Test 8 or IBC Chemistry.

### CHEM 0330L. Equilibrium, Rate, and Structure Lab.

Please see course description for CHEM 0330.

**CHEM 0332. Equilibrium, Rate and Structure - Tutorial.**

The CHEM 0332 tutorial program offers students the opportunity to master the concepts taught in the fall semester CHEM 0330: Equilibrium, Rate and Structure course by focusing on active problem solving. Students who struggle in the fall CHEM 0330 course may be invited to join the tutorial program. Students accepted into the tutorial program begin by reviewing compound and reaction stoichiometry at the beginning of the spring semester. Tutorial students enroll in CHEM 0332 during the spring semester to complete their studies of equilibrium, acid-base equilibria, thermodynamics, atomic and molecular structure and kinetics. Students in the CHEM 0332 tutorial program complete weekly problem sets during the spring semester and participate in two mandatory, regularly scheduled problem sessions during each week of the spring semester.

To qualify for consideration, the student must be struggling in the midterm exams and on track to pass the laboratory. Accepted students receive a grade of incomplete for the Fall CHEM 0330 course. Upon successful completion of the CHEM 0332 tutorial program in the spring semester, the incomplete in Fall CHEM 0330 is replaced by the student's tutorial program grade.

An override by Ms Sheila Quigley is required.

**CHEM 0350. Organic Chemistry.**

Sequel to CHEM 0330. Investigates the constitution and properties of the different classes of organic compounds, with considerable attention to reaction mechanisms. The laboratory work involves an introduction to microscale preparative and analytical techniques of organic chemistry and the preparation of representative organic compounds. Three hours of lecture and five hours of prelaboratory and laboratory. Prerequisite: CHEM 0330.

**Students MUST register for a common meeting, a lecture section, and a lab.**

If you previously completed CHEM 0350 laboratory but received a grade of no credit in the course, please register for lab section 11.

**CHEM 0350L. Organic Chemistry Lab.**

Please see course description for CHEM 0350.

**CHEM 0360. Organic Chemistry.**

Sequel to CHEM 0350. Investigates the constitution and properties of organic compounds at a fundamental level with an introduction to physical organic, bioorganic, and synthetic organic chemistry. Laboratory work is concerned with the identification and characterization of organic compounds, including modern instrumental methods. Three hours of lecture and five hours of prelaboratory and laboratory. Prerequisite: CHEM 0350.

**Students MUST register for a lecture section, a lab and a conference.**

If you previously completed CHEM 0360 laboratory but received a grade of no credit in the course, please register for lab section 11.

**CHEM 0360L. Organic Chemistry Lab.**

Please see course description for CHEM 0360.

**CHEM 0400. Biophysical and Bioinorganic Chemistry.**

Examines aspects of physical and inorganic chemistry relevant to biochemistry: thermodynamics of hydrophobic and hydrophilic interactions, electrically charged membranes, coordination chemistry, active and passive transport, enzyme kinetics and mechanisms, metal-based drugs, and physical methods. Three hours of lecture and five hours of laboratory. Prerequisite: CHEM 0360 and MATH 0100 or 0170. Prerequisite or corequisite: PHYS 0040 or 0060.

**Students MUST register for a lecture section and a lab.**

**CHEM 0500. Inorganic Chemistry.**

Examines the chemistry of main group and transition metal elements with treatment of covalent bonding and molecular structure along with the methods of studying inorganic compounds and reactions. Three hours of lecture and five hours of prelaboratory and laboratory attendance. Prerequisite: CHEM 0360.

**Students MUST register for a lecture section and a lab.**

**CHEM 0970. Undergraduate Research.**

Prerequisite: permission of the staff. Permission should be requested before the end of the preceding semester. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**CHEM 0980. Undergraduate Research.**

See Undergraduate Research (CHEM 0970) for course description. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**CHEM 0980S. Undergraduate Research - Writing Designated and Mandatory S/NC.**

Students in this independent undergraduate research course will be expected to work on several scaffolded writing assignments throughout the semester. As with all writing-designated courses, students will receive feedback on their writing that they can incorporate into a revised version of the assignment or a future submission. Students who will not be engaged in this level of scientific writing should enroll in the traditional undergraduate research course, CHEM 0970/0980. This independent study is Mandatory S/NC.

**CHEM 0981. Undergraduate Research - Writing Designated.**

Students in this independent undergraduate research course will be expected to work on several scaffolded writing assignments throughout the semester. As with all writing-designated courses, students will receive feedback on their writing that they can incorporate into a revised version of the assignment or a future submission. Students who will not be engaged in this level of scientific writing should enroll in the traditional undergraduate research course, CHEM 0970/0980.

**CHEM 1060. Advanced Inorganic Chemistry.**

Covers the physical and chemical properties of transition metal compounds as well as current research topics in inorganic chemistry. Laboratory is designed for the practice of modern inorganic chemistry through the synthesis and spectroscopic characterization of air-sensitive transition metal compounds. Prerequisite: CHEM 0500.

**CHEM 1140. Physical Chemistry: Quantum Chemistry.**

An introduction to the quantum theory of chemical systems. Elements of quantum mechanics; electronic structure of atoms and molecules; study of molecular structure and behavior by spectroscopy; chemical bonding are all explored. Prerequisites: CHEM 0330, MATH 0180 or equivalent, PHYS 0030 and PHYS 0040 or PHYS 0050 and PHYS 0060 or PHYS 0070 and PHYS 0470 or ENGN 0030 and ENGN 0040.

**CHEM 1150. Physical Chemistry: Thermodynamics and Statistical Mechanics.**

Examines the question: Where does chemical equilibrium come from? Focuses on macroscopic perspectives on chemical systems and the molecular origins of macroscopic behavior along with elements of statistical mechanics, the laws of thermodynamics, and the relationships between the two. Prerequisite: CHEM 1140 or written permission of the instructor.

**CHEM 1160. Physical Chemistry Laboratory.**

An introduction to modern instrumentation and experimental techniques as applied to physical chemistry. Experiments will emphasize application of the ideas of spectroscopy, kinetics, statistical mechanics, and thermodynamics to systems of chemical and biochemical interest. Required course for concentrators in chemistry. One to two afternoons of laboratory per week. Prerequisites: CHEM 1140 or permission of the instructor.

**CHEM 1170. Environmental Chemistry.**

A laboratory course using analytical methods to help in the study and description of several realistic environmental problems. Illustrates scientific methodology and measurement techniques as they apply to these important problems. A problem-solving course employing a kind of environmental chemical detective work. Two laboratory sessions per week. Prerequisites: MATH 0100 or the equivalent, or permission of the instructor. Enrollment limited to 8. Instructor permission required.

**CHEM 1220. Computational Tools in Biochemistry and Chemical Biology.**

Introduction to computational tools used to analyze protein sequences and structures, DNA sequence analysis, RNA structure, biochemical pathways and the analysis of microarray data. Extensive use of programs such as AMBER, BLAST, PSIBLAST and a discussion of their limitations.

**CHEM 1230. Chemical Biology.**

This course covers topics at the interface of chemistry and biology and, specifically, the use of chemical tools to probe biological systems. Using examples from the recent literature, we will discuss using the central methods of chemistry, namely the ability to design and synthesize compounds with a particular set of properties, to analyze biological problems. Specific topics include molecular recognition of DNA, artificial enzymes, small molecule sensors, and in vivo imaging of proteins, nucleic acids, and cell-surface carbohydrates. Prerequisites: CHEM 0360 and BIOL 0280. If enrollment exceeds the limit, permission to enroll will be allotted in the order: 1) first year graduate students, 2) senior concentrators in Chemistry or Biochemistry 3) junior concentrators 4) other students. Students who have registered or have permission to enroll must attend the first three classes or risk losing their places to someone on the waiting list.

**CHEM 1240. Biochemistry.**

Examines the chemical, mechanistic, and structural basis for enzymatic catalysis. Uses examples from the recent literature to examine how the experimental and conceptual tools of chemical synthesis, isotopic labeling, stereochemistry, enzymology, kinetics, and protein structure can be brought to bear to unravel the chemical and physical principles underlying the enormous catalytic acceleration and exquisite structural specificity of enzyme-catalyzed reactions. Prerequisites: Strong background in organic chemistry (CHEM 0360, A or B performance preferable) plus at least one semester of Biochemistry (BIOL 0280). Enrollment limited to: 25 students, written permission required.

**CHEM 1450. Advanced Organic Chemistry.**

Lectures cover topics of current interest in organic reaction mechanisms, synthesis, and structure determination. Laboratory emphasizes spectroscopic and separation techniques and modern synthetic methods. Prerequisite: CHEM 0360. Students MUST register for a lecture section, conference and a lab.

**CHEM 1560A. Molecular Modeling.**

No description available.

**CHEM 1560B. Techniques in Inorganic Chemistry.**

No description available.

**CHEM 1560C. Advanced Spectroscopy.**

No description available.

**CHEM 1560D. Chemistry and Biology of Naturally Occurring Antibiotics.**

Small molecules produced by organisms for chemical defense have long been exploited in medicine, biotechnology, and biological research. 1560D will examine the origins, uses, modes of action, and preparations of some of the most important and useful of these "antibiotic" molecules. Given the inter-disciplinary nature of this topic, this course is open to students with backgrounds in the biological and/or physical sciences. Familiarity with concepts of organic chemistry and biochemistry will be assumed.

**CHEM 1560E. Biological Mass Spectrometry.**

This seminar course will survey the instrumentation, methods, and applications of modern biological mass spectrometry. Through lecture and interactive discussions, we will explore the fundamentals of mass spectrometry. We will then proceed to cover a series of topics relevant to protein and peptides analysis. The seminar will conclude with an exploration of recent developments in instrumentation or applications of particular interest to the participants. Recommended pre-requisites: CHEM 0360, BIOL 0280, PHYS 0040. Enrollment limited to 20.

**CHEM 1560F. Organic Structure Analysis.****CHEM 1560G. Nuclear Magnetic Resonance.**

These special topics courses cover the basics of modern NMR spectroscopy. Topics to be included are as follows: modern Fourier transform methodology, modern NMR instrumentation, and a comprehensive discussion of one and two dimensional experiments that are routinely performed. Topics such as coherence transfer and pulsed field gradients will also be included. Experimental methods covered in detail include COSY, TOCSY, HSQC, HMBC, NOSEY, ROSEY, EXSY and DOSY methodology. This course will not focus on structure determination or spectral interpretation but rather on experimental methodology.

**CHEM 1560H. Chemical Glycobiology.**

This course examines the chemistry and biology of carbohydrates in living systems. Topics to be covered may include - principles of carbohydrate recognition, enzymes involved in synthesis and modification of carbohydrates, carbohydrates in bacterial/viral and other cellular interactions, glycomics, carbohydrate synthesis. Prerequisites: CHEM 0360 and BIOL 0280. Instructor permission required. Attendance at the first class meeting is required for enrollment.

**CHEM 1560I. DNA Damage and Repair.**

This course analyzes the chemistry of DNA damaging agents and the molecular mechanisms of DNA replication and DNA repair. We will also analyze the mutagenic and toxic consequences of modifications to DNA structure. Specific topics include the reactions of alkylating agents, ultraviolet radiation, and oxidizing radicals with DNA; additionally, chemotherapeutics that modify DNA will be discussed. Multiple cellular repair pathways will be covered including base excision repair, nucleotide excision repair, mismatch repair, and direct reversal. Prerequisites: CHEM 0350, CHEM 0360, BIOL 0280, BIOL 1270, or by permission.

**CHEM 1560J. Topics in Bioinorganic Chemistry.**

Covers current topics of bioinorganic chemistry with review of fundamental inorganic and biological chemistry. Topics include metal ion transport and storage, oxygen metabolism, electron transfer, respiration and photosynthesis, metal ion receptors and signaling, hydrolytic chemistry, metallo-neurochemistry, and medicinal bioinorganic chemistry. Students are strongly urged to complete both CHEM 0500 and CHEM 0360 prior to this special topics course.

**CHEM 1560K. Computational Chemistry.**

Introduction to computational tools for studying the structure of molecules, chemical bonding and chemical reactions. A survey of computational approaches for calculating electron distribution such as molecular mechanics, semi-empirical and ab initio methods (Hartree-Fock, configuration interaction, perturbation theory and density functional theory) will be given. Methods for calculating dynamics of atoms in molecular vibration and chemical reactions will be covered. The course is intended for seniors and graduate students in all subdivisions of chemistry. The goal is to make students capable of using research level tools and carry out simple calculations related to their research interests.

**CHEM 1560L. Modern Natural Product Biosynthesis.**

This course will cover the biosynthesis of the major classes of natural products - polyketides, non-ribosomal peptides, including beta-lactam antibiotics, terpenes, alkaloids and vitamins. The readings from original literature will cover the chemical logic and mechanisms of biosynthetic pathways and individual reactions, including isotopic labeling for whole-cell feeding experiments, stable isotopic NMR analysis, and mass spectrometry. Modern topics include genomics of natural product biosynthesis, genome mining, and pathway engineering. Prerequisites: CHEM 0350 and 0360. Recommended: CHEM 1230, 1240, or 1450. Enrollment limited to 25 juniors and seniors.

**CHEM 1560M. Applied Materials Chemistry.**

Materials chemistry is the study of the synthesis, structure, properties, and application of solid materials. Our technology-driven world is fueled by advances in materials chemistry with examples of application in areas such as microelectronics, polymers, and energy technology. This course will explain the application of materials chemistry through the materials properties and characterization, detailing how the crystalline and molecular structure of materials can be related to electronic, optical, thermal, and mechanical properties.

**CHEM 1560N. Organometallic Chemistry.**

Modern organometallic chemistry continues to find unique applications including next generation lighting displays, therapeutics and imaging, energy science, and green chemical synthesis. In this course we will briefly review fundamentals of inorganic chemistry (MO theory, ligand field theory, Pearson's HSAB theory), and then delve into the structure, bonding, synthesis, reactivity, and mechanisms associated with organometallic complexes and their associated applications. Significant emphasis will be placed on effective oral and written communication skills, with frequent peer and instructor feedback provided. Prerequisites: CHEM 0360, CHEM 0500. PLEASE NOTE: This class is WRIT designated for Undergraduates Only. Graduate Students register for CHEM 2310.

**CHEM 1560P. Applications of Modern Physical Methods in Synthesis.**

The modern synthetic chemist leverages a wide range of physical methods to answer research questions in diverse application areas ranging from renewable energy, medicine, materials, complex molecule synthesis, and others. Students will develop a working knowledge of modern techniques applied to synthesis, learning fundamental principles, experimental limitations, and interpretation of experimental results. Selected techniques may include: Nuclear Magnetic Resonance (NMR), Electron Paramagnetic Resonance (EPR), Fluorimetry, Absorption Spectroscopy (UV-Vis, IR, X-ray), Diffraction (X-ray), Magnetometry, Electrochemistry, and Mass-Spectrometry. Emphasis will be placed on how techniques are relevant in current research areas, and the instrumental capabilities available at Brown University.

**CHEM 1620A. Photoacoustics.**

Prerequisite: CHEM 1140 or equivalent.

**CHEM 1620B. Spectroscopy.**

Prerequisite: CHEM 1140 or equivalent.

**CHEM 1620C. Topics in Modern Physical Chemistry.**

No description available.

**CHEM 1660. Instrumental Analysis with Environmental Applications.**

This course covers the principles and practical applications of important analytical chemistry tools used to study environmental problems, including discussions of method selection and statistical treatment of data. Students will strategize and implement a study of a field site. Includes lab sessions with hands-on experience of instrumental analysis using atomic and molecular spectroscopic techniques, separations by gas and liquid chromatography, and electrochemical methods. Prerequisite: CHEM 0330 or GEOL 1370. Enrollment limited to 20. Instructor permission required.

**CHEM 1700. Nanoscale Materials: Synthesis and Applications.**

Focuses on synthesis, properties, and applications of nanoscale materials. It begins with the introduction to size-dependent properties and to general characterization methods of nanomaterials. It then outlines the synthesis, surface chemistry and self-assembly of nanomaterials. It further reviews catalytic, optical and magnetic properties of nanomaterials. Finally, the course highlights the applications of nanomaterials in information storage, energy conversion, and biomedicine. Prerequisites : CHEM0350, PHYS 0030 or 0050, BIOL0280 recommended.

**CHEM 2010. Advanced Thermodynamics.**

Fundamental principles of macroscopic equilibrium thermodynamics. The three laws of thermodynamics, the thermodynamic potentials, temperature scales, heat engines and refrigerators, entropy, kinetic theory, and transport phenomena. Applications to solids, fluids, and magnetic systems; Gibbs relations, first and second order phase transitions, thermal radiation, gas expansions.

**CHEM 2020. Statistical Mechanics.**

Introduction to modern equilibrium statistical mechanics, including the classical and quantum descriptions of ideal gases, the molecular basis of thermodynamics, the concepts of ensembles and fluctuations, and the implications of quantum mechanical indistinguishability. Applications include chemical and phase equilibria, the transition-state theory of chemical reaction rates, and the theory of liquids.

**CHEM 2210. Chemical Crystallography.**

Introduces the principles of crystallography (plane groups, point groups, space groups, Bravais lattice, crystal classes), crystallographic methods (single-crystal, powder XRD, macromolecular), strategies for data collection, methods for data reduction, and structure interpretation; reviews modern crystal structure databases (CSD, ICSD) and search engines; reviews the historical development of crystallography and the scope, potential and application of X-ray analysis.

**CHEM 2310. Organometallic Chemistry.**

Modern organometallic chemistry continues to find unique applications including next generation lighting displays, therapeutics and imaging, energy science, and green chemical synthesis. In this course we will briefly review fundamentals of inorganic chemistry (MO theory, ligand field theory, Pearson's HSAB theory), and then delve into the structure, bonding, synthesis, reactivity, and mechanisms associated with organometallic complexes and their associated applications. Significant emphasis will be placed on effective oral and written communication skills, with frequent peer and instructor feedback provided. Prerequisites: CHEM 0360, CHEM 0500. PLEASE NOTE: This class is WRIT designated for Undergraduates Only. Graduate Students register for CHEM 2310.

**CHEM 2320. Solid State Chemistry.**

This course focuses on descriptive understanding of structures and properties of inorganic materials. It covers symmetry operations in crystals, crystal structure, physical properties of inorganic materials, materials phase diagram and preparation, and solid state electrochemistry for battery, fuel cell and supercapacitor applications. Prerequisites: CHEM 0500 and 1060 or equivalents or written permission. Recommended for seniors and first-year graduate students.

**CHEM 2410. Physical Organic Chemistry.**

Detailed examination of organic reaction mechanisms, reactive intermediates, and the methods employed for their characterization (e.g., kinetics, free energy relationships, isotope effects, molecular orbital theory, spectroscopy, and product distributions). Topics may include concerted, free radical, elimination, and photochemical reactions, and the chemistry of radicals, carbocations, carbanions, and carbenes.

**CHEM 2420. Organic Reactions.**

Study of organic reactions and reaction mechanisms. Discussion and analysis of organic transformations. Topics can include arrow pushing strategies and synthetic methods.

**CHEM 2430. Synthetic Organic Chemistry.**

Methods, strategies, and mechanisms. Topics may include the chemistry of anions, cations, and radicals, concerted reactions, conformational analysis, and stereochemistry.

**CHEM 2770. Quantum Mechanics.**

Semester I: Time independent quantum mechanics and its application to atomic and molecular problems. Discussions of modern theories of electronic structure, chemical bonding, and molecular spectroscopy. Prerequisite: CHEM 1140 or equivalent.

**CHEM 2780. Quantum Mechanics.**

Semester II: Lectures focus on the theory and application of electronic structure methods to describe both time-independent and time-dependent phenomena in chemical physics. Modern methods including Hartree-Fock Theory, Moller Plesset Perturbation Theory, Configuration Interaction, Coupled Cluster Theory, and Density Functional Theory will be described. Numerical techniques for implementing these methods will also be introduced and applications based upon problems in molecular spectroscopy will be outlined. Prerequisite: CHEM 2770.

**CHEM 2810. Departmental Seminars.**

No description available.

**CHEM 2820. Departmental Seminars.**

No description available.

**CHEM 2870. Departmental Colloquia.**

Open to first year chemistry graduate students only.

**CHEM 2880. Departmental Colloquia.**

No description available. Open to graduate students only.

**CHEM 2920A. Chemistry and Physics of Amorphous Materials.**

No description available.

**CHEM 2920B. Organic Spectroscopic Methods.**

No description available.

**CHEM 2920C. Topics in Modern Spectroscopy.**

No description available.

**CHEM 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**CHEM 2980. Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**CHEM 2981. Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. CHEM 2981 is mandatory S/NC.

**CHEM 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**CHEM XLIST. Courses of Interest to Students wishing to Study Chemistry.**

## Classics

### Chair

Graham J. Oliver

The study of Classics focuses on the languages, literature, history, culture, and legacy of Greco-Roman antiquity. Brown's Department of Classics has a long and distinguished history, extending from the founding of the University to the present. The department offers courses that contribute to a broad liberal education, and provides specialized training for those students intending to enter graduate school. Courses are offered from beginning to advanced levels in Ancient Greek, Latin, and Sanskrit language and literature, and in Modern Greek. Each semester the department also offers a number of courses that require no knowledge of the ancient languages, in literature, mythology, history, philosophy, and religion.

For additional information, please visit the department's website: <http://www.brown.edu/academics/classics/>

### Classics Concentration Requirements

The study of Classics focuses on the languages, literature, history, culture, and legacy of Greco-Roman antiquity. An undergraduate concentration in Classics furnishes students with a broad liberal education, and provides specialized training for those students intending to enter graduate school. Students may choose to study Ancient Greek, Latin, Sanskrit, and/or Modern Greek, and to explore courses in literature, mythology, history, philosophy, and religion. Students may either pursue the standard Classics concentration – the most popular choice – or one of several optional tracks: Greek, Latin, Greek and Latin, South Asian Classics, Sanskrit, Greek and Sanskrit, or Latin and Sanskrit. Concentrators who pursue an honors degree write a senior thesis, typically over the course of two semesters during their senior year.

Beginning with declarations submitted after September 1, 2018, all tracks except "Greek and Latin," "Greek and Sanskrit," and "Latin and Sanskrit" require the satisfactory completion of nine courses as described below. The introductory courses in Greek and Latin may not usually be counted toward a concentration, but those in Sanskrit may be counted toward the concentration requirement in some of the tracks. Students should always consult with the Director of Undergraduate Studies regarding their path toward fulfilling requirements and choosing electives.

## Classics

One course in Greek or Latin on the 1000-level or above. <sup>1</sup>	1
Select one of the following series:	2
CLAS 1210 Mediterranean Culture Wars: Archaic Greek History, c. 1200 to 479 BC	
And	
CLAS 1220 The Fall of Empires and Rise of Kings: Greek History 478 to 323 BC	
or HIST 1200B The Fall of Empires and Rise of Kings: Greek History to 478 to 323 BCE	
OR	
CLAS 1310 Roman History I: The Rise and Fall of an Imperial Republic	
And	
CLAS 1320 Roman History II: The Roman Empire and Its Impact	
or HIST 1201B Roman History II: The Empire	
Five other courses in classics, including classical archaeology, Greek, Latin, Sanskrit, or related areas to be approved by the concentration advisor. At least three of these five courses must be offered through the Department of Classics. <sup>2</sup>	5
One further course offered by the Department of Classics and designated "Classics and Beyond," OR a DIAP course offered by the Department of Classics. <sup>3</sup>	1
<b>Total Credits</b>	<b>9</b>

<sup>1</sup> Options offered in 2018/2019 include, but are not limited to: GREK 1110B, GREK 1110S, GREK 1111B, GREK 1150, GREK 1810, LATN 1020D, LATN 1040B, LATN 1060G, LATN 1110F, LATN 1110H, LATN 1110P, LATN 1820, LATN 1930B, and with instructor permission for those who are very advanced in Greek or Latin: GREK 2020E, GREK 2110K, and LATN 2080F, LATN 2090I.

<sup>2</sup> Options offered by the Department of Classics in 2018/2019 include, but are not limited to: CLAS 0150, CLAS 0660, CLAS 0765, CLAS 0780, CLAS 0855, CLAS 0900, CLAS 1120G, CLAS 1120Q, CLAS 1120U, CLAS 1145, CLAS 1310, CLAS 1320, CLAS 1750H, GREK 0100, GREK 1110H, GREK 1110B, GREK 1110S, GREK 1150, GREK 1810, LATN 1020D, LATN 1040B, LATN 1060G, LATN 1110F, LATN 1110H, LATN 1110P, LATN 1820, LATN 1930B, SANS 0100 and SANS 0200.

<sup>3</sup> Options offered by the Department of Classics in 2018/2019 include, but are not limited to: CLAS 0660, CLAS 0765, CLAS 0855, CLAS 1120G, CLAS 1120U, CLAS 1145, CLAS 1750H, LATN 1110H, and with instructor permission for those who are very advanced in Latin: LATN 2080F and LATN 2090I.

## Greek

Four Greek courses on the 1000-level or above, at least one of which is to be: <sup>1</sup>	4
GREK 1810 Greek Literature Survey to 450 BCE	
or GREK 1820 Greek Literature Survey after 450 BCE	
CLAS 1210 Mediterranean Culture Wars: Archaic Greek History, c. 1200 to 479 BC	1
CLAS 1220 The Fall of Empires and Rise of Kings: Greek History 478 to 323 BC	1
Two additional courses in classics, including classical archaeology, Greek, Latin, or related areas to be approved by the concentration advisor. At least one of these two courses must be offered through the Department of Classics. <sup>2</sup>	2
One further course offered by the Department of Classics and designated "Classics and Beyond," OR a DIAP course offered by the Department of Classics. <sup>3</sup>	1
<b>Total Credits</b>	<b>9</b>

- <sup>1</sup> Options offered in 2018/2019 include, but are not limited to: GREK 1110B, GREK 1110S, GREK 1111B, GREK 1150, GREK 1810, and with instructor permission for those who are very advanced in Greek: GREK 2020E and GREK 2110K.
- <sup>2</sup> Options offered by the Department of Classics in 2018/2019 include, but are not limited to: CLAS 0150, CLAS 0660, CLAS 0765, CLAS 0780, CLAS 0855, CLAS 0900, CLAS 1120G, CLAS 1120Q, CLAS 1120U, CLAS 1145, CLAS 1310, CLAS 1320, CLAS 1750H, LATN 0300, LATN 0400, LATN 1040B, LATN 1060G, LATN 1110F, LATN 1110H, LATN 1110P, LATN 1820, LATN 1930B, SANS 0100, and SANS 0200.
- <sup>3</sup> Options offered by the Department of Classics in 2018/2019 include, but are not limited to: CLAS 0660, CLAS 0765, CLAS 0855, CLAS 1120G, CLAS 1120U, CLAS 1145, CLAS 1750H, LATN 1110H, and with instructor permission for those who are very advanced in Latin: LATN 2080F and LATN 2090I.

**Latin**

Four Latin courses on the 1000-level or above, at least one of which is to be:

LATN 1810	Survey of Republican Literature	
or LATN 1820	Survey of Roman Literature II: Empire	
CLAS 1310	Roman History I: The Rise and Fall of an Imperial Republic	1
CLAS 1320	Roman History II: The Roman Empire and Its Impact	1
or HIST 1201B	Roman History II: The Empire	

Two additional courses in classics, including classical archaeology, Greek, Latin, or related areas to be approved by the concentration advisor. At least one of these two courses must be offered through the Department of Classics.

One further course offered by the Department of Classics and designated "Classics and Beyond," OR a DIAP course offered by the Department of Classics.

---------------	--	---

- <sup>1</sup> Options offered in 2018/2019 include, but are not limited to: LATN 1020D, LATN 1040B, LATN 1060G, LATN 1110F, LATN 1110H, LATN 1110P, LATN 1820, LATN 1930B, and with instructor permission for those who are very advanced in Latin: LATN 2080F and LATN 2090I.
- <sup>2</sup> Options offered by the Department of Classics in 2018/2019 include, but are not limited to: CLAS 0150, CLAS 0660, CLAS 0765, CLAS 0771, CLAS 0780, CLAS 0855, CLAS 0900, CLAS 1120G, CLAS 1120Q, CLAS 1120U, CLAS 1145, CLAS 1750H, CLAS 1750U, GREK 0300, GREK 0400, GREK 1110B, GREK 1110S, GREK 1111B, GREK 1150, GREK 1810, SANS 0100 and SANS 0200.
- <sup>3</sup> Options offered by the Department of Classics in 2018/2019 include, but are not limited to: CLAS 0660, CLAS 0765, CLAS 0855, CLAS 1120G, CLAS 1120U, CLAS 1145, CLAS 1750H, LATN 1110H, and with instructor permission for those who are very advanced in Latin: LATN 2080F and LATN 2090I.

**Greek and Latin**

Four Latin courses on the 1000-level or above, at least one of which is to be:

LATN 1810	Survey of Republican Literature	
or LATN 1820	Survey of Roman Literature II: Empire	
Four Greek courses on the 1000-level or above, at least one of which is to be:		
GREK 1810	Greek Literature Survey to 450 BCE	
or GREK 1820	Greek Literature Survey after 450 BCE	
CLAS 1210	Mediterranean Culture Wars: Archaic Greek History, c. 1200 to 479 BC	1
CLAS 1220	The Fall of Empires and Rise of Kings: Greek History 478 to 323 BC	1

or HIST 1200B	The Fall of Empires and Rise of Kings: Greek History to 478 to 323 BCE	
CLAS 1310	Roman History I: The Rise and Fall of an Imperial Republic	1
CLAS 1320	Roman History II: The Roman Empire and Its Impact	1
or HIST 1201B	Roman History II: The Empire	
Total Credits		12

<sup>1</sup> Options offered in 2018/2019 include, but are not limited to: LATN 1020D, LATN 1040B, LATN 1060G, LATN 1110F, LATN 1110H, LATN 1110P, LATN 1820, LATN 1930B, and with instructor permission for those who are very advanced in Latin: LATN 2080F and LATN 2090I.

<sup>2</sup> Options offered in 2018/2019 include, but are not limited to: GREK 1110B, GREK 1110S, GREK 1111B, GREK 1150, GREK 1810 and with instructor permission for those who are very advanced in Greek: GREK 2020E and GREK 2110K.

**South Asian Classics**

- At least one Sanskrit course above Sanskrit 0300
- Three of the Sanskrit Classics Courses in Translation
- Four other courses in Classics or related areas (such as Comparative Literature, Religious Studies, South Asian Studies, Early Cultures, etc.) to be approved by the concentration advisor

One further course offered by the Department of Classics and designated "Classics and Beyond," OR a DIAP course offered by the Department of Classics.

Total Credits		9
---------------	--	---

- <sup>1</sup> Options offered in 2018/2019 include: SANS 0400, SANS 1080 and SANS 1600.
- <sup>2</sup> Options offered in 2018/2019 include: CLAS 0855 and CLAS 1145.
- <sup>3</sup> Options offered by the Department of Classics in 2018/2019 include, but are not limited to: CLAS 0150, CLAS 0660, CLAS 0765, CLAS 0771, CLAS 0780, CLAS 0855, CLAS 0900, CLAS 1120G, CLAS 1120Q, CLAS 1120U, CLAS 1145, CLAS 1310, CLAS 1320, CLAS 1750H, CLAS 1750U, GREK 0100, GREK 0110, GREK 0200, GREK 0300, GREK 0400, GREK 1110B, GREK 1110S, GREK 1111B, GREK 1150, GREK 1810, LATN 0100, LATN 0110, LATN 0200, LATN 0300, LATN 0400, LATN 1020D, LATN 1040B, LATN 1060G, LATN 1110F, LATN 1110H, LATN 1110P, LATN 1820, and LATN 1930B.
- <sup>4</sup> Options offered by the Department of Classics in 2018/2019 include, but are not limited to: CLAS 0660, CLAS 0765, CLAS 0855, CLAS 1120G, CLAS 1120U, CLAS 1145, CLAS 1750H, LATN 1110H, and with instructor permission for those who are very advanced in Latin: LATN 2080F and LATN 2090I.

**Sanskrit**

- Two Sanskrit courses at the 1000-level or above
- Two of the Sanskrit Classics Courses in Translation
- Four other courses in Classics or related areas (such as Comparative Literature, Religious Studies, South Asian Studies, Early Cultures, etc.) to be approved by the concentration advisor

One further course offered by the Department of Classics and designated "Classics and Beyond," OR a DIAP course offered by the Department of Classics.

- <sup>3</sup> Options offered by the Department of Classics in 2018/2019 include, but are not limited to: CLAS 0150, CLAS 0660, CLAS 0765, CLAS 0771, CLAS 0780, CLAS 0855, CLAS 0900, CLAS 1120G, CLAS 1120Q, CLAS 1120U, CLAS 1145, CLAS 1750H, CLAS 1750U, GREK 0100, GREK 0110, GREK 0200, GREK 0300, GREK 0400, GREK 1110H, GREK 1110B, GREK 1110S, GREK 1111B, GREK 1150, and GREK 1810.

## Honors

Students may earn honors in the concentration by presenting a satisfactory thesis, for the preparation of which they will ordinarily enroll in the relevant 1990 courses; these courses may not be used to satisfy the standard requirements for a concentration. In order to qualify, the candidate for honors in the Department of Classics ordinarily will be entering his/her seventh semester of study and must have an "A" average (3.50 or higher on a 4.00 scale) in the concentration.

## Classics Graduate Program

The Department of Classics offers graduate study leading to the Doctor of Philosophy (Ph.D.) degree. In addition to the Ph.D. program in Classics, the department offers graduate work in Sanskrit leading to a Ph.D. in Classics and Sanskrit, and with the Department of History, sponsors a joint Ph.D. program in Ancient History. A degree of Master of Arts (A.M.) is available for students already working toward the Ph.D. in cognate programs at Brown.

For more information on admission and program requirements, please visit the following website: <http://www.brown.edu/academics/gradschool/programs/classics>

## Courses

### Classics

#### CLAS 0010. The Greeks.

From poetry to philosophy, from music to economics to political theory, it is hard to find a subject of study that did not originate with the Greeks, at least in word. Biology? Greek. Physics? Still Greek. Math? Technology? Gym? You guessed it. Since we cannot escape the Greeks, in this class we will be on the lookout for them, reading the first classics of Western literature and discussing the great ideas behind them. All texts read in English.

#### CLAS 0020. The Romans.

Statesmen exposed republican conspiracies; historians chronicled imperial intrigue; playwrights "Greeked-it-up" with toga parties; epic poets sang of Rome's rise (and fall); moralizers bemoaned gladiators' beauty habits; and a novelist recounted the adventures of a man turned into an ass. This course tracks the development of literary culture at Rome from its beginnings to the end of the Empire, with an emphasis on the major genres, authors, and works of Roman literature. Intended for all students desiring an introduction to Roman literary culture and its masterpieces. All texts read in English; no previous experience in Roman history or Latin required.

#### CLAS 0150. Ancient Philosophy.

Ancient Greek views about the prospects and limits of reason in the human being's search for a good and valuable life. What the best life is; how, and how far, reason can provide for its realization; what social/political conditions it requires; how vulnerable it is (and should be) to uncontrolled happenings. Authors include Euripides, Thucydides, Plato, Aristotle, Epicurus, Lucretius, Augustine, and Dante.

**CLAS 0180. Indian Civilization through Its Literature.**

An examination of various historical, geographical, social, scientific, and literary aspects of Indian civilization through the reading of translations of original works of Indian culture such as the short story collection *Bṛhatkathāslokaśamgraha*. Each topic that comes up in the story is explored in greater depth in supplementary material.

**CLAS 0210A. Alexander the Great and Alexandria.**

No description available.

**CLAS 0210B. Death in Ancient Greece.**

Examines how ancient Greeks understood, described, and experienced death. Making use of sources in translation, considers how death is anticipated, imagined, feared, and sometimes sought. Also contrasts classical ideas with current experiences in our own society in order to see whether and how our assumptions concerning death are culturally determined. Enrollment limited to 19 first year students.

**CLAS 0210E. The Family in the Classical World.**

It has been said that the household, not the individual, was the core of classical society. Using primary sources, we examine such questions as parental (and paternal) authority, the status of women, the role of private property, extended kinship, the physical structure of houses, the experience of childhood, etc. Comparisons are drawn with other societies, including our own.

**CLAS 0210F. The Meaning of History in the Ancient World.**

The Greeks and Romans created the western tradition of historiography as a genre of literature and historical reflection. The course will (a) focus on the great historians Herodotus, Thucydides, Polybius, Livy, Sallust, and Tacitus, and examine what purposes they pursued in writing history; (b) investigate the origins and development of historical writing in Greece and Rome; (c) look briefly at forms of historical reflection and writing in other ancient civilizations. For first year students only.

**CLAS 0210G. Themes in Ancient Science.**

The ideas of ancient scientists are apt to seem both oddly familiar and utterly strange. Examines the major developments in ancient physics, biology, medicine, mathematics, technology, anthropology, and astronomy. Pays particular attention to the tensions between observation and theory, science and society, and the reappearance of ancient notions in modern beliefs.

**CLAS 0210H. Thucydides: History and Cultural Context.**

Thucydides' history of the Peloponnesian War is a magnificent and profound study of the growth and deterioration of Athenian imperialism. We shall examine his history against the background of concurrent intellectual achievement in drama, philosophy, and rhetoric.

**CLAS 0210I. How Women were Seen.**

Classical literature offers a wide array of representations of women, from loyal wives like Penelope to murderesses like Medea, from powerful queens like Dido to helpless slaves like the women of Troy after the destruction of their city. Through a selection of poems and prose texts, almost all composed by men, we shall attempt to gain insight into the place of women in the ancient Greek and Roman imagination.

**CLAS 0210J. Homer - The 'Big Bang' of Western Literature?.**

The history of Western Literature seems to begin with a 'Big Bang', the *Iliad* and the *Odyssey*. A primary goal of this First Year Seminar will be to become thoroughly familiar with the many fascinating and highly influential characteristics of the two epics and their plots by means of close reading (in English translation). At the same time, we will examine the key factors which made this 'miraculous beginning' possible. This includes a question that has received much attention in recent scholarship: the influence of literature from the Middle East. Looking in the other direction, Homer's enormous and lasting influence on literature and art will also be discussed. Enrollment limited to 19 first year students.

**CLAS 0210L. Who Owns the Classical Past?.**

This course offers a forum for informed discussion of a variety of difficult questions about access to the classical past, and its modern-day ownership and presentation, seen primarily from the perspective of material culture (archaeology, art, museum displays, etc.). Enrollment limited to 19 first year students.

**CLAS 0210M. Seneca: A Philosopher in Politics.**

The Stoic philosopher Seneca led a life full of contradictions: a millionaire and a politician, a man who preached the importance of mind over matter but begged for return from exile, and a philosopher compromised by his relationship with the emperor Nero, his pupil and his murderer. At least his end was heroic: ordered to commit suicide in 65 AD, he modeled his death on that of Socrates, discoursing calmly about philosophy with his friends as the blood drained out of his veins. In this course we'll read broadly in his writings and try to come up with some answers about this complex and fascinating figure and the philosophy of living for which he stood.

**CLAS 0210O. Sport in the Ancient Greek World.**

Athletics and sports were as popular and significant in the ancient Greek world as they are today, and so offer an excellent introduction to its archaeology and history. This class will discuss the development of Greek athletics, the nature of individual events, the social implications of athletic professionalism, women and athletics, and the role of sport in Greek education.

**CLAS 0210P. Dead and Loving It: The Cult of the Saints in the Eastern Mediterranean.**

This course introduces students to the literature, history, and religious life of the late ancient and medieval Mediterranean through the lens of a highly significant socio-cultural phenomenon: the Christian cult of the saints. Students will have the opportunity to engage with a variety of primary source texts in translation, while examining the subject from the perspectives of anthropology, religious studies, material culture, history and literary studies, to approach this rich topic through an interdisciplinary framework. Enrollment limited to 19 first year students.

**CLAS 0210R. Revolutionary Classics (or, the classical origins of your Brown education).**

When Brown University was founded in 1764 the curriculum was based on classical texts. In early America, the classics of Greek and Roman antiquity – read in the original Greek and Latin – were the foundation of a gentleman's education. This course will explore early ideas and structures of higher learning in America from the springboard of those classical texts. We will read a sizable portion of Brown's earliest curriculum (in English translation), but just as importantly we will seek to set that curriculum in the context of early American intellectual history, from roughly the Colonial to the Antebellum Period.

**CLAS 0210T. Travelers in Greece: from Pausanias to Shirley Valentine.**

Ever since Pausanias the Periegete wrote his "Description of Greece" in the 2nd century CE, travelers have been inspired both to see the sights of Greece and to narrate their travels. The subject of this course is travel narratives about Greece, and our own journey will lead us to sites throughout the country. Yet we will also be using these narratives as launchpads for exploring the imaginary and imagined power of the Greek landscape: from its ancient status as seat of the gods to its modern appeal as a land of anonymity, relaxation and freedom for the wearied 'westerner'.

**CLAS 0210Y. The Philosophy of Classical Indian Yoga.**

This course will introduce the history of the ancient Indian texts and ideas that came to provide the philosophical foundations of the classical school of Indian Yoga. We will examine the oldest evidence for yoga in the ancient texts of the Vedas, the Jains, and the Buddhists. We will watch it take clear shape in the Upanishads and in texts of the Mahābhārata, especially the Bhagavad Gītā. We will conclude the course by reading the classical exposition of Indian Yoga, Patañjali's Yogasūtras. This course is a philosophy course, not an introduction to the practice of yoga.

**CLAS 0220. Horror in the Ancient and Modern World.**

When are little kids creepy? Why are we afraid of clowns? How does culture shape what we find scary? In this course we will analyze literature from ancient Greece and Rome and compare it to modern horror films and short stories in an attempt to answer these questions. Topics will include monsters, witches, and possession. We will cover themes like gender, death, family, and nature.

Class will be primarily discussion-based, with regular writing feedback sessions. No Classics background necessary. WRIT designated. Note that we will be reading, watching, and discussing scenes, images, and concepts that may be disturbing. Content warnings provided.

**CLAS 0280. Latin in English/Latinate English.**

The influence of Latin not only on the English vocabulary but on English style. Topics include: word building from Latin (and some Greek), Latin words and phrases in English, English lexicography, translations into and from Latin, euphuism, the revolt against Latin elements (Saxonism). Students write essays exemplifying these types of writing.

**CLAS 0300. Animals in the Greco-Roman World.**

Animals are an important part of any culture. This is especially true for the civilizations of the ancient world, which used animals not only for food and companionship but also for labor power, medicine and entertainment. In this class, we will explore the role of animals in the civilizations of the Greco-Roman world, looking at both practical uses and literary or artistic portrayals. We will focus on ancient beliefs about animals that now seem strange to us (kneeless elephants, self-castrating beavers, venomous mice, etc.), and we will try to explain how those beliefs came to be so widely held.

**CLAS 0310. Social Welfare in the Ancient Greek City.**

What inequalities existed in the ancient Greek city? This course seeks to identify the different treatment of the inhabitants of the Greek city (polis) and the degree to which the city sought to support the disadvantaged by the redistribution of wealth. Ancient Greek communities taxed activity and property, gathered revenue, and redistributed wealth within the community. The wealthy were often liable to redirect part of the wealth to the community. How well did the redistributive economy of the Greek city work? Who were the winners? Who were the losers? What conclusions can we draw about well-being in the Greek polis?

**CLAS 0311. Juno: The Original Diva.**

Juno was the queen supreme of Rome's gods, the wife of philandering Jupiter, and the mother of Mars, god of war. It was Queen Juno who guaranteed the constant imperial triumph of Rome --a ruthless conqueror of nations-- and who safeguarded and preserved both marriage and Rome's Republic. This course explores constructions of and attitudes towards divinity, gender, war, conquest, and family. Case studies include the destruction and religious plundering of both Etruscan Veii and Hannibal's Carthage, from the perspectives of both conqueror and conquered. Interdisciplinary in nature, course materials will include literature, art, architecture, archaeology, and comparative religious studies.

**CLAS 0350. Ancient Philosophy (PHIL 0350).**

Interested students must register for PHIL 0350.

**CLAS 0400. Ancient Comedy and its Influence.**

This course examines the origins and developments of comedy in ancient Greece (early iambic poetry, Aristophanes, Menander), its later offshoots in Rome (Plautus, Terence), England (Shakespeare), and the continued influence these ancient forms have on comedy today. Secondary readings include ancient and modern thoughts on humor and laughter, and writings on the historical contexts in which these plays were produced.

**CLAS 0500. Virgil, Augustus, and Rome.**

Examines, in translation, the three masterpieces of Virgil, central poet of the golden age of Latin literature. In particular, considers his epic, the *Aeneid*, against the background of the Rome of the emperor Augustus. Subjects for discussion include the relation of poetry and power, the connection between the imagination and historical reality, and the tension between intellectual freedom and the constraints of society.

**CLAS 0520. Religion and Magic in Ancient Greece.**

Examines the sacred or supernatural realm that pervaded ancient Greek culture, considering both public and private practices. Topics include belief in the gods; aspects of polytheism; sacrifice; pollution; athletic and civic festivals; oracles; mystery cults; death and afterlife; hero cults; religion and gender; curses, spells, and charms; ancient atheism and agnosticism.

**CLAS 0530. Ancient Science, Medicine and Magic.**

What are the origins of scientific thought? How does it differ from other systems of knowledge, such as magic or myth? In this course, we will examine the cultural and intellectual history of science, medicine and magic in the Ancient World. We will delve into such topics as cosmology, zoology, geography, astrology, Hippocratic medicine, and scientific methodology. Discover how Thales predicted an eclipse, why Aristotle was afraid of seals, and how the Stoics justified their belief in divination. All students welcome.

**CLAS 0560. War and Society in the Ancient World.**

In a broad survey of ancient societies (from Egypt and Mesopotamia to late antiquity), but with a strong focus on the Greco-Roman world, this course examines the sociology of war in premodern societies: we investigate how in each case warfare and military organization interacted with social, economic, and political structures and how each society dealt with the challenges, gains, and costs of war. Readings in English.

**CLAS 0600. The Literary Worlds of Late Antiquity.**

We study the manifold literary forms championed in those centuries when Greco-Roman literature was transformed by social, spiritual, and creative forces perhaps unparalleled in the western tradition. Genres to be studied include: history (Gregory of Tours), consolation (Boethius), lyric (Ausonius and Fortunatus), hymnody (Prudentius), epic (Juvenecus), apology (Tertullian), the philosophic dialogue (Augustine), the cento (Proba), among others. Close attention will be paid to contextualizing these authors and genres in the Greco-Roman tradition and in their late ancient configurations.

**CLAS 0620. Greek Tragedy.**

An investigation of many of the surviving plays of the Greek tragedians Aeschylus, Sophocles, and Euripides. Considers the diverse aspects of ancient drama: the context, both religious and sociopolitical; issues of theatrical production, the poetic texture of the plays; and the influence of classical drama on later drama and western thought. Additional readings may include Aristophanes' *Frogs* and *Thesmophoriazusa*e and selections from Aristotle's *Poetics*, the earliest criticism of Greek tragedy.

**CLAS 0660. The World of Byzantium.**

Caught between the East and West, the culture of Byzantium inherited the ancient worlds of Greece, Rome, and Jerusalem, nurturing many a modern ideology, conflict, and identity. Byzantium is explored through its history, texts, and art. We examine the foundation and history of Constantinople, Iconoclasm, the Crusades, medieval Christianity and Islam, Byzantine court life, concepts of gender, self, and sexuality.

**CLAS 0750. Gender and Sexuality in Classical Antiquity.**

This course will analyze women in classical Greek and Roman society and literature. Using gender as a critical tool, we will examine Greek and Roman women in various sources, from Homeric epics and public inscriptions to scathing Roman satire. These sources show how the Greeks and Romans defined normative gender categories and how they used these categories as a vehicle for social and political criticism. We will cover both social history and gender discourse, focusing especially on the body and sexuality as a site for power. The limitations imposed by the source materials, both literary and non-literary, will be a topic of discussion throughout, as well as the relation of these ideas to contemporary constructions of gender.

**CLAS 0760. Ancient Utopias/Imaginary Places.**

Literary depictions of idealized imaginary societies already had a long tradition when Thomas More produced his *Utopia* in 1516. This course explores the ancient Greco-Roman utopian tradition, examining both literary depictions of mythological or fantastic utopias (or dystopias), including representations of societies remote in time ("the Golden Age") or place (e.g., Homer's Phaeacia), and works that critique contemporary values or attempt to describe idealized possible societies (e.g., Plato's *Republic*). These Greco-Roman depictions in turn provided the foundation for the utopian (and dystopian) tradition as it continued through the Medieval age and into modernity, and we will also follow that tradition.

**CLAS 0765. Witches and Vixens: Nasty Women in Ancient Greece and Rome.**

What do video vixens and Foxy Brown have in common with "Witchy Woman"? These modern metaphors continue a long history of equating female sexual allure with dangers found in/or capable of subverting Nature. This course will use contemporary methodologies to make sense of similar descriptions of women found in Greco-Roman literature: how do the Greeks and Romans express a concern about gender, ethnicity, class, and/or politics using these metaphors? How do these same categories help distinguish what is "natural" from "unnatural"? To what end does this discourse about women and nature affect law, public space, or other aspects of "civilization"?

**CLAS 0770. The Tradition of the Philosophical Dialogue.**

This course will examine the Greco-Roman tradition of the philosophical dialogue, from its Socratic origins through its adoption by early Christian authors. As we read dialogues by major practitioners including Plato, Cicero, Plutarch and Augustine, we will consider formal features of the dialogue, including setting, characterization, and authorial self-representation; and we will compare treatments of common subjects and themes, including Socrates, the pursuit of truth, good government, and the happy life. We will also discuss issues of performance and the philosophical, pedagogical, and therapeutic advantages of dialogue. All texts will be read in English.

**CLAS 0771. Dreaming in the Ancient World.**

Dreaming has always been part of our everyday experience. But did the Greeks and Romans dream any differently than we do? How and why did they extract meaning from their nightmares and daydreams? In this course, we will explore the cultural history of dreams and dream interpretation, a curious practice that stands at a fascinating intersection in the history of ideas between psychology, religion, and medicine. Readings (all in translation) include Homer, Herodotus, Plato, Egyptian magical papyri, Babylonian dream diaries, Cicero, Freud, and more. No previous knowledge of the Ancient World required.

**CLAS 0780. From Antiquity to the Humanities (via Humanism) and the History of Ideas.**

This course looks at the origins of several subjects in the Humanities in order to explain, question, and sometimes challenge the ways in which those subjects are studied or understood today. Consideration of sources for the Humanities today – in the educational practices of classical antiquity, in the 'humanism' of the Renaissance and in the 17th-20th centuries– will throw new light on ideas and categories which are central to western education. Topics include grammar/language, persuasive argument, scholarship; theory/practice of history, literature, poetry, fiction, fantasy, and the novel; relationship between words and images, and connections between studying the Humanities and being human.

**CLAS 0800. Religious and Philosophical Thought in Ancient India.**

The historical development of the main themes of ancient Indian religious and philosophical thought. Part I: The rise of monism in tension with polytheism, the efficacy of Vedic words and Vedic rites, and early Brahminic cosmology and psychology. Part II: The rise of the non-Brahminic traditions (Jainas, Ājīvikas, and Buddhists) challenging Vedic revelation and everything based upon it (mainly the rites and authority of brahmins). Part III: The ensuing 'conversations' among the completing traditions, conversations that developed new world-views and new methods for effecting human well-being in the cosmos.

**CLAS 0810A. Alexander the Great and the Alexander Tradition.**

This course focuses on a single historical figure, Alexander the Great, using him as a point of departure for exploring a wide range of problems and approaches that typify the field of Classical Studies. How knowledge of Alexander has been used and abused provides a fascinating case study in the formation and continuous reinterpretation of the western Classical tradition.

**CLAS 0820. Epics of India.**

An introduction to Indian epic literature with reading and analysis of one or more of India's grand and powerful epics, such as the *Mahabharata*, the *Rāmāyana*, the *Cilappadikaram*, and others.

**CLAS 0850. Mythology of India.**

Reviews major myths from religions of India in order to understand how the peoples of India imagined their relation to the divine world, to nature, and to other human beings. Considers connections between myths and religious practices, social structures, historical events, and psychological and aesthetic dimensions of Indian cultural life. Reading of mythic narratives will be accompanied by analysis from selected theoretical perspectives.

**CLAS 0855. The Bhagavad Gītā.**

This course will study and discuss the teachings of the Bhagavad Gītā in the context of its literary, theological, and philosophical origins in ancient India. We will read the text itself (in English, not Sanskrit), parts of the epic Mahābhārata in which the Gītā is situated, and collateral texts, such as Upanisads, Indian myths, Buddhist sermons, or even modern novels, that may shed light on why and how this text has exercised such far-reaching influence across the ages, inside India and beyond.

**CLAS 0900. Greek Mythology.**

"What of these things goes now without disaster?" -Aeschylus, Agamemnon

This course is an introduction to Ancient Greek mythological traditions. Topics include: the Olympian gods; 'culture heroes' (e.g. Heracles), Homer and the Trojan Cycle of myths; mythical traditions about the families of Oedipus and Agamemnon; etc. We will conclude with an investigation of ancient mythical scholarship and skeptical views of myth in antiquity. Throughout we will be considering myth's relationship with literature, visual culture, and religion. The class focuses on the ancient material (texts, images, monuments, rituals and traditions, etc.), with some secondary readings in mythological and cultural theory.

**CLAS 0990. Concepts of the Self in Classical Indian Literature.**

Examination of the great Indian epic Mahabharata and related mythology to introduce the context for the most ancient speculations of the Rgveda and the subtle teacher-student dialogues about the self contained in the Bhagavadgita and Upanishads. We will also examine the more systematic Indian philosophical texts and note their resonance in ancient and modern European conceptions of self.

**CLAS 0995. India's Classical Performing Arts.**

South Asia is home to rich classical traditions in the performing arts – drama, dance, music – which continue into the present. These performative traditions are accompanied by theoretical analyses going back to the Nāṭyāśāstra attributed to the sage Bharata, (2nd c. BCE-6th c. CE). This course introduces students to these traditions and theories to allow for an informed appreciation of South Asia's classical arts. This course will include reading classical texts in translation and experiencing, analyzing, and discussing recorded performances. The final portion of the course will examine the influence of the classical arts on Bollywood film.

**CLAS 1120A. Dreams, Love and Confession.**

The Middle Ages are notorious for their love of bizarre locales, hauntings, fear of demons, and superstitions. But the outlook of the medieval world also encouraged a love of hidden and of internal, spiritual space. This world-view attended to dreams, a complex anatomy of human love and confessions. In this course, we will examine the social and literary context of these three modes of communication in the classical and, especially, the medieval period. We will read classical and medieval poetry (Horace, Propertius, Ovid, Lucretius, Cambridge Songs, Alan de Lille, Bernardus Silvestris), late antique dream books (Aelius Aristides), medieval bestiaries and fables, vernacular Romances and lays, and the medieval confessional mode (Augustine, Guibert); we will also examine visual evidence, where possible.

**CLAS 1120B. Epic Poetry from Homer to Lucan.**

Traces the rich history and manifold varieties of the genre of epic poetry in the literatures of ancient Greece and Rome beginning with Homer's *Iliad* and *Odyssey* (VII c. B.C.) and ending with Lucan's *Civil War* (I. c. A.D.). Masterpieces such as Virgil's *Aeneid* and Ovid's *Metamorphoses* are included. Original sources read in translation.

**CLAS 1120D. Myth and Origins of Science.**

Examinations of various explanations of the origin of the cosmos, of human beings, and human institutions, with readings from literary, philosophical, and scientific texts. What constitutes a scientific explanation and in what respects ancient science was similar to and different from our own? Authors include Hesiod, Aeschylus, Plato, Aristotle, Hippocratic medical writings and the Presocratic fragments. Read in English translation.

**CLAS 1120E. Slavery in the Ancient World.**

Examines the institution of slavery in the ancient world, from Mesopotamia and the Near East to the great slave societies of classical Greece and (especially) imperial Rome; comparison of ancient and modern slave systems; modern views of ancient slavery from Adam Smith to Hume to Marx to M.I. Finley. Readings in English.

**CLAS 1120G. The Idea of Self.**

Literature gestures us toward a certain kind of knowledge not quite psychological, not quite philosophical. We read widely in the classical and medieval traditions in order to gauge the peculiar nature of what this knowledge tells us about experience and the ways in which expressions of selfhood abide or are changed over time. Authors include but are not limited to Sappho, Pindar, Catullus, Horace, Augustine, and Fortunatus.

**CLAS 1120H. The Invention of Literature: Literary Theory from Antiquity to the Renaissance.**

Literature is a recent concept. We study the prehistory of its invention in Antiquity and the Middle Ages focusing on ideas about authorship, fiction, and practices of reading. The course is based on close reading of primary texts from classical Greco-roman and medieval Byzantine, Latin, and Arabic authors. Beyond theoretical discussions, primary readings include contemporary premodern literary texts.

**CLAS 1120J. Essaying the Essay.**

This course explores the personal essay as a vehicle for self-expression. Examining self-reflective essays from a variety of cultures and time periods—ancient, modern, East, and West—we trace the theme of friends as dialectical others against whom individuals define themselves. Our investigations will lead us to a provisional definition of the essay genre, keeping in mind its unique placement between fiction and non-fiction, and its relationship with non-Western forms such as the *suibi* and the *xiaopin wen*. First year students need instructor permission to enroll.

**CLAS 1120K. Skeptical Traditions East and West.**

The skeptical project begins and ends in doubt and the refusal to affirm any belief dogmatically. While these ideas are most frequently associated with the writings of Cicero and Sextus Empiricus, they also appear in early Buddhist and Daoist texts. The course examines several strands of skeptical philosophy as they appear in writings from ancient Greece, Rome, China, and India. It further explores literary enactments, appropriations, and critiques of skepticism evident in the skeptical revival of the European Renaissance and in Zen *kōans*.

**CLAS 1120L. Archaeology of Feasting.**

No description available.

**CLAS 1120M. Plato.**

A close reading of Plato's major dialogues from a philosophical perspective. Topics may include his ethics, politics, metaphysics, epistemology, philosophy of mind, philosophy of language, or aesthetics. Readings are from original sources (in translation) and contemporary secondary literature. Students wishing to read the texts in the original Greek should make arrangements with the instructor.

**CLAS 1120N. Games and Spectacles of Ancient Greece and Rome.**

Will examine games and spectacles of the ancient Greek and Roman worlds, from the early Olympic contests to the popular chariot races of late antiquity. By using a variety of sources, including archaeological evidence, we will explore not only the historical development of sports in the classical world, but also its ongoing political, social and cultural importance. By seeking to understand both participants and spectators, we also hope to connect the significance of games to other facets of Greco-Roman society, including women and religion. We will not only discuss the limitations of the primary sources, but also make relevant comparisons to the role of sports in contemporary society.

**CLAS 1120Q. Seven Wonders of the Ancient World.**

"Everyone has heard of the Seven Wonders of the World," wrote Philo of Byzantium two millennia ago, and it's still true today. But what's a "Wonder"? And why seven of them? Why make such a list anyway, then or now? This class will use ancient texts, explorers' accounts, and archaeological investigations to travel through several thousand years of history in the Mediterranean and Near Eastern world. We will consider how the Seven Wonders captured past imaginations; the aura of technological achievements; the intersections of history, memory, invention, and myth; and how members of one culture view another culture's monuments.

**CLAS 1120R. Social Conflict and Political Factions in the Roman Republic.**

Traces the evolution of social conflict and political factions at Rome from the foundation to the dissolution of the Republic (C5-C1 BCE). Roman armies secured a vast empire of territory, raw materials, and manpower governed by the senate and the people of Rome itself. The influx of resources, however, destabilized Rome's constitution and upset political power balances at the city of Rome. How did the Romans—elites and masses—compete amongst themselves for the bounty of empire abroad and confront their own internal conflicts at home? Was concord possible, or were the developments of empire inconsistent with the constitution of the Republic?

**CLAS 1120T. Age of Augustus: Topography, Architecture, and Politics.**

Augustus Caesar boasted that he had found Rome a city in brick, but left it in marble. This course explores the transformation of Rome from an unadorned village to the capital of an empire. Was Rome's first emperor trying to fashion himself a Hellenistic monarch on the model of Alexander and his successors? Was he simply operating within republican traditions, which had been established through centuries of aristocratic competition at Rome? Our source materials will include ancient works of art and architecture, literary accounts, maps, and critical urban theory.

**CLAS 1120U. The American Presidents and the Western Tradition.**

We are accustomed to engaging the American presidency as a public office best approached through the prism of government or political science, but this course studies the ways in which the presidents in thought and action are part of a larger continuum of humanistic expression in the western tradition. It is organized around five categories: memory, language, consolation, farewell, and self-reflection. Our work involves reading and viewing/listening to various materials, including videos and original documents. The words we study, both by and about presidents, will be compared to various masterworks of Greco-Roman antiquity and the western Middle Ages.

**CLAS 1120V. The Age of Constantine: The Roman Empire in Transition.**

The reign of Constantine the Great (306-337) and his dynasty heralded a period of remarkable/rapid change in the Roman Empire. Christianity became the sole imperially sponsored religion; the split between Western and Eastern halves of the Empire gradually became permanent and irrevocable; consequently new ways of thinking and writing about the Roman world, past and future, developed. Focusing on generous selections of primary source material in translation and current scholarship, we will explore the history, literature, and culture of Constantinian Empire in order to highlight the role of Constantine and his successors in the evolution of the late Roman Mediterranean.

**CLAS 1120W. Aristotle.**

A close study of Aristotle's major works: his method, natural philosophy, psychology, metaphysics, with main emphasis on his ethics. Readings from original sources (in translation) and some contemporary secondary material. The class will combine lectures and discussion and is a writing course.

**CLAS 1130. The Fragility of Life in Ancient Greece.**

This interdisciplinary course explores the fragility of life in the Ancient Greek city-state from multiple perspectives: those of state-building, the population stress in the city, the capacity for the family to maintain and sustain itself, to those of the individual: man, woman, and child, whose life experiences left them vulnerable to disease and economic hardship. This course explores Ancient Greek socio-economic history addressing health, disease, fertility and childbirth, migration, mobility, and population and family 'management' as well as topics fundamental to historical demography (mortality, birth rates, and growth) over the longue durée approach (Archaic through Roman Imperial eras).

**CLAS 1140. Classical Philosophy of India.**

This course introduces the classical traditions of philosophy in India. After presenting a general overview of this discourse and its basic Brahminic, Buddhist, and Jain branches, the course will examine the ideas and debates between various schools on issues of epistemology (the nature of perception, inference, testimony, etc), metaphysics (the nature of the self and ultimate reality, the question of the reality of the world, etc), and ethics (the theory of karma, non-violence and asceticism, and devotion).

**CLAS 1141. Ancient India in Modern America: Yoga, Ayurveda, and More.**

One finds, in modern America, a variety of modes of engagement with aspect of India's ancient cultures, and debates about how to understand this engagement, as genuine appreciation or illicit appropriation. The course will prepare students to make a more informed critique or defense of such engagement, by closely comparing the modern American manifestations with aspects of ancient Indian culture which ostensibly inspired them. Readings will consist of ancient texts in translation paired with scholarship on their modern counterparts. Topics include: Yoga, Ayurveda, Buddhism, Kamasutras, Monistic Vedanta, and Vaishnava Theism.

**CLAS 1145. Goddesses and Women Gurus in South Asian Religious Traditions.**

Indian Religions have featured some prominent female figures: fierce goddesses, domestic goddesses, legendary women sages, and historical women poets. These figures can be used to empower female authority and agency, but can also be used to construct normative gender roles that limit societally accepted agency for women. This course will explore the canonical narratives of these prominent female figures and the reception of these narratives in various historical contexts. It will also examine the contemporary reception of these figures, looking both at those who champion the progressive possibilities they represent as well as feminist and subaltern critiques.

**CLAS 1160. Love and Devotion, Power and Poverty: India's Literary Classics.**

This course will introduce, in English translations, the most powerful examples of the literature of India. The course will introduce students to India's unparalleled literary richness by reading selections of the best poetry, drama, and narrative literature of Indian civilization from any of its many languages (Sanskrit, Tamil, Hindi, Bengali, etc., and English), ancient and modern.

**CLAS 1175. High Crimes and Misdemeanors: Impeachment trials and their Rhetoric.**

This course explores the history of impeachment trials in Athens, Britain, and the USA. We study some of the early deployments of impeachment (eisangelia in Greek) at Athens, its brief flourish in fourteenth century Britain, and its flowering in the seventeenth and eighteenth centuries. Subsequently we turn to the impeachment of Warren Hastings in 1788-1795 and then to the earliest impeachments in the US. We keep in mind the different time periods and governmental structures (direct democracy, monarchy with parliament, representative democracy) and investigate how legal processes--and their rhetoric--function in each of them.

**CLAS 1202. Foundations Classical Heritage (HIST 1202).**

Interested students must register for HIST 1202.

**CLAS 1210. Mediterranean Culture Wars: Archaic Greek History, c. 1200 to 479 BC.**

From the end of the Bronze Age to the end of the Persian Wars is a period of considerable change in the Mediterranean and beyond. The Greek polis challenges the powers of the ancient Near East. Over seven centuries we meet Greek writing, Homeric epic, and the first historian (Herodotus). But the Greek world lay on the edges of the Ancient Near East and this course tries to offer a more balanced approach than the typically Hellenocentric perspective of the standard textbooks. CLAS 1210 addresses political, social and economic history. Literary, epigraphical and archaeological cultures provide the evidence.

**CLAS 1220. The Fall of Empires and Rise of Kings: Greek History 478 to 323 BC.**

The Greek world was transformed in less than 200 years. The rise and fall of Empires (Athens and Persia) and metamorphosis of Macedon into a supreme power under Philip II and Alexander the Great provide the headlines. The course covers an iconic period of history, and explores life-changing events that affected the people of the eastern Mediterranean and the topics that allow us to understand aspects of life and culture of the peoples of the eastern Mediterranean. and through these transformations, offers insights into the common pressures that communities confronted. No prior knowledge of ancient history is required.

**CLAS 1240. Modern Greece in the World (MGRK 1240).**

Interested students must register for MGRK 1240.

**CLAS 1260. The Roman Reception of Greek Literature.**

Reading a number of shorter poems and excerpts in both Greek and Latin, paying particular attention to how Roman writers respond to Greek examples. Readings include Catullus and Sappho, Horace and Pindar, Virgil and Theocritus, and others, with a view to the interactions of meter, genre, and language.

**CLAS 1310. Roman History I: The Rise and Fall of an Imperial Republic.**

The social and political history of Ancient Rome from its origins to the death of Augustus in 14 CE. Focuses on the social conflicts of the early Republic; the conquest of the Mediterranean and its repercussions; the breakdown of the Republic and the establishment of monarchy. Readings emphasize ancient sources in translation.

**CLAS 1320. Roman History II: The Roman Empire and Its Impact.**

The social and political history of the Roman Empire (14-565 CE). Focuses on expansion, administration, and Romanization of the empire; crisis of the 3rd century; militarization of society and monarchy; the struggle between paganism and Christianity; the end of the Empire in the West. Special attention given to the role of women, slaves, law, and historiography. Ancient sources in translation.

**CLAS 1320X. Roman History II: The Empire (HIST 1201B).**

Interested students must register for HIST 1201B.

**CLAS 1350. Comparative Grammar of Greek and Latin I.**

An introduction to the histories of the Greek and Latin languages within the frame of their Indo-European antecedents. Addresses the sound systems of the two languages and applies our knowledge of them to a consideration of the semantics (etymology) of words in the languages. For those who know Greek and Latin well, though no specific prerequisites can be listed. Students of classics and linguistics are the main audiences addressed.

**CLAS 1410. Roman Religion.**

Explores the religions of Rome, from the animism of King Numa to the triumph of Christianity. Topics include: concepts of religion and the sacred; sacred law; ritual space and the function of ritual; festivals; divination; magistrates and priests; the imperial cult; death and the afterlife; mystery cults; astrology and magic.

**CLAS 1420. Death in the West.**

This course explores the history of western attitudes toward death from their origins in the ancient Near East and classical antiquity through the medieval and early modern periods to the modern era. The aim is to trace the evolution of western deathways against the backdrop of an anthropologically and sociologically informed understanding of this universal human experience. Among the issues to be considered are the needs of both individuals and society in proper treatment of the dead; in what ways funerary customs reflect broader cultural and historical developments; and what the implications are of recent and contemporary trends in western funerary practices.

**CLAS 1430. The Cultures of Roman Imperialism (HMAN 1974U).**  
Interested students must register for HMAN 1974U.

**CLAS 1441. Merchants, Trade, and Commerce in the Roman World.**

Exotic spices, fermented fish sauce, mass-produced pottery, olive oil, fine wine, not so-fine wine, marble, bricks, metals, people, art, elephants – these are just a few of the things that the Romans traded. This course draws on archaeological, literary, and epigraphic material to investigate the world of Roman trade from the goods that were moved, to the logistics of transport, to the merchants and traders themselves. Who ventured to India in search of spices? Who ran the local wine shop? How were colossal columns transported across deserts?

**CLAS 1750A. Caesar's Failure and Augustus' Success.**

Both Caesar and Augustus reached sole power in the Roman empire by winning civil wars. Both initiated broad reform programs, but Caesar was soon assassinated, while Augustus lived for another 45 years. We will analyze their reforms and examine the causes and historical significance of Caesar's failure and Augustus's success.

**CLAS 1750B. Justice.**

An inquiry into notions and definitions of justice. Plato's *Republic* is the basic reading. Considers a wide variety of novels, poems, and plays as examples.

**CLAS 1750C. Undergraduate Seminar: Emotions.**

Were the emotions of the ancient Greeks and Romans identical to our own? When a Greek felt pity, or a Roman was angry, were the causes and the manifestations the same as ours? This senior seminar examines how Greeks and Romans defined the emotions, and checks their descriptions against literary texts. One year of either Greek or Latin required.

**CLAS 1750D. Philosophy of Socrates.**

In this class we will read and discuss various ancient portraits of Socrates (in Aristophanes' *Clouds*, Plato's *Apology* and *Symposium*, and Xenophon's *Apology*) and several Platonic dialogues representing Socrates in action discussing moral questions, including the *Crito*, *Laches*, *Charmides*, *Lesser Hippias*, *Protagoras*, and *Gorgias*. We will focus on questions about the historical Socrates (as distinct from the portraits), his avowals of ignorance, irony, methods of argument, and interest in definition, as well as the moral questions explored in the dialogues. All readings will be in English translation. Enrollment limited to 20.

**CLAS 1750E. Writing History in the Ancient World.**

The Greeks and Romans created the western tradition of historiography as a genre of literature and historical reflection. The seminar will focus on the great historians from Herodotus to Tacitus and examine what purpose they pursued in writing history; investigate the origins of historical writing, and look at forms of historical reflection and writing in other ancient civilizations.

**CLAS 1750H. Heroes and Heroism in Graeco - Roman Antiquity and Beyond.**

Examines the concept of hero, an ancient Greek word, which had a wide variety of meanings and was employed to designate a series of diverse characters of myth. We will trace the evolution of this idea through a detailed analysis of its uses in Greek and Roman texts, and also contrast its ancient sense with present day conceptions of the hero and heroism. All readings will be in English. The course is open to all undergraduates, but preference will be given to juniors and seniors. Enrollment limited to 25.

**CLAS 1750I. Highways and Byways in Antiquity.**

This seminar will explore the construction and development of pathways of communication and contact in the ancient (primarily Mediterranean) world. Emphasis will be placed upon major routes (highways) and the state-level powers that instituted and controlled them, but also on more modest roads and paths and the communities they promoted. The scope of the course is thus quite extensive, embracing both terrestrial and maritime roadways, and all forms of activity that took place on and along them (trade, pilgrimage, 'strip development', imperial postal and spy systems, ports, etc.). Some previous study of antiquity is desirable. Please note: CLAS 1750I is being team-taught by Susan Alcock and John Bodel.

**CLAS 1750J. Ancient Revenge Dramas.**

We shall study revenge tragedies composed in ancient Athens and Rome and also some composed during the Renaissance. We shall examine formal characteristics of the tragedies as well as the conceptual constellations (historical, political, social, theatrical, legal) under which they operated for the three periods; an important question will be whether and how this medium permits us to understand how law and the notion of justice operates in a given society.

**CLAS 1750K. Madwomen and Lovers.**

Ancient Greeks and Romans were fascinated by the figure of the distressed mythological heroine, and from the Classical period onward their literature showcases women tormented by love (often for a forbidden object), but able to give voice to their desires and dilemmas. We will look at examples from different types of ancient literature (especially drama and epic), focusing on the blend of victimization and self-expression in their portrayal, and on their sometimes surprising role in the literature of love, mythology, and national history.

**CLAS 1750L. Erotic Desire in the Premodern Mediterranean.**

Erotic desire may be a universal human phenomenon. How we explain, depict, express, or experience desire is, however, not a universal, uniform matter. The premodern Mediterranean (from roughly the fifth century BCE to the fifteenth century CE) gives us a variety of forms of sexual experience and expression. We will study the history of these forms through texts, images, and objects: from Platonic love or eros to Roman tales of romance, from Judeo-Christian mysticism to Islamic literature, from sexual diets to erotic amulets. Enrollment limited to 25.

**CLAS 1750N. Marriage in the Ancient World.**

Marriage is a historical phenomenon: it assumes various forms and has distinct meanings in different societies, even those that have been regarded as the fountainhead of Western values. This course (a seminar addressed in particular to upper-level undergraduates) investigates this important social institution in ancient Greece and Rome, using a variety of primary documents (literary, historical, epigraphical, etc.) and taking account of modern approaches to the study of marriage, including anthropological, sociological and psychological theories. All sources will be read in English.

**CLAS 1750P. Homicide, Revenge, & Marital Disasters: Reception of Greek Drama in Rome, England, & Japan.**

(1) We examine theater and its relation to society, particularly, its reflection of legal culture (detections of murderers, adulterers, and young lovers); we also examine law's 'theatricality' ('productions' of trials). (2) We also explore more broadly how dramas were performed, using as comparanda Japanese Noh and Kabuki (in each, for example, we find all-male casting). (3) Attention is also directed toward twentieth century receptions of these plays; we focus largely on Japanese productions, particularly of Yukio Ninagawa, mastermind of Japanese theater who directed numerous Greek tragedies and Shakespearean plays in different venues, absorbing and subverting phenomena of traditional Japanese theater.

**CLAS 1750R. Holy Places and Sacred Spaces in Ancient Greece.**

For thousands of years, travelers have been astonished at the physical beauty of Ancient Greek sites such as Olympia, Delphi, and Delos. For anyone who visits these numinous sites, it's easy to see why the Greeks believed that the gods loved them, too. In this course we will be exploring the notion of sacred space in Greek, with emphasis on sanctuaries, topography, archaeological phenomenology, and pilgrimage. We will research and discuss sites and sanctuaries from literary, archaeological, and other material and theoretical perspectives; we will also ask what about certain spaces and places leads us to regard them as 'sacred'.

**CLAS 1750T. Love and Identity in the Roman Empire.**

Sex, pirates, powerful goddesses, and mistaken identities: these are just some of the aspects of the so-called Ancient Novel and its parodies. In this course we will investigate how a few fictional texts from the 1st-3rd centuries A.D. construct their characters' gender and sexuality, and therefore reflect concerns about wisdom, power, and difference within the Roman Empire.

**CLAS 1750U. Greek Life: Athens as a College Town Under the Roman Empire.**

This course focuses on the role of Athens as one of the most important educational centers of the Roman Empire to examine themes in the cultural history of the Eastern Mediterranean from the 2nd to the 6th century CE. Students traveled from all over the Roman world to study in Athens, celebrity professors competed to attract the biggest classes, and freshmen joining fraternities were subjected to bizarre hazing rituals. Course topics include the Second Sophistic, the educational curriculum, Paganism and Christianity in Late Antiquity, Neoplatonism, and the fate of Athens as an urban center. All readings in English translation.

**CLAS 1750V. God of the Greek Philosophers (HMAN 1974V).**

Interested students must register for HMAN 1974V.

**CLAS 1770. Ancient Law, Society and Jurisprudence.**

After a brief survey of modern legal systems (USA, common and civil law systems), we return to Athens and Rome. Topics: sources of law, its evolution, (e.g., feuding societies); procedural law (e.g., how to bring cases); legal reasoning; rhetoric; substantive law (e.g., regarding marriage, religion, homicide). Different approaches are used: historical, comparativist, anthropological, case-law study.

**CLAS 1825. Race, The Classics and Democratic Theory (POLS 1825G).**

Interested students must register for POLS 1825G.

**CLAS 1930A. Introduction to Greek and Latin Meters.**

We will survey the major metrical systems of Greek and Roman verse by reading a wide range of short poems and brief extracts. The main concerns will be, first, how to scan poems correctly, and second, how to evaluate metrical and rhythmic choices. Prerequisite: GREK/LATN 0400, or demonstration of equivalent ability in Greek and Latin.

**CLAS 1930B. Dying God.**

The figure of the dying god (like Adonis, Osiris, or Attis), embodying both beauty and tragedy, has exerted a fascination from ancient times to the present day. His worship was sometimes central to the community, sometimes marginal, yet compelling in its "outsider" status. His myths invited meditations on love and death in various modes from comedy to epic. This course, through the great mythological texts of Greece and Rome as well as modern literature and art, will explore the figure in all its variety, along with Christian adaptations and recent interpretations. There will be writing assignments.

**CLAS 1930C. Parasites and Hypocrites.**

The course is a study of the many forms of toadying, groveling, feigning friendship, flattery, ass-kissing, and so on, that were such a large of source of concern — and comedy — in antiquity. The anxieties over hypocrisy in a democracy and parasites in client-patron systems will be explored historically, in literary representations, and in their social, political, and economic contexts. Authors to be read include Aristophanes, Plutarch, Lucian, Plautus, Horace, and Petronius.

**CLAS 1930E. Economy of Ancient Greece: New Approaches.**

What was the material underpinning of Greek Society? How did the production and distribution of resources connect individuals and states and what ancient mentalities and ideologies governed this exchange? New scholarly approaches and new evidence have drastically changed how we understand the ancient economy in recent decades. This course will survey key issues in the ancient economy such as Mediterranean ecology, trade, the invention of coinage, taxation, consumption, agriculture, slavery, and connectivity. In the process, we focus closely on the primary sources, in the form of literacy, archeological, numismatic, and epigraphic evidence, while also considering current scholarly methodologies and controversies.

**CLAS 1970. Special Topics.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**CLAS 1990. Conference: Especially for Honors Students.**

Section numbers vary by instructor. Please check banner for the correct section number and CRN to use when registering for this course.

**CLAS 2000. Proseminar in Classics.**

Introduction to standard research methods and tools in major subdisciplines of classical philology and ancient history. Required of entering graduate students. Survey of various subdisciplines in order to become familiar with field and scholarly principles.

**CLAS 2010A. Mysteries Documents.**

No description available.

**CLAS 2010B. Roman Topography.**

That actions occur in place is obvious, but how does place define action, and how do actions define place? How does the accretion of meanings assigned to a place through repeated use provide significance to the current actions, affect reinterpretations of past events, and effect future uses? Topography explores not only the history of monuments but also the constellation of meanings shaped by the interaction of monuments with each other in the cultural landscape. Topographical relationships serve as an imprint of a particular community's social, political, economic, and religious behavior within and across space and time. Ancient Roman case studies.

**CLAS 2010M. Problems in Old World Archaeology: The Archaeology of Empires.**

They were big, they were bad, they were beautiful... Cradles of civilization, wreckers of havoc, empires rank among the most influential political and social formations in global history. This seminar will explore general literature on imperial genesis, consolidation and decline, as well as the specific and unique contributions that archaeology and art history can offer to the understanding of empire.

**CLAS 2080A. Seminar: Allusion/Intertextuality/Influence.**

We will study the full career of allusion (from Homer to hip-hop) to gain a sense of its origins and development, especially in antiquity and late antiquity; to understand allusion functionally, (and to measure the durability of that function across time); and to read extensively in the allusive practices of one ancient author.

**CLAS 2080B. Seminar: Social Conflicts in the Roman Republic.**

This seminar, open to upperclassmen with experience in Roman history, will analyze the causes, impact, and results of social conflicts in the early (the "struggle of the orders") and late Roman Republic (Tiberius Gracchus, the Catilinarian Conspiracy), and the latter's contribution to the demise of the Republic. Sources in translation.

**CLAS 2080C. The Emperor Tiberius.**

No description available.

**CLAS 2080H. Topics in Roman Republican History.**

This seminar will examine some of the major controversies in Roman Republican history, with possible excursions to the archaic and triumphal periods. The focus will be on political and cultural history, and on questions of method and theory. Topics will be partially dictated by student interest. Assessment include student presentations and leading discussions, writing an abstract for a term paper, and a term paper.

**CLAS 2100G. The World of Late Antiquity.**

Focused on the Mediterranean world between the third and ninth centuries CE, this seminar introduces students to the study of late antiquity and the early middle ages from a multidisciplinary perspective. Class sessions focus on the intensive reading of a small collection of closely-related primary sources in the original language and contextualizing them through a grounding in other disciplines essential to the study of ancient and medieval history, including archaeology, codicology, palaeography, numismatics, and prosopography. Topics vary by semester and may include such themes as the body, emotional and psychological histories, trauma, slavery, violence, "barbarians," or interfaith interaction. Prerequisite: Latin

**CLAS 2110A. Graduate Seminar: The Book.**

This seminar examines the relationship between ancient literary forms and the media in which they were presented. Specifically, it considers the connections between the ways in which ancient books were published and distributed—in papyrus rolls and bound codices, individually and in groups, privately and commercially—and the cultural conventions of reading and literary appreciation in antiquity. Chronologically the seminar focuses on the late Roman Republic and early Empire (ca. 100 BCE -200 CE), but attention is devoted also to new papyrological evidence for the development of poetry books during the Hellenistic period. A reading knowledge of Greek and Latin is required.

**CLAS 2110K. Vision and Visualization in Literature: The Rhetoric of Enargeia.**

How does writing make us see? We will study rhetorical concepts of "vivid description" (enargeia, phantasia, eidentia) from ancient Greek and Roman theory and literary practice and follow their reception in later periods and literary traditions, including modern evaluations of their significance (all readings in English). Taking texts from poetry, historiography, philosophy, and elsewhere, we will explore "vividness" particularly in terms of tropes of persona-fashioning (prosōpopoeia) and subject-positioning, with attention to the ethical and ideological implications that that may entail, and explore its relations with such topics as ecphrasis, narratology, and spectacularity.

**CLAS 2450. Exchange Scholar Program.****CLAS 2930A. Alexandrian Poetry.**

We will read extensive selections in the original languages from Hellenistic Greek poetry and Latin poetry with Hellenistic influence, with an eye to their historical and cultural context and to their intertextual dimension.

**CLAS 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**CLAS 2980. Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

**CLAS 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**CLAS XLIST. Courses of Interest to Classics Concentrators.****Greek****GREK 0100. Essentials of the Greek Language.**

A two-semester approach to ancient Greek with special emphasis on developing facility in rapid reading of Greek literature. Selections from Attic Greek authors. No previous knowledge of Greek is required.

**GREK 0110. Introduction to Ancient Greek.**

Intensive, one-semester introduction to Greek. No previous knowledge of Greek is required. This is a double credit course.

**GREK 0200. Essentials of the Greek Language.**

Second half of a two-semester approach to ancient Greek with special emphasis on developing facility in rapid reading of Greek literature. Selections from Attic Greek authors. No previous knowledge of Greek is required.

**GREK 0300. Introduction to Greek Literature.**

Introduction to Greek literature through intensive reading. Prerequisite: GREK 0200, GREK 0110, or the equivalent. This course focuses on translation and comprehension of Classical Greek prose. The goal is to expand your vocabulary, increase your ease with morphology, and deepen your understanding of syntax as each of these elements of the language interact with each other. The primary text will be Plato's Symposium, in which Socrates and other guests at a drinking party consider the nature of love, ἔρωσ and its role in personal relationships, education, and even politics.

**GREK 0310. Grammar Review and Composition.**

Half-credit course with attention to student's individual needs.

**GREK 0400. Introduction to Greek Literature.**

Prerequisite: GREK 0300 (or the equivalent). Review of grammar of the Attic dialect through rapid reading of texts by Lysias, Plato, or Xenophon. Emphasis on syntax and style.

**GREK 1010. Introduction to Greek Drama.**

Both for students who have recently finished GREK 0300 and 0400 and for those who have little or no experience of translating Greek drama. Begins with a brief review of Attic grammar with readings in Plato. Then turns to Greek drama with students reading a play of one of the dramatists and focusing on philological analysis and meters.

**GREK 1050A. Aristophanes.**

Addresses students with at least an intermediate-level command of Ancient Greek, but previous knowledge of Aristophanic language and poetry is not required. We will read in the original language Aristophanes' *Frogs*, and study different aspects (language, meter, historical background, theatrical performances, literary interpretations, etc.) of this play and of Aristophanic comedy generally. *Frogs*, composed towards the end of the Peloponnesian War, is one of Aristophanes' most puzzling plays. It presents a fantasy (and comic!) vision of the afterlife and, indirectly, informs us about the literary criticism of the time.

**GREK 1050B. Euripides.**

Introduction to the study of Athenian tragedy. Thorough translation of one drama with attention to literary analysis. Rapid survey of other Euripidean plays.

**GREK 1050C. Sophocles.**

An introduction to the study of Athenian tragedy. We shall read closely at least two plays of the Oedipus cycle: *Antigone*, *Oedipus the King*, and *Oedipus at Colonus*. We will give close attention to language, meters, and matters of performance.

**GREK 1050D. Homer: *Iliad*.**

No description available.

**GREK 1060. Herodotus.**

How do we read Herodotus' Histories in today's post-truth era? Once known as part of the 'Liar School', today's 'Father of History' is better understood as a commentator on cultural difference, an artful story teller, and an astute observer of historical methods. This course focuses on Herodotus Book VIII which retells the critical naval conflicts between the Greeks and Persia at Artemision and Salamis in 480 BCE. The depictions of Xerxes and Themistokles serve as an appetizer for the "debate" where Herodotus evokes Panhellenism and Greece's debt to Athens. This Advanced Greek course is suitable for Undergraduates and Graduates.

**GREK 1080. Attic Orators.**

No description available.

**GREK 1090. Athenian.**

In the fourth century BCE, Athenians already looked back with nostalgia on a fifth-century "Golden Age"—on the age of "Periclean Athens." The third quarter of the fourth century did nevertheless see the rise of a statesman, Lycurgus, who rivaled Pericles in reputation and influence. The "Lycurgan Era" was a time of cultural efflorescence in Athens, but also one in which the city lived increasingly under the threatening shadow of Macedon. In this course we read, in Greek, one or more texts from the Lycurgan Era, Athens' "Silver Age." (Possible authors include Aristotle, Demosthenes, Aeschines, Lycurgus, Hyperides.)

**GREK 1100. Advanced Homer: The Odyssey.**

It is hard to imagine a more joyful way to acquire excellent control of Homeric Greek than by reading, in its entirety (if possible), Homer's wonderful and captivating work, the *Odyssey*. Though it can be a little time-consuming initially, students quickly become familiar with the syntax and the vocabulary, and find great pleasure in immersing themselves in this thrilling masterpiece.

**GREK 1110B. Plato, Phaedrus.**

We will read in Greek Plato's dialogue *Phaedrus* on love and rhetoric. We will attempt to understand the dialogue as a unified whole, discussing such questions as the link between love and the art of persuasion, Plato's denigration of writing, and the relationship between rhetoric and philosophy.

**GREK 1110C. Plato: Statesman.**

Reading of Plato's *Statesman* in Greek and discussion of the questions: What is special about the Statesman's expertise? How (if at all) does his expertise differ from that of the philosopher? How is the Statesman related to the philosopher-kings in Plato's *Republic*? Discussion of Plato's later philosophical method, a topic central of the *Statesman*.

**GREK 1110D. Plato: Symposium.**

Readings in Greek Plato's *Symposium*, his beautiful dialogue about love and philosophy.

**GREK 1110E. Plutarch.**

Reading of selections from Plutarch's works with attention to literary and historical background.

**GREK 1110F. Poetry of Gods and Heroes.**

Readings in early Greek hymns, creation myths (especially Hesiod's *Theogony*), and short poems about human struggle and values.

**GREK 1110G. Selections from Greek Authors: Mysteries.**

We shall read documents pertaining to the Eleusinian Mysteries. In the first part of the course, we focus on orations (Andocides 6, "On the Mysteries"; Lysias 6, *Against Anocides for impiety*). In the second part, we read inscriptions (including 'sacred laws') pertaining to the Mysteries.

**GREK 1110H. The Odyssey.**

No description available.

**GREK 1110I. Selections from Greek Authors: Thucydides.**

No description available.

**GREK 1110J. Plato: Theaetetus.**

Theaetetus is in many ways Plato's most modern dialogue. The central question is: what is it to know something? Is knowledge some sort of skill? Is it perception? True judgment? Some sort of account together with true judgment? We will read the dialogue in Greek and discuss Plato's fascinating investigation of knowledge.

**GREK 1110K. Early Byzantine Literature.**

No description available.

**GREK 1110L. Aeschylus' Agamemnon.**

No description available.

**GREK 1110M. Selections from Greek Authors: Plato, Sophist.**

No description available.

**GREK 1110N. Menander.**

Thanks to a series of remarkable discoveries over the last century, we can now read several comedies by Menander. In this course, we shall investigate the nature of New Comedy, its typical plot structures and characters, the conditions of its performance, and its relation to the Hellenistic world in which it was composed.

**GREK 1110O. Aristotle: Nichomachean Ethics.**

In this class we will read Books I, II, III, and X of Aristotle's *Nicomachean Ethics* and discuss his treatment of the highest human good, moral virtue, the doctrine of the mean, and his theory of action.

**GREK 1110P. Sophocles.**

This course offers a thorough introduction to Sophocles and Greek tragedy through a careful study of two plays, *Antigone* and *Philoctetes*, as well as a rapid survey of Sophocles' other works. Close attention will be paid to issues of language, poetry, and performance. In addition, through a representative selection of recent scholarship we will explore themes including Sophocles' engagement with culture and politics in fifth-century Athens as well as the reception of his plays in modern and contemporary theater.

**GREK 1110Q. Greek Erotic Literature: From Plato to the Medieval Romances.**

Survey of desire in Greek writing, with an emphasis on post-classical texts. Exploration of Platonic love, Roman Greek literature on eros, friendship in late antique and medieval rhetoric and letter-writing, erotic epigrams from Imperial to Middle Byzantine times, depictions of the erotic in hagiographical texts, and, finally, the twelfth-century revival of romantic fiction. Four semesters of Greek required.

**GREK 1110R. Characters and Characterization in Greek Literature.**

We will read passages from a wide range of Greek literature, both verse (epic, drama, lyric, epigram) and prose (history, oratory, biography, the character sketch), as well as ancient criticism, with our attention focused on the representation of character, individuality, and self-hood, especially in relation to genre.

**GREK 1110S. Xenophon.**

What discourse was there about running the state in Xenophon's work? GREK 1060 reflects on tyranny, democracy, and oligarchy under the critical eye of the Old Oligarch ([Xenophon] Constitution of the Athenians and Xenophon's Hieron, Constitution of the Spartans, and Poroi). This advanced Greek language and literature course enhances participants' knowledge and understanding of Greek, develops an appreciation of important themes and current research into Xenophon and his minor works, and improves the student's capacity to translate and comment on ancient Greek text. Assessment is by a combination of translation, commentary, essay assignments, and examinations.

**GREK 1110T. Rhetors and Philosophers: Intellectual Thought and Sophistic Style in the Ancient World.**

In a series of notorious dialogues, Plato delineated a distinction between two professions that were to define future intellectual history: philosophy and rhetoric, the science of thinking juxtaposed to the art of speaking. We will study the transformations of this distinction in four exceptional socio-cultural contexts: Classical Athens, Imperial Rome, Late Antique Alexandria, and Medieval Constantinople. We will discuss the basics and varieties of educational curricula (Aristotle's Academy, Second Sophistic, Neoplatonism), the social position and self-definition of ancient intellectual figures, and the ever-fluid boundaries between content and form, thought and style; ultimately, between philosophy and literature.

**GREK 1110U. Survey of Post-Classical Greek (2nd-12th century CE).**

This course will study the development of post-classical Greek language and literature with an emphasis on three traditions—the Second Sophistic, late antique discourse (4th-5th centuries), and writing in medieval Constantinople (9th-12th centuries)—through a close reading of texts from a variety of styles, authors, and genres. The selections will be tailored to the needs of the participants. Prior knowledge of Greek (an equivalent of 2 years) is required. Prerequisite: GREK 0400 or instructor permission. Enrollment limited to 20.

**GREK 1110V. Greek Funeral Orations.**

Survey of classical Greek funeral orations; authors to be covered include Thucydides, Plato, Demosthenes, and other fourth century prose writers. The emphasis of the course will be on Greek grammar and techniques of prose translation, though throughout the semester we will also be discussing the nature of ancient Greek commemorative discourses, particularly in classical Athens. Some background on Greek lament and other funerary genres will be provided, and short supplementary texts may range from Homeric excerpts to inscribed epitaphs. Students should already have four semesters of ancient Greek (completion of GREK 0400) or the equivalent.

**GREK 1110W. Persia in the Greek Historians.**

This course will explore Greek encounters with Persia in the 5th and 4th centuries. Following the epoch-making conflict between Greece and Persia, the Persian empire assumed a major place in the historical, literary, cultural, and artistic production of the Greek world. We will access this world primarily through the Greek historians, principally Xenophon, Herodotus, and Ctesias, including Herodotus' histories, Xenophon's *Cyropaedia* and *Anabasis*, and Ctesias' *Persika*. While the focus of the course will be on reading these texts in Greek, we will also engage with modern scholarship on Persia and issues of cultural contact and exchange between these cultures. Recommended prerequisite: Three semesters of Ancient Greek.

**GREK 1110X. Aristotle's Politics.**

Aristotle's *Politics* is a landmark in the history of political thought: the first systematic study of political life. Thinkers from Aquinas to Agamben and Foucault have taken the *Politics* as the foundation of their own political theories. In this course, we will read Book 1 of the *Politics* in its entirety, as well as selections from Books 3, 5, 7 and 8. We will address stylistic, philosophical and philological questions raised by the text, as well as reflecting on larger interpretive questions.

**GREK 1110Z. Greek Texts in the Postclassical Tradition.**

A treasure of unedited or insufficiently edited as well as untranslated or little studied Greek texts exists in the postclassical tradition (especially from the Roman period onward). The course will introduce graduate and qualified undergraduate students into this large body of later Greek literature as well as provide training in the study of manuscripts and the preparation of critical editions, translations, and commentaries. Participation in a joint publication project is possible.

**GREK 1111B. Polybius.**

How does an Empire start? Polybius provides answers in his *Histories* and explains the rise of Rome to a position of world-power. This course focuses on Book I which describes Polybius' purpose for his history and the foundation of Rome's operations beyond Italy. This advanced Greek language and literature course enhances participants' knowledge and understanding of Greek, develops an appreciation of important themes and current research into Polybius and his work, and improves the student's capacity to translate and comment on ancient Greek text. Assessment is by a combination of translation, commentary, essay assignments, and examinations.

**GREK 1111C. Late Antique Historiography: Procopius of Caesarea.**

This course will consider the writings of Procopius of Caesarea (ca. 500-565) in light of his place in Greek literary history, and his cultural context in the Late Roman Empire of Justinian. Sessions will combine a critical reading of texts in Greek with analysis of the author's historical methods, style, and literary influences. We will study portions of all three of Procopius' surviving works, beginning with *The Wars*, and continuing with *The Secret History* and *The Buildings*.

**GREK 1140. Introduction to Greek Linguistics.**

Examines changes that took place in Greek from the time of its separation from its parent language (Proto-Indo-European) to the dialects of Classical times (5th-4th C.B.C.). This course is also an introduction to the methodology of historical linguistics, concentrating on phonology. Proficiency in ancient Greek is required.

**GREK 1150. Greek Prose Composition.**

Survey of Greek grammar and an opportunity to reflect on problems of translation. Main goals: to improve the students' command of prose syntax (both in reading and writing), and to develop a keen sensitivity towards issues of translation. A variety of texts written in Attic prose are read and analyzed in class. Students are expected to write two to three compositions a week in good Attic prose. Advanced knowledge of ancient Greek is a prerequisite for this course.

**GREK 1260. Plato and Aristotle.**

No description available.

**GREK 1260A. Plato's Protagoras.**

Plato's *Protagoras* is a literary and philosophical masterpiece representing a great gathering of intellectuals, including Socrates and the sophist Protagoras. The two men try to out-wit each other on such topics as political theory, literary criticism, and education. Major questions throughout the discussion are: What is the role of knowledge in a successful life, and how can we acquire knowledge that leads to success? We will read the dialogue in Greek. Prerequisite: two years of Greek (GREK 0400) or demonstrated equivalent ability.

**GREK 1810. Greek Literature Survey to 450 BCE.**

Surveys early Greek literature to 450 BCE. Works studied include the *Iliad*, *Odyssey*, the Hesiodic poems, Pindar, Bacchylides, and Aeschylus. Emphasis on literary interpretation, the poetics of oral poetry, and the early history of various literary genres. Extensive readings in the original.

**GREK 1820. Greek Literature Survey after 450 BCE.**

Surveys Greek literature after 450 BCE. Authors studied include Sophocles, Euripides, Aristophanes, Herodotus, Thucydides, as well as the literature of the fourth century and beyond. Emphasis on literary interpretation and the intellectual currents of the times. Extensive readings in the original.

**GREK 1830. Imperial Greek Prose.**

How did Greek literature evolve under the Roman Empire? In this course we survey Greek prose literature of the 2nd-4th centuries CE, in particular trends related to what might be called "the Long Second Sophistic." Authors and topics we study include: figures traditionally associated with the Second Sophistic (Dio Chrysostom, Philostratus, Lucian, Aristides), the Greek novel, rhetorical theory and textbooks, biographical literature, travel-writing (Pausanias), Athenian-trained Christian rhetors such as the Cappadocian Fathers, and the concept of *paideia* and its relationship to specialized disciplines such as medicine and logic.

**GREK 1910. Special Topics.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**GREK 1930A. Euripides.**

The plays of Euripides and related works, subject to consultation with students.

**GREK 1930B. Greek Epigraphy.**

Practical (making and reading squeezes, identifying letters, locating inscriptions, etc.) and analytical aspects of epigraphy will be pursued. The major focus will be legal inscriptions from the Greek world.

**GREK 1930C. Introduction to Greek Papyrology.**

During the 20th century, papyrology has become the most important source for new literary texts, with three substantial discoveries in the last decade (Simonides, Empedokles, Poseidippos). Provides an introduction to the basic techniques of this comparatively young discipline: material evidence, decipherment, dating, interpretation, restoration, editing, etc. Focus on literary texts, but documentary papyri will also be examined.

**GREK 1930D. Rapid Reading in Plutarch.**

No description available.

**GREK 1990. Conference: Especially for Honors Students.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**GREK 2000A. Aristophanes.**

No description available.

**GREK 2000B. Greek Epigraphy.**

An introduction to the study of Greek epigraphy. We shall examine treaties, laws, decrees and other documents, mostly from Athens but also from other parts of the Greek world. Practical issues (e.g., the actual reading of letters and the identification and dating of documents) and analytic questions (e.g. regarding historical context) will be explored.

**GREK 2000C. Seminar: Plutarch.**

Rapid reading of selections from Plutarch's *Lives* and from his *Moralia*.

**GREK 2000D. Graduate Seminar: On Greek Margins: Introduction to Reading Scholia and other Technical Literature.**

No description available.

**GREK 2020A. Sophocles.**

No description available.

**GREK 2020B. Herodotus.**

Books 3 to 5.

**GREK 2020C. Pindar.**

No description available.

**GREK 2020D. Thucydides.**

Books I and VIII: language, mode of thought, and methodology; how the work was composed, historical problems; supplementary sources: epigraphical, literary.

**GREK 2050A. Demosthenes.**

No description available.

**GREK 2050B. Documents: Religious Cults and Sacred Laws.**

In the first half of the course we shall read documents pertaining to the Eleusinian mysteries in Athens, including (a) two orations, Andocides 1 "On the Mysteries," and Lysias 6 "Against Andocides for impiety;" (b) a variety of inscriptions published by Clinton (in Eleusis, The Inscriptions on Stone: Documents of the Sanctuary of the Two Goddesses and Public Documents of the Deme), and (c) the grand inscription of Adnanian (ca. 92 B.C., not Eleusinian but related). In the second half of the course, we shall read inscribed sacred laws from Greece and Asia Minor, from the fifth to the first century B.C.

**GREK 2070B. Seminar: Hellenistic Poetry.**

In this seminar we will read in their original Greek version extended portions of three major Alexandrian poets' works: Apollonius of Rhodes, Callimachus, and Theocritus, supplemented by readings in Hellenistic epigrams and other texts as well as secondary literature. We will pay attention to the social, political and literary environment of third century Alexandria, where—under very special conditions—these works were produced and received for the first time. We shall investigate the nature of the Hellenistic aesthetic, the relation of Hellenistic to archaic and classical poetry, and the way Hellenistic poetry is a reflection of its time and place.

**GREK 2100A. Herodotus.**

No description available.

**GREK 2100B. Making Memory: Simonides, Herodotus, and Greek Identity.**

No description available.

**GREK 2100C. Drama and the Polis.**

No description available.

**GREK 2100D. Ancient Literary Criticism.**

Survey of ancient literary theory, with an emphasis on Greek sources. Topics to be covered include the representation of poets, the nature of inspiration, the elements of literary style, the moral and ethical uses (and dangers) of poetry, mimesis, the relationship between poetry and citizenship, literature and education, etc. We will read, in Greek, excerpts from (e.g.) Aristophanes' *Frogs*, Plato's writings on poetry, Aristotle's *Poetics*, Plutarch's *How a young man should study poetry*, and pseudo-Longinus' *On the Sublime*. Students will be evaluated on the basis of in-class presentations, two translation exams, and a seminar paper.

**GREK 2110A. Homer.**

A close reading of the entire *Odyssey*, exploring all aspects of the poem, from its oral composition, language, and style to its background myths and social dimensions. Homer's text will be read in Greek, and extensive secondary sources in several languages will be used.

**GREK 2110B. Literary Criticism in Greek Scholia.**

No description available.

**GREK 2110C. Plato's Republic and its Neoplatonic Reception.**

A close reading of Plato's *Republic* together with Proclus' fifth-century CE commentary. The main focus is Plato's discussion of poetry and mimesis (books 2, 3, and 10), his appropriation of myth and dramatic technique (books 7 and 10), and Proclus' attempt at reconciling Plato with Homer, namely Plato's anti-mimetic stance with his overt theatrics and myth-making. Brings together classical writing with its post-classical readings, broaches such topics as the notion of mimesis and the reception of Plato as well as Homer in Antiquity, and introduces students to late antique allegory and what has been termed the birth of the symbol.

**GREK 2110D. Greek Epigraphy.**

An introduction to the study of Greek epigraphy. We shall examine treaties, laws, decrees and other documents, mostly from Athens but also from other parts of the Greek world. Practical issues (e.g., the actual reading of letters and the identification and dating of documents) and analytic questions (e.g., regarding historical context) will be explored.

**GREK 2110E. Aeschines and Demosthenes, "Crowning Speeches".**

**GREK 2110F. Greek Palaeography and Premodern Book Cultures.** Introduction to pre-modern Greek book culture and the study of Greek literary scripts from classical antiquity to the Renaissance. Students become acquainted with the history of books, the context and agents of their production, and the transmission of Greek (classical as well as post-classical) literature. Training is provided in reading and dating different scripts and in editing ancient texts.

**GREK 2110G. Political Trials: Treason and Accountability in Fourth Century Athens.**

In studying trials of treason and accountability, we shall examine the democratic ideologies and political factionalism that fueled the trials and also the legal armature that rendered them possible. Our sources for the most part are speeches written by the Attic orators (Demosthenes, Aeschines, Lysias, Demosthenes, Deinarchos, and Hypereides) and include impeachment trials for treason by commission of adultery, for having the wrong dream in the Amphiareion, for leaving Athens in wartime; an accountability trial for treasonous conduct while serving on an embassy; and trials (including the prosecution of Demosthenes) for accepting bribes from Alexander's agent, Harpalos.

**GREK 2120A. Graduate Seminar: Greek Autobiography: From Plato to the Middle Ages.**

An exploration of autobiographical narratives written in Greek from classical to Byzantine times, focusing on the relation between changing notions of the self and the development of autobiography as a literary genre. Authors examined: Plato, Demosthenes, Nicolaus of Damascus, Marcus Aurelius, Aelius Aristides, Lucian, Gregory of Nazianzus, Libanius, Synesius, Michael Psellos, Michael Attaleiates, and Anna Comnena.

**GREK 2150. Plato's Theaetetus.**

See PHIL 2150I for course description.

**GREK 2970. Preliminary Exam Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**GREK 2980. Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

**GREK 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**Latin****LATN 0100. Essentials of the Latin Language.**

An intensive two-semester approach to Latin with special emphasis on developing facility in the rapid reading of Latin literature. No previous knowledge of Latin is required.

**LATN 0110. Introduction to Latin.**

This course offers a rapid introduction to the Latin language and grammar. As a one-semester introduction to material often covered in two semesters, this course carries two credit hours instead of one. The workload for this course is correspondingly heavy; students may expect an average of ten hours of homework—including memorization, practice, and preparation of vocabulary and grammar—per week. There are no prerequisites for this course.

**LATN 0200. Essentials of the Latin Language.**

Second course in an intensive two-semester approach to Latin. Special emphasis on developing facility in the rapid reading of Latin literature. No previous knowledge of Latin is required prior to taking this two course sequence.

**LATN 0300. Introduction to Latin Literature.**

Introduction to Latin literature through intensive reading of major authors in prose and poetry with careful attention to grammar and style. Prerequisite: LATN 0100, 0200 or 0110 (or equivalent).

**LATN 0310. Grammar Review and Composition.**

Half-credit course with attention to student's individual needs.

**LATN 0400. Introduction to Latin Literature.**

Introduction to Latin literature through intensive reading of major authors in prose and poetry with careful attention to grammar and style. Prerequisite: LATN 0100, 0200 or 0110 (or equivalent).

**LATN 0510A. Latin Mystical Writing.**

We read variously in Latin those authors (Cicero, Horace, Augustine, Anselm, Hildegard) who articulate the best traditions of mysticism in the West: a longing for transcendence, alienation, unity through participation with divinity and culture. Prerequisite: A knowledge of Latin at the intermediate level (one or two years).

**LATN 0510B. Medieval Latin Lyric.**

Open to students with two years of Latin.

**LATN 1010. Latin Lyric: Catullus and Horace.**

Introduction to Latin lyric poetry through the poems of its finest representatives, Catullus and Horace. Emphasis placed on careful reading of the poems, which will be considered individually, as parts of a collection, and as representatives of the poetry we call lyric. The primary objective of the course is to improve students' ability to read Latin lyric poetry fluently, in terms of meter, grammar, syntax, and literary-critical appreciation. We will also read and discuss a selection of seminal articles on ancient lyric, and students will get experience (and guidance) writing scholarly criticism.

**LATN 1020A. De Oratore.**

No description available.

**LATN 1020B. Cicero, Verrines.****LATN 1020C. Cicero's Republic.**

As one of the only texts that articulates a "Roman" political philosophy, Cicero's *De Re Publica* is indispensable for students with an interest in Roman history or classical political thought. In this class, we will address the text from both these perspectives; but we will also read it as a work of literature that remakes the genre conventions of the Platonic dialogue for a Roman readership. We will also address the complex relationship between the text of *De Re Publica* and the troubled times in which it was written.

**LATN 1020D. Cicero at the End of the Republic: Politics, Letters, and Philosophy.**

We study Cicero's writings from the last months of his life, when both his own personal legacy and the fate of the Republic were at stake. During this turbulent period he produced the *Philippics* against his arch-enemy Mark Antony, letters offering an intimate perspective on friendship and family life, and the *De Officiis*, a treatise on ethical duties that became one of the most influential works of moral philosophy ever written. We read the Second *Philippic*, several letters, and most of *De Officiis* Book I in Latin, plus selections of other *Philippics* and all the *De Officiis* in English.

**LATN 1040A. Virgil: Eclogues and Georgics.**

Virgil, most famous as the poet of the *Aeneid*, began his career with two smaller masterpieces: a collection of ten bucolic poems (*Eclogues*) modeled on the *Idylls* of the Hellenistic poet Theocritus, and a didactic work on agriculture in four books, the *Georgics*, which found its inspiration both in Hellenistic models and in more recent Roman antecedents (including Lucretius' *De Rerum Natura*) and is viewed by many as the poet's finest achievement. We will read selections from both works, concluding with the *epyllion* at the end of *Georgics* Four, which relates the tragic love story of Orpheus and Eurydice.

**LATN 1040B. Virgil: Aeneid.**

Close reading of selections from all twelve books of Virgil's epic.

**LATN 1060A. Latin Prose: Further Readings in Roman Historiography.**

No description available.

**LATN 1060B. Sallust.**

A study of the nature and themes of Roman historical writing through reading one of its major representatives: "Catilinarian Conspiracy" and selections from Sallust's other works. Comparison with other authors writing on the same topics.

**LATN 1060C. Sallust and Livy.**

Two major Roman historians provide a basis for study of style, intent, veracity, and stature.

**LATN 1060D. Sallust, Livy, and Tacitus.**

Three major Roman historians provide a basis for study of style, intent, veracity, and stature.

**LATN 1060E. Livy.**

Close readings of Livy's history of Rome, *From the Foundation of the City*. As we read selections from Books 1, 5, and 21, we will explore several historiographical aspects of Livy's text. We will consider both the historical tradition Livy was adapting and the influence and intrusion of the Augustan regime upon Livy's particular construction of the past. We will pay special attention to the roles played by myth, legend, and history. We will also discuss the text as literature and examine how the historian structures and crafts his work into individual books, sets of books, and a coherent multi-volume whole.

**LATN 1060F. Ovid.**

Reading of selections from Ovid's poetry, with emphasis placed both on close reading and on the texts' engagement with poetic issues (genre and intertextuality) and with the wider political and cultural issues of Augustan Rome.

**LATN 1060G. Tacitus.**

Will examine the literary and historical significance of Tacitus' *Annals*. In addition to reading the entire *Annals* in English, we will focus on books 1 and 4 of the Latin text, translating 6-8 pages per week (time permitting, we will also practice some sight-translations from book 14). In an effort to understand Tacitus' place in the ancient historiographical tradition, we will read several secondary sources, many of which respond to (or build on) Ronald Syme's monumental work. Not open to first year students.

**LATN 1060H. Conquest: Caesar and Tacitus.**

Caesar's account of the Gallic Wars reconstructs his conquests, defeats, and ultimate victory. We will consider the great general's aims and objectives in launching such a major military campaign and in writing a history of these endeavors. Was he simply seeking greater glory for the Roman people? After the midterm, we will turn our critical attention to the life of another Julius: Cn. Iulius Agricola, the Imperial general largely responsible for Rome's conquest of Britain. In this moral biography of his father-in-law, Tacitus mixes panegyric and invective to reveal the less savory aspects of imperialism: Rome's rapacity, corruption, greed, and despotism.

**LATN 1060I. Senecan Tragedy.**

Close reading and thorough translation of two Senecan revenge tragedies, the *Medea* and *Thyestes*. Emphasis will be on translation of the Latin, but as time permits we will also be discussing the two plays in their mythological, cultural, historical, and performance contexts. Students should already have four semesters of Latin (LATN 0400) or the equivalent.

**LATN 1060J. Ovid Heroides.**

Ovid's collection of "Heroines" is comprised of fifteen elegiac "letters" from mythological heroines to the lovers who have mistreated or abandoned them, as well as three pairs of letters between heroic lovers and their beloveds. We will read selected Heroides in Latin and the remaining poems in English translation. Emphasis will be placed on close reading of the Latin and on the poems' engagement both with poetic issues (e.g., genre and allusion) and with the wider political, social, and cultural discourses of Augustan Rome.

**LATN 1110A. Apuleius.**

No description available.

**LATN 1110B. Augustine, *Confessions*.**

We will focus on the Christian humanism of Augustine's *Confessions*, reading excerpts from the autobiographical books against the diction found in them owed to Catullus, Cicero, Horace, Lucretius, Ovid, Sallust, and Virgil. The question of why a Christian might make use of such diction will be answered through attention to Augustine's training and his literary aims in writing the *Confessions*.

**LATN 1110C. Caesar: *Bellum Gallicum*.**

No description available.

**LATN 1110D. Civil War Literature.**

Reading of Latin works that deal with the reality and experience of civil war, focusing primarily on the civil war of 49-48 B.C.E.: Caesar's *Civil War*, Cicero's letters of the time, Cicero's Caesarian orations, and selections from Suetonius and Lucan. Additional readings in translation.

**LATN 1110E. Comedy.**

No description available.

**LATN 1110F. Fortunatus.**

Wide reading in the occasional poetry of the most prolific writer of the early Middle Ages, attending to diction, meter, imagery, allusion, and paying special attention to the (homo- and hetero-) erotic pieces written to the poet's friends.

**LATN 1110G. Latin Love Elegy.**

Reading of representative selections from each of the Roman elegists: Tibullus, Propertius, and Ovid. Discussion also of the origins and development of love elegy at Rome and exploration of the themes and topoi that define the genre. Follows the poets' negotiations with various discourses and ideologies in Augustan Rome: literary, social, sexual, and political.

**LATN 1110H. Literature at the Court of Charlemagne.**

We will read widely in the Latin literature of the eighth and ninth centuries, paying attention to genre, meter, patronage, and the shifting uses put to poetry in the decades in which Charlemagne ruled.

**LATN 1110I. Lucretius.**

Lucretius' *De Rerum Natura*, a long philosophical poem, is both a major source for Epicurean philosophical thought and an example of the ambitious Latin poetry of the late Roman Republic. We will read extensive selections from the poem in Latin. Our aim will be to make a detailed exploration of these sections through close reading of the Latin text and discussion of linguistic, literary, and cultural problems.

**LATN 1110J. Petronius.**

Close reading of Petronius's comic masterpiece, the *Satyrica*, with emphasis on questions of form, narrative technique, and literary intention.

**LATN 1110K. Selections from Latin Authors: Ausonius.**

We will read widely in the poetry of Ausonias, aiming for depth and breadth, but focusing especially on those poems that speak to the ways in which the poet transformed or transferred the classical Latin tradition to his successors.

**LATN 1110L. Medieval Latin Lyric.**

Close reading of a representative sampling of the personal poetry of the Latin Middle Ages, paying attention to what constitutes the lyric mode in the fourth through the twelfth centuries, developments in metrics, the effects of Christianity on vision and voice, the pressures of vernacular traditions, lyric rhetoric.

**LATN 1110M. Plautus.**

We shall read two or three plays of the comic genius of ancient Rome, with focus on Plautus' language and cultural background.

**LATN 1110N. Latin Comedy: Terence.**

We shall read several plays of Terence. This course is ideal for freshman who have studied Latin for three or four years in high school and who are taking their first college course and for students returning to Latin after an interval without Latin.

**LATN 1110O. Roman Satire.**

Survey of the genre of Roman verse satire, with special attention to Horace and Juvenal and additional readings in Lucilius and Persius.

**LATN 1110P. Lucan's Civil War.**

We will read selected books of Lucan's *Civil War* (*Bellum Civile*) in Latin and the poem in its entirety in English. Alongside the primary goal of refining our facility with Latin language, we will also become increasingly familiar with and sensitive to Lucan's style, his poem's place within the development of Greco-Roman epic, and the socio-political context(s) of his poem's creation (e.g. Nero and the Pisonian conspiracy). Themes to be discussed may include, but are not limited to, the grotesque, epic's both complimentary and critical relationship to empire, ambition and Roman gender constructs, and the dynamics between art and politics.

**LATN 1110R. Catilines: Cicero and Sallust.**

Close readings of selections from Cicero's *Catilinarians* and Sallust's *Bellum Catilinae*. We will explore how two contemporary authors responded to the same historical event: the Catilinarian conspiracy. We will consider not only the differences of genre (political speech v. historical monograph), but also the ways in which each author's involvement affected the content of his presentation. Additionally, we will examine Sallust's and Cicero's distinctive positions on Latin diction and stylistics. Prerequisite: Knowledge of elementary Latin grammar and intermediate Latin reading skills.

**LATN 1110S. Catullus.**

We will read all the extant poetry of Catullus with an emphasis on close reading of the Latin text and discussion of linguistic, literary, and cultural problems.

**LATN 1110X. Selections from Latin Authors: Ovid, *Ars Amatoria*.**

This course will cover Ovid's *Ars Amatoria*, Book One, as well as other selections from Ovid. Our aim will be a detailed exploration of this poetry through close reading of the Latin text and discussion of linguistic, literary, and cultural questions. Quizzes, exams, and a 7 to 10-page term paper will be required.

**LATN 1110Y. Latin Epistolography.**

Through reading letters from different periods of Roman History, students will become more familiar not only with the ways letters negotiated Roman social, political, and intellectual networks but also how Roman authors drew on epistolary conventions to compose literature in other forms. Authors to be read may include but are not limited to Cicero, Ovid, Pliny the Younger, and Fronto.

**LATN 1110Z. Dying in the Republic.**

For those who witnessed the bloody violence and brutal butchering of the late Republic, death and dying were everywhere. What did these Romans believe happened to the dead? Was there an afterlife? This course explores two texts (Virgil and Cicero) that deal with visions from and of the spheres beyond the realm of the living. Discussion of supplementary material from other authors, religious studies, and material evidence further develop our notions of what it meant to die in the Republic.

**LATN 1120A. Literary Culture in the Latin Middle Ages.**

This course will survey the genres relevant to the Latin Middle Ages (beast poetry, hymns, sequences, tropes, miracle and passion plays, prosimetrum) and older forms in their medieval incarnations (epic, lyric, elegy, pastoral). We will also do some work in manuscript production, including the interplay of visual and textual modes. Work in selected medieval vernaculars is possible for students so inclined. We will focus on the tenth through the thirteenth centuries.

**LATN 1120B. Poetry at the End of the Roman World.**

Edward Gibbon thought the "fame of Ausonius condemned the taste of his age." Study of the taste of Ausonius' age, surveying Latin literature written during and after the so-called fall of Rome. Focus on some masterworks of Silver Latinity as a bridge to our period. Sampling of literature from the 4th, 5th, and 6th centuries. Authors include Prudentius, Ausonius, Paulinus of Nola, Sidonius, Avitus, and Fortunatus.

**LATN 1120C. Survey of Late and Medieval Latin.**

A study of the masterworks of the Latin language written between 350 C.E. and 1300 C.E., with special emphasis on the 4th, 8th, and 12th centuries. The historical development of Latin literature; changes in Latin grammar, syntax, and morphology; innovations in genre, prosody, and stylistics; and the relationship of writings (manuscripts) to art and music.

**LATN 1120D. Alcuin.**

Alcuin lived a life of wide variety and accomplishment, not least as an important member of Charlemagne's inner circle and, like many at court, he wrote widely and in multiple genres. From his enormous output this course will focus on the large collections of poetry and letters. We will attend in both gatherings to theme, tone, style, and allusivity and, where appropriate, we will ponder alternate readings in a collection that has not been edited since the late nineteenth century.

**LATN 1120E. Writing Lives in Late Antiquity: Jerome and Augustine.**

This course will explore the development of new forms of biographical and autobiographical writing in Latin in the fourth and fifth centuries CE. We will focus on two monumental late ancient authors, Jerome and Augustine, and examine the way that these Christian intellectuals conceive of and express ideal lives in a newly Christian Empire. Texts will include selections of Jerome's Lives of Paul the Monk and Hilarion, his letters, and Augustine's Confessions.

**LATN 1120G. Reading Humanist Latin Texts.**

The course will explore in depth some important Renaissance or 'early modern' works of Latin literature, many of which have not been translated into English. As well as opening up a new field of Latin writing, the course will extend general knowledge of classical literature by involving some less commonly studied ancient sources. It will also introduce some early imprints, enabling you to consider texts directly in the original form in which they first appeared.

**LATN 1150. Latin Prose Composition.**

Review of the basic tenets of Latin syntax, composition, and style. English to Latin translation exercises will shore up composition skills, as we study the stylistic traits of seven Roman authors: Cato, Caesar, Cicero, Sallust, Livy, Seneca, and Tacitus. The course will proceed chronologically according to author. Class time will be spent on translation exercises and review, as well as the identification of the stylistic and syntactic characteristics of the seven authors under study.

**LATN 1250. Law and Literature.**

No description available.

**LATN 1810. Survey of Republican Literature.**

Our purposes in this survey of Latin literature are to acquire a comprehensive historical perspective on Latin poetry and prose until the end of the Republic and a sense of its phases and the dynamics of its tradition; and to read different styles of Latin poetry and prose with confidence and ease.

**LATN 1820. Survey of Roman Literature II: Empire.**

This course will survey the major authors of Latin literature in chronological order from Virgil.

**LATN 1930A. Cicero: *De Oratore*.**

Close reading of Cicero's *de Oratore*.

**LATN 1930B. Ammianus Marcellinus.**

In brilliant if idiosyncratic language, Ammianus Marcellinus, last of the major Latin historians, records the exciting and fateful events of his own times, the fourth century A.D., including therein his personal and dramatic involvement in events. We will chiefly read his famous account of the deeds of the emperor Julian ("the Apostate"). The course is intended for advanced students.

**LATN 1970. Special Topics.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**LATN 1990. Conference: Especially for Honors Students.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**LATN 2000A. Senecan Tragedy.****LATN 2010A. Catullus in Horace.**

No description available.

**LATN 2010B. Horace's *Epistles*.**

No description available.

**LATN 2010C. Ovid, *Metamorphosis*.**

No description available.

**LATN 2010D. Seminar: Roman Comedy.**

We start with a couple of plays of Menander and fragments of New Comedy; we then read representative comedies of Plautus and Terence in depth.

**LATN 2010E. Virgil: *Aeneid*.**

No description available.

**LATN 2010F. Ovid: *Tristia*.**

Close examination of the eleven poems that comprise the first book of Ovid's *Tristia*.

**LATN 2010G. Roman Agricultural Writers.**

No description available.

**LATN 2010H. Varro.**

Survey of the works of Rome's greatest scholar, the polymath M. Terentius Varro, with focus on *De Re Rustica*, *De Lingua Latina*, *Antiquitates*, and the Menippean satires.

**LATN 2010I. Appendix Virgiliana.**

We will survey the Latin poetry of the Julio-Claudian period, focusing on collections of pseudonymous texts that have come down under the names of Virgil and others and that include epic, lyric, epigrammatic, elegiac, and other types of poetry, ranging in theme from high-flown panegyrics to raunchy Priapea. Some of these exerted great influence on later writing; some are almost unknown. We will aim for a more nuanced view of Latin poetry and Roman culture between and around the better-studied poetic texts of the period.

**LATN 2010J. Terence and Reception in Donatus.**

No description available.

**LATN 2020F. Seminar: Ammianus Marcellinus.**

No description available.

**LATN 2030A. The Age of Augustus.**

No description available.

**LATN 2030G. Augustine: *Confessions*.**

A close reading of selected books of the *Confessions* against the backdrop of its pagan and Christian sources. Part of the seminar will be devoted to re-constructing the readerly and writerly spaces Augustine inhabits, how those spaces impinge on his engagement of his sources, and what sort of readerly competencies the imply.

**LATN 2030H. Graduate Seminar: Caesar, *Bellum Civile*.**

No description available.

**LATN 2040. Seminar: Roman Literature.**

No description available.

**LATN 2080A. Late Latin Literary Culture.**

No description available.

**LATN 2080B. Lucan.**

No description available.

**LATN 2080C. Late Latin Poetry.**

We will read widely and quickly in a selection of poets (Prudentius, Claudian, Sidonius, etc.) but focus our work on the poetry of Fortunatus and Alcuin, paying attention especially to textual issues and the history of scholarship, such as it is, of select poems. Reading knowledge of French required. The seminar will convene for one week at the conference on late Latin poetry to be held in October 2011 on campus. Open to graduate students; advanced undergraduates may enroll with instructor permission.

**LATN 2080D. Late Latin Poetry.**

We will read selectively in the fourth (Ausonius, Prudentius) and the sixth (Fortunatus) centuries, paying attention to the ancient Latinity informing the compositional habits of these poets, and focusing on the collective writing of a commentary on one book of Fortunatus' collection. There will be regular reports and some guest lecturers.

**LATN 2080F. Latin in America.**

Exploration of some of the rich and extensive 'neo-Latin' writing from colonial Spanish America, with particular emphasis on poetry and literary prose from sixteenth-century Mexico, much of which has never been studied or translated. Latin satires, epigrams, bucolic poems, literary epistles and dialogues will be examined in relation to their classical models and influences – and in the context of the multicultural environment in which they were produced. As well as opening a new world of Latin, this course will familiarize you with the format of some early modern books and manuscripts, and offer a unique perspective on traditional classical literature

**LATN 2090A. Elegy.**

No description available.

**LATN 2090B. Lucretius.**

In this seminar, we will read Lucretius' *De rerum natura* entire, and discuss it both as a work of Epicurean philosophy and as one of the world's greatest works of didactic poetry and a masterpiece of Latin literature. Background texts will be assigned from time to time.

**LATN 2090C. Ovid: Exile Poetry.**

No description available.

**LATN 2090D. Propertius.**

We will concentrate especially on the elegist's third book, which has been viewed both as a work of closure (a farewell to the erotic themes dominant in the earlier books) and as transitional (as the poet moves toward the more overtly Callimachean stance and political themes that will characterize the fourth book). While our primary interest will be literary-critical, including especially the elegist's engagement with his Roman contemporaries, we will also engage seriously with textual criticism, employing Heyworth's *Cynthia* and the new Oxford commentary on Book 3 (in addition to the other major commentaries).

**LATN 2090F. Tibullus.**

No description available.

**LATN 2090G. Epigrams.**

No description available.

**LATN 2110. Seminar: Roman Satire.**

No description available.

**LATN 2120A. Roman Epigraphy.**

A practical introduction to the study of Latin inscriptions, with emphasis on the reading, editing, and interpretation of texts on stone. Class time will be divided between discussion of various categories of texts in the light of the 'epigraphic habit', literacy, and the sociology of reading in antiquity and hands-on experience with editing inscriptions on stone.

**LATN 2120B. Tacitus.**

Close readings of selections from Tacitus's works, especially the *Agricola*, *Dialogus*, and *Annales*, with emphasis on style, form, and literary intention. Attention will be paid also to Tacitus's political career and the life of a senatorial historian in the age of Trajan.

**LATN 2120C. Graduate Seminar: Apuleius.**

No description available.

**LATN 2970. Preliminary Exam Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**LATN 2980. Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

**LATN 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**Modern Greek****MGRK 0100. Introduction to Modern Greek.**

Designed for students with little or no prior knowledge of Modern Greek. The aim is to introduce students to basic linguistic structures and develop the ability to comprehend and produce text, as well as to speak and understand speech, in a variety of contexts and registers. The course objectives are to enable students to perform a range of tasks, master a minimum core vocabulary and acquire knowledge and understanding of various forms of Greek culture.

**MGRK 0200. Introduction to Modern Greek.**

A continuation of MGRK 0100. New students may place into it, after special arrangement with the instructor. The course continues on an integrative skills approach and aims to develop language skills, within a framework of specific topics and functions. The course objectives are to enable students to perform a range of tasks, master a minimum core vocabulary and acquire knowledge and understanding of various forms of Greek culture.

**MGRK 0300. Intermediate Modern Greek.**

Develops linguistic and cultural competence and may be taken by anyone who has completed MGRK 0200 or after consultation with the instructor and/or a placement exam. It focuses on further development of the four language skills as well as knowledge and understanding of various aspects of Greek society. It employs a variety of materials, including film, digital stories, internet based sources, music, art, and literature.

**MGRK 0400. Intermediate Modern Greek.**

A continuation of MGRK 0300. New students may place into it, after special arrangement with the instructor. It aims to enhance language skills within a variety of registers and themes; enable the students to master, use and understand effectively essential linguistic structures; examine a variety of expressive forms within an authentic cultural context.

**MGRK 0500. Advanced Modern Greek.**

May be taken by students who have completed the previous sequences or by anyone who places successfully into the course. The course places emphasis on the improvement of writing and oral skills, via presentations, collaborative projects, conversations and assignments based on topics and texts, drawn from a variety of sources and cultural forms of expression.

**MGRK 0600. Advanced Modern Greek.**

A continuation of MGRK 0500. Students who have not taken the previous sequence may take a placement test, after consultation with the instructor. The course aims to promote range, accuracy and fluency and enable students to develop ease and spontaneity with the language. Authentic materials drawn from a range of sources inform the content of the course and include films, literature, media, testimonies, music and internet based sources. The development of transcultural competence will be an essential component of the course.

**MGRK 0810. Film Classics: The Greeks on the Silver Screen.**

This course examines the adaptation of classical Greek themes and figures in world cinema. Proceeding from classical texts (that will include *The Odyssey*, *The Iliad*, *Oedipus Rex*, *Medea*, *The Oresteia*), analysis of films focuses on the ways such texts are recast to comment upon very different cultural, socioeconomic, and political circumstances. How do such films aspire to be “classic” in their own right? What genres or modes follow such films’ epic, or anti-epic, cycles? Considers Hollywood blockbusters (*Ulysses*, *Jason and the Argonauts*, *Troy*, *300*) as well as arthouse fare by Godard, Pasolini, Camus, Merchant, Cacoyannis, Dassin, the Coen brothers, Angelopoulos.

**MGRK 0811. Travelers in Greece: from Pausanias to Shirley Valentine (CLAS 0210T).**

Interested students must register for CLAS 0210T.

**MGRK 1210. A Migration Crisis? Displacement, Materiality, and Experience.**

In the past few years, we have all experienced, most of us through the media, what has been called a migration crisis. And yet, migration as a phenomenon did not appear in 2015; it is as old as humanity, and displacement and contemporary forced migration have also a long history. In this course, we will examine the historical, material and experiential dimensions of contemporary displacement and migration. Many of the examples will be from Greece but also other parts of Mediterranean and beyond, including from the Mexico-US border. Engaged Scholarship Course.

**MGRK 1220. Decolonizing Classical Antiquity: White Nationalism, Colonialism, and Ancient Material Heritage.**

Why do the material remnants of classical antiquity still attract public attention and exercise symbolic power? Why have such monuments been “used” by authorities and diverse social groups in the service of often totalitarian agendas? What are the cases where these monuments operate as weapons for resistance? How has colonial, racial, and national modernity shaped the way we understand and experience the materiality of the classical? Finally, how can we decolonize classical antiquity? We will use a diversity of global case studies, including modern Greece and Europe, and a variety of sources, from ethnographically derived performances to digital culture.

**MGRK 1230. Mediterranean Fictions: On Debts, Crises, and the Ends of Europe.**

Sun-drenched, seductive, and timeless, the Mediterranean is an appealing location from which to ponder Europe’s debt to this cradle of western civilization. Recently, an economic debt crisis in Greece and the region stoked fears that a peaceful, unified Europe will come undone or else be rehabilitated. The word ‘crisis’ itself hinges on a making a crucial decision, often in marking the turning point of a disease. This course examines representations of this moment through literature, film, history—but also in anthropology, journalism, and art—and in relation to other twentieth-century Mediterranean texts that also anticipated seismic shifts on the continent.

**MGRK 1240. Modern Greece in the World.**

This course introduces the culture, history, and politics of modern Greece. No prerequisites; all texts in English. Putting aside exceptionalist claims rooted in antiquity, the course focuses on critical moments when Greece figures in the frontline of Balkan, European, and global events in the modern period: when, as historian Mark Mazower claims, “democracy’s cradle [is] rocking the world.” Literary, filmic, and artistic representations of such moments from within and outside Greece will illuminate issues of nationalism, modernization, sovereignty, and postcoloniality. Faculty at Brown from diverse disciplines working on Greece will be invited to address such questions through their own research.

**MGRK 1800. In Other Words: Translating Greece.**

This is an advanced undergraduate seminar that will offer students the opportunity to build on their linguistic, cultural and critical literacies, by translating from Greek into English. Over the course of the semester we will be thinking critically about texts, their ideological, historical and social coordinates and their embedded discourses of Greekness, community, diglossia, identity and gender, among others. In addition to translating from Greek into English, we will read and discuss essays on translation, in order to consider in an informed way the issues (untranslatability?) and types of decision making associated with the practice of translation.

**MGRK 1910. Special Topics in Modern Greek.**

No description available.

**MGRK 2200. Modern Greek for Classicists and Archaeologists.**

This graduate level course promotes the acquisition and further refinement of the necessary translingual and transcultural skills to prepare students in the fields of Classics and Archaeology to carry out research in Greece and Cyprus. In addition, it involves training in linguistic skills that will enable students to study closely a range of texts of relevance to these disciplines. Primary emphasis will be on the development of reading, oral and aural skills using a variety of text and web based materials, of discipline specific content but also in professional and other communicative contexts of cultural currency.

**Sanskrit****SANS 0100. Elementary Sanskrit I.**

This course introduces Sanskrit to students who have no prior knowledge of any language other than English. Students quickly learn to read the Devanāgarī script and study the basics of the sound-system of Sanskrit. The course rapidly surveys the basics of Sanskrit grammar while using adaptations of classical Indian myths and stories as reading exercises.

**SANS 0200. Elementary Sanskrit II.**

This course continues the survey of grammar and the reading exercises of SANS 100. The second half of this course reads selected passages of the *Bhagavad Gītā* and the beginning of the classic story of Nala and Damayanti from the *Mahābhārata*. Prerequisite: SANS 0100.

**SANS 0300. Sanskrit Epic Narrative.**

Consolidates and extends the knowledge of Sanskrit grammar introduced in first year Sanskrit; acquaints students first-hand with basic themes of ancient Indian culture, and cultivates the reading and interpretive skills necessary to read epic and closely related Sanskrit narrative with comprehension and increased fluency. Prerequisite: SANS 0200.

**SANS 0400. Classical Sanskrit Story Literature.**

Introduces students to the more challenging Sanskrit of classical story literature and continues to extend the knowledge of Sanskrit grammar introduced in first year Sanskrit and developed in SANS 0300, as well as present basic Indian cultural themes. Prerequisite: SANS 0300.

**SANS 1020. Early Sanskrit Philosophy and Religion.**

Reading in Sanskrit of selections from the *Upanishads*, *Bhagavad Gītā*, *Dharmasāstras*, etc. Prerequisite: SANS 0200.

**SANS 1080. The Critical Episodes of the Mahabharata.**

A guided tour of the structure of the *Mahabharata*, “The Great Epic of India,” through the reading in Sanskrit of selected critical passages.

**SANS 1100. Vedic Sanskrit.**

Introduction to reading the *Rig Veda* and later Vedic literature, with particular attention to the grammar of Vedic Sanskrit.

**SANS 1400. The Sanskrit Grammatical Tradition.**

Introduction to the Sanskrit tradition of *vyākāraṇa* (grammatical derivation and analysis) through reading Pāṇini’s *Astādhyāyī* and commentaries upon it.

**SANS 1600. Sanskrit Poetry and Drama.**

Introduction to *kāvya* (classical Sanskrit *belles lettres*)—poetry, drama, and prose narrative—through the reading of authors of the Classical Period as well as works on aesthetics and commentaries upon them.

**SANS 1800. Classical Schools of Indian Philosophy.**

Introduction to the classical Brahminic *darsanas* (comprehensive, rationalized systems of philosophy and, or, theology dealing with Hermeneutics and Philosophy of Language, Logic, Metaphysics, and Ultimate Beatitude) and to corresponding Buddhist and Jain traditions through reading, in Sanskrit, of selected works. Prerequisite: SANS 0400.

**SANS 1910. Advanced Sanskrit.**

In-depth study of major poetic, dramatic, epic, philosophical, religious, grammatical, medical, or astronomical texts. Topics depend on the interest of students.

**SANS 1970. Independent Study - Special Topics.****SANS 1990. Conference: Especially for Honors Students.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor's permission required.

**SANS 2100. Theme, Language, and Meter in the Mahābhārata.**

This seminar will undertake systematic studies of thematic, linguistic, and metric continua in the text of the written Sanskrit Mahābhārata. We shall alternate between the discussion of important scholarly works of interpretation of the epic, important methodological controversies, and selected case studies focused upon variations in epic language and meter and the tracing of the 'threads' of important epic themes across large stretches of the epic. Prerequisite: three or more years study of Sanskrit. Instructor permission required.

**SANS 2970. Sanskrit Preliminary Exam Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**SANS 2980. Sanskrit Reading and Research.**

Section numbers will vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

## Cognitive, Linguistic and Psychological Sciences

### Chair

Rebecca D. Burwell

The Department of Cognitive, Linguistic & Psychological Sciences is dedicated to the multidisciplinary study of mind, brain, behavior, and language, and was formed through the merger of the Department of Cognitive and Linguistic Sciences and the Department of Psychology. Both departments have had a long and distinguished history at Brown: the Department of Psychology was created in 1892, and the Department of Cognitive and Linguistic Sciences was created in 1986 by merging the Department of Linguistics with the faculty participating in the Center for Cognitive Science. The two departments have typically taken complementary approaches to common scientific questions. State-of-the-art research on these problems requires spanning several levels of analysis using a range of approaches and methodologies, and the integration of the departments aims to create an environment in which this intellectual synthesis will flourish.

For additional information, please visit the department's website: <http://www.brown.edu/Departments/CLPS/>

## Cognitive Neuroscience Concentration Requirements

Cognitive neuroscience is the study of higher cognitive functions in humans and their underlying neural bases. It is an integrative area of study drawing primarily from cognitive science, psychology, neuroscience, and linguistics. There are two broad directions that can be taken in this concentration - one is behavioral/experimental and the other is computational/modeling. In both, the goal is to understand the nature of cognition from a neural perspective. The standard concentration for the Sc.B. degree requires courses on the foundations, systems level, and

integrative aspects of cognitive neuroscience as well as laboratory and elective courses that fit within a particular theme or category such as general cognition, perception, language development or computational/modeling. Concentrators must also complete a senior seminar course or an independent research course. Students may also participate in the work of the Brown Institute for Brain Science, an interdisciplinary program that unites ninety faculty from eleven departments.

## Standard Program for the AB degree (Effective Class of 2019)

The A.B. concentration requires 12 courses. The Sc.B concentration additionally requires 1 laboratory course and 4 approved science courses, totaling to a total of 17 required courses.

### Common Core

The introductory course, "CLPS 0010 Mind, Brain, and Behavior," surveys the broad territory of the scientific study of the mind, as uniquely represented by our department. The course maps the breadth of the science of the mind, focusing on fascinating questions, garnered insights, common commitments, and successful techniques and approaches. The course could be taken by students interested in the CLPS concentrations or as an introductory survey course at the beginning of one's college career. AP Psychology is not an acceptable equivalent for CLPS 0010.

Careers in Cognitive Neuroscience and related fields requires familiarity with statistics. Therefore, the Cognitive Neuroscience concentration requires a course in Quantitative Methods (CLPS 0900). CLPS 0900 is a prerequisite for most of the laboratory courses, so concentrators should plan to take this course by their fourth semester. The department does not grant concentration credit of AP Statistics, regardless of score. Students who feel that CLPS 0900 is too elementary can complete an approved alternative course (e.g., APMA 1650, CLPS 2906, PHP 1501, ECON 1629, APMA 1660).

### Foundation

To provide students with a solid foundation of knowledge in their area of concentration and to minimize redundancy, the Cognitive Neuroscience concentration requires four foundation courses in Neuroscience, Cognitive Neuroscience, Cognitive Neuropsychology, and Computational Methods.

### Electives

Each concentrator will take four additional courses that allow the student to go into depth in some of the relevant topics. Three of these courses must be 1000-level courses. Some courses designed to count as electives will often have foundation courses as prerequisites and may include laboratory courses, content courses, or seminars.

### Research Methods

Another element in the Cognitive Neuroscience concentration is a research methods course that builds on the introductory statistics course (which will be a prerequisite) but exposes students to a variety of topics in research of the mind: to empirical methods (e.g., surveys, chronometry, eye tracking, brain imaging), to common designs (e.g., factorial experimental, correlational, longitudinal), to research ethics, and to best practices of literature review. Alternatively, students may take an approved laboratory course.

### Capstone

Concentrators will additionally take either a seminar course or an independent research course to serve as their capstone experience.

### Additional requirements for Sc.B.

In line with university expectations, the Sc.B. requirements include a greater number of courses and especially science courses. The definition of "science" is flexible. A good number of these courses will be outside of CLPS, but several CLPS courses might fit into a coherent package as well.

In addition, the Sc.B. degree also requires a lab course to provide these students with in-depth exposure to research methods in a particular area of the science of the mind.

## Honors Requirement

An acceptable upper level Research Methods, for example CLPS 1900 or an acceptable Laboratory course (see below) will serve as a requirement for admission to the Honors program in Cognitive Neuroscience.

**FOR DETAILED UPDATES, PLEASE REFER TO THE COGNITIVE, LINGUISTIC, AND PSYCHOLOGICAL SCIENCES (CLPS) UNDERGRADUATE PAGE.**

## Requirements for the A.B. degree

### STANDARD PROGRAM FOR THE A.B. DEGREE

CLPS 0010	Mind, Brain and Behavior: An Interdisciplinary Approach	1
CLPS 0900	Statistical Methods	1
One approved course	in Cognitive Neuroscience, such as:	1
CLPS 0150	Behavioral Neuroscience: Introduction to Biological Psychiatry	
CLPS 0400	Cognitive Neuroscience	
CLPS 0450	Brain Damage and the Mind	
One approved course	in Neuroscience, such as:	1
NEUR 0010	The Brain: An Introduction to Neuroscience	
NEUR 1020	Principles of Neurobiology	
NEUR 1030	Neural Systems	
One approved course	in Cognitive Neuropsychology, such as:	1
CLPS 0200	Human Cognition	
CLPS 0450	Brain Damage and the Mind	
CLPS 1420	Cognitive Neuropsychology	
One approved course	in Computational Methods, such as:	1
CLPS 0950	Introduction to programming	
CLPS 1291	Computational Methods for Mind, Brain and Behavior	
CLPS 1492	Computational Cognitive Neuroscience	
CLPS 1950	Deep Learning in Brains, Minds	
CSCI 0111	Computing Foundations: Data	
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
NEUR 1440	Mechanisms and Meaning of Neural Dynamics	
NEUR 1630	Open-Source Big Data Neuroscience Lab	
NEUR 1680	Computational Neuroscience	
<b>Four Approved Electives:</b>		<b>4</b>
Any 1000-level course in CLPS or NEUR that is not being used to fulfill another requirement and fits with a unified theme is acceptable. Themes could be any of the foundation areas or some other theme that has three available 1000-level courses, for example, language, developmental or decision-making. Courses outside CLPS and NEUR may also be acceptable if they fit with the unified theme.		
<b>One Independent Study or Approved Seminar, such as:</b>		<b>1</b>
Acceptable Independent Research Courses: CLPS 1980 or NEUR 1970		
Acceptable seminars: Any 1000-level seminar in CLPS or NEUR		
<b>Research Methods:</b>		<b>1</b>
CLPS 1900	Research Methods And Design	
Acceptable Laboratory courses: Any 1000-level course in CLPS or NEUR. Laboratory courses outside of CLPS or NEUR are not acceptable		
Total Credits		12

## Requirements for the Sc.B. degree

**The Sc.B. requires all twelve of the courses required by the AB, above.** 12

Plus five additional courses as outlined, below:

<b>One Approved Laboratory Course, such as:</b>		<b>1</b>
Any 1000-level laboratory course in CLPS		
NEUR 1600	Experimental Neurobiology	
NEUR 1650	Structure of the Nervous System	
Laboratory courses outside of CLPS or NEUR are not acceptable		
<b>Four Approved Science Courses, such as:</b>		<b>4</b>
Any 1000-level course in CLPS or NEUR		
Any course that is acceptable for concentrations in APMA, BIOL, CHEM, CSCI, MATH or PHYS is acceptable as a science course		
Total Credits		17

## Cognitive Science Concentration Requirements

The field of Cognitive Science uses scientific methods of experimentation, computational modeling, and brain imaging to study mental abilities such as perception, action, memory, cognition, speech, and language, as well as the development and evolution of those processes. Students must become knowledgeable in four areas of emphasis: perception, cognition, language, and computational methods, as well as a set of methods relevant to Cognitive Science research. Students then create their own focus area of study, potentially integrating coursework from the Cognitive, Linguistic, and Psychological Sciences department with a diverse subset of fields including Computer Science, Neuroscience, Philosophy, Anthropology, Applied Math and Education. The A.B. program is primarily for students interested in studying human mental processes and acquiring a research orientation to the study of the mind. The Sc.B. program is designed for students who wish to develop a stronger background in Cognitive Science and requires students to engage in a specific research project in the focus area of their choosing. We recommend that prospective concentrators register for one of the gateway courses and at least one other core course in their first or second year.

### Concentration Requirements (Effective, Class of 2019)

The A.B. concentration requires 12 courses. The Sc.B concentration additionally requires 1 laboratory course and 4 approved science courses, totaling to a total of 17 required courses.

### Common Core

The introductory course, "CLPS 0010 Mind, Brain, and Behavior," surveys the broad territory of the scientific study of the mind, as uniquely represented by our department. The course maps the breadth of the science of the mind, focusing on fascinating questions, garnered insights, common commitments, and successful techniques and approaches. The course could be taken by students interested in the CLPS concentrations or as an introduction at the beginning of one's college career or as an integration after having completed a number of specialized courses in a particular concentration.

Careers in Cognitive Science and related fields requires familiarity with statistics. Therefore, the Cognitive Science concentration requires a course in Quantitative Methods (CLPS 0900). CLPS 0900 is a prerequisite for most of the laboratory courses, so concentrators should plan to take this course by their fourth semester. The department does not grant concentration credit of AP Statistics, regardless of score. Students who feel that CLPS 0900 is too elementary can complete an approved alternative course (e.g., APMA 1650, CLPS 2906).

## Foundation

To provide students with a solid foundation of knowledge in their area of concentration and to minimize redundancy, the Cognitive Science concentration requires four foundation courses in Human Cognition, Perception, Language, and Computational Methods.

## Electives

Each concentrator will take four additional courses that allow the student to go into depth in some of the relevant topics. These electives must include at least two courses in one of the four foundation topics (i.e., Human Cognition, Perception, Language, and Computational Methods).

The courses designed to count as electives will often have foundation courses as prerequisites and may include laboratory courses, content courses, or seminars.

## Research Methods and Capstone

Another element in the Cognitive Science concentration is a research methods course that builds on the introductory statistics course (which will be a prerequisite) but exposes students to a variety of topics in research of the mind: to empirical methods (e.g., surveys, chronometry, eye tracking, brain imaging), to common designs (e.g., factorial experimental, correlational, longitudinal), to research ethics, and to best practices of literature review. Concentrators will additionally take either a seminar course or an independent research course to serve as their capstone experience.

## Additional requirements for Sc.B.

In line with university expectations, the Sc.B. requirements include a greater number of courses and especially science courses. The definition of "science" is flexible. A good number of these courses will be outside of CLPS, but several CLPS courses might fit into a coherent package as well.

In addition, the Sc.B. degree also requires a lab course to provide these students with in-depth exposure to research methods in a particular area of the science of the mind.

## Honors Requirement

The Honors Program in Cognitive Science gives undergraduates a special opportunity to carry out a research project under the direction of a faculty member. The program also provides the opportunity for outstanding senior concentrators to receive their undergraduate degree with Honors. Participation in the program allows students to develop an understanding of research and acquire research skills and background.

Candidates for Honors in Cognitive Science must meet all of the requirements of the concentration as described above. Candidates submit their application for the program in semester 7. We encourage students to seek out a faculty mentor prior to semester 7 as well as complete certain course requirements before semester 7. Normally a 3.5 grade-point average in the concentration is required for admission to the Honors program. Please refer to the CLPS Honors Program page for specific requirements for the honors program in Cognitive Science.

**FOR DETAILED UPDATES, PLEASE REFER TO THE COGNITIVE, LINGUISTIC, AND PSYCHOLOGICAL SCIENCES (CLPS) UNDERGRADUATE PAGE.**

## Requirements for the A.B. degree

### STANDARD PROGRAM FOR THE A.B. DEGREE

Two Common Core Courses		
CLPS 0010	Mind, Brain and Behavior: An Interdisciplinary Approach	1
CLPS 0900	Statistical Methods	1
Four Approved Foundation Courses <sup>1</sup>		
One approved course in Human Cognition, such as:		1
CLPS 0200	Human Cognition	
CLPS 0220	Making Decisions	
One approved course in Perception:		1
CLPS 0500	Perception and Mind	

One approved course in Language, such as:		1
CLPS 0800	Language and the Mind	
CLPS 0300	Introduction to Linguistics	
One approved course in Computational Methods, such as:		1
CLPS 0950	Introduction to programming	
CLPS 1291	Computational Methods for Mind, Brain and Behavior	
Four Approved Electives related to Cognitive Science, such as: <sup>2</sup>		4
APMA 1690	Computational Probability and Statistics	
BIOL 0480	Evolutionary Biology	
CLPS 1100	Animal Cognition	
CLPS 1210	Human Memory and Learning	
CLPS 1470	Mechanisms of Motivated Decision Making	
CLPS 1500	Perception and Action	
CLPS 1610	Cognitive Development	
CLPS 1800	Language Processing	
CSCI 1010	Theory of Computation	
CSCI 1480	Building Intelligent Robots	
ENGN 1580	Communication Systems	
PHIL 1770	Philosophy of Mind	
One Independent Study or Approved Seminar, such as: <sup>3</sup>		1
CLPS 1400	The Neural Bases of Cognition	
CLPS 1480B	Cognitive Aging and Dementia	
CLPS 1480C	Cognitive Control Functions of the Prefrontal Cortex	
CLPS 1495	Affective Neuroscience	
CLPS 1560	Visually-Guided Action and Cognitive Processes	
One Research Methods Course		1
CLPS 1900	Research Methods And Design	
Total Credits		12

## Requirements for the Sc.B. degree

### STANDARD PROGRAM FOR THE Sc.B. DEGREE

Two Common Core Courses		
CLPS 0010	Mind, Brain and Behavior: An Interdisciplinary Approach	1
CLPS 0900	Statistical Methods	1
Four Approved Foundation Courses <sup>1</sup>		
One approved course in Human Cognition, such as:		1
CLPS 0200	Human Cognition	
CLPS 0220	Making Decisions	
One approved course in Perception		1
CLPS 0500	Perception and Mind	
One approved course in Language, such as:		1
CLPS 0300	Introduction to Linguistics	
CLPS 0800	Language and the Mind	
One approved course in Computational Methods, such as:		1
CLPS 0950	Introduction to programming	
CLPS 1291	Computational Methods for Mind, Brain and Behavior	
Four Approved Electives, such as: <sup>2</sup>		4
APMA 1690	Computational Probability and Statistics	
BIOL 0480	Evolutionary Biology	
CLPS 1100	Animal Cognition	
CLPS 1210	Human Memory and Learning	
CLPS 1470	Mechanisms of Motivated Decision Making	
CLPS 1500	Perception and Action	

CLPS 1610	Cognitive Development	
CLPS 1800	Language Processing	
CSCI 1010	Theory of Computation	
CSCI 1480	Building Intelligent Robots	
ENGN 1580	Communication Systems	
PHIL 1770	Philosophy of Mind	
One Independent Study or Approved Seminar, such as: <sup>3</sup>		1
CLPS 1400	The Neural Bases of Cognition	
CLPS 1480C	Cognitive Control Functions of the Prefrontal Cortex	
CLPS 1495	Affective Neuroscience	
CLPS 1560	Visually-Guided Action and Cognitive Processes	
CLPS 1990	Senior Seminar in Cognitive Science	
One Research Methods Course		1
CLPS 1900	Research Methods And Design	
One Approved Laboratory Course, such as: <sup>4</sup>		1
CLPS 1192	Experimental Analysis of Animal Behavior and Cognition	
CLPS 1193	Laboratory in Genes and Behavior	
CLPS 1492	Computational Cognitive Neuroscience	
CLPS 1510	Auditory Perception Laboratory	
CLPS 1590	Visualizing Vision	
CLPS 1791	Laboratory in Social Cognition	
CLPS 1890	Laboratory in Psycholinguistics	
Four Approved Science Courses, such as: <sup>5</sup>		4
BIOL 0200	The Foundation of Living Systems	
BIOL 0800	Principles of Physiology	
CHEM 0350	Organic Chemistry	
CSCI 1430	Computer Vision	
CSCI 1950F	Introduction to Machine Learning	
ENGN 1220	Neuroengineering	
MATH 0100	Introductory Calculus, Part II	
NEUR 1030	Neural Systems	
NEUR 1040	Introduction to Neurogenetics	
PHYS 0030	Basic Physics A	
Total Credits		17

<sup>1</sup> See the current list of approved [Foundation courses](#) on CLPS Cognitive Neuroscience page.

<sup>2</sup> See the current list of approved [Electives](#) on CLPS Cognitive Neuroscience page.

## Linguistics Concentration Requirements

Language is a uniquely human capacity that enables us to communicate a limitless set of messages on any topic. While human languages can differ greatly in certain respects, all are intricate, complex, rule-governed systems. Linguistics is the scientific study of these systems, their use in communicative and other social settings, and their cognitive and neural underpinnings. The linguistics concentration at Brown gives students a background in the “core” aspects of the language system: phonetics/phonology (the study of speech sounds and their patterning), syntax (the study of combinatorics of words, phrases, and sentences), and semantics/pragmatics (the study of the meanings of words, sentences, and conversation). Beyond this, students may focus more heavily in one or more of these areas and/or explore related questions such as how children and adults learn language (language

acquisition), how utterances are produced and understood in real time (psycholinguistics), or how speaking and understanding are anchored in underlying neural systems (neurolinguistics). Other areas such as historical linguistics, sociolinguistics, philosophy of language, and linguistic anthropology can also be pursued in conjunction with offerings in other departments.

Students who wish to pursue one or more aspects of Linguistics in greater depth than does the Bachelor of Arts, and to focus on some of the more technical, computational, and/or experimental areas of the field may choose to take a Bachelor of Science in Linguistics. Students will choose a focus pathway which will direct their choices. Pathways include: Language, Computation, and Information; Language, Mind, and Brain; Meaning and Logic, or one of the student's design, with approval from the concentration advisor.

## A.B. Requirements (10 courses)

<b>Prerequisite Course</b>		1
CLPS 0300	Introduction to Linguistics (May be waived in special instances)	
<b>Required Courses</b>		2
CLPS 1310	Phonology <sup>1</sup>	
and either		
CLPS 1330	Introduction to Syntax <sup>1</sup>	
OR		
CLPS 1331	Linguistic Typology	
AND one of:		1
CLPS 1341	Lexical Semantics	
CLPS 1342	Compositional Semantics	
CLPS 1370	Pragmatics	
One course in Psycholinguistics to be drawn from the following:		1
CLPS 0800	Language and the Mind	
CLPS 1650	Child Language Acquisition	
CLPS 1800	Language Processing	
CLPS 1820	Language and the Brain	
CLPS 1821	Neuroimaging and Language	
CLPS 1890	Laboratory in Psycholinguistics	
or any Topics Course in Language Acquisition or Language Processing		

5 additional appropriate electives forming a thematically related set to be determined in consultation with the Concentration Advisor. At least one of these must be drawn from the list of advanced courses listed below, and we strongly recommend that at least one course be an appropriate methods and a topics course. No more than 2 of these courses may be drawn from below 1000 level courses. The electives can be drawn from any of the above courses, or any of the other linguistic/language related courses in the CLPS department. Electives may also be drawn from courses in other in consultation with the Concentration Advisor; a list of courses which standardly count towards the Linguistics Concentration (provided they form part of the thematically related set) is appended below.

<b>Advanced Courses</b>		
CLPS 1320	The Production, Perception, and Analysis of Speech	
CLPS 1332	Issues in Syntactic Theory	
CLPS 1342	Compositional Semantics	
CLPS 1360	Introduction to Corpus Linguistics	
A course from the 1381 series (Topics in Phonetic & Phonology)		
A course from the 1383 series (Topics in Syntax and Semantics). For example:		
CLPS 1383D	Topics in Syntax and Semantics	
A course from the 1385 series (Topics in Language Acquisition)		

A course from the 1387 series (Topics in Neurolinguistics)

A course from the 1389 series (Topics in Language Processing)

CLPS 1390 Linguistic Field Methods

CLPS 1821 Neuroimaging and Language

CLPS 1880 series (Topics in Psycholinguistics)

CLPS 1890 Laboratory in Psycholinguistics

### Other Courses Routinely Fulfilling Linguistics Concentration Requirements (in consultation with the Concentration Advisor):

NOTE: This is NOT an exhaustive list of courses that can be applied towards the Linguistics Concentration requirements.

ANTH 0800 Sound and Symbols: Introduction to Linguistic Anthropology

ANTH 1800 Sociolinguistics, Discourse and Dialogue

CLPS 0050M Playing with Words: The Linguistic Principles Behind Word Games and Puzzles

CLPS 1365 Historical Linguistics

CSCI 1460 Computational Linguistics

EAST 1510 Chinese: A History of the Language

EGYT 2310 History of the Ancient Egyptian Language

SLAV 1300 Sociolinguistics (with Case Studies on the Former USSR and Eastern Europe)

PHIL 0540 Logic

PHIL 1760 Philosophy of Language

Total Credits 10

<sup>1</sup> It is recommended that students take CLPS 1310 and CLPS 1330 before higher level courses.

### Honors (12 courses)

Candidates for Honors in Linguistics must meet all of the requirements above, write an Honors thesis, and take two additional courses. One course is normally CLPS 1980 (Directed Research in Cognitive, Linguistic, and Psychological Sciences) - intended for work on the Honors thesis.

Three of the total 12 courses must be drawn from the advanced list above (the Directed Research course counts as one of the advanced courses).

Normally a 3.5 grade-point average in the concentration is required for admission to the Honors program. Honors candidates should formalize their projects in consultation with their advisors by the end of September 6.

Refer to the CLPS Honors Program page for detailed information about the Linguistics Honors program.

### Independent Study

Independent study is encouraged for the A.B. degree. Students should sign up for CLPS 1980 with a faculty advisor who is a member of the Department of Cognitive and Linguistic Sciences (CLPS). Arrangements should be made in Semester 6 for students expecting to do independent study during Semesters 7 and/or 8.

### Do Foreign Language Courses Count?

Foreign language courses will generally not count towards the concentration requirements, except those that focus on the structure or history of the language. Students are, however, advised to gain familiarity with a foreign language, and are encouraged to take at least one course which deals with the structure of a language other than English.

### ScB Requirements (16 courses)

Students who wish to pursue one or more aspects of Linguistics in greater depth than does the A.B., and to focus on some of the more technical, computational, and/or experimental areas of the field may choose to take an Sc.B in Linguistics. Students will choose a focus pathway which will direct their choices. Three possible pathways are described below in additional detail, though other pathways are possible, if approved by the concentration advisor. The core requirements are:

- One gateway course
- Four breadth requirements, one each in Phonology, Syntax, Semantics or Pragmatics, and Psycholinguistics.
- Three electives in the focus area (see individual pathways below)
- Four non-linguistic focus area electives (see individual pathways below)
- Two breadth requirements that satisfy the Linguistics AB requirement. These could serve as a secondary focus area.
- One additional linguistics course, either as additional breadth or in the focus area
- One Capstone course

### Language, Computation, and Information Pathway

<b>Gateway course</b>	1
CLPS 0300 Introduction to Linguistics	
<b>At least one course in phonetics / phonology, such as:</b>	1
CLPS 1310 Phonology	
<b>At least one course in syntax, such as:</b>	1
CLPS 1330 Introduction to Syntax	
CLPS 1331 Linguistic Variation and Universals	
<b>At least one course in semantics / pragmatics, such as:</b>	1
CLPS 1341 Lexical Semantics	
CLPS 1342 Compositional Semantics	
CLPS 1370 Pragmatics	
<b>At least one course in psycholinguistics, such as:</b>	1
CLPS 0800 Language and the Mind	
CLPS 1650 Child Language Acquisition	
CLPS 1800 Language Processing	
CLPS 1890 Laboratory in Psycholinguistics	
<b>Three electives specifically in the focus area, such as:</b>	3
CLPS 1360 Introduction to Corpus Linguistics	
CLPS 1361 Information Theory in Language	
CLPS 1800 Language Processing	
CLPS 1850 Language Processing in Humans and Machines	
CSCI 0220 Introduction to Discrete Structures and Probability	
CSCI 1460 Computational Linguistics	
<b>Four non-linguistic focus area electives, such as:</b>	4
CLPS 0950 Introduction to programming	
CLPS 2908 Multivariate Statistical Techniques	
APMA 1650 Statistical Inference I	
CSCI 0220 Introduction to Discrete Structures and Probability	
CSCI 1410 Artificial Intelligence	
CSCI 1420 Machine Learning	
CSCI 1951A Data Science	
PHP 1560 Statistical Programming in R	
MATH 0520 Linear Algebra	
<b>Two additional courses outside the main focus that satisfy the Linguistics AB requirement, such as:</b>	2
CLPS 1390 Linguistic Field Methods	
CLPS 1331 Linguistic Variation and Universals	
ANTH 1800 Sociolinguistics, Discourse and Dialogue	
SLAV 1300 Sociolinguistics (with Case Studies on the Former USSR and Eastern Europe)	
Or many others (see Linguistics AB for examples)	
<b>One additional class in linguistics (related or unrelated to the focus area), such as:</b>	1
CLPS 1342 Compositional Semantics	
CLPS 1850 Language Processing in Humans and Machines	

<b>One independent study / capstone requirement</b>	1
CLPS 1970 Directed Reading in Cognitive, Linguistic and Psychological Sciences	
CLPS 1980 Directed Research in Cognitive, Linguistic and Psychological Sciences	

Total Credits 16

### Language, Mind and Brain Pathway

<b>Gateway course</b>	1
CLPS 0300 Introduction to Linguistics	

<b>At least one course in phonetics / phonology, such as:</b>	1
CLPS 1310 Phonology	

<b>At least one course in syntax, such as:</b>	1
CLPS 1330 Introduction to Syntax	
CLPS 1331 Linguistic Variation and Universals	

<b>At least one course in semantics / pragmatics, such as:</b>	1
CLPS 1341 Lexical Semantics	
CLPS 1342 Compositional Semantics	
CLPS 1370 Pragmatics	

<b>At least one course in psycholinguistics, such as:</b>	1
CLPS 0800 Language and the Mind	
CLPS 1650 Child Language Acquisition	
CLPS 1800 Language Processing	
CLPS 1890 Laboratory in Psycholinguistics	

<b>Three electives specifically in the focus area, such as:</b>	3
CLPS 0800 Language and the Mind	
CLPS 1331 Linguistic Variation and Universals	
CLPS 1650 Child Language Acquisition	
CLPS 1385 Topics in Language Acquisition: Language Acquisition and Cognitive Development	

CLPS 1800 Language Processing	
CLPS 1890 Laboratory in Psycholinguistics	
CLPS 1850 Language Processing in Humans and Machines	

### Four non-linguistic focus area electives, such as:

CLPS 0200 Human Cognition	
CLPS 0400 Cognitive Neuroscience	
CLPS 0610 Children's Thinking: The Nature of Cognitive Development	
CLPS 0900 Statistical Methods	
CLPS 1420 Cognitive Neuropsychology	
CLPS 1492 Computational Cognitive Neuroscience	
CLPS 1610 Cognitive Development	
CLPS 1620 Developmental Cognitive Neuroscience	
CLPS 1900 Research Methods And Design	
EDUC 1860 Social Context of Learning and Development	
NEUR 0650 Biology of Hearing	
NEUR 0680 Introduction to Computational Neuroscience	
NEUR 1030 Neural Systems	
PHIL 1770 Philosophy of Mind	

### Two additional courses outside the main focus that satisfy the Linguistics AB requirement, such as:

CLPS 1390 Linguistic Field Methods	
CLPS 1331 Linguistic Variation and Universals	
ANTH 1800 Sociolinguistics, Discourse and Dialogue	
SLAV 1300 Sociolinguistics (with Case Studies on the Former USSR and Eastern Europe)	

Or many others (see Linguistics AB for examples)

### One additional class in linguistics (related or unrelated to the focus area), such as:

CLPS 1342 Compositional Semantics	
CLPS 1360 Introduction to Corpus Linguistics	

### One independent study / capstone requirement

CLPS 1970 Directed Reading in Cognitive, Linguistic and Psychological Sciences	
CLPS 1980 Directed Research in Cognitive, Linguistic and Psychological Sciences	

Total Credits 16

### Meaning and Logic Pathway

<b>Gateway course</b>	1
CLPS 0300 Introduction to Linguistics	

<b>At least one course in phonetics / phonology, such as:</b>	1
CLPS 1310 Phonology	

<b>At least one course in syntax, such as:</b>	1
CLPS 1330 Introduction to Syntax	
CLPS 1331 Linguistic Variation and Universals	

<b>At least one course in semantics / pragmatics, such as:</b>	1
CLPS 1341 Lexical Semantics	
CLPS 1342 Compositional Semantics	
CLPS 1370 Pragmatics	

<b>At least one course in psycholinguistics, such as:</b>	1
CLPS 0800 Language and the Mind	
CLPS 1650 Child Language Acquisition	
CLPS 1800 Language Processing	
CLPS 1890 Laboratory in Psycholinguistics	

<b>Three electives specifically in the focus area, such as:</b>	3
CLPS 1331 Linguistic Variation and Universals	
CLPS 1341 Lexical Semantics	
CLPS 1342 Compositional Semantics	
CLPS 1370 Pragmatics	
CLPS 1380 Laboratory in Phonetics	

CLPS 1880F Logic in Language and Thought	
PHIL 0990X Conditionals	
PHIL 1760 Philosophy of Language	

### Four non-linguistic focus area electives, such as:

MATH 0750 Introduction to Higher Mathematics	
CSCI 0220 Introduction to Discrete Structures and Probability	
PHIL 0990T Paradox and Infinity	
PHIL 1630 Mathematical Logic	
PHIL 1830 Twentieth-Century Analytic Philosophy	
PHIL 1870 Theories of Truth	
PHIL 1880 Advanced Deductive Logic	
CLPS 0200 Human Cognition	
CLPS 0610 Children's Thinking: The Nature of Cognitive Development	
CLPS 0700 Social Psychology	

### Two additional courses outside the main focus that satisfy the Linguistics AB requirement, such as:

CLPS 1390 Linguistic Field Methods	
CLPS 1331 Linguistic Variation and Universals	
ANTH 1800 Sociolinguistics, Discourse and Dialogue	
SLAV 1300 Sociolinguistics (with Case Studies on the Former USSR and Eastern Europe)	

Or many others (see Linguistics AB for examples)

### One additional class in linguistics (related or unrelated to the focus area), such as:

CLPS 1361	Information Theory in Language	
CLPS 1800	Language Processing	
CLSP 1850	Language Processing in Humans and Machines	
<b>One independent study / capstone requirement</b>		<b>1</b>
CLPS 1970	Directed Reading in Cognitive, Linguistic and Psychological Sciences	
CLPS 1980	Directed Research in Cognitive, Linguistic and Psychological Sciences	
Total Credits		16

### Honors (17 courses)

The Honors program requires one additional elective, which will typically be a second CLPS 1980 Directed Research course during the senior year (thus leading to a full year of Directed Reading or Directed Research). Admission to the honors program requires a majority of A grades in the concentration. The student's work will culminate in an Honors' thesis on an approved topic (see Departmental regulations regarding Honors' theses, which can be found at <https://www.brown.edu/academics/cognitive-linguistic-psychological-sciences/honors>) written under the direction of one or more faculty members, and read by a committee of at least two faculty members (one of whom may be from another department).

**NOTE: Please refer to the Cognitive, Linguistic, and Psychological Sciences undergraduate Linguistics concentration page for updates not listed here.**

## Psychology Concentration Requirements

Psychology encompasses a range of phenomena and levels of analysis in pursuit of three goals: to deepen understanding of cognitive and neural mechanisms of sensation, perception, learning, and emotion; to probe the biological and evolutionary foundations of behavior; and to clarify the social perception and assessment of individuals and groups. Students pursuing the Bachelor of Arts or Bachelor of Science take foundation courses in the field's major sub-disciplines, including perception, cognition, developmental, behavioral neuroscience, and social psychology. Students also take a course in quantitative methods, and select from an array of seminars on specialized topics and laboratory courses that focus on research design and state-of-the-art techniques. Students pursuing a Bachelor of Science must complete both a research methods and a laboratory course and four additional science courses related to the same intellectual theme as the elective courses. The concentration in Psychology prepares students for careers in research, teaching, clinical psychology, business, law, and education, among others.

The A.B. concentration requires 12 courses. The Sc.B. concentration additionally requires 1 laboratory course and 4 approved science courses, totaling to 17 required courses.

### Common Core

The introductory course, "CLPS 0010 Mind, Brain, and Behavior," surveys the broad territory of the scientific study of the mind as uniquely represented by our department. The territory includes neural processes, perception, learning, memory, emotion, language, social development, social judgment, personality, and mental illness. The course could be taken by students interested in the CLPS concentrations, as an introduction at the beginning of one's college career or as an integration after having completed a number of specialized courses in a particular concentration. AP or IB Psychology credit cannot be used as a substitute for CLPS 0010.

Careers in Psychology and related fields requires familiarity with statistics. Therefore, the Psychology concentration requires a course in Quantitative Methods (CLPS 0900). CLPS 0900 is a prerequisite for most of the laboratory courses, so concentrators should plan to take this course by their fourth semester. Students may substitute APMA 1660, PHP 1501, or SOC 1100 with the approval of a concentration advisor. The department does not grant concentration credit for AP Statistics, regardless of score.

Another element in the Psychology concentration is a course on research methods. Research Methods and Design (CLPS 1900 or CLPS 1901)

is the preferred course for fulfilling this requirement. This course builds on the introductory statistics course and exposes students to a variety of topics in the psychological sciences: to empirical methods (e.g., surveys, chronometry, eye tracking, brain imaging), to common designs (e.g., factorial experimental, correlational, longitudinal), to research ethics, and to best practices of literature review. CLPS 1900/CLPS 1901 (or an approved alternative laboratory course; consult with the Psychology advisors for details) should be taken before the senior year.

### Foundation

To provide students with a solid foundation of knowledge in their area of concentration, the Psychology concentration requires four foundation courses. Students select one course from each of the following areas: Social/Personality, Perception/Cognition, Development, and Learning/Animal Behavior/Behavioral Neuroscience.

### Electives

Concentrators will select four additional courses that examine in greater depth topics of special interest to them. The CLPS courses designed to count as electives will often have foundation courses as prerequisites and may include laboratory courses, or seminars. Students may choose up to two courses outside of CLPS as electives. Electives should fit into a coherent intellectual theme, and should be chosen in consultation with your Psychology advisor.

### Capstone

Concentrators will additionally take either a seminar course or an independent research course (CLPS 1970, 1980) to serve as their capstone experience. See the Psychology advisors for a list of approved seminars.

### Additional requirements for Sc.B.

In line with university expectations, the Sc.B. requirements include a greater number of courses and especially science courses. The definition of "science" is flexible. Some of these courses will be outside of CLPS, but several CLPS courses might fit into a coherent package as well. In addition, the Sc.B. degree also requires a laboratory course (in addition to CLPS 1900/CLPS 1901 or its alternative) to provide these students with in-depth exposure to research methods in a particular area of the science of the mind. Lists of approved laboratory courses can be obtained from the Psychology advisors.

### Honors Requirement

The Honors Program in Psychology gives undergraduates a special opportunity to carry out a research project under the direction of a faculty member. The program also provides the opportunity for outstanding senior concentrators to receive their undergraduate degree with Honors. Participation in the program allows students to develop an understanding of research and acquire research skills and background.

Candidates for Honors in Psychology must meet all of the requirements of the concentration as described above. Candidates submit their application for the program in semester 7. We encourage students to seek out a faculty mentor prior to semester 7 as well as complete certain course requirements before semester 7. This includes completion of the statistics and laboratory requirements. A 3.5 grade-point average in the concentration is required for admission to the Honors program. Please refer to the CLPS Honors Program page for detailed information about the specific requirements for the Honors program in Psychology.

**FOR DETAILED UPDATES, PLEASE REFER TO THE COGNITIVE, LINGUISTIC, AND PSYCHOLOGICAL SCIENCES (CLPS) UNDERGRADUATE PAGE.**

### Requirements for the A.B. degree

#### STANDARD PROGRAM FOR THE A.B. DEGREE <sup>1</sup>

Common Core:		
CLPS 0010	Mind, Brain and Behavior: An Interdisciplinary Approach	1
CLPS 0900	Statistical Methods	1
CLPS 1900	Research Methods And Design ((or approved alternative))	1

or CLPS 1901	Research Methods	
One approved course in Social/Personality:		1
CLPS 0700	Social Psychology	
CLPS 0701	Personality	
CLPS 0710	The Psychology and Philosophy of Happiness	
One approved course in Perception/Cognition:		1
CLPS 0200	Human Cognition	
CLPS 0450	Brain Damage and the Mind	
CLPS 0500	Perception and Mind	
One approved course in Development:		1
CLPS 0600	Developmental Psychology	
CLPS 0610	Children's Thinking: The Nature of Cognitive Development	
CLPS 0620	Social and Moral Development	
One approved course in Learning/Animal Behavior/Behavioral Neuroscience:		1
CLPS 0100	Learning and Conditioning	
CLPS 0110	Animal Behavior	
CLPS 0150	Behavioral Neuroscience: Introduction to Biological Psychiatry	
Four approved Electives related to Psychology		4
Independent Study (CLPS 1970, CLPS 1980) or approved seminar		1
<b>Total Credits</b>		<b>12</b>

## Requirements Specific for the Sc.B. degree

### STANDARD PROGRAM FOR THE Sc.B. DEGREE <sup>1</sup>

Common Core:		
CLPS 0010	Mind, Brain and Behavior: An Interdisciplinary Approach	1
CLPS 0900	Statistical Methods	1
CLPS 1900	Research Methods And Design ((or approved alternative))	1
or CLPS 1901	Research Methods	
One approved course in Social/Personality:		1
CLPS 0700	Social Psychology	
CLPS 0701	Personality	
CLPS 0710	The Psychology and Philosophy of Happiness	
One approved course in Perception/Cognition:		1
CLPS 0200	Human Cognition	
CLPS 0450	Brain Damage and the Mind	
CLPS 0500	Perception and Mind	
One approved course in Development:		1
CLPS 0600	Developmental Psychology	
CLPS 0610	Children's Thinking: The Nature of Cognitive Development	
CLPS 0620	Social and Moral Development	
One approved course in Learning/Animal Behavior/Behavioral Neuroscience:		1
CLPS 0100	Learning and Conditioning	
CLPS 0110	Animal Behavior	
CLPS 0150	Behavioral Neuroscience: Introduction to Biological Psychiatry	
One additional Laboratory course		1
Four approved Electives related to Psychology		4
Independent Study (CLPS 1970 or CLPS 1980) or approved seminar		1

Four Science courses	4
<b>Total Credits</b>	<b>17</b>

<sup>1</sup> For the current list of approved courses in all categories, see the CLPS Psychology page.

## Behavioral Decision Sciences Concentration Requirements

Leading to a Bachelor of Arts, the study of decision making at Brown covers descriptive questions like how people, institutions, and nations make judgments and decisions; normative questions about rationality, such as what constitutes the best judgments and decisions; and prescriptive questions, such as how the process of decision making can be improved to make actual decisions closer to optimal ones. By virtue of its broad interdisciplinary nature, the study of decision making covers work found in a variety of more traditional disciplines including psychology, cognitive science, economics, philosophy, computer science, and neuroscience. Professor Steven Sloman (steven\_sloman@brown.edu?subject=Behavioral Decision Sciences) is the concentration advisor. (David Yokum (david\_yokum@brown.edu?subject=concentration) will be acting concentration advisor from January 2020 to December 2020). Upon declaring, concentrators are also encouraged to speak with the appropriate area specialist from among those listed here (<https://www.brown.edu/academics/cognitive-linguistic-psychological-sciences/behavioral-decision-sciences>).

## Standard Program for the AB Degree

### CLPS Classes:

CLPS 0220	Making Decisions	1
Choose one of the following:		1
CLPS 0400	Cognitive Neuroscience	
CLPS 0200	Human Cognition	
CLPS 0700	Social Psychology	
Choose two of the following:		2
CLPS 1470	Mechanisms of Motivated Decision Making	
CLPS 1495	Affective Neuroscience	
CLPS 1730	Psychology in Business and Economics	
CLPS 1760	The Moral Brain	
CLPS 0710	The Psychology and Philosophy of Happiness	

### Distribution Requirements:

Select one Introductory Course from the following:		1
ECON 0110	Principles of Economics	
CSCI 0040	Introduction to Scientific Computing and Problem Solving <sup>1</sup>	
or CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
or CSCI 0170	Computer Science: An Integrated Introduction	
or CSCI 0180	Computer Science: An Integrated Introduction	
or CSCI 0190	Accelerated Introduction to Computer Science	
Select Two Advanced Courses From:		2
