CSCI 1410	Artificial Intelligence	
CSCI 1420	Machine Learning	
ECON 1110	Intermediate Microeconomics	
or ECON 1130	Intermediate Microeconomics (Mathematical)	
ECON 1660	Big Data	
ECON 1820	Theory of Behavioral Economics	
ECON 1870	Game Theory and Applications to Economics	
PHIL 1550	Decision Theory: Foundations and Applications	

### Methods Classes:

Choose One From the Following:	1
APMA 0650	Essential Statistics
APMA 1650	Statistical Inference I
CLPS 0900	Statistical Methods
CSCI 0100	Data Fluency for All
CSCI 1450	Probability for Computing and Data Analysis
ECON 1620	Introduction to Econometrics
Plus One of the Following:	1
CLPS 1791	Laboratory in Social Cognition
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science <sup>1</sup>
CSCI 0170	Computer Science: An Integrated Introduction
ECON 1629	Applied Research Methods for Economists
ECON 1630	Mathematical Econometrics I
PHIL 0540	Logic
<b>Electives:</b>	3
Students will choose three additional courses in consultation with a concentration advisor that will constitute an integrated specialization in some area of decision science. Any advanced course taught at Brown is eligible. Such courses might include, but are not limited to:	
<b>Psychology and Cognitive Science</b>	
CLPS 0950	Introduction to programming
CLPS 1292	Introduction to Programming for the Mind, Brain and Behavior
CLPS 1370	Pragmatics
CLPS 1970	Directed Reading in Cognitive, Linguistic and Psychological Sciences
<b>Economics:</b>	
ECON 1820	Theory of Behavioral Economics
ECON 1870	Game Theory and Applications to Economics
<b>Applied Mathematics:</b>	
APMA 0200	Introduction to Modelling
APMA 1690	Computational Probability and Statistics
APMA 2640	Theory of Probability II
APMA 2821V	Neural Dynamics: Theory and Modeling
<b>Philosophy:</b>	
PHIL 0500	Moral Philosophy
PHIL 1650	Moral Theories
PHIL 1750	Epistemology
<b>Computer Science:</b>	
CSCI 1430	Computer Vision
CSCI 1460	Computational Linguistics
CSCI 1951A	Data Science
<b>Political Science:</b>	
POLS 1090	Polarized Politics
POLS 1150	Prosperity: The Ethics and Economics of Wealth Creation
POLS 1470	International Negotiation and Conflict Resolution
<b>Public Health:</b>	
PHP 1740	Principles of Health Behavior and Health Promotion Interventions
<b>Capstone:</b>	1
Fall seminar in which students write an integrative paper or do a project covering their areas of study in their senior year.	
<b>Total Credits</b>	<b>13</b>

<sup>1</sup> Students may not use the same course to satisfy both the Introductory and Methods course requirements.

Students will be expected to take no more than 6 courses below the 1000-level within the concentration. Students with multiple concentrations may not apply more than 2 courses from a second concentration to the AB in Behavioral Decision Sciences. No more than 2 courses can be transferred from another institution to count toward concentration credit.

## Honors

The Honors Program in BDS gives undergraduates a special opportunity to carry out a research project under the direction of a faculty member that they have developed a relationship with. The program also provides the opportunity for senior concentrators to receive their undergraduate degree with Honors. Participation in the program allows students to develop an understanding of research and acquire research skills and background.

Candidates for Honors in BDS must meet all of the requirements of the BDS concentration as described above. Candidates submit their application for the program at the beginning of semester 7. We encourage students to seek out a faculty mentor prior to semester 7 and to complete their methods courses and two of their three electives before semester 7. Please refer to the CLPS Honors Program page for detailed information about the specific requirements for the Honors Program in BDS.

## Cognitive, Linguistic and Psychological Sciences Graduate Program

The department of Cognitive, Linguistic, and Psychological Sciences is a unique multidisciplinary department that offers Doctor of Philosophy (Ph.D.) degrees in three fields: Cognitive Science, Linguistics, and Psychology.

While the department offers transitional Master's degrees en route to the Ph.D., it does not accept applicants into non-Ph.D. programs.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/cognitive-linguistic-and-psychological-sciences>

## Cogut Institute for the Humanities

### Director

Amanda S. Anderson

Brown University has long played a distinctive role advancing innovation and excellence in the humanities. The humanities speak to some of our most basic human activities — creative expression, interpretation, and critical reflection — and participate in the effort to address the most vital challenges of our time. The humanities at Brown today encompass specific disciplines such as history of art and architecture, languages, literature, music, philosophy, religious studies, and visual art. They also include the interpretive dimensions of social sciences such as anthropology, history, and political science, and interdisciplinary initiatives such as gender and sexuality studies, media studies, and the study of race and ethnicity.

Named for Craig M. Cogut '75 and Deborah Cogut in recognition of their generous support, the Cogut Institute for the Humanities was launched in the fall of 2003 as the Brown Humanities Center to support collaborative research and curricular innovation in the humanities and across the university. A rich array of programming — conferences, lecture series, and colloquia — creates a lively space of inquiry and dialogue that draws in faculty, students, and members of the larger Providence community. The Cogut Institute is home to several Initiatives and Centers, including Economies of Aesthetics, Environmental Humanities, Humanities in the World, Political Concepts, the Center for the Study of the Early Modern World, and the French Center of Excellence.

Each year, our fellowship program brings together faculty, postdoctoral, graduate, and undergraduate scholars to explore work-in-progress in a dynamic workshop setting. The Cogut Institute administers Brown University's Humanities Initiative, which provides for annual faculty programming funds and six faculty chairs that combine scholarly, teaching,

and disciplinary distinction with collaborative projects within and beyond the humanities. Each semester, the Institute's faculty and fellows present unique courses for undergraduate and graduate credit.

As part of its Collaborative Humanities Initiative, the Institute features undergraduate collaborative humanities courses on a research theme, method, practice, or problem that has relevance across disciplines, divisions, or schools. Additionally, the Institute offers a Graduate Certificate in Collaborative Humanities available to students pursuing doctorates in the humanities and the humanistic social sciences. Collaboration is built into the teaching model as well as the requirements for students. Read more at <https://www.brown.edu/academics/humanities/collaborative-humanities>

The Center for the Study of the Early Modern World also administers an interdisciplinary undergraduate concentration. Information about the concentration may be found at <https://www.brown.edu/academics/early-modern-world/concentration>

More information about the Cogut Institute is available at <https://www.brown.edu/academics/humanities/>

## Courses

### **HMAN 0800A. The Humanities in Context: Literature, Media, Critique.**

The humanities attend to questions that shape individual and collective life. Literatures, media, music, and performing arts inform reflections on issues that are either pressing (justice, the environment) or constitutive of an experience (of art or medicine, for example). Does humanity have a shared heritage? Should we feel alike in the face of art? Does one have obligations toward strangers? Does history compel us to act a certain way? Whose responsibility is the planet? What identities can one choose? Should one aspire to posthuman life? Drawing from various disciplines, this seminar pursues not one, but multiple takes on these questions.

### **HMAN 0900B. Fake: A History of the Inauthentic.**

What is a fake? Are "fake" and "authentic" absolute and antithetical categories? Who gets to decide what is authentic? Greek statues, Chinese bronzes, Maya glyphs—what gets faked and why? Have fakes always existed? Galileo's moons, a centaur's skeleton, Buddhas bearing swastikas—are all fakes the same? If not, how are they different? Why do people make fakes? Who wins? Who loses? This course revolves around the history of the inauthentic through a diachronic exploration of art objects and other forms of material culture. We will range widely in time and space, focusing primarily on the pre-modern.

### **HMAN 0900C. Heritage in the Metropolis: Remembering and Preserving the Urban Past (ARCH 0317).**

Interested students must register for ARCH 0317.

### **HMAN 0900D. Introduction to Indigenous Politics with Pacific Islander Focus (POLS 0920B).**

Interested students must register for POLS 0920B.

### **HMAN 1000B. The Cogut Institute for the Humanities Research Seminar.**

This seminar involves reading and discussing in-progress research by the annual fellows of the Cogut Institute for the Humanities, an interdisciplinary group of faculty, postdoctoral fellows, graduate students, and undergraduates engaged in extended research on a major project or honors thesis. Students read a wide range of works-in-progress, prepare questions and participate in seminar discussions, intervene as first questioners for specific sessions assigned to them in advance, and present their own work twice during the year. Admission to the course requires that students have received the Cogut Institute Undergraduate Fellowship for the year in which they enroll.

### **HMAN 1200. Making Choices: Ethics at the Frontier of Global Science (UNIV 1200).**

Interested students must register for UNIV 1200.

### **HMAN 1305. Medical Humanities: Critical Perspectives on Illness, Healing, and Culture (ANTH 1305).**

Interested students must register for ANTH 1305.

### **HMAN 1970A. Religion, Secularization, and the International.**

For the past several decades (but especially since 2001), internationalists have been increasingly preoccupied by the perceived "return of religion." Religion is often proclaimed to pose the single greatest threat to a liberal legal/political order and, less often, to be the greatest hope for that order. We will explore genealogies of the three key terms at stake in this conundrum – "religion," "secularization," and "the international." We begin from the proposition that none of these terms refer to ahistorical essences, but have been subject to continual theoretical/practical contestation/reconfiguration. We focus on that contestation as it has emerged in "modernity." Enrollment limited to 20 juniors, seniors, and graduate students.

### **HMAN 1970B. The Question of the Animal.**

This course is built around the question of the animal as a difficulty posed to representation and thought at a time when animals have largely disappeared from humans' living environment, but proliferate as strange protagonists, specters or figures of ambiguity in literature and philosophy. We will consider a range of texts and films that "cast" the animal critically, that is, as a body that strains or scrambles meaning (interruption, irony, illegibility, haunting) and forces us to reconsider the work of language and narrative (indeed, of the "human"). Authors include Kafka, Coetzee, Hofmannsthal, Kofman, Chevillard, Darrieussecq, Derrida, Agamben, de Fontenay, Herzog. Enrollment limited to 20 juniors and seniors.

### **HMAN 1970C. Modern Arab Thought: The Arab Renaissance.**

This course introduces students to the 19th/early 20th century Arab thought - the "Nahda" (Arab Renaissance). Through primary and secondary English texts, we will explore questions raised by thinkers of this epoch pertaining to perceived civilizational crisis, and examine the diagnoses/proposals offered by them. The course underlines the changes and continuities in these concerns under the impact of dramatic socio-political events of the epoch. We will discuss the strengths/weaknesses of "Nahda" thought that continues to inform/preoccupy contemporary Arab debates on culture, democracy, gender and Islam. We will examine the significance of this legacy in today's Arab world. Enrollment limited to 20 juniors and seniors.

### **HMAN 1970D. Places of Healing: Memory, Miracle, and Storytelling.**

From antiquity to our day, therapeutic landscapes such as: mineral and thermal springs; shrines and churches built at sacred springs; volcanic ash mud baths; rocky landscapes emitting odorous gasses; and ponds filled with medicinal leeches, attract health pilgrims who search for healing. Storytelling transformed these into places of memory and pilgrimage. This seminar investigates places of bodily healing and miracle from a cultural studies perspective. The case studies will be drawn from the Mediterranean world and Western Asia (including Lourdes in France, Hierapolis in Southeastern Turkey and the Agiasma churches of Byzantine Istanbul). Enrollment limited to 20 juniors and seniors.

### **HMAN 1970E. The Precarious University.**

The intensification of student protest-occupy movements across the country particularly in California, and the proliferation the OWS movements across the world have rejuvenated social movements against cutbacks for the people and kickbacks for the wealthy. In this seminar, we will address the epistemic shifts and intellectual costs of these ongoing upheavals, particularly the fight against the U.S. university's neoliberalization. We will imagine the kind of progressive university that is sustainable for the arts and humanities, and how the precarious work of artists and humanists are fundamental to 21st century global universities. Enrollment limited to 20 juniors and seniors.

### **HMAN 1970F. Pain in Polish and Russian Twentieth-Century Literature.**

Does pain and reflection on pain teach us something about ourselves, the world, our relation to it? This seminar approaches the question by examining the meaning of pain in Russian/Polish literature/literary theory of the 20th century. Our concern is with pain's resistance to language and representation. The works analyzed offer a variety of responses to problem of pain as it appears in theology, experimental medicine, discussions of materialism, the philosophy of Schopenhauer, and above all, the giants of Russian literature, Dostoevsky and Tolstoy, in whom these debates are dramatized; they also form the ground on which Russian and Polish literature meet. Enrollment limited to 20 juniors and seniors.

**HMAN 1970G. International Perspectives on NGOs, Public Health, and Health Care Inequalities.**

Non-governmental and other non-state organizations play an expanding role in the provision of health care across much of the globe. Growth and internationalization of the non-governmental sector, contraction of post-socialist and advanced industrial welfare states, and sub-contracting of state-funded services have all contributed. The seminar focuses on this expansion, critically assessing texts on NGOs and health and drawing comprehensively from sources across disciplinary and interdisciplinary boundaries. We will address issues of human welfare, political citizenship and identity, replacement and displacement of states, new forms of health care inequalities, and the self-concepts, missions, and roles of non-profit sector workers around the globe. Enrollment limited to 20 juniors and seniors.

**HMAN 1970H. Specters of Comparison.**

Comparison, which posits a likeness between the dissimilar, is always profoundly haunted by the question of its ground and judgment. This seminar will examine the comparative logic of capitalist modernity in the works of Marx, Weber, Adorno and Horkheimer, Foucault, Heidegger, and Benjamin. We will ask the following questions: How is equivalence established between nonequivalent objects? How are actual social relations quantified and measured, and is there an ethics to modern forms of comparability? How does language reflect and produce these operations? Or, to put it differently: What are the forms through which difference "haunts" us? We will pay special attention to figures of the double and the ghost in Hoffmann and Freud. Other topics to be covered include rationalization and the disenchantment of the world, the modern uncanny, "mediauras," colonial comparison, and the ethics of incommensurability.

**HMAN 1970I. Imposing Orthodoxy: "Jews," "Pagans" and "Heretics" when Constantinian Christianity Won.**

What happens when a particular 'orthodoxy' becomes able to impose itself on others? This course examines the imposition of post-Constantinian catholicism on Jews, Samaritans, other Christians (Arians, Miaphysites, etc.) and the remaining ancient Mediterranean populace (4th-7th centuries) to consider a larger cultural phenomenon. We'll draw on ancient authors and legal sources (in translation), archaeological data, and contemporary studies. Half the course entails communal exploration of the late antique Mediterranean. Student research presentations, including studies of comparable situations from other cultural and historical contexts, comprise the second half. Useful prior coursework includes: RELS 400, RELS 410, CLAS 600, CLAS 660, CLAS 1320. Enrollment limited to 20 juniors and seniors.

**HMAN 1970J. Miniature: An Introduction to Cognitive Cultural Studies.**

Why do we take pleasure in small-scale objects? What is their history and what purposes do they serve? How do the technology and the aesthetics of the small contribute to human cognition? To find answers to these and other questions, the seminar explores the cultural, literary and cognitive significance of miniatures. We will explore productive relationships between three areas of research: imaginative texts produced during the eighteenth century, the period's prolific but insufficiently studied production of small-scale versions of everyday objects, and recent developments in cognitive theory about the role of size-perception in the developing brain. Enrollment limited to 20 juniors and seniors.

**HMAN 1970K. Law and Religion.**

In an arguably "post-secular" age, conflicts over the relationship between religion and law have moved to the forefront of international debate. In our multicultural/globalized world, such conflicts often provoke contestation over the very possibility of universal definitions of either "religion" or "law," let alone their proper relationship. Our interdisciplinary inquiries on these questions will include concrete legal disputes in domestic/international courts; theoretical debates over the construction of "religion" in fields such as anthropology, religious studies, and philosophy; historiographical controversies about the relationship between "secularization" and sovereignty, particularly in light of the legacy of colonialism. Limited to juniors, seniors, and graduate students.

**HMAN 1970L. Topics in the History of Aesthetics: Eighteenth Century.**

Modern aesthetics emerged in the eighteenth century at the intersection of different disciplines, discourses, cultures, and European nations. Contributors to the new field came not only from academic philosophy but also from the arts, literature, history, theology, and other fields. Aesthetics was thus and remains primary among interdisciplinary disciplines. Readings for this course will be drawn from British, German, and French authors such as Shaftesbury, Du Bos, Addison, Hutcheson, Hume, Burke, Kames, Diderot, Mendelssohn, Lessing, Kant, Schiller, and Herder. Enrollment limited to 25 juniors and seniors.

**HMAN 1970M. Living in End Times.**

Doomsday predictions/apocalyptic themes have become commonplace. Between "End of History" theses/Mayan Calendar predictions/posthumanist theories/the Rapture, and environmental/financial collapse, it seems we are living in what many believe to be End Times. This course will examine some principal clusters of ideas around finality: posthumanism/singularity, environmental collapse, patriot survivalism, and post-politics. We will look at a number of cultural products: traditional fiction/non-fiction, blogs/podcasts/films. It will be less important to establish whether the Mayan calendar calculations are accurate than seeing the connections between those claims and the claims of survivalists/Rapture theorists. Taken together, what do all these claims say about this moment in history? Enrollment limited to 25.

**HMAN 1970N. The Israeli-Palestinian Conflict in the Global Scene.**

Dominant narratives of Israeli/Palestinian conflict obscure influential forces taking place outside the boundaries of Israel/Palestine, stories we believe are unique/historically peculiar. We will see how groups have been inspired by/have inspired both peoples' struggles for survival/self-determination. We examine case studies revealing connectivity/reciprocity: Zionism's inspiration for Garvey's-U.S.-back-to-Africa movement; adoption of Fanonian/Maoist/Guevarian thought in Middle East; Black Panther Party's support for Palestinians/their endorsement of an Israeli Black Panther Party in the 1970s; South Africa/Latin America's economic/military ties to Israel; Palestinian call for international Boycott Divestment Sanctions; and examine how struggles for self-determination negotiate liberation, in the region/beyond. Enrollment limited to 20 juniors and seniors.

**HMAN 1970O. Autonomy and Globalization.**

Many of today's dissident movements adopt leaderless/self-managed practices presenting us with radically different notions of what it means to self-determine. We will situate these movements within historical struggles for autonomy. By "autonomy" we understand the quality or state of being self-governing/self-determining. By "self," we understand not the self-originating/self-determining/rational individual constructed by Enlightenment liberal humanism, but rather, a diversity of self-defined collectivities made up of social individuals. We will consider runaway slave societies (Western Hemisphere), Operaismo (Italy), Zapatistas (Mexico), Tahrir Square's protesters (Egypt), Occupy Movement (US), Shackdwellers (South Africa), refugee/migrant movements. Readings include Marx/ Cleaver/Linebaugh/Rediker/Negri/Tronti/Virno/Berardi/Holloway/others, and documents from movements we engage. Enrollment limited to 20 juniors and seniors.

**HMAN 1970P. Pragmatism, Religion, and Politics.**

Pragmatism is a distinctive American school of thought that sees the goal of philosophy not as the apprehension of timeless truths but as a practical project of bettering individual lives and society as a whole. Pragmatists such as William James and John Dewey were devoted to deepening America's commitment to democracy. Both saw an important place for an unconventional sort of religion in democratic life. This course explores the pragmatist thought of James, Dewey, and others, looking especially at their views on religion and politics. We also will explore the influence of pragmatism on Barack Obama. Enrollment limited to 20 juniors and seniors.

**HMAN 1970Q. Working (on) Concepts in the Humanities.**

Concepts are usually thought of as cognitive tools, constituents of thought used for categorization/inference/memory/learning/decision-making. We shall think about them as effects of a language game whose rules change across genres, media, and discursive regimes. Looking for these rules and analyzing them comparatively, we shall ask how concepts are formed/displayed/performed, when do we need them/can we do without them. We shall read philosophers (Plato, Descartes, Kant, Heidegger, Wittgenstein, Foucault, Derrida, and Deleuze), intellectual historians (Koselleck, Skinner), literary works (Kleist, Kafka, Musil), and look at some conceptual art. Advanced juniors, seniors and graduate students welcome. Enrollment limited to 20.

**HMAN 1970R. Literature and the Arts in Today's Cuba.**

Cuba today is home to writers, musicians and artists who engage with new media and a global audience against the backdrop of a socialist revolution. This seminar will explore esthetic and political dimensions of contemporary Cuban culture with authors who will speak to us directly through a video link with Casa de las Américas in Havana. Knowledge of Spanish required.

**HMAN 1970S. Ethics and the Humanities.**

This seminar will engage with ethical issues in a broad range of humanities disciplines. We will survey historical and thematic perspectives on ethics, and will consider the ethical implications of authorship and possession of texts and objects; translation as an ethical problem; data and open access; the perspective of the human subject; public humanities, public intellectuals and community-based research; and ethical issues in popular culture. Enrollment limited to 20. Not open to first year students or sophomores.

**HMAN 1970T. Music, New Media, and Virtual Performance.**

We'll investigate how new media technologies shape musical practices (and vice versa). Topics will include DJ cultures, digital music distribution and related intellectual property issues, digital gameplay, music videos, popular music reception, online music lessons, and virtual communities. We'll give equal attention to production, circulation, and reception practices, as well as to their increasing convergence. Readings will include both contemporary and historical studies. The course will require critical engagement with a diverse range of media, genres, and cultural contexts, encouraging students to examine their own media production and consumption practices. Enrollment limited to 20. Not open to first year students or sophomores.

**HMAN 1970V. Pragmatic Medical Humanities.**

The question, "What is medical humanities?" has flummoxed the very experts who ardently argue for its importance to medical education and the professional and personal growth of health care providers. The interdisciplinary nature of medical humanities, engaging in conversations with persons who possess different expertise, knowledge and approaches, provides opportunities for insight unavailable elsewhere. Students will investigate alternative meanings, interpretations and purposes embedded in the term "medical humanities." They will develop their own personal relationship to this term/field of study, and its utility as a tool for understanding and responding to the profound experiences of clinical medicine, illness and health. Enrollment limited to 20. Not open to first year students or sophomores. This is a half-credit course.

**HMAN 1970W. Medicine and Colonialism in the Atlantic World: A View from the South.**

This seminar examines the role of disease, medicine, and health in the history of the Atlantic World. Our analysis will be centered on events that took place in Latin America, the Caribbean, and Sub-Saharan Africa, during the era of European colonial expansion (1490-1940). In these four and a half centuries, the West became the dominant force in global geopolitics and Western medicine emerged as the hegemonic form of healing worldwide. This seminar explores the complex relationship between these two historical developments. Enrollment limited to 20. Not open to first year students or sophomores.

**HMAN 1970Y. Politics and Authority in Islamic Law and Society.**

Few courses offer insight into the genesis of Islamic political theory in light of the social and historical circumstances of the medieval period. This seminar seeks to address major trends in political thought of classical Islam. In addition to reading secondary scholarship on social and political aspects of early Muslim society, we will also examine primary sources in translation (Prolegomenon, Book of Ordinances); literary genres, including official state epistles from the medieval period; and the work of Ibn Taymiyya. Finally we will address issues of authority, ethics and gender in contemporary analyses. Enrollment limited to 20. Not open to first year students or sophomores.

**HMAN 1970Z. Knowledge Networks and Information Economies in the Early Modern Period.**

This course is designed to introduce students to major topics in the developing historical literature on the relationships between intellectual and economic history, and their implications for European culture, mainly in the first two centuries after Columbus and Da Gama. Enrollment limited to 20 juniors and seniors.

**HMAN 1971B. Paris Archive: The Capital of the Nineteenth Century, 1848-1871.**

We will take as our starting-point Walter Benjamin's notes for his unfinished masterwork "The Arcades Project." The Passagenwerke comprise a massive index of citations/observations on the nature/form of the city of Paris in every aspect of its cultural/political life in the 19th/20th centuries. We will read works from which he culled his aphorisms/ investigate the present status of each of his assertions/citations, with historical/contemporary readings. We will discuss the nature of historical/archival interpretation and try to bring together artifacts – textual/visual/sensorial - that might constitute a "Museum" of 19th Century Paris. Taught by Prof. Anthony Vidler. Graduate students encouraged to register. Enrollment limited to 20.

**HMAN 1971C. History, Theory and Practice of Storytelling Using Stereoscopic ("3D") Motion Pictures.**

This course will support/enhance Brown's tradition in the Humanities by sharpening the focus on interdisciplinary/comparative work across cultural/linguistic boundaries. Can science/technology/medicine foster the presentation of innovative work in humanities by bringing 3D to New Media? Why do some cultural values dictate genres typically produced in 3D? What were the origins of 3D motion pictures/how might new technologies affect the distribution/visualization of 3D projects? How can 3D enrich relations between humanities and studio/performing arts? We provide Brown students with an opportunity to establish a foundation for analyzing/telling stories using stereoscopic tools, and receive basic technical experience using 3D small-format video equipment.

**HMAN 1971E. Cross-Cultural Approaches to Death and Dying.**

Despite the universality of death, human responses are incredibly varied. This course situates biological, medical, and psychological conceptions of death and dying in conversation with the religious and ethical perspectives that have also informed human responses to death and dying in cultural contexts. This course—team-taught by a psychologist, a scholar of religion, and two end-of-life care physicians—facilitates a more informed understanding of death-related cultural practices and a more skilled response to death-related decisions arising in the practice of medicine and in life. Limited to 20 students in Medical Humanities and graduate Humanities fields. Honors undergraduates and PLMEs may enroll with permission.

**HMAN 1971K. Varieties of Secularism (RELS 1746).**

Interested students must register for RELS 1746.

**HMAN 1971R. The First Scientific Americans: Exploring Nature in Latin America, 1500-1800 (STS 1701C).**

Interested students must register for STS 1701C.

**HMAN 1971S. Introduction to iPhone/iPad Moviemaking Using 3-D and 360 VR Comparisons.**

Mobile Devices are democratizing movie-making by lowering barriers to entry, enabling students to become full-fledged members of the film industry virtually overnight. This pioneering course provides the basic tools for students to create and distribute no- and low-budget live-action motion pictures with professional production values utilizing only their personal smartphones. Students will acquire the skills to plan, capture and edit short motion pictures through hands-on instruction and experimentation with low-cost accessories, including selfie-sticks, lens adapters, directional microphones and iPhone apps like Filmic Pro, Vizzywig and iMovie. Limited to junior, senior and graduate students.

**HMAN 1971T. Law, Nationalism, and Colonialism.**

This seminar explores the internationalism of the past century in terms of its relationship to separatist nationalism, anti-colonialism, and religious radicalism. It takes as its point of departure the dramatic political, cultural, and intellectual transformations that followed in the wake of World War I. A guiding hypothesis of the seminar is that internationalism cannot be understood apart from its complex relationship to "identity" broadly conceived – identity of local/transnational groups as well as the identity of internationalists themselves. Readings will be drawn from law/cultural studies/politics/postcolonial theory. Enrollment limited to 20.

**HMAN 1971U. Kabbalah: An Introduction to Jewish Mysticism.**

In the 12th and 13th centuries, new ways of approaching Judaism sprung up in France and Spain that would come to be known as "kabbalah." New approaches included aspirations for mystical illumination, elaborate mythological narratives, and human history. Kabbalists radically and self-consciously departed from conventional understandings of Judaism, particularly those of medieval Aristotelian philosophers like Maimonides. They claimed to find their mythological, mystical worldviews in traditional texts, from the Bible through rabbinic writings. This course introduces students to kabbalah's founding period, focuses on primary texts in translation, especially the Zohar, the magnum opus of classical kabbalah. No prior background necessary.

**HMAN 1971W. Decolonizing African Education: Student Activism and Social Change, 1960-present (EDUC 1035).**

Interested students must register for EDUC 1035.

**HMAN 1971X. The Southern Question and the Colonial Mediterranean (ITAL 1400P).**

Interested students must register for ITAL 1400P.

**HMAN 1971Y. Visions of Liberation: African Decolonization Now? (COLT 1610R).**

Interested students must register for COLT 1610R.

**HMAN 1971Z. Cannibalism, Inversion, and Hybridity: Creative Disobedience in the Americas (HIAA 1870).**

Interested students must register for HIAA 1870.

**HMAN 1972A. Landscape and Japanese Cinema (MCM 1504X).**

Interested students must register for MCM 1504X.

**HMAN 1972B. Environmentalism and the Politics of Nature (ANTH 1556).**

Interested students must register for ANTH 1556.

**HMAN 1972C. Picturing Paradise: Art and Science in the Americas.**

The study of nature has developed together with the representation of flora and fauna in Europe and the Americas. After the encounter, visual thinking remained an integral part of how knowledge was negotiated between different communities on both sides of the Atlantic—as several scientific expeditions involving artists confirm. This course, which includes field trips to museums and collections, examines connections between knowing and making, ranging from the tradition of pre-Columbian writer-painters to contemporary Latin American artist collectives. We will investigate the entangled histories of art and science as seen through the artistic productions inspired by the exuberant American land.

**HMAN 1972D. Art of Criticism (ENGL 1901F).**

Interested students must register for ENGL 1901F.

**HMAN 1972G. Eternal Returns: Poetry and Politics in Modernity.**

The title of this course alludes to Friedrich Nietzsche's "eternal return of the same," which he famously called "the highest formula of affirmation," and which later philosophers and thinkers, such as Pierre Klossowski and Martin Heidegger, would repeatedly return to. Yet Nietzsche's discovery is not new, for it inflects, too, the thinking of the professional revolutionary, Louis-Auguste Blanqui, the returns of commodity production in high capitalism, and the poetic figurations of the big city found in nineteenth-century writers such as Charles Baudelaire. In this course, we will examine the problem of returns—temporal, political, economic, and poetic—in modernity.

**HMAN 1972I. Me, Myself, and I: Exploring Senses of Self from a Multidisciplinary Perspective.**

Human beings have long puzzled over how precisely to conceptualize and understand what it is we are. Questions about the nature of the self have informed the speculations of philosophy, the soteriologies of religion, the trajectories of self-cultivation in contemplative traditions, and the therapeutics of psychology. Recently, cognitive science and phenomenology have attempted to correlate abstract concepts about the self with lived experience, emphasizing how various senses of self give rise to our self-concepts. Through this course, students will engage with conceptions of self that we often take for granted by studying senses of self from multidisciplinary and cross-cultural perspectives.

**HMAN 1972J. Urban History of Latin America (HIST 1979L).**

Interested students must register for HIST 1979L.

**HMAN 1972K. Anthropology of Climate Change (ANTH 1112).**

Interested students must register for ANTH 1112.

**HMAN 1972M. Environmental Political Thought (POLS 1185).**

Interested students must register for POLS 1185.

**HMAN 1972N. The Indian Ocean World (HIST 1979K).**

Interested students must register for HIST 1979K.

**HMAN 1972Q. The Nature of Conquest: Scientific Literatures of the Americas (HISP 1330X).**

Interested students must register for HISP 1330X.

**HMAN 1972R. Transnational Hispaniola: Haiti and the Dominican Republic (AFRI 1050W).**

Interested students must register for AFRI 1050W.

**HMAN 1972S. Comparative Education: International Trends and Local Perspectives (EDUC 1030).**

Interested students must register for EDUC 1030.

**HMAN 1972T. Apartheid in Post-Apartheid South African Literature (COLT 1814L).**

Interested students must register for COLT 1814L.

**HMAN 1972U. Feminist Thoughts for a Heated Climate (POLS 1180).**

Interested students must register for POLS 1180.

**HMAN 1972V. Sex, Gender, Empire (HIST 1979F).**

Interested students must register for HIST 1979F.

**HMAN 1972W. Rhythm and Resistance (AFRI 1050V).**

Interested students must register for AFRI 1050V.

**HMAN 1972Y. Indigenous Peoples and American Law.**

The European colonial empires and their successor states in the Americas all developed bodies of law concerned with the indigenous peoples who preceded them. In the United States, this body of law is generally still known as "American Indian Law" or, more recently, "Federal Indian Law." It emerged out of colonial-era juristic thinking and was adapted and transformed after the U.S. gained independence from Britain. This seminar will study both the history and structure of this body of law. It will also seek to uncover the ways the technical legal materials embody deep-rooted cultural presuppositions about indigenous peoples.

**HMAN 1973A. Race, Sexuality, and Mental Disability History (AFRI 1060Z).**

Interested students must register for AFRI 1060Z.

**HMAN 1973B. Feminist Theory for a Heated Planet (POLS 1824N).**

Interested students must register for POLS 1824N.

**HMAN 1973C. East Asian Cinemas in a Global Frame (MCM 1203U).**  
Interested students must register for MCM 1203U.

**HMAN 1973D. Sports and Culture in Latin America (HISP 1371B).**  
Interested students must register for HISP 1371B.

**HMAN 1973E. The Age of Constantine: The Roman Empire in Transition (CLAS 1120V).**  
Interested students must register for CLAS 1120V.

**HMAN 1973F. Ruined History: Visual and Material Culture in South Asia (HIST 1979D).**  
Interested students must register for HIST 1979D.

Interested students must register for ETHN 1750H.

**HMAN 1973I. Oppositional Cinemas (MCM 1505J).**  
Interested students must register for MCM 1505J.

**HMAN 1973T. The Politics of Chinese Cinema (MCM 1204D).**  
Interested students must register for MCM 1204D.

**HMAN 1973U. Art for an Undivided Earth: Transnational Approaches to Indigenous Activism and Art (ENGL 1711J).**  
Interested students must register for ENGL 1711J.

**HMAN 1973W. Indigenous Politics in Hawai'i: Resurgence and Decolonization (POLS 1820I).**  
Interested students must register for POLS 1820I.

**HMAN 1973Y. Rhythm and Silence: A Creative Writing Workshop (HISP 1700B).**  
Interested students must register for HISP 1700B.

**HMAN 1973Z. Ammianus Marcellinus (LATN 1930B).**  
Interested students must register for LATN 1930B.

**HMAN 1974A. Cinema and Imperialism (MCM 1505S).**  
Interested students must register for MCM 1505S.

**HMAN 1974B. Southeast Asia's Entangled Pasts: Excavated, Curated, and Contested (ARCH 1494).**  
Interested students must register for ARCH 1494.

**HMAN 1974C. Dawnland Voices: Exploring Native New England (AMST 1902S).**  
Interested students must register for AMST 1902S.

**HMAN 1974D. Avicenna (PHIL 1002).**  
Interested students must register for PHIL 1002.

**HMAN 1974E. Political Theology for the Anthropocene.**  
The Seminar develops a discourse in political theology for gaining insight into the catastrophes of the modern world and those associated with the Anthropocene. The political imagination embedded in a cluster of texts from the Hebrew Bible and the political theology they imply will enrich discussions in political theory about sovereignty, government, law, and violence. The seminar gives special attention to the way the modern state and other modern and contemporary institutions have come to substitute for God as authors of large scale, globalized, and planetary catastrophes. Our theoretical companions include Buber, Assman, Agamben, Arendt, Foucault, Boltanski, and Žižek.

**HMAN 1974F. Anthropology in/of the Museum (ANTH 1901).**  
Interested students must register for ANTH 1901.

**HMAN 1974G. Authority, Identity, and Visual Culture in Colonial Latin America (HIAA 1631).**  
Interested students must register for HIAA 1631.

**HMAN 1974H. The Human Skeleton (ANTH 1720).**  
Interested students must register for ANTH 1720.

**HMAN 1974I. Contested Histories of Colonial Indochina: Encounters, Soc. Transformations, Legacies of Emp-HIST 1978D.**  
Interested students must register for HIST 1978D.

**HMAN 1974J. Rap as Storytelling (MUSC 1240R).**  
Interested students must register for MUSC 1240R.

**HMAN 1974K. Governing Culture: Music and the Arts in Political Life.**  
The social function and governmental regulation of aesthetic life play a key role in the constitution of political regimes. This course examines debates on the arts as instruments of power, distinction, resistance, contestation, and revolution, from the early modern period to the present. The government of music, sound, noise, and silence will offer a point of comparison among absolutist monarchies, modern republics, totalitarian regimes, liberal democracies, and colonial empires. In addition to music, the course draws from political sources, theoretical works, literature, and the visual arts.

**HMAN 1974L. The Coming Apocalypse: Between the Earth and the World.**

A cascading catastrophe threatens to turn the earth uninhabitable and bring our world to its end. How to think, in this context, the relation between **our** world, **the** world, and the **earth**? Are they known, experienced, shared with others, or being destroyed in the same way? How have their difference and convergence been affected by globalization, and affect our understanding of "the Anthropocene"? Following environmental news, the seminar addresses these and related questions through literary, theoretical, and philosophical texts, including works by Nietzsche, Heidegger, Arendt, Derrida, Nancy, Latour, Haraway, Povinelli, Coates, and Mbembe.

**HMAN 1974M. Solidarities: Sharing Freedom, Inventing Futures.**

Solidarity between people—even between species—has never been more needed. But our culture is saturated by personality politics and ubiquitous narcissism. How can we think and organize ourselves out of this impasse? Is it shared interests or shared identities that unite us? What does freedom mean in an interconnected age? These are some of the questions that any attempt to think through the question of solidarity in the twenty-first century must encounter. Writers to consider include Marx, Arendt, Foucault, Simonon, Negri, Stuart Hall, Maurizio Lazzarato, Donna Haraway, Couze Venn, and Ruth Ozeki, among others.

**HMAN 1974N. Narrating the Borderlands: Literature, Legality, and Solidarity (HISP 1371F).**

Interested students must register for HISP 1371F.

**HMAN 1974O. Print and Power in Modern Southeast Asia (HIST 1962E).**

Interested students must register for HIST 1962E.

**HMAN 1974Q. Revolutionary England, 1642-1660: Civil War, Regicide, and Republic.**

This course examines England's mid-seventeenth century revolution, looking at high and low politics, the rise of popular radicalism, and the conflict in the empire. Themes explored include: the trial of Charles I; the commonwealth, 1649-53; the Ranters and the sexual revolution; the Differ commune at St. George's Hill; Oliver Cromwell's war crimes in Ireland; Cromwell as Lord protector, 1653-58; the social and gender egalitarianism of the Baptists, Quakers, and Fifth Monarchists; the revolutions in the Caribbean and Atlantic; and the Western Design and capture of Jamaica.

**HMAN 1974S. The Costs of Climate Change.**

This seminar examines debates over the costs - economic, environmental, and social - of climate change. We will explore how economists attempt to solve seemingly impossible problems of valuation like: how much should we value the wellbeing of current versus future generations? How much value does the ecosystem as a whole provide? We will then survey how these numbers (sometimes) enter into environmental regulatory debates. Finally, we will study how movements fighting for environmental justice adopt - or reject - the language of economics to make claims about the morality and economics of fossil fuel producers.

**HMAN 1974T. Anthropology of Infrastructure: Comparative Ethnographic Perspectives.**

Basic infrastructure – e.g., electricity grids, water supply systems, roads, railroads, and the Internet – is commonly seen as a foundational requirement for and visible manifestation of modern human life. Yet inequalities in infrastructure are both causes and consequences of the profound disparities that characterize the contemporary world. This course aims at deciphering the complex interaction between infrastructure, society, politics, and human experience. Taking a comparative ethnographic approach, students will ask whether technology has produced a better world, and for whom. From economics and governance to ethics and sociality, students will explore humans' relationship to infrastructure.

**HMAN 1974U. The Cultures of Roman Imperialism.**

"The Cultures of Roman Imperialism" explores the cultural feedback loops between capital and provinces in the ancient Roman world, studying the literature (and some material culture) not only of expansionist Rome, but of the populations subject to Rome (including Greek, Egyptian, and Judaic). How did Rome appropriate local cultural forms to legitimize its own power? How did local cultures push back with their own appropriations? We will find new ways to study an ancient empire that has subsequently been a model not only for governance, whether enlightened or oppressive, but also for dialogue and interchange, however fraught.

**HMAN 1974V. God of the Greek Philosophers.**

This seminar will focus on the views of Plato and Aristotle on god's thought and human thought. Plato treats god as a craftsman who looks to unchanging forms and attempts to replicate them in recalcitrant materials. By contrast, Aristotle regards the cosmos as eternal. His god maintains the world as the relatively stable place it is and does so as an object of desire and thought. God's own activity—thinking of thinking—is extremely simple, whereas ours is necessarily more complex and involves recognizing our place and contribution to the order of things.

**HMAN 1990. Independent Study.**

**HMAN 2400Q. War and the Politics of Cultural Memory (ENGL 2901D).** Interested students must register for ENGL 2901D.

**HMAN 2400Y. Suspicion and Its Others (ENGL 2901N and RELS 2110C).**

Interested students must register for ENGL 2901N or RELS 2110C.

**HMAN 2401. Memory/Matter/Time: Literature and the Changing Earth (ENGL 2761R).**

Interested students must register for ENGL 2761R.

**HMAN 2401A. Bakhtin and the Political Present: Literature, Anthropology, Dialogue (ENGL 2901M).**

Interested students must register for ENGL 2901M.

**HMAN 2401B. Thinking Breath: An Inquiry Across Philosophy, Literature, and Performance.**

This collaborative seminar proposes an interdisciplinary and inter-cultural inquiry into breath as the shared figment of philosophical, spiritual, therapeutic, athletic, musical, and environmental practices, among others. How does breath travel across disparate traditions, bodies, and technologies? Is it vital or metaphysical? Is it restricted to particular genres? Does it have a history? Topics include punctuation and phrasing; climate change and the crisis of oxygen; circular breathing and "breathy" vocalization in musical traditions; the notion of "ruh" in Sufism, *pneuma* in ancient Greek thought, "qi" in ancient Chinese thought, and "breath" as a synonym for "self" in ancient Indian philosophy.

**HMAN 2401C. Inscribing the Event: Poetics and Politics of the Date.**

What is a date? How does it relate to our understanding of historical time? How can the idea of a date be represented in words and images? What does it mean to commemorate the anniversary of a date? When it comes to a date, what is the relation between repeatability and singularity? This seminar will devote itself to the vexing question of the date in literature, the arts, critical thought, and cultural theory. Texts to include Marx, Benjamin, Faulkner, Adorno, Derrida, Celan, among others. Graduate students from diverse fields welcome. Final collaborative seminar project required.

**HMAN 2401D. The Fugitivity of Slowness, Stillness, and Stasis.**

Slowness, stillness, stasis – these terms signal diminished velocity, extended duration, delayed development or reduced exertion. But what if we understand them as an intensification, rather than a reduction, of forces? How do slowness, stillness, and stasis animate fugitivity in various bodies of thought? What if slowness, stillness, and stasis instantiate modes of anti-colonial practice and thought, or imagine/realize a world nonsensical to much of dominant western thought? This collaborative humanities seminar will explore practices of slowness, stillness, and stasis in literature, theory, performance and art, and the ways in which they unsettle our understanding of fugitive social practices of refusal.

**HMAN 2500. Project Development Workshop.**

In this capstone course, students completing the Graduate Certificate in Collaborative Humanities pursue individual or collaborative projects, such as a dissertation prospectus, a dissertation chapter, or a methodological/theoretical exercise relating to their field of interest. Weekly sessions are devoted to work-in-progress and discussion of key texts addressing method and theory in and beyond the humanities. At the end of the semester, participants present in a Collaborative Public Workshop. Admission to the seminar requires a formal application process and the completion of two HMAN 2400 seminars.

**HMAN 2970C. Concepts of Space and Time in Media Discourses.**

No description available. Enrollment limited to 20 graduate students.

**HMAN 2970D. Biological Issues in Cultural Theory.**

Contemporary culture is increasingly preoccupied by biological themes and issues—genomes, brain images, biotechnology, the natural environment, etc.—and, not unrelatedly, by a wave of new biological determinisms: "gay genes," "God genes," mental "hardwiring," etc. At the same time, ongoing work in fields such as developmental biology, ethology, neuroscience and science studies increasingly challenges classic dualisms of nature/culture and mind/body along with traditional assumptions about the nature of biological entities and the operations of scientific knowledge. The seminar will focus on a selection of these issues and developments especially relevant to the interests of humanities scholars and students of culture and cultural theory. Enrollment limited to 20 graduate students.

**HMAN 2970E. Pain, Medicine and Society.**

We take on the big question of pain as an interdisciplinary enterprise, drawing on the rich and varied faculty of Brown University and Alpert Medical School. We will examine acute/chronic/physical/psychic pain, the nature of suffering, and why some might find value/solace in pain and suffering. We will examine representations of pain in literature, art and music; look at the shifting conceptions of pain and suffering across cultural/ethnic/religious communities, and the actual/perceived barriers to effective treatment of pain. Most importantly, we will foster sensitivity and impart tools that will improve our understanding and treatment of individuals suffering from pain. Enrollment limited to 20 students in Medical Humanities and graduate Humanities fields. Honors undergraduates and PLMEs may enroll with instructor permission.

**HMAN 2970G. Space and Capital.**

This course examines various ways Western/non-Western societies have conceptualized space, with a specific focus on the tension between capitalist/common space. We adopt the map as a lens into this question, focusing on the cadastral survey's rise in the Modern era and on its role in parceling space into strictly bounded, individual property. Throughout the semester, we undergo an enquiry into the map's uncritical reception in the contemporary era, understanding this development as linked to the Scientific Revolution; the role of linear perspective; the Age of Discovery's world-as-picture; as well as to the processes of primitive accumulation, colonialism, and the nation-state. Enrollment limited to 20.

**HMAN 2970L. History and Theory of Catastrophes.**

This seminar proposes a philosophical history of catastrophes (large-scale disasters) and uses it as a vantage point for questioning contemporary critiques of modernity/secularization. Starting from Biblical narratives of God-made disasters, we will follow God's role in the way north-western societies interpret/cope with catastrophes. Reading/viewing documentation of catastrophes from Defoe's *Journal of the Plague Year* to Cooper's/Block's/Spike Lee's reports on Hurricane Katrina, we will examine the emergence of the state as a major actor responsible for preparing for catastrophes/mitigating their effects, but often also for their generation, and discuss the globalization of catastrophes and with catastrophes as special sites of globalization. Enrollment limited to 20.

**HMAN 2970M. Race, Space, and Struggle.**

This seminar will examine the stark realities of spatial racialization: ghettos, slave plantations, prisons, refugee camps, and border walls, situating the creation of these spaces as violent responses to broader social/economic crises. At the same time, this course will highlight the the always already existing practices of resistance by exploring how inhabitants these spaces responded to their marginalization. Because these spaces are also lived, our understanding of anti-racist struggle will encompass a broad array of everyday practices, the appropriation of space, artistic expressions of resistance, and everyday forms of cooperation/creativity, alongside more traditional forms of organized interventions. (Course prerequisites: none) Enrollment limited to 20.

**HMAN 2970Q. Latin in America (LATN 2080F).**

Interested students must register for LATN 2080F.

**HMAN 2970R. Political Foucault.**

Michel Foucault was one of greatest political thinkers of the 20th century. He was not always recognized as such, but his work has shaped the field within which critical political theory is pursued today. The seminar will follow Foucault's thinking on power and its subjects, the state, sovereignty, government, and the political, as these concepts were developed, articulated, and experimented with during one decade of intensive research and revisions -- the nineteen seventies. Our main primary texts will be the three series of lectures Foucault delivered at the Collège de France between 1975 and 1979.

**HMAN 2970T. And What About the Human? Black/Anti-Colonial Thought, Human Freedom and Emancipation?.**

This course will examine the figure of the human posed in radical anti-colonial thought as a distinctive mode of thinking. Reviewing some major 20th century thinkers, Foucault, Derrida, Arendt alongside Fanon, Ceasire and Wynter, the course will also examine the complex relationships between the figure of the human, freedom and emancipation. Graduate or undergraduate senior students only. Enrollment limited to 20.

**HMAN 2970U. Antiquity and Innovation in the Hispanic Renaissance (HISP 2160N).**

Interested students must register for HISP 2160N.

**HMAN 2970X. Political Concepts: The Balibar Edition.**

The seminar is dedicated to the political philosophy/theory of Étienne Balibar, a contemporary post-Marxist and post-structuralist French philosopher. The seminar will focus on the conceptual dimension of Balibar's work through a study a small cluster of concepts with which he has been especially engaged: ideology, city, citizen and citizenship, equa-liberty, violence, politics and the political. By explicating the meaning of these concepts in Balibar's work and their role as theoretical-political interventions, we will open the question of the political and experiment with the intellectual and creative power of conceptual analysis and its possible contribution to political theory.

**HMAN 2970Y. Race and Nation in the Spanish Caribbean (AFRI 2502).**

Interested students must register for AFRI 2502.

**HMAN 2970Z. Logos, tekhnē, philosophia.**

Today, Western thinking forms the technoscientific apparatus of societies of hyper-control, built on the foundation of ubiquitous and reticular computing. This amounts to what Martin Heidegger called *Gestell*, which imposes itself as the digitalized merging of science and technology. We find ourselves confronted forcefully (as what the Greeks called *ubris*) with the question of the status of technics with respect to knowledge in all its forms. It has become crucial to understand how and why from its birth, with Plato, philosophy has made technics unthinkable thereby establishing the unthought that then comes to constitute the threat of the Anthropocene.

**HMAN 2971C. Decolonial Methodology: Pedagogy for a New Era of Dissent and Resistance.**

The seminar will focus on the ways to develop and nurture a decolonial methodology that is intersectional, anti-racist, anti-capitalist and anti-imperialist. The aim is to produce a space of trust that allows debating hard questions and challenging our own assumptions, and encouraging collective thinking and cooperative learning.

**HMAN 2971E. Kinds of Others.**

Multiple "Others," from the ancient barbaria to the contemporary and queer, from the abnormal to the colonial subject, from the Jew to the black have been widely studied in the humanities and social sciences. The seminar addresses this proliferation of others and explores the role of the Other in the economy of the self, the religious community, or the nation. We will experiment with different principles for classifying this variety of kinds of others and modes of othering. The typological approach will guide a double survey: of philosophical conceptions of otherness, and of modes of constructing kinds of others.

**HMAN 2971F. Radical Borders (HISP 2520R).**

Interested students must register for HISP 2520R.

**HMAN 2971G. The Coming Apocalypse: Between the Earth and the World.**

A cascading catastrophe threatens to turn the earth uninhabitable and bring our world to its end. How to think, in this context, the relation between **our** world, **the** world, and the **earth**? Are they known, experienced, shared with others, or being destroyed in the same way? How have their difference and convergence been affected by globalization, and affect our understanding of "the Anthropocene"? Following environmental news, the seminar addresses these and related questions through literary, theoretical, and philosophical texts, including works by Nietzsche, Heidegger, Arendt, Derrida, Nancy, Latour, Haraway, Povinelli, Coates, and Mbembe. Open to juniors and seniors with instructor permission.

**HMAN 2971H. Solidarities: Sharing Freedom, Inventing Futures.**

Solidarity between people—even between species—has never been more needed. But our culture is saturated by personality politics and ubiquitous narcissism. How can we think and organize ourselves out of this impasse? Is it shared interests or shared identities that unite us? What does freedom mean in an interconnected age? These are some of the questions that any attempt to think through the question of solidarity in the twenty-first century must encounter. Writers to consider include Marx, Arendt, Foucault, Simondon, Negri, Stuart Hall, Maurizio Lazzarato, Donna Haraway, Couze Venn, and Ruth Ozeki, among others. Open to juniors and seniors with instructor permission.

## Comparative Literature

### Chair

Marc Redfield

Comparative literature is the study of literature and other cultural expressions across linguistic and cultural boundaries. At Brown, the Department of Comparative Literature is distinct in its conviction that literary research and instruction must be *international* in character. The department performs a role similar to that of the study of international relations, but works with languages and artistic traditions, so as to understand cultures "from the inside." Both the department's undergraduate and graduate programs are held to be among the finest in the country.

For additional information, please visit the department's website: [http://www.brown.edu/Departments/Comparative\\_Literature/](http://www.brown.edu/Departments/Comparative_Literature/)

## Comparative Literature Concentration Requirements

The concentration in Comparative Literature enables students to study an illustrative range of literary topics and to develop a focused critical understanding of how cultures differ from one another and what those differences mean. Our courses provide opportunities to engage with literary works across linguistic and cultural boundaries, exploring the traditions and innovations of the literatures of the world.

In the spirit of Brown's Open Curriculum, a concentration in Comparative Literature affords great academic freedom. Advanced literature courses from any literature department at Brown count for concentration credit. Any language—ancient or modern—supported at Brown may form part of a Comparative Literature concentration program. All students take a course in literary theory and have the opportunity to complete a senior essay.

There are three concentration tracks and requirements:

- Track 1: Comparative Literature in Two Languages
- Track 2: Comparative Literature in Three Languages
- Track 3: Literary Translation

Genre and Period Requirements for all concentrators:

- One course in each literary genre (poetry, narrative, and drama/film)
- Courses must cover at least three different historical periods (such as, Antiquity; Middle Ages; Renaissance/Early Modern; Enlightenment; Modern: 19th-21st centuries).

### Track 1: Concentration in Comparative Literature in two languages

Ten literature courses including:

- COLT 1210 Introduction to the Theory of Literature
- At least two advanced (1000-level) courses in each of the two literatures chosen
- At least five courses from Comparative Literature and other literature departments (up to two 100-level courses may count in this category).

### Track 2: Concentration in Comparative Literature in three languages

Ten literature courses including:

- COLT 1210 Introduction to the Theory of Literature
- At least two advanced (1000-level) courses in each of the three literatures chosen
- At least three courses from Comparative Literature and other literature departments (up to two 100-level courses may count in this category).

### Track 3: Concentration in Literary Translation

Ten courses including:

- COLT 1210 Introduction to the Theory of Literature
- COLT 1710 Literary Translation
- At least one course in linguistics (including COLT 2720 Literary Translation and history of the language courses).
- At least one workshop in Literary Arts
- At least two advanced (1000-level) courses in each of the two literatures chosen
- At least two courses from Comparative Literature and other literature departments (up to two 100-level courses may count in this category).
- A senior thesis, eligible for Honors, consisting of substantial work in translation with a critical introduction. Completing a thesis is required of all Track 3 students but does not guarantee departmental honors.

## Notes:

### Prerequisites in languages:

Students must demonstrate proficiency in the languages of their selected literatures. We recommend that prerequisite(s) for taking 1000-level courses in their languages be completed by Semester V.

Students working in non-European languages may be allowed more latitude; be sure to be sure to consult a concentration advisor about constructing an individualized plan.

### Selecting literature courses in your language areas:

Readings must normally be in the original language. If English is one of your languages, courses need to be devoted chiefly to literature originally written in English.

### Honors in Comparative Literature

Students in all tracks may earn honors in the concentration by successfully completing a thesis that is granted honors upon submission. Completing a thesis in any track does not guarantee departmental honors. Honors are granted upon the recommendation of the two thesis readers.

**Tracks 1 & 2.** These are analytical studies of literary topics, comparative in nature, based upon research, and usually between 50 and 100 pages. They are usually composed of 3 chapters, with an introduction and a conclusion. Students are expected to choose a topic that involves work in each of the literatures of their concentration in the original language.

**Track 3.** These consist of a substantial work in translation with a critical introduction outlining the method used and specific problems encountered, and commenting on the history of the original work together with other translations, if any.

(See detailed Guidelines for Honors Theses (<http://www.brown.edu/academics/comparative-literature/undergraduate-program/honors-theses>) in Comparative Literature on Departmental website).

### Capstone option

Students in Tracks 1 & 2 not taking Honors are urged, but not required, to complete a senior essay, which may be less extensive in scope and length than the Honors thesis but which should constitute an integration of some aspect of their study.

### Transfer of Credits:

Two courses per semester of study abroad may be applied to the concentration, up to a total of four courses (for two semesters abroad). A maximum of five courses from external venues (study abroad; transfer credits from other institutions, including summer study) may be applied to the concentration.

### Joint or Double Concentration:

Joint or double concentration programs may also be arranged. Students may also combine a concentration in Comparative Literature with a teaching certificate in English or a modern language. A student interested in such a program should consult the advisor in the Education Department (<http://www.brown.edu/academics/education>) and the advisor in Comparative Literature as early as possible (preferably by Semester V). In accordance with University policy, double concentrators are allowed a maximum overlap of two courses between concentrations.

### Comparative Literature Graduate Program

The department of Comparative Literature offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. While doctoral students may also earn the Master of Arts (A.M.) degree en route to the Ph.D., the department does not admit students into a terminal Master's degree program.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/comparative-literature>

## Courses

### COLT 0510A. Best-sellers.

Study of seven novels published within the last decade that have enjoyed broad success with reading publics in different places. What pleasures of thought and imagination do we derive from these books, and how can we express clearly our responses? What is the appeal of these best-sellers first to their home audience, then to readers in other social environments and cultures? How may we reshape our own horizons of thought in order to appreciate them? Students will be encouraged to develop their skills of literary analysis, interpretation, and critical discussion. Two lectures and one discussion section per week. Several short papers, quizzes, and a final exam.

### COLT 0510B. Caribbean Re-writes.

Through close readings of canonical European texts and rewritings of them in the twentieth-century Caribbean, we explore the literary possibilities and political implications of writing the old in a new language. Readings include Columbus's diaries alongside Carpentier's *The Harp and the Shadow* (Cuba); Shakespeare's *Tempest* with that of Aimé Césaire (Martinique); and *Jane Eyre* and *Wuthering Heights* alongside novels by Jean Rhys (Dominica) and Maryse Condé (Guadeloupe).

### COLT 0510C. The World of Lyric Poetry.

Lyric poetry is the prime mode for conveying emotion in many cultures, from ancient times to the present day. This course will survey the variety of forms and themes from the earliest texts from Greece, Rome, China and Japan, then the glories of the Renaissance and the Tang Dynasty, then move to the challenges for lyric expression in the modern world. Enrollment limited to 19 first year students.

### COLT 0510D. Poetry and Music.

Explores the collaboration between poets and composers in the twentieth century. It will primarily focus on Modern Greek composers (Hadjidakis, Theodorakis, Lagios and others) and their collaboration with numerous poets (García Lorca, Gatsos, Elytis, Neruda, Ritsos and others). These works will also be examined in depth from a literary and theoretical perspective. Enrollment limited to 19 first year students.

### COLT 0510F. Fidel Castro and Che Guevara, The Men and the Myths.

Che Guevara and Fidel Castro are among the twentieth century's most iconic figures, thanks to their roles in the Cuban Revolution and in anti-imperialist struggles across the globe. They are also among the most divisive, eliciting passionate disapproval among some and strong admiration among others. In this seminar, we will read Guevara and Castro's speeches and writings alongside literary, visual and cinematic representations of them, paying particular attention to the ways in which their lives and deaths have generated distinct interpretations, in Cuba and beyond. Open only to first-year students.

### COLT 0510G. "The Grand Tour; or a Room with a View": Italy in the Imagination of Others.

Italy has for many decades been the place to which people traveled in order to both encounter something quite alien to their own identities and yet a place where they were supposed to find themselves, indeed to construct their proper selves. This course introduces students to some of the most important texts that describe this "grand tour." We will read texts (both literary and travelogues by Goethe, De Stael, Henry James, Hawthorne, Freud, among others, as well as view films (such as "A Room With a View:") - all in order to determine the ways in which Italy "means" for the cultural imagination of Western civilization. For first year students only.

### COLT 0510I. Virgil and Milton.

We will read the *Aeneid* and *Paradise Lost* with interpretive patience. The study of fate, character, and poetics will be wedded to investigations of beauty, wonder, and nationhood. Enrollment limited to 19 first year students.

### COLT 0510K. The 1001 Nights.

Explores the origins, performance, reception, adaptation, and translation of the *1001 Nights*, one of the most beloved and influential story collections in world literature. We will spend the semester in the company of genies, princes, liars, slaves, mass murderers, orientalist, and Walt Disney, and will consider the *Nights* in the context of its various literary, artistic, and cinematic afterlives.

### COLT 0510L. What is Tragedy?

Introduction to tragedy. Readings may include Sophocles, Shakespeare, Hegel, Chekhov, Chan-wook Park, and Jia Zhangke. Enrollment limited to 19 first year students.

### COLT 0510M. Early Modern Selves: From Soliloquy to Self-Portrait.

We will study the early modern self through its manifestation in the soliloquy (Shakespeare), philosophical treatise (Descartes), early modern poetry, and self-portraiture (Rembrandt). After examining Hamlet's "To be or not to be" speech and other Shakespearean soliloquies as moments in which characters represent themselves in speech, we will turn to Descartes' view of man's essence as his thinking nature. We will then read metaphysical poetry to understand the influence of religion on the early modern self. Readings include Hamlet, Richard II and III, Taming of the Shrew, Discourse on Method, Meditations, and poetry by John Donne.

### COLT 0510N. Shakespeare (ENGL 0310A).

Interested students must register for ENGL 0310A.

### COLT 0510O. Twentieth-Century Experiments.

In this course, we will read some of the most experimental and adventurous literature of the 20th century. Instead of understanding texts as mirrors of social reality, we will consider them as laboratories—spaces for testing out, working through, or mixing up new ideas, categories, and ways of seeing and feeling. We will pay special attention to 20th-century international avant-garde movements, including Futurism, Dadaism, and Surrealism, and we will explore the relation of the literary avant-garde to the avant-garde in painting, cinema, and music.

### COLT 0510P. Reading the Renaissance.

How do these works figure the renaissance as a cultural formation? Petrarch, Rime Sparse; Boccaccio, Decameron; Castiglione, Book of the Courtier; Erasmus, Praise of Folly; Thomas More, Utopia; Machiavelli, Prince, Mandragola; Wyatt and Ronsard (poems), Spenser, Faerie Queen and Shepherdes Calender, Cervantes, Don Quixote.

### COLT 0610A. The Far Side of the Old World: Perspectives on Chinese Culture.

A survey of traditional Chinese culture focusing on the major literary and artistic achievements of six major periods in Chinese history, including philosophical texts, poetry, various forms of the fine arts, and vernacular fiction and drama. A broad range of primary materials will give the student greater insight and appreciation of Chinese culture in general and also provide a foundation for further study of East Asia in other disciplines.

### COLT 0610C. Banned Books.

An examination of literary censorship in which we read various texts forbidden for putatively violating social, religious, and political norms in particular historical and cultural contexts. We also analyze the secondary literature surrounding the banning of these ostensibly "dangerous" texts in order to theorize questions and assumptions about the power of art and the ironies generated by these debates.

### COLT 0610D. Rites of Passage.

Examines a seemingly universal theme—coming of age—by focusing on texts from disparate periods and cultures. Proposes that notions of "growing up" are profoundly inflected by issues of class, gender and race, and that the literary representation of these matters changes drastically over time. Texts from the Middle Ages to the present; authors drawn from Chrétien de Troyes, Quevedo, Prévost, Balzac, Brontë, Twain, Faulkner, Vesaas, Rhys, Satrapi and Foer. Enrollment limited to 19 first year students.

**COLT 0610E. Crisis and Identity in Mexico, 1519-1968.**

Examines four moments of crisis/critical moments for the forging of Mexican identity: the "Conquest" as viewed from both sides; the hegemonic 17th century; the Mexican Revolution as represented by diverse stakeholders; the "Mex-hippies" of the 1960s. We especially explore how key literary, historical, and essayistic writings have dealt with Mexico's past and present, with trauma and transformation. Readings include works by Carlos Fuentes, Sor Juana Inés de la Cruz, Octavio Paz, Juan Rulfo, and the indigenous Nican Mopohua on the Virgin of Guadalupe. All in English. No prerequisites.

**COLT 0610G. Literature and the American Presidency.**

We are accustomed to engaging the American presidency as a public office approached through the prism of government, political science, and the like. This course studies the presidency through a literary lens, focusing on four presidents and three literary genres: epistolography (J. Adams and Jefferson), biography (Washington) and literary analysis (Lincoln). We will also study on video the inaugurals and farewells of more recent presidents and, finally, examine non-traditional literary forms, such as pamphlets, songs, posters, broadsides, graphics, newspapers, magazines, and original documents from various presidential elections.

**COLT 0610H. Renaissance Epic.**

Explores Renaissance attempts to renew, parody, and question the classical epic tradition. The study of poetics, narrative, and imagination will be wedded to investigations of beauty, wonder, and nationhood. Authors will include Ariosto, Tasso, Ercilla, Spenser, Camões, du Bartas, and Milton.

**COLT 0610I. Introduction to Cultural Studies.**

We live in a cultural saturated with information. The messages we register, the meanings we deduce, and the knowledge upon which we ground our actions and choices require critical examination if we are to engage as thoughtful actors in our personal and civic lives. This class will encourage students to reflect on their initial impressions of and reactions to various media and will give them critical tools to examine how formal and thematic strategies work to shape and elicit our sympathies, our desires, our fears, and our beliefs. Focusing primarily on visual and written texts drawn from popular culture—video, print, film, and Web sources—students will practice their analytical skills by evaluating these texts in classroom discussions, several short writing assignments, and one longer essay. Reading the work of several cultural theorists, students will learn to analyze persuasive argumentation through an attention to rhetorical and framing devices and to recognize and decipher visual cues, enabling them to interpret texts and images and to produce coherent critical positions of their own. This class will prepare participants for college courses that require them to process knowledge and not simply acquire information.

**COLT 0610L. Murder Ink: Narratives of Crime, Discovery, and Identity.**

Examines the narrative of detection, beginning with the great dramatic whodunit (and mystery of identity) *Oedipus Rex*. Literary texts which follow a trail of knowledge, whether to establish a fact (who killed Laius?) or reveal an identity (who is Oedipus?) follow in Sophocles' footsteps. We read Sophocles' intellectual children. Readings include: *Hamlet*, *The Murders in the Rue Morgue*, *The Woman in White*, and other classic novels and plays. We also analyse seminal films of the genre, including *Laura* and *Vertigo*. Will include the twentieth-century detective story, with particular attention to women writers and the genre of the female private eye.

**COLT 0610N. Being There: Bearing Witness in Modern Times (ENGL 0710F).**

Interested students must register for ENGL 0710F.

**COLT 0610O. The Death of the Subject in Twentieth and Twenty-first Century Literature.**

Examines the condition of the subject in Western novels and plays written after 1945. Traditional markers of identity in works of literature are being eroded by globalization, split families, the invasion of science in genetics, and increased mobility. Signs of this crisis include loss of agency and individuality, various pathologies including schizophrenia, and the replacement of humans with clones. We will investigate the intricacies of the derailment of the subject and how literary form is affected in novels by Beckett, Coetzee, W. G. Sebald, Kazuo Ishiguro, Michel Houellebecq, Chuck Palahniuk, and in plays by Caryl Churchill.

**COLT 0610P. Stories and Storytelling.**

An introduction to stories, how they are constructed, and how they are told. We will explore the role of storytellers in the creation of a story, the idea of "plot," the forms that stories take, and the category of fiction itself—in essence, how and why stories are made, and made up. Our discussion will range from topics such as fictional forms, the acts of reading and of telling, the role of memory, and the invention of self, to questions of time and duration. Texts examined will be drawn from a variety of genres, periods, and cultures.

**COLT 0610Q. Before Wikipedia.**

How did humans organize knowledge before Wikipedia? This course explores the fascinating history of encyclopedic texts, archives, and databases in various cultural contexts. We consider issues of book history, the classification of knowledge, and the obsession to collect, compile, and document everything knowable and unknowable in both real and fictional encyclopedias. The use of Wikipedia in this course is not only tolerated but required. Students will be responsible for originating, composing, and curating new Wikipedia entries over the course of the semester.

**COLT 0610S. Literature and Knowledge.**

What is knowledge? How do we know what we know? We will read literary texts concerned with these questions to consider how knowledge relates to power, and how deception, stupidity, and mystification force us to question what we know. Readings include Austen, Hawthorne, Melville, Flaubert, James, and Schnitzler.

**COLT 0610T. Chinese Empire and Literature.**

This course explores ancient and modern approaches to empire and imperialism, focusing on China from the Qin (221-206 BCE) establishment of unified empire through the Qing (1644-1911 CE) confrontation with the British and other European empires. Emphasis will be placed on the relation between imperial expansion and literary production, and the role of Chinese and non-Chinese literature in representing China's multilingual and multiethnic past. Texts include China's most famous work of historical literature, Sima Qian's *Shiji*; poems, short stories, tomb sculptures, contemporary film; as well as critical essays on empire, colonization, and cross-cultural heritage.

**COLT 0610U. Altered Cinema: The Cultural Politics of Film Revision (MCM 0901R).**

Interested students must register for MCM 0901R.

**COLT 0610V. Claims of Fiction (ENGL 0150X).**

Interested students must register for ENGL 0150X.

**COLT 0610W. Getting Emotional: Passionate Theories (ENGL 0500Q).**

Interested students must register for ENGL 0500Q.

**COLT 0610Y. Women's Writing in the Arab World.**

This course examines Arab women's writing through the lenses of both Arabic and Western feminist theory and criticism. Beginning with a survey of pre-modern female literary personae in Arabic (the elegist, the mystic, the singing slave), we will then examine major figures in the early modern feminist movement, modernist poetry, autobiography, film, and the novel. No Arabic required; supplemental Arabic section may be offered at the discretion of the professor. Texts by Etel Adnan, Salwa Bakr, Hoda Barakat, Assia Djebar, Nazik al-Mala'ika, Alifa Rifaat, Hanan al-Shaykh, Miral al-Tahawy, Fadwa Tuqan, Adania Shibli. Films by Moufida Tlati, Annemarie Jacir.

**COLT 0610Z. Intersections of Race and Culture in the West.**

This course will introduce students to ways in which knowledge, power and race have been interrelated in understandings of culture and in the writing and reception of literature. Beginning in antiquity, we will trace a history of political, ethnic, and social groups' perceptions and categorizations of each other and of shifts in the definitions of "race" and "culture" as concepts. We will then consider changing ideas of alliance, belonging and power, in the context of contemporary American and global politics. The course will draw from readings across various languages, and from the work and lectures of several guest speakers.

**COLT 0710A. Women's Words: Writing in Medieval Europe and Japan.**

An introduction to women poets, dramatists, and prose writers from medieval court cultures, with an emphasis on what these authors show us about their educational, social, moral/spiritual environment and civilization. What did the pen or writing brush enable them to express and achieve? How were they able to negotiate the gaps between a male classical literary language and their own vernacular speech? Readings may include works by Christine de Pizan, Dhuoda, Heloise, Hildegard of Bingen, Hrotsvitha, Julian of Norwich, Margery Kempe, Marie de France, Murasaki Shikibu, Sei Shonagon, and Trotula plus shorter texts written by both men and women. Instructor permission required.

**COLT 0710C. Introduction to Scandinavian Literature.**

An introduction to major works of Scandinavian writers, painters and filmmakers over the past 150 years. Figures include Kierkegaard, Ibsen, Strindberg, Munch, Hamsun, Josephson, Södergran, Lagerkvist, Vesaas, Cronqvist, Bergman, August and Vinterberg, as well as children's books by Astrid Lindgren and Tove Jansson.

**COLT 0710D. Inventing the Renaissance.**

The invention of the Renaissance as a cultural formation and as a part of the western cultural imaginary. We will consider the so-called "discovery of man," humanism and the recovery of the classical past, the production of scriptural identity or the "bibliographic ego," courtiership, the formation of the early modern state and the discovery of the "new world" through readings of major English and continental writers of the period.

**COLT 0710E. Japanese Literature and Society: Historical Survey of Japanese Literature.**

A reading of the major literary monuments, from early *waka* to *Genji* to the fiction of Ōe Kenzaburō. Surveys Japanese literary production from the 8th century to the present, examining the formation of literary genres, aesthetic values, and reading habits of successive eras in the context of political, social, and cultural development. No prerequisites.

**COLT 0710F. Latin America: The French Connection.**

Raises questions of intertextuality between French and Latin American literature, focusing on how each represents the other. Beginning in the late nineteenth century, questions aesthetic categories of the real, the surreal and the marvelous/magical real; and literary responses to World War II and the Dirty War, the 1968 student protests in Paris and Mexico City, feminist movements, and globalization.

**COLT 0710H. Mexican *lettres*, 1519-1968.**

The course approaches the history of ideas in Mexico by examining four critical moments/moments of crisis in the country's development. We focus on the issues and burdens of the past as conceptualized in historical, essayistic, and literary writings of the Conquest, the Baroque, the Mexican Revolution, and the iconoclastic 1960s. In English.

**COLT 0710I. New Worlds: Reading Spaces and Places in Colonial Latin America.**

An interdisciplinary journey-combining history, literature, art, film, architecture, cartography-through representations of the many worlds that comprised the colonial Hispanic New World. We traverse the paradisiacal Antilles, the U.S. Southwest, Tenochtitlan/Mexico City, Lima, Potosí. We read European, indigenous, and Creole writers, including: Columbus, Las Casas, Bernal Díaz, Aztec poets, Guaman Poma, Sor Juana. In English. Excellent preparation for study abroad in Latin America. Enrollment limited to 19 first year students.

**COLT 0710L. Storytelling: Verbal Art as Performance.**

This course offers a comparative selection of oral and written folktales from Arabic, Chinese, African, North American, and European traditions in translation in order to study the formation and reception of storytelling in different socio-cultural contexts (Western and non-Western, contemporary and traditional). We will consider storytelling and associated performance practice in the light of a variety of theoretical disciplines (e.g., rhetoric, folklore, sociolinguistics, performance studies, literary criticism, narratology). There will be lectures, presentations, and videorecordings.

**COLT 0710N. A Comparative Introduction to the Literatures of the Americas.**

Considers the common links between the diverse literatures of North and South America, approached in relation to one another rather than to Eurocentric paradigms. Focuses on the treatment of such topics as the representation of the past and the self, the role of memory and the imagination, the nature of literary language, and the questions of alienation, colonialism and post-colonialism, communication versus silence, and fiction versus history in the works of selected writers from North and Latin America, including García-Márquez, Faulkner, Cortázar, Allende, Lispector, Morrison, Doctorow, Rosa, and DeLillo. Enrollment limited to 15 first year students.

**COLT 0710P. Women and Writing in Medieval France and Japan.**

An introduction to women poets and prose writers from early court cultures, with emphasis on what these authors show us about their social environment and civilization. What did the pen or writing brush enable them to express and achieve? How were they able to negotiate the gaps between a male classical literary language and their own vernacular speech? What kinds of literary approaches and conventions were perfected by them? How did they view their personal social status? What educational, moral, and spiritual concerns did they voice? Readings: works by Murasaki Shikibu, Sei Shōnagon, Heloise, Marie de France, Christin de Pizan, plus shorter texts written by both men and women between 700 and 1450 C.E.

**COLT 0710Q. The Odyssey in Literature and Film.**

Examines reincarnations of the Homeric figure of Odysseus in contemporary literatures and film as modernist figure, postcolonial subject, and existentialist hero. How is the Odysseus myth altered from culture to culture (Greece, Rome, Ireland, the Caribbean)? How is it re-visioned in different historical periods and from different perspectives (feminist, marxist, postcolonial) and genres (epic, poetry, the novel, film, drama)? Major authors include Homer, Virgil, Tennyson, Joyce, Kazantzakis, Cavafy, Seferis, Atwood, Walcott; criticism by Bakhtin, Edith Hall, Adorno, Derrida. Films include works by Angelopoulos, the Coen brothers; Singer's *Usual Suspects*, Mendes' *James Bond* offering *Skyfall*, and Kubrick's 2001: *Space Odyssey*.

**COLT 0710S. Words and Images: A Survey of Japanese Literature.**

This survey course on Japanese literature will introduce works ranging from the 7th century AD to the present. This course will provide a historical survey of classic and modern texts, while paying attention to the close relationship Japanese literature has had with visual culture from the calligraphic poems of the Heian period to the postwar influence of manga upon literature.

**COLT 0710U. Leaves of Words: A Survey of Japanese Literature.**

While Zen, sushi and animé have become commonplaces in contemporary American parlance, Japanese literature and culture remain static enigmas, conjuring up visions of stolid-faced samurai, cherry blossoms, and post-modern dystopias. In this survey of Japanese literary works from the 8th century to the present, we will examine the development of canons of literature, both poetry and prose, and aesthetics in specific social contexts in Japanese cultural history. Also, we will consider their re-evaluations in subsequent eras, raising questions about the stability and continuity of such traditions. In addition to readings, we will briefly look at film, *manga* and anime.

**COLT 0710V. The Arab World Writes Itself: Contemporary Arabic Literature.**

In his seminal work *Orientalism*, Edward Said paraphrases Marx, and suggests that Orientalist attitudes towards the Middle East have produced a discourse in which the East must always be spoken for, and not allowed to represent itself. Said's argument has become even more relevant in the past decade, given the growing interest in the Middle East as a region in the US, coupled with a dearth of spaces where voices from the region can offer their own narratives. Designed as an introductory course to contemporary Arabic Literature, this course includes a variety of readings in translation and films from across the Arab world; it foregoes an intense exploration of one national literature for a more varied survey of the textual output of several countries. We will attempt to situate each literature within its national context and within the larger pan-Arab, regional and international context while being sensitive to the political, geographical, and historical foci that have influenced these texts, including the rise of Arab nationalism and the independence struggles of the mid-twentieth century, and immigration. We will also examine—and hopefully question—some of the discursive themes and conceptual frames that have been traditionally used to think about contemporary Arabic literature. Enrollment limited to 20.

**COLT 0710W. Cultures of Colonialism: Palestine/Israel.**

Examines the history and literary production of the Israeli-Palestinian colonial encounter from 1948 to the present. Aims to delineate the deep links between domestic culture and colonialism in Israel-Palestine by raising questions about statehood, dispossession, and exclusion in the imaginaries of both peoples and by examining novels in relation to the ethical and political imperatives of settler-colonial dynamics. Authors include: David Grossman, Emile Habibi, Jabra I. Jabra, Sahar Khalifah, Kanafani, Amos Oz, and A. B. Yehoshua. Sophomore seminar. Enrollment limited to 20 sophomores.

**COLT 0710X. Fan Fiction.**

What is imitation (sincerest form of flattery) to literary canons? Vergil's *Aeneid* appropriated Aeneas from the *Iliad*. Joyce's *Ulysses* modernized the *Odyssey*. Admiration as a source of inspiration is a major force in the evolution of fiction. "Fan Fiction" explores intriguing characters in greater detail and new contexts, allowing them new lives in contemporary imagination. This course presents pairs or sets of works that are explicitly linked by the intimate relation of imitation. Classic readings will be paired with their mostly contemporary updates, including *Pride and Prejudice/Murder at Pemberley*, *Heart of Darkness/State of Wonder*, and *Monkey/Tripmaster Monkey*.

**COLT 0710Z. Comedy from Athens to Hollywood.**

This course will look at ancient comedy from its birth in Athens and Rome through Renaissance incarnations to the 19th and 20th century, including novels and films as well as plays. We will survey the main topics of comedy, from Aristophanes' focus on the absurdities of daily and political life in Athens to the Roman codification of a genre of everyman in love and in trouble. We will also examine how later writers and filmmakers use both traditions to give comedy its subversive power of social commentary.

**COLT 0711A. Epics of India (CLAS 0820).**

Interested students must register for CLAS 0820.

**COLT 0711B. Ishiguro, Amongst Others (ENGL 0710L).**

Interested students must register for ENGL 0710L.

**COLT 0711C. Postcolonial Tales of Transition (ENGL 0710E).**

Interested students must register for ENGL 0710E.

**COLT 0711D. Comparative Approaches to the Literatures of Brazil and the United States (POBS 0850).**

Interested students must register for POBS 0850.

**COLT 0711E. Reading and Writing African Gender.**

In this course, we will examine ways that gender and literary genre figure in postcolonial African writing, and in its reception. We will closely read novels by four significant women authors: Mariama Bâ (Senegal), Zoe Wicomb (South Africa), Tsitsi Dangarembga (Zimbabwe), and Chimamanda Ngozi Adichie (Nigeria). We will also read short, lesser-known texts, such as Richard Rive's "Riva" and Binyavanga Wainaina's "The Missing Chapter," that question boundaries of gender, genre, and sexuality.

**COLT 0711F. Arabic Literature: The Qur'an to Darwish.**

The course offers an introduction to Arabic literature from ancient Arabian poetry to contemporary Palestinian novels. Topics include desert poetry, the Qur'an, medieval Muslim court literature, popular literature, Arabic literary theory, and the emergence of modern Western genres, with a focus on Palestinian literature as a test-case. We will engage first-hand with Imru' al-Qays' *Qifa Nabki*, al-Jahiz's *Books of Misers*, *Ibn Hazm's theories about love*, *Mahmoud Darwish's I Come from There*, and *Emile Habibi's The Pessoptimist*. All readings are in English.

**COLT 0711G. The Realist Novel (Europe, America, Latin America).**

How did the 19th-century novel shift from at times idealistic descriptions of domestic life to realist representations of individual, psychological, social, and political "reality"? In this course on the realist novel, we will address how literary realism attempted a description of the world "as it was": what were the social and political questions the realist novel took up? How did it conceive gender and sexuality, and how did it account for issues of social inequality, colonialism, and other types of bourgeois ideology? What national projects did non-European novels engage in, particularly in Latin America and the United States?

**COLT 0711H. The Arabic Novel.**

This course offers students both a foundation in the "classics" of Arabic fiction and a foray into recent experimentations with form and language. We'll spend the first half of the semester with Egyptian Nobel laureate Naguib Mahfouz, tracing his evolution from Victor Hugo-esque chronicler of life in Cairo to Faulknerian experimentalist. We'll then examine the works of authors who deem themselves "post-Mahfouzian," including Gamal al-Ghitani, Sonallah Ibrahim, Elias Khoury, and Hanan al-Shaykh. Students will emerge with a transnational, inclusive understanding of the Middle East glimpsed through the region's literature. No Arabic necessary; students with Arabic may read in the original.

**COLT 0711J. The Art of Revolution in Latin America.**

This course considers the role of the arts—visual, literature, music, film, and performance—in Latin American social movements. We will study the work of artists and activists in the Mexican Revolution, Cuban Revolution, Nicaraguan Revolution, South American dictatorship resistances, and contemporary social movements such as the Chilean student movement and narco-trafficking. We will trace the use of the arts in organizing, social critique, collective action, and propaganda, and how they have shaped ideology and culture in Latin America and beyond.

**COLT 0711K. Arab Voices beyond the Middle East: Cultural Encounters in Europe and the Americas.**

This course introduces students to literature by Arabs writing outside of their country of origin and in relation to a new cultural landscape, in the US, Britain, Canada, and Brazil. We will explore, through poems, short stories, novels, films, and music, the themes of exile, assimilation, gender, sexuality and war in transnational and transcultural contexts. Authors include: Rawi Haje, Etel Adnan, Rabih Alameddine, Ahdaf Sueif, and Saad Elkhadem.

**COLT 0711M. Off the Beaten Path: A Survey of Modern Japanese Literature (EAST 0800).**

Interested students must register for EAST 0800.

**COLT 0810A. Ancient Greek Myth in Modern Poetry.**

Various responses to ancient Greek myths by poets in the Western tradition, especially modern Greek. Considers how poets since 1800 have approached, rewritten, or subverted the classical version of myths, such as those of Eurydice, Helen, Orpheus, Persephone, Penelope, and Ulysses. Emphasizes the challenges posed by the past, issues of cultural and political context, and questions of gender. Readings in English.

**COLT 0810C. Arthurian Tales and Romances of the Middle Ages.**

Why did stories of King Arthur, his knights, and their ladies fascinate writers and audiences throughout Europe? What can Arthurian quests, marvels, and love adventures tell us about successive pre-modern societies that shaped them? What are our responses to their cultural beliefs and forms of playful make-believe? Readings (in modern translation) of medieval Latin, French, English, Welsh, and German texts.

**COLT 0810D. City (B)Lights.**

Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences, including sociology, political economy, urban ecology. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images, American cities and literary works will be brought to the foreground.

**COLT 0810E. Confession, Autobiography, Testimony.**

Does writing a life give it coherence and veracity, or create a fiction? What is the relationship between first-person narrative and truth, and between authorship and authority? How does the form of a first-person text -- a religious confession, a personal journal, a political denunciation, a collective memoir -- affect the telling? Must the reader of such an account be "you" to the teller's "I", and how does the intimacy of this relationship shape the experience of reading? In this course, we test the limits of self-narration against ethical and physical limits, reading first-person narratives that purport to be non-fictional. We will read accounts of different experiences -- social and sexual transgression, suffering and perpetrating violence, slavery -- and explore both the possibilities and duplicities of writing as "I".

**COLT 0810F. Desire and the Marketplace.**

Studies love and desire as the interplay between men, women, and money in mercantilized societies, in seventeenth century Japan, eighteenth century England, nineteenth century France, and twentieth century Africa. Novels featuring female protagonists by Saikaku, Defoe, Flaubert, Emecheta and Bâ, readings in economic and feminist theory, and visual art--Japanese woodcuts, Hogarth, nineteenth century French painting, West African arts.

**COLT 0810G. Equity Law Literature Philosophy.**

Justice, rigorously applied, yields injustice. This paradox haunted Western aspirations toward legal and political justice from antiquity to the Renaissance. It necessitated the formulation of a complementary principle, equity, whose job it was to correct or supplement the law in cases where the strict application of it would lead to unfairness. In England, equity was enforced by a separate system of law, and it was a weighty, ambiguous term of great emotional force, with a particular appeal to Shakespeare. After its decline, Dickens and Kafka wrote two of the greatest literary works set in a world without equity.

**COLT 0810H. How Not to Be a Hero.**

One of Shakespeare's greatest plays is about a character who was an irredeemable failure: Coriolanus. What can failure teach us? What kind of strength does a language of failure possess? We will read the ancient sources themselves (Livy, Lucian, Plutarch), and modern adaptations of these stories (Bertolt Brecht, T. S. Eliot, Günter Grass). We will also look at other "exemplary" failures who inspired Shakespeare and later literature, including Lucullus and Timon.

**COLT 0810I. Tales and Talemakers of the Non-Western World.**

Examines many forms of storytelling in Asia, from the *Epic of Gilgamesh* and the *Arabian Nights Entertainments* to works of history and fiction in China and Japan. The material is intended to follow the evolution of non-western narratives from mythological, historical and fictional sources in a variety of cultural contexts. Topics will include myth and ritual, the problem of epic, tales of love and the fantastic, etc.

**COLT 0810J. The Colonial and Postcolonial Marvelous.**

A celebration and critique of the marvelous in South American and related literatures (U.S., Caribbean). We follow the marvelous from European exoticizing of the New World during the colonial period to its postcolonial incarnations in 'magical realism' and beyond. We attend particularly to the politics and marketing of the marvelous, in writers including Borges, Chamoiseau, Columbus, García Márquez, Fuguet. Reading in English or Spanish.

**COLT 0810M. Uncanny Tales: Narratives of Repetition and Interruption.**

What makes stories creepy? Close readings of short narratives with special attention to how formal and thematic elements interact to produce the effects of uncertainty, anxiety and incoherence peculiar to "the uncanny." Topics include: the representation of the self in images of the arts; the representation of speech; instabilities of identity and spatial and temporal boundaries; doubles, monsters, automata and hybrids. Texts selected from: Walpole, Shelley, Hoffmann, Kleist, Poe, Dostoyevsky, Freud, Wilde, Cortazar, Kafka, Lovecraft.

**COLT 0810O. Civilization and Its Discontents.**

Investigates the age-old tension between order and chaos as a central dynamic in the making and interpretation of literature. Texts will be drawn from drama, fiction and poetry from Antiquity to the present. Authors include Sophocles, Shakespeare, Racine, Beckett, Prevost, Bronte, Faulkner, Morrison, Blake, Whitman, Dickinson, and Rich.

**COLT 0810P. Moderns and Primitives.**

Modernism has been called a 'Renaissance of the Archaic'. We will read from the major works of Anglo-American modernism (Eliot, Joyce, Lawrence, Pound), focusing on their attitudes toward the primitive and the archaic. In addition, we will examine anthropological theories from the Victorian period to Durkheim, explore primitivism in modernist music and painting, and read about recent controversies surrounding modernism and primitivism.

**COLT 0810U. Lovers, Slaves, Kings and Knaves: Major Plays in Western Literature.**

This course will introduce students to representative tragedies and comedies, focusing in particular upon their development as literary genres; continuities and variations of character, plot, and theme; stage and performance conventions; and the classical tradition. Readings will include Aeschylus, Sophocles, Euripides, Aristophanes, Shakespeare, Racine, Eilde, Ibsen, and Vogel.

**COLT 0810W. Caribbean Fiction.**

Through fiction and film originally in Spanish, French or English and theories of the postcolonial and postmodern, we explore how images of the Caribbean have been constructed and complicated: as lands of abundance, scenes of historical violence and natural disaster, destinations for colonial and modern-day tourists. Readings include Carpentier, Benítez Rojo, Santos Febres, Chamoiseau, Condé, Kincaid, Brathwaite.

**COLT 0810X. European Renaissances.**

Just what is the European renaissance and when and how did it happen and who decided? Let's look at the renaissances of Petrarch, Boccaccio, and Giotto, of Erasmu, and Thomas More and Holbein, of Machiavelli and Castiglione and Raphael. Are these renaissances intellectual, aesthetic, visual, rhetorical? Did they happen in the fourteenth century, the fifteenth, the sixteenth? Or in the nineteenth when they were first clearly described?

**COLT 0810Z. Myth and Literature.**

Authors throughout the ages have been fascinated by ancient mythology and have incorporated elements of it into their texts, often modifying commenting on or even destroying the original myth in the process. This course will investigate the values, dangers and limitations of myth-making/using in literature. Primary texts will include major works by Milton, Goethe, Kleist, Racine and Kafka. Texts will be supplemented by secondary readings and multimedia elements. Students will learn to question and engage critically with the historical, cultural, literary and scientific frontiers that separate myth and reality. Assignments will include two short papers and a final paper.

**COLT 0811A. Introduction to Modernism: Past, Future, Exile, Home (ENGL 0700F).**

Interested students must register for ENGL 0700F.

**COLT 0811C. Belonging and Displacement: Cross-Cultural Identities (POBS 0810).**

Interested students must register for POBS 0810.

**COLT 0811F. Writing War (ENGL 0100M).**

Interested students must register for ENGL 0100M.

**COLT 0811G. Literature, Trauma, and War (ENGL 0500L).**

Interested students must register for ENGL 0500L.

**COLT 0811H. Monuments and Monsters: Greek Literature and Archaeology.**

Surveys Greek archaeology from the Bronze Age to the Hellenistic period, and reads Greek literature roughly contemporary with the archaeological period surveyed, with an emphasis on epic and drama. No previous knowledge or prerequisites needed.

**COLT 0811I. Classical Mythology and the Western Tradition.**

Reads classical texts that expound the fundamental mythological stories and elements of the Western tradition, then will read selected texts from the Renaissance through the twentieth century that utilize these myths. Ancient texts covered will include the *Epic of Gilgamesh*, Hesiod's *Theogony* and *Works and Days*, Ovid's *Metamorphoses*, and plays by Aeschylus, Sophocles, and Euripides. Later texts will include Shakespeare's *Venus and Adonis* and *Rape of Lucrece*, Milton's "Lycidas," and lyric poetry by Keats, Shelley, Browning, Swinburne, Rilke, Auden, and Yeats. This course is suitable for anyone wishing to understand the classical background to Western literature.

**COLT 0811M. Planes, Trains, and Automobiles: Travel and Transport in Modern Literature and the Arts.**

This course studies how new modes of transportation and the experiences they enabled stood as symbols of both the fears and joys of rapid modernization in 19th- and 20th-century literature, film, and visual art. How did the speeding locomotive, the plane's aerial view, and the personal freedom of the automobile transform the ways people traversed space, experienced time, traded, and came into contact with one another? In formal terms, how did these experiences inspire innovations in the media we examine by Whitman, Kipling, Baudelaire, Marinetti, Brecht, Woolf, Huxley, Stein, Ruttman, Wegman, Picabia, Duchamp and others? No prerequisites.

**COLT 0811N. Poetics of Madness: Aspects of Literary Insanity.**

This course surveys a wide range of literary texts with a view to tracing the long process of transition from pre-modern to modern conceptions of madness on the one hand, and to identifying the symbolic logic and discursive modalities that underlie its respective representations on the other. Spanning several centuries of artistic preoccupation with the alienated mind, these texts will serve as points of reference in a focused exploration of the relationship between insanity and literature, as it has been shaped by social dynamics, cultural norms, philosophical ideas, and medical theories. Authors include Euripides, Erasmus, Shelley, Dostoyevsky, Stevenson, and Woolf.

**COLT 0811Q. Mediterranean Cities.**

Athens, Istanbul, Alexandria: three iconic cities of the Levant that will serve as points of reference in a focused exploration of East Mediterranean history and culture. Reads and discusses a number of texts that span several decades and a wide range of styles and genres – from realism to postmodernism and from autobiography to thriller – but exhibit a common interest in the urban landscape and its relationship to basic aspects of human existence: identity and ideology, memory and desire, isolation and connection, hope and fear, life and death. Authors include Theotokas, Seferis, Taktis, Durrell, Mahfouz, Kharrat, Tanpinar, Shafak, Altun.

**COLT 0811T. Statelessness and Global Media: Citizens, Foreigners, Aliens (MCM 0901K).**

Interested students must register for MCM 0901K.

**COLT 0811W. The Myth of Venice in Literature: Memory, Desire and Death.**

This course will explore the myth of Venice in literature: focusing on the *topos* of Venice in the genre of travel writing, we will study the theme of liberty and decadence associated with Venice's theatrical and political culture. Readings will include Shakespeare's *The Merchant of Venice*, excerpts from De Brosses's *Travels through Italy*, Goldoni's *Memoirs*, Rousseau's *Confessions*, and Casanova's *Histoire de ma vie*. We will also study the influence of these accounts on the Romantic poets (Goethe, Wordsworth, Byron, Shelley, and Musset), and modernity (Henry James's *The Aspern Papers*, Thomas Mann's *Death in Venice*, Donna Leone's *Death at the Fenice*).

**COLT 0811Y. Great Jewish Books (JUDS 0681).**

Interested students must register for JUDS 0681.

**COLT 0811Z. Paradise, Periphery, Prison?: The Island in the Western Imaginary.**

Paradise, periphery, or prison? The representation of the island has been described as imaginary and not actual, mythological and not geographical. Examines the fascination with islands in the western cultural imaginary. Selective readings from literature, film and historical texts focus on ways in which island spaces have been represented in diverse social, national, imperial contexts as well as the effect of such projections on the native islanders, their visitors and often subjugators. Authors may include Homer, Plato, Marco Polo, Mandeville, Darwin, Defoe, Tournier, Kincaid, Kafka, Durrell, Seferis; theoretical works drawn from critical geography, postcolonialism, and the field of island studies.

**COLT 0812A. Hamlet Post-Hamlet.**

Shakespeare's *Hamlet* is perhaps the most widely read, performed, adapted, parodied and imitated literary text of the western tradition. In this seminar we will begin by reading/re-reading the play before turning to a number of appropriations of Shakespeare, both in the west and non-west, in order to address social and aesthetic issues including questions of meaning and interpretation, intertextuality and cultural translation. First Year Seminar. Enrollment limited to 19.

**COLT 0812B. What is Colonialism? Archives, Texts and Images.**

Through a close reading of a variety of texts and images from 16th-19th century we will study the transformation of lands and people into appropriable objects and the formation of political regimes in and through different colonial projects. We will follow the encoding of slavery in literary works, in the corpus of laws, in travelers' visual renditions and in the bodies of people. We will use the archive as a source and a site for the production of knowledge. Students will create small textual and visual archives around different topics, and will use them in writing their final work.

**COLT 0812D. Mythology of India (CLAS 0850).**

Interested students must register for CLAS 0850.

**COLT 0812E. God and Poetry (JUDS 0820).**

Interested students must register for JUDS 0820.

**COLT 0812G. The Palestinian-Israeli Conflict in History, Literature, Film.**

An examination of the Palestinian-Israeli conflict through the lens of cultural production. The course will explore the history of the conflict, from the 1947 partition of Palestine to the second Intifada in 2005, through major literary works and films juxtaposed with cultural and historical texts. We will discuss the way that literature and film provide us with humanistic and counterhegemonic narratives, interrogating issues such as nationalism, ethnicity, gender, colonialism, collective trauma and cultural resistance. Exploring the tension between historic and aesthetic production, we will look at how literary and cinematic works challenge, re-imagine and supplement political accounts of the conflict.

**COLT 0812K. Film Classics: The Greeks on the Silver Screen (MGRK 0810).**

Interested students must register for MGRK 0810.

**COLT 0812M. Hamlet Post-Hamlet (ENGL 0150Z).**

Interested students must register for ENGL 0150Z.

**COLT 0812N. Film Classics: The Greeks on the Silver Screen (MGRK 0810).**

Interested students must register for MGRK 0810.

**COLT 0812P. Banned Books of Middle East.**

From Danish cartoons and fatwas to student protests and the stabbing of a Nobel laureate, in this course we will study several literary scandals that have rocked the Middle East since the mid-twentieth century. Our focus will be not only on the content and form of the texts themselves, but also on the historical, political, social, and cultural circumstances in which literature comes to have meaning for particular social and religious communities. Texts by Naguib Mahfouz, Sonallah Ibrahim, Salman Rushdie, Ahmed Naji, Mohammed Choukri, Magdy al-Shafee, Susan Abulhawa.

**COLT 1210. Introduction to the Theory of Literature.**

An historical introduction to problems of literary theory from the classical to the postmodern. Issues to be examined include mimesis, rhetoric, hermeneutics, history, psychoanalysis, formalisms and ideological criticism (questions of race, gender, sexuality, postcolonialism). Primarily for advanced undergraduates. Lectures, discussions; several short papers.

**COLT 1310B. Classics of Indian Literature (CLAS 1160).**

Interested students must register for CLAS 1160.

**COLT 1310C. Twentieth-Century Western Theatre and Performance (TAPS 1250).**

Interested students must register for TAPS 1250.

**COLT 1310D. Between Gods and Beasts: The Renaissance Ovid (ENGL 1360S).**

Interested students must register for ENGL 1360S.

**COLT 1310E. A Classical Islamic Education: Readings in Arabic Literature.**

This seminar introduces students to the essential texts of a classical education in the Arabic-Islamic world. What works of poetry, literary criticism, belletristic prose, biography, geography, history, and other disciplines were considered staples of a well-rounded education in medieval Baghdad, Cairo, Damascus, or Fez? Emphasis will be placed on close and patient readings of primary sources. At least three years of Arabic required.

**COLT 1310G. Silk Road Fictions.**

This course introduces students to East-West comparative work. We will explore the history and politics of different methods of literary comparison, and diverse definitions of East and West. In particular we will ask how assumptions of cultural contact or isolation shape the way we bring together, say, a Chinese and a Greek poem, or interpret a documentary film about modern Indonesia. Themes will include: the "Silk Road," as a historical framework of cultural exchange across Afro-Eurasia; the "Axial Age" of independent civilizations; Orientalism; Hellenism; Pan-Asianism. The filmmaker of *The Act of Killing* will visit.

**COLT 1310H. Classics of Indian Literature (CLAS 1160).**

Interested students must register for CLAS 1160.

**COLT 1310I. Modern African Literature (ENGL1710J).**

Interested students must register for ENGL 1710J.

**COLT 1310K. History of the Romance Languages (FREN 1020B).**

Interested students must register for FREN 1020B.

**COLT 1310L. Political Commitment in Modern Arabic Literature.**

This course will explore the history of and debates surrounding political consciousness and commitment in modern Arabic literature. We will trace the diverse literary strategies by which authors, living under difficult political circumstances, expressed their criticisms and envisioned social and political justice. Beginning in the mid-20th century and continuing to the present, we will read and discuss landmark works of Arabic fiction in translation, and the debates that surround them. Authors include: Etel Adnan, Sonallah Ibrahim, Sahar Khalifeh, Tayeb Salih, and Hasan Blasim.

**COLT 1310N. Global Modernism and Crisis.**

The early twentieth century was marked by a proliferation of crises in politics, the economy, language, indeed in the very fabric of society. This interdisciplinary course will insist on the global dimension of crisis, analyzing how modernist artists in the metropolis and the periphery represented this situation in different, yet overlapping ways. We will also examine how modernist works provide unique ways of thinking about what is lost in a moment of crisis and what potential may arise out of it. Authors will include: Eliot, Huidobro, Dos Passos, Woolf, Galvão, Arlt and Faulkner.

**COLT 1330M. Transatlantic Surrealisms (FREN 1330E).**

Interested students must register for FREN 1330E.

**COLT 1410A. All the World's a Stage: Seventeenth-Century Drama.**

Readings of representative English and continental plays of the 17th century including Shakespeare, Jonson, Corneille, Molière, Tasso, Calderon, and others. How do dramatists represent and negotiate oppositions between art and nature, imagination and reason, myth and history, freedom and fate through dramatic form and metaphor? Why is the stage such a powerful metaphor for the world?

**COLT 1410B. Chinese Opera: Aesthetics and Politics of the Performing Body.**

Explores traditional Chinese drama, which has always been a music theater, from the perspective of contemporary cultural theory, and in a comparative and interdisciplinary context. Analyzing classical plays in relation to their staging in today's regional operas, this course will first examine the dialectics of "prettiness and artistry" in traditional Chinese theater aesthetics and its implications in gender politics. It will then move on to investigate issues of cross-dressing and erotic desire in Chinese drama of the late imperial period in comparison with that of early modern England. Lastly, the ramifications of Chinese opera as a national imagination in modern cultural politics, as embodied in the play *M. Butterfly*, the film *Farewell My Concubine*, and the Beijing opera version of *Turandot*, will be addressed.

**COLT 1410C. Chinese Theatre in the Mao Years.**

This course focuses on two major issues: policing traditional theater and "model revolutionary drama" as "a new proletarian culture." The course will begin with a study of Mao Zedong's ideas on literature and art in the light of contemporary cultural theory. It will then look at examples of the "new opera" and "new history play," examining them in relation to a complex of censorship issues concerning the exercise of political power in administering human life and the body, literature and drama as political representation, and the hermeneutics of censorship.

**COLT 1410D. Dramatic Literature and Theoretical Practice in Eighteenth-Century England.**

An introduction to the dramatic literature of 18th-century England in the context of contemporary theatrical conventions and innovations. Plays read alongside treatises on acting techniques, stage design, and contemporary theatrical pamphlet-debates. The sociopolitical contexts of the London patent theaters and the coexistent "illegitimate" entertainments are explored, as well as the influential effects of Continental theatrical theory and innovation.

**COLT 1410E. Japanese Theatre: from Dengaku to De Sade.**

Surveys traditional Japanese theatre from the lofty medieval Nō drama to the more popular genres of Jōruri (puppet theatre) and Kabuki in the Edo period (1600-1868). Through playscripts, related secondary criticism, videotapes, and films, we will examine the function of spectacle and theatre, the problem of representation or mimesis, the notion of audience, and the relation of text to performance. Concludes with more recent examples of Japanese drama and performance.

**COLT 1410F. Medieval Drama.**

How drama developed in northwestern Europe between the tenth and early sixteenth century—from liturgical tropes and miracle plays to mystery cycles and morality plays, from popular feasts and minstrel performances to fool's plays, farces, and other secular comedies. Emphasis on the cultural context and social functions of dramatic games and performances in premodern Europe.

**COLT 1410K. European Early Modern Drama.**

An introduction to early modern drama in the French, Italian, Spanish, and English traditions. The goal is to explore a wide range of imaginative impulses in the Renaissance and Baroque periods. Readings will include plays by Corneille, Racine, Calderón, Lope de Vega, Shakespeare, Machiavelli, and Molière.

**COLT 1410L. Philosophy and Tragedy.**

Explores the intersection of philosophy and tragedy in western literature. Readings may include Sophocles, Plato, Aristotle, Shakespeare, Hegel, and Nietzsche.

**COLT 1410M. Shakespeare and Philosophy.**

Explores the relationship between Shakespeare and philosophy. Readings include philosophers who have written about Shakespeare (Hegel, Nietzsche, Cavell, and others), as well as philosophers who may illuminate interpretive problems in Shakespeare (Plato, Seneca, Spinoza, and others).

**COLT 1410N. Found in Translation: The Adaptation of Literature to Film in Japan.**

Contrasting the demands of the text versus the screen, we will read eight to ten works of modern Japanese literature and view the film versions of each in order to discuss the problem of translation from one medium to another. Possible works for inclusion are *Rashomon*, *Harp of Burma*, *Woman in the Dunes*, and *The Makioka Sisters*. Finally, we will consider *manga* (the graphic novel) and its adaptation into *anime*.

**COLT 1410O. Shakespeare and.**

Canon formation and disciplinary divisions have deformed the way in which we read Shakespeare. Frequently presented as a post-romantic singular "author," cut off from the sources, texts and genres on which he drew and the collaborators with whom he worked, Shakespeare looks, reads and performs differently in relation to the rich contexts in which the plays were produced and through which they are produced today. We will read plays and other materials with attention to formal and historical questions including genre, the Shakespearean text, gender, sexuality, status, degree, and nation.

**COLT 1410P. Shakespeare.**

We will read a number of Shakespeare's plays from *The Comedy of Errors* to *The Winter's Tale* in relation to the sources, analogues, and genres (classical, continental and English) on which he drew. We will consider both formal and historical questions. Issues to be addressed include genre, the Shakespearean text, gender, sexuality, status, degree, and nation. Some attention to what has come to be called "global" Shakespeare. Written work to include a mid-term and two papers.

**COLT 1410S. Classical Tragedy.**

This course will read the great Greek tragedies of Aeschylus, Sophocles, and Euripides, and some Senecan tragedy. We will then read Renaissance and later tragedies that use the classical world as a setting, such as *Antony and Cleopatra*, *Julius Caesar*, and tragedies that rewrite classical themes, including O'Neill's *Mourning Becomes Electra*.

**COLT 1410T. Tragedy from Sophocles to *The Wire*.**

Explores tragedy from Athens to Baltimore. Readings will include Sophocles, Shakespeare, Hegel, Chekhov, Jia Zhangke, Chan-Wook Park, Marx, Trotsky, and the deindustrialized American city. Open to juniors and seniors. Instructor permission required.

**COLT 1410U. Shakespeare in Perspective.**

We study Shakespeare together with selections from other writers or thinkers, including those who have written about Shakespeare (e.g. Nietzsche, Emerson, Coleridge), and those who can illuminate interpretive problems in Shakespeare (e.g. Plato, Melville).

**COLT 1410V. Russian Theatre and Drama (TAPS 1430).**

Interested students must register for TAPS 1430.

**COLT 1410Y. Shakespeare and Embodiment (ENGL 1360Z).**

Interested students must register for ENGL 1360Z.

**COLT 1411B. Theater and Revolution.**

This class explores how theater and dramatic literature question and shape our understanding of "revolution" as a radical turn, incisive rupture, and profound shift in the way we perceive and organize our social and cultural life. How does drama accompany revolutionary movements, and how do revolutions compel political theater to transform itself? Readings include Aristophanes's *Lysistrata*, Shakespeare's *Coriolanus*, Büchner's *Danton's Death*, Brecht's *Life of Galileo*, and Parks's *The America Play*. We will analyze plays and performances, write our own dramatic scenes, and discuss key concepts of theater theory and practice.

**COLT 1411D. Antigones.**

As one of the most revised and interpreted works around the globe, Sophocles' *Antigone* invites a comparison of adaptations across cultural contexts. This course examines how the play's exploration of citizenship, law, gender, family, and resistance to authority has shaped philosophical conceptions of tragedy and speaks to contemporary political issues. We will consider reimaginings of *Antigone* under apartheid laws in South Africa, the Mexican drug war, and in the age of ISIS. The class is designed as a workshop where students will study versions of *Antigone* (theoretical texts, dramatic literature, poetry, visual art) and engage in adaptation, translation, and performance.

**COLT 1420A. *The Tale of Genji* and its Legacy.**

*The Tale of Genji* (circa 1000 CE), authored by Murasaki Shikibu, a woman of the Heian court, has been canonized over the centuries as the greatest work of Japanese literature. No work in the Japanese tradition has exerted as much literary influence as this mammoth work of prose fiction detailing the private lives of Genji, the brilliant son of the emperor, those with whom he consorts, and his descendants. We will read *Genji* in its entirety, along with antecedent works, other texts of the period, works influenced by Murasaki's opus, other historical materials, and secondary commentary. There are no prerequisites for this course and it is open to all undergraduates.

**COLT 1420B. A Mirror for the Romantic: *The Tale of Genji* and *The Story of the Stone*.**

In East Asian Buddhist culture, the mirror is a symbol of the mind in both its intellectual and emotional aspects. These masterworks detail the lives and loves of Prince Genji, cynosure of the medieval Japanese court, and Jia Baoyu, the last hope of an influential Chinese clan during the reign of Manchus. We examine both works as well as the sources of *Genji* and literary aesthetics of the Tang dynasty.

**COLT 1420F. Fantastic and Existentialist Literatures of Argentina, Uruguay and Brazil.**

Jorge Luis Borges proclaimed that South American writers can "wield all themes" without superstition, with irreverence. This course examines the ways in which 20th century writers from Argentina, Uruguay and Brazil appropriated European fantastic and existentialist fictions, taking them in new directions. Readings, in English or original languages, include Borges, Cortázar, Onetti, Lispector. Prerequisite: previous college literature course(s).

**COLT 1420G. Fictions of the Caribbean.**

The Caribbean has inspired conflicting cultural and political claims, and a wealth of visual images. We will rethink the formation, representation and self-presentation of the Caribbean countries, steering our explorations through postcolonial and postmodern theory to questions of appropriation, language and identity. Readings from Columbus and Shakespeare to Danticat, Santos Febres and Kincaid; essays by Glissant, James Benítez Rojo and others.

**COLT 1420K. Masterworks of Chinese Fiction.**

Focuses on three acknowledged classics of Chinese fiction—*Three Kingdoms*, *The Journey to the West*, and *The Dream of the Red Chamber*—works which demonstrate the range of the genre as they represent historical, fantastical, and sociopsychological subjects. Topics include the role of fiction in Chinese society, the masterworks as mirrors of Chinese culture from the 14th through 18th centuries, and the comparative theory of the novel.

**COLT 1420L. Modern Japanese Fiction.**

Narrative fiction from the Meiji Period (1868-1912) to the present in the context of modern Japanese cultural and intellectual history. In addition to more canonical writers such as Natsume Sōseki and Mori ōgai, examines the legacy of women writers such as Higuchi Ichiyō and Enchi Fumiko; proletarian writers such as Hayama Yoshiki, Kobayashi Takiji, and Hayashi Fumiko; and more contemporary mass-audience writers such as Yoshimoto Banana and Yamada Eimi.

**COLT 1420N. Postcolonial Faulkner.**

How is it that Faulkner became one of the most influential North American authors in the Third World? To answer this, we read Faulkner's "The Bear" against two of his citational novels, *Absalom, Absalom!* and *The Sound and the Fury*. We then turn toward a number of Faulknerian novels from the Arab world and Latin America. We discuss theoretical texts that describe the legacies of various colonialisms.

**COLT 1420O. Proust, Joyce and Faulkner.**

A reading of three major Modernist authors, with a focus on the following issues: role of the artist, representation of consciousness, weight of the past. Texts include substantial portions of Proust's *Recherche*, Joyce's *Portrait and Ulysses*, Faulkner's *Sound and the Fury*, *Light in August* and *Absalom, Absalom!* Prior background in these authors desirable, especially *Ulysses*.

**COLT 1420Q. The Bildungsroman.**

Readings of novels in the *Bildungsroman* tradition and the theoretical questions of the genre: the historicity and constitution of the self; problems of the representation of a life; the category of the unity of a life as a factor of identity; notions of progress, development and completion. Considerations of the successes and failures of this model. Readings to be selected from Rousseau, Chateaubriand, Sterne, Goethe, Novalis, Flaubert, Musil, Kerouac.

**COLT 1420S. The Captivity Narrative.**

Because the captivity narrative implies both a feminized subject and a writing subject, it provides a link among political, social, and literary phenomena common to all modern Western cultures. Examines various novels consumed by members of such cultures (including gothic romances, *Bildungsromanen*, boys books, girls books, ethnographic journeys, and prison diaries) as versions of the captivity narrative.

**COLT 1420T. The Fiction of Relationship.**

Explores the manifold ways in which narrative literature sheds light on the relationships that we have in life, both knowingly and unknowingly. The novel form, with its possibilities of multiple voices and perspectives, captures the interplay between self and other that marks all lives. Authors include Laclos, Melville, Brontë, Kafka, Woolf, Faulkner, Borges, Burroughs, Vesaas, Morrison, and Coetzee.

**COLT 1420U. The South: Literatures of the U.S. South and South America.**

For Jorge Luis Borges, in his story of the same title, the South is a spectral region, hovering between imagination and reality. The literatures of the U.S. South and South America enact his notion of the South. We examine the remarkable similarities between the two literatures—similarities that result from literary influence and from social, cultural, and historical circumstances. Prerequisites: previous upper-level literature course(s), relevant to your studies at Brown. Instructor permission is required and will be given after second class.

**COLT 1420V. Visionary Fictions.**

Visionary and apocalyptic writing, subversive of modes of perception and understanding as well as of political doctrines and systems, from Blake and Novalis to mid-nineteenth century French writers (Nerval, Rimbaud, Lautréamont), Surrealism and William Burroughs' *Naked Lunch*.

**COLT 1420X. The European Novel From Goethe to Proust.**

Readings of major European novels of the 19th century as literary reflections on philosophical questions such as aesthetic and ethical judgment, subjectivity, mimesis, memory and the novel itself as a genre. Authors include Goethe, Stendhal, Balzac, Dickens, Flaubert and Proust. Selections from Kant, Hegel, Marx, Lukács and Benjamin.

**COLT 1420Y. Gigantic Fictions.**

Terms such as 'epic,' 'mammoth,' 'gigantic,' and even 'loose, baggy monsters' have been coined to describe examples of literary discourse that inordinately exceed the normative boundaries of fiction. How are we to understand these narratives? What is the relation between literary gigantism and mimesis? How do 'gigantic fictions' threaten to break their literary bounds? What holds these mammoth narratives together? What impels authors to elect such a grand scope for literary representation? We explore these questions and others through close reading of several works deemed to be among the most gargantuan from authors such as Rabelais, Murasaki Shikibu, Tolstoy and Joyce.

**COLT 1421F. Esthers of the Diaspora: Female Jewish Voices from Latin America (POBS 1500H).**

Interested students must register for POBS 1500H.

**COLT 1421G. Dickens and Others (ENGL 1511G).**

Interested students must register for ENGL 1511G.

**COLT 1421I. The Paternalistic Thriller and Other Studies in Colonial Fiction.**

The impact of colonialism on European fiction from the rise of empire to its decline and fall, focusing on authors who wrote from direct contact with the peoples of Africa and Asia, such as Rudyard Kipling, Joseph Conrad, T. E. Lawrence, E. M. Forster, and Isak Dinesen. Topics will include romantic images of conquest, imperial ideology in literature, differing attitudes towards acculturation, and the changing symbolism of exotic settings.

**COLT 1421K. Faulkner (ENGL 1710G).**

Interested students must register for ENGL 1710G.

**COLT 1421L. "Terrible Beauty": Literature and the Terrorist Imaginary (ENGL 1760I).**

Interested students must register for ENGL 1760I.

**COLT 1421M. Conrad and Naipaul: The Supremacy of the Visible? (ENGL 1761T).**

Interested students must register for ENGL 1761T.

**COLT 1421N. Kafka's Writing (GRMN 1340M).**

Interested students must register for GRMN 1340M.

**COLT 1421O. W. G. Sebald and Some Interlocutors (ENGL 1761Q).**

Interested students must register for ENGL 1761Q.

**COLT 1421Q. Word and Image: Ekphrasis, the Iconic Narrative, and the Graphic Novel.**

An examination of the tradition of illustrated narratives from the pre-modern to the modern periods: the ancient Indian epic the *Ramayana*, the early eleventh-century Japanese *Genji Monogatari*, the medieval English *Canterbury Tales*, the late eighteenth century *Marriage of Heaven and Hell*, as well as the contemporary graphic novel *Persepolis* and examples of Japanese *manga*. Discussion will focus on the nature of iconography and symbolism; the historical privileging of text over image; the significance of parallel visual and verbal representation and its implications for culturally-specific theories of reading. Instructor permission required.

**COLT 1421R. The European Novel from Richardson to Goethe.**

This course studies the rise of the novel in eighteenth-century England, France, and Germany, focusing on the development of epistolary fiction, but with side-glances at the picaresque and sentimental tradition. Texts to be read include Richardson's *Pamela*, Fielding's *Shamela* and *Joseph Andrews*, Rousseau's *Julie*, Laclos's *Les liaisons dangereuses*, perhaps Bernardin de Saint-Pierre's *Paul et Virginie*, perhaps Sade's *Justine*, and definitely Goethe's *Sorrows of Young Werther*.

**COLT 1421S. The Poetics of Confession (ENGL 1561J).**

Interested students must register for ENGL 1561J.

**COLT 1421T. Mediterranean Fictions: On Debts, Crises, and the Ends of Europe.**

Sun-drenched, seductive, and timeless, the Mediterranean is an appealing location from which to ponder Europe's debt to this cradle of western civilization. Recently, the region's economic debt crisis has crystallized thoughts that, beginning here, a peaceful, unified Europe will come undone or be rehabilitated. The word 'crisis' itself hinges on a making a crucial decision, often in marking the turning point of a disease. This course examines representations of this moment through literature and film—but also in history, anthropology, journalism, and art—and in the context of other pivotal twentieth-century Mediterranean texts that marked, and anticipated, seismic shifts on the continent.

**COLT 1421U. Words Like Daggers: The Epistolary Novel.**

Letters as novels, novels in letters: this course traces the development of the epistolary novel, as it was cultivated in Europe from the seventeenth to the twentieth centuries. Through focused discussions of seminal, as much as fascinating, specimens of the genre, we will study the major impact that epistolary fiction had on the stylistic and conceptual evolution of the novel in general, also exploring its interactions with a range of established or shifting social structures, gender roles, discursive practices, and modes of consciousness. Authors include Montesquieu, Laclos, Goethe, Hölderlin, Stoker, Foscolo, Tabucchi, Alexandrou, and Galanaki.

**COLT 1421V. Modernisms North and South: James Joyce and Roberto Bolaño.**

James Joyce's *Ulysses* (1922) and Roberto Bolaño's *The Savage Detectives* (1998) are weighty, influential, often intimidating works that bookend literary production in the twentieth century. Both are also moving narratives about humans with different sorts of artistic, emotional, and bodily ambitions, grappling with new forms of subjective and collective life in modernity, trying to work out their own place within social, political and artistic systems. Join Stephen Dedalus, Leopold and Molly Bloom, Ulises Lima and a cast of minor characters as they make their way through the hearts, minds, memories, and nervous systems of a range of modern metropolises.

**COLT 1421W. Blast from the Past: The Historical Novel.**

Focuses on a popular literary genre known as the historical novel. We will discuss its defining characteristics, cultural meanings, and basic differences from other types of fiction. We will also explore larger theoretical issues that are intricately related to the development and scope of the genre: the representation of the past and its relationship to the present; the creative integration of the gaps between factual history and lived experience; and finally the complex interaction between authenticity and fictionality, exemplarity and specificity, temporality and detachment. Authors include Flaubert, Yourcenar, Kadare, Pamuk, Calvino, Lampedusa, Roidis, and Galanaki.

**COLT 1421X. Fairy Tales and Culture (FREN 1330A).**

Interested students must register for FREN 1330A.

**COLT 1422A. The Twilight Zone: Classics of Horror Fiction.**

This course discusses a number of seminal works – from Gothic novels to ghost stories and vampire epics – that exploit the oldest and strongest emotion of mankind: fear. Why are authors and readers fanatically drawn to something as disturbing as horror, supernatural or not? How do the gruesome or the macabre become sources of intellectual excitement and aesthetic gratification? How can texts whose intended effect is to shock and distress compel us to confront suppressed instincts, challenge deep-rooted certainties, or reflect on things and ideas that we generally prefer to ignore? Are you brave enough to find out?

**COLT 1422B. Family Fictions in the Enlightenment.**

This course will study the changing representation of the family in the literature, art and culture of Enlightenment Europe. We will analyze the critique of traditional models of the family and the construction of an ideal of domesticity based on new concepts of childhood, education and marriage. We will read stories of “domestic misfortunes” as well as proposals for alternative solutions to “ill husbandry.” Readings will include novels, plays, theoretical texts and visual documents (paintings and caricatures).

**COLT 1422D. Short Forms: Major Works in a Minor Key (HISP 1330Q).**

Interested students must register for HISP 1330Q.

**COLT 1422E. The 19th-Century Novel: Transatlantic Perspectives.**

What happened when the novel crossed the Atlantic? After its rise in Europe in the mid 18th century, the novel quickly spread and became a dominant literary genre both in the U.S. and in Latin America. In this course we will read key 19th-century novels in the European tradition; we will then discuss how this (by no means homogenous) European genre was assimilated and modified across the Atlantic. What did writers in Brazil and in the U.S. do with the genre, and how did they transform it according to national specificities? We will focus on English, French, American, and Brazilian novels.

**COLT 1422F. Short Forms: Major Works in a Minor Key (HISP 1330Q).**

Interested students must register for HISP 1330Q.

**COLT 1422H. Mediterranean Fictions: On Debts, Crises, and the Ends of Europe (MGRK 1230).**

Interested students must register for MGRK 1230.

**COLT 1422J. Global Detective Fiction.**

Though often marginalized as unserious or lowly “genre fiction,” the detective plot has interested and influenced literary figures ranging from Poe and Borges to Todorov and Robbe-Grillet. In this course, we examine both the origins and the afterlives of the detective plot in fiction from around the world. We will focus in particular on the figure of the detective as reader and the commentaries detective fiction offers on reading itself. After beginning with some “classics” by Poe, Conan Doyle, Chesterton, and Chandler, we move on to examine select novels and stories from Europe, the Middle East, the Americas, and Africa.

**COLT 1422L. The Modernist Novel: Alienation and Narration.**

This course will examine how the modernist novel is not only about alienation—estrangement from others, the meaninglessness of existence, the divorce of private self from public life—but also incorporates alienation into its narrative structures. Through the close analysis of novels by European and Latin American authors (Kafka, Camus, Woolf, Onetti, Rulfo and Di Benedetto), we will consider alienation from a variety of angles: as a formal problem for narrative; as an existential situation; an experience of history and the past; and as a condition related to the uneven global economy.

**COLT 1430A. Ancient Greek Myth in Modern Poetry.**

Various responses to ancient Greek myths by poets in the Western tradition, especially modern Greek poets. Considers how the classical version of myths, such as those of Helen, Oedipus, Orpheus, Persephon, Penelope, and Ulysses, are approached, rewritten, or subverted in poetry since 1800. Emphasizes the challenges posed by the past, issues of cultural and political context, and on questions of gender. Readings in English.

**COLT 1430C. Classical Japanese Poetry.**

A historical study of various poetic forms of *waka* or Japanese poetry from the 8th-century anthology, the *Man'yōshū*, to the advent of modern verse, including *jiyūshi* or free verse, in the latter part of the 19th century. Focuses on the relationship of poetry to religion, the political implications of *waka*, and the dominant aesthetic governing poetic conventions in different periods.

**COLT 1430D. Critical Approaches to Chinese Poetry.**

Examination of works of Chinese poetry of several forms and periods in the context of Chinese poetic criticism. Knowledge of Chinese not required, but provisions for working with original texts will be made for students of Chinese language.

**COLT 1430H. Poetry, Art, and Beauty.**

What does it mean to be beautiful in classical and European literature and the arts? How do poems and works of visual art embody beauty? How is the idea of beauty defined by thinkers from Plato to Benjamin and Danto? Works include Sappho, Plato, Aristotle, Catullus, Horace, Petrarch, Kant, Wordsworth, Baudelaire, Rilke, Benjamin, Stevens. Works of art considered range from the Lascaux caves through renaissance classical painters like Giotto and Raphael to contemporary installations.

**COLT 1430I. Poetry of Europe: Montale, Celan, Hill.**

The fifty years between the Second World War and the formation of the European Union was a period in which the meaning of “Europe” was placed under great strain. The class will examine the strains and debates about Europe within the lyric poetry of several literary traditions. It will take the form of close historical, formal, and critical readings of three books of poems in their entirety: Montale's *The Storm and Others* (1956), Celan's *No-One's Rose* (1963), and Hill's *Canaan* (1997). Enrollment limited to 25.

**COLT 1430J. Readings in Poetry and Poetics.**

Concentrated readings of Hölderlin, Shelley, Baudelaire, and Yeats in conjunction with theoretical texts by Heidegger, Derrida, De Man, and Benjamin. Texts include poetry, essays, novels, and dramas of the poets in a critical and philosophical context. Focuses on the relationship between figurative and expository language, the limits of commentary, and the concept of criticism as repetition and translation. French or German required. Frequent writing and oral presentations.

**COLT 1430K. The Classical Tradition in English Poetry.**

We will read a number of famous short poems from antiquity in conjunction with the major English writers who later translated, imitated, and reworked them. We will pay special attention to the question of creative innovation. We will read Horace, Theocritus, Virgil, Dryden, Pope, Tennyson, and others.

**COLT 1430L. Voices of Romanticism.**

Readings of lyric poetry in the European Romantic tradition. Focus on problems of lyric subjectivity and representation, and the rhetoric of "voice." Emphasis on formal features of poetry. The course will be based on close reading and frequent writing assignments. Readings from Wordsworth, Shelley, Keats, Goethe, Novalis, Hugo, Nerval, Lamartine, Baudelaire and others. Knowledge of French or German required, or by permission.

**COLT 1430N. The Albatross and the Nightingale: Nineteenth-Century Poetry.**

Readings in French, German, British and American poetry of the nineteenth century. Texts selected from: Hölderlin, Mörike, Heine, Hugo, Nerval, Baudelaire, Keats, Hardy, Dickinson, Poe and others. Focus on close reading, and rhetorical and formal elements of poetry. Frequent writing assignments.

**COLT 1430O. The Poetry of Childhood.**

Selected readings from among Rousseau, Blake, Hölderlin, Wordsworth, Baudelaire, Rimbaud, Nietzsche, Freud, Yeats, Char.

**COLT 1430Q. Poetry and the Sublime (GRMN 1440C).**

Interested students must register for GRMN 1440C.

**COLT 1430S. Latin American Death Trip (LITR 1230K).**

Interested students must register for LITR 1230K.

**COLT 1430T. Leaves of Words: Japanese Poetry and Poetics.**

A historical study of various poetic forms of Japanese poetry (*waka*) from the 8th-century anthology, the *Man'yōshū*, to the advent of modern verse, including *jiyūshi* or free verse, in the latter part of the 19th century into the 20th century. Focuses on the relationship of poetry to society, religion, the political implications of *waka*, and the dominant aesthetic modes governing poetic conventions in different periods.

**COLT 1430U. Measures of Poetry: A Workshop.**

Rhythm, intonation and their written forms measure poetic matter. This workshop introduces prosody through exercises in theory and practice: the line; metrical and stanzaic form; rhyme; music and performance; free verse; language writing; and the task of translation (form). Even monkeys, Darwin wrote, express strong feelings in different tones. Enrollment limited to 20.

**COLT 1431B. Modern Arabic Poetry.**

An advanced course with readings in modernist Arabic poetry, beginning with the so-called neo-classical poets and proceeding through Romanticism and Modernism, from Egypt to Lebanon, Palestine, Iraq, and beyond. We will examine such recurring themes as love, loss, and longing; war, exile, and homeland; cultural heritage (*turath*) and creative innovation (*ibda'*); gender and genre. All readings in Arabic; at least three years Arabic language study (or equivalent) required for enrollment.

**COLT 1431C. Poets, Poetry, and Politics.**

The award of the 2016 Nobel Prize for Literature to Bob Dylan ignited a lively debate about who is, and who is not, a poet. Historically, who were deemed poets, what was their function? What do their poems do and how do they work? Do they foment revolution or "make nothing happen," as Auden once wrote? How does the poet aspire to a unique, individual voice even as he or she may (be seen to) best represent a constituency? This course relates the poetic act to political action and interrogates the commonly aired contention that politics makes for bad poetry.

**COLT 1431D. Reading Modernist Poetry.**

The period between 1880 and 1950, generally known as the age of Modernism, saw profound changes at every level of Western society, including politics, war, religion, and art. In this course, we will examine how various poets in Europe and beyond responded to and helped shape these changes through their art. Emphasis will be on reading for form as well as theme and socio-historical context, and on poetry as performance. Authors may include Yeats, H.D., Hughes, Rilke, Lasker-Schüler, Celan, Apollinaire, Césaire, Montale, Ungaretti, Blok, Akhmatova, Lorca, and Neruda. Knowledge of at least one non-English language highly recommended.

**COLT 1431E. Loss in Modern Arabic Literature.**

This course examines the literary expression of and response to various forms of loss, including military defeat, diaspora, and prison confinement in Arabic poems, short stories, and novellas from the 20th century through the post-Arab Spring. We explore how texts reimagine social and political geographies through diverse poetic and narrative techniques to enrich our understanding of the region and of central debates in its literary tradition. Though the topics may seem quite grim, we will find that many of the readings render forms of loss into aesthetics of beauty or empowerment. No knowledge of Arabic necessary.

**COLT 1431F. Reading Modernist Poetry.**

The period between 1880 and 1950, generally known as the age of Modernism, saw profound changes at every level of Western society, including politics, war, religion, and art. In this course, we will examine how various poets in Europe and beyond responded to and helped shape these changes through their art. Emphasis will be on reading for form as well as theme and socio-historical context, and on poetry as performance. Authors may include Yeats, H.D., Hughes, Rilke, Lasker-Schüler, Celan, Apollinaire, Césaire, Montale, Ungaretti, Blok, Akhmatova, Lorca, and Neruda. Knowledge of at least one non-English language highly recommended.

**COLT 1440B. Killer Love: Passion and Crime in Fiction and Film.**

Discusses textual and cinematic representations of criminal passion and its ambiguous relationship to religious, moral, and social norms. We will focus on extreme forms of intimacy both as a thematic choice of cultural production and as a symbolic medium of communication. Why is it that art so often explores unsanctioned emotions and deviant behaviors? What is at stake when narratives capitalize on violent manifestations of desire? In what ways is the semantics of excessive love related to conceptions of subjectivity, sociability, and sexuality? What role does it play in the creative process itself?

**COLT 1440F. 1948 Photo Album: From Palestine To Israel.**

Why do we name the "Israeli-Palestinian conflict" as we do? The purpose of this class is to use photographs – alongside historical and literary documents—to question the framework of a "national conflict" and study its emergence as a given, unquestioned and axiomatic scheme for any historical narrative of that period. Reading archival material and post-colonial and photography theories, each week we shall study one photograph taken in 1948, reconstructing the photography event as well as its myriad relations among the protagonists involved and its after life as an archived image, to include photographed persons, photographers, editors, journalists, politicians, and more.

**COLT 1440H. The Literature and Cinema of Global Organized Crime (SLAV 1500).**

Interested students must register for SLAV 1500.

**COLT 1440K. Israeli-Palestinian Conflict: Contested Narratives (UNIV 1001).**

Interested students must register for UNIV 1001.

**COLT 1440M. Lyric Genre-Benders.**

In this course, we will ask what constitutes poetic language and how to identify the lyric as a genre. Are there discernible traits that lyric poems share, or is poetry, like pornography, something we recognize only when we see it? We will have a special focus on how genre is related to gender, and consider the historical precedent of poetry calling readers to its defense. Discussion will revolve around essays on lyric theory both classic and contemporary, prose poems by Baudelaire and Davis, fragments by Sappho, and finally, poems by Basho, Dickinson, Rankine, and more.

**COLT 1440P. Nationalism and Transnationalism in Film and Fiction.**

Reports of the demise of nationalism always seem greatly exaggerated. How are notions of transnationalism dependent on rewriting the nation? This course revisits films of world cinema acclaimed for their national cachet from a transnational perspective and in dialogue with their literary intertexts. We will study these films' fictional narration, cinematic articulation, and critical reception and consider how they signify in multinational networks of funding, distribution, production, conception, and critical reception. Students will analyze the political, ethical, and artistic stakes of confronting difference as both a located and universal stance or commodity. Films and texts chosen from across the globe.

**COLT 1440Q. Stranger Things: The German Novella (GRMN 1440X).**

Interested students must register for GRMN 1440X.

**COLT 1440S. Images d'une guerre sans nom: the Algerian War in Literature and Film (FREN 1410R).**

Interested students must register for FREN 1410R.

**COLT 1440T. Cinema's Bodies.**

The course explores the cinematic construction of bodies, female, male, animal and others. They are not standing alone as they are framed, cut, exposed, veiled, enlarged, distorted and gendered. The body is screened at the screen and composed into an imaginary image of beauty, death, sex, work. Cinematic devices like close-up, camera angle, light etc. transform bodies into the body of the film and its specific style, from which they can't be subtracted. This leads to the question of the spectator's body as screen for the filmic body and the many theoretical explorations to the embodied visions cinema entails and stimulates.

**COLT 1440X. Shéhérazades : Depicting the "Orientale" in Modern French Culture.**

Centered around the storied figure of Shéhérazade, this course explores literary and visual representations of "oriental" women in France from the 18th century to the contemporary period. Structured in a chronological and thematic manner, the course confronts students with highly influential orientalist depictions of women (including Voltaire, Loti, and Delacroix), as well as postcolonial and feminist responses to orientalism. Primary sources will be supplemented with theoretical readings from Edward Said, Fatima Mernissi and Joan Scott among others, in order to question the evolution and relevance of "orientalism" in France today and articulate the enduringly complex relation between imperialism and gender.

**COLT 1440Z. Poets on Poetry.**

How do poets think about poetry? How might their ideas differ from those of professional theorists and critics? In this course we will look at the variety of ways in which poets throughout history have written about their craft, from essays and letters, to poems, translations, and writing guides. In addition to discussing issues surrounding the theory, composition, and ethics of poetry, students will write poems of their own, according to the "rules" of famous poets like Edgar Allan Poe and John Keats. Authors may include Celan, Gander, Hayes, Horace, Lorde, Montale, Moore, Neruda, Pound, Shelley, Swensen.

**COLT 1610B. Irony.**

A study of the trope of irony and its evaluation, especially in the Romantic tradition. Focuses on the epistemological implications of irony and the role it plays in contemporary criticism. Readings from Plato, Hegel, Schlegel, Kierkegaard, Baudelaire, Lukács, Booth, White, De Man.

**COLT 1610C. Japanese Aesthetics and Poetics.**

Focuses on the historical development of aesthetic values and their relation to social culture, religion, and national identity in Japan from the Nara period to the 20th century, with particular emphasis on the literary arts. Readings from Fujiwara Teika, Zeami Motokiyo, Sen no Rikyū, Okakura Tenshin, and others. A background in critical theory/philosophy and in East Asian studies helpful.

**COLT 1610D. Theory of Lyric Poetry.**

Through readings of recent critical discussions of the lyric genre, we will explore general methodological problems of literary theory. Discussions include: the role of form, structure and tropes in analyzing poetry; problems of subjectivity and voice; the relation between poetry and history; the function of reading: and the problematic "objectivity" of criticism. Readings from Hölderlin, Shelley, Baudelaire, Yeats, Jakobson, Benveniste, Riffaterre, Jauss, Johnson, De Man.

**COLT 1610E. Aesthetics and Politics (ENGL 1900E).**

Interested students must register for ENGL 1900E.

**COLT 1610F. New Theories for a Baroque Stage (TAPS 1280N).**

Interested students must register for TAPS 1280N.

**COLT 1610G. Mihail Bakhtin (RUSS 1895).**

Interested students must register for RUSS 1895.

**COLT 1610I. Getting Emotional: Passionate Theories (ENGL 1560W).**

Interested students must register for ENGL 1560W.

**COLT 1610J. Holocaust Literature (JUDS 1820).**

Interested students must register for JUDS 1820.

**COLT 1610L. What is Reading?.**

The answers to this question will be read—deciphered—in the many "reading scenes" found throughout the history of literature or philosophy. In Plato's *Phaedrus*, reading thus appears caught in a network of desire and power: the dominant role—the *erases* ("lover") who writes and teaches—and the passive or submissive position—the *eromenos* ("beloved") who reads and learns—are constantly permuted and destabilized. Hobbes' *Leviathan*, Melville's *Moby Dick* and *Billy Budd*, Goethe's and Valéry's *Faust* will lead us to question what we do when we read and reflect upon what could be called a *politics of reading*.

**COLT 1610M. Twentieth-Century Russian Approaches to Literature: Bakhtin and the Russian Formalists (SLAV 1890).**

Interested students must register for SLAV 1890.

**COLT 1610N. Ecological Thought.**

This course will serve as an introduction to the new interdisciplinary field of the environmental humanities. Discussing an exciting range of texts and films—from Mary Shelley, Virginia Woolf, and Arundati Roy to Ridley Scott and Werner Herzog—we will investigate how literary and cinematic works make ecological crisis perceptible. The following topics will be central to our discussions: garbology (especially hoarding, collecting, and the relation between trash and modern poetry); "slow violence" and postcolonial environmentalism; queer ecology; biopolitics; the representation of non-human animals; the effects of 24/7 consumerism; and the political uses of ecological nostalgia, disgust, grief, and wonder.

**COLT 1610P. Holocaust Literature (JUDS 1820).**

Interested students must register for JUDS 1820.

**COLT 1610Q. Gender Theory and Politics in France (FREN 1420C).**

Interested students must register for FREN 1420C.

**COLT 1610R. Visions of Liberation: African Decolonization Now?.**

If, as many African thinkers contend, the acquisition of formal national independence did not signify liberation, it is necessary to imagine decolonization now. In "Visions of Liberation," we will examine ideas, particularly those of Césaire and Fanon, that have shaped decolonial thinking in Africa. What is the contemporary relevance of notions of freedom imagined by thinkers of the early and mid-twentieth century? How have postcolonial and post-apartheid writers conceived of freedom? What does it mean to call Mali a "postcolony" or "neocolony," or to state that South Africa is not postcolonial? Previous knowledge of the topic is not required.

**COLT 1610U. Gender, Sexuality, and Culture in the Modern Middle East.**

An introduction to women's and gender studies in the Middle East, with a particular focus on Arabic literature and film. We will begin by laying critical foundations for discussing gender issues in the Middle East, with readings on Orientalism, the harem, and the veil. Other units include: pre-modern female literary personae, gender and revolution, women writing war, feminism and class, colonialism and culture.

**COLT 1610V. The Promise of Being: Heidegger for Beginners.**

"The most thought-provoking thing in our thought-provoking time is," Martin Heidegger writes, "that we are still not thinking." Our undergraduate seminar will study, slowly and carefully, some of Heidegger's most fascinating and challenging paths of thinking, especially as they relate to questions of Being and our being-in-the-world. We will encounter his unique engagements with art and literature, his critique of modern technology, his reflections on what it means to "dwell" somewhere, his views on finitude and death, and his notion of being "on the way" toward language. No previous familiarity with Heidegger is assumed; curious students from diverse fields welcome.

**COLT 1710A. Introduction to Literary Translation.**

This is a workshop course introducing the history and theory of literary translation, with demonstrations and exercises translating poetry and prose. All languages welcome, but students must be proficient to the level of reading literature in the original language. Foreign language through 0600 or permission of the instructor.

**COLT 1710B. Advanced Translation (LITR 1010F).**

Interested students must register for LITR 1010F.

**COLT 1710C. Literary Translation Workshop.**

The primary focus of this course is the practice of literary translation as an art. Using the workshop format, each student will complete a project by the end of the semester. Examples and theoretical texts will illuminate the historical, ethical, cultural, political, and aesthetic values that underlie every translation, keeping an eye towards opening up the field beyond inherited practices to consider the contemporary implications of our choices, intentions, and purposes in translation. Open to all levels. Heritage speakers are welcome, collaboration is permitted, and an open-spirited approach to this developing and fascinating practice is strongly recommended.

**COLT 1710D. Exercises in Literary Translation.**

Exercises and investigations in the history, theory, and practice of literary translation. Students pursue individual projects for translation workshops. Common exercises draw on Shakespeare translation, from classic translations in Europe to unique examples like Nyerere's Swahili Caesar and current projects like Shakespeare in Modern English or The Chinese Shakespeare. Prerequisite: one foreign-language course in literature at 1000-level (or equivalent).

**COLT 1810A. Onnade: The Woman's Hand in Classical Japanese and Medieval Western Literature.**

A consideration of various genres of women's writing from 700 to 1450 C.E. focusing on such issues as literary conventions, the relationship to the vernacular, the role of religion in education, and questions of gender and social class. Writers may include Berthgyth, Murasaki Shikibu, Sei Shōnagon, Héloïse, Marie de France, the comtessa de Dia, Ladu Nijō, Julian of Norwich, Christine de Pisan, and various anonymous women.

**COLT 1810B. Aesthetics in the Colonial Frame.**

Draws together works from a wide range of contexts and genres—Enlightenment philosophy, romantic travel literature, Arabic novels and poems—to compose a conversation about aesthetics in the colonial context of Egypt. Senior Seminar.

**COLT 1810C. City (B)Lights.**

Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images, American cities and literary works are foregrounded.

**COLT 1810E. Dwellers Amid the Clouds: the Literature of the Court.**

A survey of three court traditions—Heian Japan, medieval Iceland, and early modern England—in which the relationship between the literary genres and the specific social context from which they emerge is highlighted in the form of particular literary conventions. Topics include the question of patronage, the function of particular literature as shibboleth, the idea of spectacle and play, the politics of literature, and the trope of irony as courtly emblem.

**COLT 1810F. Enlightenment and Anti-Enlightenment in Eighteenth-Century Germany.**

Some of the most intractable questions of contemporary philosophy were vigorously debated in eighteenth-century Germany. What are the limit of reason? Does its supposed neutrality and universality mask its own set of prejudices? Are there any universally valid claims in truth or ethics? How, why, should Christian, Jew, and Muslim tolerate their differences? We will read literary and philosophical works by Hamann, Herder, Jacobi, Kant, Lessing, and Mendelssohn.

**COLT 1810G. Fiction and History.**

How the historical fiction that has flourished over the past four decades challenges the notions of objectivity and totalization, while providing alternative viewpoints for the reconstruction and reinterpretation of the past. Authors considered include Grass, Doctorow, DeLillo, García-Márquez, Allende, Danticat and Gordimer. Theoretical texts by White, LaCapra, Benjamin, Ricoeur, and Chartier. Films such as *The Official Story* and *Europa, Europa* will be viewed and incorporated into the discussions. Prerequisite: two previous courses in literature. Enrollment limited to 25. Instructor permission required.

**COLT 1810H. Tales of Two Cities: Havana - Miami, San Juan - New York.**

In this course we will compare representations of Havana and San Juan in contemporary fiction and film to literary inscriptions of Cuban Miami and Puerto Rican New York. We will explore mapping the city as mapping identity and city-writing as reconstruction and creation, viewing through the eyes of children, tourists, and urban detectives. Authors include Antonio José Ponte, Roberto G. Fernández, Mayra Santos Febres and Ernesto Quiñones. Good preparation for study abroad on the Brown-in-Cuba program. Not open to first year students.

**COLT 1810I. Gates of Asia.**

An exploration of the growth of European knowledge of Asia from the rise of the Mongol empire through the Great Game and its aftermath. Primary sources include three kinds of accounts provided by travelers who set their hearts on Asian exploration: personal narratives, official reports and dispatches, and scholarly studies of the exotic cultures. Enrollment limited to 20.

**COLT 1810J. History and Aesthetic Form.**

In this course, we will examine the co-articulation of theories of history with theories of language and aesthetics. Focus will be on the interdependence between an emerging interest in history and the origin of language, and approaches to literary history, genre definition, and general aesthetic categories. Readings to be selected from Vice, Rousseau, Herder, Lessing, Schiller, Negel, Novalis, Lukacs, Adorno, Derrida and De Man.

**COLT 1810L. Housing Problems.**

Examines architectural figures and problems of containment and construction in a variety of literary and theoretical texts. We will consider how images of buildings structure texts and outline spaces for subjectivity. Themes include the gothic, haunted houses, foundations, ruins, walls, and doors. Texts selected from Descartes, Derrida, Goethe, Hegel, Austen, Coleridge, Poe, Baudelaire, Melville, Hawthorne, Kafka, Tschumi and Borges.

**COLT 1810M. Image and Text: the Reconstitution of Narrative.**

An examination of the tradition of illustrated narratives in several premodern cultures: the early 11th-century Japanese *Genji Monogatari*, the medieval English *Canterbury Tales*, and the ancient Indian epic the *Māhābhārata*. Discussion focuses on the nature of iconography and symbolism; the historical privileging of text over image; the significance of parallel visual and verbal representation and its implications for culturally-specific theories of reading. Seminar.

**COLT 1810N. Freud: Writer and Reader.**

A broad survey of Freud's writings, with particular emphasis on psychoanalysis' relevance to literary theory and cultural analysis. Readings include Freud's major works, as well as secondary sources focused on applications to literary studies.

**COLT 1810O. Latin American Literature in Dialogue with France.**

Complicates the question of influence in Latin American literary and intellectual self-fashioning, specifically with regard to France. Explores the productivity and perplexity of this relationship through romanticism and articulations of the real (as realism, surrealism and magical realism). Approaching the twenty-first century, considers Latin American perspectives on French theories of feminism, postmodernism and globalization.

**COLT 1810P. Literature and Medicine.**

The purpose of this course is to examine a number of central issues in medicine-disease, pain, trauma, madness, the image of the physician--from the distinct perspectives of the sciences and the arts. Texts will be drawn from authors such as Sophocles, Hawthorne, Gilman, Tolstoy, Kafka, Anderson, O'Neill, Hemingway, Ionesco, Verghese, Barker, Sacks, Foucault, Sontag, Scarry, Gawande and others. Open enrollment course: lecture + section.

**COLT 1810Q. Literature and Money in the Age of Paper.**

Focuses on the complex and highly ambivalent relationship between literature and money in nineteenth-century European literature. Works by Poe, Balzac, Dickens, Baudelaire, Stevenson, Hardy, and Zola. Relevant philosophical writing by Smith, Marx, Nietzsche, and Derrida.

**COLT 1810S. Literature and the City.**

Literature's obsession with the modern city, in 19th- and 20th-century American, English, and French fiction and poetry, in writers such as Blake, Whitman, Balzac, Dickens, Baudelaire, Rimbaud, Eliot, Williams, Bellow, Morrison. Opportunities for work in other literatures and genres, e.g., in Germany, Brecht.

**COLT 1810T. Literature and the Culture of Capitalism.**

This course will examine the literary responses to capitalism in terms of five organizing tropes: regionalism, urbanization, consumerism, aestheticism, and modernism. Our investigation will begin sometime in the early 19th-century with the moment that consolidated conditions favorable for industrialization and conclude in the first decade of the 20th-century with literary modernism and the collapse of the cultural myths of progressive enlightenment and democracy. Readings include texts by Wordsworth, Malthus, Sue, Mayhew, Marx, H. Rider Haggard, Stowe, Carroll, Zola, Wilde, Stoker, Freud. Three papers and a final essay.

**COLT 1810U. Angela's Ashes and What Went Before: Irish Immigration and Literary Creation.**

Readings in the major works of Joyce, Beckett and Farrell, without forgetting Jonathan Swift and William Butler Yeats.

**COLT 1810V. Marx and Modern Literature.**

A contrastive and integrative study of the range of Marx's writings and works by writers such as Shakespeare, Dickens, Baudelaire, Flaubert, Woolf, and Stevens. Examines Marx's leading concepts in philosophy, history, economics, ideology, and aesthetics in relation to the particularities of literary forms. One or two short papers and a longer final study of a literary work chosen from the student's major field. Enrollment limited to 30.

**COLT 1810X. Mirror for the Romantic: *The Tale of the Genji* and *The Story of the Stone*.**

In East Asian Buddhist culture, the mirror is a symbol of the mind in both its intellectual and emotional aspects. These masterworks detail the lives and loves of Prince Genji, cynosure of the medieval Japanese court and Jia Baoyu, the last hope of an influential Chinese clan during the reign of Manchu. We examine both works as well as the sources of Genji and literary aesthetics of the Tang dynasty. Prerequisites: COLT 0710, RELS 0040 (0088) or 0100 (0006), or permission of the instructor.

**COLT 1810Y. Modern Japanese Women Writers.**

An examination of women's writing from the Meiji Period (1868-1912) to the present. Readings include works from such writers as Higuchi Ichiyo, Miyamoto Yuriko, Enchi Fumiko, and Tsushima Yūko. Topics include the relation of 'woman' to the modern, the legacy/construction of the past, the implications of *joryū bungaku* (women's literature), and the problem of resistance and subversion.

**COLT 1810Z. Nietzsche.**

Intensive and extensive reading of Nietzsche and some of the reception that has made him so prominent in contemporary literary and cultural theory. Topics include Nietzsche's aesthetics, theory of history, the concept of the eternal return, European decadence, misogyny and anti-semitism. Texts will be selected from Nietzsche, Heidegger, Horkheimer and Adorno, Deleuze, Derrida, Irigaray, de Man, Kofman, Lacoue-Labarthe, Foucault, Hamacher, Ronell, etc.

**COLT 1811B. Postcolonial Theory and Fiction.**

There is hardly a place in the contemporary world which has not somehow been touched by the histories and consequences of colonialism. What does it mean, then, to speak about the postcolonial? Should the postcolonial be seen as a new periodization in the study of world literatures, a recent trend in critical theory, or another type of minority discourse involving previously colonized peoples?

**COLT 1811D. Reading Revolution, Representations of Cuba, 1959-The Present.**

Considers the cultural and ideological impact of the Cuban revolution inside and outside Cuba. Starting in the 1960s, reads Latin American "boom" novels, European theorists and U.S. civil rights activists. Moving to today, addresses post-Soviet Cuba's literary production and the impact of new technologies on culture, as well as political change under Raúl Castro. Fiction, film and essays by Castro, Sartre, García Márquez, Reinaldo Arenas, Antonio José Ponte, Fernando Pérez and others. Excellent preparation for the Brown-in-Cuba program.

**COLT 1811F. The "Tenth Muse" Phenomenon.**

The texts and contexts of women writing in English, Spanish and French, during the sixteenth and especially seventeenth centuries. Often dubbed "Tenth Muses," these first early modern women writers to gain public prominence wrote iconoclastic texts and/or epitomized socially sanctioned scripts for women. Authors include: Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana, Mme de Lafayette, Maria de Zayas.

**COLT 1811H. The Idea of Beauty.**

What does it mean to be beautiful in classical and European literature? How is beauty defined by thinkers from Plato to Benjamin? Readings from the classical, medieval, Renaissance, and modern periods are brought into question by works concerning the problems of aesthetics. Works by Plato, Aristotle, Horace, Augustine, Dante, Petrarch, Shakespeare, Racine, Tolstoy and others in addition to readings from the history of aesthetics from Kant through the present.

**COLT 1811I. The Nordic Legacy: Ibsen, Strindberg, Munch and Bergman.**

This course examines the work of four major Scandinavian artists. As key figures in the development of modern theater, painting and film, these four figures share a number of common concerns: challenging the pieties of bourgeois mores; reconceiving the relations between the sexes; moving from the social to the metaphysical; undermining the unitary view of the self; and forging an artistic "language" through which the in-dwelling power of the psyche can be revealed.

**COLT 1811J. The Paternalistic Thriller and other Studies in Colonial Fiction.**

The impact of colonialism on European fiction from the rise of empire to its decline and fall, focusing on authors who wrote from direct contact with the peoples of Africa and Asia, such as Rudyard Kipling, Joseph Conrad, T.E. Lawrence, E.M. Forster, and Isak Dinesen. Topics will include romantic images of conquest, imperial ideology in literature, differing attitudes towards acculturation, and the changing symbolism of exotic settings.

**COLT 1811L. Travel, Tourism, Trafficking through the Ages.**

Why go away to find ourselves? How does the self constitute itself "elsewhere"? This course considers the genre of travel writing and its theory: how are roots, routes, and rootlessness treated in diverse racial, spiritual, sexual, national, and imperial encounters. Today, when cosmopolitan tourists, intellectuals, or exotic and erotic adventurers share the same beach as downtrodden, abject refugees and their traffickers, what are the cultural, ethical and political implications of leisurely seeking out (self-) discovery, disappearing authenticity, and commodified otherness? Readings include Herodotus, Equiano, Chatwin, Kingsley, Montagu, Darwin, Twain, Miller, Durrell, Baldwin, Phillips, Iyer, Houellebecq, Woolf, Thompson, Theroux, Baudrillard

**COLT 1811N. Persons and Portraits: Self in Early Modern Europe.**

Challenges the presumed supremacy of the "modern subject," the sovereign rational mind personified by Descartes. Rival theories of self in Machiavelli, Luther, Montaigne, Hobbes, Pascal, and Spinoza are explored alongside the richly embodied "persons" pictured in painting (Titian, Rembrandt, Velázquez), conduct literature (Castiglione, La Rochefoucauld), drama (Milton, Molière, Calderón), psychological fiction (La Fayette), and satiric prose (La Bruyère).

**COLT 1811O. Modernism: From Paris to Athens, 1900s - 1950s.**

The course examines Modernism as it developed in major European cities. Apart from focusing on major venues of modernism (Zurich, Berlin, Paris) it centers on marginal geographical spaces with specific emphasis on Athens, Greece. It further explores the rise of such movements as Cubism, Futurism, Dadaism and Surrealism and proceeds to explore the reaction of Greek modernists to these movements.

**COLT 1811Q. Poisonous or Prophetic?.**

Wright's *Native Son*, Burrough's *Naked Lunch*, Derrida's *Specters of Marx*, and Rimbaud.

**COLT 1811S. Philosophy and Literature of German Romanticism.**

A fateful collaboration between philosophy and literature was centered in Germany roughly between 1788 (Schiller's 'Gods of Greece') and 1807 (Hegel's *Phenomenology of Spirit*). A survey of the major literature of this period, organized thematically, will serve as an introduction to this complex phenomenon. Authors include (in translation) Fichte, Goethe, Hölderlin, Novalis, Schelling, Schiller, and Tieck.

**COLT 1811T. Levantine Cities: Alexandria, Istanbul, Athens.**

Explores the literary and filmic imagination of three Eastern Mediterranean cities, Alexandria, Istanbul, and Athens. It examines the history, culture and politics of these cities and the ways in which they emerge in literature, film, poetry and travelogues. How is the city defined in these works? How are social tensions addressed, such as those between Greeks and Turks and Arabs or between Christians, Muslims and Jews? How are thematic and historical issues resolved, such as those involving antiquity and modernity, tradition and modernization, colonialism and nationalism, religion and secularism? How are these cities defined in the works of western writers? Enrollment limited to 30.

**COLT 1811U. Literature and the Arts.**

Readings in the apparitions and articulations of the arts in fiction, philosophy, criticism and poetry. Focus on the interaction between language and other media, the figure of the artist, problems of expression and performance. Readings from Diderot, Hegel, Balzac, Hoffmann, Baudelaire, Poe, Nietzsche, Wagner and Mann.

**COLT 1811W. Visual Obsessions: Japanese Film, Fiction, and Modernity.**

The pervasiveness of visual obsessions in contemporary Japanese culture prompts us to rethink the impact of modernity in terms of visuality. Through the examination of a wide range of filmic, literary, and visual art forms produced in Japan from the 1920s to the 2000s, this course explores the question of visuality as a historically and technologically conditioned way of seeing. The issues to be considered in this class include: the construction of "Japanese" aesthetics, orientalism, oclarcentrism, the problems of interiority and the subject, the relation between habit and the everyday, and cultural nationalism. This course will introduce important theoretical concepts about vision and modernity, asking students to interrogate these concepts through the close examination of specific Japanese texts and films discussed in class. Writers, filmmakers, and visual artists include: Tanizaki Jun'ichirō, Edogawa Rampo, Abé Kōbō, Karatani Kōjin, Ozu Yasujirō, Kurosawa Akira, Ichikawa Kon, Suzuki Seijun, and Murakami Takashi.

**COLT 1811X. Marx and his Critics.**

This course will focus on a close study of the work of Karl Marx and its legacy for critical theory. The first part of the course will be dedicated to a reading of Marx's most important texts, with special emphasis given to his theories of economy, of ideology, alienation and fetishism. The second part will be dedicated to a reading of some of Marx's most important readers: Lukacs, Gramsci, Althusser, Zizek and Derrida. Instructor's permission required.

**COLT 1811Y. Genius and Melancholia in the Renaissance.**

Explores Renaissance accounts of genius, genial inspiration, and melancholia, and their accompanying ideas of intellection and immortality. Primary materials include Dürer, Montaigne, Rabelais, Ficino, Ariosto, Erasmus, Saint Teresa, and Luther. Secondary or contemporary texts include Warburg, Panofsky, Saxl, Klibansky, Wind, Benjamin, Kierkegaard, and Sebald.

**COLT 1811Z. Literature and the American Presidency.**

We shall read widely in writings by, and about, selected American presidents, but also focus on the ways in which presidents have used literature as a dictional source in their own writing and thinking. We will attend also to the relationship of culture to power as evidenced in other textual media, such as film.

**COLT 1812A. Literatures of Immigration.**

Why do people migrate? How do literary genres, including poetry, fiction, autobiography and memoir, characterize immigrant experiences? How is the experience of "coming from somewhere else" similar and different for each subsequent generation of immigrants? How does literature indicate the impacts of migration on the culture, politics and economics of the countries of immigration and emigration? How do literatures of immigration imagine the past, present and future of networks and communities of immigrants? Focusing on twentieth-century literary texts and the socio-historical context of mass migration, the first half of the course examines immigration literature in the U.S., the second half of the course explores literatures of immigration beyond the U.S., and the course concludes with an inquiry into immigration in our presently globalizing age.

**COLT 1812B. Aesthetics and Politics (ENGL 1900E).**

Interested students must register for ENGL 1900E.

**COLT 1812C. The Ethics of Romanticism (ENGL 1560Y).**

Interested students must register for ENGL 1560Y.

**COLT 1812F. Violence and Representation.**

Traces diverse genealogies from which to theorize violence and its relation to aesthetics. We will identify a disciplinary philology for "violence" as a signifier within visual culture, art practice and literature; historicize key transitions in varied invocations of violence in representation; study texts (photography, film, novel, installation) that create a space where violence can be discussed as both everyday and extraordinary. Some issues to be considered: representability in moments of historical crisis (war, colonialism, genocide); the efficacy of genres and artistic movements in representing violence (tragedy, surrealism, theater of cruelty); and the violence of representation (surveillance, spectatorship, voyeurism).

**COLT 1812H. "Women's Literary Make-up": Mirrors, Maquillage and the Tenth Muse.**

Focuses on the problem of creative inspiration for women writers and how the pursuit of aesthetic perfection, both somatic and literary as well as their interrelation, becomes a recurring motif in women's writing from various traditions. Readings will include fiction and poetry from the English, Japanese, and Arab traditions, both modern and pre-modern. This is an undergraduate seminar open to juniors and seniors. Prerequisite: coursework in literature and at least one course in gender studies/women's studies. Instructor permission required.

**COLT 1812I. Collective Struggles and Cultural Politics in the Global South.**

Traces the historical and ideological mapping of the North-South axis and the regional mythologies informed by racism, empire and nationalism. We will examine the ways in which imagined geographical hierarchies continue to shape cultural and political struggles and the vectors of globalization. Along with readings on imperial histories, liberal and neoliberal political economies, and postcolonialism this class seeks to establish connections between resistant narratives and collective struggles in the Global South. We will discuss political philosophies of Marx, Gramsci, Arendt, Fanon, Harvey and Schwarz, as well as the works of Achebe, Hurston, Kincaid, Rushdie, Roy, Sembene, and Wright. First year students require instructor permission.

**COLT 1812J. Poetry and Ethics.**

If history is, as Charles Olson claims, a "form of attention" and we are all participants in a collective reality relative to our capacity for language use, what ethical issues come to bear on what the poet chooses to attend to--not only as subject matter but as form? Can poetic language be sufficiently responsive to the challenge of empathy? Is there an ethics of attention? Guided by philosophical texts, we shall investigate ethical possibilities in a range of world poetics.

**COLT 1812K. European Intellectual and Cultural History: Exploring the Modern, 1880-1914 (HIST 1220).**

Interested students must register for HIST 1220.

**COLT 1812M. Erotic Desire in the Premodern Mediterranean (CLAS 1750L).**

Interested students must register for CLAS 1750L.

**COLT 1812N. Culture and Anarchy (ENGL 1511I).**

Interested students must register for ENGL 1511I.

**COLT 1812O. Lying, Cheating, and Stealing (ENGL 1760V).**

Interested students must register for ENGL 1760V.

**COLT 1812P. Essaying the Essay (CLAS 1120J).**

Interested students must register for CLAS 1120J.

**COLT 1812S. Violence and the Multiple Responses of Medieval France.**

Examines violence and its representations from a variety of perspectives: literary, historical, psychological, etc. Different literary forms (11th - 13th) introduce conflicts between competing value systems, problems raised by militant religion, vendettas and the pursuit of justice. Across the gamut of appetites and emotions, violence takes a variety of shapes, producing broken hearts and broken heads. The beautiful seductiveness of violence, despite its horrors, is frequently transformed into artistic and literary expression, from the highest forms of Western tradition to the cheap exploitations of pulp fiction. What can the Middle Ages teach us about violence, yesterday and today? Not open to first year students.

**COLT 1812T. On Being Bored (ENGL 1511L).**

Interested students must register for ENGL 1511L.

**COLT 1812U. Queer Relations: Aesthetics and Sexuality (ENGL 1900R).**

Interested students must register for ENGL 1900R.

**COLT 1812V. War, Anti-War, Postwar: Culture and Contestation in the Americas.**

This course addresses the relationship among language, war and the arts from the mid-twentieth century on. Even as armies engage in combat around the globe, the term "war" legitimates a much broader spectrum of situations, lending them the structure of organized hostility and the moral opposition of right to wrong. From the "Cold War" to the "War on Terror", to Argentina's "Dirty War" and Cuba's "War on Imperialism", literature, cinema, visual arts and community-based projects have responded to real and rhetorical declarations of "war." Drawing from U.S. and Latin American contexts, we will explore a range of responses and challenges.

**COLT 1812W. Love, Adultery, and Sexuality (RUSS 1450).**

Interested students must register for RUSS 1450.

**COLT 1812X. Literature and History: Russian Historical Imagination in the European Context (RUSS 1600).**

Interested students must register for RUSS 1600.

**COLT 1812Y. Central Europe: An Idea and its Literature (SLAV 1790).**

Interested students must register for SLAV 1790.

**COLT 1813B. Dying God (CLAS 1930B).**

Interested students must register for CLAS 1930B.

**COLT 1813C. Erotic Desire in the Premodern Mediterranean (CLAS 1750L).**

Interested students must register for CLAS 1750L.

**COLT 1813D. Issues in World Literature (ENGL 1761Y).**

Interested students must register for ENGL 1761Y.

**COLT 1813E. Chinese Women, Gender and Feminism from Historical and Transnational Perspectives (EAST 1950B).**

Interested students must register for EAST 1950B.

**COLT 1813F. Communication Culture and Literary Politics (MCM 1503Q).**

Interested students must register for MCM 1503Q.

**COLT 1813H. God, Sex and Grammar: Literary Ethics in Medieval Europe.**

What does it mean to read and write ethically? While modern culture values intellectual property, many medieval texts celebrated what we call plagiarism. On the other hand, medieval thinkers saw serious consequences in literature, which could lead authors and readers to heaven or hell. But then as now, ethics were rarely clear-cut, subject to forces as diverse as religion, sexual desire, capitalism, and even language itself. Reading some of the great authors of the period, as well as modern critical reflections, we will explore the ethical dimension of literary production in the medieval world and in our own society.

**COLT 1813I. The Colonial and the Postcolonial Marvelous.**

A celebration and critique of the marvelous--as the strange, wondrous, magical, or unreal--as it has been wielded in Spanish American and related literatures (French Caribbean, Brazilian). We follow the marvelous from European exoticizing of the New World during the colonial period to its postcolonial incarnations in "magical realism" and beyond. We attend particularly to the political, ideological, social, and commercial implications of the marvelous in writers including Carpentier, Chamoiseau, Columbus, Esquivel, Sor Juana Inés de la Cruz, and García Márquez. Readings in English, though you may read texts in the original French, Spanish, or Portuguese.

**COLT 1813K. The Problem of the Vernacular.**

It has been said that a language is a dialect with an army and a navy. Under what conditions do dialects, vernaculars, creoles, and slangs become mediums for literary and artistic expression? How have writers in different cultures managed the relationship between their "official" national languages and their more intimate mother tongues? This course explores this problem in a variety of literary traditions, including Chinese, Arabic, Greek, Hebrew, Scots, Latin and the Romance vernaculars, and a variety of other languages.

**COLT 1813M. Making a List.**

The list is one of the most ancient and enduring figures of rhetoric and one of the most versatile means of organizing literary works. From the catalogues of Homeric epic to the postmodern fables of Borges to new digital media, from medieval encyclopedism to Renaissance copia, from the descriptive realism of novels to modernist techniques of collage, the simple list has produced an astonishing variety of effects in a wide range of genres and authors. We will read widely in this course, from many periods, literatures, authors, and genres.

**COLT 1813N. Early Modern Women's Writing.**

Interested in women writers, feminism? If so, it's vital to understand their early modern origins. This course explores the rich feminist tradition enacted in the often edgy texts of women writing on the cusp of modernity. We study writers from England, France, Latin America, North America, and Spain, focusing on self-fashioning, gender and sexuality, love and marriage, imagined worlds, religion, eccentricity, and writing and fame. Authors include Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana Inés de la Cruz, Mme de Lafayette, María de Zayas. Enrollment limited to 20. Texts and class in English.

**COLT 1813O. Adventures of the Avant-Garde.**

In the early years of the twentieth century, a series of artistic movements rippled across the Western hemisphere, exploding conceptions of art and culture while reconfiguring international relations. Explores those movements, from their predecessors (Baudelaire, Rimbaud, Mallarmé), through overlapping -isms (Cubism, Futurism, Constructivism, Vorticism, Expressionism, Dada, Surrealism), to avatars in the Americas. In keeping with the avant-garde's cross-pollinating spirit, we study texts from a variety of traditions, forms, and genres: from poetry through prose to manifestoes, from painting and photography to film, music, and dance, touching on questions of translation and translatability between languages, cultures, and art-forms. Enrollment limited to 25.

**COLT 1813P. Captive Imaginations: Writing Prison in the Middle Ages.**

Many great works of the Middle Ages were written in prison or about the experience of imprisonment. Reading some of these masterpieces, we will discover why the medieval prison was such a fruitful space for poetic creation, and how the perspective of incarcerated writers helped to shape a diversity of literary traditions. Topics will include fortune and free will, sexual and cultural difference, and the construction of the individual. We will also explore the nature of medieval systems of captivity, which differed greatly from those of modern society. Selected authors: Boethius, Mas'ud Sa'd Salman, Juan Ruiz, Chaucer, François Villon.

**COLT 1813Q. Literature and Judgement.**

There exists a close but complex relationship between the acts of making literature and making judgments. This course will explore some of these relationships and ask, for instance: how does judgment weigh upon the literary act? how do literary considerations bear on our making judgments? what criteria are called forth in both of these moments? Texts treated will be literary, critical-analytical, legal, and cinematic, and include such authors as Arendt, Benjamin, Derrida, Freud, Henry James, Kafka, Kant, Primo Levi, Nietzsche, Tolstoy and Verga.

**COLT 1813R. The Ekphrastic Mode in Contemporary Literature (ENGL 1762B).**

Interested students must register for ENGL 1762B.

**COLT 1813V. The Cash Nexus: Economy and Literature.**

At a time when human existence is grounded with unprecedented conviction in a rigid set of utilitarian principles and materialistic values, the relationship between literature and various modes of economic exchange presents itself as a richly rewarding field of research. The texts we will focus on offer rare insights into the ways monetary factors affect personal identity, interpersonal relationships, and social life in general. These works reflect a diachronic tension between human interactions and financial transactions that will be the basis of our critical engagement with a series of issues and questions that are more pertinent today than ever before.

**COLT 1813X. Getting Emotional: Passionate Theories (ENGL 1560W).**

Interested students must register for ENGL 1560W.

**COLT 1813Z. Soil: The Earth and Environmental Writing.**

Why do people fight over soil? In an increasingly urbanized world, how have the ways we talk about soil, earth, and land shifted? In this class, we will explore the politics and aesthetics of writing about soil in its particular relations to ecology, homeland, geography, and race. Readings include Homer's *Odyssey*, Derek Walcott's *Omeros*, and ecological criticism from ancient China to Rachel Carson and Ramachandra Guha and beyond. Limited to 20.

**COLT 1814A. Fashion and Power (GNSS 1960Y).**

Interested students must register for GNSS 1960Y.

**COLT 1814D. East-West Encounters: Politics and Fictions of Orientalism.**

We will explore the myth of the East that develops in Europe during the Enlightenment in the wake of the extremely popular and influential translations of *The Thousand and One Nights* (Alf Layla wa Layla) in the early eighteenth century. We will focus on narratives of the encounter between East and West, on the discovery and construction of the Oriental "Other," and on its representation in the literary and visual culture of the Enlightenment. Particular attention will be paid to the figure of Shahrazad and the theme of the harem. We will study some modern versions of the *Arabian Nights*.

**COLT 1814F. Erotic Desire in the Premodern Mediterranean (CLAS 1750L).**

Interested students must register for CLAS 1750L.

**COLT 1814G. Political Commitment in Arabic Literature.**

This course will explore the history of and debates surrounding political consciousness and commitment in modern Arabic literature from the mid-20th century to the present. Through close readings of mainly novels, novellas, and short stories, we will ask how, why, and with what consequences Arab authors have challenged political realities with literary expression. We will trace the diverse strategies by which authors articulated their criticisms and envisioned justice grounded in their political context. Topics and themes will include socialist realism, resistance literature, alienation, self-criticism, and responses to colonialism and censorship. No knowledge of Arabic required.

**COLT 1814L. Apartheid in Post-Apartheid South African Literature.**

In this course, we explore the political stances that contemporary South African writing articulates towards the apartheid regime. We bring particular attention to the textual emergence of queer subjectivities. During apartheid (1948-1994), South Africa became a global symbol of racial injustice, and several South African writers became famous for their anti-apartheid literary production. Since 1994, critics have looked for new frames in which to analyze a "new" literature. In the search for "newness," however, we may forget to consider how the "old"—apartheid—reappears in post-apartheid literature. Authors include Zackie Achmat, K. Sello Duiker, Phaswane Mpe, and Zoe Wicomb.

**COLT 1814M. Postcolonial Literature + Thought in the Middle East and North Africa.**

This course examines postcolonial literature and thought in the ME and North Africa through literature, theory and film. During the early and mid-20th century, anticolonial movements transformed the region's cultural landscape, igniting new intellectual circles and literary scenes. We will study these movements as a launching ground for regional culture, interrogating local anti-colonial thought in works by writers such as Memmi and Fanon, and examining its evolution from the 1960's-1990's in work from Egypt, Algeria, Tunisia, Lebanon, Syria, Israel, Morocco and Palestine. How did intellectuals and artists articulate issues like national liberation, Westernization, radical culture, feminism, Marxism and Orientalism?

**COLT 1814Q. Species Matters: Animals in Literature, Film, and Theory.**

Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about animals, then, always also means exploring our own humanity. In this course, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be represented? How should animal suffering affect us?

**COLT 1814R. Reflections from Damaged Life: Freud, Adorno, Blanchot, Derrida (GRMN 1891).**

Interested students must register for GRMN 1891.

**COLT 1814S. The Balkans, Europe's Other?: Literature, Film, History.**

Introduces the modern Balkans through a critical examination of literary and visual, historiographic and political, narratives. The course considers the contestation over a shared historical past and interreligious geographic space through common and divergent master narratives, motifs, myths, and recurring discourses. It also examines the region's aesthetic, religious, and political relation to Europe. Do the Balkans constitute a traumatized, "balkanized," self-colonized, abject modernity at Europe's edges, its inner alterity? Given the acclaim achieved by Balkan filmmakers since 1989, the course also asks how Balkan artists, caught in-between nationalism, Orientalism, Eurocentrism and globalization, assert agency and subjectivity and captivate our imaginations.

**COLT 1814T. Maghrebi Fiction and Psychoanalysis.**

Recent fiction from the Maghreb (Morocco, Algeria, Tunisia, Libya) in both French and Arabic has been preoccupied with mothers and fathers, gestation and regeneration, inheritance and transmission, filled with figures for desires and origins blocked or diverted. In this course, we will read Maghrebi literature together with works of psychoanalytic theory, focusing in particular on uncertain origins and aborted futures, geographies of the North African landscape and of the soul. Texts by Achaari, Berrada, Chraïbi, Djebar, Kateb, al-Koni, Mustaghanimi, Wattar; Deleuze & Guattari, Fanon, Freud, Jameson, Jung, Lacan. Students of French or Arabic invited to read in the original.

**COLT 1814U. Politics of Reading.**

What do we do when we read? And do we even do something, or, as Blanchot suggests, do we rather let be? While being true to Michel de Certeau's plea for a "politics of reading" and an "autonomy of the reader", we will question its binary logic (active vs. passive): 1. by looking closely at the (de)construction of a "sovereign reader" in Hobbes' *Leviathan*; 2. by analyzing the reading imperative—"Read!"—as it is staged in Plato's and, above all, in Sade's erotics; 3. by taking seriously Walter Benjamin's paradoxical intuition that one should "read what was never written".

**COLT 1814Y. Posthumanism and the Ends of Man.**

Have we ever been human? As mechanical implants, virtual extensions, and organic interdependencies challenge self-contained conceptualizations of human being, posthumanist theories invite us to rethink our self-understanding. In this course, we will explore the human as a fluid category in perpetual motion. Focusing on female and gender nonconforming bodies, which have traditionally been situated at the limits of the human, we will analyze the critical potential of hybrids, androids, and cyborgs. Readings among others by Ovid, the Brothers Grimm, E.T.A. Hoffmann, Han Kang, and Octavia Butler; films will include *Metropolis*, *Mad Max: Fury Road*, and the series *West World*.

**COLT 1815A. Apocalypse.**

The End of the World is central to the Abrahamic faiths. From the Jewish sources, through Christian and Islamic tradition and until the present day, the idea of the End of World is decisive for the understanding of major events in history, such as the birth of Islam or Modernity. Through readings across the religious and the secular traditions starting with the Torah and ending with Steve Bannon and ISIS.

**COLT 1815F. Memory, Commemoration, Testimony.**

In this course we will study problems of remembering and forgetting in a variety of texts including poetry, philosophy, psychoanalysis, memoirs, public monuments, memory studies and trauma theory. We will explore the roles of language and representation in dealing with the past, the temporality of the self, the operation of the unconscious, the memorial and the monument. We will also look at the politics of memory in relation to the cultural traumas of slavery, the Holocaust, Viet Nam and 9/11. Readings from Rousseau, Hegel, Wordsworth, Proust, Derrida and de Man; Freud, Caruth, Saidiya Hartman, Segalen; Arendt and Reznikoff.

**COLT 1815G. Repetition: Kierkegaard, Nietzsche, Freud (GRMN 1200D).**

Interested students must register for GRMN 1200D.

**COLT 1815I. Torn Halves of Modernism.**

This course analyzes the constitutive contradictions of modernist works from a global perspective. We will address, for instance, tensions between the periphery and the metropolis, city and countryside, realism and modernism, aesthetic autonomy, commodification and political commitment. We will also examine these questions across various media: novels, poetry, photography, architecture and film. Readings include works by Dos Passos, Faulkner, Döblin, Manuel Maples Arce, Roberto Arlt, Patrícia Galvão.

**COLT 1815O. Modern Greece in the World (MGRK 1240).**

Interested students must register for MGRK 1240.

**COLT 1815P. The Coming Apocalypse: Between the Earth and the World (HMAN 1974L).**

Interested students must register for HMAN 1974L.

**COLT 1970. Individual Independent Study.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**COLT 1980. Group Independent Study.**

Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course.

**COLT 1990. Senior Thesis Preparation.**

Special work or preparation of honors theses under the supervision of a member of the staff. Open to honors students and to others. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**COLT 2210. Introduction to the Theory of Literature.**

An historical introduction to problems of literary theory from the classical to the postmodern. Issues to be examined include mimesis, rhetoric, hermeneutics, history, psychoanalysis, formalisms and ideological criticism (questions of race, gender, sexuality, postcolonialism).

**COLT 2450. Exchange Scholar Program.****COLT 2520A. City (B)Lights: Interdisciplinary Approaches to the Study of the City.**

Literary texts from the U.S., England, France, and Germany, together with substantial readings in the social sciences and selected works of art and cinema. Intended as a laboratory for interdisciplinary studies in an expansive educational spectrum for humanities Ph.Ds.

**COLT 2520B. Dark and Cloudy Words: Metaphor and Poetry.**

An examination of the philosophical significance of metaphor and its literary function in poetry ranging from *makurakotoba* in the *Man'yōshū* to *kenningar* in Skaldic poetry, to the use of the trope in a number of modern poets. Critical writings include works by Aristotle, Ki no Tsurayuki, Shelley, Christine Brooke-Rose, Max Black, Donald Davidson, Paul Ricoeur, and Jacques Derrida.

**COLT 2520C. Irony: Language and Failure.**

A study in the trope of irony and the ways in which it complicates the possibility of understanding. Focus on Socratic irony, the dialogue, and Romantic irony. We will also consider the epistemological implications of irony and the role it plays in contemporary criticism. Readings from Plato, Quintillian, Diderot, Hegel, Schlegel, Kierkegaard, Baudelaire, Lukács, Booth, De Man, Rorty and Derrida.

**COLT 2520D. The Literature of the Americas.**

Forsaking the dominant Eurocentrism in comparative literary studies, this seminar will search for the common links between the diverse literatures of North and Latin America, approached in relation to one another rather than to "Old World" models. Authors to be considered include Margaret Atwood, Julio Cortázar, Carlos Fuentes, William Faulkner, Gabriel García-Márquez, Clarice Lispector, Machado de Assis, Toni Morrison and João Guimarães Rosa.

**COLT 2520E. Dialectics of Word and Image.**

Explores how proximities and interactions of text and image construct and complicate meaning. It brings together a constellation of theoretical and historical readings that have bearing on particular problems generated at the nexus of word and image. Readings by Horace, Abd al-Qahir Jurjani, Lévi-Strauss, Ricoeur, Derrida, Mitchell and others will anchor a cross-disciplinary investigation of European and non-European paradigms of the relationship between text and image in various literary and visual cultures since late antiquity. We will examine specific examples of the interaction between word and image in several Islamic manuscripts.

**COLT 2520F. Theories of the Lyric.**

Through readings of recent critical discussions of the lyric genre, we will explore more general methodological problems of literary theory. Questions to be raised include: the role of form, structure and tropes in analyzing poetry; problems of subjectivity and voice; the relation between poetry, history and politics; the function of reading; and the problematic "objectivity" of criticism. Readings from Jakobson, Benveniste, Jauss, Benjamin, Johnson, De Man, Lacoue-Labarthe, Agamben, Badiou and Derrida. Focus on poets Hölderlin, Baudelaire and Celan.

**COLT 2540C. Romanticism and Cultural Property (ENGL 2560Y).**

Interested students must register for ENGL 2560Y.

**COLT 2540D. After Postmodernism: New Fictional Modes (ENGL 2760X).**

Interested students must register for ENGL 2760X.

**COLT 2540E. Political Romanticism (GRMN 2320E).**

Interested students must register for GRMN 2320E.

**COLT 2540F. Romanticism and Cultural Property (ENGL 2560Y).**

Interested students must register for ENGL 2560Y.

**COLT 2650A. Comparative Literature and Its Others.**

Is there such a thing as comparative literacy? This course examines the history and practices of Comparative Literature as a major discipline, including its self-conceptualizations, its relations with national literatures and with other disciplines, and its evolving methods of reading. Texts include literary as well as theoretical ones.

**COLT 2650C. Romantic Theory: Theirs and Ours.**

Recent criticism will serve as the point of departure for looking into the relation of literary criticism to its Romantic history. Emphasis on how "Romantic" problems inform contemporary criticism on such topics as periodization, literature and history, theory of symbol and allegory, and the relation between literature and philosophy. Texts will be selected from Benjamin, M.H. Abrams, de Man, McGann, Lacoue-Labarthe and Nancy, Chase, et. al.; Fichte, Schelling, Coleridge, Wordsworth, Schlegel, Novalis.

**COLT 2650D. Theory of Comparative Literature.**

Designed to introduce students to some of the central theoretical issues that define the discipline of Comparative Literature through the study of twelve central texts in the field. We will begin with Erich Auerbach's foundational text *Mimesis*, and end with Gayatri Spivak's *Death of a Discipline*. In between the authors to be read and analyzed will be Bakhtin, Lukacs, Barthes, Derrida, DeMan, Jameson, Greenblatt and others. Open to graduate students, and to undergraduates by permission of the instructor.

**COLT 2650E. Theory of Lyric Poetry.**

No description available.

**COLT 2650F. Irony.**

A study of the trope of irony and its evaluation, especially in the Romantic tradition. Focus on the epistemological implications of irony and the role it plays in the philosophical tradition and in contemporary criticism. Readings from Plato, Hegel, Schlegel, Kierkegaard, Baudelaire, Lukács, Booth, De Man, Rorty and Derrida.

**COLT 2650G. Literary Readings in Aesthetic Theory.**

The seminar will examine not just the major themes but also the rhetorical complexities of a number of powerful texts in the history of aesthetic theory. Authors to be considered include Plato, Aristotle, Longinus, Burke, Kant, Hegel, Nietzsche, Heidegger, Benjamin, Adorno. Literary texts will be considered in conjunction with these texts, sometimes by way of famous arguments or exchanges (e.g., Heidegger and Staiger on Mörke).

**COLT 2650H. On the Sublime (GRMN 2660A).**

Interested students must register for GRMN 2660A.

**COLT 2650N. Hamlet: Appropriation, Mediation, Theory (ENGL 2360X).**

Interested students must register for ENGL 2360X.

**COLT 2650T. Foundations of Literary Theory (POBS 2600C).**

Interested students must register for POBS 2600C.

**COLT 2650U. Theory, Technics, Religion (ENGL 2901K).**

Interested students must register for ENGL 2901K.

**COLT 2650V. Italian Theory: In and Out (HMAN 2400U).**

Interested students must register for HMAN 2400U.

**COLT 2720A. Advanced Practicum in Literary Translation.**

Readings in theory of translation, and in monuments of literary translation from Renaissance times to the present, will be assigned to students needing further background in these areas. Students will each complete two projects: (1) by mid-semester, a critical treatment of a published translation or a comparison of such translations; (2) for the final seminar presentation and paper, the student's own translation into English from some literary text in a language familiar to the student.

**COLT 2720B. Theory and Practice of Literary Translation.**

Readings in the history and theory of translation from the Renaissance to the present, along with selected major examples of literature in English translation. Students will write two papers: (1) an analysis of a theoretical issue in translation, with ample attention to the historical context of that issue; and (2) either a discussion of an important translation as a criticism of the original work; or a critical comparison of several translations of an original work; or an annotated translation into English of a literary text from a language familiar to the student.

**COLT 2720C. Literary Translation.**

Study and practice of translation as art and a potent form of literary criticism. Translation is an act of interpretation, which informs the language of the translator and the text as a whole: context, intent, and language. Discussion will include the impact of cultural difference, tone and time on translation, and the role of analytical as well as intuitive understanding of the original in the translator's endeavor.

**COLT 2720D. Translation: Theory and Practice.**

This seminar will address the theory and practice of translation, and their place in the Humanities. Essays by translators, authors and scholars will be drawn from a range of languages and contexts, as will literary and historical texts. Each participating student will work on a substantial translation project over the course of the semester. The seminar is open only to graduate students; a strong knowledge of at least one language other than English is required.

**COLT 2820B. Fiction and History.**

Focuses on how the historical fiction that has flourished over the past three decades challenges the notions of objectivity and totalization, while providing alternative viewpoints for the reconstruction and reinterpretation of the past. Authors to be considered include E. L. Doctorow, Gabriel García-Marquez, Günter Grass, José Saramago, Isabel Allende, Lidia Jorge, Coover. Attention will also be paid to theoretical texts by Hayden White, Dominick LaCapra, Walter Benjamin, Linda Hutcheon, and Roger Chartier.

**COLT 2820D. The "Tenth Muse" Phenomenon.**

The texts and contexts of women writing in English, Spanish and French, during the sixteenth and especially seventeenth centuries. Often dubbed "Tenth Muses," these first early modern women writers to gain public prominence wrote iconoclastic texts and/or epitomized socially sanctioned scripts for women. Authors include: Anne Bradstreet, Margaret Lucas Cavendish, Sor Juana, Mme de Lafayette, Maria de Zayas.

**COLT 2820E. What was Enlightenment?**

Emphasizes two of the Enlightenment's most durable artists-Mozart and Jane Austen-situating them in the context of other writers of their times (such as Kant, Casanova, and Adam Smith) and modern appropriations of their work (in criticism and performance). Sub-themes are desire, reason, education, and forms of otherness. Class hours include viewing time.

**COLT 2820F. Latin America and Theory.**

Explores the engagement of Latin American literature and criticism with non-Latin American bodies of literary and cultural theory (including poststructuralism, postcolonialism, postmodernism and cultural studies), addressing tensions between the autochthonous production of theoretical frameworks and their import from other contexts. Readings include the Latin American Subaltern Studies group, *Revista de Crítica Cultural*, Rama, García Canclini, Sarlo, Richard and current new media theorists. Open to graduate students and qualified seniors.

**COLT 2820H. The Politics and Aesthetics of Masochism.**

Masochism is defined as a, aestheticized positive, consensual investment in power relations. As such, it directly engages the relationship between politics and aesthetic forms, but as a sexualized relationship. Masochism articulates relations of gender in ways that seem to challenge traditional structures. Readings include novels and films, as well as theoretical engagements with masochism.

**COLT 2820I. Literature and the State of Exception.**

This course takes as its point of departure Walter Benjamin's famous diagnosis of modernity as a paradoxical condition under which the exception has become the rule. We will consider the aesthetic and political implications of such a state of exception in nineteenth-century literature. Authors include Baudelaire, DeQuincey, Arnold, Melville, Whitman, Benjamin, Derrida, Nancy and Agamben.

**COLT 2820L. Moderns and Primitives.**

Major writers, artists, and theorists of European modernism put a new emphasis on the status of primitive society and archaic pre-history. We will consider the works of Durkheim, Eliot, Joyce, Picasso, and others with reference to the anthropology and ethnography of their period, and to subsequent post-colonial critique and controversy.

**COLT 2820M. Discourses of the Senses.**

A comparative study of a variety of discourses dealing with the relation among the senses, the arts, and the problems of comparativity, interdisciplinarity, and intermediality. Topics will include ekphrasis, synaesthesia, mysticism and the theory of correspondence, the Gesamtkunstwerk, and the limits between media. Readings from Condillac, Lessing, Kant, Swedenborg, the German Romantics, Baudelaire, Wagner, Balzac, Lacoue-Labarthe, Nancy, Panofsky, Tschumi and others.

**COLT 2820N. City (B)Lights.**

Interdisciplinary explorations of the modern urban experience featuring social sciences, literature and film. Convergences and differences in the presentation of urban life in literature, film, the visual arts, urban planning, and social sciences, including sociology, political economy, urban ecology. City populations, bureaucracy, power groups, alienation, urban crowds, the city as site of the surreal, are central themes. Against the background of classic European urban images. American cities and literary works are foregrounded.

**COLT 2820O. Jacques Derrida's of Grammatology.**

This course is an introduction to the thought of the French philosopher Jacques Derrida. We will focus on his most important work, his "Grammatology", though a series of some of his essays will also be part of the readings. Other readings will include the works of authors crucial to Derrida's thought and to an understanding of the "Grammatology": Heidegger, Nietzsche, Freud, Saussure, Rousseau and Levi-Strauss.

**COLT 2820P. Aesthetics and the Eighteenth Century Subject.**

The debates about taste, judgment, beauty, sentiment, and sensation in the eighteenth century gave rise to the discourse of aesthetics as we know it today, but they also exerted a powerful influence on how knowledge, virtue, and subjectivity were imagined in the post-enlightenment period. In this course, we will examine some of the founding texts of aesthetic theory from the era (including Locke, Smith, Burke, Lessing, and Kant), and then turn to consider how aesthetic questions informed and were taken up by Goethe's narrative of subject-formation in his Bildungsroman, Wilhelm Meister's Apprenticeship. In English.

**COLT 2820Q. Culture and Politics in Cuba and the Caribbean.**

Complicating standard narratives about intellectuals and the Cuban Revolution, explores writings whose relationship to the state is neither affirmative nor oppositional. Focusing on journals and on recent work in cultural theory, history, anthropology, and political science, addresses the evolution and potential of civil society; articulations of marginality; revisions of socialism and the Soviet legacy; and the mobility of theory. Spanish required.

**COLT 2820R. Postcolonial Melancholia.**

Figures of loss and defeat proliferate widely in the accounts of colonization, national liberation, and decolonization in South Asia, Africa, the Arab world, and the Americas. We will attend to the particularity of loss by juxtaposing readings in literature and postcolonial theory with readings on mourning and melancholia, drawn from a range of disciplines.

**COLT 2820S. Poetry after Kant.**

Begins with the intensive study of a selection of writings by Immanuel Kant focused especially on force and conflict in politics and aesthetics. This study, along with relevant readings from more recent work, will provide the basis for an approach to this topic in nineteenth-century poetry. Readings of Kant (Critique of Judgment, "Toward Eternal Peace," The Conflict of the Faculties), Walter Benjamin, Jacques Derrida, and Giorgio Agamben and will lead to several "case studies" of nineteenth-century poetry, including works by Friedrich Hölderlin, Charles Baudelaire, and Matthew Arnold.

**COLT 2820T. Universals.**

Explores the status of universals in classical, Hellenistic, Scholastic, and Renaissance metaphysics. Also explores the literary implications of this philosophical problem. Readings include Plato, Aristotle, Chrysippus, Augustine, Cicero, Seneca, Abelard, Avicenna, Aquinas, Scotus, Ficino, Cusanus, Pico, and Suárez.

**COLT 2820U. Literature and Judgment.**

Investigates the intersections between acts of literature and acts of judgment, between language and the law. How is literature to be judged, when is it "good" or "bad"? Does literature lie, and if so, does it matter? Does it hide a crime? And, in turn: does literature provide its own particular kind of judgment, one that may make evident the very fictional status of the law? Readings span from the Bible to contemporary post-colonial readings (Rousseau, Tolstoy, Zola, Freud, Kafka, Arendt, Benjamin, Henry James, Primo Levi, Coetzee, Sadegh Hedayat).

**COLT 2820V. Nietzsche, Foucault, Latour (ENGL 2900K).**

Interested students must register for ENGL 2900K.

**COLT 2820W. Ethical Turns (ENGL 2900N).**

Interested students must register for ENGL 2900N.

**COLT 2820X. Things Not Entirely Possessed: Romanticism and History (ENGL 2561B).**

Interested students must register for ENGL 2561B.

**COLT 2821C. From Hegel to Nietzsche: Literature as/and Philosophy (GRMN 2660O).**

Interested students must register for GRMN 2660O.

**COLT 2821L. Postcoloniality and Globalism (ENGL 2900Z).**

Interested students must register for ENGL 2900Z.

**COLT 2821Z. Objects of (and in) Animation (MCM 2120H).**

Interested students must register for MCM 2120H.

**COLT 2822B. Introduction to Italian Studies (ITAL 2100).**

Interested students must register for ITAL 2100.

**COLT 2822C. What Is Called Thinking? On Critical Styles (GRMN 2661T).**

Interested students must register for GRMN 2661T.

**COLT 2822D. Literature and Politics in the Age of Revolution.**

Explores the major ideas and practices that radically transformed culture and society in the early-modern period in Europe and in the Atlantic. We will explore the challenges to political, cultural and religious traditions by analyzing the major debates over the questions of equality, freedom, progress, religious toleration, and happiness. Special attention will be paid to new definitions of citizenship and political rights, the role of women in the public sphere, and the critique of slavery. We will conclude by devoting particular attention to debates surrounding the French and Haitian Revolutions. Texts will include novels, plays, philosophical essays and political pamphlets.

**COLT 2830C. Literature and the Arts.**

An investigation of the discourse of the arts in the modern European tradition. Topics include the relation between the Ancients and the Moderns, evaluations of the possibilities and limitations of differing media, the role of language in discussions of the "other" arts, and conceptions of synaesthesia and correspondance. Texts selected from Perrault, Winckelmann, Lessing, Diderot, Rousseau, Kant, Hegel, Hoffman, Baudelaire, and others.

**COLT 2830F. Walter Benjamin and Modern Theory.**

An intensive reading of selected essays by Walter Benjamin on language, literature, aesthetics, and politics will be paired up with the study of the interpretation and impact of this work on contemporary work in literary theory and philosophy. In addition to Benjamin, we will also read Jacques Derrida, Philippe Lacoue-Labarthe, Samuel Weber, Giorgio Agamben, and Peter Fenves. German and/or French helpful but not required. Open to graduate students only.

**COLT 2830H. Cultural Translation: Theory and Practice.**

Across a range of disciplines, "cultural translation" today stands for the dynamic interactions among cultures. Derived from cultural anthropology and linguistic translation, the metaphor of translation (already a metaphor: trans+latere, to bear across) is used increasingly to analyze how cultures are transmitted through the operations of colonial expansion, diaspora and immigration. Though cultural globalization is assumed to be a 20th century phenomenon, the result of an expansion and acceleration in the movement and exchange of ideas, commodities and capital, this seminar considers a longer historical frame for understanding cultural competition. Theoretical texts including Schleiermacher, Jakobson, Benjamin, Derrida, Spivak, and a "case study," Shakespeare.

**COLT 2830I. Histories of the Early Modern Body.**

This seminar considers the production of knowledge about the body in the early modern period. The institution of science and how the emerging "science" of the body was visualized; discourses of the erotic, the scientific and the religious; the body in varied cultural performances including the blason, devotional texts, erotica, drama etc. Texts include theoretical work on gender and sexuality. Open to graduate students only.

**COLT 2830L. Economies of the Visual (The Reverse of Images).**

In *The Time-Image*, Deleuze wrote: "Money is the reverse of all the images that the cinema shows and edits on the obverse, so that films about money are already, if implicitly, films within the film or about the film." What are the implications of this sentence for the economy of images (what Susan Buck-Morss terms their *iconomy*)? From *The Big Store* (Marx Brothers) to Peter Jackson's *King Kong*, we will trace various mobilizations of the gaze, leading from the proto-cinematographic elevators and escalators to the actual developments of eye-tracking technologies, allowing for an increasing commodification of the gaze itself.

**COLT 2830P. The History of Wonder in Colonial Spanish American *Letres* (HISP 2350H).**

Interested students must register for HISP 2350H.

**COLT 2980. Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**COLT 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## Center for Computation and Visualization

The Center for Computation and Visualization (CCV) strives to build and foster an environment that enables teaching, learning, research, and creative undertakings that involve and rely on the use and development of advanced computing and visualization technology. CCV provides high-performance computing, highly reliable research data storage, visualization resources, physical and virtual server hosting, high-performance backup and archival services, as well as outstanding collaborative scientific support to empower computational research, scholarship, creativity, and innovation for the entire Brown community.

The computing platform comprises a 700+ high performance computing node system, some with extra large memory and some with GPUs for accelerated computing, for a total core count of over 7,000, and peak performance of roughly 125 Teraflops. A GPFS parallel filesystem provides roughly 400 Terabytes of disk storage and 40 Gigabits per second Infiniband connectivity is used for all parallel applications messaging and I/O. The storage system is integrated with a 2 Petabyte Tivoli TSM backup/archival system. CCV also maintains a high end visualization lab with large scale immersive visualization capabilities. This includes a fully immersive 360 degree YURT, a 3-wall Cave system, and a multi-projector stereo flat display wall. Custom visualization solutions for software and hardware needs are available.

For additional information please visit the center's website at: <http://www.ccv.brown.edu/>.

## Center for Computational Molecular Biology

The prime intellectual mission of Brown University's Center for Computational Molecular Biology (CCMB) (<https://www.brown.edu/academics/computational-molecular-biology>) is to promote the development, implementation and application of analytical and computational methods to foundational questions in the biological and medical sciences. The research programs of the Core Faculty in CCMB lie fundamentally at the intersection of computer science, evolutionary biology, mathematics, and molecular and cellular biology.

Biological questions that currently unite the CCMB Core and Associate Faculty are: How do genotypes and genes interact to produce phenotypes, and how does this happen from womb to tomb? What drives the formation, maintenance and evolutionary transformations of communities of organisms over time? Quantitative questions that currently unite the CCMB faculty are: how can we design powerful algorithms to make sense of the sea of data produced in the genomic era? What principles are required for a theoretical framework to completely model cellular systems?

The research challenges at the heart of CCMB are a rich source of mathematical problems motivated by the complex nature of genomes, disease processes and evolutionary relationships. These challenges are both multi-scale (with units of interest ranging from molecules to communities of organisms) and large-scale (data-intensive, due to advances in sequencing technologies). Thus, CCMB rounds out the broader landscape of research in methodological development at Brown University by partnering with and complementing the Data Science Initiative (<https://www.brown.edu/initiatives/data-science>) and the Brown Center for Biomedical Informatics. (<https://www.brown.edu/academics/medical/about-us/research/centers-institutes-and-programs/biomedical-informatics>)

In addition to these research interests, CCMB Faculty members are actively involved in the operation of Brown's NIH-funded COBRE Center for the Computational Biology of Human Disease (<https://www.brown.edu/research/projects/computational-biology-of-human-disease>), and administer both an undergraduate concentration (<https://www.brown.edu/academics/computational-molecular-biology/courses-study>) and

an interdisciplinary doctoral program (<https://www.brown.edu/academics/computational-molecular-biology/courses-study>) in Computational Biology. This is a short video about our Ph.D. program in Computational Biology (<https://www.youtube.com/watch?v=p3zBdW-ENTU>).

## Computational Biology Concentration Requirements

Computational biology involves the analysis and discovery of biological phenomena using computational tools, and the algorithmic design and analysis of such tools. The field is widely defined and includes foundations in computer science, applied mathematics, statistics, biochemistry, molecular biology, genetics, ecology, evolution, anatomy, neuroscience, and visualization.

Students may pursue a Bachelor of Arts or a Bachelor of Science. Students pursuing the ScB have the option of electing a concentration in Computational Biology with one of three focus areas: Computer Sciences, Biological Sciences, or Applied Mathematics & Statistics. Both programs require a senior capstone experience that pairs students and faculty in creative research collaborations.

### Standard program for the A.B. degree

<b>Prerequisites:</b>	2
MATH 0100	Introductory Calculus, Part II
or MATH 0170	Advanced Placement Calculus
BIOL 0200	The Foundation of Living Systems
<b>General Core Requirements: Biology</b>	2
BIOL 0470	Genetics
BIOL 0280	Biochemistry
or BIOL 0500	Cell and Molecular Biology
<b>General Core Requirements: Chemistry</b>	1
CHEM 0330	Equilibrium, Rate, and Structure
or CHEM 0350	Organic Chemistry
<b>General Core Requirements: Computer Science</b>	2
CSCI 0150 & CSCI 0160	Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures
OR	
CSCI 0170 & CSCI 0180	Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction
OR	
CSCI 0190 & CSCI 0180 & CSCI 0320 & CSCI 0330 & CSCI 1010	Accelerated Introduction to Computer Science and Computer Science: An Integrated Introduction and Introduction to Software Engineering and Introduction to Computer Systems and Theory of Computation
<b>General Core Requirements: Probability &amp; Statistics</b>	1
APMA 1650	Statistical Inference I
OR	
CSCI 1450	Probability for Computing and Data Analysis
OR	
MATH 1610	Probability
<b>Comp Bio Core Course Requirements</b>	4
CSCI 1810	Computational Molecular Biology
APMA 1080	Inference in Genomics and Molecular Biology
AND two of the following:	

CSCI 1820	Algorithmic Foundations of Computational Biology	
BIOL 1430	Population Genetics	
BIOL 1465	Human Population Genomics	
CSCI 1420	Machine Learning	
APMA 1690	Computational Probability and Statistics	
APMA 1660	Statistical Inference II	
Additional course with Director approval		
<b>Total Credits</b>		12

### University Writing Requirement:

As part of Brown's writing requirement, all students must demonstrate that they have worked on their writing both in their general studies and their concentration. There are a number of ways for Computational Biology concentrators to fulfill these requirements:

- Enrolling in an independent study: CSCI 1970, BIOL 1950, APMA 1970
- Writing an Honors Thesis
- Taking a "WRIT" course in the final two years

### Capstone Experience

Students enrolled in the computational biology concentration will complete a research project in their senior year under faculty supervision. The themes of such projects evolve with the field and the technology, but should represent a synthesis of the various specialties of the program. The requirements are either one semester of reading and research with a CCMB Faculty member or approved advisor, or a 2000-level Computational Biology course.

### Standard program for the Sc.B. degree

<b>Prerequisites</b>		
MATH 0100	Introductory Calculus, Part II (or equivalent)	1
or MATH 0170	Advanced Placement Calculus	
BIOL 0200	The Foundation of Living Systems (or equivalent)	1
<b>General Core Course Requirements: Biology</b>		
BIOL 0470	Genetics (prerequisite BIOL 0200 or equivalent)	1
BIOL 0280	Biochemistry	1
or BIOL 0500	Cell and Molecular Biology	
<b>General Core Requirements: Chemistry</b>		
CHEM 0330	Equilibrium, Rate, and Structure	1
or CHEM 0350	Organic Chemistry	
<b>General Core Requirements: Computer Science</b>		2-4
CSCI 0150 & CSCI 0160	Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures	
OR		
CSCI 0170 & CSCI 0180	Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction	
OR		
CSCI 0190 & CSCI 0180 & CSCI 0320 & CSCI 0330	Accelerated Introduction to Computer Science and Computer Science: An Integrated Introduction and Introduction to Software Engineering and Introduction to Computer Systems	
CSCI 0220	Introduction to Discrete Structures and Probability	1
<b>General Core Requirements: Probability &amp; Statistics</b>		
APMA 1650	Statistical Inference I	1

or CSCI 1450	Probability for Computing and Data Analysis	
or MATH 1610	Probability	
<b>General Core Requirements: Computational Biology</b>		
CSCI 1810	Computational Molecular Biology	1
APMA 1080	Inference in Genomics and Molecular Biology	1
<b>Capstone Experience</b>		
BIOL 1950/1960	Directed Research/Independent Study	
CSCI 1970	Individual Independent Study	1
<b>Six courses in one of the following three tracks:</b>		
<b>Computer Science Track:</b>		
Three of the following:		
CSCI 1230	Introduction to Computer Graphics	
CSCI 1270	Database Management Systems	
CSCI 1410	Artificial Intelligence	
CSCI 1550	Probabilistic Methods in Computer Science	
CSCI 1570	Design and Analysis of Algorithms	
or other Computer Science courses approved by the concentration advisor		
Three of the following:		
CSCI 0330	Introduction to Computer Systems	
or CSCI 0320	Introduction to Software Engineering	
CSCI 1820	Algorithmic Foundations of Computational Biology	
PHP 2620	Statistical Methods in Bioinformatics, I	
APMA 1660	Statistical Inference II	
BIOL 1430	Population Genetics	
BIOL 1465	Human Population Genomics	
APMA 1690	Computational Probability and Statistics	
<b>Biological Sciences track</b>		
At least four courses comprising a coherent theme in one of the following areas: Biochemistry, Ecology, Evolution, or Neurobiology.		
AND select two courses from the following:		
CSCI 1820	Algorithmic Foundations of Computational Biology	
PHP 2620	Statistical Methods in Bioinformatics, I	
APMA 1660	Statistical Inference II	
BIOL 1430	Population Genetics	
BIOL 1465	Human Population Genomics	
APMA 1690	Computational Probability and Statistics	
<b>Applied Mathematics &amp; Statistics Track:</b>		
At least three courses from the following:		
APMA 1660	Statistical Inference II	
APMA 1690	Computational Probability and Statistics	
CSCI 1410	Artificial Intelligence	
APMA 0340 & APMA 0330	Methods of Applied Mathematics I, II and Methods of Applied Mathematics I, II	
OR		
APMA 0360 & APMA 0350	Applied Partial Differential Equations I and Applied Ordinary Differential Equations	
At least three of the following:		
BIOL 1430	Population Genetics	
CSCI 1820	Algorithmic Foundations of Computational Biology	
PHP 2620	Statistical Methods in Bioinformatics, I	
APMA 1070	Quantitative Models of Biological Systems	

BIOL 1465	Human Population Genomics	
Total Credits		18-20

## Honors:

In order to be considered a candidate for honors, students will be expected to maintain an outstanding record, with no "C's" in concentration courses and with a minimum of an "A-" average in concentration courses. In addition, students should take at least one semester, and are strongly encouraged to take 2 semesters, of reading and research with a CCMB faculty member or approved advisor. Students must submit to a public defense of their theses to be open to the CCMB community.

- Students seeking honors are advised to choose a Thesis Advisor prior to the end of their Junior year
- Students must complete the Registration form for Comp Bio and submit it to CCMB@BROWN.EDU

Any deviation from these rules must be approved by the director of undergraduate studies, in consultation with the student's advisor.

## Computational Biology Graduate Program

The Center for Computational Molecular Biology (CCMB) offers Ph.D. degrees in Computational Biology to train the next generation of scientists to perform cutting edge research in the multidisciplinary field of Computational Biology. During the course of their Ph.D. studies students will develop and apply novel computational, mathematical, and statistical techniques to problems in the life sciences. Students in this program must achieve mastery in three areas - computational science, molecular biology, and probability and statistical inference - through a common core of studies that spans and integrates these areas.

The Ph.D. program in Computational Biology draws on course offerings from the disciplines of the Center's Core faculty members. These areas are Applied Mathematics (APMA), Computer Science (CS), the Division of Biology and Medicine (BioMed), Brown Center for Biomedical Informatics (BCBI), and the School of Public Health/Biostats (SPH). Our faculty and Director of Graduate Studies (DGS) work with each student to develop the best plan of coursework and research rotations to meet the student's goals in their research focus and satisfy the University's requirements for graduation.

Applicants should state a preference for at least one of these areas in their personal statement or elsewhere in their application. In addition, students interested in the intersection of Applied Mathematics and Computational Biology are encouraged to apply directly to the Applied Mathematics Ph.D. program (<http://www.brown.edu/academics/applied-mathematics/graduate>), and also to contact relevant CCMB faculty members (<https://www.brown.edu/academics/computational-molecular-biology/about/people/faculty-and-staff>).

Our PhD program assumes the following prerequisites: mathematics through intermediate calculus, linear algebra and discrete mathematics, demonstrated programming skill, and at least one undergraduate course in chemistry and in molecular biology. Exceptional strengths in one area may compensate for limited background in other areas, but some proficiency across the disciplines must be evident for admission.

- Ph.D. Program Overview & Handbook ([https://www.brown.edu/academics/computational-molecular-biology/sites/brown.edu/academics/computational-molecular-biology/files/uploads/Comp%20Bio%20Ph.D.%20Program%20requirements%20%26%20handbook\\_1.pdf](https://www.brown.edu/academics/computational-molecular-biology/sites/brown.edu/academics/computational-molecular-biology/files/uploads/Comp%20Bio%20Ph.D.%20Program%20requirements%20%26%20handbook_1.pdf)) (pdf file)
- FAQ (<http://brown.edu/academics/computational-molecular-biology/frequently-asked-questions>)

The application process to the CCMB graduate program is run through the Graduate School (<http://www.brown.edu/academics/gradschool/>)

## Computer Science

### Chair

Ugur Cetintemel

## Vice Chair and Director of Undergraduate Studies

Thomas W. Doeppner

## Director of Graduate Studies

David H. Laidlaw

Since our inception in 1979, the Computer Science Department at Brown has forged a path of innovative information technology research and teaching at both the undergraduate and graduate levels. From our modest beginnings as an interest group within the Divisions of Applied Mathematics and Engineering in the 1960s to its current stature as one of the nation's leading computer science programs, the Computer Science Department has continuously produced prominent contributors in the field. Computer Science combines the intellectual challenge of a new discipline with the excitement of an innovative and rapidly expanding technology. The department resides in Brown's Center for Information Technology; this striking building houses many of the university's computing activities, as well as the department's instructional computing facilities and research labs. Faculty, staff and students are provided state-of-the-art computing facilities.

We are a diverse community of scholars engaged in all aspects of research, teaching and mentoring in computer science and its related interdisciplinary disciplines. Realizing the importance of computing and algorithmic thinking in so many scientific, social and technological endeavors, we collaborate extensively with colleagues in archaeology, applied mathematics, biology, cognitive and linguistic sciences, economics, engineering, mathematics, medicine, physics and neuroscience.

Our undergraduate offerings reflect the department's multidisciplinary orientations, with joint concentrations in mathematics, applied mathematics, computational biology and economics. We have strong undergraduate research groups and a long history of involving undergraduates in projects that span disciplinary boundaries.

For additional information, please visit the department's website: <http://www.cs.brown.edu/>

## Computer Science Concentration Requirements

Computer science is now a critical tool for pursuing an ever-broadening range of topics, from outer space to the workings of the human mind. In most areas of science and in many liberal arts fields, cutting-edge work depends increasingly on computational approaches. The undergraduate program at Brown is designed to combine breadth in practical and theoretical computer science with depth in specialized areas. These areas range from traditional topics, such as analysis of algorithms, artificial intelligence, databases, distributed systems, graphics, mobile computing, networks, operating systems, programming languages, robotics and security, to novel areas including games and scientific visualization.

Our requirements are built on a collection of *pathways*, each representing a well defined area within computer science. Concentrators interested in particular areas can choose the courses included in particular pathways.

Conversely, concentrators who are unsure of their area of interest but who have particularly enjoyed certain courses can choose pathways that include these concentrations. Students may not use more than two CSCI 1970 courses to complete the requirements for the Sc.B. and one CSCI 1970 course for the A.B. requirements.

## Requirements for the Standard Track of the Sc.B. degree

### Prerequisites (0-3 courses)

Calculus prerequisite: students must complete or place out of second semester calculus. 0-3

MATH 0100 Introductory Calculus, Part II  
or MATH 0170 Advanced Placement Calculus

or MATH 0190 Advanced Placement Calculus (Physics/Engineering)

### Concentration Requirements

#### Core-Computer Science:

Select one of the following introductory course Series: 2

##### Series A

CSCI 0150 & CSCI 0160 Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures

##### Series B

CSCI 0170 & CSCI 0180 Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction

##### Series C

CSCI 0190 Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level course, or an advanced course)

Thirteen CS courses numbered 0220 or higher. 13

◆# Two complete pathways (at least one core course from each)

# Each requires two 1000-level courses as well as one-to-three intermediate courses

# One of the courses used in one pathway must be a capstone course (defined below)

# The core and related courses used in one pathway may not overlap with those used in another

# 2000-level courses beyond those explicitly mentioned may also be used toward the concentration. They will be considered to be part of the same pathway as their thematically-related 1000-level courses

◆# Additional intermediate courses so that a total of five are taken, with at least one from each of the three categories

◆# One additional 1000-level course that is neither a core nor a related course for the pathways used above

### Intermediate Courses

Students must complete the intermediate courses defined for the pathway they choose. In addition, ScB students must take at least one course from each intermediate course category to ensure they span all areas. Taking additional courses beyond those listed for the pathway may be required.

#### Foundations

CSCI 0220 Introduction to Discrete Structures and Probability

CSCI 1010 Theory of Computation

#### Mathematics

CSCI 0530 Coding the Matrix: An Introduction to Linear Algebra for Computer Science

or MATH 0520 Linear Algebra

or MATH 0540 Honors Linear Algebra

CSCI 1450 Probability for Computing and Data Analysis

or APMA 1650 Statistical Inference I

or APMA 1655 Statistical Inference I

MATH 0180 Intermediate Calculus

or MATH 0200 Intermediate Calculus (Physics/Engineering)

or MATH 0350 Honors Calculus

#### Systems

CSCI 0320 Introduction to Software Engineering

CSCI 0330 Introduction to Computer Systems

## Pathways

Completing a pathway entails taking two courses in the pathway of which at least one is a core course for the pathway. One must also take the intermediate courses specified as part of the pathway. Certain graduate courses can also satisfy pathway requirements, see the CS Pathway page for more info: <https://cs.brown.edu/degrees/undergrad/concentrating-in-cs/concentration-requirements-2020/pathways-for-undergraduate-and-masters-students/><sup>3</sup>

### **SYSTEMS: studies the design, construction, and analysis of modern, multi-faceted computing systems**

#### Core Courses

CSCI 1380	Distributed Computer Systems
or CSCI 1670	Operating Systems
or CSCI 1680	Computer Networks

#### Related Courses

CSCI 1270	Database Management Systems
or CSCI 1310	Fundamentals of Computer Systems
or CSCI 1320	Creating Modern Web & Mobile Applications
or CSCI 1600	Real-Time and Embedded Software
or CSCI 1650	Software Security and Exploitation
or CSCI 1660	Introduction to Computer Systems Security
or CSCI 1730	Design and Implementation of Programming Languages
or CSCI 1760	Multiprocessor Synchronization
or CSCI 1950Y	Logic for Systems
or ENGN 1640	Design of Computing Systems

#### Intermediate Courses

CSCI 0330	Introduction to Computer Systems
CSCI 0220	Introduction to Discrete Structures and Probability
or CSCI 0320	Introduction to Software Engineering

### **SOFTWARE PRINCIPLES: studies the design, construction, and analysis of modern software systems**

#### Core Courses

CSCI 1260	Compilers and Program Analysis
or CSCI 1320	Creating Modern Web & Mobile Applications
or CSCI 1600	Real-Time and Embedded Software
or CSCI 1730	Design and Implementation of Programming Languages
or CSCI 1950Y	Logic for Systems

#### Related Courses

CSCI 1270	Database Management Systems
or CSCI 1380	Distributed Computer Systems
or CSCI 1650	Software Security and Exploitation
or CSCI 1680	Computer Networks
or CSCI 1951I	CS for Social Change
or CSCI 1951T	Surveying VR Data Visualization Software for Research

#### Intermediate Courses

CSCI 0220	Introduction to Discrete Structures and Probability
CSCI 0320	Introduction to Software Engineering
CSCI 0330	Introduction to Computer Systems (Data)

### **DATA: Studies the management and use of large data collections**

#### Core Courses

CSCI 1270	Database Management Systems
or CSCI 1420	Machine Learning
or CSCI 1951A	Data Science

#### Related Courses

CSCI 1550	Probabilistic Methods in Computer Science
or CSCI 1580	Information Retrieval and Web Search
or ECON 1660	Big Data

#### Intermediate Courses

CSCI 0320	Introduction to Software Engineering
or CSCI 0330	Introduction to Computer Systems
MATH 0520	Linear Algebra
or MATH 0540	Honors Linear Algebra
or CSCI 0530	Coding the Matrix: An Introduction to Linear Algebra for Computer Science

CSCI 1450	Probability for Computing and Data Analysis
-----------	---

or APMA 1650	Statistical Inference I
or APMA 1655	Statistical Inference I

### **ARTIFICIAL INTELLIGENCE / MACHINE LEARNING: studies the theory and application of algorithms for making decisions and inferences from rules and data**

#### Core Courses

CSCI 1410	Artificial Intelligence
or CSCI 1420	Machine Learning
or CSCI 1430	Computer Vision
or CSCI 1460	Computational Linguistics
or CSCI 1470	Deep Learning
or CSCI 1951R	Introduction to Robotics

#### Related Courses

CSCI 1550	Probabilistic Methods in Computer Science
or CSCI 1951A	Data Science
or CSCI 1951C	Designing Humanity Centered Robots
or CSCI 1951K	Algorithmic Game Theory
or ENGN 1610	Image Understanding

#### Intermediate Courses

CSCI 1450	Probability for Computing and Data Analysis
or APMA 1650	Statistical Inference I
or APMA 1655	Statistical Inference I
MATH 0520	Linear Algebra
or MATH 0540	Honors Linear Algebra
or CSCI 0530	Coding the Matrix: An Introduction to Linear Algebra for Computer Science

### **THEORY: students the foundations of models and algorithms for computing in various contexts**

#### Core Courses

CSCI 1510	Introduction to Cryptography and Computer Security
or CSCI 1550	Probabilistic Methods in Computer Science
or CSCI 1570	Design and Analysis of Algorithms
or CSCI 1760	Multiprocessor Synchronization

#### Related Courses

CSCI 1590	Introduction to Computational Complexity
or CSCI 1810	Computational Molecular Biology
or CSCI 1820	Algorithmic Foundations of Computational Biology
or CSCI 1950H	Computational Topology
or CSCI 1950Y	Logic for Systems
or CSCI 1951G	Optimization Methods in Finance
or CSCI 1951K	Algorithmic Game Theory

#### Intermediate Courses

CSCI 1010	Theory of Computation
-----------	-----------------------

CSCI 1450	Probability for Computing and Data Analysis
or APMA 1650	Statistical Inference I
or APMA 1655	Statistical Inference I
MATH 0520	Linear Algebra
or MATH 0540	Honors Linear Algebra
or CSCI 0530	Coding the Matrix: An Introduction to Linear Algebra for Computer Science

**SECURITY: studies the design, construction, analysis, and defense of techniques to protect systems, data, and communications**

Core Courses

CSCI 1510	Introduction to Cryptography and Computer Security
or CSCI 1660	Introduction to Computer Systems Security
or CSCI 1650	Software Security and Exploitation

Related Courses

CSCI 1320	Creating Modern Web & Mobile Applications
or CSCI 1380	Distributed Computer Systems
or CSCI 1670	Operating Systems
or CSCI 1680	Computer Networks
or CSCI 1730	Design and Implementation of Programming Languages
or CSCI 1800	Cybersecurity and International Relations
or CSCI 1805	Computers, Freedom and Privacy
or CSCI 1950Y	Logic for Systems

Intermediate Courses

CSCI 0330	Introduction to Computer Systems
CSCI 1010	Theory of Computation
CSCI 0220	Introduction to Discrete Structures and Probability (Or Probability and Statistics (see options below))
or CSCI 1450	Probability for Computing and Data Analysis
or APMA 1650	Statistical Inference I
or APMA 1655	Statistical Inference I

**VISUAL COMPUTING: studies the creation, interaction, and analysis of images and visual information, including animation and games**

Core Courses

CSCI 1230	Introduction to Computer Graphics
or CSCI 1250	Introduction to Computer Animation
or CSCI 1280	Intermediate 3D Computer Animation
or CSCI 1290	Computational Photography
or CSCI 1300	User Interfaces and User Experience
or CSCI 1370	Virtual Reality Design for Science
or CSCI 1430	Computer Vision
or CSCI 1950T	Advanced Animation Production

Related Courses

CSCI 1950N	2D Game Engines
or CSCI 1470	Deep Learning
or CSCI 1950U	Topics in 3D Game Engine Development
or ENGN 1610	Image Understanding
or CLPS 1520	Computational Vision
or DATA 1200	Reality Remix - Experimental VR

Intermediate Courses

CSCI 0320	Introduction to Software Engineering
or CSCI 0330	Introduction to Computer Systems
MATH 0520	Linear Algebra
or MATH 0540	Honors Linear Algebra

or CSCI 0530	Coding the Matrix: An Introduction to Linear Algebra for Computer Science
--------------	---

**COMPUTER ARCHITECTURE: studies the design, construction, and analysis of computer architecture and hardware**

Core Courses

ENGN 1630	Digital Electronics Systems Design
or ENGN 1640	Design of Computing Systems
or ENGN 1650	Embedded Microprocessor Design

Related Courses

CSCI 1600	Real-Time and Embedded Software
or CSCI 1760	Multiprocessor Synchronization
or ENGN 1600	Design and Implementation of Digital Integrated Circuits

Intermediate Course

CSCI 0330	Introduction to Computer Systems
-----------	----------------------------------

**COMPUTATIONAL BIOLOGY: studies the foundations and applications of algorithms for analyzing biological data and processes**

Core Courses

CSCI 1810	Computational Molecular Biology
CSCI 1820	Algorithmic Foundations of Computational Biology
CSCI 1850	Deep Learning in Genomics

Related Courses

CSCI 1420	Machine Learning
or CSCI 1430	Computer Vision
or CSCI 1951A	Data Science
or CLPS 1520	Computational Vision

Intermediate Courses

CSCI 0220	Introduction to Discrete Structures and Probability
CSCI 1010	Theory of Computation
CSCI 1450	Probability for Computing and Data Analysis
or APMA 1650	Statistical Inference I
or APMA 1655	Statistical Inference I

**DESIGN: studies the design, construction, and analysis of processes at the interface between humans and systems**

Core Courses

CSCI 1300	User Interfaces and User Experience
or CSCI 1370	Virtual Reality Design for Science
or CSCI 1951C	Designing Humanity Centered Robots

Related Courses

CSCI 1230	Introduction to Computer Graphics
or CSCI 1320	Creating Modern Web & Mobile Applications
or CSCI 1600	Real-Time and Embedded Software
or CSCI 1900	csciStartup
or CSCI 1951A	Data Science
or CSCI 1951I	CS for Social Change
or CSCI 1951T	Surveying VR Data Visualization Software for Research
or VISA 1720	Physical Computing

Intermediate Courses

CSCI 0320	Introduction to Software Engineering
or CSCI 0330	Introduction to Computer Systems
CSCI 1450	Probability for Computing and Data Analysis
or APMA 1650	Statistical Inference I
or APMA 1655	Statistical Inference I

**SELF-DESIGNED: This pathway is modeled after the Brown programs for designing one's own concentration. Students electing this pathway must write a proposal for their pathway and have it approved by an advisor and the director of undergraduate studies. The proposal must meet the breadth and overall course requirements. This must be done by the end of shopping period of the student's seventh semester.**

- 1 Capstone: a one-semester course, taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project.
- 2 Certain 1000-level courses may be used to fill the additional 1000-level course requirements for both the AB and ScB. No more than one such course may be used for the AB concentration and no more than three for the ScB concentration. A list of approved non-CS courses is on our web page. Unless explicitly stated on our web page, such non-CS courses may not be used as part of pathways.
- 3 <https://cs.brown.edu/degrees/undergrad/concentrating-in-cs/concentration-requirements-2020/pathways-for-undergraduate-and-masters-students/>

## Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

## Requirements for the Standard Track of the A.B. degree

### Prerequisites (0-3 courses)

0-3

Students must complete or place out of second semester calculus.

MATH 0100	Introductory Calculus, Part II
or MATH 0170	Advanced Placement Calculus
or MATH 0190	Advanced Placement Calculus (Physics/Engineering)

### Concentration Requirements (9 courses)

Core Computer Science:

Select one of the following series:

2

#### Series A

CSCI 0150 & CSCI 0160	Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures
-----------------------	---

#### Series B

CSCI 0170 & CSCI 0180	Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction
-----------------------	---

#### Series C

CSCI 0190	Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level course, or an advanced course)
-----------	---

Seven CS courses numbered 0220 or higher

7

◆# One complete pathway (see ScB for pathways)

Requires two 1000-level courses as well as one-to-three intermediate courses

◆# Additional intermediate courses so that a total of three are taken with at least one in each of two different intermediate-course categories (see the ScB requirements for a listing of these categories)

◆# One additional 1000-level course that is neither a core nor a related course for the pathways used above

◆# Of the remaining two courses, at least one must be at the 1000-level or higher (i.e., one may be an intermediate course not otherwise used as part of the concentration). One course may be an approved 1000-level course from another department. Unless explicitly stated in a pathway, such non-CS courses may not be used as part of pathways.

## Requirements for the Professional Track of the A.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

## Computer Science-Economics Concentration Requirements

The joint Computer Science-Economics concentration exposes students to the theoretical and practical connections between computer science and

economics. It prepares students for professional careers that incorporate aspects of economics and computer technology and for academic careers conducting research in areas that emphasize the overlap between the two fields. Concentrators may choose to pursue either the A.B. or the Sc.B. degree. While the A.B. degree allows students to explore the two disciplines by taking advanced courses in both departments, its smaller number of required courses is compatible with a liberal education. The Sc.B. degree achieves greater depth in both computer science and economics by requiring more courses, and it offers students the opportunity to creatively integrate both disciplines through a design requirement. In addition to courses in economics, computer science, and applied mathematics, all concentrators must fulfill the Computer Science department's writing requirement by passing a course that involves significant expository writing.

## Standard Program for the Sc.B. degree.

### Prerequisites (3 courses):

MATH 0100	Introductory Calculus, Part II	
MATH 0520	Linear Algebra	
or MATH 0540	Honors Linear Algebra	
or CSCI 0530	Coding the Matrix: An Introduction to Linear Algebra for Computer Science	
ECON 0110	Principles of Economics	

### Required Courses: 17 courses: 8 Computer Science, 8 Economics, and a Capstone

CSCI 1450	Probability for Computing and Data Analysis	1
or APMA 1650	Statistical Inference I	
or APMA 1655	Statistical Inference I	
Select one of the following Series:		2
<b>Series A</b>		
CSCI 0150 & CSCI 0160	Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures	
<b>Series B</b>		
CSCI 0170 & CSCI 0180	Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction	
<b>Series C</b>		
CSCI 0190	Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level course.)	
Two of the following intermediate courses, one of which must be math-oriented and one systems-oriented.		2
CSCI 0220	Introduction to Discrete Structures and Probability (math)	
CSCI 0320	Introduction to Software Engineering (systems)	
CSCI 0330	Introduction to Computer Systems (systems)	
CSCI 1010	Theory of Computation (math) <sup>2</sup>	
A pair of 1000-level CS courses that, along with the intermediate courses and math courses, satisfy one of the CS Pathways. <sup>3</sup>		2
An additional CS course that is either at the 1000-level or is an intermediate course not already used to satisfy concentration requirements. CSCI 1450 may not be used to satisfy this requirement.		1
ECON 1130	Intermediate Microeconomics (Mathematical) <sup>4</sup>	1
ECON 1210	Intermediate Macroeconomics	1

ECON 1630	Mathematical Econometrics I	1
Three courses from the "mathematical economics" group (CSCI 1951K can be counted as one of them, if it has not been used to satisfy the computer science requirements of the concentration and if the student has taken either ECON 1470 or ECON 1870):		3
ECON 1170	Welfare Economics and Social Choice Theory	
ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies	
ECON 1460	Industrial Organization	
ECON 1470	Bargaining Theory and Applications	
ECON 1490	Designing Internet Marketplaces	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1670	Advanced Topics in Econometrics	
ECON 1750	Investments II	
ECON 1820	Theory of Behavioral Economics	
ECON 1850	Theory of Economic Growth	
ECON 1860	The Theory of General Equilibrium	
ECON 1870	Game Theory and Applications to Economics	
and any graduate Economics course		
Two additional 1000-level Economics courses excluding 1620, 1960, 1970 <sup>5</sup>		2
One capstone course in either CS or Economics: a one-semester course, normally taken in the student's last semester undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic (preferably at the intersection of computer science and economics) in depth, to produce a culminating artifact such as a paper or software project. A senior thesis, which involved two semesters of work, may count as a capstone. <sup>6</sup>		1
Total Credits		17

- CSCI 1450 was formerly known as CSCI 0450: they are the same course and hence only one may be taken for credit. APMA 1650 or APMA 1655 may be used in place of CSCI 1450 in CS pathway requirements. However, concentration credit will be given for only one for APMA 1650, APMA 1655, and CSCI 1450.
- CSCI 1010 may be used either as a math-oriented intermediate course or as an advanced course. CSCI 1010 was formerly known as CSCI 0510: They are the same course and hence only one may be taken for credit.
- A list of pre-approved pairs may be found at the approved-pairs web page (<http://www.cs.brown.edu/ugrad/concentrations/approvedpairs.html>). You are not restricted to pairs on this list, but any pair not on the list must be approved by the Computer Science director of undergraduate studies. CS Pathways can be found on the New Pathways (<https://cs.brown.edu/degrees/undergrad/concentration-requirements/pathways-for-undergraduate-and-masters-students>) page.
- Or ECON 1110, with permission.
- Students may use either ECON 1070 or ECON 1090 toward the concentration, but not both. Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, 1620 and 1960 can be used for university credit and up to two 1970s may be used for university credit.

<sup>6</sup> One capstone course (<http://cs.brown.edu/degrees/undergrad/concentrations/capstone>) in either Computer Science or Economics: a one-semester course, taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic (preferably at the intersection of computer science and economics) in depth, to produce a culminating artifact such as a paper or software project.

## Standard Program for the A.B. degree:

### Prerequisites (3 courses):

MATH 0100	Introductory Calculus, Part II
MATH 0520	Linear Algebra
or MATH 0540	Honors Linear Algebra
or CSCI 0530	Coding the Matrix: An Introduction to Linear Algebra for Computer Science
ECON 0110	Principles of Economics

### Required Courses: 13 courses: 7 Computer Science and 6 Economics

CSCI 1450	Probability for Computing and Data Analysis	1
or APMA 1650	Statistical Inference I	
or APMA 1655	Statistical Inference I	

Select one of the following series: 2

#### Series A

CSCI 0150 & CSCI 0160	Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures
-----------------------	---

#### Series B

CSCI 0170 & CSCI 0180	Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction
-----------------------	---

#### Series C

CSCI 0190	Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level course, or a 1000-level course)
-----------	--

Two of the following intermediate courses, one of which must be math-oriented and one systems-oriented: 2

CSCI 0220	Introduction to Discrete Structures and Probability (math)
-----------	--

CSCI 0320	Introduction to Software Engineering (systems)
-----------	--

CSCI 0330	Introduction to Computer Systems (systems)
-----------	--

CSCI 1010	Theory of Computation (math)
-----------	------------------------------

Two additional CS courses; at least one must be at the 1000-level. The other must either be at the 1000-level or be an intermediate course not already used to satisfy concentration requirements. CSCI 1450 may not be used to satisfy this requirement. 2

ECON 1130	Intermediate Microeconomics (Mathematical)	1
-----------	--	---

ECON 1210	Intermediate Macroeconomics	1
-----------	-----------------------------	---

ECON 1630	Mathematical Econometrics I	1
-----------	-----------------------------	---

Three courses from the "mathematical-economics" group: <sup>2</sup> 3

ECON 1170	Welfare Economics and Social Choice Theory
-----------	--

ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
-----------	---

ECON 1460	Industrial Organization
ECON 1470	Bargaining Theory and Applications
ECON 1490	Designing Internet Marketplaces
ECON 1640	Mathematical Econometrics II
ECON 1660	Big Data
ECON 1670	Advanced Topics in Econometrics
ECON 1750	Investments II
ECON 1820	Theory of Behavioral Economics
ECON 1850	Theory of Economic Growth
ECON 1860	The Theory of General Equilibrium
ECON 1870	Game Theory and Applications to Economics

or any graduate Economics course <sup>3</sup>

Total Credits 13

<sup>1</sup> Or ECON 1110, with permission.

<sup>2</sup> CSCI 1951K can be counted as one of them, if it has not been used to satisfy the computer science requirements of the concentration and if the student has taken either ECON 1470 or ECON 1870.

<sup>3</sup> Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, 1620 and 1960 can be used for university credit and up to two 1970s may be used for university credit.

## Honors

Students who meet stated requirements are eligible to write an honors thesis in their senior year. Students should consult the listed honors requirements of whichever of the two departments their primary thesis advisor belongs to, at the respective departments' websites.

## Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

## Applied Mathematics-Computer Science Concentration Requirements

The Sc.B. concentration in Applied Math-Computer Science provides a foundation of basic concepts and methodology of mathematical analysis and computation and prepares students for advanced work in computer science, applied mathematics, and scientific computation. Concentrators must complete courses in mathematics, applied math, computer science, and an approved English writing course. While the concentration in

Applied Math-Computer Science allows students to develop the use of quantitative methods in thinking about and solving problems, knowledge that is valuable in all walks of life, students who have completed the concentration have pursued graduate study, computer consulting and information industries, and scientific and statistical analysis careers in industry or government. This degree offers a standard track and a professional track.

## Requirements for the Standard Track of the Sc.B. degree.

### Prerequisites - two semesters of Calculus, for example

MATH 0090 & MATH 0100	Introductory Calculus, Part I and Introductory Calculus, Part II
MATH 0170	Advanced Placement Calculus

### Concentration Requirements (17 courses)

#### Core-Math:

MATH 0180 or MATH 0350	Intermediate Calculus Honors Calculus	1
MATH 0520 or MATH 0540 or CSCI 0530	Linear Algebra Honors Linear Algebra Coding the Matrix: An Introduction to Linear Algebra for Computer Science	1

#### Core-Applied Mathematics:

APMA 0350	Applied Ordinary Differential Equations	1
APMA 0360	Applied Partial Differential Equations I	1
APMA 1170 or APMA 1180	Introduction to Computational Linear Algebra Introduction to Numerical Solution of Differential Equations	1

#### Core-Computer Science:

Select one of the following Series: 2

#### Series A

CSCI 0150 & CSCI 0160	Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures
--------------------------	---

#### Series B

CSCI 0170 & CSCI 0180	Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction
--------------------------	---

#### Series C

CSCI 0190	Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; (this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level course) )
-----------	--

Select three of the following intermediate-level courses, one of which must be math-oriented and one systems-oriented. The intermediate courses must cover the requirements of the pathway chosen under additional requirements for CS. 3

CSCI 0220	Introduction to Discrete Structures and Probability (math)
CSCI 0320	Introduction to Software Engineering (systems)
CSCI 0330	Introduction to Computer Systems (systems)
CSCI 1010	Theory of Computation (math)
CSCI 1450 or APMA 1650	Probability for Computing and Data Analysis (math) <sup>1</sup> Statistical Inference I

Three 1000-level Computer Science courses. Two of these courses and the intermediate courses must satisfy one of the CS pathways.<sup>2</sup> 3

Three 1000-level Applied Mathematics courses approved by the concentration advisor, of which two should constitute a standard sequence or address a common theme. Typical sequences include: APMA 1200/1210 and APMA 1650 or 1655/1660. APMA 1910 cannot be used as an elective. 3

A capstone course: a one-semester course, taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project. The title and abstract of the artifact, along with the student's and faculty-sponsor's names, will be placed in the CS website. The inclusion of a relevant image or system diagram is strongly encouraged. The complete text of the best artifacts of each class will be featured on the CS website. A senior thesis, which involves two semesters of work, may count as a capstone.<sup>3</sup> 1

Note: CSCI 1010 and 1450 may be used either as a math-oriented intermediate courses or as advanced courses. CSCI 1010 was formerly known as CSCI 510: they are the same course and hence only one may be taken for credit. CSCI 1450 was formerly known as CSCI 450: they are the same course and hence only one may be taken for credit. Applied Math 1650 or 1655 may be used in place of CSCI 1450. However, concentration credit will be given for only one of Applied Math 1650, 1655, and CSCI 1450.

Total Credits 17

<sup>1</sup> APMA 1650 may only be used if not being used as an Applied Math course.

<sup>2</sup> Pathways may be viewed here: <https://cs.brown.edu/degrees/undergrad/concentrating-in-cs/concentration-requirements-2020/pathways-for-undergraduate-and-masters-students/>

<sup>3</sup> Capstone Options may be found here: <https://cs.brown.edu/degrees/undergrad/concentrating-in-cs/concentration-requirements-2020/capstone/>

## Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

## Mathematics-Computer Science Concentration Requirements

Students may opt to pursue an interdisciplinary Bachelor of Science degree in Math-Computer Science, a concentration administered cooperatively between the mathematics and computer science departments. Course requirements include math- and systems-oriented computer science courses, as well as computational courses in applied math. Students must identify a series of electives that cohere around a common theme. As with other concentrations offered by the Computer Science department, students have the option to pursue the professional track (<http://www.cs.brown.edu/ugrad/concentrations/professional.track.html>) of the ScB program in Mathematics-Computer Science.

### Requirements for the Standard Track of the Sc.B. degree.

#### Prerequisites

Three semesters of Calculus to the level of MATH 0180, MATH 0200, or MATH 0350	3
MATH 0520 Linear Algebra	1
or MATH 0540 Honors Linear Algebra	
or CSCI 0530 Coding the Matrix: An Introduction to Linear Algebra for Computer Science	

#### Core Courses

MATH 1530 Abstract Algebra	1
Select one of the following series:	2
Series A	
CSCI 0150 & CSCI 0160 Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures	
Series B	
CSCI 0170 & CSCI 0180 Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction	
Series C	
CSCI 0190 Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level CS course)	
CSCI 0320 Introduction to Software Engineering	1
or CSCI 0330 Introduction to Computer Systems	
CSCI 0220 Introduction to Discrete Structures and Probability	1
or CSCI 1010 Theory of Computation	
Three 1000-level Mathematics courses	3
Three advanced courses in Computer Science <sup>1, 2</sup>	3
Three additional courses different from any of the above chosen from Mathematics, Computer Science, Applied Mathematics, or related areas <sup>3</sup>	3
A capstone course in Computer Science or Mathematics <sup>4</sup>	1
<b>Total Credits</b>	<b>19</b>

<sup>1</sup> These courses must be at the 1000-level or higher. Two of these courses and the intermediate courses must satisfy one of the CS pathways (<https://cs.brown.edu/degrees/undergrad/concentration-requirements/pathways-for-undergraduate-and-masters-students>).

<sup>2</sup> Note: CSCI 1010 may be used either as a math-oriented intermediate course or as an advanced course. CSCI 1010 was formerly known as CSCI 510: they are the same course and hence only one may be taken for credit. CSCI 1450 was formerly known as CSCI 450: they are the same course and hence only one may be taken for credit. Applied Math 1650 or 1655 may be used in place of CSCI 1450 in CS pathway requirements (<https://cs.brown.edu/degrees/undergrad/concentration-requirements/pathways-for-undergraduate-and-masters-students>). However, concentration credit will be given for only one of Applied Math 1650, 1655, and CSCI 1450.

<sup>3</sup> These must be approved by a concentration advisor.

<sup>4</sup> A one-semester course, taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project. The title and abstract of the artifact, along with the student's and faculty-sponsor's names, will be placed in the CS website. The inclusion of a relevant image or system diagram is strongly encouraged. The complete text of the best artifacts of each class will be featured on the CS website. A senior thesis, which involves two semesters of work, may count as a capstone (<http://cs.brown.edu/degrees/undergrad/concentrations/capstone>).

#### Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

## Computer Science Graduate Program

The department of Computer Science offers two graduate degrees in computer science. The Master of Science (Sc.M.) degree for those who wish to improve their professional competence in computer science or to prepare for further graduate study, and the Doctor of Philosophy (Ph.D) degree.

For more information on admission, please visit the following website: <http://www.brown.edu/academics/gradschool/programs/computer-science>

## Ph.D. Requirements

Requirements for the Ph.D. program can be found at [https://cs.brown.edu/degrees/doctoral/reqs/reqs\\_phd.2015.pdf](https://cs.brown.edu/degrees/doctoral/reqs/reqs_phd.2015.pdf)

## Requirements for the Masters Degree

The requirements consist of a basic component and an advanced component. All courses must be at the 1000 level or higher. All courses must be completed with a grade of B or better.

The courses in student's program must be approved by the director of the Master's program (as well as by the student's advisor).

## Basic Component

The basic component consists of six courses. None of these courses may be reading and research courses such as CSCI 1970 and CSCI 2980.

The six courses are chosen as follows:

- Two must be CS courses that form a pathway (see the explanation of pathways at <https://cs.brown.edu/degrees/undergrad/concentration-requirements/pathways-for-undergraduate-and-masters-students>).
- One must be a CS course in an area that's not listed in the chosen pathway (it must not be a core course, must not be a grad course, and must not be a related course of the pathway).
- The three additional courses must be in CS or related and must be approved by your advisor or the director of graduate studies (master's). Getting this approval will require you to show that the courses are relevant to your CS interests. In general, the more non-CS courses you wish to take, the stronger your justification must be.

## Advanced Component

The advanced component requires the student to complete one of the following six options. Reading and research courses (such as CSCI 2980) may be used as part of options 1, 2, 3, and 4, but not as part of options 5 and 6. An "advanced course," as used below, is either a 2000-level CS courses or a 1000-level CS courses that includes a Master's supplement. Master's supplement are nominally half-credit courses, but students may do the work of these courses without officially registering for them. Examples of such supplements are CSCI 1234 (supplementing CSCI 1230), CSCI 1690 (supplementing CSCI 1670), and CSCI 1729 (supplementing CSCI 1730).

"Internships", as used below, must be approved by the student's advisor and are paid work in the area of the student's master's studies. They may be full, or part time. A full-time internship must last at least two months but no more than four months. A part-time internship must last at least four months but no more than six months. Normally the internship will be performed between the student's second and third semesters in the program.

The six options are:

1. Complete a thesis supervised by her or his advisor and approved by a committee consisting of the advisor and at least one other faculty member.
2. Complete a thesis supervised by her or his advisor and approved by a committee consisting of the advisor and at least one other faculty member, and complete an internship.
3. Complete a project supervised and approved by her or his advisor.
4. Complete a project supervised and approved by her or his advisor, and complete an internship.
5. Complete two advanced courses.
6. Complete two advanced courses and complete an internship.

## Rationale

Students entering the Master's program typically have one of two goals: they intend to pursue research in Computer Science and are preparing themselves to enter Ph.D. programs, or they intend to become professional computer scientists and pursue careers in industry. In both cases, students should take collections of courses that not only give them strength in particular areas of Computer Science, but also include complementary areas that familiarize them with other ways of thinking about the field. For example, a student whose interests are in the practical aspects of designing computer systems should certainly take courses in this area, but should also be exposed to the mindset of theoretical computer science. In a rapidly changing discipline, there is much cross-fertilization among areas and students should have some experience in doing advanced work in areas not directly related to their own.

A student whose goal is a research career should become involved as quickly as possible with a research group as part of their Master's studies, and demonstrate and learn about research by participating in it. The

resulting thesis or project report will serve to establish her or his suitability for entering a Ph.D. program.

A student whose goal is to be a professional computer scientist should have some professional experience as part of her or his preparation. A certain amount of coursework is required before a student can qualify for a pedagogically useful internship. Students with limited experience in Computer Science should take a few advanced Computer Science courses before embarking on an internship. Other students, particularly those whose undergraduate degrees were at Brown, will have had internship experiences while undergraduates. Internships provide insights for subsequent courses and project work at Brown. Students without such experiences are at a disadvantage with respect to their peers. Thus we strongly encourage students who have not had such experience to choose one of options 2, 4, and 6, for which internships are required.

Note that these internships are not courses and the work is not evaluated as it would be for a course. Students' advisors will assist them in choosing and obtaining internships, but it is up to students themselves to ensure that they get as much benefit as possible from their experiences. They must be able to take advantage of these experiences while completing their Master's projects – we expect as high-quality work from them as we do from students who entered the program with prior internship experiences.

A Master's degree normally requires three to four semesters of full-time study, depending upon one's preparation.

CSCI 1010	Theory of Computation	1
CSCI 1230	Introduction to Computer Graphics	1

\* Students may arrange with the instructor to receive 2000 level credit for additional coursework in CSCI 1230, 1660 or 1670

## Concurrent ScB (NUS) and ScM in Computational Biology (Brown University)

The School of Computing at National University of Singapore and The Department of Computer Science at Brown have established a concurrent Bachelor's and Master's degree program in Computational Biology. After having first completed four years of undergraduate study at National University of Singapore (NUS), qualified students will attend Brown University to complete their fifth and final year of study in computational biology. After the successful completion of requirements set forth by both universities, the students will simultaneously earn both their Sc.B. and Sc.M. degrees. The Sc.B will be awarded by the National University of Singapore, while the Sc.M. is awarded by Brown University.

## Courses

### CSCI 0020. The Digital World.

Removes the mystery surrounding computers and the ever-growing digital world. Introduces a range of topics and many aspects of multimedia, along with explanations of the underlying digital technology and its relevance to our society. Other topics include artificial intelligence, IT security, ethics and the economics of computing as well as the effects of its pervasiveness in today's world. Introductory programming and analytic skills are developed through HTML, Photoshop, Excel and Python assignments. CSCI 0020 is a good introduction to a wide range of CS topics that have broad relevance in our society. No prerequisites.

### CSCI 0030. Introduction to Computation for the Humanities and Social Sciences.

Introduces students to the use of computation for solving problems in the social sciences and the humanities. We will investigate a series of real-world problems taken from the news, from books such as Freakonomics, and from current research. Topics covered include data gathering, analysis, and visualization; web-based interfaces; algorithms; and scripting. Enrollment limited to 20. Instructor permission required.

### CSCI 0040. Introduction to Scientific Computing and Problem Solving.

CSCI0040 provides an introduction to using computers to solve STEM (Science, Technology, Engineering and Mathematics) data analysis, visualization and simulation problems from engineering, neuroscience, biology, mathematics and finance.

Students will access and analyze a number of "real world" data sets while becoming fluent MATLAB programmers. Other tools utilized may include Excel, Wolframalpha and Python.

By course end, students should be able to use MATLAB to solve a large variety of scientific data analysis, visualization and simulation problems.

No prior programming experience is required (MATLAB is easy and fun to use).

### CSCI 0050. A Data-Centric Introduction to Programming.

An introduction to computer programming with a focus on skills needed for data-intensive applications. Topics include core constructs for processing both tabular and structured data; decomposing problems into programming tasks; data structures; algorithms; and testing programs for correct behavior.

### CSCI 0060. Practical System Skills.

An introduction to develop hands-on-computing skills necessary to comfortably work within a UNIX-like operating system. Topics include the shell, its filesystem, bash scripting, SSH, version control, as well as how to locally develop, deploy and publish a website. <https://cs.brown.edu/courses/csci0060/>

### CSCI 0080. A First Byte of Computer Science.

Introduces non-CS concentrators to the academic discipline of computer science, its thought processes, and its relevance to other fields and modern life more generally. The target audience is students who are interested in learning more about what computer science is about and the ideas it has to offer tomorrow's citizens and scholars. Topics include the basics of computation and programming, a taste of theoretical computer science and algorithms, and an introduction to codes and artificial intelligence. Although students will learn to read and understand short programs, the course will not teach or require advanced programming skills.

### CSCI 0081. TA Apprenticeship: Full Credit.

Being an undergraduate TA is a learning experience: one not only gets a deeper understanding of the course material, but gains management and social skills that are invaluable for one's future. Students taking this course must first be selected as an undergraduate TA for a Computer Science course, a course the student has taken and done well in. Students will work with the course's instructor on a variety of course-related topics, including preparation of material and development of assignments. Whether CSCI 0081 or its half-credit version (CSCI 0082) is taken is up to the professor of the course being TA'd. Instructor permission required.

**CSCI 0082. TA Apprenticeship: Half Credit.**

Being an undergraduate TA is a learning experience: one not only gets a deeper understanding of the course material, but gains management and social skills that are invaluable for one's future. Students taking this course must first be selected as an undergraduate TA for a Computer Science course, a course the student has taken and done well in. Students will work with the course's instructor on a variety of course-related topics, including preparation of material and development of assignments. Whether CSCI 0082 or its full-credit version (CSCI 0081) is taken is up to the professor of the course being TA'd. Instructor permission required.

**CSCI 0100. Data Fluency for All.**

This course is intended to introduce Brown students to computational techniques that data scientists use to tell stories. Data fluency encompasses both data literacy, the basics of statistics and machine learning, and data communication, which relies heavily on principles of design. Students will gain hands on experience using statistical tools such as 'R' to analyze real world data sets, and 'ggplot' to visualize them. Sample application domains include just about every field, since the only requirement is data, which there almost always are (e.g., the complete works of Shakespeare is a sample data set).

**CSCI 0111. Computing Foundations: Data.**

An introduction to computing and programming that focuses on understanding and manipulating data. Students will learn to write programs to process both tabular and structured data, to assess programs both experimentally and theoretically, to apply basic data science concepts, and to discuss big ideas around the communication and use of digital information.

Designed for both concentrators and non-concentrators, this is the first in an eventual three-course introductory sequence leading into advanced CS courses. Programming assignments will be smaller scale than in CSCI 0150/0170, thus allowing students time to practice programming and discuss computational ideas in a broader context.

**CSCI 0130. User Interfaces and User Experience.**

Topics include understanding when to use different interfaces, modeling and representing user interaction, principles of user experience design, eliciting requirements and feedback from users, methods for designing and prototyping interfaces, and user interface evaluation. Students interested in learning the process behind building a user interface and gaining hands-on experience designing a user interface should take this course. Programming experience is unnecessary. There will be assignments, readings, and design labs. CSCI 0130 is the same lecture, labs, and readings as CSCI 1300 but half of the assignments will be different (CSCI 1300 will have assignments with computer science prerequisites). Website: <http://cs.brown.edu/courses/csci1300/>

**CSCI 0150. Introduction to Object-Oriented Programming and Computer Science.**

Emphasizes object-oriented design and programming in Java, an effective modern technique for producing modular, reusable, internet-aware programs. Also introduces interactive computer graphics, user interface design and some fundamental data structures and algorithms. A sequence of successively more complex graphics programs, including Tetris, and culminating in a significant final project, helps provide a serious introduction to the field intended for both potential concentrators and those who may take only a single course. No prerequisites, no prior knowledge of programming required.

**CSCI 0160. Introduction to Algorithms and Data Structures.**

Introduces fundamental techniques for problem solving by computer that are relevant to most areas of computer science, both theoretical and applied. Algorithms and data structures for sorting, searching, graph problems, and geometric problems are covered. Programming assignments conform with the object-oriented methodology introduced in CSCI 0150. Prerequisite: CSCI 0150 or written permission.

**CSCI 0170. Computer Science: An Integrated Introduction.**

CSCI0170/0180 is an introductory sequence that helps students begin to develop the skills, knowledge, and confidence to solve computational problems elegantly, correctly, efficiently, and with ease. The sequence is unique in teaching both the functional and imperative programming paradigms—the first through the languages Scheme and ML in CSCI0170; the second through Java in CSCI0180. The sequence requires no previous programming experience. Indeed, few high school students are exposed to functional programming; hence even students with previous programming experience often find this sequence an invaluable part of their education.

Although students are taught to use programming languages as tools, the goal of CSCI0170/0180 is not merely to teach programming. On the contrary, the goal is to convey to students that computer science is much more than programming! All of the following fundamental computer science techniques are integrated into the course material: algorithms, data structures, analysis, problem solving, abstract reasoning, and collaboration. Concrete examples are drawn from different subareas of computer science: in 0170, from arbitrary-precision arithmetic, natural language processing, databases, and strategic games; in 0180, from discrete-event simulation, data compression, and client/server architectures.

**CSCI 0180. Computer Science: An Integrated Introduction.**

A continuation of CSCI 0170. Students learn to program in Java while continuing to develop their algorithmic and analytic skills. Emphasis is placed on object-oriented design, imperative programming, and the implementation and use of data structures. Examples are drawn from such areas as databases, strategy games, web programming, graphical user interfaces, route finding, and data compression. Lab work done with the assistance of TAs. Prerequisite: CSCI 0170 or CSCI 0190.

**CSCI 0190. Accelerated Introduction to Computer Science.**

A one-semester introduction to CS covering programming integrated with core data structures, algorithms, and analysis techniques, similar to the two-course introductory sequences (CSCI 0150-0160 and CSCI 0170-0180). Students wishing to take CSCI 0190 must pass a sequence of online placement assignments. Though the placement process is most appropriate for students who have had some prior programming experience, it is self-contained so all are welcome to try learning the provided material and attempting placement. Placement information will be available by June 1st at <http://cs.brown.edu/courses/csci0190/>. Students who do not successfully pass the placement process won't be allowed to register.

**CSCI 0220. Introduction to Discrete Structures and Probability.**

Seeks to place on solid foundations the most common structures of computer science, to illustrate proof techniques, to provide the background for an introductory course in computational theory, and to introduce basic concepts of probability theory. Introduces Boolean algebras, logic, set theory, elements of algebraic structures, graph theory, combinatorics, and probability. No prerequisites.

**CSCI 0310. Introduction to Computer Systems.**

Basic principles of computer organization. Begins with machine representation of data types and logic design, then explores architecture and operations of computer systems, including I/O, pipelining, and memory hierarchies. Uses assembly language as an intermediate abstraction to study introductory operating system and compiler concepts. Prerequisite: CSCI 0150 or CSCI 0180 or CSCI 0190.

**CSCI 0320. Introduction to Software Engineering.**

Techniques for designing, building, and maintaining large,scalable, and reusable systems. We will cover advanced programming techniques using Java and Javascript. Course assignments will familiarize students with software testing, relational databases, concurrency techniques such as threads, and software engineering tools like git, profilers, and debuggers. A major component of the course will be a group software project of your own design.

Prerequisite: CSCI 0160, CSCI 0180 or CSCI 0190; CSCI 0220 is recommended.

**CSCI 0330. Introduction to Computer Systems.**

High-level computer architecture and systems programming. The course covers the organization of computer systems (in terms of storage units, caches, processors, and I/O controllers) and teaches students assembly-language programming and C-language programming. Extensive programming exercises introduce students to systems-level programming on Unix systems, as well as to multi-threaded programming with POSIX threads. Students will be introduced to the functions of operating systems. Prerequisite: CSCI 0150, 0180, or 0190.

**CSCI 0530. Coding the Matrix: An Introduction to Linear Algebra for Computer Science.**

Introduces vectors, matrices and their role in computer science in three components: (1) concepts, theorems, and proofs, (2) procedures and programs, (3) applications and working with data. Weekly lab sessions where students apply concepts to a real task with real data. Example labs: transformations in 2-d graphics, error-correcting codes, image compression using wavelets, synthesizing a new perspective in a photo, face recognition, news story categorization, cancer diagnosis using machine learning, matching airplanes to destinations, Google's PageRank method. Other topics as time allows. Skills in programming and prior exposure to reading and writing mathematical proofs required.

**CSCI 1010. Theory of Computation.**

The course introduces basic models of computation including languages, finite-state automata and Turing machines. Proves fundamental limits on computation (incomputability, the halting problem). Provides the tools to compare the hardness of computational problems (reductions). Introduces computational complexity classes (P, NP, PSPACE and others). Prerequisite: CSCI 0220 or 1450.

**CSCI 1230. Introduction to Computer Graphics.**

Fundamental concepts in 2D and 3D computer graphics, e.g., 2D raster graphics techniques, simple image processing, and user interface design. Focuses on geometric transformations, and 3D modeling, viewing and rendering. A sequence of assignments in C++ culminates in a simple geometric modeler and ray tracer. Prerequisite: CSCI 0160, CSCI 0180, or CSCI 0190. Some knowledge of basic linear algebra is helpful but not required. Strong object-oriented programming ability (e.g., in C++, Java or Python) is required.

**CSCI 1234. Computer Graphics Lab.**

CSCI 1234 is a half-credit course intended to be taken concurrently with CSCI 1230 and provides students with a greater understanding of the material by having them extend each of 1230's assignments to greater depth.

**CSCI 1250. Introduction to Computer Animation.**

Introduction to 3D computer animation production including story writing, production planning, modeling, shading, animation, lighting, and compositing. The first part of the course leads students through progressive exercises that build on each other to learn basic skills in 2D and 3D animation. At each step, student work is evaluated for expressiveness, technical correctness and aesthetic qualities. Students then work in groups creating a polished short animation. Emphasis on in-class critique of ongoing work which is essential to the cycle of visually evaluating work in progress, determining improvements, and implementing them for further evaluation.

Please see course website for application procedure.

**CSCI 1260. Compilers and Program Analysis.**

Lexical analysis, syntactic analysis, semantic analysis, code generation, code optimization, translator writing systems. Prerequisites: CSCI 0220 and 0320; 0510 is recommended.

**CSCI 1270. Database Management Systems.**

Introduction to database structure, organization, languages, and implementation. Relational model, query languages, query processing, query optimization, normalization, file structures, concurrency control and recovery algorithms, and distributed databases. Coverage of modern applications such as the Web, but with emphasis on Database Management Systems internals. Prerequisites: CSCI 0160, CSCI 0180, or CSCI 0190. One of CSCI 0330 or CSCI 0320 is strongly recommended.

**CSCI 1280. Intermediate 3D Computer Animation.**

Continues work begun in CSCI 1250 with deeper exploration of technical and artistic aspects of 3D computer animation including more sophisticated shading and lighting methods and character modeling, rigging, animation, and dynamics. After a series of individual exercises, students pursue an independent topic and then, working alone or in pairs, create a polished demonstration. Emphasis is on in-class critique of ongoing work. Prerequisite: CSCI 1250. Students may contact the instructor in December for permission.

**CSCI 1290. Computational Photography.**

Describes the convergence of computer graphics and computer vision with photography. Its goal is to overcome the limitations of traditional photography using computational techniques to enhance the way we capture, manipulate, and interact with visual media. Topics covered: cameras, human visual perception, image processing and manipulation, image based lighting and rendering, high dynamic range, single view reconstruction, photo quality assessment, non photorealistic rendering, the use of Internet-scale data, and more. Students are encouraged to capture and process their own data. Prerequisites: previous programming experience, basic linear algebra, calculus, and probability; previous knowledge of computer graphics or computer vision. Strongly recommended: CSCI 1230, CSCI 1430, ENGN 1610.

**CSCI 1300. User Interfaces and User Experience.**

Topics include understanding when to use different interfaces, modeling and representing user interaction, principles of user experience design, eliciting requirements and feedback from users, methods for designing and prototyping interfaces, and user interface evaluation. Students interested in learning the process behind building a user interface and gaining hands-on experience designing a user interface should take this course. There will be assignments, readings, and design labs. CSCI 1300 and CS 0130 share the same lecture, labs, and readings but half of the assignments will be different (CSCI 1300 will have assignments with computer science prerequisites). Website: <http://cs.brown.edu/courses/csci1300/>

**CSCI 1310. Fundamentals of Computer Systems.**

Covers fundamental concepts, principles, and abstractions that underlie the design and engineering of computer systems, with reference to applications of these concepts in industry. Topics include machine organization, systems programming and performance, key concepts of operating systems, isolation, security, virtualization, concurrent programming, and the basics of distributed systems. Combined lectures, case studies, labs, and several hands-on projects involving programming exercises. Prerequisites: CSCI 0160, 0180, or 0190; or CSCI 0150, 0170 if concurrently taking CSCI 0160 or 0180; or permission of the instructor.

**CSCI 1320. Creating Modern Web & Mobile Applications.**

This course covers all aspects of web application development, including initial concept, user-centric design, development methodologies, front and back end development, databases, security, testing, load testing, accessibility, and deployment. There will be a substantial team project. The course is designed for students with a programming background (equiv CSCI 0320/CSCI 0330) who want to learn how to build web applications, and for students with a background in web design, including HTML and Javascript, who are interested in learning how to extend design techniques to incorporate the technologies needed in modern web applications. Project teams will consist of students with both backgrounds.

**CSCI 1340. Innovating Game Development.**

What technologies will shape the next generation of videos? This project-centered course focuses on computational innovations for game development. Students examine innovative game technology through case studies of existing games and talks by industrial and academic game professionals. In teams, students propose and implement a project demonstrating a novel technology for gaming. Recommended: strong computational or engineering background.

**CSCI 1370. Virtual Reality Design for Science.**

Explores the visual and human-computer interaction design process for scientific applications in Brown's immersive virtual reality Cave. Joint with RISD. Computer Science and design students learn how to work together effectively; study the process of design; learn about scientific problems; create designs applications; critique, evaluate, realize and iterate designs; and demonstrate final projects. Instructor permission required.

**CSCI 1380. Distributed Computer Systems.**

Explores the fundamental principles and practice underlying networked information systems, first we cover basic distributed computing mechanisms (e.g., naming, replication, security, etc.) and enabling middleware technologies. We then discuss how these mechanisms and technologies fit together to realize distributed databases and file systems, web-based and mobile information systems. Prerequisite: CSCI 0320 or CSCI 0330.

**CSCI 1410. Artificial Intelligence.**

Practical approaches to designing intelligent systems. Topics include search and optimization, uncertainty, learning, and decision making. Application areas include natural language processing, machine vision, machine learning, and robotics. Prerequisites: CSCI 0160, CSCI 0180 or CSCI 0190; and one of CSCI0220 or CSCI1450 or APMA1650 or APMA1655.

**CSCI 1420. Machine Learning.**

How can artificial systems learn from examples and discover information buried in data? We explore the theory and practice of statistical machine learning, focusing on computational methods for supervised and unsupervised learning. Specific topics include empirical risk minimization, probably approximately correct learning, kernel methods, neural networks, maximum likelihood estimation, the expectation maximization algorithm, and principal component analysis. This course also aims to expose students to relevant ethical and societal considerations related to machine learning that may arise in practice.

Please contact the instructor for information about the waitlist.

**CSCI 1430. Computer Vision.**

How can we program computers to understand the visual world? This course treats vision as inference from noisy and uncertain data and emphasizes probabilistic and statistical approaches. Topics may include perception of 3D scene structure from stereo, motion, and shading; segmentation and grouping; texture analysis; learning, object recognition; tracking and motion estimation. Strongly recommended: basic linear algebra, calculus, and probability.

**CSCI 1440. Computation in Economics and Games.**

This course examines topics in game theory and mechanism design from a computer scientist's perspective. Through the lens of computation, the focus is the design and analysis of systems utilized by self-interested agents. Students will investigate how the potential for strategic agent behavior can/should influence system design, and the ramifications of conflicts of interest between system designers and participating agents. Emphasis on computational tractability is paramount, so that simple designs are often preferred to optimal. Students will learn to analyze competing designs using the tools of theoretical computer science, and empirical tools, such as empirical game-theoretic analysis. Application areas include computational advertising, wireless spectrum, and prediction markets.

**CSCI 1450. Probability for Computing and Data Analysis.**

Probability and statistics have become indispensable tools in computer science. Probabilistic methods and statistical reasoning play major roles in machine learning, cryptography, network security, communication protocols, web search engines, robotics, program verification, and more. This course introduces the basic concepts of probability and statistics, focusing on topics that are most useful in computer science applications. Topics include: modeling and solution in sample space, random variables, simple random processes and their probability distributions, Markov processes, limit theorems, and basic elements of Bayesian and frequentist statistical inference. Basic programming experience required for homework assignments. Students cannot get concentration credit for both CSCI1450 and APMA1650/APMA1655

**CSCI 1460. Computational Linguistics.**

The application of computational methods to problems in natural-language processing. In particular we examine techniques due to recent advances in deep learning: word embeddings, recurrent neural networks (e.g., LSTMs), sequence-to-sequence models, and generative adversarial networks (GANs). Programming projects include parsing, machine translation, question answering, and chat-bots. The prerequisite of CS 1470 (or the equivalent background) is very important.

**CSCI 1470. Deep Learning.**

Deep learning is the name for a particular version of neural networks-- a version that emphasizes multiple layers of networks. Deep learning, plus the specialized techniques that it has inspired (e.g. convolutional features and word embeddings) have lead to rapid improvements in many applications such as computer vision, machine translation, and computer Go. This course intends to give students a practical understanding of deep learning as applied in these and other areas. It also teaches the Tensorflow programming language for the expression of deep learning algorithms. (The primary API for Tensorflow is from Python.)

This course is using its own waitlist. If the course is full, you can sign up for the waitlist using this form: [https://docs.google.com/forms/d/e/1FAIpQLSffeOCnsiVMT0svyjLH2IHcNC\\_FIQHrKl3C7W\\_PwG7Cu9aWSw/viewform?usp=sf\\_link](https://docs.google.com/forms/d/e/1FAIpQLSffeOCnsiVMT0svyjLH2IHcNC_FIQHrKl3C7W_PwG7Cu9aWSw/viewform?usp=sf_link)

You can check your position on the waitlist by submitting

a request here: [https://docs.google.com/forms/d/e/1FAIpQLSesSF50NfPs40rAs9PnSZA92PbdHVdEUObKwvQVzGGIYAdYWg/viewform?usp=sf\\_link](https://docs.google.com/forms/d/e/1FAIpQLSesSF50NfPs40rAs9PnSZA92PbdHVdEUObKwvQVzGGIYAdYWg/viewform?usp=sf_link)

Note that you must be logged in to your Brown Google account in order to view these links.

IMPORTANT: \*The course staff will not reply to emails about the waitlist.\* The instructions above tell you all you need to know about getting on it and checking where you are.

**CSCI 1480. Building Intelligent Robots.**

How do robots function autonomously in dynamic, unpredictable environments? This course focuses on programming mobile robots, such as the iRobot Roomba, to perceive and act autonomously in real-world environments. The major paradigms for autonomous control and robot perception are examined and compared with robotic notions in science fiction. Prerequisite: CSCI 0150, CSCI 0170 or CSCI 0190. Recommended: CSCI 1410 or CSCI 1230.

**CSCI 1490. Introduction to Combinatorial Optimization.**

This course covers the algorithmic aspects of optimizing decisions in fully observable, non-changing environments. Students are introduced to state-of-the-art optimization methods such as linear programming, integer programming, local search, and constraint programming. Strongly recommended: CSCI 0160, CSCI 0180 or CSCI 0190; CSCI 0510; and CSCI 0530 or MATH 0520 or MATH 0540.

**CSCI 1510. Introduction to Cryptography and Computer Security.**

This course studies the tools for guaranteeing safe communication and computation in an adversarial setting. We develop notions of security and give provably secure constructions for such cryptographic objects as cryptosystems, signature schemes and pseudorandom generators. We also review the principles for secure system design. Prerequisites: CSCI 0220, and either CSCI 0510 or CSCI 1010.

**CSCI 1550. Probabilistic Methods in Computer Science.**

Randomization and probabilistic techniques play an important role in modern computer science, with applications ranging from combinatorial optimization and machine learning to communications networks and secure protocols. This course introduces the most fundamental probabilistic techniques used in computer science applications, in particular in randomized algorithms, probabilistic analysis of algorithms and machine learning.

Prerequisite: Basic background in probability theory course such as CSCI 1450.

**CSCI 1570. Design and Analysis of Algorithms.**

A single algorithmic improvement can have a greater impact on our ability to solve a problem than ten years of incremental improvements in CPU speed. We study techniques for designing and analyzing algorithms. Typical problem areas addressed include hashing, searching, dynamic programming, graph algorithms, network flow, and optimization algorithms including linear programming. Prerequisites: CSCI 0160, CSCI 0180, or CSCI 0190, and one of CSCI 0220, CSCI 1010, CSCI 1450, MATH 0750, MATH 1010, MATH 1530.

**CSCI 1575. Algorithms: in Depth.**

Half-credit course intended to be taken with CSCI 1570. Students will explore each topic in greater depth by collaboratively solving homework problems that will reinforce valuable new perspectives on the material. Corequisite: CSCI 1570.

**CSCI 1580. Information Retrieval and Web Search.**

Covers traditional material as well as recent advances in information retrieval (IR), the study of indexing, processing, and querying of textual data. The focus will be on newer techniques geared to hypertext documents available on the World Wide Web. Topics include efficient text indexing; Boolean and vector space retrieval models; evaluation and interface issues; Web crawling, link-based algorithms, and Web metadata; text/Web clustering, classification; text mining.

**CSCI 1590. Introduction to Computational Complexity.**

Introduction to serial and parallel models of computation; time and space complexity classes on these models; the circuit model of computation and its relation to serial and parallel time complexity; space-time tradeoffs on serial computers; area-time tradeoffs on the VLSI computational model; interactive and probabilistically checkable proofs; the definition of NP in terms of probabilistically checkable proofs; hardness of approximations to solutions to NP-hard problems. Prerequisite: CSCI 0510.

**CSCI 1600. Real-Time and Embedded Software.**

Comprehensive introduction to the design and implementation of software for programmable embedded computing systems, those enclosed in devices such as cellular phones, game consoles, and car engines. Includes the overall embedded real-time software design and development processes, as well as aspects of embedded hardware and real-time, small-footprint operating systems. Major project component. Prerequisites: CSCI 0320 or 0330.

**CSCI 1610. Building High-Performance Servers.**

In depth study of modern server design. Considers architectures for building high-performance, robust, scalable, and secure network servers. We will consider all aspects of "mission-critical" servers. Topics include multithreaded and asynchronous programming techniques, database access, performance profiling, security, and redundancy. Teams will build significant projects. Prerequisite: CSCI 0320 or 0360. CSCI 1670 or 1680 is recommended.

**CSCI 1620. Computer Systems Security Lab.**

CSCI 1620 is a half-credit laboratory course intended to be taken concurrently with CSCI 1660 and provides students with a deeper understanding of the material by doing additional assignments, which include extensions of the 1660's assignments. Instructor permission required.

**CSCI 1650. Software Security and Exploitation.**

Covers software exploitation techniques and state-of-the-art mechanisms for protecting (vulnerable) software. It begins with a summary of prevalent software defects, typically found in applications written in memory unsafe languages, like C/C++, and proceeds with studying traditional and modern exploitation techniques, ranging from classical code-injection and code-reuse up to the newest goodies (just-in-time code reuse). For the most part, it focuses on defenses against certain vulnerability classes and exploitation methods. Students will learn about the boundaries and effectiveness of virtualization, stack and heap protections, and address space randomization, and analyze advanced exploitation techniques and countermeasures.

**CSCI 1660. Introduction to Computer Systems Security.**

This course teaches principles of computer security from an applied viewpoint and provides hands-on experience on security threats and countermeasures. Topics include code execution vulnerabilities (buffer overflow, sandboxing, mobile code), malware (trojans, viruses, and worms), access control (users, roles, policies), cryptosystems (hashing, signatures, certificates), network security (firewalls, TLS, intrusion detection, VPN), and human and social issues. Prerequisites: one of CSCI 0160 or CSCI 0180 or CSCI 0190; and CSCI 0330.

**CSCI 1670. Operating Systems.**

Covers not just the principles of operating systems but the intricacies of how they work. Topics include multithreaded programming, managing threads and interrupts, managing storage, processor scheduling, operating-system structure, virtualization, security, and the design of file systems (both local and distributed). Extensive examples are taken from actual systems, including Linux and Windows. Students are expected to complete both problem sets and programming assignments (in C). Prerequisite: CSCI 0330.

**CSCI 1680. Computer Networks.**

Covers the technologies supporting the Internet, from Ethernet and WiFi through the routing protocols that govern the flow of traffic and the web technologies that are generating most of it. A major concern is understanding the protocols used on the Internet: what the issues are, how they work, their shortcomings, and what improvements are on the horizon. Prerequisite: CSCI 0330 or consent of instructor.

**CSCI 1690. Operating Systems Laboratory.**

Half-credit course intended to be taken with CSCI 1670. Students individually write a simple operating system in C. Serves to reinforce the concepts learned in 1670 and provides valuable experience in systems programming. Corequisite: CSCI 1670.

**CSCI 1729. Programming Languages Lab.**

Half-credit course intended to be taken concurrently with CSCI 1730. Students individually implement a full programming language chosen by the course. Reinforces the concepts learned in CSCI 1730 and provides valuable experience in implementing programming languages. Corequisite: CSCI 1730

**CSCI 1730. Design and Implementation of Programming Languages.**

Explores the principles of modern programming languages by implementation. Examines linguistic features, especially control operators such as first-class functions, exceptions, and continuations. Studies data and their types, including polymorphism, type inference, and type soundness. Examines compiler and run-time system topics: continuation-passing style and garbage collection. Prerequisite: CSCI 0160, CSCI 0180 or CSCI 0190. Preferred: CSCI 0220, either CSCI 0320 or CSCI 0330, and CSCI 0510.

**CSCI 1760. Multiprocessor Synchronization.**

This course examines the theory and practice of multiprocessor synchronization. Subjects covered include multiprocessor architecture, mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, load balancing, concurrent data structures, and transactional synchronization. Prerequisites: CSCI 0330

**CSCI 1780. Parallel and Distributed Programming.**

Covers the practical aspects involved in designing, writing, tuning, and debugging software designed to run on parallel and distributed systems. Topics might include client-server computation, threads, networks of workstations, message passing, shared memory, partitioning strategies, load balancing, algorithms, remote procedure call, and synchronization techniques. Prerequisites: CSCI 0220 and either 0320 or 0360; 0510 recommended.

**CSCI 1800. Cybersecurity and International Relations.**

The global Internet shortens distances, makes businesses more efficient and facilitates greater social interaction. At the same time, it exposes vital national resources to exploitation and makes it easier for the international criminal element to prey on innocent Internet users. Cybersecurity is concerned with making the Internet a more secure and trustworthy environment. In this course we study this topic from the technological and policy points of view. The goal is to facilitate communication across the divide that normally characterizes the technological and policy communities.

**CSCI 1805. Computers, Freedom and Privacy.**

Who is the Big Brother that we most fear? Is it the NSA -- or is it Google and Facebook? Rapidly changing social mores and the growing problem of cybersecurity have all contributed to a sense that privacy is dead. Laws protecting privacy and civil liberties are stuck in the analog age, while the capabilities for mass digital surveillance continue to advance rapidly. This course will examine a variety of informational privacy and technology issues. A major theme: the historical and contemporary struggle to bring surveillance under democratic control to protect against abuses of privacy, civil liberties and human rights.

**CSCI 1810. Computational Molecular Biology.**

High-throughput experimental approaches now allow molecular biologists to make large-scale measurements of DNA, RNA, and protein, the three fundamental molecules of the cell. The resulting datasets are often too large for manual analysis and demand computational techniques. This course introduces algorithms for sequence comparison and alignment; molecular evolution and phylogenetics; DNA/RNA sequencing and assembly; recognition of genes and regulatory elements; and RNA and protein structure. The course demonstrates how to model biological problems in terms of computer science.

Prerequisites: CSCI 0160, CSCI 0180 or CSCI 0190, or consent of instructor.

**CSCI 1820. Algorithmic Foundations of Computational Biology.**

The course is devoted to computational and statistical methods as well as software tools for DNA, RNA, and protein sequence analysis. The focus is on understanding the algorithmic and mathematical foundations of the methods, the design of associated genomics software tools, as well as on their applications. Topics include: sequence alignment, genome assembly, gene prediction, regulatory genomics, and SNP's variation. The course is open to computer and mathematical sciences students as well as biological and medical students.

**CSCI 1870. Cybersecurity Ethics.**

This timely, topical course offers a comprehensive examination of ethical questions in cybersecurity. These issues pervade numerous, diverse aspects of the economy and society in the Information Age, from human rights to international trade. Students will learn about these topics, beginning first with acquaintance with the dominant ethical frameworks of the 20th and 21st centuries, then employing these frameworks to understand, analyze, and develop solutions for leading ethical problems in cybersecurity. The things that you learn in this course will stay with you and inform your personal and professional lives.

**CSCI 1900. csciStartup.**

In csciStartup, you will incorporate and run a startup. Apply as a team to be part of a prototype class to remove the mystery from starting a company and to focus entirely on a product you're passionate about. Teams will incorporate, build a product for real customers, advertise their product, and improve it week after week. We'll spend half our class meetings with individual attention to each group's progress and how to improve your offerings. Assignments will be designed to apply to any company, with enough flexibility to ensure you're always working on things that make sense for your business.

**CSCI 1950A. Computational Modeling and Algorithmic Thinking.**

In this course you will learn how to apply tools from statistics and computer science to build computational models of physical and biological systems. Example applications include modeling and then simulating the behavior of a collection of genes, the spread of disease in a population, a single neuron in isolation or the complex of neurons comprising the primate visual cortex.

**CSCI 1950B. Computational Topology and Discrete Geometry.**

This course will investigate (through a mixture of lectures and student presentations of recent papers) topics in computational topology, including Morse theory and discrete differential geometry. Other possible topics are knot polynomials, simplicial homology, and geometric probability theory. Some mathematical sophistication and programming skills required. No prerequisites.

**CSCI 1950H. Computational Topology.**

We will study various algorithmic problems that arise in the study of topological phenomena, such as winding number, turning number, knot polynomials, topology of covering spaces (especially Riemann surfaces), and discrete Morse theory. The mathematical topics will be briefly introduced before we move to computations, but some a priori mathematical sophistication will make the course more valuable to the student. Prerequisite: CSCI 0160, 0180, or 0190.

**CSCI 1950J. Introduction to Computational Geometry.**

Geometric algorithms in two and three dimensions. Algorithmic and geometric fundamentals. Point location, convex hulls, proximity (Voronoi diagrams, Delaunay triangulations), intersections, the geometry of rectangles. Prerequisites: CSCI 0160, 0170, or 0190; and CSCI 0220.

**CSCI 1950K. Innovating Game Development.**

A project-centered course focused on technological, paradigm, and design innovations for game development. As teams, students will propose and implement a project demonstrating a novel technology for gaming. Examines the current state and future of game development through a seminar of speakers active in game development and research. A strong computer science or engineering background is recommended.

**CSCI 1950M. Advanced Practical Combinatorial Algorithms.**

We review recent as well as well-established advanced techniques in combinatorial optimization and constraint satisfaction. Students will study and individually present research papers and work on challenging software projects in small teams. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2580, or instructor permission.

**CSCI 1950N. 2D Game Engines.**

2D Game Engines covers core techniques used in the development of the software that drives computer games and other interactive software. Projects involve building different varieties of 2D game engines as well as games that require use of the features implemented in the engines. Topics include high-level engine design, vector and raster graphics, animation, collision detection, physics, content management, and game AI. Prerequisite: CSCI 0160, 0180, or 0190. Instructor override is required as a technicality; please apply! This course has also been offered as DISP CSCI1971.

**CSCI 1950R. Compiler Practice.**

This class covers the practice of compiler writing, including lexical analysis, parsing, semantic analysis, code generation, and code optimization. Students design and implement a full compiler modularly for a modern functional language using a modern intermediate representation and modular backend. Instructor permission required.

**CSCI 1950T. Advanced Animation Production.**

Students will apply knowledge and skills gained in previous animation courses to produce a high quality short animated film as a group. Production will follow the industry standard pipeline that includes modeling, texturing, lighting, animating, rendering, and post production. Interested students will perform preproduction story and concept design prior to beginning of course. Prerequisite: CSCI 1250. Enrollment limited to 15. Instructor permission required.

**CSCI 1950U. Topics in 3D Game Engine Development.**

Covers core techniques in 3D game development with an emphasis on engine architecture. Students independently develop their own engines using C++, OpenGL, and the Qt framework, then work in groups to create a polished game. Topics include: spatial subdivision, player representation, collision detection and response, game networking, GPUs, and OpenGL. Prerequisites: CSCI 1230 and one of CSCI 0320 or CSCI 1950N. Enrollment limited to 25.

**CSCI 1950X. Software Foundations.**

Software Foundations will be a project-based course focusing on the challenges and techniques involved in proving non-trivial properties about real-world systems. We will base our exploration around formal development in a proof environment. Roughly half of the course will be a guided tutorial of proof techniques using one or more theorem provers; in the remainder, students will apply this knowledge to existing systems. No prior experience with theorem provers or proof assistants is necessary, but familiarity with and aptitude for functional programming will be a huge bonus. Prerequisite: CSCI 1730 or equivalent; mathematical maturity.

**CSCI 1950Y. Logic for Systems.**

The course will focus on proving properties about systems and programs. We will study the distinction between programs and specifications, and check for whether the former obey the latter. We will work with tools that have extensive automation such as model constructors, model checkers, and proof assistants. Problems and projects will apply to real-world systems. Prerequisite: CSCI 0160, CSCI 0180, or CSCI 0190. Preferred but not required: CSCI 0220 and CSCI 0510, or instructor's permission.

**CSCI 1950Z. Computational Methods for Biology.**

This course will introduce algorithms from machine learning and combinatorial optimization with a focus on their application to biological data. Topics will include problems in phylogenetic inference, population genetics, and biological interaction networks.

**CSCI 1951A. Data Science.**

Mastering big data requires skills spanning a variety of disciplines: distributed systems over statistics, machine learning, and a deep understanding of a complex ecosystem of tools and platforms. Data Science refers to the intersection of these skills and how to transform data into actionable knowledge. This course provides an overview of techniques and tools involved and how they work together: SQL and NoSQL solutions for massive data management, basic algorithms for data mining and machine learning, information retrieval techniques, and visualization methods.

Prerequisites: CSCI 0160, CSCI 0180, or CSCI 0190. One of CSCI 0330 or CSCI 0320 strongly recommended.

**CSCI 1951B. Virtual Citizens or Subjects? The Global Battle Over Governing Your Internet.**

The Internet began as a U.S. government research project, progressed to an open network run by free-spirited geeks, and transitioned in the late 1990's to a unique governance model in which nations, corporations, and civil society were supposed to all have a voice. Where are the real decisions being made? Who is making them? How can you and citizens of other nations influence these decisions? The global battle to run the Internet, brewing for years, has broken wide open with revelations of American spying on a massive scale.

**CSCI 1951C. Designing Humanity Centered Robots.**

Offered by Brown's Computer Science department under the auspices of the Humanity Centered Robotics Initiative. It is focused on the iterative design process and how it can be used to develop robots for solving tasks that help people. It will expose students to a suite of fabrication and prototyping technologies sufficient for creating a functioning robotic system.

[https://www.youtube.com/watch?v=Dbvis\\_j\\_b78](https://www.youtube.com/watch?v=Dbvis_j_b78)

The course has two tracks, one intended for CS concentrators, and one intended for non-concentrators with previous design experience. The non-concentrator track cannot be used toward fulfilling a Computer Science concentration requirement.

**CSCI 1951G. Optimization Methods in Finance.**

Optimization plays an important role in financial decisions. Many computational finance problems ranging from asset allocation to risk management, from option pricing to model calibration can be solved efficiently using modern optimization techniques. This course discusses several classes of optimization problems (including linear, quadratic, integer, dynamic, stochastic, conic, and robust programming) encountered in financial models. For each problem class, after introducing the relevant theory and efficient solution methods, we discuss problems of mathematical finance that can be modeled within this problem class. Prerequisites: CSCI 1450 or APMA 1650, and CSCI 1570.

**CSCI 1951I. CS for Social Change.**

Working in a studio environment to iteratively design, build, and test technical projects in partnership with different social change organizations, students will be placed in small teams to collaboratively work on projects that will range from developing a chatbot to aid community engagement to conducting geospatial data analytics. We will also reflect on our positionality and ethics in engaging in social impact work and what it practically means to leverage technology to create social change on an everyday basis. Enrollment limited to 12. Entry to this course is through application only: <https://docs.google.com/forms/d/1wmCbmB6dpO10-FCjHE50IHgxAOO8gCE38m1dD71JtUw/edit>

**CSCI 1951J. Interdisciplinary Scientific Visualization.**

Students will learn about solving scientific problems using computer graphics and visualization. Projects will involve the solution of scientific problems using computer graphics, modeling, and visualization. Working in small groups, students will identify scientific problems, propose solutions involving computational modeling and visualization, evaluate the proposals, design and implement the solutions, apply them to the problems, evaluate their success, and report on results. Example projects might include interactive software systems, immersive virtual reality cave applications, quantitative analysis tools, or new applications of existing visualizations methods. The focus will be on applications in the new virtual reality cave.

**CSCI 1951K. Algorithmic Game Theory.**

This course examines topics in game theory from a computer scientist's perspective. Through the lens of computation, this course will focus on the design and analysis of systems involving self-interested agents, investigating how strategic behavior should influence algorithm design, which game-theoretic solution concepts are practical to implement, and the ramifications of conflicts of interest between system designers and participating agents. Topics include: auctions and mechanism design, equilibria, and learning.

**CSCI 1951N. VR+X, The Potential of Virtual Reality to Transform Nearly Everything.**

This course introduces students to the history, present, and future possibilities of virtual reality (VR) with a focus on addressing the question: What is the transformative potential of virtual reality? We'll critically evaluate a variety of applications in fields as varied as healthcare, architecture, education, and storytelling. Students will learn discovery and design thinking processes of a kind that can lead to the development of VR solutions. Students will create a design concept for a VR use case in a field of their choosing.

**CSCI 1951R. Introduction to Robotics.**

Each student will learn to program a small quad-rotor helicopter. We will provide each student with their own robot for the duration of the course. The course will cover PID controllers for stable flight, localization with a camera, mapping, and autonomous planning. At the end of the course, the aim is for students to understand the basic concepts of a mobile robot and aerial vehicle. Enrollment by instructor permission.

**CSCI 1951T. Surveying VR Data Visualization Software for Research.**

In a collaborative group effort, this course will search out, install, test, and critically evaluate VR software that supports data visualization for researchers. We will target several specific types of data, including volumetric data, and remote sensing data. We will investigate the capabilities of software for head-mounted displays (HMDs), big-metal displays like caves and the yurt, and, as a baseline, desktop displays. Software evaluation will include web research, hands-on case studies, and surveying. Results will be documented in a courses wiki.

**CSCI 1951U. Software Engineering of Large Systems.**

This course teaches the software engineering techniques used to create moderate to large sized programs. This includes design methodologies that scale and are geared toward larger, long-lifetime systems with multiple designers. It includes tools and techniques that assist the programmer and help manage programmer teams.

**CSCI 1951V. Hypertext: The Web Was Not the Beginning and the Web is Not the End.**

A "hypertext" system is for creating, linking, exploring, annotating, and searching for information. Designed 30-years ago, the World Wide Web is a hypertext system gone global, but the Web represents only a small part of past visions. Students will explore hypertext's history through hands-on use of systems from the 1970s onward, identifying features still not in common use. They will study the architecture, design, and features of hypertext systems, examining topics such as permanence, collaboration, searching, content design patterns, and societal impact. A final implementation project will explore what hypertext systems might look like in the 2020s. Prerequisites: an introductory CS sequence or equivalent experience

**CSCI 1970. Individual Independent Study.**

Independent study in various branches of Computer Science. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**CSCI 1971. Independent Study in 2D Game Engines.**

2D Game Engines covers core techniques used in the development 2D game engines. Projects involve building different varieties of 2D game engines as well as games that require use of the features implemented in the engines. Topics include high-level engine design, vector and raster graphics, animation, collision detection, physics, content management, and game AI. Prerequisite: CSCI 0160, 0180, or 0190.

**CSCI 1972. Topics in 3D Game Engine Development.**

Covers core techniques in 3D game development with an emphasis on engine architecture. Students independently develop their own engines using C++, OpenGL, and the Qt framework, then work in groups to create a polished game. Topics include: spatial subdivision, player representation, collision detection and response, game networking, GPUs, and OpenGL. Prerequisite: CSCI 1230 and one of the following CSCI 0320, CSCI 0330, CSCI 1950N, OR CSCI 1971.

**CSCI 1973. Independent Study.****CSCI 2240. Interactive Computer Graphics.**

Important current topics in computer graphics. Course includes reading and discussing current research papers, multiple assignments and preliminary projects in which students implement recent papers, and a demanding final integrative project done in small groups. Prerequisite: Instructor's permission or CSCI 1230.

**CSCI 2270. Topics in Database Management.**

In-depth treatment of advanced issues in database management systems. Topics vary from year to year and may include distributed databases, mobile data management, data stream processing and web-based data management. Prerequisite: CSCI 1270.

**CSCI 2300. Human-Computer Interaction Seminar.**

Covers methods for conducting research in human-computer interaction (HCI). Topics will be pursued through independent reading, assignments, and class discussion. Comprises four assignments that apply to HCI research methods and push the envelope, which are designed to be meaningful and have the potential to be widely visible or to be published. Students will gain the background necessary to perform research in HCI and the skills to conduct human-centric research. There will be little content about user interfaces, but students will find some topics in CSCI 1300 relevant. Students should have taken CSCI 1300 or make a case for their interest.

**CSCI 2310. Human Factors and User Interface Design.**

Covers current research issues involving the implementation, evaluation and design of user interfaces, while also providing a basic background in the fundamentals of user interface evaluation, programming, tools, and techniques. A possible topic is programming and designing device-independent interfaces. Previous topics have included the development of pervasive internet-based interfaces and software visualization. Prerequisite: Consent of instructor.

**CSCI 2330. Programming Environments.**

Programming tools; control and data integration; software understanding and debugging; environments for parallel and distributed programming; reverse engineering; configuration management and version control and debugging. Emphasis on current research areas. Prerequisite: consent of instructor.

**CSCI 2340. Software Engineering.**

Topics in the design, specification, construction and validation of programs. Focus will be on tools to support each of these stages. Course will pay special attention to the concerns raised by the properties of modern software systems including distribution, security, component-based decomposition and implicit control. Prerequisite: CSCI 0320 or CSCI 0330

**CSCI 2370. Interdisciplinary Scientific Visualization.**

How to do research on using computer graphics, visualization, and interaction applied to scientific problems. Working in small multidisciplinary groups, students identify scientific problems, propose solutions involving computational modeling and visualization, design and implement the solutions, apply them to the problems, and evaluate their success. Immersive CAVE applications will be a focus, but other interaction or visualization projects are possible. Prerequisites: all: programming experience; CS students: graphics experience; others: problem ideas. Instructor permission required.

**CSCI 2410. Statistical Models in Natural-Language Understanding.**

Various topics in computer understanding of natural language, primarily from a statistical point of view. Topics include: hidden Markov models, word-tagging models, probabilistic context-free grammars, syntactic disambiguation, semantic word clustering, word-sense disambiguation, machine translation and lexical semantics. Prerequisite: CSCI 1410.

**CSCI 2420. Probabilistic Graphical Models.**

Probabilistic graphical models provide a flexible framework for modeling large, complex, heterogeneous collections of random variables. After a brief introduction to their representational power, we provide a comprehensive survey of state-of-the-art methods for statistical learning and inference in graphical models. We discuss a range of efficient algorithms for approximate inference, including optimization-based variational methods, and simulation-based Monte Carlo methods. Several approaches to learning from data are explored, including conditional models for discriminative learning, and Bayesian methods for controlling model complexity. Programming experience required for homeworks and projects, which integrate mathematical derivations with algorithm implementations. PREREQUISITES: CSCI1420 or APMA1690.

**CSCI 2430. Topics in Machine Learning.**

Machine learning from the artificial intelligence perspective, with emphasis on empirical validation of learning algorithms. Different learning problems are considered, including concept learning, clustering, speed-up learning, and behavior learning. For each problem a variety of solutions are investigated, including those from symbolic AI, neural and genetic algorithms, and standard statistical methods. Prerequisite: CSCI 1410 or familiarity with basic logic and probability theory.

**CSCI 2440. Computation in Economics and Games.**

This course examines topics in game theory and mechanism design from a computer scientist's perspective. Through the lens of computation, the focus is the design and analysis of systems utilized by self-interested agents. Students will investigate how the potential for strategic agent behavior can/should influence system design, and the ramifications of conflicts of interest between system designers and participating agents. Emphasis on computational tractability is paramount, so that simple designs are often preferred to optimal. Students will learn to analyze competing designs using the tools of theoretical computer science, and empirical tools, such as empirical game-theoretic analysis. Application areas include computational advertising, wireless spectrum, and prediction markets.

**CSCI 2450. Exchange Scholar Program.****CSCI 2470. Deep Learning.**

Deep learning is the name for a particular version of neural networks--a version that emphasizes multiple layers of networks. Deep learning, plus the specialized techniques that it has inspired (e.g. convolutional features and word embeddings) have led to rapid improvements in many applications such as computer vision, machine translation, and computer Go. This course intends to give students a practical understanding of deep learning as applied in these and other areas. It also teaches the Tensorflow programming language for the expression of deep learning algorithms. A final project will implement an advanced piece of work in one of these areas. Pre Requisites: A basic programming course: (CSCI 0150, 0170 or 0190) A linear algebra course: (CSCI 0530, MATH 0520 or 0540) A stats / probability course: (CSCI 0220, 1450, 0450, MATH 1610, APMA 1650 or 1655)

**CSCI 2500A. Advanced Algorithms.**

Typically, an algorithm solves one problem, whereas a well-designed data structure can help implement algorithms for a wide variety of problems. We will study the design, analysis and implementation of advanced data structures. Focus is on data structures that are fast, both theoretically and empirically. Prerequisite: CSCI 1570 or the equivalent.

**CSCI 2500B. Optimization Algorithms for Planar Graphs.**

Planar graphs arise in applications such as road map navigation and logistics, graph drawing and image processing. We will study graph algorithms and data structures that exploit planarity. Our focus will be on recent research results in optimization. Prerequisite: CSCI 1570 or the equivalent.

**CSCI 2510. Approximation Algorithms.**

Approximation Algorithms deal with NP-hard combinatorial optimization problems by efficiently constructing a suboptimal solution with some specified quality guarantees. We study techniques such as linear programming and semidefinite programming relaxations, and apply them to problems such as facility location, scheduling, bin packing, maximum satisfiability or vertex cover. Prerequisite - one of the following: CSCI 1510, 1550, 1810, 1950J, 1950L, any graduate-level course on algorithms (including 2500A, 2500B, 2580).

**CSCI 2520. Computational Geometry.**

Algorithms and data structures for fundamental geometric problems in two and three dimensions. Topics include point location, range searching, convex hull, intersection, Voronoi diagrams, and graph drawing. Applications to computer graphics, circuit layout, information visualization, and computer-aided design are also discussed. Prerequisite: CSCI 1570 or instructor permission.

**CSCI 2530. Design and Analysis of Communication Networks.**

A theory seminar focusing on algorithmic and combinatorial issues related to the design and analysis of communication networks for parallel and distributed systems. Topics include packet routing, circuit switching, distributed shared memory, fault tolerance, and more. Prerequisites: CSCI 1550, 1570, or equivalent.

**CSCI 2531. Internet and Web Algorithms.**

This advanced graduate course/seminar focuses on the mathematical foundations of algorithms for handling large amounts of data over networks. We'll read and discuss recent papers in information retrieval, search engines, link analysis, probabilistic modeling of the web and social networks, and more. Recommended: CSCI 1550 and CSCI 1570, or equivalent courses.

**CSCI 2540. Advanced Probabilistic Methods in Computer Science.**

Advanced topics in applications of probabilistic methods in design and analysis of algorithms, in particular to randomized algorithms and probabilistic analysis of algorithms. Topics include the Markov chains Monte Carlo method, martingales, entropy as a measure for information and randomness, and more. Prerequisite: CSCI 1450. Recommended but not required: CSCI 1570.

**CSCI 2550. Parallel Computation: Models, Algorithms, Limits.**

The theoretical foundations of parallel algorithms. Analysis of the most important models of parallel computation, such as directed-acyclic computation graphs, shared memory and networks, and standard data-exchange schemes (common address space and message-passing). Algorithmic techniques with numerous examples are cast mostly in the data-parallel framework. Finally, limitations to parallelizability (P-completeness) are analyzed. The content of the course is likely to change as technology evolves.

**CSCI 2560. Advanced Complexity.**

Advanced topics in computational complexity, such as: the polynomial hierarchy, interactive proofs, pseudorandomness, derandomization, probabilistically checkable proofs.

**CSCI 2570. Introduction to Nanocomputing.**

Nanoscale technologies employing materials whose smallest dimension is on the order of a few nanometers are expected to replace lithography in the design of chips. We give an introduction to computational nanotechnologies and explore problems presented by their stochastic nature. Nanotechnologies based on the use of DNA and semiconducting materials will be explored. Prerequisite: CSCI 0510.

**CSCI 2580. Solving Hard Problems in Combinatorial Optimization: Theory and Systems.**

The theory of combinatorial optimization and how it is embodied in practical systems. Explores issues encountered in implementing such systems. Emphasizes the wide variety of techniques and methodologies available, including integer programming, local search, constraint programming, and approximation algorithms. Problems addressed may include: scheduling, coloring, traveling salesman tours, and resource allocation. Prerequisites: CSCI 0320 and basic knowledge of linear algebra.

**CSCI 2590. Advanced Topics in Cryptography.**

Seminar-style course on advanced topics in cryptography. Example topics are zero-knowledge proofs, multi-party computation, extractors in cryptography, universal composability, anonymous credentials and ecash, interplay of cryptography and game theory. May be repeated for credit. Prerequisite: CSCI 1510 or permission of the instructor.

**CSCI 2730. Programming Language Theory.**

Theoretical models for the semantics of programming languages and the verification of programs. Topics will be drawn from operational semantics, denotational semantics, type theory and static analyses. Recommended prerequisite: CSCI 1730, CSCI 1950Y or instructor permission.

**CSCI 2750. Topics in Parallel and Distributed Computing.**

CSCI 2750 is a graduate seminar that will consider an advanced topic (to be determined) in distributed computing. May be repeated for credit.

**CSCI 2820. Advanced Algorithms in Computational Biology and Medical Bioinformatics.**

Devoted to computational problems and methods in the emerging field of Medical Bioinformatics where genomics, computational biology and bioinformatics impact medical research. We will present challenging problems and solutions in three areas: Disease Associations, Protein Folding and Immunogenomics. This course is open to graduate students and advanced undergraduates with Computational or Life Science backgrounds. Prior background in Biology is not required.

**CSCI 2890. Comprehensive Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**CSCI 2950C. Topics in Computational Biology.**

This course will investigate active and emerging research areas in computational biology. Topics include cancer genomics; genome rearrangements and assembly; and protein and regulatory interaction networks. The course will be a mixture of lectures and student presentations of recent conference and journal papers.

**CSCI 2950D. Sensor Data Management.**

Sensor networks combine sensing, computing, actuation, and communication in a single infrastructure that allows us to observe and respond to phenomena in the physical and cyber world. The sensors range from tiny "smart dusts" to dime-sized RFID tags and large-scale weather sensors. This course will cover the state-of-the-art in designing and building sensor networks, focusing on issues that revolve around data and resource management. No prerequisites.

**CSCI 2950E. Stochastic Optimization.**

This advanced graduate course/seminar will focus on optimization under uncertainty, or optimization problems where some of the constraints include random (stochastic) components. Most practical optimization problems are stochastic (subject to future market conditions, weather, faults, etc.), and there has been substantial research (both theoretical and experimental) in efficient solution for such problems. We'll read and discuss some of the recent works in this area.

**CSCI 2950F. Implementing Web-Based Software Systems.****CSCI 2950G. Large-Scale Networked Systems.**

Explores widely-distributed systems that take advantage of resources throughout the Internet. The systems leverage their large size and geographic diversity to provide bandwidth scalability, rapid responses, fault-tolerance, high-availability and diverse data collection. Topics include overlay networks, peer-to-peer systems, content distribution networks, distributed file systems and wide-scale measurement systems.

**CSCI 2950H. Advanced Cryptography.****CSCI 2950I. Computational Models of the Neocortex.**

This course addresses the problem of modeling the perceptual neocortex using probabilistic graphical models, including Bayesian and Markov networks, and extensions to model time and change such as hidden Markov models and dynamic Bayesian networks. The emphasis is on problems of learning, inference, and attention. Sources include the literature in computational and cognitive neuroscience, machine learning, and other fields that bear on how biological and engineered systems make sense of the world. Prerequisites: basic probability theory, algorithms and statistics.

**CSCI 2950J. Cognition, Human-Computer Interaction and Visual Analysis.**

In this graduate seminar we will learn about models of human cognition and perception, and explore potential implications of the models on how computers and humans can interact effectively when performing scientific analyses. Participants will be responsible for reading assigned materials, taking turns guiding discussions of the readings, and preparing a final paper and presentation. It is recommended that participants have some background in at least one of the areas of study.

**CSCI 2950K. Special Topics in Computational Linguistics.**

Every year will cover a different topic in computational linguistics, from a statistical point of view, including parsing, machine translation, conference, summarization, etc. Prerequisites: CSCI 1460 or permission of the instructor.

**CSCI 2950M. Computer Science, Algorithms and Economics.**

Course investigates the interplay of economic theory and computer science. It is suitable for advanced senior undergraduates and for graduate students. We will study topics such as: algorithms for selfish routing; competitive combinatorial auctions; Multicast cost sharing and cooperative games; graphical models for games; and related topics. This course will be organized around the presentation of recent research papers. Prerequisite: CSCI 1570 or equivalent.

**CSCI 2950N. Special Topics in Autonomous Robotics.**

No description available.

**CSCI 2950O. Topics in Brain-Computer Interfaces.**

Introduces the mathematical and computational foundations of brain-computer interfaces. Statistical learning, Bayesian inference, dimensionality reduction, information theory, and other topics are presented in the context of brain interfaces based on neural implants and EEG recordings. Prerequisites: Basic knowledge of probability, statistics and linear algebra (e.g., CSCI 1550, APMA 1650, APMA 1690, or APMA 2640). Enrollment limited to 20 students.

**CSCI 2950P. Special Topics in Machine Learning.**

This seminar course explores current research topics in statistical machine learning. Focus varies by year, and may include Bayesian nonparametrics; models for spatial, temporal, or structured data; and variational or Monte Carlo approximations. Course meetings combine lectures with presentation and discussion of classical and contemporary research papers. Students will apply some this material to a project, ideally drawn from their own research interests.

**CSCI 2950Q. Topics in Computer Vision.**

This course will cover current topics in computer vision by focusing on a single real problem in computer vision. Recent courses have focused on forensic video analysis of an unsolved murder and three-dimensional object recognition for a mobile robot. Readings from the literature are integrated with group projects to solve problems beyond the state of the art. Strong mathematical skills (probability, linear algebra, calculus) and previous exposure to computer vision (e.g. CSCI 1430) are essential.

**CSCI 2950R. Special Topics in Advanced Algorithms.**

We will study an advanced topic in the design and analysis of algorithms. Prerequisite: CSCI 1570 or the equivalent.

**CSCI 2950S. Advanced Practical Combinatorial Algorithms.**

We review recent as well as well-established advanced techniques in combinatorial optimization and constraint satisfaction. Students will study and individually present research papers and work on challenging software projects in small teams. Prerequisites: CSCI 0160, 0180, or 0190; and CSCI 0510; and CSCI 1490 or 2580, or instructor permission.

**CSCI 2950T. Topics in Distributed Databases and Systems.**

This course explores data and resource management issues that arise in the design, implementation, and deployment of distributed computing systems by covering the state of the art in research and industry. Typical topics include cloud computing and sensor networks. Strongly recommended: CSCI 0320, CSCI 1270, or CSCI 1951A.

**CSCI 2950U. Special Topics on Networking and Distributed Systems.**

Explores current research topics in networking, distributed and operating systems. Specific topics may include wireless and sensor networking, Internet-scale distributed systems, cloud computing, as well as the core problems, concepts, and techniques underlying these systems. The course has two components: reading and discussion of current and classical research papers, and a research project related to the topic but ideally drawn from students' own research interests. This is a graduate-level course, undergrads can join with the consent of the instructor.

**CSCI 2950V. Topics in Applied Cryptography.**

This course surveys recent developments in applied cryptography. Research in this field is motivated by privacy and security issues that arise in practice from areas like cloud computing, databases, surveillance and finance. Topics will vary each year. Pre Requisites: CSCI 1660 and CSCI 1510 recommended or instructor permission. This year's theme is cryptography for social good.

**CSCI 2950W. Online Algorithms.**

Decisions must often be made before the entire data is available. Online algorithms solve problems in which commitments must be made as the data is arriving. Choosing which items to evict from a cache before knowing future requests, which advertisers to consider for displaying ads alongside the result of a search, or which most representative data to store when computing statistics about a huge stream of information. We will discuss the worst-case model, which hinges against the worst possible future data, and some stochastic and game-theoretic models.

**CSCI 2950X. Topics in Programming Languages and Systems.**

Examines contemporary research topics in software construction from the perspectives of programming languages, software engineering and computer-aided verification. The primary goals are to understand which theory applies to which problems and to convert that theory into tools. Topics include security, modularity, and new paradigms in software composition. Prerequisite: CSCI 1730 or written permission of the instructor.

**CSCI 2950Y. Theorem Proving.**

This course explores computer-assisted theorem proving with the Coq Proof Assistant. The course will teach students to formally specify software and model mathematical theories. We will then study techniques for mechanically proving theorems about these Coq. Prerequisites: CSCI 1730 or CSCI 0170 and permission of the instructor.

**CSCI 2950Z. Robot Learning and Autonomy.**

This seminar course will cover current research topics related to perceiving and acting in the real world. These topics will be pursued through independent reading, class discussion, and project implementations. Papers covered will be drawn from robotics, computer vision, animation, machine learning, and neuroscience. Special emphasis will be given to developing autonomous control from human performance. No prerequisites.

**CSCI 2951A. Robots for Education.**

This seminar will explore the potential for robotics to engage future generations of scientists and engineers, with a particular focus on broadening participation in computing across society. Academic papers describing existing models, systems, courses, and evaluation for teaching robotics at undergraduate and secondary levels will be covered through students presentations. A group project will be conducted to find viable and accessible "off-the-shelf" technology solutions suited to teaching robotics without requiring a technical background. Instructor permission required.

**CSCI 2951B. Data-Driven Vision and Graphics.**

Investigates current research topics in image-based graphics and vision. We will examine data sources, features, and algorithms for understanding and manipulating visual data. We will pay special attention to methods that use crowd-sourcing or Internet-derived data. Vision topics such as scene understanding and object detection will be linked to graphics applications such as photo editing and image-based rendering. These topics will be pursued through independent reading, class discussion and presentations, and a semester long research project. Strong mathematical skills and previous imaging (vision or computational photography) courses are essential.

**CSCI 2951C. Autonomous Agents and Computational Market Design.**

An important area of research in artificial intelligence is how to effectively automate decision making in time-critical, information-rich environments. Electronic markets are a prime example of such environments. In this course students will create their own simulated electronic market as well as autonomous agents that trade in their market simulation. Application domains will include supply chain management, the Dutch flower auctions, and ad auctions, such as those run by Google and Facebook. Enrollment limited to 40 graduate students.

**CSCI 2951E. Topics in Computer Systems Security.**

This course explores advanced topics and highlights current research in computer security from a systems perspective. Topics include vulnerabilities and defenses for automotive, computing, medical, and industrial control devices, intrusion detection, botnets, secure network protocols, web spam, tracking of web users, JavaScript sandboxing, attacks and defenses for web applications, and security and privacy issues in cloud computing. Research papers and industry reports will be presented and discussed. Also, hands-on experiments and system demonstrations will be performed. CSCI 1660 or equivalent background is essential. Enrollment limited to 12. Instructor permission required.

**CSCI 2951F. Learning and Sequential Decision Making.**

The course explores automated decision making from a computer-science perspective. It examines efficient algorithms, where they exist, for single agent and multiagent planning as well as approaches to learning near-optimal decisions from experience. Topics will include Markov decision processes, stochastic and repeated games, partially observable Markov decision processes, and reinforcement learning. Of particular interest will be issues of generalization, exploration, and representation. Each student will be expected to present a published research paper and will participate in a group programming project. Prerequisite: a graduate-level computer science course and some exposure to reinforcement learning from a previous computer-science class or seminar.

**CSCI 2951I. Computer Vision for Graphics and Interaction.**

Computer vision reconstructs real world information from image and video data; computer graphics synthesizes dynamic virtual worlds; interaction lets us explore these worlds; and machine learning allows us to map between domains across vision, graphics, and interaction. In visual computing, these fields converge to exploit both models of visual appearance and databases of examples to generate and interact with new images. This enables applications from the seemingly simple, like semantic photo editing, to the seemingly science fiction, like mixed reality. In this seminar, we will discover the state-of-the-art algorithmic contributions in computer vision which make this possible. Please join us!

**CSCI 2951K. Topics in Collaborative Robotics.**

Practical approaches to designing intelligent systems. Topics include search and optimization, uncertainty, learning, and decision making. Application areas include natural language processing, machine vision, machine learning, and robotics. Prerequisite: CSCI 1410, 1420, 1460, 1480, or 1950F; or instructor permission.

**CSCI 2951M. Advanced Algorithms Seminar.**

Students in this course will read, present, and discuss recent breakthrough papers on the topic of algorithms, and the related areas needed to analyze algorithms. This course is aimed at current and potential future graduate students who want to gain technical depth and perspective on the field of algorithms. Topics will roughly alternate by year, with even years emphasizing fundamental techniques, and odd years emphasizing applications such as machine learning. Suggested prerequisites: CSCI 1570 and mathematical maturity. Instructor permission required. Enrollment will be limited to 24 students, based on an application that will be described on the first day of class. Ideal students will have a mix of the following: 1) motivation to learn how to read papers, 2) technical skills and background, 3) willingness to participate and contribute to discussions.

**CSCI 2951N. Advanced Algorithms in Computational Biology.**

This is a full-lecture, graduate course on algorithms and biomedical applications. The Foundations lectures are an introduction to the biological and medical genomics application areas. Each Algorithm section is devoted to an algorithmic method presented in rigorous depth, followed by an important open problem in the application area, together with the current most effective algorithmic solutions to the problem. Graduate students and advanced undergraduates in computational and mathematical sciences and engineering are welcome. Biological, life sciences and medical students and faculty are welcome as well and will be able to participate more in the applications areas.

**CSCI 2951O. Foundations of Prescriptive Analytics.**

We are undoubtedly in the middle of an Analytics Revolution that enabled turning huge amounts of data into insights, and insights into predictions about the future. At its final frontiers, Prescriptive Analytics is aimed at identifying the best possible action to take given the constraints and the objective. To that end, this course provides students with a comprehensive overview of the theory and practice of how to apply Prescriptive Analytics through optimization technology. A wide variety of state-of-the-art techniques are studied including: Boolean Satisfiability, Constraint Programming, Linear Programming, Integer Programming, Local Search Meta-Heuristics, and Large-Scale Optimization. Pre Requisites: One of CSCI 0320 or CSCI 0330 and recommended: one of CSCI 0530, CSCI 1570, MATH 0520 or MATH 0540.

**CSCI 2951S. Distributed Computing through Combinatorial Topology.**

Although computer science itself is based on discrete mathematics, combinatorial topology and its applications may still be unfamiliar to many computer scientists. For this reason, this course provides a self-contained, elementary introduction to the concepts from combinatorial topology needed to analyze distributed computing. Conversely, while the systems and models used here are standard in computer science, they may be unfamiliar to students with a background in pure or applied mathematics. For this reason, this course also provides a self-contained, elementary description of standard notions of distributed computing. CSCI 0220 required, CSCI 1760 recommended

**CSCI 2951T. Data-Driven Computer Vision.**

Investigates current research topics in data-driven object detection, scene recognition, and image-based graphics. We will examine data sources, features, and algorithms useful for understanding and manipulating visual data. We will pay special attention to methods that harness large-scale or Internet-derived data. There will be an overview of the current crowdsourcing techniques used to acquire massive image datasets. Vision topics such as scene understanding and object detection will be linked to graphics applications such as photo editing. These topics will be pursued through independent reading, class discussion and presentations, and projects involving current research problems in Computer Vision.

**CSCI 2951U. Topics in Software Security.**

This course investigates the state-of-the-art in software exploitation and defense. Specifically, the course is structured as a seminar where students present research papers to their peers. We will begin with a summary of prevalent software defects, typically found in applications written in memory unsafe languages, and proceed to surveying what we are up against: traditional and modern exploitation techniques, ranging from classical code injection and code reuse up to the newest goodies (JIT-ROP, Blind ROP). For the bulk part, we will focus on the latest advances in protection mechanisms, mitigation techniques, and tools against modern vulnerability classes and exploitation methods.

**CSCI 2951X. Reintegrating AI.**

The goal of AI has been to build complete intelligent agents, yet the field has been fragmented into a collection of problem-specific areas of study. We will first spend a few weeks in lecture covering a new approach to integrating existing AI subfields into a single agent architecture, and remainder of the semester on self-directed, semester-long research projects.

Grading based on a mid-semester project proposal, and a substantial open-ended final project. The projects will be multi-disciplinary in nature but students will have the opportunity to work in small groups, so they need not necessarily have expertise in the relevant areas. Graduate students welcome; undergraduates need instructor permission to enroll.

**CSCI 2951Z. Advanced Algorithmic Game Theory.**

This course examines topics in game theory from a computer scientist's perspective. Through the lens of computation, it will focus on the design and analysis of systems involving self-interested agents, investigating how strategic behavior should influence algorithm design, which game-theoretic solution concepts are practical to implement, and the ramifications of conflicts of interest between system designers and participating agents. Students will create their own automated trading agents for various simulated market games. Topics include: auctions and mechanism design, equilibria, and learning. For graduate credit, students will complete additional homework exercises, and a significant programming project.

**CSCI 2952C. Learning with Limited Labeled Data.**

As machine learning is deployed more widely, researchers and practitioners keep running into a fundamental problem: how do we get enough labeled data? This seminar course will survey research on learning when only limited labeled data is available. Topics covered include weak supervision, semi-supervised learning, active learning, transfer learning, and few-shot learning. Students will lead discussions on classic and recent research papers, and work in teams on final research projects. Previous experience in machine learning is required through CSCI 1420 or equivalent research experience.

**CSCI 2952G. Deep Learning in Genomics.**

Deep learning models have achieved impressive performance in fields like computer vision and NLP. Given an adequate amount of data, these models can extract meaningful representations to perform accurate predictions. The collection of vast quantities of biological data naturally leads to the question -- can deep learning help us understand genomics? In this seminar-style class, we will cover the recent research literature trying to answer this question. We will learn how state-of-the-art models like CNNs, RNNs, GCNs, GANs, etc. have been applied to solve significant problems in genomics and what unique challenges are presented by the data in this field.

**CSCI 2952H. Recent Progress in Reinforcement Learning.**

Reinforcement learning is a framework for studying machines that interact with a sequential environment to achieve a goal. In the past decade, the RL framework has gained a lot of attention owing to its intriguing success in solving problems in complicated domains such as games, robotics, and dialog systems. We observe continual growth in the number of RL papers published in major machine-learning conferences. This growth calls for a careful investigation of the recent progress in the field. By reading selections of the current RL literature, this graduate-level course examines some of the latest theoretical and empirical progress in the field.

**CSCI 2955. The Design and Analysis of Trading Agents.**

The Dutch Flower Auctions (DFA) clear over 100,000 auctions per day, each lasting on average between 3 and 5 seconds! This semester, we'll study the mechanism through which the DFA distribute 2/3 of the world's flowers, focusing on both the sellers' and buyers' decision-making processes. More generally, we'll research ways to automate and optimize decision-making in time-critical, information-rich environments, like the DFA. Undergraduate students require instructor permission, and should have already completed CSCI 0190, or CSCI 0150 and CSCI 0160, or CSCI 0170 and CSCI 0180.

**CSCI 2956A. Design of Agents for Bidding in Sponsored Search Auctions.**

This course investigates the new field of sponsored search auctions. Although students will be exposed to the field from the point of view of both the search engine and the advertiser, the course's focus is on advertiser's bidding algorithms. The students will implement novel bidding agents, and the course will culminate in a competition among the students' agents. Undergraduate students who obtained permission from the instructor or completed CSCI 0910, or CSCI 0150 and CSCI 0160, or CSCI 0170 and CSCI 0180 can register for the course. CSCI 1410 is a co-requisite.

**CSCI 2956R. Multiplicative-Weights/Packing-Covering Method for Approximating Linear and Semidefinite Programs.**

We will study the method called, variously, multiplicative weights and packing-covering. We will in particular investigate the use of this method for finding approximately optimal solutions to linear programs and semidefinite programs. Prerequisite: A graduate-level course on algorithms. Enrollment limited to 10. Instructor permission required.

**CSCI 2980. Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**CSCI 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**CSCI XLIST. Courses of Interest to Concentrators in Computer Science.**

## Data Science Initiative

### Director

Bjorn Sandstede

Brown University's Data Science Initiative serves as a campus hub for research and education in data science. Engaging partners across campus and beyond, the DSI's mission is to facilitate and conduct both domain-driven and fundamental research in data science, increase data fluency and educate the next generation of data scientists, and ultimately explore the impact of the data revolution on culture, society, and social justice. We envision our role in the university and beyond as something to build over time, with the flexibility to meet the changing needs of Brown's students and research community.

The Master's Program in Data Science (Master of Science, ScM) prepares students from a wide range of disciplinary backgrounds for distinctive careers in data science. Rooted in a research collaboration between four strong academic departments (Applied Mathematics, Biostatistics, Computer Science, and Mathematics), the Master's Program offers a unique and rigorous education for people building careers in data science and/or big data management.

For additional information, please visit the initiative's website: <http://dsi.brown.edu/>

## Data Science Graduate Program

### Master of Science in Data Science

The Data Science Initiative at Brown offers a new master's program (ScM) that will prepare students from a wide range of disciplinary backgrounds for distinctive careers in Data Science. Rooted in a research collaboration among four very strong academic departments (Applied Mathematics, Biostatistics, Computer Science, and Mathematics), the master's program will offer a rigorous, distinctive, and attractive education for people building careers in Data Science and/or in Big Data Management. The program's main goal is to provide a fundamental understanding of the methods and algorithms of Data Science. Such an understanding will be achieved through a study of relevant topics in mathematics, statistics and computer science, including machine learning, data mining, security and privacy, visualization, and data management. The program will also provide experience in important, frontline data-science problems in a variety of fields, and introduce students to ethical and societal considerations surrounding data science and its applications.

The program's course structure, including the capstone experience, will ensure that the students meet the goals of acquiring and integrating foundational knowledge for data science, applying this understanding in relation to specific problems, and appreciating the broader ramifications of data-driven approaches to human activity. Moreover, our strong industry partnerships will help you better learn about industry's needs and directions, and will expose you to novel and unique opportunities. In addition, several professors from all across the different department's groups work closely with industry (regional and beyond) and the government, so you will be able to sharpen your skills here on problems that bring research ideas and methods to bear on problems of practical value.

The program will be conducted over one academic year plus one summer, with the option for an additional pre-program summer for students who lack one or more of the basic prerequisites. The regular program includes two semesters of coursework and a one-summer (5- 10 week) capstone project focused on data analysis in a particular application area.

There are nine credits unites required to pass the program: four in each of the academic year semesters, and one (the capstone experience) in the summer. The nine credit-units divide as follows:

- 3 credits in mathematical and statistical foundations,
- 3 credits in data and computational science,
- 1 credit in societal implications and opportunities,
- 1 elective credit to be drawn from a wide range of focused applications or deeper theoretical exploration, and
- 1 credit capstone experience.

We also offer an option as a 5-th Year Master's Program if you are an undergraduate at Brown. This allows you to substitute maximally 2 credits with courses you have already taken.

### Master of Science in Data Science

#### Semester I

DATA 1010	Probability, Statistics, and Machine Learning	2
DATA 1030	Hands-on Data Science	1
DATA 1050	Data Engineering	1

#### Semester II

DATA 2020	Statistical Learning	1
DATA 2040	Deep Learning and Special Topics in Data Science	1
DATA 2080	Data and Society	1

An appropriate 1000-level or 2000-level course to be determined by the student and approved by the program advisor. Possible courses could range from advanced mathematical methods to very specific applications of data science.

#### Summer

DATA 2050	Data Science Practicum <sup>1</sup>	1
Total Credits		9

<sup>1</sup> For their capstone experience, students will work on a project with real data, potentially in any one of the areas covered by the elective course. A faculty member from one of the four departments will oversee the capstone course, although each student may collaborate with an additional faculty member, postdoc, or industry partner on his/her project.

For more information on admission and program requirements, please visit the following website:

<https://www.brown.edu/academics/gradschool/programs/data-science>

### Courses

#### DATA 0080. Data, Ethics and Society.

A course on the social, political, and philosophical issues raised by the theory and practice of data science. Explores how data science is transforming not only our sense of science and scientific knowledge, but our sense of ourselves and our communities and our commitments concerning human affairs and institutions generally. Students will examine the field of data science in light of perspectives provided by the philosophy of science and technology, the sociology of knowledge, and science studies, and explore the consequences of data science for life in the first half of the 21st century.

#### DATA 0200. Data Science Fluency.

As data science becomes more visible, are you becoming more curious about its unique amalgamation of computer programming, statistics, and visualizing or storytelling? Have you ever wondered how these areas fit together and what a data scientist does? This course offers all students regardless of background the opportunity for hands-on data science experience, following a data science process from an initial research question, through data analysis, to the storytelling of the data. Along the way, you will learn about the ethical considerations of working with data through ethics spotting, and become more aware of societal impacts of data science. Course does not count toward CS concentration requirements.

#### DATA 1010. Probability, Statistics, and Machine Learning.

An introduction to the mathematical methods of data science through a combination of computational exploration, visualization, and theory. Students will learn scientific computing basics, topics in numerical linear algebra, mathematical probability (probability spaces, expectation, conditioning, common distributions, law of large numbers and the central limit theorem), statistics (point estimation, confidence intervals, hypothesis testing, maximum likelihood estimation, density estimation, bootstrapping, and cross-validation), and machine learning (regression, classification, and dimensionality reduction, including neural networks, principal component analysis, and unsupervised learning).

**DATA 1030. Hands-on Data Science.**

Develops all aspects of the data science pipeline: data acquisition and cleaning, handling missing data, data storage, exploratory data analysis, visualization, feature engineering, modeling, interpretation, presentation in the context of real-world datasets. Fundamental considerations for data analysis are emphasized (the bias-variance tradeoff, training, validation, testing). Classical models and techniques for classification and regression are included (linear regression, ridge and lasso regression, logistic regression, support vector machines, decision trees, ensemble methods). Uses the Python data science ecosystem. Prerequisites: A course equivalent to CSCI 0050, CSCI 0150 or CSCI 0170 are strongly recommended.

**DATA 1150. Data Science Fellows.**

Data science is growing fast, with tools, approaches, and results evolving rapidly. This course is for students with some familiarity with data science tools and skills, seeking to apply these skills and teach others how to implement and interpret data science. Working in conjunction with a faculty sponsor, this course teaches students communication skills, how to determine the needs (requirements) for a project, and how to teach data science to peers. These valuable agile skills will be an incredible advantage moving forward in your professional development. Experience and familiarity with data science strategies and/or tools (for example, at least one area of coding, statistics, or visualizations) are required for this course, along with an interest in developing skills around designing teaching and learning activities around data science. Students may request an override in C@B.

**DATA 1200. Reality Remix - Experimental VR.**

This course pursues collaborative experimentation with virtual and augmented reality (AR and VR). The class will work as a team to pursue research (survey of VR/AR experiences, scientific and critical literature review), reconnaissance (identifying VR/AR resources on campus, in Providence and the region), design (VR/AR prototyping). Research findings are documented in a class wiki. The course makes use of Brown Arts Initiative facilities in the Granoff Center where an existing VR laboratory will be expanded through the course of the semester based on student needs. Class culminates in the release the class wiki as a resource for the Brown community.

**DATA 2020. Statistical Learning.**

A modern introduction to inferential methods for regression analysis and statistical learning, with an emphasis on application in practical settings in the context of learning relationships from observed data. Topics will include basics of linear regression, variable selection and dimension reduction, and approaches to nonlinear regression. Extensions to other data structures such as longitudinal data and the fundamentals of causal inference will also be introduced.

**DATA 2040. Deep Learning and Special Topics in Data Science.**

A hands-on introduction to neural networks, reinforcement learning, and related topics. Students will learn the theory of neural networks, including common optimization methods, activation and loss functions, regularization methods, and architectures. Topics include model interpretability, connections to other machine learning models, and computational considerations. Students will analyze a variety of real-world problems and data types, including image and natural language data.

**DATA 2050. Data Science Practicum.**

The capstone experience is a hands-on thesis project that entails an in-depth study of a current problem in data science. Students will synthesize their knowledge of probability and statistics, machine learning, and data and computational science. A faculty member from one of the four core DSI departments (Applied Mathematics, Biostatistics, Computer Science, Mathematics) will oversee the capstone course. Students may collaborate with an additional faculty member, postdoc, or industry partner on projects. DATA 1010 and DATA 1030 are recommended pre-requisites.

**DATA 2080. Data and Society.**

A course on the social, political, and philosophical issues raised by the theory and practice of data science. Explores how data science is transforming not only our sense of science and scientific knowledge, but our sense of ourselves and our communities and our commitments concerning human affairs and institutions generally. Students will examine the field of data science in light of perspectives provided by the philosophy of science and technology, the sociology of knowledge, and science studies, and explore the consequences of data science for life in the first half of the 21st century.

**DATA 2110. Topics in Econometrics.**

This course will begin with a survey of the literature on identification using instrumental variables, including identification bounds, conditional moment restrictions, and control function approaches. The next part of class will cover some of the theoretical foundations of machine learning, including regularization and data-driven choice of tuning parameters. We will discuss in some detail the canonical normal means model, Gaussian process priors, (empirical) Bayes estimation, and reproducing kernel Hilbert space norms. We will finally cover some selected additional topics in machine learning, including (deep) neural nets, text as data (topics models), multi-armed bandits, and data visualization.

## Lefschetz Center for Dynamical Systems

The Lefschetz Center for Dynamical Systems at Brown University promotes research in dynamical systems interpreted in its broadest sense as the study of evolving systems, including partial differential and functional equations, stochastic processes and finite-dimensional systems. Interactions and collaborations among its members and other scientists, engineers and mathematicians have made the Lefschetz Center for Dynamical Systems one of the leading groups in dynamical systems and control theory.

The Lefschetz Center for Dynamical Systems originated in 1964, when a large group of mathematicians and control theorists came to Brown from the Research Institute for Advanced Studies (RIAS) in Baltimore. Solomon Lefschetz (<http://www.nasonline.org/publications/biographical-memoirs/memoir-pdfs/lefschetz-solomon.pdf>) (1884-1972), its first director, was one of the most outstanding mathematicians of this century. The Center has been privileged to name itself in his honor for these many years.

For additional information please visit the center's website at: <http://www.brown.edu/research/projects/dynamical-systems/home>.

## Early Cultures

The Program in Early Cultures (until recently called the Program in Ancient Studies) was founded in the late 1970s, when faculty in various academic units sought new ways to foster collaboration and promote the study of ancient civilizations among Brown's students. It is a Program of rich collaboration, critical exploration, and truly interdisciplinary scholarship that seeks to bring together all those at Brown (faculty, graduate students, undergraduates, and staff) who are interested in the cultures, religions, and histories of ancient civilizations. Geographically, the "ancient world" represented at Brown comprises early China and India, West Asia (Mesopotamia, Iran, Anatolia, and Israel), Egypt, the Mediterranean (especially Greece and Italy), the early Islamic and Byzantine worlds as well as the Pre-Columbian Mesoamerican civilizations.

For additional information, please visit the department's website: [http://www.brown.edu/Departments/Early\\_Cultures/](http://www.brown.edu/Departments/Early_Cultures/)

## Courses

**ERLY 0680. Judaism, Christianity, and the Bible (JUDS 0680).**

Interested students must register for JUDS 0680.

**ERLY 0990. Concepts of the Self in Classical Indian Literature (CLAS 0990).**

Interested students must register for CLAS 0990.

**ERLY 1000A. Writing History in the Ancient World.**

The Greeks and Romans created the western tradition of historiography as a genre of literature and historical reflection. The seminar will focus on the great historians from Herodotus to Tacitus and examine what purpose they pursued in writing history, investigate the origins of historical writing, and look at forms of historical reflection and writing in other ancient civilizations. Instructor permission required.

**ERLY 1000B. Geography, Ethnography, and Perceptions of the World in Antiquity.**

Curious about the shape and limits of the earth and the variety of cultures, ancient Greeks and Romans explored and described the world, drew maps, and interpreted the customs of others in fascinating ways. We will discuss relevant texts (Homer, Herodotus, Strabo, Tacitus, etc., in translation) and compare the Graeco-Roman world with that of other ancient civilizations (China, Mesopotamia, Aztecs).

**ERLY 1000C. Epic and History in the Ancient and Medieval Worlds.**

This seminar will focus on the question of preservation, transformation, and distortion of historical memory in epic poetry from various parts of the ancient (Mesopotamian, Hittite, Greek, and Roman) and medieval (German, French, Hispanic, and Slavic) worlds. Additional issues to be discussed include orality and literacy, cultural memory, and the social function of poetry in changing conditions. Texts in translation.

**ERLY 1000D. Highways and Byways in Antiquity.**

No description available.

**ERLY 1000E. The Gift in Antiquity (RELS 1880A).**

Interested students must register for RELS 1880A.

**ERLY 1120G. The Idea of Self (CLAS 1120G).**

Interested students must register for CLAS 1120G.

**ERLY 1150. Animal Acts.**

From the blood-soaked amphitheaters of the Roman Empire to tattooing and other forms of body modification, this course will explore how people, ancient and modern, view animals and what looking at animals reveals about what it means to be human. Examining evidence from a variety of disciplines (archaeology, religious studies, history, philosophy, art, and literature), we will investigate the problematic boundary between "man" and "animal" and challenge the presumed superiority of the "human".

**ERLY 1155. Animals in the Ancient City: Interdependence in the Urban Environment.**

In the past, as in the present, humans and animals were city dwellers, living side by side in urban environments. This course will focus on five ancient cities – in India, China, Egypt, Italy and Mexico – to examine the places where human and animal lives intersected in these early metropolises. We will explore how these complex relationships had a pervasive influence on nearly every aspect of urban life: from religious practices, to city planning, to entertainment, to health.

**ERLY 1410. Ancient Egyptian Literature (EGYT 1410).**

Interested students must register for EGYT 1410.

**ERLY 1420. Ancient Egyptian Religion and Magic (EGYT 1420).**

Interested students must register for EGYT 1420.

**ERLY 1750K. Madwomen and Lovers (CLAS 1750K).**

Interested students must register for CLAS 1750K.

**ERLY 1970. Individual Study Project.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ERLY 1990. Thesis Preparation.**

Required of seniors in the honors program. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ERLY 2110F. Greek Palaeography and Premodern Book Cultures (GREK 2110F).**

Interested students must register for GREK 2110F.

## Earth, Environmental and Planetary Sciences

### Chair

Greg Hirth

Students in Earth, Environmental, and Planetary Sciences develop a comprehensive grasp of principles as well as an ability to think critically and creatively. Formal instruction places an emphasis on fundamental principles, processes, and recent developments, using lecture, seminar, laboratory, colloquium, and field trip formats. Undergraduates as well as graduate students have opportunities to carry out research in current fields of interest.

The principal research fields of the department are geochemistry, mineral physics, igneous petrology; geophysics, structural geology, tectonophysics; environmental science, hydrology; paleoceanography, paleoclimatology, sedimentology; and planetary geosciences. Emphasis in these different areas varies, but includes experimental, theoretical, and observational approaches as well as applications to field problems. Field studies of specific problems are encouraged rather than field mapping for its own sake. Interdisciplinary study with other departments and divisions is encouraged.

For additional information, please visit the department's website: <http://www.brown.edu/academics/earth-environmental-planetary-sciences/>

### Geological Sciences Concentration Requirements

Geological science involves the study of the Earth (and other planetary bodies), including their compositions and histories and the physical chemical and biological processes that shape them. The geosciences are highly interdisciplinary, thus students must take some supporting math and science courses. Geoscience courses emphasize a process-oriented approach, with hands-on experiences in labs and on field trips. There is a strong emphasis on active and collaborative learning, and on practice in communication. Students may choose an AB (total of 13 courses) or an ScB (19 total courses, including one semester of research). There are many opportunities for students to do research work (typically in paid positions) during the academic year or in the summer, in areas such as deformation and properties of geological materials, deciphering the geologic history of some local rocks, or analysis of planetary images.

#### Standard program for the A.B. degree

This program provides a broad introduction to the geological sciences. Recommended for students seeking a liberal education and a general understanding of Earth processes and Earth history. Especially attractive for double concentrations, such as geology and economics as a career path to law or business, or geology and English as a career path to journalism or technical writing.

#### Basic supporting science courses

CHEM 0330	Equilibrium, Rate, and Structure (or advanced placement)	1
Select three of the following:		3
MATH 0090	Introductory Calculus, Part I	
MATH 0100	Introductory Calculus, Part II (or more advanced)	
PHYS 0050	Foundations of Mechanics	
PHYS 0060	Foundations of Electromagnetism and Modern Physics (or more advanced)	
ENGN 0030	Introduction to Engineering	
ENGN 0040	Dynamics and Vibrations (or more advanced)	
BIOL 0200	The Foundation of Living Systems (or more advanced)	

#### Concentration courses

EEPS 0220	Earth Processes	1
EEPS 0230	Geochemistry: Earth and Planetary Materials and Processes	1
EEPS 0240	Earth: Evolution of a Habitable Planet	1
Select two of the following:		2
EEPS 1410	Mineralogy	
EEPS 1420	Petrology	
EEPS 1450	Structural Geology	
Select two of the following:		2
EEPS 0310	Fossil Record	
EEPS 1110	Estuarine Oceanography	
EEPS 1240	Stratigraphy and Sedimentation	
EEPS 1330	Global Environmental Remote Sensing	
EEPS 1370	Environmental Geochemistry	
A field course		
Select two additional courses from upper level geological sciences, mathematics, or supporting sciences with approval from the departmental concentration advisor.		2
Total Credits		13

### Standard program for the Sc.B. degree

This program is recommended for students interested in graduate study and careers in the geosciences and related fields.

#### Basic supporting science courses

Select two courses in mathematics at the level of:		2
MATH 0090	Introductory Calculus, Part I	
MATH 0100	Introductory Calculus, Part II	
or another more advanced math or statistics course		
CHEM 0330	Equilibrium, Rate, and Structure (or advanced placement)	1
Select one of the following Series:		2
PHYS 0050 & PHYS 0060	Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics (or more advanced) <sup>1</sup>	
ENGN 0030 & ENGN 0040	Introduction to Engineering and Dynamics and Vibrations (or more advanced)	

#### Concentration courses

EEPS 0220	Earth Processes	1
EEPS 0230	Geochemistry: Earth and Planetary Materials and Processes	1
EEPS 0240	Earth: Evolution of a Habitable Planet	1
EEPS 0310	Fossil Record	1
EEPS 1240	Stratigraphy and Sedimentation	1
EEPS 1410	Mineralogy	1
EEPS 1420	Petrology	1
EEPS 1450	Structural Geology	1
A field course, or approved substitute		1
Select four courses from upper level geological sciences, mathematics, or supporting sciences with approval from the departmental concentration advisor.		4
EEPS 1970	Individual Study of Geologic Problems (Senior Research Thesis)	1
Total Credits		19

<sup>1</sup> Advanced placement may be substituted for the first semester of physics.

## Geology-Biology Concentration Requirements

Geology-Biology involves study of the interactions of the Earth and its hydrosphere and atmosphere with the great diversity of life forms, and how they have evolved and influenced one another over the entire history of the Earth. Many courses emphasize climate and biogeochemistry; this concentration is a good one for students interested in quantitative approaches to environmental science. Students take a basic suite of geoscience courses and at least 4 bio courses of their choosing, plus some supporting math and science courses; the AB degree requires a total of 14 courses and the ScB degree requires a total of 19, including one semester of research. There is a strong emphasis on active and collaborative learning, and on practice in communication. There are many opportunities for students to do research work (typically in paid positions) during the academic year or in the summer, in areas such as determining the history of climate change during the recent ice age, investigating the causes of major extinctions, and using paleoenvironmental records to determine the vulnerability of different regions of the globe to droughts and other processes that strongly affect society.

### Standard program for the A.B. degree

This program provides a broad introduction to the geologic and biologic processes that shape the Earth and our environment. It is recommended for students seeking a liberal education and a general understanding of Earth processes, including the evolution of climate and the environment, global environmental change and Earth history. The program prepares students for careers in environmental science, geology, ecology, oceanography, and global change.

#### Basic supporting science courses

BIOL 0200	The Foundation of Living Systems (or more advanced)	1
CHEM 0330	Equilibrium, Rate, and Structure (or advanced placement)	1
Select two courses in mathematics and/or physics at the level of:		2
MATH 0090	Introductory Calculus, Part I (or more advanced)	
PHYS 0050	Foundations of Mechanics (or more advanced)	
ENGN 0030	Introduction to Engineering (or more advanced, or courses in data analysis and statistics)	

#### Concentration courses

EEPS 0220	Earth Processes	1
EEPS 0230	Geochemistry: Earth and Planetary Materials and Processes	1
EEPS 0240	Earth: Evolution of a Habitable Planet	1
EEPS 1240	Stratigraphy and Sedimentation	1
Select three Biology courses from the following:		3
BIOL 0390	Vertebrate Evolution and Diversity	
BIOL 0410	Invertebrate Zoology	
BIOL 0415	Microbes in the Environment	
BIOL 0420	Principles of Ecology	
BIOL 0430	The Evolution of Plant Diversity	
BIOL 0440	Inquiry in Plant Biology: Analysis of Plant Growth, Reproduction and Adaptive Responses	
BIOL 0480	Evolutionary Biology	
BIOL 1470	Conservation Biology	
BIOL 1480	Terrestrial Biogeochemistry and the Functioning of Ecosystems	
BIOL 1500	Plant Physiological Ecology	
BIOL 1880	Comparative Biology of the Vertebrates	

Three geological sciences courses from the following: 3

EEPS 0580	Foundations of Physical Hydrology	
EEPS 1110	Estuarine Oceanography	
EEPS 1120	Paleoceanography	
EEPS 1130	Ocean Biogeochemical Cycles	
EEPS 1150	Limnology: The Study of Lakes	
EEPS 1330	Global Environmental Remote Sensing	
EEPS 1370	Environmental Geochemistry	
EEPS 1380	Environmental Stable Isotopes	
EEPS 1510	Introduction to Atmospheric Dynamics	
Total Credits		14

## Standard program for the Sc.B. degree

This program is recommended for students interested in graduate study and careers in the Earth, Environmental, or Biological Sciences. It is relevant for students interested in environmental science, paleoclimate, Earth systems science, biogeochemistry, oceanography, or paleobiology.

### Five basic supporting science courses

BIOL 0200	The Foundation of Living Systems (or more advanced)	1
CHEM 0330	Equilibrium, Rate, and Structure (or advanced placement)	1
PHYS 0050	Foundations of Mechanics (or more advanced)	1
or ENGN 0030	Introduction to Engineering	
Select two courses in mathematics at the level of:		2
MATH 0090	Introductory Calculus, Part I	
MATH 0100	Introductory Calculus, Part II (or more advanced, or advanced courses in data analysis)	

### Fourteen (14) concentration courses

EEPS 0220	Earth Processes	1
EEPS 0230	Geochemistry: Earth and Planetary Materials and Processes	1
EEPS 0240	Earth: Evolution of a Habitable Planet	1
EEPS 1240	Stratigraphy and Sedimentation	1
Three biology courses from the following:		3
BIOL 0390	Vertebrate Evolution and Diversity	
BIOL 0410	Invertebrate Zoology	
BIOL 0415	Microbes in the Environment	
BIOL 0420	Principles of Ecology	
BIOL 0430	The Evolution of Plant Diversity	
BIOL 0440	Inquiry in Plant Biology: Analysis of Plant Growth, Reproduction and Adaptive Responses	
BIOL 0480	Evolutionary Biology	
BIOL 1470	Conservation Biology	
BIOL 1480	Terrestrial Biogeochemistry and the Functioning of Ecosystems	
BIOL 1500	Plant Physiological Ecology	
BIOL 1880	Comparative Biology of the Vertebrates	
Three geological sciences courses from the following:		3
EEPS 0580	Foundations of Physical Hydrology	
EEPS 1110	Estuarine Oceanography	
EEPS 1120	Paleoceanography	
EEPS 1130	Ocean Biogeochemical Cycles	
EEPS 1150	Limnology: The Study of Lakes	
EEPS 1330	Global Environmental Remote Sensing	
EEPS 1370	Environmental Geochemistry	
EEPS 1380	Environmental Stable Isotopes	
EEPS 1510	Introduction to Atmospheric Dynamics	

Three additional courses from upper level geological sciences, mathematics, or supporting sciences with approval from the concentration advisor		3
EEPS 1970	Individual Study of Geologic Problems (Senior Research Thesis)	1
Total Credits		19

## Geology-Chemistry Concentration Requirements

Geochemistry involves two different emphases. Low-temperature geochemistry involves study of chemical and biochemical processes on and near Earth's surface, including land, oceans and freshwater bodies, and how the geochemical record reflects climate conditions. High-temperature geochemistry includes study of formation and evolution of the Earth and other planets, magma formation and properties, volcanic activity, and metamorphism. The AB degree requires a total of 14 courses, including 5 geoscience courses and 4 chemistry courses, and a few supporting math and physics courses. The ScB degree requires a total of 20 courses, including 7 geoscience courses and 4 chemistry courses, either with an organic or an inorganic focus, plus some supporting math and physics courses and one research course. Geoscience courses emphasize a process-oriented approach, with hands-on experiences in labs and on field trips. There is a strong emphasis on active and collaborative learning, and on practice in communication. There are many opportunities for students to do research work for pay during the academic year or in the summer, in areas such as experimental studies of magma formation, and analyzing lunar rock samples for water content.

### Standard program for the A.B. degree

Recommended for students seeking a liberal education and interested in applying physical and chemical principles toward an understanding of Earth history, Earth processes, and environmental and resource issues.

#### Basic supporting science courses

Select two courses in mathematics at the level of:		2
MATH 0090	Introductory Calculus, Part I (or more advanced)	
MATH 0100	Introductory Calculus, Part II (or more advanced)	
CHEM 0330	Equilibrium, Rate, and Structure	1
PHYS 0050	Foundations of Mechanics (or a more advanced course, or advanced placement.)	1
or ENGN 0030	Introduction to Engineering	

#### Concentration courses

EEPS 0220	Earth Processes	1
EEPS 0230	Geochemistry: Earth and Planetary Materials and Processes	1
EEPS 0240	Earth: Evolution of a Habitable Planet	1
Three additional chemistry courses		3
Select one of the following Series:		2
EEPS 1410	Mineralogy	
or EEPS 1420	Petrology	
EEPS 1130	Ocean Biogeochemical Cycles	
or EEPS 1370	Environmental Geochemistry	
Two additional courses from upper level geological sciences, math, or supporting sciences with approval from the department concentration advisor.		2
Total Credits		14

### Standard program for the Sc.B. degree

This program is recommended for students interested in graduate study and careers in geochemistry and related fields.

**Basic Supporting Science Courses:**

Select two courses in mathematics at the level of:	2
MATH 0090	Introductory Calculus, Part I (or more advanced)
MATH 0100	Introductory Calculus, Part II (or more advanced)
CHEM 0330	Equilibrium, Rate, and Structure
Select one of the following series:	2
PHYS 0050 & PHYS 0060	Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics <sup>1</sup>
ENGN 0030 & ENGN 0040	Introduction to Engineering and Dynamics and Vibrations or a more advanced course

**Concentration Courses:**

Either the geochemistry/inorganic option or the geochemistry/organic option: 10

**Geochemistry/Inorganic Option:**

EEPS 0220	Earth Processes
EEPS 0230	Geochemistry: Earth and Planetary Materials and Processes
EEPS 0240	Earth: Evolution of a Habitable Planet
EEPS 1130 or EEPS 1370	Ocean Biogeochemical Cycles or Environmental Geochemistry
EEPS 1410	Mineralogy
EEPS 1420	Petrology
Plus one from:	
EEPS 1240	Stratigraphy and Sedimentation
EEPS 1330	Global Environmental Remote Sensing
EEPS 1450	Structural Geology

Three from:

CHEM 0350	Organic Chemistry
CHEM 0500	Inorganic Chemistry
CHEM 1060	Advanced Inorganic Chemistry
CHEM 1140	Physical Chemistry: Quantum Chemistry
CHEM 1150	Physical Chemistry: Thermodynamics and Statistical Mechanics

**Geochemistry/Organic Option:**

EEPS 0220	Earth Processes
EEPS 0230	Geochemistry: Earth and Planetary Materials and Processes
EEPS 0240	Earth: Evolution of a Habitable Planet
EEPS 1130	Ocean Biogeochemical Cycles
EEPS 1370	Environmental Geochemistry
EEPS 1410	Mineralogy
Plus one from:	
EEPS 1240	Stratigraphy and Sedimentation
EEPS 1330	Global Environmental Remote Sensing
EEPS 1380	Environmental Stable Isotopes

Three Chemistry courses:

CHEM 0350	Organic Chemistry
CHEM 0360	Organic Chemistry
Plus one additional chemistry course	

Three additional courses from upper level geological sciences, mathematics, or supporting sciences with approval of the departmental concentration advisor 3

EEPS 1970 Individual Study of Geologic Problems 1

Total Credits 19

<sup>1</sup> Advanced placement may be substituted for the first semester of physics.

## Geology-Physics/Mathematics Concentration Requirements

Geophysics involves the application of physics and mathematics to the study of processes that operate on and within the Earth and other planets, over short and long timescales. The AB degree requires a total of 14 courses, including 6 geoscience courses, 3 physics or engineering courses, and 3 math and applied math courses. The ScB degree requires a total of 20 courses, including 8 geoscience courses, 4 physics or engineering courses, and 3 math and applied courses; students can choose courses from both solid Earth geophysics and climate science themes. Geoscience courses emphasize an analytical and process-oriented approach, with hands-on experiences in labs and on field trips. Active and collaborative learning is encouraged, as is practice in written and oral communication. There are many opportunities for students to engage in research (typically in paid positions) during the academic year or in the summer, in areas such as analysis of seismic waves in subduction zones, theoretical modeling of convection in the Earth's mantle, modeling the effects of the warming climate in the oceans and atmosphere, and remote sensing of how climate change affects vegetation.

### Standard program for the A.B. degree

Recommended for students seeking a liberal education and interested in applying physical and mathematical principles toward an understanding of the processes affecting planets, Earth, and the environment and how they are modeled. Some course requirements may be flexible based on consultation with concentration advisor.

EEPS 0220	Earth Processes	1
EEPS 0250	Computational Approaches to Modelling and Quantitative Analysis in Natural Sciences: An Introduction	1
or EEPS 0350	Mathematical Methods of Fluid	

Four theme courses (choose either the Solid Earth Geophysics Theme or the Climate Science Theme) 4

**Solid Earth Geophysics Theme**

EEPS 0230	Geochemistry: Earth and Planetary Materials and Processes
EEPS 1610	Solid Earth Geophysics
And select two of the following:	
EEPS 1410	Mineralogy
EEPS 1420	Petrology
EEPS 1450	Structural Geology
EEPS 1620	Continuum Physics of the Solid Earth

**Climate Science Theme**

EEPS 0240	Earth: Evolution of a Habitable Planet
And select two from the following:	
EEPS 1130	Ocean Biogeochemical Cycles
EEPS 1310	Global Water Cycle
EEPS 1430	Principles of Planetary Climate
EEPS 1510	Introduction to Atmospheric Dynamics
EEPS 1520	Ocean Circulation and Climate

Choose one of the following: 1

PHYS 0050	Foundations of Mechanics
PHYS 0070	Analytical Mechanics
ENGN 0040	Dynamics and Vibrations

Choose one of the following: 1

PHYS 0060	Foundations of Electromagnetism and Modern Physics
ENGN 0310	Mechanics of Solids and Structures
ENGN 0810	Fluid Mechanics <sup>1</sup>

Choose one of the following: 1

PHYS 0470	Electricity and Magnetism
-----------	---------------------------

PHYS 0500	Advanced Classical Mechanics	
PHYS 1600	Computational Physics	
ENGN 0510	Electricity and Magnetism	
ENGN 0810	Fluid Mechanics <sup>1,2</sup>	
ENGN 1370	Advanced Engineering Mechanics	
EEPS 1820	Geophysical Fluid Dynamics: Rotating, Stratified Turbulence Edition	
<b>Three courses in Mathematics, including:</b>		<b>3</b>
APMA 0330	Methods of Applied Mathematics I, II	
or APMA 0340	Methods of Applied Mathematics I, II	
CHEM 0330	Equilibrium, Rate, and Structure (or advanced placement)	1
<b>One additional course from upper level geological sciences, mathematics, or supporting sciences with approval from the departmental concentration advisor.</b> <sup>3</sup>		<b>1</b>
Total Credits		14

<sup>1</sup> One course cannot be used to satisfy two requirements.

<sup>2</sup> ENGN 0810 or EEPS 1820 are recommended for those completing the Climate Science theme.

<sup>3</sup> In addition to courses listed elsewhere, in the Geology-Physics/Math concentrations, these courses are of particular relevance: EEPS 0810, EEPS 1320, EEPS 1710, EEPS 1960A.

## Standard program for the Sc.B. degree

This program is recommended for students interested in graduate study and careers in geophysics, climate science and related fields. Students will be prepared to understand and use models, make measurements, and use theories of the processes studied in these fields. Some course requirements may be flexible based on consultation with concentration advisor.

EEPS 0220	Earth Processes	1
EEPS 1430	Principles of Planetary Climate	1
EEPS 1610	Solid Earth Geophysics	1
EEPS 0250	Computational Approaches to Modelling and Quantitative Analysis in Natural Sciences: An Introduction	1
or EEPS 0350	Mathematical Methods of Fluid	

**Five theme courses (choose either the Solid Earth Geophysics theme or the Climate Science Theme):** 5

### Solid Earth Geophysics Theme

EEPS 0230 Geochemistry: Earth and Planetary Materials and Processes

EEPS 1450 Structural Geology

EEPS 1620 Continuum Physics of the Solid Earth

And choose two from the following:

EEPS 1410 Mineralogy

EEPS 1420 Petrology

EEPS 1560 Global Tectonics

EEPS 1650 Earthquake Seismology

Or a field course

### Climate Science Theme

EEPS 0240 Earth: Evolution of a Habitable Planet

Choose one:

EEPS 1510 Introduction to Atmospheric Dynamics

EEPS 1520 Ocean Circulation and Climate

And choose three from the following:<sup>1</sup>

EEPS 1130 Ocean Biogeochemical Cycles

EEPS 1310 Global Water Cycle

EEPS 1330 Global Environmental Remote Sensing

EEPS 1510 Introduction to Atmospheric Dynamics

EEPS 1520 Ocean Circulation and Climate

Or a field or sea course

PHYS 0050	Foundations of Mechanics	1
or PHYS 0070	Analytical Mechanics	
or ENGN 0040	Dynamics and Vibrations	
PHYS 0060	Foundations of Electromagnetism and Modern Physics	1
or ENGN 0310	Mechanics of Solids and Structures	
or ENGN 0810	Fluid Mechanics	
Select two of the following: <sup>1,2</sup>		<b>2</b>
PHYS 0470	Electricity and Magnetism	
PHYS 0500	Advanced Classical Mechanics	
PHYS 1600	Computational Physics	
ENGN 0510	Electricity and Magnetism	
ENGN 0810	Fluid Mechanics	
ENGN 1370	Advanced Engineering Mechanics	
EEPS 1820	Geophysical Fluid Dynamics: Rotating, Stratified Turbulence Edition	

Three courses in mathematics including 3

APMA 0330 Methods of Applied Mathematics I, II

or APMA 0340 Methods of Applied Mathematics I, II

One additional courses from upper level geological sciences, mathematics, or supporting sciences with approval from the departmental concentration advisor.<sup>3</sup> 1

CHEM 0330 Equilibrium, Rate, and Structure 1

EEPS 1970 Individual Study of Geologic Problems 1

Total Credits 19

<sup>1</sup> One course cannot be used to satisfy two requirements

<sup>2</sup> ENGN 0810 or EEPS 1820 are recommended for those completing the Climate Science theme.

<sup>3</sup> In addition to courses listed elsewhere, in the Geology-Physics/Math concentrations, these courses are of particular relevance: EEPS 0810, EEPS 1320, EEPS 1710, EEPS 1960A.

## Geological Sciences Graduate Program

The department of Geological Sciences offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/geological-sciences>

## Courses

### EEPS 0010. Face of the Earth.

Study of Earth's surface (e.g., mountains, rivers, shorelines) and processes which have created and modify it (e.g., glaciation, floods, volcanism, plate tectonics, earthquakes). The goals are to increase appreciation and enjoyment of our natural surroundings and provide a better understanding of environmental problems, natural resources, land use, and geologic hazards. Four labs, plus a field trip. For nonscience concentrators (science concentrators should take EEPS 0220). Students MUST register for both components of this course (the lecture and one of the labs) during the SAME registration session. Enrollment limited to 100.

### EEPS 0011. Geology in the Real World: Intersections Between Geology and Society.

Do you know how the Earth and its processes affect you? If you want to learn how geology influences the lives of everyone on Earth, this is the class for you. We will use case studies, like the Tohoku earthquake that displaced 200,000 people, to guide our exploration. Along the way, you will learn to critically evaluate how science is presented in the media. Ten years from now you might not remember how to tell gneiss from schist, but because of this class you should be able to tell your neighbor how geology affects the lives of everyone in the world.

**EEPS 0030. Climate and Climate Change.**

This course is designed to provide students with an understanding of the climate system on Earth, changes in Earth's climate over time, and interactions between climate change and human society. Topics will include: global energy balance; the structure, composition and role of the atmosphere and oceans; the influence of the global carbon cycle on climate; the social, economic and political drivers of human perturbations to the carbon cycle; and societal vulnerability, resilience and adaptive capacity in the face of environmental changes. No prerequisites; course open to all levels.

**EEPS 0050. Mars, Moon, and the Earth.**

Space exploration has revealed an astonishing array of surface features on the planets and their satellites. Why are atmospheres on the planets different from Earth's atmosphere? Do other planets represent our past or future environment? Is there life on other planets? The planets and their histories are compared to gain insight and a new perspective on planet Earth.

**EEPS 0070. Introduction to Oceanography.**

Examines the ocean's role in Earth's global environment, emphasizing the dynamical interaction of the ocean with the atmosphere, biosphere, cryosphere, and lithosphere. Focus on physical/chemical/biological systems' interconnections needed to understand natural and anthropogenic variability on various time and space scales, from El Niño to global warming. Three lectures, written exercises on oceanographic problems; two field trips to study estuarine and coastal processes.

**EEPS 0160B. Global Change: Ecology and Climate.**

Examines ways in which global change will affect ecosystems, considering how temperature, rainfall, and land use can modify the distribution of organisms in the future, and reduce biodiversity. Examine how biotic feedbacks to global change can modify climate change through their effects on the carbon cycle, absorption of sunlight at the land surface, and retention of water in soils. Enrollment limited to 19 first year students.

**EEPS 0160C. Global Environmental Change.**

Examination of evidence that supports or refutes various perspectives on global environmental change, with a foundation in the principles that govern the fundamental underlying processes. Example topics include climate change (warming, cooling, neutral), population growth (how many, how fast), and loss of natural resources (diversity). Topics explored through selected readings from the natural and social sciences. Enrollment limited to 19 first year students.

**EEPS 0160D. Living Within the Landscape.**

Physical processes that shape the Earth's surface provide an inescapable context for human activity. We will examine the physical principles that govern erosion and sedimentation, slope stability, river and coastal flooding, and groundwater flow, and analyze how these processes affect land-use philosophies and decision-making. Enrollment limited to 19 first year students.

**EEPS 0160E. Volcanos, Windows into the Deep Earth.**

Examines the physical and chemical principles controlling the generation of volcanoes and their different styles of eruption. Investigates where and why volcanoes occur, and what volcanic lavas can tell us about the composition and evolution of the Earth and other planets. Evaluates volcanic hazards and their environmental impacts and the economic benefits and cultural aspects of volcanism. Two-day field trip. Enrollment limited to 19 first year students.

**EEPS 0160F. Patterns: in Nature, in Society.**

The shapes of plants and animals, of mountains and shorelines arise because nature dissipates energy as rapidly as possible. These morphological patterns allow description of the "energy" landscape that produced them. Societies and economies show temporal and spatial patterns as well; does the "flow rate" of ideas and of money cause these patterns? We will explore just how "entropy rules." CAP course. Enrollment limited to 19 first year students.

**EEPS 0160G. Energy Resources.**

Most of our energy comes directly from the Earth - predominantly as fossil fuels, but also from geothermal, wind, and hydro sources. Developing technologies for alternative energy such as solar, nuclear, biomass and fuel cells also rely on Earth resources. The potential for these energy sources will be discussed. The science behind their utilization and environmental impact (e.g. carbon sequestration and nuclear waste disposal) will be introduced and the trade-offs in making decisions for the future will be explored. CAP course. Enrollment limited to 19 first year students.

**EEPS 0160H. Chicken Little or Armageddon? Past and Future Cosmic Threats.**

Explore the probability of the next impact on the Earth and assess the possible consequences through historic times (incidents), folklore/legends, examples in recent geological time (last 10 million years), and the catastrophic consequences 65 million years ago. Strategies for searching and possible mitigation of the next "big one" will be considered. This seminar will explore the realities of various predictions, consider public policy, investigate strategies for prevention, and assess the role of the press in shaping perceptions. Enrollment limited to 19 first year students.

**EEPS 0160I. Diamonds.**

Examines both the science and human history of diamonds, and shows how they have interacted over the years. Investigates how and where diamonds are formed in nature and what they tell us about the Earth. At the same time, explores the role diamonds have played in our history and culture. Enrollment limited to 12 first year students.

**EEPS 0160J. The Natural History of Great Writers: From Goethe to Steinbeck.**

Many great and influential writers have also been natural historians. This course examines selections from the writing of such authors as the romantic and naturalist Johann Wolfgang von Goethe, the rationalist Benedict de Spinoza, the intuitive thermodynamicist William Blake, the naturalist novelist John Steinbeck, the lepidopterist novelist Vladimir Nabokov, the amateur paleontologist Arthur Conan Doyle, the proto-ecologist Henry David Thoreau, and the philosopher and sociologist Herbert Spencer. We will examine in a modern scientific context how facts and theories of natural history informed their writing and influenced their worldviews. Specific topics in this seminar will include: man's place in nature and the importance of the discovery of this deep time perspective, Darwinian evolution and its impact on sociology, and the emerging science of ecology in 19th century American literature. Enrollment limited to 19 first year students.

**EEPS 0160M. Natural Disasters.**

This First Year Seminar will explore natural disasters: the physical processes that cause them, and their effects on human life. Types of natural disasters covered include earthquakes, volcanoes, tsunamis, hurricanes, tornadoes, and floods. The focus of the course will be case studies of specific disasters, allowing us to discuss both the science of natural hazards and the vulnerability of human populations to those hazards.

It will provide a broad overview of the Earth Sciences, including geology and geophysics, meteorology, oceanography, and climatology.

**EEPS 0160N. Monsters of the Abyss: Oceanography and Sea Tales.**

We will read from the logbooks of Cook, Darwin, Wallace, and Nansen. Their discoveries and expeditions inspired and were inspired by fiction that we will also read, including *Moby Dick* and *20,000 Leagues Under the Sea*. The daring successes and cannibalistic dooms of the *Essex*, *Beagle*, *Terror*, *Challenger*, and *Fram* inspired 19th century writers to imagine what lay far across and deep beneath the oceans. These retellings--fictional, narrative, and scientific--helped formulate and fund further research. Who risks their life for a bird, a map, a widow, or an eclipse? How would these scientists and their ideas do today? Enrollment limited to 19 first year students.

**EEPS 0160S. Assembling Rhode Island.**

Rhode Island has existed as a state in the U.S. for over 200 years, but the land itself is the product of hundreds of millions of years of rich geologic history. As a participant in this First Year Seminar, you will engage with introductory principles of geology toward an understanding of the tectonic history of Rhode Island as well as the geological processes that presently influence and modify its landscape. The basis of our investigation of Rhode Island geology will come from observations made over a series of afternoon-long field trips to geological points of interest in the state and nearby.

**EEPS 0220. Earth Processes.**

Introduction to the physical and chemical processes that shape the Earth's surface, govern the structure of its interior, cause natural hazards and affect the human environment. Topics include interior processes (plate tectonics, mountain building, volcanism, earthquakes, and flow of solid rocks) and environmental processes (climate, atmospheric and oceanic circulation, flow of rivers, glaciers, and groundwater). Four labs and two field trips arranged. Intended for science concentrators or those wishing in-depth treatment. CAP course. Enrollment limited to 100. After pre-registration, instructor permission is required to register or get on wait-list. Please see or email instructor (Jan\_Tullis@brown.edu).

**EEPS 0230. Geochemistry: Earth and Planetary Materials and Processes.**

Introduction to the chemical and mineralogical nature of the Earth, Moon, and meteorites, and the role of chemical processes in their evolution. Topics include: composition of rock-forming minerals; origin of crustal and mantle rocks; stable and radiogenic isotopes; models of nucleosynthesis, planet formation and differentiation. Weekly laboratory and two field trips. Intended for science concentrators. Prerequisites: basic chemistry and EEPS 0010 or 0050 or 0220, or instructor permission.

Labs will meet Tuesdays from 7:00 pm to 9:00 pm.

**EEPS 0240. Earth: Evolution of a Habitable Planet.**

Introduces Earth's surface environment evolution - climate, chemistry, and physical makeup. Uses Earth's carbon cycle to understand solar, tectonic, and biological cycles' interactions. Examines the origin of the sedimentary record, dating of the geological record, chemistry and life on early Earth, and the nature of feedbacks that maintain the "habitable" range on Earth. Two field trips; five laboratories arranged. Prerequisite: EEPS 0220 or 0230, or instructor permission.

**EEPS 0250. Computational Approaches to Modelling and Quantitative Analysis in Natural Sciences: An Introduction.**

Application of numerical analysis to mathematical modelling in the natural sciences including topics such as ground water and glacier flow, earthquakes, climate models, phase equilibrium, and population dynamics. Numerical methods will include the solution of linear algebraic systems of equations, numerical integration, solution of differential equations, time series analysis, statistical data analysis tools. Development of computer programming skills in the Matlab programming environment. Suggested prerequisites: MATH 0090, 0100; PHYS 0030, 0040, or 0050, 0060.

**EEPS 0300. Sustainability of Earth Resources.**

Fossil fuels are not the only Earth resource we rely on in great quantities. Over 1.5 billion cell phones are made yearly; each using 64 different elements, at least 12 of which are currently irreplaceable. Iron, copper, nickel, rare earth elements, and even sand, are all key components of our modern world that we extract from the Earth. How much are left? How environmentally damaging is it to extract them? Are there alternative extraction methods, or alternative materials? Can they be recycled? What part of your world would you be willing to give up to reduce environmental impacts?

**EEPS 0310. Fossil Record.**

Integrated view of the history of life: biogeochemical cycles, biodiversity, evolution by natural selection, ecology, and physiology along a multiplicity of scales from the microbial to the planetary, as recorded in the fossil record. Attention is given to how biotic systems, in contrast to just physical systems, have changed through time maintaining the chemical and thermodynamic non-equilibrium state of the Earth's surface. Two lectures per week; several labs including dissections for paleobiological comparisons and one field trip to fossil localities and museum collections in Connecticut and Massachusetts. Prerequisites: EEPS 0220 or 0230 or 0240, BIOL 0200, or instructor permission.

**EEPS 0350. Mathematical Methods of Fluid.**

Intended for undergraduates concentrating in geological and physical sciences or engineering, especially those interested in the quantitative study of Earth. Problem sets will cover common approaches to quantify the dynamics and chemistry of solids and fluids in nature. Mathematical topics to be introduced include linear algebra, vectors and tensors, differential equations, dynamical systems, eigenvalues and eigenvectors, empirical orthogonal functions, fractals, chaos, and statistics. Applications include waves in the oceans, atmosphere, and solid earth, convective and conductive heat flow, reaction rates, gravitational potential energy, Newton's laws on a rotating planet, measuring coastlines and ranges, and dating errors in stratigraphy.

**EEPS 0580. Foundations of Physical Hydrology.**

Qualitative introduction to the dynamics of watersheds and groundwater flow from an intuitive perspective. Lays the foundations for understanding the physical mechanisms by which water is transported throughout a hydrologic system. Provides background for future studies, but is primarily designed to enable informed citizens to thoughtfully critique water management practices and public policy. Pre-college math and physics background is expected.

**EEPS 0810. Planetary Geology.**

This introductory level course will examine the evolution of our Solar System and the geology of planetary bodies, including Mercury, Venus, the Moon, Mars, asteroids, and the moons of Jupiter and Saturn. We will discuss the origin of the Solar System from a geological perspective and explore how scientists combine observations from extraterrestrial samples such as meteorites with data returned by satellites and rovers to develop and test hypotheses related to planetary evolution. Emphasis will be on comparing geologic processes on these bodies to well-understood processes on Earth, results from past, current, and upcoming planetary missions, and the future of human and robotic exploration of space.

**EEPS 0850. Weather and Climate.**

Weather phenomena occur on short time scales, and form the basis for understanding climate, the study of changes over longer time scales. This course aims to provide an understanding of the processes that drive weather patterns, the general circulation of the atmosphere, and climate on Earth. Topics include the structure and composition of the atmosphere, sources of energy that drive atmospheric processes, weather forecasting, the hydrological cycle, forces that create severe weather, the influence of humans on the atmosphere, and factors that influence climate, climate variability and climate change. Recommend courses or equivalent: MATH 0090, MATH 0010, PHYS 0050.

**EEPS 1110. Estuarine Oceanography.**

Examines physical, chemical, and biological characteristics of local estuaries using field measurements, analysis of field data, and interpretation of processes; field investigation results will be prepared as a cooperative class report. Topics include: tidal and circulation processes, salinity and freshwater fluxes, watershed pollutants, estuary flushing rates, and estuary ecosystems. Primarily for students with experience in the sciences. MATH 0090, 0100, or equivalent, recommended. Enrollment limited to 20.

Labs will be held on Fridays from 1-5pm, with fieldwork through mid-October.

**EEPS 1120. Paleooceanography.**

An examination of the Cenozoic history of the world ocean with attention to the processes which have acted to change its circulation, climate, geometry, and biology. Develops a strategy to use marine sediments and microfossils to identify and understand past variations in the oceans. Class projects analyze and interpret various types of paleoceanographic data. Laboratory arranged. Offered alternate years.

**EEPS 1130. Ocean Biogeochemical Cycles.**

A quantitative treatment of the cycling of biologically important elements in the world ocean. Special attention paid to the carbon system in the ocean and the role that organisms, in conjunction with ocean circulation, play in regulating the carbon dioxide content of the atmosphere through exchange with the surface ocean. For science concentrators. Offered alternate years. Prerequisite: CHEM 0330 or equivalent, or instructor permission.

**EEPS 1150. Limnology: The Study of Lakes.**

This course will provide an interdisciplinary overview of the physics, chemistry, biology, and geology of lakes. Areas of emphasis will include the origin of lake basins, water circulation patterns, heat and water budgets, biogeochemical processes, lake ecosystems, and the stratigraphic record of lakes. We will also discuss human and climatic impacts on lakes. Prerequisites: EEPS 0220 and 0240, or instructor permission. Enrollment limited to 20.

**EEPS 1240. Stratigraphy and Sedimentation.**

Introduction to depositional environments and processes responsible for formation of sedimentary rocks. Major sedimentary environments in the Recent are discussed, general models are proposed, and stratigraphic sequences in older sediments are examined in the light of these models. The Phanerozoic stratigraphic record is examined from the perspective of Earth system history. Laboratory arranged. Prerequisites: EEPS 0220 or 0240, or instructor permission. EEPS 0310, 1410 are also recommended.

**EEPS 1310. Global Water Cycle.**

The goal of this class is to understand the physical principles and processes of the global water cycle. Topics include the climatic importance of water, circulation of atmospheric water vapor, formation of rain and snow, availability of soil water, plant-water relations, mass balance of glaciers, and ongoing and expected changes in the water cycle. Additional goals: become familiar with the current research literature, practice clear and concise science writing, and to use simple programming in Python to plot and analyze actual data sets.

Students are expected to have taken at least one geology-related course. Programming experience recommended, but not necessary.

**EEPS 1320. Introduction to Geographic Information Systems for Environmental Applications.**

An introduction to basic geographic information system (GIS) concepts, and the utilization and application of geospatial data for analysis. Topics will include data structures and management, coordinate systems and projections, data creation, obtaining spatial data from outside sources, georeferencing and address-matching, model building and batch geoprocessing, and performing fundamental spatial analysis techniques such as overlay, extraction, and interpolation, viewsheds, and hot spot analysis among others. Concepts are presented via online videos (Canvas) and put into practice through weekly hands-on laboratory exercises utilizing the GIS software product ArcGIS 10.x and ArcGIS Pro (ESRI, Inc.). Two presentations by each student are required - a case study, and an original research project employing the methods learned. A public poster session on the original research project culminates the term. If unable to pre-register, a wait list will be used to fill openings on a first come, first serve basis. S/NC.

**EEPS 1330. Global Environmental Remote Sensing.**

Introduction to physical principles of remote sensing across electromagnetic spectrum and application to the study of Earth's systems (oceans, atmosphere, and land). Topics: interaction of light with materials, imaging principles and interpretation, methods of data analysis. Laboratory work in digital image analysis, classification, and multi-temporal studies. One field trip to Block Island. Recommended preparation courses: MATH 0090, 0100; PHYS 0060; and background courses in natural sciences.

**EEPS 1370. Environmental Geochemistry.**

The course will examine the biogeochemical cycling, fate and transport of chemicals in the atmospheric and aquatic environments. Topics such as chemical weathering, natural water pollution and remediation, acid deposition, global warming and air pollution will be examined through natural ecosystem examples from rivers, lakes, estuaries, and ocean. Field trips and laboratory arranged. Prerequisites: CHEM 0100 or 0330, or instructor permission.

**EEPS 1380. Environmental Stable Isotopes.**

Introduction to the concepts, analytical methods, theory and environmental applications of stable H, O, C, N and S isotopes. Emphasis will be placed on theory and applications of light isotopes in paleoclimate studies, environmental hydrogeology and biogeochemistry. Prerequisites: CHEM 0100, EEPS 0220 or 0230 recommended, or instructor permission.

**EEPS 1390. Planetary Surface Processes.**

This course is designed to introduce students a variety of physical and chemical processes that shape and sculpt the surfaces of solid planetary bodies (asteroid, comets, moons, & terrestrial planets). We will learn the ways mountains can form and how their topography is supported (Is Venus' 11 km high Maxwell Montes the result of a rising mantle plume? among other questions). This course will cover the processes of faulting, tectonics, volcanism, impact cratering, landslides, and weathering from wind, and water. These processes will be explored from a physical quantitative perspective.

**EEPS 1410. Mineralogy.**

Introduction to mineralogical processes on Earth's surface and its interior. Topics include crystallography, crystal chemistry, nucleation, crystal growth, biomineralization, environmental mineralogy, and mantle mineralogy. Laboratory study devoted to optical identification of rock-forming minerals. Prerequisites: EEPS 0230, CHEM 0100 or 0330, or equivalent.

**EEPS 1420. Petrology.**

Introduction to the origin and evolution of igneous rocks. Topics include: physical properties of magma, thermodynamics and phase equilibria, igneous rocks and their classification, magmatic processes, trace elements and isotopes, basalts and layered intrusions, survey of lunar and planetary petrology. Prerequisites: EEPS 1410, or instructor permission.

**EEPS 1430. Principles of Planetary Climate.**

This course provides the physical building blocks for understanding planetary climate. Topics include thermodynamics applied to planetary atmosphere, basic radiative transfer, energy balance in the atmosphere, and climate variability. In-class exercises and homework problems are designed to strengthen the understanding of basic concepts and to improve problem-solving skills.

**EEPS 1450. Structural Geology.**

Introduction to the geometry, kinematics and mechanics of rocks deformed by brittle fracture or faulting and ductile solid state flow, on scales from microscopic to mountain ranges. The emphasis is on using concepts to interpret the formation, strain history and rheology of deformed rocks in terms of the operative grain-scale processes, material properties and environmental conditions. Weekly 2 hour lab involving hands-on experience closely related to class topics. Two field trips. Prerequisites: EEPS 0220 or instructor permission.

**EEPS 1510. Introduction to Atmospheric Dynamics.**

The objective of EEPS 1510 is to understand the fundamental physical principles that govern the motion of the atmosphere. Students will explore the dynamics of the atmosphere and the mathematical laws governing weather and climate. Topics include the fundamental equations of motion in rotating fluids, hydrostatic, geostrophic and thermal wind balance, and vorticity, as applied to phenomena, including sea breezes, planetary waves, midlatitude cyclones, fronts, and the global general circulation. The emphasis will be on physical interpretation of the equations but facility with vector calculus is critical. Enrollment limited to 30.

**EEPS 1520. Ocean Circulation and Climate.**

Examines physical characteristics, processes, and dynamics of the global ocean to understand circulation patterns and how they relate to ocean biology, chemistry, climate change. Assignments address ocean's role in the climate system; ocean observations and models; the origin, distribution, and dynamics of large-scale ocean circulation and water masses; energy and freshwater budgets; and variability of the coupled system on seasonal to centennial timescales e.g. El Niño. Intended for geological and physical sciences undergraduate and graduate students with quantitative skills and an interest in oceans, climate, paleoclimate. Pre-requisites: EEPS 0250, EEPS 0350, PHYS 0720, or APMA 0180. Offered alternate years.

**EEPS 1560. Global Tectonics.**

Plate tectonic theory and the evolution of continents and the seafloor. Emphasis on the structure and tectonics of western U.S. considering geological, geophysical, and geochemical constraints as well as direct geodetic observations of plate motions from GPS measurements. Prerequisite: EEPS 0220 and 0230. Three or more of EEPS 0220, 0230, 1240, 1410, 1420, 1450 and 1610 are recommended.

**EEPS 1580. Quantitative Elements of Physical Hydrology.**

Physical hydrology with emphasis on fundamental physical principles and mathematical tools. Topics include precipitation, surface runoff, groundwater flow, water quality and contaminant transport. Prerequisites: APMA 0340; and ENGN 0510 or PHYS 0470; ENGN 0810 is recommended; or instructor permission.

**EEPS 1590. Quantitative Modeling of Hydrologic Processes.**

A quantitative overview of selected topics at the advanced undergraduate and beginning graduate student level of analytical and numerical models for simulating surface runoff, groundwater flow and contaminant migration. While participants will employ computers and scientific visualization to implement the material, no prior computing experience is expected. Non-concentrators encouraged. No exams. Prerequisites: PHYS 0470, or ENGN 0510.

**EEPS 1590A. Quantitative Modeling of Hydrologic Processes.**

A quantitative overview of selected topics at the advanced undergraduate, beginning graduate student level of analytical and numerical models for simulating surface runoff, groundwater flow and contaminant migration. While participants will employ computers and scientific visualization to implement the material, no prior computing experience is expected. Non-concentrators encouraged. No exams. Prerequisites: PHYS 0070, or ENGN 0510.

**EEPS 1600. Environmental and Engineering Geophysics.**

A hands-on introduction to non-invasive geophysical methods applied to subsurface investigations of soil and bedrock conditions, groundwater, geotechnical engineering, forensics, archaeology and other environmental applications. Students will use ground penetrating radar, seismic, gravity resistivity, electromagnetic and magnetic methods in the field one afternoon a week to investigate relevant environmental and geotechnical problems. A background in geology is not expected. Prerequisites: APMA 0340 and PHYS 0470, or ENGN 0510, or instructor permission.

**EEPS 1610. Solid Earth Geophysics.**

A survey of basic geophysical techniques for determining the structure and dynamics of Earth's interior. Topics include: global structure from seismic waves; gravity, magnetic field, and shape of the Earth; thermal processes within the Earth; structure of continental and oceanic lithosphere. Recommended courses: EEPS 0220, PHYS 0470, APMA 0330. No prerequisites.

**EEPS 1615. The Environmental Policy Process.****EEPS 1620. Continuum Physics of the Solid Earth.**

Physics of the Earth with emphasis on fundamental physical principles and mathematical tools. Topics include application of: conductive and convective heat transfer to cooling of the Earth; potential theory to interpretation of gravity anomalies; solid mechanics to deformation of Earth's lithosphere; fluid mechanics to flow in the Earth's interior and in porous media. Recommended courses: EEPS 0220; APMA 0340; PHYS 0470 or ENGN 0510.

**EEPS 1650. Earthquake Seismology.**

Topics include: location of earthquakes in space and time; measures of size and intensity of shaking; body waves, surface waves, and free oscillations; structure of the interior of the Earth from wave propagation; earthquake faulting and relationship to tectonic processes. Recommended course: EEPS 0161. Offered in alternate years.

**EEPS 1690. Introduction to Methods in Data Analysis.**

This class will be an overview of different ways one can quantitatively analyze data. Topics will include linear regression, least squares inversion, principal component analysis, and Bayesian methods. Emphasis will be on both a theoretical understanding of these methods and on practical applications to geophysical and earth science problems. Exercises will include using MATLAB to analyze data.

**EEPS 1710. Remote Sensing of Earth and Planetary Surfaces.**

Geologic applications of remotely sensed information derived from interaction of electromagnetic radiation (X-ray, gamma-ray, visible, near-IR, mid-IR, radar) with geologic materials. Applications emphasize remote geochemical analyses for both terrestrial and extraterrestrial environments. Several spectroscopy and image processing labs. EEPS 1410 (Mineralogy), PHYS 0060, or equivalent recommended.

**EEPS 1810. Physics of Planetary Evolution.**

The course will explore and expose students to the fundamental physics necessary to understand how planetary bodies evolve. The evolution of planetary bodies will be discussed on the basis of geological and geophysical evidence derived from exploration of the Solar System. This course will study the physical processes responsible for and that occur as a consequence of differentiation and deformation of planetary bodies. Includes the study of physical processes responsible for volcanism and deformation on the surface as well as the state and structure of the interior of planets.

**EEPS 1820. Geophysical Fluid Dynamics: Rotating, Stratified Turbulence Edition.**

Explores theories of the large-scale ocean and atmosphere, including quasigeostrophic, planetary geostrophic, and shallow water equations. Topics will vary to focus on features of the general circulation and climate system (e.g. thermocline, westward intensification, jet stream dynamics, polar vortex, meridional overturning circulations), instabilities and waves (e.g. gravity, Rossby, and Kelvin), or rotating stratified turbulence. May be repeated with permission of instructor. Pre-requisites: EEPS 0350 or PHYS 0720 or APMA 0340 and EEPS 1510 or EEPS 1520.

**EEPS 1950B. Atmospheric Chemistry.**

Earth's atmosphere touches everything on the surface of our planet has evolved, from the first signs of life on land and in the oceans to today's. This seminar course will provide students with an understanding of the chemical and physical processes that determine the composition of the atmosphere and its implications for climate, ecosystems, and human welfare. Topics to be covered include basic measures of the atmosphere; photolysis and reaction kinetics; atmospheric transport of trace species; stratospheric ozone chemistry; tropospheric hydrocarbon chemistry; oxidizing power and nitrogen, oxygen, sulfur, and carbon cycles; chemistry-climate-biosphere interactions; aerosols, smog, and acid rain.

**EEPS 1950C. Planetary Materials.**

A comparative planetology course that examines the origin and evolution of materials on the Earth, Moon, and Mars through sample analyses, spacecraft observations, and modeling approaches. Recommended courses: EEPS 1410, 1420. No prerequisites.

**EEPS 1950D. Field and Tectonics Seminar.**

Development of field mapping and interpretive skills used in the evolution of complex orogenic terranes. Structural field mapping is carried out in highly deformed metamorphic and igneous rocks in the New England Appalachians, the site of a continental collision associated with the formation of the supercontinent Pangea. Expected: EEPS 0230 and EEPS 1450, or equivalent, and field mapping experience (generally a summer geological mapping course). Students are required to arrive one week prior to the start of classes for the beginning of field work. Instructor permission required.

**EEPS 1950F. Geomicrobiology.**

Microbes were the predominant form of life for most of Earth's history and continue to drive many of the elemental cycles that sustain life in our contemporary biosphere. By taking this course students will learn about the phylogenetic and metabolic diversity of microbes in the environment and their influence on global biogeochemical cycles. Students will gain hands-on experience with molecular and environmental microbiological techniques and the bioinformatics tools required to analyze and interpret the resulting data. There are 2 sections or topical areas: Phylogenetic and ecological diversity of microbes; Microbial and metabolic diversity of biogeochemical cycling. Prerequisite: BIOL 0415 or 1460 or 1480 or EEPS 1130. Enrollment limited to 12. Instructor permission required.

**EEPS 1950G. Astrophysical and Dynamical Processes in Planetary Sciences.**

Astrophysical and Dynamical Processes in Planetary Sciences is a course that challenges students to use physical and geophysical analysis to construct a quantitative understanding of the formation and evolution of the Sun, the solar system's planets and small bodies, and extrasolar planets. The goal is to provide senior undergraduate and first-year graduate students with core knowledge of facts and current theories in the planetary sciences. Through lectures, problem sets, and exams, the students will construct quantitative framework on which to evaluate, and place into context, hypotheses and theories discussed in upper-level graduate courses. Prerequisites: MATH 0100; and one of EEPS 0050, PHYS 0210, 0220, or 0270. APMA 0330 is desirable but not required.

**EEPS 1960A. Rheology of the Crust and Mantle.**

Introduces the principals of rock mechanics and uses them to describe brittle and ductile deformation processes in the crust and mantle. Each topic will review experimental constraints on deformation mechanisms and introduce the theories that support their application to geological conditions. Analyze microstructural observations in real rocks to link what is learned in the lab to what actually is seen in the Earth. Topics to be covered include: brittle fracture and crack propagation, frictional sliding, the brittle/plastic transition, viscous deformation mechanisms, microstructural analysis of deformed rocks, and the scaling and extrapolation of laboratory flow laws. The class will also feature a field trip to well-exposed crustal faults and shear zones. Several class periods and a class project will focus on microstructural observations of rocks collected during the field trip. Pre-requisite: EEPS 1450 or permission of instructor. Enrollment limited to 20.

**EEPS 1960B. Special Topics in Geological Sciences: Physical Hydrology.**

Physical Hydrology is the description of processes that involve the transport of aqueous fluids in the subsurface of the Planets. We will learn about the principle that govern the motion of these fluids and the common approaches to describe their dynamics in terms of governing equations. The goal of the course is to be introduced to flows in porous media, as well as transport of heat, chemical species and multiphase flows (unsaturated aquifers). We will discuss applications from geothermal energy extraction, CO<sub>2</sub> geological sequestration strategies and reactive transport, such as those encountered for pollutant remediation and sediment diagenesis.

**EEPS 1960F. Patterns in Nature, in Society.**

The shapes of plants and animals, of mountains and shorelines arise because nature dissipates energy as rapidly as possible. These morphological patterns allow description of the energy "landscape" that produced them. Societies and economies show temporal and spatial patterns as well: does the "flow rate" of ideas and of money cause these patterns? We will explore just how "entropy rules." Enrollment limited to 16. Instructor permission required.

**EEPS 1960G. Earth Science Curriculum Design and Teaching Practicum for Elementary School.**

This course is a practical introduction to Earth Sciences curriculum design and teaching with a strong "learning by teaching" component. Students will learn about the principles and best practices of science education and communication and will teach a theme-driven ten-lesson Earth Science module previously designed by DEEPS students in collaboration with participating teachers from Providence Public Schools in two elementary public schools. After each lesson students will receive feedback and will analyze and discuss their teaching process during class meetings. In the second part of the course students will apply the experience they gained to design a new module outline.

**EEPS 1960H. The Early Earth.**

Primary focus on evolution of the solid Earth (core, mantle, crust) but will also include discussion of the Archean hydrosphere, atmosphere and biosphere. Reading and discussing current literature, with lectures. Intended for graduate students and upper level undergraduates with advanced petrology and/or geophysics. Enrollment limited to 20.

**EEPS 1960J. Reactions and Rheology: Chemical and Mechanical Kinetics in Mineral Systems.**

Characterization of atomic diffusion and dislocation motion responsible for chemical and physical reactions and plastic rheology in ionic solids. Topics include: point-defect thermodynamics; atomic diffusion (physical and mathematical); solid-solution formation; solid-state compound formation; dislocation structures; grain boundary structure and chemical segregation; plastic rheology. Recommended three or more of EEPS 1410, EEPS 1420, or EEPS 0410, ENGN 1410, or CHEM 0330, CHEM 1060. Enrollment limited to 20.

**EEPS 1960K. Carbon Cycle Seminar.**

Consideration of quantitative models of the cycling of carbon between various reservoirs near Earth's surface. Topics include: mass balance models of carbon sedimentation; carbon chemistry in the ocean; exchange of carbon between atmosphere, ocean, and biosphere; and consumption of carbon in weathering reactions with rocks. Special emphasis will be placed on the use of isotopic tracers (d<sup>13</sup>C, <sup>14</sup>C) to estimate present and past dynamics of the carbon cycle. Instructor's permission required. Enrollment limited to 20.

**EEPS 1960M. Lab and Field Methods in Hydrology.**

A series of hands-on opportunities for students to characterize the hydrologic properties of soils and simple hydrologic systems in the lab, combined with selected outdoor exercises using standard hydrologic tools in the field. High school math and physics recommended. Enrollment limited to 20.

**EEPS 1960Z. Physical Volcanology.****EEPS 1970. Individual Study of Geologic Problems.**

One semester is required for seniors in Sc.B. and honors program. Course work includes preparation of a thesis. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Enrollment is restricted to undergraduates only.

**EEPS 2300. Mathematical and Computational Earth Sciences.**

For graduate students interested in quantitative study of the Earth in geological, physical, or engineering sciences. Mathematical topics to be introduced include tensor analysis, asymptotic and perturbation analysis of differential equations, numerical integration of differential equations, basis functions and pattern recognition, fractals and multifractals, and statistics. Applications will vary by offering, but examples include: statistics of turbulence and earthquakes, advection-reaction-diffusion systems, boundary layers, development of shocks and singularities, climate change, carbon sensitivity, and dimensional reduction of geophysical data. Intensive review of introductory mathematical methods through leading discussions in a lower level class. Earth, fluid, or solid science background recommended.

**EEPS 2330. Advanced Remote Sensing.**

Strategies and the physical principles behind the quantitative extraction of geophysical and biophysical properties from remotely sensed data. Emphasis on radiative transfer theory and modeling of spectra and spectral mixtures from optical constants. Advanced methods of digital image processing. Methods of integrating remotely sensed data into a GIS framework will be introduced. Recommended preparation course: EEPS 1330 or 1710; MATH 0100; PHYS 0600.

**EEPS 2350. Quaternary Climatology Seminar.**

Discussion of current problems in paleoclimatology and global climate change. Students analyze the primary literature, and do original analyses of their own on published data. Topics include: theories of ice ages, millennial-scale climate variability, the influence of greenhouse gases and radiative forcing on climate, and historical and future climate changes. Prerequisites: graduate student status; or EEPS 0240, 0310, and 1240; or instructor permission.

**EEPS 2410. Kinetics of Geochemical Processes.**

Emphasizes kinetic theories and their geological applications. Topics include: rate laws of chemical reaction, rates of chemical weathering; fundamentals of diffusion, nucleation, crystal growth, and dissolution; transport theory. Recommended prerequisite: EEPS 2460 or equivalent.

**EEPS 2430. Igneous Petrology.**

Study of mineral equilibria in igneous rocks in relation to theoretical and experimental studies in silicate systems. Principles of the origin and evolution of igneous rocks in space and time. Offered alternate years.

**EEPS 2440. Petrogenesis Metamorphic Rocks.**

Study of metamorphic rocks with emphasis on mineral equilibria, metamorphic facies, and metamorphic facies series. Topics include: metasomatism, mobile components, partial anatexis, and petrogenetic grids. Prerequisite: EEPS 2460. Offered alternate years.

**EEPS 2450. Exchange Scholar Program.****EEPS 2460. Phase Equilibria.**

Principles of thermodynamics and phase equilibria in unary, binary, ternary, and multicomponent systems using analytical and graphical methods. Other topics include: solution theory, equations of state, and thermodynamics of surfaces.

**EEPS 2520. Numerical Geodynamics.**

Numerical methods for the solution of continuum physics problems arising in geophysics and geology: Basic theoretical formulations and algorithms implementing finite element, finite difference, and boundary element methods are developed. Applications include problems in viscous and plastic flow, elasticity, and heat and mass transport discussed within a geological framework. Course consists of lectures and a computer project applying the methods and concepts considered to a scientifically significant problem. Recommended: APMA 0330, 0340; ENGN 1750. Offered alternate years.

**EEPS 2630. Interpretation Theory in Geophysics.**

Use basic statistical theory and its matrix algebra representation and modern approaches for the optimum design of experiments, constructing model solutions to measurements, and describing nonuniqueness in models, with particular emphasis on generalized linear-inverse techniques. Introduction to stochastic processes and prediction. Recommended courses: EEPS 1610; MATH 0290, 0520, or APMA 0330, 0340, and computer programming skills. Offered alternate years.

**EEPS 2650. Advanced Seismology.**

The theory of modern seismology will be applied to imaging of Earth structure (from local to global scales) and determination of earthquake source models. Topics include elastic wave propagation, representation theorems, seismic tomography, moment tensors, source-time functions, and models of fault rupture. Offered alternate years.

**EEPS 2730. Isotope Geochemistry.**

A survey course emphasizing fundamental principles in isotope geochemistry, including nuclear systematics, nucleosynthesis, geochronological and stable isotope systems, and the application of radiogenic and stable isotopic tracers to geological problems. Prerequisites: EEPS 1410 and 1420, or instructor permission.

**EEPS 2800. The Chemistry and Mineralogy of Mars.**

Examination of the chemical and mineralogical composition of Mars as revealed from meteorites and spacecraft missions. Example topics include: SNC meteorites, origin and evolution of the crust, alteration processes, remote near- and thermal-infrared observations, remote gamma-ray and neutron measurements, and petrology of surface materials. Recommended courses: EEPS 1410, 1420, 1710, or equivalent. No prerequisites.

**EEPS 2810. Planetary Science Seminar.**

New data for the Moon and Mercury from recent missions (including Chanrayaan-1, Lunar Reconnaissance Orbiter, GRAIL and MESSENGER) permit new insights into "The Crater to Basin Transition on the Moon and Mercury". In this seminar course we will examine this transition using these new data and recent developments in cratering theory and modeling. The course will feature research from the NASA SSERVI activity. Prerequisites: Instructor permission.

**EEPS 2840. Asteroids and Meteorites.**

Compositional and petrographic characteristics of meteorites are examined along with the physical and compositional diversity of asteroids and other small bodies of the solar system. Possible links between specific types of asteroids and meteorite groups will be evaluated in the context of early solar system evolution. Data from spacecraft encounters with asteroids will be critically reviewed.

**EEPS 2850. Regolith Processes.**

Particulate material (regoliths) and soils develop on every planetary surface. Physical and chemical alteration of the uppermost surface results from interwoven active processes of specific environments. Understanding these processes and products is central to interpreting data returned from planetary surfaces. Regoliths reflect surface history over a variety of time scales. Several planetary environments are examined in detail. Prerequisites: EEPS 1410, 1710, 2880, or instructor permission.

**EEPS 2860. Planetary Volcanology.**

An examination of volcanism using observations of features and deposits on planetary bodies, comparing them to predictions from the theory of magma ascent and emplacement. Attention to the influence of different variables (e.g. gravity, composition, temperature, pressure, and atmospheric effects). The history of planetary volcanism, its relation to thermal evolution, and comparative planetary volcanology are also addressed. Offered alternate years.

**EEPS 2870. Planetary Evolution – Origin/Evolution of the Moon: Touchstone for Understanding Planets.**

The Moon forms a fundamental baseline for our understanding of the origin of planets and their early evolution, in terms of primary and secondary crustal formation, core and mantle formation and evolution, magnetism, impact basins, and global tectonics. A major goal of this course is to identify major outstanding questions and scientific and exploration goals for future robotic and human exploration missions to the Moon. Sponsored by NASA SSERVI, the lecture series is jointly organized by SSERVI teams at Brown University and the Lunar and Planetary Institute in Houston with many affiliated SSERVI institutes participating.

**EEPS 2880. Planetary Cratering.**

Impact cratering is arguably the most pervasive geologic process in the solar system. This course will study the physical process of impact cratering and its place in planetary science. The course will take a process oriented approach to understanding impact cratering with firm foundations in geologic observation and impact experiments. To explore the extreme process of impact cratering, we will use continuum/rock mechanics, thermodynamics, numerical modeling, experiments, and observations. Principal topics will include the formation of craters from contact of the projectile to final crater morphology; shock metamorphism; impact ejecta and products; cratered terrains; impacts and planetary evolution; and impact hazards.

**EEPS 2910A. Problems in Antarctic Dry Valley Geoscience.**

The Antarctic Dry Valleys represent an extreme hyperarid polar desert environment. Their geomorphology records the range of processes operating in these environments, preserving a record of climate change of millions of years. Major microenvironments are studied at the micro-, meso-, and macro-scale through literature review, field analyses, and research projects. Exobiological themes and climate change on Mars will be assessed.

**EEPS 2910B. Advanced Remote Sensing and Geographical Information Systems (GIS).**

Strategies and the physical principles behind the quantitative extraction of geophysical and biophysical measurements from remotely sensed data. Advanced methods of digital image processing and data integration. Introduction to Geographical Information Systems (GIS) and methods of integrating remotely sensed data into a GIS framework. Prerequisites: EEPS 1330 or 1710; MATH 0100; PHYS 0060; or permission of the instructor.

**EEPS 2910C. The Global Nitrogen Cycle.**

This seminar course will survey the literature and discuss aspects of the marine, atmosphere, biosphere and geologic cycles of reactive nitrogen. Topics include general evaluation of the N cycle in these systems and records of changes in the N cycle through time, particularly on relevant climate change timescales.

**EEPS 2910E. Miocene: Prelude to the Ice Ages and Analogue to Future Climate Change.**

The Miocene Epoch (~23 to 5 Ma) was characterized by a variety of interconnected changes including the tectonic evolution of various ocean gateways, changes in surface and deep-ocean circulation patterns and evolving ocean and atmospheric chemistry. In the Middle Miocene, these conditions resulted in reduced pole-to-equator temperature gradients and global mean annual surface temperatures of ~18°C, equivalent to warming predicted for the next century. These evolving conditions in the Late Miocene set the stage for the initiation of high amplitude northern hemisphere glacial cycles. Study of Miocene climate will yield insight into mechanisms relevant to past and future climate change.

**EEPS 2910F. Earthquake Mechanics, Rheology and Rock Friction.**

Reading current literature, class discussion, lectures to explore current research in fault mechanics and rheology. Time in the lab examining microstructures in both experimental and natural samples. Topics will include: (1) Deformation mechanisms associated with slow slip and tremor; (2) Grain-size evolution processes and their geophysical implications; (3) Grain-size sensitive deformation processes and their geophysical implications. Prior to each class, students will submit (via email) at least 2 questions about the assigned reading. After class, there will be 3 or 4 questions to answer on topics covered in the reading and during class discussion.

**EEPS 2910G. Dynamics of Ice Sheets and Glaciers.****EEPS 2910I. Marine Geophysical Techniques.****EEPS 2910M. The Changing Arctic.**

What is the fate of the Arctic and high latitude regions in a warming world? This course explores how the Arctic is changing and its implications to the physical, natural, and social systems. This class will provide a comprehensive overview of the Arctic and synthesize the latest scientific findings from an array of readings/reports. Topics covered will include changes in: snow, freshwater, ice, permafrost, sea level rise, shipping routes, Arctic policy and governance, and identify how these changes are impacting Arctic-dwelling communities and adaptation strategies available. Instructor override required. Email samiah\_moustafa@brown.edu with a statement of interest, year and concentration.

**EEPS 2910P. Origin and Evolution of Planetary Systems.**

The goal of this course is to introduce students to our current understanding of how planetary systems form and evolve. We will focus on the physical theories describing how the structures of planetary systems develop and how planets, moons, and other heavenly bodies form. We will also consider the relationship between these theories and observations (astronomical, geophysical, cosmochemical) of the Solar System and extrasolar planetary systems. This will include some discussion how the Solar System fits into our understanding of the veritable menagerie of planetary systems.

**EEPS 2920B. Special Topics: Ocean Worlds.****EEPS 2920C. The Sedimentary Rock Cycle of Mars and Earth.**

This course consists of a mixture of instructor and student-led discussions on topics related to the sedimentary rock cycle on Mars as viewed through the lens of how we understand such processes on Earth. Topics: sediment transport and deposition, erosion processes and rates, lithification + diagenesis, water-rock interaction, and cyclicity in strata. Major goal: Assess how the sedimentary rock record of Mars can be used to understand changes in depositional processes and environmental conditions through time. Results from Mars satellite and rover data will be discussed, with an emphasis on fundamental processes as understood from detailed studies of Earth's sedimentary rock record. Prerequisite: Undergraduate level sedimentology/stratigraphy, or permission of instructor.

**EEPS 2920D. Introduction to Geochemical Modeling.**

Continuum descriptions of mass transfer in geochemical cycles. Topics include: fundamentals of diffusive and advective mass transfer, kinetics of weathering and early diagenesis, fluid flow in the Earth's crust and mantle, trace elements and isotopes in magmatic processes. Recommended: CHEM 0330, EEPS 1610 and APMA 0330, 0340.

**EEPS 2920E. Introduction to Organic Geochemistry.**

Mainly literature critiques and seminars, supplemented by introductory lectures. Topics include organic biomarkers, analytical methodologies, natural macromolecules, stable isotope ratios of biomarkers, application of organic geochemistry in studies of climatic and environmental change, fossil fuel exploration, and applied environmental research.

**EEPS 2920F. Kinetics of Mineralogical and Petrological Processes.**

Emphasizes kinetic theories and their geological applications. Topics include: fundamentals of diffusion in crystals and melts, theories of nucleation and crystal growth, kinetics of melting and dissolving, theory of phase transformation. Prerequisite: EEPS 2460 or equivalent.

**EEPS 2920G. Special Topics in Geological Sciences: Exoplanet Seminar.**

The goal of this course is to introduce students to the study of planets orbiting other stars. Learning outcomes: Recognize the methods for detection and characterization of exoplanets, and the information these methods provide about exoplanetary systems. Discuss planet properties that can be derived from observational methods. Summarize our understanding of exoplanet populations. Recognize cutting edge work being done in the field of exoplanets – such as the search for exomoons, habitability, and biosignatures. Recall updated facilities (both ground and space based) for future exoplanet studies. Assessment of journal articles and synthesizing material across sources. Completion of an independent project on an outstanding question in exoplanet science.

**EEPS 2920H. Past Variations in the Global Carbon Cycle.**

This course will examine variations in the earth's carbon cycle over multiple time scales. We will examine geological tools that measure rates of carbon storage and release, especially over the past one million years. Special emphasis will be given to monitoring rates of past biological carbon storage.

**EEPS 2920I. Special Topics: Dynamics of Tropical Climate and Ecosystem.****EEPS 2920J. The Source of Liquid Water in the Noachian History of Mars.****EEPS 2920K. Special Topics in Geological Sciences: The Hydrological Cycle on Mars: Evidence for Oceans.****EEPS 2920L. Evolution of the Moon II.**

A seminar on the thermal and chemical evolution of the Moon. In this part II of lunar seminar, we will focus more on petrological and geochemical observations of lunar samples, terrestrial layered intrusions, related geophysical observations, and lunar petrogenesis. Prerequisite: EEPS 1420, 2730, or 2920K.

**EEPS 2920N. Problems Antarctic Dry Valley Geoscience.**

The Antarctic Dry Valleys represent an extreme hyperarid polar desert environment. Their geomorphology records the range of processes operating in these environments, preserving a record of climate change over millions of years. Major microenvironments are studied at the micro-, meso-, and macro-scale through literature review, field analyses, and research projects. Exobiological themes and climate change on Mars will be assessed.

**EEPS 2920O. Physics of Melt Migration.**

A seminar course focusing on the physical processes and geochemical consequences of melt migration in the mantle. Topics include, but are not limited to: flow in porous media; compaction; adiabatic melting and melt-rock reaction; instabilities in melt migration; melt generation beneath mid-ocean ridge; and melt migration in other tectonic environments. Recommended course: EEPS 1620. Enrollment limited to 15. S/NC

**EEPS 2920P. Special Topics in Geological Sciences: Geological History of Mars.**

In many ways, Mars is the most Earth-like planet in the Solar System and may have once had a climate conducive to the origin and evolution of life. We will trace the geologic history of Mars (atmospheric, climatic, eolian, fluvial, lacustrine, oceanic, volcanic, impact crater, tectonic, interior evolution) from the present back through the Amazonian, Hesperian, Noachian and pre-Noachian to the origin of Mars, examining the main themes in its evolution in order to provide a comparative framework for the other terrestrial planets and satellites.

**EEPS 2920Q. Rheological Boundaries in the Earth.**

The properties of lower crust control the coupling of mantle convection to shallow crustal dynamics, post-seismic creep and the chemical evolution of the Earth. On Earth we have xenoliths and exhumed lower crustal rocks to study and relate to geophysical, experimental and theoretical investigations. We will explore these avenues of research with the goal of synthesizing our understanding of the behavior of lower crust on Earth as well as other terrestrial planets.

**EEPS 2920R. Evolution of the Moon.**

Petrological, geochemical, and geophysical observations, physical and chemical processes relevant to the formation and evolution of the Moon.

**EEPS 2920S. Continental Cratons.**

The focus of this course is the formation, evolution, and structure of continental cratons. These topics will be explored through a survey of the observational constraints on cratons, including seismology, gravity, heat flow, geochemistry, and petrology. The use of dynamical models to investigate the assembly, destruction, and long-term stability of cratons will also be considered.

**EEPS 2920T. Science Applications of Lunar Spectroscopy.**

This course will focus on current science issues that are addressed with new lunar orbital or laboratory spectroscopy data. Each participant must identify a specific science topic (and data source) to be pursued and brought to completion during the term. Format will be seminar with very active participation by all attending. At the beginning of the term each participant will describe their chosen research topic. Subsequent sessions will critically examine issues that are associated with each topic in an iterative fashion, focusing on progress made, problems faced, solutions designed, insights found, and finally completed project. Prerequisites: EEPS 1710 and confirmation with instructor about the project.

**EEPS 2920U. Climate Variations.**

This course will examine the geologic record of lake basins on decadal to million-year time-scales. Students will gain hands-on experience with techniques in paleolimnology including sediment core acquisition, sediment description, petrography, sedimentology and environmental analysis, geochemistry, basic core scanning, and age determination, modeling, and time series analysis. The biotic content and interpretation of fossils will be stressed. The course will also cover theoretical aspects of paleolimnology and more specialized techniques according to student interests through student-led discussions and a course project on regional lake sediments. Graduate students only; enrollment limited to 20.

**EEPS 2920V. Terrestrial Nitrogen and Carbon Cycling.**

This course will examine aboveground/ belowground processes in the context of the global nitrogen and carbon cycles, and the impacts of both natural and anthropogenic disturbances. It will include discussion of processes such as (de)nitrification, N-fixation, respiration, photosynthesis, and decomposition and their relationship to soil properties; the coupling of N and C cycles in soils related to climate change and increasing N deposition. It will include emphasis on emerging new techniques to quantify N and C processes in the laboratory, field and through modeling, and field trip investigating current field studies. Prerequisites: BIOL 1480 or EEPS 1130 or equivalent biogeochemistry course. Enrollment limited to 15.

**EEPS 2920W. Numerical Climate Change Scenarios for Southern New England.**

This seminar will examine regional-scale climate model scenarios for past and future climate change in Southern New England. Reliable estimates of the trajectory and variability of climate change are needed to address specific climate impacts, adaptations, and mitigations. Global climate model simulations, based on a range of IPCC green house gas scenarios, need to be "downscaled" to achieve useful regional resolution. Understanding the generation of these high-resolution "downscaled" climate scenarios and compiling a number of observed and modeled climate variables to assess the trends and reliability of climate scenarios for Southern New England is the goal of the seminar.

**EEPS 2920Z. The Evolution of Lacustrine Ecosystems.****EEPS 2980. Research in Geological Sciences.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Enrollment is restricted to graduate students only.

**EEPS 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## East Asian Studies

### Chair

Cynthia J. Brokaw

The 21<sup>st</sup> century has turned to Asia as a center of international trade, culture, and critical inquiry. The Department of East Asian Studies offers Brown students a window onto this vitally important corner of the world, whose civilizations reach back several millennia and whose cultural and economic ties extend throughout the globe. A vibrant community of teachers and undergraduates who work closely together in the spirit of free inquiry, the Department of East Asian Studies embodies Brown's unique mission "to serve the community, the nation and the world."

The Department offers several tiers of instruction in Chinese, Japanese and Korean, with courses designed to accommodate students ranging from those who have never taken a class in the language before, to those hoping to hone their abilities at the highest levels. East Asian Studies also offers Brown students the opportunity to explore the visual, textual and religious cultures of East Asia through introductory and advanced courses on literature, film, pilgrimage and translation, among others.

For additional information, please visit the department's website: <http://www.brown.edu/academics/east-asian-studies/>

## East Asian Studies Concentration Requirements

East Asian Studies is a multidisciplinary concentration designed for students wishing to attain reasonable fluency in Chinese, Japanese, or Korean with specialized exposure to selected East Asian subjects. It serves students with two types of interests: those who aim to pursue active professional careers related to the East Asian region; and those who want to pursue graduate study in the humanities or social sciences with particular emphasis on China, Japan or Korea. Students in East Asian Studies will gain language proficiency and familiarity with East Asia through advanced courses in a variety of disciplines. Concentrators are strongly encouraged, but not required, to study in East Asia for one or two semesters. The concentration requires students to demonstrate a basic proficiency in Chinese, Japanese, or Korean.

### The Language Requirement

The concentration requires students to demonstrate a basic proficiency in Chinese, Japanese, or Korean. For the purposes of the concentration, proficiency is determined to be consistent with successful completion of the Department's third-year course sequence in Chinese, Japanese, or Korean (0500-0600), or its equivalent. Native speakers of these languages may, for example, demonstrate competency such that language courses may be unnecessary. Department language instructors may also determine that course work completed at one of the language-intensive study abroad programs attended by our undergraduates is comparable to courses offered at Brown. Up to three upper level (700-999) may count as electives for concentration credit.

Note that we do not equate completion of third-year Chinese, Japanese, or Korean with fluency in these languages. Rather, we believe that students who have demonstrated the skills associated with third-year Chinese, Japanese, or Korean have acquired a foundational understanding of the languages' grammar, vocabularies, and conversational patterns, such that they are able to make themselves understood in everyday situations, and to understand both spoken and written communication.

For the purposes of the concentration, language courses through the third-year are treated as an accompanying requirement.

### Language Prerequisites (demonstrating proficiency through the third-year or 0600 level in one of the three languages below)

Chinese	
CHIN 0100 & CHIN 0200	Basic Chinese and Basic Chinese
CHIN 0300 & CHIN 0400	Intermediate Chinese and Intermediate Chinese
CHIN 0350 & CHIN 0450	Elementary to Intermediate Chinese for Advanced Beginners and Advanced Chinese for Heritage Learners
CHIN 0500 & CHIN 0600	Advanced Modern Chinese I and Advanced Modern Chinese I
Japanese	
JAPN 0100 & JAPN 0200	Basic Japanese and Basic Japanese
JAPN 0300 & JAPN 0400	Intermediate Japanese and Intermediate Japanese
JAPN 0500 & JAPN 0600	Advanced Japanese I and Advanced Japanese I
Korean	
KREA 0100 & KREA 0200	Korean and Korean
KREA 0300 & KREA 0400	Intermediate Korean and Intermediate Korean
KREA 0500 & KREA 0600	Advanced Korean and Advanced Korean

### Language Electives (language courses that may be counted for concentration credit)

Chinese	
CHIN 0700 & CHIN 0800	Advanced Modern Chinese II and Advanced Modern Chinese II (either course may be taken for one semester)
CHIN 0920D	Business Chinese
CHIN 0920E	Two Sides of the Coin: Advanced Chinese Conversation
CHIN 1010	Stories from the Chinese Empire: Scholars, Demons and Swindlers
CHIN 1040	Modern Chinese Literature
Japanese	
JAPN 0700 & JAPN 0800	Advanced Japanese II and Advanced Japanese II (either course may be taken for one semester)
JAPN 0910A	Classical Japanese
JAPN 0910C	Japanese Linguistics
JAPN 1310	Japanese Linguistics: Communication and Understanding Utterances
Korean	
KREA 0910B	Media Korean

### Electives

The concentration requires that students complete a total of eight electives tied to their course of study, which may be defined in linguistic, chronological, thematic, or cultural terms. Students should choose their courses with the following three requirements in mind.

- **EAST Requirement:** At least three of the eight electives must be East Asian Studies (EAST) courses at any level; Chinese (CHIN), Japanese (JAPN), or Korean (KREA) courses at the 1000-level and above may also count toward this requirement.
- **Breadth Requirement:** At least one of the eight electives must focus on an East Asian country or culture other than those associated with the language the student is using to satisfy the concentration's language requirement. A concentrator studying Chinese, for example, must choose at least one course that focuses on Korea and/or Japan.
- **Senior Seminar Requirement:** At least one of the eight elective courses must be an advanced research seminar, taken in the senior year.

As is common for interdisciplinary concentrations, a wide range of courses, including many taught by faculty in other departments, may be counted toward the concentration. These include courses offered by East Asian Studies faculty, faculty with courtesy appointments in the Department, and courses with a significant focus on East Asia offered in such disciplines as American Studies, Art History, Economics, International Relations, and many others.

### Sample Electives offered by East Asian Studies

EAST 0500	Childhood and Culture in Japan <sup>2</sup>
EAST 0650	Language, Culture, and Society: Korea <sup>3</sup>
EAST 1030	Words on Things: Literature and Material Culture in Early Modern China <sup>1</sup>
EAST 1070	China Modern: An Introduction to the Literature of Twentieth-Century China <sup>1</sup>
EAST 1290	The Korea "Brand": Understanding KPop, Film, and Culture of the Two Koreas in the Global Context <sup>3</sup>

For additional elective choices, visit <http://brown.edu/academics/east-asian-studies/courses/more-course-offerings>.

- <sup>1</sup> China-centric
- <sup>2</sup> Japan-centric
- <sup>3</sup> Korea-centric
- <sup>4</sup> East Asia-centric

## Advanced Research Seminars

At least one of the eight elective courses must be an advanced research seminar, taken in the senior year. The research seminar will normally provide students with the opportunity to develop a project or paper focusing on one or more of their areas of inquiry within the concentration. Students are strongly encouraged to find ways to incorporate the use of Chinese, Japanese or Korean language materials in their research and learning in these courses. Courses falling into this category include the East Asian Studies 1950 series as well as designated seminars offered by faculty in such departments as History, Religious Studies, and Comparative Literature among others. The Department will provide a list of pre-approved advanced seminars every semester. Students wishing to add courses to that list must submit their requests in writing to the Director of Undergraduate Studies at the start of the semester.

### Sample advanced seminars offered by East Asian Studies

EAST 1951B	From Desktop to Stage: Drama and Performance in Late Imperial China	1
EAST 1950G	Market Economy, Popular Culture, and Mass Media in Contemporary China	1

## Honors

East Asian Studies offers qualified students, in their senior year, the opportunity to undertake a sustained research and writing project that, ideally, will result not merely in a long term paper, but in a piece of original scholarship. To enroll in the Honors Program, the student must be a senior East Asian Studies concentrator, with at least a high B average in concentration courses. Candidates for Honors are required to have developed a competence in an East Asian language sufficient to allow them to use East Asian language materials in carrying out their research. Students must also successfully obtain the support of at least two faculty members who will agree to serve as primary and secondary advisors for the thesis. Prospective writers submit a thesis prospectus, brief bibliography, and completed application forms (with signatures), ordinarily late in the student's six semester, to the Director of Undergraduate Studies, who provides the final permission to proceed. Synopses of successful thesis proposals will be distributed to Department faculty.

Thesis writers enroll in advisor-specific sections of the thesis-writing course EAST 1930 (Fall) and EAST 1940 (Spring), meet regularly with their advisors over the course of both semesters, and submit final versions of their theses to the Department in mid-April. Advisors and students are required to provide updates of their progress to the Director of Undergraduate Studies at regular intervals.

The completed thesis is evaluated for Honors by the thesis director and by a second reader. In case of a difference of judgment between the two readers, a third opinion may be sought. The awarding of Honors in East Asian Studies will occur only if the Honors Thesis receives a final grade of A. If an A is not received, the student will still receive academic credit for EAST 1930-1940. Students are notified in mid-May whether the Department has recommended the awarding of Honors. Copies of readers' comments are provided to the student.

All graduating concentrators will present the results of their senior theses in the department's Senior Project Forum. The Forum will usually take place at the end of the spring semester, but may also occur at the end of the fall semester to accommodate mid-year graduates.

## Double Concentrations

Students who are interested in developing a double concentration, including East Asian Studies as one of the two concentrations, should bear in mind that normally no more than two courses may be double-counted toward satisfying the course requirements of either of the two concentration programs involved.

## Study Abroad

Concentrators are strongly encouraged, but not required, to study in East Asia for one or two semesters during their undergraduate years. Course credits earned abroad are generally transferable to Brown. However, a maximum of three courses taken abroad, of genuine intellectual substance

and significantly related to East Asian Studies, may be considered for concentration credit.

## Summary of requirements:

- Language study through the level of 0600 or the equivalent of Chinese, Japanese, or Korean
- Eight elective courses
  - At least three of the eight must be East Asian Studies (EAST) courses at any level or Chinese (CHIN), Japanese (JAPN), or Korean (KREA) courses at the 1000-level and above
  - At least one of the eight electives must focus on an East Asian country or culture other than those associated with the language the student is using to satisfy the concentration's language requirement. A concentrator studying China, for example, would choose at least one course that focuses on Korea and/or Japan.
  - At least one of the eight must be an advanced research seminar, taken in the senior year.
- EAST 1930 (Senior Thesis, Semester 1)- EAST 1940 (Senior Thesis, Semester 2) for Honors candidates only

## Courses

### Chinese

#### CHIN 0100. Basic Chinese.

A year-long introduction to Standard Chinese (Mandarin). Speaking, reading, writing, and grammar. Five classroom meetings weekly. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of course work in CHIN 0200 covers the entire year and is recorded as the final grade for both semesters.

#### CHIN 0150. Advanced Beginning Chinese.

A year-long intensive course designed for students with some prior knowledge of Chinese. Designed to enhance listening, speaking, reading, and writing skills. Five classroom meetings weekly. Placement interview required. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in CHIN 0250 covers the entire year and is recorded as the final grade for both semesters.

#### CHIN 0200. Basic Chinese.

A year-long introduction to Standard Chinese (Mandarin). Speaking, reading, writing, and grammar. Five classroom meetings weekly. This is the second half of a year-long course. Students must have taken CHIN 0100 to receive credit for this course. The final grade for this course will become the final grade for CHIN 0100. If CHIN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

#### CHIN 0250. Advanced Beginning Chinese.

A year-long intensive course designed for students with some prior knowledge of Chinese. Designed to enhance listening, speaking, reading, and writing skills. Five classroom meetings weekly. Placement interview required. This is the second half of a year-long course. Students must have taken CHIN 0150 to receive credit for this course. The final grade for this course will become the final grade for CHIN 0150. If CHIN 0150 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

#### CHIN 0300. Intermediate Chinese.

An intermediate course in Standard Chinese designed to further communicative competence and to develop reading and writing skills. Five classroom meetings weekly. Prerequisite: CHIN 0200 or permission of instructor.

**CHIN 0350. Elementary to Intermediate Chinese for Advanced Beginners.**

This course is designed to enhance listening, speaking, reading, and writing skills for Chinese heritage students who have some prior knowledge of Chinese. Five classroom meetings weekly. Placement interview required.

**CHIN 0400. Intermediate Chinese.**

An intermediate course in Standard Chinese designed to further communicative competence and to develop reading and writing skills. Five classroom meetings weekly. Prerequisite: CHIN 0300 or permission of instructor.

**CHIN 0450. Advanced Chinese for Heritage Learners.**

This course is primarily designed for Chinese heritage students who have successfully completed CHIN 0350. If you have not taken CHIN0350, please contact the instructor for a proficiency evaluation. Upon completing this course, you can take CHIN 0700 or equivalent, i.e. courses that have a prerequisite of CHIN 0600. This is an advanced-level course offering comprehensive work on all four language skills, with a focus on developing your ability to use sophisticated grammatical structures, vocabulary, and improving your reading and speaking skills. Materials used in this course will include a textbook, supplementary articles, and video clips.

**CHIN 0500. Advanced Modern Chinese I.**

An advanced course designed to enable students to read authentic materials. Students enhance their listening, speaking, reading, and writing skills; improve their narrative and descriptive abilities; and learn to express abstract ideas both orally and in writing. Five classroom meetings weekly. Prerequisite: CHIN 0250 or CHIN 0400 or permission of instructor.

**CHIN 0600. Advanced Modern Chinese I.**

An advanced course designed to enable students to read authentic materials. Students enhance their listening, speaking, reading, and writing skills; improve their narrative and descriptive abilities; and learn to express abstract ideas both orally and in writing. Five classroom meetings weekly. Prerequisite: CHIN 0500 or permission of instructor.

**CHIN 0700. Advanced Modern Chinese II.**

This course is designed to enhance the Chinese proficiency of those who have taken Advanced Modern Chinese I (CHIN 0600) or the equivalent. All four language skills are emphasized through selected authentic materials. At the end of the year, students should be able to express their ideas with sophistication and nuance. Drills on complex sentence patterns will be conducted when necessary. Prerequisite: CHIN 0600 or permission of instructor.

**CHIN 0800. Advanced Modern Chinese II.**

See Advanced Modern Chinese II (CHIN 0700) for course description. Prerequisite: CHIN 0700 or permission of instructor.

**CHIN 0910A. Academic Chinese I.**

This course trains students to read texts in order to improve language skills and acquire the ability to do research in academic fields. Through reading and discussing literature, newspaper and magazine articles, and academic writings, students will gain a better understanding of traditional and modern China. Prerequisite: CHIN 0800 or permission of the instructor.

**CHIN 0910B. Introduction to Classical Chinese.**

This course aims to build on basic knowledge of reading Classical Chinese grammar, syntax, and vocabulary, and to catch a glimpse of ancient Chinese wisdom. The class will use modern Chinese (Mandarin) to discuss classical texts. Readings are original works of prose and poetry dating from the 2nd to 12th century. Prerequisite: CHIN 600. Instructor permission required.

**CHIN 0910C. Introduction to Modern Chinese Prose.**

Students will pursue their ability to appreciate and use various Chinese writing styles by reading and analyzing modern Chinese prose classics. Classes include lecture, discussion and group or individual presentations. By the end of the semester, students will be familiar with the development of modern Chinese prose, understand the language and meaning of each text, be comfortable with different writing styles and techniques, and have a deeper understanding of Chinese thought, society, and culture via the writers and their masterpieces. Conducted in Mandarin Chinese; designed for students with advanced language skills. Prerequisites: CHIN 0800 or the equivalent.

**CHIN 0920B. Classical Chinese.**

This course aims to build on basic knowledge of reading Classical Chinese grammar, syntax, and vocabulary. The class will use modern Chinese (Mandarin) to discuss classical texts. Readings are original works of prose and poetry dating from the 2nd to 12th century CE. Prerequisite: CHIN 0910B. Instructor permission required.

**CHIN 0920C. The Changing Face of China: Advanced Reading in Chinese Media.**

This course is designed to help students develop advanced reading proficiency and formal oral and writing communication skills. Students will listen and read up-to-date news, reports and commentaries from various Chinese media sources, such as TV broadcasts, newspapers, magazines, and websites. Through reading and discussion, students will gain a better understanding of a wide range of current issues in a rapidly changing China, including economics, politics, education and popular culture. Class format varies from lecture, discussion, debate, and group and/or individual presentations. Prerequisites: CHIN0800 or the equivalent.

**CHIN 0920D. Business Chinese.**

Business Chinese focuses on practical language skills that are most useful in business interactions in Chinese-speaking communities. Classroom activities are largely based on authentic documents and correspondence as well as a textbook. Through intensive practice in the listening, speaking, reading and writing of the Chinese language for business purposes, this course aims at enhancing students' linguistic knowledge in a business context. Classes are conducted in Chinese. Prerequisite: CHIN 0800 or instructor permission. Enrollment limited to 18.

**CHIN 0920E. Two Sides of the Coin: Advanced Chinese Conversation.**

Many of us know about the trolley scenario- would you kill one to save five? What do you think about organ trade- is it immoral for people to buy organs from the poor in order to save lives? What is your stance on the Affirmative Action? Did you know China has similar laws? The goal of this course is to develop your listening and speaking skills in Chinese by way of exploring morally debatable issues. Class materials will cover a broad range of topics and will not be limited to those unique to China. Prerequisite is CHIN0600 or equivalent.

**CHIN 0920G. Chinese Language in the Big Screen.**

This course is designed for advanced Chinese language students who have completed CHIN 0600 or equivalent. You will gain language and culture proficiency through studying different genres of movies that reflect Chinese history, social issues and Chinese people's values. The primary objective of this course is to further develop your language proficiency in meaningful and entertaining contexts. By conducting research into the films, creating video summary, and sharing your work with your fellow students, you will build up your interpretive and presentational skills. In place of a final written exam, you will be asked to produce a mini-film.

**CHIN 0920H. Chinese Language and Culture.**

This course is designed for advanced learners of Chinese to enhance their language proficiency, as well as to grasp essential skills to observe and appreciate Chinese culture from the perspective of language, especially through Chinese radicals, idioms, proverbs, taboos, verses, vernacular language and internet language. The teaching methods in this course include lecture, case studies, and heuristic approach etc. After taking this course, students are expected to have much deeper understanding of Chinese language and culture and be able to use the language in a near native and artistic way.

**CHIN 1010. Stories from the Chinese Empire: Scholars, Demons and Swindlers.**

This bilingual course introduces the culture and society of late imperial China by reading short stories, novels, prose essays between 1368 and 1911. To maintain students' language skills, the lecture is primary in mandarin aided by English explanation. Students can choose to complete the assignments in either English or Chinese. The course explores the interwoven spectacular fantasy and societal reality of the imperial China. A chronological exposure to different cultural practice and social structures is organized under three rubrics, namely, scholar-official as social elite; merchants and courtesans as mobile agents; and criminals and demons as outcast.

**CHIN 1040. Modern Chinese Literature.**

Introduces students to the most representative writers in 20th century China. Emphasizes textual and historical analyses. Major issues include Westernization, nationalism, revolution, class, gender, and literary innovations. Designated primarily as a literature course, rather than language class, and conducted entirely in Mandarin Chinese. Prerequisite: CHIN 0800. Instructor permission required.

**CHIN 1910. Independent Study.**

Reading materials for research in Chinese. Sections numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**CHIN 2450. Exchange Scholar Program.****East Asian Studies****EAST 0040. Foundations of Chinese Religions (RELS 0040).**

Interested students must register for RELS 0040.

**EAST 0100. Introduction to Buddhism (RELS 0100).**

Interested students must register for RELS 0100.

**EAST 0160. Buried History, Hidden Wonders: Discovering East Asian Archaeology (ARCH 0160).**

Interested students must register for ARCH 0160.

**EAST 0180. Japan: Nature, Ritual, and the Arts.**

This course is an introduction to Japanese culture and aesthetics as represented in pre-modern literature, drama, tea practices, landscape and the fine arts. Recurring themes include Japanese attitudes toward the natural world; traditional conceptions of beauty; and the function of ritual in artistic cultivation. The course is designed for students who have no previous exposure to Japanese studies at the college level; no prerequisites.

**EAST 0290E. Engaged Buddhism (RELS 0290E).**

Interested students must register for RELS 0290E.

**EAST 0350. Pop and Political: Modern Culture in Japan and the Koreas.**

This course introduces the modern cultures of Japan and Korea through an examination of events, artifacts, and cultural practices. With a broad understanding of culture as a general process of artistic and intellectual development, as a body of material artifacts, and as a social practice of ordinary life, we'll focus our attention on the implications of studying culture in relation to popular media and political activism. Topics covered will include: colonial fiction, the re-creation of tradition, the proletarian arts, postwar children's culture, the globalization of popular music, myth in the DPRK, *shoji* print culture, and East Asian activism.

**EAST 0380. Introduction to Premodern Japanese Literature.**

This course examines major works of Japanese literature from the 10th through the 19th century. We will read prose, poetry, and theater written for audiences ranging from the imperial court of the Heian Era to medieval Buddhist monks or the urban masses of the Tokugawa Era. We will discuss the socio-historical context of the works, and consider the religious, ideological and aesthetic trends that influenced their creation. Active participation will be an important factor in the evaluation of students. There is no prerequisite for this class, and no previous knowledge of film or Japanese language is required.

**EAST 0410. Introduction to East Asian Civilization: China (HIST 0410).**

Interested students must register for HIST 0410.

**EAST 0500. Childhood and Culture in Japan.**

This seminar offers students an interdisciplinary look at how children became central to social life in modern Japan. What set of historical and philosophical conditions made childhood newly visible in the late 19th century? How has the relationship between the marketplace and childhood evolved over the past hundred years? How have class, gender, ethnicity and sexuality inflected the ways childhood has been experienced? Students will analyze different cultural texts for and about children (early fairy tales, comic books, propaganda, film) in relation to critical essays drawn from a variety of disciplines.

**EAST 0530. Modern Korea: Politics, Culture, and Society.**

Korea has a long and rich history that often goes underappreciated in the U.S. and other parts of the world. At the same time, studying Korea provides a unique vantage point for understanding major processes in East Asia and the world, both in the past and the present. The aim of this introductory course is to use illuminating aspects of the Korean historical experience to set the path for an educational journey that encompasses not only learning about the Korean past, but also expanding our ability to approach cultural histories, as well as national cultures in general.

**EAST 0531. Complicating Korean History: Topics and Issues.**

Korea is known for its musicians, serene palaces, and North Korea. Under these ubiquitous stereotypes, however, it has an even more fascinating culture and history, punctuated by numerous invasions, colonialism, and division. In this inter-disciplinary survey course, we explore various facets of Korea North and South, from foundation myths to contemporary life and address Korean history broadly, examining key debates around origins, colonialism, and division. We move chronologically through major cultural, political, economic moments that inform Korean identity, arriving at the particulars of North and South Korea today, from daily life, gender, the diaspora, to KPop, and consider peninsular futurity.

**EAST 0532. Korean Controversies and Negotiations: Moving Beyond Colonial Origins of National Division.**

Covering the broad sweep of Korean modernity and contemporary history, this course will introduce and debate the most fundamental and contested issues in Korea today. In this theme-based course, students will have the opportunity to consider and debate these topics in an informed and balanced context which takes into account several perspectives of debate, through informed lectures and historical insights. These conversations will equip students to negotiate Korean identity and politics within a larger global context, beyond the Korean nation into the boardrooms of global corporate entities, the United Nations conference and other professional environments, outside the ivory tower.

**EAST 0533. Beyond Gangnam Style: Seoul, Dislocation, and the Search for Place.**

Seoul has become a celebrated cultural hub both within Asia and globally. However, underneath the glitter of modernity visible in the urban sprawl of Seoul's "Gangnam Style" are forgotten stories, stratified claims, and a tumultuous history covering 35 years of Japanese rule, a war, and the ongoing presence of 28,500 American troops. This course will take an interdisciplinary approach to Seoul incorporating history, urban culture, literature and visual media, and engage key concepts informing the burgeoning field of Korean studies. Attention will be given to contestations over space, IT infrastructure, architectural spaces, and the emergence of new subjectivities.

**EAST 0550. K-Pop: History, Culture, Politics.**

This is a class for those who want to use popular music as a tool to more deeply understand contemporary Korea. We will address Korean popular music from the turn of the twentieth century to the latest K-pop hits, while noting the ways that the changing musical tastes of Korean people are linked to historical shifts on the Korean peninsula as well as music and performance related trends that influenced Korea from abroad. Class will use abundant music and video clips, incorporate discussions based on readings, and require student analysis that connects popular music to its context.

**EAST 0610A. The Far Side of the Old World: Perspectives on Chinese Culture (COLT 0610A).**

Interested students must register for COLT 0610A.

**EAST 0620. Literature, Science, and Technology in China.**

This course explores relations between Chinese science, technical know-how, and literary writings in early modern and contemporary China. The course encourages students to re-define science and technology in the context of China's changing Confucian education system, booming market economy, and the multiethnic empire and explores the impact of imperial legacy in scientific imagination in contemporary China. By drawing on materials from local museums as well as latest Chinese science fictions, we will investigate the ways in which knowledge about medicine, handicrafts, and foreign lands transformed the form and content of novels and belle-lettres.

**EAST 0650. Language, Culture, and Society: Korea.**

This course aims to look into the interaction between language, culture and society. It will specifically examine the role of language in myriads of social contexts with special focus on Korean society. Topics to be covered in this course include language contact (e.g. with Japan and China), language variation (e.g. regional, generational, gender), language and identity, language and social class, language perceptions and attitudes, language education in a social context, and so on. Knowledge of the Korean language is preferred but not required.

**EAST 0710U. Leaves of Words: A Survey of Japanese Literature (COLT 0710U).**

Interested students must register for COLT 0710U.

**EAST 0800. Off the Beaten Path: A Survey of Modern Japanese Literature.**

An introduction to major and minor works of Japanese literature produced during the Japanese Empire as well as in post-WWII Japan. Covered writers include canonical novelists such as Tanizaki Junichiro, Kawabata Yasunari, and Oe Kenzaburo, as well as writers lesser known outside of Japan today, including women, queers, revolutionaries and colonial/resident Koreans.

**EAST 0910D. Two Virgins in the Attic: Advanced Japanese Readings in Canonical and Popular Literature (JAPN0910D).**

Interested students must register for JAPN 0910D.

**EAST 0950A. Turning Japanese: Constructing Nation, Race and Culture in Modern Japan.**

This first year seminar focuses on Japan's experiences with historical processes and concepts which have transformed the modern world. These include the creation of the nation as the fundamental structure for social and political organization, as well as the evolution and implications of beliefs and practices associated with race, culture and tradition. Participants will work with primary sources and scholarly analysis from diverse disciplinary perspectives. Enrollment limited to 19 first year students.

**EAST 0950B. The Floating World.**

An exploration of selected literary, artistic, and religious works with an eye to understanding Japanese culture and thought of the early modern period (1600-1868). Materials include merchant tracts, samurai codes, Buddhist sermons, Confucian disquisitions, woodblock prints, drama, and fiction. No prerequisites. Enrollment limited to 19 first year students.

**EAST 0950C. Reading China: Texts and Contexts.**

An introduction to Chinese lit., focusing on its translation and circulation outside of China from the 17th c. to the present. A variety of texts are examined, considering the various ways translation shapes Western conceptions of China. Begins by discussing how Chinese lit. has been construed as particularly difficult to translate, explores ways in which the translation and circulation of early Chinese classics was animated by interests in ancient Chinese wisdom, and considers the recent emergence of a global notion of Chinese literature and culture. Concludes by comparing histories: translations of Chinese drama into European languages and their adaptation within China. Enrollment limited to 19 first year students.

**EAST 1010. From Basho to Banana: Four Centuries of Japanese Literature.**

This course explores classic writers of Japanese literature written between 1600 and 2000. We will focus on both the specificity of Japanese genre as well as the historical, social relations that have shaped them-- Edo merchant culture, modernism, the avant-garde, mass culture and postmodernism, among others. Writers covered will include Ihara Saikaku, Jippensha Ikku, Higuchi Ichiyo, Natsume Soseki, Akutagawa Ryunosuke, Tanizaki Junichiro and Yoshimoto Banana. No prerequisites.

**EAST 1030. Words on Things: Literature and Material Culture in Early Modern China.**

This course examines Chinese literary representation of artifacts written between 1000 to 1900 CE. Our discussion will highlight international trade and the transforming science and technology in early modern China. The course aims to guide students to conduct inter-artistic analysis as a means to decipher the political, religious, gendered, and technical significance embedded in literary representation of material objects. To emphasize a comparative perspective, we will also draw on scholarship outside of the field of Chinese literature. We will explore artifacts in the following categories: illustration, painting and calligraphy, seals, ceramics, furniture, and textile.

**EAST 1050. The Chinese Novel.**

The purpose of this course is to help us see how the Chinese novel took shape from popular sources, such as storytelling and drama, how the novel drew on history as well as legend, and how its authors and editors express a distinct world view. The class will cover the "masterworks" of the Chinese novel. Through intensive reading, students can explore notions of the hero and heroism, moral action and, more broadly, history and literature from a comparative perspective. All readings are in English translation. Limited to 20 freshmen and sophomores, or by instructor permission.

**EAST 1060. Manly Men, Womanly Women, and Other Variations: The Quest for Becoming in Pre-Modern Chinese Lit.**

In this, we will study representative works of Chinese poetry, historical narrative, fiction, and drama, translated into English, in order to understand how Chinese people through the ages approached the task of defining what it means to be human— what constitutes an ideal person, how the ideal changes with the person's sex, and the degree to which individuals shape and are shaped by the collective they live in. We will read these texts as works of art while also using them to compose a picture of Chinese society as it evolved from the earliest times to the end of the Imperial era.

**EAST 1070. China Modern: An Introduction to the Literature of Twentieth-Century China.**

A general introduction to modern and contemporary Chinese literature from the May Fourth Movement to contemporary Taiwan and the People's Republic of China. Emphasizes reading of literary works in relation to topics such as cultural tradition, modernity, nationalism, revolution, class, gender, region, cultural commodification, and literary innovations. Readings in English. No previous knowledge of Chinese required.

**EAST 1090. Translating Korean: Fiction, Poetry & Film.**

This class explores the theory and practice of translation in the context of Korean cultural production. Each week we shall grapple with a particular issue in translation studies in dialogue with a Korean-language text. By the end of this course students should be able to locate the tools necessary to carry out translations from Korean to English, to demonstrate an understanding of translation as a craft with its own standards, responsibilities, and complexities, and to have completed a significant translation project themselves. Learners of the Korean language who have completed Korean 600 as well as native speakers of Korean are welcome.

**EAST 1100. Korean Culture and Film.**

This course aims to introduce and explore various aspects of Korean history, culture and society. Students are expected to develop a comprehensive understanding of Korean culture by examining contemporary films that pertain to issues such as national identity, history, international relations, religion, Korean life style, and family life. Enrollment limited to 20.

**EAST 1120K. Skeptical Traditions East and West (CLAS 1120K).**

Interested students must register for CLAS 1120K.

**EAST 1170. Women's Literature in Japan and Korea.**

This course focuses on Japanese and Korean women's literature from the modern period, giving particular attention to the historical issues and the narrative strategies that play out in celebrated works of women's fiction. The goal of the class is to deepen our understanding of the universal and particular aspects of women's writing in Japan and Korea and at the same time to learn an idiom with which to talk about literary form. Previous coursework in East Asian Studies or Literary Studies is suggested but not required. Instructor permission required.

**EAST 1190. Literature and Science in Early Modern China.**

This course explores the relations between Chinese literature and the studies of nature and technological know-how from 1368 to 1911. Introducing recent insight in the history of science and technology, the course challenges students to re-define science in the context of the changing Confucian curriculum, the booming market economy, and the multiethnic empire. The course investigates the ways in which the form and content of poetry, novel, and essays transformed because of their appropriation of knowledge about medicine, handicraft, and foreign lands. Topics include: encyclopedia for merchants, carpenters' spell, autofiction of Confucian engineers, novel medicine, and so on.

**EAST 1202E. Extreme Asian Cinema: Contemporary Genre Cinemas in an East Asian Context (MCM 1202E).**

Interested students must register for MCM 1202E.

**EAST 1210. Imagining Modern China.**

This course introduces students to the literary and cultural milestones in twentieth-century China, highlighting the capacity of literature as a form of historical engagement and ethical reasoning. Featuring masterpieces by mainland Chinese as well as Sinophone and ethnic minority writers, and translation works and critically acclaimed films, the course unpacks the multivalence of Chinese literary and cultural modernity as well as that of the very term "China." Issues for discussion include translation and intercultural encounters, nationalism, tradition, gender, the revolutionary legacy, cultural identity, diaspora, and literary citizenship. All readings and discussions are in English.

**EAST 1230. Edo Woodblock Printing.**

This course provides an introduction to Japanese art and cultural history through a survey of woodblock print media from its emergence in the mid-17th century to the end of the early modern era. Topics for consideration include East Asian pictorial traditions, the publishing industry, censorship, social identity, and specialist print communities. The course will track the development of Japanese woodblock printing from its origins in printed books and monochrome prints, and the transition to hand-coloring and multi-colored printing that facilitated a highly nuanced media form, via the publishing industry's shifting relationship with the authorities, and influences from China and the West.

**EAST 1270. China Through the Lens: History, Cinema, and Critical Discourse.**

This is a critical introduction to the history of mainland Chinese film. It focuses on three dimensions of cinematic practice: the historical context of film productions, the specific context/form of each film, and the critical reception of Chinese films in film studies. Important themes such as nation, visual modernity, cinematic narrative, and commercialism will be studied across the three dimensions.

**EAST 1280. Introduction to Japanese Cinema.**

This course examines the cinema of Japan, from the 1930s to the present. Students will learn to "read" film as a visual text through a study of the basics of film editing and shot composition and will gain an understanding of cinema as art form, commercial product, and ideological tool through selected articles on film theory and published analyses of the assigned films. In addition, we will place the films within their specific context through a study of Japanese history, religious thought, and cultural trends.

**EAST 1290. The Korea "Brand": Understanding KPop, Film, and Culture of the Two Koreas in the Global Context.**

The global media has recently showcased two newsworthy events related to Korea: BTS at the 2018 BMAs, and the Inter-Korea Summit. This course examines the arrival of "Korea" globally, from the West's fascination with the North Korean nuclear crises, to the hype around KPop, KFilm, cosmetics, food, and eSports. We will question the fascination with NK in US media outlets, versus its treatment in SK media. The ways in which the particular, local, and authentic, within Korean cultural production negotiates the global market is of particular interest.

**EAST 1291. Korean Film and Culture: The Appeal of Korean Film.**

This introductory course offers an overview of Korean film production from its colonial beginnings to the present, linking film with major historical, political and cultural events or shifts over the past century. Topically organized, the course will explore issues of cultural identity in the ways that the domestic movie industry has interacted with the foreign filmic audience. Focusing on how film narratives can influence (rather than reflect) social reality, we will analyze the imagination and construction of national identity and cultural tradition (and its critique) across these films.

**EAST 1292. Asia Extreme: Beauty and Violence in Korean Media.**

Korean films are often identifiable within two distinct tropes – the beautiful, tranquil Orient and a violent, frenetic hyper-modernity. Koreans, however, grapple with identifying themselves and their modern experiences differently beyond how the international community and the "West" sees them – as the exotic "East." Seeking to understand and complicate this dichotomy, we will explore how Korea has struggled to hone and complicate national identity (their critique, their futurities) through film, and examine how Korea has been struggling since the 1990s to overcome the national in the face of globalization and cosmopolitanism to address the local and the liminal.

**EAST 1370. Performances in the Asias (TAPS 1270).**

Interested students must register for TAPS 1270.

**EAST 1400. The Floating World: Early Modern Japanese Culture.**

This course treats major trends in Japanese thought and culture of the Tokugawa period (1600-1868), including debates among Confucian scholars; merchant culture; samurai ethics; the popularization of Buddhism; and the rise of nativism in the late period. Emphasis is on reading and analysis of primary texts in translation. Required: a course in East Asian culture or religion. Recommended but not required: RELS 0120. Enrollment limited to 20.

**EAST 1410N. Lost in Translation: The Adaptation of Literature to Film in Japan (COLT 1410N).**

Interested students must register for COLT 1410N.

**EAST 1415A. Classical Daoist Thought (RELS 1415A).**

Interested students must register for RELS 1415A.

**EAST 1420. The Confucian Mind.**

This course explores the Neo-Confucian tradition, a pervasive influence in the intellectual, educational, and political life of China, Korea, and Japan from late medieval through early modern times. Emphasis is on conceptions of the mind and their implications for moral cultivation and social action; the legacy of Confucian values in modern East Asia may also be considered. Readings are primary texts in translation and selected secondary works; the format is primarily discussion. Recommended prerequisite: RELS 0040. Not open to first year students. Enrollment limited to 20.

**EAST 1430. Classics of East Asian Buddhism (RELS 1430).**

Interested students must register for RELS 1430.

**EAST 1430C. Classical Japanese Poetry (COLT 1430C).**

Interested students must register for COLT 1430C.

**EAST 1430T. Leaves of Words: Japanese Poetry and Poetics (COLT 1430T).**

Interested students must register for COLT 1430T.

**EAST 1440. Themes in Japanese Buddhism: Original Enlightenment (RELS 1440).**

Interested students must register for RELS 1440.

**EAST 1490. Word for Word: Linguistic Principles in Chinese-English Translation.**

English has tense, Chinese has aspect; English has inflection and conjugation, and Chinese uses word order and function words to sort out syntactic structures. This course will explore and bridge such great differences between the two languages through linguistic readings and translation exercises.

Prerequisite: two years of Chinese study or the equivalent proficiency

**EAST 1500. Returnees in China's Modernization.**

This course examines the impact on contemporary China of returnees, people who having left China to study abroad have now returned home and become reintegrated into society. Focusing on a series of in-depth studies of returnees who have carved out professional identities in the commercial world, the state, and civil society. The returnee experience will be examined from 2 angles: the manner by which contemporary returnees negotiate Chinese tradition and Western learning, and the differences between this cohort's experience and that of previous generations of returnees in China's now century and a half long period of modernization.

**EAST 1510. Chinese: A History of the Language.**

This course traces the historical evolution of modern Chinese, commonly known as Mandarin. We will examine the uniqueness of Chinese characters, and explore their relationship to other features of the language, including word formation, phonology, grammar, and dialects. The goal will be to understand the manner by which the written script has become so central to the development of Chinese civilization.

**EAST 1510A. China's Late Empires (HIST 1510A).**

Interested students must register for HIST 1510A.

**EAST 1530. Modern Korea (HIST 1530).**

Interested students must register for HIST 1530.

**EAST 1540. Power, Profit, and Pillage: The Rise and Fall of Trading Kingdoms in Asia (ANTH 1540).**

Interested students must register for ANTH 1540.

**EAST 1700. Global Korea: Modernity, Nation, and Belonging.**

In this course we will explore important issues in the study of contemporary Korean society and ask how those themes can help us to better understand processes of globalization in East Asia and beyond. Although the Koreas are relatively small countries in Asia, their history of colonialism, the Korean War, coming of age in the Cold War, and struggling to rise to the top of the global stage makes them a productive region of the world for thinking about themes such as globalization, nationalism, belonging and modernity. We will look at issues such as the Korean diaspora, immigration, plastic surgery, and the "Korean Wave" of film, TV and music.

**EAST 1701. Transnational Koreans: Gender, Family, and Sexuality.**

From an economic basket case in 1963 to a successful producer of global cultural products such as Samsung phones and the "Korean Wave," South Korea has become the envy of many developing nations. What are the gender and sexual politics that undergird this neoliberal success story? Utilizing the analytical lens of "gender," "sexuality," and "family," this course will confront and interrogate the hypermasculine Korean state and its hetero-gendering of Korean citizenship by examining issues ranging from the cosmetic surgery boom for women and military conscription for men to the ongoing controversy around "comfort women" (military sex slaves for the Japanese imperial army).

**EAST 1810X. Mirror for the Romantic: *The Tale of the Gengi and The Story of the Stone* (COLT 1810X).**

Interested students must register for COLT 1810X.

**EAST 1811L. Travel and Tourism through the Ages (COLT 1811L).**

Interested students must register for COLT 1811L.

**EAST 1880A. Lao Tzu and Huai-nan Tzu.**

This seminar will approach early Taoist thought through the study of important essays from the Han dynasty compendium, the *Huai-nan Tzu* and will discuss the historical and philosophical origins of Lao Tzu's *Tao te ching*, heretofore acknowledged as the foundational text of the Taoist tradition.

**EAST 1880C. Zen Meditation in China, Korea, and Japan.**

An intensive study of the origin and development of Zen Meditation in China, Korea and Japan featuring historical origins in Indian Mahayana Buddhism and Chinese Daoism. Historical and social contextualization will be balanced by first-person investigations. Both kōan and silent illumination styles will be studied in depth. Weekly seminars will study representative texts in translation; labs will experiment with meditation techniques directly drawn from the readings. Students MUST register for the lecture section and a lab. Prerequisites: RELS 0100, RELS 0500, UNIV 0540; or instructor's permission.

**EAST 1880D. Early Daoist Syncretism: Zhuang Zi and Huainan Zi.**

The final phase of the classical Daoist tradition has been called "syncretist" by Graham, "Huang-Lao" by Lin. It is the version of Daoism carried into the Han dynasty and the one that transmitted the tradition's earlier works. Casting a broad net we will examine a variety of works from this critical phase including the "Techniques of the Mind" texts in the *Guarzi* collection, the so-called "Huang-Lao" silk manuscripts from the Han tomb at Mawangdui, certain chapters of the *Lushi chunqin*, and selections from the *Zhuangzi* and *Huainanzi*. We will examine the ways in which cosmology, self-cultivation, and political thought coalesce in these works.

**EAST 1910. Independent Study.**

Sections numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**EAST 1930. Reading and Writing of the Honors Thesis.**

Prior admission to honors candidacy required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**EAST 1940. Reading and Writing of the Honors Thesis.**

Prior admission to honors candidacy required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**EAST 1940A. Crafting Early Modern China: Handicraft, Witchcraft and Statecraft.**

This course examines how Chinese cultural industry was shaped by socio-political institutions and religious practice between 1400 and 1900 CE. The course highlights the concept of craft, broadly understood as the ways of making artifacts and building social community by using environmental resources and through micro-political negotiations in everyday life. The course aims to equip students in ways to decipher the political, religious and gendered significance embedded in cultural products, including literature and decorative arts. We will explore artifacts from the following categories: literary illustration, painting and calligraphy, seals, ceramics, furniture, and textiles. Prerequisites: None.

**EAST 1950B. Chinese Women, Gender and Feminism from Historical and Transnational Perspectives.**

This seminar course is designed to critically re-evaluate (re)presentations of Chinese women, gender, and feminism in historical, literary, and academic discourses. It examines a diverse body of texts produced through different historical periods and in different geopolitical locations. It emphasizes gender as both a historical construct(s) among competing discourses and as a material process of individual embodiment and disembodiment. The goal of the course is to help advanced students understand Chinese history from a distinctly gendered perspective, to recognize women's roles in history and writing, and to develop a reflective, cross-cultural approach to gender, politics, and the self.

**EAST 1950G. Market Economy, Popular Culture, and Mass Media in Contemporary China.**

Course focuses on mainland Chinese cultural and media production since the mid 1980's, when China began transforming itself culturally and economically into a capitalist society with socialist characteristics. Traditional values, socialist legacy, commercial forces, and globalization have all played significant roles in the ongoing transformation. The goal of the course is to examine the complex interactions among diverse historical forces in a rapidly changing China. Course taught in Mandarin Chinese.

**EAST 1950H. Translating Japanese: Short Fiction, Poetry, Film and Manga.**

This seminar/workshop discusses a broad range of narrative arts produced over the past 100 years in Japan, and practices the art of translating them. Drawing rigor from the field of linguistics and translation theory, we shall make central to our effort of analyzing Japanese cultural productions an attentiveness to the historicity of language and a self-consciousness of our roles as cultural interpreters. While the course will focus on mid-20th century Japanese short fiction, we will also work on poetry, music, manga, animation, and film, depending on the interests of enrolled students. Pre-requisites: JAPN 0600 or equivalent. Instructor permission required.

**EAST 1950I. Revolution and Culture, East Asia and Beyond.**

This seminar investigates cultural practices enacted with the aim of social change. Topics include the Soviet avant-garde, race and the American cultural front, gender and proletarian literature in Japan and colonial Korea, as well as issues of propaganda and struggle in the DPRK and China. Instructor permission required.

**EAST 1950J. The Chinese Story, Its Authors and Readers.**

A study of the Chinese story in its social and historical context. The seminar will survey the broad story stereotypes and consider their earlier sources in the classical tale, storytelling, drama, and ritual. All readings are in English translation.

**EAST 1950N. The Love Letter, Fiction and Desire.**

A study of the art of the love letter in China of the 16th to 18th centuries. The circulation of letter-writing manuals fueled the rise of letter fiction in China, as it did in Europe in the same period. The seminar will explore how desire serves as a motive for writing to someone far away, an element of the plot, and an end in itself, in comparative and theoretical perspectives. All readings are in English. Enrollment limited to 20.

**EAST 1950O. The Art of Dissent.**

This seminar investigates the relationship between activism and art in early modern and 20th century Japan and Korea. Historical topics to be discussed in relation to works of fiction, biography, poetry, film and graphic art include the Freedom and People's Rights Movement, Japanese anarchism, pre-WWI communism, feminism, the Kwangju Uprising and the Minjung Munhak Movement.

**EAST 1950P. Attachment to Objects in Chinese Literature.**

A seminar investigating interactions between objects and literary composition in China of the 12th to 16th century, exploring 3 core issues: 1st, what do writers about objects reveal about notions of literary art and artifice? 2nd, in what ways are material artifacts endowed with aesthetic and personal meaning? 3rd, what literary and extra-literary factors shaped exchanges of poetry and gift-giving as linked forms of social intercourse? Readings in English translation. Instructor permission required.

**EAST 1950Q. Early Chinese Poetry.**

A survey of the evolution of major forms of Chinese lyric poetry beginning with the Shijing (Book of Songs), the breakthrough to 5-character verse in the Han Dynasty, landscape (shanshui) and field and garden (tianyuan) poetry of the 6 Dynasties, and the flowering of the shi form during the Tang Dynasty. Readings will be in Chinese, discussions in English. Previous study of classical Chinese or permission of the instructor required.

**EAST 1950U. South Korean Cinema: From Golden Age to Korean Wave.**

This seminar explores the cinema of South Korea, proceeding chronologically and thematically, interrogating the key problematics of gender and genre. We will think about cinema's role—as a medium for visual storytelling and as a site for producing cultural norms and values—in assessing the consequences of historical events and in helping to construct official histories. Across films from Korean cinema's "golden age" (1950's and 60') to post-authoritarian realist cinema to the contemporary era of globalized, transnational genre films, we will map the questions, themes, and debates on the formation and effects of South Korea's cinematic imaginary of nation. Enrollment limited to 20 juniors and seniors.

**EAST 1950V. Contemporary Film and Media Cultures in East Asia.**

This course visits postwar film and television cultures in East Asia as a part of a larger narrative of contemporary media production and consumption. How can thinking about films' relationship with other media enhance our understanding of contemporary popular culture? How does it help us re-imagine narrative issues such as textuality, production, and representation? How does understanding the rich contexts of audience interaction with media affect our approaches to reading and meaning-making? To explore these questions, we will consider postwar Chinese and Japanese films, popular fiction, literature, television dramas, as well as manga/anime.

**EAST 1950X. Queer Japan: Culture, History and Sexuality.**

This seminar investigates cultural practices enacted by Japanese gays and lesbians, or otherwise related to same-sex attraction. How have sexual identities traditionally been constructed in Japan, and how has the modern period transformed them? How has same-sex sexuality become figured in the Japanese art, literature and popular culture of the 20th century; and how have the forces of a global LGBT culture interacted with the specific experiences of a same-sex community in Japan? This class explores questions about queer history, writing and cultural practice by looking at particular moments in the Japanese past and present.

**EAST 1950Y. The Many Faces of Chinese Opera.**

"Chinese opera" denotes several hundred regional variations of a performance art form that comprises sung arias with musical accompaniment, spoken dialogue, stylized movements, and elaborate costumes and make-up. Originating in the elite leisure spaces of early modern China, the best known versions of this art form are Peking opera and Kun opera. We will examine drama texts from the Yuan dynasty to the present, learn about the aesthetics and politics of these textual and performance traditions, and consider theater culture within its social, economic, and historical contexts. Prerequisite: Previous study of literature or theater at the college level.

**EAST 1951B. From Desktop to Stage: Drama and Performance in Late Imperial China.**

This course examines the multiple social and aesthetic functions of late imperial Chinese theatre between 1368 and 1840: theatre as lyrical self-expression, political action, ideological propaganda, and/or religious ritual. Close examination of translated plays and their sociohistoric contexts are combined with multimedial approaches that explore woodblock illustration, stage adaptation, and film related to the selected plays. The course covers topics that range from literary masterpieces, theatrical training, props and costumes, regional theatres, to women's ballads. Prerequisites: Some knowledge of Chinese history is preferred but not mandated.

**EAST 1951C. Picturing Korea: History and Memory in South Korean Cinema.**

South Korean films have recently shown a thematic preoccupation with the nation's tumultuous history by presenting diverse stories of past event and experience. They have also rendered different ways to address the issues related to important social developments and cultural phenomena. The aim of this seminar is to think about cinema's role as a medium for visual storytelling and as a site for producing historical imaginations. Prior coursework on film and media and/or the history of East Asia is required, and students are expected to have a firm grounding in the methods of critical reading, textual analysis, and scholarly argumentation.

**EAST 1951D. The Two Koreas, 1945-Present.**

This seminar examines the Cold War in North and South Korea through literature, music, and film. How do aesthetic works explore this historical trauma and ideological rift? Beginning with the major historical writings on the formation of two Koreas, we will look at shifting cultural discourses in postwar East Asia through key junctures. In particular, we will focus on Korean responses to the legacy of Japanese colonialism, industries of popular culture, and memories of ideological war. In the study of Cold War divisions, we will also explore the possibilities of inter-cultural dialogues and regional reintegration.

**EAST 1951E. The Making of Cold War East Asia.**

This seminar explores the ambitions, anxieties and mutual images embraced by citizens and policy makers in East Asia in the aftermath of Japan's defeat in 1945, and during the long Cold War that followed. We will examine the roles the U.S. and the U.S.S.R. played in shaping the region's ideological and geo-political landscapes, mostly in the 1950s and '60s, but our attention will also be on the experiences and perspectives of Chinese, Koreans, Japanese and others who worked either to preserve some semblance of the old order, or to abandon it in favor of new cultural, economic and political agendas.

**EAST 1990. Senior Reading and Research: Selected Topics.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**EAST 2450. Exchange Scholar Program.****EAST XLIST. Courses of Interest to Concentrators.****Fall 2020**

East Asian Studies is a highly interdisciplinary concentration. The following courses in other departments can be taken for concentration credit. Please check the listing of the appropriate department for the time and location of each course.

**Religious Studies**

RELS 1440A Themes in Japanese Buddhism

## Japanese

**JAPN 0100. Basic Japanese.**

Introduction to Japanese language. Emphasizes the attainment of good spoken control of Japanese and develops a foundation of literacy. No prerequisites. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in JAPN 0200 covers the entire year and is recorded as the final grade for both semesters. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

**JAPN 0150. Advanced Beginning Japanese.**

Designed for those who have had high-school Japanese or other Japanese language experience. An opportunity to organize previous knowledge of Japanese and develop a firm basis of spoken and written Japanese. Prerequisite: Reading and writing knowledge of Hiragana, Katakana, and some Kanji. Placement test required. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in JAPN 0250 covers the entire year and is recorded as the final grade for both semesters. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

**JAPN 0200. Basic Japanese.**

Introduction to Japanese language. Emphasizes the attainment of good spoken control of Japanese and develops a foundation of literacy. This is the second half of a year-long course. Students must have taken JAPN 0100 to receive credit for this course. The final grade for this course will become the final grade for JAPN 0100. If JAPN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

**JAPN 0250. Advanced Beginning Japanese.**

Designed for those who have had high-school Japanese or other Japanese language experience. An opportunity to organize previous knowledge of Japanese and develop a firm basis of spoken and written Japanese. Prerequisite: Reading and writing knowledge of Hiragana, Katakana and some Kanji. Placement test required. This is the second half of a year-long course. Students must have taken JAPN 0150 to receive credit for this course. The final grade for this course will become the final grade for JAPN 0150. If JAPN 0150 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

**JAPN 0300. Intermediate Japanese.**

Further practice of patterns and structures of the language. Readings are introduced on aspects of Japanese culture and society to develop reading and writing skills, enhance vocabulary, and provide points of departure for conversation in Japanese. Prerequisite: JAPN 0200 or equivalent. The East Asian Studies department wishes to provide language instruction to all interested students. If you are unable to register for this course due to enrollment limits but are dedicated to learning Japanese, please contact the instructor via email.

**JAPN 0400. Intermediate Japanese.**

See Intermediate Japanese (JAPN 0300) for course description. Prerequisite: JAPN 0300 or equivalent. Enrollment limited to 18.

**JAPN 0500. Advanced Japanese I.**

Continued practice in reading, writing, and speaking. Emphasizes the development of reading proficiency and speaking in cultural contexts. Students read actual articles and selections from Japanese newspapers. Course includes translation, with writing and discussion in Japanese. Films and video tapes are shown as supplementary materials. Prerequisite: JAPN 0400 or equivalent.

**JAPN 0600. Advanced Japanese I.**

See Advanced Japanese I (JAPN 0500) for course description.

**JAPN 0700. Advanced Japanese II.**

Reading of articles from Japan's press with discussion in Japanese. Focuses on explanations and drills on the fine points in grammar and vocabulary as well as on the practice of writing in various styles. Movies and video tapes are used as supplementary materials. Prerequisite: JAPN 0600 or equivalent.

**JAPN 0800. Advanced Japanese II.**

See Advanced Japanese II (JAPN 0700) for course description.

**JAPN 0910A. Classical Japanese.**

This is an introductory course to pre-modern Japanese. It will explore the lifestyle and philosophy of samurai in 17th century Japan through reading the book, *Gorin no Sho*. The book comprises Miyamoto Musashi's thoughts on swordplay, winning, and mind training. The course includes reading background information in English and viewing films and dramas. Enrollment limited to 20.

**JAPN 0910B. Japanese Cities: Tokyo and Kyoto.**

The goal of this course is to develop the ability to use Japanese source materials for research in social sciences. Course covers lifestyles in two contrasting cities, Tokyo and Kyoto. Topics include topography, environmental issues, houses, urban life-styles, and natural habitation. We will ask questions: why houses are so compact in cities; why crows and boars pick on garbage, etc. Information sources are films, videos, and websites in addition to textbooks. Prerequisite: JAPN 0600 or equivalent. Enrollment limited to 20.

**JAPN 0910C. Japanese Linguistics.**

This course will provide a structural overview of the Japanese language. Students will learn how to develop skills for analyzing the language through looking at sounds, meaning, and grammar. Topics include linguistic analysis of various sentence structures that students often find difficult to use, learning to choose words and sentences in appropriate situations, looking at the relation between language and culture.

**JAPN 0910D. Two Virgins in the Attic: Advanced Japanese Readings in Canonical and Popular Literature.**

A traditional Japanese readings course with content both canonical and unconventional. It allows students with three years of Japanese to read from a diverse selection of 20th century Japanese novels, short stories and graphic novels. Our main focus will be on understanding the original Japanese, but some translation into English will be involved as well. In addition to selections from well-known modernists such as Natsume Soseki, Tanizaki Jun'ichi and Mishima Yukio, readings may also include works by Edogawa Rampo, Inagaki Taruho, Yoshiya Nobuko, Yamaji Ebine, Hoshi Shin'ichi, Murakami Ryu, and others to be determined by student interest. All readings in Japanese. Prerequisite: JAPN 0600 or instructor permission.

**JAPN 0910E. Advanced Reading for Research.**

This is an advanced reading course. Class activities include reading and translation of scholarly articles in the fields of students' interests, and of selected writings in humanities and social sciences in general or in broad perspectives. Readings include literary essays, fiction and short stories, articles from major newspapers, weekly and monthly journals/magazines. Prerequisite JAPN0600 Advanced Japanese II.

**JAPN 0920A. Business Japanese.**

Designed to teach post-advanced level Japanese language, with the focus on effective oral and written communication in business situations, this course emphasizes vocabulary building in the areas of business and economics, use of formal expressions, business writing, and conversation and presentation skills, as well as familiarizing students with Japanese corporate culture, protocol, and interpersonal relationships. Prerequisite: JAPN 0700 or equivalent. Enrollment limited to 20. Instructor permission required.

**JAPN 0920B. Modern Japanese Poetry.**

This course is an introduction to modern Japanese poetry, which includes pre-war and post-war poetic forms. We will explore issues of modernity and identity as well as poetics through a close examination of several poems each week. We will work on translations of the poems as part of the exercise of reading. The course includes reading background information in English. No prerequisites required.

**JAPN 1010. Readings in Contemporary Japanese Fiction.**

Introduces contemporary short stories and novellas by award winning writers published after 2000. Authors include Yoko Ogawa, Natsuo Kirino, Jiro Asada, Bin Konno. We will analyze why the great many readers are drawn into these literary works through socio cultural background of urban communities. Prerequisites: JAPN0700 or instructor permission.

**JAPN 1310. Japanese Linguistics: Communication and Understanding Utterances.**

Introduces a linguistic analysis of Japanese language to attain an overview of structure and a foundation for understanding how grammar relates to various modes of communication. Topics include discourse analysis, pragmatics, communicative intention, communication strategies, and intercultural communication gaps. Linguistic data is drawn from films and fiction. Prerequisite: basic knowledge of Japanese grammar, vocabulary, and linguistics. Enrollment limited to 20.

**JAPN 1910. Independent Study.**

Reading materials for research in Japanese. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**JAPN 1990. In Their Own Words: Advanced Readings in Japanese Literature and Criticism.**

This advanced Japanese literature class offers students the chance to read works of modern Japanese literature in dialogue with important works of criticism as we work our way through each decade of the 20th century. Readings will be in both Japanese and English. We will consider both the formal properties of fiction and the historical pressures of gender, ethnicity, class, imperialism and globalization. Authors vary depending on student interest, but often include writers such as Natsume Soseki, Abe Kobo, Ch'oe Chŏng-hŭi, Kono Taeko, and Kawakami Hiromi as well as celebrated Japanese critics such as Maeda Ai and Komori Yoichi.

**Korean****KREA 0100. Korean.**

Begins with an introduction to the Korean writing system (Hangul) and focuses on building communicative competence in modern Korean in the four language modalities (listening, speaking, reading, writing). Provides a foundation for later work in spoken and written Korean. Six classroom hours per week. No prerequisite. Enrollment limited to 18. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in KREA 0200 covers the entire year and is recorded as the final grade for both semesters.

**KREA 0200. Korean.**

Begins with an introduction to the Korean writing system (Hangul) and focuses on building communicative competence in modern Korean in the four language modalities (listening, speaking, reading, writing). Provides a foundation for later work in spoken and written Korean. Six classroom hours per week. Enrollment limited to 18. This is the second half of a year-long course. Students must have taken KREA 0100 to receive credit for this course. The final grade for this course will become the final grade for KREA 0100. If KREA 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

**KREA 0300. Intermediate Korean.**

An intermediate course in Korean designed to further communicative competence in spoken Korean and to provide additional reading practice in stylistically higher level materials that are progressively integrated into the given dialogues. Discussions on various aspects of Korean culture and society. Five classroom hours per week. Prerequisite: KREA 0200 or instructor permission.

**KREA 0400. Intermediate Korean.**

See Intermediate Korean (KREA 0300) for course description. Prerequisite: KREA 0100-0200 or equivalent.

**KREA 0500. Advanced Korean.**

Aims to help students develop an advanced level of communicative competence, with special focus on enhancing their reading comprehension, essay writing, and discourse (discussion and presentation) skills. Authentic reading materials from a variety of sources will be used to introduce various topics and issues pertaining to Korean society and culture, thus students' cultural understanding will also be enhanced. Prerequisite: KREA 0400 or equivalent or permission of instructor.

**KREA 0600. Advanced Korean.**

See Advanced Korean (KREA 0500) for course description. Prerequisite: KREA 0500 or equivalent or permission of instructor.

**KREA 0910B. Media Korean.**

Develop linguistic competence and deepen cultural understanding through exposure to a variety of media sources. Built on the Content-based Instruction model and Genre-based Approach. Discuss current Korean affairs and core issues of culture based on assigned materials. Develop reading and listening comprehension skills through pre-class activities, oral proficiency through in-class discussion and presentation, and writing proficiency through assigned essays writings, in addition to various integrative tasks. Tuesday classes will focus on comprehending the text and source materials, Thursday classes will focus on related tasks and activities. Enrollment limited to 20. Conducted entirely in Korean.

**KREA 0920A. Korean Culture and Society.**

Develops oral proficiency in Korean language through a variety of readings on Korean culture and society. By reading about and discussing important aspects and core issues of Korea, students enhance their speaking competence and cultural understanding. Prerequisites: KREA 0300 and 0400 or permission of instructor. Enrollment limited to: 15.

**KREA 0920B. Business Korean.**

For students who are interested in Korean culture in general and business culture in particular, and in improving their Korean language skills in a business context. The course not only focuses on business and economy-related words and expressions, but also on developing learners' confidence in business writing, conversation and presentations in Korean. Enrollment limited to 15. Prerequisite: KREA 0600 or instructor's permission.

**KREA 0920D. The Korean Vision: A Debate.**

The contemporary Korean society has undergone significant transformation in the past few decades, not only on the personal level, such as changes in personal life style and family structure, but also on the public level, such as economic development and political affairs. Various issues due to these changes have sparked a much heated debate within Korean society. This course will look into some of these major controversial issues with texts and media materials. Through this content-oriented advanced level language course, students will be able to improve their Korean language proficiency, as well as deepen their understanding of Korean culture and society. Prerequisite: KREA 0600. Enrollment limit to 18. Will replace current KREA 0900 course in schedule for Fall 2016.

**KREA 1910. Independent Study.**

Reading materials for research in Korean. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**KREA 1950W. Translating Korean: Fiction, Poetry, Film and K-Pop (EAST 1950W).**

Interested students must register for EAST 1950W.

## Economics

### Chair

Anna Aizer

Economics is a social science that analyzes how people, businesses, and governments make the best of limited resources, and how they make choices when faced with tradeoffs. Microeconomics studies these decision-makers and the markets in which they interact, while macroeconomics studies the workings of the economy as a whole. Economics provides tools for understanding public policy issues like inequality, poverty, education, health, taxes, trade, regulation, and the environment.

For additional information, please visit the department's website: <http://www.brown.edu/Departments/Economics/>

### Economics Concentration Requirements

Economics is the study of how individuals, businesses, and governments allocate resources to satisfy their objectives. The study of economics helps students understand markets, firms, financial organizations, and public debate about economic policy, including taxation, government expenditure, trade, globalization, health, and welfare. The concentration in Economics prepares students for graduate study in fields such as

business and law, for graduate study leading to teaching and research in economics, and can be a stepping-stone to employment in business, finance, non-profit, and government organizations. Students may choose the standard concentration or the business track, both of which have a corresponding professional track.

Students are required to begin with ECON 0110, an introductory course that stresses the economic problems of our society, and the vocabulary and principles of economic analysis. Intermediate level courses in microeconomics (ECON 1110 or ECON 1130), macroeconomics (ECON 1210), and econometrics (ECON 1620 followed by ECON 1629 or ECON 1630 ) round out the list of foundation courses for the concentration. Economics students must also fulfill a calculus requirement.

The economics department sponsors a number of concentration options. The most popular is the standard economics concentration, described below. Three additional concentration options are administered jointly with other departments and are described separately under their respective titles. They are the concentrations in applied mathematics–economics, mathematical–economics, and in computer science–economics. The first two are especially recommended for students interested in graduate study in economics.

The department offers many of the required courses in an interdepartmental concentration called Business, Entrepreneurship and Organizations (BEO). BEO is jointly run by the departments of economics and sociology, and the school of engineering. BEO has three possible "tracks," of which the business economics track is most closely related to economics. The BEO concentration and all of its current BEO track offerings remain in place through the class of 2023, after which it will be discontinued. Please contact the BEO administrator for more details, including information about advising in that concentration. A new Business Economics track within the economics concentration is now available to classes of 2020 and beyond. Please see the requirements for this track listed below.

### Standard Economics Concentration

ECON 0110	Principles of Economics <sup>1</sup>	1
MATH 0100 or ECON 0170	Introductory Calculus, Part II Essential Mathematics for Economics or a higher-level math course. <sup>2</sup>	1
ECON 1110 or ECON 1130	Intermediate Microeconomics Intermediate Microeconomics (Mathematical)	1
ECON 1210	Intermediate Macroeconomics	1
ECON 1620 or MATH 1620 or APMA 1650 or APMA 1655	Introduction to Econometrics Mathematical Statistics Statistical Inference I Statistical Inference I	1
ECON 1629 or ECON 1630	Applied Research Methods for Economists Mathematical Econometrics I	1
At least five additional 1000-level Economics courses. <sup>3</sup>		5
Total Credits		11

<sup>1</sup> Students who place out of ECON 0110 on the basis of qualifying scores on the AP, IB, or A-level exams must take an additional 1000-level course (6 instead of 5).

<sup>2</sup> Students can satisfy the mathematics requirement with qualifying scores on the AP, IB, or A-level exams (but not the math department's self placement exam). Note that certain advanced economics courses may impose additional math prerequisites.

<sup>3</sup> Students may use either ECON 1070 or ECON 1090 toward the concentration, but not both. Note that ECON 1960 (thesis course) and ECON 1970 (independent research) do not count toward the concentration.

### Business Economics Track

ECON 0110	Principles of Economics <sup>1</sup>	1
MATH 0100 or ECON 0170	Introductory Calculus, Part II <sup>2</sup> Essential Mathematics for Economics	1

or a higher level math course		
ECON 0710	Financial Accounting	1
ECON 1110	Intermediate Microeconomics	1
or ECON 1130	Intermediate Microeconomics (Mathematical)	
ECON 1210	Intermediate Macroeconomics	1
ECON 1460	Industrial Organization	1
ECON 1620	Introduction to Econometrics	1
or MATH 1620	Mathematical Statistics	
or APMA 1650	Statistical Inference I	
or APMA 1655	Statistical Inference I	
ECON 1629	Applied Research Methods for Economists	1
or ECON 1630	Mathematical Econometrics I	
ECON 1710	Investments I	1
ECON 1720	Corporate Finance	1
Two Business Economics electives from the following:		2
ECON 1310	Labor Economics	
ECON 1400	The Economics of Mass Media	
ECON 1450	Economic Organizations and Economic Systems	
ECON 1470	Bargaining Theory and Applications	
ECON 1490	Designing Internet Marketplaces	
ECON 1540	International Trade	
ECON 1550	International Finance	
ECON 1660	Big Data	
ECON 1730	Venture Capital, Private Equity, and Entrepreneurship	
ECON 1740	Mathematical Finance	
ECON 1750	Investments II	
ECON 1760	Financial Institutions	
ECON 1780	Advanced Topics in Corporate Finance	
ECON 1820	Theory of Behavioral Economics	
ECON 1870	Game Theory and Applications to Economics	
Total Credits		12

<sup>1</sup> Students who place out of ECON 0110 on the basis of qualifying scores on the AP, IB, or A level exams must take an additional 1000-level course (6 instead of 5).

<sup>2</sup> Students can satisfy the mathematics requirement with qualifying scores on the AP, IB, or A-levels exams (but not the math department's self placement exam). Note the certain advanced economics courses may impose additional math prerequisites.

All concentrators in economics programs are encouraged to consult their concentration advisors regularly. Economics concentrators who wish to study abroad should consult first with the department transfer credit advisor.

## Honors

Students who wish to pursue honors in economics should consult the department's undergraduate web site to obtain a complete description of the requirements. See the description of Capstone Projects there, as well. Courses taken to prepare an honors thesis are in addition to the regular concentration requirements.

### Professional Track <sup>1</sup>

Students wishing to complete the Professional Track for either the standard concentration or the Business Economics track will complete the requirements for the standard/Business Economics track, as well as the following:

Students must complete full-time professional experiences doing work that is related to their concentration programs, totaling 2-6 months, whereby each internship must be at least one month in duration in cases where students choose to do more than one internship experience. Such work is normally done at a company, but may also be at a university under the

supervision of a faculty member. Internships that take place between the end of the fall and the start of the spring semesters cannot be used to fulfill this requirement. On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience, to be approved by the student's concentration advisor.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience, to be approved by the student's concentration advisor:

<sup>1</sup> International students must declare the professional track of their concentration in order for U.S. based internships to qualify for Curricular Practical Training (CPT). In addition to their other concentration requirements, students must complete two two-to-four month full time professional experiences, doing work that is related to their concentration program. Such work is normally done at a company or a non profit, but may also be at a university under the supervision of a faculty member. Upon completion of each profession experience, the student must write a reflective essay on ASK, to be approved by their concentration advisor.

## Applied Mathematics-Economics Concentration Requirements

The Applied Mathematics-Economics concentration is designed to reflect the mathematical and statistical nature of modern economic theory and empirical research. This concentration has two tracks. The first is the advanced economics track, which is intended to prepare students for graduate study in economics. The second is the mathematical finance track, which is intended to prepare students for graduate study in finance, or for careers in finance or financial engineering. Both tracks have A.B. degree versions and Sc.B. degree versions, as well as a Professional track option.

### Standard Program for the A.B. degree (Advanced Economics track):

#### Prerequisites:

MATH 0100	Introductory Calculus, Part II
MATH 0520	Linear Algebra

#### Course Requirements:

##### Applied Mathematics Requirements

(a) <sup>1</sup>		
APMA 0350 & APMA 0360	Applied Ordinary Differential Equations and Applied Partial Differential Equations	2
	<sup>1</sup> <sup>2</sup>	
Select one of the following:		1
APMA 0160	Introduction to Scientific Computing (preferred)	
CSCI 0040	Introduction to Scientific Computing and Problem Solving	
CSCI 0111	Computing Foundations: Data	
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
CSCI 0170	Computer Science: An Integrated Introduction	
Select one of the following:		1
APMA 1200	Operations Research: Probabilistic Models	
APMA 1210	Operations Research: Deterministic Models	
APMA 1650 or APMA 1655	Statistical Inference I	1
	Statistical Inference I	
(b) <sup>1</sup>		
Select one of the following:		1
APMA 1200	Operations Research: Probabilistic Models	
APMA 1210	Operations Research: Deterministic Models	

APMA 1330	Methods of Applied Mathematics	
APMA 1360	Applied Dynamical Systems	
APMA 1660	Statistical Inference II	
APMA 1690	Computational Probability and Statistics	
APMA 1720	Monte Carlo Simulation with Applications to Finance	
APMA 1740	Recent Applications of Probability and Statistics	
MATH 1010	Analysis: Functions of One Variable	
<b>Economics Requirements:</b>		
ECON 1130	Intermediate Microeconomics (Mathematical) <sup>3</sup>	1
ECON 1210	Intermediate Macroeconomics	1
ECON 1630	Mathematical Econometrics I	1
Two 1000-level courses from the "mathematical-economics" group: <sup>4</sup>		2
ECON 1170	Welfare Economics and Social Choice Theory	
ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies	
ECON 1460	Industrial Organization	
ECON 1470	Bargaining Theory and Applications	
ECON 1490	Designing Internet Marketplaces	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1670	Advanced Topics in Econometrics	
ECON 1750	Investments II	
ECON 1820	Theory of Behavioral Economics	
ECON 1850	Theory of Economic Growth	
ECON 1860	The Theory of General Equilibrium	
ECON 1870	Game Theory and Applications to Economics	
One 1000-level course from the "data methods" group: <sup>4</sup>		1
ECON 1301	Economics of Education I	
ECON 1310	Labor Economics	
ECON 1315	Health, Education, and Social Policy	
ECON 1340	Economics of Global Warming	
ECON 1355	Environmental Issues in Development Economics	
ECON 1360	Health Economics	
ECON 1375	Inequality of Opportunity in the US	
ECON 1400	The Economics of Mass Media	
ECON 1430	The Economics of Social Policy	
ECON 1480	Public Economics	
ECON 1510	Economic Development	
ECON 1530	Health, Hunger and the Household in Developing Countries	
ECON 1629	Applied Research Methods for Economists	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1670	Advanced Topics in Econometrics	
ECON 1765	Finance, Regulation, and the Economy	
ECON 1825	Behavioral Economics and Public Policy	
ECON 1830	Behavioral Finance	
One additional 1000-level economics course. <sup>5</sup>		1
<b>Total Credits</b>		<b>13</b>

<sup>1</sup> No course may be used to simultaneously satisfy (a) and (b).  
<sup>2</sup> APMA 0330 and APMA 0340 may be substituted with advisor approval. APMA 1910 cannot be used as an elective.  
<sup>3</sup> Or ECON 1110 with permission.

<sup>4</sup> No course may be used to simultaneously satisfy the "mathematical economics" and the "data methods" requirements.

<sup>5</sup> Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, 1620 and 1960 can be used for university credit and up to two 1970s may be used for university credit.

### Standard program for the Sc.B. degree (Advanced Economics track):

<b>Prerequisites:</b>		
MATH 0100	Introductory Calculus, Part II	
MATH 0520	Linear Algebra	
<b>Course Requirements:</b>		
<b>Applied Mathematics Requirements</b>		
(a) <sup>1</sup>		
APMA 0350 & APMA 0360	Applied Ordinary Differential Equations and Applied Partial Differential Equations I <sup>2</sup>	2
Select one of the following:		
APMA 0160	Introduction to Scientific Computing (preferred)	1
CSCI 0040	Introduction to Scientific Computing and Problem Solving	
CSCI 0111	Computing Foundations: Data	
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
CSCI 0170	Computer Science: An Integrated Introduction	
Select one of the following:		
APMA 1200	Operations Research: Probabilistic Models	1
APMA 1210	Operations Research: Deterministic Models	
APMA 1650 or APMA 1655	Statistical Inference I	1
(b) <sup>1</sup>		
Select two of the following:		
APMA 1200	Operations Research: Probabilistic Models	2
APMA 1210	Operations Research: Deterministic Models	
APMA 1330	Methods of Applied Mathematics	
APMA 1360	Applied Dynamical Systems	
APMA 1660	Statistical Inference II	
APMA 1690	Computational Probability and Statistics	
APMA 1720	Monte Carlo Simulation with Applications to Finance	
APMA 1740	Recent Applications of Probability and Statistics	
MATH 1010	Analysis: Functions of One Variable	
<b>Economics Requirements:</b>		
ECON 1130	Intermediate Microeconomics (Mathematical) <sup>3</sup>	1
ECON 1210	Intermediate Macroeconomics	1
ECON 1630	Mathematical Econometrics I	1
Three 1000-level courses from the "mathematical-economics" group: <sup>4</sup>		3
ECON 1170	Welfare Economics and Social Choice Theory	
ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies	
ECON 1460	Industrial Organization	
ECON 1470	Bargaining Theory and Applications	
ECON 1490	Designing Internet Marketplaces	

ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1670	Advanced Topics in Econometrics	
ECON 1750	Investments II	
ECON 1820	Theory of Behavioral Economics	
ECON 1850	Theory of Economic Growth	
ECON 1860	The Theory of General Equilibrium	
ECON 1870	Game Theory and Applications to Economics	
One 1000-level course from the "data methods" group: <sup>4</sup>		1
ECON 1301	Economics of Education I	
ECON 1310	Labor Economics	
ECON 1315	Health, Education, and Social Policy	
ECON 1340	Economics of Global Warming	
ECON 1355	Environmental Issues in Development Economics	
ECON 1360	Health Economics	
ECON 1375	Inequality of Opportunity in the US	
ECON 1400	The Economics of Mass Media	
ECON 1430	The Economics of Social Policy	
ECON 1480	Public Economics	
ECON 1510	Economic Development	
ECON 1530	Health, Hunger and the Household in Developing Countries	
ECON 1629	Applied Research Methods for Economists	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1765	Finance, Regulation, and the Economy	
ECON 1825	Behavioral Economics and Public Policy	
ECON 1830	Behavioral Finance	
Two additional 1000-level economics courses <sup>5</sup>		2
<b>Total Credits</b>		<b>16</b>

<sup>1</sup> No course may be used to simultaneously satisfy (a) and (b).

<sup>2</sup> APMA 0330 and APMA 0340 may be substituted with advisor approval. APMA 1910 cannot be used as an elective.

<sup>3</sup> Or ECON 1110 with permission.

<sup>4</sup> No course may be used to simultaneously satisfy the "mathematical economics" and the "data methods" requirements.

<sup>5</sup> Students may use either ECON 1070 or ECON 1090 toward the concentration, but not both. Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, 1620 and 1960 can be used for university credit and up to two 1970s may be used for university credit.

## Standard program for the A.B. degree (Mathematical Finance track):

### Prerequisites:

MATH 0100	Introductory Calculus, Part II	
MATH 0520	Linear Algebra	

### Course Requirements: 13 Courses: 6 Applied Math and 7 Economics

#### Applied Mathematics Requirements

(a)		
APMA 0350 & APMA 0360	Applied Ordinary Differential Equations and Applied Partial Differential Equations I <sup>1</sup>	2
Select one of the following:		1
APMA 0160	Introduction to Scientific Computing (preferred)	

CSCI 0040	Introduction to Scientific Computing and Problem Solving	
CSCI 0111	Computing Foundations: Data	
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
CSCI 0170	Computer Science: An Integrated Introduction	
APMA 1200	Operations Research: Probabilistic Models	1
APMA 1650 or APMA 1655	Statistical Inference I	1

(b)		
Select one of the following:		1
APMA 1180	Introduction to Numerical Solution of Differential Equations	
APMA 1210	Operations Research: Deterministic Models	
APMA 1330	Methods of Applied Mathematics	
APMA 1360	Applied Dynamical Systems	
APMA 1660	Statistical Inference II	
APMA 1655	Statistical Inference I	
APMA 1690	Computational Probability and Statistics	
APMA 1720	Monte Carlo Simulation with Applications to Finance (preferred)	
APMA 1740	Recent Applications of Probability and Statistics	
MATH 1010	Analysis: Functions of One Variable	

#### Economics Requirements:

ECON 1130	Intermediate Microeconomics (Mathematical) <sup>3</sup>	1
ECON 1210	Intermediate Macroeconomics	1
ECON 1630	Mathematical Econometrics I	1
Select two 1000-level courses from the "financial economics" group: <sup>2</sup>		2
ECON 1710	Investments I	
ECON 1720	Corporate Finance	
ECON 1730	Venture Capital, Private Equity, and Entrepreneurship	
ECON 1750	Investments II	
ECON 1760	Financial Institutions	
ECON 1765	Finance, Regulation, and the Economy	
ECON 1780	Advanced Topics in Corporate Finance	
ECON 1830	Behavioral Finance	

Select one 1000-level course from the "mathematical economics" group:<sup>2</sup>

ECON 1170	Welfare Economics and Social Choice Theory	
ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies	
ECON 1460	Industrial Organization	
ECON 1470	Bargaining Theory and Applications	
ECON 1490	Designing Internet Marketplaces	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1670	Advanced Topics in Econometrics	
ECON 1750	Investments II	
ECON 1820	Theory of Behavioral Economics	
ECON 1850	Theory of Economic Growth	
ECON 1860	The Theory of General Equilibrium	
ECON 1870	Game Theory and Applications to Economics	

Select one 1000-level course from the "data methods" group:<sup>2</sup>

1

ECON 1301	Economics of Education I
ECON 1310	Labor Economics
ECON 1315	Health, Education, and Social Policy
ECON 1340	Economics of Global Warming
ECON 1355	Environmental Issues in Development Economics
ECON 1360	Health Economics
ECON 1375	Inequality of Opportunity in the US
ECON 1400	The Economics of Mass Media
ECON 1430	The Economics of Social Policy
ECON 1480	Public Economics
ECON 1510	Economic Development
ECON 1530	Health, Hunger and the Household in Developing Countries
ECON 1629	Applied Research Methods for Economists
ECON 1640	Mathematical Econometrics II
ECON 1660	Big Data
ECON 1765	Finance, Regulation, and the Economy
ECON 1825	Behavioral Economics and Public Policy
ECON 1830	Behavioral Finance

Total Credits 13

<sup>1</sup> APMA 0330 and APMA 0340 may be substituted with advisor approval. APMA 1910 cannot be used as an elective.

<sup>2</sup> No course may be used to simultaneously satisfy any two or more of the "financial economics," "mathematical economics," and "data methods" requirements.

<sup>3</sup> Or ECON 1110 with permission.

<sup>4</sup> Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, 1620 and 1960 can be used for university credit and up to two 1970s may be used for university credit.

## Standard program for the Sc.B. degree (Mathematical Finance track):

### Prerequisites:

MATH 0100	Introductory Calculus, Part II
MATH 0520	Linear Algebra

### Course Requirements: 16 courses: 7 Applied Math and 9 Economics

#### Applied Mathematics requirements:

(a)		
APMA 0350 & APMA 0360	Applied Ordinary Differential Equations and Applied Partial Differential Equations I <sup>1</sup>	2

Select one of the following: 1

APMA 0160	Introduction to Scientific Computing (preferred)	1
CSCI 0040	Introduction to Scientific Computing and Problem Solving	1
CSCI 0111	Computing Foundations: Data	1
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	1
CSCI 0170	Computer Science: An Integrated Introduction	1

APMA 1200 Operations Research: Probabilistic Models 1

APMA 1650 Statistical Inference I 1  
or APMA 1655 Statistical Inference I

(b)  
Select two of the following: 2

APMA 1180	Introduction to Numerical Solution of Differential Equations	2
-----------	--	---

APMA 1210	Operations Research: Deterministic Models	
APMA 1330	Methods of Applied Mathematics	
APMA 1360	Applied Dynamical Systems	
APMA 1660	Statistical Inference II	
APMA 1690	Computational Probability and Statistics	
APMA 1720	Monte Carlo Simulation with Applications to Finance (preferred)	
APMA 1740	Recent Applications of Probability and Statistics	
MATH 1010	Analysis: Functions of One Variable	

#### Economics Requirements:

ECON 1130 Intermediate Microeconomics (Mathematical)<sup>3</sup> 1

ECON 1210 Intermediate Macroeconomics 1

ECON 1630 Mathematical Econometrics I 1

Select three 1000-level courses from the "financial economics" group:<sup>2</sup> 3

ECON 1710	Investments I	
ECON 1720	Corporate Finance	
ECON 1730	Venture Capital, Private Equity, and Entrepreneurship	

ECON 1750 Investments II

ECON 1760 Financial Institutions

ECON 1765 Finance, Regulation, and the Economy

ECON 1780 Advanced Topics in Corporate Finance

ECON 1830 Behavioral Finance

Select two 1000-level courses from the "mathematical economics" group:<sup>2</sup> 2

ECON 1170 Welfare Economics and Social Choice Theory

ECON 1225 Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies

ECON 1460 Industrial Organization

ECON 1470 Bargaining Theory and Applications

ECON 1490 Designing Internet Marketplaces

ECON 1640 Mathematical Econometrics II

ECON 1660 Big Data

ECON 1670 Advanced Topics in Econometrics

ECON 1750 Investments II

ECON 1820 Theory of Behavioral Economics

ECON 1850 Theory of Economic Growth

ECON 1860 The Theory of General Equilibrium

ECON 1870 Game Theory and Applications to Economics

Select one 1000-level course from the "data methods" group:<sup>2</sup> 1

ECON 1301 Economics of Education I

ECON 1310 Labor Economics

ECON 1315 Health, Education, and Social Policy

ECON 1340 Economics of Global Warming

ECON 1355 Environmental Issues in Development Economics

ECON 1360 Health Economics

ECON 1375 Inequality of Opportunity in the US

ECON 1400 The Economics of Mass Media

ECON 1430 The Economics of Social Policy

ECON 1480 Public Economics

ECON 1510 Economic Development

ECON 1530 Health, Hunger and the Household in Developing Countries

ECON 1629 Applied Research Methods for Economists

ECON 1640	Mathematical Econometrics II
ECON 1660	Big Data
ECON 1765	Finance, Regulation, and the Economy
ECON 1825	Behavioral Economics and Public Policy
ECON 1830	Behavioral Finance

Total Credits 16

- <sup>1</sup> APMA 0330 and APMA 0340 may be substituted with advisor approval. APMA 1910 cannot be used as an elective.
- <sup>2</sup> No course may be used to simultaneously satisfy any two or more of the "financial economics," "mathematical economics," and "data methods" requirements.
- <sup>3</sup> Or ECON 1110 with permission.
- <sup>4</sup> Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, 1620 and 1960 can be used for university credit and up to two 1970s may be used for university credit.

## Honors and Capstone Requirement

Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and a 3.5 GPA overall.

To graduate with honors, a student must write an honors thesis in the senior year following the procedures specified by the concentration (see Economics Department website).

## Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

## Computer Science-Economics Concentration Requirements

The joint Computer Science-Economics concentration exposes students to the theoretical and practical connections between computer science and economics. It prepares students for professional careers that incorporate aspects of economics and computer technology and for academic careers conducting research in areas that emphasize the overlap between the two fields. Concentrators may choose to pursue either the A.B. or the Sc.B. degree. While the A.B. degree allows students to explore the two disciplines by taking advanced courses in both departments, its smaller number of required courses is compatible with a liberal education. The Sc.B. degree achieves greater depth in both computer science and economics by requiring more courses, and it offers students the opportunity to creatively integrate both disciplines through a design requirement. In addition to courses in economics, computer science, and

applied mathematics, all concentrators must fulfill the Computer Science department's writing requirement by passing a course that involves significant expository writing.

## Standard Program for the Sc.B. degree.

### Prerequisites (3 courses):

MATH 0100	Introductory Calculus, Part II	
MATH 0520	Linear Algebra	
or MATH 0540	Honors Linear Algebra	
or CSCI 0530	Coding the Matrix: An Introduction to Linear Algebra for Computer Science	
ECON 0110	Principles of Economics	

### Required Courses: 17 courses: 8 Computer Science, 8 Economics, and a Capstone

CSCI 1450	Probability for Computing and Data Analysis <sup>1</sup>	1
or APMA 1650	Statistical Inference I	
or APMA 1655	Statistical Inference I	

Select one of the following Series: 2

#### Series A

CSCI 0150 & CSCI 0160	Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures	
-----------------------	---	--

#### Series B

CSCI 0170 & CSCI 0180	Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction	
-----------------------	---	--

#### Series C

CSCI 0190	Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level course.)	
-----------	--	--

Two of the following intermediate courses, one of which must be math-oriented and one systems-oriented. 2

CSCI 0220	Introduction to Discrete Structures and Probability (math)	
-----------	--	--

CSCI 0320	Introduction to Software Engineering (systems)	
-----------	--	--

CSCI 0330	Introduction to Computer Systems (systems)	
-----------	--	--

CSCI 1010	Theory of Computation (math) <sup>2</sup>	
-----------	---	--

A pair of 1000-level CS courses that, along with the intermediate courses and math courses, satisfy one of the CS Pathways.<sup>3</sup> 2

An additional CS course that is either at the 1000-level or is an intermediate course not already used to satisfy concentration requirements. CSCI 1450 may not be used to satisfy this requirement. 1

ECON 1130	Intermediate Microeconomics (Mathematical) <sup>4</sup>	1
-----------	---	---

ECON 1210	Intermediate Macroeconomics	1
-----------	-----------------------------	---

ECON 1630	Mathematical Econometrics I	1
-----------	-----------------------------	---

Three courses from the "mathematical economics" group (CSCI 1951K can be counted as one of them, if it has not been used to satisfy the computer science requirements of the concentration and if the student has taken either ECON 1470 or ECON 1870): 3

ECON 1170	Welfare Economics and Social Choice Theory	
-----------	--	--

ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies	
-----------	---	--

ECON 1460	Industrial Organization
ECON 1470	Bargaining Theory and Applications
ECON 1490	Designing Internet Marketplaces
ECON 1640	Mathematical Econometrics II
ECON 1660	Big Data
ECON 1670	Advanced Topics in Econometrics
ECON 1750	Investments II
ECON 1820	Theory of Behavioral Economics
ECON 1850	Theory of Economic Growth
ECON 1860	The Theory of General Equilibrium
ECON 1870	Game Theory and Applications to Economics

and any graduate Economics course  
Two additional 1000-level Economics courses excluding 1620, 1960, 1970<sup>5</sup> 2

One capstone course in either CS or Economics: a one-semester course, normally taken in the student's last semester undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic (preferably at the intersection of computer science and economics) in depth, to produce a culminating artifact such as a paper or software project. A senior thesis, which involved two semesters of work, may count as a capstone.<sup>6</sup> 1

Total Credits 17

<sup>1</sup> CSCI 1450 was formerly known as CSCI 0450: they are the same course and hence only one may be taken for credit. APMA 1650 or APMA 1655 may be used in place of CSCI 1450 in CS pathway requirements. However, concentration credit will be given for only one for APMA 1650, APMA 1655, and CSCI 1450.

<sup>2</sup> CSCI 1010 may be used either as a math-oriented intermediate course or as an advanced course. CSCI 1010 was formerly known as CSCI 0510: They are the same course and hence only one may be taken for credit.

<sup>3</sup> A list of pre-approved pairs may be found at the approved-pairs web page (<http://www.cs.brown.edu/ugrad/concentrations/approvedpairs.html>). You are not restricted to pairs on this list, but any pair not on the list must be approved by the Computer Science director of undergraduate studies. CS Pathways can be found on the New Pathways (<https://cs.brown.edu/degrees/undergrad/concentration-requirements/pathways-for-undergraduate-and-masters-students>) page.

<sup>4</sup> Or ECON 1110, with permission.

<sup>5</sup> Students may use either ECON 1070 or ECON 1090 toward the concentration, but not both. Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, 1620 and 1960 can be used for university credit and up to two 1970s may be used for university credit.

<sup>6</sup> One capstone course (<http://cs.brown.edu/degrees/undergrad/concentrations/capstone>) in either Computer Science or Economics: a one-semester course, taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic (preferably at the intersection of computer science and economics) in depth, to produce a culminating artifact such as a paper or software project.

## Standard Program for the A.B. degree:

### Prerequisites (3 courses):

MATH 0100	Introductory Calculus, Part II
MATH 0520	Linear Algebra
or MATH 0540	Honors Linear Algebra
or CSCI 0530	Coding the Matrix: An Introduction to Linear Algebra for Computer Science
ECON 0110	Principles of Economics

### Required Courses: 13 courses: 7 Computer Science and 6 Economics

CSCI 1450	Probability for Computing and Data Analysis	1
or APMA 1650	Statistical Inference I	
or APMA 1655	Statistical Inference I	

Select one of the following series: 2

#### Series A

CSCI 0150 & CSCI 0160	Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures
-----------------------	---

#### Series B

CSCI 0170 & CSCI 0180	Computer Science: An Integrated Introduction and Computer Science: An Integrated Introduction
-----------------------	---

#### Series C

CSCI 0190	Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level course, or a 1000-level course)
-----------	--

Two of the following intermediate courses, one of which must be math-oriented and one systems-oriented: 2

CSCI 0220	Introduction to Discrete Structures and Probability (math)
-----------	--

CSCI 0320	Introduction to Software Engineering (systems)
-----------	--

CSCI 0330	Introduction to Computer Systems (systems)
-----------	--

CSCI 1010	Theory of Computation (math)
-----------	------------------------------

Two additional CS courses; at least one must be at the 1000-level. The other must either be at the 1000-level or be an intermediate course not already used to satisfy concentration requirements. CSCI 1450 may not be used to satisfy this requirement. 2

ECON 1130	Intermediate Microeconomics (Mathematical) <sup>1</sup>	1
-----------	---	---

ECON 1210	Intermediate Macroeconomics	1
-----------	-----------------------------	---

ECON 1630	Mathematical Econometrics I	1
-----------	-----------------------------	---

Three courses from the "mathematical-economics" group:<sup>2</sup> 3

ECON 1170	Welfare Economics and Social Choice Theory
-----------	--

ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies
-----------	---

ECON 1460	Industrial Organization
-----------	-------------------------

ECON 1470	Bargaining Theory and Applications
-----------	------------------------------------

ECON 1490	Designing Internet Marketplaces
-----------	---------------------------------

ECON 1640	Mathematical Econometrics II
-----------	------------------------------

ECON 1660	Big Data
-----------	----------

ECON 1670	Advanced Topics in Econometrics
-----------	---------------------------------

ECON 1750	Investments II
-----------	----------------

ECON 1820	Theory of Behavioral Economics
-----------	--------------------------------

ECON 1850	Theory of Economic Growth
-----------	---------------------------

ECON 1860	The Theory of General Equilibrium
-----------	-----------------------------------

ECON 1870	Game Theory and Applications to Economics
-----------	---

or any graduate Economics course<sup>3</sup>

Total Credits 13

- <sup>1</sup> Or ECON 1110, with permission.
- <sup>2</sup> CSCI 1951K can be counted as one of them, if it has not been used to satisfy the computer science requirements of the concentration and if the student has taken either ECON 1470 or ECON 1870.
- <sup>3</sup> Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, 1620 and 1960 can be used for university credit and up to two 1970s may be used for university credit.

## Honors

Students who meet stated requirements are eligible to write an honors thesis in their senior year. Students should consult the listed honors requirements of whichever of the two departments their primary thesis advisor belongs to, at the respective departments' websites.

## Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

## Mathematics-Economics Concentration Requirements

The Mathematics Economics concentration is designed to give a background in economic theory plus the mathematical tools needed to analyze and develop additional theoretical constructions. The emphasis is on the abstract theory itself. Students may choose either the standard or the professional track, both award a Bachelor of Arts degree.

### Standard Mathematics-Economics Concentration

#### Economics

ECON 1130	Intermediate Microeconomics (Mathematical) <sup>1</sup>	1
ECON 1210	Intermediate Macroeconomics	1
ECON 1630	Mathematical Econometrics I	1
Two courses from the "mathematical-economics" group: <sup>2</sup>		2
ECON 1170	Welfare Economics and Social Choice Theory	
ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies	
ECON 1460	Industrial Organization	
ECON 1470	Bargaining Theory and Applications	

ECON 1490	Designing Internet Marketplaces	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1670	Advanced Topics in Econometrics	
ECON 1750	Investments II	
ECON 1820	Theory of Behavioral Economics	
ECON 1850	Theory of Economic Growth	
ECON 1860	The Theory of General Equilibrium	
ECON 1870	Game Theory and Applications to Economics	
One course from the "data methods" group: <sup>2</sup>		1
ECON 1301	Economics of Education I	
ECON 1305	Economics of Education: Research	
ECON 1310	Labor Economics	
ECON 1360	Health Economics	
ECON 1410	Urban Economics	
ECON 1480	Public Economics	
ECON 1510	Economic Development	
ECON 1530	Health, Hunger and the Household in Developing Countries	
ECON 1629	Applied Research Methods for Economists	
ECON 1640	Mathematical Econometrics II	
ECON 1650	Financial Econometrics	
Two additional 1000-level economics courses <sup>3</sup>		2
<b>Mathematics</b>		
Calculus: MATH 0180 or higher		1
Linear Algebra - one of the following:		1
MATH 0520	Linear Algebra	
MATH 0540	Honors Linear Algebra	
Probability Theory - one of the following:		1
MATH 1610	Probability	
MATH 1620	Mathematical Statistics	
APMA 1650	Statistical Inference I	
Analysis - one of the following:		1
MATH 1010	Analysis: Functions of One Variable	
MATH 1130	Functions of Several Variables	
MATH 1140	Functions Of Several Variables	
Differential Equations - one of the following:		1
MATH 1110	Ordinary Differential Equations	
MATH 1120	Partial Differential Equations	
One additional course from the Probability, Analysis, and Differential Equations courses listed above		1
<b>Total Credits</b>		<b>14</b>

- <sup>1</sup> Or ECON 1110 with permission.
- <sup>2</sup> No course may be "double-counted" to satisfy both the mathematical-economics and data methods requirement.
- <sup>3</sup> Students may use either ECON 1070 or ECON 1090 toward the concentration, but not both. Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, ECON 1620 and ECON 1960 can be used for university credit and up to two 1970s may be used for university credit.

### Honors and Capstone Requirement:

Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and 3.5 GPA overall. To graduate with honors, a student must write an honors thesis in senior year following the procedures specified by the concentration (see Economics Department website).

## Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four month full-time professional experiences, doing work that is relevant to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

## Behavioral Decision Sciences Concentration Requirements

Leading to a Bachelor of Arts, the study of decision making at Brown covers descriptive questions like how people, institutions, and nations make judgments and decisions; normative questions about rationality, such as what constitutes the best judgments and decisions; and prescriptive questions, such as how the process of decision making can be improved to make actual decisions closer to optimal ones. By virtue of its broad interdisciplinary nature, the study of decision making covers work found in a variety of more traditional disciplines including psychology, cognitive science, economics, philosophy, computer science, and neuroscience. Professor Steven Sloman ([steven\\_sloman@brown.edu?subject=Behavioral Decision Sciences](mailto:steven_sloman@brown.edu?subject=Behavioral%20Decision%20Sciences)) is the concentration advisor. (David Yokum ([david\\_yokum@brown.edu?subject=concentration](mailto:david_yokum@brown.edu?subject=concentration)) will be acting concentration advisor from January 2020 to December 2020). Upon declaring, concentrators are also encouraged to speak with the appropriate area specialist from among those listed here (<https://www.brown.edu/academics/cognitive-linguistic-psychological-sciences/behavioral-decision-sciences>).

### Standard Program for the AB Degree

#### CLPS Classes:

CLPS 0220	Making Decisions	1
Choose one of the following:		
CLPS 0400	Cognitive Neuroscience	1
CLPS 0200	Human Cognition	
CLPS 0700	Social Psychology	
Choose two of the following:		
CLPS 1470	Mechanisms of Motivated Decision Making	2
CLPS 1495	Affective Neuroscience	
CLPS 1730	Psychology in Business and Economics	
CLPS 1760	The Moral Brain	
CLPS 0710	The Psychology and Philosophy of Happiness	

#### Distribution Requirements:

Select one Introductory Course from the following:		
ECON 0110	Principles of Economics	1

CSCI 0040	Introduction to Scientific Computing and Problem Solving <sup>1</sup>	
or CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
or CSCI 0170	Computer Science: An Integrated Introduction	
or CSCI 0180	Computer Science: An Integrated Introduction	
or CSCI 0190	Accelerated Introduction to Computer Science	
Select Two Advanced Courses From:		2
CSCI 1410	Artificial Intelligence	
CSCI 1420	Machine Learning	
ECON 1110	Intermediate Microeconomics	
or ECON 1130	Intermediate Microeconomics (Mathematical)	
ECON 1660	Big Data	
ECON 1820	Theory of Behavioral Economics	
ECON 1870	Game Theory and Applications to Economics	
PHIL 1550	Decision Theory: Foundations and Applications	

#### Methods Classes:

Choose One From the Following:		
APMA 0650	Essential Statistics	1
APMA 1650	Statistical Inference I	
CLPS 0900	Statistical Methods	
CSCI 0100	Data Fluency for All	
CSCI 1450	Probability for Computing and Data Analysis	
ECON 1620	Introduction to Econometrics	

Plus One of the Following:		
CLPS 1791	Laboratory in Social Cognition	1
CSCI 0150	Introduction to Object-Oriented Programming and Computer Science <sup>1</sup>	
CSCI 0170	Computer Science: An Integrated Introduction <sup>1</sup>	
ECON 1629	Applied Research Methods for Economists	
ECON 1630	Mathematical Econometrics I	
PHIL 0540	Logic	

#### Electives:

Students will choose three additional courses in consultation with a concentration advisor that will constitute an integrated specialization in some area of decision science. Any advanced course taught at Brown is eligible. Such courses might include, but are not limited to:

Psychology and Cognitive Science		
CLPS 0950	Introduction to programming	
CLPS 1292	Introduction to Programming for the Mind, Brain and Behavior	
CLPS 1370	Pragmatics	
CLPS 1970	Directed Reading in Cognitive, Linguistic and Psychological Sciences	

Economics:		
ECON 1820	Theory of Behavioral Economics	
ECON 1870	Game Theory and Applications to Economics	

Applied Mathematics:		
APMA 0200	Introduction to Modelling	
APMA 1690	Computational Probability and Statistics	
APMA 2640	Theory of Probability II	
APMA 2821V	Neural Dynamics: Theory and Modeling	

Philosophy:		
PHIL 0500	Moral Philosophy	
PHIL 1650	Moral Theories	

PHIL 1750	Epistemology	
Computer Science:		
CSCI 1430	Computer Vision	
CSCI 1460	Computational Linguistics	
CSCI 1951A	Data Science	
Political Science:		
POLS 1090	Polarized Politics	
POLS 1150	Prosperity: The Ethics and Economics of Wealth Creation	
POLS 1470	International Negotiation and Conflict Resolution	
Public Health:		
PHP 1740	Principles of Health Behavior and Health Promotion Interventions	
<b>Capstone:</b>		1
Fall seminar in which students write an integrative paper or do a project covering their areas of study in their senior year.		
Total Credits		13

<sup>1</sup> Students may not use the same course to satisfy both the Introductory and Methods course requirements.

Students will be expected to take no more than 6 courses below the 1000-level within the concentration. Students with multiple concentrations may not apply more than 2 courses from a second concentration to the AB in Behavioral Decision Sciences. No more than 2 courses can be transferred from another institution to count toward concentration credit.

## Honors

The Honors Program in BDS gives undergraduates a special opportunity to carry out a research project under the direction of a faculty member that they have developed a relationship with. The program also provides the opportunity for senior concentrators to receive their undergraduate degree with Honors. Participation in the program allows students to develop an understanding of research and acquire research skills and background.

Candidates for Honors in BDS must meet all of the requirements of the BDS concentration as described above. Candidates submit their application for the program at the beginning of semester 7. We encourage students to seek out a faculty mentor prior to semester 7 and to complete their methods courses and two of their three electives before semester 7. Please refer to the CLPS Honors Program page for detailed information about the specific requirements for the Honors Program in BDS.

## Economics Graduate Program

The department of Economics offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. Ph.D. students can earn the A.M. on the way to the Ph.D. or can receive the A.M. if they choose not to complete the Ph.D. program. The A.M. requires passing eight courses in the areas of Microeconomics, Macroeconomics, and Econometrics. Effective the 2020-21 academic year the department will also offer a Post-Baccalaureate Certificate in Economics to select cohort of students working as Research Associates within Economics.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/economics>

## Courses

### ECON 0110. Principles of Economics.

Extensive coverage of economic issues, institutions, and terminology, plus an introduction to economic analysis and its application to current social problems. Required for all economics concentrators. Prerequisite for ECON 1110, 1130, 1210 and 1620. Serves as a general course for students who will take no other economics courses and want a broad introduction to the discipline. Weekly one-hour conference required (conferences are not held during the summer session).

### ECON 0170. Essential Mathematics for Economics.

This course teaches the mathematical skills useful for upper level Economics classes. Emphasis is on acquisition of tools, problem solving, intuition, and applications rather than proofs.

This course satisfies the mathematics requirement for the Economics concentration, but does not serve as a prerequisite for upper level courses in Math, Applied Math, or other departments. Students planning further courses in those areas should take MATH 0100 or MATH 0170 (which also satisfy the Economics concentration requirement) instead. Ideally, ECON 0170 should be taken before ECON 1110, or at least simultaneously.

### ECON 0180D. The Power of Data (and its Limits).

Open any newspaper, any magazine, any academic journal, you'll find claims which rely on data. Government policies, economic data, health recommendations – all of these are based on some underlying data analysis. Data used in this context has enormous power, but it also has limits. Understanding these limits is key to using – but not mis-using – the power of data.

This first-year seminar will focus on understanding where data comes from, what we can learn from it, and what the limitations are. The course will emphasize policy-relevant economic and public health applications.

### ECON 0200. 20th Century Political Economy.

This course covers major debates in the 20th century political economy, starting with the Bolshevik Revolution and the Treatise of Versailles. We examine the Great Depression, the New Deal, and Postwar economic planning in the US and UK. We then turn to consider important periods in the second half of the 20th century, including Indian Economic Planning, Bretton Woods, and inflation in the 1970s. The course ends with a consideration of trade, trade deficits, sovereign debt crises, and austerity. The aim is to develop an understanding of both sides of key debates in political economy.

### ECON 0300. Health Disparities.

This seminar will examine the causes and consequences of racial and ethnic disparities in health in the United States, and their relationship to economic disparities. Although the course will be taught primarily from an economics perspective, it will draw on literature from sociology, demography and epidemiology. Enrollment determined by lottery.

### ECON 0510. Development and the International Economy.

A course designed primarily for students who do not plan to concentrate in economics but who seek a basic understanding of the economics of less developed countries, including savings and investment, health and education, agriculture and employment, and interactions with the world economy, including trade, international capital flows, aid, and migration. Enrollment limited to 100.

### ECON 0520. The Economics of Gender Equality and Development.

This course shows how an economics lens can be useful in understanding disparities in gender outcomes; how these disparities evolve over the development process; why closing gender gaps matters for development; and the roles of public policies and private action. Among the outcomes examined are human capital, access to economic opportunities, and agency or the ability to make choices and take actions. We will use the tools of economics think about how individuals and families make decisions, respond to opportunities generated by markets, and are affected by the parameters outlined by both formal and informal institutions and social norms.

### ECON 0710. Financial Accounting.

Basic accounting theory and practice. Accounting procedures for various forms of business organizations.

### ECON 1110. Intermediate Microeconomics.

Tools for use in microeconomic analysis, with some public policy applications. Theory of consumer demand, theories of the firm, market behavior, welfare economics, and general equilibrium.

**ECON 1130. Intermediate Microeconomics (Mathematical).**

Microeconomic theory: Theories of the consumer and firm, competitive equilibrium, factor markets, imperfect competition, game theory, welfare economics, general equilibrium. May not be taken in addition to ECON 1110. The instructor(s) of this course utilize override codes to grant access for registration restrictions rather than the request/wait list feature in C@B. Please reach out to the instructor directly for an override.

**ECON 1170. Welfare Economics and Social Choice Theory.**

Advanced microeconomic theory class for undergraduates. Building on the intermediate microeconomics course, the approach is more formal and mathematically more rigorous, presenting arguments and expecting students to carefully develop techniques in order to understand and produce logical proofs. Topics include the efficiency and coalitional stability properties of markets, as well as other mechanisms to allocate resources. Market failures are discussed, including advanced treatments of externalities, public goods, and asymmetric information. The second part of the course will discuss a number of topics in social choice theory, including different normative criteria of compensation, life and death choices, majority voting, Arrow's impossibility theorem.

**ECON 1200. History of Economic Thought.**

This course covers the history of modern (20th century) economics and economic thinking from the marginal revolution through the first half of the 20th century. The aim will be to develop an understanding of the origin and evolution of central concepts in economic theory, including subjective utility, marginal analysis, competitive markets, examine methodological disputes over positivism and formalism, and the development of general competitive equilibrium. We will consider the emergence of certain subfields in modern economics, and end with a discussion of the relevance of these ideas for economics in the 21st century.

**ECON 1210. Intermediate Macroeconomics.**

The economy as a whole: Level and growth of national income, inflation, unemployment, role of government policy. Prerequisite: MATH 0060, 0070, 0090, 0100, 0170, 0180, 0190, 0200, or 0350; and ECON 0110; or advanced placement.

**ECON 1225. Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies.**

The course is concerned with macroeconomic policy in the US, with special focus on the recent economic crisis. The main objective of the course is to introduce students to the type of models and methods used in current research in macroeconomics both in the scholarly literature but also in the practice of central banks and major policy institutions. Events of the financial crisis and the economic recession of 2007-2009 will serve to illustrate the challenges confronted by macroeconomic analysis. Enrollment limited to 30.

**ECON 1300. Education, the Economy and School Reform (EDUC1150).**

Interested students must register for EDUC 1150.

**ECON 1301. Economics of Education I.**

This course teaches students how to use microeconomics to analyze a broad array of education policy issues. The departure of this course from ECON 1110 is the emphasis on studying microeconomics in applied settings, and in particular, using microeconomic concepts to think about, analyze, and solve policy questions in education.

**ECON 1305. Economics of Education: Research.**

This course will cover academic research in the Economics of Education. Topics include production of student achievement, measuring student achievement, funding of public education, and school choice and school vouchers.

**ECON 1310. Labor Economics.**

Labor supply, human capital, income inequality, discrimination, immigration, unemployment. Enrollment limited to 100.

**ECON 1315. Health, Education, and Social Policy.**

The goal of the course is to help students to use economic theory and modern empirical methodology to think critically about the relative costs and benefits of health and education policies. By the end of the course students should feel comfortable critically evaluating proposals meant to increase human capital through school reforms, increased access to health care, or improved health environments.

**ECON 1340. Economics of Global Warming.**

The problem of global warming can be usefully be described with the following simple economic model. We face a tradeoff between current consumption, future consumption, and future climate, have preferences over consumption and future climate and would like to choose our optimal climate/consumption bundle. This course is organized around filling in the details required to make this model useful, characterizing the optimal climate/consumption path suggested by the model, and finally, investigating policies to achieve the optimal path.

**ECON 1350. Environmental Economics and Policy.**

This course equips students with theoretical and empirical tools to analyze environmental issues from the perspective of economics. First, we review when and why the markets fail, competing policy solutions (e.g., cap-and-trade), and cost-benefit analysis. Second, we survey methods to quantify the benefits of environmental regulations, including revealed and stated preference methods, a primer on climate-economy modeling, and a real-world application in a class research project. Third, we study the costs of environmental regulations. We conclude with advanced policy considerations (e.g., trans-boundary pollutants), private market solutions/corporate social responsibility, and select special topics (e.g., resources and economic development).

**ECON 1355. Environmental Issues in Development Economics.**

Examines environmental issues in developing countries, including air and water pollution, land use change, energy use, and the extraction of natural resources. Uses microeconomic models of households and firms, linking household/firm decision-making on environmental issues to choices in labor, land, and product markets. Develops basic empirical techniques through exercises and a project. For readings, relies exclusively on recent research to illustrate the roles of econometrics and economic theory in confronting problems at the nexus of the environment, poverty, and economic development.

**ECON 1360. Health Economics.**

This course introduces students to the issues, theory and practice of health economics in the US. Topics include the economic determinants of health, the market for medical care, the market for health insurance and the role of the government in health care. Course work includes data analyses using the program STATA. Enrollment limited to 24.

**ECON 1370. Race and Inequality in the United States.**

We examine racial inequality in the United States, focusing on economic, political, social and historical aspects. Topics include urban poverty, employment discrimination, crime and the criminal justice system, affirmative action, immigration, and low wage labor markets. Black/white relations in the US are the principle but not exclusive concern. Enrollment limited to 25.

**ECON 1375. Inequality of Opportunity in the US.**

This course examines empirical evidence on inequality of opportunity in the US. We cover recent work in economics that measures the importance of parents, schools, health care, neighborhoods, income, and race in determining children's long-term labor market success, and implications of these findings for US public policy. We will also place the empirical work in historical and philosophical context and cover a variety of statistical issues. Enrollment limited to 30 seniors.

**ECON 1400. The Economics of Mass Media.**

The mass media shape our culture and politics but are also shaped by their economic incentives. In this course we will use tools from microeconomics and econometrics to study the effects of mass media on economic, social and political behavior, and to study the factors that shape media content and availability. We will develop implications for business and public policy. Students will complete weekly readings, bi-weekly assignments, a take-home midterm, and a final paper and presentation. Class time will be devoted to a mix of lecture and discussion of readings and lecture topics.

**ECON 1410. Urban Economics.**

The first part of the course covers the set of conceptual and mathematical models widely used to understand economic activity both between and within cities. The second part of the course examines various urban policy issues including urban transportation, housing, urban poverty, segregation and crime. The course makes extensive use of empirical evidence taken primarily from the United States. Enrollment limited to 100.

**ECON 1430. The Economics of Social Policy.**

This course will cover research topics in the economics of social policy. The course will focus on understanding the context for key social policies in health, education, social welfare and other areas as well as understanding the methods that economists use to generate causal impacts of these policies.

**ECON 1450. Economic Organizations and Economic Systems.**

Positive and normative study of the organizations that comprise and the institutional structures that characterize a modern mixed market economy. Theoretical efficiency and potential limitations of private enterprises and markets including (a) why some market actors are organizations (e.g., companies), (b) effort elicitation problems in organizations, (c) the problem of cooperation in traditional versus behavioral economics, and (d) alternative kinds of organization (including proprietorships, corporations, nonprofits, government agencies). Roles of government, and problems of government failure, including the collective action problem of democracy. State-market balance and contemporary controversies over the economic system in light of the 2008 financial crisis.

**ECON 1460. Industrial Organization.**

A study of industry structure and firm conduct and its economic/antitrust implications. Theoretical and empirical examinations of strategic firm interactions in oligopolistic markets, dominant firm behaviors, and entry deterrence by incumbents. Also economics of innovation: research and development activities and government patent policies. Enrollment limited to 100.

**ECON 1470. Bargaining Theory and Applications.**

Bargaining theory is emerging as an important area within the general rubric of game theory. Emphasis is on providing a relatively elementary version of the theory in order to make it accessible to a large number of students. Covers introductory concepts in game theory, strategic and axiomatic theories of bargaining and their connections, applications to competitive markets, strikes, etc. Enrollment limited to 100.

**ECON 1480. Public Economics.**

This course is an introduction to the economics of the public sector. We will cover theoretical and empirical tools of public economics and apply these tools to a wide range of issues including externalities, public goods, collective choice, social insurance, redistribution and taxation. The course will focus on questions such as: What should government do? How much should governments insure individuals against misfortune? How much should governments redistribute resources from high-income to low-income households? Throughout the course we will emphasize real-world empirical applications rather than hypothetical examples.

**ECON 1486. The Economic Analysis of Political Behavior.**

Slow economic growth, controversial policy, and over a decade of continuous war have led many to question the extent to which government is a force for the common good. Blame is often assigned to specific politicians or ideological perspectives. Public choice economics instead analyzes the incentive structure within which political decisions take place, seeking to uncover the forces guiding the behavior of voters, legislators, judges, and other political agents. This course will examine the insights and limitations of the public choice perspective in the context of electoral politics, legislation, bureaucracy and regulation, and constitutional rules.

**ECON 1490. Designing Internet Marketplaces.**

How has the digital economy changed market interactions? The goal of this course is to help you think critically, using economic theory, about the future of the digital economy.

What are important economic activities now being conducted digitally? How has digital implementation of these activities changed economists' classical views and assumptions?

What are ways in which we can use economics to engineer "better" digital markets?

We will focus on several real-world markets (eg. eBay, Airbnb, Google advertising, Uber, Tinder, TaskRabbit) and topics (eg. market entry, pricing, search, auctions, matching, reputation, peer-to-peer platform design).

**ECON 1500. Current Global Macroeconomic Challenges.**

Current Global Macroeconomics Challenges will cover issues that include ageing, the underdeveloped world, child access to medical care, health, education and protection, climate change, decolonization, democracy, ending poverty and increasing food sustainability, human rights and gender equality, migration, oceans and the law of the sea, peace and security, population, refugees, water management, and youth. The course will begin with the development of solid economic models to help explain these phenomena and then will move on to examine the impact of various macroeconomic policies on these issues and whether and how they promote global long-term development.

**ECON 1510. Economic Development.**

This course is an introduction to development economics and related policy questions. It discusses the measurement of poverty and inequality; growth; population change; health and education; resource allocation and gender; land and agriculture; and credit, insurance, and savings. The course provides a theoretical framework for the economic analysis of specific problems associated with developing economies, and introduces empirical methods used to evaluate policies aimed at solving these problems. By the end of the class, students will be able to discuss some of the "hot topics" in development, like microfinance, family planning, or the problem of "missing women" in South-East Asia.

**ECON 1530. Health, Hunger and the Household in Developing Countries.**

Microeconomic analysis of household behavior in low income societies emphasizing the economic determinants of health and nutrition and the evaluation of policy. The relationship among health, nutrition, fertility, savings, schooling, labor productivity, wage determination, and gender-based inequality. Emphasizes theoretically-based empirical research. Enrollment limited to 30.

**ECON 1540. International Trade.**

Theory of comparative advantage, trade, and income distribution. Welfare analysis of trade: gains from trade, evaluation of the effects of trade policy instruments-tariffs, quotas, and subsidies. Trade under imperfect competition. Strategic trade policy. Trade, labor markets, preferential trade agreements, and the world trading systems. Enrollment limited to 100.

**ECON 1550. International Finance.**

The balance of payments; identification and measurement of surpluses and deficits; international monetary standards; the role of gold and paper money; government policies; free versus fixed exchange rates; international capital movements; war and inflation; the International Monetary Fund. Enrollment limited to 100.

**ECON 1560. Economic Growth.**

A theoretical and empirical examination of economic growth and income differences among countries. Focuses on both the historical experience of countries that are currently rich and the process of catch-up among poor countries. Topics include population growth, accumulation of physical and human capital, technological change, natural resources, income distribution, geography, government, and culture. Enrollment limited to 100.

**ECON 1565. Income Inequality.**

This course examines the macroeconomic dimensions of income inequality. How much of national income is paid to capital and how much to labor? What determines the gap in wages between workers with different skill levels, as well as variation in wages within skill groups? How have changes in technology, openness to trade, government policy, and the quantities of factors of production contributed to changes in these relative returns? What determines the aggregate quantities of different factors of production as well as their distribution among individuals? How does inequality feed back to affect macroeconomic stability and long term growth?

**ECON 1570. The Economics of Latin Americans.**

This course introduces students to the economic study of Latin Americans (both in the US and abroad). Topics include the determinants of economic development, institutions and growth, imperialism, conflict, immigration and discrimination.

**ECON 1590. The Economy of China since 1949.**

This course examines the organization, structure, and performance of the economy of China. Emphasis is placed on the changing economic system including the roles of planning and markets and government economic strategy and policies. The pre-reform period (1949-78) receives attention especially as it influences developments in the market-oriented reform period since 1978. Topics include rural and urban development, industrialization and structural change, rural-urban migration, income inequality and growth, the role of international trade and investment. Both analytical and descriptive methods are used.

**ECON 1620. Introduction to Econometrics.**

Probability and statistical inference. Estimation and hypothesis testing. Simple and multiple regression analysis. Applications emphasized. Weekly one-hour computer conference required.

**ECON 1629. Applied Research Methods for Economists.**

This class will cover the basics of applied research in economics. We will cover how we use economic theory to formulate a hypothesis to test and how we use data to test our hypothesis. As part of the coursework, students will be exposed to topics across multiple fields of applied economic research (eg, health, labor, political economy, urban economics, development, etc) that can be explored in greater detail in more advanced classes. Students will read and discuss papers published in professional journals and perform data analysis.

**ECON 1630. Mathematical Econometrics I.**

Advanced introduction to econometrics with applications in finance and economics. How to formulate and test economic questions of interest. The multivariate linear regression model is treated in detail, including tests of the model's underlying assumptions. Other topics include: asymptotic analysis, instrumental variable estimation, and likelihood analysis. Convergence concepts and matrix algebra are used extensively.

**ECON 1640. Mathematical Econometrics II.**

Continuation of ECON 1630 with an emphasis on econometric modeling and applications. Includes applied topics from labor, finance, and macroeconomics. Prerequisite: ECON 1630. Enrollment limited to 100.

**ECON 1650. Financial Econometrics.**

Financial time series, for example, asset returns, options and interest rates, possess a number of stylized features that are analyzed using a specific set of econometric models. This course deals with an introduction to such models. It discusses time series models for analyzing asset returns and interest rates, (GARCH) models to explain volatility, models to explain extreme events which are used for the Value at Risk and models for options prices. Enrollment limited to 100.

**ECON 1660. Big Data.**

The spread of information technology has led to the generation of vast amounts of data on human behavior. This course explores ways to use this data to better understand the societies in which we live. The course weaves together methods from machine learning (OLS, LASSO, trees) and economics (reduced form causal inference, economic theory, structural modeling) to answer real world questions in a sequence of projects. We will use these projects as a backdrop to weigh the importance of causality, precision, and computational efficiency. Knowledge of basic econometrics and programming is assumed.

**ECON 1670. Advanced Topics in Econometrics.**

This class will present advanced topics in Econometrics. The focus will be on cross-sectional methods; the class will start with some basic results needed for any advanced econometrics work, before giving an introduction to asymptotic and identification techniques and concepts, with some applications.

**ECON 1710. Investments I.**

The function and operation of asset markets; the determinants of the prices of stocks, bonds, options, and futures; the relations between risk, return, and investment management; the capital asset pricing model, normative portfolio management, and market efficiency.

**ECON 1720. Corporate Finance.**

A study of theories of decision-making within corporations, with empirical evidence as background. Topics include capital budgeting, risk, securities issuance, capital structure, dividend policy, compensation policy, mergers and acquisitions, leveraged buyouts and corporate restructuring.

**ECON 1730. Venture Capital, Private Equity, and Entrepreneurship.**

This course will use a combination of lectures and case discussions to prepare students to make decisions, both as entrepreneurs and venture capitalists, regarding the financing of rapidly growing firms. The course will focus on the following five areas:

1. Business valuation
2. Financing
3. Venture Capital Industry
4. Employment
5. Exit

**ECON 1740. Mathematical Finance.**

The course is an introduction to both the economics and the mathematics of finance. Concentrating on the probabilistic theory of continuous arbitrage pricing of financial derivatives, it provides full treatment of Black-Scholes option pricing and its extensions to the case of stochastic volatility and VIX derivatives. More generally, the techniques of change of measure and risk-neutralization are extensively studied, including in the context of fixed-income securities. Finally, implications for financial econometrics (stochastic volatility processes, models of stochastic discount factors) are briefly discussed.

**ECON 1750. Investments II.**

Individual securities: forwards, futures, options and basic derivatives, pricing conditions. Financial markets: main empirical features, equity premium and risk-free rate puzzles, consumption based asset pricing models, stock market participation, international diversification, and topics in behavioral finance.

**ECON 1760. Financial Institutions.**

This course analyzes the role of financial institutions in allocating resources, managing risk, and exerting corporate governance over firms. After studying interest rate determination, the risk and term structure of interest rates, derivatives, and the role of central banks, it takes an international perspective in examining the emergence, operation, and regulation of financial institutions, especially banks.

**ECON 1770. Fixed Income Securities.**

The fixed income market is much larger than the stock market in the U.S. Topics covered in this course include basic fixed income securities, term structure, hedging interest rate risk, investment strategies, fixed income derivatives, mortgage-backed securities and asset-backed securities.

**ECON 1780. Advanced Topics in Corporate Finance.**

This advanced, case-based seminar is focused on delving deeply into several key pillars of corporate finance: valuation, financing, cash management, and, importantly, business ethics. We will build upon concepts presented in earlier finance courses, in particular, ECON 1710 and ECON 1720, and will use MBA-level cases to explore in much greater detail several concepts introduced in these classes. This course is rigorous - we will be analyzing at least one case each week and qualitative and quantitative case write-ups will be required throughout the semester, as well as a comprehensive final project. We will have guest speakers throughout the semester.

**ECON 1820. Theory of Behavioral Economics.**

This course provides a formal introduction to behavioral economics, focusing mostly on individual decision making. For different choice domains, we start by analyzing the behavior implied by benchmark models used by economists (e.g. rational choice, expected utility, exponential discounting). Experimental and empirical evidence is then used to highlight some limitations of these models, and to motivate new models that have been introduced to account for these violations. We will cover, for instance, models of limited attention, non-expected utility, and hyperbolic discounting.

**ECON 1850. Theory of Economic Growth.**

Analysis of the fundamental elements that determine economic growth. It examines the role of technological progress, population growth, income inequality, and government policy in the determination of (a) the pattern of economic development within a country, and (b) sustainable differences in per capita income and growth rates across countries. Enrollment limited to 100.

**ECON 1860. The Theory of General Equilibrium.**

Existence and efficiency of equilibria for a competitive economy; comparative statistics; time and uncertainty. Enrollment limited to 100.

**ECON 1870. Game Theory and Applications to Economics.**

Study of the elements of the theory of games. Non-cooperative games. Repeated games. Cooperative games. Applications include bargaining and oligopoly theory. Enrollment limited to 100.

**ECON 1960. Honors Tutorial for Economics Majors.**

Students intending to write an honors thesis in economics must register for this class. The goal is to help students with the process of identifying and defining feasible topics, investigating relevant background literature, framing hypotheses, and planning the structure of their thesis. Each student must find a thesis advisor with interests related to their topic and plan to enroll in ECON 1970 during the final semester of senior year.

Note this course does not count toward Economics concentration credit.

**ECON 1970. Independent Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ECON 2010. Mathematics for Economists.**

Techniques of mathematical analysis useful in economic theory and econometrics. Linear algebra, constrained maximization, difference and differential equations, calculus of variations.

**ECON 2020. Applied Economics Analysis.**

This course introduces students to basic concepts in software engineering and scientific computing as preparation for conducting frontier research in all fields of economics. Topics in software engineering will include version control, automation, abstraction, parallel processing, and object-oriented programming. Topics in scientific computing and numerical methods will include programming basics, floating-point arithmetic, numerical differentiation and integration, equation-solving, and numerical optimization. Coding will be in Python and applications will focus on topics likely to arise in economics research. Key concepts will be introduced in interactive lectures and reinforced in in-class group work and at-home assignments.

**ECON 2030. Introduction to Econometrics I.**

The probabilistic and statistical basis of inference in econometrics.

**ECON 2040. Econometric Methods.**

Applications of mathematical statistics in economics. The nature of economic observations, cross-section and time series analysis, the analysis of variance and regression analysis, problems of estimation.

**ECON 2050. Microeconomics I.**

Decision theory: consumer's and producer's theory; general competitive equilibrium and welfare economics: the Arrow-Debreu-McKenzie model; social choice and implementation.

**ECON 2060. Microeconomics II.**

Economics of imperfect information: expected utility, risk and risk aversion, optimization under uncertainty, moral hazard, and self-selection problems. Economics of imperfect competition: monopoly; price discrimination; monopolistic competition; market structure in single shot, repeated and stage games; and vertical differentiation.

**ECON 2070. Macroeconomics I.**

Consumption and saving, under both certainty and uncertainty; theory of economic growth; real business cycles; investment; and asset pricing.

**ECON 2080. Macroeconomics II.**

Money, inflation, economic fluctuations and nominal rigidities, monetary and fiscal policy, investment, unemployment, and search and coordination failure.

**ECON 2090. Topics in Microeconomics: Decision Theory and Evidence.**

Decision theory is the use of axiomatic techniques to understand the observable implications of models of choice. It is central to the incorporation of psychological insights into economics, and provides a vital link between theory and experimental economics. This course covers standard economic models of choice in different domains - choice under risk, choice under uncertainty and intertemporal choice. It looks at key topics from behavioral economics: choice with incomplete information, reference dependent preferences, temptation and self control, the Allais paradox, ambiguity aversion and neuroeconomics. In each case it relates the predictions of theory to experimental data on behavior.

**ECON 2130. Topics in Monetary Economics.**

Business cycle analysis with an emphasis on heterogeneous-agent economics and the interaction between business cycles and economic growth.

**ECON 2150. Market Design.**

This is a theoretical course in market design, specifically studying the theory and applications of matching. It is designed for students interested in market and mechanism design, and may also be of interest to students interested in utilizing applied theory in their research. The course will begin with an overview of matching markets, but will quickly move to recent advances and open research topics.

**ECON 2160. Risk, Uncertainty, and Information.**

Advanced topics in the theories of risk, uncertainty and information, including the following: Decision making under uncertainty: expected and non-expected utility, measures of risk aversion, stochastic dominance. Models with a small number of agents: optimal risk-sharing, the principal-agent paradigm, contracts. Models with a large number of agents: asymmetric information in centralized and decentralized markets. Implementation theory.

**ECON 2170. Applied Economic Theory.**

In this course we will survey some classic theoretical papers published post-1980, drawn from a variety of fields in economics. Our emphasis will be on mastering modeling techniques in these papers, with an eye toward applying those techniques to new problems. The papers fall within the broad areas of industrial organization, information economics and the theory of incentives.

**ECON 2180. Game Theory.**

Non-cooperative games, dominance, Nash equilibrium, refinements. Cooperative games, core, bargaining set, equilibrium in normal form games. Implementation. Repeated games.

**ECON 2190A. Cooperative Game Theory.**

No description available.

**ECON 2190B. General Equilibrium Theory.**

No description available.

**ECON 2190C. Topics in Economic Theory.**

No description available.

**ECON 2190D. Topics on Game Theory.**

First, we will discuss the several elements that characterize a two-sided matching market and the concept of setwise-stability versus core. Then, we will model several of these markets (one-to-one, many-to-one and many-to-many, in the discrete and continuous cases) under the game-theoretic approach and will define for all of them the stability concept, establishing its relationship with the core and the competitive equilibrium concepts. Afterwards, we will introduce the theory of stable matching model by focusing on both the cooperative and non-cooperative aspects of the one-to-one matching markets.

**ECON 2190E. Topics in Economics: Economics and Psychology.**

This course is about the challenges that economic theorists face in their quest for economic models in which decision makers have a "richer psychology" than prescribed by textbook models. The enrichment takes two forms: (i) broadening the set of considerations that affect decision makers' behavior beyond simple, material self-interest; (ii) relaxing the standard assumption that agents have unlimited ability to perceive and analyze economic environments, and that they reason about uncertainty as "Bayesian statisticians". Special emphasis will be put on the implications of "psychologically richer" models on market behavior.

**ECON 2210. Political Economy I.**

An introduction to political economy, focusing especially on the political economy of institutions and development. Its purpose is to give a good command of the basic tools of the area and to introduce at least some of the frontier research topics. The readings will be approximately evenly divided between theoretical and empirical approaches.

**ECON 2260. Political Economy I.**

This first course in political economy provides theoretical and empirical coverage of the application of economic analysis to political behavior and institutions. This course is designed for students wishing to specialize in political economy but may also be useful for students specializing in related areas, such as development economics and macroeconomics. After starting with a basic overview of candidates and voters, we then turn to specific topics in the areas of electoral systems, legislatures and legislative bargaining, the role of the media, local public finance, and fiscal federalism.

**ECON 2270. Political Economy II.**

This is the second course in the political economy sequence. It continues the theoretical and empirical coverage of the economic analysis to political behavior and institutions. This course is designed for students wishing to specialize in political economy. A variety of topics will be covered paying special attention to the formation of skills necessary to become a producer of research and moving away from being just a consumer.

**ECON 2320. Applied Methods.**

This course examines identification issues in empirical microeconomics. The focus on the sensible application of econometric methods to empirical problems in economics and policy research. The course examines issues that arise when analyzing non-experimental data and provides a guide for tools that are useful for applied research. By the end of the course, students should have a firm grasp of the types of research designs and methods that can lead to convincing analysis and be comfortable working with large-scale data sets.

**ECON 2330. Topics in Labor Economics.**

The course introduces students to procedures used to extract evidence from data and to perform rigorous causal inference in order to evaluate public policy on issues such as schooling, the return to education and returns on late intervention programs. Econometric methods, such as Instrumental Variable, Matching, Control Functions, Self Selection Models and Discrete Choice as well as Panel Data Methods, are discussed in detail.

**ECON 2350. Inequality and Social Policy.**

This is a survey course about economic and social inequality with a focus on the applied methods used to examine inequality. The course will provide a broad perspective on the causes and consequences of inequality, develop an understanding of the data and methods used to measure and analyze changes in income and wellbeing, and review selected topics relating to anti-poverty and social policy programs.

**ECON 2350B. Inequality and Public Policies.**

This course on economic inequality provides an overview of the most recent empirical research on the extent, the anatomy and the historical evolution of inequality. In addition to these descriptives, it focuses on the causes of inequality, covering research designs from the research frontier. The course also reviews the role of government policies, such as anti-poverty programs and progressive taxes on income and on capital, in affecting inequality.

**ECON 2360. Economics of Health and Population.**

This course is designed to do the following three things: 1) build on your knowledge of the methodological problems and approaches in applied microeconomics with applications from the health economics literature; 2) survey the major topics in Health Economics, and 3) better prepare you to write an empirical microeconomics thesis. By the end of this course you should understand how to draw credible inference using non-experimental data and be able to contribute to public policy debates regarding health and medical care in the US.

**ECON 2370. Inequality: Theory and Evidence.**

This course uses economic theory to study the problems of inequality. The emphasis is two-fold: (1) to explain persistent resource disparities between individuals or social groups; and, (2) to assess the welfare effects of various equality-promoting policies. Topics include racial stereotypes, residential segregation, distributive justice, incentive effects of preferential policies, dysfunctional identity, and endogenous inequality due to the structure of production and exchange.

**ECON 2380. The Economics of Children and Families.**

We will consider the current research in economic behavior related to children, child health, and child economic and social well-being. We begin with the model of human capital development and the technology of skill formation and then proceed to empirical work. Individual topics covered will include: models of human capital and the technology of skill formation, the fetal origins of disease, non-marital and teen fertility, the evolution of gaps in human capital, models of parental investment, pre-school environments, the impact of income and in-kind transfer programs on child health and well-being, neighborhood influences, adolescent risky behavior.

**ECON 2410. Urbanization.**

The first part of the course covers social interactions, productivity spillovers, systems of cities models, urban growth, and rural-urban migration. The second part of the course covers topics such as durable housing, land market regulation and exclusion, and local political economy. Besides covering basic theoretical models, emphasis is placed on working through recent empirical papers on both the USA and developing countries. Prerequisites: ECON 2050 and 2060.

**ECON 2420. The Structure of Cities.**

This course covers standard urban land use theory, urban transportation, sorting across political jurisdictions, hedonics, housing, segregation and crime. Empirical examples are taken primarily from the United States. After taking the course, students will have an understanding of standard urban theory and of empirical evidence on various important applied urban topics. In addition, students will gain practical experience in manipulating spatial data sets and simulating urban models.

**ECON 2450. Exchange Scholar Program.****ECON 2470. Industrial Organization.**

The focus of this course will be on empirical models for understanding the interactions between firms and consumers in imperfectly competitive markets. Lectures and problem sets will teach canonical models and methods; class discussion will focus on applications of these methods, especially applications outside of traditional areas of industrial organization. Students who take this class will be prepared to conduct research in industrial organization or to "export" methods from industrial organization to other areas of applied microeconomics.

**ECON 2480. Public Economics.**

Theoretical and empirical analysis of the role of government in private economies. Topics include welfare economics, public goods, externalities, income redistribution, tax revenues, public choice, and fiscal federalism.

**ECON 2485. Public Economics I.**

This course covers core issues in the design of optimal government policies, and the empirical analysis of those policies in the world. In addition, this course will familiarize students with the basic empirical methods and theoretical models in applied microeconomics. Emphasis is placed on connecting theory to data to inform economic policy. Specific topics include efficiency costs and incidence of taxation, income and corporate taxation, optimal tax theory, tax expenditures and tax-based transfer programs, welfare analysis in behavioral models, and social security and retirement policy.

**ECON 2490. Public Finance II.**

This course examines empirical work on (1) individual taxation and (2) human capital production. The goal of the course will be to provide graduate students with an overview of recent empirical methods and findings in these areas, and to identify promising research questions for their own work.

**ECON 2510. Economic Development I.**

This course covers issues related to labor, land, and natural resource markets in developing countries, in partial and general equilibrium settings. Topics covered include: The agricultural household model, under complete and incomplete market assumptions; household and individual labor supply, migration, self-employment, and the informal sector; rental market frictions and sharecropping arrangements; and environmental externalities (e.g., pollution, water usage, etc.), and sustainable development.

**ECON 2520. Economic Development II.**

This course deals with the economic analysis of institutions, with a particular focus on community-based institutions in developing countries. Institutions covered in this course includes cooperatives, ROSCAs, networks, marriage and the family.

**ECON 2530. Behavioral and Experimental Economics.**

An introduction to the methodology of experimental economics with an emphasis on experiments designed to illuminate problems in organizational design and emergence of institutions, and experiments investigating the operation of social and social-psychological elements of preference such as altruism, inequality aversion, reciprocity, trust, concern for relative standing, envy, and willingness to punish norm violators. Experiments studied will include ones based on the prisoners' dilemma, dictator game, ultimatum game, and especially the voluntary contribution mechanism (public goods game) and the trust game. Junior and seniors in the APMA-Economics, Math-Economics and CS-Economics may enroll with instructor's permission.

**ECON 2580. International Trade.**

General equilibrium analysis of the theory of international trade and trade policy under perfect competition; trade under imperfect competition; strategic trade policy; trade and growth; and the political economy of trade policy determination. Empirical analysis of trade theories and policy. Additional topics include the theory of preferential trading areas, trade and labor, and the analytics of trade policy reform.

**ECON 2590. Topics in International Economics.**

Advanced theoretical and empirical research topics in international economics emphasizing positive and normative analysis of trade, trade policy and international trading agreements, policy reform and stabilization, exchange rate determination, sovereign debt and currency crises and optimum currency areas.

**ECON 2600. Bayesian and Structural Econometrics.**

This course will cover a number of topics in Bayesian econometrics and estimation of structural dynamic discrete choice models. The Bayesian econometrics part of the course will start with introductory textbook material (Geweke, 2005, Contemporary Bayesian Econometrics and Statistics, denoted by G). A list of 11 topics with corresponding readings is given below. Topics 1-5 will be covered. If time permits, a subset of topics 6-11 determined by interests of the course participants will be covered as well. Readings marked with asterisk \* are not required.

**ECON 2610. Applied Econometrics.**

Topics in applied econometrics. Both cross-sectional and time series issues will be discussed. Special emphasis will be placed on the link between econometric theory and empirical work.

**ECON 2620. Topics in Econometrics.**

This course will begin with a survey of the literature on identification using instrumental variables, including identification bounds, conditional moment restrictions, and control function approaches. The next part of class will cover some of the theoretical foundations of machine learning, including regularization and data-driven choice of tuning parameters. We will discuss in some detail the canonical normal means model, Gaussian process priors, (empirical) Bayes estimation, and reproducing kernel Hilbert space norms. We will finally cover some selected additional topics in machine learning, including (deep) neural nets, text as data (topics models), multi-armed bandits, and data visualization.

**ECON 2630. Econometric Theory.**

Standard and generalized linear models, simultaneous equations, maximum likelihood, Bayesian inference, panel data, nonlinear models, asymptotic theory, discrete choice, and limited dependent variable models.

**ECON 2640. Microeconometrics.**

Topics in microeconometrics treated from a modern Bayesian perspective. Limited and qualitative dependent variables, selectivity bias, duration models, panel data.

**ECON 2660. Recent Advances in the Generalized Method of Moments.**

Method of Moments (GMM) and Empirical Likelihood (EL). Kernel methods for density and regression estimation. Optimal instruments and local EL. Applications to non-linear time series models, Euler equations and asset pricing.

**ECON 2820. Discrete Dynamical Systems and Application to Intertemporal Economics.**

This course will focus on the qualitative analysis of discrete dynamical systems and their application for Intertemporal Economics.

**ECON 2830. Economic Growth and Comparative Development.**

This course will explore the origins of the vast inequality in income per capita across countries, regions and ethnic groups. It will analyze the determinants of growth process over the entire course of human history and will examine the role of deeply-rooted geographical, institutional, cultural, and genetic factors in the observed pattern of uneven development across the globe.

**ECON 2840. Empirical Analysis of Economic Growth.**

Examines economic growth, focusing on the effects of technological change, fertility, income inequality, and government policy. ECON 2830 is strongly recommended.

**ECON 2850. Theory of Innovation-Based Growth.**

Issues concerning innovation-based growth theory, including scale effects and effects of research and development versus capital accumulation. Interactions between growth and phenomena such as fluctuations, unemployment, natural resources, competition, regulation, patent policy, and international trade.

**ECON 2860. Comparative Development.**

Weighing the shadow of history on contemporary economic performance occupies an increasing part of the agenda among growth and development economists. This course will focus on recent contributions in the literature of the historical determinants of comparative development paying particular attention on how to integrate the use of Geographic Information Systems (GIS) in the research inquiry. The goal is to get you thinking about the big historical processes that have shaped the modern world. We will go over background concepts, critically review recent works and talk about new research designs, like that of spatial regression discontinuity.

**ECON 2890C. Topics in Macro and Monetary Economics.**

This is a graduate class that covers selected topics at the intersection of macroeconomics and monetary economics, for students in the second year of the PhD and above. The leading theme of the class is the current economic crisis and how it can be modeled. The syllabus is evolving.

**ECON 2890D. Topics in Macroeconomics, Development and Trade.**

This is a graduate class that covers selected topics at the intersection of macroeconomics, economic development and trade, for students in the second year of the PhD and above. The leading theme of the class is the determinants of the observed cross-country differences in income per capita and growth rates, with a focus on the long run. We start by reviewing theories where factor markets function perfectly and only aggregates matter. We then move to non-aggregative theories, placing special emphasis on theories of financial frictions. We spend some time studying the stochastic growth model with partially uninsurable idiosyncratic risk.

**ECON 2920A. Advanced Econometrics - Microeconometrics from a Semiparametric Perspective.**

This course is concerned with a rigorous, state-of-the-art introduction to Micro-econometrics. In particular, we will review many of the more recent contributions in Microeconomic Theory. While the focus of this course is theoretical, we will also be concerned with applications and the applicability of these methods. More specifically, we will consider nonparametric regression and density estimation methods, as well as methods and models for binary and categorical dependent variables, for limited dependent variables in general, and for models of selection. We will also discuss more general nonparametric IV models. Prerequisites are: Introductory Econometrics (at the level of the Wooldridge (2002)).

**ECON 2920B. Topics in Game Theory.**

No description available.

**ECON 2930. Workshop in Applied Economics.**

No description available.

**ECON 2950. Workshop in Econometrics.**

No description available.

**ECON 2960. Workshop in Macroeconomics and Related Topics.**

No description available.

**ECON 2970. Workshop in Economic Theory.**

No description available.

**ECON 2971. Race and Inequality Seminar.**

This is a workshop primarily for graduate students and faculty in the Department of Economics where original research on issues of race and inequality are presented by external visitors, along with Brown faculty and graduate students. No course credit.

**ECON 2980. Reading and Research.**

Individual research projects. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ECON 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## Education

### Chair

Tracy L. Steffes

The Department of Education focuses its scholarly and teaching efforts on the study of human learning and development, the history of education, teaching, school reform, and education policy. Students study education from a variety of disciplinary perspectives, including anthropology, economics, history, political science, psychology, and sociology. The department offers a wide range of courses designed for students seeking an understanding of the many facets of education from multidisciplinary perspectives.

For additional information, please visit the department's website: <http://www.brown.edu/academics/education/>

## Education Studies Concentration Requirements

Welcome to Education Studies! Undergraduate concentrators study education in a rigorous, multi-dimensional way that allows them to

investigate thorny questions of opportunity and equity in real-world settings. Our ever-expanding array of education courses allows undergraduates to explore fundamental issues of race, class, power, privilege, equity and identity through the lens of education. From introductory courses to advanced seminars, our classes examine how to teach for social justice, how students learn and develop, and how education policies promote or limit opportunity and equity.

Our faculty includes experts in teaching and learning, human development, education policy, and the history of education. We take a multi-disciplinary approach to the field, offering courses from perspectives in anthropology, economics, history, human development, political science, social work, and sociology, among others.

For more information, please visit our website (<https://education.brown.edu/academics/undergraduate>) or contact John Papay ([john\\_papay@brown.edu?subject=Education concentration](mailto:john_papay@brown.edu?subject=Education%20concentration)), Director of Undergraduate Studies.

## Concentration Requirements

Redesigned for the 2020-2021 academic year, the concentration in Education Studies requires a total of 10 credit-bearing courses and 1 non-credit-bearing experiential component, allowing students to develop a personalized plan of study to structure their Education experiences. The new Education Studies coursework is as follows:

- 3 Core Courses: 2 introductory courses (EDUC 0300 and EDUC 0750) will provide students with a broad-based introduction to the field of education and empirical methods used in the field, while 1 Senior Seminar, EDUC 1900, offers a culmination of students' experiences in the concentration.
- 4 Specialization Courses: Students must take 4 courses total in their chosen area of emphasis (Education Policy Analysis; Human Development; Education and Inequality; Education for Social Justice; Adolescence; Immigrant Families, Communities & Education; Child Development; Teaching and Learning; Education and Economics; or any related topic of interest) within the education field.
- 3 Elective courses related to the field of education and the student's field of study. Only 1 independent study can count towards concentration requirements. No more than 3 courses in an Education Studies concentration can come from other departments outside of Education, and all courses should be approved by the student's advisor and meaningfully tied to education.
- 1 Experiential Component: By the end of fall semester of senior year, students must complete an Experiential Component designed to promote practice-based engagement with the field of education and reflect on their experiences, tying them into their academic learning in the Education Studies concentration. Students can satisfy this requirement in one of three ways:
  - a. By completing an existing Community-Based Learning and Research (CBLR) in the Department.
  - b. By writing a paper reflecting on their experience through the lens of their coursework in the Department. The student's academic advisor will assess the paper. It is to be completed independently of coursework and is not credit bearing (although students may do it as an additional assignment associated with a class they are taking).
  - c. By completing the reflection in an independent study-like course "Reflecting on Fieldwork."

### Education Studies Concentration Plan of Study

## Foundational Courses Required for Education Studies Concentration

EDUC 0300	Introduction to Education and Society: Foundations of Opportunity and Inequality
EDUC 0750	Evidence and Method in Education Research
EDUC 1900	Senior Seminar

## Other Courses in Education Studies Concentration

### 4 Courses in Area of Emphasis (could include any 4 of the following)

EDUC 0410A	New Faces, New Challenges: Immigrant Students in U.S. Schools
EDUC 0410B	Controversies in American Education Policy: A Multidisciplinary Approach
EDUC 0410G	The Afterschool Hours
EDUC 0600	Juveniles for Justice: Youth Civic Engagement and Activism
EDUC 0610	Brown v. Board of Education
EDUC 0620	Cradle of Inequality: The Role of Families, Schools, and Neighborhoods
EDUC 0800	Introduction to Human Development and Education
EDUC 0860	Sports in American Society
EDUC 0900	Fieldwork and Seminar in Secondary Education
EDUC 1010	The Craft of Teaching
EDUC 1020	The History of American Education
EDUC 1030	Comparative Education
EDUC 1040	Sociology of Education
EDUC 1045	Sociology of Higher Education
EDUC 1050	History of African-American Education
EDUC 1060	Politics and Public Education
EDUC 1090	Adolescent Literature
EDUC 1100	Introduction to Qualitative Research Methods
EDUC 1110	Introductory Statistics for Education Research and Policy Analysis
EDUC 1130	Economics of Education I
EDUC 1150	Education, the Economy and School Reform
EDUC 1270	Adolescence in Social Context
EDUC 1380	Language and Education Policy in Multilingual Contexts
EDUC 1430	Social Psychology of Race, Class, and Gender
EDUC 1450	The Psychology of Teaching and Learning
EDUC 1520	Ethnic Studies & Education
EDUC 1580	Cross-Cultural Perspectives on Child Development
EDUC 1650	Policy Implementation in Education
EDUC 1690	Literacy, Community, and the Arts: Theory into Practice
EDUC 1720	Urban Schools in Historical Perspective
EDUC 1760A	Beauty Pageants as an American Institution
EDUC 1730	American Higher Education in Historical Context
EDUC 1850	Moral Development and Education
EDUC 1860	Social Context of Learning and Development
EDUC 1870	Education and Human Development in East Asia
EDUC 1890	Family Engagement in Education

**3 Foundational course in Education (from the table above)** 3

**3 Electives** 3

<b>1 Experiential Component</b>	0
Total Credits	10

## Honors

Concentrators seeking to graduate with honors must apply for honors candidacy by the end of their sixth semester. Successful candidates must meet all requirements for the concentration; maintain a minimum grade average that includes more A's than B's in Education courses (a B must be counterbalanced by two A's); and successfully complete EDUC 1990 and EDUC 1991, in which they write a senior thesis under the guidance of a thesis advisor. Honors are awarded on the basis of thesis quality. Students whose theses meet or exceed the standards established in the Department Rubric earn honors upon graduation. Students interested in writing an Honors thesis should contact David Rangel, the Honors/Capstone Advisor.

## Capstone

Capstones are voluntary, student-initiated projects or experiences outside the classroom that build on and contribute to students' Education Studies concentration. They can take various forms, including a research project, website design, curriculum design, policy analysis, or scholarly paper. Capstones can be designed and executed in the senior year, or can be based on a previous experience that the student wants to explore further in some way, such as an internship or teaching experience. While capstones do not confer academic credit or departmental honors, students who complete capstones will be recognized at the department graduation ceremony and will have the opportunity to present their work at a conference in the spring of their senior year. Through capstones, students have the opportunity to work closely with a faculty member in an area of their interest and are able to reflect on and extend their learning in the concentration.

## Concurrent Baccalaureate/Master of Arts in Teaching Degree

Beginning in 2020-2021, the Education Department offers a concurrent degree program in which Brown undergraduates can apply to earn a B.A. or B.S. in a subject field (English, history, math, biology, chemistry, physics, engineering and allied concentrations) and MAT degree in 5 years.

Brown undergraduates can apply through the Education Department during their junior year. During their first four years, candidates must complete all baccalaureate requirements and may take up to two of the required graduate courses. In their fifth year, they will complete the remaining required graduate courses, including the one-year teaching residency. The minimum requirements to complete both degrees are 36 credits, of which a maximum of two may count toward the concurrent baccalaureate/MAT degree.

## Engaged Scholars Program

The Engaged Scholars Program (<http://brown.edu/go/engagedscholars>) (ESP) in Education is intended for Education Studies concentrators interested in making connections between their concentration curriculum and long-term engagement, including internships, public service, humanitarian and development work, school-based education work, social service in education, or other forms of community and clinical involvement. The program combines preparation, experience, and reflection to provide students with opportunities to integrate academic learning and social engagement. (Note: This program is separate from the department's required experiential component.). Students can learn more about the program and its requirements on the ESP in Education website (<https://education.brown.edu/academics/undergraduate/engaged-scholars-program>).

## Education Graduate Program

The Department of Education offers two graduate programs: a Master of Arts in Teaching (M.A.T.) and a Master of Arts (A.M.) in Urban Education Policy.

### MAT Program Information and Requirements

The MAT program offers a master's degree in one of four secondary education disciplines: English, social studies, science (biology, chemistry, or physics/engineering), or mathematics. The MAT program has an intensive one-year, full-time format, beginning with a summer semester in June and ending the following May. The program is certification-eligible for Rhode Island state teacher certification in secondary education (grades 7-12). Rhode Island is a member of the Interstate Certification Compact (ICC) (<http://www.ride.ri.gov/TeachersAdministrators/EducatorCertification.aspx>), which has reciprocal agreements with 44 states.

MAT program graduate students complete 8 credits in total, consisting of a mix of one-credit and half-credit courses, including the summer practicum and academic-year student teaching.

## English - MAT

The following plan of study is required of all secondary English MAT students:

EDUC 2500	Foundations of Teaching and Learning
EDUC 2510A	Educational Theory and Practice in Teaching English 1
EDUC 2515	Learning Theory and Special Populations
EDUC 2520A	Educational Theory and Practice in Teaching English II
EDUC 2525	Instructional Design, Planning, and Integrating Technology
EDUC 2530A	Educational Theory and Practice III: English
EDUC 2535	Teaching Literacy and Language to Emerging Bilinguals Across the Disciplines I
EDUC 2545	Teaching Literacy and Language to Emerging Bilinguals Across the Disciplines II
EDUC 2555	Assessment and Using Data to Support Student Learning
EDUC 2565	Practicum and Seminar I
EDUC 2575	Practicum and Seminar II
EDUC 2385	Education Inequality and Community Assets: Contexts and Change

## Social Studies - MAT

The following plan of study is required of all secondary Social Studies MAT students:

EDUC 2500	Foundations of Teaching and Learning
EDUC 2510B	Educational Theory and Practice I: Social Studies
EDUC 2515	Learning Theory and Special Populations
EDUC 2520B	Educational Theory and Practice in Teaching Social Studies II
EDUC 2525	Instructional Design, Planning, and Integrating Technology
EDUC 2530B	Educational Theory and Practice in Teaching Social Studies III
EDUC 2535	Teaching Literacy and Language to Emerging Bilinguals Across the Disciplines I
EDUC 2545	Teaching Literacy and Language to Emerging Bilinguals Across the Disciplines II
EDUC 2555	Assessment and Using Data to Support Student Learning
EDUC 2565	Practicum and Seminar I
EDUC 2575	Practicum and Seminar II

EDUC 2385	Education Inequality and Community Assets: Contexts and Change
-----------	--

## Science - MAT

The following plan of study is required of all secondary Science MAT students:

EDUC 2500	Foundations of Teaching and Learning
EDUC 2510C	Educational Theory and Practice 1: Science
EDUC 2515	Learning Theory and Special Populations
EDUC 2520C	Educational Theory and Practice for Science II
EDUC 2525	Instructional Design, Planning, and Integrating Technology
EDUC 2530C	Educational Theory and Practice in Teaching Science III
EDUC 2535	Teaching Literacy and Language to Emerging Bilinguals Across the Disciplines I
EDUC 2545	Teaching Literacy and Language to Emerging Bilinguals Across the Disciplines II
EDUC 2555	Assessment and Using Data to Support Student Learning
EDUC 2565	Practicum and Seminar I
EDUC 2575	Practicum and Seminar II
EDUC 2385	Education Inequality and Community Assets: Contexts and Change

## Math - MAT

The following plan of study is required of all secondary Math MAT students:

EDUC 2500	Foundations of Teaching and Learning
EDUC 2510D	Educational Theory and Practice in Teaching Mathematics 1
EDUC 2515	Learning Theory and Special Populations
EDUC 2520D	Educational Theory and Practice in Teaching Mathematics II
EDUC 2525	Instructional Design, Planning, and Integrating Technology
EDUC 2530D	Educational Theory and Practice in Teaching Mathematics III
EDUC 2535	Teaching Literacy and Language to Emerging Bilinguals Across the Disciplines I
EDUC 2545	Teaching Literacy and Language to Emerging Bilinguals Across the Disciplines II
EDUC 2555	Assessment and Using Data to Support Student Learning
EDUC 2565	Practicum and Seminar I
EDUC 2575	Practicum and Seminar II
EDUC 2385	Education Inequality and Community Assets: Contexts and Change

For more information on MAT admission, program requirements, and state certification requirements, please visit the following website:

<https://education.brown.edu/academics/graduate/master-arts-teaching>

## Urban Education Policy Program Information and Requirements

Urban Education Policy (UEP) program graduate students complete nine (9) courses in total, including a required nine-month internship that counts as one course.

UEP students must complete the following seven core courses:

EDUC 2320	Quantitative Research Methods and Data Analysis
EDUC 2330	Urban Education Policy: System and Governance
EDUC 2350	Economic Analysis and Urban Education Policy
EDUC 2360	Policy Analysis and Program Evaluation for Education
EDUC 2380	UEP Internship Seminar
EDUC 2385	Education Inequality and Community Assets: Contexts and Change
EDUC 2390	Race and Democracy in Urban Education Policy

## UEP Electives

In addition to the seven courses listed above, UEP students must complete two (2) electives, approved by the student's faculty advisor, in areas that can include public policy, schools and school reform, social contexts of education, economic analysis, urban politics, quantitative analysis, research methods, schools and communities, and organization and leadership. A partial list of these elective courses could include any two of the following:

EDUC 1010	The Craft of Teaching
EDUC 1020	The History of American Education
EDUC 1040	Sociology of Education
EDUC 1050	History of African-American Education
EDUC 1060	Politics and Public Education
EDUC 1100	Introduction to Qualitative Research Methods
EDUC 1380	Language and Education Policy in Multilingual Contexts
EDUC 1430	Social Psychology of Race, Class, and Gender
EDUC 1450	The Psychology of Teaching and Learning
EDUC 1580	Cross-Cultural Perspectives on Child Development
EDUC 1720	Urban Schools in Historical Perspective
EDUC 1860	Social Context of Learning and Development
EDUC 1890	Family Engagement in Education
ECON 1110	Intermediate Microeconomics
ECON 1210	Intermediate Macroeconomics
ECON 1310	Labor Economics
ECON 1410	Urban Economics
ECON 1480	Public Economics
ECON 1430	The Economics of Social Policy
ECON 1620	Introduction to Econometrics
ECON 1630	Mathematical Econometrics I
ECON 1640	Mathematical Econometrics II
ECON 2030	Introduction to Econometrics I
ECON 2040	Econometric Methods
ECON 2020	Applied Economics Analysis
SOC 1050	Methods of Research in Organizations
SOC 1060	Leadership in Organizations
SOC 1120	Market and Social Surveys
SOC 2010	Multivariate Statistical Methods I
SOC 2260F	Advanced Demographic Techniques

POBS 1720	Literacy, Culture, and Schooling for the Language Minority Student
POBS 1750	Language, Culture, and Society
POBS 2020D	Theories in First and Second Language Acquisition
POBS 2020E	Research Seminar in ESL Education
PHP 2360	Developing + Testing Theory-Driven, Evidence Based Psychosocial and Behavioral Health Interventions
POLS 1310	African American Politics
POLS 1822S	The Politics of Urban Transformation
URBN 0210	The City: An Introduction to Urban Studies
URBN 1000	Fieldwork in the Urban Community
URBN 1870A	American Culture and the City
URBN 1870J	The Politics of Community Organizing
URBN 1932	The Just City: Installment I, Comparative Perspectives on Juvenile Justice Reform
ETHN 1750A	Immigrant Social Movements: Bridging Theory and Practice

For more information on the A.M. in Urban Education Policy admission and program requirements, please visit the following website:

<https://education.brown.edu/academics/graduate/urban-education-policy-am>

## Courses

### EDUC 0300. Introduction to Education and Society: Foundations of Opportunity and Inequality.

This course examines the purpose, structure, and challenges of the American educational system as well as the experiences of the diverse learners and teachers within the system. It also explores how educational institutions have served to create social mobility and opportunity, but also to perpetuate inequality across race, class, gender, and other axes of difference. The course requires no prior knowledge.

### EDUC 0410A. New Faces, New Challenges: Immigrant Students in U.S. Schools.

What challenges do immigrant students face in adapting to a new system of education? By comparing and contrasting the perspectives education stakeholders--students, teachers, administrators, and parents--this course examines a number of key contributions to the study of the immigrant experience in education, as well as a selection of memoirs and films about the pathways these newcomers take in navigating school and (trans)forming their developing identities. Enrollment limited to 19 first year students.

### EDUC 0410B. Controversies in American Education Policy: A Multidisciplinary Approach.

Introduces perspectives on education based in history, economics, sociology, and political science. Students engage foundational texts in each of these fields, using the insights gained to examine controversial issues in American education policy, including policies to address ethnic disparities in student achievement, test-based accountability, class-size reduction, and school choice. Enrollment limited to 19 first year students.

### EDUC 0410G. The Afterschool Hours.

The family and the school are seen as the two primary institutions of childhood. But what about the space in between? Over the course of the twentieth century—once compulsory schooling became law—the way American children occupied the hours between school and home became ever more important. This course examines the literature on how youth should “best” spend their afterschool time. Looking at enrichment courses, sports, work, leisure, and more, this class introduces you to the social science method of interviewing as you learn to undertake your own original research and reflect on how you spent your own afterschool hours.

**EDUC 0600. Juveniles for Justice: Youth Civic Engagement and Activism.**

This course examines the meaning of youth activism in terms of individual civic development and collective social transformation. Guiding questions include: How does youth civic engagement affect youth's understandings of themselves, their civic identity, and belonging? How do youth engage in their communities? What effect does this engagement have? What are the barriers and bridges to engagement? Is civic engagement a universal good? The course uses ethnographic cases to explore: 1) how time, place, and social context affect youth's engagement and notions of citizenship and 2) what transferable insights about citizenship, engagement, and change can be gleaned from study across contexts.

**EDUC 0610. Brown v. Board of Education.**

Using sources in history, education, and law this course will explore the landmark Supreme Court case of *Brown v. Board of Education* which found school segregation unconstitutional and challenged the entire foundation of legal segregation. We will explore the legal, political, and social issues that culminated in *Brown* and examine the development and deployment of remedies, with particular emphasis on school integration and educational equity. We will consider the legacy of *Brown* for education and explore the meaning of equity in the past and present. Enrollment limited to 20 sophomore students.

**EDUC 0620. Cradle of Inequality: The Role of Families, Schools, and Neighborhoods.**

In this Sophomore Seminar, we will examine contours of inequality that begin in early childhood and accumulate over time, with particular focus on issues of race, class, and gender. Moreover, we will examine how these factors matter in early childhood and the role of families, schools, and neighborhoods in shaping, ameliorating, and propagating larger inequalities. Through our reading and active discussion, we will develop answers to questions that motivate much inquiry into inequality: Who gets what, and why?

**EDUC 0750. Evidence and Method in Education Research.**

Understanding evidence is critical to engaging as citizens and leaders the 21st century. This is particularly true in education research, policy, and practice. Recent years have seen an explosion of empirical education research, requirements that policies be evidence-based, and rapid expansion of the use of evidence in school settings. This course will introduce students to a range of methods used to generate evidence in education. It is a required course in the Education concentration.

**EDUC 0800. Introduction to Human Development and Education.**

Introduces students to the study of human development and education from infancy through young adulthood. This course provides a broad overview of scientific and theoretical understanding of how children develop and how research is generated in the field. Major topics include biological foundations, cognition, language, emotion, social skills, and moral understanding based on developmental theories and empirical research. We will attend to variations in cultural, ethnic, gender, socioeconomic, and other forms of human diversity in social contexts (e.g., family and schools) and how the person-context fit may influence children's developmental trajectories. The course also covers educational contexts, processes, and outcomes.

**EDUC 0860. Sports in American Society.**

This course seeks to understand, analyze, and criticize sport—seen here as one of the primary institutions in the lives of Americans. Working from the basis of sporting events in the Durkheimian sense of symbolic community, we will elevate them to the status of educational and religious institutions in our everyday lives (as we interrogate them and see them in relation to these, and other, institutions as well). Using the primary lenses of gender and race this class examines sports at five different levels—professional, Olympic, NCAA, scholastic, and youth—to understand how athletics have impacted, and will continue to impact, American society.

**EDUC 0900. Fieldwork and Seminar in Secondary Education.**

Combines study of current educational issues with extensive fieldwork that allows the student to observe how these issues translate themselves into reality on a daily basis. Each student reads and discusses recent writing about educational history, theory, and practice, and observes a class in a local school for 32 hours. The final paper synthesizes reading and observations.

**EDUC 1010. The Craft of Teaching.**

What is the "craft of teaching"? A wide variety of texts are used to investigate the complexity of teaching and learning. Considering current problems as well as reform initiatives, we examine teaching and learning in America from the perspectives of history, public policy, critical theory, sociology, and the arts. Weekly journals and reading critiques; final portfolio presented to the class.

**EDUC 1020. The History of American Education.**

This course is an introduction to the history of American education with an emphasis on K-12 public schooling. Using primary and secondary sources, we will explore the development of public schools and school systems, debates over aims and curriculum, conflicts over school governance and funding, and struggles for equity and inclusion over time. We will analyze the relationship between schooling, capitalism, and democracy. Finally, in exploring how different generations have defined and tried to solve educational dilemmas, we'll consider how this history might help us approach education today.

**EDUC 1030. Comparative Education.**

This course will explore education across the Global South—from adult literacy NGOs in Brazil to Syrian refugees in Turkey, to post-genocide Rwandan classrooms. While initially the international community was concerned with access to education, the main goal now is quality education, especially beyond the primary school level. Readings range from official documents by international organizations, writings by sociologists, historians, political scientists, and anthropologists. Enrollment limited to 40.

**EDUC 1040. Sociology of Education.**

While the United States educational system is widely considered the main institution through which the nation delivers on its promise of social mobility, sociologists have long recognized that schools exacerbate – or even produce – social inequality. This course provides an introduction to the application of sociology to questions of education, with a focus on the United States education system. We will ask questions such as: What do schools teach besides academics? How do social class, gender, and racial/ethnic relations shape student experiences? How can we address critical social issues through education policy?

**EDUC 1045. Sociology of Higher Education.**

American higher education has often been characterized as the great equalizer and, thus, as one of the foundational pillars of the American Dream. In this course students will develop a sociological understanding of higher education, primarily in the United States. Using both theory and empirical evidence, we will explore issues relating to the impact of social factors on higher education. Particular attention will be paid to the role that higher education plays in promoting social mobility as well as social reproduction. Throughout we will ponder what policies might best fulfill the promise of higher education in the U.S.

**EDUC 1050. History of African-American Education.**

This course will examine the history of African-American education with particular emphasis on the twentieth century. We will explore African-Americans' experiences with schooling under slavery and segregation, the struggle for desegregation and equity North and South, and the place of education in African-Americans' quest for equal rights. We will also consider how the African-American experience with public schooling makes us rethink major narratives of American education, democracy, and equality of opportunity and how an historical understanding of these issues may help us engage contemporary debates.

**EDUC 1060. Politics and Public Education.**

Who exercises power in public education? This course examines the key institutions (e.g. school districts, states, Congress, and the courts) and actors (e.g. parents, teachers, interest groups, and the general public) shaping American K-12 education in order to understand recent policy trends and their consequences for students. Major policies discussed include school finance, textbook adoption, school accountability, and school choice. Particular attention is given to the federal No Child Left Behind Act of 2001 and debates over its reauthorization. Previous coursework in American politics or public policy is suggested but not required.

**EDUC 1090. Adolescent Literature.**

What are teens and tweens reading? What should they read? Do books that adults view as "trashy" ruin kids' literary sensibilities? Provide access to the wider world of academic discourse? How can reading adolescent literature provide adolescents with a path toward holding a reader identity?

This course will present a general overview of the historical, socio-cultural, academic, and political issues that provide context for the use and availability of adolescent literature today. It presents a strong introduction to contemporary texts that interest adolescents inside and outside of the classroom. Particular attention is paid to issues of reading engagement for striving adolescent readers, issues of access to literacy through adolescent literature, ways that adolescent literature can be paired with the classics, and issues of censorship in American public school classrooms and public libraries. Students in this course will walk away with an understanding of the place of adolescent literature in today's debates as well as a background in choosing, reading, and analyzing the literature itself. Written assignments include weekly reading responses, an annotated bibliography, and a short, 3-5 page paper. There is a substantial amount of independent self-selected reading as well as one collaborative group project with a presentation.

**EDUC 1100. Introduction to Qualitative Research Methods.**

Designed for sophomores or juniors concentrating in education studies, but also open to other undergraduates interested in qualitative research methods. Through readings, class exercises and discussions, and written assignments, examines issues related to the nature of the qualitative research methods that are commonly used in education, psychology, anthropology, and sociology. Enrollment limited to 20.

**EDUC 1110. Introductory Statistics for Education Research and Policy Analysis.**

This course provides an introduction to applied statistics for conducting quantitative research in the social sciences, with a focus on education policy. Students will become acquainted with the fundamentals of probability, descriptive and summary statistics, tabular and graphical methods for displaying data, statistical inference, analytic methods for exploring relationships with both categorical and continuous measures, and multivariate regression. Concepts and methods are taught using real-world examples with multiple opportunities for students to apply these methods in practice. The course uses the statistical software program, STATA.

**EDUC 1130. Economics of Education I.**

How do we attract good teachers to public schools? What are the economic returns to early-childhood intervention programs? These are just two examples of important education policy questions. This course introduces key concepts of microeconomic theory and uses them to analyze these and other policy questions. Organized around a structured sequence of readings. First year students require instructor permission.

**EDUC 1150. Education, the Economy and School Reform.**

This seminar examines the linkages between educational achievement and economic outcomes for individuals and nations. We study a range of system, organizational, and personnel reforms in education by reviewing the empirical evidence and debating which reforms hold promise for improving public education and closing persistent achievement gaps. Understanding and critiquing the experimental, quasi-experimental and descriptive research methods used in the empirical literature will play a central role in the course. Prerequisites: Education and PP concentrators, EDUC 1130 and EDUC 1110 (or equivalent); Economics concentrators, ECON 1110 or ECON 1130, and ECON 1620. Enrollment limited to 20.

**EDUC 1270. Adolescence in Social Context.**

Both an individual and a collective perspective on adolescence are used to provide an understanding of how this life stage is differently experienced by youth cross-culturally. Readings include theoretical and empirical papers from such areas as psychology, sociology, anthropology, and education.

**EDUC 1380. Language and Education Policy in Multilingual Contexts.**

Children who are assessed in a language different from that spoken at home demonstrate lower learning outcomes than their peers. This course explores how multilingual countries and communities design and implement language policies, and the major factors at play when increasing the number of languages used in a school system, via three main learning objectives: develop foundational concepts related to language in education policies, apply them critically to specific contexts, and develop research and writing skills necessary for policy and practice work. Students will explore systems around the world, with attention to the policy cycle from design to implementation.

**EDUC 1430. Social Psychology of Race, Class, and Gender.**

Focuses on the social construction of race, class, and gender and how this construction influences an individual's perception of self and other individuals. Topics include identity development, achievement, motivation, and sociopolitical development. Enrollment limited to 30.

**EDUC 1450. The Psychology of Teaching and Learning.**

Seeks both to demystify the process of teaching and to illuminate its complexities. Assists students with such questions as: What shall I teach? How shall I teach it? Will my students respond? What if I have a discipline problem? Focuses on the teaching-learning process and student behavior, as well as research, theory, and illustrations concerned with classroom applications of psychological principles and ideas. Enrollment limited to 50.

**EDUC 1520. Ethnic Studies & Education.**

This course examines and bridges the origins, epistemologies, key concepts, and central questions of the academic field of Ethnic Studies with key questions and issues in the field of education. The course begins with an examination of key events in early U.S. History and the historical and contemporary struggle for Ethnic Studies through a comparative, multiracial lens, followed by analyses of contemporary issues faced by practitioners working in 21st century educational contexts.

**EDUC 1580. Cross-Cultural Perspectives on Child Development.**

Focus on role of culture in child development, infancy to young adulthood. Reviews contemporary theories and empirical research to examine various age periods and domains of development. Major topics: infant care, parenting, socialization, gender roles, cognition, moral development, affect, adolescence, and education and schooling in formal and informal settings. Enrollment limited to 50.

**EDUC 1650. Policy Implementation in Education.**

This course offers an "analytical foundation" for students interested in public policy implementation, with particular emphasis on education. Drawing on social science research, the course examines strengths and limitations of several frameworks, including the "policy typology" school of thought, the rational actor paradigm, the institutional analysis, the bargain model, the organizational-bureaucratic model, and the "consumer choice" perspective. Enrollment limited to 20.

**EDUC 1690. Literacy, Community, and the Arts: Theory into Practice.**

An exploration of ways to improve student literacy skills through the performing arts in area schools. Students read about the theory and practice of literacy and the arts, research national and local initiatives, engage in arts activities, and spend time in area classrooms working with local teachers and artists to draft curriculum materials to be used in summer and school-year programs.

**EDUC 1720. Urban Schools in Historical Perspective.**

Why did urban schools, widely viewed as the best in the nation in the early twentieth century, become a "problem" to be solved by its end? How have urban schools been shaped by social, economic, and political transformations in cities and by other public policies? How have urban schools changed over time? This course will ask these and other questions to explore how historical perspective can help us better understand urban schools today. We will analyze the impact of changes in demographics, urban renewal and suburban development, the political economy of cities, educational expectations, and demands for equity.

**EDUC 1730. American Higher Education in Historical Context.**

A study of 350 years of American higher education. The first part traces the growth and development of American higher education from premodern college to the modern research university. The second part examines issues facing higher education today and places them in historical context. Particular attention is given to: the evolution of curriculum; professionalization; student life; and the often competing priorities of teaching, research and service.

**EDUC 1760A. Beauty Pageants as an American Institution.**

Beauty pageants are often ridiculed, and even vilified, in American society. Yet their lasting power—from "There She Is" to Toddlers & Tiaras to pageant waves—is undeniable. What accounts for their enduring power? This course draws on inter-disciplinary scholarship to examine how and why pageantry and American femininity have become linked in the public consciousness as they transformed from beauty contests to the largest source of scholarship money available to women in this country. We will examine how pageantry intersects with major institutions—education, politics, and media.

**EDUC 1850. Moral Development and Education.**

Examines contending approaches to moral development and its fostering in the home, school and peer group. Topics include philosophical underpinnings of moral theory, cognitive and behavioral dynamics of moral growth, values climate of contemporary American society, the role of schooling, and variations attributable to culture and gender. Prerequisites: EDUC 0800, 1270, or 1710, or CLPS 0610 (COGS 0630), or CLPS 0600 (PSYC 0810). Enrollment limited to 30.

**EDUC 1860. Social Context of Learning and Development.**

Focuses on the social environment that contributes to the development of children's minds, language, self-understanding, relations with others, affect, and attitudes toward learning. Examines the period from birth through young adulthood. Topics include children's social interactions, parental expectations and socialization practices, and the influences of family, peers, school, and media. Prerequisites: EDUC 0800, EDUC 1270, EDUC 1430, EDUC 1580, EDUC 1710, CLPS 0610 (COGS 0630), or equivalent. Enrollment limited to 30.

**EDUC 1870. Education and Human Development in East Asia.**

This course examines education and human development in East Asia, mainly China, Japan, and South Korea, using international and comparative perspectives. We will examine the role of educational systems and key contexts such as family, school, and globalization in the development and educational processes of children and adolescents. We will also explore culturally unique concepts, diversity, and inequality in educational processes across and within these countries. The course draws on a range of contemporary studies from interdisciplinary social science fields, some of them theoretical and many of them empirical (both qualitative and quantitative).

**EDUC 1890. Family Engagement in Education.**

How do families from diverse backgrounds support their children's schooling? What does research tell us about how families influence their children's development and educational processes? Students in this course will examine theories and research findings related to family engagement in education drawing from various social science studies. The course offers an in-depth look at focal topics across diverse groups, such as parental beliefs and practices, family processes in sociocultural contexts, immigrant families, and elements and programs that promote family-school partnerships. This course involves students' fieldwork and engagement in the community.

**EDUC 1900. Senior Seminar.**

Required of and reserved for seniors of the Education Studies Concentration as a culminating experience of your Concentration. Our foundational and methodological courses introduced you to the basic themes and research in the field, and upper-level courses typically focused on particular topics in greater depth. Your decision to be an Education Studies concentrator was likely related to one or more of the central themes of the field of education (e.g., human development, education policy and history, culture, race/ethnicity, gender, social justice, etc.). We hope to build on these learning experiences, broadening and deepening your learning across different areas of education.

**EDUC 1970. Independent Study.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**EDUC 1990. Independent Reading and Research.**

Supervised reading and/or research for education concentrators who are preparing an honors thesis. Written permission from the honors advisor required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**EDUC 1991. Independent Reading and Research.**

Supervised reading and/or research for education concentrators who are preparing an honors thesis. Written permission from the honors advisor required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**EDUC 2060A. Methods of Teaching: English.**

S/NC.

**EDUC 2060B. Methods of Teaching: History and Social Studies.**

S/NC.

**EDUC 2060C. Methods of Teaching: Science.**

S/NC.

**EDUC 2070A. Student Teaching: English.**

S/NC.

**EDUC 2070B. Student Teaching: History and Social Studies.**

S/NC.

**EDUC 2070C. Student Teaching: Science.**

S/NC.

**EDUC 2080A. Analysis of Teaching: English.**

No credit course.

**EDUC 2080B. Analysis of Teaching: History and Social Studies.**

No credit course.

**EDUC 2080C. Analysis of Teaching: Science.**

No credit course.

**EDUC 2090. Literacy Across the Curriculum.**

Focuses on three major areas of pedagogy: literacy across the curriculum, special education, and teaching English Language Learners. Topics include: current theory and practice in the three areas, legal requirements for special education, planning for differentiated instruction, assessment and diagnosis of student skill levels, measuring and reporting student achievement, adapting content for ELLS, selecting and working with texts, and effective vocabulary instruction. Open to MAT students only. S/NC.

**EDUC 2110. Summer Practicum and Analysis.**

Introduces MAT students to elementary school students through work in a unique summer enrichment program for inner city Providence children: Summer Prep readings and seminar meetings focus on arts education; introductions to the teaching of literacy, math and science; curriculum and lesson planning; creating a community of learners; issues of diversity; and physical education. S/NC.

**EDUC 2320. Quantitative Research Methods and Data Analysis.**

The goal of this course is to provide students in the Urban Education Policy course with a foundation and understanding of basic statistical analyses so that they will be able to design and carry out their own research and will be able to use data to inform education policy and practice.

**EDUC 2330. Urban Education Policy: System and Governance.**

This course is a requirement for students of the MA in Urban Education Policy program. It examines the system, structure, and governance of urban education policy. It will explore how urban school systems are organized, how urban education policies are made and implemented, and the political realities behind urban policy change. Students will develop an understanding of the landscape of contemporary education policy. The course will include team-based policy projects.

**EDUC 2350. Economic Analysis and Urban Education Policy.**

This course introduces students to the main economic theories and related applied work that inform education policy analysis by combining economic theory, econometric studies, and education and institutional literature in an examination of current issues in U.S. education, particularly those issues that are most relevant to urban education. We begin by examining key concepts and theories from microeconomics, labor economics, and public economics that are most relevant for studying questions in education. After laying this theoretical foundation, we examine how these theories can illuminate and aid policy analysis around key topics in U.S. education. Open to graduate students only.

**EDUC 2360. Policy Analysis and Program Evaluation for Education.**

Informed education policymaking requires reliable information about the causal effects of government programs and other factors shaping educational outcomes. This course offers an overview of education policy analysis with an emphasis on econometric strategies for measuring program impacts. It aims to make students critical consumers of policy evaluations and to equip them with tools to conduct their own research. Topics covered include the political context for policy research, social experiments, alternative strategies for making causal inferences, and cost-benefit analysis. Prerequisites: EDUC 1110, POLS 1600, SOC 1100, or written permission of the instructor.

**EDUC 2370. Internship.**

Students in the Urban Education Policy Master's Program participate in year-long internships in organizations that focus on urban education policy. Each student works with his or her site supervisor to develop a job description for the internship that allows the student to learn from and contribute to the work of the host organization.

**EDUC 2380. UEP Internship Seminar.**

Students in the Urban Education Policy master's program participate in year-long internships in organizations that focus on urban education policy. Each student works with his or her site supervisor to develop a job description for the internship that allows the student to learn from and contribute to the work of the host organization. This corresponding seminar will explore identity in leadership and study what leadership practices, skills, competencies and dispositions are required to succeed at social change work, both at the internship site and in educational organizations where students may work in after Brown.

**EDUC 2385. Education Inequality and Community Assets: Contexts and Change.**

Designed for graduate students in the Urban Education Policy A.M. and the Master of Arts in Teaching programs, this course focuses on understanding the dynamic social, cultural, and community conditions shaping America's diverse classrooms. We do so through reading and engaging in anthropological and sociological scholarship on issues like immigrant students, hidden scripts of gender and sexuality in secondary schools, social class and tracking, and ethno-racial discrepancies in discipline. By reading works focused on close observation of students, teachers, and families, students will learn to identify, describe, and evaluate how socio-cultural and socio-economic factors impact learning, student outcomes, and teaching.

**EDUC 2450. Exchange Scholar Program.****EDUC 2500. Foundations of Teaching and Learning.**

This course surveys and critically appraises foundational theories of teaching and learning. As MAT students learn about these theories and the theorists behind them, we consider their effect on our construction of youth's learning and teachers' practice. Through reading ethnographic and qualitative research, we will examine how sociocultural contexts and differences affect how youth learn and how teachers teach. In this way, we see how theoretical paradigms are refined by the experiences of diverse learners and teachers.

**EDUC 2510A. Educational Theory and Practice in Teaching English 1.**

This course is designed to help MAT students make connections between the theory and the practice of teaching English in the secondary schools. This fast-paced summer course includes a Brown Summer High School practicum teaching experience in the morning and an intensive methods class that accompanies it in the afternoon. The class will focus on high leverage practices for teaching English and visible learning for literacy, particularly in the heterogeneous untracked high school classroom. This workshop-based class focuses specifically on methods for creating a constructivist, student-centered English classroom with high school students from diverse backgrounds in the mainstream classroom.

**EDUC 2510B. Educational Theory and Practice I: Social Studies.**

This course is designed to provide MAT students with an opportunity to wrestle with the tensions and possibilities embedded in the struggle to bridge educational theory with practice in secondary social studies classrooms. The summer course is an intensive theory- and practice-based experience that is intimately linked with a Brown Summer High School teaching practicum. The practicum, in combination with daily methods classes, will begin the process of developing culturally responsive lessons that integrate the multiple dimensions of social studies: Civics & Government, Historical Perspectives, Geography, and Economics.

**EDUC 2510C. Educational Theory and Practice 1: Science.**

This course is designed to provide experiences and resources that will support the development of science MAT students. Through interactive activities, readings, and class discussions, the class, as a component to student teaching during Brown Summer High School, will explore key elements and challenges of secondary science teaching and provide a foundation for continued growth and reflection throughout the students' teaching careers. Some of the main topics discussed in this course are national and state science standards, reform-based approaches to instruction and assessment, unit/lesson planning, the use of technology in science teaching, and laboratory safety.

**EDUC 2510D. Educational Theory and Practice in Teaching Mathematics 1.**

This course is designed to provide a clinical experience and resources that will support the development of math MAT students teaching at Brown Summer High School. Through interactive activities, readings, and class discussions, the class will explore key elements and challenges of secondary mathematics teaching and provide a foundation for continued growth and reflection throughout the students' teaching careers. Topics will include standards, reform-based approaches to instruction and assessment (including fostering mathematical thinking in students through use of active pedagogy), unit/lesson planning, analyzing student work to improve teacher practice, and the use of technology in mathematics teaching.

**EDUC 2515. Learning Theory and Special Populations.**

This course will provide MAT students with an understanding of factors and responsibilities as you work collaboratively with students, professionals, and parents to establish appropriate educational supports student success and achievement. We will explore the various categories of human exceptionality and their variations; review the main laws and policies that inform your work with exceptional students; study Individualized Education Programs and 504 plans and their implications for instruction; study the Universal Design for Learning (UDL) framework for differentiation; discuss different models for collaborations with school professionals and parents; and access research and resources that support your work with these students.

**EDUC 2520A. Educational Theory and Practice in Teaching English II.**

This course is designed to accompany MAT students' one-semester fall practicum teaching placement. This field-based course uses the Rhode Island Professional Teaching Standards and the aligned rubric of Danielson's Framework for Teaching as a guiding standard as well as a central assessment mechanism. ETP II integrates theory and practice with standards-based instruction for the culturally relevant classroom. Students will bring their experiences and questions about teaching and learning directly from teaching and/or observations at field sites so the class can address those questions using discussion, research and inquiry. Artifacts of instruction, practice, and assessment will be examined and analyzed.

**EDUC 2520B. Educational Theory and Practice in Teaching Social Studies II.**

This course provides opportunities for social studies MAT students to meet the Rhode Island Professional Teacher Standards (RIPTS) and the National Council of the Social Studies Preservice teacher standards. In this particular semester, the objectives are to be able to develop standards-based lesson plans and activities for your students that are culturally responsive in social studies based on your knowledge of students and how they learn; use an evaluation framework to distinguish curriculum quality; and successfully revise curriculum as necessary in order to align with the RI GSEs and meet the needs of your students in a culturally responsive way.

**EDUC 2520C. Educational Theory and Practice for Science II.**

This course provides opportunities for science MATs to meet the Rhode Island Professional Teacher Standards (RIPTS) and the National Science Teacher Association Preservice science teacher standards. In this particular semester, the objectives are to be able to develop standards-based lesson plans and activities for your students that are culturally responsive in science based on your knowledge of students and how they learn; use an evaluation framework to distinguish curriculum quality; and successfully revise curriculum as necessary in order to meet the needs of your students in a culturally responsive way.

**EDUC 2520D. Educational Theory and Practice in Teaching Mathematics II.**

This course is designed to provide a space for math MAT candidates in their fall placement to develop their pedagogical content knowledge of culturally responsive teaching as it pertains specifically to teaching mathematics in middle and high school levels. Continuing from our summer work, this course delves more deeply into thinking about what it means to be culturally responsive in particular aspects of curriculum and instruction: CCSS math standards, how students learn, approaches to student-centered mathematics instruction, and choosing and revising curriculum materials. Students will explore what it means to be culturally responsive in each of these areas.

**EDUC 2525. Instructional Design, Planning, and Integrating Technology.**

In this course, students enrolled in the MAT program will build on the knowledge of instructional design that they developed in the summer. MAT candidates will delve more deeply into the Universal by Design (UbD) design process and consider its relationship to the Sheltered Instruction Observation Protocol (SIOP) Model. Additionally, students will work with the Technology, Pedagogy and Content Knowledge (TPACK) Model which will support their ability to deliberately integrate developmentally appropriate technology into their plans in order to positively impact student learning.

**EDUC 2530A. Educational Theory and Practice III: English.**

This course is designed to accompany the English MAT spring semester student teaching placement, with an aim to connect research with an experience, workshop, or record of practice to help students understand, implement, question and revise the practice in their own classrooms. Particular areas of focus include independent teaching in the linguistically and culturally diverse high school English classroom; practices for setting up the heterogeneous high school English classroom; classroom management; diagnostic assessment of student learning; understanding your position as a teacher and the context of your school; creating a professional learning community; and methods of teaching English with technology.

**EDUC 2530B. Educational Theory and Practice in Teaching Social Studies III.**

This course is a continuation of Educational Theory and Practice 1 and 2, designed to provide a space for social studies MAT candidates in their spring student teaching placement to develop their pedagogical content knowledge of culturally responsive teaching as it pertains specifically to teaching social studies in middle and high school levels. Building on the work we did in the summer and the fall, this course delves more deeply into thinking about what it means to be culturally responsive in particular aspects of curriculum and instruction.

**EDUC 2530C. Educational Theory and Practice in Teaching Science III.**

This course for science MAT candidates is a continuation of Educational Theory and Practice 1 and 2. It is designed to provide a space for candidates in their spring student teaching placement to develop their pedagogical content knowledge of culturally responsive teaching as it pertains specifically to teaching science in middle and high school levels. Continuing from the work done in the summer and the fall, this course delves more deeply into thinking about what it means to be culturally responsive in developing science assessments and in approaching discourse, modeling and mathematical representations.

**EDUC 2530D. Educational Theory and Practice in Teaching Mathematics III.**

This course is a continuation of Educational Theory and Practice 1 and 2. It is designed to provide a space for math MAT candidates in their spring student teaching placement to develop their pedagogical content knowledge of culturally responsive teaching as it pertains specifically to teaching mathematics in middle and high school levels. Continuing from the work we did in the summer and the fall, this course delves more deeply into thinking about what it means to be culturally responsive in curriculum and instruction, particularly in approaches to discourse, assessment, and interdisciplinary connections.

**EDUC 2535. Teaching Literacy and Language to Emerging Bilinguals Across the Disciplines I.**

This half of a year-long course prepares preservice teachers in the MAT program to teach emerging bilingual students/English learners through sheltered instruction in the mainstream classroom and meet students' linguistic, academic, and socio-emotional needs. New teachers must learn how to understand and include the experiences of linguistically diverse and multilingual students in their teaching. Additionally, preservice teachers must learn the nature of language acquisition and how specialized instruction can support this development. Through analysis of case studies, participants will also learn to plan and deliver high quality instruction that is differentiated to meet the needs of English learners.

**EDUC 2545. Teaching Literacy and Language to Emerging Bilinguals Across the Disciplines II.**

This second half of a year-long course prepares preservice teachers in the MAT program to teach emerging bilingual students/English learners through sheltered instruction in the mainstream classroom and meet students' linguistic, academic, and socio-emotional needs. New teachers must learn how to understand and include the experiences of linguistically diverse and multilingual students in their teaching. Additionally, preservice teachers must learn the nature of language acquisition and how specialized instruction can support this development. Through analysis of case studies, participants will also learn to plan and deliver high quality instruction that is differentiated to meet the needs of English learners.

**EDUC 2555. Assessment and Using Data to Support Student Learning.**

This course will provide a space for enrolled MAT degree candidates to learn theories related to assessment that are closely tied to their student teaching practical experience and also establish effective ways to measure their impact on student learning. The course will prepare students to explain concepts related to assessment; design formative and summative assessment systems through the UDL Framework; analyze the results of assessment tasks/data and utilize them to inform instructional decisions; and evaluate current and future trends in educational assessment.

**EDUC 2565. Practicum and Seminar I.**

This clinical experience and seminar, held off-campus at student teaching sites, provides the practical component of the MAT fall semester that will allow MAT students to merge theory and practice. The main goals for this semester are for practicum students to familiarize themselves with their school context, students and community; develop an understanding of how school context and learning about students inform planning curriculum; be aware of the policies and initiatives you are responsible for in the role of a teacher; form professional relationships with your colleagues, students, and families; and begin instructing in a co-teaching model.

**EDUC 2575. Student Teaching and Seminar.**

This off-campus student teaching clinical experience and seminar, held at student teaching sites, provides the practical component of MAT students' winter and spring semester that will allow students to merge theory and practice and gain proficiency in the domains outlined by the Framework for Teachers. This will be accomplished by taking on the full responsibilities of a teacher for selected secondary classes in your placement school with the guidance of your mentor teacher and your supervisor as well as attending meetings and other programs teachers are required to attend for your placement site.

**EDUC 2980. Studies in Education.**

Independent study; must be arranged in advance. Section numbers vary by instructor. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**EDUC 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**EDUC XLIST. Courses of Interest to Concentrators in Education.**

## Education Alliance for Equity and Excellence in the Nation's Schools

The Education Alliance at Brown University is a reform support organization committed to advancing equitable educational opportunities that prepare all student populations to succeed in the 21st century. Our mission is to enhance learning for culturally and linguistically diverse students. We build partnerships with communities and educational organizations to improve instructional practice for English language learners.

Since 1975, we have partnered with schools, districts and state departments of education to apply research finding in developing solutions to educational challenges. We focus on district and school improvement with special attention to underperformance and issues of equity and diversity.

The Executive Director of The Education Alliance is Dr. Maria Pacheco.

For additional information please visit: [www.brown.edu/education-alliance](http://www.brown.edu/education-alliance)

## Egyptology and Assyriology

### Chair

Matthew T. Rutz

The Department of Egyptology and Assyriology is designed to explore the histories, languages, cultures and sciences of ancient Egypt, Mesopotamia and their neighbors. These regions, sometimes known collectively as the Ancient Near East, have a long history stretching back to the formation of the first complex societies and the invention of writing. As a field of higher learning, Egyptology and Assyriology are represented at most of the world's great universities. Their establishment at Brown, beginning the 2005-06 academic year, is a product of Brown's Plan for Academic Enrichment, a commitment to higher learning in the humanities and the sciences.

Faculty in the department teach undergraduate and graduate courses in Egyptology, Assyriology and the History of Ancient Science.

For additional information, please visit the department's website: <http://www.brown.edu/academics/egyptology/>

## Egyptology and Assyriology Concentration Requirements

The concentration in Egyptology and Assyriology offers students a choice of two tracks: Assyriology or Egyptology. The department promotes collaborations with other academic units at Brown devoted to the study of antiquity including Archaeology, Classics, Judaic Studies, and Religious Studies. Egyptology and Assyriology also collaborates with Brown's Joukowsky Institute for Archaeology and the Ancient World.

### Assyriology Track

Also known as the Near East or Middle East, Western Asia includes present-day Iraq, Syria, Turkey, and other neighboring states, a broad geographic area that was connected in antiquity with the wider world—the Mediterranean, North Africa, the Arabian Peninsula, Central Asia, and the Asian subcontinent. Students will be exposed to the critical study of the ancient cultures of this region (ca. 3400 B.C.E.–100 C.E.) using the tools of archaeology, epigraphy, and historical inquiry. A variety of interdisciplinary, comparative, and theoretical approaches will be introduced to give students the tools and methods to explore this region's ancient languages and literatures, political and socio-economic modes of organization, art and architecture, religious traditions and other systems of knowledge, such as early science.

The Assyriology (ASYR) track requires a total of at least ten (10) courses that are determined in the following way:

Introductory courses:		3
ASYR 0800	The Cradle of Civilization? An Introduction to the Ancient Near East	
or ARCH 1600	Archaeologies of the Near East	
ASYR 1000	Introduction to Akkadian	
ASYR 1010	Intermediate Akkadian	
Foundational Courses (at least one course from each of the following three areas):		
History and Culture of Ancient Western Asia: <sup>1</sup>		1
ASYR 1100	Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia (WRIT)	
ASYR 1300	The Age of Empires: The Ancient Near East in the First Millennium BC	
ASYR 1500	Ancient Babylonian Magic and Medicine	
ASYR 2310B	Assyriology I (WRIT)	
ASYR 2310C	Assyriology II (WRIT)	
ASYR 2600	Topics in Cuneiform Studies	
Ancient Scholarship in Western Asia: <sup>1</sup>		1
ASYR 1600	Astronomy Before the Telescope	
ASYR 1650	Time in the Ancient World (WRIT)	
ASYR 1700	Astronomy, Divination and Politics in the Ancient World (WRIT)	
ASYR 1750	Divination in Ancient Mesopotamia (WRIT)	
ASYR 2310A	Ancient Scientific Texts: Akkadian	
Archaeology of Ancient Western Asia: <sup>1</sup>		1
ARCH 1200F	City and the Festival: Cult Practices and Architectural Production in the Ancient Near East (WRIT)	
ARCH 1200I	Material Worlds: Art and Agency in the Near East and Africa	
ARCH 1810	Under the Tower of Babel: Archaeology, Politics, and Identity in the Modern Middle East (WRIT)	
ARCH 2010C	Architecture, Body and Performance in the Ancient Near Eastern World (WRIT)	
ARCH 2300	The Rise of the State in the Near East	

Depth Requirement: At least two additional courses offered in ASYR or ARCH dealing with ancient Western Asia. These courses must be approved by the undergraduate concentration advisor.	2
Breadth Requirement: At least one course offered in EGYT or ARCH on the archaeology, art, history, culture, or language of ancient Egypt.	1
Elective: At least one elective course on the ancient world broadly defined. Usually this course will be offered in Assyriology, Anthropology, Archaeology, Classics, Comparative Literature, East Asian Studies, Egyptology, History, History of Art and Architecture, Judaic Studies, Philosophy, or Religious Studies. The elective course must be approved by the undergraduate concentration advisor.	1
<b>Total Credits</b>	<b>10</b>

<sup>1</sup> This list contains possible offerings but should not be considered exhaustive.

## Egyptology Track

The Egyptology track requires a total of at least ten courses. Six of these must be taken by all concentrators, but the remaining four can be chosen from a fairly broad range of courses, to suit individual interests.

Introductory Courses:	6
EGYT 1310 & EGYT 1320	Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian I) and Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian II) <sup>1</sup>
EGYT 1430 & EGYT 1440	History of Egypt I and History of Egypt II <sup>1</sup>
ARCH 0150	Introduction to Egyptian Archaeology and Art <sup>1</sup>
EGYT 1420 or ARCH 1625	Ancient Egyptian Religion and Magic Temples and Tombs: Egyptian Religion and Culture
Depth Courses:	2
EGYT 1330	Selections from Middle Egyptian Hieroglyphic Texts <sup>1</sup>
EGYT 1410	Ancient Egyptian Literature <sup>2</sup>
Breadth Course - Any course covering the ancient Near East or Mediterranean world outside Egypt, such as:	1
ASYR 0800 or ARCH 1600	The Cradle of Civilization? An Introduction to the Ancient Near East Archaeologies of the Near East
Elective Course: Any course germane to ancient Egypt or the ancient Near East or Mediterranean world. Alternative and elective courses must be approved by the undergraduate concentration advisor. Such courses will normally be offered by Egyptology and Assyriology, the Joukowsky Institute for Archaeology and the Ancient World, Religious Studies, Classics, Judaic Studies, Anthropology, History of Art and Architecture, History, or Philosophy. Concentrators are welcome to take most courses offered by Egyptology and Assyriology (EGYT and ASYR), Archaeology (ARCH), or related departments, though some may require the instructor's approval. Concentrators should consult with the concentration advisor to discuss the courses most suitable to their interests.	1
<b>Total Credits</b>	<b>10</b>

<sup>1</sup> Required for all students pursuing the Egyptology track.

<sup>2</sup> Or an EGYT or ARCH course in material culture.

## Capstone

All concentrators in Egyptology and Assyriology are required to complete a capstone project. The project can take many forms, but the common feature shared among all possible projects will be a public presentation.

Typically in the final semester before graduating, the concentrator will give this capstone presentation before faculty, fellow students, and other interested audiences. If the concentrator is writing an undergraduate honors thesis, the procedure for which is detailed below, this work should provide the content for the capstone presentation. Students not writing an honors thesis will base their presentation on a research project more in depth than a class project, though the topic may stem from a course project or paper. The format of the presentation may vary; suggestions range from an illustrated lecture to a video or an installation presented with discussion. Both the content and the format of the capstone project should be discussed with and agreed upon by the concentration advisor no later than the end of the first semester of the senior year.

## Honors in Egyptology and Assyriology

### 1. *Becoming an honors candidate*

Students who wish to consider pursuing honors should meet with the Undergraduate Concentration Advisor in the first half of their sixth semester.

Eligibility is dependent on:

- Being in good standing
- Having completed at least two thirds of the concentration requirements by the end of the sixth semester.
- Having earned two-thirds "quality grades" in courses counted towards the concentration. A "quality grade" is defined as a grade of "A" or a grade of "S" accompanied by a course performance report indicating a performance at the "A" standard.

To pursue honors candidacy, eligible students must:

- Secure a faculty advisor and discuss plans for the proposed thesis project well before the established deadline; this can be done by email when a student is abroad.
- Prepare a thesis prospectus (see below).
- Submit the prospectus to the advisor, one other proposed faculty reader (at least one of the readers must be in the department) and the department chair *no later than the first week of the seventh semester*.

The structure of a thesis prospectus:

An honors thesis in Egyptology or Assyriology is a substantial piece of research with some degree of originality that demonstrates the student's ability to frame an appropriate question and deal critically with the range of original and secondary sources. A thesis prospectus is a short analytical document consisting of several parts. It will normally include a concise and focused research question; a justification for that question that demonstrates familiarity with previous research on the topic; a project description that includes a discussion of the types of evidence available and appropriate to answering the proposed question; a discussion of methods of collecting and analyzing that evidence; a conclusion that returns to the research question and assures the reader that the project will add value to our understanding of the topic; and a bibliography. The prospectus will ordinarily be in the range of 5-7 pages in length, exclusive of bibliography. The prospectus will include proper citations throughout.

Determination of whether or not a student may pursue the proposed project will be made on review of the prospectus by the readers and department chair. Prospectuses will be evaluated on the following scale:

1. No concerns about the viability of the project.
2. No concerns about the viability of the project, but minor weaknesses in the execution of the prospectus.
3. Concerns about the viability of the project, but willingness to reevaluate a revised prospectus submitted within two weeks of receipt of evaluation.
4. Reservations that the prospectus does not describe an honors-worthy project.
5. Poorly conceived and shoddy work.

Prospectuses will be returned to the student with this numerical evaluation and comments one week after submission of the prospectus. A prospectus must receive an evaluation of 1 or 2 prior to the third week of the seventh semester for a student to be admitted to the honors track. Students who submit an original prospectus that is graded 4 or 5 will not be permitted to rework the prospectus for the second submission.

## 2. Developing, completing and submitting the honors project

Once accepted as honors candidates, students will pursue a course of study that goes beyond what is expected of a regular concentrator. This includes:

- Enrollment in two semesters of independent study in Egyptology or Assyriology (these do not fulfill course requirements towards the concentration).
- Twice-monthly meetings with the thesis advisor and once-monthly meetings with the second reader. These meetings will be scheduled at the beginning of each term.
- Submission of a comprehensive outline to both readers no later than October 15 (for May graduates)
- Regular submission of drafts. A partial draft including a complete version of at least one chapter or section is due before Reading Period of the seventh semester.
- A complete draft is due to both readers no later than March 15 (for May graduates).
- The revised final thesis is due in both electronic and physical form to both readers and department chair April 5 (for May graduates).

Failure to meet any deadline will result in automatic termination of the honors process. No extensions will be granted. If a thesis is turned in late but before the end of the term, credit and grade for the Independent Study may still be granted.

## 3. Evaluating the submitted work of honors candidates

In order to receive honors a student must be found to have:

- Remained in good academic standing throughout the academic year.
- Not violated the Academic Code of Conduct during honors candidacy.
- Complete or be about to complete all concentration requirements.
- Produced a thesis that is judged by the readers to meet the department's expectations for honors work (see below), and turned it in by the established deadlines.
- Successfully defended the thesis during a half hour public presentation held during the final exam period of the eighth semester.

Students who submit theses that are deemed to fall short of the expectations will graduate without honors. In that case, the theses will count as a capstone project.

## 4. Expectations for honors theses:

### Originality:

An honors thesis in Egyptology or Assyriology is expected to add to existing scholarship. The thesis must be based on close work with primary sources (usually in publication rather than in person), supplemented by critical engagement with a substantial amount of relevant secondary literature. While the resulting study is not necessarily expected to be ground-breakingly original, and may engage with a well-studied topic, it will usually include a new insight into or interpretation of the material considered.

### Scope:

An honors thesis is not a book or dissertation. It is, however, a very serious piece of research and writing for which two dedicated study courses have provided substantial time to the honors student. The question upon which the honors thesis is based should be focused enough to allow an in-depth treatment, generally in under 100 pages or 30,000 words (exclusive of bibliography and illustrations). Appropriate length will vary considerably depending on the topic itself and the nature of the primary sources being considered, particularly if substantial translation of ancient textual sources is required.

### Argument:

The thesis should present a sustained analytic argument in answer to its structuring question. A thesis should not be primarily descriptive or narrative in nature. Each chapter should contain a sub-argument that is clearly related to the overall argument of the thesis. The significance of the argument and its relationship to prior scholarship should be clearly articulated. Honors theses are not expected to demonstrate comprehensive familiarity with the secondary literature, but they are expected to engage critically and maturely with important works on the defined topic.

### Methodology:

Egyptology and Assyriology are very broad fields, and the appropriate methods will be determined in conjunction with the thesis advisor on the basis of the questions and types of evidence - textual, archaeological, art historical - under consideration. With very few exceptions the methodology of the thesis is expected to be conventional rather than innovative, rooted in the accepted practices of the field in question.

### Organization and writing:

An honors thesis must be well organized and written. It should include an introduction and conclusion as well as well-considered chapters that allow the reader to follow the line of reasoning easily. The relationship of any section to the larger whole should be clear, and segues should help the reader move between sections. Writing should be grammatically correct, well copy-edited, professional, and consistent. Citations and bibliography must be in an accepted style as determined in consultation with the advisor.

## Egyptology and Assyriology Graduate Program

### PhD Program in Egyptology and Assyriology

Brown is one of the premier institutions for the study of Egyptology, Assyriology, and the history of ancient science, and our PhD students train in the foundational areas of our disciplines: the languages, literatures, history, and material culture of Egypt and Mesopotamia in their wider environment. The department offers instruction in the core ancient languages that are essential for research in our fields: Akkadian (Babylonian and Assyrian, all stages), Egyptian (all stages), Hittite, and Sumerian; instruction in Arabic, Aramaic, Greek, Hebrew, Latin, Sanskrit, Syriac, and Ugaritic is available to our students at Brown as well. In addition to training in philology and critical research methods, our students also become conversant in the archaeological sequence, art and architecture, and repertoires of material culture found across the ancient Near East.

Brown's doctoral program in Egyptology and Assyriology has a number of distinguishing features:

- We offer in-depth disciplinary training that allows our students to pursue focused research in any one of our core fields: Assyriology, Egyptology, the history of ancient science, and the archaeology of Egypt and the Near East.
- We encourage creative interdisciplinary work, including but not limited to research that bridges Egyptology, Assyriology, and the history of ancient science in innovative ways. Our doctoral students have the opportunity to do coursework in and cultivate stimulating intellectual relationships with faculty from Anthropology, Classics, History, the Joukowsky Institute for Archaeology and the Ancient World, and Religious Studies. In addition Brown's Graduate School has an Open Graduate Program that allows interested doctoral students at Brown to pursue a concurrent master's degree in a secondary field that is outside the scope of their doctoral program.
- We provide significant funding both in the department and across the university to support graduate students' original research. Our doctoral students have recently used support from the department and university to carry out research in museum collections in the US, Europe, and Africa; to participate in archaeological fieldwork (survey and excavation) in Egypt, Sudan, and Turkey; and to present the results of their research at international conferences and symposia.
- We emphasize developing our students professionally and encourage students to reach important early career milestones during their time in the program, such as giving conference papers and submitting academic publications; to that end we have incorporated valuable professional academic skills into our curriculum and assessment.
- We provide a variety of opportunities for our PhD students to train as teachers and develop valuable teaching skills that will be useful in a wide variety of educational settings, including research universities, museums, or teaching colleges focused on the liberal arts.

A few areas of particular interest to the department's faculty include: ancient science (astronomy and astrology, timekeeping and calendrics, divination and medicine); cultural interactions throughout the

Mediterranean, Near East, and Africa in the second and first millennia BC; religion and ritual in the ancient Near East, from Egypt and Sudan to Anatolia and Mesopotamia; the history of the Egyptian language and its grammar; the origins and development of writing and the diffusion and reception of cuneiform, hieroglyphic, and alphabetic scripts in the ancient world; kingship and monumentality in ancient Egypt and Sudan; the integration of textual and archaeological methodologies; Coptic manuscripts; the ancient Near East in classical periods and Greek and Roman cultures' perceptions of the more ancient past; Mesopotamian and Egyptian literature; ancient empires of the Near East in context; and the origins of Egyptian civilization.

#### PhD Tracks

The department currently offers three tracks to the PhD: (1) Assyriology (2) Egyptology, and (3) History of the Exact Sciences in Antiquity. Each track has different course requirements, details of which may be found in the program's Graduate Student Handbook. Students who enter the program in one track may switch to another track providing they are still able to complete the coursework requirements by the end of their third year.

Further details about our graduate program may be found at <http://www.brown.edu/academics/gradschool/programs/egyptology-and-assyriology>

## Courses

### Assyriology

#### ASYR 0300. Babylon: Myth and Reality.

From the Hanging Gardens of Babylon to the Tower of Babel to Babylon 5, the city of Babylon in ancient Iraq holds an important place in contemporary culture. But how much of what is commonly known of Babylon is true? In this course we will explore the ancient city of Babylon through its texts and archaeological remains and investigate the ways Babylon has been viewed over the past two thousand years. Enrollment limited to 19 first year students. Instructor permission required.

#### ASYR 0310. Thunder-gods and Dragon-slayers: Mythology + Cultural Contact - Ancient Mediterranean and Near East.

This course is an exploration of the mythological imagination in the ancient Mediterranean and Near East. From cosmic origins to epic battles, mighty queens to baneful monsters, mythological motives and narratives crisscrossed the ancient world, bypassing seemingly rigid geographic and cultural boundaries. Particular attention will be devoted to the study of the dynamic reinterpretation of myths in situations of cultural contact. Primary evidence will include material from Mesopotamia, Egypt, Anatolia, the Levant, Greece and Rome. The course will span several millennia, from the earliest attestations of the Epic of Gilgamesh to the Christian and Muslim reinterpretation of so-called pagan myths.

#### ASYR 0350. Haunted Universe: Monsters and Demons at the Dawn of Civilization.

This seminar explores the relationship between monsters and civilization, considering what exactly it is that monsters do for us; why we create, deploy, and ultimately destroy them; and what they tell us about the peoples among whom they sprang up and roamed. Emphasized is the developing civilization in Mesopotamia, and the place and functioning of monsters and demons in the visual arts and literary contexts, as well as in the worldview, of the early cities of that region. Enrollment limited to 19 first year students.

#### ASYR 0400. Intimate Stories: Narrative in Ancient Visual Culture.

Images tell stories that carry us to imaginary worlds. A story in pictures engages us deeply, opening the doors of fantastic places and times. In antiquity public monuments displayed visual narratives that animated public spaces, enthralled audiences and delivered state ideologies. This course involves reading narrative imagery from the Middle East and East Mediterranean including magical hunt scenes in prehistoric caves, political tales on Mesopotamian relief sculpture, visions of paradise in Egyptian tombs, Aegean frescoes and Assyrian reliefs of exotic landscapes. Using contemporary perspectives on art, we will explore the material power and everyday significance of pictorial representations as intimate spectacles. Enrollment limited to 19 first year students.

#### ASYR 0800. The Cradle of Civilization? An Introduction to the Ancient Near East.

This course explores the cultures of ancient Mesopotamia and the Near East (present-day Iraq, Syria, Turkey, and Iran) from prehistory until the end of the first millennium BC. We will investigate the rich history and archaeology of this region through literary and historical texts (in translation) and archaeological evidence, including visual culture and architecture. Central to our discussion will be questions about how and why scholars study the Middle East in this early period. Topics include: early complex societies, state formation, the origins and development of writing, ancient empires, religion, culture and ethnicity, trade, diplomacy, warfare, agriculture, and craft production.

#### ASYR 1000. Introduction to Akkadian.

An intensive introduction to the cuneiform writing system and the basic grammar and vocabulary of Akkadian, a language first attested over four thousand years ago in Mesopotamia (modern Iraq). The earliest known member of the Semitic family of languages (like Arabic and Hebrew), Akkadian was in use for over two thousand years across a wide expanse of the ancient Near East. Students will learn the classical Old Babylonian dialect of Akkadian (ca. 1800 BCE) and read Mesopotamian texts in the original, including selections from the Laws of Hammurabi, as well as excerpts from myths, hymns, prayers, historical documents, and letters.

#### ASYR 1010. Intermediate Akkadian.

This course is the second semester of an intensive, yearlong introduction to the Akkadian (Babylonian/Assyrian) language. Students will deepen their knowledge of the cuneiform writing system and continue to develop their grasp of Akkadian grammar. Readings from Mesopotamian texts in the original language and script will include, among others, selections from the Laws of Hammurabi, Assyrian historical texts (such as the accounts of Sennacherib's siege of Jerusalem), and the story of the Flood from the Standard Babylonian Epic of Gilgamesh. Prerequisite: Introduction to Akkadian (ASYR 0200 or ASYR 1000) or permission of the instructor.

#### ASYR 1100. Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia.

Creation, the Flood, the Tower of Babel--well-known myths such as these have their origins in ancient Mesopotamia, the land between the Tigris and Euphrates Rivers. Using both ancient texts in translation and archaeology, this course will explore categories of Mesopotamian culture labeled "myth" and "religion" (roughly 3300-300 BCE), critically examining the ancient evidence as well as various modern interpretations. Topics will include myths of creation and the flood, prophecy and divination, death and the afterlife, ritual, kingship, combat myths and apocalypses, the nature and expression of ancient religious experience, and representations of the divine. There are no prerequisites.

#### ASYR 1110. Literature of Ancient Iraq.

Introduction to rich and varied compositions surviving from ancient Mesopotamia (Iraq) and beyond, including selected myths, epics, hymns, prayers, rituals, oracles, elegiac poetry, fables, proverbs, riddles, debates and more. We will consider what they can tell us about people's lives and values in ancient times and the processes by which written knowledge was preserved and passed on, where the texts were collected and how they come to be scattered in museums. The definition of "literature" adopted in this course considers aesthetic intent but also the subjects (e.g. love, death, heroism, gods) and forms of writing meaningful to an ancient audience.

#### ASYR 1150. The Art of Civilization: Artist, Image, and Aesthetic in the First Cities.

This course examines various facets of the relationship between art and developing social/political complexity in the ancient world, with case studies drawn primarily from the ancient Near East and Egypt between the rise of the first cities in the late fourth millennium BCE through to the fall of the Achaemenid "world empire" in the mid-fourth century BCE.

**ASYS 1160. Color and Culture in the Ancient Near East.**

This seminar investigates the meaning of color as a culturally mediated and culturally embedded phenomenon using case studies drawn from the civilizations of the ancient Near East and Aegean. Employing contemporary critical theories from cognition, phenomenology, linguistics and material culture studies, we will explore how human beings perceived, categorized and valued color in ways that vary cross-culturally.

**ASYS 1200. Sacred Spaces and Sacred Times: Religious Travels and Pilgrimages in the Ancient Near East.**

The course will focus on the cultural and religious-historical interpretation of physical displacements among sacred places, including urban processions, visits to temples and journeys to sacred places within the context of the Ancient Near Eastern religions. We will attempt to sketch a map of the holy centers and cultic itineraries, focusing on case studies from Babylonia, Assyria and Syria from the third to the first millennium BC as well as comparative case studies from surrounding cultures. These topics will be explored with an emphasis on how written and archaeological sources can be interpreted with the help of theoretical literature.

**ASYS 1300. The Age of Empires: The Ancient Near East in the First Millennium BC.**

The first millennium BC saw a series of empires vying for control of the Near East: the Assyrians, the Babylonians, the Persians, and the Greeks of Alexander the Great and his successors. The course will explore the political, social and cultural history of Mesopotamia and the Ancient Near East under these empires, using evidence drawn from archaeology and ancient texts (in translation).

**ASYS 1400. Introduction to Sumerian.**

Over five thousand years ago the first cities emerged in southern Iraq, and around that same time writing was invented, most likely to record the language we now call Sumerian. Even after it was no longer spoken, Sumerian became a powerful conduit for the region's cultural heritage, preserving its literature and religious traditions for millennia. In this course students will learn the fundamentals of Sumerian grammar, develop a basic working vocabulary, and explore the cuneiform script through weekly readings in original texts. Selections will come from royal inscriptions, court cases, myths, magical incantations, and even ancient schoolwork. No prerequisites.

**ASYS 1500. Ancient Babylonian Magic and Medicine.**

A survey of ancient magic and medicine focusing on Mesopotamia (present-day Iraq, ca. 2500-300 BCE), with an emphasis on beliefs about the body, health, illness, and the causes of disease, such as witchcraft or angry gods. Topics will include the training of healers, exorcists, and herbalists; concepts of contagion and plague, modalities of treatment, incantations, prayers, and empirical remedies like prescriptions; ancient perceptions of problems like sexual dysfunction, the perils of pregnancy, tooth decay, epilepsy, and mental illness. Readings will be drawn from ancient texts (in translation), archaeology, and parallels with ancient Egypt, Greece, Rome, and the Bible. No prerequisites. Not open to first year students.

**ASYS 1600. Astronomy Before the Telescope.**

This course provides an introduction to the history of astronomy from ancient times down to the invention of the telescope, focusing on the development of astronomy in Babylon, Greece, China, the medieval Islamic world, and Europe. The course will cover topics such as the invention of the zodiac, cosmological models, early astronomical instruments, and the development of astronomical theories. We will also explore the reasons people practiced astronomy in the past. No prior knowledge of astronomy is necessary for this course.

**ASYS 1650. Time in the Ancient World.**

Time plays many roles in civic and everyday life: calendars provide a way of regulating activities ranging from gathering taxes to knowing when to perform religious rituals. This course will provide an introduction to the way time was measured, used, regulated and conceived in the ancient world. We will cover topics such as the calendars used in Mesopotamia, Egypt, Greece and China, sundials and other instruments used for measuring time in the ancient world, and the way time is used in scientific and non-scientific texts.

**ASYS 1700. Astronomy, Divination and Politics in the Ancient World.**

This course will explore the relationship between astronomy, divination and politics in the ancient world. The sky provided ancient cultures with many possibilities for observing occurrences that could be interpreted as omens. In many cultures, celestial omens were directed towards the king and his government. As a result, interpreting and controlling celestial omens became an important political activity. In this course, we will explore how and why astronomical events were used politically in ancient Mesopotamia, the Greco-Roman world, and ancient and medieval China. No prior knowledge of astronomy is necessary for this course.

**ASYS 1725. Scientific Thought in Ancient Iraq.**

This course will investigate a variety of ancient scientific disciplines using primary sources from ancient Mesopotamia (modern Iraq). By reading the original texts and studying the secondary literature we will explore the notion of scientific thought in the ancient world and critique our own modern interpretation of what "science" is and how different traditions have practiced scientific methods towards a variety of aims. Looking at a range of disciplines will allow us to compare and contrast the different ways in which scientific thinking is transmitted in the historical record.

**ASYS 1750. Divination in Ancient Mesopotamia.**

The interpretation of natural events as portents of good or bad outcomes played an important role in religious, political, scholarly and everyday life in ancient Mesopotamia. In this course we will study Mesopotamian omen literature from textual, scientific, philosophical and cultural viewpoints in order to understand how divination operated and what it was used for.

**ASYS 1800. Scribes and Scholarship in the Ancient Near East.**

This course will explore the development of written traditions among the scribes of the Ancient Near East. Topics covered include the mechanics of writing on clay tablets, the training of scribes and the school curriculum, the status of scribes in society, the development of literary and scholarly traditions, the creation of tablet archives, and the range of scholarship (eg science, medicine, ritual, literature) found in the ancient near east.

**ASYS 1900. Introduction to Hittite Language and Literature.**

This course is an introduction to Hittite language, literature, and culture. Hittite, the earliest attested Indo-European language (thus related to Greek, Latin, and Sanskrit) was used in Anatolia during the second millennium BCE. It survives in tens of thousands of tablets written in cuneiform script. Students will learn the basic grammar of the language and read in the original or in translation specimens from the fascinating textual legacy of the Hittites, which includes myths, prayers, laws, diplomatic texts as well as formal and informal letters. They will also become familiar with the cultural environment in which those texts were composed.

**ASYS 2120. Historiography of Exact Sciences.**

Introduces graduate students to the sources, problems, and methodologies of the history of astronomy and mathematics from Babylon to Kepler. Prerequisite: AWAS 0200. Open to graduate students only.

**ASYS 2130. Historiography of Exact Sciences.**

Introduces graduate students to the sources, problems, and methodologies of the history of astronomy and mathematics from Babylon to Kepler.

**ASYS 2310A. Ancient Scientific Texts: Akkadian.**

Readings and analysis of a major scientific text in Akkadian. Prerequisite: AWAS 0200 or 0210. Open to graduate students only.

**ASYS 2310B. Assyriology I.**

The kings of Babylonia and Assyria took every opportunity to boast about their military victories, successful hunts, the completion of new cities, and the building and decoration of temples and palaces. But is theirs the only possible version of Mesopotamian history? This course examines episodes in the history of Babylonia and Assyria (ca. 2400-500BCE) by looking at the political and social relationships among kings, political elites, entrepreneurs, and commoners; emphasis is placed on reading Akkadian texts both in the original and in translation, with a focus on letters, royal inscriptions, and astrological reports. Prerequisite: AWAS0210 or instructor's permission.

**ASYS 2310C. Assyriology II.**

This seminar will focus on selected topics of Neo-Assyrian history (1000-612 BC), including: the royal family; the queen and her influence; celebrating New Year's festivals; hunting lions; conquering a city; constructing and decorating palaces and temples; urban renewal and the founding of new cities; the substitute king ritual; and scholarly life. Assyria in the first millennium BC will be examined principally from Assyrian texts in translation.

**ASYS 2310D. Ancient Scientific Texts: Cuneiform Literature.****ASYS 2400. Akkadian Literary and Religious Texts.**

Readings in Akkadian literary and religious texts in the original language and script. Possible genres include myths, proverbs, and literary miscellanea as well as prayers, hymns, incantations, rituals, prophecies, and divinatory texts. This course is intended primarily for graduate students and may be repeated for credit. A reading knowledge of Akkadian cuneiform is required. A reading knowledge of both German and French is recommended but not required.

**ASYS 2420. Akkadian Divinatory Texts.**

This course offers focused study of the most significant Akkadian divinatory texts from the second and first millennia BCE. Readings will come from the major genres of Mesopotamian divination found at sites throughout the ancient Near East. Emphasis will be placed on matters of textual transmission, reconstruction, and interpretation. We will read texts in the cuneiform script (copies, photographs, and, when possible, actual tablets) and work to place the material in meaningful historical, social, and cultural contexts. Knowledge of Akkadian cuneiform required.

**ASYS 2500. Readings in Sumerian.**

Advanced readings in Sumerian cuneiform texts in the original script and language. Readings will be selected from a particular genre, historical period, or site. This course is intended primarily for graduate students and may be repeated for credit. A reading knowledge of Sumerian cuneiform is required. A reading knowledge of both German and French is strongly recommended but not required.

**ASYS 2600. Topics in Cuneiform Studies.**

Advanced readings in Akkadian and Sumerian cuneiform texts in the original script and language(s). The focus of this course will be on the close reading of a specific genre, period, and/or dialect. A rotating cycle of topics to be covered may include the following with a synchronic and/or diachronic approach: historical texts and royal inscriptions, legal and administrative texts, letters, literary and religious texts, medical texts, or scholastic texts. May be repeated for credit. Prerequisite: AWAS 0210 or instructor permission. Open to juniors, seniors, and graduate students.

**ASYS 2700. Special Topics in Ancient Sciences.**

This course will be a topics course containing a detailed technical and cultural study of an area of science in a culture of the ancient world. Although intended for graduate students, undergraduate students who have taken EGYT 1600 or AWAS 1600 or a similar course may be admitted at the instructor's discretion.

**ASYS 2710. Babylonian Astronomy.**

An advanced seminar on Babylonian astronomy, taking both a technical and a cultural perspective on the history of this ancient science.

**ASYS 2750. Art and Visual Culture in the Ancient Near East.**

Peoples of the Ancient Near East from prehistory to the Hellenistic period produced a unique corpus of production technologies and visual culture. Cultures from Anatolia to the Iraqi southern alluvium, from the Levant to Iran and the Caucasus shared this common pictorial language in a variety of ways. In this seminar, we will investigate bodies of archaeological, architectural and pictorial evidence from the Near East while also debating relevant art and architecture historical methodologies and discourses in direct relationship to that material. Conceptual issues such as narrative, representation, perspective, agency, technology, style, symbolism, landscape, space, and power will be explored. Enrollment limited to 15.

**ASYS 2800. Archaeologies of Text.**

An interdisciplinary seminar that examines the interplay between ancient texts and archaeology in the study of the ancient world. Emphasis will be placed on articulating and analyzing the research methods and assumptions found in case studies set in the ancient Near East, Mediterranean, East Asia, and the Americas. Topics will include: canons of literature as/versus ancient inscriptions; materiality of text; texts on display, in deposits, in archives, in libraries, as refuse; literacy and education; practices of documentation and analysis; writing, language, and ethnicity; historical geography; fakes and forgeries; ancient texts and archaeological ethics. No prerequisites. Intended primarily for graduate students.

**ASYS 2920. Seminar in Biblical Studies: Ugaritic (RELS 2100F).**

Interested students must register for RELS 2100F.

**ASYS 2950. Scribal and Scholarly Practices in Babylonia and Assyria.**

This seminar will explore the development of written traditions among the cuneiform scribes of ancient Babylonia and Assyria. Topics covered include the mechanics of writing on clay tablets, the training of scribes and the school curriculum, the status of scribes in society, the development of literary and scholarly traditions, the creation of tablet archives, the circulation of scholarly knowledge, and the range of scholarship (e.g. science, medicine, ritual, literature) found in Babylonia and Assyria.

**ASYS 2980. Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ASYS 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**ASYS XLIST. Courses of Interest to Concentrators in Egyptology and Assyriology.**

## Egyptology

**EGYT 0300. In the Beginning: Cosmos and Creation in the Ancient World.**

As in every human society, the people of ancient Mesopotamia (Iraq) and Egypt wondered about the universe, their world, and how it came about in the first place. Preserved for us in ancient texts and images, their ideas share some things in common with more familiar ancient traditions, such as the creation account in the Bible. In this course, you will look at these ancient texts and images and learn how to dissect them to find what their authors were thinking. In the process, you will discover some surprisingly sophisticated concepts that are still present in our own culture.

**EGYT 0500. The Pyramids in Context: Archaeology of Life and Religion of Death in Old Kingdom Egypt.**

No ancient world monument is more iconic than the Egyptian pyramids of Giza. This ONLINE course sets out to be a comprehensive analysis of the Old Kingdom (2575-2150 BCE) pyramids and the material, historical and symbolic context that produced them. How and why were the pyramids built? What was inside them? How was everyday life in the pyramid towns? What kind of rituals were performed in their multiple chambers? This course wants to show the real face of the pyramids and the people who worked on and lived by them.

**EGYT 1100. Ancient Voices: The Literature of Ancient Egypt.**

In 1800 BCE, the ancient Egyptian writer Khakheperreseneb declared that he could not write anything new because everything had already been said. By then, ancient Egypt had already established a complex body of literature that continued to develop over the next several millennia. This course examines literary, religious, historical, and philosophical writings from ancient Egypt, ranging in date from 2400 to 250 BCE, in order to investigate how those texts can enrich our understanding of Egyptian culture and how they relate to broader literary traditions from the ancient world. Selected texts include adventure tales, love poetry, myths, and autobiographies. No prerequisites.

**EGYT 1200. Archaeology of Ancient Egypt.**

A general survey of the archaeology of ancient Egypt in prehistoric and Pharaonic times. Covers such areas as the development of private and royal funerary monuments, private and royal dwellings, and temples. Attention is also paid to the principles of Egyptian art and architecture and, where appropriate, to archaeological connections with the surrounding cultures. Offered in alternate years.

**EGYT 1210. Archaeology of Ancient Egypt.**

See Archaeology of Ancient Egypt (EG0120) for description.

**EGYT 1310. Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian I).**

Much of this two-semester sequence is spent learning the signs, vocabulary, and grammar of one of the oldest languages known. By the end of this introductory year, students read authentic texts of biographical, historical, and literary significance. The cornerstone course in the Department of Egyptology-essential for any serious work in this field and particularly recommended for students in archaeology, history, classics, and religious studies. No prerequisites.

**EGYT 1320. Introduction to Classical Hieroglyphic Egyptian Writing and Language (Middle Egyptian II).**

Continuation of a two-semester sequence spent learning the signs, vocabulary, and grammar of one of the oldest languages known. By the end of this introductory year, students read authentic texts of biographical, historical, and literary significance. The cornerstone course in the Department of Egyptology - essential for any serious work in this field and particularly recommended for students in archaeology, history, classics, and religious studies. Prerequisite: EGYT 1310.

**EGYT 1330. Selections from Middle Egyptian Hieroglyphic Texts.**

Readings from the various genres of classical Egyptian literature, including stories and other literary texts, historical inscriptions, and religious compositions. Students will be expected to translate and discuss assigned texts. Prerequisite: EGYT 1310, 1320.

**EGYT 1340. Selections from Middle Egyptian Hieratic Texts.**

Introduction to the hieratic script and readings from a variety of hieratic documents, including literary compositions, letters, and religious texts. Students will be expected to translate and discuss assigned texts. Prerequisite: EG 131, 132 (EGYT 1310, 1320).

**EGYT 1410. Ancient Egyptian Literature.**

A survey of one of the most intriguing aspects of ancient Egyptian culture. Readings (in translation) of many of the most significant literary documents that survive from Egypt. Presentation of a reasonable amount of historical perspective. Class discussions concerning the nature, purpose, quality, and effectiveness of the works read. Two term papers. No prerequisites. Offered in alternate years.

**EGYT 1420. Ancient Egyptian Religion and Magic.**

An overview of ancient Egyptian religion from both a synchronic and diachronic perspective. Examines such topics as the Egyptian pantheon, cosmology, cosmogony, religious anthropology, personal religion, magic, and funerary beliefs. Introduces the different genres of Egyptian religious texts in translation. Also treats the archaeological evidence which contributes to our understanding of Egyptian religion, including temple and tomb architecture and decoration. Midterm and final exams; one research paper.

**EGYT 1430. History of Egypt I.**

A survey of the history and society of ancient Egypt from prehistoric times to the end of the Eighteenth Dynasty (ca. 5000-1300 BC). Readings include translations from the original documents that serve as primary sources for the reconstruction of ancient Egyptian history.

**EGYT 1440. History of Egypt II.**

A survey of the history and society of ancient Egypt from the Ramesside Period to the Roman conquest (ca. 1300-30 BC). Readings include translations from the original documents that serve as primary sources for the reconstruction of ancient Egyptian history.

**EGYT 1450. History of Egypt III, Libyans, Nubians, and Persians in Egypt.**

Continuation of EGYT 1430, 1440 (not prerequisites). Covers the Third Intermediate and Late Periods (ca. 1000-332 B.C.E.), from the end of the New Kingdom to Alexander's conquest. Characterized by internal conflict and long intervals of foreign domination, this era, is often described as a period of decline, but closer study shows it to be eventful and rich in documentation. Offered in alternate years.

**EGYT 1455. Black Pharaohs: Nubian Rule over Egypt in the 25th Dynasty.**

The course will cover Egypt's 25th Dynasty (728-657 BC), when rulers of Nubia, located in the region of modern Sudan, added Egypt to their territories. Using a wide range of textual and archaeological evidence, students will learn about the history of famous 'black pharaohs' such as Taharqa and study some of Africa's most impressive archaeological remains. This fascinating period is not well understood and has often been afflicted in the past by racist, colonialist scholarship; using primary sources and recent theory on ethnic identity, this class will re-examine the complex and changing relationship between Egypt and Nubia.

**EGYT 1460. History of Egypt IV. The Age of Cleopatra.**

Continuation of EGYT 1430, 1440, and 1450 (not prerequisites). A survey of the history and society of ancient Egypt from Alexander's conquest to the Arab Conquest, ca. 332 B.C.E.-A.D. 600. Covers the Ptolemaic (323-30), Roman (30 B.C.E.-ca. A.D. 300), and Byzantine (ca. A.D. 300-640) periods. Focal point and pivot is the Ptolemaic period, from Alexander the Great to Cleopatra (332-30 B.C.E.). Offered in alternate years.

**EGYT 1465. Life on the Nile: Ancient Egypt beyond the Pharaohs.**

The history of ancient Egypt is marked by the names of their great pharaohs and monumental buildings. But what about ordinary people who made up the majority of this fascinating culture, yet are not well represented in historical narratives? This course will explore what we know about the daily life of non-royal Egyptians by looking at the primary texts (in translation), art, and material culture of ancient Egypt. We will look at various categories of population, such as children, craftsmen, women, soldiers; and discuss such issues and topics as households, growing up, family, education, love, clothing, medicine, magic, and leisure.

**EGYT 1470. Egypt After the Pharaohs: Archaeology and Society in the Coptic and Early Islamic Periods.**

The history of Egypt may be famous for the tombs, pyramids and mummies of the Pharaonic periods. This course, however, offers a vision of a different Egypt, a later Egypt: one that evolved from the traditions of the past but was infused by Christianity, Islam, Arabic, and the emergence of one of the world's great cities: Cairo. Students will experience the heritage of Egypt that is contained in the mosque of al-Azhar, the monasteries of the Egyptian desert, and the pageantry and ritual of a new set of ruling elites. At the same time they will understand the continuities of this land which Egyptians refer to as Umm al-Duniya "Mother of the World".

**EGYT 1480. Egypt in the Global World.**

From the 4th to the 2nd millennium BC we see Ancient Egypt as part of a wider world in the Eastern Mediterranean. Egypt had diplomatic and trade contacts with the major powers and smaller political entities of this period as well as armed conflicts. These contacts left an abundance of material evidence in Egypt in the archaeological and epigraphical records such as foreign luxury items and pottery, and depictions of foreigners in Egyptian tombs and temples. The course will shed light on the varying intensity and character of the relationship between Egypt and her neighbors in the Levant, Nubia and Libya and wider Eastern Mediterranean world.

**EGYT 1485. Medicine and Physicians in Ancient Egypt.**

The course explores medical practices and beliefs, including healing magic, in ancient Egypt, from the beginning of the Old Kingdom to the end of the Roman period, drawing evidence from both ancient texts (in translation) and archaeological sources. In addition to surveying ancient Egyptian medical practices, the course investigates the social world of the physicians and their patients, and their views on their bodies and illnesses. Topics surveyed include medical handbooks and recipes, physicians' equipment and training, gods, demons and disease, pregnancy and childbirth, veterinary medicine, the health effects of the ancient Egyptian diet, and later myths about Egyptian medical knowledge.

**EGYT 1490. Calendars and Chronology in Ancient Egypt and the Ancient World.**

Time is the dimension of history. Chronology studies how we know when events happened. Chronology is much more important to "BC history" than to "AD history." History books state that the great Ramses II ruled around the thirteenth century B.C.E. But how do we know this? The focus of this class is on the answers to such questions through the study of the foundations of the history of Egypt specifically and of the ancient world in general. Some prior knowledge of Egyptian language or civilization might be handy but is by no means required.

**EGYT 1500. Ancient Egyptian Art and Architecture.**

Ancient Egyptian art and architecture had a remarkably long history, and much that was produced is amazingly well preserved. This course will focus on the inception and development of these material expressions of high culture through detailed studies of monumental buildings and decorated private tombs, as well as the sculpture, painting, and minor arts from the Predynastic period through the end of the Middle Kingdom (c. 3700-1790 BC). Enrollment limited to 20.

**EGYT 1510. Ancient Egyptian Art II.**

Considers the art of ancient Egypt's New Kingdom or Empire Period (1500-1100 B.C.). The relief carving and painting of Theban temples and tombs are studied in detail, and the developments leading to the revolutionary Amarna style of art is carefully analyzed. Decorative arts, Tutankhamun's treasures, and recent exciting discoveries are all surveyed.

**EGYT 1520. The Archaeology of Ancient Egyptian Household and Settlement.**

Survey of the primary settlement remains from the Pharaonic Period of ancient Egypt, addressing the practices and problems in settlement and household archaeology. Not open to first year students.

**EGYT 1525. Living, Creating, Believing and Dying in the Village of the Royal Tomb Builders.**

The site of Deir el-Medina was home to a community of skilled workmen in charge of digging and decorating the tombs of both the Valley of the Kings and Valley of the Queens during the New Kingdom (ca. 1550-1069 B.C.). Deir el-Medina is usually considered the paradigmatic site-witness for studies of Egyptian daily life and benefits from a substantial material record. Through a multi-perspective analysis drawing on both tangible (archaeological structures) and intangible (textual/iconographical) sources, ancient and modern (excavation diaries and new discoveries recently made on the spot!), this course aims at discovering the lifestyle, practices and culture of this community.

**EGYT 1550. Ethnic Identity in Graeco-Roman Egypt.**

Egypt under Greek and Roman rule (from c. 332 BC) was a diverse place, its population including Egyptians, Greeks, Jews, Romans, Nubians, Arabs, and even Indians. This course will explore the sometimes controversial subject of ethnic identity and its manifestations in the material and textual record from Graeco-Roman Egypt, through a series of case studies involving individual people and communities. Topics will include multilingualism, ethnic conflict and discrimination, legal systems, and gender, using evidence from contemporary texts on papyrus as well as recent archaeological excavations and field survey projects.

**EGYT 1910. Senior Seminar.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**EGYT 1920. Senior Seminar.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**EGYT 2210. Introduction to Coptic.**

Coptic, the last stage of the ancient Egyptian language, was written with essentially Greek alphabetic characters. An introduction to Sahidic, which is perhaps the best represented of the Coptic dialects. Sahidic grammar is explained, and some texts, mainly of a biblical and patristic nature, are read. Open to undergraduates with the consent of the instructor. No prerequisites, but a knowledge of Middle Egyptian or Greek would be helpful.

**EGYT 2300. Readings in Ancient Egyptian.**

Advanced readings in ancient Egyptian texts in the original script and language. Readings will be selected from a particular genre, historical period, or site. This course is intended primarily for graduate students and may be repeated for credit. A reading knowledge of ancient Egyptian is required. A reading knowledge of both German and French is strongly recommended but not required.

**EGYT 2310. History of the Ancient Egyptian Language.**

Diachronic survey of ancient Egyptian from Old Egyptian through Coptic, covering changes in phonology and grammar and analyzing the processes through which these changes took place. Course requirements are short research papers to be presented in class and a final examination. Previous course work in at least one stage of the Egyptian language required; knowledge of Late Egyptian, Demotic (grammar) or Coptic preferable. Prerequisites: EGYT 1310 and EGYT 1320, plus either EGYT 2210, EGYT 2410 or EGYT 2610.

**EGYT 2410. Late Egyptian.**

Introduction to the grammar of the third historical phase of ancient Egyptian and readings from its various genres, including literary texts, letters, historical inscriptions, and tomb-robbing papyri. Students will be expected to translate and discuss assigned texts. Prerequisites: EGYT 1310, 1320.

**EGYT 2510. Social Life in Ancient Egypt.**

This course will provide a valuable opportunity to link theory and data innovatively. Taking the lifecycle as its structure, it covers Egyptian life from conception to death and the afterlife, drawing together a range of data sources, such as material culture, iconography, textual data, and human remains.

**EGYT 2530. The Perception of Time and Space in Ancient Egypt.**

This seminar aims to explore how ancient Egyptian perceived time and space, how they described them, and how they experienced them. Topics covered will include, inter alia, the notion of eternity, the mechanisms of time counting and space organization, the issue of awareness of history, the question of gender-differentiation in the domestic sphere, and the creation of a place.

**EGYT 2610. Introduction to Demotic.**

Begins with discussions and exercises in the grammar and peculiar script of this late stage of the Egyptian language, followed by readings of actual ancient texts, including *The Instructions of Onkhsheshonkhy*, *The Petition of Petiese*, and *The Story of Setne Khaemwas*. Knowledge of Demotic remains essential for a proper understanding of Egypt during the Saite, Persian, Ptolemaic, and Roman periods. Open to undergraduates with consent of instructor. Prerequisites: EGYT 2410 or 2210.

**EGYT 2800. Ancient Egyptian Phonology.**

Introduction into the phonology of the ancient Egyptian language, from its hypothetical proto-Semitic cognates to its final stage, the six major dialects of Coptic. The course will concentrate not only on phonology but also on how the principles of Egyptian phonology can be used in understanding and interpreting written forms.

**EGYT 2810. Old Egyptian.**

Introduction to the grammar of the first historical phase of ancient Egyptian and readings from its two primary genres, the Pyramid Texts and autobiographical inscriptions. Students will be expected to translate and discuss assigned texts. Prerequisites: EG 131, 132 (EGYT 1310, 1320).

**EGYT 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**EGYT 2980. Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**EGYT 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**EGYT XLIST. Courses of Interest to Concentrators in Egyptology and Assyriology.**

## English

### Chair

Richard M. Rambuss

The English Department fosters the study of British, American, and Anglophone literature—old and new—in ways that are both intensive and open. We offer a wide array of courses in poetry, drama, fiction, creative nonfiction, film, digital media, and theory. All of our courses emphasize the development of student skills in writing, textual analysis, and argument. You will find considerable diversity in critical approaches and methods among the department's faculty. We encourage students in our classes likewise to forge their own new ways of understanding literature and culture. English is among the most popular concentrations at Brown, and graduates of our highly ranked Ph.D. program are widely recognized for their scholarship and teaching.

For additional information, please visit the department's website: <http://www.brown.edu/academics/english/>

### English Concentration Requirements

The English Department fosters the study of British, American, and Anglophone literature—old and new—in ways that are both intensive and open. We study how English literature works, how we understand and appreciate it, and how we write about it. We offer a wide array of courses in poetry, drama, fiction, creative nonfiction, film, digital media, and theory. All our courses emphasize the development of student skills in writing, textual analysis, and argument. The department's faculty members are deeply committed to undergraduate teaching and advising. You will find considerable diversity in our critical methods, including cross-disciplinary approaches that relate the study of literature to history, politics, science, as well as to other art forms. We encourage students in our classes likewise to forge their own new ways of understanding literature and culture.

In addition to the standard English concentration, we offer an English concentration track in the practice of Nonfiction Writing. The concentration in English and the English/Nonfiction track follow the same core requirements, and students in the English concentration may elect Nonfiction Writing courses as electives. We invite applications from qualified juniors to the honors programs in both English and Nonfiction.

One of the largest humanities concentrations at Brown, English provides a strong foundation for a liberal education and for employment in many sectors, especially those that centrally involve writing and working with texts (in any form). In addition to authorship, scholarship, and teaching, these include: journalism, publishing, advertising, visual media, consulting, public relations, public service, finance, government, corporate research, and administration. Our English concentrators routinely go on to law, medical, and professional schools as well as to graduate education in literature and the arts.

### About the Concentration

We encourage students interested in concentrating in English to come into the department offices at 70 Brown Street and speak with a concentration advisor. Students in English courses who are considering an English concentration are welcome to make an appointment to speak with their instructor. Concentration programs must be approved by a concentration advisor. To declare a concentration, students must fill out an online Concentration form via ASK and enter their plan of study indicating the requirements that each course fulfills.

### Concentration Requirements (10 courses <sup>1</sup>):

- ONE course in "How Literature Matters" (ENGL0100, 0101): 1  
Addressing topics about which professors are especially passionate, these introductory courses aim to deepen and refine students' understanding of how literature matters: aesthetically, ethically, historically and politically. Students not only engage with larger questions about literature's significance, exploring the particular kinds of insights and thinking it is especially suited for conveying, they also gain a deeper awareness of the critical methods we use to understand and analyze it, engaging with matters of form, genre and media. Finally, these courses help students develop their skills as close, careful readers of literary form and language.
 

ENGL 0100A	How To Read A Poem
ENGL 0100C	Altered States
ENGL 0100D	Matters of Romance
ENGL 0100F	Devils, Demons, Do-Gooders
ENGL 0100G	The Literature of Identity
ENGL 0100J	Cultures and Countercultures: The American Novel after World War II
ENGL 0100M	Writing War
ENGL 0100N	City Novels
ENGL 0100P	Love Stories
ENGL 0100Q	How Poems See
ENGL 0100R	American Histories, American Novels
ENGL 0100S	Being Romantic
ENGL 0100T	The Simple Art of Murder
ENGL 0100U	Serial Fictions
ENGL 0100V	Inventing Asian American Literature
ENGL 0100W	Literature Reformatted
ENGL 0100Y	Do the Right Thing
ENGL 0100Z	The Experiment: Poetry and Knowledge
ENGL 0101A	Independence and Modern Literature
ENGL 0101B	Earth Poetics: Literature and Climate Change
ENGL 0101C	America Dreaming
- ONE course in Medieval and Renaissance Literatures (Pre-1700): 1  
These courses, which center on Medieval and Renaissance literary works, cast light on periods that can come across to us as both familiar and strange. They focus our attention on how literatures from these periods depict concepts such as aesthetics, romance, gender, sexuality, race, power and politics in ways that are like and unlike how we tend to think of them today—on how pre-modern or early modern works can both defamiliarize the categories of experience and identity we tend to take for granted and also suggest something of their origins. Several courses under this rubric will also engage with recent literary and filmic adaptations of works from these eras, exploring how many such works continue to function as vibrant and at times ambivalent inspirations for the literary imaginings of later periods.
- ONE course in Literatures of Modernity (Post-1700): 1

These courses explore the many strands of writing in English that have emerged from the eighteenth century through the present, shaping the contemporary world. These literatures reflect on political, economic, and intellectual history, from the idea of the nation and the structures of capital through the rise and dissolution of empire and the emergence of postcolonial states, including the forms of race, gender and sexuality that cut across them. Courses also examine how aesthetic works can shape and critique their moment: they look at genres like the novel and short story, poetry, drama, essays, and new, hybrid forms that have arisen with expanding digital media; they also take up a multitude of literary movements whose influences remain with us today, including Romanticism, realism, naturalism, modernism, and post-modernism.

4. ONE course in Literatures of the Color Line: 1

In 1903, W. E. B. Du Bois famously proclaimed in "The Souls of Black Folk" that "The problem of the twentieth century is the problem of the color-line,—the relation of the darker to the lighter races of men in Asia and Africa, in America and the islands of the sea." Courses in this category explore the complex ways in which literary texts have addressed American histories of race, ethnicity, and empire. They may do so from the vantage point of ideas about difference and hierarchy that predate the modern conception of race and by engaging with earlier histories of conflict and contact. These courses explore issues of intersectionality as well, highlighting how race operates in relation to other structures of difference such as gender, sexuality and class.

ENGL 0100F	Devils, Demons, Do-Gooders
ENGL 0100N	City Novels
ENGL 0100S	Being Romantic
ENGL 0100V	Inventing Asian American Literature
ENGL 0101A	Independence and Modern Literature
ENGL 0150X	The Claims of Fiction
ENGL 0150Y	Brontës and Brontëism
ENGL 0700E	Postcolonial Literature
ENGL 0700G	American Fiction and Mass Culture
ENGL 0710B	African American Literature and the Legacy of Slavery
ENGL 0710Q	American Literature in the Era of Segregation
ENGL 0710V	Death and Dying in Black Literature
ENGL 0710W	Readings in Black and Queer
ENGL 0710X	Black Poetics
ENGL 0710Y	Literature of US Inequality, 1945-2020
ENGL 0710Z	American Literature and the Constitution
ENGL 1310H	The Origins of American Literature
ENGL 1511A	American Literature and the Civil War
ENGL 1511C	Lincoln, Whitman, and The Civil War
ENGL 1511P	Realism, Modernism, Postmodernism: The American Novel and its Traditions
ENGL 1710J	Modern African Literature
ENGL 1710K	Literature and the Problem of Poverty
ENGL 1710P	The Literature and Culture of Black Power Reconsidered
ENGL 1711D	Reading New York
ENGL 1711F	India in English
ENGL 1711H	Lyric Concepts: The Question of Identity in Modern and Contemporary Poetry
ENGL 1711J	Art for an Undivided Earth / Transnational Approaches to Indigenous Art and Activism
ENGL 1711K	The Politics of Perspective: Post-war British Fiction

ENGL 1711L	Contemporary Black Women's Literature
ENGL 1711N	Monsters in our Midst: The Plantation and the Woods in Trans-American Literature
ENGL 1711O	Radical Pasts, Radical Futures: Literature and the Left
ENGL 1760U	American Modernism and its Aftermaths
ENGL 1760Y	Toni Morrison
ENGL 1761B	Narratives of Blackness in Latinx and Latin America
ENGL 1761E	Blackness and Being
ENGL 1761F	Toni Morrison
ENGL 1761V	The Korean War in Color
ENGL 1900D	Literature and Politics
ENGL 1901J	Fanon and Spillers
ENGL 1950H	The Recent Novel and its Cultural Rivals

5. ONE course in Literary Theory and Cultural Critique: 1

The late-twentieth century saw a revolution in the field of literary studies in the United States, as critics turned their attention to the contextual and historical nature of our categories of knowledge. This turn to theory was influenced by developments in psychoanalysis, linguistics, philosophy, political theory and sociology and by the emergence of social movements that challenged such structures as patriarchy, homophobia, racism, imperialism, economic inequality, and environmental violence. The avenues of inquiry opened up brought an increased awareness of the implication of literature in the operations of power and ideology; a sense of the potential for literary modes of presentation to challenge and displace such operations; and a new attention to the role of gender, race, empire, class, and sexuality in the formation of the literary work. Courses that satisfy the Literary Theory and Cultural Critique requirement explore some dimension of these issues – either directly, taking as their primary focus a set of theoretical questions or debates, or indirectly, by examining a compelling topical question of social and political significance through works of literature and literary theory.

6. FIVE electives<sup>2</sup> 5

Total Credits 10

<sup>1</sup> Each course may fulfill ONE requirement. Five courses must be 1000-level courses. With advisor approval, two of the ten required courses may be taken in departments other than English.

<sup>2</sup> Only TWO courses dealing primarily with the practice of writing at the 1000-level may be counted as electives. ENGL0900 and ENGL0930 do not count toward the concentration, however they do fulfill prerequisites for upper-level Nonfiction courses. One ENGL0200 may be counted toward the 10-course requirement only as an elective.

All substitutions and/or exceptions must be approved by the concentration advisor in consultation with the Director of Undergraduate Studies. A substitution or exception is not approved until specified in writing in the student's concentration file housed in the English Department.

## English Concentration -- Nonfiction Writing Track (10 courses)

The English concentration also includes a Nonfiction Writing Track. The requirements are the same as 1 through 6 above, but three of the five electives must be 1000-level Nonfiction Writing courses (only ONE of which may be intermediate: ENGL1030, ENGL1050). Only THREE Nonfiction courses may count toward the track.

## Honors in English

The English Honors program is intended for students who have been highly successful in their English concentration coursework and who want the opportunity to pursue a research project in more depth than is possible in an undergraduate seminar. The program is intended for those students with a strong desire to conduct independent research under the

supervision of a thesis advisor and culminates in the writing of a thesis during the senior year.

### Admission

Students apply to the Honors Program early in the second semester of their junior year. December or mid-year graduates may apply in their 6th semester, but are encouraged to apply during their 5th semester and write their theses alongside May graduates. Interested concentrators should speak to the Honors Advisor early in their junior year to discuss their plans. Specific deadlines for admission are announced annually and are available on the department website. Students who are studying off campus are expected to meet the application submission deadline.

Admission to the English Honors Program depends on evidence of ability and promise in the study of literature. To be eligible for admission, students must have received more As than Bs (and no Cs or below) in concentration courses completed. Students must complete an application; supply a brief writing sample, and request two letters of recommendation from English faculty with whom they have taken courses. If necessary, letters may come from faculty in related departments. Letters from teaching assistants may only serve as supporting recommendations. Candidates must also submit a one-page project proposal signed by the faculty member who has agreed to serve as the thesis advisor.

See procedures and application (<http://brown.edu/academics/english/english-honors-procedures>) for more details.

*December or mid-year graduates who wish to apply to honors have two options, but the first is highly encouraged:*

Option 1:

In their 5th semester (Spring), students apply to the honors program along with the other juniors. Accepted students will be incorporated into the regular honors cohort and must meet the same deadlines: i.e. they must complete their theses at the same time as the other honors students (though for mid-years this will be at the end of their 7th semester). They register for ENGL 1991 English Honors Seminar in the Fall, and ENGL 1992 Senior Honors Thesis in the Spring.

Option 2:

In the 7th semester (the Spring of their final year), students take an independent study with their thesis advisor, under whose direction they will begin to research and write their theses. This course must be taken S/NC. In the 8th semester (the Fall of their final year), as they complete their theses, students take ENGL 1992 for a grade. Mid-year graduates should consult with the Honors Director for information about deadlines.

### Requirements

The course requirements for the English Honors Program are the same as those for the regular concentration, with the following additions:

As part of regular coursework, and counting toward the concentration requirements, honors candidates must complete at least three upper-level seminars or comparable small courses in which students have the opportunity to do independent research, take significant responsibility for discussion, and do extensive scholarly and critical writing. Students are encouraged to include at least one graduate seminar in their program. (Permission to take a graduate course must be obtained from the instructor.) Honors candidates should discuss their proposed course of study with the Honors Advisor.

During the Fall and Spring of the senior year, honors candidates must complete two additional courses beyond the ten courses required by the regular concentration: ENGL 1991 and ENGL 1992. ENGL 1991 is the Senior Honors Seminar, in which students begin to research and write their theses, as well as meet to discuss their work. This is a mandatory S/NC course. ENGL 1992, the Senior Honors Thesis is an independent research course that must be taken for a grade.

Honors candidates must continue to receive more As than Bs in courses taken as part of the concentration. Courses completed with a grade of C will not count toward an Honors concentration. A student who receives such a grade and wishes to continue in the program must complete a comparable course with a grade higher than C.

### The Honors Thesis

The Honors thesis is an extended essay, usually between 50 and 80 pages, written under the supervision of a department faculty advisor and second reader. (Where appropriate, the advisor or the reader, but not both, may be in another department.) The thesis may be an interdisciplinary or creative project, but it is usually an essay on a scholarly or critical problem dealing with works of literature in English. The specific topic and approach of the thesis are worked out between the student and the thesis advisor, with assistance from the student's second reader. This process should begin in the latter part of the student's junior year. A good way to get an idea of what sorts of projects are possible is to visit the Hay Library, which stores theses from previous years, or to meet with the Honors Advisor.

A prospectus describing the project and endorsed by the faculty advisor must be submitted to the Honors Advisor at the beginning of the senior year. At the end of the senior year fall term, a student must submit approximately 25 pages of draft material toward the thesis. Full thesis drafts are due by mid-March; final bound copies of the thesis are due in mid-April. Late theses will not be accepted for honors after the April deadline; students who hand in theses after the deadline but before the end of the term will receive a grade for the thesis course, but they will not be eligible for departmental honors. The completed thesis will be evaluated by the student's advisor and a second reader, each of whom provides written commentary and suggests a grade for ENGL 1992.

### Evaluation

The English Department reviews the academic record as well as the thesis evaluations for each senior completing the Honors Program. Following a successful review, the student will be eligible to graduate with Honors in English.

## Honors in Nonfiction Writing

The Nonfiction Writing Honors Program is intended for students who have been highly successful in their English concentration work. Specifically, it allows those who have an expressed and proven interest in nonfiction writing to pursue more completely a single project under the supervision of a first reader. The intention is to help students to complete work worthy of publication. The program culminates in the writing of a thesis during the senior year.

### Admission

Students apply to the Nonfiction Writing Honors Program in the second semester of their junior year. December or mid-year graduates may apply in their 6th semester, but are encouraged to apply during their 5th semester and write their theses alongside May graduates. Interested concentrators should have already made contact with at least one member of the Nonfiction Writing faculty and should meet with the Honors Advisor early in their junior year to discuss their plans. Specific deadlines for admission are announced annually and are available on the department website. Students who are studying off campus are expected to meet the application submission deadline.

Admission to the Honors Program in Nonfiction Writing depends upon a student's demonstrated superior ability in nonfiction writing. Students must have taken either one intermediate and one advanced writing course, or two advanced writing courses by the end of their sixth semester and completed each of them with an S. To be eligible for admission, students must have earned more As than Bs (and no Cs or below) in other courses in the concentration plan. Students must submit an application, two letters of recommendation, a writing sample from an advanced writing course, and a project proposal.

See procedures and application (<http://brown.edu/academics/english/nonfiction-honors-procedures>) for more details.

*December or mid-year graduates who wish to apply for nonfiction honors have two options, but the first is highly encouraged:*

Option 1:

In their 5th semester (Spring), students can apply to the nonfiction honors program along with the other juniors. Accepted students will be incorporated into the regular nonfiction honors cohort and must meet the same deadlines: i.e. they must complete their theses at the same time as the other honors students (though for mid-years this will be at the end of their 7th semester). They register for ENGL 1993 Nonfiction Honors

Seminar in the Fall and ENGL 1994 Senior Honors Thesis in Nonfiction in the Spring.

Option 2:

In their 7th semester (the Spring of their final year) students take ENGL 1200 and in their 8th semester (the Fall of their final year) they take ENGL 1994. (Students choosing this option must consult with the Honors Advisor for information on deadlines.)

#### Requirements

Students in the Nonfiction Writing Honors Program take two additional courses beyond the ten courses required by the Nonfiction Writing Track -- ENGL 1993 Honors Seminar in Nonfiction Writing (with the Honors Advisor) and ENGL 1994 Senior Honors Thesis in Nonfiction Writing; the Honors track will bring to twelve the total number of required courses. The ENGL 1993 grade option must be S/NC; ENGL 1994 must be taken for a grade. Honors candidates should discuss their proposed course of study with the faculty member they choose to direct their thesis.

Honors candidates must continue to receive more As than Bs in courses taken as part of the concentration. Courses completed with a grade of C will not count toward an Honors concentration. A student who receives a "C" after admission to Nonfiction Honors and wishes to continue in the program must complete an additional course in a comparable subject area, with a grade higher than C.

#### The Honors Thesis

The Nonfiction Writing Honors thesis is an extended project, usually of between 50 and 80 pages, written under the supervision of one of the Nonfiction Writing faculty and a second reader (who can be from literature or another department). The specific topic and approach of the thesis are worked out between the student and the first reader, with assistance from the student's second reader. A good way to get an idea of what sorts of projects are possible is to visit the Hay Library, which stores theses from previous years, or to meet with the Honors Advisor. The work typically is in a genre chosen from Nonfiction Writing's spectrum: critical analysis, literary journalism, memoir, lyric essay, or narrative based on travel, science, history, or cultural critique.

Full thesis drafts are due by mid-March; final bound copies of the thesis are due in mid-April. Late theses will not be accepted for honors after the April deadline; students who hand in theses after the deadline and before the end of the term will receive a grade for the thesis course, but they will not be eligible for departmental honors. The completed thesis will be evaluated by its first reader and second reader, each of whom provides written commentary and suggests a grade for ENGL 1994.

#### Evaluation

The English Department reviews the academic record as well as the thesis evaluations for each senior completing the Nonfiction Writing Honors Program. Following a successful review, the student will be eligible to graduate with Honors in Nonfiction Writing.

## English Graduate Program

The Department of English offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/english>

## Courses

### ENGL 0100A. How To Read A Poem.

*It is difficult to get the news from poems/ yet men die miserably every day/ for lack/ of what is found there.* Poet William Carlos Williams captures this course's focus on the special ways that poetic language represents and gives shape to human experience. Organized around concepts and practical skills, the readings cross historical and geographical boundaries.

### ENGL 0100B. Literature, Trauma, and War.

This course surveys many genres and periods in order to consider and think about two traditional kinds of literary responses to war--glorifying it, and representing its horrors. We'll examine texts by Homer, Shakespeare, Milton, Wordsworth, Byron, Whitman, Hardy, Crane, Freud, Levi, Pynchon, and Sebald, among others; we may also screen one or two films. Limited to undergraduates. Students should register for ENGL 0100B S01 and may be assigned to conference sections by the instructor during the first week of class.

### ENGL 0100C. Altered States.

A course about ecstasy, rapture, transport, travel, mysticism, metamorphosis, and magic in pre- and early modern verse, drama, and prose, including: Ovid (*Metamorphoses*), Shakespeare (*A Midsummer Night's Dream*; *Othello*), Marlowe (*Dr. Faustus*), *Mandeville's Travels*; the writings of the medieval female mystics Julian of Norwich and Margery Kempe; the ecstatic verse of Crashaw, and the erotic, at times pornographic, verse of Donne, Herrick, Carew, Rochester, and Behn.

### ENGL 0100D. Matters of Romance.

Narratives (1100-1500) of men, women, and elves seeking identity on the road, in bed, and at court. Readings (in modern English) include Arthurian romances, *Havelok*, *lais* by Marie de France, and Chaucer's "Wife of Bath's Tale." Primarily for freshmen and sophomores. Students should register for ENGL 0100D S01 and may be assigned to conference sections by the instructor during the first week of class.

### ENGL 0100E. Catastrophic Communities.

What becomes of communities and individuals in a catastrophe? This course considers the different literary, social and ethical formations that arise or are destroyed in disaster, and examines what it means to be both an individual and part of a collective in times of unprecedented upheaval. Readings by Blanchot, Camus, Sebald, Duras, Freud, Arendt, Jaspers, Orwell, and Eggers.

### ENGL 0100F. Devils, Demons, Do-Gooders.

Who hasn't struggled with the problem of good and evil? We will investigate how various writers grapple with these fundamental questions of judgment. What constitutes good and evil in the first place, and who gets to make such judgments? Works may include John Milton, Mary Shelley, Jhumpa Lahiri, Frederick Douglass, Toni Morrison, and Herman Melville. Students should register for ENGL 0100F S01 and may be assigned to conference sections by the instructor during the first week of class.

### ENGL 0100G. The Literature of Identity.

This course will explore various conceptions of personal identity, with an emphasis on Romanticism. We'll read Anglo-American philosophical and literary texts (mostly poetry) from the Renaissance through the 19th century, taking some excursions into contemporary theory (queer, feminist, post-structuralist). Writers may include Shakespeare, Montaigne, Locke, Hume, Rousseau, Wordsworth, Keats, Emerson, Browning, and Wilde.

### ENGL 0100H. Fictions and Frauds: Literature and the Historical Imagination.

How does fiction reinvent history? What makes autobiography "true"? Readings focus on the slave narrative, Hawthorne, historical novels, and Jack Kerouac's "On the Road." Limited to undergraduates.

### ENGL 0100I. American Fiction and the Sea.

This class examines one of the most distinctive of literary genres: the sea tale. These narratives are interested not only in how we know what we know, but in the ways we imagine what we don't know. Novels and films to be discussed will include *Moby-Dick*; *Lord Jim*; *Aguirre, the Wrath of God*; *Apocalypse Now*; *The Witness*.

**ENGL 0100J. Cultures and Countercultures: The American Novel after World War II.**

A study of the postwar American novel in the context of the intellectual history of the 1950s, 1960s, and 1970s. We will read the postwar novel in relation to the affluent society, the vital center, the lonely crowd, the power elite, the one-dimensional man, the post-industrial society. Authors to be considered include Baldwin, Bellow, Ellison, Highsmith, McCarthy, O'Connor, Petry, Pynchon, and Roth. Two lectures and one discussion meeting weekly. Students should register for ENGL 0100J S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0100K. The Dead and the Living.**

Explores ethical, historical, and personal dilemmas in modernism through the relation between the dead and the living. What claims do the dead have on the living? How do the living shape the lives of the dead? Readings in literature, psychoanalysis, and philosophy, including Henry James, Virginia Woolf, Walter Benjamin, Sigmund Freud, James Joyce, W. G. Sebald, and Julian Barnes. Students should register for ENGL 0100K S01 and may be assigned to a conference section by the instructor during the first week of class.

**ENGL 0100L. What Was Postmodern Literature?**

How compatible is the idea of the postmodern with the idea of a historical period? This course looks at recent British and American literature through the optic of postmodern theory, discussing how the theoretical problematization of both history and politics has an impact upon the very possibility of fiction. Readings include Doctorow, Pynchon, Amis, Jameson, Lyotard, Baudrillard. Students may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0100M. Writing War.**

Examines the challenges that war poses to representation, and particularly to language and literary expression in the modern era. We will focus primarily on the First and Second World Wars, exploring the specific pressures war puts on novels and poetry, as well as on history, psychology, and ethics. Works by Sassoon, Owen, Hemingway, Woolf, Rebecca West, Graham Greene, Pat Barker, Tim O'Brien, Georges Perec. Students should register for ENGL 0100M S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0100N. City Novels.**

This course examines 20th and 21st century novels to consider how these narratives envision the city, its possibilities and limits. How does the city shape how we think, wander, grow up, see and know each other? How does the city divide people? How does the novel imagine ways to bridge those divisions? Readings by Woolf, Chandler, Wright, Cisneros, Smith, Calvino, Adiga, Whitehead.

**ENGL 0100P. Love Stories.**

What do we talk about when we talk about love? We will see how writers have addressed this question from Shakespeare's day to the present. Writers may include Shakespeare, Austen, Eliot, Flaubert, Graham Greene, Marilynne Robinson, and/or others. Students should register for ENGL 0100P S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0100Q. How Poems See.**

What makes poems and pictures such powerful forms of life? Why do pictures have so much to tell us? How do we see things in words? How do graphic images, optical images, verbal images, and mental images together constitute ways of understanding the world? Looking at poems and images from Giotto and Shakespeare, Wordsworth and Dickinson and Turner through such modern poets and painters as Stevens, Ashberry, Warhol and Hejtinian, we will study sensory and symbolic images, the uses and dangers of likeness, and the baffling confluence of concrete and abstract, literal and figurative, body and mind, matter and spirit.

**ENGL 0100R. American Histories, American Novels.**

How do novels make readers experience such traumatic historical events as war, slavery, genocide, the internment, and civil conflict? What kind of political or ethical perspective on such events do literary narratives encourage? How do novels construct cultural memory? This course explores important post-1945 novels that make us readers and feel in particularly resonant ways about American histories of race.

**ENGL 0100S. Being Romantic.**

"Romantic literature" and "Romantic art" are familiar concepts in the history of culture. But what does "Romantic" actually mean? Were Coleridge and Keats especially dedicated to writing about erotic love? Why would "Romantic" literature emerge during the period of the French Revolution and Industrial Revolution? What does early 19th-century "Romanticism" have to do with the meaning and status of the "Romantic" in our culture today? Readings in British and American writing from Blake and Mary Shelley to Ani DiFranco and Rage Against the Machine.

**ENGL 0100T. The Simple Art of Murder.**

A survey of the history of criminal enterprise in American literature. Authors to be considered include Poe, Melville, Hawthorne, Twain, Chandler, Wright, Petry, Highsmith, Millar, Harris, and Mosley.

**ENGL 0100U. Serial Fictions.**

A study of serial and serialized fictional narratives from the nineteenth century to the present-- dime novels, serial genre fictions, literary novels comprised of chapters initially published as short stories, radio and film serials, television programs old (*The Naked City*, *Hawaii-Five O*), newer (*The Wire*, *Sex in the City*), and new (*Americans*), podcasts, and video games (*Legend of Zelda*).

**ENGL 0100V. Inventing Asian American Literature.**

What insights can literature provide into the complicated workings of race in America? What role can the invention of a literary tradition play in illuminating and rectifying past and present injustices? We explore these questions by examining how the idea of an Asian American literary tradition came into being and by reading influential works that have become part of its canon. Students should register for ENGL 0100V S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0100W. Literature Reformatted.**

We'll put literary works produced for digital environments (novels on Twitter, cominatory poetry, collaborative fiction on chat forums) in conversation with works of literature produced in traditional forms. Do these new forms offer empowering extensions of the literary, or do they threaten the very forms of literature from which we can profit the most?

**ENGL 0100X. Literature and Social Justice.**

What role does literature play (if any) in understanding/revealing injustice, oppression, or inequity, or even helping create a more just world? What role might literature play in helping produce the very definitions of sociality and justice through which we see the world? Readings may be drawn from the writings of Mark Twain, Ralph Ellison, Toni Morrison, and Leslie Marmon Silko.

**ENGL 0101A. Independence and Modern Literature.**

Words like "freedom" and "independence" are central to modern global history. This course introduces students to modernist and postcolonial poetry and fiction, exploring individual and collective self-determination. We address questions of aesthetic autonomy and form, and collective aspirations along disparate lines of nation, race, gender, and sexuality. Readings from Achebe, Bulawayo, Conrad, Eliot, Hurston, Joyce, Kincaid, Lamming, Walcott, and Woolf. Students should register for ENGL 0101A S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0101B. Earth Poetics: Literature and Climate Change.**

Climate change is one of the most pressing issues of our time and calls for new strategies of collective action, but also for new ways of conceptualizing and attending to the changing Earth. This course will address how literary texts can help us develop our understanding of environmental change by attending to the material entanglements between nature and culture.

**ENGL 0101C. America Dreaming.**

What ever happened to the American Dream? How is American literature a series of dreaming--fantasy, utopia, dystopia, antislavery, reform, the West, and escape. Fiction, film, the essay, the nonfiction novel. What makes for an "American" myth? How is it exported to the world?

**ENGL 0150A. Elizabeth I: The Queen and the Poets.**

Queen Elizabeth I, a poet herself, adorned her aging body as the symbolic object of desire for a circle of ambitious male poets. Considers the poetic means by which Sidney, Spenser, and Shakespeare overcome the obvious obstacles to desire presented by her uncertain health and imperious temperament and court their Virgin Queen.

**ENGL 0150B. Objects of Beauty in Renaissance Culture.**

What made a poem or a play as beautiful in 16th-century England as a hat or the right pair of shoes? Literary history and aesthetics from Wyatt, Surrey, and More, through Sidney, Shakespeare, Jonson, and Donne.

**ENGL 0150C. The Medieval King Arthur.**

Where did stories of King Arthur come from and how did they develop in the Middle Ages? We will read the earliest narratives of King Arthur and his companions, in histories and romances from Celtic, Anglo-Norman, and Middle English sources, to examine Arthur's varying personas of warrior, king, lover, thief. Enrollment limited to 19 first-year students.

**ENGL 0150D. Shakespeare's Present Tense.**

*Shakespeare in Love* suggests how Shakespeare was clued in to elite and popular cultures. Current adaptations like *O* and *10 THINGS I HATE ABOUT YOU* demonstrate how Shakespeare provides anachronistic clues to issues of the present. This course will trace such clues by examining the cultural origins and ongoing adaptations of *Romeo and Juliet*, *Hamlet*, *Othello*, *Twelfth Night*, *Henry V*, and the sonnets. Enrollment limited to 19 first-year students.

**ENGL 0150E. Love and Friendship.**

What do we talk about when we talk about love? This course poses this question in various ways. How, for instance, can we tell the difference between love's various forms—between love that is friendly and love that is romantic? How do the different forms of love differently shape people? How does love work when it involves sex, or marriage, or children, or divinity? And what must love involve to be called "good"? Why? Materials will range from Plato and St. Augustine to Leo Bersani and Allen Bloom and will also include popular filmic representations of love. Limited to 19.

**ENGL 0150F. Hawthorne and James.**

An introduction to a pair of writers whose work continues to shape our understanding of American literature and American identity. Focusing on much of their most important work, our aim will be to understand how their conceptions of the relationship between writing and history both complicate and complement each other. Limited to 19 first-year students.

**ENGL 0150G. Lincoln, Whitman, and The Civil War.**

An introduction to the literature of the American Civil War: Whitman, Lincoln, Melville, Stowe, and other autobiographical and military narratives.

**ENGL 0150H. Literature of The American South.**

The South is as much a state of mind as a place on the map, and some of the major figures in American literature have contributed to the making of what we think of when we think of "the South." Explores the sometimes contradictory but always important meanings of the American South. Authors include Poe, Douglass, and Faulkner.

**ENGL 0150I. The Simple Art of Murder.**

This course surveys the history of criminal enterprise in twentieth-century American culture. Drawing from a broad range of sources ("literary" novels and pulp fiction, B-movies and auteurist features), we will assess the role of crime as object of aesthetic attention and attend to the questions that can arise about the idea of the criminal when one takes it up outside of its usual home in courts. Authors: Poe, Hammett, Fitzgerald, Chandler, Wright, Petry, Hughes, Butler. Directors: Hitchcock, Wilder, Huston, Truffaut, Pakula, Lupino. Limited to 19 first-year students.

**ENGL 0150J. Inventing America.**

One of the distinguishing features of American literature may be its seemingly constant struggle with the idea of America itself. For what, these authors wonder, does/should America stand? We will examine the rhetorical battles waged in some major works over the meaning and/or meanings of America's national identity. Authors may include Franklin, Hawthorne, and Fitzgerald. Limited to 19 first-year students. Instructor permission required.

**ENGL 0150K. The Transatlantic American Novel.**

This course reads American literature across national boundaries, focusing on the novel genre and the question of "American" identity as a problem in itself. The course takes up this problem in a wide array of novels spanning the period between the late eighteenth and twentieth centuries. Writers include Crèvecoeur, Susanna Rowson, Poe, Melville, Twain, and Nella Larsen. Limited to 19 first-year students.

**ENGL 0150L. The Sensational and the Real in Victorian Fiction.**

This course will explore two modes through which Victorian novels engaged the turbulent experience of their time: realism and sensation. We will examine how these different genres tackled issues of gender, sexuality, class, and personal and community identity. Enrollment limited to 19 first-year students.

**ENGL 0150M. "Model Minority" Writers: Cold War Fictions of Race and Ethnicity.**

Explores the construction of race and ethnicity in U.S. writings of the 50s, paying particular attention to how literary texts negotiate the ideological demands of Cold War anti-communism. Writers studied may include Saul Bellow, Carlos Bulosan, Ralph Ellison, Jack Kerouac, Norman Mailer, John Okada, and Jade Snow Wong.

**ENGL 0150N. Black Atlantic Narratives of Africa.**

We will study fiction, drama, and autobiography by black writers who have used the motif of a literal or symbolic journey to Africa to explore in powerful ways issues of the trans-Atlantic slave trade, Africa as land and concept, individual and collective memory. Writers will include Maryse Condé, Charles Johnson, George Lamming, Paule Marshall, Toni Morrison, and Derek Walcott.

**ENGL 0150O. Englishness and Britishness in Contemporary Fiction.**

How have writers of fiction responded to recent developments in British political culture? How has the category of Englishness changed during that period? This course offers an overview of some of the most important British writers of the last twenty years and an introduction to theories of culture and ideology. Readings include Ishiguro, Kelman, Caryl Phillips, Zadie Smith.

**ENGL 0150P. Is There a Theory of the Short Story?**

This course considers the question in the title by looking at works of short fiction by Melville, Conrad, Bierce, Joyce, Lawrence, Kafka, Wicomb, Paley, O'Connor, Beckett, White, and literary theories by figures such as Lukacs, Bakhtin and Deleuze. Enrollment limited to 19 first-year students. Banner registrations after classes begin require instructor approval.

**ENGL 0150Q. Realism and Modernism.**

The novel as a genre has been closely identified with the act of representation. What it means to represent "reality," however, has varied widely. This seminar will explore how the representation of reality changes as modern fiction questions the assumptions about knowing, language, and society that defined the great tradition of realism. English and American novels will be the primary focus of our attention, but influential French, German, and Russian works will be studied as well. Limited to 19 first-year students. Banner registration after classes begin requires instructor approval.

**ENGL 0150R. The Problem of Women's Writing.**

Combines a survey of British and American women writers with an interrogation of the concept of women's writing. Authors will include Austen and Bronte, Walker and Viramontes; theoretical topics will include the figure of the author, subjectivity and ideology, the concept of a separate women's canon or tradition, and the complex differences within "feminine" writing and "feminist" reading.

**ENGL 0150S. The Roaring Twenties.**

The 1920s helped solidify much of what we consider modern in 20th-century U.S. culture. This course reads literature of the decade in the context of a broader culture, including film and advertising, to think about the period's important topics: the rise of mass culture and of public relations, changes in women's position, consumerism, nativism and race relations. Writers include Fitzgerald, Hemingway, Larsen, Toomer, Parker. Enrollment limited to 19 first-year students.

**ENGL 0150T. Arms and the Man.**

"Mother Green and her killing machine!" So enthuses a grunt in Full Metal Jacket about the Marine Corps. This seminar explores the romance of man and machine: the individual man's body as a machine and group relations with each man as a cog in a larger body/machine. We'll also consider other sites—including the gym—infiltrated, at least figuratively, by militarism. Texts: Crane, *The Red Badge*; Herr, *Dispatches*; Swofford, *Jarhead*; Paul Fussell, *The Great War and Modern Memory*; Samuel Fussell, *Muscle*. Films: *Full Metal Jacket*; *The Hurt Locker*; *GI Jane*; *Three Kings*; *Pumping Iron*. Enrollment limited to 19. Instructor permission required.

**ENGL 0150U. The Terrible Century.**

Although the term "terrorism" was coined in the 18th century, and although its contemporary resonance has reached an unprecedented pitch, the truly terrible century was arguably the 20th. This course introduces 20th century literature in English through a historical and philosophical examination of terror and terrorism. We will focus on several historical contexts, including: British colonialism in Ireland and Africa, South African apartheid, and the post 9/11 world. Readings include Conrad, Bowen, Gordimer, Coetzee, Foulds, Walters, Hamid. Enrollment limited to 19 first-year students.

**ENGL 0150V. James and Wharton.**

Friends, rivals, fellow ex-pats, and close correspondents for 15 years, Henry James and Edith Wharton had much in common. Their names are often coupled together in much the manner as Hemingway and Fitzgerald, since their fiction has often thought to deal with the same set of concerns: the societal and emotional ups and downs of well-to-do people in London, Paris, and New York. This class will read James and Wharton side by side in order not only to see in what ways they shed light on each other, but in what ways they differ. Limited to 19 first-year students.

**ENGL 0150W. Literature and the Visual Arts.**

How do words and images represent? Are the processes by which literature and the visual arts render the world similar or different? Is reading a novel or a poem more like or unlike viewing a painting, a sculpture, or a film? This seminar will analyze important theoretical statements about these questions as well as selected literary and visual examples. Limited to 19 first-year students.

**ENGL 0150X. The Claims of Fiction.**

This course explores the interplay of tropes of strangeness, contamination, and crisis in a range of novels and shorter fiction, in English or in translation. We will ask why social misfits and outsiders somehow become such fascinating figures in fictional narratives. How do these fictions entice and equip readers to reflect on collective assumptions, values, and practices? Writers will include Baldwin, Brontë, Coetzee, Conrad, Faulkner, Ishiguro, Morrison, Naipaul, Rushdie, Salih, Shelley. Limited to 19 first-year students.

**ENGL 0150Y. Brontës and Brontëism.**

The novels of Anne, Charlotte, and Emily Brontë alongside works (fiction and film) influenced by or continuing their powerful (and competing) authorial visions: *Wide Sargasso Sea* (Rhys), *Rebecca* (Hitchcock), *The Piano* (Campion), and *Suspiria* (Argento). Among other questions, we will discuss the role of Romanticism, feminism, the bodily imaginary, colonialism, and genre. Enrollment limited to 19 first-year students.

**ENGL 0150Z. Hamlet/Post-Hamlet.**

Shakespeare's *Hamlet* is perhaps the most widely read, performed, adapted, parodied and imitated literary text of the western tradition. In this seminar we will begin by reading/re-reading the play before turning to a number of appropriations of Shakespeare, both in the west and non-west, in order to address social and aesthetic issues including questions of meaning and interpretation, intertextuality and cultural translation. Enrollment limited to 19 first-year students.

**ENGL 0151A. Hitchcock!**

An exploration of the work of one of the most famous directors of the twentieth century. We will watch many of Alfred Hitchcock's best-loved films, including *The Birds*, *North by Northwest*, *Vertigo*, *Psycho*, *Rear Window*, and *Rope*. In addition, we will read some of the most important criticism of these films. No knowledge of film theory required. Enrollment limited to 19 first-year students.

**ENGL 0151B. How to Do Things with Books.**

What can one do with a book? Read a novel, sure, but also cook a fabulous meal, join a movement, or reimagine ways of being. Each class will focus on old or rare materials in the John Hay Library and throughout Providence. We'll explore the nature of the book through discussion and hands-on activities such as letterpress printing and zine-making. Enrollment limited to 19 first-year students.

**ENGL 0200A. Thinking in Dark Times: Crisis and the Literary Imagination.**

How can writers and artists confront a world on the precipice? What political role does thinking play today? Through reflection on key periods of crisis in the twentieth century, this seminar examines how intellectuals address a threatened world in fiction, nonfiction, criticism, and theory. Texts may include: Arendt, Sontag, Hersey, Baldwin, Hayslip, Pynchon, Kushner, Livingston, Rankine, Coogler, others. Enrollment limited to 17.

**ENGL 0200B. The Animal in Modernity and Postmodernity.**

Since the industrial revolution, human manipulation, modification, and examination of animal life has accelerated at an unprecedented rate. From slaughterhouses and photography to laboratories and zoos, this course will consider how animal alterations impact modern and postmodern human life. Authors include Derrida, Foucault, Melville, Poe, Thoreau, Sinclair, Kafka, Sontag, and Benjamin. Enrollment limited to 17.

**ENGL 0200C. Visionaries, Dreamers, and Dissidents: Imagining Other Worlds.**

To change the world, you must first be able to imagine an alternative. This class will explore works by radical thinkers, activists, and artists from the last two centuries who dared to do just that — from communists to (oc)cultists, Soviet sci-fi to the Syrian resistance. Authors/directors include: Marx, Nietzsche, Freud, Malcom X, Alinsky, Lynch, Gibson, hooks, Vertov, Haraway, Tsutsui. Enrollment limited to 17.

**ENGL 0200D. Women of Color, Migration and Diaspora in America.**

What does it mean to be an immigrant to a country founded on settler colonialism and slavery? Starting with indigenous women's literature and moving on to Black, Asian and Latinx diasporas, this course will tend to the similarities and stark differences of women of color's lived experiences in American literature. Authors include Louise Erdrich, Bharati Mukherjee, and Chimamanda Ngozi Adichie. Enrollment limited to 17.

**ENGL 0200E. (Victorian) Flesh.**

From the Victorians we expect genteel courtesies and hushed gestures—but in the raw underbelly of the era lies the image of the grotesque body. This course dissects the flesh found in the Victorian crypts, miry rivers, and sullied sheets that also survives in our modern cultural consciousness. Texts/films include: Dickens, Poe, Wilde; *Batman: Gothic*; *Sweeney Todd*, *The Fly*. Enrollment limited to 17.

**ENGL 0200F. How We Became Machines.**

Do we create machines in our image, or are we their mere prototypes? Through a series of encounters with novels, films, poems, and manifestos, this class will examine the ways technology might transform (or destroy) our world, bodies, and thought. Works by: Melville, Shelley, Marx, Kafka, Beckett, Simondon, Deleuze. Films: *Ex Machina*, *Metropolis*, *Ghost in the Shell*. Enrollment limited to 17.

**ENGL 0200G. Plague Art, from the Black Death to AIDS.**

Plague art disrupts notions of the self as a contained body. It prompts us to notice our connections with each other and with non-human materials, and asks us to examine how trauma can be inherited and "caught." We will consider works emerging from contexts of the Black Plague, cancer, HIV/AIDS, and zombie apocalypse. Authors include Boccaccio, Shakespeare, Camus, Lorde, Whitehead. Enrollment limited to 17.

**ENGL 0200H. The Last Eighteen Years: Literature and Conflict in the 21st Century.**

This course will examine contemporary fiction alongside research being done in political science and economics, hoping to establish productive points of intersection. Topics like the Iraq War, mass incarceration, and the 2008 financial crisis will be discussed alongside Hamid's *Reluctant Fundamentalist*, Beatty's *The Sellout*, Smith's *Swing Time*, and Beyoncé's *Lemonade*. Supplementary reading will likely include writing by Coates, Piketty, and Arendt. Enrollment limited to 17.

**ENGL 0200J. Stuck in the Suburbs: A Poetics of Everyday Life.**

Suburbia is where nothing happens: a landscape that cultivates boredom and indulges angst. But it is also a site of repressed horrors, where our deepest anxieties come home to roost. This course examines architecture, tone, temporality, race, and gender in the literature and films of the suburbs. Texts include Eugenides, Perrotta, Lahiri; *Blue Velvet*, *The Stepford Wives*, *American Beauty*. Enrollment limited to 17.

**ENGL 0200K. Trans—: Transformation, Translation, Transgression in Literature.**

From transgression to transformation to trans rights, why does the prefix “trans” appear inescapable whenever one is discussing radical change? Centering on this mercurial prefix, this course examines the possibilities and limits of change from ancient anxieties about transcendence to contemporary discussions of transnationalism and transgender identities. Authors include: Wordsworth, Woolf, Ginsberg, Plath, Morrison, Imogen Binnie, hooks, Dylan, Against Me!. Enrollment limited to 17.

**ENGL 0200L. Between Home and Haven: Contemporary Narratives of Revolt and Refuge.**

What forces dictate our perception of “home?” Is it where we come from? Somewhere we must find? Or is home what persecutes us - a place from which we must escape or rebel? This course will contemplate sanctuary, family, authoritarianism, and resistance across fiction, graphic memoir, and film. Writers may include Marjane Satrapi, Julia Alvarez, and Viet Thanh Nguyen. Enrollment limited to 17.

**ENGL 0200M. One True Pairing (“OTP”): The Courtship Plot from Jane Austen to Jane the Virgin.**

What’s love got to do with it? This course examines how the courtship plot, from meet-cute to marriage, shapes our understanding, not only of romance and seduction, but also of gender, race, social class, sexual orientation, empire, and literary genre. Texts include fiction by Jane Austen, Nella Larsen, Jenny Han, and Henry James, alongside *Clueless*, *Moonlight*, and *Jane the Virgin*. Enrollment limited to 17.

**ENGL 0200N. Godforsaken Spaces: Literatures of the Demonic.**

Has fear of the Devil outlived the fear of God? While the demonic rationalizes unfathomable violence and renders forms of otherness intolerable, it may also allow us to imagine social alternatives. This course will explore demonic figures in contemporary literature/film: the scapegoats, witches, and misfits that occupy the margins of society. Authors include: McCarthy, O’Connor, Morrison, Gyasi, Erdrich. Enrollment limited to 17.

**ENGL 0200P. Literatures of Anxiety.**

From Xanax to safe spaces to #MAGA, our age is notoriously characterized as an unduly anxious one. But anxious by what measures? Tracking expressions of anxiety through a range of literary works, we’ll explore how the so-called “anxious” subject may yet signal a crucial, generative political position. Works by: Atwood, Dostoevsky, Abdellah Taïa, Dionne Brand, Hieu Nguyen, Lacan and LaWhore Vagistan. Enrollment limited to 17.

**ENGL 0200S. “Killing Shakespeare”: Three Plays and their Afterlives.**

Do adaptations of Shakespeare “kill” his texts? In this course, we will explore three plays—*Othello*, *The Tempest*, and *Hamlet*—with some of their most prominent adaptations. We will focus on how these adaptations consider important political questions of their times in relation to Shakespeare. Authors/directors include: Lawrence Olivier, Aime Cesaire, Jawad Al-Asadi, Vishal Bharadwaj, and Julie Taymor. Enrollment limited to 17.

**ENGL 0200T. The Revolution Will Not Be Televised: Poetry, Popular Music, and Politics.**

Can poetry and popular music transform our understanding of politics? This class examines how poetry and song as representational forms change how we see each other and the world. We also consider non-representational dimensions of lyric, such as sound. Readings and music from key historical moments in the US may include Claudia Rankine, Lucille Clifton, Bob Dylan, and Kendrick Lamar. Enrollment limited to 17.

**ENGL 0300B. The Romance of Travel.**

Considers the role of the strange, new, and fantastic in travel accounts of the Medieval period and Renaissance. If travel writers offered their stories as “windows to the world,” we will treat them as representations that expose, reinforce, and subvert the author’s cultural, political, and social attitudes. Works by Marco Polo, Chaucer, Columbus, Raleigh, Shakespeare, Defoe, and Swift. Enrollment limited to 30.

**ENGL 0300C. English Drama 1350-1700.**

This course presents great plays not written by Shakespeare, from the mystery plays of the late Middle Ages through Restoration drama. We will address these questions: What kinds of plays spoke to what kinds of audiences? How do changes in theatrical style relate to social change? How do genre, convention, staging, and acting style shape a dramatic text? Enrollment limited to 30.

**ENGL 0300E. Three Great Poets: Shakespeare, Donne, Milton.**

We will study these premier Renaissance poets from all angles possible, to understand the historical situations and political issues that shaped their writing, the authors and ideas that influenced them, the traditional forms they appropriated for new purposes. Most of all, we will study them to appreciate the power of poetry as a source of knowledge and inspiration. Enrollment limited to 30.

**ENGL 0300F. Beowulf to Aphra Behn: The Earliest British Literatures.**

Major texts and a few surprises from literatures composed in Old English, Old Irish, Anglo-Norman, Middle English, and Early Modern English. We will read texts in their historical and cultural contexts. Texts include anonymously authored narratives like *Beowulf* and *Sir Gawain and the Green Knight*, selected *Canterbury Tales* by Chaucer, and texts by Sir Thomas Malory, Spenser, Shakespeare, and Aphra Behn. Enrollment limited to 30.

**ENGL 0300G. Angels and Demons, Heavens and Hells: The Otherworld from the Middle Ages to the Early Modern Era.**

Wonder about what happens after death is among the most fascinating and gripping subjects of human inquiry. We will explore concepts of heaven, hell, purgatory, Satan, angels, ghosts, the soul, virtue and vice, the poetry of salvation, and the power of melancholy. Texts will include Old and Middle English Otherworld narratives, and writings by Dante, Milton, Browne, Marlowe, and others. Enrollment limited to 30.

**ENGL 0300H. New Selves, New Worlds.**

How did pre-modern and early modern writers imagine the self? How were these notions of the self transformed when individuals traveled to unfamiliar places? How do these new selves imagine certain fundamental questions, such as the power one has to control one’s emotions, social environment, and ultimate fate. Authors may include Chaucer, Shakespeare, and Milton. Enrollment limited to 50.

**ENGL 0300I. The Arrival of English: Medieval, Renaissance, Early Modern.**

In these literary periods, something arrives in England, whether it is the Anglo Saxon invaders, Christianity, French medieval romance, or the continental example of renaissance. Readings include *Beowulf*, *Wanderer*, *Dream of the Rood*, Chaucer’s *Canterbury Tales*, Spenser’s *Shepherds Calendar* and *Faerie Queene*, and Milton’s *Paradise Lost*. Enrollment limited to 30.

**ENGL 0310A. Shakespeare.**

We will read a representative selection of Shakespeare’s comedies, tragedies, histories, and romances, considering their historical contexts and their cultural afterlife in terms of belief, doubt, language, feeling, politics, and form. Students should register for ENGL 0310A S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0310D. Violence, Sacrifice, and Medieval Narrative.**

This course will introduce students to medieval prose and poetry that centralize the problematic nature of violent conflict and its attendant horrors. We will study literature from medieval England, Wales, Ireland, and Iceland, including *Beowulf*, two Old Icelandic sagas and Eddic poetry, Irish and Welsh texts, and part of Malory’s *Morte Darthur*. Topics will include sacrifice, religion, chivalry, horror, and contemporary critical approaches. Open to undergraduates only.

**ENGL 0310E. Shakespeare: The Screenplays.**

It's been said that if Shakespeare were alive today he'd be working in Hollywood. We will read five or six plays (including at least one representative of each of Shakespeare's genres: comedy, history, tragedy, romance) and then study film adaptations of them. The course is especially concerned with various approaches to the Shakespeare film: not just the straightforward adaptation, but also the Shakespeare spin-off ("10 Things"; "My Own Private Idaho"), the Shakespeare film as a star-turn (Helen Mirren as "Prospera" in Taymor's "Tempest"), and the Shakespeare film as an auteur-turn (Orson Welles's "Chimes at Midnight"; Polanski's "Macbeth").

**ENGL 0310F. Prose Sagas of the Medieval North.**

In this course, we will read long prose fiction from medieval Iceland, Ireland, and Wales, considering how it is similar to and different from the modern novel. We will consider plot, characterization, and style in each linguistic tradition. Texts may include *The Cattle Raid of Cooley*, *The Mabinogi*, *Njal's Saga*, *Egil's Saga*, *Grettir's Saga*, and *Gisli's Saga*.

**ENGL 0310G. Gender and Genre in Medieval Celtic Literatures.**

This course traces images of masculinity and femininity in Welsh, Cornish, Breton, and Irish narratives within and around early medieval Britain. You will be introduced to the genres of saga, romance, and the short poetic lai as you consider how the nature and gender of the hero changes in specific cultural and linguistic moments.

**ENGL 0500A. Literature and the Fantastic.**

Considers the changing ways Renaissance, Romantic, Victorian, and late-nineteenth-century authors incorporate non-realistic and fantastic themes and elements in literature. Special attention to the relationship between realism and fantasy in different genres. Readings include stories (gothic, ghost, and adventure), fairy tales, short novels, plays, and poems. Shakespeare, Swift, Brothers Grimm, Blake, Wordsworth, Coleridge, Keats, Tennyson, Robert Browning, Christina Rossetti, Stoker, Lewis Carroll, Dickens, Henry James. Enrollment limited to 30.

**ENGL 0500B. Introduction to British and American Romanticism.**

An exploration of "Romanticism" in literature written and read on both sides of the Atlantic between 1775 and 1865. Poetry, fiction, and essays by writers such as Blake, Wollstonecraft, Wordsworth, Coleridge, Byron, Percy Shelley, Mary Shelley, Keats, Thoreau, Emerson, Fuller, Hawthorne. Enrollment limited to 30.

**ENGL 0500C. Inventing America.**

Even before there was a United States, American authors argued over just what distinguished "America" from other communities. For what, they wondered, did or should America stand? Examines the rhetorical battles waged in some key pre-Civil War American literary texts over the meaning and/or meanings of America. Authors studied may include Bradstreet, Franklin, Douglass, and Melville. Enrollment limited to 30.

**ENGL 0500E. Foundations of the Novel.**

Introduces students to the first stages of novel writing in England and to historical and theoretical issues relating to the novel's "rise" to the dominant genre of the modern era. Eighteenth-century works of fiction are long; however, texts selected for this course are less long. They include Defoe's *Moll Flanders*, Richardson's *Pamela* and Fielding's *Joseph Andrews*. Enrollment limited to 30.

**ENGL 0500G. Literature and Revolutions, 1640-1840.**

Key developments in British and American literature understood in relation to the historical and cultural forces that produced the English Revolution, the American Revolution, the French Revolution, and the Industrial Revolution. Readings in major writers such as Milton, Paine, Blake, Wollstonecraft, Emerson, Barrett Browning, and Dickens, and in some of their non-canonical contemporaries. Focus on the emergence of a transatlantic literary culture. Enrollment limited to 30.

**ENGL 0500H. Mariners, Renegades, and Castaways: American Fiction and the Romance of the Sea.**

Examines one of the most distinctive of literary genres: the sea novel. Ostensibly stories of mystery and adventure, these texts are also meticulous accounts of working life at sea. Reads a number of well-known and lesser known American tales of the sea, including Poe's *The Adventures of A. Gordon Pym*, Melville's *Moby-Dick*, London's *The Sea-Wolf*, and Crane's "The Open Boat." Enrollment limited to 30.

**ENGL 0500I. The Literature and Politics of Friendship.**

Considers changing concepts of friendship as a key to major developments in British and American literature from the Renaissance through the 19th century. Special attention given to the ways the literary history of friendship intersects with leading political questions of the day. Shakespeare, Donne, Milton, Defoe, Wordsworth, Keats, Percy and Mary Shelley, Dickens, Poe, Melville, and Henry James. Enrollment limited to 30.

**ENGL 0500K. The Transatlantic Novel: Robinson Crusoe to Connecticut Yankee.**

How does the "American" novel change if we read it across national borders? This course reads novels written in/about America with this question in mind, focusing on such topics as slavery, exploration, seduction, and cosmopolitan ideals. Readings range from Aphra Behn to Mark Twain. Enrollment limited to 30. Students should register for ENGL0500K S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0500L. Literature, Trauma, and War.**

This course surveys many genres and periods in order to consider and think about two traditional kinds of literary responses to war--glorifying it, and representing its horrors. We'll examine texts by Homer, Shakespeare, Milton, Wordsworth, Byron, Whitman, Hardy, Crane, Freud, Levi, Pynchon, and Sebald, among others; we may also screen one or two films. Enrollment limited to 30. Open to undergraduates only.

**ENGL 0500P. The Examined Self: Lives of the Soul.**

This course examines a crucial tradition in American letters and culture: the literature of self-examination and the spiritual quest. Each work focuses in some way on questions of identity and identification: We will be reading a wide range of authors and genres-- spiritual autobiography, short fiction, the novel, conversion narratives, confessions, and lyric and epic poetry. Limited to 30 students.

**ENGL 0510A. Literature and Print Culture.**

The cultural impact of widely circulating printed material -- books of poetry, essays, and fiction but also newspapers, stock certificates, and advertisements -- makes the period 1660-1740 the first technologically enabled information age. The production and consumption of published texts changed the world for the restored monarch and his licentious court, for the rising bourgeoisie, and for the newly literate classes. We will follow several controversies, experiments, and innovations of the print revolution in works as apparently diverse as Milton's epic poetry, Manley's erotic secret histories, and the ads in *The Spectator*. Other canonical and non-canonical writers include Rochester, Behn, Dryden, Swift, Manley, Haywood, and Defoe.

**ENGL 0510B. The Gothic.**

The course will investigate the origins and development of Gothic literature from its invention during the eighteenth century to its postmodern forms. We will consider conventional figures (monsters, distressed heroines, moldering castles), common themes (fear, horror, the supernatural, the irrational, the transgressive), and the cultural work they do. Readings include Walpole, Lewis, Radcliffe, Shelley, James, and King.

**ENGL 0510C. The Victorian Novel.**

Considers the Victorian novel with an emphasis on its many forms, including the social-problem novel, *bildungsroman*, sensation novel, detective novel, and multiplot novel. Topics covered include the nature of realism, serial publication, empire, the "new woman," industrialization, the "condition of England," science and technology, and the role of the artist. Novels by Charlotte Brontë, Charles Dickens, Elizabeth Gaskell, George Eliot, Wilkie Collins, Thomas Hardy, Anthony Trollope. Students should register for ENGL 0510C S01 and may be assigned to conference sections by the instructor during the first week of class. Banner registrations after classes begin require instructor approval.

**ENGL 0510D. Mark Twain's America.**

A course for all kinds of readers of Twain and his contemporaries. Close readings of fiction and essays that focus on race, slavery, capitalism, and the development of "modern" literature. Works include *Puddinhead Wilson*, *Huck Finn*, and *Connecticut Yankee*.

**ENGL 0510G. New Worlds, New Subjects: American Fiction at the Dawn of the Twentieth Century.**

In 1900, the historian Henry Adams declared, Americans lived in a world so radically transformed that "the new American ... must be a sort of God compared with any former creation of nature." This new world had many progenitors: Darwin's theory of evolution; Nietzsche's theory of the will; Freud's theory of the unconscious; the rise of the mass media; the industrial production line; the triumph of consumerism; mass immigration; Jim Crow; the New Woman. This class reads works of fiction from the turn-of-the-century in the context of these transformations. Writers include Freud, Nietzsche, Stephen Crane, Henry James, and Edith Wharton.

**ENGL 0510H. Victorian Self and Society.**

This multi-genre course is an introduction to literature and culture of the Victorian period, looking at the changing ideas of society and the individual's place within that larger community in an age of empire, industrialization, urbanization, class conflict, and religious crisis. Topics include conceptions of the role of art and culture in society, the railway mania of the 1840s, the "great stink" of London, women's suffrage and the condition of women, and the Great Exhibition of 1851. Readings will include Carlyle, Charlotte Brontë, Ruskin, Robert Browning, Dickens, Tennyson, Christina Rossetti, George Eliot, and Lewis Carroll.

**ENGL 0510M. Madness and Enlightenment: Literature 1660-1800.**

The term "enlightenment" has been used to emphasize the power of reason in the development of intellectual freedom, democracy, capitalism, class mobility, and other aspects of 18th-century experience. However, the period's major writers were fascinated by unreason, by aberrant states of mind from love melancholy to outright madness. Readings include Swift's *Tale of a Tub*, Pope's *Dunciad*, Johnson's *Rasselas*, Sterne's *Tristram Shandy*, Boswell's *Hypochondriack*, and Godwin's *Caleb Williams*.

**ENGL 0510N. Victorian Modernity: Literature 1880-1900.**

"Modernity" in the *fin-de-siècle* period meant progress, the "march of the intellect," technological innovation, urban growth, female emancipation, but it also meant fears of degeneration, moral decline, the rise of the crowd, and the degradation of the individual. This course considers how these contradictions come to a climax in the literature, art, and culture of the 1880s and 1890s. Authors include G. B. Shaw, Oscar Wilde, Thomas Hardy, Charles Algernon Swinburne, H. G. Wells, Olive Schreiner, George Egerton.

**ENGL 0510P. Fiction from Dickens to James.**

An introduction to nineteenth-century fiction in English by eight major authors—four British and four American. Emphasis will be placed on the careful reading and interpretation of the novels and short stories in historical context. Issues to be addressed include the rise of the mass media, transatlantic literary relations, literature and ethics, and aestheticism. Works by Dickens, Poe, Eliot, Melville, Stevenson, Twain, Wilde, and James. Students should register for ENGL 0510P S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0510Q. Unstable Subjects: Race and Meaning in Contemporary (African) American Literature.**

What are the stakes involved in defining (African) American literature through a racialized authorial framework? Should we adhere to this prescribed and contentious categorization when considering writers who only incidentally identify as "black," and whose works challenge any critical or aesthetic alignment based upon racial affiliation? More broadly, this course seeks to question the lingering persistence of race as an ontological marker within the literary arts. Writers include but are not limited to Fran Ross, Darryl Pinckney, Andrea Lee, David Henry Hwang, Maurice Manning, and Colson Whitehead.

**ENGL 0510R. American Renaissance.**

This course examines major and lesser known writers of nineteenth-century America, emphasizing the works of Emerson, Melville, and Catharine Sedgwick. The focus is on Romantic literature and culture, with particular emphasis on the following subjects: Nature and transcendence; capitalism and its discontents; utopianism and reform; slavery and antislavery; the problem of history and national culture; and transatlantic relations. Readings include Transcendentalist essays, slave narratives, romance novels, autobiography, fiction, and lyric and epic poetry. Improved student writing is a main goal of the course.

**ENGL 0510S. Good, Evil, and Inbetween.**

Are humans born naturally good, evil, neither, or all of the above? Does evil lurk deep within the heart of all that is good, or can the forces of good eradicate those of evil? Is evil an inextricable part of what it means to be human in the first place? We'll examine these and related questions by reading some especially provocative literature, including Frankenstein, *Jekyll and Hyde*, and works by Hawthorne, Poe, and Fitzgerald. We'll also view several relevant movies, including *Young Frankenstein*.

**ENGL 0510W. Coupling: The Literature of Courtship.**

This course examines the courtship plot in the Anglo-American literary tradition, concentrating on novels of the eighteenth and nineteenth centuries but extending forward to twentieth-century and contemporary novels, and explores how these fictions have constructed and challenged normative narratives of gender and sexuality.

**ENGL 0510Y. Nineteenth-Century British Fiction.**

This course focuses on the fiction of nineteenth-century Britain, with particular attention to its exploration of gender and sexuality, class, national and imperial cultures, the familiar and the strange. Readings will include novels and short stories by Jane Austen, Mary Shelley, Emily Brontë, Elizabeth Gaskell, Charles Dickens, Robert Louis Stevenson, Rudyard Kipling, and Thomas Hardy.

**ENGL 0510Z. Worldly Victorians: Victorian Literature at Home and Abroad.**

This course explores how Victorian literature engaged questions animated by Britain's experience of conflict and triumphalism at home, and imperial power and anxiety on the global stage. Authors we read will include Alfred, Lord Tennyson; Charlotte Brontë; Elizabeth Gaskell; Rider Haggard; Olive Schreiner; and Bram Stoker.

**ENGL 0511A. Dickens: The Novel and Society.**

This course rehabilitates Charles Dickens from his reputation as a mainstream writer paid by the word, most famous as the author of sentimental, implausible works for children, such as *A Christmas Carol*. We will be looking at Dickens's social novels as a formally innovative response to the urban and industrial capitalism of his time. Issues will include: realism, the relation of his fiction to his journalism, serial form, and representations of work, the city, and bureaucracy.

**ENGL 0511B. The Nineteenth-Century British Novel.**

A study of major novelists of the period, through the question: How did the novel develop as a form of social understanding? We will be looking at novels as bearers of social values, especially around questions of property, class, marriage, work, bureaucracy and the state, and selfhood. Authors studied: Jane Austen, Emily Brontë, Charles Dickens, Anthony Trollope, and Thomas Hardy.

**ENGL 0511C. Fantastic Places, Unhuman Humans.**

What can the grotesque, monstrous, and even alien creatures found lurking in an extraordinary range of literature across many centuries reveal about the different ways humans have imagined what it means to be human in the first place? Is the human a unified, single category of being at all? Authors may include Shakespeare, Mary Shelley, and Poe.

**ENGL 0511E. Melville, Conrad, and the Sea.**

Stories begin with the sea: *Jason and the Argonauts*, *Sinbad and the Seven Seas*, Odysseus trying to sail home. The sea is the place of 'tall tales,' of adventure, and of terror, but also of industrial labor and modern commerce. This class reads the sea narratives of Herman Melville and Joseph Conrad within this larger narrative and historical context.

**ENGL 0511G. Introduction to Native and Indigenous Literatures.**

This course will familiarize students with the study of Native and Indigenous literatures in North America. Focusing on a range of genres, geographic locations, and historical moments, students can expect to acquire both a working knowledge of the history of Native literatures in English and a critical methodological approach to the study of American literature.

**ENGL 0511H. Late Romantics.**

An introduction to the varied work of canonical and non-canonical writers often described as British second-generation or late Romantics: Keats, the Shelleys, Byron, Clare, de Quincey, Hemans, Austen. We will explore what lateness constitutes for these authors as a political, aesthetic, and ethical category, and consider how it informs the kind of distinctly "Romantic" work that characterizes their writings. Particular emphasis on close readings of poetry and theoretical texts, as well as excursions into late nineteenth-century authors.

**ENGL 0511J. Renegades, Reprobates, and Castaways.**

In this ONLINE course, we'll look at a range of literary works—including short stories, novels, graphic novels, films, and electronic literature—populated by characters cast as pirates, degenerates, depraved, and miscreants. We'll examine how the seemingly disreputable characters, settings, and/or forms offer alternative visions of a just society by challenging powerful institutions, conventional moral principles, and/or dominant conceptions of the "normal" and "natural."

**ENGL 0511K. Terrible Births: the Novel out of Romanticism.**

A new world struggled to be born at the turn of the nineteenth century, as Europe was consumed in revolutionary wars, the Industrial Revolution spawned new powers and violence, and the age of Romanticism envisioned a Promethean spirit unbound in poetry. We will be reading the novels that defined this tumultuous age and those that came in its wake. We will read Shelley's "Frankenstein," Brontë's "Wuthering Heights," and books by Walter Scott, Charlotte Brontë, and Charles Dickens.

**ENGL 0700A. Introduction to African American Literature, 1742-1920.**

Surveys African American writing from the beginnings to the Harlem Renaissance, reading both poetry and prose (primarily slave narratives, speeches, essays, and fiction). Attention to how African American authors have shaped a literature out of available cultural and aesthetic resources. Enrollment limited to 30.

**ENGL 0700B. Introduction to African American Literature, 1920-Present.**

All genres of literature from the Harlem Renaissance to the present, tracing the development of an African American literary tradition. Enrollment limited to 30.

**ENGL 0700C. Twentieth-Century American Fiction.**

Through detailed readings of a variety of novels from almost every decade, this class explores the various ways fiction responded to what has been called the American century. Our main emphasis will be on the relationship between aesthetic and national representation. Writers to include Wharton, Fitzgerald, Faulkner, Ellison, Kingston, and DeLillo. Enrollment limited to 30. Students will be assigned to conference sections by the instructor during the first week of class.

**ENGL 0700D. Inventing Asian American Literature.**

Through a focus on works by Asian Americans, this course examines how the concept of literature has evolved across the twentieth century. We address how different genres and literary modes shape the way readers view experiences depicted in literary works, paying attention to how works "theorize" their own interpretation. We also take up the issue of how canons get formed. Enrollment limited to 30.

**ENGL 0700E. Postcolonial Literature.**

Examines fiction, drama, poetry, travel writing, and cultural criticism by contemporary writers from former colonies of the British Empire. We study works by Anglophone writers from African, Caribbean, and South Asian backgrounds. Issues that will concern us include: cultural-nationalism, diaspora, and globalization; histories, identities, and generational shifts; literary form and the idea of "postcolonial literature." Authors will include Coetzee, Ghosh, Hartman, Naipaul, Ondaatje, Kincaid, Soyinka, Walcott, and Wicomb. Enrollment limited to 30.

**ENGL 0700F. Introduction to Modernism: Past, Future, Exile, Home.**

An introduction to European Modernism with an emphasis on British Literature. We will address ideas of personal and national history through literary and aesthetic innovations of the first half of the 20th century, as well as the relationship—literary, cultural, historical and psychological—between constructions of home and abroad. Texts include James, Conrad, Forster, Joyce, Proust, Woolf, Faulkner, Waugh, and Freud, as well as films by Sergei Eisenstein and Fritz Lang. Enrollment limited to 30.

**ENGL 0700G. American Fiction and Mass Culture.**

How have American fiction writers responded to the growing national influence of mass culture industries such as recorded music, film, and television? This course will consider this question by assessing both how writers have imagined the impact of mass culture on American life and how the style of literary writing has evolved in relation to popular media. Authors include F. Scott Fitzgerald, Nathanael West, Toni Morrison, Colson Whitehead, and Don DeLillo. Enrollment limited to 30.

**ENGL 0700J. Contemporary British Fiction.**

This course is an introduction to the study of 20th century literature in English. We consider central terms of and approaches to literary criticism by reading some of the most important British writers of the last fifty years. We will also take into account theories of culture, ideology and nationhood, and attempt to bring into focus a Britain defined as much by its ways of looking as by historical and geopolitical situation. Readings include Kingsley Amis, Greene, McEwan, Zadie Smith, Spark, Kelman, Banville, Naipaul and Sebald. Enrollment limited to 30.

**ENGL 0700K. 20th-Century Literatures in English.**

This course offers a broad introduction to a range of literatures written in English, tracing shifts in the formal conventions of fiction and poetry. We examine ongoing debates about what literature is and what social role it plays. We consider how these debates respond to historical changes such as industrialization, the collapse of global empires, and movements for social equality. Writers include Dreiser, Woolf, Eliot, Hughes, Toomer, Cather, Morrison, Hwang, Rushdie. Enrollment limited to 30. Students should register for ENGL 0700K S01 and will be assigned to conference sections by the instructors during the first week of class.

**ENGL 0700L. Make It New: American Literature 1900-1945.**

Introductory survey of a major—perhaps *the* major—period of American literature. Genres include poems, plays, short stories, and novels, as well as film. Writers include Willa Cather, Raymond Chandler, T. S. Eliot, William Faulkner, F. Scott Fitzgerald, Robert Frost, Ernest Hemingway, Eugene O'Neill, Gertrude Stein, and Wallace Stevens; filmmakers include Charlie Chaplin and Orson Welles. Enrollment limited to 30.

**ENGL 0700P. Reading Practices: An Introduction to Literary Theory.**

What is it to read? This course is an introduction to theories of reading that have shaped literary interpretation and definitions of literature from the early twentieth century to the present, with particular attention to the relation between "literary theory" as a discipline and the broader reading practices it engenders and from which it emerges. We will read the New Criticism, structuralism, post-structuralism, and new historicism, critical race theory and feminist critiques, and recent work in aesthetics. Topics include literariness and textuality, the reader and subjectivity, narrative, rhetoric, and the problem of representation, and "new formalism." Enrollment limited to thirty.

**ENGL 0700Q. Poetic Cosmologies.**

This course will examine how various traditions within modern and contemporary poetry have addressed the question of materiality. Readings will range from poetic explorations of the archaeologies of place by William Carlos Williams and Charles Olson, to the investigations of non-human materialities of crystals, clouds and bacteria by writers such as Clark Coolidge, Christian Bök and Lisa Robertson. Enrollment limited to 30.

**ENGL 0700R. Modernist Cities.**

In the early twentieth century, modernist writers headed for New York, Paris, London and other cities, and based their literary experiments on forms of metropolitan life. We will discuss chance encounters, cosmopolitan and underground nightlife, solitary wandering, and bohemian communities. Writers may include Barnes, Dos Passos, Eliot, Hemingway, Hughes, Larsen, Joyce, McKay, Rhys, Woolf. Enrollment limited to 30.

**ENGL 0710B. African American Literature and the Legacy of Slavery.**

Traces the relationship between the African American literary tradition and slavery from the antebellum slave narrative to the flowering of historical novels about slavery at the end of the twentieth century. Positions these texts within specific literary, historical, and political frameworks. Authors may include Frederick Douglass, Harriet Jacobs, Charles Chesnut, Octavia Butler, and Toni Morrison.

**ENGL 0710E. Postcolonial Tales of Transition.**

This course focuses on postcolonial British, Caribbean, and Southern-African works that exemplify, complicate, or refashion the category of the bildungsroman, the "novel of education." Issues to be considered include the ways the texts rework archetypal tropes of initiation, rebellion, development, and the interplay of contradictory passions. We will also think about ways in which issues of race, gender, and sexuality emerge in the texts, and the connections or disjunctions between literature and "the real world." Writers will likely include Dangarembga, CLR James, Ghosh, Ishiguro, Joyce, Kincaid, Lamming, Naipaul, Rhys, Wicomb.

**ENGL 0710F. Being There: Bearing Witness in Modern Times.**

What is the significance of one who says, "I was there"? This course explores the ethical, literary and historical dimensions of witnessing in an era when traumatic events are increasingly relayed secondhand or recorded in sound and image. Texts include Forster, Woolf, Camus, Freud, Celan, Coetzee; films by Hitchcock and Kurosawa; and readings in law and psychology.

**ENGL 0710I. Global South Asia.**

This course provides an introduction to contemporary fiction by South Asia and its diaspora. We will read novels written in North America, the Caribbean, Australia, Africa, the United Kingdom, and of course South Asia, paying particular attention to issues of identity, ethnicity, and transnational circulation. Authors include Adiga, Hanif, Lahiri, Meeran, Mistry, Naipaul, Roy, Rushdie, Selvadurai, and Sinha.

**ENGL 0710J. Introduction to Asian American Literature.**

This course is intended to familiarize students with key issues that have shaped the study of Asian American writings and to provide a sense of the historical conditions out of which those works have emerged. As a literature course, it will focus on textual analysis—on how particular texts give representational shape to the social, historical and psychological experiences they depict. Readings consist primarily of works that have a canonical status within Asian American literary studies but also include newer works that suggest new directions in the field. It also strives to provide some coverage of the major ethnic groups.

**ENGL 0710L. Ishiguro, Amongst Others.**

Kazuo Ishiguro is one of the most distinctive and enigmatic voices in contemporary fiction. He has few obvious precursors, and there is little consensus among literary critics about the meanings of his works. This course will try to establish principles for reading Ishiguro's works by seeking alliances for his writing in works of philosophy, literature and cinema. Such interlocutors will include Ozu, Kiarostami, Kierkegaard, Sartre, Hadžihalilović, Dostoevsky, Pasolini.

**ENGL 0710M. Impressionism, Consciousness, and Modernism.**

This course explores the role of the "literary impressionists" (Crane, James, Conrad, and Ford) in the transformation of the novel from realism to modernism (especially the "post-impressionists" Stein, Joyce, and Woolf). "Impressionism" is defined by its focus on consciousness, the inner life, and the ambiguities of perception. What happens to the novel when writers worry about whether the way they tell their stories is an accurate reflection of how we know the world? Attention will also be paid to how the literary experiments of impressionist and post-impressionist writers relate to simultaneously occurring innovations in the visual arts.

**ENGL 0710N. Fitzgerald, Hemingway, and the Lost Generation.**

An introduction to two of the most popular and influential American novelists of the twentieth century, Scott Fitzgerald and Ernest Hemingway. We will read many of their most important novels and stories, including *The Great Gatsby*, *Tender is the Night*, *In Our Time*, *The Sun Also Rises*, and *A Farewell to Arms*. In addition we will examine the work of the contemporary American writers who most influenced them: Gertrude Stein, Willa Cather, Sherwood Anderson, and T. S. Eliot.

**ENGL 0710Q. American Literature in the Era of Segregation.**

This course examines how American literature intersects with the legal, ethical, and racial discourses that defined the system of racial segregation. In doing so, the course will assess the ways that literary style and genre became inseparable from the culture of segregation. Authors include Mark Twain, Nella Larsen, William Faulkner, and Richard Wright.

**ENGL 0710R. Poetry and Science.**

This course will explore the relationship between the observational procedures and modes of composition employed by twentieth and twenty-first century poets who have worked in more conceptual or avant-garde traditions and the practices of description and experimentation that have emerged out of history of science. Readings will range from Gertrude Stein's poetic taxonomies to recent work in critical science studies.

**ENGL 0710S. The Eighties: Earnestness to Irony.**

From "White Noise" to "Working Girl," Duran Duran to Public Enemy, this course explores the culture, rhetoric, and politics of the 1980s through literature, film, music, and television. What kind of counterculture, if any, emerges from a decade of conservatism, greed and the AIDS epidemic? What, in short, made the 80s unique—and what is the decade's afterimage? Students should register for ENGL 0710S S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 0710V. Death and Dying in Black Literature.**

How is death represented in black literature as a topic and as a figure of genre? Which theoretical ideas help us think about the intertwining of blackness and death? How do notions of gender and sexuality inform this thinking? This course will explore works from the twentieth and twenty-first centuries to consider the scope of black literary imaginings of death.

**ENGL 0710W. Readings in Black and Queer.**

This course will survey works that engage the intersection of black and queer, especially from 1970 onward. We will use the central idioms of queer of color critique to think about performativity, homophobia, the erotic, and gender normativity; and will use this thinking to read literary representations in various novels, poems, nonfiction essays, plays, and films.

**ENGL 0710X. Black Poetics.**

This course is interested in poetic thinking: how a poem inclines toward a certain kind of knowing; how a poem's imagining invites philosophical considerations (as in, what is being, and how to be); how a poem's language and its formal qualities sustain such thinking. We are interested, also, in how poetic thinking reckons (with) blackness.

**ENGL 0710Y. Literature of US Inequality, 1945-2020.**

Study of the way inequality has been represented in US literature from 1945 to the present. Authors to be considered include Morrison, Updike, Wright, Highsmith, Lee, Adichie, Leavitt.

**ENGL 0710Z. American Literature and the Constitution.**

A study of the interactive relations between US literary constitutional and literary history, with a special emphasis on how American constitutional discourses and American writers have framed and conceived of the interplay between civil rights, racial equality, and economic privilege.

**ENGL 0900. Critical Reading and Writing I: The Academic Essay.**

An introduction to university-level writing. Students produce and revise multiple drafts of essays, practice essential skills of paragraph organization, and develop techniques of critical analysis and research. Readings from a wide range of texts in literature, the media, and academic disciplines. Assignments move from personal response papers to formal academic essays. Enrollment limited to 17. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 0930. Introduction to Creative Nonfiction.**

Designed to familiarize students with the techniques and narrative structures of creative nonfiction. Reading and writing focus on personal essays, memoir, science writing, travel writing, and other related subgenres. May serve as preparation for any 1000-level nonfiction writing course. Writing sample may be required. Enrollment limited. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1030A. The Thoughtful Generalist.**

This \*ONLINE\* section of "ENGL1030: Critical Reading and Writing II: Research" will prepare you for academic and real-world discourse. In Canvas, you will discuss essays demonstrating deep research distilled into engaging intellectual journey. You will research and revise four explanatory, analytical, persuasive essays, using varied sources to explore subjects or issues of your choice. Mandatory peer reviews and conferences ONLINE. Enrollment limited to 17. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1030C. Writing Science.**

This course explores how science, as an academic way of thinking and a method, affects our critical thinking and expression of culture. Readings examine the various dialects of scientific discourse. Students write three major research essays on self-selected scientific topics from both within and outside their fields of study. Enrollment limited to 17. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1030D. Myth + Modern Essay.**

A writing and research focused course, in which students read a small selection of ancient texts (including *The Epic of Gilgamesh* and Ovid's *Metamorphoses*) and use the myths retold to illuminate the contemporary world and to inform the essays they write. Enrollment limited to 17. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1030E. Testaments of War.**

Discovery is at the heart of research. In this course, we will discover how and why literary texts reflect and illuminate the intellectual and social worlds around them. We will use a variety of primary and theoretical sources and research tools, identify powerful research problems, and craft questions and sophisticated thesis statements. The course will also enable you to refine a critically sensitive, informed, and persuasive writing style that will be key to the success of your scholarly work. Enrollment limited to 17. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1030F. The Artist in the Archives.**

While artists can benefit greatly from archival work, they are not typically given the tools to make use of these institutions. This writing intensive course takes a two pronged approach to the problem: embedding students in archives both at Brown and RISD to produce creative, lyrical, and multi-media essays; and exploring how artists have used these institutions for information and inspiration. Enrollment limited to 17. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1030G. Backstory.**

Everything has a backstory—every event, every object, every idea. In this workshop-based course we will explore the archives at Brown and RISD to write three research essays for general audiences. You can expect readings, looking at how authors like David Foster Wallace, John McPhee and Eula Biss structure their pieces, workshops and in-class writing prompts to get you going. Enrollment limited to 17. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050A. Narrative.**

This course offers a broad exploration of the many kinds of essays you can write in creative nonfiction. We will be looking at how authors structure their pieces and the range of narrative techniques they often use. You can expect workshops, in-class prompts and readings by Jamaica Kincaid, John McPhee, David Foster Wallace, Annie Dillard, David Sedaris and others. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050B. True Stories.**

This class will allow confident writers to explore and develop their creative nonfiction writing. We'll focus on two structures—nonfiction narratives and essays—with occasional forays into other forms. Students will work simultaneously on several small assignments and two larger, self-directed pieces. Readings will include cultural reportage, lyric memoir, science and nature writing, standard and hybrid essays. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050C. Creative Nonfiction: Practice and Criticism.**

What is Creative Nonfiction? It has a long history and recently writers have flocked to it; scholars have questioned it: Academic enough? Harm the truth? Narrative with too much "I" and too little "Eye"? Literary? Significant? By reading historical and contemporary examples along with critics, we will explore persistent questions about form, method, ethics, and significance. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050D. Lifewriting.**

We explore writing's various forms—memoir, diary, essay, graphic narrative, film, and autobiography—while crafting personal narrative. Students read sample texts, view films, and keep an electronic diary. Projects include a memoir, personal critical essay, and final autobiography, as well as shorter assignments. This is a writing workshop, so students read & critique each others work. Individual conferences with the instructor also provide feedback. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050E. Sportswriting.**

This course introduces students to the practice of sportswriting, including writing sports news, features, and columns. Readings will include works by Rick Reilly, Bill Simmons, Frank Deford, Karen Russell, Allison Glock, Tom Wolfe, Hunter S. Thompson, W.C. Heinz, and others. Students will develop skills in analyzing, researching, writing, revising, and workshoping in the genre. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050F. Line Work: Experiments in Short-Form Writing.**

This class is based on the premise that to improve your writing, you need to write often. By responding to almost daily drills, you will develop a regular writing habit and explore a range of styles. We will take your most successful pieces through a series of workshops, helping you refine your work and ultimately build a writing portfolio. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050G. Journalistic Writing.**

This course, taught by a Pulitzer Prize-winning reporter, teaches students how to report and write hard news and feature stories. Students learn to gather and organize material, develop in-depth interviewing techniques, use public records to report stories and become better observers of everyday life. The first half of the semester focuses on hard news and investigative reporting -- crime, government and court news. The second half is devoted to feature writing -- profiles and the art of narrative storytelling. Class list will be reduced to 17 after writing samples are reviewed. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050H. Journalistic Writing.**

This course teaches students how to report and write hard news and feature stories for newspapers and online. Students learn to gather and organize material, develop interviewing techniques, and hone their writing skills – all while facing the deadlines of journalism. The first half of the semester focuses on "hard" news: issues, crime, government, and courts. The second half is devoted to features, profiles, and narrative story telling. Writing sample required. Class list will be reduced to 17 after writing samples are reviewed in first week of classes. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050J. Multimedia Storytelling.**

Through a series of short assignments, we will explore how the stories we tell are affected by the use of audio, visual, and performative tools. The course cumulates in a final project where each student will pursue a long-form story of their choice of subject and medium. Enrollment limited to 12. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050L. Writing in Place: Travel, Ecology, Locality.**

To explore the relationships among people, places and language, this course will incorporate science and nature writing, environmental / ecological writing, travel writing, psychogeography and architectural writing. Assignments and practices will include diaries, observational writing, reporting, criticism and more lyrical forms. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050M. Music Writing.**

Music writing asks that we take readers across a space not entirely tangible. To listen—with care—and then articulate, with words written, what was heard and what was experienced. Music writing is a big genre, encompassing journalism (especially criticism), memoir (by listeners and by direct participants), long-form essay, and lyric forms. This course will touch upon these categories. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050N. Writing for Today's Electronic Media.**

This course introduces students to the practice of reporting for television news, radio, and their online equivalents—online news and podcasts. Exploring the world of communications for contemporary media, the course features hands-on work in writing news, features, and opinion pieces for television, radio, online news, and podcasts. Students will develop skills in analyzing, writing, revising, and workshoping in these media. Enrollment limited to 17. Writing sample required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1050P. Reframing Race in Art Writing.**

This seminar will consider how contemporary writers and critics respond to art that directly addresses race and challenges institutional power. We will discuss past and recent controversies involving race and representation in exhibitions and examine the relationships between artists, museums and other art institutions, and public audiences. We will consider how writing about arts and culture can advance public discourse about race, equity, and justice. Enrollment limited to 17. No pre-requisites. Writing sample required. Instructor permission required.

**ENGL 1140A. Intellectual Pleasures: Reading/Writing the Literary Text.**

Riffing on the generative tensions between intellectual rigor and aesthetic pleasure, this seminar will examine (through the theoretical framework of cognitive poetics) a richly diverse range of literary texts, from Susan Howe to *Beowulf*. Our objective: to develop an awareness of language that will reshape how we read and how we write literary texts in various genres. Writing centered. Enrollment limited to 12. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. S/NC.

**ENGL 1140B. The Public Intellectual.**

This course offers advanced writers an opportunity to practice sophisticated, engaged critical writing in academic, personal, and civic modes. Emphasis will be on writing "public" essays (general audience essays that do intellectual work or academic essays that address public topics), ideally in fluid, "hybrid," audience-appropriate forms. Areas of investigation will include (but are not limited to) the review essay, the cultural analysis essay, literary documentary, and the extended persuasive/analytic essay. It will include some brief "touchstone" investigations into rhetorical theory, with the aim of helping to broaden our concepts of audience, analyze the constitutive and imaginative effects of language, increase the real-world effectiveness of our own language practices, and situate our writing within current political, cultural, aesthetic and intellectual debates. Students must have sophomore standing or higher in order to be admitted to the class. A writing sample will be administered on the first day of class. Prerequisite: ENGL 0930, 1030, or 1050. Class list will be reduced to 12 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1140E. Writing for Activists.**

How can writing support and further change? In this course students will practice grant applications, budget narratives, mission and strategy statements, press releases, position papers, op-eds, and other writing strategies with practical application in activist work. We'll read examples and theoretical grounding, and guest speakers will introduce us to writings and needs specific to a range of fields. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Instructor permission required. S/NC.

**ENGL 1160A. Advanced Feature Writing.**

For the advanced writer. Nothing provides people with more pleasure than a "good read." This journalism seminar helps students develop the skills to spin feature stories that newspaper and magazine readers will stay with from beginning to end, both for print and on-line publications. Students will spend substantial time off-campus conducting in-depth interviews and sharpening their investigative reporting skills. The art of narrative storytelling will be emphasized. Prerequisite: ENGL 1050G or 1050H, or published clips submitted before the first week of classes. Class list reduced to 17 after writing samples are reviewed. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1160B. Editors/Producers.**

On-site workshop for editors/producers of campus or local journalism that aspires to professional standards. Students must be chosen by peers to edit a campus publication such as the BDH, or to produce a radio show at WBSR or WBRU; or they must have an internship at a local newspaper, radio or TV station. Required: Minimum 20 hours a week editing/producing; participation in skill-building workshops for staff. All issues/shows evaluated. Enrollment limited to 17. Instructor permission required. S/NC.

**ENGL 1160C. Radio Nonfiction.**

For advanced writers only. Introduction to radio writing and producing. Students find and research stories, interview, draft, edit and fine-tune for radio presentation. Genres include news, profile, feature and personal narratives, editorial and review. Weekly labs focus on recording equipment, digital editing and mixing, and music use. Final project: half-hour radio feature ready for broadcast. Preference given to students who have taken ENGL0160, advanced nonfiction writing courses, English concentrators, or students who have worked at WBSR or WBRU. A writing sample will be administered on the first day of class. Class list will be reduced to 12 after writing samples are reviewed. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1160D. The Common Critic.**

For the advanced writer. Aimed at the cultivated consumer of books, magazines and newspapers-- what has traditionally been called the common reader. Students will attend films, plays, art shows, concerts or dance performances and write weekly reviews based on these experiences. Readings include Orwell, Woolf, Shaw, Kael, Tynan, Clive James, Zbigniew Herbert, and current reviews. Writing sample submitted at first class; also a previous sample, if possible, submitted at the same time. Class list will be reduced to 12 after writing samples are reviewed during the first week of classes. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1160E. Advanced Journalism: Investigative and Online Reporting.**

The goal of this class is to rigorously test and improve the reporting and nonfiction writing abilities of students seriously considering a career in journalism. By reading award-winning articles; reporting and writing five nonfiction pieces on campus or in Providence; and rigorously critiquing each other's writing, students will gain a sense of the promise and perils of journalism. Prerequisite: ENGL 0160. Enrollment limited to 17.

**ENGL 1160F. Reporting Crime and Justice.**

Crime and justice stories are people stories. The drama of everyday life is played out every day in courtrooms. This advanced journalism course will get students into the courtrooms, case files and archives of Rhode Island's judicial system and into committee hearings at the State House where they will report on stories that incorporate drama, tension, and narrative storytelling. Prerequisite: ENGL1050G, ENGL1050H or ENGL1160A (Advanced Feature Writing). Enrollment limited to 17. Instructor permission required. Preference will be given to English concentrators. S/NC.

**ENGL 1160G. Literary Journalism: Writing about Politics and Culture.**

Students are introduced to procedures and techniques of cultural journalism through reading and discussing work of notable practitioners and writing their own reviews, profiles, and reportage. Enrollment limited to 12. Prerequisites: ENGL0900, ENGL0930, or any intermediate or advanced nonfiction course. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1160H. Social Justice Journalism.**

Students will investigate perceived injustices and write carefully crafted nonfiction pieces that present complex stories in a fair, balanced, and accurate way. Students will complete several short pieces and a full-length article suitable for publication. Class list will be reduced to 17 after writing samples are reviewed during first week of classes. Preference will be given to English concentrators. Prerequisites: ENGL0930 or any 1000 level nonfiction writing course. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1160J. Advanced Journalistic Nonfiction.**

For experienced writers. We will study and emulate the works of journalists who write across genres. We will focus on observational skills, narrative arc, the capturing of critical detail, scene setting, character, anecdote, thematic development, precision with words, and voice. Because all such writing is dependent upon quality reporting, we will explore the relationship between fidelity to fact and creativity. Class list will be reduced to 12 after writing samples are reviewed during first week of classes. Preference will be given to English concentrators. Prerequisites: ENGL0930 or any 1000-level nonfiction writing course. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1160K. Literary Reporting: Writing Literature on Deadline.**

How does a writer go into the world, observe closely, and turn those observations into something artful? Students will read and discuss works in the genre, and produce their own. Enrollment limited to 12. Prerequisites: ENGL0900, ENGL0930, or any intermediate or advanced nonfiction course. Preference will be given to English concentrators. Writing sample may be required. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1160L. In Order to Write About the Twenty-First-Century City, We First Have to Imagine It.**

The city is changing. In the Internet age, the physical city is written over with data, like everything else. The new city, moreover, is not Western, which transforms our notions of urbanity. Students will work towards their own piece of writing about the twenty-first-century city: its new landscapes and characters, its new feelings and intensities. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Not open to first-year or sophomore students. Instructor permission required. Pre-requisites ENGL0900, 0930 or any 1050. S/NC.

**ENGL 1160M. Social Justice Journalism in the Digital Age.**

This writing class will teach you how to report and craft socially-conscious journalism that is neither dull nor righteous. You will learn about news hooks and angles, compelling central characters, and clever story structures, and how to attract audiences in a distracted visual digital age. Along with long-form narrative we will work multimedia forms: audio, photography, Twitter journalism, and comics. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Prerequisite: ENGL 1050G or ENGL 1050H. Instructor permission required. S/NC.

**ENGL 1180A. Crime Writing.**

This course offers students the opportunity to study crime reportage. We will read and analyze excerpts from classics in the genre, magazine articles, and newspaper accounts. Students will develop semester-long individual writing projects covering a particular crime, and can work either with Providence and Brown University police on a local incident, or research a case through secondary source material.

**ENGL 1180B. Digital Nonfiction.**

In this class, we will join the host of other artists, activists, and writers that have used Twitter bots, iPhone apps, virtual reality experiences, and more to tell compelling stories. No previous digital writing experience is necessary, however, as an advanced creative nonfiction class, Digital Nonfiction requires students to have completed ENGL 0930 or any 1000-level nonfiction writing course. Enrollment is limited to 17. Instructor permission required. S/NC.

**ENGL 1180C. Advanced Creative Nonfiction: Writing with Food.**

This course examines writing about food and how writing affects food and food culture. We shall explore the relationship of food to the pen through reading classic texts, writing in and out of class, guest lectures, and touring culinary archives. The goal is to polish personal voice in menus, recipes, memoir, history, reportage, and the lyric essay. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1180D. Concealing and Revealing: Writing the Unsaid.**

We'll read and write works that voice what often goes unvoiced, challenge taboos or build silence into their structures. Creative and critical writing assignments, class discussions reading responses and in-class writing will allow us to enter and question these texts, their motives, and their methods. Prerequisite: ENGL 0130, 0160, 0180, or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1180E. Lifewriting.**

Features theoretical and practical study of lifewriting's various forms-- memoir, diary, essay, and autobiography-- and the crafting of personal narrative. Students read books, view films, and keep an electronic diary and paper notebook. Requirements include a personal critical essay and autobiography. Writing sample required. Prerequisite: ENGL 0130, 0160, 0180, 1140, 1160, 1180, or 1190. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1180F. Literary Journalism.**

Focusing on the craft of literary techniques in a range of journalistic modes, we will read John McPhee, Diane Ackerman, Ian Frazier, Susan Orlean and Tracy Kidder, among others. Workshops and conferences on student work, which can include personal essays, immersion journalism, researched argumentative essays and magazine-style feature articles. Complete and polish several shorter pieces and one longer feature-length article.

**ENGL 1180G. Lyricism and Lucidity.**

For the advanced writer. This course will explore two subsets of the personal essay that blur or cross boundary lines--the lyric essay and the photographic essay--in both traditional and experimental formats. Writing sample required. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Not open to first year students. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1180H. Satire and Humor Writing.**

For the advanced writer. This course will introduce students to the practice of writing satire and humorous essays. Readings will include works by Jonathan Swift, Mark Twain, Garrison Keillor, Bill Bryson, David Foster Wallace, David Sedaris, and others, and students will develop skills in analyzing, writing, and workshoping in the genre. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1180I. Writing Medical Narrative.**

This class will examine the recent turn toward the use of narrative in medicine and the recent trend of published medical narrative. We'll look at literary and cultural narratives of sickness and health and how they shape perceptions and treatments, while keeping the science and politics of health care—and its public discourse—in view. Writing sample required. Prerequisite: ENGL0900, ENGL0930, or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

**ENGL 1180J. Tales of the Real World.**

For the advanced writer, this section offers a chance to practice the pleasures and challenges of nonfiction story-telling in the forms of literary journalism, personal essay, and audio narrative. Inspirations include Gay Talese, James Baldwin, Joan Didion, David Foster Wallace, and *This American Life*. Intensive practice in researching, interviewing, revising, and audio editing. Writing sample required. Prerequisite: ENGL 0130, 0160, 0180, 1050, 1140, 1160, 1180, or 1190. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1180K. The Art of Literary Nonfiction.**

For the advanced writer. Based on Roland Barthes' notion of the fragment, this workshop features an incremental, literary approach to writing nonfiction, in both traditional and experimental formats. In response to daily assignments, students will produce numerous short pieces and three extended "essays," to be gathered into a chapbook at the end of the course. Writing sample required. Prerequisite: ENGL0930 or any 1000-level nonfiction writing course. Not open to first year students. Class list reduced to 17 after writing samples are reviewed during first week of classes. Preference given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1180L. Travel Writing: In the Domain of the Other.**

For the advanced writer. Huck Finn's intention "to light out for the Territory" reflects a pervasive desire to be somewhere else. Restless curiosity about the Other affects travel, writing about travel, and reading about travel. Will concentrate on contemporary travel writers (Heat-Moon, Didion, Chatwin, numerous others) and experiment with various types of narrative structures.

Writing sample required. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

**ENGL 1180M. Special Delivery: Letters and Diaries.**

For the advanced writer. While letters and diaries are constrained by "dailiness"--the writer's informal situation in time--they often form the basis of more formal communications, including the novel. We will keep diaries as self-conscious intellectual enterprises and write letters to address their roles in various literary modes. The final project will be an epistolary essay incorporating structures and motifs from both sub-genres. Writing sample required. Prerequisite: ENGL 0130, 0160, or 0180, or instructor permission. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor permission.

**ENGL 1180N. The Longer Literary Essay.**

We will focus on reflective essays and researched investigations for the non-scholarly reader, like those in *The New Yorker*, *Science Times*, and *Harper's*. Students learn to develop lengthier pieces, translate technical information, and sustain reader interest. Class consists of discussion of readings, workshops, and occasional visits by professional writers. Writing sample required. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

**ENGL 1180P. Further Adventures in Creative Nonfiction.**

For the advanced writer. A workshop course for students who have taken ENGL 0930 or the equivalent and are looking for further explorations of voice and form. Work can include personal essays, literary journalism and travel writing. Readings from Ian Frazier, Joan Didion, David Sedaris, John McPhee and others. Writing sample required. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1180Q. Narrating History.**

For the advanced writer: the protocols of historical narrative and essay for a general audience. Using the archives of Brown, the Rhode Island Historical Society, and the student's family (if feasible), each writer will research primary and secondary sources, use interviews and oral histories, to help shape three engaging, instructive true stories of the past. Intensive library work, revisions, and peer editing.

Writing sample required. Prerequisite: ENGL0930 or any 1000-level nonfiction writing course. Class list reduced to 17 after writing samples are reviewed during first week of classes. Preference given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1180R. Travel Writing: Personal and Cultural Narratives.**

For the advanced writer. Helps students build skills in the growing genre of travel writing, including techniques for reading, composing, and revising travel pieces. Students will read the best contemporary travel writing in order to develop their own writing in areas like narrative, setting, characters, and voice. The course will feature interactive discussions, instructor conferences, and workshops. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1180S. Memoir, the Modern Novel.**

Memoir is an ancient form (Augustine, Rousseau) and an American literary standby (Thoreau, Henry Adams) which has exploded in popularity in the past twenty years. We will study its political implications and experiment with this controversial form whose dimensions have barely been explored. We will write new kinds of memoir, stretching our stories towards biography, fiction and historical narrative. Prerequisite: ENGL 0130, 0160, or 0180. Writing sample required. Enrollment limited to 12. Instructor permission required. S/NC

**ENGL 1180T. A Slice of Life: Writing the Full Length Memoir.**

This course, intended for advanced nonfiction writers, will focus on reading and writing successful book-length memoirs. By studying masters of the form, students will develop a sense of what makes a compelling memoir work and how to approach their own. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1180U. Testimony.**

How does the creative nonfiction writer bear witness to profound political, social, and environmental change? In this course students engage with the world as writers. They will conduct extensive interviews within the Brown community and beyond and will turn those first hand testimonials into a suite of creative nonfiction pieces in various genres including the lyric, personal, "found," and multi-media essay. Writing sample required. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

**ENGL 1180V. Asian American Narrative.**

This course considers themes, forms, and contexts of Asian American narratives. We will examine diverse representations of Asian American experience and explore the questions these texts raise about race and ethnicity; self-invention and identity; and visibility and representation. We'll consider how Asian American authors have used writing to reclaim agency, preserve cultural memory, and redress past and present injustice. Prerequisite: ENGL0930 or any 1000-level nonfiction writing course. Writing sample required. Class list will be reduced to 17 after writings samples are reviewed during the first week of classes. Preference given to English concentrators. Instructor permission required. S/NC.

**ENGL 1180W. Writing About History.**

This course introduces students to the practice of writing about history, including crafting news, features, and memoir pieces. Readings include works by Jill Lepore, Ta-Nehisi Coates, David McCullough, Iris Chang, Henry Louis Gates Jr., John Hersey, W.E.B. Du Bois, and others. Students will strengthen skills in primary and secondary research, interviewing, writing, and revision, utilizing Brown's libraries and other archives. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1190A. "The Arrangement of Words": Liberating Fiction(s).**

We read fiction because we enjoy stories. As critical or astute readers, we are often drawn into something more than the story itself: into the way it is told, into the inflections and constructions of language. Concentrating on American fiction writers 1918-1945 (Hemingway, Faulkner, Welty, O'Connor, others), we will examine their fiction and non-fictional prose to see what they do and how and why. Writing will range from critical exposition to annotated fictional experiments. Prerequisite: ENGL 0130, 0160, 0180, 1140, 1160, 1180, or 1190. S/NC.

**ENGL 1190B. Real Language: Poetics, Romanticism, Writing.**

For the advanced writer. Concentrates on the first generation Romantics (Wordsworth and Coleridge) and their poetic/aesthetic experiments to correlate "the real language of men" with poetic perception. Along with primary sources (prose and poetry), we read scholarly, critical, and theoretical texts to construct ways of reading English Romantic poetry and then work on different kinds of writing that derive from those readings. Writing sample required. Prerequisite: ENGL 0130, 0160, or 0180, or instructor permission. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor permission. S/NC.

**ENGL 1190C. Advanced Creative Nonfiction: Biography.**

Biography, one of the oldest forms of creative nonfiction, tells the life story of a person, idea, place, or thing. We consider old and new forms of biography, experiment with those forms, and practice them as a method of inquiry as well as presentation of self. We also explore biography's connection to journalism, autobiography, memoir, and history. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1190D. Writing About Sports in America.**

For the advanced writer. Writing about any sport involves one in complex cultural issues that transcend the sport itself. We'll examine work by such authors as Bissinger, Halberstam and Maraniss for voice, craft, and research methods. Students will be required to produce their own pieces of sports writing that explore, through critical research and analysis, the place of sports within the larger culture. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). S/NC.

**ENGL 1190F. My So-Called Life: The Art of the Literary Memoir.**

The literary memoir offers students inspiration and warning as to the possibilities and limits of using their own experience as text. We study personal essays, narratives, and prose poems by a variety of writers. Advanced writers only. Writing sample required on first day of class.

**ENGL 1190G. Science as Writing, Scientists as Writers.**

For the advanced writer. Investigates the ways science, scientists, and science-related issues have been represented in fiction and nonfiction written for general audiences. Writing assignments include an informal online journal, literary/cultural analyses, fiction or personal essay, and scientific journalism. Readings from literary, journalistic, and scientific writers. A background in science is useful but not required. Science and humanities students welcome. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Prerequisite: ENGL 0130, 0160, or 0180. Banner registrations after classes begin require instructor permission. S/NC.

**ENGL 1190H. Writing Science, Writing the Sacred.**

Explores the relationships between two dominant intellectual paradigms—science and religion—and asks students to respond by writing their own "sacred" and science-related texts. Genres to read and write will be poetry and critical/literary nonfiction. Writing sample required. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

**ENGL 1190I. Writing the Southeast Asian War.**

It was the Vietnam War, the American War, the Southeast Asian diaspora. By reading varied genres responding to the experience of the war in Southeast Asia and its aftermath, we will study how any experience is multitudinous and how genres manipulate experience in different ways. Analysis and practice of memoir, fiction, poetry, and oral history. Writing sample required. Prerequisite: EL 13, 16, 18, 114, 116, 118, or 119 (ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190). Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

**ENGL 1190J. Narrative Poetics.**

A study of literary language from the writer's perspective that draws on Chomsky's universalist linguistics to refashion structuralist poetics and narratology. Small written experiments with literary word choice and literary sentence structure prepare for a final experiment with narrative structure. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Prerequisite: EL 13, 16, 18, 114, 118, or 119 (ENGL 0130, 0160, 0180, 1140, 1160, 1180, or 1190). S/NC.

**ENGL 1190K. Literary Biography.**

For the advanced writer. How does one narrate the twists and turns of a life while simultaneously doing justice to whatever literature the subject managed to produce as he or she plodded through each day? We will examine examples of literary biographies for, among other things, voice, form, and research methods. Students will be required to produce their own pieces of literary biography. Prerequisite: ENGL 0130, 0160, or 0180. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor permission. Enrollment limited. S/NC.

**ENGL 1190L. Creative Nonfiction: Practice and Criticism.**

For advanced writers. What is Creative Nonfiction? Writers have flocked to it; scholars have questioned it. Does it harm the truth? Is it narrative with too much "I" and too little "Eye"? What makes it significant? To help us explore persistent questions about form, point of view, method, and ethics, readings will include historical examples, recent practitioners, editors, and critics. Intensive reading responses, research, drafting, and revision. Two critical essays; one piece of creative nonfiction. Prerequisite: ENGL0130, 0160, 0180, 1140, 1160, 1180, or 1190. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1190M. The Teaching and Practice of Writing: Writing Fellows Program.**

This course prepares students for their work as Writing Fellows. Course readings, activities, and assignments introduce students to: post-process writing theory and pedagogy; data-based investigations of the revision habits of experienced and inexperienced writers; and effective methods for responding to student writing and conferencing with student writers. Enrollment is restricted to undergraduates who have been accepted into the Writing Fellows Program in the preceding July. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1190N. Brown: Writing the Archive.**

The archives at and around Brown are primary sources for discovering stories--institutional, historical, personal--of our life across time through local history, personal memory, biography, and cultural critique, combining scholarship, media, and the arts. What opportunities for new writing lie behind doors to be opened across the street? Writing sample required. Prerequisite: ENGL0130, 0160, 0180, or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1190P. The Art of Memoir in Theory and Practice.**

The course introduces students to the historical and theoretical nuances of memoir. You will critically engage with a variety of readings and develop an appreciation of your creative role as a memoirist. In the process of crafting a portfolio of work you will explore the complexities of remembering and experiment with the style of narrative voice and structure. Writing sample required. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

**ENGL 1190Q. The Essay.**

This course offers a feel for the essay and its versatile range, from the informative to the personal to the philosophical. We will study tone and style, meaning, beginnings and endings, and use of historical and personal information. Our focus will be on the craft of writing rather than on literary criticism. Readings include essays by two dozen accomplished writers. Writing sample required. Prerequisite: ENGL 0110, 0130, 0160, 0180, or any 1000-level nonfiction writing course. Class list will be reduced to 12 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC

**ENGL 1190S. Poetics of Narrative.**

Narratives are everywhere, simply there, like life itself, Roland Barthes says; we structure our experiences with narratives that we either infer or create. We will read different literary genres to see how narratives work and what makes them poetic and read theoretical texts to understand narrative function and performance. We will write experimentally to experience how stories are constructed. Pre-requisites: ENGL 0900, 0930, or any 1000-level nonfiction writing course. S/NC.

**ENGL 1190T. Writing the Mythic Life: The Use of Traditional Narrative.**

This course explores the theory and practice of traditional narrative structures such as fairy-tale, myth, and legend in creating stories about ourselves. We will read fiction and nonfiction by Tolkien, C.S. Lewis, A.S. Byatt, and others, engaging critically with the texts as well as creating new ones modeled on them. Writing assignments will include several short papers and a longer end-of-term project. Writing sample required. Prerequisite: ENGL 0900, 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

**ENGL 1190U. Nature Writing.**

This course seeks to develop your skills as a sensitive reader and writer of the natural world. You will build a portfolio of revised work through a process of workshops, tutorials, and conferences, and engage in discussion of a range of written and visual narratives with reference to their personal, political, and ecological contexts. Writing sample required. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 17 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. S/NC.

**ENGL 1190W. The Fiction of Nonfiction.**

Nonfiction texts are fictions in that they deploy the devices of fiction (pacing, voice, etc.), but even more so in that they are constructs (they're in-formed and made up). In this seminar we will revel in the architectonic of good nonfiction writing. Upending the myth of "objectivity," we will read as if writing mattered, and write as if reading did.

Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list reduced to 17 after writing samples are reviewed during first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1190X. Nonfiction Now.**

Nonfiction Now introduces students to contemporary nonfiction writing through in-person exposure to professional writers, who will visit the course to deliver a craft lecture, read from their latest work and discuss the labor that goes into maintaining a professional writing life. Students will be expected to read the work of the visitor and produce creative work in response. Prerequisite: ENGL 0930 or any 1000-level nonfiction writing course. Class list will be reduced to 30 after writing samples are reviewed during the first week of classes. Preference will be given to English concentrators. Banner registrations after classes begin require instructor approval. S/NC.

**ENGL 1200. Independent Study in Nonfiction Writing.**

Tutorial instruction oriented toward some work in progress by the student. Requires submission of a written proposal to a faculty supervisor. Section numbers vary by instructor. Instructor permission required. S/NC.

**ENGL 1310A. Firing the Canon: Early Modern Women's Writing.**

Rediscovery and reconsideration of works by early modern women have changed the literary canon; these once-neglected works are becoming mainstream, and they are changing the way we read 'traditional' texts. The reading in this course includes poetry, letters, drama, essays, fiction, and life-writing by authors including Lanyer, Wroth, Cavendish, Behn, Manley, Haywood, Scott, and Montagu.

**ENGL 1310B. American Degenerates.**

Colonial British-Americans were called, among other names, monstrous, wild, impotent, and grotesque. They could not, it was said, produce writing worth reading. We will explore the ways in which American writers embraced and/or challenged these charges of cultural and bodily degeneracy. In the process, we will examine the development of modern notions of literature and identity. Students should register for ENGL 1310B S01 and may be assigned to conference sections by the instructor during the first week of classes.

**ENGL 1310C. Arguments of Form in Renaissance Poetry.**

In the literatures of the European Renaissance, stylistic innovation is a marker of cultural change. The production of sonnets, of neoclassical epigrams, and of poems aspiring to be Ovidian or Vergilian opens up a theoretical space for arguments about faith, thought, words, the self, and society. Readings from Wyatt, Surrey, Gascoigne, Spenser, Sidney, Shakespeare, Donne, Jonson, Milton, and others.

**ENGL 1310D. Between Gods and Beasts: The Renaissance Ovid.**

Ovid's *Metamorphoses*, an epic compendium of classical myths, narrates with wit and pathos the transformations of body and mind wrought by sexual passion. Central to Renaissance conceptions of the human, it inspired drama, poetry, and narrative. Readings: Shakespeare, Marlowe, Donne, Spenser, Milton.

**ENGL 1310E. Border Crossings in Renaissance Drama.**

Investigates how distant peoples and places, from Ireland to the West Indies, from East to West, are constructed for the English stage. We will read Marlowe's *Tamburlaine*, Fletcher's *Island Princess*, Heywood's *Fair Maid of the West*, the anonymous *Stukeley* play, Shakespeare's *Othello*, and Daborne's *A Christian Turned Turk* to observe what dangers and freedoms these plays ascribe to specific geographies.

**ENGL 1310F. Early Modern Utopias.**

Why does the early modern period witness a flourishing of utopias from More to Milton? We will explore this question, in reading a range of utopias by writers such as Montaigne, More, Raleigh, Bacon, Hall, and Cavendish, engaging them not just as visions of ideal societies, but as efforts at reform of England and Englishness.

**ENGL 1310H. The Origins of American Literature.**

Where does American literature begin? Can it be said to have a single point of origin? Can writings by people who did not consider themselves American be the source of our national literary tradition? Does such a tradition even exist and, if so, what are its main characteristics? How does one understand the various diverse traditions that constitute American literature, including African-American, Native American, and many others, into a single object of study—or does one even need to? Authors may include de Vaca, Anne Bradstreet, Benjamin Franklin, and Phillis Wheatley.

**ENGL 1310J. Imagining the Individual in Renaissance England.**

How did the men and women of 16th- and 17th- century England apprehend themselves as individual human subjects? In relation to the law and the state? As creatures of God? As humanists interrogating the texts of the past? Readings include works by More, Machiavelli, Hobbes, Wyatt, Erasmus, Luther, Tyndale, Askew, Hooker, Hebert, Donne, Browne, de Montaigne, Ascham, Jonson, and Herrick.

**ENGL 1310N. Renaissance Drama.**

An introduction to the great classics and some less-known gems of a stellar period in English drama. Plays by Marlowe, Jonson, Webster, Middleton, and Ford, in the context of urban culture, English nationhood, gender and sexuality, playhouses and playing companies, and forms of theatricality.

**ENGL 1310O. Restoration and Early Eighteenth-Century Literature.**

A survey of writing and cultural history in England between 1660 and 1750, emphasizing innovation and experimentation in drama, satire, poetry, and fiction. Readings include work by Behn, Rochester, Swift, and Defoe.

**ENGL 1310S. Women and the Book in the Middle Ages.**

We will read texts authored by medieval women such as Marie de France, Marjorie Kempe, Julian of Norwich, and Christine de Pizan, and we will explore other textual roles of women, including book ownership and patronage, translation and scribal transmission. The result? A complex picture of mediated and mediating female participants in manuscript culture. Some readings in Middle English.

**ENGL 1310T. Chaucer.**

Texts in Middle English by Geoffrey Chaucer including the romance *Troilus and Criseyde*; dream vision poems *Book of the Duchess*, *House of Fame*, and *Parliament of Fowls*; Chaucer's translation of Boethius's *Consolation of Philosophy*; his shorter poems; and two *Canterbury Tales*. Prior knowledge of Middle English not required. Not open to first-year students.

**ENGL 1310U. Monsters, Giants, and Fantastic Landscapes in Early American Literature.**

Monsters, giants, "exotic natives," and unknown continents fill the pages of early American writing. Examines how the well-known and obscure writers of early America used the strange and the fabulous to suggest new ways of being normal.

**ENGL 1310V. Chaucer: The Canterbury Tales.**

Middle English narratives by Geoffrey Chaucer's band of fictional pilgrims, read in their 14th-century historical and literary contexts. Prior knowledge of Middle English not required. Not open to first-year students.

**ENGL 1310W. English Poetry and the Renaissance.**

The names of Spenser, Sidney, Shakespeare, Donne, Jonson, Milton, and other poets inscribe a golden age of poetry in the cultural mythography of English-language literature. Who are these poets and what stories are told about them? In their time? During the long eighteenth century? By Wordsworth and Browning? By Eliot, the high modernists, and postmodernists?

**ENGL 1310Y. Besides Paradise Lost: Milton's Other Poems.**

A study of Milton's lyric and dramatic poetry, including the sonnets, Latin poems, *L'Allegro*, *Il Penseroso*, the Nativity Ode, *Lycidas*, *Comus*, the verse epistles and *Samson Agonistes*.

**ENGL 1310Z. Three Great Poets: Shakespeare, Donne, Milton.**

We will study these premier Renaissance poets from all angles possible, to understand the historical situations and political issues that shaped their writing, the authors and ideas that influenced them, the traditional forms they appropriated for new purposes. Most of all, we will study them to appreciate the power of poetry as a source of knowledge and inspiration. It is recommended that students should have already taken a course in reading poetry, such as ENGL0910A How to Read a Poem or ENGL0400A Introduction to Shakespeare. Students who have taken ENGL0210E may not register for this course.

**ENGL 1311A. Milton's Paradise Lost: Poetry and Belief.**

Milton, Blake wrote, was of the devil's party without knowing it, and this course offers close reading of the language of *Paradise Lost* as poetry of belief: how does the poetry of Milton's major poem embody belief and doubt for him, in history, and for his readers?

**ENGL 1311B. Medieval Zoographies and the Origins of the Human.**

This course engages with medieval texts and contemporary theory to attempt to understand the shifting boundaries between humans and animals, as we examine the premodern roots of the discussion over what it has historically meant to be human, and what might come next. Topics will include beast fables and epics, nature and artifice, emotions, the soul, simulacra, sacrifice, and hunting.

**ENGL 1311C. Milton.**

A close examination of the poetry and prose of John Milton, from the early lyrics to the polemical prose writings of the 1640s and 50s, to the masterpieces *Paradise Lost*, *Paradise Regained*, and *Samson Agonistes*. Not open to first-year students.

**ENGL 1311E. History of the English Language.**

Provides an introduction to the study of the English language from a historical, linguistic, and philological perspective, and an overview of the study of the "Englishes" that populate our globe. While providing students with the ability to identify and explain language change through historical periods, also examines language as a social and political phenomenon.

**ENGL 1311G. Shakespeare, Love and Friendship.**

Shakespeare portrays friends who are compared to a "double cherry"; a lover who wants to cut her beloved out in little stars; and subjects who sweat with desire to see their kings. How does Shakespeare imagine the possibilities and pitfalls of affection, whether personal or political? What happens to that affection when Shakespeare is adapted into film?

**ENGL 1311H. Sagas Without Borders: Multilingual Literatures of Early England.**

This course traces evolutions of the hero in Old English, Norse, Welsh, and Irish narratives within and around early medieval England. Introduction to genres of saga, romance, and the short poetic lai, as students consider how the nature of the hero changes in specific cultural and linguistic moments. Texts in modern English translation. Essays will focus on close textual readings. Not open to first-year students.

**ENGL 1311L. From Mead-Hall to Mordor: The Celtic and Germanic Roots of Tolkien's Fiction.**

This course traces the sources used by J.R.R. Tolkien in writing *The Hobbit* and *The Lord of the Rings*, including tales drawn from Old English, Norse, Welsh, and Irish literatures. You will be introduced to different medieval genres as you consider how the nature and gender of the hero change in specific cultural and linguistic moments.

**ENGL 1311M. Renaissance Poetry and Its Kinds.**

English poetry from 1500-1650 traces a revolutionary arc of poetic invention remarkable for diverse individual voices and literary kinds. Forms such as lyric, heroic, pastoral, satiric, epistle, and epigram embraced concerns that were at once affective, political, and religious. How does this variety constitute literature? Wyatt, Surrey, Raleigh, Spenser, Sidney, Marlowe, Donne, Jonson, Herrick, Herbert, Crashaw, Milton.

**ENGL 1360A. The Stage as Globe in Renaissance Drama.**

Investigates how distant peoples and places, from Ireland to the West Indies, from East to West, are constructed for the English stage. We will read Marlowe's *Tamburlaine*, Fletcher's *Island Princess*, Heywood's *Fair Maid of the West*, the anonymous *Stukeley* play, Shakespeare's *Othello*, and Daborne's *A Christian Turned Turk* to observe what dangers and freedoms these plays ascribe to specific geographies. Enrollment limited.

**ENGL 1360B. Inventing Britain.**

Focuses on the internal colonization of the British Isles as represented by chronicle histories, drama, masques, and epic and lyric poetry: How do the English define themselves as a center striving to incorporate the British periphery? Authors may include Spenser, Shakespeare, King James I, Bacon, Jonson, Milton, and Marvel.

**ENGL 1360C. Language and Form in Shakespearean Studies.**

Shakespeare's poems and plays are a working dictionary of early modern English and an inventory of the possibilities of formal invention in early modern culture. How can we reach a historically informed awareness of form and formality in Shakespeare? What is the history of formalism in Shakespearean studies? What new modes of inquiry issue from questions of form?

**ENGL 1360D. Medieval Manuscript Studies: Paleography, Codicology, and Interpretation.**

How to read a medieval manuscript. Students will learn to transcribe and date 5th- through 16th-century scripts in Old and Middle English and some Latin texts, and will learn about interpretive methods. Prior course work in Middle English recommended, and acquaintance with Latin and/or Old English and/or Old French and/or medieval Spanish helpful.

**ENGL 1360F. Quest, Vision, Diaspora: Medieval Journey Narratives.**

Medieval texts explored ideas of self, love, rite-of-passage, spirituality, and group identity through narratives of travel, both imagined and real. We will read romance quests that foray to fairylands and wastelands, visionary journeys to hell, pilgrimages of self discovery, an epic exodus that founds King Arthur's nation, and a 14th-century round-the-world travelogue. Chaucer, Malory, Kempe, Mandeville, Layamon, Anonymous. Middle English readings. Not open to first-year students. Enrollment limited.

**ENGL 1360H. Introduction to the Old English Language.**

This course offers a thorough introduction to the earliest period of English language and literature. We begin with an extensive coverage of grammar and syntax before reading short texts and a few Old English poems, including *The Battle of Brunanburh* and *Judith*. Enrollment limited to 20.

**ENGL 1360J. Middle English Literature.**

In the age of Chaucer, literature in Middle English ranged from lyrics to romance narratives to mystery plays and medieval genres like dream visions and debate poems. This course will introduce students to reading texts like *Sir Gawain and the Green Knight* and *The Owl and the Nightingale* in their original Middle English. No prerequisites. Not open to first-year students. Enrollment limited to 20.

**ENGL 1360K. Shakespeare and Company.**

Shakespeare belonged to a community of actors and playwrights who competed for audiences in a fledgling entertainment industry. How do his plays compare to those of Marlowe or Jonson, Middleton or Webster? Reading Shakespeare in tandem with his contemporaries, we will consider the genres, sources, styles and conventions they shared, the issues that concerned them, and their differing artistic perspectives. Prerequisite: ENGL 0310A or equivalent. Enrollment limited to 20 juniors and seniors.

**ENGL 1360M. Spenser, Milton, and the Politics of the English Epic.**

We will read the literary and political writings of England's two major authors of epic -- Spenser and Milton -- assessing their investment in contemporary debates about nation and conquest, rule and liberty, and sexuality and selfhood. Along with the major poems, we will read these authors' shorter literary and political writings.

**ENGL 1360N. Shakespeare and European Culture.**

How do Shakespeare's works embody and transform the cultures of Europe? What is his relationship to ancient Greece and Rome? To the moral and political philosophies of the sixteenth century? To contemporary literary fashion?

**ENGL 1360O. The Ties that Bind: Renaissance Revenge Plays.**

From revenge plays to domestic tragedies, family is a value to kill and die for in Renaissance drama. This course considers the cultural pressures such violence responds to, the contaminations it guards against, and explores the political life of these violent domestic affairs. Works by Kyd, Shakespeare, Heywood, Webster, and Middleton. Not open to first-year students. Enrollment limited to 20.

**ENGL 1360P. Shakespearean Tragedy.**

We will read in depth early, middle and late tragedies by Shakespeare, attending to the genre as understood in the Renaissance and as Shakespeare developed it, along with critical readings that explore tragic form. Oral presentations, short papers, and a final research paper. Prerequisite: ENGL 0310A or equivalent. Enrollment limited to 20 juniors and seniors.

**ENGL 1360R. Modernism and the Early Modern: 17th-Century.**

Did human nature become modern in the seventeenth century or did modern people just think so? This course will study style, science, politics and cultural transactions in this period of revolution and restoration, examining such texts as Donne's satires and epistles and Eliot's high modernist essays on the division of human nature in this period. Enrollment limited to 20.

**ENGL 1360S. Between Gods and Beasts: The Renaissance Ovid.**

Ovid's *Metamorphoses*, an epic compendium of classical myths, narrates with wit and pathos the transformations of body and mind wrought by sexual passion. Central to Renaissance conceptions of the human, it inspired drama, poetry, and narrative. Readings: Shakespeare, Marlowe, Donne, Spenser, Milton. Students who have taken ENGL 1310D may not register for this course. Enrollment limited to 20.

**ENGL 1360T. Eco-Shakespeare.**

Do Shakespeare's plays register and respond to the ecological crises of his day, including deforestation, land enclosure, climate change, and animal exploitation? Or, are they complicit in the ideologies that instated these practices? What kind of relation do Shakespeare's plays envision as underpinning the natural and the cultural realms and how does this differ from modern conceptions? We will seek answers to such questions by considering the plays' use of pastoral tropes and green worlds, but also by analyzing the inter-animating dynamics they stage between subject and environment. Enrollment limited to 23. Not open to first-year students.

**ENGL 1360U. Europe in the Vernacular.**

Why did a few early medieval European authors write not in Latin or Arabic but in vernacular languages like Castilian, Early Middle English, Old Icelandic, or Old French? We will read primary texts by Layamon, Alfonso X, Dante, troubadours and anonymous others, and assess previous claims about the "rise of the individual" and various proto-nationalisms as we rewrite the story of how, why, and for whom multilingual vernacular writings came to be. Readings in modern English supplemented by medieval languages. Enrollment limited to 20 students. Not open to first-year students. Sophomores require instructor permission to register.

**ENGL 1360Z. Shakespeare and Embodiment.**

Consideration of a number of Shakespearean texts including the erotic narrative poem "Venus and Adonis," the early revenge drama *Titus Andronicus*, the history *Henry IV, pt. 1*, the tragedy of *Othello*, among others, and their various representations of the body: as subject to violence, gender and desire, sovereignty and history. Attention to Shakespeare's rewriting of Ovid, novelle, and chronicle history. Enrollment limited to 20. Not open to first year students.

**ENGL 1361A. Fantasies of Milton.**

*Paradise Lost* has served as the basis for numerous fantasy novels. Even *Comus* has become a (supposedly inappropriate) children's story. How can a seventeenth-century poet's treatment of temptation, disobedience, reason and self-regard come to seem relevant in the present? What do contemporary writers feel compelled to preserve and to change? How might we reimagine Milton? Enrollment limited to 20.

**ENGL 1361D. Women's Voices in Medieval Literature.**

This course explores literary works from the early medieval period, both literature by women and literature that represents women's voices and desires. Traditions examined will include the Old and Middle English, Norse, Welsh, and Irish. The course provides insight into the construction of premodern sexualities as well as into the cultural and social histories of multiple national traditions.

**ENGL 1361F. Spenser and Shakespeare.**

A comparative study of theme, form, and genre based upon paired works: Shakespeare's *Sonnets/ Amoretti*; *Faerie Queene I/King Lear*; *Faerie Queene III/Twelfth Night*, *Midsummer Night's Dream*, *Winter's Tale*, *Tempest*, *Venus and Adonis*; *Shepheardes Calender/As You Like It*. Weekly short interpretative exercises (250-500 words) submitted as CANVAS discussions; draft (1250 words) and final essay (3000 words). Enrollment limited to 20.

**ENGL 1361G. Tolkien and the Renaissance.**

This course explores the work of J.R.R. Tolkien alongside Renaissance forbears such as Shakespeare, Spenser, Milton and others. Topics to include love and friendship, good and evil, violence and nonviolence, and how literature offers distinctive forms of life. Enrollment limited to 20.

**ENGL 1361J. Seminar in Old Norse-Icelandic Language and Literature.**

This course offers a thorough introduction to a language both closely related to Old English and in which survives one of the richest medieval literatures. We will start with an extensive coverage of grammar and syntax before reading short excerpts from sagas including *Egil's Saga* and *Grettir's Saga*. Enrollment limited to 20; knowledge of Old English, Latin, or German advised.

**ENGL 1361K. Seminar in the Old English Language II.**

This course continues the work of Introduction to the Old English Language, which is a prerequisite. We will translate short poems including *The Wanderer* and *The Wife's Lament* and possibly make inroads on *Beowulf*, while exploring history, cultural context, and changes in Old English studies. Projects include a midterm examination, research presentation, and final paper, as well as daily translations. Enrollment limited to 20.

**ENGL 1361M. "Evil Plays: Shakespeare and Contemporaries".**

Coleridge posited of the villainous Iago a "motiveless malignancy." That is, the evil he performs exceeds any reason provided. We'll consider the question of evil in Shakespeare's tragedies *Titus Andronicus* (which pushes the logic of revenge past its breaking point); *Macbeth*; *Othello*; *King Lear*. Because Renaissance drama is more than Shakespeare, we'll also consider spectacularizations of evil in his contemporaries Ford, Webster, and Middleton. Not open to first-year students. Instructor permission required.

**ENGL 1380. Undergraduate Independent Study in Medieval and Early Modern Literatures.**

Tutorial instruction oriented toward a literary research topic. Section numbers vary by instructor. Instructor permission required.

**ENGL 1510A. Jane Austen and Her Predecessors: The Other History of the Novel.**

This course focuses on the novels of Jane Austen — from *Sense and Sensibility* to *Persuasion*. The course first establishes some familiarity with the earlier women writers of narrative fiction, in order to gain a deeper understanding of the development of the novel and of Austen's place in that rich tradition. Additional readings include work by Aphra Behn, Eliza Haywood, Charlotte Lennox, Elizabeth Inchbald, and Mary Wollstonecraft.

**ENGL 1510B. Liberalism and American Culture.**

A course in the relationship between the rise of liberalism and American literary history. Writings from Franklin, Jefferson, Emerson, Fuller, Rowson, Twain, and Charlotte Perkins Gilman.

**ENGL 1510D. The Literature of the American South.**

The South is as much a state of mind as a place on the map, and some of the major figures in American literature have contributed to the making of what we think of when we think of "the South." Explores sometimes contradictory but always important meanings of the American South. Authors include Poe, Douglass, and Twain.

**ENGL 1510E. American Renaissance.**

An intensive reading in American literature between 1820 and 1860, with special attention to Romanticism, race and slavery, and the historical novel.

**ENGL 1510H. Why the Novel Happened.**

Readings in "early" novels of 18th-century England and in more recent explanations of the novel's rise to dominance as a popular modern genre. How have changing ideas of truth, virtue, gender, money, politics, history, or the human subject interacted with the practices of narrative fiction? Writers to be considered include Behn, Haywood, Defoe, Richardson, Fielding, Sterne, Lewis, Watt, Lukacs, McKeon, and Bakhtin.

**ENGL 1510I. The Novel from Defoe to Austen.**

How and why did the novel become the dominant literary mode? This course considers the "rise" of the novel during the "long" eighteenth century. Beginning with Behn and Defoe, readings include works by Richardson, Fielding, Sterne, Smollett, Lewis, and Godwin.

**ENGL 1510J. Eighteenth-Century Women Writers.**

Rediscovery and reconsideration of works by women during the eighteenth century are changing the literary canon: works by women are becoming mainstream, and they are changing the way we read 'traditional' texts. This course includes poetry, drama, fiction, letters, diaries, and essays by writers including Manley, Haywood, Centlivre, Scott, Fielding, Montagu, Sheridan, Burney, Radcliffe, and Wollstonecraft.

**ENGL 1510L. Fiction and Mass Media in Nineteenth-Century England and America.**

Explores critiques of the mass media from Carlyle and Arnold to Benjamin and McLuhan by way of a reading of important works of popular Anglo-American fiction of the 19th century. Criticism includes essays by Carlyle, Arnold, Benjamin, and McLuhan; literature includes fiction by Poe, Dickens, Melville, Stevenson, and James.

**ENGL 1510M. From Melville to Modernism: The American Novel 1851-1909.**

A survey of American fiction in the latter half of the nineteenth century. We will examine the ways narrative form helped shape modern America's increasingly fractured sense of identity, focusing specifically on questions of imitation and authenticity, race and nationalism. Writers will include Twain, Stein, Wharton, Crane, Chopin, and Chesnutt.

**ENGL 1510O. Inventing Race in America.**

What is "race"? Where does it come from? This course argues that categories of racial difference—far from being fixed or natural—have emerged from within writing. We trace the emergence of "race" in America from the late 16th century to the present day by reading 17th-century British colonial writing, 18th-century racial scientists, Jefferson, Crèvecoeur, Melville, Faulkner, Mukherjee, and Silko.

**ENGL 1510R. Location and Dislocation in the Late Nineteenth-Century American Novel.**

Focuses on the two dominant literary modes of the late 19th century: realism and naturalism. We try to generate working definitions of these two methods in order to understand the ways narrative form shaped Americans' increasingly fractured sense of identity. Writers include Twain, James, Crane, Cahan, Jewett, Chopin, and Chesnutt.

**ENGL 1510S. Pre-Raphaelites, Aesthetes, and Decadents.**

Looks at both Pre-Raphaelite literature and painting, and the reading includes Browning, the Rossettis, Morris, and Swinburne. The painters include both early hard-edge photographic Pre-Raphaelites and the erotic medievalism of Rossetti, Burne-Jones, and the followers. The course will focus on the tensions in Pre-Raphaelitism between realism and fantasy, fact and symbol, body and spirit.

**ENGL 1510T. Swift and His Contemporaries.**

Swift's works are central to this course's investigation of literature, politics, and society, Anglo-Irish relations, and the great outpouring of satire in English in the early 18th century. Irony, parody, and mock-heroics inventively transform genres while challenging "abuses" of learning, government, religion, colonialism, and even love. Other writers include Congreve, Manley, Addison, Steele, Montagu, Pope, and Gay.

**ENGL 1510V. Civil Rights and American Literature.**

An examination of the relations between legal theory and practice and literature, with a particular emphasis on the nature and significance of those relations in the historical development of American discourses of civil rights. Readings include Thoreau, Douglass, Wright, and Perry, and legal theorists such as Dworkin, Unger, Cardozo, and Fish.

**ENGL 1510W. George Eliot.**

The course will study George Eliot's major works, including *Adam Bede*, *Middlemarch*, and *Daniel Deronda*, as well as examples of her essays and criticism. We will consider her experiments with literary realism, which helped secure for the novel form a position as high art. Giving attention to George Eliot's emphasis on conflicting ethical systems, from sympathy, utilitarian economics, and theology, to theories of physiological necessity, we will also examine the question of choice—including personal, women's social, professional, and marriage choices—that lies at the heart of many of her novels.

**ENGL 1510X. The Early American Novel.**

A reading of diverse genres of the early American novel, between 1790 and 1860, including the seduction novel, frontier romance, historical fiction, and the antislavery novel. What was the novel's cultural role? Writers include Susanna Rowson, Brockden Brown, Hawthorne, Stowe, and William Wells Brown.

**ENGL 1510Z. The Realist Age: American Literature at the Turn of the Century.**

What do we mean when we call a novel realistic? When did the term first start being used, and why? This class attempts to answer these questions by studying the emergence of realism as the dominant American literary form at the turn of the century. Writers will include Mark Twain, Henry James, Stephen Crane, Edith Wharton, and Charles Chesnutt.

**ENGL 1511A. American Literature and the Civil War.**

An examination of the way the Civil War is represented in American literature from Reconstruction to the present. Authors to be considered include Grant, Twain, Dixon, Chesnutt, DuBois, Faulkner, Morrison, Ellison.

**ENGL 1511B. The Victorian Novel.**

Challenges the notion of a Great Tradition or mainstream Victorian novel by looking at the proliferation of subgenres—e.g., sensation fiction, crime fiction, thug fiction, colonial adventures stories—for which the period is known. Includes novels by Mary Shelley, the Brontës, Dickens, Mrs. Henry Wood, Eliot, Hardy, Stevenson, Haggard, Stoker, and Wilde.

**ENGL 1511C. Lincoln, Whitman, and The Civil War.**

A literary and cultural history of the Civil War with special emphasis on Whitman's poetry and Lincoln's addresses and letters. It focuses on issues of race, democracy, and modernity.

**ENGL 1511E. Monsters, Giants, and Fantastic Landscapes.**

Monsters, giants, and exotic landscapes fill the pages of much writing in English before 1900. We will examine the ways in which a number of writers before 1900 use the strange and the fabulous to suggest new ways of understanding what it means to be normal. Authors may include Columbus, Shakespeare, Mary Shelley, and Poe.

**ENGL 1511F. Wordsworth and Coleridge: Lyrical Ballads.**

An introduction to and close reading of the *Lyrical Ballads*, one of the most radical and innovative volumes in British Romantic literature. We will pay special attention to the aesthetic, historical, ethical, and political dimensions of the text, patiently working through the poems and prefaces, as well as reading antecedent texts, in order to understand why the book was an experiment for its authors, and what are its enduring effects on our contemporary moment.

**ENGL 1511G. Dickens and Others.**

An introduction to the novels of Charles Dickens (1812-1870) that considers these works in relation to other important intellectual, historical, and literary developments of mid-19th-century England. Special attention given to the political, social, and philosophical significance of "others" in Dickens's writing and in related works from the period. In addition to a set of Dickens's novels, readings include selections from Mill, Arnold, Marx, Tennyson, Eliot, and others.

**ENGL 1511H. Literature of the American Renaissance.**

A survey of the major figures of mid-19th-century American literature, with a particular emphasis on how the writers of the period engaged the political and legal issues informing the sectional conflict on the eve of the Civil War. Authors to be considered include Poe, Hawthorne, Melville, Dickinson, Stowe, Douglass, Brown, Jacobs, and Whitman. Students who have taken ENGL 0600F may not register for this course.

**ENGL 1511I. Culture and Anarchy.**

This course will trace the development of the concept of culture from its origin in conflict generated by the universalizing mission of the Enlightenment into a variety of literary and philosophical writings in 19th-century British literature. Readings from Rousseau, Kant, Herder, Burke, Wordsworth, Percy Shelley, Carlyle, Thoreau, Emerson, Tennyson, Arnold, and George Eliot.

**ENGL 1511J. The Rise of American Realism.**

Realist fiction is traditionally associated with France (Honoré Balzac, Émile Zola) and England (Jane Austen, Charles Dickens, George Eliot). We will read a number of important American realist writers (including Stephen Crane, Edith Wharton, Henry James, and Theodore Dreiser) in order to understand what might be distinctive about American realism and what it might owe to its European forerunner.

**ENGL 1511K. Gothic Novels and Romantic Poems.**

The difference between "high Romantic" poetry and Gothic popular fiction blurs when we look closely at these haunted and haunting texts. This seminar will examine some major Romantic poems by Wordsworth, Coleridge, Keats, Shelley, and Byron in tandem with Gothic novels by Ann Radcliffe, Matthew Lewis, Jane Austen, and Mary Shelley.

**ENGL 1511L. On Being Bored.**

This course explores texts/films that represent and formally express states of non-productivity or non-desire. Beginning with the Enlightenment and romantic periods, we will reflect on narratives with neither progress nor plot, characters that resist characterization, and poems that deny assertion and revelation. Authors include: Kleist, Kant, Rousseau, Coleridge, de Quincey, Keats, Blanchot, Levinas, Beckett, Ashbery, Schuyler.

**ENGL 1511M. Victorian Self and Society.**

This multi-genre course studies literature and culture of the Victorian period, looking at the changing ideas of society and the individual's place within that larger community in an age of empire, industrialization, urbanization, class conflict, and religious crisis. Topics include conceptions of the role of art and culture in society, the railway mania of the 1840s, women's suffrage and the condition of women, and the Great Exhibition of 1851. Readings (essays, poems, stories, plays, and novels) by Carlyle, Charlotte Brontë, Ruskin, Robert Browning, Dickens, Tennyson, Christina Rossetti, George Eliot, and Lewis Carroll.

**ENGL 1511N. Liberalism, Empire, and the American Novel.**

An historical consideration of how the novel in the United States addresses the relations between American liberalism and the projection of US sovereign authority into international contexts. Topics to be considered include: Manifest Destiny and the frontier; Reconstruction and the rise of imperial America; World War II and the Cold War; and the United States at the end of History.

**ENGL 1511O. American Poetry I: Puritans through the Nineteenth Century.**

Survey of the invention and development of American poetic traditions. Readings include Bradstreet, Taylor, Wheatley, Freneau, Bryant, Emerson, Poe, Whitman, Melville, Dickinson, and Frost.

**ENGL 1511P. Realism, Modernism, Postmodernism: The American Novel and its Traditions.**

This course charts the course of American novel from the Civil War to the present. We will attend to the development of a distinctly novelistic literary tradition in American writing over the period and to the interactions between this tradition of literary novel writing and the emergence commercial novelistic generic forms (ie. the detective novel, science fiction). We will also consider the novel's relations to alternative literary modes (narrative history, the sketch, the short story, the occasional essay) and to alternative media (film, television, music). Melville, Twain, DuBois, James, Fitzgerald, Hammett, Hurston, Wright, Nabokov, Butler, Morrison, Dick, Didion.

**ENGL 1511R. Scandalous Victorians.**

This course examines the literature and culture of Victorian Britain through the lens of scandal. Particular attention will be paid to questions of gender, sexuality, class and social mobility, and national and imperial identity, as well as to the dynamics of scandal and the processes of social change.

**ENGL 1511S. The Victorian Novel and/as the History of Sexuality.**

Might the modern hetero- and homosexual be Victorian constructions that have really "stuck"? We will explore how the Victorian novel contributed to the cultural labor of joining sexuality to a sense of the self, and then pitched in on the effort to meld romance, love, and sexuality into marital relationships. Domesticity, obsession, heterophobia, the Malthusian unconscionousness, and erotic versus romantic friendship will be some of the issues discussed. We will also branch out into issues of pleasure and desire more broadly in Victorian culture. Authors will include Brontë, Dickens, Eliot, Hardy, Charlotte Yonge, and Wilde.

**ENGL 1511T. Victorian Inequality.**

From "Dickensian" workhouses to shady financiers, Victorian literature has provided touchstones for discussions of inequality today. This course will investigate how writers responded to the experience of inequality in Victorian Britain. Considering multiple axes of inequality, we will explore topics such as poverty and class conflict, social mobility, urbanization, gender, education, Empire, and labor.

**ENGL 1511U. Melville, Poe, and American Modernity.**

The class will be guided by the premise that the writings of Poe and Melville reflect mid-19th century modernity. To support this claim we will look into their experimentation with narrative structure and ask whether the absence of clearly delineated characters in their stories is related to the emergence of urban crowds, practices of dehumanization employed in New York and Philadelphia prisons and hospitals.

**ENGL 1511V. Nature and the Self in Victorian Poetry.**

The major works of Victorian poetry, spanning from the end of the Romantic period to the beginnings of Modernist poetry: roughly 1840 to 1890. We will be reading Matthew Arnold, Robert Browning, Thomas Hardy, Gerard Manley Hopkins, and Alfred Tennyson in detail, as well as critical writing and political poetry from the period.

**ENGL 1511Y. Emily Dickinson and the Theory of Lyric Form.**

This class examines the extraordinary work of Emily Dickinson in an attempt to understand what lyric poetry is and how it works. We will read a generous sampling of Dickinson's poetry as well as a number of the major theoretical accounts of the lyric. Enrollment limited to juniors and seniors.

**ENGL 1511Z. The Art of the Novel: Henry James.**

Henry James wrote about fiction as a form of experience: "The power to guess the unseen from the seen, to trace the implications of things." He advises the writer, "Try to be one of the people on whom nothing is lost!" In this course we will read James's critical writings and his major works in the novel and short story. Enrollment limited to juniors and seniors.

**ENGL 1560A. Jane Austen and George Eliot.**

A survey of the major novels of Austen and Eliot. Readings will also include contemporary reviews and responses, letters, and Eliot's critical prose, as well as literary theory and criticism addressing questions such as novelistic form, realism and narrativity, the problem of the subject, the politics of aesthetics, and the changing status of the woman writer in the 19th century. Enrollment limited to 20 seniors and juniors. Instructor permission required.

**ENGL 1560B. Melville.**

A seminar looking closely at the relation between the life and literary work of Herman Melville, with an extended reading of his masterpiece, *Moby-Dick*. The course will look at the history of writing and publishing during Melville's era and consider some of his contemporaries like Hawthorne and Harriet Beecher Stowe. Enrollment limited to 20.

**ENGL 1560E. The Modern Self and Its Others.**

How do eighteenth-century representations of personal and public identity mark the emergence of the modern 'subject' as defined by gender, race, nation, language, and the body? Readings will include selections by Swift, Pope, Montague, Stern, Johnson, and Berney.

**ENGL 1560F. Nineteenth-Century American Imperialism.**

Examines a number of different types of texts—novels, essays, journalism, oral narratives—in order to trace the connections between the internal colonialism of America in the nineteenth century and U.S. colonial ventures in the Caribbean, Asia, and Latin America. Writers to include Melville, Twain, Marti, Black Elk, Crane, Du Bois, and Roosevelt.

**ENGL 1560G. Romantic Orientalism.**

Representations of "the East" in British writing and visual art from 1775 to 1825. Historical and theoretical accounts of "orientalism" and analysis of the political and ideological sources and consequences of "orientalist" representation. Readings in Wordsworth, Coleridge, Owenson, DeQuincey, Byron, Percy Shelley, and Mary Shelley.

**ENGL 1560H. The Victorian Novel.**

What specific historical conditions can be seen to have led to the emergence of the novel as a leading literary form in the Victorian era? What cultural work was it called upon to perform? How does it address broader philosophical, economic, political and social questions of the Victorian era? Authors include Dickens, Eliot, Hardy, Stevenson, and Conrad.

**ENGL 1560M. Orientalism and the Place of Literature.**

Literary representations of "the East" from the Enlightenment through Modernism and their relation to changing conceptions of the meaning and value of "literature" itself. Thinking about "place" in representational, geopolitical, and institutional terms. Readings from the "Arabian Nights," Mary Wortley Montagu, Oliver Goldsmith, Coleridge, Byron, De Quincey, Kipling, Michael Ondaatje, and others; theoretical and historical perspectives from Said, Williams, Eagleton, and others.

**ENGL 1560N. Eighteenth-Century Novel.**

The 18th century marks the beginning of the novel as we know it. This course considers the "rise" of fiction during the "long" eighteenth century. Beginning with Behn, Haywood and Defoe, readings include works by Richardson, Fielding, Sterne, Smollett, Lewis, and Godwin.

**ENGL 1560O. Slavery and American Literature.**

This course examines the ways in which slavery is represented in 19th-century American literature. We will consider efforts to delineate the social practices and effects of chattel slavery and deployments of slavery as a form of political rhetoric. Readings include works by Douglass, Jacobs, Stowe, Melville, Howells, Twain, and DuBois.

**ENGL 1560Q. The Poetry of Politics: Baudelaire, Arnold, Whitman.**

Explores the special challenge to the traditional form of lyric poetry posed by the post-industrial modern city of the mid-19th century. We will study the poetry and prose of Charles Baudelaire, Matthew Arnold, and Walt Whitman as responses to the urban conditions represented by mid-19th-century Paris, London, and New York. Motifs to be considered include modernity, commodification, and crowds. Priority will be given to junior and senior concentrators in English, Comparative Literature, Modern Culture and Media, and French Studies. First-year students and sophomores may request permission by email to take the course.

**ENGL 1560R. From Frankenstein to Einstein: Literature and Science from 1800 to 1950.**

Science and literature as interrelated ways of knowing and learning, focusing on questions of language, observation, interpretation, and value. Themes include utopias and dystopias, evolution and degeneration, man and machine, entropy and chaos, and the relationship between literary imagination and scientific creativity. Readings include poems, plays, novels, and essays (Shelley, Arnold, Doyle, Poe, Wells, Kafka, Stoppard) alongside a range of scientific writing (Darwin, Huxley, Freud, Gould, James Watson) and philosophy of science (Popper, Feyerabend, Kuhn). Enrollment limited to 20 juniors and seniors. Banner registrations after classes begin require instructor approval.

**ENGL 1560S. Forms of American Realism, 1865-1945.**

An inquiry into the nature of realism and an examination of its various historical manifestations-literary, legal, political, and aesthetic-between the Civil War and World War II. Authors to be considered include DeForest, Chesnutt, Twain, Howells, Norris, Gilman, Wharton, Hemingway, Steinbeck, Hurston, and Wright. Enrollment limited.

**ENGL 1560T. Literature, Religion, and "Culture Wars" in America.**

This course examines important moments where religious and literary histories converge. It reads "classic" American literary works in context of ongoing conflicts between evangelical and secular forces in American life, and it thinks about literature as an arena where these very categories are contested and revised. Major readings will include works by John Winthrop, Benjamin Franklin, Harriet Beecher Stowe, African American women preachers, Emerson, Mark Twain, and Flannery O'Connor. Enrollment restricted.

**ENGL 1560U. Radicals and Conservatives: the later 18th Century.**

The relationship between literature and society is demonstrated by conservatives like "Dictionary" Johnson as well as by radicals like visionary Blake. Readings include works by Johnson, Boswell, Burke, Gibbon, Sterne, Burney, Wollstonecraft, Godwin, and Blake. Enrollment limited to 20.

**ENGL 1560V. The Lives of a Text.**

Books are composed not merely of concepts. They are material objects whose forms, functions, and value can vary widely. We will make use of rare editions at the John Hay Library to help us explore both the literary content of works and their production and dissemination in various formats and for various audiences. Authors may include Shakespeare, Poe, and Fitzgerald. Enrollment limited to 15. Not open to first year students.

**ENGL 1560W. Getting Emotional: Passionate Theories.**

This course examines connections between emotion, feeling, and affect in several key texts from 18th-, 19th-, and 20th-century literatures. We will ask how and why affect becomes a central concept for writers and thinkers in the Enlightenment, and chart the ways in which affect productively opens up onto contemporary theorizations of identity, gender, sexuality, and race. Possible authors include: Wordsworth, Austen, Blake, Equiano, Coleridge, Keats, Shelley, Wilde, Pater, Kant, Melville, Hofmansthal, Hume. Films by Todd Haynes, McQueen, Campion, Frampton. Theoretical readings by Berlant, Ellison, Terada, Deleuze, Stewart. Enrollment limited to 20 juniors and seniors.

**ENGL 1560X. Transatlantic America.**

What was "transatlantic" culture in colonial and 19th-century America? How did American writers continue to engage and respond to English culture? Franklin, Emerson, Sedgwick, Paine, Addison and Steele, Carlyle, and others. Enrollment limited.

**ENGL 1560Y. The Ethics of Romanticism.**

An exploration of the intersections of moral philosophy and Romantic literature and culture. Writers studied may include Smith, Hume, Bentham, Hazlitt, Hegel, Wordsworth, Coleridge, Keats, Shelley, Byron, Godwin, Equiano, Austen. We will consider how writings of the Enlightenment and Romantic period differently reflect upon problems of knowledge, otherness, identity, community, and aesthetics, and how these reflections are related to the ethical imagination. We will also juxtapose our selections with several recent theoretical debates. Enrollment limited to 20.

**ENGL 1560Z. Time and Narrative.**

This course studies fiction that experiments with the representation of time alongside philosophical and critical texts on the theory of time. We will consider how engagements with the question of time shape the structures, language, characters, plots, themes, and goals of narrative, looking at topics such as time and language, story and narration, memory and history. We will also consider the impact of technological and social developments on the sense of time (the wristwatch, the telegraph, railway timetables). Authors include St. Augustine, Laurence Sterne, John Locke, David Hume, Ambrose Bierce, Charles Dickens, H.G. Wells, Thomas Hardy, Henry James, Virginia Woolf. Enrollment limited.

**ENGL 1561C. Swift and His Contemporaries.**

Jonathan Swift's works are central to this course's investigation of early 18th-century literature and culture. The reading focuses on the period as an "information age" energized by issues not unlike those of our own time: partisan politics, money, proliferation of new forms of textuality, globalization, changing views on gender and sexuality, love, religion, and war. The emphasis will be on irony, parody, and satire. Other writers include Congreve, Defoe, Manley, Pope, Gay, Montagu, Addison, and Steele. Students who have taken ENGL 1510T may not register for this course. Not open to first-year students or students who have taken ENGL1510T. Enrollment limited.

**ENGL 1561D. Writing and the Ruins of Empire.**

An exploration of literary representations of "empire" and "imperialism" from the 18th century to the present. Readings in Gibbon's *Decline and Fall of the Roman Empire*, Volney's *Ruins of Empire*, and a wide range of 19th- and 20th-century texts. Some consideration of theories of imperialism and of visual representations of cultures of empire. Enrollment limited to 20. Prior coursework in 18th- and 19th-century literature advised.

**ENGL 1561E. The Western.**

An examination of the formula Western in American fiction, art, and cinema, with a view toward situating the genre within urban middle-class culture in the late 19th- and 20th-century United States. Authors to be considered include Twain, Harte, Crane, Austin, Cather, Doctorow, Reed, Leonard, and L'Amour. Films: *Destry Rides Again*, *Stagecoach*, *Rio Bravo*, *The Seven Samurai*, *Fistful of Dollars*, *Dirty Harry*, *The Man from Laramie*, *Paint your Wagon*, *Act of Violence*, among others. Enrollment limited to 20.

**ENGL 1561F. Sacred Readings: The Bible, Biblical Interpretation, and Victorian Literature.**

Bible reading in terms of apocalyptic and other prophecies permeates Victorian literature, coloring ideas of politics, gender, character, and the arts in ways that seem a secret code. The course therefore reads works by Charlotte Brontë, the Brownings, Carlyle, Hopkins, Newman, the Rossetts, Ruskin, and Swinburne in light of once common ideas of typology, prophecy, and apocalypse. Enrollment limited to 20.

**ENGL 1561G. Swift, Pope, Johnson.**

The course provides in-depth study of three major writers of the eighteenth century and will include cultural contexts. Readings include *Gulliver's Travels*, *The Rape of the Lock*, and *Rasselas*. Enrollment limited to 20.

**ENGL 1561H. The Brain and the Book: Thinking and Reading in the Victorian Novel.**

Considers two nineteenth-century novels in light of theories of cognition, both nineteenth-century and contemporary. This course proposes to study how some of the foundational questions of literary study—the nature of language, the location of meaning, the experience of reading, the power of metaphor, and the sources of creative thought—can also be studied from the perspective of mental science. We will read two Victorian novels in serial installments simultaneously, alongside shorter readings. Limited to juniors and seniors only. Banner registrations after classes begin require instructor approval. Enrollment limited to 20.

**ENGL 1561I. Gender, Narrative, and the 19th-Century Novel.**

Like Freud, Victorian novelists tell stories of desire that often center on a female character. This seminar examines some of the contexts, conventions, and tensions that go into the making of a "portrait of a lady" in this novelistic tradition. Texts to be studied include Freud's case history *Dora*, and novels by Brontë, Collins, Eliot, and James. Enrollment limited to 20.

**ENGL 1561J. The Poetics of Confession.**

This course explores the theoretical structures and models of confession in various literary and cinematic sources, with a special emphasis on work from the nineteenth and twentieth centuries. Authors might include: St. Augustine, Rousseau, De Quincey, Foucault, Wordsworth, Bronte, Wilde.

**ENGL 1561K. Restoration and Eighteenth-Century Drama.**

After almost two decades of closure, public theaters re-opened in 1660. This new beginning occasioned new plays, new kinds of performance and production, and new intersections between the stage and society. We will study works by Etherege, Wycherly, Congreve, Dryden, Behn, Gay, Lillo, Sheridan, and others. Not open to first-year students.

**ENGL 1561L. Revolution, War, Poetry: Wordsworth in the 1790s.**

William Wordsworth's poetic experiments during the 1790s are often said to have invented modern poetry as the poetry of consciousness; they are also efforts to find language adequate to a time of revolution, war, and modernity. This seminar examines texts by various writers of the revolutionary era, but focuses on Wordsworth's poetry from the early 1790s to the 1805 *Prelude*. Enrollment limited to 20. Not open to first-year students.

**ENGL 1561M. American Literature and the Corporation.**

A study of the development of the American novel from the Civil War to the present in light of the emergence of the corporation as the principal unit of economic enterprise in the United States. We will survey corporate theory from Lippmann to Collins, and use it to frame the novel's development from realism through modernism into postmodernism. Corporate theorists to be considered: Lippmann, Dewey, Berle, Drucker, Mayo, Demming, Friedman, Coase. Novelists to be considered: Twain, Dreiser, Wharton, Stein, Faulkner, Steinbeck, Wright, Ellison, McCullers, Reed, Gaddis, Morrison. Enrollment limited to 20.

**ENGL 1561N. What is an Author?: Poe, Hawthorne, Dickinson.**

What does it mean to be identified as an "author"? How did the practices of writing and reading change in 19th-century America? This course addresses such questions by reconsidering the literary careers of Hawthorn, Poe, and Emily Dickinson. Our work will investigate literary culture and book history, focusing on 19th-century authors, readers, magazines, publishing, criticism, and popular media. Enrollment limited to 20.

**ENGL 1561S. Gender and Sexuality in Victorian Literature.**

This seminar explores the constructions and the highly charged cultural significance of gender and sexuality in the literature of Victorian Britain. Readings include a selection of fiction, poetry, and prose writing by authors such as Alfred, Lord Tennyson; Emily Brontë; Elizabeth Barrett Browning; Mary Elizabeth Braddon; Dante Gabriel Rossetti; Christina Rossetti; Robert Louis Stevenson; and Thomas Hardy. Enrollment limited to 20.

**ENGL 1561T. The Sensational and the Real In Victorian Fiction.**

This course will focus on the Victorian novel, which has been called the period's greatest artistic achievement. In particular we will explore two modes through which novels engaged the turbulent experience of their time: realism and sensation. We will examine how these different novelistic modes tackled the issues of gender, sexuality, class, and personal and community identity. Enrollment limited to 20.

**ENGL 1561U. Oedipus in Myth, Tragedy, and Theory.**

This course is an intensive study of *Oedipus Rex*, as well as an introduction to the debates and responses it has occasioned. It spans several disciplines, from the classics to philosophy to psychoanalysis to literary theory, following the trajectory of this single figure. Readings: Sophocles, Aristotle, Hegel, Rancière, Girard, Foucault, Freud, and Bernard Williams. Enrollment limited to 20.

**ENGL 1561Y. In Excess: Rossetti, Hopkins, Wilde.**

This seminar will be a focused close reading of three late Victorian writers whose works might be described as radically excessive insofar as they transgress and push beyond the limits of social, ethical, aesthetic, sexual, and political conventions. What does it mean to describe a text as excessive, and how can excess be considered as a constitutive part of its form? We will concentrate on poetry, plays, and theoretical texts, putting our authors into conversation with contemporary thinkers of excess. Enrollment limited to 20.

**ENGL 1561Z. American Renaissance.**

A course focusing on the writings of the Transcendentalists, reform literature, antislavery and Native American and Indigenous rights. The subjects of history, the capitalist market, Nature, and the development of modern authorship and literary professionalism. Emerson, Thoreau, Douglass, Alcott, as well as Harriet Wilson, William Apess, and magazine writing.

**ENGL 1580. Undergraduate Independent Study in the Enlightenment and the Rise of National Literatures.**

Tutorial instruction oriented toward a literary research topic. Section numbers vary by instructor. Instructor's permission required.

**ENGL 1710A. "Extravagant" Texts: Advanced Studies in Asian American Literatures.**

Examines Asian American writings that are difficult, complex, and/or experimental—that are, in Kingston's phrase, "extravagant." Explores the issue of what is at stake—politically and aesthetically—in writing that explicitly challenges the generic conventions with which much Asian American literature is linked: autobiography, the Bildungsroman, ethnography, realism, and sentimentalism.

**ENGL 1710B. American Vertigo: How the World Sees the U.S..**

Why does America exercise such an extraordinary attraction for foreign writers? And why, moreover, is the America that appears in those writings so often unrecognizable? This class examines the representation of American life from DeTocqueville to Henry-Levy, looking at work by Amis, Antonioni, Adorno, Nabokov, Kincaid, and others. Two lectures and one discussion meeting weekly. Students will be assigned to conference sections by the instructor during the first week of class.

**ENGL 1710C. Race and Nation in American Literature.**

From the heyday of literary realism through the rise of modernism, race definitively shaped the national literature of the U.S. This course will consider representations of racial identities in relation to key historical and aesthetic developments within these two periods. Authors include Mark Twain, Frances Harper, Charles Chesnut, Stephen Crane, William Faulkner, and John Fante.

**ENGL 1710D. Anglo-American Nonfiction: Sages, Satirists, and New Journalists.**

After examining the relations between fiction and nonfiction, the class will consider the work of Tom Wolfe, Joan Didion, Annie Dillard, and others within contexts created by essayists (Montaigne), satirists (Swift), and Nineteenth-century sages (Carlyle, Thoreau, Nightingale, and Ruskin). The class will become acquainted with various nonfictional forms including prose satire, the meditative essay, sage-writing, autobiography, and travel literature.

**ENGL 1710E. Reading Race in Black + Yellow: Comparative Studies in 20th-C African American + Asian American Fiction.**

Focusing on pairs of African American and Asian American works that address parallel concerns, we explore the continuities and discontinuities between these literary traditions. Authors we examine may include: James Weldon Johnson and Winnifred Eaton, Richard Wright and Carlos Bulosan, Chang-rae Lee and Toni Morrison, Karen Tei Yamashita and Caryl Phillips.

**ENGL 1710F. Tribe, Nation, and Race in African Fiction.**

How do major African novelists represent the interplay of tribe, nation, and race in African societies? This course will introduce students to key themes and contexts of African literature in English. We will read the work of the writers for the historical sources and conceptual implications of these categories in modern Africa. Writers include Achebe, Emecheta, Farah, Ngugi, and Vera.

**ENGL 1710G. Faulkner.**

In examining Faulkner's major works from the early stream-of-consciousness novels through the history-driven and race-inflected texts of the 30s and 40s, this course will evaluate Faulkner's practice as a writer working both in and against Southern culture, and as Modernist writing within an international context. Issues include narrative experimentation, race, class, gender, and the evolution of Faulkner's work. Students should register for ENGL 1710G S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 1710H. Black Internationalism and African American Literature.**

The notion that African Americans are an extension of a global racial community has been a fixture of black politics and culture for more than a century. In this course, we will consider how the concept of global racial alliance has shaped black political resistance, literary practice, and critical theory. Likely writers include DuBois, Hughes, McKay, and Wideman.

**ENGL 1710I. Harlem Renaissance: The Politics of Culture.**

The Harlem Renaissance was a remarkable flowering of culture in post-war New York as well as a social movement that advanced political agendas for the nation. This course takes up the relationship between literature and politics by exploring such matters as the urbanization of black America, the representation of the black poor, the influence of white patronage, and the rise of primitivism. Writers may include Hughes, Hurston, Larsen, Fisher, Locke, and McKay.

**ENGL 1710J. Modern African Literature.**

This course considers themes, antecedents, and contexts of modern African literature and related forms. Our readings will include fiction in English or in translation, traditional oral forms like panegyric and festival poetry, and some films. We will examine how these diverse materials explore the interplay of ethnicity, nationality, and race. We will also address the issue of "tradition" in contexts where nationalisms of various stripes are becoming stronger, even as the world becomes more interconnected through trade, immigration, and digital technology. Authors will include Achebe, Adichie, Dangarembga, Kourouma, Ngugi, Salih, Soyinka, Wicomb. Films by Kouyaté, Loreau, Sembène.

**ENGL 1710K. Literature and the Problem of Poverty.**

This course explores poverty as a political and aesthetic problem for American writers. Examines the ways that writers have imagined the poor as dangerous others, agents of urban decay, bearers of folk culture, and engines of class revolt. Authors include Stephen Crane, William Faulkner, Zora Neale Hurston, and Richard Wright.

**ENGL 1710L. Modernism and Everyday Life.**

We will examine modernist literature in the context of contemporary art, psychology, and theories of everyday life to ask how this period understood ordinary objects and events. Could they be the proper subject matter of art? In the right circumstances, might they actually be art? Writers may include Woolf, Joyce, Williams, Eliot, Stein, James, Freud, deCerteau. One previous literature class required.

**ENGL 1710M. Nationalizing Narratives: Race, Nationalism, and the 20th-C. American Novel.**

An advanced survey that examines how 20th-century American novels construct the nation as "imagined community" and as "fictive ethnicity." We focus on the central role that conceptions of race—as well as those of gender and sexuality—play in the novelistic visions of America projected by such authors as Ralph Ellison, William Faulkner, Jessica Hagedorn, and Chang-rae Lee. Not open to first year students.

**ENGL 1710N. Photography and the American Novel.**

Traces the impact made by the emerging medium of photography on American fiction from its very beginnings until the present. Our focus will be on the varying strategies adopted by novelists in response to the representational challenges posed by photography. Writers include Hawthorne, Nabokov, Faulkner, Hurston, Citron, Eugenides, and Barthes. Students should register for ENGL 1710N S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 1710O. The Dead and the Living.**

Readings in literature, theory, psychoanalysis, philosophy and law examine how the relation between the dead and the living shapes the concerns of modernist narrative and thought. Topics include "Living with the Dead," "Haunting and Knowing," "Writing Lives," "Dreaming and Waking," and "Picturing the Dead." Readings include Joyce, Conrad, Woolf, Forster, and Greene as well as Freud, Lacan, Benjamin, and Barthes.

**ENGL 1710P. The Literature and Culture of Black Power Reconsidered.**

This course reexamines the Black Power movement as a signal development in American literature and culture. We will read classics from the period with a view toward reassessing the nuances and complexities of their form and politics. At the same time, we will recover less familiar texts that complicate conventional understandings of what defines this movement. Authors include Malcolm X, Huey P. Newton, Angela Davis, Eldridge Cleaver, John Edgar Wideman, Ernest Gaines, and Amiri Baraka.

**ENGL 1710Q. Bloomsbury and Modernism.**

The contribution of the avant-garde "Bloomsbury Group" to the development of literary modernism. The focus will be on the central literary figures (Virginia Woolf, E. M. Forster, and T. S. Eliot), but attention will also be paid to the visual arts (Roger Fry, Vanessa Bell, and Post-Impressionism) and to social criticism (Lytton Strachey, Leonard Woolf, and John Maynard Keynes).

**ENGL 1710S. Writing War.**

Examines the challenges that war poses to representation, and particularly to language and literary expression in the modern era. We will focus primarily on the First and Second World Wars, exploring the specific pressures war puts on novels and poetry, as well as on history, psychology, and ethics. Works by Sassoon, Owen, Barbusse, Brittain, Woolf, Rebecca West, Graham Greene, Pat Barker, Marc Bloch.

**ENGL 1710W. Literary Impressionism.**

An examination of the role of "literary impressionism" in the transformation of the novel from realism to modernism. Writers studied include Henry James, Joseph Conrad, Stephen Crane, Ford Madox Ford, and Virginia Woolf. Close analysis of their narrative methods for dramatizing consciousness, with attention to the political and ethical implications of impressionism's focus on the inner life.

**ENGL 1710Y. American Literature and the Cold War.**

A study of American literature in the context of the broad intellectual culture—strategic, ideological, philosophical, aesthetic, and economic—engendered by the conflict between the United States and the Soviet Union from 1945 to 1991. We will assess the role of the bomb, McCarthyism, game theory, the military industrial complex, and strategic doctrines of containment and deterrence in the rise of postmodernism in American literature. Authors to be considered include Bellow, Highsmith, Miller, Ellison, McCarthy, Mailer, Pynchon, Wideman, Coover, DeLillo. Students should register for ENGL 1710Y S01 and may be assigned to conference sections by the instructor during the first week of class.

**ENGL 1711A. American Poetry II: Modernism.**

Study of modernist American poetry. Readings include Pound, Eliot, Stevens, Williams, H.D., Moore, Hughes, and others.

**ENGL 1711B. Modernist Fiction.**

Readings in British and American fiction and culture in the early 20th century, with particular attention to the relationships between modernist literary experiment and contemporary questions about empire, race, the changing status of women, and the grounds of literary authority. Writers may include Conrad, H.D., Joyce, Larsen, Lawrence, Rhys, Toomer, Woolf. Two lectures and one discussion meeting weekly. Students will be assigned to conference sections by the instructor during the first week of class.

**ENGL 1711C. Modernist Henry James.**

How consciousness knows the world was a topic of endless fascination to Henry James. By dramatizing the workings of consciousness, James transformed the novel and led the way to modernism. In addition to the aesthetic significance of his experiments with point of view, the course will also analyze the ethical consequences of his insistence on life's ambiguities.

**ENGL 1711D. Reading New York.**

This course explores narratives of New York City in a variety of genres, from the early 20th century to the present. Topics include immigration, mobility, cosmopolitanism and the neighborhood, cruising, gentrification, post-9/11. Work by John Dos Passos, Nella Larsen, E.B. White, Jane Jacobs, Frank O'Hara, Samuel Delany, Patti Smith, Nan Goldin, Ernesto Quinones, Teju Cole. Prerequisite: one previous literature course.

**ENGL 1711E. African American Literature After 1975.**

This course examines major authors and currents in African American literary writing from 1975 through the present. The class positions these works in relation to historical developments such as the rise of black nationalism, the evolution of a distinctive black feminist tradition, and the growing social divisions within the African American community. Authors include Toni Morrison, Jamaica Kincaid, Colson Whitehead, and John Wideman.

**ENGL 1711H. Lyric Concepts: The Question of Identity in Modern and Contemporary Poetry.**

The lyric within contemporary poetry has often been associated with a desire to express a subjective relation to interior experience while experimental traditions have often imagined the poem as a site of formal or conceptual play devoid of specific concerns of identity. This course draws on poets such as Rankine, Moten, Robertson, Hejinian and the critical tools of affect theory to trouble these distinctions.

**ENGL 1711J. Art for an Undivided Earth / Transnational Approaches to Indigenous Art and Activism.**

The tension between indigenous literary nationalism and methodologies of cosmopolitanism and transnationalism have animated contemporary Native literary studies. At stake is the very meaning of indigeneity itself—how does indigeneity function on a global scale? How do hemispheric approaches to indigeneity transform our understanding of histories of colonialism? How have artists made connections across space without flattening the specificity of their locations?

**ENGL 1711K. The Politics of Perspective: Post-war British Fiction.**

Offers an overview of British fiction from the last 50 years in order to consider how Englishness, as (i) a set of images and (ii) a mode of looking, has changed. The course covers 3 distinct periods (post-War period, Thatcherism, the New Labour epoch and beyond) and, is intended as an introduction to theories of culture, ideology and literary analysis and to some of the most important British writers of the last fifty years.

**ENGL 1711L. Contemporary Black Women's Literature.**

Examination of black women's literature in the post-Civil Rights period. Foregrounding complexities of black womanhood, course investigates how black women have used writing to revise history, assert agency, manufacture beauty, and redress personal and group injury. Emphasis on the intersections of precarity and power, race and rebellion, pastness and black feminist futurity within the context of African women's literary legacies. Specific attention paid to the aesthetics of form and the interrelations of race, class, sexuality, generation and nation. Not open to first-year students.

**ENGL 1711N. Monsters in our Midst: The Plantation and the Woods in Trans-American Literature.**

This course focuses on how literary and visual culture grappled with land as a topographic entity in relation to race, gender, and time. Students read literature about the Caribbean and parts of the U.S., produced from the 19th century to the present. Readings include Marlon James's *The Book of Night Women* and Jean Rhys's *Wide Saragasso Sea*.

**ENGL 1711P. "We have not yet heard enough, if anything, about the female gaze": Contemporary Writing Not by Men.**

The concept of the "male gaze" has been central to feminist critiques of cinema. In developing the concept, Laura Mulvey refused to posit a corrective "female gaze" – which makes Maggie Nelson's remark about the female gaze in literature all the more surprising. This course discusses experimental writing primarily by women through the proposition that, without the male gaze, writing has the potential to be an "astonishing equalizer." Writers include Cusk, Fitzgerald, Gladman, Quin, Z. Smith, Spark, S. Hartman.

**ENGL 1711Q. Poetic Modernisms: Now!**

This course is a survey of modernist poetry that explores how key works by figures such as Langston Hughes, Gertrude Stein, Ezra Pound, William Carlos Williams, and Marianne Moore have continued to shape poetic forms and possibilities throughout the twentieth century and into the contemporary moment.

**ENGL 1760A. Joyce and Woolf.**

Intensive study of two of the most innovative and influential modern British novelists, with an emphasis on the relation between their formal experiments and their political engagements. Enrollment limited to 20.

**ENGL 1760B. Contemporary African American Literature and the End(s) of Identity.**

African American writers and intellectuals have begun to question the wisdom of defining black identity in terms that overemphasize the shared racial and cultural heritage of black people. Course assesses a range of literary and scholarly writing that engages these concerns. Explores such topics as the growing class division among African Americans, the effects of integration, the decline of nationalism, and the visibility of sexual minorities. Likely authors include Johnson, Morrison, Wideman, Beatty, and Senna. Enrollment limited.

**ENGL 1760C. Body and Event in Contemporary Fiction.**

Discusses the recent turn to the body and mortality in contemporary fiction, and considers the proposition that episodes of dismemberment in contemporary fiction stand in for the dismantlement of the literary text itself. Readings include Selby, Ellis, Cooper, Acker, Frame, Deleuze, Butler, Blanchot. Enrollment limited to seniors, juniors, and sophomores. Banner registrations after classes begin require instructor approval.

**ENGL 1760D. Race and Detection: American Crime Narratives.**

We examine American crime narratives, focusing on their representations of race, class, gender, and sexuality. Writers studied may include James M. Cain, Raymond Chandler, William Faulkner, Sue Grafton, Chester Himes, Walter Mosley, and Mark Twain.

**ENGL 1760E. Who's Afraid of Virginia Woolf?**

We will read novels, essays, diaries, and letters by Woolf in order to ask how and why Virginia Woolf haunts our culture and to consider her status as a cultural icon. The seminar will explore her work in the contexts of history, modernism, and literary influences, and it will examine the dimensions of Woolf's afterlife—a posthumous dynamic that shapes issues in art, politics, and gender. Enrollment limited to 20 seniors and juniors.

**ENGL 1760F. City, Culture, and Literature in the Early Twentieth Century.**

How did changes in the city shape early 20th-century literature? How does the literature of this period—whether avant-garde or documentary, progressive or conservative—shape the way we imagine the city? Topics may include urban spectacle, mobility and segregation, the neighborhood and the crowd. Authors include Dos Passos, Eliot, Larsen, Orwell, Woolf, Wright. Prerequisite: two previous literature courses. Priority to English and Urban Studies concentrators.

**ENGL 1760G. American and British Poetry Since 1945.**

Study of poetry after 1945. Readings include Bishop, Plath, Ashbery, Merrill, O'Hara, Heaney, Larkin, Walcott, Rich, Dove. Enrollment limited to 20.

**ENGL 1760I. "Terrible Beauty": Literature and the Terrorist Imaginary.**

Why does terrorism fascinate literary writers in the modern period? Is terrorism the figure of something that is unrepresentable in fiction, or is it a type of direct political action that fiction writers aspire to? Can literature's humanistic role of allaying terror survive an age of spectacular politics? How susceptible is terrorism to "aestheticization"? Texts will include works by Conrad, Flannery O'Connor, Naipaul, Dennis Cooper, Frantz Fanon, and Ngugiwa Thiong'o. Enrollment limited to 20 seniors, juniors, and sophomores. Banner registrations after classes begin require instructor approval.

**ENGL 1760J. Reading *Gravity's Rainbow*.**

An in-depth study of perhaps the most important American novel of the twentieth century. Reading will include Pynchon's early novel *The Crying of Lot 49*, stories by Borges, Kafka, and Nabokov, and a range of historical, texts and films alluded to in *Gravity's Rainbow*, from the sermons of Jonathan Edwards to the poetry of Rilke to *The Wizard of Oz*. Enrollment limited to 20 seniors.

**ENGL 1760K. Reading New York.**

We will explore narratives of New York City, both fictional and nonfictional, from the early 20th century to the present. Topics to be addressed include immigration, segregation and mobility, cosmopolitanism and the neighborhood, celebrity and postmodernism. Authors may include John Dos Passos, Ann Petry, E.B. White, Jane Jacobs, Rem Koolhaas. Registration limited to English and Urban Studies concentrators. Students from other concentrations should attend class on the first day and will be admitted if space is available. Enrollment limited to 20. Not open to first-year students. Prerequisite: two previous literature classes.

**ENGL 1760L. Bloomsbury and Modernism.**

This course will explore the contribution of the so-called "Bloomsbury Group" to the development of modernism in Britain. The focus will be on the central literary figures (Virginia Woolf, E. M. Forster, T. S. Eliot), but attention will also be paid to the visual arts (especially Roger Fry and Post-Impressionism) and social criticism (Lyttton Strachey, Leonard Woolf, and John Maynard Keynes). A major question will be how the controversies swirling around Bloomsbury exemplify important debates about modernism. Enrollment limited. Not open to first-year students. Banner registrations after classes begin require instructor approval.

**ENGL 1760N. Henry James.**

James is a pivotal figure in the history of the novel. His explorations of the workings of consciousness and conventions in representation transformed realism and announced the preoccupation of modernism with interpretation, signs, and narrative experimentation. An intensive study of his most important novels from *Daisy Miller* to *The Golden Bowl*.

**ENGL 1760O. American Orientalism.**

Examines Orientalism as central motif and thematic concern for American writers from Emerson to DuBois to Kingston. Issues to be addressed include the distinctions between U.S., European, and Afro-Orientalisms; how intra-Asian differences (i.e., China-Japan, East/South Asia) shape conceptions of the Orient; how whiteness and blackness are constructed via a vis yellowness; the relationship between Orientalism and racism; how "nativist" Asian American literary texts, on the one hand, and diasporic texts, on the other, negotiate the legacy of Orientalism. Enrollment limited.

**ENGL 1760P. "Extravagant" Texts: Experiments in Asian American Writing.**

We examine Asian American writings that are difficult, complex, and/or experimental: texts that are, in Maxine Hong Kingston's phrase, "extravagant." By looking at works that explicitly challenge the generic conventions with which much Asian American literature is usually linked—autobiography, the Bildungsroman, ethnography, realism, and sentimentalism—we try to arrive at a more expansive sense of what the ends of Asian American cultural politics might be. Enrollment limited to 20. Not open to first year students.

**ENGL 1760Q. James Joyce and the Modern Novel.**

One measure of James Joyce's achievement as a writer is his influence (as an inspiration, an antagonist, or a competitor) on novelists who came after him. Our primary concern will be with Joyce's formal innovations: How did his audacious narrative experiments transform the novel as a genre? Do his stylistic games break with the realistic tradition or expose its linguistic and epistemological workings? In addition to *Dubliners*, *Portrait of the Artist*, and *Ulysses*, we will read novels by Woolf, Faulkner, Beckett, and Nabokov. Enrollment limited to 20. Not open to first-year students. Instructor permission required.

**ENGL 1760R. The Roaring Twenties.**

The 1920s crystallized much of what we consider modern in 20th-century U. S. culture. This course reads literature of the decade in the context of a broader culture, including film and advertising, to analyze the period's central features: the rise of mass culture and of public relations, changes in women's position, consumerism, car culture, nativism and race relations. Writers include Fitzgerald, Hemingway, Larsen, Toomer, Parker. First-year students and students who have taken ENGL 0650K may not register for this course. Enrollment limited.

**ENGL 1760S. Law and Literature: From Response to Responsibility.**

Explores modernism as it is shaped by the normative and ethical concerns of a rapidly changing world through literary works, legal writing, and legal opinions. Examines the conceptual, psychological and rhetorical connections between literature and law, and considers how both disciplines shape the imagination but also aim to elicit response and responsibility. Authors include Walter Benjamin, Joseph Conrad, Virginia Woolf, Rebecca West, Chinua Achebe; legal texts include Blackstone, Holmes, Bentham, Cover and a number of legal opinions. Enrollment limited to 20 juniors and seniors.

**ENGL 1760T. The Texts of Africa.**

This seminar considers the various ways in which "Africa" has been depicted in fictional and non-fictional writing from the nineteenth-century on. We begin with classic travel writing by European missionaries (Park, Livingstone, Moffat), and their African and black diasporic counterparts (Crowther, Freeman, Sims, Soga). We then turn to twentieth-century literature and non-fiction (Abrahams, Conrad, Dinesen, Greene, Ndebele, Wright), closely following the rhetorical devices used to evoke the continent as geographical or subjective reality. We will pay particular attention to questions of history, linguistic representation, and the vagaries of intercultural encounter.

**ENGL 1760U. American Modernism and its Aftermaths.**

An interdisciplinary study of the rise of modernist aesthetic theory in the United States, its dissemination across various aesthetic (poetry, fiction, various plastic arts) and intellectual (economics, sociology, political theory) fields, and its persistence in United States intellectual life in the various permutations of postmodernism that have succeeded it. Authors to be considered include: poets such as Eliot, Williams, Bishop, Brooks, and Ashbery; novelists such as Faulkner, Hurston, O'Connor, and Didion; aesthetic theorists such as Greenberg, Rosenberg, Fried, Baraka and Kraus; and social theorists such as von Neuman, Rawls, Cavell, Kuhn, Samuelsohn, Drucker, and Friedman. Enrollment limited to 20.

**ENGL 1760V. Lying, Cheating, and Stealing.**

Explores literature's treatment of transgressions large and small, with particular attention to the way in which modernist narratives expose, obstruct, condone, or condemn acts of wrongdoing. What is the relationship between a misdeed and its retelling? Does writing right the story of a wrong? Readings from Rousseau, Graham Greene, Oscar Wilde, Lauren Slater, Nietzsche, Freud, as well as film, television, and select readings from law. Enrollment limited to 20 seniors and juniors.

**ENGL 1760Y. Toni Morrison.**

This course will consider Toni Morrison's novels and essays through four prisms: her interest in the anxieties of Americanness; her attention to language, which includes a consideration of form and of literary theory; her study of love; and her figuring humanity through the experiences of people who are racially black and (often) gendered female. Not open to first-year students. Enrollment limited to 20.

**ENGL 1760Z. Law and Literature.**

What is the relationship between law and literature? How do these supposedly separate disciplines contribute to our sense of justice and our understanding of injustice? We examine these questions through novels, legal writings, legal opinions, and film, in order to discover how law and literature create interrelated narratives that shed light on issues like identity, sexuality, injury, policing, speech, and silence. We read literary and legal narratives to see to how they inform each other, but also illuminate each other's blind spots. Writers include Robert Louis Stevenson, Virginia Woolf, James Weldon Johnson, and Claudia Rankine. Enrollment limited to 18.

**ENGL 1761A. Nationalizing Narratives: Advanced Studies in the Twentieth-Century U.S. Novel.**

Focuses on the complex relationship between the genre of the novel and nationalist rhetorics in the modern U.S. Gives particular attention to how literary discourses of nationalism articulate with those of race, gender, and sexuality.

**ENGL 1761B. Narratives of Blackness in Latinx and Latin America.**

We analyze literary, visual, and performative narratives of blackness in the Spanish- and Portuguese-speaking Americas in relation to whiteness, indigeneity, class, and gender. Primary texts include Carlos Fuentes' *The Death of Artemio Cruz*, Loida Maritza Pérez's *Geographies of Home*, and Herman Melville's *Benito Cereno*. Films include *Xica* (dir. Carlos Diegues) and *Bad Hair* (dir. Mariana Rondón). Enrollment limited to 20. Instructor permission required.

**ENGL 1761C. Race, Writing, Manhood: Rhetorics of the "Authentic" in 20th-Cent African + Asian American Literature.**

Explores the interrelatedness of racial, sexual, and literary identity in works by U.S. black and Asian male writers. Particular interest given to how the issue of homosocial desire frames literary accounts of racial authenticity. Writers and theorists studied may include James Baldwin, Frank Chin, Ralph Ellison, Frantz Fanon, David Henry Hwang.

**ENGL 1761E. Blackness and Being.**

Through reading criticism, theory, literature, we will think about the representational, aesthetic, and, philosophical (ontological, epistemological, ethical) questions that shape blackness as a conceptual notion. Our study will think through feminist and queer studies, as well as through diaspora and American and ethnic studies, and will consider the historical trajectory of various critical turns in theorizing (literary) blackness. Enrollment limited to 20 juniors and seniors. Instructor permission required. Class list will be finalized after the first day of classes. Please email the professor to add your name to the potential roster.

**ENGL 1761F. Toni Morrison.**

This course is an advanced introduction to the oeuvre of Nobel Laureate Toni Morrison. Reading her novels and nonfiction, we investigate concerns that shaped our world in the last century and haunt the current one, foregrounding Morrison's writing as a key site of trouble and of transformation.

**ENGL 1761L. Reading the Black Masses in Literature and Critical Practice.**

African American literary and critical practice in the twentieth century was definitively shaped by claims about the linkages between literature and mass politics. We will unpack the continuities and divides that constituted such assertions. Historical nodal points in our investigations will include racial uplift, the Harlem Renaissance, the Black Power Movement, and the post-identity debates.

**ENGL 1761M. Asian American Travel Narratives.**

Examines mobility and movement as key motifs in Asian American fiction. The course will focus on Asian American literary texts that are structured around travel, both in relation to the United States and to Asia. Our approach will draw from Americanist and Asian Americanist cultural theories about narratives of mobility and from postcolonial theories about travel writing. Enrollment limited.

**ENGL 1761N. Natural and Supernatural: Issues in the Study of Science and Religion.**

Religion has been studied in a number of fields (anthropology, classics, history, philosophy, psychology, sociology) as a complex of human/cultural phenomena to be examined and explained naturalistically or, as it is said, "scientifically." The course focuses on a set of key classic and contemporary texts in this tradition and on the issues they raise for current understandings of science, religion and the relations--historical, intellectual, cultural and political--between them. Enrollment limited to 20 juniors, seniors, and graduate students.

**ENGL 1761O. "Everything that is must be destroyed": American Modernism.**

This class will attempt to discover whether there is such a thing as American modernism, examining the connections between works and movements as different as Gertrude Stein's highly experimental *Three Lives*, the Harlem Renaissance (Larsen, Hurston), American Gothic (Anderson, Faulkner), social realism (Wharton, Wright), the cosmopolitan fiction of Fitzgerald and Hemingway, and the proto-postmodern work of Barnes and West. Enrollment limited.

**ENGL 1761P. Yeats, Pound, Eliot.**

Readings in the poetry and selected prose of Yeats, Pound, and Eliot. Enrollment limited to 20.

**ENGL 1761Q. W. G. Sebald and Some Interlocutors.**

The works of W. G. Sebald have received a huge amount of critical attention since his death in 2001, particularly from critics interested in the question of the ethics of literature after Auschwitz. But what is Sebald's literary heritage, and who are his interlocutors? What internal and external connections do his works establish? Besides Sebald's works, readings will include Stendhal, Kafka, Walsler, Borges, Bergson, Resnais, Lanzmann. Banner registrations after classes begin require instructor approval. Enrollment limited to 20. Not open to first-year students.

**ENGL 1761R. The Non-Fiction of "Race" in 20th-Century US Culture.**

This course examines influential autobiographies and other non-fictional literary works about the meaning of race in America across the 20th century. Writers we examine may include W.E.B. DuBois, Sui Sin Far, Maxine Hong Kingston, N. Scott Momaday, Richard Rodriguez, Maxine Hong Kingston, Richard Rodriguez, and Malcom X. Enrollment limited to 20 juniors and seniors.

**ENGL 1761S. The Fifties in Color: Race, Empire, and the U.S. Cold War Culture.**

In this seminar, we examine a range of cultural texts of the 1950s that provide some productive points of entry into the study of U.S. culture in the early part of the Cold War. We give particular attention to issues of race and ethnicity as they were shaped both by domestic and foreign policy concerns. Enrollment limited to 20.

**ENGL 1761T. Conrad and Naipaul: The Supremacy of the Visible?.**

The reception of Conrad's works turns on a critical quandary: are his commitments primarily sensory, celebratory and imperialist, or conceptual, subdued and self-critical? This course will examine Conrad's works in detail, and the critical and literary responses to them: most notably, the work of his most direct successor, the British-Caribbean novelist V. S. Naipaul. Other readings include Said, Achebe, Jameson, Badiou, Rancière, Deleuze. Enrollment limited. Not open to first-year students. Banner registrations after classes begin require instructor approval.

**ENGL 1761V. The Korean War in Color.**

We examine US and South Korean representations of the Korean War. We look at how this event was depicted in US films of the 1950s with a focus on how it occasioned a transformation of American understandings of race, both domestically and transnationally. We then look at how this event has been memorialized by contemporary American authors as well as in South Korean literature and film. Authors we read include: Susan Choi, Ha Jin, Chang-rae Lee, Toni Morrison, Jayne Anne Phillips and Hwang Sok-Yong. Enrollment limited to 20. Not open to first-year students.

**ENGL 1761W. Modern South Asia: Literature and Theory.**

This seminar provides an overview of 20th and 21st century writing from and about South Asia. It will serve, in addition, as an introduction to postcolonial studies. Theoretical readings will focus on issues of diaspora; transnational cultural circulation; and subaltern historiography. Fiction will be primarily Anglophone (Anand, Du Bois, Forster, Naipaul, Rushdie, etc.), with some vernacular texts in translation (Chughtai, Limbale, Premchand, Tagore). Enrollment limited to 20.

**ENGL 1761Y. Issues in World Literature.**

What is world literature? How does it relate to fields like comparative literature and postcolonial studies? We will read fiction and drama usually featured in this canon, including works by Achebe, Coetzee, Homer, Kafka, Rushdie, Shikibu, and Walcott. We will also attend to the critical paradigms that constitute the field, from Goethe's *Weltliteratur* to more recent theorizations by Casanova, Damrosch, Deleuze, Moretti, Spivak, etc. Enrollment limited to 20. Not open to first-year students.

**ENGL 1762A. Perverse Cinema.**

A seminar on movies that pursue and spectacularize the perverse, as well as on how viewing movies is itself a perverse pleasure. We will study film genres that traffic in what's sensational, excessive, uncanny, and transgressive, such as the detective film, thriller, melodrama, sex film, horror, and sci-fi. Special emphasis on the movies of Hitchcock, Kubrick, Lynch, and Cronenberg. Enrollment limited to 20 concentrators in English, Comparative Literature, MCM, Gender and Sexuality Studies, and Theatre and Performance Studies. Not open to first year students.

**ENGL 1762B. The Ekphrastic Mode in Contemporary Literature.**

Ekphrasis – the extended description of a visual work of art in a work of literature – is as old as Homer and as modern as McEwan; however, in contemporary literary criticism the concept has been eclipsed by terms such as "self-reflexivity" and "metafiction." This course proposes a rediscovery of ekphrasis as a key feature of contemporary works of literature and film. Includes texts by Sebald, Alan Bennett, Godard, Starnone, Panahi, McEwan. Enrollment limited to 20. Not open to first year students.

**ENGL 1762C. Image, Music, Text.**

This course examines a number of novels and short stories alongside their various cinematic, theatrical, or musical adaptations in order to ask what a medium is and what distinctive formal features might define literature, cinema, theater, and music. Writers will include Melville, Conrad, Maupassant, Mann, and Cortazar; filmmakers will include Hitchcock, Antonioni, Godard, Visconti, and Coppola; critics will include Barthes, Deleuze, and Ranciere. Limited to 20 junior and senior concentrators in English, Comparative Literature, MCM, Hispanic Studies, Italian Studies, French Studies, German Studies, Literary Arts.

**ENGL 1762D. Kubrick.**

On Kubrick's feature films, documentaries, and photography, starting with his sci-fi masterpiece 2001, followed by his early noirs (*Killer's Kiss*; *The Killing*); sex films (*Lolita*; *A Clockwork Orange*; *Eyes Wide Shut*); and war films (*Paths of Glory*; *Dr. Strangelove*; *Full Metal Jacket*). Topics include: adaptation; genre; masculinity in extremis; technophilia and technophobia; the aesthetics of violence; and sex on film. Limited to 20 junior and senior concentrators in English and MCM. Instructor permission required.

**ENGL 1762H. "The Wire".**

Over sixty episodes, David Simon's acclaimed television series explores a range of social and political issues, but it does so with unusual literary ambition and success. In this course we'll ask how "The Wire" generates interest, engagement, and debate in part by appropriating and adapting generic strategies and aesthetic devices deployed by such "classic" authors as Shakespeare and Dickens. Enrollment limited to 20.

**ENGL 1780. Undergraduate Independent Study in Modern and Contemporary Literatures.**

Tutorial instruction oriented toward a literary research topic. Section numbers vary by instructor. Instructor's permission required.

**ENGL 1900A. "Literature" and the Ideology of the Aesthetic.**

Theoretical and historical analysis of the idea of "literature" as writing that has the status of art, in relation to the emergence and elaboration of discourses of the "aesthetic." Readings in 18th- and 19th-century German and British sources (Kant, Schiller, Hegel, Nietzsche; Coleridge, Shelley, Arnold, Wilde) and in 20th-century literary and aesthetic theory (Benjamin, Adorno, Barthes, Foucault, Derrida, Williams, Eagleton). Enrollment limited to 20. Priority given to English concentrators. All other students must obtain instructor's permission.

**ENGL 1900D. Literature and Politics.**

Literature as a changing historical formation that often represents and is always shaped by the practices of organizing, asserting, and controlling power in society. Sustained focus on writings by Raymond Williams, Leon Trotsky, Michel Foucault, Edward Said, Gayatri Spivak, and Terry Eagleton, and on literary texts read from the perspectives of these six theorists (possibly Shakespeare, Milton, Marvell, Swift, Dickens, Gaskell, the Brontës, Victor Serge, Anna Akhmatova). Enrollment limited to 20.

**ENGL 1900E. Aesthetics and Politics.**

Considers the shifting relationship between art and politics beginning with the formation of aesthetics in the Enlightenment and continuing through such 20th-century historical moments as Naziism, modernism, impressionism, socialist realism, postmodernism, and such thinkers as Kant, Hegel, Marx, Adorno, Lyotard, Cixous, Deleuze.

**ENGL 1900F. Interpretation.**

This course will introduce students to the central issues in the theory of interpretation and their implications for critical practice. Topics will include the causes and consequences of interpretive conflict, the availability of tests for validity, the roles of the author and the reader, and the historical, social, and political dimensions of understanding. Readings will include major theoretical statements as well as critical essays and background materials related to three controversial novels.

**ENGL 1900I. Critical Methodologies: Contemporary Literary Theory.**

A survey of theories of literature from the early 20th century to the present, with particular attention to relations between "literary theory" and the broader phenomena of cultural studies and Critical Theory writ large. We will examine the New Critics; structuralism, post-structuralism and new historicism; cultural theory, including psychoanalysis, marxism, and aesthetic theory. Topics will include literariness and textuality, the reader and subjectivity, narrative and mimesis, and the reemergence of form in contemporary literary studies. Enrollment limited to 20. Not open to first-year or graduate students.

**ENGL 1900J. Zoopoetics.**

This course will explore the intersections between the depictions of plants and animals in twentieth and twenty-first century poetry and the theoretical conversations about non-human worlds unfolding in emerging fields, such as animal studies and the environmental humanities. Readings will range from poetic texts by Francis Ponge and Marianne Moore to theoretical texts by figures such as Donna Haraway.

**ENGL 1900K. Reading Sex.**

How do we interpret "sex," as a concept, as a thing, as a phenomenon? What kinds of ethical, political, historical, and aesthetic contexts are informed by—and, in turn, form—our sense of "sex" itself? This course will focus on intensive close readings of various queer theoretical texts, novels, and films that variously try to think through the multiple ways we try to represent and render sex legible, while at the same time calling into question our sense of what, ultimately, sex can be as something that both binds and unbinds the human. Enrollment limited to 20.

**ENGL 1900L. The Problem of American Literature.**

Considers questions such as: what are the distinctive qualities (if any) of American literature, and how do the various writers from diverse cultural settings fit into a single literary tradition called "American" (or do they fit in)? In order to examine the assumptions and implications of studying literature as a national phenomenon, focuses reading on various critical and theoretical texts.

**ENGL 1900M. Twentieth-Century Reconceptions of Knowledge and Science.**

Significant critiques of classic and prevailing (rationalist, realist, positivist) ideas of scientific truth, method, objectivity, and progress and the development of alternative (constructivist, pragmatist, historicist, sociological) accounts; the dynamics of knowledge; the relation between scientific and other cultural practices. Readings include works by Fleck, Popper, Kuhn, Foucault, Rorty, and Latour. Prerequisite: UC 49 (An Introduction to Science Studies) or college-level work in critical theory, science, or philosophy.

**ENGL 1900O. Contemporary Feminist Literary Theory.**

An advanced survey of 20th-century feminist literary theory with an emphasis on U.S., British, and French traditions. Topics include canon formation, "resisting readers," and the category of "women's writing," as well as the relation of feminist criticism to problematics such as critical race theory, poststructuralism, psychoanalysis, and postcolonialism.

**ENGL 1900P. History of Criticism from Plato to Postmodernism.**

A survey of the major theorists of literature in the western tradition, from the Greeks to the contemporary period. Recurrent issues will include the definition of literary value, the distinctiveness of the aesthetic experience, and the moral and social uses of literature. Enrollment limited. Banner registrations after classes begin require instructor approval.

**ENGL 1900Q. Women In/And the Novel.**

An introduction to the novel through feminist theory, considering social and historical reasons why women read, wrote, and figured in novels, from the 18th century to the 20th. Novels by Defoe, Austen, George Eliot, Rhys, Woolf; readings in feminist theory and criticism. Priority will be given to concentrators in English and Gender Studies. Others will be admitted only with permission of the instructor.

**ENGL 1900R. Queer Relations: Aesthetics and Sexuality.**

A study of the relationship between aesthetic thought and sexuality in a variety of literary and cinematic works. We will supplement our readings with ventures into queer theory, emphasizing how art is related to identity, community, race, gender, and ethics. Authors include Wilde, Pater, James, Winterson, Cole, Guibert, Foucault, Bersani, Edelman. Films by Julien and Jarman.

**ENGL 1900T. The Postcolonial and the Postmodern.**

Explores the contexts and conceptual implications of theories of postmodernism and postcolonialism. Particular attention to intersections and disjunctions between both concepts as attempts to grapple with the challenges of modernity from the vantage point of the late-20th century. Course will end with two novels that address related issues with the tools of fictional narrative: Coetzee's *Foe* and Rushdie's *Midnight's Children*. Readings include: Butler, Hall, Jameson, Laclau, Lyotard, Spivak. Not open to first-year students. Enrollment limited to 20.

**ENGL 1900U. Word and Image.**

How do words and images represent? This course will examine major statements about the relation between verbal and visual representation from Lessing's classic study *Laocöon* to contemporary theories of the semiotic and social construction of images. Theoretical readings will be accompanied by analyses of examples from literature and the visual arts, ranging from painting to film and graphic novels. Not open to first-year students. Banner registration after classes begin requires instructor approval.

**ENGL 1900V. Camera Works: The Theory and Fiction of Photography.**

This class focuses both on literature influenced by and theoretical considerations of photography. Texts and films to include Barthes' *Camera Lucida*, essays by Benjamin, Kracauer, and Krauss, Cortazar's "Blow-Up," Antonioni's *Blow-Up*, Fitzgerald's *Tender is the Night*, Sebald's *The Emigrants*, West's *The Day of the Locust*, Frampton's *Nostalgia*, Egoyan's *Calendar*, Rancière's *The Future of the Image*, and poetry by Rich, Ashbery, and Larkin. Not open to first-year students and sophomores. Open to English concentrators only.

**ENGL 1900Y. Medieval Manuscript Studies: Paleography, Codicology, and Interpretation.**

How do you read a medieval manuscript? This course teaches hands-on methodologies for deciphering the material text, including palaeography (history of scripts) and codicology (archeology of the book); contemporary models of interpreting scribal texts, including editorial theory and analysis of readers' reception; and medieval concepts of textuality and interpretation, including medieval theories of authorship and the arts of memory. Prior course work in Middle English or Latin or other medieval language recommended. Not open to first-year students. Enrollment limited to 20. Instructor permission required.

**ENGL 1900Z. Neuroaesthetics and Reading.**

Analysis of the theories of art, reading, and aesthetic experience proposed by neuroscience and cognitive science in light of traditional aesthetics and contemporary literary theory. Enrollment limited to 20. Prerequisite: At least one course on neuroscience or cognitive science and one 1000-level literature course. Instructor permission required.

**ENGL 1901B. Politics and the Novel.**

This course will explore how various realist and modernist novels represent political life, both in its practical dimensions and as forms of consciousness (ideologies, world views, attitudes). We will also explore theoretical and critical writings on the topic of literature and politics. Authors will include Elizabeth Gaskell, E.M. Forster, Lionel Trilling, Ralph Ellison, Doris Lessing, and Viet Thanh Nguyen. Enrollment limited to 20.

**ENGL 1901E. Reading Literature in a Digital World.**

We will explore the implications of using digital technologies to study literature. How does our understanding of literature and literary study change—if it does—in light of recently developed digital methods for studying such works? How do such methods compare with traditional ways of studying literature? How might literary studies be reconceived in relation to new media studies? Enrollment limited to 20.

**ENGL 1901F. Art of Criticism.**

This course explores the art of literary criticism through analysis of individual critics as well as larger schools of criticism. Focusing on the twentieth century, we will read works by those affiliated with high theory as well as those who stood outside that influential development. The goal will be to understand literary criticism as a form of thinking, and an art, in its own right, one with philosophical, social, and literary dimensions. Authors include: Oscar Wilde, Kenneth Burke, Mary McCarthy, Lionel Trilling, Raymond Williams, Paul de Man, Eve Sedgwick, D. A. Miller, John Guillory. Enrollment limited to 20.

**ENGL 1901H. The Late 60s: Film Countercultures.**

On representative late-60s counterculture movies concerned with antiauthoritarianism; hippy Bohemianism; social and sexual experimentation; dropping out; and psychedelia. Bookended by rock music festival documentaries (*Monterey Pop*; *Gimme Shelter*; *Woodstock*), the seminar is mostly concerned with feature films (*The Graduate*; *Bonnie and Clyde*; *2001*; *Midnight Cowboy*; *Easy Rider*; *Medium Cool*). It will also consider some underground art cinema of Kenneth Anger and Andy Warhol. Enrollment limited to 20 juniors and seniors in English and MCM. Instructor permission required.

**ENGL 1901J. Fanon and Spillers.**

This course will consider the conceptual/theoretical contributions of Frantz Fanon and Hortense Spillers, as frames for reading some iconic texts in the black literary canon. Central to our study will be an exploration of blackness, subjection, and gendering—as well as thinking about how these idioms relate to the genre conventions of our course's literary works. Enrollment limited to 20 juniors and seniors. Instructor permission required.

**ENGL 1910A. Dreamworlds: Utopia from Plato to the Present.**

Can acts of writing change the world? This course looks at a number of famous utopias and dystopias from classical time to the modern period and analyzes how the genre's literary experiments transform reading into a political act. Works by Plato, More, Montaigne, Shakespeare, Swift, H.G. Wells, and Le Guin. Films will include *Blade Runner* and *Pleasantville*.

**ENGL 1910B. Great Books and Good Movies.**

Since the first silent pictures, the film industry has turned to "great books." This course uses films based on "great books" to examine differences between the genres. Frequent screenings; reading and screen journals; critical essays and screenplays. Films/texts include *Sense and Sensibility*, *Great Expectations*, *Beloved*, and *The English Patient*.

**ENGL 1910E. Lyric Language: Renaissance Forms and Modern Poetry.**

Tracing poetic forms from renaissance to modern-- stubborn models like the sonnet (Shakespeare/Berryman), the ode (Jonson/ Creely), and the sestina (Sidney/Bishop); soft forms like blank/free verse (Milton/ Wordsworth/Eliot); generic containers like elegy, epigram, and satire (Herrick/Donne/Keats/Auden); low and nonsense verse (Skelton/Caroll/ hip-hop); and the functions of repeatable forms like line and stanza (Spenser/Tennyson/Dr. Suess/Heijinian).

**ENGL 1950A. Form and Feeling in Renaissance Poetry.**

*Pending Approval.* Renaissance poets laid claim to the ethical power of poetry to move people through imagination. How does formal imitation and innovation create fields of feeling in the poetry of Spenser, Sidney, Shakespeare, Donne, Jonson, and Milton? Enrollment limited to 20 seniors.

**ENGL 1950B. Literature and the Ideology of the Aesthetic.**

*Pending Approval.* Theoretical and historical exploration of the idea of literature understood as writing that has the status of art--and of the relation of this idea to the emergence and elaboration of discourses of the aesthetic. First six weeks: decisive eighteenth- and nineteenth-century developments in the meaning of literature as it relates to the aesthetic. Second six weeks: recent positions (especially poststructuralist and Marxist) that figure prominently in current debates. Enrollment limited to 20 seniors.

**ENGL 1950G. Reading Narrative Theory.**

Narrative is a powerful category of analysis spanning genres, historical periods, media forms, and the distinction between the "fictional" and the "real." This course examines major narrative theorists of the twentieth and twenty-first centuries. We will focus on literary examples, such as theories of the folktale and novel, and scholarship that interrogates the work of narrative in historiography, in cinema and television, and in extra-literary contexts (in the struggle of political campaigners to "control the narrative" or debates on narrative in gaming, medical research, law, and theory itself). Limited to 20 senior English concentrators. Others admitted by instructor permission only.

**ENGL 1950H. The Recent Novel and its Cultural Rivals.**

A careful consideration of several major late twentieth- and early twenty-first century Anglophone novels in terms of their relationship to rival aesthetic forms and media--film, television, radio, video games, and the like. Writers to be considered included: Morrison, Lee, Rushdie, Smith, Didion, Díaz, Pynchon, and Egan. Enrollment limited to 20 senior English concentrators. Others admitted by instructor permission only.

**ENGL 1990. Senior Honors Thesis in Nonfiction Writing.**

Independent writing project under the direction of a faculty member. Permission should be obtained from the Honors Director for Nonfiction Writing. Enrollment limited to English concentrators whose application to the Honors in Nonfiction Writing program have been accepted.

**ENGL 1991. Senior Honors Seminar in English.**

Weekly seminar led by the Advisor of Honors in English. Introduces students to sustained literary-critical research and writing skills necessary to successful completion of the senior thesis. Particular attention to efficient ways of developing literary-critical projects, as well as evaluating, incorporating, and documenting secondary sources. Enrollment limited to English concentrators whose applications to the Honors in English program have been accepted. Permission should be obtained from the Honors Advisor in English. S/NC

**ENGL 1992. Senior Honors Thesis in English.**

Independent research and writing under the direction of a faculty member. Permission should be obtained from the Honors Advisor in English. Open to senior English concentrators pursuing Honors in English. Instructor permission required.

**ENGL 1993. Senior Honors Seminar in Nonfiction Writing.**

This course is designed for students accepted into the Nonfiction Honors Program. It will be run in workshop format, and will focus on research skills and generative and developmental writing strategies for students embarking on their thesis projects. Weekly assignments will be directed toward helping students work through various stages in their writing processes. Students will be expected to respond thoughtfully and constructively in peer reviewing one another's work. Open to seniors who have been admitted to the Honors Program in Nonfiction Writing. Instructor permission required. S/NC

**ENGL 1994. Senior Honors Thesis in Nonfiction Writing.**

Independent research and writing under the direction of the student's Nonfiction Writing honors supervisor. Permission should be obtained from the Honors Advisor for Nonfiction Writing. Open to senior English concentrators pursuing Honors in Nonfiction Writing. Instructor permission required.

**ENGL 2210. Proseminar.**

This seminar, required for *first-year graduate students in English*, considers the state and stakes of literary studies today. The course aims to familiarize students with contemporary critical debates and stances in the wider discipline, and to engage with current methodologies, theories, and analytical tensions. We also address issues of professionalization as they relate to the first years of graduate work. Enrollment limited to 10. S/NC.

**ENGL 2360A. Renaissance Drama.**

This course explores Early Modern drama: its styles of representation, material conditions, and political engagements, in Marlowe, Jonson, Middleton, Webster, Ford, Beaumont and Fletcher, and others. Drawing on current scholarship, it posits the stage as the site of contests over national identity, royal power, gender ideology, social mobility, nascent capitalism, religious and ethnic differences. Enrollment limited to 15 graduate students. Undergraduate English concentrators may request permission of the instructor.

**ENGL 2360B. Before Holinshed: The English Brut Chronicle Tradition.**

Holinshed's 16th-century history drew from 400 years of manuscript chronicles, most in verse, which founded the "modern" history of England on a Trojan/Celtic ancient Britain. We will read the medieval versions of these historical narratives from Geoffrey of Monmouth, Wace, and Layamon to the popular 15th-century Middle English prose Brut. Critical engagements with manuscript/print cultures and the "Brut" narrative as a vocabulary for nationalism. Enrollment limited to 15.

**ENGL 2360C. Beowulf.**

This course will consist of a careful reading and analysis of *Beowulf* in its original language. In addition to developing language competence, we will also discuss the poem through comparison to other Old English poems and Scandinavian analogues. Themes will include the manuscript context, heroism, gender, sacrifice, lamentation and elegy, the monstrous, material culture, and contemporary theoretical approaches to the poem. Prerequisite: 2000-level Introduction to Old English or its equivalent. Enrollment limited to 15.

**ENGL 2360D. Early Modern Drama.**

An intensive introduction, for specialists and others, to the great classics and some less-known gems of a stellar period in English drama. Plays by Marlowe, Middleton, Webster, Jonson, and Ford, among others. Topics: the popular theatre and its audience; urban culture; English nationhood; boy actors and the representation of gender and sexuality; play texts in print culture. Enrollment limited to 15.

**ENGL 2360F. Introduction to Medieval Studies.**

Equips students with critical, linguistic, and historical knowledge to interpret Middle English texts (1066-1500). Primary texts by Chaucer and others, to be read in contexts of current critical debates (on topics including textuality, sexuality, and political formations) and medieval conceptual systems (including dream theory, alchemy, arts of memory). Priority to graduate students; no prior Middle English required. Enrollment limited to 15.

**ENGL 2360G. Medieval Manuscript Studies: Paleography and Interpretation.**

How to read and understand a medieval manuscript text. Methodologies include paleography, codicology, editorial theory. Hands-on analysis and interpretation of specific Middle English texts in their manuscript medium (in microfilm, facsimile, digital representation, and when accessible, actual manuscripts). For students already acquainted with Old English and/or Middle English; Latin helpful. Textual projects in other medieval languages possible with instructor's consent. Enrollment limited to 15.

**ENGL 2360H. Race and Place in Renaissance Literature.**

Reads early modern English drama, poetry, and prose depicting the migration of groups to foreign places (England, the Indies, the Americas) to consider how such writing defines the connection between space and identity. We will consider how this literature values environment as against blood, soil against seed, as determinants of identity capable of marking people as "strange," "alien," or "natural." Authors will include Marlowe, Shakespeare, Fletcher, Massinger, Drayton, Jonson, and Bacon. Enrollment limited to 15 graduate students. All others will be admitted only with permission of the instructor.

**ENGL 2360I. Renaissance Embodiments.**

Considers Renaissance representations of self in pre-modern terms—that is, inseparable from the physical conditions of climate and region. How did early modern culture draw the line between culture and nature? Where do these theories connect with or depart from modern paradigms of self in such authors as Elyot, Shakespeare, Calvin, Luther, Burton, Donne, Montaigne, Jonson, and Browne? Enrollment limited to 15.

**ENGL 2360K. The Renaissance and Modernity.**

Modernism restages 17th-century cultural and political revolution and restoration. An examination of the problem of style and modernity, looking at practices in poetic and prose style and at the emergence of the term "modernity" at the moment of high modernism and after. Enrollment limited to 15.

**ENGL 2360N. The Pearl Manuscript in Context.**

Close translation of the Middle English alliterative poems in British Library Manuscript Cotton Nero A.x., *Pearl*, *Cleanness*, *Patience*, and *Sir Gawain and the Green Knight*, with attention to their medieval theological, generic, and codicological contexts. Enrollment limited to 15.

**ENGL 2360O. Irony and Satire.**

Works of irony and satire (from the Civil Wars to the death of Swift) allow an investigation of current issues in the study of Civil War, Restoration, and Early 18th-C. texts, including revisionist history, the public sphere, Anglo-Irish relations, print culture, mercantilism, and gender construction. Enrollment limited to 15.

**ENGL 2360P. Thinking with Romance in the Renaissance.**

Modernity defines romance as escapist, a mode that flies from the "real." Yet Renaissance writers placed it at the center of debates about politics, ethics, and knowledge. Tracking its generic fingerprint in Spenser's romance-epic, we will consider its adaptation for the stage as tragicomedy and its relation to epistemological shifts dividing science from fiction, knowledge from pleasure. Authors include Raleigh, Spenser, Shakespeare, Fletcher, Massinger, Bacon, Cavendish. Open to graduate students only.

**ENGL 2360Q. Manuscript, Image, and the Middle English Text.**

This seminar will engage with the interpretive issues raised by considering manuscript images in relation to manuscript text. Selected Middle English texts will include *Pearl*, works by Chaucer, and the popular Middle English prose *Brut*, in the context of twelve historiated manuscripts of the fourteenth and fifteenth centuries. Enrollment limited to 15 graduate students.

**ENGL 2360R. Civil Wars, Restoration, and Early Georgian Literature.**

The seminar will consider major works from the English Civil Wars to the first years of the eighteenth-century, with attention to cultural and theoretical contexts for understanding important developments such as print culture, war, nation-formation, the marketplace, and public/private spheres. Writers will include Milton, Rochester, Behn, Restoration playwrights, Dryden, Swift, and others. Additional readings will include selections from Adorno, Pocock, Anderson, Zizek, Brown, Johns, and others. Enrollment limited to 15 graduate students.

**ENGL 2360S. Alternative Miltons.**

This seminar undertakes a close reading of Milton's monumentally significant epic "Paradise Lost." We will also consider the current state of Milton criticism. What's new in Milton criticism? What approaches have been holding fort? Has Milton criticism been slower to take to critical and theoretical innovation than Shakespeare criticism? If so, why, and what might we do about it? On that account, the seminar will engage a range of newer approaches—disability studies, queer theory, trauma theory, eco-criticism, animal studies, technoculture studies, and popular culture studies—to consider what they have to offer by way of new perspectives on Milton. Enrollment limited to 15 graduate students.

**ENGL 2360Y. Lyric and Ecstasy.**

This seminar principally focuses on ecstatic states in the lyric verse of three extraordinary seventeenth-century English poets—John Donne, Richard Crashaw, and John Milton—who are rarely read together. We will consider lyric poetry—both erotic and religious—not only as an apposite medium for rendering ecstatic experience, but also how lyric poetry itself might function as a stimulus for ecstasy. We might also venture into some consideration of music along similar lines. Limited to 15 graduate students.

**ENGL 2360Z. Shakespeare: a Politics of Love.**

This seminar will explore certain of Shakespeare's plays—mainstays such as *Romeo and Juliet* and *Othello* but also more marginal texts, such as *All's Well* and *As You Like It*—in order to discern a politics of love. Enrollment limited to 15.

**ENGL 2380. Graduate Independent Study in Medieval and Early Modern Literatures.**

Section numbers vary by instructor. May be repeated for credit. Instructor's permission required.

**ENGL 2450. Exchange Scholar Program.****ENGL 2560A. American Exotics.**

From the beginning of colonization all the way up to the American Revolution, America is consistently figured as a remote and alien place. We will explore the figurative transformation of "America" by examining the use of images of the "remote" and "exotic" in British American colonial writing, including poems, plays, maps, travel narratives and natural histories. Enrollment limited to 15.

**ENGL 2560C. Early American Studies.**

A critical introduction for graduate students to the scholarly field of early American studies, from the colonial era to the late 19th century. Enrollment limited to 15.

**ENGL 2560E. Liberalism.**

An interdisciplinary approach to American culture and literary history through the lens of liberal ideologies. Readings include Franklin, Thoreau, sentimental novel, and Ellison's *Invisible Man*. Enrollment limited to 15 graduate students. Exceptions with permission by instructor.

**ENGL 2560F. Realism.**

Begins with European theories of realism, including Lukacs, Watt, Jameson, and others, who define realism by linking it to some aspect of modernization. Moves to theories that expose the limits of classical realism in the name of someone as some aspect of history it systematically subordinates or excludes, e.g., women, colonial subjects, minority cultures. Enrollment limited to 15.

**ENGL 2560G. Romantic Orientalism.**

Representations of the "Orient" in British and transatlantic literary culture during the "Romantic" period (c. 1770-c. 1830). Connections between cultural representation and both assertions of and challenges to British colonial and imperial power. Theoretical, historical and political analysis by Said, Barrell, and others; poetry by Coleridge, Southey, Byron, P.B. Shelley; prose by Sydney Owenson, Charlotte Dacre, Thomas DeQuincey. Enrollment limited to 15.

**ENGL 2560H. Romanticism and the Ideology of the Aesthetic.**

Historical development of discourses of the "aesthetic" as they relate to the problem of "romanticism" as the name of a distinctive era in British and European literature and culture. Ideas about the autonomy of art in the period of the French and the Industrial Revolutions. Readings in Baumgarten, Kant, and Hegel; in Coleridge, W. Wordsworth, P. B. Shelley, and Keats. Enrollment limited to 15.

**ENGL 2560K. The Transatlantic Enlightenment.**

A graduate seminar in literatures and cultures of the long 18th century in transatlantic context. Emphasis on print culture, the Black Atlantic, colonialism and slavery, as well as the American Revolution. Enrollment limited to 15.

**ENGL 2560L. The Victorian Novel.**

An intensive seminar on the Victorian novel. The aim will be historically contextualized, theoretically informed interpretations of some leading examples of this complex literary form. Will focus on the role of the (British) novel, as distinct from the (American) short story, in rise of mass culture, and on recent formalist, stylistic, and historical approaches to the Victorian novel as a literary form. Enrollment limited to 15.

**ENGL 2560N. American Literature and the Corporation.**

An examination of 19th-century American literature in the context of the rapid growth of corporate forms in American economic, political, and social life from the mid-1830s through the turn of the century. How does literature participate in the debate this process of incorporation occasioned, and in what ways was it shaped by the process of incorporation occasioned, and in what ways was it shaped by the process? Readings include Hawthorne, Melville, Harper, Grant, Alcott, Crane, and Chestnutt. Enrollment limited to 15.

**ENGL 2560Q. Victorian Fictions of Consciousness.**

Victorian novels, Brontë through James, with an emphasis on the ways in which novels engage 19th-century theories of mind and psychology, looking at such central concepts as memory, will, sensation, and perception. Examines the importance of form and the subgenres of Victorian fiction (*Bildungsroman*, sensation novel, multiplot novel) in the construction of concepts of selfhood and consciousness. Attention also to the place of consciousness in Victorian and 20th-century theories of the novel. This course will also serve as an introduction to working on topics in science and literature. Enrollment limited to 15.

**ENGL 2560R. Romantic Dispossession: Subjectivity and Agency.**

This course examines the diverse arguments made by writers of the Romantic era concerning nonidentity, and focuses on the kinds of ethical, political, and aesthetic considerations that arise once identity is forfeited and dispossession is perceived as either a matter of self-discipline, the negative result of sympathy, a characteristic of literary culture, or a sign of melancholic loss. Enrollment limited to 15 graduate students. Undergraduate seniors will be admitted only with the permission of the instructor.

**ENGL 2560T. The Realist Imagination.**

A study of American literary realism. We will situate realism in the context of the realist turn in American artistic, political, legal, and economic enterprise from the Civil War to World War II, and measure the realist novel's relations to alternative aesthetic ideologies such as transcendentalism, regionalism, naturalism, and modernism. Authors to be considered include Emerson, DeForest, Grant, Twain, Cable, Chesnutt, Dreiser, Wharton, Cather, Anderson, Dos Passos, Faulkner, and Hurston. Enrollment limited to 15.

**ENGL 2560U. Romanticism and the Ruins of Empire.**

Representations of the ruins of ancient empires (Babylonian, Assyrian, Roman) in relation to British and French imperialism during the period we call "Romanticism." Enrollment limited to 15.

**ENGL 2560V. Transatlantic Studies.**

This course offers a theoretical and historical examination of "transatlantic" models of literary analysis as an alternative to traditionally national ones. It will look at a recent criticism theorizing the field, including both literary and historical scholarship. Primary readings will be from Rowson, Equiano, Franklin, Emerson, and Twain, among others. Enrollment limited to 15.

**ENGL 2560W. The Figure of the Artist in the Nineteenth Century.**

This course considers the changing representations of the artist in the 19th century, as prophet, intellectual, professional, critic, genius, madman, aesthete, and social celebrity. Readings will focus on 19th-century novels, with select essays, reviews, and other nonfiction prose. Authors include George Eliot, Charles Dickens, Anthony Trollope, Arnold Bennett, George Gissing, H. G. Wells, George Bernard Shaw, Oscar Wilde. Enrollment limited to 15.

**ENGL 2560X. The Rise of the Novel.**

The seminar would combine the study of eighteenth-century novels [some canonical, like *Robinson Crusoe*, *Clarissa*, *Tom Jones*, and *Tristram Shandy*; some less so, like amatory fiction and revolutionary fiction of the 1790's] with important theories of and debates about the novel — its origins, rise, and discourses. Enrollment limited to 15.

**ENGL 2560Y. Writing the Ruins of Empire: Romantic Cultural Property.**

British literary responses to the shifting significance and value status of ancient artifacts and works of art in the period of the French Revolution and Napoleonic Wars. Ruins as "cultural property," "cultural capital," and "aesthetic object"--then and now. Effects of colonial expansion and imperialist rivalry on collecting, connoisseurship, the advent of public museums, the marketing of antiquities, the marketing of literature. Primary readings in Gibbon, Volney, Byron, P.B. Shelley, Mary Shelley, Anna Barbauld, Felicia Hemans, Hazlitt, Keats.

**ENGL 2560Z. Global Early American Literature.**

What does American literature before 1860 look like viewed from a global perspective? Our goal will be to see what specifically literary problems and questions came into focus when we read American literature in terms of economic, social, philosophic, and ideological issues that extend across the globe. Authors may include John Smith, Anne Bradstreet, Charles Brockden Brown, and Herman Melville. Enrollment limited to 15 graduate students.

**ENGL 2561A. Manifest Destinies: Liberalism and Expansion in American Literature, 1820-1920.**

An investigation of the relations between American literature and the territorial expansion of the United States from the early 19th century through World War I. Topics include the role of liberalism in the rise and operation of American expansion, the relationship between colonialist and imperialist visions of America's manifest destiny, the ideological implications of literary genres of open space (the western, the sea narrative), race and the patterns of internal migration in the United States, and the connection between the Turner thesis and literary form (Howellsian realism, Whitman's poetics and Dickinson's anti-poetics, Jewett's regionalism). Authors include Cooper, Poe, Melville, Douglass, Craft, Whitman, Dickinson, James, Jewett, and Twain. Enrollment limited to 15 graduate students.

**ENGL 2561B. Things Not Entirely Possessed: Romanticism and History.**

This course explores how Romanticism *thinks through* the historical, and in particular, it engages Romantic mediations of historical knowledge through aesthetic form. What is the relationship of the aesthetic to the historical? How is subjectivity an effect of a poem's negotiation of the past? And what role does the "future" play in Romanticism? Authors will include Liu, Pfau, Levinson, McGann, Goodman, Chandler, Ferris, Pyle.

**ENGL 2561C. Intellectuals and the Public Sphere.**

Considers the relationship of the artist to the public sphere, focusing on the late nineteenth century. We will look back from debates today over the "public intellectual" to Victorian debates over the "intellectual." Attention to how narratives of intellectual decline in the late nineteenth and twentieth centuries portray the figure of the artist: as prophet, intellectual, professional, critic, genius, woman, madman, aesthete, scientist, and social celebrity. Readings will include literary writers and essayists (such as Dickens, Trollope, James, Pater, Shaw, Wilde, Wells), alongside theorists (Humboldt, Weber, Brecht, Benjamin, Habermas, Bourdieu, Latour, Kittler). Enrollment limited to 15 graduate students.

**ENGL 2561H. American Literature Without Borders.**

Recent theoretical and critical approaches to colonial and 19th-c. American literature: transatlantic, Caribbean, hemispheric; borderlands; imperial, colonial and postcolonial cultural formations; the Black Atlantic; diasporic and migration studies. Enrollment limited to 15 graduate students.

**ENGL 2561J. Satire and Irony.**

Satire is not so much a genre as it is a mode of discourse, like irony, that resists formal constraints and can function in almost any kind of text. Satire's dynamic contradictions (reform and frustration; laughter and anger; topicality and generality; purposefulness and pointlessness; public and private) enliven early modern texts, and complicate the relationship between language and meaning. Theories of satire provide a framework for the study of its history and practice. Emphasis falls on the great age of satire (especially the works of Jonathan Swift and his contemporaries) but some attention will be given to earlier and later examples.

**ENGL 2561L. Nature and Law in American Literature.**

This course will explore how American authors registered the transformation of natural history into the sciences of life. It will pay special attention to how new sciences of life influenced the legal and political practices that constitute our understanding of personhood. It will explore how sciences and emerging experimental medicine competed with discourses of the supernatural in deciding who has the right to live and die.

**ENGL 2561U. Consciousness and the Novel.**

How does the novel represent conscious life? Intensive study of literary examples from the 18th through the 20th centuries (Richardson, Sterne, Austen, Dickens, Joyce, Woolf, and Morrison) will be accompanied by selected theoretical readings on challenges to the grammatical model from historical and cognitive methods and from affect theory, race and gender studies, and theories of the posthuman. Enrollment limited to 15.

**ENGL 2561V. The Pursuit of Happiness: Transatlantic Literary Culture in the Long Eighteenth Century.**

English and American literature of the long eighteenth century with a focus on emerging concepts of happiness. Reading includes poetry, novels, satire, travel, moral philosophy, and other genres. The right to pursue happiness placed in the context of new forms of social mobility such as education, class, and affectionate marriage, but also in the context of war, empire, slavery, and other metropolitan and colonial cultural formations and exchanges. Enrollment limited to 15.

**ENGL 2561W. Image, World, Bodies: Wordsworth, Clare, Hopkins.**

A close reading of the poetry of Wordsworth, Clare, and Hopkins with particular reference to theories of visually, embodiment, and worlding/worldlessness. Enrollment limited to 15.

**ENGL 2580. Graduate Independent Study in the Enlightenment and the Rise of National Literatures.**

Section numbers vary by instructor. May be repeated for credit. Instructor's permission required.

**ENGL 2760A. American Modernist Poetry and Poetics.**

Study of the poetry and prose of Eliot, Pound, Stevens, Williams, H.D., Moore, and Hughes, with additional readings in criticism and theories of modernism. Enrollment limited to 15 graduate students.

**ENGL 2760B. City, Culture, and Literature in the Early Twentieth Century.**

Examines the way the city structures early 20th-century culture and history. Through novels, poetry, and cultural criticism, considers a range of topics that include the relation between the city, consciousness, and ideology; the effects of changing urban immigration; and the effects of mobility. Authors include Simmel, Benjamin, Harvey, Williams, Rotella, James, Woolf, Wright, and Eliot. Enrollment limited to 15 graduate students.

**ENGL 2760D. Contemporary African American Literature and the End(s) of Identity.**

Investigates the controversies surrounding the claim that the late 20th century marks the end of nationalist and essentialist paradigms in the scripting of black identity. Readings from a range of literary and theoretical works dealing with this intricate problem, including Stuart Hall, Hortense Spillers, Reginald McKnight, Trey Ellis, Octavia Butler, and Paul Beatty. Enrollment limited to 15.

**ENGL 2760E. Law and Literature: From Response to Responsibility.**

Explores modernism as it is shaped by the normative and ethical concerns of a rapidly changing world through literary works, legal writings, and legal opinions. Examines the conceptual, psychological and rhetorical connections between literature and law, and considers how both disciplines shape the imagination but also aim to elicit response and responsibility. Authors include Walter Benjamin, Joseph Conrad, Virginia Woolf, Rebecca West, Chinua Achebe, and others; legal texts include Holmes, Bentham, Cover and a number of legal opinions. Enrollment limited to 15.

**ENGL 2760F. Metaphoric Expression: Emerson, James, Stein.**

According to William Carlos Williams, metaphoric vision continually blinds Americans to the actual conditions of their world. In an attempt to answer this charge, we will read these three densely metaphorical writers against their varied historical backgrounds, hoping in the process to better understand the role played by figurative language in the shaping of American society, culture, and identity. Enrollment limited to 15.

**ENGL 2760G. Modernist Fiction and Theories of Modernism.**

Examines a range of modernist fiction—including work by Conrad, Dos Passos, H.D., Joyce, Larsen, Rhys, Toomer, Woolf—alongside selected theories of modernism. Considers approaches ranging from theories of reification and the aesthetic to more recent considerations of modernism's relation to gender, nation, race, empire, and professionalism. Enrollment limited to 15 graduate students.

**ENGL 2760H. Nationalizing Narratives: Studies in the Twentieth-Century U.S. Novel.**

In this seminar, we will examine a number of important 20th-century U.S. novels for the ways in which they conjure the nation both as "imagined community" and "fictive ethnicity." Particular focus will be given to how the category of national identity becomes intertwined issues of race, gender, sexuality, and region as well as with ideologies of the aesthetic. Enrollment limited to 15.

**ENGL 2760I. Possession and Dispossession in the Modern Novel.**

Examines modernist sentimentality as it is figured in notions of property. By exploring the legal and literary relationship between owning and being, we will consider how writers such as Forster, Woolf, Joyce, and Lawrence use property to conceive of human relationships—and by extension, social justice—in dramatically new ways. Enrollment limited to 15.

**ENGL 2760K. Postcolonial Theory and Africanist Discourse.**

Explores central questions in current Anglo-American postcolonial theory, and examines how related questions emerge with specific inflections in writings by Africanist philosophers, historians, and creative writers. Issues include: varied connotations of the very idea of "Africa"; ideology and subjectivity; constructivism and essentialism; nationalism and globalization; aesthetics and politics. Texts by Amílcar Cabral, Frantz Fanon, Stuart Hall, Paulin Hountondji, Fredric Jameson, Ernesto Laclau, Ngũgĩ wa Thiong'o, Wole Soyinka, Gayatri Spivak, Yvonne Vera. Enrollment limited to 15 graduate students. Undergraduate seniors may be admitted with instructor's permission.

**ENGL 2760L. Literature and Photography.**

Since the invention of photography in 1839, novelists have often claimed the camera as an important model for their work. We will endeavor to investigate this claim, asking in the process what the links between modernism and the visual arts have to tell us about the nature of fictional representation. Readings to include a number of theoretical discussions of photography. Enrollment limited to 15.

**ENGL 2760M. Postcoloniality and Globalism.**

Seminar addresses intersections and disjunctions between two currents in contemporary literary and cultural criticism: "postcolonial theory" and "world literature theory." We read "theory" alongside imaginative literature by writers and critics associated with concepts of postcoloniality, globalism, and diaspora. Themes include: race, identity and subject-position, and the problem of "literature" itself, understood as mode of thought and act of will. Readings will include: Césaire, Damrosch, Fanon, Hall, Jameson, Naipaul, Said, Soyinka, Spivak, Walcott, Wright, Wynter. Enrollment limited to 15.

**ENGL 2760N. The Politics of Modernism.**

An exploration of the controversies that have surrounded the political implications of modernist form. Topics will include the Brecht-Lukacs debate, surrealism and the politics of the avant-garde, the so-called "great divide" between innovative and popular art, and the relation of modernism to postmodernism. In addition to examining important theoretical statements, we will test their arguments against selected literary examples. Enrollment limited to 15.

**ENGL 2760O. Shame, Colonialism, Ethics.**

This course constructs a dialogue between debates on post-Holocaust aesthetics ("Is poetry possible after Auschwitz?") and the central questions of postcolonial theory ("Can the Subaltern Speak?"), and considers the ethical and aesthetic salience of shame. It is organized around three writers whose work suggests that the novel form itself might require decolonization: Naipaul, Coetzee and Caryl Phillips. Enrollment limited to 15.

**ENGL 2760P. The Fifties in Color: Race, Empire, and U.S. Cold War Culture.**

Examines U.S. cultural texts of the '50s in relation to both domestic race politics and foreign policy concerns. Explores issues of assimilation, conflict, containment, development, and integration in a transnational as well as a national framework. Writers we study may include Ralph Ellison, Jack Kerouac, Phillip Roth, John Okada and Jade Snow Wong. This course is limited to 15 graduate students.

**ENGL 2760Q. Ways of Seeing: Modern American Fiction and Photography.**

Reads a number of important modernist novels alongside the work of early 20th-century American photographers, focusing on what this fiction's engagement with photography has to teach us about the reproduction and circulation of American identity and history. Writers include James, Dos Passos, Hurston, Agee, Welty, and Ellison; photographers include Stieglitz, Strand, and Weston. Enrollment limited to 15.

**ENGL 2760R. Realism and the American Novel.**

An inquiry into the form, purpose, longevity, and afterlife of American realism. In what way did it differ from its British counterpart? In what ways was it different from naturalism, modernism, and romanticism? What was its aesthetic and political legacy? How has it been read by critics? Writers to include Melville, Dreiser, Norris, James, Chestnut, Wharton, Jewett, and Wright. Enrollment limited to 15.

**ENGL 2760T. Postmodernism and Literary Form.**

Intended for graduate students interested in the relationship between socio-historical conditions and literary form, and for those interested in thinking beyond a narrowly periodized notion of the postmodern. Beginning with Lukács's *The Theory of the Novel*, considers the problematic of literary representation as it emerges in the modern age. Readings include Beckett, Nabokov, Burroughs, Amis, Rushdie, McEwan, Lyotard, and Moretti. Enrollment limited to 15.

**ENGL 2760U. Reading the Black Masses in Literature and Critical Practice.**

For more than a century, African American literature and criticism have been definitively shaped by claims about the linked fate of the black masses and the world of letters. These contested assertions provide occasions for rethinking the traditional ends of black literary production. Class conflict, the waning of black nationalism, and diasporic identity politics, are among the topics examined under this rubric. Likely literary writers include Washington, Larsen, Ellison, Brooks, and Wideman. Enrollment limited to 15 graduate students.

**ENGL 2760V. Neo-Victorianism: Rewriting the Long Nineteenth Century.**

This seminar examines recent novelists rewriting canonical 19th-century texts by Dickens and others, playing with matters of postcoloniality and gender. *Jack Maggs*, for example, answers the questions, "Can the subaltern speak?" and "Does the empire write back?" while *Fingersmith* offers a lesbian version of the Victorian sensation novel. *Patchwork Girl* rewrites *Frankenstein*, stitching together fiction, gender, and identity. Enrollment limited to 15.

**ENGL 2760W. American Literature and the Visual Arts.**

With the publication of several recent studies of cinema and modernism, interest in the relation between literature and the visual arts has never been higher. We will chart the forms this relation takes in the modern era by reading both theoretical attempts to diagnose it (Benjamin, Barthes, Derrida, Rancière) and literary attempts to enact it (James, Stein, Ellison, Williams, Agee). Enrollment limited to 15 graduate students.

**ENGL 2760X. After Postmodernism: New Fictional Modes.**

What happens when the "postmodern," the period that did away with periodization, is over? This class will discuss issues such as contemporaneity, materiality, subtraction, subjectivity, the event, and the frame in approaching British and American literature at the turn of the 21st century. Readings include Ishiguro, Cooper, Toussaint, Seth, Coetzee, Chatwin, Danielewski, Deleuze, Bergson, Badiou, Lukács, Voloshinov, Adorno, Pasolini, Nancy. Enrollment limited to 15 graduate students. Banner registrations after classes begin require instructor approval.

**ENGL 2760Y. American Orientalism and Asian American Literary Criticism.**

We examine critical studies of American Orientalism, influential works of Asian Americanist cultural criticism, American Orientalist texts by white and black authors, and literary texts by Asian American authors. Critics, cultural historians and writers we read may include: Christina Klein, Vijay Prashad, Elaine Kim, Frank Chin, Lisa Lowe, W.E.B. DuBois, Susan Choi, Nam Le, Karen Tei Yamashita. Enrollment limited to 15 graduate students.

**ENGL 2760Z. African American Literature After 1965: Nationalism and Dissent.**

Since the late 1960s, major theoretical and literary currents in African American letters have been profoundly influenced by black nationalism. This seminar examines the persistence of nationalist thought in ongoing debates about racial authenticity, gender inequality, black aesthetics, and diasporic politics. In so doing we will attend to both the complexity of nationalist ideology and the dissent generated by it. Authors include Baraka, Cruse, Giovanni, Morrison, Senna, Whitehead, and Gilroy. Open to graduate students only.

**ENGL 2761B. Temporalities.**

Centered on modernism and the early 20th century, this course will investigate the varied models of time pulsing through literary and theoretical texts, and consider a range of issues, including memory and forgetting, historical progress and decay, utopian futurity, and queer temporalities. Readings include work by Freud, Bergson, Nietzsche, Benjamin, Joyce, Woolf, Barnes, Stein, Faulkner. Enrollment limited to 15.

**ENGL 2761C. Black Internationalism and Its Discontents.**

This seminar reassesses the broad influence of internationalism in African American letters from the age of abolition to the present. We will be concerned with literary writings that foreground the global struggle of black subjects to assert political agency in relation to Western imperialism and transatlantic slavery. Equally crucial will be a reconsideration of an established body of theoretical writings that conceive of diasporic modes of solidarity and cultural expression as alternatives to the black nationalist intellectual tradition. Authors include Martin Delany, W.E.B Du Bois, Richard Wright, Angela Davis, Brent Edwards, and Paul Gilroy.

**ENGL 2761F. The Racial Lives of Affect.**

This course explores both dominant and emergent theoretical paradigms that anatomize the affective dimensions of racialized subjectivity in the US with a particular emphasis on recent scholarship that is linked with the field of affect theory. Rather than attempting an exhaustive or definitive mapping of that field, this seminar focuses on those thinkers whose works enhance our understandings of race. Enrollment limited to 15.

**ENGL 2761J. Identity and Agency.**

Any consideration of identity is bound to run up against the concept of agency. Considering identity and agency as mutually constitutive, this course looks at identity's formation and reformation as a narrative experience and effect, examining its emergence on historical and affective terrains. Approaching identity from a range of vantages (psychoanalysis, gender, history, law), we trace the ways that identities might be consolidated into (or, alternatively, unravel) cultural, political, national, or social arrangements. Works by Woolf, Selvon, James Weldon Johnson, Christopher Isherwood, Proust, Fanon, Arendt, Freud, Winnicott, Butler. Enrollment limited to 15.

**ENGL 2761R. Memory/Matter/Time: Literature and the Changing Earth.**

In this collaborative seminar we will consider the flickering edge between metaphor and materiality in the shadow of the Anthropocene. Weekly discussions will be built around a series of "threshold sites"—including Sea, Sun, Silk, Plastic, Forest, Photograph, Shell, Horse, Whale—in which "matter" and "figure" may be seen to be simultaneously in relation and at odds. We will endeavor to think metaphoricity as the imbrication of materiality and semiosis, and in its relationship to ecological time, through readings from Lucretius, Melville, Coleridge, Ponge, Moore, Bervin, Barad, Haraway, Derrida, Ricoeur, among others. Enrollment limited to 15.

**ENGL 2761S. Naturalism and the Anthropocene.**

The world of naturalist fiction is strange and terrifying: monstrous new forms of life; speaking animals; suicide; madness; financial ruin; ecological disaster. We will study this world in light of our catastrophic present, reading recent work in new materialism, neuroscience, animal studies, science studies, and environmentalism. Authors include Zola, Stein, Wharton, Chesnutt, Conrad, Hardy, Nietzsche, Bergson, Freud, Du Bois, James. Enrollment limited to 15 graduate students.

**ENGL 2780. Graduate Independent Study in Modern and Contemporary Literatures.**

Section numbers vary by instructor. May be repeated for credit. Instructor's permission required.

**ENGL 2900A. Contemporary Feminist Theory: Feminist Address.**

Recent feminist theory addresses identity politics and the critique of the subject; problematics of race, class and gender; the challenge of queer theory; the demand for materialist analysis. We consider these topics in light of the problematics of address. What are the forms of feminist address? How are they received or refused? Who are the subjects of contemporary feminisms? Enrollment limited to 15.

**ENGL 2900C. Theories of Literature: From Classical Antiquity to Postmodernity.**

Investigates theories of literature in two self-conscious historical epochs: classical antiquity, represented by figures such as Plato, Aristotle, and Horace, and by practices such as marginal notation of texts, literary commentaries, and performance techniques; and the 20th century, represented by figures such as Adorno, Barthes, and Bakhtin, with special attention to the intersections between philosophy and literature and poststructuralist conceptions of textuality. Enrollment limited to 15.

**ENGL 2900D. Walter Benjamin and Modern Theory.**

Intensive study of Walter Benjamin's essays on modern culture and literature (in particular Goethe, Baudelaire, Proust, and Kafka). Explores the consequences of his thinking for problems in contemporary literary and cultural theory. German and/or French helpful but not required. Enrollment limited to 15.

**ENGL 2900E. Deleuze: Literature and Aesthetics.**

How does Deleuze help us read modern culture? This course will focus on Deleuze's writings on literature, painting and cinema as a point of entry to the work of one of the most original and intriguing thinkers of the late 20th century. We will look at the reasons for Deleuze's fascination with Anglo-American literature, and discuss the extent to which Deleuze's model of literary analysis breaks with -- while remaining fundamentally indebted to -- Marxism and psychoanalysis. Other readers include Melville, Kafka, T. E. Lawrence, as well as films by Antonioni, Godard and Sembene. Enrollment limited to 15.

**ENGL 2900F. Form and Content.**

Readings in aesthetics, literary theory, structuralism-poststructuralism, and cultural studies that address the form/content distinction in one of its many avatars. Topics will include the sign, thematics, formlessness, formalism and historicism, tenors and vehicles, structure, and defamiliarization, among others. Previous work in literary or cultural theory strongly recommended. Enrollment limited to 15.

**ENGL 2900G. History and Form.**

An exploration of the relation between historical and formalist approaches to literary interpretation, from the New Critics to the so-called "New Formalism." What is the role of form in historically and politically oriented criticism (examples will be taken from Marxism, the New Historicism, feminism, cultural studies, and post-colonial theory)? What happens to history when form takes center stage (for example, in structuralism and deconstruction)? Is it possible (and desirable) to avoid a pendulum swing between the poles of historicism and formalism and to mediate the conflicting claims of history and form? Or is a focus on one at the expense of the other the necessary cost of an incisive interpretive strategy? In addition to theoretical readings that exemplify the conflict between history and form, attention will be paid to the history of reception of one or more literary works in order to articulate the practical implications of their opposition and interdependence. Enrollment limited to 15.

**ENGL 2900H. Queer Passivity.**

A study of the concept of passivity in queer theory, literature, and film. Subjects will include AIDS and temporality; the senses and dissolution; asceticism and chastity; pornography and sovereignty. We will explore post-structuralist theories and continental philosophies (Agamben, Cavaretti, Deleuze, Derrida, Marion, Nancy) that resonate with the kind of queer receptivity that will be the object of study. Enrollment limited to 15.

**ENGL 2900K. Nietzsche, Foucault, Latour.**

The seminar will trace a line of radical thought about truth, language, knowledge and power—and their interrelations—in the writings of Friedrich Nietzsche, Michel Foucault and Bruno Latour. Particular attention will be given to the significance of their work for poststructuralist language theory, constructivist epistemology and science studies, and current issues involving the relations between science and religion. Enrollment limited to 15 graduate students.

**ENGL 2900M. The Reading Effect and the Persistence of Form.**

This course examines the "reading effect" as it emerges in work on the question of form and contemporaneous scholarship on the problematics of reading. We will trace the ways in which these related but distinct critical idioms negotiate concepts of mutual concern (interpretation, representation, the reading subject/reading brain). Topics include "new formalism," cognitive studies, symptomatic reading. Theorists from Althusser and deMan to Marcus, Wolfson and Zunshine. Enrollment limited to 15 graduate students; undergraduate seniors may enroll with instructor permission.

**ENGL 2900N. Ethical Turns in Psychoanalysis and Literature.**

This course examines ethics, broadly conceived, as the place where literature and psychoanalysis intersect or coexist in tense or collaborative relation. We will consider ethics at sites or moments of transition—as turns, upheavals, or ordinary acts that bring into view notions of responsibility, conviction, obligation, knowledge, ignorance, and complicity. Readings by Barthes, Benjamin, Fanon, Arendt, Freud, Lacan, Winnicott, Klein, Butler. Enrollment limited to 15 graduate students.

**ENGL 2900X. Postcolonial Theory.**

In this introduction to postcolonial theory we will consider key Western sources (Hegel, Marx, Lacan, Levi Strauss, Emmanuel Levinas); anticolonial manifestos (Gandhi, Fanon, Césaire, Memmi); political and ethical practices (civil disobedience, armed struggle, friendship). In addition to canonical critics (Said, Bhabha, Spivak), the course will review new interests in the field (transnationalism, non-western imperialisms, the environmental turn).

**ENGL 2901D. War and the Politics of Cultural Memory.**

The past several decades have seen the rise of a veritable memory industry devoted to the memorializing of wars. This seminar focuses on a selection of British, European, and American novels, memoirs, and films that self-consciously engage in remembering a range of conflicts, from the First World War to the "War on Terror," alongside a relevant body of theoretical writings. Our aim is to think in detail, and collectively, about the political stakes of such literary remembrances and to develop together a "contrapuntal" approach that engages with the collaborative tensions between Anglo-European, postcolonial, and US minority modes of memory.

**ENGL 2901K. Theory, Technics, Religion.**

Critical theory has a rich history of engagement with fundamental and overlapping questions of technics, media and religion. This seminar focuses mainly on important texts from the last century (Benjamin, Heidegger, Levinas, Derrida, Agamben), but also reads more broadly in the post-Enlightenment critical and speculative tradition (Kant, Hegel, Marx, Freud, Weber). Selections from the Bible and readings from a few literary texts from various eras will also be assigned. Enrollment limited to 15 graduate students.

**ENGL 2901M. Bakhtin and the Political Present: Literature, Anthropology, Dialogue.**

This collaborative humanities graduate seminar explores the revolutionary ideas of Mikhail Bakhtin, considering their influence in two disciplines, literary studies and linguistic anthropology. The primary historical context of the course is our own political present, characterized by linguistic homogeneity, the unification of power, and the rise of authoritarian governments. How effective are Bakhtin's theories of dialogue, polyphony and carnival as principles of resistance to the challenges of the current moment? Instructor permission required. Enrollment limited to 15.

**ENGL 2901N. Suspicion and Its Others.**

From the hermeneutics of suspicion to post-critique, a range of thinkers and theories have positioned suspicion as a central critical disposition of the modern age. In this collaborative seminar we will explore the concept and practice of suspicion both in relation to the classic objects over against which it emerged—morality, religion, and tradition—and through the lens of other modes of engagement more recently proposed, including charity, reconstruction, attunement, quiet, resonance, and reparative practices of reading. Readings will be drawn from philosophy, critical theory, race and ethnicity studies, gender and sexuality studies, and literary theory and criticism.

**ENGL 2901P. Black Feminism: Roots, Routes, Futures.**

This graduate seminar pursues an interdisciplinary investigation of black feminist theories, methods, praxes, and politics. Using a black feminist lens, it investigates legacies of racial slavery and colonialism; the pathways and promises of African diaspora; citizenship, labor, and the law; theories of the flesh and changing definitions of kin; human ontology and the mutability of gender; black expressive practices and emancipatory politics. Enrollment limited to 15.

**ENGL 2940. Scholarly Writing for Journal Publication.**

Writing and professionalization workshop intended for graduate students in literary studies. Topics covered include selection of journal; framing, structuring and composition of the article; the logistics of peer review; sharing and workshopping drafts; working with academic mentors and advisors. Every passing student will have a publishable article under consideration by the end of the semester. Enrollment limited to 12 English Ph.D. students. Instructor permission required. S/NC.

**ENGL 2950. Seminar in Pedagogy and Composition Theory.**

An experimental and exploratory investigation into writing as a preparation for teaching college-level writing. Reviews the history of writing about writing, from Plato to current discussions on composition theory. Against this background, examines various processes of reading and writing. Emphasizes the practice of writing, including syllabus design. Enrollment restricted to students in the English Ph.D. program.

**ENGL 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**ENGL 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## ENGL XLIST. Courses of Interest to Students Concentrating in English.

### Spring 2021

These courses, offered in other departments, are cross listed with the English Department and do not require advisor approval to count toward the concentration for English concentrators. Please refer to the primary department for registration details.

#### Cogut Institute for Humanities

HMAN 2401B Thinking Breath: An Inquiry Across Philosophy, Literature, and Performance

HMAN 2401C Inscribing the Event: Poetics and Politics of the Date

# Institute at Brown for Environment and Society

## Director

Amanda Lynch

## Deputy Director

Dov F. Sax

## Director of Graduate Studies

Scott A. Frickel

## Director of Undergraduate Studies

Dawn King

The Institute at Brown for Environment & Society supports research to understand the interactions between natural, human and social systems. Our teaching programs prepare future leaders to envision and build a just and sustainable world. Our engagement programs take research from the lab to the statehouse, the hospital and the public sphere.

Undergraduate and graduate students can study conservation science and policy, water and food security, environmental health, climate science and meteorology, biogeography and evolution, and more. Research is conducted in laboratories, on supercomputers and at field sites around the world.

For additional information, please visit the Institute's website: <http://www.brown.edu/academics/institute-environment-society/>

## Environmental Studies Concentration Requirements

Many of the most pressing challenges of the 21st Century are environmental ones. We must find ways to feed a growing human population while maintaining the natural life support system provided by the Earth's ecosystems; to make built environments more efficient as urban areas continue to grow dramatically in size; and to meet the challenges posed by rising sea-level and increasing global temperatures. These challenges are complex, multifaceted and can best be solved with expertise from multiple, relevant disciplines. To prepare students to meet these challenges, the Institute at Brown for Environment and Society (IBES) offers two undergraduate degrees: an A.B. in Environmental Studies and a Sc.B. in Environmental Science. The two degrees vary primarily in the number of course requirements; the Sc.B. is a more in-depth treatment of a single field. Both degrees provide interdisciplinary exposure to the natural and social sciences, as well as public policy. Both degrees also develop depth in a primary field by requiring students to select one of five tracks of study. Concentrators might also consider pursuing the Engaged Scholars Program, which allows them to connect theory and practice and gain hands-on experience working with community partners.

Through a rigorous set of core courses, track requirements, and a course or project-based capstone experience, our students are primed to make meaningful contributions to environmental scholarship and outreach at local, national and global scales.

If you have administrative questions regarding these concentrations or wish to be added to the email directory listing upcoming events, then

please contact Jeanne Loewenstein ([jeanne\\_loewenstein@brown.edu](mailto:jeanne_loewenstein@brown.edu)), the academic program manager.

## Standard program in Environmental Studies and Environmental Science:

The Institute at Brown for Environment and Society administers two concentrations, one offering an A.B. degree in Environmental Studies (**requires 14-15 courses**) and the other a Sc.B. degree in Environmental Science (**requires 19-20 courses**). Below are a set of course offerings arranged into four tracks:

1. Air, Climate & Energy
2. Conservation Science & Policy
3. Environment & Inequality
4. Land, Water & Food Security
5. Sustainability in Development

## Requirements for the A.B. Degree

### Core Requirements

ECON 0110	Principles of Economics <sup>1</sup>	1
or HIST 0150A	History of Capitalism	
ENVS 0490	Environmental Science in a Changing World <sup>2</sup>	1
ENVS 0110	Humans, Nature, and the Environment: Addressing Environmental Change in the 21st Century	1
BIOL 0210	Diversity of Life	1
or EEPS 0240	Earth: Evolution of a Habitable Planet	

### Methods - one course

ENVS 1920	Methods for Interdisciplinary Environmental Research	1
-----------	--	---

### Electives - three courses

	These electives provide increased environmental expertise and further enhance a student's ability to customize a course of study. Acceptable courses include prerequisites for track requirements, any ENVS course, and classes with significant environmental content.	3
--	---	---

### Capstone - one or two courses

	This requirement can be met with a two-semester thesis (ENVS 1970 & ENVS 1971), one-semester research project (ENVS 1970 or ENVS 1971), or an approved capstone course.	1-2
--	---	-----

### Track Specific Requirements

		5
--	--	---

#### Track 1 - Air, Climate, and Energy

Foundational courses (choose two):

CHEM 0330	Equilibrium, Rate, and Structure
EEPS 0220	Earth Processes
ENGN 0030	Introduction to Engineering
ENGN 0490	Fundamentals of Environmental Engineering
PHYS 0030	Basic Physics A
PHYS 0050	Foundations of Mechanics

Climate (choose one):

EEPS 0850	Weather and Climate
EEPS 1430	Principles of Planetary Climate
ENVS 1245	Air Pollution & Chemistry

Policy (choose one):

ENVS 0710	Powering the Past: Environmental Histories of Energy Use and Social Change
ENVS 1415	Power, Justice, and Climate Change
ENVS 1615	Making Connections: The Environmental Policy Process
ENVS 1925	Energy Policy and Politics
POLS 1822I	Geopolitics of Oil and Energy

## Energy Technology and Infrastructure (choose one):

ENGN 0490	Fundamentals of Environmental Engineering
ENGN 0720	Thermodynamics
ENGN 1930U	Renewable Energy Technologies
ENGN 1931P	Energy and the Environment
ENVS 1400	Sustainable Design in the Built Environment
ENVS 1580	Environmental Stewardship and Resilience in Urban Systems

**Track 2 - Conservation Science and Policy**

## Ecology:

BIOL 0420	Principles of Ecology
-----------	-----------------------

## Conservation:

BIOL 1470	Conservation Biology
-----------	----------------------

## Ecology &amp; Conservation Topics: Select One

BIOL 1450	Community Ecology
BIOL 1480	Terrestrial Biogeochemistry and the Functioning of Ecosystems
BIOL 1515	Conservation in the Genomics Age

## Policy: Select One

ENVS 1415	Power, Justice, and Climate Change
ENVS 1555	Urban Agriculture: The Importance of Localized Food Systems
ENVS 1574	Engaged Climate Policy in the U.S.: Rhode Island and Washington, DC
ENVS 1615	Making Connections: The Environmental Policy Process
ENVS 1755	Globalization and the Environment
ENVS 1916	Animals and Plants in Chinese History
ENVS 1925	Energy Policy and Politics

## Statistics: Select One

APMA 0650	Essential Statistics
APMA 1650	Statistical Inference I
BIOL 0495	Statistical Analysis of Biological Data
CLPS 0900	Statistical Methods
ECON 1620	Introduction to Econometrics

**Track 3 – Environment and Inequality**

## Track Intro Course:

ENVS 0705 - Equity and the Environment: Movements, Scholarship, Solutions
---

## Race, Class, and Gender Inequality: Select One

AFRI 0090	An Introduction to Africana Studies
AFRI 0210	Afro Latin Americans and Blackness in the Americas
AFRI 0830	How Structural Racism Works
ECON 1370	Race and Inequality in the United States
ETHN 1000	Introduction to American/Ethnic Studies

<hr/>	
Total Credits	14-15

<sup>1</sup> The ECON 0110 core requirement can be waived for students with an AP exam score of 4 or 5 in both Microeconomics and Macroeconomics.

<sup>2</sup> The core requirement of ENVS 0490 can be waived for students with an AP exam score of 5 in Environmental Science.

## Requirements for the Sc.B. Degree

**Requires ALL 14-15 course requirements as listed in the A.B. Program** 14-15

**Additional Track specific requirements for the Sc.B.** 5

### Track 1 - Air, Climate, and Energy

Math:

MATH 0090 Introductory Calculus, Part I <sup>1</sup>

Policy (choose one):

ECON 1340 Economics of Global Warming

ENVS 1350 Environmental Economics and Policy

ENVS 1415 Power, Justice, and Climate Change

ENVS 1574 Engaged Climate Policy in the U.S.: Rhode Island and Washington, DC

ENVS 1615 Making Connections: The Environmental Policy Process

ENVS 1755 Globalization and the Environment

ENVS 1925 Energy Policy and Politics

IAPA 1802C Infrastructure!

POLS 1822I Geopolitics of Oil and Energy

Tools (choose one):

APMA 0340 Methods of Applied Mathematics I, II

APMA 0650 Essential Statistics

APMA 1650 Statistical Inference I

ECON 1620 Introduction to Econometrics

ENVS 1105 Introduction to Environmental GIS

EEPS 1320 Introduction to Geographic Information Systems for Environmental Applications

EEPS 1330 Global Environmental Remote Sensing

Climate and Thermal Change (choose two):

EEPS 0230 Geochemistry: Earth and Planetary Materials and Processes

EEPS 1120 Paleoceanography

EEPS 1370 Environmental Geochemistry

EEPS 1510 Introduction to Atmospheric Dynamics

ENGN 0720 Thermodynamics

ENGN 1720 Design of Thermal Engines

ENGN 1930M Industrial Design

ENVS 1245 Air Pollution & Chemistry

### Track 2 - Conservation Science and Policy

Math: Select One

MATH 0090 Introductory Calculus, Part I <sup>1</sup>

Evolution: Select One

BIOL 0480 Evolutionary Biology

Organismal Diversity: Select One

BIOL 0410 Invertebrate Zoology

BIOL 0430	The Evolution of Plant Diversity (BIOL 0460 - Insect Biology)
BIOL 0440	Inquiry in Plant Biology: Analysis of Plant Growth, Reproduction and Adaptive Responses
BIOL 1880	Comparative Biology of the Vertebrates
Env. Econ: Select One	
ECON 1340	Economics of Global Warming
ENVS 1350	Environmental Economics and Policy
ECON 1355	Environmental Issues in Development Economics
Tools: Select One	
ENVS 1105	Introduction to Environmental GIS
EEPS 1320	Introduction to Geographic Information Systems for Environmental Applications
EEPS 1330	Global Environmental Remote Sensing
SOC 1340	Principles and Methods of Geographic Information Systems
SOC 2610	Spatial Thinking in Social Science

**Track 3 – Environment and Inequality**

Tools: Select One

ANTH 1940	Ethnographic Research Methods
ECON 1620	Introduction to Econometrics
EDUC 1100	Introduction to Qualitative Research Methods
ENVS 1105	Introduction to Environmental GIS
EEPS 1320	Introduction to Geographic Information Systems for Environmental Applications
EEPS 1330	Global Environmental Remote Sensing
SOC 1100	Introductory Statistics for Social Research
SOC 1117	Focus Groups for Market and Social Research
SOC 1340	Principles and Methods of Geographic Information Systems
SOC 2610	Spatial Thinking in Social Science

Race, Class and Gender Inequality: Select One

ECON 1370	Race and Inequality in the United States
ETHN 1200I	History and Resistance in Representations of Native Peoples
SOC 1270	Race, Class, and Ethnicity in the Modern World

SELECT A FOCUS AREA (pick three courses from only one focus area)

FOCUS ONE - Environmental Inequality in Globalization and Development: Select Three

ANTH 0110	Anthropology and Global Social Problems: Environment, Development, and Governance
ECON 1355	Environmental Issues in Development Economics
ECON 1510	Economic Development
ECON 1530	Health, Hunger and the Household in Developing Countries
ENVS 1415	Power, Justice, and Climate Change
ENVS 1916	Animals and Plants in Chinese History
HIST 0150D	Refugees: A Twentieth-Century History
IAPA 1805C	Caribbean and Pacific Small States: On the Margins of Development
PHP 1070	The Burden of Disease in Developing Countries
POLS 1440	Security, Governance and Development in Africa

POLS 1730	Politics of Globalization
SOC 0150	Economic Development and Social Change

FOCUS TWO - Environmental Health and Inequality: Select Three

AFRI 1060W	Policy, Culture and Discourse that Shape Health and Access to Healthcare
ANTH 1310	International Health: Anthropological Perspectives
BIOL 1820	Environmental Health and Disease
HIST 1960Q	Medicine and Public Health in Africa
PHP 0320	Introduction to Public Health
PHP 1070	The Burden of Disease in Developing Countries
PHP 1500	Global Health Nutrition
PHP 1530	Case Studies in Public Health: The Role of Governments, Communities and Professions
PHP 1700	Current Topics in Environmental Health
PHP 1710	Climate Change and Human Health
PHP 1920	Social Determinants of Health

FOCUS THREE - Environmental Inequalities in Food, Water, and Energy: Select Three

AMST 1906P	Food in American Society and Culture
ENVS 0710	Powering the Past: Environmental Histories of Energy Use and Social Change
ENVS 1415	Power, Justice, and Climate Change
ENVS 1555	Urban Agriculture: The Importance of Localized Food Systems
ENVS 1580	Environmental Stewardship and Resilience in Urban Systems
ENVS 1915	Histories of Global Wetlands
ENVS 1925	Energy Policy and Politics
ETHN 1750B	Treaty Rights and Food Fights: Eating Local in Indian Country
IAPA 1805C	Caribbean and Pacific Small States: On the Margins of Development
PHP 1500	Global Health Nutrition

**Track 4 - Land, Water & Food Security**

Math: Select One

MATH 0090	Introductory Calculus, Part I <sup>1</sup>
-----------	--

Chemistry: Select One

CHEM 0330	Equilibrium, Rate, and Structure
-----------	----------------------------------

Earth/Life Systems: Select Three

BIOL 1470	Conservation Biology
BIOL 1480	Terrestrial Biogeochemistry and the Functioning of Ecosystems
EEPS 0240	Earth: Evolution of a Habitable Planet
EEPS 1120	Paleoceanography
EEPS 1130	Ocean Biogeochemical Cycles
EEPS 1310	Global Water Cycle
EEPS 1370	Environmental Geochemistry
EEPS 1510	Introduction to Atmospheric Dynamics
ENGN 1340	Water Supply and Treatment Systems - Technology and Sustainability

**Track 5 - Sustainability in Development**

Sociology and Politics: Select One

ENVS 0150	Climate Futures and a Sociology of Just Transitions
ENVS 1755	Globalization and the Environment
POLS 0400	Introduction to International Politics

## Critical Perspectives on Development: Select One

ANTH 0110	Anthropology and Global Social Problems: Environment, Development, and Governance
ECON 1370	Race and Inequality in the United States
IAPA 0010	Sophomore Seminar in Development Studies
IAPA 1802C	Infrastructure!
POLS 1200	Reimagining Capitalism
SOC 1620	Globalization and Social Conflict

## Economic Perspectives: Select Two

ECON 1110	Intermediate Microeconomics
ECON 1340	Economics of Global Warming
ECON 1355	Environmental Issues in Development Economics
ECON 1510	Economic Development
ECON 1530	Health, Hunger and the Household in Developing Countries
ECON 1560	Economic Growth

## Climate: Select One

EEPS 0850	Weather and Climate
ENVS 1245	Air Pollution & Chemistry

Total Credits 19-20

<sup>1</sup> The track requirement of MATH 0090 can be waived for students with an AP exam of 4 or 5 on Calc AB; or students with an AP exam score of 4 or 5 on Calc BC in place of Math 0090 & 0100

## Honors

Students interested in graduating with honors in their concentration must complete a thesis determined to be of the highest quality and must have excelled in their coursework required for the concentration, which is defined here as receiving a grade of "A" in the majority of courses taken to fulfill the concentration. You can learn more by visiting the honors page (<https://www.brown.edu/academics/institute-environment-society/education/undergraduate/honors>) on the IBES website.

## Courses

### ENVS 0070C. Transcending Transportation Impacts.

Students will be engaged in interdisciplinary analyses of the life-cycle costs, environmental impacts, technical developments, and policy innovations at the local and regional level. We will discuss technical modifications in vehicles, such as plug-in hybrids, as well as policy and planning on intermodal systems, recycle-a-bike programs, intelligent transportation systems, and other innovations. Enrollment limited to 19 first year students. Instructor permission required.

### ENVS 0070D. The Misuse of Scientific Information in American Life.

Many important political issues hinge on matters of science or technology. But most Americans are ill-equipped to assess these matters. As a result, we are vulnerable to spin when scientific information is distorted, cherry-picked or otherwise misused to advance financial, political or even religious goals. This course examines ways these phenomena skew public discussion of climate change, vaccine safety, the teaching of evolution, cancer screening, GM food and a host of other issues. Enrollment limited to 19 first year students.

### ENVS 0070E. What Does It Mean To Be Green?

What does it mean to be green? From saving energy to recycling to eating organic food, in recent years the idea of going green has gained increasing attention. But green is not solely a proxy for environmentalism: it encompasses competing, and at times contradictory meanings. This seminar places contemporary green debates in historical and cross-cultural contexts. We'll examine multiple paradigms of greenness in the Global South as well as the Global North. Topics range from imperial visions of tropical landscapes to the green revolution emphasis on agrochemicals, from conservation to climate change. Enrollment limited to 19 first year students.

### ENVS 0110. Humans, Nature, and the Environment: Addressing Environmental Change in the 21st Century.

This is an engaged scholars course that offers an introduction to contemporary environmental issues. We explore the relationships between human societies and the non-human environment through a survey of topical cases, including: human population growth and consumption, global climate change, toxins, waste streams, water resources, environmental justice and ethics, and agro-food systems. This course also analyzes various solutions—social, political, technical, and economic—put forth by institutions and individuals to address questions of environmental sustainability. Students must join a 90-minute weekly discussion section. Each section will partner with a community organization to complete an engaged, local project.

### ENVS 0120. Botanical Roots of Modern Medicine (BIOL 0190E).

Interested students must register for BIOL 0190E.

### ENVS 0121. Plants, Food, and People (BIOL 0190H).

Interested students must register for BIOL 0190H.

### ENVS 0150. Climate Futures and a Sociology of Just Transitions.

This course, team-taught with Professor Damian White of RISD, seeks to build a reconstructive environmental sociology of the sustainable transition, incorporating debates from political ecology, critical design studies and energy/technology studies. It debates the merits of green capitalist and post-capitalist, socio-centric and technocentric visions of the transition away from fossil fuels. Class will be meet on the RISD campus.

### ENVS 0160. Migration and Borders in a Time of Climate Crisis.

This course foregrounds the political implications of migration and border regimes in the context of environmental change, historically, today, and in the future. It examines in what sense environmental and climate factors might be causally related to human movement. We will seek to understand the fears of a future "climate refugee crisis," and how states and security regimes are already preparing for climate displacement. Furthermore, we will ask how migrant justice groups are challenging the closed-border policies of many states in 'the Global North' as well as the global structural inequalities that create the vulnerabilities that drive movement and migration.

### ENVS 0220. Physical Processes in Geology (GEOL 0220).

Interested students must register for GEOL 0220.

### ENVS 0240. Earth: Evolution of a Habitable Planet (GEOL 0240).

Interested students must register for GEOL 0240.

### ENVS 0241. Climate and Climate Change (GEOL 0030).

Interested students must register for GEOL 0030.

### ENVS 0260. Religion Gone Wild: Spirituality and the Environment (RELS 0260).

Interested students must register for RELS 0260.

### ENVS 0300. Environment and Society in Africa (SOC 0300L).

Interested students must register for SOC 0300L.

### ENVS 0410. Environmental Stewardship.

Challenges students to address the economics and logistics of implementing strategies to conserve resources and reduce the negative impacts of the built environment. The goal is to learn the rationale, process and technical aspects of the practice of environmental stewardship. Topics include sustainable design, institutional change, and corporate environmental responsibility. Students collaborate in interdisciplinary teams on applied projects. Permission by instructor by application process prior to enrollment in the class.

### ENVS 0420. Principles of Ecology (BIOL 0420).

Interested students must register for BIOL 0420.

### ENVS 0490. Environmental Science in a Changing World.

Introduces students to environmental science and the challenges we face in studying human impacts on an ever-changing earth system. We will explore what is known, and not known, about how ecosystems respond to perturbations. This understanding is crucial, because natural systems provide vital services (water and air filtration, climate stabilization, food supply, erosion and flood control) that can not be easily or inexpensively replicated. Special emphasis will be placed on climate, food and water supply, population growth, and energy.

**ENVS 0495. Introduction to Environmental Social Science.**

This course introduces students to core areas of theory and research in the environmental social sciences. It also challenges students to think carefully about what we learn and don't learn when we apply different disciplinary lenses to interdisciplinary environmental challenges.

**ENVS 0510. International Environmental Law and Policy.**

Introduces students to principles of international environmental law and examines how international organizations, national governments and non-state actors interact to address human impacts on the global environment. Considers effects of treaties, trade agreements and foreign aid on resolution of trans-boundary environmental problems including climate change, marine governance, biodiversity loss and trade in endangered species and hazardous waste. Students negotiate a mock treaty (NEWORLD) to mitigate some aspect of human impact on global change from the perspective of different state and non-state actors. Introductory coursework that addresses some aspects of environmental studies or environmental science is recommended.

**ENVS 0520. Wild Literature in the Urban Landscape.**

Combines deep study of ecological poetry, fiction, essays and other writing with service to schools in the community through exploration of local ecological challenges through both creative and more discursive expressions. The field-work or community component to this course will involve students in conducting workshops that combine literature and ecology in order to better elucidate and understand local issues related to, for one example, eco-industrial histories associated with Gorham Silver in Providence and the current state of Masphepaug Pond on the Reservoir Triangle, where a public high school, Alvarez, now sits on contaminated soil. Enrollment limited to 22 undergraduates. S/NC.

**ENVS 0580. Foundations of Physical Hydrology (GEOL 0580).**

Interested students must register for GEOL 0580.

**ENVS 0700A. New England Environmental History.**

Explores the environmental history of New England from the arrival of people circa 10,000 years ago to the present day. Topics include Native American and colonial environmental interactions and 20th century environmental transformations. From abandoned textile mills to Northern forests, understanding the history of a place can help us plan for its future.

**ENVS 0700C. Extinction: A Global History.**

In the past five centuries, about 800 species of animals and plants have gone extinct, the majority of them in the last one hundred years. Recent estimates suggest that 41 percent of described amphibians, 26 percent of mammals, and 13 percent of birds currently face the threat of extinction. We will examine the current global extinction crisis as a biological, historical, cultural, economic, and political phenomenon. This course adopts an interdisciplinary approach by examining the issue of extinctions from the perspectives of the humanities and environmental sciences.

**ENVS 0700D. Food for Thought: Food and Agriculture in the History of the Americas.**

This course is an introduction to the history of food and agriculture in the Americas. We will examine key topics such as the domestication of plants and animals several thousand years ago, food production + consumption in pre-Columbian societies, the impact of European colonialism + colonial systems of food production across the Americas farming in the 19th century, the industrialization of agriculture in the 19th and early 20th centuries in the US and Latin America, the Green Revolution, organic agriculture and alternatives to industrial agriculture in the Americas in the past few decades, and the future of food + agriculture.

**ENVS 0705. Equity and the Environment: Movements, Scholarship, Solutions.**

The environmental justice movement emerged in the U.S. South from the observation that African-Americans were more exposed to toxics than whites. It spurred decades of academic and activist efforts to understand and address the relationship between inequality and environment. The issue has expanded around the world, and beyond unequal exposures to "bads", to unequal access to "goods," along lines of equity by race, class, gender, ethnicity, indigenous identity, and position in the global economy. Issues of assigning responsibility and applying theories of justice with legal instruments have made environmental justice policy difficult. This course seeks to serve first-years and sophomores.

**ENVS 0710. Powering the Past: Environmental Histories of Energy Use and Social Change.**

From wood, water, and muscles, to coal, oil, and nuclear power, humans have a long history of reshaping their environments to access energy. The nature of these energy sources also influences the form and distribution of political and economic power. Using environmental history methods, this course examines the ties between energy, power, environmental change, and inequality, from before the agricultural revolution to the present. Readings and lectures link the United States and Europe to the rest of the globe, with particular emphasis on the nineteenth and twentieth centuries. Each class combines lecture and discussion. No prerequisites.

**ENVS 0715. Political Ecology: Power, Difference and Knowledge.**

This course introduces students to political ecology — an approach to environmental issues that emphasizes power relations, inequalities, and difference. After surveying the genealogy, diversity and theoretical basis of political ecology, we will examine case studies that draw on the approach. By focusing on the relationship between nature, power, economics and the making of environmental knowledge, this course will illustrate how environmental questions are always deeply political. We will discuss new analytical directions political ecologists have developed in recent decades and assess what we gain as environmental researchers when we actively interrogate power.

**ENVS 0900. Quantitative Methods in Psychology (CLPS 0900).**

Interested students must register for CLPS 0900.

**ENVS 0930A. Appropriate Technology (ENGN 0930A).**

Interested students must register for ENGN 0930A.

**ENVS 1000. Fieldwork in the Urban Community (URBN 1000).**

Interested students must register for URBN 1000.

**ENVS 1070. The Burden of Disease in Developing Countries (PHP 1070).**

Interested students must register for PHP 1070.

**ENVS 1105. Introduction to Environmental GIS.**

This course introduces the tools, techniques, and fundamentals of Geographic Information Systems (GIS) using the ArcGIS software package. GIS has broad applications in environmental, natural, and social sciences. Examples include disaster management, transportation planning, and environmental quality assessment. By the end of this course, students will understand the processes of spatial data analysis, geographic databases, visualization and cartography, and uncertainty quantification. Students will produce an independent final research project and present their results in a highly-visual flash talk and an open-access poster presentation session. Course override required. Contact the instructor (samiah\_moustafa@brown.edu) with year, concentration, and statement of interest.

**ENVS 1110. Estuarine Oceanography (GEOL 1110).**

Interested students must register for GEOL 1110.

**ENVS 1180. Feminist Thoughts for a Heated Climate (POLS 1180).**

Interested students must register for POLS 1180.

**ENVS 1225. Arctic Climate and Policy: Winter Session in Bodø.**

The Arctic is a region where rapid climate and social changes will have important and far-reaching consequences. Current issues include access to mineral and hydrocarbon resources, possibilities for new maritime routes, cross-border cooperation, governance and self-determination, sustainability of fisheries, opportunities for Arctic tourism, and support of indigenous communities. Students will travel to Bodø, Norway, to participate in this class together with undergraduates from Babson College and Nord University Business School. Students will work together across disciplines and cultures to learn how to apply knowledge to map relevant policy issues more creatively, effectively, and responsibly.

**ENVS 1230. Forest History of Colonial New England: Combining Evidence from Documents and Pollen.**

Bringing metal tools and animals with them from Europe, settlers set out to transform the Northeastern American landscape shortly after founding Plymouth Colony in 1620. Historical accounts describe an abundance of tree cover, which, environmental historians argue, provided the frame and fuel for American nationhood. But what do we really know about the pre-colonial canopy of the Northeast and its transformation under colonialism? To find out, we have to go back into the woods and understand how forests age. Using ecology and pollen records, we can learn about Abenaki and early settlers' interactions with the treed landscape.

**ENVS 1245. Air Pollution & Chemistry.**

Air pollution is a major concern across the globe, impacting human health, ecosystems, and climate. This course will provide students with an understanding of the chemical and physical processes that determine the composition of the atmosphere, with an emphasis on the dispersion of pollutants responsible for urban smog, acid rain, climate change, and the ozone hole. Topics to be covered also include health and environmental impacts of air pollutants, potential technological solutions, air pollution monitoring, and international policy regulations. Prerequisites: CHEM 0330, CHEM 0050, ENGN 0720 or similar.

**ENVS 1260. Indigenous People and Nature: Birds (ANTH 1260).**

Interested students must register for ANTH 1260.

**ENVS 1270. From Magic Mushrooms to Big Pharma: Anthropology of Drugs (ANTH 1880).**

Interested students must register for ANTH 1880.

**ENVS 1330. Global Environmental Remote Sensing (GEOL 1330).**

Interested students must register for GEOL 1330.

**ENVS 1331. Weather and Climate (GEOL 1350).**

Interested students must register for GEOL 1350.

**ENVS 1350. Environmental Economics and Policy.**

This course equips students with theoretical and empirical tools to analyze environmental issues from the perspective of economics. First, we review when and why the markets fail, competing policy solutions (e.g., cap-and-trade), and cost-benefit analysis. Second, we survey methods to quantify the benefits of environmental regulations, including revealed and stated preference methods, a primer on climate-economy modeling, and a real-world application in a class research project. Third, we study the costs of environmental regulations. We conclude with advanced policy considerations (e.g., trans-boundary pollutants), private market solutions/corporate social responsibility, and select special topics (e.g., resources and economic development).

**ENVS 1355. Environmental Issues in Development Economics (ECON 1355).**

Interested students must register for ECON 1355.

**ENVS 1356. Health, Hunger and the Household in Developing Countries (ECON 1530).**

Interested students must register for ECON 1530.

**ENVS 1370. Environmental Geochemistry (GEOL 1370).**

Interested students must register for GEOL 1370.

**ENVS 1400. Sustainable Design in the Built Environment.**

Course develops students' analytical abilities to apply fundamental concepts of environmental issues, building systems analysis, and architectural and engineering design. Students learn how to reduce the negative environmental impacts, and maximize positive social and economic impacts, of the built environment. Students cultivate applied skills in sustainable design; including fundamental energy calculations, heat flow analysis, schematic design analysis, and building operating impacts assessment. Course emphasis is on building energy flows. Students conduct independent research projects, providing the opportunity to study broader impacts of the built environment and propose solutions. Class meetings combine lectures, student presentations, and group workshops.

**ENVS 1410. Environmental Law and Policy.**

Introduces students to environmental law in the United States. Uses legal decisions and policy frameworks to consider the roles of non-/governmental actors in formation and implementation of environmental policy. Students will become familiar with major federal environmental laws and regulatory databases and see how legal precedent, differing understandings of risk and alternative regulatory and market-enlisting strategies have shaped solutions to environmental problems. Provides opportunity to apply legal skills to local environmental legislation or legal problem. Intermediate coursework in Environmental Studies, Political Science, Community Health, Urban Studies or other environmentally-related coursework is recommended. First year students need instructor permission.

**ENVS 1415. Power, Justice, and Climate Change.**

Climate change creates injustices in who caused the problem, who is suffering worst and first, and who is taking action. Power differences between nations and social groups drives unequal disaster risks and "compounded vulnerabilities" for poor peoples and nations, and has led to gridlock in United Nations negotiations. The course reviews social and political dimensions of climate change, including local and national adaptation and mitigation efforts, media dynamics, collective and individual denial, negotiations, and the rise of climate social movements. Enrollment limited to 40.

**ENVS 1421. Podcasting For the Common Good: Storytelling with Science.**

How can we use podcasts to spread compelling information about the future of our planet? In this hands-on, interactive course, we bring new perspective to environmental topics by integrating scientific research with audio story telling techniques. Students will learn how to find answers to environmental questions, use recording equipment, conduct interviews, write scripts, and make a finished product.

Students will produce several audio projects for the course including an episode for Possibly- a podcast produced through a partnership between IBES and The Public's Radio.

Students who want to enroll should write a one page (max) statement about how skills related to explaining environmental and health issues will help them in their educational trajectory. Statements can be emailed to Megan\_Hall@Brown.edu.

**ENVS 1440. Conservation Biology (BIOL 1470).**

Interested students must register for BIOL 1470.

**ENVS 1450. Ecosystem Analysis.**

Develops ability to measure and characterize important biological and physical parameters of terrestrial ecosystems. Weekly field trips to explore measurement techniques and develop testable questions and/ or hypotheses about different forested ecosystems. Qualitative and quantitative writing exercises explore how to describe the patterns and processes associated with the ecosystems visited. One Saturday field trip to central Massachusetts and one weekend field trip to New Hampshire are required. A background in environmental issues, as evidenced by taking BIOL 0420, is strongly recommended.

**ENVS 1455. Marine Conservation Science and Policy.**

Students will develop an interdisciplinary understanding of ocean ecosystems and how humans are connected to them socially, economically, and ecologically. Integration of the scientific and human dimensions of marine conservation will be achieved through analysis of the current status, trends, and threats to ocean ecosystems, and the range of solutions to mediate these threats. This course is designed for advanced juniors, seniors and graduate students; participating students are expected to have background in at least one related field (e.g., biology, geosciences, sociology, economics, or political science) beyond the intermediate level. Suggested prerequisites include ENVS 0490, BIOL 0420 or 1470.

**ENVS 1460. Microbial Diversity and the Environment.**

This is a lecture and discussion based course that focuses on the role of microbes in biological, geological, and environmental processes. This includes: introductory concepts, origins of life, bacterial evolution, role in climate change, metabolic diversity of biogeochemical cycles, microbial communities and interactions, habitat specific examples, and applications in the environment and human health. Recommended background courses: BIOL 0200, CHEM 0330 and an intermediate science course (e.g., BIOL 0280, GEOL 0240, or ENVS 0490).

**ENVS 1490. SES-Independent Study/Science Writing.**

The culmination of the Semester in Environmental Sciences at the Marine Biological Laboratory is an independent research project that builds on the topics covered in the aquatic and terrestrial ecosystem analysis core courses. In addition students participate in a seminar designed to help improve their ability to tell a lay reader about science. Enrollment is limited to students in this program. Instructor permission required.

**ENVS 1491. SES-Terrestrial Ecosystem Analysis.**

Team-taught course examining: the structure of terrestrial ecosystems fundamental biogeochemical processes, physiological ecology, impacts of environmental change on the landscape; the application of basic principles of ecosystem ecology to investigating contemporary environmental problems. Part of the Semester in Environmental Science at the Marine Biological Laboratory; enrollment is limited to students in this program. Instructor permission required.

**ENVS 1492. SES-Aquatic Ecosystem Analysis.**

Team-taught course examining the structure of freshwater, estuarine and marine ecosystems; impacts of environmental change on the landscape at local regional and global scales; the application of basic principles of ecosystem ecology to investigating contemporary environmental problems such as coastal eutrophication, fisheries exploitation. Part of the Semester in Environmental Science at the Marine Biological Laboratory; enrollment is limited to students in this program. Instructor permission required.

**ENVS 1493. SES-Environmental Science Elective.**

Two environmental science electives are offered each fall semester as part of the Semester in Environmental Science at the Marine Biological Laboratory, including: aquatic chemistry, mathematical modeling of ecological systems and microbial ecology. Enrollment is limited to students in this program. Instructor permission required.

**ENVS 1500. Environmental Justice and Climate Change in Rhode Island TRI-Lab Engaged Research.**

The TRI- Lab (Teaching, Research, Impact) on Climate Change and Environmental Justice in Rhode Island will be taught by a team including two experts from the RI state Department of Health. It will investigate ways to reduce the climate change-related public health risks to vulnerable individuals in three targeted neighborhoods in Providence, and increase the capacities of these neighborhoods to respond to climate change threats. Content topics to be covered include: projected climate change impacts in RI; public health risk assessment; risk outreach and communications strategies; state and federal policies, design and evaluation of adaptive responses; community-based research methods.

**ENVS 1510. Environmental Theory and Philosophy.**

Each student develops his or her own concept of "socially better." The task is to understand conceptions of "socially better" belonging to various authors and others in the class, to put one's own concept in context with the readings and class discussion, and explain why that concept is sensible and should be taken seriously by others. Prerequisite: ENVS 1350 or permission of the instructor.

**ENVS 1530. From Locke to Deep Ecology: Property Rights and Environmental Policy.**

Examines the evolution of property law and tenure in land, water, the atmosphere and natural resources, and the consequences of these property rights regimes for environmental protection. Readings drawn from the scientific, legal, public policy and popular literature are used to consider the development of American attitudes about the relationship between people and nature; the relationship between public and private rights in the land, sea, freshwater, atmosphere and wildlife; and the use of innovative property rights regimes in environmental policy. Intermediate coursework in Environmental Studies, Urban Studies, American Civilizations or other environmentally-related coursework is recommended.

**ENVS 1535. Environmental (In)justice and Island Societies: Towards Equitable, Sustainable Solutions.**

The island nations of the world are among the most vulnerable to the economic and social strains of globalization, and the impacts of climate change. This course will take a case-based approach to deconstructing and proposing equitable and sustainable solutions for various environmental justice challenges faced by islands across the Caribbean, Atlantic and Indian Oceans, and Pacific. Cases will include: (a) Puerto Rico and self-determination in the post-Hurricane Maria period; (b) military occupation in the South China Sea; (c) ocean grabbing, territoriality and small-scale fishers in Kiribati; (d) nuclear testing in the Marshall Islands; and (e) climate-induced relocation in Fiji.

**ENVS 1540. Technology and Material Culture in America: The Urban Built Environment (AMST 1520).**

Interested students must register for AMST 1520.

**ENVS 1545. The Theory and Practice of Sustainable Investing.**

21st century businesses and investors face a broadening and deepening array of Environmental, Social, and Governance (ESG) risks and opportunities. Climate change, water scarcity, community conflicts, resource depletion, supply chain breakdowns, worker well-being and economic inequality pose present material challenges that make sustainability an imperative for successful corporations and investors. We will examine current ESG strategy, trends, future scenarios, players, and frameworks and integrate that theory with practical investment performance analysis, metrics, and study of screens, asset classes, and diversification.

**ENVS 1552. Science and Power: The Corruption of Environmental Health.**

Students will engage in a semester-long discussion about environment, health, science, ethics, and power. How do public health and the environment relate to each other, and how is each shaped by shared and/or contested cultural values? How do deeply-held but historically-specific ideas about the family, nation, gender, money, race, the market, etc. affect how we conceptualize and attempt to solve health problems? What are the most effective ways to improve environmental health on the local, national, and/or global level? Readings, movies and YouTube presentations in epidemiology, bioethics, cultural theory, public health and history will be used to address such questions.

**ENVS 1555. Urban Agriculture: The Importance of Localized Food Systems.**

This is an engaged scholar course. Urban agriculture has a critical function in a small but increasing movement toward more localized and sustainable food systems. This course focuses on research and readings from multiple disciplines addressing urban agriculture and local food systems' role in shaping food policies, labor practices, sustainable agricultural practices, and human health (to name a few). More importantly, students will work with community partners to actively engage in a local food system project. Enrollment limited to 40.

**ENVS 1556. Environmentalism and the Politics of Nature (ANTH 1556).**

Interested students must register for ANTH 1556.

**ENVS 1557. Birding Communities.**

This seminar explores and builds communities around a charismatic and conspicuous class of animals: birds. The irony is that birds are marvelously diverse and abundant, but birding is associated with a narrow and privileged sector of society. Course readings address the politics of knowledge and modes of inclusion and exclusion in birding practice. While studying these hierarchies worldwide and historically, we create our own community of knowledge and practice through a "birding buddies" program in a local urban school. Students will learn from interdisciplinary scholarship, school children, and not least, the birds. History matters. Be woke. Think globally. Bird locally.

**ENVS 1570. Guts of the City: Perspectives on Urban Infrastructure and Environmental Planning (URBN 1570).**

Interested students must register for URBN 1570.

**ENVS 1574. Engaged Climate Policy in the U.S.: Rhode Island and Washington, DC.**

Sufficient and equitable policies addressing the crisis of climate change have been elusive, and United States leadership is crucial for an adequate global response. After several weeks of readings and lectures on climate policy, the course shifts to team-based research to produce strategic, policy-relevant briefings and scholarly outputs with partner organizations in Rhode Island, Washington, and internationally. Students will travel to D.C. for three days to attend meetings and a mini-conference with experts and staff from government agencies, industry organizations, think tanks, and environmental NGOs, and to hold a briefing on our joint research.

**ENVS 1575. Engaged Climate Policy at the UN Climate Change Talks.**

Twelve undergraduate students will study a group of core readings, conduct independent and group projects, and attend the United Nations Framework Convention on Climate Change's (UNFCCC) 23rd Conference of the Parties (COP23) and related climate change events in Bonn, Germany in November 2017. Students will critically analyze contemporary political events; develop and addresses pertinent research questions; engage with and interview experts in the field; craft policy-relevant and empirically grounded publications; and develop experience in using social media. Team-based research may be shared at the climate negotiations in Bonn. Contact J. Timmons Roberts for an application - [j\\_timmons\\_roberts@brown.edu](mailto:j_timmons_roberts@brown.edu).

**ENVS 1580. Environmental Stewardship and Resilience in Urban Systems.**

This course investigates current environmental impacts and risks related to urban infrastructure systems. Students analyze efforts to minimize negative environmental, health and economic impacts of the built environment. The course explores urban initiatives to increase sustainability and resiliency of infrastructure systems in anticipation of increased risks related to climate change. The goal is to learn the rationale, process and technical aspects of the practice of environmental stewardship and resilience planning in an urban context. Students will develop competence in technical analysis, policy analysis, and program implementation through case studies and systems analyses.

**ENVS 1605. Glaciers and Climate Change.**

What is the fate of glaciers in a warming world? Where, how much, and how rapidly will glaciers melt? This course investigates how Earth's glaciers are responding to climate change. This class will provide a comprehensive overview of changes to Earth's glaciers, ice caps, and ice sheets, synthesize the latest scientific information, find gaps in our current knowledge, and identify what questions should be explored in future research. And, students will work with glacier-based observations and interpret trends using remote sensing, GIS, and/or other visualization techniques. Topics will also include impacts to sea level rise, ocean circulation, and water resources.

**ENVS 1615. Making Connections: The Environmental Policy Process.**

The diminishing quantity and quality of the resources of the Earth carries profound implications for the fulfillment of human rights and aspirations. But even as we understand better the intrinsic interdependencies between humans and the environment, policy gridlock persists. Indeed, the findings of fundamental environmental science are regularly contested on political grounds. The purpose of this course is to learn how to apply knowledge to map the relevant policy context in environmental issues, and to develop the tools and approaches to address any problem of decision in the environmental arena more creatively, effectively, and responsibly. Enrollment limited to 10.

**ENVS 1650. Statistical Inference I (APMA 1650).**

Interested students must register for APMA 1650.

**ENVS 1660. Instrumental Analysis with Environmental Applications (GEOL 1660).**

Interested students must register for GEOL 1660.

**ENVS 1700B. Watershed Policy + Management: Governance Beyond Borders.**

Changes in land use at parcel and landscape scales have altered water cycles, water quality and water-dependent ecosystems. Governance Beyond Borders examines the management of water, land use and aquatic life in coastal watersheds. We will consider the accomplishments of the top-down, expert-driven federal laws of the 1960s and 1970s. However we will focus on integrated, trans-boundary approaches to governance of land, water, pollutants and aquatic life and become immersed in thinking like a watershed. ENVS1410 is desirable but not required. Other relevant courses could include BIOL1470, ENVS1350, ENVS1530, ENVS1615. Enrollment is limited to 18 students. Instructor's approval is required.

**ENVS 1710. Environmental Health and Policy.**

Provides an overview of environmental health methods and their application to policy and regulation. Students will learn the basic tools of environmental health sciences, including toxicology, epidemiology, and risk assessment, as well as the scientific basis for regulation. Traditional environmental health concerns will be discussed, as well as emerging discourses on environmental health issues, including urban pollution and its concomitant health concerns, climate change, issues of health disparities and environmental injustice, and the interrelationship between humanitarian crises and environmental degradation. Open to both undergraduate and graduate students of all fields, space permitting. Prerequisite: ENVS 0110 or instructor permission.

**ENVS 1711. Current Topics in Environmental Health (PHP 1700).**

Interested students must register for PHP 1700.

**ENVS 1720. Environmental Justice: The Science and Political Economy of Environmental Health and Social Justice.**

Provides an overview of environmental justice history, theory and definitions. Students will review quantitative, qualitative, and theoretical approaches for understanding the origins and persistence of environmental discrimination. Examines the regulatory, institutional, structural, political, and economic forces that underlie patterns of race and class-based discrimination and their implications for environmental health among diverse communities. Case examples of environmental justice organizing will inform students of positive efforts by people of color in protecting their communities. Not open to first year students. Prerequisite: ENVS 0110.

**ENVS 1725. Political Economy of the Environment in Latin America (INTL 1450).**

Interested students must register for INTL 1450.

**ENVS 1755. Globalization and the Environment.**

What are the effects of globalization on the environment? Can globalization be greened? Corporations, civil society, international organizations and states are in a race to globalize their rules, sometimes working together, and others times in bitter conflict. This course seeks to understand this set of issues through a mix of examining concrete social/environmental problems and studying theories of globalization and social change. While addressing global issues and the impacts of wealthy nations, this course focuses most on the developing countries, where the impacts of these global issues appear to be worst, and where resources are fewest to address them. Enrollment limited to 20 juniors and seniors.

**ENVS 1790. North American Environmental History (HIST 1790).**

Interested students must register for HIST 1790.

**ENVS 1791. From Nature's Dangers to Nature Endangered: A History of American Environmental Thought (HIST 1977T).**

Interested students must register for HIST 1977T.

**ENVS 1820. Environmental Health and Disease (BIOL 1820).**

Interested students must register for BIOL 1820.

**ENVS 1824. Environmental Political Thought (POLS 1824L).**

Interested students must register for POLS 1824L.

**ENVS 1890. Native American Environmental Health Movements (ETHN 1890J).**

Interested students must register for ETHN 1890J.

**ENVS 1900. Introduction to Geographic Information Systems for Environmental Applications (GEOL 1320).**

Interested students must register for GEOL 1320.

**ENVS 1910. The Anthropocene: The Past and Present of Environmental Change.**

Scholars in many disciplines have begun using the term the Anthropocene to signal a geological epoch defined by human activity. This seminar examines the Anthropocene idea from the perspective of environmental history. What activities might have changed the planet – the use of fire thousands of years ago, or agriculture, or fossil fuels? Is the Anthropocene another term for climate change, or does it include pollution and extinction? Is it a useful concept? Drawing on anthropology and the sciences as well as history, we will use the Anthropocene to think through environmental change and the human relationship with the non-human world.

**ENVS 1913. China's Environment: Power, Pollution and Hope.**

This course focuses on key environmental issues transforming Chinese landscapes and society. It introduces students to China's geography and identifies contemporary environmental problems (including air, water and soil pollution, biodiversity loss, etc.) as well as their proposed solutions. Considering China's recent history of rapid economic growth and stark socio-economic inequalities, a central objective of the course is to develop tools to effectively locate environmental issues within a broader political, social and economic context — a skill transposable to other geographical and environmental contexts. We will draw on scholarship from geography, anthropology, political science, and environmental science.

**ENVS 1914. Colonization and Environmental Change in Chinese History.**

This course explores how the wide diversity of cultures and ecosystems that existed across the East Asian mainland 3,000 years ago came to be replaced with the language, culture and agricultural practices of North and Central China. It aims to teach students to think comparatively about processes of colonialism, especially the environmental aspects of the gradual colonization of non-Chinese ethnic groups in what is now South China.

**ENVS 1915. Histories of Global Wetlands.**

Wetlands are increasingly recognized as dynamic ecosystems, but for much of human history were valued only after being drained to make farmland. This course explores how humans have used, transformed and destroyed wetlands around the world over the past two millennia. In some cases people have entirely rebuilt hydrological systems with dikes, sluices and dams, creating landscapes that require constant management and investment to remain livable. Studying the environmental history of wetlands can help with conservation, managing cities built upon them, and recognizing how coastal peoples can adapt to rising sea levels.

**ENVS 1916. Animals and Plants in Chinese History.**

Plants and animals are the basis of human civilization, providing us with shelter, clothing, medicine and, especially, food. While historians have traditionally put humans at the center of history, this course shifts the focus to species that have shaped Chinese society from prehistoric farming to global agribusiness. We will study wild animals, farmed fish, silk worms, crops like rice and soybeans, livestock like pigs and cattle, fruit like oranges and peaches, drugs like tea and opium, and building materials like wood and bamboo. We will examine the roles these species have played from Chinese villages to Brown's campus, which is home to dozens of Chinese ornamental plants and was built in part from the profits of the tea and silk trades. Studying the histories of specific species will help students appreciate the central roles that plants and animals have played in Chinese civilization, and still play in our daily lives.

**ENVS 1920. Methods for Interdisciplinary Environmental Research.**

This course provides an introduction to a wide range of research approaches in the social and environmental sciences. We will cover the epistemological and theoretical foundations of various research approaches and discuss implications of these foundations for what research questions are answerable and what evidence one can bring to bear to answer such questions. By the end of the semester, students will be able to write a clear and answerable research question, and know what methods are appropriate to use to answer such a question. Enrollment limited to ENVS Juniors. ENVS seniors must receive instructor override from Professor Bosworth, kai\_bosworth@brown.edu.

**ENVS 1925. Energy Policy and Politics.**

From coal power to solar power, energy drives economies and increases quality of life world-wide. However, this same energy use can, and often does, lead to severe environmental destruction/pollution and global warming. This course serves as an introduction to energy policy in the United States and also explores global attempts to solve energy problems. This course examines different types of energy sources and uses, different ideological paths driving energy policy, the environmental impacts of energy use, current global and domestic attempts to solve energy problems, and the role of renewable and alternative forms of energy in future energy policy.

**ENVS 1926. Wasted: Rethinking Chemical Environments.**

This senior seminar investigates chemical and other forms of industrially produced waste and its impacts on environment and society. We will take an interdisciplinary approach, drawing on scholarship from anthropology, geography, history, sociology, science studies, and discard studies. We will follow chemicals around the world, from their inception in Western laboratories to their disposal in landfills and waste pits of the global South. Along the way, we will consider how corporations engineer chemicals' manufacture, governments regulate their use, sciences measure their human and ecological effects, and communities contend with the lived realities of chemical exposure and toxic suffering.

**ENVS 1927. Nature, Society and Culture.**

This senior seminar provides a selective overview of major approaches, debates, and interdisciplinary cross-currents shaping environmental sociology. It's designed to provide a substantive background to undergraduates interested in pursuing a specialization in environmental sociology or related fields. The general goal is to deepen collective understanding of the dynamic interrelationships shaping human societies and the natural environment. We will pursue this goal by considering how sociologists and others have conceptualized society-environment relations and by critically assessing the various approaches developed to examine those relations, their causes, and outcomes.

**ENVS 1928. Race and the Politics of Nature: Intersecting Histories and Political Ecologies.**

This senior seminar examines the ongoing perpetuation of race and racism as fundamentally related to concepts of "nature" and "the natural." We examine scientific and pseudoscientific concepts about population, biology, and resource scarcity, western environmentalism's origins and history, and relations with projects of incarceration, border violence, triage, environmental determinism, dehumanization, and the maintenance of essentialist understandings of 'race.' This course centralizes a critical race studies lens towards the history of environmental injustices, while also querying in what way nature, ecology, or environmentalism might be liberatory projects for racial justice.

**ENVS 1929. The Fate of the Coast: Land Use and Public Policy in an Era of Rising Seas.**

For the last few decades, there has been a land-rush on the ocean coasts of the United States. Unfortunately, this swamps the coast at a time when sea levels are on the rise. In some places the rise is natural, in some places the rise is exacerbated by human activities and everywhere it is fueled by climate change. This course will examine the causes of sea level rise, the effects it produces on land, the steps people have taken to deal with these effects and their consequences, and possible remedies. Enrollment limited to 20. Preference given to juniors and seniors.

**ENVS 1930. Land Use and Built Environment: An entrepreneurial view (ENGN 1930S).**

Interested students must register for ENGN 1930S.

**ENVS 1931. Renewable Energy Technologies (ENGN 1930U).**

Interested students must register for ENGN 1930U.

**ENVS 1931E. Writing the Environment.**

Few issues are more important than restoring and preserving our environment, but also few are more complex and politicized. Researchers must know how to convey the substance and importance of their work, not just in the language of scholarly journals, but also in ways that engage a lay audience while maintaining scientific accuracy. This seminar focuses on writing about subjects including new findings, the people who make them, scientific disputes, calls to action and policy debates. Participants will produce news and feature articles, profiles, op-ed pieces, essays, policy papers, web pages and the like. Enrollment limit 15.

**ENVS 1965. Engaged Environmental Scholarship and Communication.**

This upper level seminar will enable to students to place their research in the context of environmentally relevant policy and practice. Development of an environmentally-focused thesis or independent research project is a prerequisite. Students will hone practical professional skills, e.g. how to communicate scientific findings to the media and policy audiences; oral presentation skills, and tips on professional interactions. Required of all Brown Environmental Fellows (<http://blogs.brown.edu/bef/>), and open to others engaged in environmentally relevant projects from the natural and social sciences and humanities. Enrollment is limited to 15 seniors and graduate students, by application only (available Fall 2011). Instructor permission required. Contact [Heather\\_Leslie@brown.edu](mailto:Heather_Leslie@brown.edu) for more information.

**ENVS 1970. Independent Study.**

First semester of individual analysis of environmental issues, required for all environmental studies concentrators. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor override required prior to registration.

**ENVS 1971. Independent Study.**

Second semester of individual analysis of environmental issues, required for all environmental studies concentrators. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor override required prior to registration.

**ENVS 2010. Special Topics in Environmental Studies.**

A mandatory seminar for graduate students in environmental studies. This course develops group problem-solving skills by addressing a current local, national or global environmental issue. We will work on problem definition, identifying options for addressing the problems, and crafting potential solutions. In all stages we work closely with non-profit groups, government agencies, or firms, who have the capacity to implement solutions. Students learn basic research design and begin the process of developing a research question and possible methods for conducting their Master's thesis research.

**ENVS 2110B. Radical American Romanticism: Democratic, Environmental, + Religious Traditions in America (RELS 2110B).**

Interested students must register for RELS 2110B.

**ENVS 2420. The Structure of Cities (ECON 2420).**

Interested students must register for ECON 2420.

**ENVS 2450. Exchange Scholar Program.****ENVS 2980. Reading and Research.**

First semester of thesis research during which a thesis proposal is prepared. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor override required prior to registration.

**ENVS 2981. Reading and Research.**

Second semester of thesis research. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor override required prior to registration.

**ENVS 2990. Thesis Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing a thesis.

## Center for Fluid Mechanics, Turbulence and Computation

'Fluids at Brown' as the Center is known serves to promote research at Brown University in fluid mechanics, through the development of research collaborations, seminars, the sharing of intellectual knowledge and the coordination of graduate courses. Participating members of the Center include faculty from the Division of Applied Mathematics, School of Engineering, Department of Earth, Environmental & Planetary Sciences and the Department of Physics. The Center organizes regular seminars on topics relating to fluid mechanics.

Fluid mechanics is an enabling science that describes dynamics over a wide spectrum of scales, ranging from the global scales of climate and ocean dynamics to the transport of suspended proteins through nanopores. New fundamental research challenges involving fluid dynamics continue to emerge in engineering, the physical or biological sciences, mathematics and scientific computation.

Current information on activities and research may be found at the Center's website at <http://www.brown.edu/research/projects/fluids>

## French Studies

### Chair

Lewis C. Seifert

The Department of French Studies at Brown promotes an intensive engagement with the language, literature, and cultural and critical traditions of the French-speaking world. The Department offers both the B.A. and the PhD in French and Francophone Studies. Courses cover a wide diversity of topics, while placing a shared emphasis on language-specific study, critical writing skills, and the vital place of literature and art for intellectual inquiry. Undergraduate course offerings are designed for students at all levels: those beginning French at Brown, those continuing their study of language and those undertaking advanced research in French and Francophone literature, culture and thought. Undergraduate concentrators and non-concentrators alike are encouraged to avail of

study abroad opportunities in their junior year, through Brown-sponsored and Brown-approved programs in France or in another Francophone country. Graduates in French and Francophone studies go on to pursue careers in a number of fields, including translation, public service, college and secondary education, publishing and the media.

For additional information, please visit the department's website: <http://www.brown.edu/Departments/French/>

## French and Francophone Studies Concentration Requirements

The concentration in French and Francophone Studies is committed to the pursuit of an interdisciplinary, linguistically rigorous, and textually informed understanding of French and Francophone literatures and cultures. Concentrators engage actively through their coursework with a wide range of texts and critical perspectives, pertaining to multiple literary genres, media, and contexts. They have opportunities to study different periods of French history as well as Francophone cultures beyond France. By the time they graduate, concentrators will have learned to read with knowledge and nuance and produced a varied body of critical work in French.

The concentration in French and Francophone Studies is committed to the study of the language, literature, and cultural and critical traditions of the French-speaking world. Concentrators engage actively through their coursework with a wide range of texts and critical perspectives, and multiple literary genres and media (the novel; theater; poetry; cinema; critical theory; special topics in contemporary politics and culture). They have opportunities to study different periods of French literature and intellectual history (from the Renaissance to the present) as well as Francophone cultures beyond France (West Africa, the Maghreb and the Caribbean). Courses cover a wide diversity of topics, while placing a shared emphasis on language-specific study, critical writing skills, and the vital place of literature and art for intellectual inquiry.

The concentration program is designed to encourage and support language-specific study. Literary texts and cultural documents are read principally in the original. Likewise, in most courses, French is the language of class discussions, presentations and research/critical papers.

Concentrators in French and Francophone Studies are strongly encouraged to spend one or two semesters (usually in their junior year) in France or in a Francophone country to derive the richest benefits of linguistic and cultural immersion. Information on Brown in France and approved alternative programs in French-speaking countries is available from the Office of International Programs (<http://www.brown.edu/Administration/OIP>) office and the OIP website. Other summer programs can be found on the French Embassy website.

Students who have an outstanding record in their concentration courses, have completed at least six concentration courses by the first semester of their senior year, and are highly recommended by two professors, are eligible to apply for admission to the Honors program (<http://www.brown.edu/academics/french-studies/undergraduate/honors-program>).

### Concentration Requirements

A minimum of 10 courses is required for the concentration in French and Francophone Studies. Concentrators must observe following guidelines when planning their concentration. It is recommended that course choices for each semester be discussed with the department's concentration advisor.

**Note: A maximum of four courses taken during a single semester (and a maximum of five courses from an entire year) in France or a Francophone country** may count toward the concentration. Our concentrators are strongly encouraged to spend significant time in France or in a Francophone country to derive the richest benefits of linguistic and cultural immersion. Through the Brown-in-France program administered by OIP and departmental faculty, students can enroll directly in French institutions.

FREN 0600 Writing and Speaking French II (is accepted for concentration credit)

### Required Courses

One (and no more than two) of the following 0720, 820, 1010	1
FREN 0720A	De l'Amour courtois au désir postmoderne
FREN 0720B	The French Novel Today
FREN 0820A	Identité et différence dans le monde francophone
FREN 1010A	Littérature et culture: Margins of Modernity
One of the following:	1
FREN 1510A	Advanced Oral and Written French: Traduction
FREN 1510F	Advanced Written and Oral French: Regards sur la France actuelle
FREN 1510C	Advanced Oral and Written French: A table!
FREN 1510J	Advanced Oral and Written French: Photographie
<b>The senior seminar (senior year spring)</b>	<b>1</b>
FREN 1900H	La France en guerre
FREN 1900K	Extrême droite en France
FREN 1900L	French-American (Dis)Connections: histoire, société, culture
<b>Electives</b>	<b>7</b>
At least two 1000-level courses offered in the Department of French Studies (excluding FREN 1510 and FREN 1900) are required	
Up to two 1000-level courses taught in English offered by French Studies or other departments at Brown are eligible for concentration credit. (Appropriate courses on French or Francophone topics from other departments must be approved by the concentration advisor. Departments in which electives are typically taken include Africana Studies, Anthropology, Art History, Comparative Literature, English, History, Linguistics, Modern Culture and Media)	
At least one course must cover a pre-Revolutionary period <sup>1</sup>	
FREN 1000A	Littérature et intertextualité: du Moyen-Age jusqu'à la fin du XVIIème s
FREN 1000B	Littérature et culture: Chevaliers, sorcières, philosophes, et poètes
FREN 1030A	L'univers de la Renaissance: XVe et XVIe siècles
FREN 1030B	The French Renaissance: The Birth of Modernity?
FREN 1040A	Civilite et litterature
FREN 1040B	Pouvoirs de la scène: le théâtre du XVIIe siècle
FREN 1040C	Le Grand Siècle à l'écran
FREN 1040D	Molière et son monde
FREN 1050A	"Family Values": Représentations littéraires de la famille au 18eme siècle
FREN 1050B	Fictions de l'individu
FREN 1050D	The Age of Voltaire: Culture, Pensée, Société
FREN 1050E	French Lovers: Séduction et libertinage sous l'Ancien Régime
FREN 1050F	Espace public; espace privé
FREN 1050G	Le corps des Lumières
FREN 1050H	The Age of Voltaire: Lumières et modernité
FREN 1100F	<i>Contes et nouvelles du Moyen Age</i>
FREN 1410I	Sorcellerie et Renaissance: le sort de la sorcière
At least one course a post-Revolutionary period <sup>1</sup>	
FREN 0720F	Paradigms of Difference in the 19th-Century French Novel and Short Story

FREN 1130E	Le Poétique et le quotidien
FREN 1060A	Décadence
FREN 1060B	Gender and the Novel
FREN 1060D	L'Orient littéraire
FREN 1060E	Genre, sexualité, et le roman du XIXe siècle
FREN 1060F	Paris: Capital of the 19th Century
FREN 1070A	Avant-Gardes
FREN 1070B	Emergent literature: Postcolonial Nations and Cultural Identity
FREN 1070C	Figures du roman français au XX siècle
FREN 1070E	Littérature, appartenance et identité
FREN 1310O	Clichés. L'écriture à l'épreuve de la photographie
FREN 1330A	Fairy Tales and Culture
FREN 1330C	French Women Writers
FREN 1330E	Transatlantic Surrealisms
FREN 1410D	L'identité française
FREN 1410R	Images d'une guerre sans nom: The Algerian War in Literature and Film
FREN 1420C	Gender Theory and Politics in France
FREN 1610C	Advanced Written French: Atelier d'écriture

Total Credits 10

<sup>1</sup> Or another appropriate course as agreed to by concentration advisor

### Honors

Students who have received all "A's" in their concentration courses, have completed at least six concentration courses by the first semester of their senior year, and are highly recommended by two professors are eligible to apply for admission to the honors program. For more information, consult the requirements on the Department's website: <http://www.brown.edu/academics/french-studies/undergraduate/honors-program>

## French Studies Graduate Program

The department of French Studies offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) Degree. Under most circumstances, the A.M. degree is only awarded as part of the Ph.D. track.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/french-studies>

## Courses

### FREN 0100. Basic French.

This is the first half of a two-semester course. Four meetings a week for oral practice. One hour of work outside of class is expected every day (grammar/writing, oral practice, reading). Enrollment limited to 15.

### FREN 0110A. Basic French Language and Culture.

Intensive course for beginners. Nine contact hours per week, double credit. Students should expect at least 2 hours of homework daily. No prior knowledge of French expected. Communication in class in French only. Reading of authentic texts, grammar practice and writing outside of class. This course is equivalent to the year-course FREN 0100- FREN 0200 and the prerequisite for FREN 0300. Students receiving an A at the end of the semester are encouraged to pre-register for FREN 0400 the following semester. Override required to encourage first-year enrollment.

### FREN 0200. Basic French.

This is the second half of a two-semester course. Four meetings a week for oral practice plus one conversation hour. One hour of work outside of class is expected every day (grammar/writing, oral practice, reading). An accelerated track enables qualified students to go directly to FREN 0500 after FREN 0200. Enrollment limited to 15.

### FREN 0220. Reading French in the Arts and Sciences.

Designed to develop the reading competence in French for graduate students (or advanced undergraduates with permission of the instructor). Fundamentals of grammar and syntax are emphasized as well as reading skills in the fields of individual students. Successful completion should satisfy the foreign language requirement for graduate students in other departments. (Consult the relevant department.) No prerequisites. Not for graduate-level credit.

### FREN 0300. Intermediate French I.

A semi-intensive elementary review with emphasis on all four skills (listening, speaking, reading and writing). Class activities include drills, small group activities, and skits. Class materials include videos, a French film, short stories, and various other authentic documents. Prerequisite: FREN 0200 or placement (Previous experience with French is required to take this class). Four meetings per week, plus a 50-minute conversation section with TAs.

### FREN 0400. Intermediate French II.

Continuation of FREN 0300 but may be taken separately. A four-skill language course that stresses oral interaction in class (three meetings per week plus one 50-minute conversation section). Materials include audio activities, film, and a novel. Short compositions with systematic grammar practice. Prerequisite: FREN 0300, FREN 0200 with permission, or placement.

### FREN 0500. Writing and Speaking French I.

A four-skill language course that stresses oral interaction in class. Thematic units will focus on songs, poems, a short novel, a graphic novel, films and a longer novel. Activities include a creative project using Comic Life, and a systematic grammar review. Prerequisite: FREN 0400, FREN 0200 with written permission, or placement.

### FREN 0520. Introduction to the Literary Experience.

Pre-requisite: FREN 0400; equivalent to FREN 0500 in language sequence. Language course in which discussions and writing exercises are based on readings in French and Francophone literature and film, focusing on geographic displacement and the relationship between place and identity. With grammar review and short papers. Texts include: Baudelaire, Maupassant, Eberhardt, van Cauwelaert, Ernaux.

### FREN 0600. Writing and Speaking French II.

Prerequisite for study in French-speaking countries. Class time is devoted mainly to conversation and discussion practice. Writing instruction and assignments focus on essays, commentaries, and to a lesser degree, on story writing. Apart from reading assignments for discussion (press articles and literary excerpts), students select two novels to read. Prerequisite: FREN 0500 or placement. Enrollment limited to 15.

### FREN 0610. Writing and Speaking French II: International Relations.

Prerequisite for study in French-speaking countries. Continuation of FREN 0500. Class time is devoted mainly to conversation and discussion practice. Same level as FREN 0600. This course is designed for students who are interested in international relations. Discussions and writing assignments are related to global politics from French and Francophone perspectives and introduce students to the discourse of international relations in French. Prerequisite: FREN 0500. Enrollment limited to 15.

### FREN 0620. Writing and Speaking French II: Littérature:Nature/Culture.

Same level as FREN 0600, with emphasis on literary analysis. This course will explore a collection of French novels and films that explore the idea of a nature/culture dichotomy, calling into question both what it means to be human and what it means to be natural. Topics include: the interplay between human beings and their environment; animal studies/animal ethics; the idea of human nature (and its critics). Readings will feature authors such as: Rousseau, Zola, Rachilde, Colette, Gide. Taught in French.

**FREN 0720A. De l'Amour courtois au désir postmoderne.**

From twelfth-century courtly literature to contemporary film, this course explores the enduring romance between French culture and Eros. The ambiguities of desire are brought to the fore across changing religious and social contexts. Readings include Duras, Flaubert, Freud, and Baudrillard. Open to students who receive a 5 (AP test), 700 and above (SAT II) or with instructor's permission. First Year Seminar, open to first year students only. Please email Virginia\_Krause@brown.edu if you have questions. Taught in French.

**FREN 0720B. The French Novel Today.**

What does today's French novel look like? Reading ten prominent short novels (in English translation) from the last 20 years, students will be acquainted with the novelistic landscape of contemporary France, while also learning to approach through analysis and narrative theory the novel as genre. We will consider what kinds of questions these novels pose and how - be it regarding conditions specific to our time (human/inhuman, identity, technology, the globalized world, the everyday, dystopia...) or those unceasing questions of life, time, love, predicament, that every novel must ask, even while sometimes seeming not to. Taught in English.

**FREN 0720C. Down and Out in Paris.**

This freshman seminar focuses on the culture and literature of the Parisian underbelly from the 19th century to the present. It looks at representations of the laboring, marginal, and criminal classes from both high and low literary perspectives, taking pains to anchor these readings in lived contexts. Authors studied will include Hugo, Baudelaire, Zola, Orwell, Dabit, Carco, Hemingway, Genet, Vargas. Taught in English.

**FREN 0720D. Contes et identités francophones.**

An introduction to the French-speaking world through folk- and fairy tales, we will examine how folktales have been used to define national and ethnic identities in France, Sénégal, the Caribbean, Louisiana, and Canada and consider how the study and rewriting of these traditions have redefined these identities. We will explore these questions by studying tale-types from all of the above regions, tales specific to each, and literary reworkings of folktales by writers, including d'Aulnoy, Perrault, Nothomb, Ben Jelloun, Diop, and Chamoiseau. Prerequisites: 5 on Advanced Placement testing, 700 and above SAT II, or instructor's permission. Taught in French.

**FREN 0720E. L'art de la nouvelle.**

What sort of story is the short story? What kinds of possibilities and pressures distinguish it from other forms? Attentive to its contained – and constrained – narrative economy, we shall study a range of examples of the genre, from 19th century realist and fantastic literature (Maupassant, Flaubert, Nerval) to modern French and Francophone texts (Sartre, Beckett, Djébar, Redonnet). Taught in French. Prerequisites: 5 on Advanced Placement Testing, 700 and above SAT II, or Instructor's Permission

**FREN 0720F. Paradigms of Difference in the 19th-Century French Novel and Short Story.**

Examines constructions of class, race, gender, and sexuality in relation to 19th-century French culture and literary movements, including romanticism, realism and naturalism, decadence, and the popular novel. Topics include constructions of homosexuality, fatal femininity, besieged masculinity, sexuality and race, prostitution, bored housewives. Works by Duras, Balzac, Flaubert, Zola, Maupassant, Rachilde, accompanied by non-fictional sources in early sexology and criminology. Taught in English.

**FREN 0720G. L'art de la nouvelle.**

In this course we shall study a range of examples of the nouvelle or short story, from 19th century realist and fantastic literature (Maupassant, Flaubert, Colette) to modern French and Francophone texts (Sartre, Camus, Djébar, Redonnet, Quiriny). Emphasis will be on formal analysis, major genres/movements (realism, the fantastic, existentialism, anti-/post-colonial critique, "post-modernism") and the short story's capacity to offer forms of social critique. We will also read some secondary theoretical materials (Freud, Sartre, Barthes, Todorov, Piglia, Samoyault). Taught in French.

**FREN 0750D. Nous et les autres: les Français et le monde de la Renaissance à la Révolution.**

An exploration of early French encounters with and reactions to non-European cultures from 1500 to 1800. Studying travel narratives, essays, and fictional texts, we will examine the multiple ways that French identity attempts to come to terms with its "Others" during this crucial period of European colonial expansion. Texts by Cartier, Thevet, and Choisy; Montaigne, Molière, and Montesquieu, among others.

**FREN 0750F. L'Idée de l'empire dans l'imaginaire français.**

From the early nineteenth century to the 1931 Colonial Exposition in Paris and the Algerian Revolution, ideas and debates about slavery, race, and colonialism informed the ways in which French writers and intellectuals thought about empire and its relationship to national identity. This course examines how these debates took shape through contrasting imaginative conceptions of empire from the 1800s until the 1960s, when France lost most of her colonies. How did visions of empire contribute to the formation of French colonial identity, and what kind of purchase do these ideas have on contemporary French cultural and political life? In French.

**FREN 0750G. L'animal dans la culture contemporaine.**

From reports of animals stranded in conflict zones and natural calamities, to cute or clever animals cast in advertisements and popular media, from the rat of Ratatouille to the caged orangutan of Nénette, the new interest in the animal marks an age of heightened awareness of the costs and ironies of the human story. We will consider in this course significant representations of the animal in contemporary French and Francophone literature, film, visual art, cultural theory and media representations. We will also revisit earlier moments linking the animal to modernity, including early film/photography and urban history. Taught in French.

**FREN 0760A. Introduction à l'analyse littéraire.**

On what terms and with what tools can we "read" a literary text? An introduction to major genres (the short story, the novel, poetry, theater) of French and Francophone literature and to a range of analytical approaches to the text, including narrative theory, poetics and psychoanalysis. Readings will feature select 19th and 20th century works (Maupassant, Apollinaire, Ionesco, NDiaje) and excerpts from key analytic/theoretical writings (Benveniste, Todorov, Freud, Barthes, Bakhtin). Taught in French.

**FREN 0820A. Identité et différence dans le monde francophone.**

How have racial and cultural minorities in France and the French-speaking world thought about identity and difference since decolonization began after World War Two? And how have minorities in metropolitan France begun to use racial categories to challenge universalist narratives of social inclusion? This sophomore seminar will study these and related questions as we explore race as a political and cultural category in the Francophone world. We will consider a variety of contexts, including Caribbean politics, postcolonial Africa, and urban violence in contemporary France. In French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 0980. Becoming French: Minorities and the Challenges of Integration in the French Republic (HIST 0980B).**

Interested students must register for HIST 0980B.

**FREN 1000A. Littérature et intertextualité: du Moyen-Age jusqu'à la fin du XVIIème s.**

A chronological survey of French literature from the Grail romance to neo-classical tragedy. Topics will include the birth of courtly love, the Crusades, lyric poetry, and Humanism. Course discussions will be devoted to the close reading of texts by writers such as Marie de France, Chrétien de Troyes, Ronsard, Louise Labé and Montaigne. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1000B. Littérature et culture: Chevaliers, sorcières, philosophes, et poètes.**

From the Middle Ages to the Age of Versailles, this course examines 6 foundational moments in French civilization: the Crusades, courtly love, humanism, the witch hunts, Cartesian reason, and the emergence of the autonomous self. Close scrutiny of literary texts and films will provide a window onto French civilization before the Revolution. Readings include medieval epic, Montaigne, and Descartes. In French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1010A. Littérature et culture: Margins of Modernity.**

A survey of French and Francophone works from the 18th century to the present that reflects on a number of cultural shifts, of challenges but also resistances to hierarchies (social, sexual, political); the urban context; legacies of colonization. Various figures of marginality to be studied: vagabonds and parvenus, dandies and courtesans, outcasts and pariahs. Authors to be studied include Prévost, Marivaux, Balzac, Baudelaire, Maupassant, Duras, Camara Laye and Rachid O. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not take French at Brown. Taught in French.

**FREN 1010B. Modernités Littéraires: Du 18ème siècle jusqu'à nos jours.**

A chronological survey of French literature introducing seminal texts from the last 300 years. Classes devoted to discussion and to the development of skills in close textual analysis. Authors to be studied include Graffigny, Balzac, Baudelaire, Zola, Apollinaire, Duras, and Ben Jelloun. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1020A. Histoire de la langue française: usages, politiques et enjeux du français.**

A study of the evolution of the French language from the Middle Ages to the present. We will trace the main periods of this linguistic, social, historical and political development. Among topics to be explored: France's encounter with English from the Norman conquest to the current so-called English "invasion," the French Revolution's destruction of dialects (patois), and the status of French in France's former colonial empire. Through a variety of French and francophone texts we will investigate the transformations brought about by Feminists and by youth from the banlieues and examine the status of French outside of France. In French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1020B. History of Romance Languages.**

The Romance family is one of the most widely-spoken and politically important language families. The aim of this course is to introduce students to the history and linguistic characteristics of the Romance family. Our purpose is to learn the factors that led to the development of modern standard Romance languages, and provide an understanding of Romance structures and their linguistic relationships. The course covers language families; genetic relationships (family trees); typological comparison; internal versus external history; language contact and borrowing; Romance Pidgins and Creoles; Standard language versus dialect; social variation; concepts of Phonetics and Phonology; Morphology; Syntax; Semantics; Lexicon.

**FREN 1020C. Le Mariage dans la littérature médiévale: la violence et le "problème" du corps.**

After first gaining a foundational understanding of how marriage was portrayed in seminal Medieval theoretical texts and how it was discussed in Medieval literature, in this course we will examine a wide range of genres—treatises, biblical exegesis, debate literature, fabliaux, and epic and lyric poetry—that will help us carefully investigate literary representations of women and wives in Medieval French literature. Taught in French.

**FREN 1030A. L'univers de la Renaissance: XVe et XVIe siècles.**

An exploration of the cultural cosmos of Renaissance France through literature, visual culture, history, and film. What projects, fantasies, and nightmares characterize this stormy period in French history, from the birth of Humanism to the Wars of Religion? Other topics include the trial of Martin Guerre, court life, madness, and the New World. Readings in Montaigne, Louise Labé, among others. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1030B. The French Renaissance: The Birth of Modernity?.**

This class will read works from the French Renaissance in historical and cultural context. Did the Renaissance mark the birth of what we call the modern period? So much of twentieth and twentieth-century thought relies on the notion that our modern paradigm came into being with the Renaissance. We will read literary works by writers such François Rabelais, Louise Labé, Marguerite de Navarre and Agrippa d'Aubigné in relation to both medieval and Renaissance writers and philosophers such as Jean Calvin, Martin Luther, Marsilio Ficino and Erasmus and political actors such as Francis I, Charles IX and Henry IV. Enrollment limited to 40.

**FREN 1040A. Civilité et littérature.**

How should one burp, pass gas, and spit in public? Should people use utensils when eating? How should a young woman react when a man speaks to her without her parents' consent? Questions such as these preoccupied 17-c France, which defined much of what we understand today to be civility. We will examine how literature makes civility seem either natural or normal or artificial and deceptive. Readings will include selections from conduct manuals (Faret, Courtin), comedies (Corneille and Molière), letters (Voiture, Sévigné), fairy tales (d'Aulnoy, Perrault), "moralist" writing (Pascal, La Rochefoucauld, La Bruyère), and cultural history (Chartier, Elias, Foucault). Taught in French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1040B. Pouvoirs de la scène: le théâtre du XVIIe siècle.**

This course examines how 17th-century theater both reinforces and undermines the ideologies of absolutism, national identity, the nuclear family, and emerging bourgeois consciousness, among others. Special consideration will be given to the theory and performance of theater in the 17th century and the present. Readings will be supplemented with screenings of videos for the plays studied (as available). In addition to papers and oral presentations, students will stage selections from some of the plays studied. Plays by Rotrou, Corneille, Molière, Racine, and an opera by Quinault/Lully. Taught in French. Prerequisite: a course at the 0600 or 0700 level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1040C. Le Grand Siècle à l'écran.**

Why is the "Grand Siècle" depicted so frequently in contemporary French film? To answer this question we will explore the roles 17th-century culture plays in French identity through readings in history and literature and recent films focusing on 17th-century texts, personalities, or events. We will highlight both continuities and discontinuities between the 17th century and our own time. Readings by Corneille, Cyrano de Bergerac, Lafayette, Maintenon, Molière, Pascal, Racine, Sévigné. 10 films. Two short papers, two oral presentations, a weekly blog, and a final project (paper or multimedia project). Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not take French at Brown.

**FREN 1040D. Molière et son monde.**

In-depth study of Molière's theater and its cultural contexts. We will examine how Molière uses a variety of theatrical forms to portray the monarchy, social class, religion, medicine, and gender relations of seventeenth-century France. Plays by Molière will be studied alongside other literary texts and documents of the period as well as films (performances of plays, historical fiction). Prerequisite: a course at the 0600 or 0700 -level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1050A. "Family Values": Représentations littéraires de la famille au 18<sup>ème</sup> siècle.**

This course will study the "invention" of the bourgeois family in 18th-century literature. It will examine particularly the ideological construct that supports this literature. Special attention will be given to the way in which this literature defines and orders family relationships around the notions of state, hierarchy, nature, and gender. Readings in Prévost, Diderot, Rousseau, Mme de Charrière, and Sade.

**FREN 1050B. Fictions de l'individu.**

Explores various expressions of the self in the 18th century, especially with regard to conflicts with social constraints, hierarchical gendering, the ordering of class structures, and the effort to normalize sexuality. Notions of autonomy, freedom, and happiness, the chief pursuits of the Enlightenment, are examined. Authors studied include Marivaux, Voltaire, Rousseau, Casanova, Diderot, and Mme de Châtelet. Prerequisite: a course at the 0600 or 0700 -level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1050D. The Age of Voltaire: Culture, Pensée, Société.**

A presentation of various aspects of the eighteenth century through its most representative texts. This course examines the period in its diversity, from its preoccupation with philosophy to its discovery of sensibility, from the development of libertinism to the affirmation of women and claim of liberty. Authors to be read include Montesquieu, Rousseau, Sedaine, Beaumarchais, Diderot, and Françoise de Graffigny.

**FREN 1050E. French Lovers: Séduction et libertinage sous l'Ancien Régime.**

A study of love and relationships in the Old Regime. The course will concentrate on the major actors (the libertine, the fop), on the spaces (the boudoir, the salon, the garden), on social practices (conversation). Authors will include Molière, Mme de Lafayette, Crébillon fils, Laclous and film adaptations by Frears and Forman.

**FREN 1050F. Espace public; espace privé.**

This course will study the interpenetration of spaces in the 18th century, the domination of the public space but the emergence of the private. We will attempt to draw the frontiers of these spaces in a variety of texts. We will explore social spaces (the salon, the café), the domestic space (cabinet, bedroom), places of leisure and exteriority (gardens). Readings in Crébillon fils, Denon, Bastide, Diderot, Mme de Charrière, Rutledge, Palissot.

**FREN 1050G. Le corps des Lumières.**

This course will examine various representations of the body during the Age of the Enlightenment. We will study how these representations are influenced by notions of race and nation, discipline (Foucault), and by the Revolution. Texts by Montesquieu, Graffigny, Voltaire, Foucault, and historical context provided by Foucault, Outram and Hunt.

**FREN 1050H. The Age of Voltaire: Lumières et modernité.**

A presentation of various aspects of the eighteenth century through its principal representative texts. This course examines the period in its various preoccupations: with philosophy, its discovery of sensibility, the development of libertinism, and the pursuit of liberty. Authors to be read include Voltaire, Marivaux, Rousseau, Sedaine, Diderot, and Françoise de Graffigny.

**FREN 1060A. Décadence.**

Study of the notion of decadence in fin-de-siècle French culture. From scientific theories of degeneration to literary representations of sexual perversion, writers of the period were consumed by the specter of moral decay and social disease. This course will analyze fictional and non-fictional texts of the period by authors such as Péladan, Lorrain, Rachilde, Mendès, and Nordau.

**FREN 1060B. Gender and the Novel.**

This course explores how major authors represented gender and sexuality. Obsessed with unlocking the mystery of femininity, novelists attempted to represent truths about sexual difference while new scientific discourses (psychiatry, sexology, criminology) aimed to analyze gender and sexual deviance in objective terms. Authors include: Balzac, Flaubert, Zola, Rachilde, Foucault, and 19th-century scientific texts.

**FREN 1060C. La texte réaliste.**

This course will focus on realism, both as a literary movement of the second half of the 19th century and as a style present during other eras (such as romantic realism) and in other "non-realist" genres (poetry, science fiction, literature of the fantastic). How does a literary text convince its readers that it accurately copies reality? Does the realist novel have privileged themes (sexuality, the modern city, corruption)? Readings by Stendhal, Balzac, Gautier, Jules Verne, Flaubert, Coppée, Zola, Maupassant.

**FREN 1060D. L'Orient littéraire.**

This course is a study of the representations of the Orient (Turkey, Arabia, Persia) in the imaginary of classical French writers of the nineteenth century. Through the analysis of the phantasms pertaining to the representations of Sexuality and Power, this course will also study a series of figures associated with the Orient like *travestissement*, melancholia, nostalgia, etc. in the novels of Montesquieu, Chateaubriand, Flaubert, Gautier, and others.

**FREN 1060E. Genre, sexualité, et le roman du XIX<sup>ème</sup> siècle.**

Examines novelistic constructions of gender and sexuality in relation to 19th-century French culture and literary movements, including romanticism, realism and naturalism, decadence, and the popular novel. Topics include constructions of homosexuality in literature and non-fiction, fatal femininity, besieged masculinity, sexuality and race, prostitution, bored housewives. Works by Balzac, Flaubert, Zola, Maupassant, Rachilde, accompanied by non-fictional sources in early sexology and criminology. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1060F. Paris: Capital of the 19th Century.**

Nineteenth century Paris in interdisciplinary perspective—literature, art, history, politics, Haussmann's transformations of the city, revolution. Works by Balzac, Baudelaire, Flaubert, Rimbaud, Marx, Benjamin, Bernard Marchand, Ingres, Delacroix, Courbet, Manet, Caillebotte, Daumier. Classes in English, readings in original or translation depending on language proficiency of the student.

**FREN 1070A. Avant-Gardes.**

We examine avant-garde groups and movements, including surrealism, *Collège de Sociologie*, *Oulipo*, existentialism, *Tel Quel*, *situationnisme*, *Théâtre du Soleil*, *politique et psychanalyse*, while trying to assess their aesthetic/political platforms and their performative strategies. Readings include (poetic) manifestoes, novels, plays and essays by Breton, Caillois, Bataille, Colette Peignot, Queneau, Satre, Sollers, Kristeva, Guy Debord, Cixous, Wittig, Irigaray, Catherine Clément.

**FREN 1070B. Emergent literature: Postcolonial Nations and Cultural Identity.**

Does a writer belong to a "nation"? To which nation does one belong when one writes in the language of one's former colonizer? Does political independence warrant the existence of a new nation? Finally: How does literature contribute to the emergence and consolidation of a new nation? Many writers faced these questions after the independence of their countries from French colonial rule. Analyzes the answers Francophone writers offered to these perplexing questions in their novels and essays. Two short papers and a final essay.

**FREN 1070C. Figures du roman français au XX<sup>ème</sup> siècle.**

We will analyse novels by Marcel Proust, Jean Giono, Julien Gracq, Samuel Beckett, Marguerite Duras, Nathalie Sarraute, Le Clézio, Philippe Sollers, Annie Ernaux and Marie Redonnet while trying to assess the main tendencies of the contemporary French novel and the cultural evolution that led to it.

**FREN 1070E. Littérature, appartenance et identité.**

In this course, the analysis of a series of significant literary and critical texts written by French and Francophone contemporary writers will allow us to study the meaning of the emergence of new forms of identity and belonging in 20th-century modern French and Francophone writers. Three short papers.

**FREN 1070K. Les années folles: le roman français dans les années 20.**

This course explores social aspects of the French novel in the 1920s that have earned this period between the two world wars the name "Les Années Folles." We will first focus on the liberation of women, frivolity, sexual ambiguity and conceptions of love at the time. We will then discuss the demobilized writers, whose disarray, procrastination, suicidal tendency are the characteristics of a generation disillusioned by a society that no longer offers exciting prospects. Our meetings will also be punctuated by reflections on new autobiography as well as on new narrative techniques illustrated by the studied works. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. Taught in French.

**FREN 1070L. Islam, Immigration et Identité nationale dans le roman français contemporain.**

This course examines how Muslim immigration into France is represented in the contemporary French and Francophone novel. We will introduce some of the major themes of anti-colonialism, such as the opposition between primitive harmony and modern alienation, and the necessity of rehabilitating the role of mythologies in modern Western culture. Then, we will discuss the French social science fiction where special consideration will be given to themes such as the decline of the sense of religious belonging in France, the disarray generated by postmodernity, dynamism of religion versus apathy of consumer society, and the mechanisms of conversion to Islam. In French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1100F. Contes et nouvelles du Moyen Age.**

Storytelling in medieval French courts, villages, and towns. Works read (in modern French translation) include love tales, fables, chivalric adventures, comic escapades, earthy anecdotes, stories of warfare and politics. Class discussions investigate the tales and consider how medieval listeners and readers responded to them. Brief lectures on questions of cultural context.

**FREN 1110B. Gender, Sexuality and the Novel.**

Examines constructions of gender and sexuality in relation to the schools and styles of the 19th- and early 20th-century French novel, including romanticism, realism, decadence, and the popular novel. Works by Balzac, Flaubert, Zola, Maupassant, Rachilde, and Marguerite, accompanied by non-fictional sources in early sexology.

**FREN 1110F. Le Roman contemporain.**

In this course we will read a selection of French and Francophone novels from 1985 to 2015. Authors include Patrick Modiano, Marie NDiaye, Lydie Salvayre, Marie Redonnet, Jean-Philippe Toussaint and Laurent Mauvignier. Placing these novels in dialogue with key voices from critical theory (Cixous, Barthes, Derrida, Kristeva), we will pursue through the semester a sustained reflection on major contemporary "problematics" including identity, subjecthood, hospitality, history, genealogy, gender, memory and ghosts. Taught in French. Prerequisite: a course at the 0600- or 0700 -level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1120F. L'enfer, c'est les autres.**

In this course we will read a selection of plays by notable 20th century French and Francophone writers, and consider how the dramatic form organizes and complicates questions of representation, subjectivity, body, politics and voice. Authors include Sartre, Camus, Genet, Beckett, Césaire, Koltès, Duras, Sarraute, Ndiaye, Redonnet. Secondary readings by Adorno, Deleuze, Kristeva amongst others. Taught in French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1130B. Révolution poétique - à la française: Baudelaire, Rimbaud, Mallarmé.**

Primary emphasis: intensive study of the poetic production and theoretical texts of three writers who substantially contributed to the radical transformation of modern Western poetry. Additionally: attention to historical contexts and to influences on later writers and theories. Enrollment limited to 20.

**FREN 1130E. Le Poétique et le quotidien.**

In this course on the relationship between the poetic and the ordinary, unremarkable or otherwise apparently "non-lyrical" matters and textures of modern living, we will consider formal and conceptual innovations in French poetry through the last 100 years as it has responded to a changing world, and continually reimagined the place of poetry in it. After situating certain coordinates of our investigation in the early decades of the 20th century (Apollinaire, Cendrars, Char, technology, war, speed, time) we will read works by later and contemporary poets including Francis Ponge, Jacques Roubaud, Michelle Grangaud, Sabine Macher. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. Taught in French.

**FREN 1130G. Modernismes poétiques.**

Poetry begins with (more) white space on the page. The modernist remaking of poetry - beginning somewhere in the second half of the 19th century and lasting more or less through the first half of the 20th - brought about an exponential increase in the volume of that space, and in various other extensions of it (e.g. into design and drawing, into the unconscious). The course will follow those transformations by reading poems and other writings by selected poets from Rimbaud and Mallarmé to the surrealists and Ponge. Taught in French. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1140A. French Theory.**

Something called both "French" and "theory" came ashore in the Anglo-American academic scene of the 1970s. Supposedly both impenetrable and hegemonic, it was seen to reconstitute what was discussed in programs in literature and the social sciences, and how it was discussed. Today the shoreline of study in the humanities has been transformed, but French theory's moment is presumed to have past. This course will trace that history through key French texts (read in translation) written between the 1960s and 1990s. Taught in English.

**FREN 1150A. Literature and Cinema.**

Introduces the fertile relationships that exist between literature and cinema. The study of several cinematographic adaptations of novels helps to answer the following questions: How does a novel translate into a film? What characterizes each medium? What kind of aesthetic impact did cinema have on literary works? Novels by Cocteau, Balzac, Zola, Maupassant, Flaubert, and Gide and films by Renoir, Truffaut, Chabrol, Rivette, and others.

**FREN 1150B. Introduction to French Cinema.**

French Cinema: The First 50 Years. This course explores the history of French cinema and its relation to politics, history, technology and art during the first half of the 20th Century. Readings, discussions, and lectures in French and English. Films with English and French subtitles.

**FREN 1210C. Reading Proust at the Turn of the Century.**

Proust's enduring masterpiece *A la recherche du temps perdu*, viewed from different perspectives: philosophical, psychological, and cultural. Open to undergraduate and graduate students interested in the rich rewards of reading this complex novel and in considering the impact of narrative fiction on our lives. WRI

**FREN 1210F. L'œuvre romanesque de Marguerite Duras.**

Starting with her first novels in the 1950s and up until her broad recognition, for *The Lover*, as France's most renowned female writer of the post-WWII period, Marguerite Duras was involved in profound research into the form and force of novelistic narrative. Our course will examine a representative series of her texts from three different points of view: narrative, writing, femininity. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. Taught in French.

**FREN 1310D. L'Orient littéraire.**

Examines the representations of the Orient (Turkey, Arabia, Persia) in the imagery of French and Francophone writers of the 19th and 20th centuries. Through the analysis of the fantasies pertaining to the representations of Sexuality and Power, this course will study the dominant figures associated with the Orient. Two short papers and an oral presentation.

**FREN 1310E. Paris, ville des Lumières.**

Representations of the city; the crowd; the rise of the individual; the narrator as spectator and promeneur; narratives of social mobility; speed and circulation; sex and the city; Paris as a cultural place. Various authors to be studied: Marivaux, Fougere de Monbron, Rousseau, Diderot, Mercier, Restif de la Bretonne. Taught in French.

**FREN 1310F. Penser la France et l'Europe.**

We will read philosophers (e.g. Levinas, Irigaray, Lipvetsky, Ferry, Renaut, and Le Doeuff), anthropologists (Dumont and Favret-Saada), and historians (Duby and Perrot) while debating such issues as individualism versus holism, modernity versus postmodernity, autonomy versus freedom, democracy, feminism, violence, fashion, and France versus Europe.

**FREN 1310G. War, Image, Text.**

This course treats literary and film narratives of war from the 19th-century to the present (Franco-Prussian War, WWI, WWII, colonial wars, the Gulf war.) Topics include the uses and limits of realism in war narratives; issues of nationalism, patriotism, collaboration, resistance, civil rights, and the politics of gender in wartime. Students will research non-fictional sources to supplement class readings.

**FREN 1310H. Contes et identités francophones.**

How do folktales define national and ethnic identities in France, Sénégal, the Caribbean, Louisiana, and Canada? How have the study and rewriting of these traditions redefined such identities? We will consider these questions by studying tale-types from all of the above regions, tales specific to each, and literary reworkings of folktales by writers, including d'Aulnoy, Perrault, Pourrat, Diop, and Chamoiseau.

**FREN 1310J. Special Topics in French Studies I: Ecritures du Moi: Disclosures of the Self.**

A study of autobiographical writings beginning with the classics (Rousseau, Stendhal) and continuing with the legacy of the genre by contemporary writers. They will include Marguerite Duras, Annie Ernaux, Jean Claude Charles, François Weyerans, Catherine Cusset. Notions to be covered include memory and forgetting, fiction and reconstruction, writing, desire, and loss.

**FREN 1310K. Short Stories.**

What sort of story is the short story? What kinds of possibilities and pressures distinguish it from other forms? Attentive to its contained – and constrained – narrative economy, we shall study a range of examples of the genre, from 19th century realist and fantastic literature (Maupassant, Flaubert, Nerval) to modern French and Francophone texts (Camus, Sartre, Djébar, Condé, Ndiaye).

**FREN 1310M. Le fantastique.**

Ghosts, spirits and specters populate the French "fantastique". Starting with the precursors of the genre in the 18th century (Jacques Cazotte's *Le Diable amoureux*), we will read major works of "littérature fantastique" of the 19th century, including Balzac's *La Peau de chagrin* (1831), *Contes cruels* by Villiers de l'Isle-Adam (1883) and Maupassant's *Le Horla* (1886). Select readings from critical theory and philosophy will accompany the readings (Todorov, Bergson, Derrida). We will also consider examples of the fantastic in 20th century cinema (Epstein's *La Chute de la Maison Usher* (1928) and Franju's *Les Yeux sans visage* (1960)). Taught in French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1310N. La Pornographie.**

In 1769, Restif de la Bretonne coined the word *pornographe*: one who writes (*graphein*) about prostitution (*pornê* is the prostitute). It is in literature, then, that what is known today as "pornography" was invented. This course will be dedicated to classics of the pornographic genre (from Sade to Bataille), to pornological essays (by Deleuze or Nancy), and to the political stakes of pornography in contemporary writings (by Desportes or Guibert). We will not forget cinema (with films by Genet or Bonello): if pornography pertains to a compulsion to show everything, what would be the blind spot of its absolute visibility? Taught in French.

**FREN 1310O. Clichés. L'écriture à l'épreuve de la photographie.**

With the invention of photography, the relation of writing to the world—to history, memory, or the gaze—undergoes a radical change. In this course, we will try to understand how snapshots, these lasting images of things, have been inscribed into literature and thought. We will read a number of texts where the photographic image is staged (Proust, Claude Simon, Guibert, Perec, Tournier...) or questioned (Barthes, Derrida, Didi-Huberman, Baudrillard); and we will analyze some artworks that deviate its logic (Sophie Calle, ORLAN). We will also explore the ties between photography and the cinematographic medium that stems from it (Marker, Godard). Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. Taught in French.

**FREN 1310P. La théorie féministe en France.**

From Olympe de Gouges to the movement called #Balancetonporc (the French version of #MeToo), from the first-wave feminism to the queer third-wave feminism, from the debates on abortion to pornography, prostitution, and gender parity, this course will explore major texts in French and francophone feminist theory (Simone de Beauvoir, Monique Wittig, Luce Irigaray, Julia Kristeva, Hélène Cixous, Virginie Despentes, Sam Bourcier, Paul B. Preciado...). Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. Taught in French.

**FREN 1320A. Apocalypses and Millennia.**

A multidisciplinary investigation of figures such as Rimbaud, Van Gogh, the Surrealists, Simon, Blanchot, and Duras in the perspectives of history, philosophy, mysticism, literature, and the visual arts.

**FREN 1320B. Du côté de la passion.**

Focuses on the representation of emotions and passions in French novels from the 17th century to the present. In working out a new approach to characters in narrative fiction, the emphasis will be on perception and affect. In addition to novels, students read short essays on the nature of narrative, on emotions, and on aesthetic response. Novelists include Madame de Lafayette, Rousseau, Balzac, Flaubert, Proust, Colette, and Sarraute.

**FREN 1320D. Ecrire au féminin: Women Writing in France.**

Both introduces students to important female-authored texts from the 18th century to the present and addresses theoretical issues pertaining to women and writing. Topics include: the relation of gender to genre; the *écriture féminine* debate; development of feminist thought; women's relation to masculine literary traditions and the canon. Readings include Graffigny, Gouges, Staël, Desbordes-Valmore, Sand, Colette, Beauvoir, Duras, Bâ, Wittig, and Cixous.

**FREN 1320F. La Communauté.**

What do we mean when we say "we"? What does it mean to "be with," and what do we share with one another? This class ponders such questions, incessantly asked by 20th-century French literature and thought, by studying works that confront the necessity and difficulty of life in common, be it in the community of a family, society, friendship, lovers, or artists. Authors read include Marguerite Duras (*La Maladie de la mort*), Maylis de Kerangal (*Naissance d'un pont*), Maurice Blanchot (*La Communauté inavouable*), Jean-Luc Nancy (*La Communauté désœuvrée*), Jacques Rancière (*Aux bords du politique*), and Georges Bataille's journal *Acéphale*. In French. Prerequisite: A course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1320I. Literature and Social Thought: L'Utopie Littéraire.**

For centuries literary utopias have been considered a means to reinvent the world's ideal desires/values. We will attempt to understand the role utopian texts have played in shaping the imaginary of generations of people in Europe, particularly in France. Entire texts or excerpts from novels, essays, cartoons or films by Campanella, Voltaire, Marivaux, Mercier, and others will be discussed.

**FREN 1320J. Des monstres et de l'anormal.**

What are monsters and why do they fascinate us so much? How and why have representations of "abnormal" creatures changed over time? We will examine these questions through literary, philosophical, and scientific texts from the 16th century to the present. In addition to films, iconography, and criticism, readings will include: Paré, Montaigne; Malebranche, Perrault, d'Aulnoy; Le Prince de Beaumont; Geoffroy Saint-Hilaire, Mendès; Bataille, Cocteau, Darrieussecq, Foucault, Nothomb. Taught in French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1330A. Fairy Tales and Culture.**

Fairy tales, which occur in almost every culture, encapsulate in (usually) succinct form many of the pressing concerns of human existence: family conflict, the struggle for survival, sexual desire, the quest for happiness, etc. This course explores why writers and readers have been attracted to the fairy-tale form through a study of its key elements and its uses in adult and children's literature, book illustration, and film. Special attention given to French *contes de fées*, along with North American, English, German, Italian and selected non-Western fairy tales. Discussions and readings in English with French, German, and Italian originals on reserve.

**FREN 1330B. Masterpieces of French Literature.**

This course will study principally the most accomplished genre of the French literature, the novel. We will analyze the major representative novels from the 17th century to the present, and we will attempt to study their access to canonicity. We will also evaluate their continued interest by focusing on the major contemporary interpretations that they have provoked. Readings in Mme de la Fayette, Laclos, Stendhal, Flaubert, Genet, and Duras.

**FREN 1330C. French Women Writers.**

This class analyzes the relationship between gender and literary genre through the study of texts authored by women from the 19th through the 21st century. We will read novels and poetry by George Sand, Desbordes-Valmore, Colette, Beauvoir, Marguerite Duras, Monique Wittig, Annie Ernaux, among others. Screenings of work by women filmmakers will complement readings. Course taught in English.

**FREN 1330E. Transatlantic Surrealisms.**

"Surreal" refers to what is incongruous, uncanny, or downright bizarre. Those terms describe many poetic and artistic productions belonging to Surrealism, without for all that explaining the literary and theoretical underpinnings of the movement at its origins in the 1920s, or accounting for the international flowering of its ideas and its continued influence. The class will attempt to trace the complexities of Surrealism from its modernist prehistory, through "canonization," to diversification and waning in the 1960s. We will also study surrealism vis-à-vis the shift in cultural capital from Europe to the New World, and reverberations in subsequent artistic forms. Taught in English.

**FREN 1410D. L'identité française.**

We discuss different ways of defining French identity across centuries by stressing catholicism, *le génie de la langue française*, Cartesianism, French Revolution, *les droits de l'homme*, the French Presidency, Francophonie, and *l'exception française*, or, in a minor key, *l'esprit gaulois*, French cuisine, French *chanson*, *cafés philosophiques*, and French film.

**FREN 1410F. Comment peut-on être Français? L'identité française en question.**

This course will examine the transformation of cultural identity in contemporary France. What does it mean to be "French" or étranger today? We will investigate this question by reflecting on some of the major changes that have occurred in French society in the past 30 years in the wake of immigration, the emergence of ethnic identity, racism, the construction of Europe, and globalization. We will study contemporary fiction and non-fiction, essays, films, songs, comedy, as well as theoretical texts. Readings will include works by Leïla Sebbar, Chadhort Djavann, Faïza Guène, Julie Kristeva, Tzvetan Todorov, Philippe d'Iribarne, and Eric Fassin. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. In French.

**FREN 1410H. Révoltes et opposition en France.**

Why are strikes and protest marches more common in France than in the United States and many other countries? A good part of the answer lies in the traditions of social and political opposition that have existed in France since the Revolution. In this course we will examine how this tradition developed by concentrating on four key historical moments: the Revolutions of 1789-1794, the Commune, the Occupation, and the 1968 uprisings.

**FREN 1410I. Sorcellerie et Renaissance: le sort de la sorcière.**

An interdisciplinary exploration of witches and witchcraft in Renaissance France based on close analysis of primary texts—confessions from trials, iconography, literary texts, and witchcraft theory. Topics include the trial of Joan of Arc, the science of demons, skepticism, and the nature of belief. Readings in Montaigne, Mauss, among others. Enrollment limited to 20. Taught in French. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1410J. War, Culture, Politics.**

Armed conflict in and involving France, from World War I to the war in Iraq. We will consider the socio-political climates giving rise to armed conflict, as well as the cultural products (journalism, memoirs, film, novels) resulting from the experience of war. Issues include colonialism, nationalism, collaboration, resistance, civil rights, international relations, and the politics of gender in wartime.

**FREN 1410K. French Culture and Civilization: La pensée française au XXe siècle.**

We will address XXth century French thinkers coming from philosophy, aesthetics, semiotics, sociology, and feminism. Readings include works by Henri Bergson, Simone Weil, Luc Ferry and Alain Badiou; Paul Valéry, Roger Caillois, and Paul Ricoeur, Emile Durkheim, Raymond Aron, and Pierre Bourdieu; Luce Irigaray and Michèle Le Doeuff. Two oral presentations and one final paper.

**FREN 1410N. Présence française en Amérique du Nord au XXe siècle.**

We will examine varieties of French spoken in Northern America (Acadian French, chiac, joul, creole) as well as the French culture and literature of Québec, New England and Louisiana. Students will choose between fieldwork in a New England francophone community of their choice or writing a solid essay on North-American francophone culture/literature.

**FREN 1410R. Images d'une guerre sans nom: The Algerian War in Literature and Film.**

Not officially acknowledged as a war by France until recently, the Algerian War of independence remains, more than a half-century later, a contested battleground in the French national consciousness. Focusing on depictions of the Algerian War in literature and film we will investigate the many taboos that still endure, most notably around the question of violence and torture, and attempt to reassess the relative "invisibility" of this conflict. Readings will include films by Gillo Pontecorvo, Jean-Luc Godard, Alain Resnais, Agnès Varda, and works by Frantz Fanon, Jean-Paul Sartre, Albert Camus, Benjamin Stora, Claire Etcherelli, Assia Djébar, and Leïla Sebbar. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. Taught in French.

**FREN 1410S. Les Français au travail: chômage et précarité dans la société contemporaine.**

This course focuses on a crucial contemporary French social issue by examining the question of unemployment and the rise of so-called precarious jobs through their representations in literature, culture, and film. Special attention will be given to questions of identity, gender, race, socioeconomic factors, and politics. Authors read include Bon, Deck, Foenkinos, and Oster. In addition we will analyze several films and read the work of journalists and sociologists. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1410T. L'expérience des réfugiés: déplacements, migrations.**

An exploration of the experience of refugees and immigrants with two components. The first component consists of close study of the French context from Decolonization up through the current refugee crisis based on literature, film, the press, and critical essays. The second component of this course will give students the opportunity to work with refugee/recent immigrant communities in Providence. This is a community-engaged course requiring substantial commitment beyond the classroom. Taught in French. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1420B. France at War.**

This course treats armed conflict from the Franco-Prussian war to the war in Iraq through readings of essays (Aubrac, Camus), fiction (Maupassant, Duras), press articles, correspondence, and film viewings (Tavernier, Chabrol, Pontecorvo). Topics include: nationalism and patriotism, collaboration, resistance, torture, civil rights, international relations, and the politics of gender in wartime.

**FREN 1420C. Gender Theory and Politics in France.**

This course explores thought, activism, and public policy in contemporary France pertaining to issues of gender and sexuality. Attention will be paid to intellectual and cultural differences between France and the US, as well as Franco-American exchanges in critical theory related to these domains (e.g. Foucault, Butler). Topics include Beauvoir's legacy and 1970's feminisms (Cixous, Irigaray, Wittig, Delphy); recent public policy debates (representative parity, marriage equality, surrogacy); sexual violence; feminism and multiculturalism (gender and national identity, anti-sexism/anti-racism, French secularism and the headscarf debate). Taught in English.

**FREN 1430. Research Seminar: Franco-American as a New England Minority Culture.**

After an intensive week of training, students choose a specific topic of research and work independently during the rest of the course. They meet with the instructor and present partial results of their research in the weekly seminar. Projects include collecting oral history in Woonsocket; research on (and in) Franco-American institutions located in the vicinity; and studies on Franco-American history, onomastics, literature, film, and press. While not required for all of the projects, a basic knowledge of French is strongly recommended. Conducted in English.

**FREN 1510A. Advanced Oral and Written French: Traduction.**

An introduction to the theory and practice of translation, this course will be designed to expand students' range and appreciation of written styles and registers and will be based on translation exercises and texts reflecting different types of written and oral communication. Texts will range from literary texts (excerpts from novels, plays, comic books...) to journalistic texts (articles from newspapers...). Class activities will also include comparative studies of translated texts, as well as grammar review and vocabulary work. Course taught in French. Written translations to and from French. Prerequisite: FREN 0600 or equivalent. Enrollment limited to 18. Instructor permission required.

**FREN 1510C. Advanced Oral and Written French: A table!**

Thematic units with different approaches to French cuisine and the French meal, such as regional cuisine, meals in literature and at the movies, radio-TV culinary shows, political and economical considerations, and, of course, a practical unit on how to compose, prepare and eat a French meal. Follows FREN 0600 in the sequence of language courses. Development of oral skills via presentations, debates, conversation, and discussion based on the various topics. Writing activities: essays, translations, commentaries, journals, creative descriptions and stories, etc. Taught in French. Pre-requisites include FREN 0600 and FREN 0610 and FREN 0620.

**FREN 1510D. Advanced Oral and Written French: L'animal Post-Moderne.**

This course will focus on depictions of animals in the present day French (and Francophone) public and cultural sphere – in literature, journalism, cinema, advertisements, the visual arts, etc. Through presentations, class discussion and reading and writing assignments (essays, short responses, a journalistic piece, an interview) students will develop their linguistic and critical skills in French while engaging thoughtfully with the course's materials and questions. Follows FREN 600 in the sequence of language courses. Enrollment limited to 18.

**FREN 1510F. Advanced Written and Oral French: Regards sur la France actuelle.**

This course will use contemporary and classic works, newspaper articles, and film – all "made in France" – to explore and analyze the myths, realities, and contradictions of France today. Through in-class discussions, debates, and presentations, students will gain a deeper understanding of the enigma and legacy of this European country that once was the center of the cultural world and an early model of democracy. Follows FREN 0600 in the sequence of language courses. Writing activities, essays, commentaries, journals, etc.. May be repeated for credit. Prerequisite: FREN 0600. Enrollment limited to 18.

**FREN 1510G. Advanced Written and Oral French: La Sociabilité à la Française.**

An exploration of French sociability, this course is designed to expand students' oral skills through discussions and presentations, as well as to help them develop their writing skills via essays, creative projects, blog entries, and use of Twitter. Students will experience the different modes of sociability through a variety of texts (novel excerpts, comic books, newspaper articles) and films, ranging from 17th-century fairytales to contemporary thinkers (Sartre, Bergson), and will be invited to reflect on their own practice of social networks through essays and debates. Taught in French.

Prerequisite: FREN 0600 or equivalent. Enrollment limited to 18. Instructor permission required.

**FREN 1510H. Advanced Oral and Written French: A nous deux la mode.**

A bird's eye view of the fashion world, we will explore the birth and evolution of the French fashion industry (from the development of department stores to the birth and rise of Haute Couture), its impact on society and social change, as well as its relationship with art and advertisement. Materials range from literary excerpts to journalistic texts, online resources, and films, and will include portraits of fashion designers, studies of iconic fashion pieces, descriptions of techniques and crafts, and analyses of fashion shows. Activities include presentations, discussion, essays, commentaries, and the creation of a trend book. Taught in French.

**FREN 1510J. Advanced Oral and Written French: Photographie.**

Follows FREN 0600 in the sequence of language courses. Development of oral and written skills via presentation, debate, conversation and discussion on a variety of topics. Through novels, articles, photographs and discussions, this course will explore the world of photography from its beginnings until today. Theory and practice; professionals and amateurs; famous people and paparazzi; photo reportage and photo studio; argentic and digital; your own photos, etc. Taught in French. Pre-requisites include FREN 0600 or FREN 0610 or FREN 0620.

**FREN 1510L. À nous deux la mode.**

A bird's eye view of the fashion world, this course will explore the birth and evolution of the French fashion industry (from the development of department stores to the birth and rise of Haute Couture), its impact on society and social change, as well as its relationship with art and advertisement. Materials range from literary excerpts to journalistic texts, online resources, and films, and will include portraits of fashion designers, studies of iconic fashion pieces, descriptions of techniques and crafts, and analyses of fashion shows. Activities include presentations, discussion, essays, commentaries, and the creation of a trend book. In French.

**FREN 1610B. To Be Determined.**

No description available.

**FREN 1610C. Advanced Written French: Atelier d'écriture.**

An advanced course in (functional or creative) writing. The workshops range from practice in interpersonal communication (letters) to essays and various forms of narration. Recommended to students returning from a study-abroad program, students with a native French background who lack formal training in writing, or post-FREN 1510 students. Exercises for each workshop plus a final writing project. Prerequisite: FREN 1510. Enrollment limited to 15. Instructor permission required. Taught in French.

**FREN 1710A. France-Afrique/Afrique-France: Je t'aime moi non plus.**

Historically, the relationship between France and Africa has been characterized by a permanent tension. We will use literature and film to reflect on the historical events and, socio-political processes that have shaped the encounter between France and Africa. How are African and French novelists/filmmakers responding to this relationship? Topics include: the Colonial Encounter, "World War II", Decolonization, Negritude and Immigration.

**FREN 1710B. Black, Blanc, Beur.**

This course examines how the ethnic make up of contemporary French society challenges its republican ideals of Liberty, Equality and Fraternity. Violent clashes involving teenagers from immigrant descents and the police are recurrent. Anti immigration policies have also become a major component of political discourse. We will use literature; film, newspapers and popular musical forms to reflect on issues such as integration, identity, violence, race and class.

**FREN 1710E. Machines de guerre: Violence et société en Afrique francophone.**

From civil war in Ivory Coast to terrorism in Mali, war and violence in Francophone Africa both provoke and respond to debates about France's colonial legacy and continued presence on the continent. Yet these phenomena have much to tell us about emerging social relations, new forms of politics, and how ordinary Africans view the future—their own, that of their countries, and of the continent as a whole. This course studies these and related questions in a variety of media, including anthropological texts, written testimonies, novels, documentary films, philosophy, and investigative journalism. Anglophone Africa will also be considered. Taught in French. Prerequisite: a course at the 0600- or 0700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1710F. Politique, démocratie, et corruption en Afrique francophone.**

What do representations of democracy (its promises as well as its shortcomings) and corruption have to tell us about postcolonial and postmillennial politics in contemporary Francophone Sub-Saharan Africa? How have these interrelated problems and discourses been negotiated in French and African literature, film, journalism, and anthropology? This course will address these and related questions in a number of national and historical contexts, paying special attention to the ways in which current events on the continent both complement and complicate our understandings of Francophone African cultural production. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown. Taught in French.

**FREN 1710G. L'Idée de l'empire dans l'imaginaire français.**

From the early nineteenth century to the 1931 Colonial Exposition in Paris and the Algerian Revolution, ideas and debates about slavery, race, and colonialism informed the ways in which French writers and intellectuals thought about empire and its relationship to national identity. This course examines how these debates took shape through contrasting imaginative conceptions of empire from the 1800s until the 1960s, when France lost most of her colonies. How did visions of empire contribute to the formation of French colonial identity, and what kind of purchase do these ideas have on contemporary French cultural and political life? In French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1710H. Villes africaines.**

This course examines space, politics, and urban life in Francophone Africa from the 1960s to the 21st century. How has the African city changed since the colonial period? And how do writers, filmmakers, and artists imagine the African city's global dimensions today? Our course will examine these and related questions as we study how cities in Francophone Africa reflect changing visions of art, politics, gender/sexuality, and literature. Taught in French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1710I. Politique, démocratie, et corruption en Afrique francophone.**

What do representations of democracy (its promises as well as its shortcomings) and corruption have to tell us about postcolonial and postmillennial politics in contemporary Francophone Sub-Saharan Africa? How have these interrelated problems and discourses been negotiated in French and African literature, film, journalism, and anthropology? This course will address these and related questions in a number of national and historical contexts, paying special attention to the ways in which current events on the continent both complement and complicate our understandings of Francophone African cultural production. Taught in French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1720A. Disenchantment and Melancholia in Postcolonial Africa.**

In the decades following independence, African novels and films were characterized by euphoria. This optimism has since been replaced by narratives of hopelessness. Rather than assuming that disenchantment and melancholia lead inevitably to pessimism, we will explore ways in which artistic forms engage the idea of a better future through a careful examination of the predicaments facing the African continent. In English.

**FREN 1720B. Foreign Bodies/Forbidden Sexualities in Africa and the Caribbean.**

The practice of homosexuality is a crime in several Caribbean and African countries. In Uganda, it is referred as "carnal knowledge of another against nature" while Zimbabwe's president Mugabe claimed homosexuals are "worse than pigs and dogs." We will explore ways in which artistic forms engage the LGBT experience within predominantly heterosexual societies. Topics include: psychoanalysis, Black feminism, Black Queer theory, HIV/AIDS, gender role socialization.

**FREN 1720C. Black Paris.**

This course is a study of Black Paris, as imagined by three generations of Black cultural producers from the United States, the Caribbean and Africa, who lived in Paris. We will investigate how the representation of Paris functions in the construction of black identities from Joesphine Baker to Shay Youngblood.

**FREN 1720E. Melancholia Africana: Loss Mourning and Survival in Africa and the Diaspora.**

Traditional beliefs, historical and cultural circumstances construct how the African understands himself/herself in relation to the world. From this construction resonates a theme of loss - loss of land; of freedom; of language; of self. Melancholia Africana incorporates loss but moreover, grapples with the external world. We will explore ways in which literature, film and music portray loss, resilience and survival.

**FREN 1900B. Figures de l'étranger dans la littérature française.**

From Montaigne to Marguerite Duras, Segalen to Jean Gené, modern French literature has been haunted by a specter: the figure of the Other (the foreigner, the "immigrant", the "bon sauvage", etc.) Various literary and philosophical texts will help us study the historical status and the various forms of these figures in modern French literature. Two short papers.

**FREN 1900F. Senior Seminar: L'Identité française.**

This course examines different ways of defining French identity across centuries by alternately or simultaneously stressing Catholicism, *le génie de la langue française*, Cartesianism, French Revolution, individualism and *les droits de l'homme*, France in the European Union, *l'exception française*, and Francophonie or, in a minor key, *l'esprit gaulois*, French cuisine, French chanson, cafés philosophiques and French films.

**FREN 1900G. French Feminisms.**

Analysis of feminist thought, activism, and creative work in France from the middle ages to the present day. Topics include: proto-feminisms, revolution and women's rights, utopian feminism, suffrage, psychoanalysis and other "new French feminisms," reproductive rights, la parité, Islamic and Muslim feminisms. Authors include: Christine de Pisan, Gournay, Poullain de la Barre, Gouges, Sand, Démar, Beauvoir, Irigaray, Wittig, Halimi, Amara.

**FREN 1900H. La France en guerre.**

Studies the rise of far-right tendencies (nationalism, anti-Semitism, legitimism, racism), beginning with the Franco-Prussian war and its aftermath, and examining key moments up to the present day. Topics include the Dreyfus Affair, the Vichy regime, the Front national. Taught in French. Prerequisite: a course at the 0600- or 0700 -level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1900K. Extrême droite en France.**

Considers the rise and evolution of far-right tendencies from the French counter-revolution to today. Topics include nationalism, anti-Semitism and the Dreyfus Affair, the Vichy regime, the Front national, Islamophobia, and homophobia. While the main focus is on France, we will give comparative consideration to issues of political extremism resonating in the US and other European nations, including national identity, populism, immigration, exclusion, and religious intolerance. This course draws on a variety of sources, fictional and non-fictional, including print journalism, novels and short stories, essays, film. For senior French Studies concentrators; instructor permission required for others. In French. Prerequisite: a course at the 600- or 700-level or equivalent proficiency. Contact the instructor to verify your proficiency if you have not taken French at Brown.

**FREN 1900L. French-American (Dis)Connections: histoire, société, culture.**

The relationship between France and the United States is one of paradoxes. Since their respective Revolutions, these two countries have displayed profound admiration for each other, but have also experienced moments of deep distrust and hostility. We will first trace the history of political, intellectual, and cultural relations between France and the United States, and then concentrate on several moments and topics from the contemporary period, including multiculturalism, gender and sexuality, popular culture, and "French theory." Readings and films in English and French; taught in French. For senior French Studies concentrators; instructor permission required for others.

**FREN 1900M. La question animale.**

This seminar studies representations of animals in French literature, visual arts, popular culture and critical thought through the 19th-21st centuries, attending to their specific cultural and material histories. We will consider the fates of animals as industrial modernity progressed (discussing in turn urban space, agriculture, the battlefield, zoos, science, meat, the beginnings of photography and cinema), and the important philosophical and ethical questions they raise. Authors include Renard, Michaux, Cixous, Roubaud, Pastoureau, Baratay, Philibert, de Fontenay, Derrida, Bailly et Despret. Taught in French.

**FREN 1970. Individual Independent Study.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Instructor permission required.

**FREN 1990. Senior Thesis.**

Independent study in an area of special interest to the student, with close guidance of a member of the staff, and leading to a major paper. Required of candidates for honors, and recommended for all senior concentrators. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**FREN 2040E. Voies et chemins: errance à travers la littérature médiévale.**

This seminar unpacks notions of displacement, migration, transformation, and alterity as they appear to us through the literature of medieval France and its global context. From the omnipresent Song of Roland to the poetic lamentations of exiled princes, much of this material might be described as the "literature of war." Texts by more willing voyagers recall the minutiae of travel and the dazzling marvels beheld in faraway lands. Legacies of conquest and civil war pierce the carefully polished surface of diverse fictions. Our sources bear witness to the after-effects of trans-cultural encounter on songs, images, forms, and ideas. Taught in French.

**FREN 2110A. Le roman renaissant.**

From the origins of medieval romance in the 12th century, this course traces the history of the genre through the end of the sixteenth century. What was the fate of the knight errant in the modern era and how did the invention of printing transform medieval romance cycles? Did the humanist novel offer a corrective to the vagaries of chivalric romance? Literary works will be read in light of theories of the novel. Readings in Chrétien de Troyes, the prose Lancelot, Rabelais, Bakhtin, Lukács, and others. Taught in French.

**FREN 2110B. Pratiques de l'aveu.**

This course examines Renaissance literature in light of confessional practices in early modern France, focusing on notions of secrecy, sexuality, and guilt as well as on knowledge and the self. The primary corpus includes not only literary texts, but also confessor's manuals, judicial handbooks, and confessions from witch trials. Readings in Foucault, Labé, Montaigne, Marguerite de Navarre, among others.

**FREN 2110C. Rhétorique et polémique à la Renaissance.**

An exploration of the performative modes of literature in light of the Renaissance's rhetorical tradition. Examines the text in a variety of rhetorical situations from poetic seduction, to the courtier's pursuit of royal favor, to the Religious Wars. Also engages contemporary theories of discourse while confronting early modern rhetorical theory with contemporary speech act theory (Austin and others). Writers include les grands rhétoriciens, Labé Montaigne, Du Bellay, Ronsard, pseudo-Longinus.

**FREN 2110D. Humanisme et Renaissance (humain, inhumain, non-humain).**

Erasmus famously wrote: "one is not born human, one becomes human." For Renaissance humanists, how does one become human, and what role do the "Humanities" play in this process? This course explores Renaissance understandings of the "human" as well as its antitheses, the inhuman, non-human, and animal. Readings include Rabelais, Marguerite de Navarre, Du Bellay, Montaigne, and La Boétie.

**FREN 2110E. "Sorcellerie et Renaissance".**

Drawing on literary studies, history, and anthropology, this course explores witchcraft from the Late Middle Ages through the Renaissance. What cultural dynamic produced the figure of the witch, caught up in the interplay of power and knowledge? Close readings of works by demonologists and their critics offer a lens for examining the making of witchcraft theory as well as its eventual demise. Other topics include the imagination and dreams, violence and the sacred. Special attention will be paid to the methodological challenges facing the scholar of early modern literary studies. Readings in Montaigne, Rabelais, Ronsard, Foucault, and Mauss, among others.

**FREN 2130A. Civilité et subjectivité au XVII<sup>e</sup> siècle.**

This course explores the effect of *civilité* on subjectivity in 17th-century France. After considering pertinent theories of subjectivity, we examine how civility links the sense of "distinction" to disgust and, more precisely, the "abject," and how this linkage changes over the course of the century under the influence of political, economic, and aesthetic forces. We pay particular attention to the ways civility constructs language, the body, sexuality, gender, and class.

**FREN 2130B. Civilité, littérature, et différences sexuelles.**

How did "politeness" shape gender identities in 17th-century France? What role did *la civilité* play in the period's conceptions of the body, sexuality, and relations between the sexes? How did literature both implement and contest the norms of civility? These questions are explored by examining conduct literature, salons and the art of conversation, "galant" poetry, male melancholy, and female cross-dressing.

**FREN 2130C. Fictions du masculin.**

The aesthetics and politics of masculine identities in seventeenth-century France. Both literary representations and case studies of historical figures are considered. Topics include: the picaresque hero, male melancholy, effeminacy, salons and women's cultural authority, sodomy, the king's body. In addition to critical readings in gender theory and cultural studies, texts by Sorel, Molière, Lafayette; iconography; satirical literature.

**FREN 2130D. Studies in French Literature of the Seventeenth Century: Les Modernités du XVII<sup>e</sup> siècle.**

By examining how recent thinkers have used the period to (re)define "classicism," "modernity," "modernism," or the "post-modern" and confronting these interpretations with selected 17th-century texts, we will explore the crucial role the century plays in French cultural, literary and theoretical debates. Readings include Barthes, Bourdieu, Derrida, Foucault and Descartes, Cyrano de Bergerac, Pascal, La Rochefoucauld, Racine, La Bruyère, and Perrault.

**FREN 2130E. Corps et esprits libertins.**

Throughout the 17th century, writers flouted religious, philosophical, political, sexual, and social norms/dogmas, provoking debate, censorship, and even persecution. This seminar will explore the themes and contexts of libertine thought and practice, as well as the attacks it occasioned in both philosophy and literature. We will study debates about skepticism, Epicureanism, sexual freedom, religious and political dissent, and will read, among others, Montaigne, Charron, Viau, Garasse, Gassendi, Cyrano de Bergerac, La Mothe Le Vayer, Ninon de L'Enclos, Pascal, Molière, La Fontaine, Saint-Evremond, and Deshoulières.

**FREN 2130F. Façons d'aimer: Discourses of Sexuality in Early Modern France.**

This course will examine both the connections and tensions among the legal, literary, philosophical, medical, and religious discourses of sexuality in early modern France. Topics such as Neoplatonism, erotomania, one-gender theory, conjugal love, cuckoldry, impotence, sodomy, and tribadism will be studied in their historical, social, and literary contexts. In addition to primary sources (selections from edicts, essays, treatises) and secondary readings (theoretical and critical), literary texts by Rabelais, Ronsard, Labé, Montaigne, Viau, Molière, Choisy, among many others. Class discussions in English or French, depending on preparation of students. Enrollment limited to graduate students or advanced undergraduates (with instructor's permission only).

**FREN 2130G. Queering the Grand Siècle.**

This seminar will approach canonical and non-canonical 17th-century literature through the lens of queer theory. Using strategies of queer critique while being attentive to literary/historical context, we will explore a selection of poetic, prose, and theatrical texts from perspectives that trouble the heteronormative and patriarchal norms of knowledge and power. Particular focus on the reception of the "Grand Siècle" in contemporary French cultural identity and poststructuralist thought. Theoretical readings by Butler, Edelman, Freccero, Foucault, Halberstam, Sedgwick; literary texts by François de Sales, Théophile de Viau, Benserade, Cyrano de Bergerac, Madeleine de Scudéry, Corneille, Molière, Racine, Bussy-Rabutin, among others. Taught in French.

**FREN 2130R. Penser et écrire le non-humain au XVII<sup>e</sup> siècle.**

Under the influence of "New Science," the 17th century witnessed dramatic shifts in ways of perceiving and relating to the natural world. Guided by theoretical and historical work in environmental humanities and with a focus on literature, we will consider how French thinkers and writers framed the relationship between humans and their non-human others (animals, plants, natural landscapes). Theoretical readings in Braidotti, Descola, Foucault, Latour; primary texts by Descartes, Cyrano de Bergerac, Cureau de la Chambre, Scudéry, Pascal, La Fontaine, Sévigné, Perrault (Claude and Charles), d'Aulnoy, among others. Taught in French.

**FREN 2150A. Bodies of Enlightenment.**

An exploration of the body in the eighteenth-century in its multiple guises: foreign and national; disciplined and idle; natural and mechanical; libertine and political. Readings in Prévost, Diderot, Rousseau, Boyer d'Argens, Sade. Critical essays by: Michel Foucault, Lynn Hunt, David Cottom, Dorinda Outram.

**FREN 2150B. Foucault et les Lumières.**

An examination of Foucault's key writings on the French Enlightenment and the confrontation of his criticism with the major works of that period. We will consider how other French theoreticians differ with Foucault in examining the Enlightenment, particularly Lyotard and Ferry. Readings in *Histoire de la folie*, *Les Mots et les choses*, *Surveiller et Punir* and *Histoire de la sexualité* and texts by Prévost, Rousseau, Diderot, Sade and others. Open to qualified undergraduates.

**FREN 2150C. Le Roman libertin: approches critiques.**

We will attempt to study the evolution of the different genres of the libertine novel in the 18th century: *roman de séduction*, *the conte*, *roman de la prostituée*. We will also examine how current approaches around issues of gender, sexuality, pornography allow for new contextualization of that novel. Authors to be read are Crébillon fils, Duclos, Godard d'Aucour, La Morlière, Boyer d'Argens, Denon and Laclos. Taught in French.

**FREN 2150D. Qu'est-ce que les Lumières?.**

A critical examination of the authors of the French Enlightenment from the point of view of the capital ideas that will forge the century: notions of universalism and otherness, notions of politics (such as reason and violence), notions of gender and race. Examines the critical reception of the Enlightenment by contemporary theorists and historians, principally Foucault, Hunt and Darnton. Readings in Graffigny, Boyer d'Argens, Diderot, Rousseau, and Sade.

**FREN 2170A. Courants poétiques du XIX<sup>e</sup> siècle, Romantisme, Modernisme, Symbolisme.**

Special attention to Hugo, Baudelaire, Rimbaud, and Mallarmé.

**FREN 2170B. Crimes écrits.**

This course focuses on fictional crime, literary criminals, and criminalized literature in 19th-century France. Topics include the romantic murderer, popular literature, the aesthetics of evil, literary trials of the Second Empire, naturalism and legal transgression. Authors to be studied include Balzac, Lacenaire, Sue, Baudelaire, Flaubert, Barbey d'Aurévilly, Zola, Maupassant, Foucault.

**FREN 2170C. Sexualités décadentes.**

A study of fin-de-siècle literature and ideology. Topics include: degeneration and the new sciences of sexology and criminology; representations of homosexuality, prostitution, and the femme fatale; and masculinity in crisis. Texts by Huysmans, Nordau, Rachilde, Zola, Lorrain, Verlaine, Krafft-Ebing, Lombroso. Secondary sources in literary criticism and contemporary theories of sexuality.

**FREN 2170D. Lyrisme et différence sexuelle.**

Seminar exploring the relationship between gender and the lyric, often deemed a "masculine" genre. We will read male and female poets of the 19th century (including Desbordes-Valmore, Hugo, Baudelaire, Verlaine, Rimbaud, and Vivien) and examine the gendering of the poem on various levels. Topics include the construction of masculine poetic identity, the possibility of a female lyric voice, homosexual traditions, gender and form.

**FREN 2170G. Decadence.**

Study of the notion of decadence in fin-de-siècle French culture. From scientific theories of degeneration to literary representations of sexual perversion, writers of the period were consumed by the specter of moral decay and social disease. This course will analyze fictional and non-fictional texts of the period by authors such as Péladan, Lorrain, Rachilde, Mendès, and Nordau.

**FREN 2170I. Naturalisme et positivisme.**

This seminar studies the naturalist literary "method" and its ideological implications in relation to 19th-century positivist thought and the disciplines it informed. Topics include scientism, anti-clericalism, republicanism, gender and social reform, and the birth of sociology. In addition to several novels from Zola's cycle, *Les Rougon-Macquart: Histoire naturelle et sociale d'une famille sous le Second Empire*, primary sources include texts by Maupassant, Comte, Taine, Littré, Durkheim. Secondary readings in the sociology of literature and cultural history.

**FREN 2170J. Naturalisme et décadence.**

In this seminar we will read seminal works associated with these two nineteenth-century literary tendencies. We will explore the antithetical nature of their aesthetic programs and the ideological implications of their differences. Moving beyond the literary text, we will consider corresponding cleavages that divided France along similar lines between the old guard (Catholic monarchists) and the new (republican secularists), between science and the Church, between Dreyfusards and anti-Dreyfusards, among other conflicting viewpoints that polarized France at the end of the century. Works by Zola, Maupassant, Huysmans, Lorrain, Péladan, Mendès.

**FREN 2170K. High Culture: Intoxicants in 19th-Century Literature and Society.**

This seminar explores the cultural significance of intoxicants in 19th-century France. Between the wine of transcendence and creation and the opiates of degeneration and disease, alcohol and narcotics played a role in antithetical discourses of fulfillment and depletion. Their idealization commonly found witnesses among poets, while the social sciences roundly condemned their deleterious effects on the material and social body. Advances in medicine contributed new intoxicants available for abuse (ether, morphine), even feeding discourses condemning alcoholism and drug use as social scourges. Primary readings include literature (Gautier, Baudelaire, Rimbaud, Zola, Lorrain), medical treatises, social policy. Taught in English.

**FREN 2170N. La Poésie et ses révolutions.**

Study of major poets of the second half of the long nineteenth century. Topics include: symbolism and decadence, vers libéré and vers libre, French prosody, prose poetry, gender and the lyric, the poetic subject. Authors read will include: Baudelaire, Mallarmé, Rimbaud, Verlaine, Krysinska, Vivien, Valéry, Apollinaire. Taught in French.

**FREN 2190C. Littératures Francophones Contemporaines. Nations d'écrivains.**

Does a writer belong to a "Nation"? To which nation does a writer belong when he or she writes in the language of his or her former colonizer? Does political independence warrant the existence of a new nation? How does literature contribute to the emergence and consolidation of a new nation? How does Francophone literature relate to French literature? Readings of major contemporary Francophone writers.

**FREN 2190D. Literary Theory of Roland Barthes and Jacques Derrida.**

These two thinkers, one from a literary and rhetorical perspective, the other speaking out of philosophy, posed in a persistent and explicit manner during the period 1965-1980 the question of literature. We will study a series of their texts that continue to provide important models for a critical approach to literary writing. Taught in English.

**FREN 2190E. Le sujet en procès.**

An engagement with 20th century literature and critical theory through a series of perspectives on the subject, including the narrative, the lyrical, the historical, the feminine, the specular. Reading fiction and poetry (Michaux, Beckett, Ponge, Simon, Djébar) alongside key theoretical writings (Deleuze, Derrida, Benveniste, Kristeva), we will consider some of the trials/processes (procès) that have marked the fate of the modern subject.

**FREN 2190F. L'Honneur des poètes.**

This course will focus on 20th century narrative attempts to give form to war, as historical and traumatic event and scene of a protagonism/narrativity in crisis. Starting with the paradigmatic battlefields of Stendhal's *La Chartreuse de Parme* and Céline's *Voyage au bout de la nuit*, we will then consider major post-1945 novels (and films) dealing notably with the second world war and the Vichy years (Perec, Simon, Duras, Resnais, Modiano, Littell, Jenni, Echenoz), along with theoretical writings on war, representation and the military-industrialized present (Baudrillard, Virilio, Chamayou, Scarry, Butler). Taught in French.

**FREN 2450. Exchange Scholar Program.****FREN 2600A. À quoi pense la littérature?**

In this seminar we will study the relationship between literature and philosophy to clarify the following questions: What kind of relationship does literature have with philosophical discourse? Does literature produce any philosophical knowledge? What kind of thought is produced in literary texts? This course will draw on works borrowed from French and Francophone literary fiction and modern philosophy. One exposé, a mid-term and a final paper.

**FREN 2600B. Gender and Sexuality in Contemporary France.**

Critical theory in France focusing on changes in the last decade in approaches to feminism, gender and sexuality. Topics include 1970s feminisms (Cixous, Irigaray); history of sexuality (Foucault); contemporary political debates such as le Pacs and la parité (Agasinski, Fraisse, Borrillo, Halimi); masculine domination (Bourdieu); gay and lesbian studies (Eribon, Bourcier).

**FREN 2600C. Théories de la littérature.**

Theory is perhaps the most over-used term in philosophy, in literature, and in the so-called Social Sciences. The main goal of this seminar is to draw a map of the theoretical landscape which has affected the study and the teaching of modern French and Francophone literature during the past fifty years.

**FREN 2600D. Théories du texte.**

Examines the major theoretical approaches to the notion of text in literature and cinema. Compares the works of literary critics (Barthes, Starobinski) to those of philosophers and film theorists (such as Deleuze, Derrida, Ropars-Wuilleumier). Significant literary works and films by Blanchot, Duras, Beckett, Godard, and Robbe-Grillet are put to the task.

**FREN 2600F. French Feminisms meet Queer Theory.**

Feminist and GLBTQ thought and activism in contemporary France, their conflicts and compatibilities, and their exchanges with American critical theory. Topics include Beauvoir's legacy and 1970's feminisms (Cixous, Irigaray, Wittig); Foucault on the history of sexuality; Bourdieu on masculine domination; recent public policy debates (*le PaCS* and *la parité*); the impact of US queer theory on GLBTQ studies in France.

**FREN 2600Z. Cinema and Deconstruction.**

Though there are only a few texts by Jacques Derrida on cinema, his thought allows us to grasp the contemporary regime of cinematic images. Reading Derrida and other authors with whom he has been in dialogue, we will use such philosophical concepts as auto-immunity or spectrality in order to analyze various filmic texts and contexts. How do images circulate, how do they contaminate each other? How can we understand the dissemination and connectedness of screens? Is it possible for a film to testify or be a witness? These are some of the questions we will approach from a deconstructive perspective.

**FREN 2610A. Discours amoureux.**

Confrontation of literary, philosophical, and psychoanalytical discourses on love in the 20th century. Authors discussed include Claudel, Proust, Bataille, Gracq, Duras, and Sarraute. Secondary readings from Foucault, Derrida, Barthes, Irigaray, Levinas, and Kristeva.

**FREN 2610C. Le récit post-moderne.**

'Postmodernism' is a word much used and misused in a variety of disciplines, including literature, visual arts, film, architecture, literary theory, history, and philosophy. Drawing from the theoretical work of essayists such as Baudelaire, Jean-Francois Lyotard, Antoine Compagnon, Roland Barthes, and Linda Hutcheon, this course will attempt to analyze defining characteristics of postmodern thought--storytelling, autobiography, anecdote, localism, etc.--in the works of major contemporary French and Francophone writers of fiction.

**FREN 2610D. Théories de l'action communicative et de l'intersubjectivité.**

Approaches communicative action from the perspectives of literary criticism, pragmatics, political philosophy, feminist criticism etc. and examines the interplay between speech and silence, politeness and directness, reciprocity and domination etc. Authors include Benveniste, Barthes, Kristeva, Merleau-Ponty, Irigaray, Bourdieu, Molière, Balzac, and Duras. Open to qualified undergraduates.

**FREN 2610E. Littérature française et cinéma.**

This course considers the relationship between cinema and literature from the perspective of adaptation. The passage from writing to screen is most often discussed in terms of fidelity of a film to an original literary work. The study of texts and films will allow us to analyze the theoretical, stylistic, and ideological stakes of adaptation. We will propose a typology in three parts: the desire for fidelity of images to text; creative interpretation and adaptation; the limits, even impossibility, of adaptation. Enrollment limited to 40.

**FREN 2620B. Groupes littéraires et esthétiques communautaires au XXe siècle.**

Examines avant-garde groups and movements, including surrealism, *Collège de Sociologie*, *Oulipo*, existentialism, *Tel Quel*, *situationnisme*, *Théâtre du Soleil*, *politique et. psychanalyse*, and *Féministes révolutionnaires*. Attempts to assess their aesthetic and political platforms to evaluate their performative strategies. Readings include (poetic) manifestos, novels, plays, and essays by Breton, Bataille, Sartre, Lacan, Barthes, Derrida, Kristeva, Cixous, Wittig, and Irigaray.

**FREN 2620C. Théories de la Production Textuelle et de l'intersubjectivité.**

Approaches textual production from the perspectives of literary pragmatics, political philosophy, or feminist criticism and examines the interplay between speech and silence, politeness and directness, reciprocity and domination, etc. Authors include Austin, Wittgenstein, Benveniste, Barthes, Kristeva, Merleau-Ponty, Ducrot, Irigaray, Bourdieu, Molière, Balzac, and Duras.

**FREN 2620D. La pensée française au XXe siècle.**

We will address XXth century French thinkers coming from philosophy, aesthetics, semiotics, sociology, and feminism. Readings include works by Henri Bergson, Simone Weil, Maurice Merleau-Ponty, Luc Ferry and Alain Badiou; Paul Valéry, Roger Caillois, and Paul Ricoeur; Émile Durkheim, Raymond Aron, and Pierre Bourdieu; Luce Irigaray and Michèle Le Doeuff. Two oral presentations and one final paper.

**FREN 2620E. Discours amoureux.**

We will discuss love novels/plays (by Proust, Claudel, Breton, Duras, Sollers, Ernaux, Redonnet) and essays on love by Barthes, De Rougemont, Bataille, Kristeva, Lévinas, Irigaray.

**FREN 2620F. France-Afrique / Afrique-France: Je t'aime moi non plus.**

Historically, the relationship between France and Africa has been characterized by a permanent tension. We will use literature to reflect on the historical events and, socio-political processes that have shaped the encounter between France and Africa. Topics include: the Colonial Encounter, "World War II", Decolonization, Negritude and Immigration.

**FREN 2620G. Writing the Postcolonial Today: New Politics of Form.**

Close reading of selected texts by major Francophone writers. Attention to postcolonial criticism, politics of form and role of intellectual. Focus on re-appropriation of history, writing of violence, migration.

**FREN 2620H. The Francophone Routes of Postcolonial Thought.**

One of the more striking omissions from the founding theoretical work of postcolonial studies, *The Empire writes Back* (1989), is Francophone writing in general and the Francophone Caribbean in particular. Nevertheless, the Francophone Caribbean maintains a shadowy yet powerful presence in postcolonial thought. The course sets out both to resituate francophone writing in the blindspots of postcolonial theory and to explore the way in which a postcolonial approach liberates writing in French from what some see as the neocolonial label of francophonie.

**FREN 2620K. Metaphor/Matter/Time.**

In this collaborative seminar we will consider the flickering edge between metaphor and materiality in the shadow of the Anthropocene. Weekly discussions will be built around a series of "threshold sites"—including Sea, Sun, Silk, Plastic, Forest, Photograph, Shell, Horse, Whale—in which "matter" and "figure" may be seen to be simultaneously in relation and at odds. We will endeavor to think metaphorically as the imbrication of materiality and semiosis, and in its relationship to ecological time, through readings from Lucretius, Melville, Coleridge, Ponge, Moore, Bervin, Barad, Haraway, Derrida, Ricoeur, among others. Taught in English.

**FREN 2900. Theory and Methods of Foreign Language Teaching.**

Introduction to the theoretical and practical aspects of foreign language learning and teaching. Specific topics include theories of language acquisition, an overview of teaching practices and the principles underlying them, selection and evaluation of textbooks, teaching materials, and learner variables. Students observe beginning language courses and do micro-teaching. Taught in English. Undergraduates may enroll with instructor's permission.

**FREN 2970. Preliminary Examination Preparation.**

For graduate students who have completed their course work and are preparing for a preliminary examination.

**FREN 2980. Reading and Research.**

Work with individual students in connection with special readings, problems of research, or preparation of theses. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**FREN 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**FREN XLIST. Courses of Interest to French Concentrators.**

## Center for Geometric Computing

The Center for Geometric Computing, founded in the summer of 1995, consists of members of the faculty of the Department of Computer Science and their students. The Center was initially established to enhance the visibility of a major research effort funded by the Army Research Office and the National Science Foundation. The main objective of the Center is to facilitate the transfer from basic research in computational geometry to several applied areas.

Over the years, the Center has expanded its core geometric computing research focus into new strategic directions with significant potential for technological and economic impact, including applied cryptography, computer security, cloud computing, data security, graph drawing information visualization, and metrology. Funding for research in the above areas is currently provided by NSF and NetApp. Members of the Center are Professors Roberto Tamassia (Director), Franco P. Preparata (past Director), and Bernardo Palazzi. The Center frequently hosts internationally known visitors participating in joint projects.

## German Studies

### Chair

Zachary Sng

The Department of German Studies is a vibrant intellectual community with strong ties to the full range of critical inquiry that characterizes the humanities at Brown. It focuses its research and teaching on German literature, culture, and critical thought (from German Idealism and

Romanticism to the Frankfurt School and beyond), with a comparative and transdisciplinary orientation. It offers both the B.A. and the Ph.D. in German Studies, affording its students – from beginning language learner to advanced doctoral researcher – the opportunity to combine their interests in the literary, cultural, and intellectual production of the German-speaking countries with a wide variety of complementary pursuits, including philosophy, aesthetics, history, music, cultural theory, psychoanalysis, and film, among others. The Department encourages this approach through its flexible yet rigorous curriculum; intense research and teaching collaboration with faculty in related Brown departments and from partner institutions in Europe; rich and varied course offerings in both German and English; as well as attractive study abroad opportunities in Berlin and Tübingen.

For additional information, please visit the department's website: <https://www.brown.edu/academics/german-studies/>

## German Studies Concentration Requirements

German Studies exposes students to the language, literature, and culture of the German speaking areas of Central Europe. Concentrators combine intensive study of the German language with interdisciplinary studies by complementing courses from the German Studies core program with courses from other departments that deal with topics from the German cultural tradition. The quest for national identity that dominated German history in the nineteenth and twentieth centuries has been augmented by contemporary Germany's efforts to come to terms with its past and create new ways of dealing with diversity. Our curriculum therefore looks back at the German literary, cultural, and historical tradition, examining figures from Goethe or Christa Wolf to Marx, Freud, Nietzsche, and Heidegger, alongside the "texts" of contemporary German media, including television, film, and music. Most concentrators study abroad for one or two semesters.

\*In spring 2017, Professor Jane Sokolosky will serve as concentration advisor. Professor Kristina Mendicino will return as concentration advisor in fall 2017.

### Standard program for the A.B. degree

Many students elect to complete a double concentration, combining German Studies with one of the above areas, or with fields such as International Relations or Economics, Comparative Literature or History of Art and Architecture.

Knowledge of the German language is not required for declaring a concentration in German Studies. However, since language fluency is the basis for sophisticated understanding of German culture, students must meet a language requirement by the time they graduate.

### Concentration Requirements

- Nine courses beyond GRMN 0400 or GRMN 0450;
- At least six of the nine courses must be at the 1000-level (or higher);
- Two of the 1000-level courses must involve writing assignments in German, and students must obtain at least a grade of B in these courses;
- At least five of the nine courses must be taken in the Department of German Studies (or four if a student spends a whole year in Germany on Study Abroad);
- Completion of a Senior Seminar (i.e. a course from the German Studies 1900 series) as part of the five courses within the Department of German Studies; and
- If a student studies abroad for one semester, as many as four courses, in the case of two semesters, as many as five courses, from study abroad may count toward the concentration.

GRMN 0500F	Twentieth-Century German Culture
GRMN 0600C	From Faust to Freud: Germany's Long 19th Century
GRMN 0750B	Tales of Vampirism and the Uncanny

## Honors

Candidates for honors will be expected to have a superior record in departmental courses and will have to be approved by the Department of German Studies. Honors candidates must take one additional course at the 1000-level from the German studies offerings and present an acceptable Senior Honors Thesis. The additional course may be used for preparation of the honors thesis. Students are encouraged to discuss their thesis topics with the concentration advisor no later than the third week of classes in Fall of their Senior year.

## German Studies Graduate Program

The department of German Studies offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) degree. The A.M. degree is only awarded as a transitional degree for Ph.D. candidates and is not open for admission for non-Ph.D. applicants.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/german-studies>

## Courses

### German Studies

#### GRMN 0100. Beginning German.

A course in the language and cultures of German-speaking countries. Four hours per week plus regular computer and listening comprehension work. At the end of the year, students will be able to communicate successfully about everyday topics. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade submitted at the end of the course work in GRMN 0200 covers the entire year and is recorded as the final grade for both semesters.

**GRMN 0110. Intensive Beginning German.**

An intensive, double-credit language course that meets five days a week for 9 hours and focuses on speaking, listening, reading and writing skills and the cultures of the German-speaking countries. At the end of the semester, students will be able to communicate successfully about everyday topics relating to the university, jobs, daily life and traveling. Ideal for undergraduate students interested in learning German for study abroad or for concentration requirements and for graduate students interested in starting their foreign language requirements. The course is designed for new students of German, regardless of any previous experience with German.

**GRMN 0120. German for Reading.**

This course prepares students to read and understand German texts from a variety of disciplines and in various genres. This intensive introduction to German grammar and syntax is for students without prior knowledge of German, but also for those students with some background in German who wish to review and master German grammar. The student who successfully completes this course will have the necessary foundation for reading and translating texts from German into English.

**GRMN 0121. German for Reading.**

This online course prepares students to read and understand German texts from a variety of disciplines and genres. This intensive study of German grammar and syntax is for students without prior knowledge of German and for students with some background in German who want to review and gain better mastery of grammar. Students who successfully complete this course have the necessary foundation for reading and translating texts from German into English.

Course is open to undergraduates. Graduate students must email Jane\_Sokolosky@brown.edu to enroll. May be taken for a grade or S/NC but students may NOT enroll as audit.

**GRMN 0200. Beginning German.**

A course in the language and cultures of German-speaking countries. Four hours per week plus regular computer and listening comprehension work. At the end of the year, students will be able to communicate about everyday topics and participate in the annual film festival. This is the second half of a year-long course. Students must have taken GRMN 0100 to receive credit for this course. The final grade for this course will become the final grade for GRMN 0100.

**GRMN 0300. Intermediate German I.**

Focuses on deepening students' understanding of modern German culture by reading texts and viewing films pertinent to Germany today. Intended to provide a thorough review of German grammar and help students develop their writing, reading, listening, and speaking skills. Frequent writing assignments. Four hours per week. Recommended prerequisite: GRMN 0200.

**GRMN 0400. Intermediate German II.**

An intermediate German course that stresses improvement of the four language skills. Students read short stories and a novel; screen one film; maintain a blog in German. Topics include German art, history, and literature. Frequent writing assignments. Grammar review as needed. Four hours per week. Recommended prerequisite: GRMN 0300.

**GRMN 0450. Intensive Intermediate German.**

Open to students participating in Brown in Berlin or Tübingen, this is an intensive intermediate course which meets 20 hours per week for one month in Berlin. Students work on all four language skills through daily reading, writing and speaking assignments. The course introduces students to contemporary German literature, culture and politics. Prerequisite: GRMN 0300 or equivalent. May not be taken for credit by students who have completed GRMN 0400.

**GRMN 0500A. Cold War Germanys and the Aftermath.**

The year 1990 unifies Germany and divides two decades in German history. The course investigates how self identification and the experience of present time were depicted in German literature and film in East and West in the 80s and 90s. Oral and written skills in German are furthered while deepening participants' understanding of Germany's cultural and social situation. In German. Prerequisite: GRMN 0400 or permission.

**GRMN 0500B. From Zero Hour to the Wende.**

An exploration of postwar German culture through the study of literary and film texts. Oral and written skills in German are furthered while deepening participants' understanding of the prehistory of contemporary Germany. In German. Prerequisite: GRMN 0400 or permission.

**GRMN 0500E. The Presence of the Past: German Literature and Film (1945-present day).**

Exploration of ways in which the German past, through cultural materials, including literature and film, played a role in the construction and deconstruction of the Berlin Wall, the two Germanys, and contemporary Germany. German oral/written skills are furthered while deepening participants' understanding of present-day Germany. In German. Prerequisite: GRMN 0400 or permission.

**GRMN 0500F. Twentieth-Century German Culture.**

A broad exploration of twentieth-century German culture using many kinds of written and visual texts (e.g. literature, journalism, film, art). While continuing to work on all four language skills (speaking, listening, reading, writing) students will gain more intensive knowledge about German culture, society, and history. In German. Recommended prerequisite: GRMN 0400.

**GRMN 0600B. Was ist Deutsch?.**

In this course we will examine some of the ideas and myths that became entangled with the emerging notion of a "German" identity in the eighteenth and nineteenth centuries. Some of the terms that we will discuss include 'Kultur,' 'Bildung,' 'Freiheit' and 'Gesellschaft,' all of which have rich semantic histories. Conducted in German. Recommended prerequisite: one course in the GRMN 0500 series.

**GRMN 0600C. From Faust to Freud: Germany's Long 19th Century.**

In the 19th century, a fundamental renegotiation took place about what it means to be German. Literary, aesthetic, and philosophical discourses played a decisive role in these deliberations on German identity. We will study seminal texts from these fields and discuss how they shaped German self-understanding in the 20th century and beyond. Readings by Goethe, Büchner, Stifter, Wagner, Nietzsche, Raabe, Fontane, George, Freud, among others. In German. Prerequisite: GRMN 0500.

**GRMN 0750A. Faust and the Faust Legend.**

Variations on the Faust theme focus on the role of knowledge in modern society. How do we define what we know? How do we accommodate knowledge with belief? What are the limits of human knowledge and can they satisfy us? Texts from the Reformation to the present: Marlowe, Calderon, Goethe, Turgenev, Mann, Bulgakov, Kerouac, Havel. In English. Enrollment limited to 19 first year students.

**GRMN 0750B. Tales of Vampirism and the Uncanny.**

This course compares literary texts of horror and haunting in English and German Romanticism. The psychoanalytic foundations of vampirism are discussed to enable students to boldly go beyond mere fandom and engage these texts on a more sophisticated level. Readings by Walpole, Coleridge, Poe, Tieck, E.T.A. Hoffmann and others. In English. Enrollment limited to 19 first year students.

**GRMN 0750C. Crime Fiction: The Global Hyper-Genre.**

Twenty-five percent of all new literary books worldwide are crime fiction. As a means of a society to reflect upon itself, crime fiction reflects how certain cultures deal with the dialectics of threatening and securing civic order, how they depict mentalities, traditions, topographies, or cultural chance. In English.

**GRMN 0750D. The Poetics of Murder: Crime Fiction from Poe to the Present.**

In this course, we will trace the literary and cinematic depiction of mystery and mayhem from the earliest manifestations of the genre to the present. Texts will include examples from the "Golden Age," the hard-boiled mode, the police procedural, and historical crime fiction. Enrollment limited to 19 first year students.

**GRMN 0750E. Reading Film: An Introduction to German Cinema.**

What is it that fascinates us about cinema? What desires and drives have held us in thrall to the moving image? This seminar introduces you to writing about film, not just within the specific field of media studies but within the humanities as a whole. We will examine 12 filmic examples (ranging from early silent film to contemporary popular cinema) alongside a selection of theoretical and historical readings. The course will impart the basic skills needed to write in a critical, reflective, and rigorous way about film. For those interested in film in the context of any humanities field. Enrollment limited to 19 first year students.

**GRMN 0750F. Historical Crime Fiction.**

There is almost no time period that has not been covered by historical crime fiction. From ancient Egypt and Rome to 18th century China, historical crime fiction has complemented and contested our knowledge of history. In this seminar, we will do some extensive time travel and explore how crime fiction explores the past and challenges our understanding of bygone times. Readings of texts by Ellis Peters, Umberto Eco, Peter Tremayne, Lindsey Davis, Alan Gordon, Robert van Gulik, Laura Rowland, among others.

**GRMN 0900B. Great Works from Germany.**

Cultural and historical analysis of some of the most significant German texts from the past two centuries. Writers: Lessing, Thomas Mann, Günter Grass, Christa Wolf. Philosophers: Kant, Marx, Nietzsche, Freud. Sections: Enlightenment and its limits, liberation and oppression, and love and death. Students will give one presentation in class and write a final essay. In English.

**GRMN 0900C. Introduction to German Literature.**

This survey course will give a historical overview of the main periods and genres of literature in German from the eighteenth to the early twentieth century. We will also consider how literature relates and contributes to the cultural, intellectual, and political history of Germany. In English.

**GRMN 0900D. History of the Holocaust (JUDS 0902).**

Interested students must register for JUDS 0902.

**GRMN 0990B. The German Novel in the 19th and 20th Century.**

The modern and postmodern German novel provides some of the most intriguing reading in the history of Western culture. From 19th century realism to 20th century postmodernism, these authors have commented on political events, provided historical hindsight, analyzed the German psyche, and initiated literary innovations that would have a profound impact on world literature and captivate readers worldwide. Works by Fontane, Kafka, Hesse, Mann, Grass, and Sebald, among others. In English.

**GRMN 0990C. Introduction to Scandinavian Literature.**

An introduction to major works of Scandinavian writers, painters and filmmakers over the past 150 years. Figures include Kierkegaard, Ibsen, Strindberg, Munch, Hamsun, Josephson, Sodergran, Lagerkvist, Vesaas, Cronqvist, August and Vinterberg, as well as children's books by Astrid Lindgren and Tove Jansson. In English.

**GRMN 0990D. The German Novel From Classicism to Realism.**

What is a novel, and how did it emerge as such a dominant genre in the course of the 18th and 19th centuries? This course introduces some of the most important German prose works prior to the 20th century, including texts by Goethe, Novalis, Hoffmann, Droste-Hülshoff, and Stifter. We will begin with the novel's earliest classical forms, follow its development in tandem with genres such as the fantastic tale and the novella, and end with a discussion of realism. All readings and discussions in English; no German language proficiency required.

**GRMN 0990E. The Rhine River: An Aesthetic, Environmental, and Political History.**

From Hölderlin to Hugo, cannonballs to canalization, this course examines representations of Europe's most important waterway in the modern period. Although it has long been seen as a "natural" border between France and Germany, the Rhine River has been anything but undisputed. Both the French and German nationalist movements claimed the river as their own, spawning a bi-lingual catalogue of songs, poems, and historical legends. We will approach the Rhine from an interdisciplinary perspective, with readings from economists, environmentalists, historians, and cultural studies scholars. We will be aided by a vast array of primary source material. Taught in English.

**GRMN 0999M. Marx and Money in Modern Germany.**

No critique of capitalism has been more enduring than Karl Marx's nineteenth-century account of European finance and industry. We will engage Marx's work alongside a close reading of the societies Marx sought to critique. We will also contextualize the work of Marx's contemporaries and successors, including Engels, Simmel, Sombart, as well as look at the continuation of the "capitalism debate" in Weimar and Nazi Germany. Our focus on the societies in which these writings emerged, allows for a less obstructed view onto these economic and social ideas. Issues of religion, gender, politics, militarism, and globalism will be considered. In English.

**GRMN 1090. Advanced Written and Spoken German.**

Designed to increase the range, fluency, and accuracy of idiomatic expression through written and oral practice, and to improve students' reading skills of progressively more difficult authentic texts from a variety of subject areas. Discussions, group projects, and oral reports. Review of selected grammar topics, systematic vocabulary building. Not to forget: "Deutsch macht Spass!" In German. Recommended prerequisite: one course in the GRMN 0600 series.

**GRMN 1200C. Nietzsche - The Good European.**

Nietzsche prided himself on his transnational identity. He loved German literature and was himself a writer of the first rank. Yet he was critical of the culture and the politics of his nation and he loved the literatures and cultures of many other nations. We will study his philosophical works with a view to his criticisms of *Deutschtum* and his affirmation of other traditions—starting with the Greeks, for by profession he was a classicist. We will also study Nietzsche's journeys—for he was convinced that the places in which he thought and wrote were essential to his thinking and writing. Enrollment limited to 40.

**GRMN 1200D. Repetition: Kierkegaard, Nietzsche and Freud.**

A study of the concept and the textual practices of repetition. We will consider the relation between repetition and transcendence, history, memory, and art. The course will focus on how the category and the event of repetition problematize identity, interpretation, and expression. Issues include religion and aesthetics of repetition (Kierkegaard); history and the eternal return (Nietzsche); repetition compulsion and the death drive (Freud). We will especially be interested in how the theme of repetition informs the way these thinkers write and what problems this poses to interpretation and understanding. In English.

**GRMN 1200I. Show Trials: The Aesthetics of Law in Literature and Film.**

J'accuse! Zola's public denunciation of the French President, accusing him of anti-Semitism and unlawful imprisonment, has become emblematic for theatrical politics and dramatized trials. Even though their outcomes were decided in advance, the performance of show trials – from the Dreyfus affair to the Auschwitz trials and the prosecution of Saddam Hussein – have been indispensable for the political formation of society. In this course, we will analyze the literary, cinematic, and philosophical reception of such performative trials, ranging from Kafka's Trial and Arendt's Eichmann in Jerusalem to Dreyer's The Passion of Joan of Arc and Kramer's Judgment at Nuremberg.

**GRMN 1320A. German Aesthetics from Lessing to Heidegger.**

A survey of some of the most important German-language contributions to theories of art. Authors include Lessing, Kant, Schiller, Hegel, Nietzsche, Benjamin, Adorno, and Heidegger. Emphasis will be on how aesthetics intersects with literary theory and the idea of critique, and also how it contributes to discussions about knowledge, subjectivity, and power. All readings in English translation.

**GRMN 1320C. Goethe's Children.**

The name "Goethe" looms large over modern German literature, but what are founding figures without the daughters and sons that question and challenge their authority? This course offers a broad introduction to Goethe's life and works, focusing on themes and questions of youth and childhood in his writings. Readings include canonical works such as *The Sorrows of Young Werther*, *Iphigenia in Tauris*, *Wilhelm Meister's Apprenticeship*, *Faust*, and *Elective Affinities*. We will also examine Goethe's legacy by looking at musical, theatrical, and philosophical responses to images of youth and childhood in his works. [Taught in German; all students welcome.]

**GRMN 1320D. Goethe.**

Selected readings of Goethe's theater plays, novels, and poetry. Explores the meaning of reading Goethe today, at the 250th anniversary of his year of birth, and investigates the activities around the celebration of this anniversary. Time permitting, we consider versions of Goethe's texts in film and other media. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1320E. Classical German Literature: Goethe und die Klassik.**

The anthropology and aesthetics of Weimar Classicism. Readings of major works by Johann Wolfgang Goethe and Friedrich Schiller, with discussion of selected texts by Herder, Humboldt, and Kant. In German. Pre-requisite: GRMN0600 or placement. Prerequisite: GRMN 0600 or permission.

**GRMN 1320F. Eighteenth-Century German Aesthetics.**

A survey of important aesthetic writings from the period, including some texts of Winckelmann, Lessing, Schiller, Goethe, and Hamann. Major questions to be treated include the role of imitation, the concept of form, the relationship between the beautiful and the good, and formation of aesthetic judgments. Course will conclude with selections from Kant's *Critique of Judgment*. In English.

**GRMN 1320G. Drama and Religion.**

Lessing used the stage as his "pulpit" when forbidden to publish in religious disputes. Some dramatists addressed particular religious views in tragedies or satiric comedies; others staged religious themes more generally or in metaphysical imagery. We examine the variety, nature and context of these stagings in texts by major German authors: L. Gottsched, Gellert, Lessing, Schiller, Goethe, Kleist, and Hölderlin. In English, with a German section (TBA) for those able and interested.

**GRMN 1320I. What is an Image? German Aesthetics and Art from Lessing to Heidegger.**

A survey of some of the most important German-language contributions to theories of art, alongside a discussion of some major art-works from the German tradition. Authors include Lessing, Kant, Schiller, Hegel, Nietzsche, Benjamin, Adorno, and Heidegger. Emphasis will be on how aesthetics intersects with literary theory and the idea of critique, and also how it contributes to discussions about knowledge, subjectivity, and power. All readings in English translation. In English.

**GRMN 1320O. Freudian Inspirations: Psychoanalysis and the Arts.**

This course engages with the central concepts and motifs of Freud's psychoanalytic theory and how they relate to works of literature, art, and film. What do Sophocles, Ovid, and Hoffmann tell us when we read *Oedipus Rex*, *The Metamorphoses*, and *The Sandman* today? How does our understanding of these texts differ from or resemble Freud's reading of them? And when we engage art that cites psychoanalytic concepts—such as Hitchcock's *Marnie* or Lars von Trier's *Melancholia*—do we recognize the Freud we encounter in our readings of his own texts? (In English; all students welcome)

**GRMN 1320P. Friends and Adjuncts: J. P. Hebel, Kafka, Benjamin, Sebald.**

He was a favorite among seminal German writers and thinkers such as Goethe, Kafka, and Walter Benjamin. Nonetheless, Johann Peter Hebel's work remains largely unknown outside of German-speaking countries and is generally ignored by the academy. In this seminar we will read Hebel's poetry and prose alongside some of the seminal works of those who wrote and thought with him as unexpected friends or adjuncts. In English.

**GRMN 1320S. Reading Friedrich Hölderlin; An Introduction.**

The course is intended as an introduction to the reading of Hölderlin as a poet, so the focus will be on close reading and on intense and detailed discussions of the texts in class. To that end it is indispensable to study the texts in the original German. Available English translations will be used in addition. Of course, linguistic difficulties in understanding the texts (which are, by the way, by no means restricted to non-German speakers) will themselves form an integral part of the seminar discussions. Critical texts will be read in English.

**GRMN 1330A. The Individual in the Age of Industry.**

This seminar discusses the second part of the 19th century, which is distinguished by nation building, industrial revolution, advance of science, realism and belief in progress but also nihilism and cultural pessimism. We investigate how the new age of pragmatism and the "technological sublime" is reflected in short stories by major German writers such as Adalbert Stifter, Karl Gutzkow, Theodor Storm, Gottfried Keller, Wilhelm Raabe, Theodor Fontane, Arno Holz and Gerhart Hauptmann. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1340A. Crime and Punishment- Introduction to German Mystery Texts and Films.**

This course provides an exploration of German crime, detective and mystery texts and films ranging from the early 19th century to contemporary fiction. In addition to exercising hermeneutic skills, this course aims at improving proficiency in oral and reading comprehension, as well as speaking and writing skills, with an emphasis on vocabulary expansion, advanced Grammar review and stylistic development. This course is recommended for students interested in a combined introduction to literature and high-level language learning. Prerequisite: GRMN 0600 or permission.

**GRMN 1340B. Guilt Management: Postwar German Culture.**

The central theme of postwar German Culture, from the so-called "Zero-Hour" in 1945 to postunification, was dealing with the Nazi past. We discuss how writers, filmmakers, and critics tried to establish a public discourse on guilt. Films and readings by Mitscherlich, Syberberg, Reitz, Müller, Grass, Christa Wolf, Sichrovsky, Biller, Chaim Noll, and others. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1340C. Jahrhundertwende 1900.**

Modernism and its discontents in German literature around 1900. Examines naturalism, Jugendstil, Dada, and early expressionism. Poetry, fiction, and drama by Nietzsche, Th. Mann, Stefan George, Rilke, Kafka, Wedekind, Hofmannsthal, Schnitzler, Hauptmann, and others. Operas by Wagner and R. Strauss. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1340D. Modern German Prose, 1978-1998.**

Since the end of the 1970s, East and West German prose has tended to concentrate more on everyday life than on the overbearing questions of memory that were so central to immediate postwar authors. The changing function of literature in Germany is explored by reading representative prose fiction by major authors such as Becker, Delius, Hein, Strauss, and Walser. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1340I. Turn of the Century.**

The most important issues in literature around 1900 will be discussed: the critique of language, media, psychoanalysis, urbanization, technical progress, the construction of the subject and a growing sense of isolation. Texts by Hofmannsthal, Rike, Schnitzler, Robert Walser, Georg Simmel, Freud, Nietzsche, Hermann Bahr and others. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1340J. The Works of Franz Kafka.**

We will read a selection of texts by Kafka (including short stories, a novel, and journal entries) in order to explore his importance for the aesthetics of modernity. Topics include: representation of the law, literature and religion, the role of the paternal, and guilt. Frequent short papers based on close reading of texts, and a longer final paper. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1340K. Unmittelbar nach 1945: Literatur und Film in Deutschland.**

Often called "Zero Hour," the period immediately following the end of the Second World War was one of turmoil and uncertainty in Germany. An enormous cultural production sprang up under extremely difficult conditions. Texts and films by Heinrich Böll, Wolfgang Borchert, Alfred Andersch, Wolfgang Staudte, Helmut Käutner, and others. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1340L. The Modern Period.**

Explores the fascinating flowering of modernity in Germany, including the period around 1900 (adolescent Angst and the new Broadway version), Weimar culture (revolution, women's emancipation), Nazi culture, and exile literature in socio-historical context; including examples from film, art, and popular culture. Authors may include: Wedekind, Brecht, Kafka, T. Mann, Toller, Keun. In German. Recommended prerequisite: GRMN 0600 or equivalent.

**GRMN 1340M. Kafka's Writing.**

Writing--vocation or duty, gift or curse, poison or antidote? This course provides an introduction to Kafka's stories, novels, journal entries, and letters, with a focus on his complicated, tortured relationship to the idea and practice of writing. We will explore how the difficulties of this relationship generate an enigmatic, tragi-comic oscillation between hope and despair that continues to fascinate readers today. This is a writing-intensive course, and the frequent short assignments will involve drafts, revisions, and individual consultations, with the aim of getting you to think critically about your own relationship to writing about literature. In English. Enrollment limited to 40. First year students require instructor permission.

**GRMN 1340Q. Vergangenheitsbewältigung: German Literature of Memory.**

This course will examine one of the most loaded terms in German Studies, "the coming to terms with the past" or rather "the mastering of the past", which concerns German strategies of dealing with the atrocities of World War II and the Holocaust. Thus, this course will focus on the literary engagements with issues of trauma, memory, and remembrance. Authors include Adorno, Celan, Klüger, Grass, Weiss, Wolf, Müller, Timm, Kluge, and Sebald. The course will also have a closer look at contemporary debates regarding "Vergangenheitsbewältigung" and the culture of memory in Germany itself. In German. Prerequisite GRMN 0600.

**GRMN 1340V. Mis(s)Education: Feminist Undoings of the Bildungsroman.**

Declared central to Western history and culture by Freud, the Oedipal complex survived in manifold literary reiterations-- particularly the Bildungsroman, which privileges the father as primary educator and eventual adversary. This course challenges the genre's patriarchal premise by shifting focus to female representations, in order to reconsider the traditionally 'masculine' discourse on Bildung. As a dynamic construct, femininity allows to dispute the historically patriarchal paradigm of knowledge acquisition and the precarious position of woman beyond psychoanalysis. Departing from Goethe's Wilhelm Meister's Apprenticeship, we will open the genre's paternal margins toward works such as Arendt's Eichmann in Jerusalem and Satrapi's Persepolis.

**GRMN 1340Y. Germans and Jews.**

This introductory course will examine the fraught relationship between Germans (and Austrians) and Jews in Germanophone writing across genres from the Enlightenment to the mid- 20th century. We will consider writing by Jewish authors, images of Jews, and the themes of Jewishness and Germanness, emancipation, assimilation, anti-semitism and Zionism. Students will learn analytic reading, writing and research skills. Texts by Lessing, Mendelsohn, Veit, von Arnim, Heine, Marx, Droste-Hülshoff, Laske-Schüler, Kafka, Benjamin, Scholem and Arendt, among others. Readings and discussion in English.

**GRMN 1340Z. Reisen und Entdecken.**

Globalization is a phenomenon that changes basic structures of contemporary life. The political, social, economic and cultural spheres are connected worldwide & influence each other like never before. German literature reflects these developments & reflects on them in a multitude of ways. One of the modes in which literature after the spatial turn renegotiates space, time, & identities, are contemporary travel accounts, in which encounters w/the other are shown to be cultural constructions that are always influenced by preconceived ideas and ideologies. Readings of texts by Christoph Ransmayr, Sten Nadolny, Felicitas Hoppe, Daniel Kehlmann, and others. Prereq: GRMN 600 or equivalent. In German.

**GRMN 1341A. Kafka (Im)paired.**

Kafka's writing might be profoundly singular, but it also challenges us to think about dualities. His texts teem with thematic dyads and character pairs that are as memorable and genial as they are incommensurable, uncanny, absurd, and disastrous. Our seminar takes on these unlikely couplings alongside the question of what it means to 'pair' Kafka with philosophy, film, history, post-modernity, etc. Readings and discussions in English, with German originals available to students with the necessary proficiency.

**GRMN 1440A. Dada-Performance and Digital-Interactivity.**

This course investigates the invention of performance art in German Dada and its legacy and further development in contemporary interactive art in digital media. Both phenomena are discussed with respect to their aesthetic, philosophical, and social roots and intentions. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1440C. Poetry and the Sublime.**

We will examine some theories of the sublime, and read them alongside selected poets who take up certain related questions about representation, perception, and power. The goal will be to come to a better understanding of why the sublime is important as a category in thinking about the relationship between literature, philosophy, and history. Texts may include: Longinus, Schiller, Kant, and Paul de Man on the theory of the sublime, and poetry by Hölderlin, Wordsworth, Rilke, and Celan. In English; reading knowledge of German helpful but not required.

**GRMN 1440D. Modernity and Its Discontents: The German Novella.**

After the failed revolution of 1848, the German bourgeoisie had to curb its desire to control the sphere of politics. At the same time, the effects of modernization started to manifest themselves in full force. We will discuss how the revolutionary changes of the second half of the 19th century in Germany were worked through in literature, and specifically in the realist novella. Readings by C.F. Meyer, Keller, Stifter, Storm, Raabe, Fontane, Mörike, and Heyse. In German. Recommended prerequisite: one course in the GRMN 0600 series.

**GRMN 1440E. Märchen.**

Fairy tales in German are usually associated with the Grimm brothers, but there is a rich tradition of popular (*Volksmärchen*) and literary (*Kunstmärchen*) fairy tales going back further and continuing into the present. We read a representative sample, consider typical features of the genre, and discuss the role of *Märchen* in shaping ideology. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1440F. Lyric Poetry From the Middle Ages to the Present.**

Broad exploration of German poetry, including intersections between poetry/music/art: spiritual/worldly (medieval troubadours, Baroque); classical Greece/modern Germany (Goethe, Schiller, romantics, art songs), poetry/politics (Heine, Brecht), expressions/symbols (Rilke, expressionism), poetry after Auschwitz (Celan, Bachmann), contemporary reflections on history (V. Braun), poetry between cultures (Turkish-German poets, hip-hop). Intensive reading, discussions and vocabulary building. In German. Recommended prerequisite: one course in the GRMN 0600 series.

**GRMN 1440G. Talking Animals and the Politics of World Literature.**

We have encountered talking animals within literature for over four thousand years. Alongside the Fables of Aesop, there are comparable animal stories from Ancient Babylon, Egypt, and from the Indian-Arabian-Persian cultural space, whose distribution was just as far-reaching. Animal fables appear easy to understand and universally valid. But do we really understand what it means when animals talk in texts? This course will employ current approaches to human-animal-studies alongside concepts of world literature to examine why animals are made to talk, what functions animal stories have, and what the conditions for their dissemination are. [In English; all Brown students welcome.]

**GRMN 1440H. Projections of America.**

Since its discovery, 'America' has served as a projection screen for a variety of images of the 'New World': as utopia, as harbinger of modernity, and as the origin of political, economic, and cultural imperialism. Readings of the changing and shifting image of America in German literary and journalistic texts from the 18th century to the present (Lenau, Goethe, Heine, Sealsfield, May, Frisch, and others). In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1440L. German Lyric Poetry: From Goethe to Heine.**

A survey of German lyric poetry during what Heine calls "die Kunstperiode." Focus on rhetoric of the lyric: apostrophe, prosopopeia, metaphor, metonymy and allegory. Close reading, frequent writing assignments. Reading in German, class discussion in English.

**GRMN 1440N. Kunstmaerchen: the Literary Fairytale in the Nineteenth Century.**

"Das Kunstmaerchen" or literary fairy-tale occupies a central place in the literature of late romanticism. Focusing on major examples from writers such as Tieck, Eichendorff, and Brentano, we will examine how the content and the representational structure of these texts contribute to debates on categories like the "natural," the "fantastic," and the "moral." In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1440O. Modern German Drama.**

Explores the fascinating modern German dramatic tradition from the 19th century to the present, emphasizing plays that are still a part of the stage repertory today and authors that have exerted a strong international influence. Authors may include: Büchner, Wedekind, Brecht, Toller, Dürrenmatt, Frisch, Weiss, Heiner Müller. In German. Recommended prerequisite: GRMN 0600 or permission.

**GRMN 1440P. Heroes, Failures and Other Peculiar Characters-The German Novel from Goethe to Kafka.**

Readings in the tradition of the German novel, including the Bildungsroman, Realism and modernist fiction. Consideration especially of failed heroes and the failure of the novel genre. Authors include Goethe, Hoelderlin, Novalis, Stifter, Fontane, Musil and Kafka. Readings and class discussions in English.

**GRMN 1440S. Grimms' Fairy Tales.**

"One doesn't know the sorts of things one has in one's house," says the servant girl in Kafka's "A Country Doctor," as a stranger, who will soon act violently towards her, emerges on all fours from an unused sty. The precarious moment of finding more than one seeks in one's midst is among the key motifs of Grimms' "Household Tales" that we will trace, following the way they move writers of literature, psychoanalysis, and critical theory. Reading the Grimms among others, we will find: what was "once upon a time" is not finished, nor can these uncanny tales be domesticated.

**GRMN 1440W. The European Novel from Goethe to Proust (COLT 1420).**

Interested students must register for COLT 1420.

**GRMN 1440X. "Stranger Things: The German Novella".**

Goethe's famous description of the novella as an "unheard-of event" holds true to this day: scandals, murder, and the supernatural abound in this seminal German genre. Both meticulously structured and notoriously difficult to define, the novella as a form mirrors the paradoxes of its narratives. In this course, we will ask how form and content come together in the novella to engender strange occurrences that vacillate between everyday experiences and fever dreams. What is it about the German novella that creates such a particular sense of unease, and how does this genre mediate modern experience? [In English. All students welcome.]

**GRMN 1440Y. Return to Sender: Love, Letters, and Literature.**

This seminar investigates the relays between the postal system (18th – 20th century) and German literature, philosophy, as well as love. We will read selected correspondence and literary prose emulating or reflecting the epistolary form. Writers include Goethe, Kafka, Bachmann, and Celan. In English.

**GRMN 1441A. Theater and Revolution (COLT 1411B).**

Interested students must register for COLT 1411B.

**GRMN 1441C. Introduction to German Romantic Poetry.**

German Romanticism reflects a field of writing in which poetry was as powerful and seductive as it was riven by conscious conflict. Through numerous experimentations with open forms, Romanticism counteracts classical unities and closure. In this course we will closely read and discuss – with occasional turns towards music and the visual arts – a representative selection of poems by Brentano, Eichendorff, Günderode, Heine, Novalis, among others. In English.

**GRMN 1441F. On Gifts and Givens.**

What could it mean, "to give"? From the outset of "The Gift: Forms and Functions of Exchange in Archaic Societies," Marcel Mauss underscores the value of the gift in economic terms that the notion of giving, taken apart, would have to exceed. Any given phenomenon that happens to appear, for example, no longer belongs to a scheme of reciprocity and surpasses what anyone can grasp: otherwise, there could be no different takes on it. Throughout this course, literary, anthropological, and theoretical texts will be examined to address the problems that present themselves when giving is at stake.

**GRMN 1450A. German-Jewish Literature.**

From emancipation to anti-Semitism and from the "Golden Age" to the Shoah, Jewish life in Germany has experienced extremes comparable to no other cultural exchange. In this class, we will explore the German-Jewish encounter by reading literary texts written by German-Jewish authors. Readings by Lessing, Mendelssohn, Heine, Kafka, Jurek Becker, and others. In English.

**GRMN 1450B. Die Berliner Republik und die Vergangenheit.**

The opening of the Berlin Wall and the reunification of Germany brought with them a dramatic rethinking of both the past and the present of the German nation. Literature, film, architecture, visual art, and music have played important parts in this process. This course will consider a range of documents from the contemporary Berlin Republic and the way they negotiate the Cold War and Nazi pasts. All readings and class discussion in German. Prerequisite: GRMN 0600 or equivalent. Enrollment limited to 20.

**GRMN 1450C. National Socialism and the Shoah in Recent German Prose.**

Since Germany's reunification in 1990, German discourse on National Socialism and the Shoah has changed significantly. With the generation of the eye-witnesses disappearing, the third generation after World War II renegotiated issues such as perpetratorship, guilt, and responsibility on the one hand, wartime-suffering on the other. During the last decade, German literature represented voices from different generations/groups. This seminar will examine literature by Grass (b. 1927), Klüger (b. 1931), Timm (b. 1940), Schlink (b. 1944), Biller (b. 1960) and Erpenbeck (b. 1967) to situate these literary interventions within the framework of characteristic debates of the last few years. Enrollment limited to 40.

**GRMN 1450F. 20 Years After: The End of GDR and German Reunification.**

The fall of the Berlin wall heralded the German reunification rather than the reformation of the GDR as an example of "democratic socialism." The 20th anniversary gives reason to discuss the development of Germany since 1990. Readings of Volker Braun, Christa Wolf, Thomas Brussig, Ingo Schulze, Clemens Meyer, Yadé Kara. Films: *Goodbye Lenin*, *Das Leben der anderen*, *Willenbrock*. Issues discussed: Cold War, Perestroika, Reunification, East-/West-German identity, Migration and Globalization. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1450G. Love and Death.**

The course will examine the theme of love and death in four texts from around 1800: Lessing's *Emilia Galotti*, Goethe's *Werther*, Kleist's *Penthesilea* and Büchner's *Woyzeck*. We will focus on historical changes in the understanding and theory of emotions. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1450H. Images of America in German Literature.**

What was, has been, and is America to Germans? Some believe America to be moving in the right direction, and others imagine America as thoroughly evil from the very beginning. Literature, however, does not say this or that. It displays complex images, plays with prejudices, idols, ideals, and stereotypes to show their inner mechanisms and conceptual limits. And, of course, it generates images and counter-images. By examining some canonical texts on this topic, the seminar reconstructs the major perceptions, attributions and ascriptions with which German authors over time have envisioned the United States – even without travelling there.

**GRMN 1450L. Flussdichtungen.**

The flow of words and the flow of water are complicit in many languages. Between fluency disorder and logorrhea the discourse on human speech (and speech deficiency) often recurs to the image of rivers, or streams. The seminar will follow and unfold this complicity between (spoken) language and rivers in excerpts from Homer's *Odyssey*; in poems by Ausonius, Hölderlin, Mörike, Heine, Keller, Stefan George, Bertolt Brecht; in a chapter from James Joyce's *Finnegans Wake* ("Anna Livia Plurabelle"); in two prose pieces (by Hebel and Kafka) on swimmers; and in a song by Johnny Cash: *Big River*. Taught in German.

**GRMN 1640C. German National Cinema from 1917 to 1989, and Cold War Germanys in Film.**

Examines three phases of German national cinema in competition with Hollywood's early dominance of film production, from the founding of the UFA in 1917 through National Socialist Cinema, the "New German Cinema," and the cinema of East Germany. Explores representations of Germanys during the Cold War, 1949-1989, a mythical Germany cast as the locus of "world evil." Weekly screenings. In English.

**GRMN 1660B. Berlin: A City Strives to Reinvent Itself.**

Contemporary Berlin buzzes with energy, yet this metropolis is characterized by the legacy of fascism and divided government. The city as cultural space will be interrogated in interdisciplinary ways. Topics range from Weimar culture and Nazi architecture to the Cold War and German reunification. In English with possible extra session for students who have completed GRMN 0400 or higher.

**GRMN 1660C. German Culture in the Nazi Era.**

Explores the variety and the contexts of German cultural production during the Nazi era. We will examine party sanctioned mass-mediated culture in the Third Reich including literature, film, theater, and public spectacle; as well as "unofficial" cultural productions including exile literature, literature of "inner emigration," "degenerate" art, and concentration camp poetry. We'll inquire into the effects of the political ministrations of culture in the Nazi era, asking to what degree continuities in cultural production were sustained after 1933, and investigating the hallmarks and the legacies of a distinctive "Nazi culture." Previous course work in German history and/or the Holocaust recommended but not required. In English.

**GRMN 1660F. After Hitler: German Culture and Politics, 1945 to Present.**

From the country that produced Hitler and the Holocaust to today's democratic, peaceful Germany, this course explores the enormous cultural and political transformations since 1945 in both German states and reunified Germany. Topics include: responses to the Nazi past, Germany and Europe, protest movements, migration patterns, women, popular culture, socialism in East Germany, political and intellectual debates, recent assertions that Germany is now a "normal" country. In English.

**GRMN 1660G. Kafka.**

This course will analyze both the uncanny and comical aspects of Kafka's writings. It offers an exercise in literary analysis discussing methodological approaches as diverse as literary theory, media studies, and cultural studies. It also presents an overview of one of the twentieth century's most haunting writers who in many ways determined for our postmodern mind what we call "literature". In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1660H. Literary Discourse of Minority Cultures in Germany.**

During the last thirty years or so, strong minority cultures have emerged in Germany. Writers from diverse cultural backgrounds have given voice to the problems and challenges of living among a dominant German culture that only reluctantly started to listen to their concerns. Authors discussed include Schami, Ören, Atabay, Dischereit, Monikova, Müller, and others. Focuses on questions of cultural and ethnic identity as expressed in and through literary texts. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1660I. Literature and Other Media.**

When looking at literature and other media, the question is not, whether one will be replaced by the other, but rather, what one medium can do that the other cannot do so well or at all. Study of twentieth-century Media Theory Made in Germany with special emphasis on the relationships of literature to audio-visual media. Readings by Brecht, Benjamin, Adorno, Enzensberger, Kittler, Hörisch and others. In English.

**GRMN 1660K. Thinking After Philosophy.**

What does it mean when, after Nietzsche, we speak of the "end of philosophy"? Contemporary critical discourse in many fields of the Humanities and social sciences is profoundly impacted by a skeptical break with philosophical traditions that can be traced back to 18th- and 19th-century Germany. This course will follow the development of this break through a range of major paradigms, schools, and critical methods from the time of Goethe to the twentieth century. All readings and class discussion in English. First year students require instructor permission to enroll.

**GRMN 1660L. German Jews and Capitalist Markets in the Long Nineteenth Century.**

This course focuses on the commercial lives of German Jews, 1789-1918. While the classic historiographical debates surrounding assimilation, emancipation, and anti-Semitism will not be ignored, our spotlight will remain on capitalist markets, where Germans and Jews most often encountered one another. Our study will begin and end in the Franco-German borderlands, with revolution and warfare. In between, we will traverse the German landscape, meeting, among others, bankers in Frankfurt, wine merchants in the Rhineland, and department store magnates in Berlin, all in an attempt to understand the complexities of cross-cultural (dis)integration. Readings and instruction in English.

**GRMN 1660P. Having Beethoven Over in 1970.**

In 1970, Beethoven arrives in Bonn to visit his birthplace. A tour guide shows him around. It is a journey that begins with the museum one knows, but which gets weirder with each subsequent room. There is a jukebox in the basement. A gully is burning. There are strange utensils on display in the kitchen. As the demarcation between documentary and fiction become blurry, we realize that somebody must have added more rooms to the original floorplan. Our course will analyze TV crime series, Hollywood feature films, the Peanuts, radio pieces, and artworks surrounding Beethoven's bicentennial. Taught in English.

**GRMN 1660Q. Film and the Third Reich.**

This course explores the cinema of the Third Reich as well as filmic responses to World War II and the Holocaust. Sections will be dedicated to propaganda films by Leni Riefenstahl and others; to the relationship between Third Reich cinema and Hollywood; to propaganda films produced by the Allied forces, and to movies about the Holocaust such as Shoah and Schindler's List. We will discuss key concepts of film theory, cinema's political efficacy, Holocaust representation in film, music, and language, and questions of trauma, commemoration, and victimhood. [Taught in English; students from diverse fields welcome.]

**GRMN 1660R. Freud.**

Introduction to Freud's theories of the unconscious and its manifestations, Freud's thinking on culture and aesthetics, his theory of sexuality, his view of religion, and of fascism. In English.

**GRMN 1660S. Mord und Medien. Krimis im intermedialen Vergleich.**

The genre of the mystery novel has proven exceedingly productive in German speaking countries. At the same time, the new and the newest media have discovered the mystery genre as one of the most appealing narrative structures in contemporary culture. Readings of mystery narratives in book form, on television, on CD-ROM, and on the Internet. In German. Prerequisite: GRMN 0600 or permission.

**GRMN 1660T. Germans/Jews, Deutsche (und) Juden.**

From emancipation to anti-Semitism and from the 'Golden Age' to the Shoah, Jewish life in Germany has experienced extremes comparable to no other cultural exchange. Widespread philo-Semitism and the official taboo on anti-Jewish sentiments indicate that the relationship between Jewish and non-Jewish Germans today remains one of mutual nonunderstanding and distrust. Texts by Lessing, Mendelssohn, Heine, Kafka, and others. In English.

**GRMN 1660U. What was Socialism? From Marx to "Goodbye Lenin".**

The international socialist movement was born in Germany, and many of Germany's most important cultural figures were attracted to its striving for social justice. But socialism seems to have come to a tragic end. Course includes theoreticians such as Marx and Luxemburg, writers such as Heine and Brecht, and a focus on East German culture (film, art, literature) and its aftermath since the fall of the Berlin Wall. In English.

**GRMN 1660V. Nietzsche.**

This course will provide an introduction into Nietzsche's thinking. Discussion of the major works from *The Birth of Tragedy* and *Beyond Good and Evil* to *Thus Spoke Zarathustra*. No pre-requisites. In English.

**GRMN 1660W. Early German Film and Film Theory.**

We will study the interference/interface of cinema and theory in the 20th century. Includes analysis of classical German films and texts by critics such as Eisenstein, Balazs, Vertov, Arnheim, Kracauer, Benjamin. In English.

**GRMN 1661A. Race and Classical German Thought.**

Thought about race has a complex history in modern intellectual culture; crucial paradigms regarding culture, identity, and biology have roots in the philosophy, science, and arts of eighteenth-century Germany. This course will give in-depth consideration to ideas and paradigms from classical German intellectual culture, and will trace their resonances within African, Francophone, French, and North American race theory in the twentieth century. All readings in English. Not open to first year students.

**GRMN 1661E. Germany, Alcohol, and the Global Nineteenth Century.**

This course examines the German "long nineteenth century" through the lens of the production, sale, and consumption of alcohol. The cultural resonance of alcohol allows us to better situate Germany in an increasingly global context, where its exchange reflected broader patterns of modernization, social transformation, and nationalism. Whether brewing beer in Chinese Tsingtao, harvesting grapes in California's Napa Valley, or celebrating Purim with wine in Palestine, Germans engaged the nineteenth-century world through their own historical traditions and trades. Our endeavors will be aided by the remarkable "Alcohol and Addiction Studies" special collections at the John Hay Library.

**GRMN 1661F. Music, Religion, Politics (MUSC 1675).**

Interested students must register for MUSC 1675.

**GRMN 1661G. The Case of Wagner (MUSC 1640G).**

Interested students must register for MUSC 1640G.

**GRMN 1661L. The Promise of Being: Heidegger for Beginners (COLT 1610V).**

Interested students must register for COLT 1610V.

**GRMN 1700A. Introduction to Yiddish Culture and Language (JUDS 1713).**

Interested students must register for JUDS 1713.

**GRMN 1770. Introduction to Yiddish Culture and Language (JUDS 1713).**

Interested students must register for JUDS 1713.

**GRMN 1770A. Introduction to Yiddish Culture (JUDS 1713).**

Interested students must register for JUDS 1713.

**GRMN 1800. Posthumanism and the Ends of Man (COLT 1814Y).**

Interested students must register for COLT 1814Y.

**GRMN 1800A. Berlin: Dissonance, Division, Revision (COLT 1813J).**

Interested students must register for COLT 1813J.

**GRMN 1900A. The Weimar Republic (1918-1933).**

Advanced students of German culture will pursue their own interests in researching this fascinating period in German culture and political history. Common readings, general discussions, and individual class presentations will facilitate the development of individual projects. Covered areas include literature, art, music, film, politics, etc. Required for concentrators, written permission required for others. Prerequisite: at least 3 100-level GRMN courses or equivalent. In German and English.

**GRMN 1900B. Sites of Memory.**

The seminar explores the connection between representation and management of space and memory in the German context. Readings drawn from literary works, philosophy, public discourse about monuments and memorials, and so on. Assignments include individual presentations and final research project. Required for concentrators, open to others with instructor's permission. In English and German.

**GRMN 1900C. Cultural Industry and the Aesthetics of the Spectacle.**

This course explores mass culture and distraction as conceptualized by the Frankfurt School. Readings and discussions will engage with the emergence of distraction as a specific category of experience; the function of entertainment in the culture industries of Nazi Germany; the critique of mass culture in post war Germany, and the reformulation of spectacle and distraction in Culture Studies and postmodern discourse. Readings: Schiller, Adorno, Benjamin, Kracauer, Debord, Baudrillard, Postman, Virilio, Norbert Bolz. In German.

**GRMN 1900D. Fleeing the Nazis: German Culture in Exile, 1933-1945.**

When the Nazis came to power in Germany in 1933 this caused one of the biggest brain drains in history. We will trace the lives of leading experts in a variety of fields such as literature, music, philosophy, and the sciences and ask questions such as: Why did they leave? Where did they go? How did they do in their new environment? What did they say about their exile afterwards? Specific persons and places of exile will be studied according to the interests of the seminar participants. In German. Recommended prerequisite: one course in the GRMN 0600 series. Open to seniors only.

**GRMN 1900E. Made in Germany - A Cultural History of Science, Technology, and Engineering.**

In this seminar, we will examine the German technological imagination in literature and film. The material to be studied reaches from nineteenth and early twentieth century German Science Fiction to the history of engineering giants such as Volkswagen or BMW and will also include philosophical reflections of technology, the role of the German engineer as hero, and the image of the mad scientist. A field trip to Germany during spring break is planned. In German. Prerequisite: GRMN 0600. Enrollment limited to 20; first year students require an instructor override prior to registering.

**GRMN 1900Q. Contemporary German Crime Fiction.**

A "Krimi" in German can refer to a crime story in a multitude of media. This course will look at contemporary German, Austrian and Swiss "Krimis" as novels, TV-series and movies. After a brief overview of crime fiction in German speaking countries, we will examine what is being written, read, and watched today. Readings will include novels by Andrea Maria Schenkel, Christine Lehmann, Uta-Maria Heim, Hansjörg Schneider, Simone Buchholz, and Osman Elgin. We will also analyze several episodes of Tatort and at least one feature-length movie. In German.

**GRMN 1970. Independent Study.**

Independent study on a particular topic related to German culture. In German or English. At the discretion of the instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**GRMN 1981A. Introduction to Yiddish Culture and Language (JUDS 1713).**

Interested students must register for JUDS 1713.

**GRMN 1990. Senior Conference.**

Special work or preparation of an honors thesis under the direction of a faculty member. Please check Banner for the correct section number and CRN to use when registering for this course.

**GRMN 2081A. Realism, Idealism, and Modernity (II) (PHIL 2080D).**

Interested students must register for PHIL 2080D.

**GRMN 2261U. Mourning, in Theory.**

Our graduate seminar will trace the fundamental affinity between critical theory and modes of mourning. Through careful reading of key reflections on the bonds among thinking, language, and mourning, we will work to deepen our understanding of how our relation to finitude, loss, and absence relates to the potentialities of conceptual inquiry. Texts to include Heidegger on Dasein's finitude; Freud on mourning and melancholia; Benjamin on the "mourning play"; Barthes' Mourning Diary; Derrida's The Work of Mourning and his newly published seminar Life Death; and Butler on the politics of grievable and allegedly ungrievable lives. Students from diverse fields welcome.

**GRMN 2320A. 1700.**

Comparing language (rhetoric, style), literature (poetry, drama, novel), and other cultural phenomena (theater, dictionaries, emblem books, professionalization), we will consider shifts in cultural paradigms from the early modern to the modern period. Grimmelshausen and Gellert; Gryphius and Gottsched; Opitz and Haller. Readings in German. Discussion in German or English.

**GRMN 2320B. The Works of Heinrich Kleist.**

Kleist's writings continue to pose interpretive and theoretical riddles for the modern reader nearly 200 years after their composition. We will read a selection of his major texts (dramatic, narrative, and journalistic) alongside some modern American and German criticism, covering methodological approaches such as deconstruction, psychoanalysis, and discourse analysis. Readings in German, with discussion in English.

**GRMN 2320C. Enlightened Laughter.**

We follow the development of German comedy and theory of comedy and laughter from the late Baroque to the Enlightenment, comparing comedies and theoretical texts with foreign examples. What kind of laughter is appropriate for a bourgeois stage? A German stage? Why is laughing important? What kind? Texts by Weise, Prehauser, the Gottscheds, Gellert, J. A. Schlegel, Lessing, also Molière, Destouches, Farquhar, Graffigny. German texts read in German. Prerequisite: Graduate standing or permission.

**GRMN 2320D. Kafka in English.**

No description available.

**GRMN 2320E. Political Romanticism.**

What, if anything, is political about Romanticism? We will read the literary and non-literary writings of British and German romantic authors, with a focus on their complex relationship to political ideas, political practice, and the very concept of "the political." We will also consider why the question of Romanticism's relationship to politics has been re-visited with such insistence in the 20th century. Authors include W. Wordsworth, P. B. Shelley, Coleridge, Friedrich Schlegel, Novalis, and Kleist. All readings and discussions in English.

**GRMN 2330A. Vision and Narration in the 19th Century.**

Explores the relationship between vision and techniques of linguistic representation in selected literary texts from late romanticism to the fin-de-siecle. Special attention will be paid to the idea of "realistic" representation and to problems that afflict both seeing and speaking in the texts. Authors include Kleist, Stifter, Storm, Keller, Hofmannsthal, Rilke, and Musil. Readings in German, discussions in English. Open to seniors with instructor's permission.

**GRMN 2340A. German Literature 1968-1989.**

Discussion of major trends in literature in German: New Subjectivity, postmodernism, feminist literature, the role of mythology, post-histoire. Authors to be discussed include Botho Strauss, Elfriede Jelinek, Thomas Bernhard, W.G. Sebald, among others. In German.

**GRMN 2340B. Poetik der AutorInnen.**

This course will examine postwar literary aesthetics as put forth in the so-called "Poetikvorlesungen" which several universities in German-speaking countries have instituted since 1959. These lectures have featured important contemporary authors thinking about their work - from poetic practices and aesthetic theories to biographic considerations and the technicalities of writing literature in today's world. In German.

**GRMN 2340C. German Modernism.**

This seminar will explore German literary modernism from around 1880 to the 1930s. Schools and authors to be studied will include Naturalism (Hauptmann, Holz, Schlaf), Neo-Romanticism and Symbolism (Hofmannsthal, Rilke, George), Expressionism (Toller, Benn, Kaiser, Brecht), and New Objectivity (Kästner, Döblin, Fallada). In German. Required proficiency: GRMN 0600.

**GRMN 2450. Exchange Scholar Program.****GRMN 2460A. German Literature 1945-1967.**

Examines the literature and the literary debates in postwar Germany, East and West. Authors to be discussed include those of the *Gruppe 47* and those excluded from the group in the West; Brecht, Seghers, Becher and the new generation in the East. Emphasis on cultural politics and the role of literature in postwar German society (the work of the mourning, political restoration).

**GRMN 2460C. Literature of the German Democratic Republic.**

Against the background of the history of socialism in Germany, an intensive study of GDR authors and East German authors since reunification, with opportunities to explore other areas such as film and art. Authors may include: Brecht, Müller, C. Wolf, Reimann, Hein, Braun, Tellkamp. Readings in German, discussion in English or German.

**GRMN 2460D. Thomas Mann: Die Romane.**

In this course, we will read and discuss Thomas Mann's novels, from Buddenbrooks (1900) to Bekenntnisse des Hochstaplers Felix Krull (1954). Emphasis on narratological analysis and historical contextualization. In German.

**GRMN 2500A. Rethinking the Bildungsroman (COLT 2520G).**

Interested students must register for COLT 2520G.

**GRMN 2660A. On the Sublime.**

Survey of major theories of the sublime from antiquity to modern times, with emphasis on German, British, and French texts from the 18th to 20th centuries. Authors to be read include Longinus, Immanuel Kant, Edmund Burke, Jean-Francois Lyotard, and Neil Hertz. Readings and discussions in English, with optional readings in original languages provided. Open to seniors with instructor's permission.

**GRMN 2660C. Socialism and the Intellectuals.**

The international socialist movement was born in Germany, and many of Germany's most important intellectuals were attracted to its striving for social justice. Against the background of 19th century politics and theory, the course focuses on the Weimar Republic, the cultural politics of the German Democratic Republic and the New Left in the Federal Republic, and developments since reunification. Authors may include Heine, Marx, Hauptmann, Brecht, Müller, C. Wolf. Readings in German, discussions in English and/or German.

**GRMN 2660G. Reading (in) German Literature.**

What is reading? We will discuss theories of reading from reader-response-theory to performativity and its history. Beginning with Goethe's novel "Werther," we will read German literature since the 18th century. We will focus on the emerging conditions and techniques of reading (extensity, accessibility, popularity) which still shape text-reader-relations and on the double-bind of reading as a bourgeois model for subject-formation alongside profound ambivalence towards its pleasures. Finally: How is our own experience and performance of reading German literature? In German.

**GRMN 2660H. Historicism, Photography, Film.**

How does the emergence of photographic media--photography and film--affect concepts of historicity and historical experience? And how do philosophical concepts of history and historicity inform the aesthetics of film and of documentary film in particular? Taking Kracauer's critique of photography and Benjamin's work on film, photography and the philosophy of history as its point of departure and focusing on longitudinal documentaries from the former GDR, West Germany and Switzerland, this course proposes an inquiry into the relationship of photographic media and philosophical concepts of historicity. Readings and discussions in English. Open to graduate students. Juniors and seniors may enroll with instructor permission.

**GRMN 2660I. Torture in European Literature and Aesthetic Theory.**

Alongside the history of actual torture runs the history of representations of torture. Throughout the centuries, literature has worked through many of torture's manifestations. Texts range from the biblical scenes of crucifixion and punishment to modern forms of torture. Writers like E.T.A. Hoffmann, Mirbeau, Kafka, Améry and Sartre have reflected on torture. And aesthetic theory has taken various stances towards the depiction of torture in the arts, ranging from Winckelmann and Lessing to Adorno and Elaine Scarry. Our graduate seminar will read and discuss a selection of literary and theoretical texts covering the period from the mid-18th century until today.

**GRMN 2660O. From Hegel to Nietzsche: Literature as/and Philosophy.**

This seminar has two aims. It will scrutinize Hegel's and Nietzsche's respective conceptions of literature, and it will analyze the particular use of literary texts in their writings. The choice of these two authors is based not only on the fact that they qualify as representatives of the trajectory of German philosophy in the 19th century. They also act as antagonists on systematic grounds: While Hegel seeks to outperform literature with philosophy, Nietzsche depicts human life as an "aesthetic phenomenon," arguably creating a "literary" mode of philosophy. Enrollment limited to 30.

**GRMN 2660P. The Essay: Theory and Praxis.**

An essay, Lukács once said, is not yet form, but form on the way to becoming form. It is something in between: between art, science, and philosophy, between reason and intuition, between "precision and soul" (Musil). We will begin with the idea of the essay in Montaigne and Francis Bacon, and trace its development in Germany's intellectual and literary history from around 1870 till 1960. We will try to understand why, during this period, the essay became the preferred medium of thought and one of the dominant forms of reflecting on great Western narratives as well as important contemporary discourses.

**GRMN 2660Q. Freud and Lacan (ENGL 2900T).**

Interested students must register for ENGL 2900T.

**GRMN 2661A. "Other Worlds".**

This seminar explores the notion of "other worlds" in philosophy and art. The starting point for this exploration is a personal feeling. One day I realize that I exist in a world no longer there, although it had never crossed my mind that "my" world, as strange and inhospitable as it might have been, could come to an end. I have turned into a ghost without noticing. What shall I do? Adapt to the new world? Pretend nothing has happened? Resist the disintegration of the old world? Readings by Leibniz, Nietzsche, Bloch, Benjamin, Deleuze, Meillassoux. Films by Visconti and Godard.

**GRMN 2661F. Textual Border Crossings: Translational Literature.**

We will first attempt to discover what happens to a translation, as well as to the translator, when a text asks for asylum in the guest house of another language: "domestication" or "foreignization," as Lawrence Venuti puts it? Or is it appropriation, acculturation, adoption? Or rather estrangement, alienation, defamiliarization? Next we will investigate different models of derivative, parasitic, and translational writing by authors as diverse as J. Franzen, E. Fried, Ch. Hawkey, E. Jelinek, Y. Tawada, P. Waterhouse, and others. Finally, we will examine translational writing as a means of decolonizing world literature.

**GRMN 2661J. Art, Philosophy, and Truth: A Close Reading of Benjamin's Essay on Goethe's Elective Affinities.**

This course will be devoted to a close reading of one of the most rewarding, and also most intricate, essays about aesthetics written in the first half of the twentieth century, Benjamin's 1924 essay on Goethe. Rather than discuss the pertinence of the interpretation Benjamin proposes of Goethe's famous novel, we will focus on the ideas he develops in relation to art and philosophy, and the conceptual distinctions he introduces, such as the distinction between commentary and criticism, or the distinction between an artwork's material content and its truth content.

**GRMN 2661Q. Goethe's Faust.**

Faust is one of the most inspiring and complex dramas written in German, with immense influence on later literary texts. Its form is stunningly experimental and plays out all metric forms that were known in the age of Goethe in German literature. The two-part drama takes place in a time that measures from antiquity to the early nineteenth century, but it is, throughout, a representation of existence within a modern socio-economic dynamic. In this course, we will closely read and discuss selected scenes. Taught in German.

**GRMN 2662A. Theories of Poetry and the Poetic.**

Poetry, poésie, poesia carries a double meaning in many Western languages, since it can refer to a foundational principle of literary art in general as well as to a specific literary genre. Accordingly, the accent may be on poetic activity, derived from one or several meanings of the Greek poiein, or on the textual product, the poem. The course is interested in the problems and perspectives of this double meaning in a series of texts by poets and literary theorists from different periods, mainly Romanticism and 20th century modernism. Taught in English.

**GRMN 2662C. History, Philology.**

At one point in his Treatise on Philological Knowledge Peter Szondi claims that philological knowledge differs, in essence, from historical knowledge. The seminar will pursue and discuss this (non)relation in texts by Seneca, Dante, Vico, Auerbach, Said, Nietzsche, Benjamin, Kafka, Heidegger, Joyce, Beckett, Szondi, Paul de Man, and Derrida. Taught in English.

**GRMN 2900. Theory and Methods of Foreign Language Teaching.**

No description available.

**GRMN 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the Registration Fee to continue active enrollment while preparing for a preliminary examination.

**GRMN 2980. Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**GRMN 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## GRMN XLIST. Courses of Interest to Students Concentrating in German Studies.

### Swedish

#### SWED 0100A. Beginning Swedish.

Swedish 0100 is an introduction to both Sweden and Swedish, covering various aspects of Swedish history, art and society, as well as screening at least three Swedish films per semester. The course packet contains the text/workbook, Mål 1, with additional materials. We will cover one chapter of Mål per week, with quizzes every three weeks. There will be a midterm and a final exam, along with a short take-home project.

This is a small class, so your presence is absolutely required. Emphasis will be placed on speaking and understanding Swedish. Good will and good humor are required.

This is the first half of a year-long course (SWED 0100A and SWED 0200A) whose first semester grade is temporary. Neither semester may be elected independently without special written permission. The final grade at the end of the course work in SWED 0200A covers the entire year and is recorded as the final grade for both semesters.

#### SWED 0200A. Beginning Swedish.

Swedish 200 is a continuation of Swedish 100, with the same goals, materials and methods. It may also be suited to students with some prior background in Swedish.

This is the second half of a year-long course (SWED 0100A and SWED 0200A) whose first semester grade is temporary. Neither semester may be elected independently without special written permission. The final grade at the end of the course work in SWED 0200A covers the entire year and is recorded as the final grade for both semesters.

#### SWED 0300. Intermediate Swedish I.

Continuing Swedish.

#### SWED 0400. Intermediate Swedish II.

Continuing Swedish. Recommended prerequisite: SWED 0300.

## Harriet W. Sheridan Center for Teaching and Learning

The Sheridan Center promotes evidence-based teaching to create an inclusive environment where all learners can succeed. To encourage innovation and interdisciplinary collaboration, we cultivate dynamic partnerships with all members of Brown's teaching and learning communities. The Center advances effective liberal learning ([https://www.brown.edu/academics/college/degree/sites/brown.edu/academics/college/degree/files/uploads/Lib-Learning-Goals\\_0.pdf](https://www.brown.edu/academics/college/degree/sites/brown.edu/academics/college/degree/files/uploads/Lib-Learning-Goals_0.pdf)), encourages ongoing professional development, and fosters reflective teaching and learning. To learn more about the Center, please see our website: [brown.edu/sheridan](http://brown.edu/sheridan). To subscribe to our bi-weekly newsletter, please see: [brown.edu/sheridan/newsletter](http://brown.edu/sheridan/newsletter)

### Major initiatives of the Sheridan Center include:

- **The Brown Learning Collaborative**, offering rigorous academic courses for undergraduate teaching fellows and evidence-based course design institutes for faculty and TAs, to enhance student learning in key liberal arts areas, such as writing, problem solving, research, and data science.
- **Inclusive teaching**, embedded in Sheridan programs and offered as customized workshops (<https://www.brown.edu/sheridan/departments-workshops-inclusive-teaching>) for departments, drawing upon pedagogical research in the disciplines.
- **Writing, STEM, academic tutoring, and English language expertise** to offer direct support to students; develop peer fellows, mentors and tutors; and promote faculty and department practices to help all students succeed as learners and communicators.
- **Interdisciplinary learning communities**, such as certificates on reflective teaching and course design, a Junior Faculty Fellows program, dissertation writing groups, and course design institutes.

- **Assessment and research support** for program review, cross-institutional grants supporting educational innovation, and initiatives to enhance teaching and learning at Brown.

### We also offer:

- **Confidential consultations** – classroom observations; early student feedback; consultations on inclusive teaching, course design, writing pedagogy, assessment, student evaluations, and graduate and undergraduate TA professional development.
- **Services to enhance student learning** - Pre-orientation programs on writing and STEM, peer mentoring programs, conversation partners program, and classroom-based writing workshops on topics such as peer review.
- **Programs on teaching** – orientations for instructors and students, certificate programs, institutes, disciplinary and interdisciplinary workshops.
- **Educational research and assessment** – collaboration on course and curricular assessment, consultations on the scholarship of teaching and learning, assistance with evaluation sections of postsecondary educational grants.
- **Community** - programs and projects that bring together faculty, graduate students, postdocs, and undergraduates from across the disciplines.
- **Teaching and learning resources** - online resources addressing a wide range of topics; newsletters to summarize research and practice on key teaching topics.

## Hispanic Studies

### Chair

Laura R. Bass

The Department of Hispanic Studies at Brown University takes a distinctly Trans-Atlantic, interdisciplinary approach to the literatures and cultures of Spain and Latin America. Our undergraduate program offers basic through advanced language classes and a wide selection of literature and culture courses, many of them cross-listed. Our graduate program balances generalist training with individually tailored specialization and keeps a firm commitment to professional development and mentoring. All students, both undergraduate and graduate, work closely with faculty members, and peer collaboration is encouraged to further intellectual, creative, and academic growth.

For additional information, please visit the department's website: <http://www.brown.edu/academics/hispanic-studies/>

## Hispanic Literatures and Culture Concentration Requirements

Spanish is the second most widely spoken language in the world and the second language of the United States. In our society, knowing Spanish is not just an asset; it is increasingly a necessity. The Spanish language program offers a sequence of courses ranging from basic to advanced. Students at all levels develop proficiency in speaking, listening, reading, and writing while also studying the cultures and societies of the contemporary Spanish-speaking world. The Hispanic Literatures and Culture concentration enables students to develop advanced Spanish skills while acquiring a solid background in the complex history, literature, cultures, and intellectual traditions of Spain, Latin America, and the Latinx-U.S. The department offers a variety of courses on topics related to literary history and theory; multicultural contact; linguistics and the history of the language; visual culture, film, and performance studies. Interdisciplinarity is a hallmark of the department, and students in this concentration are

encouraged to broaden their perspectives by taking relevant courses in other departments. Most choose to strengthen their academic preparation by participating in a study abroad program in Spain or Latin America and by engaging with Latin American and Latinx communities in the United States.

The concentration requires a minimum of ten courses. A required course, HISP 0650 *Advanced Spanish through Literature and Film*, provides fundamental tools for critical analysis while continuing to emphasize grammar and writing development. 700-level courses provide fundamental tools for critical analysis and opportunities for developing advanced skills in the Spanish language. In courses at the 1000 level, students explore particular authors, genres, periods, or special topics and continue to hone their skills in literary and cultural analysis.

HISP 0650                      *Advanced Spanish Through Literature & Film*<sup>1</sup>

#### Remaining Courses

Concentrators must complete nine additional courses beyond HISP 0650, or a total of 10 courses if the 0650 requirement has been waived. At least five of those courses must be taken in Hispanic Studies at Brown. Of those, a minimum of three must be 1000-level courses. Concentrators must take at least one Hispanic Studies course with the WRIT designation.<sup>2</sup>

Students may apply up to four related courses toward the concentration in Hispanic Literatures and Cultures. These courses may come from Study Abroad, transfer credit, and other departments and programs at Brown (e.g., Latin America and Caribbean Studies, Comparative Literature, History, Ethnic Studies, Anthropology), as long as they deal with themes related to the literatures, histories, and/or cultures of Spain, Latin America, or the Latinx USA. Any courses outside the Department of Hispanic Studies must be previously approved by the Concentration Advisor on a case by case basis.

Total Credits = 10

E-Portfolio: As their capstone work, all Hispanic Studies concentrators must complete an E-Portfolio in ASK in their last year of studies. The E-Portfolio is composed of samples of written work and other projects done as part of the concentration, as well as reflections on concentration-related experiences (study abroad, community work, internships, etc.).

<sup>1</sup> Students who took HISP 0730, HISP 0740, or HISP 0760 prior to fall 2020 may use that course in lieu of HISP 0650. This requirement will be waived for students with a score of 5 on the AP Spanish Literature and Culture exam.

<sup>2</sup> Please note that a maximum of two courses for the concentration can be taken in English.

## Honors Thesis or Project

Students with an excellent record in their Hispanic Studies courses will be eligible to write an Honors Thesis or write and produce an Honors Project. Students pursuing honors must have a record of all A's or a final grade of S with distinction in courses they have as S/NC. Typically, the Honors Thesis is a major research paper of approximately 40 to 80 pages in Spanish, depending on the topic and treatment necessary. Alternatively, a student may, with prior permission of the Hispanic Studies Concentration Advisor, present a film, gallery exhibition, or other appropriate project, together with a paper that clearly demonstrates the academic foundations and relevance of the project. For additional details regarding Honors Thesis in Hispanic Studies, please refer to our website or consult with the Concentration Advisor.

#### Concentration Advisor:

Felipe Martínez-Pinzón

## Hispanic Studies Graduate Program

The department of Hispanic Studies offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) degree. The A.M. is ordinarily received as a part of the Ph.D. program.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/hispanic-studies>

## Courses

### HISP 0100. Basic Spanish.

This fast-paced beginning course provides a solid foundation in the development of communicative skills in Spanish (speaking, listening comprehension, reading and writing) as well as some insight on the cultures of the Spanish-speaking world. Individual work outside of class prepares students for in-class activities focused on authentic communication. Placement: students who have never taken Spanish before, or have scored below 390 in SAT II, or below 240 in the Brown Placement Exam. Students who have taken Spanish before and those with an AP score of 3 or below must take the Brown Placement Exam. Students should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

### HISP 0110. Intensive Basic Spanish.

A highly-intensive, two-semester sequence in one semester that carries 10 contact hours per week. Primarily for students with knowledge of Spanish, who have scored below 450 in SATII or below 340 in Brown Placement Exam. Students with little or no preparation in Spanish should consult with the Course Supervisor. Focused on acquisition of communicative skills (speaking, listening comprehension, reading and writing), and development of cultural awareness. With successful completion of the course students will be able to understand simple texts, carry on short spontaneous conversations involving everyday topics (such as modern daily life, health, art and culture, nature and the environment, and relationships) and write simple texts with good command of grammar and sentence structure. Ideal for students interested in fast-tracking their language learning to meet study abroad requirements. Double credit. Instructor permission required. Enrollment limited to 18: 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

### HISP 0200. Basic Spanish.

A continuation of HISP 0100. This course continues to focus on acquisition of communicative skills (speaking, listening comprehension, reading and writing) as well as cultural awareness. With successful completion of the course students will be able to understand simple texts, carry on short spontaneous conversations involving everyday topics (such as modern day life and its pressures, health, art and culture, nature and the environment, relationships) and write simple texts with good command of grammar and sentence structure. Prerequisite: HISP 0100 or placement: SAT II scores between 400 and 450; Brown Placement Exam scores between 241 and 340. Students with an AP score of 3 or below must take the Brown Placement Exam. Students should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

**HISP 0300. Intermediate Spanish I.**

This course continues to develop and strengthen students' proficiency in the Spanish language, as well as to help them increase their cultural understanding. It seeks to develop both fluency and accuracy and to teach students to express, interpret, and negotiate meaning in context. Through the exploration of themes such as the individual and the community, health issues, traveling, multiculturalism and human rights, students focus on communication and learn to appreciate cultural differences. Pre-requisite: either HISP 0200, HISP 0110, or placement: SAT II scores between 460 and 510, or Brown Placement Exam scores between 341 and 410. Students with an AP score of 3 or below must take the Brown Placement Exam. Students should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

**HISP 0400. Intermediate Spanish II.**

This course offers an exploration of the Spanish language and Hispanic cultures through a variety of thematic foci: the world of work, the arts, globalization and technology, leisure, and celebrations. It focuses on vocabulary building, the examination of some of the more difficult points of grammar, and moving students towards a more sophisticated level of comprehension and expression. Students work with readings, including literary texts; songs; film; and the visual arts. Prerequisite: HISP 0300 or placement: SAT II scores between 520 and 590 or Brown Placement Exam scores between 411 and 490. Students with an AP score of 3 or below must take the Brown Placement Exam. Students should check Placement and Course Description in the Undergraduate Program section of the Hispanic Studies Website. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

**HISP 0490A. Spanish for Health Care Workers.**

This course is designed to provide students with the linguistic and cultural competencies necessary to communicate with and help treat Spanish speaking patients with limited English. The course includes a general review of pertinent grammar and vocabulary relating to the health care professions, assessment, and vocabulary useful for establishing patient rapport. Students will practice communicating in common medical situations, conducting patient interviews, and increase their understanding of possible responses from patients. We will broaden knowledge of different cultures, explore health care systems/ professions in a variety of settings, and have pertinent speakers invited to class. Please note this course does not qualify as a pre-requisite for study abroad or for HISP 0600. Students who complete 0490A successfully can continue in our program with HISP 0500 as the next level. This is an intermediate level language course so if you have taken a 600 course or above, you will be too advanced for this 400 level class.

**HISP 0500. Advanced Spanish I.**

Offers comprehensive work in listening, speaking, reading, and writing, with targeted grammar review. Students work with a variety of readings (literature, newspaper articles, etc.) and with art forms such as music and film, in order to develop oral and written expression and to explore issues relevant to the Hispanic world. Students explore topics of their own interest through student-led activities and presentations. Prerequisite: HISP0400 or placement: SAT II scores between 600 and 660, Brown Placement Exam scores between 491 and 570, or AP score of 4 in language or literature. Please check Hispanic Studies website (Undergraduate Programs) for course descriptions and placement information. Enrollment limited to 18; 15 spaces are available for students during pre-registration. 3 spaces will be available at the start of the semester for incoming or re-admitted students who should attend the first class. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized.

**HISP 0550. Intermediate Spanish for Heritage Speakers.**

Heritage speakers of Spanish are students who understand and speak Spanish to some degree but have not yet had formal education in Spanish. This course is specifically for students who already possess intermediate communicative skills and can communicate effectively in their home and community. This course is designed to validate, strengthen and expand the previous linguistic and cultural knowledge students bring to the classroom. Through a variety of authentic materials, students will explore issues of identity, linguistic rights, equality, and social justice, while developing their Spanish range to include formal registers, and honing their oral communication, reading and writing skills.

**HISP 0600. Advanced Spanish II.**

Offers continued, advanced-level work in speaking, listening, reading, and writing skills, with focused review of challenging aspects of Spanish grammar. Course materials include films, music, art works, and a variety of written texts (articles, stories, plays, a novella, etc.) chosen to promote class discussion and in-depth written analysis. There will be individual and group activities, including in-class presentations and creative writing projects. Prerequisite: HISP0500 or placement: SATII scores between 670 and 740, Brown Placement Exam scores between 571 and 650, or AP score of 5 in language. Please check Hispanic Studies website (Undergraduate Programs) for course descriptions and placement information. Enrollment limited to 18. Pre-enrolled students must attend the first four days of class to maintain their pre-registered status and notify the instructor in advance if they must miss any day before the 4th class when the composition of the course section is finalized. Students with scores of 750 and above on the SAT II, 551 on the Brown Placement Exam, or 5 in AP Literature should consider offerings in the HISP 0730-0740-0750 range.

**HISP 0710A. Cultura gastronómica de España.**

Spain has a rich and varied culinary culture — both steeped in its multicultural history and at the cutting edge of new culinary movements. In this course, you will learn about la cocina española in all its dimensions and at the same time develop your linguistic skills in written and oral Spanish. Topics include: the Mediterranean diet (and its threat from fast food), the culture of tapas, the wine regions of Spain, Spain's new star chefs, the olive oil industry, Spanish food products abroad. We will explore these topics through documentaries, recipes, interviews, films, music, short stories, and hands-on cooking.

**HISP 0710B. Hispanic Culture Through Cinema.**

This course will examine eleven cinematic works of the contemporary Hispanic world (Argentina, Chile, Mexico, Spain, and the USA) from 1999 until 2012. We will focus on the cultural, thematic, technical and aesthetic aspects of the films, as well as on their socio-historical and political context. Every movie will be discussed in class integrating sociological, historical, political and aesthetic contexts, as well as a critical analysis of the film as artistic expression. This is a course also designed to improve students' speaking abilities while learning about Hispanic cultures and cinema. FYS

**HISP 0710C. Introducción a la lingüística hispánica.**

This course introduces students to the study of language and deepens their knowledge of Spanish in its main linguistic components. After briefly considering the nature of language, we will study the sounds of Spanish (phonology and phonetics), word and sentence structure (morphology and syntax), and the elements and mechanics to express and interpret meaning (semantics and pragmatics). We will then turn our focus to linguistic phenomena such as changes in Spanish over time (historical linguistics), variations in the language according to region and social group (sociolinguistics), and bilingualism, with special attention to Spanish in the U.S.

**HISP 0710D. History of the Spanish Language.**

We will study of the development of Spanish from the first manifestations to the present, and the development of the language beyond the Iberian Peninsula (in the Sephardic diaspora and in the Americas). Includes the historical and cultural events that deeply influenced the shaping of Castilian language. We will examine the most relevant contributions as well as other languages (Arabic in particular) in shaping the Spanish language. Taught in Spanish.

**HISP 0710E. Introduction to Professional Translation and Interpretation.**

What is translation? Interpretation? What roles do the translator and interpreter play in communication? What skills and kinds of knowledge are needed to develop competency in translation and interpretation as professional/community services? What factors shape how a text is translated (e.g., purpose, intended audience, type and genre, intercultural differences)? What is the role of translation in advancing language competence and proficiency? Through a functionalist approach, students advance their mastery of Spanish and develop translation competence. In addition to academic work (readings, translation assignments, and in-class exercises), students will also gain practical experience working with Spanish-speaking clinics and community organizations.

**HISP 0730. Encounters: Latin America in Its Literature and Culture.**

An introduction to major authors, movements, and themes of Spanish American literature from the Discovery to the present. This course also aims to develop students' oral and written expression in Spanish. Students are expected to engage in close reading and discussion of texts, as well as to revise their papers. Prerequisite: HISP 0600, or AP score =5, or SAT II (Literature) score of 750 or above, or Brown placement score of 651 or above.

**HISP 0740. Intensive Survey of Spanish Literature.**

This course provides students an overview of the major authors and movements in Spain's literature from the Middle Ages to the twentieth century. It teaches students to close-read and engage critically with individual texts and their literary, historical, and social conditions of production. Throughout, we will interrogate canon formation, examine the literary construction of the self and the nation, and analyze the reflection – and creation – of culture in literature. Conducted in Spanish. Prerequisite: HISP 0600, or AP score =5, or SAT II (Literature) score of 750 or above, or Brown placement score of 651 or above.

**HISP 0750B. The Latin American Diaspora in the US.**

Designed to bridge academic learning about Hispanic/Latino culture and volunteer work in agencies serving Hispanics in Providence. Readings, films, and guest presentations focus on issues of concern to these groups. Spanish language learning occurs in the classroom and the community, where students have the opportunity to enrich and test course content. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 651 and over in the Brown Placement Exam.

**HISP 0750C. Love and War in Medieval and Contemporary Spanish Fiction.**

Examines presentations of Medieval Iberian culture in literature and film. This subject interrogates the persistent popularity of medieval themes and stories in contemporary film and fiction. It will consider some medieval narratives, such as *El Cid*, medieval chronicles and ballads, and *La Celestina*, which inspire a tradition of revisionist re-writing, as well as modern "inventions" of the medieval in a range of cultural forms. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam.

**HISP 0750E. Topics in Hispanic Culture and Civilization.**

This course provides an overview of the culture and history of Spain from medieval times to the present, drawing from literature, art, music, and film. We will study Islamic al-Andalus, Judeo-Spanish culture (including the Sephardic diaspora), Christian Spain, the conquest and colonization of the "New World," the decline of empire, the Civil War and its aftermath. Historical and cultural connections between Spain and Europe, and Spain and America will also be examined. Taught in Spanish. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam.

**HISP 0750G. Wildeyed Stories.**

Students will study a wide-range of stories from cultures of the Spanish speaking world in literature and film: tales, fables, and humorous stories of heroism, deception and revenge. Class discussions will seek to situate the works examined within the political and cultural currents and debates of their time. Emphasis will be placed on both the historical context and on the development of close reading skills. Conducted in Spanish. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam.

**HISP 0750I. Spanish Cinema and Literature: The Postmodern Cinema of Pedro Almodovar.**

Spanish film has experienced a total renewal after Franco's death. In this course we will analyze recent developments in Spanish film paying special attention to the way film directors have exploited a very rich and well established literary tradition from Luis G. Berlanga, and Carlos Saura, to Víctor Erice and Pedro Almodóvar. Prerequisite: HISP 0600 or placement: SAT II scores of over 750, 5 in AP Literature or 551 and over in the Brown Placement Exam.

**HISP 0750M. The Spanish Civil War: Image, Text, and Memory.**

The Spanish Civil War (1936-1939) has inspired a vast trove of scholarly and artistic production. In this course, we will analyze documentary and feature-length Spanish films in order to understand the social and political causes of the war and its central players. We will complement our film discussions with relevant poetry, novels, and art works to expand our critical perspectives on ways of representing and remembering the Civil War. In Spanish for first-year students with SAT II of 750 or above, a 5 on the AP Literature exam, or a Brown Placement Test score of 651 or above. Enrollment limited to 19 first year students.

**HISP 0750N. Muslims, Jews, and Christians in Medieval Iberia.**

The cultural diversity of medieval Spain and Portugal is proclaimed by their Christian cathedrals, Islamic palaces, and Jewish synagogues. The three distinct cultures that produced these buildings lived together for centuries in medieval Iberia, sometimes in peace, sometimes not. This convivencia of Jews, Muslims, and Christians will be examined from the perspectives of literature, art, architecture, archaeology and history.

**HISP 0750O. Cultural Studies in Spanish America.**

This is a culture class, taught in Spanish, in which we will explore the origins and meanings of the terms "culture" and "cultural studies," a particular approach to culture, as it is manifested in a Spanish American context. This critical approach crosses conventional disciplinary boundaries and so will we, examining a variety of texts, phenomena, and themes that extend traditional concepts of "culture." Topics considered will include: sports-- fútbol and lucha libre-- music in literature, melodrama and the telenovela, manifestations of Indian and mestizo identities in the late 20th-21st centuries, tourism, and contemporary urban existence.

**HISP 0750P. Screening Social Justice in the Spanish-Speaking World.**

This course engages students with social justice issues in the Spanish-speaking world (the US, Latin America, and Spain), analyzing recent films addressing topics such as: racial, gender, and sexual identities; socioeconomic inequality; immigration, the border, and displacement; civil conflict, dictatorship, and their aftermath; the environment and climate change; postcolonial legacies and the impact of neoliberalism and globalization. We will analyze the stories these films tell and how they tell them, asking whether film can be considered an activist project, and what effect it might have on legal, political, and social debates outside the walls of the cinema. Conducted in English.

**HISP 0750Q. Health, Illness and Medicine in Spanish and Spanish American Literature and Film.**

In this class we will read/see, discuss and write about texts and films that deal with health, illness, death and medicine in Spanish and Spanish American contexts. Our approach will be informed by principals of Narrative Medicine that demonstrate how attending to, representing and affiliating oneself with other human beings by studying literature and the arts can transform relationships between patients and healthcare professionals. We will be honing our reading and analytical skills as we confront the subjective dimensions of illness and medicine from humanistic and cross-cultural perspectives. This course is conducted in Spanish.

**HISP 0750R. Mexico: An Introduction to Its History and Culture.**

This course will take an interdisciplinary approach to studying the rich history of Mexico and its diverse populations. We will examine both how Mexico has constructed its own identity from within (for example, the 20th century explorations of "lo mexicano"). In addition, we will study how Mexico has been constructed from without, especially from the English-speaking world (for instance, American diplomat Joel Poinsett's 19th century views). Course materials will range from both Mexican and European chronicles of conquest to modern reflections and representations by historians, philosophers, filmmakers, musicians, writers, and artists, among others. In English.

**HISP 0750S. The Art of Revolution in Latin America (COLT 0711J).**

Interested students must register for COLT 0711J.

**HISP 0750T. Around Latin America in 80 Days: An Historical and Cultural Journey (LACA 0500).**

Interested students must register for LACA 0500.

**HISP 0750U. Re-writing Realities: A Non-Fiction Creative Writing Workshop.**

This course focuses on the basic elements of creative non-fiction writing in Spanish. By writing our own pieces, we will discover how artistic uses of Spanish language can help us view our 'reality' under a new light. We will be reading texts from the Spanish language tradition of non-fiction produced through hybrid texts—that is, narrative and essayistic pieces that are not investigative journalism. Our readings will range from influential writers such as Rubén Darío, Jorge Luis Borges, and Alfonso Reyes to contemporary authors including Javier Cercas, Juan Villoro, and Eduardo Halfon.

**HISP 0760. Transatlantic Crossings: Readings in Hispanic Literatures.**

This course provides students a comprehensive introduction to literature and culture of the Spanish-speaking world, through exploration of a wide range of genres (short story, poetry, theater, novel, and film) and periods of production. The course not only gives students a contextualized historical panorama of literature in Spanish, it also equips them with strategies for reading, thinking, and writing about texts and films in Spanish, preparing them for more advanced literature and culture courses in Hispanic Studies. The course is conducted entirely in Spanish.

**HISP 1020A. Spanish Civil War in Literature and the Visual Arts.**

The Spanish Civil War (1936-39) would culminate with the military overthrow of the Republican government and the beginning of Francisco Franco's long dictatorship. This course examines artistic representations of the war, from film (documentary and fictional), through painting (Picasso), to the written works of both Spanish and foreign authors including Orwell, Hemingway, Neruda, Cela, Sender, Rodoreda. Readings and discussion in English.

**HISP 1210A. Judeo-Spanish Literature and Culture.**

Focuses on Judeo-Spanish literature from the 10th century to the first years of the Spanish Jewish diaspora (end of the 15th century). Poetry and narrative are read as works of moral instruction rooted in traditional modes of art and thought. Considers also the preservation of Judeo-Spanish culture in the Sephardic diaspora through ballads and songs recorded from oral traditions.

**HISP 1240A. Fashion and Fiction in the Early Modern Hispanic World.**

In the early modern period, clothing and fabrics were meant to provide visible markers of social status, gender, religion, race, and nationality. Yet dress did not just so much reflect identity as construct it. It could blur differences even as it supposedly marked them. In other words, clothes often created fictions, and fiction itself frequently focused on clothing. Drawing on literary and historical texts as well as paintings, prints, and maps, this course traces the connections between fashion and fiction in a period of unprecedented change in Spain and the wider Hispanic world. In Spanish.

**HISP 1240C. Golden Age Short Stories.**

We will examine the spatial itinerary of main literary figures (the *picaro* or rogue, the *morisco*, the soldier, the courtesan, the witch, the *indiano*) and the spaces they inhabited in Spain's short stories throughout the 16th and 17th centuries. Violence, sexual transgression, and social conflicts are themes of inquiry. Emphasis on Cervantes' *Novelas ejemplares*.

**HISP 1240L. Don Quijote de la Mancha.**

This course will study Miguel de Cervantes's El ingenioso hidalgo don Quijote de la Mancha in its literary and historical contexts. We will read Cervantes's masterpiece as a book about books and about the pleasures and dangers of reading; as a story of the Spanish empire and its discontents; as a palimpsest of Christian, Muslim, and Jewish meetings in Spain; and as a reflection on the nature of language, desire, and madness. All the while, we will read Don Quijote as an eminently entertaining and endlessly engaging work of the human imagination. In Spanish.

**HISP 1250A. Madrid: History, Literature, and Culture.**

This course explores cultural production in and about Madrid during key moments of the city's history from its establishment as the capital of imperial Spain in the 16th century through its reinvention as a major international tourist destination in the late 20th. Multimedia in orientation, the course draws on representations of the Spanish capital in literature, painting, photography, maps, music, and film. Topics include: self-invention in the court city, modernization and its discontents, Madrid and Spanishness, provincialism versus internationalism. In Spanish.

**HISP 1250B. Hispanic Culture Through Film.**

This course examines major trends of Hispanic cinema through a representative selection of culturally diverse films from Spain, Latin America and the USA. Among the course objectives are: to learn about Hispanic history and culture through film, to understand cinema's strengths and limitation for representing culture and history, to gain an understanding of Hispanic cinema in a broader context of globalization, and to learn to write film analyses in Spanish.

**HISP 1290D. Contra Franco vivíamos mejor? Literature and Culture of the Spanish Dictatorship (1939-1975).**

The end of the Spanish Civil War inaugurated one of the longest dictatorships of the twentieth century. This course will examine the literature and popular culture produced in the peninsula during that period—both the "official" culture allowed and sponsored by the Franco regime, and the voices of resistance that attempted to present alternative political views against a background of repression and censorship.

**HISP 1290G. Generación del '98.**

To what extent does a national crisis, the Spanish defeat of 1898 by the United States, provoke a movement of patriotic reevaluation, the so-called "Generation of '98"? Or are the symptoms of crisis more in accord with *fin de siècle* aesthetics, which incites literary experimentation in all the traditional genres? These crucial questions will be studied in such typical authors as Unamuno, Baroja, Azorín, Antonio Machado, and Ramón del Valle-Inclán.

**HISP 1290J. Spain on Screen: 80 Years of Spanish Cinema.**

Spain's is one of the most dynamic and at the same time overlooked of European cinemas. In recent years, Spain has become more internationally visible on screen, especially thanks to filmmakers like del Toro, Almodóvar, and Bayona, or actors Penélope Cruz and Javier Bardem. But where does Spanish cinema come from? And what can it tell us about the nation and its history? Focusing on issues such as landscape, memory, violence, gender, sexuality, and national identity, this course provides students with a solid training in film analysis and a wide-ranging introduction to Spanish culture through its cinema. In Spanish.

**HISP 1290K. The Spanish Novel since 1975.**

In 1975, the death of General Francisco Franco opened the door to a new democratic Spain. In the novel, the social and political novelties generated a change both thematic and formal. This course pays attention to issues such as the diverse genres that have gained strength, such as the groups that have acquired a literary voice, and the portrayal of current preoccupations. Prerequisite: HISP 0730 or 0740.

**HISP 1290P. Federico García Lorca, 1898-1936.**

Federico García Lorca (1898-1936) embodies Spanish Modernity. While his innovative poetry and drama established him as a crucial figure in the 20th Century Spanish cultural landscape, his brutal murder by Fascist supporters at the beginning of the Civil War made of him a symbol of the lost freedom. This class will study his artistic evolution: from his youth in Granada, and his studies in Madrid—where he met and befriended filmmaker Luis Buñuel and painter Salvador Dalí—to his trip to New York and Latin America. The focus of the class will be the study of his poetry, theatre, and essays, but will also explore both the construction of the Lorca myth, and the period of cultural splendor that is encapsulated in his biographical dates: from the loss of the empire in 1898, to the beginning of the Civil War in the summer of 1936.

**HISP 1290U. The Spanish Civil War in Visual Culture.**

No other event marked contemporary Spain as profoundly as the Spanish Civil War (1936-39). This course will study the history of the war itself and trace the multiple ways it has been remembered and represented from its immediate aftermath through to the present. Materials will include films and documentaries, paintings and photography, propaganda posters and newsreels, radio and television, monuments and comics, oral histories and fiction. In addition, we will read critical and theoretical texts on historical trauma and individual and collective memory as well as amnesia. This course will be conducted in Spanish.

**HISP 1330C. Indigenous Literatures of Latin America.**

This course explores the presence of indigenous cultures in Latin American literature over the last five centuries. Blending historical and literary analysis, we will delve into foundational indigenous narratives (with a stress on Nahuatl, Mayan and Quechua variants); the vision of Colonial mestizo and bilingual go-betweens; othering discourses in antiquarian, archeological and travel narratives; and the indigenous imprint in contemporary novels, short stories and poetry, including indigenous, women and transnational authors. Through this journey, marginalized cultures throughout the continent show their resilience as the multicultural plot of Latin American history comes to the fore. In Spanish.

**HISP 1330D. Patriots, Rogues, and Lovers.**

Nineteenth-century Spanish American writers were committed to educating their readers, yet they delighted in entertaining them with melodrama. We critically examine patriotic novels and stories with a focus on tales of love and/or adventure. We consider the breakdown of this trend in the first quarter of the 20th century as well as feminist critiques of it.

**HISP 1330K. Contemporary Poetry of Latin America.**

An exploration of some representative poets and movements in modern Latin American poetry, with special emphasis on the Latin American Modernists, the Avant-Garde and contemporary trends. Topics include: analytical techniques, historicity, poetry and translation, and a creative writing workshop. For advanced students only. Prerequisites: HISP 0740, or HISP 0600 and HISP 0730. Previous experience in 1000-level Spanish courses desirable.

**HISP 1330P. The Philosophy of Borges.**

Jorge Luis Borges devoted several essays during his youth to developing his philosophical understanding of concepts like "personality," "memory," "reality," "narrative" and "style." At some point later in his literary career, he attempted to erase the memory of those years from his public existence, to the extent that most of the books published during the 1920s were never reprinted during Borges' lifetime. Nevertheless, it was in those years that he developed the entire philosophical grounding of his future literary work. We will work to decipher Borges' philosophy through the reading and interpretation of his essays, narratives and poems, including several key texts from his first three suppressed prose volumes (*Inquisiciones*, *El tamaño de mi esperanza*, and *El idioma de los argentinos*). In English, with some Spanish readings. Prerequisite: HISP 0730 or 0740.

**HISP 1330Q. Short Forms: Major Works in a Minor Key.**

This course focuses on two outstanding practitioners of the short story in twentieth century Latin American literature—the Argentineans Jorge Luis Borges and Julio Cortázar—paying close attention to each one's most famous collection of stories (Borges' *Ficciones* [1944], Cortázar's *Final del juego* [1956]). We'll map the ways in which their writing connects to different genres (detective fiction, science fiction, poetry), media (photography, painting, film), and practices of adaptation (especially translation), and explore their legacy for more recent writers (Ricardo Piglia, Edmundo Paz Soldán, Roberto Bolaño, Samanta Schweblin).

**HISP 1330T. El amor en español.**

This course will visit a series of famous, colorful and controversial couples (novios, esposos y amantes) from the literature and history of Spain and Latin America. We will consider such themes as courtly love, erotic love, commonplaces about love and distortions of them, the degradation of idealized love, and the renunciation of human love in favor of divine love in the medieval and Renaissance periods. We will also address contemporary rites of passage in the formation of couples, traditional and modern views of love and marriage, as well as the "death of the couple," love and melancholy, melodrama and hysteria.

**HISP 1330U. Hauntings: Gothic Fictions, Banditry and the Supernatural in Latin America.**

A specter haunts Latin America. The constitution of the nation-state in the region after the Wars of Independence (1810-1830) entailed creating fictions to include (and, naturally, exclude) those who belonged to the community of the nation. Usually the left-outs were the ones who did not comply with the profile of the desired citizen: lettered, male, white and urban. This course will focus on narrations about those 'left-outs' after the constitution of the Nation-States in the region. We will read fictions about mad monster women, spectral slaves, bloodthirsty bandits, priests-turned-sorcerers, dwarfs, animal rebellions, and many other "exceptions to the norm." In Spanish.

**HISP 1330V. Gender Trouble in Spanish America.**

This course will explore the construction of gendered identities in Spanish American literature and film after 1960. Questioning normative constructions of gender roles, we will see how masculinities and femininities are represented and respond to changing politics and power, often redefining earlier "gender contracts." Works studied will include novels by Angeles Mastretta, José Donoso, Mario Bellatín and Diamela Eltit, short stories, theater, poetry, and 2-3 films, as well as pertinent theoretical and critical approaches to the study of gender in Latin America. In Spanish.

**HISP 1330X. The Nature of Conquest: Scientific Literatures of the Americas.**

Throughout history, conquest and colonization have implied different kinds of appropriations: control over new lands, new bodies, new languages. With the appropriation of new languages came the confrontation between different ways of organizing the world and, in particular, alternative ways of understanding humankind's relationship to nature. This course explores the scientific literatures that emerged in the wake of Spanish conquest and colonization of the Americas (1500-1800). These hybrid scientific literatures, written in Spanish but also in Nahuatl, Maya, Quechua and graphic forms, illustrate the lasting cross-pollination between Old and New World notions about American nature.

**HISP 1330Y. "Us" and "Them": Cross-Cultural Representations in Spanish American Literature and Film.**

This class will study the construction of self and other in Latin American cultural production. By examining examples from colonial times to today in a variety of literary genres and in three particular countries - Mexico, Argentina and Peru - we will examine ethnic, racial, and national identities (primarily). Our study will include some of the theoretical ideas associated with the confrontation between "them" and "us" and changes in these positions: the concept of the contact zone, of acculturation, and cultural hybridity, among others.

**HISP 1330Z. Tropical Fictions: Geography and Literature in Latin American Culture.**

Tropical nature in Latin America has been represented in conflicting ways: a place of leisure and sensuality, but also of depravity and sloth; a place of infinite riches but also a space where disease and racial degeneration thrive. Tracing the variations and endurance of these tropes in 18th- to 21st-century Western consciousness, this course aims to re-think the tropics in literature, film and the arts from a vantage point different to that of temperate-climate European civilization. Readings include canonical fictions such as *La vorágine* (1924), 19th-century European travelogues from the region, as well as contemporary indigenous art.

**HISP 1331A. Writing Animals in the Iberian Atlantic.**

Animals are our mirrors, our doubles; creatures onto which we project our notions about humanity and its limits. From Aristotle's ladder to Mesoamerican nahualism, animals have been at the center of how we understand the world and our place in it. This course looks at Animal Studies in dialogue with Hispanic, Latin American and Indigenous Studies to explore how intersectionality illuminates discourses about the human-nonhuman divide. Drawing on studies from both sides of the Atlantic, we will analyze the main genres that have focused on the nonhuman and recent studies on sheep, pigs, the rhinoceros, llamas, and perhaps even hummingbirds.

**HISP 1331D. Latin America and the Caribbean: Challenges of the Global South (LACA 1620B).**

Interested students must register for LACA 1620B.

**HISP 1331E. Visions and Voices of Indigenous Mexico.**

"In Mexico we are all mixed" goes a popular dictum, placing mestizaje at the core of what it means to be Mexican. One fifth of the population, however, self-identifies as indigenous (pueblos originarios), and keeps experiencing various forms of discrimination for not abiding by the dominant national discourse. HISP 1331E explores three pillars of indigenous identity—land's gifts, material culture and language—to inquire how indigeneity has been deployed and reclaimed by indigenous groups through time. Materials include pre-Hispanic and Colonial codices, murals and objects, and present day literary works, music and cinema, with one hour of Nahuatl basics per week.

**HISP 1331F. Museum Fictions.**

Museums: monuments to national pride or international pillage? Sites for exhibition or for exoticism? Anchored in the past or for the present? This course looks at the way that museums have been imagined and practiced in Spain and Latin America: spaces for art and anthropology, materials and memories, collections and encounters. We will explore poetry inspired by artworks and by museums; stories that take place in museums; films that show us the behind-the-scenes of institutions; theory that asks what we look at when we look at a collection. We will visit some museums, and perhaps create some of our own.

**HISP 1331G. Latin American Horror (GNSS 1520).**

Interested students must register for GNSS 1520.

**HISP 1331H. Latin American Environmental Humanities (LACA 1504G).**

Interested students must register for LACA 1504G.

**HISP 1370A. "One Hundred Years of Solitude": Culture and Politics in Garcia Marquez's Work.**

This course will focus on Garcia Márquez's masterpiece in order to analyze its modes of representation, discursive strategies, and fictional construction as well as its interactions with history, politics, and literary and popular traditions. Other related work by the Colombian Nobel Prize winner will be discussed, as will his journalistic pieces and movies. The novel may be read in Spanish or English; discussion will be mainly in Spanish.

**HISP 1370B. Gaborium: Memory, Fiction, and Reading in Gabriel García Márquez.**

Departing from some formats of writing and reading (myth, history, legend, journalism, memoirs) in Garcia Márquez writings, we plan to study the representation (magical, carnivalesque, political) unfolding in his novels, stories, and essays. From this processing of information and exchange, our course will analyze the cultural history of abundance, scarcity, and Utopia in Latin America. Prerequisite: HISP 0730 or 0740. Enrollment limited to 40.

**HISP 1370E. La creatividad en América Latina.**

Varias teorías actuales sobre la creatividad se ilustran muy bien con relatos, poemas, películas, música y arte de América Latina gracias a su adaptación de materiales, diversidad de formas, y gusto por la mezcla. Revisaremos las poéticas del dadaísmo, el surrealismo, la literatura fantástica, el realismo mágico, la biografía imaginaria, el utopismo, y el juego verbal. La clase será visitada por algunos autores para discutir sus procesos creativos.

**HISP 1370F. Modernity and Memory in Latin America.**

Contemporary cultural history proposes that memory is not an archive or a museum of history but a past evoked to amplify the present. We examine the rewriting and transformation of history in texts that illustrate issues of tradition/modernity, countryside/culture, center/margins, migration/exile, feminine/masculine, and popular culture/media culture.

**HISP 1370I. The End of the Century and the Idea of the New.**

This course will explore the narrative of the end, the culture of crisis, and the literary sceneries of the new aesthetics. Departing from a comparison between the "fin de siècle" and the current "end of the century," we will pass to the apocalyptic views of the millennium and focus on current essays on the topic (Calvino, Baudrillard) as well as on new trends, ideas, and narratives related to this subject in the Americas. This could be the first course on the literature of the 21st century.

**HISP 1370K. Literatura latinoamericana del siglo XXI.**

Estudiaremos las tendencias innovativas de la narrativa latinoamericana reciente. Veremos la literatura como un trabajo sobre la resignificación de lo nuevo. Nuevas voces, nuevos textos y géneros, y nuevas ideas proponen una visión del futuro que buscaremos documentar. Los libros y textos que leeremos son un mapa del futuro. Algunos temas: el sicodrama familiar, violencia y crisis del proyecto moderno, la saga de la migración, la conciencia transatlántica, el mundo emotivo y los afectos, la ética de la solidaridad.

**HISP 1370L. Gabriel García Marquez and the Politics of Magic Realism.**

Estudiaremos las principales novelas del autor, desde *El coronel no tiene quien le escriba* hasta *Cien años de soledad*, con especial atención al realismo mágico y las ideas sobre la novela que cultivó el autor. Nuestra discusión se situará en el proceso social y político latinoamericano así como en las mitologías de la cultura popular. Prerequisite: HISP 0730 or 0740.

**HISP 1370N. Carlos Fuentes and the New Mexican Narrative.**

This seminar will focus on close-readings and conceptualization of Fuentes' innovative works of fiction and main ideas on Mexico and its cultural history. We will discuss a selection of his short-stories, novels and essays, moving from the political to the Gothic, from history to the Baroque. We will follow with new Mexican fiction writers who renew and debate Fuentes practices and ideas. Among them, Carmen Boullosa, Jorge Volpi, Pedro Ángel Palou, Cristina Rivera Garza and Yuri Herrera. The seminar will be in Spanish, and is limited to 40 students.

**HISP 1370T. Transatlantic Literature of the XXI Century: The Galaxia Borges.**

This course will explore new trends and authors from the Hispano-phonetic world: Spanish, Latin American and Latino narratives of migration, bilingualism, globalization and innovative forms and techniques. This course will be dedicated to Borges global. We will follow his imprint on the international literature and literary ideas. We will read, in Spanish and English, Borges' stories and essays.

**HISP 1370V. Mujeres Malas.**

This seminar will analyze the notion of "bad women" in Pre-modern and Latin American Literature and visual texts. Perception, representation, and stereotyping of these women, both historical and fictional, as Mad, Witch, Femme fatal, Hysterical, and Crazy, will allow us to follow the ideological narrative that produced these characters. Some of them are based on medical, primitive, political, and even psychoanalytic conceptions. We will discuss the primitive Castilian epic cycle, *Celestina*, *Carmen*, the novel and the opera; Malinche, Cortéz' translator in the conquest of Mexico; and novels and short stories from contemporary authors as well as Luis Buñuel' films. Prerequisite: HISP 0730 or 0740.

**HISP 1370W. La Cultura Política de la Transición y DDHH en el mundo Hispánico.**

This course will discuss literary representations of "transitions" as the social and cultural mechanisms by which a country or region (Spain, Argentina, Chile, Peru, Cuba) moves from tradition to modernity, from the rural to urban, and from authoritarian regimes to democracy. We will also analyze the role of borders, social spaces, political negotiation, mapping and networks in the sagas of migration. Prerequisite: HISP 0730 or 0740.

**HISP 1370Y. Literature and Film of the Cuban Revolution.**

Cuba's revolution of 1959 gained extraordinary visibility internationally, motivating images of bearded rebels, jubilant crowds and middle-class flight. Yet even as the Cuban Revolution became an object of representation abroad, it guided the domestic production of new forms of literature and cinema. Over the course of the semester, we will trace the relationship between fiction and film, and between art and the revolutionary project, from 1959 to the present day.

**HISP 1371B. Sports and Culture in Latin America.**

Sports in Latin America are big, and in some cases huge, and their significance goes way beyond pure entertainment. They are a contemporary theater of sorts where underlying social tensions are relived and sometimes exacerbated. This course studies soccer, boxing, baseball and lesser-known sports (e.g., ultramarathons and women's wrestling) in relation to Latin American national narratives, politics, race, and gender. Using tools of sociology and anthropology, among others disciplines, we will study the representation of and discourse about sports in cinema, literature, television, and other media. IN ENGLISH.

**HISP 1371C. "El gran zoo": Animals in Latin American Culture.**

From César Vallejo's dismembered spider, to Julio Cortázar's house tiger, to Nicolás Guillén's satirical zoo, this course traces the varied ways in which animals appear in 20th and 21st century Latin American culture. We will pay particular attention to the zones of entanglement between the human and non-human, in order to analyze how a number of Latin American writers and filmmakers tackle oppositions between nature and culture, *civilización y barbarie*, city and countryside, self and other. In unsettling the human-animal divide, Latin American cultures respond to some of the most pressing—perhaps dehumanizing—issues of the century.

**HISP 1371D. Latin American Authors Encounter the Sciences (LACA 1504F).**

Interested students must register for LACA 1504F.

**HISP 1371F. Narrating the Borderlands: Literature, Legality, and Solidarity.**

This course explores multiple issues concerning crossing, living, and narrating the United States-Mexico border. We will focus on the border as a legal space bound to interpretations about what it means to migrate legally or illegally across that territory. We will explore the border as a vast and uneven expanse that entails diverse and often contradictory narrations and imaginaries that range from idealized landscapes to apocalyptic wastelands. Finally, we will discuss how border-crossing is a theme for artists and writers working on the solidarity networks from those who have dealt with the journey and its perils.

**HISP 1371H. Storytelling in the Americas (LACA 1630).**

Interested students must register for LACA 1630.

**HISP 1371J. Gabriel García Márquez and Toni Morrison.**

In Spanish and English. This course will follow the conversation between Gabriel García Márquez and Toni Morrison through their fiction, essays, and political standing. Magic realism (Gabo) and mythical resolution (Toni) will be discussed as the political answer to violence, exploitation, and exclusion.

**HISP 1371K. Between Borders and Walls.**

This conversation will focus on the study and deconstruction of cultural encounters between Europe and the Americas. We plan to start with Shakespeare's *Caliban* and Montaigne's essays, and to follow Marti in NY, Sarmiento in the Mississippi, and Trump in Puerto Rico. Walls and barriers will be discussed in this balance of books undoing prejudice and violence.

**HISP 1500L. Theory and Practice of Translation.**

The objectives of the course are to give students a firm grounding in the theory of translation studies as well as extensive experience in the practice of literary translation, working closely with several canonical Spanish texts as well as texts of the student's choice. Throughout the course of the semester, students will also be called upon to reflect actively on their experience as translators, and dialogue on this experience with their peers. This course is structured as a workshop, with students sharing their work – both translations and reading reflections – and collaborating with their peers.

**HISP 1500M. Queer Aesthetics and Intimacies en español.**

This course asks what connections can be drawn among 'queer' texts across time, place, and different genres of writing and forms of artistic expression in Spanish, Latin American, and US Latinx cultures. By looking to literary texts and cultural objects from the 20th to 21st centuries, this course considers how non-normative sex and gender function within spaces beset by colonial, racist, and nationalist legacies and how queerness imagines being within and without these structures. Readings and discussion will be in Spanish with an option to write papers in English for non-concentrators or concentrators fulfilling one of their English-language courses.

**HISP 1700A. Dismantling the Clockwork: Creative Writing and Narrative Techniques.**

This class focuses on creating literary texts in Spanish, which involves the development of a sensibility to appreciate narrative texts and the skills to employ writing techniques, e.g. use of the first person, free indirect speech or the stream of consciousness. Drawing from theoretical reflections on writing made by Latin American and Spanish canonical writers as well as examples of its use, we'll explore the creative possibilities of narrative forms: aphorisms, prose poetry and short stories. Our objective is to strengthen students' skills as individual and collaborative authors through exercises in literary production and techniques, strategies, and habits of good writing. In Spanish.

**HISP 1700B. Rhythm and Silence: A Creative Writing Workshop.**

The course focuses on learning the craft of creative writing in Spanish across genres. We will study underlying principles of writing through lectures, readings, discussions, and exercises. As we reflect upon the creative process, we will examine the relationship between author and text and explore narrative techniques used to construct complex characters, dialogue, and imagery. The object will be to expand our creative writing skills and discuss the works of influential contemporary Latin American authors such as Juan José Arreola, Eduardo Halfon, Juan Carlos Onetti, Juan José Saer and Mario Vargas Llosa.

**HISP 1750P. TAship/fellow for First Year Seminar HISP 0750P.**

This course provides a senior concentrator the opportunity to work as a TA and fellow for the First Year Seminar HISP 750P: Contemporary Social Justice Cinema of the Spanish Speaking World. The TA/fellow completes more advanced versions of the two short semester papers and for a final project compiles a course development proposal for improvement to the class, along with an annotated bibliography. The student holds weekly discussion sections with first years and also provides developmental writing support throughout the semester.

**HISP 1980. Independent Study.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**HISP 1990. Senior Thesis Preparation.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**HISP 2013. Dissertation/Professional Development.**

This is intended for advanced graduate students in Hispanic Studies at the prospectus or dissertation stages. Its main purpose is to help students conceptualize or refine projects (including corpus of investigation, scholarly approaches, and principal guiding questions) and develop strategies for research and writing. Conducted as a workshop, the seminar provides ample opportunities for participants to give and receive feedback on each other's work and thus acquire important skills in peer review. While focused primarily on the dissertation (prospectus), the seminar also offers guidance on various aspects of professional development such as preparation for the job market and article publication.

**HISP 2030B. History and Fiction: Literature of the 15th Century.**

The goal of this course is to familiarize students with major literary works of the Fifteenth Century, and their socio-cultural background. Major works of three outstanding poets of this period (Juan de Mena, Íñigo López de Mendoza, and Jorge Manrique), satirical and historical writings, *romances*, (ballads sung with instrumental accompaniment), Alfonso Martínez de Toledo's *Corbacho* and Fernando de Rojas' *Celestina* will be presented in the context of the distinct cultural traditions that coexisted in Spain.

**HISP 2030C. Medieval Masterpieces.**

Examines three medieval Spanish masterpieces: *Cantar de Mio Cid*, *Libro de buen amor*, and *Celestina*. Other works are read to explore lines of continuity and discontinuity in these three works and their respective genres.

**HISP 2030D. Fifteenth-Century Sentimental Romances and Celestina.**

The fifteenth-century sentimental romances establish narrative innovations and a literary climate that lead inevitably to the creation of the "novel". With their insistent portrayal of the sufferings of love, romances by Padrón, Flores, San Pedro, and Rojas represent an essential step in the evolution of the modern novel.

**HISP 2030E. Medieval Spanish Epic.**

A study of the medieval Spanish epic poems and narratives. This seminar will move through a series of topics or events and texts from the 10th to the 15th centuries, exploring the relation between heroic narratives and history. Four medieval cycles (Castilian Counts, Cid, Carolingian, and anti-Carolingian) based on oral traditions will be studied and compared with their ballad congeners printed in the 16th century. We will examine the different contexts and channels in which historical epic narratives were produced, consumed and transmitted.

**HISP 2030G. Mester de clerecía.**

This course will focus on different works of "mester de clerecía" from the 13th and 14th centuries, and provide an overview of current thinking regarding their nature and origin, while at the same time seeking to interrogate many of the prevailing assumptions and received ideas of Spanish literary historiography. Works and topics will include: Libro de Alexandre (ideologies of power), Libro de Apolonio (the intellectual hero), Berceo's works (hagiography, clerical poetry, the rise of literacy), Poema/ Libro de Fernán González (epic hero), and Libro de buen amor (seduction manual/spiritual guide).

**HISP 2030H. Latin in America (LATN 2080F).**

Interested students must register for LATN 2080F.

**HISP 2160F. Questioning the Canon: Golden Age Theatre.**

The canonical dramatic texts of the Spanish Golden Age - from Lope de Vega's *El caballero de Olmedo* and *El castigo sin venganza* to Tirso de Molina's *El burlador de Sevilla* and Calderón's *La vida es sueño* will be opened to new critical inquiry. Dramatic discourse, construction of characters, social and moral issues such as justice versus revenge, reality versus dream, courtly love versus erotic love, chastity versus incest, will be at issue. Each play will also be studied in relation to its social background and as metaphors of power and political crisis.

**HISP 2160G. Don Quixote: Contexts and Constructions.**

This seminar offers an in-depth study of El ingenioso hidalgo Don Quijote de la Mancha in its "own right" and through an exploration of its afterlives (editions, translations, interpretations, imitations). On the one hand, we will examine the novel in its narrative complexity and engagement with early modern Spanish literature and history. On the other, we will trace its modern critical reception, with particular focus on its paradoxical canonization both as a "universal" masterpiece and a cornerstone of constructions of Spain and the study of Spanish and the Hispanic world.

**HISP 2160J. The Poetics and Practice of Space in the Theater of the Spanish Baroque.**

This seminar will explore the real and virtual spaces of seventeenth-century Spanish drama. We will examine the diverse spaces in which theatrical performances took place (public playhouses, city streets, court theaters, convents), as well as the various types of spaces represented on the stage (domestic and public, urban and rural, worldly and supernatural, familiar and distant). How did dramatic space articulate the boundaries of the public and private in the Spanish baroque? How did it function in the configuration of social hierarchies, subjectivities, and marginal as well as normative identities? In the theatrical world of seventeenth-century Spain, how did spatial practices on stage shape the experience of space off stage?

**HISP 2160N. Antiquity and Innovation in the Hispanic Renaissance.**

The artistic and literary florescence of the Siglo de Oro paralleled a broader current of cultural innovation, which extended beyond peninsular Spain to other parts of Europe and the Americas – a movement which can be conceived as a Hispanic Renaissance. After an introductory overview, the seminar will highlight four major tendencies, through close examination of some foundational authors and texts. The course will be organized thematically, but texts will generally be approached in chronological sequence, beginning with Antonio de Nebrija's investigations in the 1490s and ending with Carlos de Sigüenza y Góngora's showcasing of New Spain's complex legacies.

**HISP 2160P. The Invention of the Novel: Fiction and Society in Renaissance Spain.**

In the space of ten years, at the mid-sixteenth century, four genres made their first appearance in Spain: the picaresque, pastoral and Moorish (or captivity) novels, and the novel of foreign customs and adventures. This course examines how and why these novels, and the more complex novels that followed, became key instruments for commentary and dissent in a society with little tolerance for both pursuits. Working individually and in groups, we will also undertake a series of exercises in close and critical reading to hone analytical skills. All readings, discussions and assignments will be done in Spanish.

**HISP 2250N. Madrid's Modern Landscapes (1780-1900).**

A seminar to study the changing relationship between landscape, architecture, and society during Madrid's modernization, from the late eighteenth century to the early twentieth. Considers representations of gardens, parks, and "natural" landscapes around the Spanish capital as expressions of how writers, planners, and intellectuals envisioned changes in ideas of national identity, gender relationships, class consciousness, and artistic perception. Readings, presentations, and group discussions are designed to promote a sustained analysis of such concepts as modernization, nature, the city and the country, with an eye not only to Madrid's past but also to our own relationship to landscape in the present.

**HISP 2350C. La nueva novela de América Latina.**

Este curso está dedicado a algunos textos fundadores: *Rayuela* de Julio Cortázar, *Pedro Páramo* de Juan Rulfo, *La muerte de Artemio Cruz* de Carlos Fuentes, *Los ríos profundos* de José María Arguedas, *Cien años de Soledad* de Gabriel García Márquez; pero también a otros que literaria inician nuevas rutas: *La guaracha del macho Camacho* de Luis Rafael Sánchez, *Un mundo para Julius* de Alfredo Bryce Echenique, *Los vigilantes* de Diamela Eltit, y *La ingratitud* de Matilde Sánchez.

**HISP 2350E. Novela latinoamericana contemporánea: Crítica Textual y Ediciones Críticas.**

Estudiaremos la constelación de novelas fundamentales (*Pedro Páramo*, *Los ríos profundos*, *Rayuela*, *La muerte de Artemio Cruz*, *Cien Años de soledad* entre otras) que configuran un sistema literario hecho de innovación formal, ampliación de la lectura, y puesta en crisis de la representación.

**HISP 2350G. Teoría y Práctica Poética en Cesar Vallejo.**

Seminario dedicado a estudiar en profundidad la poesía hermética de Vallejo. Analizaremos su práctica poética así como su teoría del poema a través de la evolución de su obra y pensamiento.

**HISP 2350H. The History of Wonder in Colonial Spanish American Lettres.**

The notion of wonder (*asombro*, *maravilla*) played a determining role in the Spanish and Creole writings of the Spanish American colonial period. The volatile aesthetic of wonder raises and implicates such important issues as otherness, exoticism, category crisis, and identity formation. A studies course examining the role of wonder in New World historiographic and literary writings of the 16th and 17th centuries.

**HISP 2350I. Vallejo y sus contemporáneos.**

Este seminario monográfico tiene como finalidad explorar la obra poética de César Vallejo en relación a los contextos del modernismo, la vanguardia, y la poesía contemporánea. Partiremos de un análisis formal del lenguaje poético y su organización semántica, de modo de ejercitarnos en el análisis textual de la poesía.

**HISP 2350M. Poetics of the Avant-Garde in Latin America.**

This course traces the shocks and flows of avant-garde activities through Latin America, beginning in the first decades of the twentieth century and weaving our way to the present. We will explore manifestoes, poetry, artworks, and film from Argentina, the Caribbean, Chile, Brazil, Mexico, and Peru, from creacionismo through Brazilian modernismo, ultraísmo and estridentismo, poesía afroantillana and technoindigenismo, with occasional detours into Iberian experiments, culminating with studies of the neo-avant-gardes of the 1960s and of the nostalgia for the avant-gardes which characterizes the early twenty-first century.

**HISP 2350P. Teoría Literaria: la literatura Transatlántica.**

Dedicado a la teoría del texto transatlántico, en este seminario trabajaremos sobre la historia intelectual de la interculturalidad Atlántica. A partir de los modelos, contactos, apropiación, debate y dialogismo que entre Europa y América Latina configuran un sistema literario, nos detendremos en la construcción del Sujeto, la Representación y la Lectura. Estudiaremos a Guamán Poma de Ayala y Garcilaso de la Vega, la saga de Calibán, los modelos de la formación nacional en Martí y Sarmiento, y la genealogía de la mezcla como la diferencia moderna de la producción cultural latinoamericana. En español.

**HISP 2350Y. Escritoras Transatlánticas del XXI.**

En este curso estudiaremos la producción de algunas poetisas y narradoras que han hecho de la condición femenina el centro alarmado de su obra. Leeremos los libros de Diamela Eltit (Chile), Matilde Sánchez (Argentina), Mariela Dreyfus (Perú), Julia Castillo y Marina Perezagua (España), Rocio Ceron (México), María A. Alvarez (Venezuela), y las Poetas Transatlánticas de Brown (Silvia Goldman, Claudia Becerra, Ethel Barja, Berta Garcia Faet).

**HISP 2350Z. Neovanguardias: escribir después.**

This class explores the practices of a range of poets working individually or collectively in the wake of the historical avant-gardes in Latin America. We will range over conversational poetry from Chile and Peru; visual and citational poetry from Brazil and Mexico; performed poetry from Cuba and Argentina; and experiments with and by the book. Our readings will be set against a moving backdrop of theory, film, art practices, and political upheavals, asking how poetry reconfigures the aesthetic while engaging questions of gender, race, and audience. Writers will include Parra, Carrión, JL Martínez, Hora Zero, Varela, Thenón, Carrera, Zurita.

**HISP 2450. Exchange Scholar Program.**

**HISP 2520I. Sor Juana Inés de la Cruz in Her Literary Context.** Intensive study of Sor Juana's major writings in a variety of genres; comparisons with other writers of her extended literary milieu.

**HISP 2520J. Teoría y práctica del texto transatlántico.**

Este curso propone varios escenarios teóricos sobre el texto transatlántico. Partiendo de modelos de teoría literaria formal trabajaremos sobre un conjunto de textos de ambas orillas del idioma. Revisaremos las cuestiones del género, representación, lectura y recepción, mezcla y heterogeneidad archivo y cambio.

**HISP 2520L. Latin American Existential Literature.**

European existentialism had a strong impact on Latin American literature, though that impact remains under-explored. The course begins with European existentialism and Latin American identity politics. It then explores the particular constructions of European existentialism effected by Argentine, Uruguayan, Mexican, and Brazilian writers of prose fiction in the mid-twentieth century. Readings in Spanish and English. Instructor override needed for registration.

**HISP 2520M. The Poetry and Discursive Strategies of Spanish American Modernismo.**

The development of *Modernismo* was a turning point in the elaboration of the continental self-image. Modernista poets like Rubén Darío, Leopoldo Lugones, Julio Herrera y Reissig, Julián del Casal, Manuel Gutiérrez Nájera and José Asunción Silva were among the first original Hispanic American creators of literature, but they did *not* share a common view on continental problems and solutions. The relevance of Modernismo for the shaping of Latin American self image cannot be overstated. *Modernista's* conceptions on new intellectuals, aestheticism, *l'art pour l'art*, racism, immigrants, science and the occult, modernization, decadence, *dandysmo*, the body, sex, feminism, anarchism, cosmopolitanism, pan-Latinism, universalism and nationalism will be discussed.

**HISP 2520O. The Old Science in the New World: Nature, Culture, and Empire in the Age of Exploration.**

Studies how Spain's exploration and conquest of the Americas tested European understandings of the natural world; of nature's bearing on human psycho-physiology and, thereby, on culture; and of the balance between normalcy and deviance in natural and human domains. Topics range from changing theories about the distribution of land and life around the globe to "natural" and "moral" histories implicated in a debate over Spain's rights to the Americas and its peoples. Readings: Aristotle, Strabo, Pliny, Ptolemy, Columbus, Vespucci, Oviedo, Las Casas, and Acosta. Students will be able to read primary texts in either Spanish or English. Discussion in English. Undergraduates welcome.

**HISP 2520P. Narrativa latinoamericana contemporánea (De Juan Rulfo a Diamela Eltit).**

Estudiaremos los modos de representación, prácticas de escritura y lectura, redes culturales, tramas sociales y políticas de los relatos de la modernidad crítica y diferencia latinoamericana. Autores: Cortázar, García Márquez, Fuentes, Bryce, Rodríguez, Juliá.

**HISP 2520Q. Nación, insularismo e identidad en el Caribe hispano.**

This course traces the emergence and evolution of nationalist expression in literary and political texts from Cuba, Puerto Rico and the Dominican Republic. Beginning with early anti-colonial and nation-building writing, we focus particularly on the idea of the island in articulations of national culture. We address key figures in the intellectual history of the Caribbean; essays, novels and poetry from the nineteenth-century to the twenty-first; and recent critical and theoretical work on the Spanish Caribbean. Weekly topics include the intersection of race and nationalism; exile and migration; and transnational ties to the broader Caribbean, the U.S. and Latin America.

**HISP 2520R. Radical Borders.**

This course considers Mexico from a transnational perspective in order to explore the aesthetic and political dimensions of its northern and southern borders. We will examine the question of migration from and to Mexico in novels, poems, and theoretical materials from countries such as El Salvador, Honduras, and the United States. The objective is to conceptualize the notion of border not only as a space of surveillance and law enforcement but also as an arena for radical politics and revolutionary ideals. We will read texts by Horacio Castellanos Moya, Alaide Foppa, Yuri Herrera, Subcomandante Marcos, and Sayak Valencia among others.

### HISP 2620A. Entre nosotros: Representing the Family in Modern and Contemporary Spain.

This course reflects on the representation of the family in Spanish literature and film since the Civil War, spanning texts and films from the period 1942-2009. Some of the themes we will explore over the course of the semester include: the family as a space for the formation of identities and subjectivities; the symbolic relationship between family and nation; religion; gender roles and the concepts of maternity, fatherhood, and childhood; monstrous families and the specter of incest; modern "found" families constructed outside biological bonds. Texts and films by Sender, Buero Vallejo, Delibes, Cela, Laforet, Buñuel, Borau, Almodóvar, Saura, among others.

### HISP 2620O. Authorship and Authoritarianism in Spain and Latin America.

This course examines responses to authoritarianism in contemporary Spanish and Latin American literature, using the particular cases of recent dictatorships in Spain (Francisco Franco, 1939-1975) and Chile (Augusto Pinochet, 1973-1990) as a focus. Alongside novels and a play dealing with dictatorship and its aftermath, we will read theoretical texts that offer varied approaches to history, literature, aesthetics, and politics. Throughout, we will examine the complex relationship between authority, authoritarianism, and authorship in the twentieth and twenty-first centuries, asking how dictatorship is (not) narrated and how we can read narratives emerging from contexts of repression and state terror. In Spanish.

### HISP 2620P. The Urbanization of Culture: BCN-MAD from Modernity to Postmodernity.

The way you live is the way you represent reality, David Harvey argued in *The Urban Experience* (1989). Any change in aesthetics, he continued, it should therefore imply a change in the perception of space leading to what Harvey described as the urbanization of consciousness. Playing out of this concept, this class will examine the ways by which two Iberian cities (Barcelona and Madrid) have been both represented and re-imagined in contemporary culture through novels, film, painting and photography.

### HISP 2900. Theory and Methods of Foreign Language Teaching.

How are second languages acquired? How can instruction optimize acquisition? How do we evaluate, improve or create effective teaching materials? This course introduces the theory of foreign language learning and teaching and seeks to help language teachers implement communicative language teaching through reflective practice. Written permission required for undergraduates.

### HISP 2970. Preliminary Examination Preparation.

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

### HISP 2980. Research in Spanish and Latin American Literature.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

### HISP 2990. Thesis Preparation.

For graduate students who have met the residency requirement and are continuing research on a full time basis.

### HISP 2991. Thesis Preparation.

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

### HISP XLIST. Courses of Interest to Concentrators in Hispanic Studies.

## History

### Chair

Ethan M. Pollock

As one of the first institutions in the United States to provide for historical studies, Brown University has long valued and nurtured research in the Department of History. The faculty's high standard of scholarship and excellence in teaching are well known, and members of the department are committed to the value a rigorous education in the humanities confers upon students. The department trains students in the fundamentals of historical thinking: skills and attitudes that will provide a foundation for

excellence in a wide range of careers and professions, including teaching, law, medicine, business, public service, and advanced historical research.

For additional information, please visit the department's website: <https://www.brown.edu/academics/history/>

## History Concentration Requirements

History is the study of how societies and cultures across the world change over time. History concentrators learn to write and think critically, and to understand issues from a variety of perspectives. The department offers a wide variety of courses concerned with changes in human experience through time, ranging from classical Greek and Roman civilizations to the histories of Africa, the Middle East, the Americas, and Asia. While some courses explore special topics, others concentrate on the history of a particular country (e.g. China or Brazil) or period of time (e.g. Antiquity or the 20th century). By taking advantage of our diverse course offerings, students can engage in and develop broad perspectives on the past and the present.

### Prospective concentrators should visit the History site

(<https://www.brown.edu/academics/history/undergraduate/history-concentration>) and visit the office hours of their prospective concentrator advisor (<https://www.brown.edu/academics/history/undergraduate/history-concentration/concentration-advisors>) (assigned according to student surname).

## Concentration Requirements

**Basic requirement:** A minimum of 10 courses, at least 8 of which must be courses taught by a Brown University History Department faculty member (<https://www.brown.edu/academics/history/faculty>) (including their cross-listed courses) and/or courses offered by the Brown History Department (such as those taught by Visiting or Adjunct Professors). Transfer students or study-abroad students who have spent a year or more at another institution must have at least 7 of 10 history courses taught by Brown History faculty or otherwise offered through the Brown History Department.

### Summary

Courses in the "Premodern" era (P)	2
2 Courses in 3 different geographic regions	6
Field of focus	4
Capstone Seminar	1
Any combination of courses that fulfill the four requirements above for a total number of 10 courses*	
Honors (optional) 3 additional courses related to writing a thesis (one of which, HIST 1992, can count towards your 10 concentration requirements)	3

**Courses below 1000:** Students may count no more than four courses numbered below 1000 toward the concentration requirements. Students considering a concentration in History are encouraged to take First Year and Sophomore seminars, as well as courses in the HIST 0150 and 0200 series, for an introduction to historical reasoning, discussion, and writing.

**Field of focus:** In History, concentrators choose or create their own "track," rather than having to select an existing track. The field of focus must include a minimum of four courses, and it may be: geographical (such as Latin America); geographical and chronological (such as Modern North America); or transnational (such as ancient world); or thematic (such as urban history). Students who choose North America or Europe must also choose a chronological focus (i.e. Early Modern Europe. Fields in Latin America, Africa, East Asia, or Middle East/South Asia do not require a chronological definition. All students should consult a concentration advisor early in the process about their potential field of focus. All fields are subject to approval by the concentration advisor.

Thematic fields of focus include but are not restricted to:

- Comparative Colonialism
- Gender and Sexuality
- Law and Society
- Race and Ethnicity
- Science, Technology, Environment and Medicine (STEAM)
- Urban History

Examples of transnational foci include:

- The Ancient World
- The Early Modern Atlantic World
- Africa and the Diaspora
- The Mediterranean World from Antiquity to the Middle Ages
- The Pacific World

**Geographic Distribution:** Concentrators must take at least two courses in three of the following geographic areas:

- Africa
- East Asia
- Europe
- Global
- Latin America and the Caribbean
- Middle East and South Asia
- North America

"Global" courses are defined as those that deal with at least three different regions of the world.

For details on which courses count toward which geographical distribution requirement click here (<https://docs.google.com/spreadsheets/d/1NT5I7zAqIXDCivZXCtSdsceSnMD5v28ke6550tnBrnE/edit/#gid=2138711521>).

**Chronological Distribution:** All concentrators must complete at least two courses designated as "P" (for pre-modern).

For a listing of which courses count as "P" courses [click here](#)

**Capstone Seminar:** All concentrators must complete at least one capstone seminar (HIST 1960s and HIST 1970s series and select HIST 1980s courses). These seminars are designed to serve as an intellectual culmination of the concentration. They provide students with an opportunity to delve deeply into a historical problem and to write a major research and/or analytical paper which serves as a capstone experience.

Ideally, they will be taken in the field of focus and during the student's junior or senior year. Students considering writing a senior honors thesis are advised to take an advanced seminar in their junior year.

**Transferring Courses:** The History Department encourages students to take history courses at other institutions, either in the United States or abroad, as well as history-oriented courses in other departments and programs at Brown. Students may apply two courses taken in other departments/programs at Brown to the ten-course minimum for the History concentration. Students who spend one semester at another institution may apply to their concentration a maximum of two courses from other departments or institutions, and those who spend more than one semester at another institution may apply to their concentration a third course transferred from another institution.

Students wishing to apply such courses must present to their concentration advisor justification that those courses complement some aspect of their concentration. Courses from other Brown departments *may not* be applied toward the chronological distribution requirement. History courses taught by trained historians from other institutions (e.g., from study abroad or a previous institution) *may* be applied toward the chronological distribution requirement so long as at least 2/3 of the course content examine the "premodern" or "early modern" periods.

It is normally expected that students will have declared their intention to concentrate in History and have their concentration programs approved before undertaking study elsewhere. Students taking courses in Brown-run programs abroad automatically receive University transfer credit, but concentration credit is granted only with the approval of a concentration advisor. Students taking courses in other foreign-study programs or at other universities in the United States must apply to the Transfer Credit Advisor and then get approval from a concentration advisor.

**Regular Consultation:** Students are strongly urged to consult regularly with their concentration advisor or a department advisor about their program. During the seventh semester, all students must meet with their concentration advisor for review and approval of their program.

## COURSES BELOW 1000

### LECTURE COURSES

## 150's: Thematic Courses that Cut Across Time and Place

HIST 0150A	History of Capitalism
HIST 0150B	The Philosophers' Stone: Alchemy From Antiquity to Harry Potter
HIST 0150C	Locked Up: A Global History of Prison and Captivity
HIST 0150D	Refugees: A Twentieth-Century History
HIST 0150F	Pirates
HIST 0150G	History of Law: Great Trials
HIST 0150H	Foods and Drugs in History

## Gateway Lecture Courses

HIST 0202	African Experiences of Empire
HIST 0203	Modern Africa: From Empire to Nation-State
HIST 0212	Histories of East Asia: China
HIST 0214	Histories of East Asia: Japan
HIST 0215	Modern Korea: Contending with Modernity
HIST 0218	The Making of Modern East Asia
HIST 0228A	War and Peace in Modern Europe
HIST 0232	Clash of Empires in Latin America
HIST 0233	Colonial Latin America
HIST 0234	Modern Latin America
HIST 0243	Modern Middle East Roots: 1492 to the Present
HIST 0244	Understanding the Middle East: 1800s to the Present
HIST 0247	Civilization, Empire, Nation: Competing Histories of the Middle East
HIST 0248	'Neither of the East nor West': The Ottoman Empire
HIST 0259	Labor, Land and Culture: A History of Immigration in the U.S.

HIST 1976H	Environmental History of Latin America 1492-Present
HIST 1976I	Imperialism and Environmental Change
HIST 1976N	Topics in the History of Economic Thought
HIST 1976R	Histories of the Future
HIST 1977B	Feathery Things: An Avian Introduction to Animal Studies
HIST 1977I	Gender, Race, and Medicine in the Americas
HIST 1977J	War and Medicine since the Renaissance
HIST 1990	Undergraduate Reading Courses
HIST 1992	History Honors Workshop for Prospective Thesis Writers
HIST 1993	History Honors Workshop for Thesis Writers, Part I
HIST 1994	History Honors Workshop for Thesis Writers, Part II

## Honors (OPTIONAL):

History concentrators in the 5th or 6th semester may apply for honors. To be admitted, students must have achieved two-thirds "quality grades" in History department courses. A "quality grade" is defined as a grade of "A" or a grade of "S" accompanied by a course performance report indicating a performance at the "A" standard.

Students who wish to enroll in honors are recommended to take HIST 1992, "History Honors Workshop for Prospective Students." HIST 1992 can count as one of the 10 courses required for graduation in history. HIST 1992 students who prepare a prospectus that receives a grade of A- or above will be admitted to the honors program. Students in their 7<sup>th</sup> semester who have not taken HIST 1992 (including but not limited to those who are away from Brown during that semester) may apply to the program by submitting a prospectus no later than the first day of that semester. All honors students must complete one semester of HIST 1993 "History Honors Workshop for Thesis Writers, Part I" and one semester of HIST 1994 "History Workshop for Thesis Writers, Part II." HIST 1993 and HIST 1994 do not count towards the 10 courses required for graduation in history; they are an additional two courses to the minimum of 10 required history courses. Students who contemplate enrolling in the honors program in History should consult the honors section of the department website. They are also encouraged to meet with the Director of Undergraduate Studies, who serves as the honors advisor.

## History Graduate Program

The department of History offers graduate programs leading to the Master of Arts (A.M.) degree and Doctor of Philosophy (Ph.D.) degree.

The A.M. degree is only awarded to students in the Fifth Year M.A. and Open Graduate Education Programs, and as a transitional degree for Ph.D. students. It is not open for admission to terminal M.A. applicants not currently enrolled at Brown.

For more information about the Ph.D. program please visit the following website:

<https://www.brown.edu/academics/history/graduate-program>

For more information about the A.M. program please visit the following website:

<https://www.brown.edu/academics/history/graduate/ma-program>

## Courses

### **HIST 0150A. History of Capitalism.**

Capitalism didn't just spring from the brain of Adam Smith. Its logic is not encoded on human DNA, and its practices are not the inevitable outcome of supply and demand. So how did capitalism become the dominant economic system of the modern world? History can provide an answer by exploring the interaction of culture and politics, technology and enterprise, and opportunity and exploitation from the era of the Atlantic Slave Trade to the 2008 Financial Crisis. HIST 0150 courses introduce students to methods of historical analysis, interpretation, and argument. This class presumes no economics background, nor previous history courses.

### **HIST 0150B. The Philosophers' Stone: Alchemy From Antiquity to Harry Potter.**

Alchemy today conjures Harry Potter or Full Metal Alchemist, not the serious scholarly tradition that captivated Isaac Newton and Carl Jung. We will explore alchemy's long history, examining how it has endured and adapted to different cultural, social, intellectual, economic, and religious contexts. What did alchemists do? How did they explain their art? And why has alchemy come to represent fraud and folly in some circles and wisdom in others? Students will answer these questions by conducting research in the Hay. HIST 0150 courses introduce students to methods of historical analysis, interpretation, and argument. Presumes no previous history courses.

### **HIST 0150C. Locked Up: A Global History of Prison and Captivity.**

A long history lies behind the millions of men and women locked up today as prisoners, captives and hostages. Beginning in antiquity and ending in the present, this course draws on materials from a variety of cultures across the world to explore incarceration's centuries-old past. In examining the experience and meaning of imprisonment, whether as judicial punishment, political repression, or the fallout of war, the class will ask fundamental questions about liberty as well. History 150 courses introduce students to methods of historical analysis, interpretation and argumentation. This course presumes no previous history courses.

### **HIST 0150D. Refugees: A Twentieth-Century History.**

Refugees are arguably the most important social, political and legal category of the twentieth century. This introductory lecture course locates the emergence of the figure of the refugee in histories of border-making, nation-state formation and political conflicts across the twentieth century to understand how displacement and humanitarianism came to be organized as international responses to forms of exclusion, war, disaster and inequality.

### **HIST 0150F. Pirates.**

As long as ships have sailed, pirates have preyed upon them. This course examines piracy from ancient times to present, from the Mediterranean Sea to the Indian Ocean and the Caribbean. We will explore questions: How did piracy evolve over time? Where, why, and how did people become pirates, and what (if anything) made them different from other seafarers? How is piracy related to other historical processes, notably imperialism and nation-building? What explains the resurgence of piracy in the twenty-first century? Why have pirates become the stuff of legend, and how accurately are they portrayed in books and films?

### **HIST 0150G. History of Law: Great Trials.**

Through discussion of a variety of precedent-setting trials throughout history, this course will probe the nature of demonstrative justice, the relationship between ideology and law in different societies, the politics of trials, and the relationship of trials to terror(ism) and social marginalization. Cases to be covered include: Socrates, Jesus Christ, the mythical Japanese Okuninushi, witch trials, the French Revolutionary Terror, the Dreyfus Affair, the Scopes (monkey) trial, the Stalinist show trials, the war crimes trials at Nuremberg, the Chinese Gang of Four, and the trials of Nelson Mandela and Saddam Hussein.

### **HIST 0150H. Foods and Drugs in History.**

What we consume connects us to the worlds of both nature and culture. Bodily and socially, "you are what you eat," but if your well-being suffers, you often seek out other ingestible substances. In many times and places, changing what you eat is thought to be healing, while in other times and places drugs – either remedial or recreational – are thought to be distinct and more immediately restorative. Few human interactions with the larger world are more important or interesting than how comestibles and medicines have been discovered, mixed, transformed, distributed, and how those processes have changed us.

### **HIST 0202. African Experiences of Empire.**

This is a "flipped" course on sub-Saharan Africa from the mid-nineteenth through the mid-twentieth centuries. It presupposes no knowledge of Africa and serves as an introduction to the continent. It focuses on daily life, families, and popular culture. Students will analyze change, question perspectives, and imagine life, and question what "Africa" was during the period of European imperialism. Most readings are primary sources, which include photographs, songs, and oral histories. The course is "flipped"; students' first introduction to the content comes before class meetings through the text and multi-media sources. Class meetings are dedicated to discussion and exercises, including role-playing.

### **HIST 0203. Modern Africa: From Empire to Nation-State.**

This course examines the major historical developments in Africa from 1945 to the present and pays special attention to the diversity of experiences within the vast continent. The first part focuses on Africans' varied responses to the waning European imperial project and explores different ways in which African nationalist leaders and everyday people challenged colonial administrations to ultimately achieve their independence. The second part of the class investigates the consequences and opportunities of decolonization, including questions of political legitimacy, state-building, structural adjustment programs and international aid, human rights, and civil conflicts.

### **HIST 0212. Histories of East Asia: China.**

China's ascendancy as a global economic power in recent decades has been regarded by many as a reclaiming of its former glory. In introducing the history of China from earliest times to the present, this course aims to provide an understanding of the making and remaking over millennia of what we call Chinese civilization, with its changes, contingencies, and continuities, its various claims to greatness, and its many recurring challenges. This course is open to all students and assumes no prior knowledge of Chinese culture, history, or language. Readings consist of both a textbook and relevant primary sources.

### **HIST 0214. Histories of East Asia: Japan.**

This is a course for students who have always been curious about Japan but haven't had an opportunity to explore that interest fully, for anyone in search of a better understanding of the historical contexts that shaped Japan's complex relationships with China, Korea and the West, and for all those who wish to broaden their exposure to the histories of East Asia. Open to all students, this course assumes no prior knowledge of Japanese culture, history, or language.

### **HIST 0215. Modern Korea: Contending with Modernity.**

This course examines the extraordinarily rapid revolution of Korea from isolated, agrarian society into a culturally modern, industrialized, and democratic nation that is an important actor on the world stage. It also will investigate how a non-Western society generates its own inspiration for human relations, social structure, political and cultural values. Includes coverage of North Korea.

### **HIST 0218. The Making of Modern East Asia.**

This course examines Asia in the shaping of the modern world, from competing definitions of empires circa 1800 to the rise of the notion of the twenty-first as a "Pacific Century." It investigates the definition(s) of Asia as a world region, explores transnational interactions and emphasizes Asians as historical actors via written, visual and aural sources. Events are placed in the context of key historical paradigms, including varying definitions of modernity, the rise of the nation-state, birth of mass politics, new mechanisms of war, the language of self-determination, changing views of gender, shifting types of media and consumption, etc.

**HIST 0228A. War and Peace in Modern Europe.**

This course explores the relationship between war, culture, and society in modern Europe. The two world wars changed the political, social, and cultural landscape of Europe, and by extension, of the rest of the world, not least the United States. We will not delve into the military history of these vast conflicts; instead, we will examine how the experience of total war remolded European understanding and practices of memory and commemoration, culture and representation, humanity and civilization, utopia and revolution, catastrophe and identity. We will read influential scholarly texts and literary works, and watch important contemporary films.

**HIST 0232. Clash of Empires in Latin America.**

Examines Latin America as the scene of international rivalry from the 16th to the 19th century. Topics include comparative colonization, the transatlantic slave trade, privateering and piracy in the Caribbean, and the creation of an "Atlantic world." P

**HIST 0233. Colonial Latin America.**

Colonial Latin America, from Columbus's voyage in 1492 to Independence in the nineteenth century, was the creation of three peoples: Europeans, Native Americans, and Africans. Spanish and Portuguese conquerors brought with them the world of the Crusades, the Inquisition, and the Renaissance. Native Americans lived there already, in rich empires and hunter-gatherer bands. Africans came as slaves from Senegal, Nigeria, Congo and Angola, bringing old traditions and creating new ones. These diverse peoples blended together to form a new people. This was a place of violence, slavery and oppression -- but also of art, faith, new societies, new ideas. P

**HIST 0234. Modern Latin America.**

This course is an introduction to the history of modern Latin America. Through lectures, discussions, shared readings, we will explore major themes in the past two hundred years of Latin American history, from the early nineteenth-century independence movements to the recent "Left Turn" in Latin American politics. Some of the topics we will examine include the racial politics of state-formation; the fraught history of U.S.-Latin American relations; the cultural politics of nationalism; how modernity was defined in relation to gender and sexuality; and the emergence of authoritarian regimes and revolutionary mobilizations, and the role of religion in shaping these processes.

**HIST 0243. Modern Middle East Roots: 1492 to the Present.**

A robust introduction to Middle East history from early-modern to contemporary times. We begin in Reconquista Spain with the expulsion of Iberia's longstanding Muslim and Jewish populations, before journeying to the eastern Mediterranean at the Ottoman Empire's zenith. In the "long" 19th-20th centuries, we explore modern tensions shaping this amorphous but pivotal region, including: colonialism, nationalism, and Islamism; water, fossil fuels, and information infrastructures; constitutionalism, authoritarianism, and "street" politics; and interventions by the US, USSR/Russia, and local powers. Emphasizing socioeconomic, legal, and environmental history perspectives, our goal is to unearth the roots of conflict and other conditions shaping today's "Mideast."

**HIST 0244. Understanding the Middle East: 1800s to the Present.**

This course is an introduction to the history of the modern Middle East from the mid-19th C to the present. Readings and topics are structured chronologically, and emphasize the key events and turning points in the political and economic history of the region. The goal of the course is to understand how the Middle East, as it is today, has been shaped by the events of the past.

**HIST 0247. Civilization, Empire, Nation: Competing Histories of the Middle East.**

The "Middle East" is a recent invention. 100 years ago, virtually none of the states currently populating the region's map existed. This course considers how historians (and others) have used the concepts of civilization, empire, and nation to construct competing narratives about this pivotal region's past from the rise of Islam to the present. Since facts acquire meanings through interpretative frameworks, we ask: What is privileged and what is hidden in these narratives? And what would the history of this region look like if we could see it through the eyes of the peoples who have long lived there?

**HIST 0248. 'Neither of the East nor West': The Ottoman Empire.**

The Ottoman Empire (1299—1923) was the longest lived, most powerful, and most controversial Muslim dynasty in history. From Turkish nomads in Asia to multiethnic empire straddling three continents, the Ottomans became the premier power of the early-modern Mediterranean and last to single-handedly govern most of today's "Middle East." Yet, the empire's formation and evolution—fusing Persianate, Mongol, and Roman heritages, as well as Muslim, Christian, and Jewish populaces—remain little understood. Navigating multiple regions and eras, we'll explore the contours of Ottoman history—from medieval beginnings to modern legacies, including those surviving the empire's partition and demise after WWI.

**HIST 0250. American Exceptionalism: The History of an Idea.**

For four centuries, the theme of America having a special place in the world has dominated American politics and culture, though many have questioned or challenged American distinctiveness. This course examines articulations and critiques of American exceptionalism, using sources from American history and literature, from comparative history and literature, and from modern American culture and politics. It is intended both as an introduction to American history and as a thematic class, focused on the U.S. in a global context, which is different from a traditional high school or first-year college American history class.

**HIST 0252. The American Civil War in Global Perspective: History, Law, and Popular Culture.**

This course uses the American Civil War of 1861-1865 to investigate certain issues relevant to current domestic and global affairs: the use of history in popular memory and popular culture (focusing on the Civil War in public art and film); the role of law in the prosecution and resolution of war; international law, especially as it applies to war and human rights. The course is aimed at students interested in history, law, and international relations. There are no prerequisites--the course is accessible to students at all levels--but some knowledge of U.S. history might be useful.

**HIST 0253. Religion, Politics, and Culture in America, 1865 - Present.**

Religion has played an undeniable role in the contemporary American cultural landscape. This course lends some perspective on the present by investigating the various and, at times, surprising role religion has played in history in the shaping of American culture from 1865 to the present.

**HIST 0257. Modern American History: New and Different Perspectives.**

Rather than a survey, this course uses specific episodes and events to reveal different modes of analysis. Examples of questions are: What do gender perspectives tell us about men on the frontier and women in dance halls? What is the importance of baseball to American culture? How do a historian and a lawyer differ in their analysis of a sensational crime case? How can we understand why the U.S. dropped two atomic bombs on Japan? How did scandals in television and popular music signal an end to American innocence? How has the Baby Boom generation altered American society? And more.

**HIST 0259. Labor, Land and Culture: A History of Immigration in the U.S..**

Current debates surrounding immigration and immigrants in U.S. society focus largely on the recent past, while simultaneously reiterating long-standing ideas and narratives. This course will equip students to better understand the genesis of such debates, including ideological, economic, and social factors, by exploring the history of immigration to what is now the United States. Sources from popular culture will aid students' insight into the ways in which American Exceptionalism, national identity, and constructions of "otherness" are woven into discourses regarding immigration, and further considers the ways in which "immigrant" is constructed as distinct from histories of colonialism, enslavement, and refuge.

**HIST 0270A. From Fire Welders to Empire Builders: Human Impact on the Global Environment before 1492.**

This is a new lecture course intended to introduce the field of environmental history to students with no previous experience in it. The study of prehistoric, ancient and medieval environments is a heavily interdisciplinary research field, and the course will emphasize the variety of sources available for studying it. We will combine textbook readings with primary source readings from scientific and archaeological reports and, especially, contemporary texts. P

**HIST 0270B. From the Columbian Exchange to Climate Change: Modern Global Environmental History.**

Environmental stories are constantly in the news, from weird weather to viral outbreaks to concerns about extinction and fracking. In this course, we put current events in the context of the past 500 years, exploring how climate, plants, animals, and microbiota – not just humans –acted as agents in history. From imperialism to the industrial revolution and from global capitalism to environmental activism, we will examine how nature and culture intermingled to create the modern world. This is an introduction to environmental history and assumes no prior courses.

**HIST 0273A. The First Globalization: The Portuguese in Africa, Asia, and the Americas.**

This class surveys history of Portuguese empire in Asia, Africa, and Brazil from fifteenth to early nineteenth centuries. Portugal pioneered the European expansion in the fourteenth century, laying the groundwork for several historical phenomena that defined modernity - the formation of colonial coastal enclaves in Africa and Asia, the colonization of the Americas, and the beginning of large-scale trade across the Atlantic and Indian oceans. The class analyzes the economic, religious and technological factors behind Portugal's pioneering role in European expansion. We focus on patterns of socio-cultural and religious interaction between Portuguese and native peoples in Asia, Africa, Brazil. P

**HIST 0276. A Global History of the Atomic Age.**

We live in the atomic age. From 1945 to the foreseeable future, atomic weapons and nuclear energy have had (and will continue to have) a tremendous effect on global politics, the environment, and everyday life around the world. This course introduces students to three themes in this broader history: first, we examine the origins of nuclear proliferation and the global arms race; second, we explore cultural responses to the atomic age; third, we juxtapose the excitement over the unlimited promise of nuclear energy with the slow catastrophes that accompanied weapons development, the nuclear industry, and waste storage.

**HIST 0276B. Science and Capitalism.**

We will explore the longstanding relationship between science and commerce from the 17th century to our own asking when the modern notion of science as a disinterested pursuit of objective truth took root. We will also explore how knowledge of the natural world has been shaped by personal, financial, and other kinds of self-interest in a number of diverse contexts ranging from Galileo's invention of the telescope in Renaissance Italy to the patenting of genetically engineered organisms in today's world, paying special attention to the diverse mechanisms that have been devised to guard against fraud and disinformation.

**HIST 0285A. Modern Genocide and Other Crimes against Humanity.**

This lecture course explores genocide and other crimes against humanity across the world during the 20th century. We will discuss the origins of modern genocide in the transition to modernity and subsequent conceptualizations of this phenomenon; review examples of colonial, imperial, racial, communist, anti-communist, and post-colonial genocides; discuss war crimes and other mass crimes perpetrated by authoritarian regimes; and consider policies of mass deportation and ethnic cleansing. This course will conclude with a discussion of attempts by the international community to prevent and punish genocide along with various ways in which genocide has been commemorated or denied.

**HIST 0286A. History of Medicine I: Medical Traditions in the Old World Before 1700.**

People have always attempted to promote health and prolong life, and to ameliorate bodily suffering. Those living in parts of Eurasia also developed textual traditions that, together with material remains, allow historians to explore their medical practices and explanations, including changes in their traditions, sometimes caused by interactions with other peoples of Europe, Asia, and Africa. We'll introduce students to major medical traditions of the Old World to 1700, with emphasis on Europe, and explore some reasons for change. A knowledge of languages and the social and natural sciences is welcome not required. P

**HIST 0286B. History of Medicine II: The Development of Scientific Medicine in Europe and the World.**

From the 18th century onward, Western medicine has claimed universal validity due to its scientific foundations, relegating other kinds of medicine to the status of "alternative" practices. The course therefore examines the development of scientific medicine in Europe and elsewhere up to the late 20th century, and its relationships with other medical ideas, practices, and traditions. Students with a knowledge of languages and the social and natural sciences are welcome but no prerequisites are required.

**HIST 0505. Africa and the Transatlantic Slave Trade.**

This class deals with the History of transatlantic slave trade by emphasizing how Africa affected and was affected by the largest forced migration in the History of humankind. The class will engage key debates in the historiography of the slave trade, such as whether the trade underdeveloped Africa, the connection between the trade and the rise of coastal kingdoms in West Africa, and African resistance/cooperation with the slave trade. P

**HIST 0510A. Shanghai in Myth and History.**

"Fishing village", "Paris of the East", or "a waking dream where everything I could already imagine had been taken to its extreme?" In an iconic role, Marlene Dietrich bragged that "it took more than one man to change my name to Shanghai Lily," but the local song "Shanghai by Night" retorted, "To look at her/Smiling face/Who would know that she's troubled inside?" We will examine why Shanghai has gripped the imaginations of so many, placing the material history of the city alongside dream and image, focusing on the four topics of colonialism, race and ethnicity, gender and sexuality, and class.

**HIST 0520A. Athens, Jerusalem, and Baghdad: Three Civilizations, One Tradition.**

We examine core beliefs of early Greek, Jewish, Christian, and Islamic civilizations that form the basis of Western thought. Serving similar ideological purpose in the pre-modern world as have political and economic theories for the modern world, religion and philosophy defined individual lives and collective identities. We focus on the manner of appropriation and modification of thought from one culture to another in order to appreciate that there is far more similarity than difference in belief systems among what are today viewed as separate, even contesting, cultures. Enrollment limited to 20 first year students. Instructor permission required. P

**HIST 0521A. Christianity in Conflict in the Medieval Mediterranean.**

Students in this class will learn about medieval history by taking on roles, informed by classic texts, in elaborate games set in the past. Drawing on the innovative "Reacting to the Past" curriculum, this class explores two dramatic moments in medieval history: the debate about Christian belief held at Nicaea in 325 and the deliberations about crusading held at Acre in 1148. Students will adhere to the intellectual beliefs of the medieval figures they have been assigned to play, and will learn skills—speaking, writing, critical thinking, leadership, and teamwork—in order to prevail in difficult and complicated situations. P

**HIST 0521M. The Holy Grail and the Historian's Quest for the Truth.**

Dan Brown's wildly successful novel *The Da Vinci Code* has recently given a feminist twist to an enduringly popular medieval legend also captured in big-screen antics of Monty Python and Indiana Jones: the quest for the Holy Grail. Beginning with Brown's novel and other modern representations of the search for the Grail then turning back to texts from the Middle Ages, this seminar will unravel the truth - or truths - behind the legend. One central question will be how historians can use legends to understand the cultures they study. Instructor permission required. P

**HIST 0522G. An Empire and Republic: The Dutch Golden Age.**

Between about 1580 and 1690, a new nation emerged in Europe that became a bastion of liberty, ideas in ferment, fine art, military power, science and technology, and global economic reach: the Dutch Republic. A nation that thought of itself as peaceful, yet was constantly at war; as Protestant, yet was composed of people of many faiths; as personally aspirational, yet derived much wealth from the conquest and slavery of others. Its people and institutional arrangements greatly influenced Britain and America on their paths to power, too. Its rise and eclipse may be instructive.. Enrollment limited to 19 first-year students. P

**HIST 0522N. Reason, Revolution and Reaction in Europe.**

First year seminar designed to introduce students to the study of history through a focused look at the French Revolution. It will be divided into two very different parts. The first part will be organized as a traditional history seminar in which we explore together the eighteenth-century developments that preceded the outbreak of the French Revolution. In the second half of the class, students will be assigned different roles in order to re-enact the discussions in the National Assembly that, from 1791 to its collapse in 1792, tried to create a constitution for the new French Nation. P

**HIST 0522O. The Enlightenment.**

The Enlightenment: Introduction to the Enlightenment as a fragmented series of projects that aimed at human liberation and the understanding of the social and natural worlds, with massive implications for the way that we conceive of ourselves today. Readings explore philosophy, science, slavery, economics, gender relations, and politics in the 18th century.

**HIST 0523A. The Holocaust in Historical Perspective.**

The course will examine the history and historiography of the Holocaust from early accounts to recent reconstructions of the origins, implementation, and aftermath of the "Final Solution." We will also analyze documents, testimonies, memoirs, trial records, and various forms of representations and commemorations of the Shoah. Enrollment limited to 19 first year students.

**HIST 0523B. State Surveillance in History.**

How and why do states watch their citizens? This course explores historical practices of state surveillance from the perspective of both the "watchers" and the "watched." Special emphasis will be given to twentieth-century Europe, but examples from other parts of the world and the US will also be featured in the readings. Some of the readings will be primary sources: memoirs, diaries, surveillance files. Other sources will include films and short fiction and some scholarly pieces on the workings of state security and secret police organizations.

**HIST 0523M. History of Fascism.**

What is fascism—both in theory and in practice—and what remains of it a century after the establishment of the first fascist regime in Italy? This course will explore the social, cultural, and intellectual origins of fascism, the rise of fascist movements in Europe in the early to mid-20th century, the politics and policies of fascist parties and regimes—including Germany, Italy, Iberia, in the Balkans, and in the Baltic States—and transnational links to the Americas, Asia, and Africa. This course will conclude with considerations of anti-fascism in the postwar world as well as the legacies of fascism in contemporary far right politics.

**HIST 0523O. The Academic as Activist.**

Since the late nineteenth century, the modern research university has struggled with questions about When is the researcher participating in engaged scholarship? When does engagement suggest, instead, a lack of objectivity? How have economists, anthropologists, biologists, and historians tried to contribute to the common good, and where have their efforts broken barriers of privilege, and when have their efforts contributed to further oppression? This seminar will look at debates over the role of academics in political life. Topics may include: Fabian socialism, libertarianism and development economics, pan-African movements, and the Green Revolution.

**HIST 0523P. The First World War.**

On the eve of the First World War, many Europeans cheered for a "war to end all wars." It achieved nothing of the like, instead inaugurating a century of war and unthinkable destruction. This seminar explores the history of the first truly global conflict, examining its origins, its course, its aftermath, and how it might help us better understand our own world today. A broad set of primary sources, from soldiers' diaries to rationing cards, artwork, and diplomatic cables, forms the basis for discussion. Designed as an introduction to historical inquiry and writing.

**HIST 0535A. Atlantic Pirates.**

This seminar explores piracy in the Atlantic from the sixteenth to the early nineteenth centuries. We will examine everyday life on pirate vessels; the pirates' role in emerging colonial societies and economies; the complex links between piracy, imperialism, and nation-building; and the image of pirates as both villains and figures of legend. Enrollment limited to 19 first year students. P

**HIST 0535B. Conquests.**

What does "conquest" mean? How does it take place, and how is it experienced by both the invaders and the invaded? Drawing upon both primary and secondary sources, this seminar explores how conquest shaped the region we now know as Spanish America. We will begin with the great pre-Columbian empires of the Aztecs and Incas, and then turn to Spanish expeditions in the sixteenth century. The course will encompass specific moments of encounter (such as the Spanish capture of the Inca emperor Atahualpa at Cajamarca), as well as the broader implications of forging a new political and social order. P

**HIST 0537A. Popular Culture in Latin America and the Caribbean.**

From tango to plastic surgery, Donald Duck to reggaeton, this course places popular culture at the center of modern Latin American and Caribbean history. How, we will ask, did popular culture reflect and shape struggles over national belonging? How did foreign cultural products come to bear on international relations and transnational flows? In what contexts has culture served as a vehicle of resistance to dominant ideologies and systems of power? Far from a mere "diversion," popular culture instead offers a compelling lens onto the relationship between state and society in Latin America and beyond.

**HIST 0537B. Tropical Delights: Imagining Brazil in History and Culture.**

Examines the many ways that Brazilians and foreigners have understood this vast continent-size country, ranging from early European explorers' anxieties about Cannibalism to modern images of the Amazonian rainforest, Rio De Janeiro's freewheeling Carnival celebrations, and the array of social movements mobilizing for social justice. Through an examination of historical sources, literature, movies, and popular culture, this seminar will consider how multiple images and projections of Brazil have shaped national and international notions about the country. Reserved for First Year students. Enrollment limited to 19.

**HIST 0540F. Women in the Middle East, 7th-20th C.: Patriarchal Visions, Revolutionary Voices.**

This course provides an historical approach to women's lives, status, and perceptions. It focuses on women in the Middle East, from the seventh century emergence of Islam to the twentieth century revolutions and struggle for new identities. It examines the contested roles of women in society and the ways women were culturally crafted. In particular, we will discuss the modes by which women's lives were narrated (by themselves and others); women's use of the "patriarchal bargain" to deal with the shift from so-called "traditional" to so-called "modern" culture; and the encounter between "Eastern" and "Western" societies.

**HIST 0550A. Object Histories: The Material Culture of Early America.**

History is not just about people; it is also about things! Come explore the world of early America through the lens of objects—boats, dresses, plows, houses, wagons, watches, silver cups, wigs, blankets, land, gardens, hammers, desks—and the cultures that produced and consumed them. As a first year seminar, this course is designed to engagingly introduce students to the basic concepts of historical study. We will take several field trips to local historical sites, both on and off campus. Our primary focus will be specific objects and their contexts and histories. Enrollment limited to 19 first year students. P

**HIST 0551A. Abraham Lincoln: Historical and Cultural Perspectives.**

This seminar uses life, legacy, myth of Abraham Lincoln to explore central themes such as frontier in early republic, nature of political leadership, law/legal culture, and emergence of sectionalism, slavery, antislavery, Civil War. Frequent short writing assignments and research investigations allow students in-depth explorations of Lincoln's works, the writings of his contemporaries, and modern non-fiction, fiction, and film. The course enables us to consider two larger themes: 1) the relationship between memory and history; and 2) the function of history in modern society. The course has no prerequisites and does not presuppose special knowledge of American history.

**HIST 0555B. Robber Barons.**

Today, the United States looks a lot like it did at the turn of the 20th century. Much like it is now, America's economy at that time saw tremendous growth interrupted by periodic financial crises. Moreover, both are periods of immense inequality. Whereas we have the one per cent, the late 19th century witnessed a small group of capitalists amass unprecedented fortunes, which provided immense political power. In this class, we will explore what the lives of these "robber barons" can tell us about the role of economic privilege in shaping America's social, cultural, and political history.

**HIST 0556A. Sport in American History.**

This course covers the relationship of sports to aspects of American culture since 1900. Topics include gender, race, amateurism, professionalism, intercollegiate athletics, and sports heroes. Enrollment limited to 19 first year students.

**HIST 0556B. Inequality and American Capitalism in the Twentieth Century.**

"Inequality in America rose, fell, and rose sharply again over the 20th century. Why were the early decades of the century so unequal? How did working and middle-class Americans gain a greater share of wealth and why did it these gains later slip away? How truly egalitarian were the mid-century decades? We will examine the rise of corporations, the New Deal, deindustrialization, labor, housing, and the economics of race and gender that weave through them all. Students will come away from the class able to link global economic trends with the intimate everyday experiences of inequality in America.

**HIST 0557A. Slavery and Historical Memory in the United States.**

How has America chosen to remember and forget the enslavement of millions of its own people? What are appropriate ways to acknowledge slavery in monuments, museum exhibitions, film, literature, and public policy? By approaching these questions through a wide range of visual and textual sources, we will explore the indeterminate space between history and memory. Enrollment limited to 19 first year students.

**HIST 0557B. Slavery, Race, and Racism.**

This seminar will address the history of race and racism as it relates to the history of slavery in America. We will trace the emergence of slavery in the New World, with a heavy emphasis on slavery in the U.S. South. The course is broad in scope, beginning with the emergence of the slave trade and concluding with a look forward to the ways that the history of slavery continues to impact the way race structures our lives today. In short, this course provides an introduction to slavery studies and to the history of race in America.

**HIST 0557C. Narratives of Slavery.**

This course will uncover the history of the slave trade, the labor regimes of slavery in the Caribbean and North America, and the rise of the Cotton Kingdom through the voices of the very people who lived through it: enslaved people themselves. We will read slave narratives, court documents, abolitionist treaties, oral histories of formerly enslaved people, and fictional accounts produced in the period. We will give special attention the ways that different kinds of historical sources—different types of narratives—shape what we know and how we know it in the history of slavery.

**HIST 0559A. Culture and U.S. Empire.**

This seminar examines the relationship of American culture to U.S. imperial project. We will look at how cultural ideologies such as those about race, gender, and American exceptionalism have not only shaped Americans' interactions with other peoples but also justified the spread of U.S. power. Enrollment limited to 19 first year students.

**HIST 0559B. Asian Americans and Third World Solidarity.**

As historian Vijay Prashad puts it, "The Third World was not a place. It was a project." During the 20th century struggles against colonialism, the peoples of Africa, Asia, and Latin America believed that another world was possible. Here, too, in the United States, minorities and their allies dreamed of dignity, democracy, and justice. Looking through the experiences of Asian Americans, this course examines the domestic freedom movements in the context of global decolonization. Topics include: campus activism, immigration, capitalist labor regimes, neocolonialism, cultural hegemony, and Afro-Asian connections.

**HIST 0574A. The Silk Road, Past and Present.**

The Silk Road has historically been the crossroad of Eurasia; since the third-century BCE it has linked the societies of Asia—East, Central, and South—and Europe and the Middle East. The exchange of goods, ideas, and peoples that the Silk Road facilitated has significantly shaped the politics, economies, belief systems, and cultures of many modern nations: China, Russia, Afghanistan, Uzbekistan, and India. This course explores the long history (and the mythologies or imaginations) of the Silk Road in order to understand how the long and complex pasts of the regions it touches are important in the age of globalization.

**HIST 0576A. The Arctic: Global History from the Dog Sled to the Oil Rig.**

The Arctic is regularly in the media, thanks to climate change. This course examines the long history of human thinking about and habitation in the far north before and during the era of global warming. Focusing on how people valued, survived, and made the arctic home, topics range from whaling, the importance of dogs, cultural imaginaries and colonialism to capitalist and communist arctics, the meaning of sea ice, indigenous rights, and climate change. The course introduces historical methods and environmental history through reading, writing, discussion, and interpreting artifacts.

**HIST 0577A. The Chinese Diaspora: A History of Globalization.**

Why are there Chinese in the US, Canada, Mexico, Cuba, Peru? Singapore, Indonesia, Thailand, Vietnam, the Philippines? Australia, New Zealand, Fiji, Guam, Samoa? Mozambique, Zimbabwe, Cape Verde, Ghana? Spain, Germany, France, Russia, Czech Republic? Mauritius, Madagascar? India, Sri Lanka, Myanmar? Hong Kong, Macau, Taiwan? How and when did 50 million Chinese find their way around the world during the past 500 years, from the Ming Dynasty to the present moment? We will explore worldwide distribution of ethnic Chinese through Time (history) and Space (culture) in the so-called "Chinese diaspora," and examine questions of migration, identity, belonging, politics and conflict.

**HIST 0580M. The Age of Revolutions, 1760-1824.**

In the middle of the eighteenth century, the Americas belonged to a handful of European monarchies; within a few decades, most of the Americas was composed of independent republics, some of the European monarchs were either deposed or quaking on their thrones. Usually considered separately, revolutions in British North America, France, Saint-Domingue (Haiti) and Spanish America had diverse local circumstances yet composed a single cycle of intellectual ferment, imperial reform, accelerating violence and, forging of new political communities. We will examine revolutions that helped create the world we live in. Enrollment limited to 19 first year students. P

**HIST 0580O. Making Change: Nonviolence in Action.**

This seminar will focus on the life and work of one of the most influential thinkers of the twentieth century, examining both his role in the Indian nationalist movement, as well as the global impact of his ideas on leaders such as Martin Luther King Jr. and Nelson Mandela. Enrollment limited to 19 first year students.

**HIST 0582A. Animal Histories.**

Animals have been people's energy, food, wealth, gods, hobbies, icons, and companions. Wild and domesticated non-human animals are essential yet often invisible historical subjects. This seminar makes them visible by tracking them through time—ancient, modern, and contemporary—on every continent. They are often symbols, but we look beyond animals as represented by people. We are more interested in them as actors and subjects with agency. By pushing at the boundaries of what constitutes legitimate topics, this seminar serves as a critical introduction to the historical discipline.

**HIST 0582B. Science and Society in Darwin's England.**

This course is a first year seminar designed to introduce students to the study of history. It will be divided into two very different parts. The first part will be organized as a traditional history seminar in which we explore together the world in which Darwin developed his theory of the Origin of Species. The second part will be a historical re-enactment of an 1863 discussion in Britain's Royal Society about whether to award Darwin their highest honor, the Copley Medal. Enrollment limited to 19 first year students.

**HIST 0621B. The Search for King Arthur.**

The King Arthur legend is one of the most enduring stories to emerge from medieval Britain. Drawing evidence from written and archaeological sources, we'll delve into shadowy period in which legend is based, between the collapse of Roman imperial power in Britain and establishment of the Anglo-Saxon and Celtic kingdoms that would succeed the empire. We'll also take students inside the historian's workshop, exposing them to the tools, texts, and objects from which historians and archaeologists construct their interpretations of how the inhabitants of Arthur's Britain lived and died. Enrollment limited to 20 sophomores. P

**HIST 0623A. British Social History.**

What is the role of history in imagining progress, identity, and political movements? This course begins by reading classic nineteenth-century historians From Trevelyan to E. P. Thompson, asking about the politics implicit in their choice of subject and archive. It then turns to contemporary history, asking, how have debates about race, gender, and the environment in the past thirty years shaped how we look at history? How have different tools like digital history or the analysis of culture changed what we look at or why? How is the study of history changing today?

**HIST 0623M. Becoming French: Minorities and the Challenges of Integration in the French Republic.**

Recent controversies around Muslim integration, including debates around the headscarf and uprisings in the working class suburbs of French cities, point to difficulties France has faced in integrating minority populations. We'll explore the encounter between France and its immigrant, religious, and racial minorities from the Revolution to contemporary times. By comparing paths of integration and debates around minority inclusion and consider how minorities negotiated their identities as they struggled to internalize France's cultural and historical legacy. We'll address political and historiographical debates over the relationship between political citizenship and religious/cultural identity. Enrollment limited to 20 sophomores.

**HIST 0637B. Fractious Friendships: The United States and Latin America in the Twentieth Century.**

From the vantage point of ordinary men and women, statesmen, businessmen, and scholars, this course explores how Latin Americans in various countries viewed and engaged with the United States during the twentieth century. We will look at how perceptions of the United States formed across Latin America and how and why they changed over time (or why they did not). The ultimate aim is to uncover the reasons for the sometimes amicable, but often strained, ties between Washington and its hemispheric counterparts. Prominent topics include imperialism, nationalism, war, diplomacy, popular culture, consumerism, and industrialization.

**HIST 0654A. Welfare States and a History of Modern Life.**

History of the American welfare state, from its origins in nineteenth-century industrial capitalism to contemporary debates about health care, in comparative perspective. Why did welfare states appear and what form did the U.S. version take? Considerations of social inequality, labor relations, race, gender, family policy, the social wage, and the relationship between markets and the state are all considered. Some comparison with European models.

**HIST 0654B. American Patriotism in Black and White.**

This course explores the different and sometimes conflicting definitions and meanings of patriotism and citizenship through the lens of African American history and military participation, using primary and secondary sources from the colonial period to the present, including political and legal documents, letters to editors, literary pieces, plays, speeches, and petitions. What are the many definitions of freedom and patriotism, and how have black people understood their realities as they chose to serve militarily? This social and political (not military) history focuses on the political implications of African Americans' military service for/to the nation over three centuries.

**HIST 0655A. Culture Wars in American Schools.**

This course examines "culture wars" in American public schools over the past century. It will explore how and why school curriculum has become an arena for cultural conflict and how those debates have changed over time. These debates clashes in schools over religion, values, politics, and educational aims raise important questions about majority and minority rights, the existence and meaning of a common national culture, and the role of schooling in a democratic nation. Enrollment limited to 20 first year students and sophomores.

**HIST 0656A. History of Intercollegiate Athletics.**

The United States is the only country in the world in which practically every institution of higher education finances and promotes high-caliber athletics. How did this phenomenon happen? Has there ever been any resistance to its happening? How and when did African Americans integrate collage sports? Did Title IX really open up opportunities for women in college sports? Are sports the "front door" of colleges and universities? This course examines these and other questions as it examines the interrelationship between the histories of sports and higher education in the U.S.

**HIST 0658D. Walden + Woodstock: The American Lives of Ralph Waldo Emerson and Bob Dylan.**

Emerson and Dylan are cultural icons. Emerson has been called "Mr. America" and Dylan has just won the Nobel Prize for Literature. Both had boundless energy for public performance and self-representation; both actively supported turning points in the civil rights struggle; both raged against American military aggression; both were at the epicenter of a wide circle of intellectuals, while denying their own centrality. What is the celebrity intellectual's responsibility to society while remaining true to oneself? Poems, essays, autobiographies, songs, and movies provide insight into these eternally fascinating geniuses and their times.

**HIST 0675A. The Chinese Diaspora: A History of Globalization.**

To understand globalization is to study linkages and circulation of peoples, goods, cultures and ideas across space (land and sea) and over time. There is no better illustration of globalization than the Chinese diaspora--the worldwide dissemination of Chinese people and their descendants across the world from the Ming Dynasty to present. After sketching the global contour of this phenomenon, students will drill down deeper into specific regions of the world to examine conflicts and integration as immigrants localize; identity, community and social formations as immigrants re-territorialize; as well as transnational relationships with place of origin and co-ethnics in the diaspora.

**HIST 0685A. The Social Lives of Dead Bodies in China and Beyond.**

The dead are all around us, but how do we know it? This course aims to uncover how corpses interact with the living as participants in social relations, especially during times of community upheaval. We'll take China and Taiwan as jumping off points, but also look elsewhere in Africa, the Americas, Asia and Europe since the 19th century, when the broadening scale and nature of warfare; state expansion; rapid development; global circulations of technology; and the interplay of international philanthropies with older forms of charity and ritual pacification significantly affected the treatment, conceptions, and actions of the dead.

**HIST 0690A. Empire and Everyday Life in Colonial Latin America.**

What was it like to live a "regular" life in the American colonies of Spain and Portugal? How did people eat, dress, have fun, start and sustain families, pursue careers, and think about the world and themselves? Drawing upon a range of sources, this course considers how global and local forces intersected in the individual or community in myriad, yet historically contingent, ways. This micro focus provides another way of considering the broad historical forces at work in the colonies, such as religion, gender, politics, race, technology, and geography, from the "inside-out" perspective of individual and communal accounts and stories.

**HIST 0690B. Women's Work: Gender and Capitalism in American History.**

This course examines the importance of women and gender to the long economic history of the United States. Whereas the history of American capitalism has often been a primarily male story, this course moves women from the margins of the narrative to the center. It asks how female labor (paid and unpaid), cultural norms around gender and family, and issues of sex and reproduction have fundamentally shaped economic life—not just for women, but for all Americans. Students will gain insight into American women's history, the history of capitalism, and the intersectional history of gender, sexuality, race, and class.

**HIST 0720. The Romans.**

The Romans established the only successful pan-Mediterranean empire in history, lasting nearly 1,000 years, with a legacy living everywhere today, from the U.S. Constitution to the English alphabet. Who were these people? We will study their social-political history from the city's founding in 753 BCE to its fall in 476 CE, confronting the opinions of ancient authors directly to study historical questions such as: what challenges and problems did empire create? How did gender shape Roman lives? Or what does the decline of Rome's democracy reveal about the state of American democracy?

**HIST 0770. Evil: The History of an Idea.**

This course considers how individuals and societies have constructed the idea of evil. We examine evil's origins in religious traditions and review how those interpretations have been deployed and how the concept of evil has changed over time. Is it possible to offer a universal definition of evil? Is it true that "When a woman thinks alone, she thinks evil?" Does evil exist in "the Other" or oneself? To answer these questions, we engage in activities and discussion about sin, hell, pacts with the devil, witches, torture, lynching, genocide, psychopaths, empathy, and representations of evil in music, literature, and film.

**HIST 0770B. Political Imprisonment and Captivity in the Modern World: from Revolution to Conscience.**

This course examines the history of political incarceration and captivity since the French Revolution. What is the relationship between the rise of ideologies such as fascism, communism and nationalism on the one hand, and the use of political imprisonment on the other? How do crimes and the political intersect? We examine several cases to consider how captivity has been used for political purposes in the modern world. In addition to scholarly works, readings will consist of primary source documents and memoirs. Emphasis will be placed on Europe, but the course will also include lectures and readings on other geographic regions.

**HIST 0930A. Word, Image and Power in Renaissance Italy (ITAL 0580).**

Interested students must register for ITAL 0580.

**HIST 0930E. Sacrifice and Suffering: Rhetorics of Martyrdom Compared (RELS 0640).**

Interested students must register for RELS 0640.

**HIST 0930F. Twentieth-Century Africa (AFRI 0160).**

Interested students must register for AFRI 0160.

**HIST 0930G. Difficult Relations? Judaism and Christianity from the Middle Ages until the Present (JUDS 0050M).**

Interested students must register for JUDS 0050M.

**HIST 0930I. History of the Holocaust (JUDS 0902).**

Interested students must register for JUDS 0902.

**HIST 0930J. The World of Byzantium (CLAS 0660).**

Interested students must register for CLAS 0660.

**HIST 0930M. Brothers Betrayed: Jews and Poles from 1500 until Today (JUDS 0901).**

Interested students must register for JUDS 0901.

**HIST 0930N. War and Society in the Ancient World (CLAS 0560).**

Interested students must register for CLAS 0560.

**HIST 0930P. Powering the Past (ENVS 0710).**

Interested students must register for ENVS 0710.

**HIST 0940A. History of Intercollegiate Athletics (EDUC 0850).**

Interested students must register for EDUC 0850.

**HIST 0940B. The Campus on Fire: American Colleges and Universities in the 1960's (EDUC 0400).**

Interested students must register for EDUC 0400.

**HIST 0940C. When Leaders Lie: Machiavelli in International Context (ITAL 0981).**

Interested students must register for ITAL 0981.

**HIST 0940D. The Border/La Frontera (ETHN 0090A).**

Interested students must register for ETHN 0090A.

**HIST 0940E. Autobiography of the Civil Rights Movement (AFRI 0110C).**

Interested students must register for AFRI 0110C.

**HIST 0940F. Brown v. Board of Education (EDUC 0610).**

Interested students must register for EDUC 0610.

**HIST 0940G. From Amsterdam to Istanbul: Christians, Moslems, and Jews (JUDS 0050E).**

Interested students must register for JUDS 0050E.

**HIST 0940H. The Jew in the Modern World (JUDS 0050L).**

Interested students must register for JUDS 0050L.

**HIST 0940I. Social Welfare in the Ancient Greek City (CLAS 0310).**

Interested students must register for CLAS 0310.

**HIST 0940K. Israel's Wars (JUDS 0050H).**

Interested students must register for JUDS 0050H.

**HIST 0940L. Difficult Relations? Judaism and Christianity from the Middle Ages Until the Present (JUDS 0050M).**

Interested students must register for JUDS 0050M.

**HIST 0960G. When Leaders Lie: Machiavelli in International Context (ITAL 0981).**

Interested students must register for ITAL 0981.

**HIST 0980K. Extinction: A Global History (ENVS 0700C).**

Interested students must register for ENVS 0700C.

**HIST 0980L. Food for Thought: Food and Agriculture in the History of the Americas (ENVS 0700D).**

Interested students must register for ENVS 0700D.

**HIST 1030. Entangled South Africa.**

Examines the contradiction of twentieth century South Africa as a divided society that nonetheless had dense contact across boundaries. In considering daily life, social interactions, and relations with animals, we find a challenging politics of entanglement within the class, gender, and racial hierarchies of apartheid. We close with a discussion of new divisions and alignments emerging during the transition to democratic rule in the 1990s.

**HIST 1050. Africa and the Transatlantic Slave Trade.**

This lecture class looks at the relationship between Africa and the Transatlantic slave trade from the late fifteenth century to the nineteenth century. We deal with the main regions of Atlantic Africa affected by the largest forced migration in the history of humankind, focusing on such issues as resistance to the slave trade and the role of slavery in the African continent. The class will reflect on the relationship between the slave trade and African patterns of long-term underdevelopment as well as the relationship between the abolition of the trade and the rise of colonialism in the nineteenth century. P

**HIST 1060. Africa, c.1850-1946: Colonial Contexts and Everyday Experiences.**

This course considers major actors and developments in Africa from the mid-nineteenth through the mid-twentieth centuries. With a critical awareness of the ways that Africa's past has been narrated, it balances coverage of the state and economy with attention to daily life, families, and popular culture. The majority of the reading assignments are drawn from contemporary documents, commentaries, interviews, and memoirs. Works produced by historians supplement these. Students will analyze change, question perspectives, and imagine life during the age of European imperialism. Written assignments include a book review, two examinations, and identifying and editing a primary source text.

**HIST 1070. "Modern" Africa.**

This course begins with the end of imperialism and ends with a look toward the future. Themes include the pivotal importance of the newly sovereign states, the ongoing engagement with the rest of the world, and shared opinion about the imperative of modern development, even as definitions of modern and development differed. Readings include many primary sources, supplemented by articles on history and social science. Evaluation is based on participation, a map quiz, mid-term and final examinations, and short writing examinations, including article reviews. Students will also discover, analyze, and edit two new primary sources.

**HIST 1080. Humanitarianism and Conflict in Africa.**

This course focuses on the major issues and debates concerning humanitarianism and international intervention in 20th century Africa. It will explore the history of humanitarianism and the many challenges that arise when governments and institutions intervene in a conflict. Then students will investigate specific sites of conflict in Africa (ranging from Nigeria, Somalia, Rwanda, Sudan, and Western Sahara) and analyze different models of intervention and aid. These case studies will expose students to pivotal events in African history and equip them with a critical vocabulary with which to assess contemporary conflicts.

**HIST 1101. Chinese Political Thought from Confucius to Xi Jinping.**

Xi Jinping, President of the People's Republic of China, cites the ancient political thinker Han Feizi (280-233 BCE) as an important influence on his approach to governance. He has also embraced (as have several leaders before him) some of the political and social ideals of Confucianism—ideals first stated in the sixth century BCE. This lecture-and-discussion course traces the history of Chinese political thinking from the first Chinese state to the present, emphasizing first, those ideas that continue to shape Chinese notions of governance, and second, comparisons between these and American political ideals. P

**HIST 1110. Imperial China/China: Culture and Legacy.**

As the current revival of Confucianism in the People's Republic of China demonstrates, the past is still very much alive in China today. This lecture-and-discussion course surveys the history of China from the origins of the first state through the twilight of the imperial period in the nineteenth century. Lectures are designed and the reading assignments chosen to emphasize in particular those ideas and beliefs, institutions and government structures, and literary and artistic developments that have shaped (and continue to shape) China today. "Imperial China" provides the knowledge necessary for informed study of modern China. P

**HIST 1118. China's Late Empires.**

A post-nationalist perspective on history in China from 1200-1930, with emphasis on empire--formation, gender, and daily life in the Mongol Yuan, Chinese Ming, and Manchu Qing empires, as well as nationalist reconstructions of the Chinese past in the early twentieth century. P

**HIST 1120. At China's Edges.**

What does it mean to live on the borders of a rising world power? This course introduces the modern histories of such places as Hong Kong; Macau; Taiwan; Manchuria; Sichuan; Yunnan; and Xinjiang by investigating their commonalities and differences. Themes include: ecology and identity; comparative colonialisms and experiences of decolonization; war and border regions; nation building, citizenship, and the "art of not being governed." Students will have an opportunity to research additional sites (e.g. Mongolia, Tibet) using frameworks introduced in class discussions.

**HIST 1121. The Modern Chinese Nation: An Idea and Its Limits.**

How did the Chinese empire become a nation-state? This question drives a survey of the history of China, Taiwan, Hong Kong and Chinese societies overseas from 1895 to the present. We will explore a variety of conceptions of the Chinese nation and the rise of new state formations, investigating the extent to which they shaped the way people experienced everyday life. We will also pay attention to those who have been excluded by or unwillingly drafted into these processes, or who live outside them altogether, looking at other ways society has been organized and culture defined.

**HIST 1122. China Pop: The Social History of Chinese Popular Culture.**

An exploration of how the artifacts of visual, material, aural and ritual culture illuminate the construction of and tensions in Chinese society at various levels and localities during the last two centuries. Topics include arrangements of space and time; gender and the body; popular entertainment; religion and performance; the growth of mass media; and the relationship of cultural forms to politics, local identity, and global forces. Class projects will draw on the Haffrenreffer collection and develop multimedia presentations.

**HIST 1140. Samurai and Merchants, Prostitutes and Priests: Japanese Urban Culture in the Early Modern Period.**

Examines the cultural traditions of the urban samurai, the wealthy merchant, and the plebian artisan that emerged in the great metropolises of Edo, Osaka, and Kyoto during the early modern period. Focuses on the efforts of the government to mold certain kinds of cultural development for its own purposes and the efforts of various social groups to redirect those efforts to suit their desires and self-interest. P

**HIST 1141. Japan in the Age of the Samurai.**

This course is for students interested in exploring Japan's remarkable cultural, political and social transformations during the Age of the Samurai, which began in the late 12th century and came to a close in the mid-19th century. Lectures, readings and films will explore how the emergence of new forms of military expertise and technologies led to the creation of warrior-led "tent governments," that first co-existed with and eventually supplanted the structures of power centered on Kyoto and the Imperial Court. Open to all students. P

**HIST 1149. Imperial Japan.**

This course is for students interested in exploring the changing ideas, technologies and practices that shaped Japan's history from the 1850s, when it confronted the power of an encroaching West, to the 1930s when its choices led the nation to the edge of ruin. Lectures and readings will address the collapse of the Tokugawa regime, the Meiji Restoration, the construction of empire, and the emergence of new forms of cultural and political expression. Students will also learn how ideas about gender, race, and tradition were understood and made use of in Imperial Japan. Open to all students.

**HIST 1150. Modern Japan.**

Japan is a rich site for an exploration of many of the key processes and concepts that have shaped, and continue to transform, the modern world. These include the creation of the nation as the fundamental structure for social and political organization, a development that came late to Japan and had profound effects on its relationships with its neighbors, the crafting of its own histories, and with the emergence of debates about what it meant to be "Japanese." The course also explores how ideas about gender, race, and tradition have been understood and made use of in modern Japan.

**HIST 1155. Japan's Pacific War: 1937-1945.**

Uses film, oral histories, historical fiction, and more traditional forms of historical interpretation to explore the events, ideas, and legacies of Japan's Pacific War. The armed conflict began in 1937 with the Japanese invasion of China and ended in 1945 with the atomic bombing of Hiroshima and Nagasaki. Some attention is paid to military developments, but the principle concerns fall into the areas of mutual images, mobilization, and memory.

**HIST 1156. Postwar Japan.**

This course is for students interested in exploring Japan's remarkable cultural, political and social transformations from the closing days of the Second World War, through its emergence as an apparent exemplar of democratization's potential and capitalism's benefits, and on to the contemporary era. Lectures, readings and films will explore the legacies of the war and the Occupation, the so-called "economic miracle" (and its effects on the environment), the protest movements of the 1960s and beyond, and Japan's complicated relationships with its neighbors, with the U.S., and with its own recent history. Open to all students.

**HIST 1200B. The Fall of Empires and Rise of Kings: Greek History to 478 to 323 BCE.**

The Greek world was transformed in less than 200 years. The rise and fall of Empires (Athens and Persia) and metamorphosis of Macedon into a supreme power under Philip II and Alexander the Great provide the headlines. The course covers an iconic period of history, and explores life-changing events that affected the people of the eastern Mediterranean and the topics that allow us to understand aspects of life and culture of the peoples of the eastern Mediterranean. and through these transformations, offers insights into the common pressures that communities confronted. No prior knowledge of ancient history is required. P

**HIST 1200C. History of Greece: From Alexander the Great to the Roman Conquest.**

In 334 BCE, the 22-year-old Alexander crossed over to Asia and North Africa perhaps already in his own mind to conquer the known world, thus changing the history of the West forever. The values of a small, if intensely introspective, people (the Greeks) became the cultural veneer for much of West, as the period became known as the Hellenistic ("Greekish") Age. It led to the spread of a monotheistic idea, a profound belief in individualism, alienation from central power, and yet, conversely, the creation of natural law and human rights, along with a deep desire for universalism. P

**HIST 1201A. Roman History I.**

No description available.

**HIST 1201B. Roman History II: The Empire.**

The social and political history of the Roman Empire (14-565 CE). Focuses on expansion, administration, and Romanization of the empire; crisis of the 3rd century; militarization of society and monarchy; the struggle between paganism and Christianity; the end of the Empire in the West. Special attention given to the role of women, slaves, law, and historiography. Ancient sources in translation.

**HIST 1202. Formation of the Classical Heritage: Greeks, Romans, Jews, Christians, and Muslims.**

Explores essential social, cultural, and religious foundation blocks of Western Civilization, 200 BCE to 800 CE. The main theme is the eternal struggle between universalism and particularism, including: Greek elitism vs. humanism; Roman imperialism vs. inclusion; Jewish assimilation vs. orthodoxy; Christian fellowship vs. exclusion, and Islamic transcendence vs. imminence. We will study how ancient Western individuals and societies confronted oppression and/or dramatic change and developed intellectual and spiritual strategies still in use today. Students should be prepared to examine religious thought from a secular point of view. There is no prerequisite or assumed knowledge of the period. P

**HIST 1205. The Long Fall of the Roman Empire.**

Once thought of as the "Dark Ages," this period of western European history should instead be seen as a fascinating time in which late Roman culture fused with that of the Germanic tribes, a mixture tempered by a new religion, Christianity. Issues of particular concern include the symbolic construction of political authority, the role of religion, the nature of social loyalties, and gender roles. P

**HIST 1210A. The Viking Age.**

For two centuries, Viking marauders struck terror into hearts of European Christians. Feared as raiders, Norsemen were also traders and explorers who maintained a network of connections stretching from North America to Baghdad and who developed a complex civilization that was deeply concerned with power and its abuses, the role of law in society, and the corrosive power of violence. This class examines the tensions and transformations within Norse society between AD 750 and 1100 and how people living in the Viking world sought to devise solutions to the challenges that confronted them as their world expanded and changed. P

**HIST 1211. Crusaders and Cathedrals, Deviants and Dominance: Europe in the High Middle Ages.**

Popes named Joan, Gothic cathedrals, and crusaders—all these were produced by rich world of the western European Middle Ages. The cultural, religious, and social history of this period are explored with special attention to the social construction of power, gender roles, and relations between Christians and non-Christians. P

**HIST 1216. The Paradox of Early Modern Europe.**

European social, intellectual, political, and economic history from the 15th to the 18th centuries, with an eye to the paradox embodied in the term "early modern." On the one hand, this is supposedly the heroic era of Columbus, Machiavelli, Newton, and Montesquieu, when Europeans became increasingly global, urban, and critical. On the other hand, this period also saw the rise of judicial torture, new regimes of discipline, colonialism, and a robust belief in the unseen world of demons, angels, and witches. We will explore the interplay of these paradoxical forces in Europe's transformation from medieval into modern. P

**HIST 1230A. Modern European Intellectual and Cultural History: Revolution and Romanticism, 1760-1860.**

A lecture course, primarily for juniors and seniors, that focuses on salient philosophic, artistic, and ideological currents of 19th-century Europe. Beginning with the crisis of political and cultural legitimacy posed by the French Revolution, it concludes with the consolidation of bourgeois culture in the 1860s and 1870s and the two great scientific systematizers of these decades: Darwin and Marx.

**HIST 1230B. Modern European Intellectual and Cultural History: The Fin de Siecle, 1880-1914.**

A sequel to HIST 1230A focusing on radical intellectual and cultural currents that challenged and destabilized the assumptions of Victorian high culture during the fin de siecle. Through a careful reading of primary texts by Hobhouse, Nietzsche, Weber, and Freud. The course explores issues such as the rise of mass consumer culture, neoliberal and neofascist politics, philosophic irrationalism, psychoanalysis, and the woman question.

**HIST 1230C. The Search for Renewal in 20th century Europe.**

The overarching theme of the course is the relationship between modernity and the primitive as manifested in major cultural, aesthetic and political movements in the 20th century. Films are an integral part of the course.

**HIST 1235A. Making A "Second Sex": Women and Gender in Modern European History.**

This course deals with the history of European women and gender from the Enlightenment to the present. It will focus on large historical themes and questions, especially shifting constructions of femininity and masculinity. It will begin with an analysis of eighteenth-century philosophies regarding women and gender, and it will move to examinations of specific topics such as industrialization, Victorian femininity, the suffrage movements, gender and the Great War, interwar sexuality, fascism, gender and the Second World War, and the sexual revolution.

**HIST 1240A. Politics of Violence in 20C Europe.**

Europe's 20th century saw the emergence of forms of violence unthinkable in a world without mass politics. To better understand the changes in European states and societies that gave rise to total war and the violence associated with totalizing ideologies such as fascism and communism, we will read Lenin, Mussolini, Hitler, Fanon and others who sought to interpret violence as an extension of ideology. We will also read selections from more recent works by state leaders, historians and cultural figures from Ukraine to France, from Turkey to Great Britain who have reinterpreted past violence for present political ends.

**HIST 1241B. Understanding the Body in Medieval and Early Modern Europe.**

In medieval Europe, the body was both a site of sin and the grounds where sin might find redemption in penance or prayer. The health of the medieval body was implicated by the health of the soul (and vice versa). In early modern Europe, the body shed some of its sacred meanings as it became an object of professionalized medical discourse. We trace this "disenchantment" of the body by examining concepts of sickness and health, the roles of gender and racial differences in understanding the nature of the body, and the changing social practices regarding human bodies and mortal remains. P

**HIST 1260D. Living Together: Muslims, Christians, and Jews in Medieval Iberia.**

A pressing issue in today's pluralistic societies is how people of different identities (religious, ethnic, etc.) can live together. This course explores a slice of history that can help us think through questions of difference in our world: medieval Spain, where for centuries Muslims, Christians, and Jews lived in close proximity. Through explicit juxtaposition with modern debates, this course examines how these people understood and structured their relations with each other in the Iberian Peninsula between 711 and 1492. Themes include: identity and cultural definition; power and religious violence; tolerance and intolerance; acculturation and assimilation; gender and sexuality. P

**HIST 1261E. After Empire: Modern Spain in the 20th Century.**

This course situates 20th-century Spain at the crossroads of postcolonialism, ideological violence, and contested modernization. Spain entered the century amidst a profound national identity crisis, stirred by its defeat in the Cuban Independence War. Over the next decades, conflict erupted among advocates of different visions of Spain, while the rise of mass politics transformed Spain in the first battleground in the global confrontation between fascism, communism, and liberalism. General Franco's victory in the Spanish Civil War installed an authoritarian regime lasting four decades whose legacies marked Spain's transition into the current democratic system and its problematic relationship with discontented sectors.

**HIST 1262F. Women, Gender, and Feminism in Early Modern Italy.**

This course explores the variety of Italian women's histories, issues of gender and sexuality, and ingenious responses to circumvent the social, economic, religious, and political limitations placed upon them during the early modern period (1400-1800). Italian women produced some of the foundational texts of historical feminism, the intellectual and cultural movement that advanced the idea of equality across genders and the necessity of equal access to opportunity and education. This course surveys the alternatives proposed to the gender hierarchies of Italian society and will include selections from archival documents, letters, literature, treatises, and the visual arts.

**HIST 1262M. Truth on Trial: Justice in Italy, 1400-1800.**

Why do we think that one human being can judge another? How did this activity, enshrined in legal and political systems, profoundly shape society? We'll examine the changing face of justice, from the medieval ordeal to judicial torture; expansion of inquisitorial and state law courts; and the eventual disillusionment with the use of torture and the death penalty in the eighteenth century. Using Italy as focus, the course explores how law courts defined social, political, scientific, and religious truth in Italy. Students may pursue a project on another geographical area for their final project for the course. P

**HIST 1264M. Cultural History of the Netherlands in a Golden Age and a Global Age.**

Between 1580 and 1690 two nations emerged in Europe from what had been one unified region. To the north, the Dutch Republic gained its independence from Spain and developed as a bastion of liberty, ideas in ferment, visual arts, Calvinist faith, science, technology, global economic reach. To the south, the "loyal" Netherlands, now Belgium, returned to the Spanish and Catholic fold, but sustained its leading position in the arts, competed in global trade, and negotiated a new compromise of government. In this course we present an interdisciplinary, comparative view of the "two" Netherlands and their legacy in the world. P

**HIST 1266C. English History, 1529-1660.**

Examines politics, religion, and society from the Protestant Reformation to the Puritan Revolution—a period of rapid and dramatic change when the world, for most English people, was turned upside down. Considers the experiences and concerns of ordinary men and women, as well as the elite. Takes in Scotland, Ireland, and the great migration to New England. P

**HIST 1266D. British History, 1660-1800.**

A survey of British history from the restoration of monarchy to the Wilkes affair and the loss of the American colonies. In addition to political developments such as the Glorious Revolution and the rise of party, examines political ideology (including the great political theorist, John Locke) and various themes in social history (such as crime, popular protest, the sexual revolution, and the experiences of women). P

**HIST 1268A. The Rise of the Russian Empire.**

This course provides a broad survey of Russian history from Kievan Rus' to the Crimean War. Topics include the rise of Moscow, the Time of Troubles, the reforms of Peter the Great and Catherine the Great, the Napoleonic Wars, and the conservative reign of Nicholas I. The following themes are emphasized in the lectures and readings: the changing stratification of society; the expansion of the Russian empire; Russia and the West (including diplomatic and cultural relations); economic development; and the origins and growth of the Russian intelligentsia and radical opposition to the autocracy. P

**HIST 1268B. Russia in the Era of Reforms, Revolutions, and World Wars.**

This course examines the rapid industrialization, modernization, and urbanization of Russia from the era of the "Great Reforms" (1860s) through the Second World War. We will examine both the growing discontentment among the population with autocracy's efforts to maintain power and the Bolshevik effort to recreate the economy, society, and everyday life. Topics will include Russian Marxism and socialism, terrorism, the Russian revolutions of 1917, the rise and consolidation of Soviet socialism, famine, the red terror, and World War II.

**HIST 1268C. The Collapse of Socialism and the Rise of New Russia.**

This course examines late Soviet socialism, the collapse of the USSR, and the emergence of the new Russia. The following themes are emphasized in lectures and readings: the major features of de-Stalinization; Soviet and Russian foreign policy during and after the Cold War; the domestic and international causes and consequences of the collapse of the Soviet Union; and the emergence of a new Russian government and national identity during the 1990s and early 2000s.

**HIST 1270C. German History, 1806-1945.**

This course examines the development of German history from the dissolution of the Holy Roman Empire to the end of World War II. During that time the German states went from being a sleepy backwater to being the conquerors of Europe, finally conquered themselves by the Allied Forces. Through lecture, readings, and discussion we will examine post-Napoleonic Germany, Prussia's role in uniting Germany, the Wilhelmine Empire, the Weimar Republic, and finally National Socialism. The class will take into account politics, economics, war, and culture in painting a full picture of the development of a distinct German state and society.

**HIST 1272C. Liberty, Equality, Fraternity? The History of Modern France.**

This course follows the history of France from the time of Louis XIV to the present, focusing on social and cultural trends, with particular emphasis on the boundaries of French national identity. It asks who belonged to the French nation at key moments in French history, including the Enlightenment, the French Revolution, the Napoleonic era, industrialization, imperialism, and the two world wars, as well as the complex questions presently facing France. We will examine how inclusions and exclusions during these moments reveal larger themes within French history, such as those dealing with race, class, gender, immigration, and anti-Semitism, amongst others.

**HIST 1272D. The French Revolution.**

This course aims to provide a basic factual knowledge of the French Revolution, an understanding of the major historiographic debates about the revolutionary period, and a sense of the worldwide impact of events occurring in late-eighteenth century France. A strong historiographic focus will direct our attention to the gendered nature of the revolutionary project; the tension between liberty and equality that runs throughout French history; the intersection of race and citizenship in the Revolution; and the plausibility of competing social, political, and cultural interpretations of the Revolution.

**HIST 1272E. Paris: Sacred and Profane, Imagined and Real.**

Paris has been called the capital of modernity, the capital of the nineteenth century, and the capital of the black Atlantic. This course explores how Paris grew from a small settlement into a vast city with an enormous global impact. Covering the settlement of the Celtic Parisii in the mid-third century BCE through the present, the course investigates the dynamic relationship between urban space, public activism, racism, and colonialism. It also considers who has been excluded from the city's complex mythology and how these myths impacted experiences of the "other" (including people of color, low-income people, Jewish people, and women).

**HIST 1280. Death from Medieval Relics to Forensic Science.**

From CSI: Crime Scene Investigation to Ghost Busters to murder mysteries, western society finds death and dead bodies both fascinating and horrifying. This lecture course considers how the western world has dealt with life's most fundamental truth – all humans die – by looking at the history of death and dead bodies from the Middle Ages up to the early twentieth century. Topics include the worship of Christian relics, Catholic and Protestant conceptions of the "good death," body snatching and dissection, society's fascination with murder, execution as legalized death, forensic science and dead bodies, and ghosts. P

**HIST 1310. History of Brazil.**

This course charts the history of Brazil from Portuguese contact with the indigenous population in 1500 to the present. It examines the country's political, economic, social, intellectual, and cultural development to understand the causes, interactions, and consequences of conflict, change, and continuity within Brazilian society.

**HIST 1312. Brazil: From Abolition to Emerging Global Power.**

How did Brazil transform itself from a slave society in 1888 to rising international economic and political force? This course will examine the history of Brazil from the end of slavery to the present. We will analyze the reasons for the fall of the Empire and the establishment of a Republic, the transformations that took place as immigrants arrived from Europe, Japan, and the Middle East in the early twentieth century, and the search for new forms of national identity. We will study the rise of authoritarian regimes and the search for democratic governance in more recent years.

**HIST 1313. Brazilian Biographies.**

How do the famous Brazilian singers Carmen Miranda and Caetano Veloso fit into any comprehensive understanding of Brazilian history? Do the life stories of the eighteenth-century freed slave Xica da Silva or the twentieth-century favela dweller and best-selling author Carolina Maria de Jesus represent unique characters or larger social phenomena of different times and places? How have Brazilian and foreign authors written the history of Brazil through portraits of individuals. This course will examine life stories of Brazilians of all races and social classes through texts, documents, and films to see what these biographical portrayals reveal about Brazilian history/culture. P

**HIST 1320. Rebel Island: Cuba, 1492-Present.**

Cuba, once the jewel in the Spanish imperial crown, has been home to some of the world's most radical revolutions and violent retrenchments. For two centuries, its influence has spread well beyond its borders, igniting the passion of nationalists and internationalists as well as the wrath of imperial aggression. This course traces the history of Cuba from its colonial origins through the present, foregrounding the revolutionary imaginary that has sustained popular action from anti-slavery rebellions through the Cuban Revolution and its discontents—in addition to the historical processes that have forged one of the world's most vibrant socio-cultural traditions.

**HIST 1331. The Rise and Fall of the Aztecs: Mexico, 1300-1600.**

This course will chart the evolution of the Mexica (better known as the Aztecs) from nomads to the dominant people of central Mexico; examine their political, cultural, and religious practices (including human sacrifice); explore the structure and limitations of their empire; and analyze their defeat by Spanish conquistadors and their response to European colonization. We will draw upon a variety of pre- and post-conquest sources, treating the Aztecs as a case study in the challenges of ethnohistory. P

**HIST 1332. Reform and Rebellion: Mexico, 1700-1867.**

This course focuses on Mexico's difficult transition from colony to nation. We will examine the key political, social, economic, and cultural developments during this period. Major topics will include: the paradoxical eighteenth century, which saw Mexico emerge as the most prosperous region of the Spanish empire, even as social and economic tensions deepened; the outbreak of peasant rebellions in the early nineteenth century; the elite-led movement for independence; the economic decline and political turmoil of the early republic; foreign interventions by the United States and France; and the rise of the Liberals as Mexico's dominant political force. P

**HIST 1333. The Mexican Revolution.**

To study the Mexican Revolution is to examine the sweeping history of Modern Mexico: from the Liberal reforms of Benito Juárez to the enduring power of the Partido Revolucionario Institucional (PRI); from peasant revolutionary Emiliano Zapata to his namesake Zapatistas of Chiapas; from Pancho Villa's mass revolutionary army to transnational mystic Teresita Urrea; from the landlord Francisco Madero who led the insurgency to Lázaro Cárdenas who enacted land and labor reforms; from the constant flows of migrants crossing the border back and forth to Mexico's defiance against Trump's wall.

**HIST 1370. The United States and Brazil: Tangled Relations.**

This lecture course explores the complex relations between Brazil and the United States from the American Revolution to the present. Through the use of documents, films, literature, and historical monographs, we will examine the diplomatic, political, economic, and cultural interactions between the largest nations in the Americas, paying particular attention to the growing influence of the United States. We will focus on the "Special Relationship" that developed during World War II, the effects of Washington's foreign policy during the Cold War, U.S. involvement over the course of the military dictatorship, and new forms of interactions after the return to democracy.

**HIST 1381. Latin American History and Film: Memory, Narrative and Nation.**

This course provides an introduction to cinematic interpretations of Latin American history. Together we will explore how (and why) filmmakers have used motion pictures to tell particular narratives about the Latin American past. We will critically examine a broad range of films dealing with historical questions, and explore what these films have to say about how gender and sexuality, imperialism, slavery, the church, revolution and repression shaped the history of the region. In order to explore these topics we will examine films in relation to academic, autobiographical, and popular texts, all of which provide different ways of representing the past.

**HIST 1430. Truth on Trial: Justice in Italy, 1400-1800.**

Why do we think that one human being can judge another? How did this activity, enshrined in legal and political systems, profoundly shape society? This course examines the changing face of justice, from the medieval ordeal to judicial torture; the expansion of inquisitorial and state law courts; and the eventual disillusionment with the use of torture and the death penalty in the eighteenth century. Using Italy as a focus, the course explores how law courts defined social, political, scientific, and religious truth in Italy. Students may pursue a project of another geographical area for their final project for the course. P

**HIST 1440. The Ottomans: Faith, Law, Empire.**

This course explores the rise and fall of the longest-lived Muslim dynasty in history, the Ottoman Empire (1299-1923). From Turkish nomads in Asia Minor to multiethnic empire spanning three continents, the Ottomans were the premier power of southern Europe, northern Africa, and the eastern Mediterranean in the early modern world. From medieval "Turko-Persia" to the catastrophes of World War I, we shall engage difficult historical questions surrounding law and empire, religion and secularism, nationalism and statebuilding, and the legacy of Ottoman rule in and outside today's Turkey—from Sarajevo to Baghdad, Crimea to Mecca, and "where East meets West": Constantinople/Istanbul.

**HIST 1445. The Making of the Ottoman World, 15th - 20th Centuries.**

This course treats some of the major themes of Ottoman state and society, one of the major empires of the world out of which many new polities in the Balkans, Anatolia, the Middle East and North Africa emerged during the twentieth century. At the center of the course is the transformation of the "classical" Ottoman state to the early modern and modern through the many shapes and forms it has taken. We will be covering the beginnings from the 15th century and end with the analysis of the making of the modern Ottoman society in the early 20th century.

**HIST 1455. The Making of the Modern Middle East.**

From North Africa to Afghanistan, Turkey to the Arabian peninsula, the goal of this course is to provide students with a robust background in modern Middle Eastern history, broadly defined. We begin in the long nineteenth century, an era of intense social and economic transformation that led to the collapse of the Ottoman empire and emergence of a new state system, primarily under British and French colonial rule. We then explore forces shaping the contemporary region, including nationalism, oil, regional conflicts and the Cold War, Islamism and mass politics, and military interventions by the US and other world powers. M

**HIST 1456. Bankrupt: An Economic and Financial History of the Middle East in the 19th and 20th Centuries.**

This course critically examines the economic, and particularly, the financial history of the modern Middle East in the 19th and 20th centuries. It is structured chronologically and thematically. It starts in the mid-19th century by examining the role of European states, as well as private European investment firms and oil companies, in facilitating the colonization of the region via loans, capitulations, and extractive concession agreements. It then shifts to the post-colonial period, studying how western oil companies, banks, investment firms, and multi-national organizations shaped the trajectories of the newly-independent states in the Middle East.

**HIST 1460. Modern Turkey: Empire, Nation, Republic.**

This course will treat some of the major themes of Turkish history and society, one of world's Muslim majority countries today. Since Turkey unfolded from the Ottoman Empire in the early 20th century, Turkish nationalism and its many shapes and forms has been at the center of the country's uneasy history of democratization. Mapping the political, socio-economic and cultural landscape, this ventures through Turkish history to study state and society through political thought and economy of democracy, exploring secularism, Islam, feminism, Kurdish question, memory and popular culture.

**HIST 1470. Legal History in the Middle East.**

This course is devoted to exploring questions of law and legal history in the Middle East/eastern Mediterranean region from late antiquity to the present. Emphasis will be on the Islamic legal tradition from medieval to modern times, including intersection-and-friction points between the shari'a and Roman, Persianate, and Mongol imperial legacies, and fellow Abrahamic faiths. From the earliest schools of Islamic jurisprudence to late Ottoman constitutionalism, and the sociolegal impact of the 1979 Iranian Revolution to the Arab Spring uprisings, our goal is to explore the depth and diversity of legal cultures and institutions across different epochs of Middle East history.

**HIST 1501. The American Revolution.**

This course will explore the period of the American Revolution from the 1760s through the turn of the nineteenth century. Taking a broad view of the conflict and its consequences, we will situate the American colonies in their North American and Atlantic context, examine the material and ideological concerns that prompted the Revolutionary War, and trace the consequences of the conflict for the nation that followed. Students will be invited to look beyond the Founders to the experiences of women, slaves, Native Americans, common soldiers, and Loyalists. P

**HIST 1502. The Early Republic.**

This course explores the politics and culture of the United States between the ratification of the Constitution in 1789 and the financial crisis of the late 1830s. The establishment of the federal government still left crucial questions unresolved: the characteristics of national identity, the boundaries of citizenship, the legitimacy of slavery, and the tense relationship between capitalism, colonialism, and democracy. Relying on primary sources and secondary scholarship, the course will revisit familiar debates over warfare, sovereignty, and public policy, while also introducing students to a wide range of critical voices seeking to fulfill the idealistic possibilities of the American Revolution.

**HIST 1503. Antebellum America and the Road to Civil War.**

Surveys society, culture, and politics between 1800 and 1860. Topics include the social order of slavery, the market revolution and its impact, abolition and other evangelical reform movements, and the development of sectional identities.

**HIST 1505. Making America Modern.**

This course surveys a crucial period in American history between the end of Reconstruction and the beginning of World War I. During this time, the United States transitioned from a relatively fragmented, traditional, and largely agricultural society into one that was remarkably diverse, increasingly urban, and highly industrialized. In surveying this important transitional period, we will pay particular attention to far-reaching changes in the nation's business and economic life, its social movements, as well as its cultural developments, all with an eye to understanding how the United States became one of the world's most commanding economic, political, and cultural powers.

**HIST 1507. American Politics and Culture Since 1945.**

This course explores the history of the United States between the end of World War II and the present. Major themes and topics include WWII; the rise and decline of New Deal liberalism; the Cold War and anti-communism; mass consumption; race, civil rights and liberation movements; women's rights and feminism; the New Right; Vietnam and foreign policy; the service economy; immigration; and neoliberalism.

**HIST 1511. Sinners, Saints, and Heretics: Religion in Early America.**

This course considers the major people, events, and issues in the history of religion in North America, from pre-contact Native cosmologies to the tumultuous events of the Civil War. Attention will be given to "religion as lived" by ordinary people, as well as to the ways that religion shaped (or not) larger cultural issues such as immigration, public policy, social reform, warfare, democracy, slavery, and women's rights. Prior knowledge of religion in North America is not required; there are no prerequisites to this course, and it is open to all students. P

**HIST 1512. First Nations: The People and Cultures of Native North America to 1800.**

This course explores the history of North America through the eyes of the original inhabitants from pre-contact times up through 1800. Far from a simplistic story of European conquest, the histories of Euroamericans and Natives were and continue to be intertwined in surprising ways. Although disease, conquest, and death are all part of this history, this course also tell another story: the big and small ways in which these First Nations shaped their own destiny, controlled resources, utilized local court systems, and drew on millennia-old rituals and practices to sustain their communities despite the crushing weight of colonialism. P

**HIST 1513. U.S. Cultural History from Revolution to Reconstruction.**

What does it mean to survey a country's history? In this course, it means setting out in several different directions in order to determine the form, extent, and situation of the United States from the 1750s to the 1870s. It means looking carefully at the nation's past through its cultural productions (ideas, beliefs, and customs expressed in print, material, and visual forms). And it means paying close attention to the details. Each week, students will examine one object, text, or idea in order to track broader developments in American history during this time period.

**HIST 1514. Capitalism, Slavery and the Economy of Early America.**

The simultaneous expansion of capitalism and slavery witnessed intense struggle over the boundaries of the market, self-interest, and economic justice. This course traces those arguments from Colonization through Reconstruction and asks how common people navigate the shifting terrain of economic life. The approach is one of cultural and social history, rather than the application of economic models to the past.

**HIST 1515. American Slavery.**

This lecture course will address the history of slavery in America. We will trace the emergence of slavery in the New World, with a heavy emphasis on slavery in the U.S. South, and a focus on the relationship of slavery to the emergence of systems of racial and gendered power. The course is broad in scope, beginning with the emergence of the slave trade and concluding with a look forward to the ways that the history of slavery continues to impact the way race and gender (as well as sexuality and class) structure our lives today.

**HIST 1520. Women in Early America.**

This course examines the major social and cultural developments of early America through the lens of women's history. We will explore differences among representations of women, constructions and ideals of womanhood, and lived experiences, as we engage such topics as: cross-cultural exchange and conflict; citizenship and enslavement; work and cultural expression; and women's varying degrees of access within social, civic and legal arenas. Relying heavily on sources like letters, diaries, legal records, and artifacts, we will work to identify strategies and best practices for recovering the voices and experiences of early American women buried in the archive.

**HIST 1530. The Intimate State: The Politics of Gender, Sex, and Family in the U.S., 1873-Present.**

Examines the "intimate politics" of gender norms, sex and sexuality, and family structure in American history, from the 1870s to the present, focusing on law and political conflict. Topics include laws regulating sex and marriage; social norms governing gender roles in both private and public spheres; the range of political perspectives (from feminist to conservative) on sex, sexuality, and family, and the relationship of gender to notions of nationhood and the role of the modern state. Some background in history strongly recommended.

**HIST 1531. Political Movements in Twentieth-Century America.**

Political movements in the United States in the twentieth century. History and theory. Highlights of the course include: populism, progressivism, segregationism, first wave feminism, labor movement, civil rights, new left, second wave feminism, new right. The course focuses on the origins, nature, ideologies, and outcomes of major political movements on both left and right in the twentieth century United States.

**HIST 1532. Black Freedom Struggle Since 1945.**

Examines the extended history of the Civil Rights Movement in the U.S. with a range of primary sources. Starting at World War II, the course considers the roles of the courts, the government, organizations, local communities, and individuals in the ongoing struggle for African American equality, focusing on African American agency. Sources include photographs, documentaries, movies, letters, speeches, autobiography, and secondary readings. Must have taken at least one post-1865 U.S. history course demonstrating a foundation in this time period.

**HIST 1550. American Urban History, 1600-1870.**

Both a survey covering urbanization in America from colonial times to the present, and a specialized focus exploring American history from an urban frame of reference. Examines the premodern, "walking" city from 1600-1870. Includes such topics as cities in the Revolution and Civil War, the development of urban services, westward expansion, and social structure. P

**HIST 1551. American Urban History, 1870-1965.**

A survey with a specialized focus exploring American history from an urban frame of reference. Topics include the social consequences of the modern city, politics, reform, and federal-city relations.

**HIST 1553. Empires in America to 1890.**

In this class, we'll consider some of the forms of empire-building by various groups of indigenous and colonizing peoples in what is now the United States in order to understand the development of imperial U.S. power in both domestic and international contexts. Rather than resting upon a foregone conclusion of European settler colonial "success," the course explores the contingent and incomplete nature of empire-building even within unbalanced power relationships.

**HIST 1554. American Empire Since 1890.**

This survey of twentieth-century US foreign relations will focus on the interplay between the rise of the United States as a superpower and American culture and society. Topics include: ideology and U.S. foreign policy, imperialism and American political culture, U.S. social movements and international affairs, and the relationship between U.S. power abroad and domestic race, gender and class arrangements.

**HIST 1570. American Legal and Constitutional History.**

History of American law and constitutions from European settlement to the end of the 20th century. Not a comprehensive survey but a study of specific issues or episodes connecting law and history, including witchcraft trials, slavery, contests over Native American lands, delineations of race and gender, regulation of morals and the economy, and the construction of privacy.

**HIST 1571. The Intellectual History of Black Women.**

This course will introduce students to the intellectual productions and theoretical traditions of African American women. Focused on the canonical texts of African American women, this class gestures toward diaspora as well. Moving chronologically from the history of slavery to the present will require that we simultaneously confront the question of what counts as "intellectual" history. Thus even as we will read the written words of black feminists across time, we will also call into question what Barbara Christian calls "the race for theory," turning also to resistance practices, material culture, and bodily performance as sites of black feminist theorization.

**HIST 1620. Resisting Empire: Gandhi and the Making of Modern South Asia.**

Gandhi's India tracks the emergence and transformations of British colonial rule in the Indian subcontinent, the insurgencies and the cultural and economic critiques that shaped anti-colonial nationalism, the conflicts that fueled religious differences and the ideas that shaped non-violent civil disobedience as a unique form of resistance. With readings from Gandhi, Marx and Tagore, amongst others, this course interrogates relationships between power and knowledge, histories from below, as well as violence and political mobilizations that would, by the mid-twentieth century, bring down an empire and create a bloody and enduring divide with the birth of two nation-states.

**HIST 1639. Colonial Africa.**

From in the late 19th century until the mid-20th century, European powers held the African continent as their colonial possession. This course engages recent historical literature to survey the changes wrought through empire. Beginning with Africa international relations before the imperial scramble, we will probe what changed and what endured under this new condition. We also examine hopes for an independent future. We will seek out both the limits of European empire in Africa and the incomplete nature of decolonization.

**HIST 1640. Inequality + Change: South Asia after 1947.**

With a focus on inequality and change this lecture course will survey South Asia's history post-1947, with the end of colonial rule and the making of nation-states. With a historical attention to 'inequality', we will interrogate the inequalities cast by rural poverty, environment, religion, caste, gender and ethnicity and the remarkable contestations of people in the region that have challenged state power, and have thus shaped South Asia's postcolonial histories. We will particularly focus on histories from below, and engage historical and literary writings, newspapers as well as documentary films.

**HIST 1730. "Cannibals", "Barbarians" and "Noble Savages": Travel and Ethnography in the Early Modern World.**

This seminar will trace the growth of European images of the "other" in early modern Africa, Europe and the Americas. Using the tropes of "cannibal", "barbarian" and "noble savage", it explores evolving theories about human nature, human difference and race. Alongside critical analyses drawn from several disciplines, the main readings will be primary sources. These vivid, enigmatic accounts are both portraits of a world alien to the writer, and also mirror the writer's own culture.

**HIST 1735. Slavery in the Early Modern World.**

There were multiple forms of slavery in the Early Modern world. We will look at three major systems: Mediterranean slavery and the Barbary Corsairs, Black Sea slavery and slave elites of the Ottoman Empire, and the Atlantic triangular trade. We will examine the religious, political, racial, and economic bases for these slave systems, and compare the experiences of individual slaves and slave societies. Topics discussed include gender and sexuality (e.g. the institution of the Harem and the eunuchs who ran it), the connection between piracy and slavery, and the roles of slavery in shaping the Western world. P

**HIST 1736. A Global History of the Reformation.**

2017 marked the 500th anniversary of the publication of Martin Luther's "95 Theses," an event often considered to have caused the Reformation in Europe. This course explores the religious reforms of the sixteenth and seventeenth centuries in a global context, examining how the interaction of peoples from Europe, Asia, Africa, and the Americas shaped both contemporary debates and their enduring legacies. Bound up in Catholic and Protestant controversies about how humanity should interact with the divine were fundamental reappraisals of how to define who counted as human, the desirability/possibility of cultural pluralism, and religion's place in public life. P

**HIST 1740. Capitalism, Land and Water: A World History: 1350-1848.**

The choice of how we allocate land and water shapes famine, drought, war, homelessness and poverty. Over the centuries, utopians and empires have looked to very different systems of allocation, from village communalism to plantation systems to state provision of infrastructure to free-market systems. This course mixes histories of political economy, theology, literature, and anthropology, asking how imaginary landscapes become the material realities of farm and highway. Themes will include the rise of modern, surveying, engineering, cities, infrastructure systems, and land reform. It will ask about the consequences of history in an era of environmental disaster, famine, mortgages, and evictions.

**HIST 1741. Capitalism, Land and Water: A World History: 1848 to the present.**

The choice of how we allocate land and water shapes famine, drought, war, homelessness and poverty. Over the centuries, utopians and empires have looked to very different systems of allocation, from village communalism to plantation systems to state provision of infrastructure to free-market systems. While an economist or political scientist might study these regimes through abstraction, the historian dives into the social context of different systems, reading government documents, social protests, as well as architecture, maps, and the landscape itself, as an archive that testifies as to the nature of consent, participation, and resistance in a political system.

**HIST 1820A. Environmental History.**

Environmental history examines the changing relationship between human beings and their physical surroundings. We will actively question the boundary between nature and culture, showing how social and natural history mutually inform one another. We will do so by asking three interrelated questions. First, how has the material context in which history unfolded impacted the development of our culture, society, and economy? Second, how and why did people's ideas and representations of the natural world change over time? Finally, in what ways and to what ends have human beings actively though not always intentionally altered their physical surroundings?

**HIST 1820B. Environmental History of East Asia.**

With a fifth of the world's population on a twentieth of its land, the ecosystems of China, Japan, Korea and Vietnam have been thoroughly transformed by human activity. This course will explore the human impact on the environment from the first farmers to the industrial present, exploring how wildlife was eliminated by the spread of agriculture, how states colonized the subcontinent, how people rebuilt water systems, and how modern communism and capitalism have accelerated environmental change. Each week we will examine primary sources like paintings, essays, maps and poems. The course assumes no background in Asian or environmental history.

**HIST 1820G. Nature on Display.**

This course will explore the different ways in which people have represented the natural world in a variety of context and time periods from the 16th to the 21st century. We will look at the depiction of nature in museums, gardens, documentary films, and municipal parks, as well as the science of biology and ecology. As we do so, we will explore our changing attitudes towards nature and the place that we occupy in it, thinking through the complex and philosophically fraught question of what nature is, and what, if anything, distinguishes it from the rest of our world.

**HIST 1825F. Nature, Knowledge, Power in Renaissance Europe.**

This course examines the creation and circulation of scientific knowledge in Renaissance Europe, ca. 1450-1600. We will explore the practices, materials, and ideas not just of astronomers and natural philosophers, but also of healers, botanists, astrologers, alchemists, and artisans. How did social, political, economic, and artistic developments during this period reshape how naturalists proposed to learn about, collect, manipulate, and commercialize nature? We will also consider the ways in which colonial projects forced Europeans to engage with other “ways of knowing” and rethink classical knowledge systems. P

**HIST 1825H. Science, Medicine and Technology in the 17th Century.**

This course examines the development of science and related fields in the period sometimes called ‘the scientific revolution’. It will both introduce the student to what happened, and ask some questions about causes and effects. The new science is often associated with figures like Harvey, Galileo, Descartes, Boyle, Leeuwenhoek, and Newton. But it is also associated with new ways of assessing nature that are mingled with commerce. The question of the relationship between developments in Europe and elsewhere is therefore also explored. P

**HIST 1825L. The Roots of Modern Science.**

This course explores the ways theories of physics, chemistry, biology and mathematics grew in relation to the natural, cultural and social worlds of the 18th and 19th centuries. There are no formal pre-requisites for the course, which is designed to be equally open and accessible to science and humanities students.

**HIST 1825M. Science at the Crossroads.**

This course will look closely at the dramatic developments that fundamentally challenged Western Science between 1859 and the advent of the Second World War in the 1930s. Its primary focus will be on a variety of texts written in an effort to understand and interpret the meanings of fundamentally new ideas including from the biological side—evolutionary theory, genetic theory, and eugenics; from the physical side—relativity theory, and quantum mechanics. The class should be equally accessible to students whose primary interests lie in the sciences and those who are working in the humanities.

**HIST 1825S. Science and Capitalism.**

We will explore the longstanding relationship between science and commerce from the 17th century to our own asking when the modern notion of science as a disinterested pursuit of objective truth took root. We will also explore how knowledge of the natural world has been shaped by personal, financial, and other kinds of self-interest in a number of diverse contexts ranging from Galileo’s invention of the telescope in Renaissance Italy to the patenting of genetically engineered organisms in today’s world, paying special attention to the diverse mechanisms that have been devised to guard against fraud and disinformation.

**HIST 1830M. From Medieval Bedlam to Prozac Nation: Intimate Histories of Psychiatry and Self.**

Humankind has long sought out keepers of its secrets and interpreters of its dreams: seers, priests, and, finally, psychiatrists. This lecture course will introduce students to the history of psychiatry in Europe, the United States, and beyond, from its pre-modern antecedents through the present day. Our focus will be on the long age of asylum psychiatry, but we will also consider the medical and social histories that intersect with, but are not contained by, asylum psychiatry: the rise of modern diagnostic systems, psychoanalysis, sexuality and stigma, race, eugenics, and pharmaceutical presents and futures.

**HIST 1835A. Unearthing the Body: History, Archaeology, and Biology at the End of Antiquity.**

How was the physical human body imagined, understood, and treated in life and death in the late ancient Mediterranean world? Drawing on evidence from written sources, artistic representations, and archaeological excavations, this class will explore this question by interweaving thematic lectures and student analysis of topics including disease and medicine, famine, asceticism, personal adornment and ideals of beauty, suffering, slavery, and the boundaries between the visible world and the afterlife, in order to understand and interpret the experiences of women, men, and children who lived as individuals—and not just as abstractions—at the end of antiquity. P

**HIST 1930A. History of American School Reform (EDUC 1200).**  
Interested students must register for EDUC 1200.

**HIST 1930B. Academic Freedom on Trial: A Century of Campus Controversies (EDUC 1740).**  
Interested students must register for EDUC 1740.

**HIST 1930C. The Century of Immigration (AMST 1611Z).**  
Interested students must register for AMST 1611Z.

**HIST 1930D. Making America: Twentieth-Century U.S. Immigrant/ Ethnic Literature (AMST 1611A).**  
Interested students must register for AMST 1611A.

**HIST 1930E. Health and Healing in American History (GNSS 1960B).**  
Interested students must register for GNSS 1960B.

**HIST 1930F. Renaissance Italy (ITAL 1360).**  
Interested students must register for ITAL 1360.

**HIST 1930G. Black Freedom Struggle Since 1945 (AFRI 1090).**  
Interested students must register for AFRI 1090.

**HIST 1930H. Teaching Topics in American History and Literature, 1945-1980 (EDUC 1620).**  
Interested students must register for EDUC 1620.

**HIST 1930I. American Higher Education in Historical Context (EDUC 1730).**  
Interested students must register for EDUC 1730.

**HIST 1930J. Word, Image and Power in Renaissance Italy (ITAL 1580).**  
Interested students must register for ITAL 1580.

**HIST 1930L. The History of American Education (EDUC 1020).**  
Interested students must register for EDUC 1020.

**HIST 1930M. History of African-American Education (EDUC 1050).**  
Interested students must register for EDUC 1050.

**HIST 1930N. Germany, Alcohol, and the Global Nineteenth Century (GRMN 1661E).**  
Interested students must register for GRMN 1661E.

**HIST 1930P. Development, Dependency, and Decline in Africa, 1950-2025 (AFRI 1640).**  
Interested students must register for AFRI 1640.

**HIST 1930Q. History of the State of Israel: 1948 to the Present (JUDS 1711).**  
Interested students must register for JUDS 1711.

**HIST 1930R. Roman History I: The Rise and Fall of an Imperial Republic (CLAS 1310).**  
Interested students must register for CLAS 1310.

**HIST 1930S. Roman History II: The Roman Empire and Its Impact (CLAS 1320).**  
Interested students must register for CLAS 1320.

**HIST 1930T. History of African-American Education (EDUC 1050).**  
Interested students must register for EDUC 1050.

**HIST 1930U. Slavery in the Ancient World (CLAS 1120E).**  
Interested students must register for CLAS 1120E.

**HIST 1930V. History of Zionism and the Birth of the State of Israel (JUDS 1712).**  
Interested students must register for JUDS 1712.

**HIST 1930W. Introduction to Yiddish Culture (JUDS 1713).**  
Interested students must register for JUDS 1713.

**HIST 1930Z. The Lower East Side: Immigration and Memory (JUDS 1730).**  
Interested students must register for JUDS 1730.

**HIST 1931A. Kabbalah: Jews, Mysticism, and Magic (JUDS 1740).**  
Interested students must register for JUDS 1740.

**HIST 1931B. Money, Power, Sex and Love: the Modern Jewish Family in Europe and America (JUDS 1722).**  
Interested students must register for JUDS 1722.

**HIST 1931C. The End of Modern Jewish History (JUDS 1716).**

Interested students must register for JUDS 1716.

**HIST 1931D. Society and Population in Ancient Greece (CLAS 1130).**

Interested students must register for CLAS 1130.

**HIST 1931E. The Culture of Death in Ancient Rome (CLAS 1420).**

Interested students must register for CLAS 1420.

**HIST 1931F. History of Greece from Archaic Times to the Death of Alexander (CLAS 1210).**

Interested students must register for CLAS 1210.

**HIST 1931G. Roman Religion (CLAS 1410).**

Interested students must register for CLAS 1410.

**HIST 1931H. 1968: A Year in Review (AFRI 1968).**

Interested students must register for AFRI 1968.

**HIST 1947Q. History of Jews in Brazil.**

This seminar examines the history of Jews in Brazil from early Portuguese colonial rule to the present, first focusing on the role of Jews and New Christians in early economic development. We then examine the Inquisition in Brazil, North African Jewish immigration in the mid-nineteenth century, Eastern European immigration in the twentieth-century, and the formation of communities and institutions over the last hundred years. We study Brazil's foreign policy to Israel and other Middle Eastern countries. Finally, we consider the role of Jews in the opposition to the dictatorship and in the process of democratic consolidation.

**HIST 1952A. World of Walden Pond: Transcendentalism as a Social and Intellectual Movement.**

This course examines the 19th century phenomenon of Transcendentalism: this country's most romanticized religious, philosophical, and literary movement. Focusing especially on Emerson, Thoreau, and Fuller, we'll examine the ideas of the Transcendentalists in the age of reform and evaluate the application of their principles to abolition, feminism, and nature. The central problem which they wrestled with will be the focus, too, of our investigations: the tension between individualism and conformity.

**HIST 1956A. Thinking Historically: A History of History Writing.**

Philosopher George Santayana famously warned that "Those who cannot remember the past are condemned to repeat it." Ten years later, industrialist Henry Ford perhaps even more famously dismissed that notion: "History is more or less bunk." What we mean by history and how we construct and use it are essential questions in all societies. Thinking Historically explores how we view and employ the past. The course examines major ways of interpreting the past through a survey of historians and methods and studies how history is produced, used, and misused, by professionals as well as by the public.

**HIST 1956B. Rites of Power in Modern China.**

Confucius and Mao shared at least one characteristic: a conviction that ritual is a critical part of exercising power. This course investigates the meaning of ritual and its importance in the formation of Chinese communities in the modern era, whether households, villages, empires, communes, regions, or nation-states. Topics include family and gender roles, imperial ceremonies, religious rites, revolutionary politics, cults of personality, grassroots movements, and popular protests. The class will collaboratively explore how political activists embraced new media (photographs, mass performance, music, film, video) and techniques (boycotts, mobilization, marches, purges) that merged ritual power with material action.

**HIST 1956D. Jewish Humor, Commercial Entertainment, and Modern identity in 20th C America and Central Europe.**

The seminar explores the relationship between humor, popular culture and Jewish ethnic identity in early 20th-century Europe and America. It argues that self-deprecating humor and satiric performance of Jewish stereotypes were not expressions of self-hatred, but complex cultural gestures that led to integration within mainstream society. Topics to be considered are: the joke as a social gesture; the Jewish music hall as an urban institution; the politics of blackface in American Vaudeville; the East-European Jews in Hollywood.

**HIST 1958A. Archives of Desire: Non-Normative Genders and Sexualities in the Hispanophone World.**

This course focuses on non-normative genders and sexualities in the Hispanophone world from the pre-colonial to the present period. It pays particular attention to affects, desires, and subjectivities captured in the historical testimonies of gender and sexual non-conformists. From the life of "The Nun Lieutenant" Catalina de Erauso or the 1901 lesbian marriage of Elisa and Marcela, to recent LatinX queer diasporas in the United States, we will discuss the historical tensions among Catholic morality, taxonomic and empiricist projects originated in the early modern era, and the embodied and emotional experiences of gender and sexual non-conformists.

**HIST 1960A. African Environmental History (AFRI 1060M).**

Interested students must register for AFRI 1060M.

**HIST 1960B. Alien-nation: Latina/o Im/migration in Comparative Perspective (AMST 1903B).**

Interested students must register for AMST 1903B.

**HIST 1960C. End of the West: The Closing of the U.S. Western Frontier in Images and Narrative (AMST 1904D).**

Interested students must register for AMST 1904D.

**HIST 1960D. Africa Since 1950 (AFRI 1060A).**

Interested students must register for AFRI 1060A.

**HIST 1960E. Word and Utopia: Seventeenth-century Portuguese World (POBS 1600S).**

Interested students must register for POBS 1600S.

**HIST 1960F. The Portuguese Colonial Empire in a Comparative Perspective (XIX-XX Centuries) (POBS 1600Y).**

Interested students must register for POBS 1600Y.

**HIST 1960G. Southern African Frontiers, c. 1400-1860.**

This seminar explores southern Africa before 1860 to explore a global phenomenon: the pernicious emergence of race as the salient marker of human difference. We examine successive frontiers over millennia to track the changing dynamic between indigenes and newcomers. Discussions unpack overarching trends in the ways people negotiated cultural, political and economic difference. Both violence and absorption were always in play, but by the mid-nineteenth century, fluidity and hybridity gave way to assimilation to European norms. In these borderlands at the end of Africa lies the tragic history of our world: inherited race as an overpowering and rigid determinant of status. P

**HIST 1960H. Methods and Problems in Islam: Heresy and Orthodoxy (RELS 1530B).**

Interested students must register for RELS 1530B.

**HIST 1960I. Portuguese Discoveries and Early Modern Globalization (POBS 1600D).**

Interested students must register for POBS 1600D.

**HIST 1960J. Knowledge Networks and Information Economies in the Early Modern Period (HMAN 1970Z).**

Interested students must register for HMAN 1970Z.

**HIST 1960K. The End of Empires? A Global History of Decolonization (POBS 1600I).**

Interested students must register for POBS 1600I.

**HIST 1960L. Conflicts, Diasporas and Diversities: Religion in the Early Portuguese Empire (POBS 1600J).**

Interested students must register for POBS 1600J.

**HIST 1960M. The Birth of the Modern World: A Global History of Empires (POBS 1601A).**

Interested students must register for POBS 1601A.

**HIST 1960N. South Africa since 1990 (AFRI 1060T).**

Interested students must register for AFRI 1060T.

**HIST 1960Q. Medicine and Public Health in Africa.**

This course explores the major debates in the history of medicine in Africa during the nineteenth and twentieth centuries and highlights the coexistence of a variety of healing traditions and medical understandings across the continent. It will focus on the following questions: What are some of the ways Africans practice and understand medicine? How have these practices interacted with other medical systems? What impact did colonialism have on the production of medical knowledge? How were practices and treatments evaluated and deemed effective? By whom and on what grounds? And how have independent African states addressed these critical issues?

**HIST 1960R. South Africa Since 1990.**

South Africa transformed after 1990, but the past remains powerful. This seminar offers a study of this dynamic and complicated country as well as an exercise in contemporary history. It explores the endurance and erosion of the apartheid legacy and the emergence of new problems. A quarter century isn't enough for a full body of academic historical work to have developed, so the syllabus features journalism, opinion pieces, social science, and biographies – works that provide the “first draft” of history. In addition to the political history, we will focus on the Truth and Reconciliation Commission and HIV-AIDs.

**HIST 1960S. North African History: 1800 to Present.**

This course focuses on the francophone Maghrib (Morocco, Algeria, Tunisia) and offers an introduction to major themes in the history of Africa and the Arab world in the nineteenth and twentieth centuries. Students will gain the tools to analyze and historicize the dynamic history of this region. We will examine a range of topics, including the transformations of pre-colonial social, economic and cultural patterns, conquest and resistance, comparative histories of colonialism, nationalism, decolonization and revolution, the consolidation of postcolonial states, regional cooperation, the rise of Islamism and civil conflicts, and the Arab Spring.

**HIST 1960Z. Zionists Anti Zionists and Post Zionists: Jewish Controversies in the 20th Century (JUDS 1752).**

Interested students must register for JUDS 1752.

**HIST 1961B. Cities and Urban Culture in China.**

Treats the development of cities and urban culture in China from roughly the sixteenth century (the beginning of a great urban boom) to the present. We will look at the physical layout of cities, city government and social structure, and urban economic life, often from a comparative perspective. The course focuses, however, on the changing culture of city life, tracing the evolution of a vernacular popular culture from the late imperial period, through the rise of Shanghai commercial culture in the late nineteenth and early twentieth centuries, to the diverse regional urban cultures of contemporary China.

**HIST 1961C. Knowledge and Power: China's Examination Hell.**

For centuries a rigorous series of examinations requiring deep knowledge of the Confucian Classics was the primary tool for the selection of government officials in imperial China. This system has been variously celebrated as a tool of meritocracy and excoriated as the intellectual “straightjacket” that impeded China's entry into the modern world. This seminar examines the system and the profound impact it had, for better or worse, on Chinese society and government in the early modern period, and the role that its successor “examination hell”—the gaokao or university entrance examination—plays in society today.

**HIST 1961E. Medieval Kyoto - Medieval Japan.**

In the Western historical lexicon, the term “medieval” often conjures up images of backwardness and stagnation. Japan, however, pulsated with political, economic, and cultural creativity during its middle ages. This course explores topics central to Japan's medieval revolution: - The emergence of a samurai-led shogunate and the creation of new warrior values ; -The appearance of Zen and popular religious sects ; -The creation of innovative “Zen arts” such as noh drama and the tea ceremony, and; -The destruction of Kyoto and its subsequent resurgence in the sixteenth century as a city shared by aristocrats, merchants, and artisans. P

**HIST 1961H. Korea: North and South.**

This course offers a systematic investigation of the political, economic, and social histories of Korea, North and South, from the inception of the two governments following liberation from Japanese occupation in 1945 to the present day. Enrollment limited to 20.

**HIST 1961I. North Korea: Past, Present, Future.**

Typically, the Democratic Peoples Republic of Korea (DPRK) is portrayed as a rogue nation ruled by the Kim family, autocrats who are either “mad” or “bad” and whose policies have traumatized the country's citizens, wrecked the economy, and threatened nuclear disaster on South Korea, East Asia, even the USA. This course moves beyond such stereotypes to examine the interconnected political, economic, and cultural transformations of the DPRK from 1945 to the present. Also included are the lived experiences of the Korean people, the plight of refugees, and the question of unification with South Korea.

**HIST 1961M. Outside the Mainstream.**

When ratifying UN Covenant on Civil Rights in 1979, its representative reported, “The right of any person to enjoy his own culture... is ensured under Japanese law. However, minorities... do not exist in Japan.” Nothing could have been further from the truth. Japan is - and has been - home to immigrants, indigenous populations forced to accept Japanese citizenship, outcast communities of Japanese ethnicity, and otherwise ordinary persons who live outside the mainstream as outlaws and prostitutes. This course examines how minority communities came into existence, struggled to maintain distinctive lifestyles in what many view as an extraordinarily homogenous society.

**HIST 1962B. Life During Wartime: Theory and Sources from the Twentieth Century.**

This course asks how we are to understand war as everyday experience, and what separates war from, or connects it to, the other great movements of mass social and political disruption that the twentieth century has seen. The first part of the semester will examine different frameworks scholars and thinkers have proposed for understanding war as modern experience (militarization, trauma, collective memory, states of exception, etc.) In the second part we will investigate the uses and limitations of specific types of primary sources, drawn from China's war with Japan. Students will choose their own topics for final projects.

**HIST 1962C. State, Religion and the Public Good in Modern China.**

In late imperial China, religion formed an intrinsic part of public life, from the cosmological ritual of the state to the constitution of family and communities of various kinds. This arrangement was challenged in the twentieth century by the fall of the dynastic system and the introduction of new definitions of religion, modernity, sovereignty, and secularism. We will explore the ramifications of this change in greater China and its border areas during the past hundred years, looking at how people have sought to create a good public and the public good. Enrollment limited to 20.

**HIST 1962D. Japan in the World, from the Age of Empires to 3.11.**

This seminar explores the ambitions, anxieties and mutual images that shaped Japan's relationships with China, Korea, and eventually the West, from the early modern era to the 21st century. We will examine the response to Perry's arrival in 1853, Japan's subsequent efforts to join the ranks of the great powers of the day through diplomacy, the pursuit of empire, and military force, and the emergence of radically different ways of being in the world since 1945. Other topics to be covered include the role of race in shaping US-Japan relations, and the legacies of colonialism and war in East Asia.

**HIST 1962E. Print and Power in Modern Southeast Asia.**

This seminar explores the relationship between print and power in the comparative histories of 20th century colonial era Southeast Asia (focus: Vietnam, Indonesia, Thailand, Burma). What are the mechanics and manifestations of ‘print’? How does print communicate and symbolize ‘power’? From governmental paperwork to scriptural authority, mass printed newspapers to writers and publishers, print embodies many forms and functions. We will cover the following topics: print culture and print capitalism, circulations and the publishing economy, colonial archives and mapping, the formation of ‘imagined communities’ and national consciousness, and debates on gender, class, and modernity expressed through popular press and novels.

**HIST 1963L. Barbarians, Byzantines, and Berbers: Early Medieval North Africa, AD 300-1050.**

This class explores the transition from antiquity to the Middle Ages through the lens of western North Africa. Divided internally by theological disputes and inter-communal violence, and subjected to repeated conquests and reconquests from the outside, in this period North Africa witnessed the triumph of Islam over Christianity; the rise and fall of ephemeral kingdoms, empires, and caliphates; the gradual desertion of once-prosperous cities and rural settlements; the rising strength of Berber confederations; and the continuing ability of trade to transcend political boundaries and to link the southern Mediterranean littoral to the outside world. P

**HIST 1963M. Charlemagne: Conquest, Empire, and the Making of the Middle Ages.**

The age of Charlemagne sits at the nexus of antiquity and the middle ages. For two hundred years Charlemagne's family, the Carolingians, welded together fragments of splintered Roman imperial tradition and elements from the Germanic world to forge a new, medieval European civilization. This seminar examines that process by exposing students to the primary sources, archaeological evidence, and modern scholarly debates surrounding the Carolingian age. Topics include the Carolingians' rise to power; Charlemagne's imperial coronation; interactions with the Islamic and Byzantine worlds; the revival of classical learning; the Church; warfare; the economy; Vikings; and collapse of the Carolingian Empire. P

**HIST 1963Q. Sex, Power, and God: A Medieval Perspective.**

Cross-dressing knights, virgin saints, homophobic priests, and mystics who speak in the language of erotic desire are but some of the medieval people considered in this seminar. This course examines how conceptions of sin, sanctity, and sexuality in the High Middle Ages intersected with structures of power in this period. While the seminar primarily focuses on Christian culture, it also considers Muslim and Jewish experience. Enrollment limited to 20. P

**HIST 1964A. Age of Impostors: Fraud, Identification, and the Self in Early Modern Europe.**

Alchemists claiming to possess the philosophers' stone; basilisks for sale in the market; Jews pretending to be Catholics; women dressing as men: early modern Europe appeared to be an age of impostors. Officials responded to this perceived threat by hiring experts and creating courts, licenses, passports, and other methods of surveillance in an era before reliable documentation, photography, DNA. And yet one person's fraud was another's self-fashioning. We will examine instances of dissimulation, self-fashioning, and purported fraud, efforts to identify and stem deception, and debates about what was at stake when people and things were not what they seemed. P

**HIST 1964B. The Enchanted World: Magic, Angels, and Demons in Early Modern Europe.**

European fascination with the unseen world reached its highpoint alongside the Renaissance, Reformation, Scientific Revolution, and Enlightenment. Between 1500 and 1800, theologians, natural philosopher, princes, and peasants devoted enormous energy to understanding, communicating with, and eliminating a host of ethereal creatures, including ghosts, angels, demons, vampires, nature spirits, and witches. Some also sought to access the praeternatural powers that these creatures seemed to command. This course explores the intellectual, social, political, and religious origins of the interest in this unseen world, the structures Europeans created to grapple with it, as well as the factors that ultimately led to its demise.

**HIST 1964D. Women in Early Modern England.**

Selected topics in the social history of early modern England (c.1500-1800), with particular emphasis on the experiences of women. Themes to be addressed will include the family, working life, education, crime, politics, religion, and the early feminists. Not open to freshmen sophomores. P

**HIST 1964E. The English Revolution.**

Looks at the origins and nature of the English Civil War and Republican experiment in government (1642-1660) through a close examination of primary source materials. Considers not only the constitutional conflict between the crown and parliament, but also the part played by those out-of-doors in the revolutionary upheaval, the rise of popular radicalism, and the impact of events in Scotland and Ireland. P

**HIST 1964F. Early Modern Ireland.**

This seminar will cover various themes in the political, religious, social and cultural history of Ireland between c. 1500 and the later eighteenth century. Topics to be discussed will include the Reformation, the Irish Rebellion, Cromwell's rule, the War of the Two Kings, popular protest, the beginnings of the Irish nationalism, and the experiences of women. P

**HIST 1964G. Spin, Terror and Revolution: England, Scotland and Ireland, 1660-1720.**

Examines the revolutionary upheavals in England, Scotland and Ireland of the later 17th-century through a close examination of primary source materials. Topics covered include: high and low politics, the rise of the public sphere, the politics of sexual scandal, government spin, persecution and toleration, and the revolutions of 1688-91 and their aftermaths. Enrollment limited to 20. P

**HIST 1964K. Descartes' World.**

An exploration of history and historical fiction through examination of the early life of René Descartes, one of the most famous "French" philosophers of the 17th century. Little is known about his personal life, however, especially before he left France for good in 1628, despite many hints about his years as a soldier, his extensive travels in Europe, and his possible political and occult associations. This seminar is designed as a collective exploration into the small pieces of evidence about his early life and the lives of his friends and enemies in order to understand it imaginatively but truthfully. P

**HIST 1964L. Slavery in the Early Modern World.**

There were multiple forms of slavery in the Early Modern world. We will look at three major systems: Mediterranean slavery and the Barbary Corsairs, Black Sea slavery and slave elites of the Ottoman Empire, and the Atlantic triangular trade. We will examine the religious, political, racial, and economic bases for these slave systems, and compare the experiences of individual slaves and slave societies. Topics discussed include gender and sexuality (e.g. the institution of the Harem and the eunuchs who ran it), the connection between piracy and slavery, and the roles of slavery in shaping the Western world. P

**HIST 1965A. City as Modernity: Popular Culture, Mass Consumption, Urban Entertainment in Nineteenth-Century Paris.**

Modernity as a distinct kind of cultural experience was first articulated in the Paris of the 1850s. The seminar will explore the meaning of this concept by looking at the theories of Walter Benjamin, as well as historical examples of popular urban culture such as the mass circulation newspaper, the department store, the museum, the café concert and the early cinema. Enrollment limited to 20.

**HIST 1965B. Fin-de-Siècle Paris and Vienna.**

We will examine two great imperial capitals facing similar set of challenges at the end of a century dominated by Europe. Austria-Hungary and France were forced to reckon with declining status as great powers, made manifest by their defeat at the hands of Prussia in 1867/1870 respectively. Both struggled with place of ethnic and religious minorities in modern states, and both responded with outbursts of political anti-Semitism that emerged. We will not only gain a basic factual knowledge of fin-de-siècle urban life but also explore some of the works and problems animating the intellectual life of the twentieth century.

**HIST 1965C. Stalinism.**

In this course students will examine in detail one of the most deadly and perplexing phenomena of the twentieth century: Stalinism. Readings will introduce students to major events of Soviet history from the mid-1920s to the mid-1950s as well as debates among historians about how to interpret those events?

**HIST 1965D. The USSR and the Cold War.**

This seminar will examine in detail the Soviet Union's involvement in the Cold War, the defining international conflict between the end of the Second World War and the collapse of communism in Europe. Topics include cultural phenomena, economic organizations, and ideology, in addition to diplomatic crises and the indirect military confrontations in Asian, Africa, and the Americas. Enrollment limited to 20.

**HIST 1965E. Politics of the Intellectual in 20C Europe.**

This course will concentrate on European thinkers' engagement with the politics of the 20th century. Discussion will cover a range of cultural and intellectual currents and ideologies—modernism, fascism, communism, "dissidence," "internal" migration, "anti-politics"—as well as genres (essays, letters, fiction, criticism, poetry, film).

**HIST 1965H. Europe and the Invention of Race.**

This upper-level seminar in European intellectual history will examine key texts from the 16th through the 20th century in which the negotiation of difference and diversity produced and questioned the organization of populations into groups and hierarchies called races. How does "race thinking," with its spectrum from racism to critical race thinking, channel and direct phenomena such as European global expansions, capitalism and slavery, religious difference and secularization, imperialism, and fascism.

**HIST 1965L. Appetite for Greatness: Cuisine, Power, and the French.**

France has long been synonymous with a delicious cuisine, one with no equal in the world. This seminar will examine the development of French cuisine as a tool for national greatness, beginning with its origins under the Sun King, Louis XIV. We will trace subjects such as the global dissemination of French food after the French Revolution, the food shortages common to French people as the country industrialized, and the feeling that France was losing its culinary hold in the twentieth century. Today, French food again serves as a nexus for the anxieties of the nation, including Americanization and immigration.

**HIST 1965M. Double Fault! Race and Gender in Modern Sports History.**

From 1936 Berlin Olympics to infamous East German swimmers of the Cold War to 1998 French soccer team, sport culture has consistently helped define overall societal values. We will examine how early modern societies defined the ideal sporting participant, and how shifts over time included and excluded various groups. These shifts, including the promotion of masculinity through duels, the fears of women's emancipation via cycling, and the exclusion of Jews from competition, were based on perceived national needs. Through the study of sports, we will study who we have been as a community—as well as who we aspire to be.

**HIST 1965N. "Furies from Hell" to "Femi-Nazis": A History of Modern Anti-Feminism.**

Women have faced a deep antipathy at nearly every turn in their struggles for civic and social inclusion. These denials of women's rights often take the form of commentaries—sometimes vicious ones—about women's general natures, bodies, and fitness for public life. Women are consistently tagged with various labels of otherness: opponents of women's rights deem them irrational, unnatural, traitors to society, even sexual deviants. This course will examine the dangers that women allegedly represent to social stability from the Enlightenment to today, as well as how women have fought back to assert their rights and independence.

**HIST 1965O. 'Naturally Chic': Fashion, Gender, and National Identity in French History.**

From its beginnings, the fashion industry in France has been synonymous with the international reputation of the nation. Similarly, being "chic," having an innate sense of discernment and style, became synonymous with French femininity. This seminar will explore the interconnectivity of the history of fashion in France, the requirements it placed on French women, and the pressures the fashion industry has borne since the 1700s. We will look at how fashion reflected and created the moods of various periods, and we will also see how French women's national belonging has been innately tied to ability to display French fashion.

**HIST 1965R. The Crisis of Liberalism in Modern History.**

Liberalism has flamed out before. Its collapse in the late 19c left a mark on the psychoanalytic theories of Sigmund Freud, the art of Gustav Klimt, and the fiction of Franz Kafka. Liberalism's second collapse in the 1930s, inspired the founder of neoliberal economics Friedrich Hayek and the philosopher of science Karl Popper. These men were all Austrian, a nationality they shared with the most infamous critic of liberalism, Adolf Hitler. This course wonders why this country in the center of Europe has exercised such an outsized influence on our modern experience.

**HIST 1966Q. Colonial Encounters and the Creation of Latin America.**

This seminar examines how interactions between Europeans and indigenous peoples shaped the formation of early Latin America. From Florida to Brazil, invasion led to widely varied outcomes, including outright failures. Students will come to see colonization as a difficult, uneven process, as Europeans struggled to comprehend and engage unfamiliar natural and human environments; the new societies that emerged reflected complex transatlantic exchanges. Our readings will consist of primary sources from the sixteenth century, supplemented by academic texts. Students will write a series of three-page response papers, along with a ten to twelve-page essay on major themes from the course. P

**HIST 1967C. Making Revolutionary Cuba, 1959-Present.**

In January 1959, the forces of rebel leader Fidel Castro entered Havana and forever altered the destiny of their nation and world. We will examine the question of political hegemony and the many silences built into the achievement of Revolution—from race to sexuality to culture—even as we acknowledge that popular support for that Revolution has often been both genuine and heartfelt. It is this counterpoint between the Revolution's successes in the social, economic, and political spheres and its equally patent exclusions that have shaped Cuba's history in the past and will continue to guide its path to an uncertain future.

**HIST 1967E. In the Shadow of Revolution: Mexico Since 1940.**

This course traces political, social, and economic developments in Mexico since the consolidation of the revolutionary regime in the 1930s. The topics addressed include: the post World War II economic "miracle"; the rise of new social movements; the Tlatelolco massacre; the deepening crisis of the PRI (the governing party) in the 1980s and 1990s; the Zapatista rebellion; violence and migration on the northern border; and the war against narcotraffickers.

**HIST 1967F. The Maya in the Modern World.**

This seminar focuses on the Maya in postcolonial Guatemala. The main theme is the evolving relationship between indigenous peoples and the nation-state. Topics include peasant rebellions in the nineteenth century, the development and redefinition of ethnic identities, the military repression of the 1970s and 1980s, the Rigoberta Menchú controversy, and the Maya diaspora in Mexico and the United States. Enrollment limited to 20.

**HIST 1967L. Politics and Culture Under The Brazilian Military Dictatorship, 1964-1985.**

This course will focus on the political, social, economic, and cultural changes that took place in Brazil during the military dictatorship that ruled the country from 1964-85. We will examine why the generals took power, the role of the U.S. government in backing the new regime, cultural transformations during this period, and the process that led to re-democratization.

**HIST 1967Q. Gender and Sexuality in the Modern History of Latin America.**

This seminar explores how gender shaped the political and social history of 19th and 20th century Latin America. Together, we will explore some themes at the center of this growing body of scholarship, such as the role of honor and sexual morality in shaping post-independence Latin American societies, the efforts of states to regulate the family, and the role of gender in the organization of the modern labor force. Throughout the semester, we will discuss the intersections of race, gender and class that are at the heart of changing conceptions of sexual morality and ideals of modern family organization.

**HIST 1967R. History of Rio de Janeiro.**

From colonial outpost to capital of the Portuguese Empire, from sleepy port to urban megalopolis, this seminar examines the history of Rio de Janeiro from the sixteenth century to the present. Using an interdisciplinary perspective rooted in historical analyses, we will analyze multiple representations of the city, its people, and geography in relationship to Brazilian history, culture, and society.

**HIST 1967T. History of the Andes from the Incas to Evo Morales.**

Before the Spanish invaded in the 1530s, western South America was the scene of the largest state the New World had ever known, Tawantinsuyu, the Inca empire. During almost 300 years of colonial rule, the Andean provinces were shared by the "Republic of Spaniards" and the "Republic of Indians" - two separate societies, one dominating and exploiting the other. Today the region remains in many ways colonial, as Quechua- and Aymara-speaking villagers face a Spanish-speaking state, as well as an ever-more-integrated world market, the pressures of neoliberal reform from international banks, and the melting of the Andean glaciers.

**HIST 1968A. Approaches to the Middle East.**

This seminar introduces students to the interdisciplinary field of Middle East Studies in the broader context of the history of area studies in the humanities and social sciences. Why and when did the Middle East become an area of study? What are the approaches and topics that have shaped the development of this field? And what are the political implications of contending visions for its future? The readings sample canonical and alternative works and the classes feature visits by leading scholars who research and write on this pivotal and amorphous region.

**HIST 1968F. History of Capitalism: The Eastern Mediterranean and the World Around.**

This course is an analysis of where the Mediterranean region fits in the evolving capitalist world-economy in the aftermath of the so-called Age of Discovery. The context of the Mediterranean is set in our own age's "globalization" as histories of capitalism push on the "world" in new ways challenging our mental maps for historical change. The seminar takes on a critical approach to the European historiography on the rise of capitalism and the view that the Mediterranean collapsed with the rise of the Baltic and the Atlantic.

**HIST 1968V. America and the Middle East: Histories of Connection and Exchange.**

This seminar explores connections and exchanges between the diverse peoples of two constructed regions: the Middle East and North America. The course proceeds chronologically from the global context surrounding Columbus's 1492 voyage, eventually focusing on US relations with the "Mideast." But we'll not stop there. Rather, we'll read closely for underlying socioeconomic, diplomatic, and cultural processes—including trade, migration, education, and evolving conceptions of race, religion, and citizenship—themes often ignored by conventional histories that dwell on watershed events, personalities, or conflict. Our goal: to recognize how American-Mideast ties are far more complex, rich, and deep-rooted than is generally assumed.

**HIST 1969A. Israel-Palestine: Lands and Peoples I.**

This advanced undergraduate seminar seeks to provide a deeper understanding of the links between the region now known as Israel and Palestine and the peoples that have inhabited it or have made it into part of their mental, mythical, and religious landscape throughout history. The course will be interdisciplinary at its very core, engaging the perspectives of historians, geologists, geographers, sociologists, scholars of religion and the arts, politics and media. At the very heart of the seminar is the question: What makes for the bond between groups and place - real or imagined, tangible or ephemeral. No prerequisites required.

**HIST 1969B. Israel-Palestine: Lands and Peoples II.**

This advanced undergraduate seminar seeks to provide a deeper understanding of the links between the region now known as Israel and Palestine and the peoples that have inhabited it or have made it into part of their mental, mythical, and religious landscape throughout history. The course will be interdisciplinary at its very core, engaging the perspectives of historians, geologists, geographers, sociologists, scholars of religion and the arts, politics and media. At the very heart of the seminar is the question: What makes for the bond between groups and place - real or imagined, tangible or ephemeral. No prerequisites required.

**HIST 1969C. Debates in Middle Eastern History.**

This seminar investigates the historical bases of some of the major debates which continue to dominate contemporary discussions on the Middle East. These include debates on colonialism and its legacies; problems associated with the post-colonial Middle Eastern state (the "democracy deficit": human rights; oil; political Islam); and arguments about the causes and consequences of some of the major events in Middle Eastern history (the Israel-Palestinian conflict; the Iranian revolution; the Lebanese civil war; 9/11 and the Iraq invasion; and the Arab Spring).

**HIST 1969D. Palestine versus the Palestinians.**

This course explores alternatives to the common view that the Palestinian-Israeli conflict is a struggle between two nationalist movements over the same land. Moving away from state-centric political discourse, it engages the questions of imperialism, settler-colonialism, and displacement from a bottom-up perspective of everyday life of Palestinian communities in historic Palestine and the Diaspora. How do these internally divided and spatially fragmented communities negotiate the present and imagine the future? Ultimately, the course asks: What does it mean to be a Palestinian? And what can the Palestinian condition teach us about the modern world?

**HIST 1969F. Nothing Pleases Me: Understanding Modern Middle Eastern History Through Literature.**

This seminar examines the major themes and events in the history of the Middle East in the 20th century through a close reading of literary texts and, in some cases, films. Throughout the course we will try to locate the perspectives of the "ordinary people" of the region, and will pay special attention to the voices of those who are rarely heard from in discourses on the Middle East: religious minorities, sexual minorities, women, children, but also criminals, misfits, misanthropes and others who have been deemed social outcasts.

**HIST 1970A. Colonial Encounters: Indians, Europeans, and the Making of Early America.**

This seminar explores Native American histories and cultures in North America, primarily through the multiple and overlapping points of contact and coexistence with Europeans from the sixteenth through the eighteenth centuries. Although we will be reading widely in the very interesting recent literature in the field, a major component of the class is to investigate in a practical way the problem of sources for understanding and writing about American Indian history. As a senior capstone seminar, the final project is a substantial research paper. Enrollment limited to 20. P

**HIST 1970B. Enslaved! Indians and Africans in an Unfree Atlantic World.**

This course examines the varieties of Indian and African enslavement in the Atlantic world, including North America, up through 1800. Reading widely in recent literature in the field as well as in primary sources from the colonial period, we will ponder the origins, practices, meanings, and varieties of enslavement, along with critiques and points of resistance by enslaved peoples and Europeans. Special emphasis will be given to the lived nature of enslavement, and the activity of Indians and Africans to navigate and resist these harsh realities. A final project or paper is required, but there are no prerequisites. P

**HIST 1970D. Problem of Class in Early America.**

This seminar considers economic inequality in colonial British North America and the new United States. Studying everyone from sailors, servants, and slaves in the seventeenth century to industrial capitalists and slaveholders in the nineteenth century, this course will look at the changing material structures of economic inequality and the shifting arguments that legitimated or challenged that inequality. Readings will explore how historians have approached the subject of inequality using on class as a mode of analysis. Students will write extended papers that place primary research in conversation with relevant historiography. Enrollment limited to: 20. Written permission required.

**HIST 1970F. Early American Money.**

The history of finance has become a crucial site for studying governance and statecraft, for recovering the organizing logic of capitalism, and for recognizing the structures of power in any given society. Topics include the recurring debates over metallic and paper currencies, the emergence of a national banking system, and the technologies of coinage, assaying, and counterfeiting. Particular focus on the relationship of finance and slavery, as well as the many “bank wars” that riled American politics from the seventeenth century through the nineteenth century.

**HIST 1970G. Captive Voices: Atlantic Slavery in the Digital Age.**

The digital revolution is transforming the study of history. But is it allowing us to better recover the voices and lived experiences of people in the past? This course considers the possibilities and pitfalls of using digital tools to understand the lives of enslaved men and women in the Americas between 1500 and 1800. Each session considers a different digital humanities project, supplemented by primary sources and recent books. For their final project, students will contribute to the Database of Indigenous Slavery in the Americas, which is hosted here at Brown. There are no prerequisites for this course. P

**HIST 1971D. From Emancipation to Obama.**

This course develops a deep reading knowledge of significant issues and themes that define African American experiences in the 20th century, experiences that begin with the years following Emancipation and culminates with the election of President Obama. Themes include citizenship, gender, labor, politics, and culture. The goal is to develop critical analysis and historiographical depth. Some background in twentieth century United States history is preferred but not required. Assignments include weekly reading responses, class participation and presentation, and two written papers. Enrollment limited to 20.

**HIST 1972A. American Legal History, 1760-1920.**

Undergraduate seminar on the United States and international law. Focuses mainly on the period before the twentieth century. Examines subjects such as the right of revolution; the evolution of U.S. Constitution; law as an instrument of economic development and exploitation; and the evolution of rights-consciousness—all within the context of international law. Enrollment limited to 20. Students should contact the instructor before the beginning of the semester if they are interested in taking the course. Instructor permission required.

**HIST 1972E. Theory and Practice of Local History.**

Examines the theory and practice of local history, evaluating examples from a variety of genres ranging through micro history to folk music, from genealogy to journalism. Work with primary documents, evidence from the built environment and visits to local historic sites and archives will enable students to evaluate sources and develop their own ideas about writing history and presenting it to a public audience. Enrollment limited to 20. Instructor permission required.

**HIST 1972F. Consent: Race, Sex, and the Law.**

In the context of recent student organizing on college campuses, the word “consent” has become headline news. But what is “consent” and what does it have to do with the history of race and sexuality in America? In this course, we will use history, law, and feminist theory to understand the origins of consent, to trace its operation as a political category, and to uncover the many cultural meanings of “yes” and “no” across time. Themes addressed include: slavery, marriage, sex work, feminism, and violence, from the founding of American democracy to the present.

**HIST 1972H. U.S. Human Rights in a Global Age.**

Examines how the U.S. has shaped or been shaped by global human rights struggles. Topics include: indigenous rights in the U.S. Early Republic; Antislavery in the early Atlantic World; anti-imperialism in U.S. wars with Mexico and Spain; U.S. and human rights conventions; the Cold War and Civil Rights; and recent U.S. policies concerning human migration. No prerequisites. Priority given to seniors and juniors and those who have not taken the related course HIST 1972A (though students may take both courses). Instructor permission required (email professor before end of registration period).

**HIST 1974A. The Silk Roads, Past and Present.**

The Silk Road has historically been the crossroad of Eurasia; since the third-century BCE it has linked the societies of Asia—East, Central, and South—and Europe and the Middle East. The exchange of goods, ideas, and peoples that the Silk Road facilitated has significantly shaped the polities, economies, belief systems, and cultures of many modern nations: China, Russia, Afghanistan, Uzbekistan, and India. This course explores the long history (and the mythologies or imaginations) of the Silk Road in order to understand how the long and complex pasts of the regions it touches are important in the age of globalization. P

**HIST 1974B. War and Peace: A Global History.**

A seminar examining how the categories of “war” and “peace” have emerged over time and place. How does a society decide that a war exists or has ended, or that there is peace, or that peace has been violated? How has the practice of war and the practice of peace changed over the course of history? We approach these questions by looking at a series of case studies, from Greek-Persian relations of the fifth century BCE to the Mongol imperial system of the thirteenth century to the twentieth-century World Wars and recent efforts (successful and failed) at global governance.

**HIST 1974G. Nonviolence in History and Practice.**

This advanced history seminar will begin with exploring sources of Mahatma Gandhi’s conception of nonviolent civil disobedience and go on to explore the transformation of those ideas in different contexts of protest and resistance in different parts of colonial India, as well as the US and South Africa. In addition to thinking historically, we will look at the details of strategies and practices that have been developed over the last half century, into the present.

**HIST 1974J. Decolonizing Minds: A People’s History of the World.**

This seminar is an experiment in thinking a global history of the making of the modern world. We read texts that track the movement of ideas, peoples and goods, the formation of political and economic inequalities and the continuous struggles of ordinary people against them. From empires to nation-states, from anti-imperialist nationalist struggles to transnational radical movements, this seminar grapples with the politics of knowledge for drawing out “fugitive” lineages of the past that we need to shape our collective future. No overrides will be given before the semester begins. Interested students must attend first class meeting.

**HIST 1974K. Maps and Empires.**

The human fascination with maps is perennial, but it has been transformed in recent decades from a field for antiquarian map-lovers to a bona fide domain of intellectual inquiry. Maps are now understood as instruments of power and domination rather than value-free representations of territory. Using the world-renowned cartographic collection of the John Carter Brown Library, this seminar will examine the role of maps and other graphic representations of space in the consolidation and contestation of imperial dominions, introducing students to the idea of using maps as primary source materials for historical and cultural analysis. Winter session. P

**HIST 1974L. A Global Idea: Civilization(s).**

This seminar explores a global history perspective to the idea of civilization since the eighteenth century. Starting from the view that the Enlightenment was a specifically European phenomenon, a foundational premise of Western modernity, we explore how the master narrative around 'civilization' developed and crystallized through universal history and world history into today's global history. Analyzing the making of this global idea includes topics like the politics of knowledge production, and transnational exchanges of ideas and practices of progress, nationalism, periodization, and intertextuality in the West, Ottoman Empire and others.

**HIST 1974M. Early Modern Globalization.**

What can the experience of a minority group like the Jews teach us about roots of globalization? What were the economic, political, and cultural conditions that allowed early modern Jewish merchants to create economic networks stretching from India to the New World? We will answer these questions by examining the connections and interactions between four major Jewish centers: Ottoman Jewry in the Eastern Mediterranean, the Port Jews of Amsterdam and London, Polish-Jewish estate managers in Ukraine, and the Court Jews of central Europe. We will see how European expansion exploited - and was exploited by - these Jewish entrepreneurs. P

**HIST 1974P. Modernity's Crisis: Jewish History from the French Revolution to the Election of Donald Trump.**

As the modern world developed and grew, the question of the Jews' place within it became increasingly important for the majority societies and the Jews themselves to deal with. The solutions found have ranged from inclusion on equal terms through exclusion not only from society but from humanity altogether. In many ways, the debates around this issue have touched on the very meaning of modernity itself. In this advanced undergraduate seminar, we will examine the ongoing polemics on the place of the Jews from the perspectives of both the proponents of the different solutions and the Jews themselves.

**HIST 1974S. The Nuclear Age.**

This is a course for students interested in questions about the development of atomic weapons, their use on Hiroshima and Nagasaki, the Cold War arms race that followed, and debates over the risks associated with other nuclear technologies. We will look carefully at the scientific and military imperatives behind the Manhattan Project, the decisions that led to the use of atomic weapons on Japan, and subsequent efforts to reflect on the consequences of those choices. We will also explore how popular protest and popular culture after 1945 shaped our understanding of the terrors and promise of the nuclear age.

**HIST 1974Y. Moral Panic and Politics of Fear.**

What are the political uses and content of fear? This course traces the politics of panic as a window onto state, stigma, and society by pairing foundational readings in culture studies with historical monographs grounded in case studies. Over the course of the semester, we will consider such themes as: the mobilization of fear as a strategy of governance; sexuality, sickness, and disgust; the political logic of backlash; racial terror and colonialism; paranoia and conspiracy theories; popular culture and elite repression and appropriation; and the supernatural inflection of fear politics.

**HIST 1976A. Native Histories in Latin America and North America.**

From Alaska to Argentina, Native people have diverse histories. Spain, Portugal, England and France established different colonial societies; indigenous Latin Americans today have a different historical legacy than Native Americans in the United States. But the experiences of conquest, resistance and adaptation also tell a single overarching story. In colonial times, Native Americans and Europeans struggled over and shared the land. After Independence, however, the new American republics tried to destroy American Indians through war and assimilation. But in the last century Native peoples (both North and South) reasserted their identities within modern states: the "vanishing Indian" refused to vanish.

**HIST 1976B. The History of Extinction.**

This seminar explores the history of animals and people that are no more or whose existence is threatened. To come to terms with these histories, we will study classification of species and cultures, frontiers of exploitation and appropriation, and violence against lives and ways of life. Extinction itself is also an idea: when is it just an evolutionary phenomenon and when is it a historical moment worth marking? We will consider claims about intervention for the good of humans or others. Finally, we will observe forms of mourning. Course requirements include a major independent research project.

**HIST 1976C. Animal, Vegetable, Mineral: Environmental Histories of Non-Human Actors.**

More than other sub-fields of history, environmental history approaches non-human actors as agents in their own right. This forces a radical reconceptualization of the nature of the subject. What happens to our understanding of the past (and the stories we tell about the past) if we posit that mountains think, mosquitos speak, and dogs dream? Drawing on Science and Technology Studies, Thing Theory, and Animal Studies, this course examines such questions by decentering the human and elevating non-human actors within narratives of interactive networks. Short written assignments build on each other to culminate in a research project in environmental history.

**HIST 1976D. Powering the Past: The History of Energy.**

This seminar will explore the role of energy in shaping our past, and uses energy consumption and production as an entry into central questions in environmental history. Beginning with the regimes of wood, water, and muscle in early human history, the course moves on to explore fossil fuels, nuclear power, and alternative energy sources around the world. While attentive to issues of environmental impact, we will also examine the broader implications of energy use for social, economic, and political developments and challenges. Readings are drawn from anthropology, geography, ecology as well as history. This course presumes no previous history courses.

**HIST 1976E. The Anthropocene: Climate Change as Social History.**

This seminar will explore ramifications of the concept of the Anthropocene. The Anthropocene has been proposed as a new human-driven geologic age that began with the increased exploitation of fossil fuels in the late eighteenth century. Its proponents emphasize transformations through anthropogenic climate change, but we will also consider the effects of population growth, pollution, habitat destruction, and extinction. To assess the historical validity of the concept, we will discuss the impact of humans on the environment before 1800, the extent of transformation since 1800, and whether human-environmental interactions can be usefully generalized to our species as a whole.

**HIST 1976F. Fueling Change: A Global History of Energy.**

The transition from an energy regime based on biomass and animal muscle to another based on fossil fuels is an epochal transformation whose importance is on a par with the Neolithic transition from hunter-gathering to agriculture. For most of their history, human societies relied on the sun's energy locked up in plants and animals for their livelihood. In the late eighteenth century, some societies began to transcend the limits of the established energy regime. This course examines the implications of the modern energy transition from the old energy regime to a new one based on fossil fuels around the world.

**HIST 1976G. Animal Histories.**

Participants in this seminar are invited to explore human and non-human relations in the global past. The history of human-animal relations is huge, so rather than attempt a general survey, we situate our discussion around selected topics. We begin with one animal, the wolf, and move through established and less-familiar historical topics, building toward our final question: how does the inclusion of animals enhance the discipline? The anthropologist Claude Lévi-Strauss said, "animals are good to think with." So is history. In this seminar we think through those things together.

**HIST 1976H. Environmental History of Latin America 1492-Present.**

From the development of sugar as the major slave commodity of the 18th century Caribbean to the “Water Wars” in the Bolivian highlands at the turn of the 21st century, race, labor, and imperialism in Latin America have been shaped in relation to the natural environment. This course explores the role of the environment in the colonial and modern history of Latin America. Together, we will examine how the environment shaped the processes of conquest, displacement, settlement, and trade, as well as how these processes transformed the natural environment throughout the hemisphere.

**HIST 1976I. Imperialism and Environmental Change.**

Empires conquer and control territory to enrich their ruling elites, often transforming the environments of these regions to make them more productive and profitable. This course will examine how empires have reorganized the landscapes of the regions they conquered from the ancient empires of Rome and China to the modern overseas empires of Europe and Japan and the informal American empire.

**HIST 1976N. Topics in the History of Economic Thought.**

This reading intensive seminar exposes students to the intellectual history of capitalism via primary texts in the history of economic thought. Each semester that it is offered, we tackle a different theme through a new set of readings. Past topics include ideas about value, property, markets, labor, and inequality. We have also examined how the relationship between capitalism and other forms of production have changed over time. In the Spring of 2020, we will focus on Social Darwinism.

**HIST 1976R. Histories of the Future.**

This course is for students interested in how ideas about what the future of human societies would look like have developed over time, and in the impact of those ideas on cultural, social and political norms. We will look carefully at examples of early modern prophecy before turning to the more recent emergence of theories of economic and social progress, plans for utopian communities, and markedly less optimistic and often dark visions of where we’re headed. We will also explore the roles capitalism, popular culture, and science have played in shaping the practices and vocabularies associated with imagining the future.

**HIST 1977B. Feathery Things: An Avian Introduction to Animal Studies.**

This course will provide grounding in the emerging field of critical animal studies by surveying how we know and interact with one diverse and charismatic class of animals: the Aves. Inspiring science, art, and conservation, traded as resources, kept as hunters or pets, and eaten as meat, birds provide an excellent avenue into animal studies. The diverse ways people relate to birds provides an innovative avenue into studies of social science and human existence. In addition to reading and discussion, we also will experience the many forms of birds around us through indoor and outdoor “laboratory” sessions.

**HIST 1977I. Gender, Race, and Medicine in the Americas.**

This seminar explores the gendered and racial histories of disease and medicine in nineteenth and twentieth century Latin America and the United States. From the dark history of obstetrics and slavery in the antebellum U.S. South to twentieth-century efforts to curb venereal disease in revolutionary Mexico or U.S.-occupied Puerto Rico, to debates over HIV policy in Cuba and Brazil—together we will explore how modern medicine has shaped both race and gender in the Americas. Topics we will explore include environmental health and the body; infant mortality; the medicalization of birth; and the colonial/imperial history of new reproductive technologies.

**HIST 1977J. War and Medicine since the Renaissance.**

Since the Renaissance, warfare has mainly been a mass activity organized by states, with the ability to cause mass harm growing by leaps and bounds. At the same time, states have developed methods to care for their armed forces, and sometimes the civilians entangled in their military operation. This course will deal briefly with the history of warfare, and mainly with the ways in which states, citizens, and interested parties have attempted to ameliorate the bodily effects of warfare, from the Renaissance to the late 20th century.

**HIST 1978B. Bearer of Light, Prince of Darkness: The Devil in Premodern Christianity.**

Satan. Lucifer. The Prince of this World. The personification of evil in the Abrahamic traditions has gone by many names and titles. To premodern Christians, the devil was not an abstract entity; they felt the real presence of Satan and his demonic army all around them. This course explores the devil as a dynamic concept evolved in accordance with cultural and political priorities. It looks at the relationship between the premodern Christian perceptions of personified evil and the Jewish and Islamic traditions. It will also look at the ways in which misogyny and racism shaped ancient and medieval demonologies. P

**HIST 1978C. Women Writers in Early European History.**

The Middle Ages and Early Modern Europe were periods during which writing was a mode for women’s self-fashioning and expression in western Europe. Women’s devotional practices in particular offered a dynamic space for education, the advancement of both Latin and vernacular literacies, and the production of often highly personal texts speaking of divine matters on the level of everyday life. We will study a diverse set of writings by women in the medieval and early modern periods, and women’s texts will be examined as historical evidence for women’s perspectives. P

**HIST 1978D. Contested Histories of Colonial Indochina: Encounters, Social Transformations, Legacies of Empire.**

This seminar explores the history of French colonial Indochina (Vietnam, Cambodia, Laos) from 1858 to 1945. Challenging Euro-centric narratives of colonialism, we will critically analyze the colonial encounter as complex exchanges, geographically diverse, and socially uneven. We will examine the mechanisms and limitations of the colonial state, capitalism, cultural institutions, and science and technology. Rather than position colonialism as an external agent of change, this seminar dedicates attention to local agency, social and cultural transformations, and the creative production of ideas, print media, and urban and religious communities especially in 1920’s to 1940’s Hanoi, Saigon, and Phnom Penh.

**HIST 1978O. Enslaved: Indians and Africans in an Unfree Atlantic World.**

This course examines the varieties of Indian and African enslavement in the Atlantic world, including North America, up through 1800. Reading widely in the recent literature in the field as well as in primary sources from the colonial period, we will ponder the origins, practices, meanings, and varieties of enslavement, along with critiques and points of resistance by enslaved peoples and Europeans. Special emphasis will be given to the lived nature of enslavement, and the activity of Indians and Africans to navigate and resist these harsh realities. A final project or paper is required. Enrollment limited to 20. P

**HIST 1979A. Women’s Work: Gender and Capitalism in American History.**

This course examines the importance of women and gender to the long economic history of the United States. Whereas the history of American capitalism has often been a primarily male story, this course moves women from the margins of the narrative to the center. It asks how female labor (paid and unpaid), cultural norms around gender and family, and issues of sex and reproduction have fundamentally shaped economic life—not just for women, but for all Americans. Students will gain insight into American women’s history, the history of capitalism, and the intersectional history of gender, sexuality, race, and class.

**HIST 1979B. Empire and Everyday Life in Colonial Latin America.**

What was it like to live a “regular” life in the American colonies of Spain and Portugal? How did people eat, dress, have fun, start and sustain families, pursue careers, and think about the world and themselves? Drawing upon a range of sources, this course considers how global and local forces intersected in the individual or community in myriad, yet historically contingent, ways. This micro focus provides another way of considering the broad historical forces at work in the colonies, such as religion, gender, politics, race, technology, and geography, from the “inside-out” perspective of individual and communal accounts and stories.

### **HIST 1979C. Putin, Stalin and "Friends": Understanding Eurasia Today through its History and Personalities.**

This course uses the past to understand the present in Russia and its neighboring states. Each week we will use a "friend" (a person drawn from current events) as a window into events past and present. We will read a few contemporary articles about these notables alongside historical works that give us the necessary background to explore key aspects of their story. In the middle of the semester, you will choose an event or theme and execute an independent research project using contemporary and historical sources. Topics explored include gender, political activism, terrorism, immigration and battles to control the past.

### **HIST 1979D. Ruined History: Visual and Material Culture in South Asia.**

What does art, architecture and material culture reveal about South Asia's history? This course explores the significance of images, objects, architecture and other forms of material and visual culture to South Asian societies as well as their transformation during the 19th and 20th centuries under pressure from British colonial rule. We will consider how shifts in the meanings of architectural sites (like temples), images and material objects under colonial rule animated political and religious conflict in South Asia between 1880 and 1947. Topics include nationalist cartography; Hindu-Muslim violence around temples and mosques; public performance and anti-colonial activism.

### **HIST 1979E. Wise Latinas: Women, Gender, and Biography in Latinx History.**

Last summer the Brown community reflected on Supreme Court Justice Sonia Sotomayor's autobiography that documents how her experience as a Bronx-raised Puerto Rican and "wise Latina" shaped her illustrious legal career. This course will provide historical context for reading Latinx biographies and locate them within a broader history of women, gender, and sexuality in Latinx histories of the United States. We will examine life histories, oral histories, and biographies. Units will explore the histories of Mexican Americans, Puerto Ricans, Cubans, Dominicans, and Central Americans, paying close attention to race and gender and highlighting struggles for social justice.

### **HIST 1979F. Sex, Gender, Empire.**

Despite brutal violence at their core, European empires were imagined as families consisting of European colonials and their "native" subjects. We'll position sex, gender, family at the heart of the imperial enterprise, examining how boundaries of imperial territory were imagined in terms of a shared household. What a family was and who was part of it became a source of imperial debate which intersected with anxieties around racial mixing and sexuality. In turn, diverse formations of imperial families shaped questions of sex and gender in Europe pursuing this global history of inter-cultural relationships that continue to shape our present day.

### **HIST 1979G. The Unwinding: A History of the 1990s.**

This course will carefully consider the history of a recent decade -- the 1990s. We will reflect on grand historical narratives -- the end of the Cold War, the two-term presidency of a centrist Democrat, and the large challenges faced by the United States at home and abroad. But we will also explore less conventional topics, including the effects of new technology, and the ways in which new media and new tactics reshaped a political consensus that had endured for decades. Finally, we will consider the decade's rich cultural expression, including its music, film, literature and journalism.

### **HIST 1979H. Prostitutes, Mothers, + Midwives: Women in Pre-modern Europe and North America.**

Today's society often contrasts stay-at-home moms with working women. How did women in Europe and North America navigate the domestic and public sphere from the late medieval period to the start of the twentieth century? How did gender affect occupational identity? Were women excluded from the professional class? This seminar investigates gender in the workplace, looks at gender-specific employment, and considers how families functioned. Readings include passages from classical, religious, and medical texts as an introduction to medieval gender roles. Students will explore texts, images, and film to understand pre-modern work and the women who did it.

### **HIST 1979I. Race and Inequality in Metropolitan America from Urbanization to #blacklivesmatter.**

There is nothing natural about the state of race and inequality in American cities today. Urban inequities -- around residential segregation; access to housing, schools, jobs; state violence -- are overwhelmingly the result of decades of choices made by individuals and policymakers. This course will examine this history. We will trace how race has shaped metropolitan America from the late nineteenth century to present day. The course will explore how institutions, government policies, and individual practices developed and perpetuated race and class-based inequalities. We will also examine examples throughout this history of individuals who fought collectively for racial and economic justice.

### **HIST 1979J. London: 1750 to the Present.**

This course explores London's emergence as a major European capital in the eighteenth century, its international pre-eminence in the nineteenth, its experiences of war in the twentieth century and its encounters with immigration, social change and urban discontent in the postwar period. We will focus on themes in the social and cultural life of London, including popular culture, poverty, urban space, crime, and street life. We will discuss how scholars have approached these histories and use contemporary sources—visual and material culture, court records, newspaper accounts, and literature—to explore the lives of Londoners of the past.

### **HIST 1979K. The Indian Ocean World.**

Oceans cover two-thirds of the surface of the earth. They are the world's great connectors. Rather than political boundaries of empire and nation-state, this course focuses on an enduring geography of water as the central shaper of history. Drawing together the history of three continents this course explores the Indian Ocean world as a major arena of political, economic and cultural contact during the nineteenth and twentieth centuries. As we map the contours of this history we study how race, gender and sexuality were shaped across the Indian Ocean. Major topics include Islam, imperialism, indentured labor migration, liberalism and anti-colonialism. HISTGlobal

### **HIST 1979L. Urban History of Latin America.**

Latin America is the world's most urbanized region. 80 percent of Latin Americans live in cities, and iconic cities such as São Paulo and Mexico City are among the world's largest conurbations. The city has long played a key role in the region's history, serving as nodes of imperial power, as religious centers, and as markets from pre-Columbian to colonial times. The 20th century witnessed both the achievement and failure of modernization, as cities industrialized rapidly but grew haphazardly, struggling with poverty and pollution. Today, Latin American cities are multifaceted spaces where both real advancement and daunting problems coexist.

### **HIST 1979M. Piracy, Patents and Intellectual Property.**

Intellectual ownership is one of the most intractable problems in contemporary social and economic life. This course explores the emergence and significance of intellectual ownership in the domains of art, architecture, literature, scientific innovation, media, and law. We are particularly interested in the different social, geographic and national contexts in which regimes of intellectual ownership surfaced, and how different national agencies, individuals, and corporate formations variously construct and enforce understandings of ownership and infringement. We will also canvass contemporary enforcement and implementation mechanisms, global north versus global south wealth disparities, and the fate of intellectual property in the digital world.

### **HIST 1979N. American Charters.**

This seminar will read deeply in thirteen seminal texts from American history. Exploring the context in which each document was written, the intentions of the author(s), the medium of publication, the way audiences experienced the document, and its reception throughout history, arguing that charter documents have assumed high importance in the United States, a nation with little precedent to build upon. From John Winthrop's "City Upon a Hill" speech, which may never have been given, to Second Inaugural of Barack Obama, we'll consider the ways in which ambitious writers/speakers have tried to claim authorship for the narrative of American history.

**HIST 1979O. Comparative Black Power.**

Fifty years ago, in 1966, Stokely Carmichael made his legendary call for "Black Power!" That call was global, marked by its diversity. How did the idea of Black Power travel? Why did it emerge when and where it did, and what were its meanings in different contexts? This course examines the manifestations of black power movements in the Caribbean and in Africa, in the United States and in India. With the 50th anniversary in mind, this course will critically explore the dreams, international dimensions, gender politics, and legacies of Black Power.

**HIST 1979P. History of Chinese Medicine.**

In the past several decades consumer discontent with Western medicine has prompted an unprecedented interest in other methods of healing. As the longest continuous literate tradition on the planet Chinese culture has enduring experience in healthcare provision, making it an attractive alternative to biomedicine. In this course we survey the depth and complexity of the Chinese medical tradition through the lens of indigenous techniques and their permutations in diverse locales. Proceeding from the earliest written records on oracle bones to present day ethnographies of clinical practice, we will complement close readings of canonical texts with a focus on lived experience.

**HIST 1979Q. Japanese Film and Animation of the 20th Century.**

Recent years have seen an explosion of worldwide interest in Japanese popular media, including manga (comics), anime (animation), and films. Yet Japan's current success in exporting films/anime abroad is by no means just a recent phenomenon. We will explore Japanese live action film/animation from its origins through turn of 21st century. Students will learn to read films as narrative texts, and critiquing them on multiple levels. In the process, we will attempt to seek out what about Japanese cinematic art has caught the attention of Western critics, keeping our eyes on questions of identity and responses to historical events.

**HIST 1979R. Scientific Controversies from Creationism to Climate Change.**

This course examines scientific controversies from the mid-nineteenth century to the present. Topics will include evolution, telepathy, eugenics, lobotomy, recovered memories, vaccination, cloning, and global warming. We will study what these controversies tell us about the shifting relationship between science and society, how changes in scientific paradigms occur, why some controversies resolve, and why others persist, even in the face of long-standing scientific consensus. Students will learn to see science not as a progressive series of discoveries in the eternal pursuit of truth, but as an often messy historical process fully embedded in the politics and culture of its time.

**HIST 1979S. History of Life Itself: Biopolitics in Modern Europe.**

Life has long existed, but also has a history of its own. With the development of the natural sciences and state governance of its own populations, human life can be said to have entered into history. Homo Sapiens became the subject of medical science, political philosophy, and state law. In looking at the intersecting histories of science, politics, and theories of life, this seminar will examine the origins and effects of political economy, biology, public health, racism, eugenics, state violence, and ultimately democracy. We will read meta-histories from theorists, case studies from historians, and classic works of political philosophy.

**HIST 1979T. Modernism and Its Critics.**

This course explores how European writers interpreted modern art and manners between 1850 and 1940. As a crucial figure in emerging modern world, the cultural critic aimed to explain the meaning of style for society. Consequently, cultural critics created rich primary resources for understanding politics, beliefs, and everyday life activities. We will especially focus on anxiety about modern life expressed in controversies over avant garde movements from impressionists to expressionists, realists to the surrealists. We will cover issues like hysteria, men's fashion, music, vacations, sexuality, and advertising. In addition to lesser known figures, selected readings include Baudelaire, Nietzsche, Benjamin, Kafka.

**HIST 1979U. The Business of Empire: History of Capitalism and U.S. Foreign Relations, 1900 to the Present.**

This course explores the intersections between American business and American Empire during the twentieth century. From the United Fruit Company in Latin America to the arms manufacturers at Lockheed Martin, the interests of capital have shaped U.S. foreign relations. As students race this history across the twentieth century, they will learn how the rise of American business to global preeminence depended upon a supportive, interventionist government. This course will appeal to history, IR, and Economics concentrators among others.

**HIST 1979V. Technologies of the Soul: The History of Healing.**

Movements that sought to heal society formed a distinct counterpoint to establishment science, religion and culture throughout modernity. In this course, we will examine distinctly modern, non-medical forms of healing from the late 18th until the mid twentieth centuries. This course engages cultural history and theory, science, opera and religion asking whether movements such as Mesmerism, Wagnerism, or Anthroposophy formed a hopeful expansion of the healing role of science art and religion? Or did such developments subvert established norms that provoked anxiety? Ultimately we will probe the limits of the humanities while exploring movements that have challenged such boundaries.

**HIST 1979W. Debates on the Holocaust.**

Few topics in Modern European History have so heavily engaged historians while producing so little consensus as the Holocaust. Several debates have emerged in scholarship around several major issues such as motivation, collaboration, ideology, as well as larger questions around genocide itself. In this course, we will examine each debate and the links to specific methods within history such as periodization, causality and disciplinary boundaries. This course presents a unique entry to gain exposure to foundational historical categories and methods. Students will gain a knowledge of concepts critical to historical debate and foundation in a variety of approaches to history.

**HIST 1979X. Modern Enchantments: Science, Religion, and Magic in Modernizing America.**

Scholars have long equated modernity with "disenchantment," the subordination of magic and mysticism to the forces of science and secularization. Recent scholarship, however, has challenged this view, suggesting that the persistence of magical worldviews has been integral to the development of modernity itself. In this course, we will explore the various interactions, both conflicting and complementary, between science, religion, and magic in the nineteenth- and early twentieth-century United States. Topics will include spiritualism, hypnosis, phrenology, optical illusions, alternative medicines, stage magic, and the early psychology of religion. Throughout, we will interrogate the concept of modernity and the narrative of disenchantment.

**HIST 1979Y. Peace, Justice and Human Rights in a Global Age.**

This course explores the history of the major themes, problems and ideals of global peace, justice and human rights. We investigate the theoretical, social and political elements within these ideals and practices, spanning broad temporal and spatial genealogies of human thought. From biopolitics to geopolitics, we uncover attempts to demand food security, health care, and dignity as universal human rights. We highlight philosophies of peace and ethics, and unpack competing conceptions of "justice." Among other topics, the political economy of global survival plays an important role in this perspective, especially within bioethics and environmental justice.

**HIST 1979Z. The World in Revolution: America and the Global South during the Long 1970s.**

We'll explore varied relationships between Americans and Global South during the long 1970s—from the wave of revolutionary movements of the late 1960s to the Reagan "offensive" of 1981. As we trace these relationships across the decade, students will learn how Americans from all walks of life encountered the revolutionary "Third World." While many on the American Left—from Black Nationalists to feminists such as Bella Abzug—sought cooperation with the revolutionary movements in the Global South, others became determined to reassert U.S. hegemony abroad following the Vietnam War. We will try to understand why this latter group's antagonistic attitude towards the Global South ultimately came to define U.S. foreign policy.

**HIST 1980B. Animals and Plants in Chinese History (ENVS 1916).**

Interested students must register for ENVS 1916.

**HIST 1980C. Histories of Global Wetlands (ENVS 1915).**

Interested students must register for ENVS 1915.

**HIST 1980I. Portuguese Discoveries and Early Modern Globalization (POBS 1600D).**

Interested students must register for POBS 1600D.

**HIST 1980P. Museum Histories (AMST 1903I).**

Interested students must register for AMST 1903I.

**HIST 1980R. Urban Schools in Historical Perspective (EDUC 1720).**

Interested students must register for EDUC 1720.

**HIST 1980T. Modernity, Jews, and Urban Identities in Central Europe (JUDS 1718).**

Interested students must register for JUDS 1718.

**HIST 1980U. Popular Culture, 1400-1800 (ITAL 1430).**

Interested students must register ITAL 1430.

**HIST 1980Y. Jews and Revolutions (JUDS 1701).**

Interested students must register for JUDS 1701.

**HIST 1981B. Birding Communities (ENVS 1557).**

Interested students must register for ENVS 1557.

**HIST 1981D. Jewish Humor and Commercial Entertainment in Early 20th-Century Europe and America (JUDS 1726).**

Interested students must register for JUDS 1726.

**HIST 1981F. The Anthropocene: The Past and Present of Environmental Change (ENVS 1910).**

Interested students must register for ENVS 1910.

**HIST 1981G. Intellectual Change: From Ottoman Modernization to the Turkish Republic (MES 1300).**

Interested students must register for MES 1300.

**HIST 1981H. Blacks + Jews in American History and Culture (JUDS 1753).**

Interested students must register for JUDS 1753.

**HIST 1990. Undergraduate Reading Courses.**

Guided reading on selected topics. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**HIST 1992. History Honors Workshop for Prospective Thesis Writers.**

Prospective honors students are encouraged to enroll in HIST 1992 during semesters 5 or 6. HIST 1992 offers a consideration of historical methodology and techniques of writing and research with the goal of preparing to write a senior thesis in history. The course helps students refine research skills, define a project, and prepare a thesis prospectus, which is required for admission to honors. Students who complete honors may count HIST 1992 as a concentration requirement. Limited to juniors who qualify for the honors program.

**HIST 1993. History Honors Workshop for Thesis Writers, Part I.**

HIST 1992 and HIST 1993 students meet together as the History Honors Workshop, offered in two separate sections per week. All students admitted to the History Honors Program must enroll in HIST 1993 for two semesters of thesis research and writing. They may enroll in the course during semesters 6 and 7, or 7 and 8. Course work entails researching, organizing, writing a history honors thesis. Presentation of work and critique of peers' work required. Limited to seniors and juniors who have been admitted to History Honors Program. HIST 1993 is a mandatory S/NC course. See History Concentration Honors Requirements.

**HIST 1994. History Honors Workshop for Thesis Writers, Part II.**

This is the second half of a year-long course, upon completion the grade will revert to HIST 1993. Prerequisite: HIST 1993.

**HIST 2050. Proseminar in Late Medieval History.**

Macrohistory/Microhistory. A comparison of two different approaches to the study of the past, especially of late medieval and early modern Europe, focusing on the works of Fernand Braudel and Carlo Ginzburg.

**HIST 2080. Seminar in European Social History in the Eighteenth and Nineteenth Centuries.**

Methods of analysis for current topics in social, economic, demographic, family, and gender history. Depending on sources available, papers may be on Italian topics of the 16th-19th centuries, or on French or English topics of the 18th-19th centuries. Language requirement depends on area of specialization.

**HIST 2090. Proseminar on European Social History in the Eighteenth and Nineteenth Centuries.**

Selected readings on changes of social life in European cities in the period of transition from the preindustrial to the industrial economy. Primary focus is on developments in France, England, and Italy. Language requirement depends on area of specialization.

**HIST 2450. Exchange Scholar Program.****HIST 2890. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**HIST 2910. Reading and Research.**

Section numbers vary by instructor. Please see check Banner for the correct section number and CRN to use when registering for this course.

**HIST 2930. Colloquium.**

"The Theory and Practice of History" encourages critical thinking about some of the different ways in which historians approach thinking and writing about the past. In particular, we will explore some of the major theoretical stances that have influenced the discipline of history. Our focus throughout will be the interplay between theory and practice. By examining how historians have grappled with questions posed by influential thinkers (often working within other fields of knowledge), we will chart the trajectory of the discipline and assess its working methods. Required for all incoming PhD students in History.

**HIST 2935. Historical Crossings.**

"Historical crossings" is a rough translation of *histoire croisée*, referring to global configurations of events and a shared history, rather than to a traditional comparative history. This Seminar is designed to be the cornerstone of the M.A. program. It will not serve as a traditional historical methods course but instead focus on training students to read and think on various scales of historical analysis—from cross-cultural and trans-geographic to the granularity of social and cultural specificity, requiring students to think both globally and locally and introducing them to an advanced level of historical inquiry, debate, and exploration.

**HIST 2940. Writing Workshop.**

Required of all 3rd semester Ph.D. students.

**HIST 2950. Professionalization Seminar.**

Required of all second year Ph.D. students.

**HIST 2960. Prospectus Development Seminar.**

This collaborative seminar focuses on identifying and contextualizing a dissertation topic; choosing a dissertation committee and a support network; designing and executing plans for research and writing; and articulating a thesis project as a prospectus, grant proposal, and other oral and written forms. This is a required course for and open only to third-year students in the History Ph.D. program.

**HIST 2970A. New Perspectives on Medieval History.**

Over the past several decades, the field of medieval history has been reshaped radically. New approaches have changed the ways that medievalists think about old subjects. Our understanding of medieval society itself has expanded as previously marginal or unexplored subjects have become central to medievalists' concern. This seminar explores how the ways in which medieval historians practice their craft have altered in response to these developments. Readings in classic older works are juxtaposed with newer ones on their way to becoming classics themselves.

**HIST 2970B. Race, Ethnicity and Identity in the Atlantic World.**

Explores question of identity in Atlantic world from sixteenth to nineteenth century, focusing on three types of identity: 1) ethnicity; 2) race; 3) nationality. How are such identities created and maintained? Are they "natural" or "artificial"? How do they change over time, and why? Throughout the seminar, we'll consider both internal/external boundaries, how social actors - particularly subalterns - see themselves and how they are imagined by outsiders. Finally, we will examine how identity is expressed in a wide variety of media - codices, paintings, maps, oral histories, diaries, etc. - and how scholars make use of such sources.

**HIST 2970C. Rethinking the Civil Rights Movement.**

This graduate course encourages a rethinking of the complex components, arguments and activities that have characterized what we have come to know as the Civil Rights Movement, concentrating primarily on African American agency, actions and politics, through careful reading of recent scholarship in the field. While knowledge of U.S. history is preferred, this course asks larger thematic questions about protest movements (the role of the state, relationships with and between oppressed groups and organizations, and periodization), that will interest non-Americanists also. Some of the topics covered include: gender, organizing and strategies, the local, global ramifications and interactions, organizational structures and politics, and the recent concept of the Long Civil Rights Movement. *M*

**HIST 2970D. Modernity and Everyday Culture - Reading.**

No description available.

**HIST 2970E. Early Modern Continental Europe - Reading.**

This course is designed to introduce graduate students to some major topics and debates in early modern European history, as well as a range of geographical, methodological, and historiographical perspectives. Readings combine recent works and classics to give a sense both of where the field has been and where it is going. Topics covered include political history, religious interactions (among Christians and between Christians, Jews and Muslims), urban history, the history of the book, Atlantic history, the history of science, and the Enlightenment. The class also provides the opportunity to explore a single topic of choice in greater depth.

**HIST 2970F. Problems in Modern Jewish History - Reading.**

This course examines significant issues in the history and historiography of modern European Jewry from the mid-18th century to WWII. It is divided into four units each of which considers a thematic question that has been of interest to European Jewish historians, including: emancipation, integration, and acculturation; gender and the study of modern Jewish history; approaches to minority identity; and history and memory. Written permission required.

**HIST 2970G. Early Modern European Empires.**

This course addresses both the history and historiography of the most relevant European imperial experiences in Africa, Asia and America c. 1400-1800. It will focus on the structure and dynamics of the Iberian case(s), as well as in the profile of the so-called Second European expansion led by the Dutch, the English and a number of other (minor) European examples. Particular emphasis will be given to the relations between these imperial bodies and other (non-European) Empires, by focusing on cross-cultural contacts and conflicts, hybrid societies and images. Restricted to juniors, seniors, and graduate students only. *P*

**HIST 2970H. Special Topics Seminar: American Political History.**

This graduate seminar will explore a range of approaches to the study of America's political past from the colonial period to the late twentieth century, including scholarship on electoral politics, the state, political culture, grassroots politics and resistance, the politics of gender and family, and American political development. We will analyze how scholars have defined and redefined the field over time and throughout we will interrogate the question, "what is political history?"

**HIST 2970I. Methodologies of the Ancient World.**

No description available. Open to graduate students only.

**HIST 2970J. Early Modern British History-Reading.**

No description available.

**HIST 2970L. Race and U.S. Empire.**

No description available.

**HIST 2970O. Modern Latin American History - Reading.**

No description available.

**HIST 2970P. Nineteenth and Twentieth Century American History - Reading.**

No description available.

**HIST 2970Q. Core Readings in 20th Century United States History.**

Major topics and themes in 20th-century U.S. history. *M*

**HIST 2970R. U.S. Social/Cultural History, 1877-present - Reading.**

Case studies of prominent public intellectuals spanning the century from John Reed to George Will, Mary McCarthy to Frances Fitzgerald.

**HIST 2970S. Western and Frontier History - Reading.**

An introduction to recent work on the history of North American frontiers and the region of the American West.

**HIST 2970U. Topics in Nineteenth and Twentieth Century American History.**

*M*

**HIST 2970V. Atlantic Empires.**

No description available.

**HIST 2970W. Graduate Readings in Early American History.**

No description available.

**HIST 2970X. Topics in the History of Empire and Culture.**

No description available.

**HIST 2970Y. History and Theory of Secularity.**

No description available.

**HIST 2970Z. Core Readings in Nineteenth Century Europe.**

Provides an introduction to the central issues of nineteenth-century European history. It has two purposes: first, to help you refine your abilities to think historiographically; second, to assist you in preparing for your comprehensive exams. To that end, we will read both standard interpretations and newer scholarship.

**HIST 2971A. Science in a Colonial Context.**

This graduate seminar will consider the politics of science in colonies societies. Subjects covered include: the relationship between science and local (indigenous) knowledges, science and the "civilizing" mission, social relations in knowledge production, science and development, racial science and subject bodies, science and nationalism. Assignments will include book review, a review essay and leading discussion.

**HIST 2971B. Topics in Twentieth Century Europe.**

This course will introduce graduate students to current scholarship on major issues in twentieth century European history. Topics will include (but are not limited to) the causes and consequences of the two world wars; the emergence, workings, and collapse of authoritarian societies; the spread of mass culture and consumerism; Americanization; decolonization; the European Union, and the collapse of the bi-polar political system. In the interest of introducing students to the significant historiographical debates of the field, they will read both standard historical interpretations and newer scholarship. *M*

**HIST 2971C. Readings in American History.**

Topics in American social and cultural history in the nineteenth and twentieth centuries.

**HIST 2971D. Passion, Dispassion, and the Scholar.**

What role should passion and the imagination play in intellectual endeavor? Is the dispassionate, objective, and objectifying voice the only appropriate one in the arena of scholarship? How much can or should the scholar let his or her personality and personal investment in a subject appear on the page? The seminar will explore these and related questions by examining non-traditional modes of scholarly writing (primarily but not exclusively drawing on historians and anthropologists). This is not a seminar about theory and method, although such issues will inevitably be part of our discussions. It is a seminar about writing and scholarly voice. *P*

**HIST 2971E. Latin American Historiography.**

This course examines the development of historical writings on Latin America produced in the United States from the late nineteenth century until the present. We will focus on themes, such as race, gender, labor, subaltern studies, dependency theory, postcolonial analysis, and post-modernism, to understand the diverse approaches to Latin American history. *M*

**HIST 2971F. Gender & Knowledge in Early Modern Europe.****HIST 2971G. Notions of Public & Private in Late Modern Europe.****HIST 2971H. Politics and Society in the 20th Century.****HIST 2971I. New Perspectives on Medieval History.**

Over the past several decades, the field of medieval history has been reshaped radically. New approaches have changed the ways in which medievalists think about old subjects. Our understanding of medieval society itself has expanded as previously marginalized or unexplored subjects have become central to medievalists' concerns. This seminar explores the ways in which medievalist historians have altered how they practice their craft in response to these developments. Readings in classic older works are juxtaposed with newer ones on the way to becoming classics themselves.

**HIST 2971J. Topics in 19th c. U.S. History.**

This state-of-the-field course will introduce students to nineteenth-century U.S. history, with specific attention to how recent transnational, imperial, institutional, and cultural approaches have reframed older debates over the "Age of Jackson," "Manifest Destiny," and the "Market Revolution." This seminar offers core readings for students preparing a comprehensive exam field, while providing others with content knowledge to teach this period of American history.

**HIST 2971L. Borderlands: Violence and Coexistence.**

Readings of theoretical and empirical studies in interstate and inter-ethnic relations in borderland regions throughout the world, with an emphasis on the modern period in East-Central. Open to graduate students only.

**HIST 2971M. History of Medicine.**

The history of medicine is a topic that can shed light on any period and place, since all aspects of human life are intertwined parts of the story: ideas, religion, culture, material life, economy, politics, social organization and legal institutions, etc. This reading course is meant to introduce graduate students to the main subjects debated in the field, so that by the end of the semester you will be able to read in the literature and to take up any related archival trail with confidence. Open to graduate students only. *E*

**HIST 2971N. Critical Perspectives on Public and Private.**

No description available. Open to graduate students only.

**HIST 2971O. Graduate Preliminary Readings.**

No description available.

**HIST 2971P. Diasporas and Transnationalism.**

This reading seminar is designed to familiarize students with the most cited and current theories on diaspora and transnationalism, to examine a few exemplary case studies from around the world, and to allow students to develop and discuss their individual interests and reading lists around these broad themes and concepts, towards a prelim field or dissertation prospectus.

**HIST 2971R. Approaches to Middle East History.**

This course is a rare opportunity that brings together graduate students from Harvard University and Brown University who are interested in the historiography of Middle East, Ottoman, and Islamic studies. Co-taught by Cemal Kafadar (Harvard) and Beshara Doumani (Brown), the meetings will alternate between Cambridge and Providence. The course covers the early modern and modern periods and considers a wide range of canonical and recent scholarship. Special attention will be paid to social and cultural histories that draw on materialist and discursive approaches and that engage larger debates in other disciplines.

**HIST 2971T. Colonial Latin America.**

This seminar focuses on the historiography of colonial Latin America since the 1960s. We will examine how this historiography has been influenced by broader trends in the discipline, such as the "cultural turn," and by internal developments, notably the increasing emphasis on native-language sources. We will pay particular attention to more recent interpretations of both traditional subjects (conquest, evangelization, the frontier) and emerging approaches (environmental history, ethnogenesis). Requirements include short essays and a literature review.

**HIST 2980B. Legal History.**

An introduction for graduate students to the significance and methods of legal history, broadly defined. Students will engage with works in legal history from a variety of time periods and geographical areas, and they will be guided to sources related to their specific research interests. A major research essay will be required that draws from the models of legal history given and is based on original research into legal sources. *E*

**HIST 2980C. Race, Ethnicity and Identity in Atlantic World.**

This seminar examines the meaning of racial and ethnic identity in colonial Latin America. Our primary approach will be historiographical; we will begin with colonial concepts of racial hierarchy, then move on to national ideologies of *mestizaje* and *indigenismo*, the emergence of "race mixture" as a scholarly topic, the "caste vs. class" debate of the 1970s and 1980s, and finally recent works on the African diaspora.

**HIST 2980D. Topics in Violence in Modern Europe: Interethnic Relations and Violence in Eastern Europe.**

This seminar will examine recent studies on interethnic coexistence, violence, and genocide in East-Central and Eastern Europe in the 20th century. Readings will range from works on definitions of ethnicity and the making of nations to studies of communities and interpersonal relations. We will also read and listen to testimonies and analyze contemporary documents.

**HIST 2980E. Social History in Early Modern England - Research.**

Readings on select topics in early modern English social history. Topics include: marriage formation, crime, social unrest, gender issues, and popular culture. Open to graduate students and advanced undergraduates.

**HIST 2980F. Modern British History - Research.**

No description available.

**HIST 2980G. Topics in Violence in Modern Europe - Research.**

No description available.

**HIST 2980H. Early American History - Research.**

Research seminar.

**HIST 2980I. Problems in American Social History - Research.**

An advanced examination of the issues and methodology of American urban and social history plus primary research in specific topics.

**HIST 2980J. U.S. Women's/Gender History - Research.**

Focus is 20th-century history. Open only to graduate students.

**HIST 2980K. Passion, Dispassion, and the Scholar.**

What role should passion play in intellectual endeavor? Should the scholar's personal involvement in a subject appear on the page? What is the value of the dispassionate voice as opposed to a narrative voice of immediacy? The seminar explores such issues in modes of scholarly writing (primarily but not exclusively historical and anthropological). Although questions of theory and method inevitably arise, this is a seminar about scholarly voice.

**HIST 2980L. Research and Pedagogy.**

This research seminar is geared to help graduate students think about the ways in which they can incorporate their own research into the courses they will teach. The final product for the seminar is a primary source unit and an accompanying essay that can conceivably serve as a "teacher's guide." All fields and periods welcome. *E*

**HIST 2980M. Nature, Space and Power: Environmental History.**

No description available.

**HIST 2980N. Gender and Knowledge.**

No description available.

**HIST 2980P. Theory of Everyday Life.**

What do we mean by the "everyday" and how can we study it in the social sciences and represent it in the arts? We will focus on attempts to answer this question both on the theoretical and the empirical levels. Readings will include philosophers of everyday life and examples of recent scholarship in "everyday life studies" that have revolutionized the study of leisure, entertainment, national identity, decolonization and gender.

**HIST 2980Q. Seminar in Early Modern British History.**

No description available.

**HIST 2980R. Cultures of Empire.**

The goal of this course is to research and produce a piece of original historical scholarship, drawing on methodologies developed during the cultural turn in the study of empires. Early semester readings address approaches to studying empire (Marxian, Subaltern Studies, Cultural Studies, etc.) and various locations: British India, Japanese Manchuria, and Netherlands Indies, among others. The course then evolves into a history writing workshop for the rest of the semester, paying attention also to historical writing, including style, form, and narrative strategies. Relevant to historical inquiry into cross-cultural encounters in any time period.

**HIST 2980S. Hannah Arendt and Her World.**

This seminar will explore key concerns and paradigms in 20th-century intellectual history via a critical consideration of the thinking of Hannah Arendt (1906-75). In recent years, Arendt's work has earned renewed attention for its multidisciplinary, multicontinental importance as well as for its uncanny currency to the present political and academic moment. Her thinking is thus in many ways "migratory thinking." Migratory thinking involves first the diaspora and exchange of thinkers, most specifically through political exile and emigration during the Nazi period and after. It thus involves both the experience and theorization of "worldliness": the Enlightenment value that remains a key principle for Arendt, with special reference to Lessing. Migratory thinking also involves discursive movement among disciplines and cultures, for example from German philosophy to American political theory/science, and the complications of intellectual and cultural subjectivity of émigré as well as German Jewish thinking. Finally, the history and historical contingency that support this style of thinking emphasize the drive to thinking, responsibility, and judgment at a moment of danger. Readings and seminar discussions will focus on Arendt's work, read in dialogue with the work of thinkers with whom she was in dialogue (Benjamin, Broch, Heidegger, Scholem) and with the later work of thinkers whose own subject positions might be considered comparable with the concerns in the paragraph above (G. Rose, S. Neiman, S. Aschheim, J. Derrida et al.). Themes will include cosmopolitanism, nationalism, and totalitarianism, the global politics of race, capitalism, and exchange, religious/secular tensions, and the relations of society and politics to art and the imagination.

**HIST 2980T. Minorities, Citizenship and Nation.**

No description available.

**HIST 2980U. Power, Culture, Knowledge.**

"Truth isn't outside power, or lacking in power... [t]ruth is a thing of this world," wrote Michel Foucault in the mid 1970s. In this course we will read and examine Foucault's seminal works on knowledge and power, and the kinds of scholarship it has engendered at the intersections of history, art history, anthropology, political science and social theory. In addition to Foucault's major interlocutor, Edward Said, we will read Antonio Gramsci, Derrida and Walter Benjamin. We will end the semester with facing the challenge of historicizing our own political present through a number of contemporary thinkers. *M*

**HIST 2980V. Early Modern Empires.**

This seminar will explore various approaches to understanding the rise, expansion, and contraction of empires in the early modern period (ca. 1500-1800). Students will be required to write a major research essay based on primary sources.

**HIST 2980W. First Person History in Times of Crisis: Witnessing, Memory, Fiction.**

This seminar examines the relationship between History as a narrative of events and history as individual experience. Postulating that historical events as related by historians were experienced in numerous different ways by their protagonists, the seminar focuses on the complementary and contradictory aspects of this often fraught relationship at times of crisis, especially in war and genocide. While much time will be spent on World War II and the Holocaust, the seminar will engage with other modern wars and genocides across the world. Materials will include eyewitness reports, postwar testimonies and trial records, memoirs and relevant works of fiction. Open to graduate students only. *M*

**HIST 2981C. The Frontiers of Empire.**

This class will look at interactions along and across imperial frontier zones throughout the world, with an emphasis on the pre-modern and early modern period. Readings will be both theoretical and empirical in nature, and will focus on themes including the conceptualization of space; practices and consequences of warfare, captive-taking, and slavery; identity- and secondary state-formation; economy and society; diplomacy and the negotiation of claims to authority.

**HIST 2981E. Environmental History.**

A topical seminar with global and chronologically broad scope, "Environmental History" surveys classic works and recent writing on explicitly environmental themes such as agriculture, conservation, energy, and anthropogenic change. Equally, it considers environmental treatments of major topics in other sub-fields such as war, science, imperialism, the body and senses, and animals. In examining this broad range of topics, we will seek what is distinctive about environmental history and how environmental considerations can enhance the students' own research.

**HIST 2981F. The Politics of Knowledge.**

The seminar offers an introduction to fundamental theoretical texts and exemplary works in the interdisciplinary field of Science and Technology Studies. Readings will be drawn from a range of time periods and geographical areas, and students will be asked to deploy the theoretical insights of our readings in working with sources in their own fields for a final research paper. Topics include: the gendered dimensions of knowledge, the moral economy of science, claims to expertise, and the stakes of "objectivity."

**HIST 2981I. Theory From The South.**

The "global south" is a working category today for a diversity of intellectual projects centered on the non-European postcolonial world. While this category is embedded in histories of empire and culture, critical thinking since the 1970s has already done much to "provincialize Europe" and interrogate the ways in which power and knowledge have been imbricated in the making of universal claims, institutional processes and historical self-understanding. This graduate seminar will draw upon lineages of anti-colonial thought and postcolonial critique to relocate and rethink the "south" as a generative source for theory and history.

**HIST 2981J. The Body.**

This seminar will consider theories of the body as a site of knowledge, politics, culture, gender, and identification in a broad range of temporal and geographic contexts. We will also examine how historians have written the history of the body, and what sources they have used to do so.

**HIST 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**HIST 2993. Gender Matters (ITAL 2550).**

Interested students must register for ITAL 2550.

**HIST 2994. Roman Epigraphy (LATN 2120A).**

Interested students must register for LATN 2120A.

**HIST 2996. Premodern Art-Science, or the Work of Knowing in Europe before 1800 (HMAN 2400X).**

Interested students must register for HMAN 2400X.

# History of Art and Architecture

## Chair

Evelyn Lincoln

Work in the department of the History of Art and Architecture at Brown is conceived as an interdisciplinary undertaking, in which students are encouraged to become familiar with the variety of methodologies and practices that have historically been, and continue to be productive in our fields. We also maintain a longstanding commitment to museum studies and the study of objects through a close working relationship with the Museum of the Rhode Island School of Design. Interested students in this department have the opportunity to hold internships and (in the case of graduate students) proctorships at the museum.

For additional information, please visit the department's website: <http://www.brown.edu/academics/art-history/>

## Architecture Concentration Requirements

The Architecture concentration allows students to develop a broad understanding of the concepts and methods for the planning and design of buildings, landscapes, and cities. The concentration was planned with the explicit goal of connecting architectural training firmly with the humanities and providing a greater awareness of global, environmental, social and economic issues in the built environment. This approach to the education of architects and urban planners is meant to provide them with the tools needed in today's urban global society. Students who complete a specific track within the concentration will have the option of transitioning into a 2-year Masters of Architecture program at the Rhode Island School of Design or several other architecture schools.

### Concentration Requirements

Two RISD double-credit Design Studios: Students will take the courses at the Rhode Island School of Design but will register at Brown. 4

HIAA 0001	Architectural Design
HIAA 0002	Advanced Design Studio

Six Core Requirements: 6

Select Four (4) courses from RISD: Students will take the courses at the Rhode Island School of Design but will register at Brown

HIAA 0003	Architectural Projection (alternative IntAR Intro to Drawing)
HIAA 0004	Architectural Analysis
HIAA 0005	Structural Analysis
HIAA 0006	Wood Structures
HIAA 0007	Environmental Design II

Select Two (2) Courses from Brown:

HIAA 0010	A Global History of Art and Architecture
HIAA 0042	Islamic Art and Architecture
HIAA 0081	Architecture of the House Through Space and Time
HIAA 0770	Architecture and Urbanism of Africa
HIAA 0850	Modern Architecture
or HIAA 0860	Contemporary Architecture
HIAA 0860	Contemporary Architecture
HIAA 1181	Prefabrication and Architecture

Six Additional Electives: 6

#### Two courses from History and Theory:

HIAA 0070	Introduction to American Art: The 19th Century
HIAA 0081	Architecture of the House Through Space and Time
HIAA 0560	Constructing the Eternal City: Popes and Pilgrims in Early Modern Rome

HIAA 0770	Architecture and Urbanism of Africa
HIAA 0860	Contemporary Architecture
HIAA 1181	Prefabrication and Architecture
HIAA 1440B	Architecture of Solitude: The Medieval Monastery
HIAA 1910A	Providence Architecture
HIAA 1910D	Water and Architecture
<b>Two Classes from Engineering and Design:</b>	
ENGN 0030	Introduction to Engineering
ENGN 0040	Dynamics and Vibrations
ENGN 0310	Mechanics of Solids and Structures
ENGN 0930A	Appropriate Technology
ENGN 0930C	DesignStudio
ENGN 1000	Projects in Engineering Design I
ENGN 1300	Structural Analysis
ENGN 1380	Design of Civil Engineering Structures
ENGN 1930U	Renewable Energy Technologies
<b>Four Additional Electives from the following:</b>	
ARCH 1900	The Archaeology of College Hill
COLT 1810H	Tales of Two Cities: Havana - Miami, San Juan - New York
ENGL 1760K	Reading New York
ENVS 0110	Humans, Nature, and the Environment: Addressing Environmental Change in the 21st Century
ENVS 0410	Environmental Stewardship
IAPA 1803E	Social Entrepreneurship
JAPN 0910B	Japanese Cities: Tokyo and Kyoto
LACA 1510I	Urban Latin America
POLS 0220	City Politics
POLS 1730	Politics of Globalization
SOC 1340	Principles and Methods of Geographic Information Systems
TAPS 0260	Stage Lighting
TAPS 1240	Performance Historiography and Theatre History
TAPS 1280F	Introduction to Set Design
TAPS 1300	Advanced Set Design
URBN 0210	The City: An Introduction to Urban Studies
URBN 1000	Fieldwork in the Urban Community
URBN 1870C	The Environment Built: Urban Environmental History and Urban Environmentalism for the 21st Century
VISA 0100	Studio Foundation
VISA 1210K	Digital Printmaking
VISA 1420	Sculpture II: Conceptual Propositions

Total Credits 16

## Honors

For students in the concentration who intend to go to architecture school afterwards, typically their design project in their double credit second RISD studio will be ideal for a capstone or honors project. For others, who might tend towards theory or history of architecture, an honors thesis is still a valid option.

## History of Art and Architecture Concentration Requirements

The concentration in History of Art and Architecture introduces students to the history of art, architecture, and visual culture. Students in HIAA explore Western and non-Western areas ranging over a wide period of time (Ancient, Medieval, Islamic, East Asian, Latin American, Early Modern,

Modern/ Contemporary). Concentrators often focus on a particular period (e.g. ancient, modern architecture), a particular branch of the field (e.g. urbanism), or a methodology (e.g. semiotics, critical interpretation, archaeology), but students may choose to create their own program of study. Concentrators will receive essential training in perceptual, historical, and critical analysis.

## History of Art and Architecture Requirements

To complete the concentration, you will be expected to take a minimum of ten courses (11 for honors). Our goal in setting out these requirements is to welcome students into a lively and diverse department that also shares a cohesive and strong commitment to the field. We as a faculty want students to cultivate their special interests and also to venture into areas that may not be so familiar but that will open new and exciting possibilities for them. Ten courses are only the minimum requirement. Beyond that students are encouraged to take courses at RISD, participate in study abroad programs, and take courses in other Brown departments. As we are a truly interdisciplinary department, you will also find that our faculty collaborates with members of other departments to teach courses that bring together the strengths of different disciplines. We encourage both experimentation and concentration. Because foreign language skills are essential for pursuing art historical studies in a professional environment or in graduate school, HIAA requires knowledge equivalent to passing a 500-level language course at Brown.

Our general survey in history of art and architecture (HIAA 0010 (<https://bulletin.brown.edu/search/?P=HIAA%200010>)) is an excellent foundation for the concentration. It is not a prerequisite for taking other lecture courses but you can count it as one of the 4 non-core courses required for the concentration (see below for core and non-core courses).

Since the history of art and architecture addresses issues of practice within specific historical contexts, concentrators are encouraged to take at least 1 studio art course. Courses in history also train students in methods and approaches that are highly relevant to the history of art and architecture. Study abroad can be a valuable enrichment of the academic work available on campus, in that it offers opportunities for first-hand knowledge of works of art and monuments as well as providing exposure to foreign languages and cultures. Study abroad should be planned in consultation with the concentration advisor in order to make sure that foreign course work will relate meaningfully to the concentrators program of study.

Four core general lecture courses, numbered HIAA 0020 - HIAA 0940. The courses should be distributed between three of the seven available areas of the discipline: Ancient; Medieval; Islamic; East Asian; Latin American; Early Modern (ca. 1400-1800); Modern, Contemporary

HIAA 0010	A Global History of Art and Architecture
HIAA 0011	Introduction to the History of Architecture and Urbanism
HIAA 0013	Introduction to Indian Art
HIAA 0022	The Art of Enlightenment
HIAA 0031	Pre-Islamic Empires of Iran
HIAA 0040	Introduction to Medieval Art and Architecture
HIAA 0041	The Architectures of Islam
HIAA 0042	Islamic Art and Architecture
HIAA 0061	Baroque
HIAA 0062	Dutch and Flemish Art: Visual Culture of the Netherlands in the Seventeenth Century
HIAA 0070	Introduction to American Art: The 19th Century
HIAA 0075	Introduction to the History of Art: Modern Photography
HIAA 0077	Revolutions, Illusions, Impressions: A History of Nineteenth-Century Art
HIAA 0081	Architecture of the House Through Space and Time

HIAA 0820	Art and Technology from Futurism to Hacktivism	
HIAA 0089	Contemporary Photography	
HIAA 0321	Toward a Global Late Antiquity:200-800 CE	
HIAA 0340	Roman Art and Architecture: From Julius Caesar to Hadrian	
HIAA 0400	Early Christian, Jewish, and Byzantine Art and Architecture	
HIAA 0440	Gothic Art and Architecture	
HIAA 0460	Muslims, Jews and Christians in Medieval Iberia	
HIAA 0550	Gold, Wool and Stone: Painters and Bankers in Renaissance Tuscany	
HIAA 0560	Constructing the Eternal City: Popes and Pilgrims in Early Modern Rome	
HIAA 0570	The Renaissance Embodied	
HIAA 0580	Word, Image and Power in Renaissance Italy	
HIAA 0600	From Van Eyck to Bruegel	
HIAA 0630	Cultural History of the Netherlands in a Golden Age and a Global Age	
HIAA 0660	Giotto to Watteau: Introduction to the Art of Europe from Renaissance to French Revolution	
HIAA 0710	The Other History of Modern Architecture	
HIAA 0770	Architecture and Urbanism of Africa	
HIAA 0771	African American and Caribbean Architectures: Domestic Space	
HIAA 0801	Art After '68	
HIAA 0810	20th Century Sculpture	
HIAA 0830	Revolutionary Forms: 100 Years of Art and Politics in Latin America	
HIAA 0840	History of Rhode Island Architecture	
HIAA 0850	Modern Architecture	
HIAA 0860	Contemporary Architecture	
HIAA 0861	City and Cinema	
HIAA 0870	20th Century British Art: Edwardian to Contemporary	
Two core seminar courses, numbered between HIAA 1020 and HIAA 1930		2
HIAA 1020	Topics in East Asian Art	
HIAA 1090	Writing About the Arts	
HIAA 1101A	Illustrating Knowledge	
HIAA 1101B	Seeing and Writing on Contemporary Arts	
HIAA 1120B	History of Urbanism, 1300-1700	
HIAA 1120C	History of Western European Urbanism 1200-1600	
HIAA 1105	Otherworldly and Other Worlds: Representing the Unseen in Early Modern Europe	
HIAA 1170B	Twentieth-Century American Painting	
HIAA 1181	Prefabrication and Architecture	
HIAA 1182	Spaces and Institutions of Modernity	
HIAA 1200A	Ancient Art in the RISD Collection	
HIAA 1200D	Pompeii	
HIAA 1201	Brushwork: Chinese Painting in Time	
HIAA 1300	Topics in Classical Art and Architecture	
HIAA 1301	The Palaces of Ancient Rome	
HIAA 1302	Women and Families in the Ancient Mediterranean	

HIAA 1303	Pompeii: Art, Architecture, and Archaeology in the Lost City
HIAA 1304	Spectacle! Games, Gladiators, Performance, and Ceremony in the Roman World
HIAA 1310	Topics in Hellenistic Art
HIAA 1400F	Research Seminar Gothic Art
HIAA 1410A	Topics in Islamic Art: Islamic Art and Architecture on the Indian Subcontinent
HIAA 1410B	Painting in Mughal India 1550-1650
HIAA 1430A	The Visual Culture of Medieval Women
HIAA 1440D	The Gothic Cathedral
HIAA 1440F	Architectural Reuse: The Appropriation of the Past
HIAA 1440B	Architecture of Solitude: The Medieval Monastery
HIAA 1460	Topics in Medieval Archaeology
HIAA 1550B	Topics in the Early History of Printmaking: Festival and Carnival
HIAA 1550A	Prints and Everyday Life in Early Modern Europe
HIAA 1560A	Italy and the Mediterranean
HIAA 1560B	Mannerism
HIAA 1560C	Renaissance Venice and the Veneto
HIAA 1560D	Siena from Simone Martini to Beccafumi
HIAA 1560E	The Arts of Renaissance Courts
HIAA 1560F	Topics in Italian Visual Culture: The Visible City, 1400- 1800
HIAA 1600A	Bosch and Bruegel: Art Turns the World Upside Down
HIAA 1600B	Caravaggio
HIAA 1600C	Italian Baroque Painting and Sculpture
HIAA 1600D	The Art of Peter Paul Rubens
HIAA 1600E	The World Turned Upside Down
HIAA 1600F	Antwerp: Art and Urban History
HIAA 1600G	Art + Religion in Early Modern Europe
HIAA 1600H	Comedy in Netherlandish Art From Hieronymus Bosch to Jan Steen
HIAA 1600I	Collections and Visual Knowledge in Early Modern Europe: 1400-1800
HIAA 1600J	Rembrandt
HIAA 1650A	About Face: English Portraiture: 1600-1800
HIAA 1650B	Visualizing Revolutionary Bodies 1785-1815
HIAA 1650C	Visual Culture and the Production of Identity in the Atlantic World, 1700-1815
HIAA 1650D	Souvenirs: Remembering the Pleasures and Perils of the Grand Tour
HIAA 1711	Black and White: Imagining Africans and African Americans in Visual Culture
HIAA 1770	Architecture and Visual Culture of Empire
HIAA 1811	Possible Futures: Art and the Social Network before the Internet (1950-1979)
HIAA 1850A	Frank Lloyd Wright
HIAA 1850D	Film Architecture
HIAA 1850E	Architecture, Light and Urban Screens
HIAA 1850G	Contemporary American Urbanism: City Design and Planning, 1945-2000
HIAA 1850H	Berlin: Architecture, Politics and Memory
HIAA 1870	Cannibalism, Inversion, and Hybridity: Creative Disobedience in the Americas

HIAA 1890E	SoCal: Art in Los Angeles, 1945-Present
HIAA 1890G	Contemporary Art of Africa and the Diaspora
HIAA 1910A	Providence Architecture
HIAA 1910B	Project Seminar: The Architecture of Bridges
HIAA 1910D	Water and Architecture
HIAA 1910E	Project Seminar for Architectural Studies Concentrators
HIAA 1910F	City Senses: Urbanism Beyond Visual Spectacle
HIAA 1920	Individual Study Project in the History of Art and Architecture
HIAA 1930	The History and Methods of Art Historical Interpretation
HIAA 1990	Honors Thesis
Four elective courses. These can include courses taught in the department, cross-listed courses from other departments, or courses in other departments approved by the concentration advisor. HIAA 0010 may count as one of these courses but cannot count as one of the four core lecture courses. Students are encouraged to take a studio class as part of this requirement.	

Total Credits 10

- The six core lecture and seminar courses must be taken in the History of Art and Architecture department and cannot be replaced with independent study, honors thesis or classes taken in other departments, universities, or high schools.
- A maximum of two (2) credits may be allowed for courses taken at other universities (transfer credits or from study abroad) or courses that also count toward a second concentration. No concentration credit will be granted for AP/A-level scores, or for language classes.

## Architectural Studies Track

The **Optional** Architectural Studies track within the History of Art and Architecture concentration blends a variety of disciplines toward the study of buildings and the built environment. The concentration prepares students for the continued study of architecture and the history of architecture in graduate school as well as careers in related areas such as urban studies.

Because the architectural studies program was especially designed for students wishing to gain greater experience in the practical skills necessary for a career in architecture or a related field, concentrators are required to take a course in design from the Visual Arts Department, the Rhode Island School of Design or an introduction to architectural design, theatre set design at Brown University.

Four lecture courses. These courses will be numbered between HIAA 0020 and HIAA 0940 and will be marked with an "A" in the course description. The courses must be distributed over three of seven areas in architectural history: Ancient; Medieval; Islamic; East Asian; Latin American; Early Modern (ca. 1400-1800); Modern/Contemporary.

HIAA 0040	Introduction to Medieval Art and Architecture
HIAA 0042	Islamic Art and Architecture
HIAA 0031	Pre-Islamic Empires of Iran
HIAA 0041	The Architectures of Islam
HIAA 0061	Baroque
HIAA 0062	Dutch and Flemish Art: Visual Culture of the Netherlands in the Seventeenth Century
HIAA 0070	Introduction to American Art: The 19th Century
HIAA 0075	Introduction to the History of Art: Modern Photography

HIAA 0081	Architecture of the House Through Space and Time	HIAA 1410A	Topics in Islamic Art: Islamic Art and Architecture on the Indian Subcontinent
HIAA 0089	Contemporary Photography	HIAA 1430A	The Visual Culture of Medieval Women
HIAA 0321	Toward a Global Late Antiquity:200-800 CE	HIAA 1440B	Architecture of Solitude: The Medieval Monastery
HIAA 0340	Roman Art and Architecture: From Julius Caesar to Hadrian	HIAA 1440D	The Gothic Cathedral
HIAA 0400	Early Christian, Jewish, and Byzantine Art and Architecture	HIAA 1460	Topics in Medieval Archaeology
HIAA 0440	Gothic Art and Architecture	HIAA 1550A	Prints and Everyday Life in Early Modern Europe
HIAA 0460	Muslims, Jews and Christians in Medieval Iberia	HIAA 1550B	Topics in the Early History of Printmaking: Festival and Carnival
HIAA 0550	Gold, Wool and Stone: Painters and Bankers in Renaissance Tuscany	HIAA 1560A	Italy and the Mediterranean

- <sup>5</sup> A maximum of two credits may be awarded for courses taken at other universities or for courses that count toward a second concentration. No concentration credit is awarded for high school AP/A-level courses or for language courses.

The below pertains to **ALL concentrators** in the department:

## Self Assessment

All concentrators are required to write an essay when they file for the concentration that lays out what they expect to gain from the course of study they propose. All second semester seniors will be required to write a final essay that takes measure of what they have learned from the concentration, including their capstone and other experiences relating to their study of the history of art and architecture. For students doing a capstone, their capstone director will read this essay. A department subcommittee will read essays written by students not electing to do a capstone. The self-assessment should be turned in with a revised list of courses actually taken and the final paperwork for concentration approval.

### Capstone Project

At the beginning of your senior year you will be actively encouraged to propose and undertake a Capstone Project. The Capstone Project is intended to challenge you with an opportunity to synthesize at a high level of achievement the knowledge and understanding you have gained by concentrating in the History of Art and Architecture or Architectural Studies. To propose and work on a Capstone Project you will need the support of a faculty sponsor. Capstone Projects embrace many possibilities. You can perfect a seminar paper in which you have developed a strong interest. You can participate in a graduate seminar to which the instructor has admitted you. You can serve as an undergraduate TA. You can work as an intern in museums and auction houses such as Christie's. You might work on an archaeological excavation. You can participate in the Honors Program. Beyond these opportunities, the Department is open to other approaches. You should work with a faculty sponsor and with the Undergraduate Concentration Advisor to decide what will work best for you.

## Honors

The Honors program in History of Art & Architecture and Architectural Studies will be administered as follows: accepted students will sign up for HIAA 1990 in the Fall and in the Spring. In the Fall, students will meet regularly with the whole Honors group and HIAA faculty to discuss methodology and general research and writing questions. In the Spring, students will continue to meet to present their research in progress to each other for comment and feedback. They will also be meeting regularly with their advisors and second readers throughout the year. Finished drafts of the thesis (which will generally be no more than 30-35 pages in length (exceptions to be determined in consultation with the instructor), not counting bibliography and visual materials) will be due to the advisor and second reader on April 1 of the Spring semester. Comments will be returned to the students for final corrections at that point. There will be a public presentation of the Honors work at the end of the Spring semester.

Students wishing to write an honors thesis should have an 'A' average in the concentration. It is advisable for them to have taken at least one seminar in the department and written a research paper before choosing to undertake a thesis. While acceptance into the Honors program depends on the persuasiveness of the thesis topic as well as the number of students applying, students may refine their proposals by speaking in advance with potential advisors. No honors student may take more than four courses either semester of their senior year—with the honors seminar being considered one of the four courses. Students interested in honors who are expecting to graduate in the middle of the year should contact the concentration advisor no later than the beginning of their junior year.

### Honors Application Process

During the second semester of the junior year all concentrators will be invited to apply for admission to the Honors Program in History of Art and Architecture and Architectural Studies.

### Admission to the Honors Program

1. To be admitted to the Honors Program you should have produced consistently excellent work and maintained a high level of

achievement in all your concentration course. You should have earned an A grade in most of your concentration courses.

2. The key project for honors is to write an honors thesis. When you apply for admission you will be asked to submit a proposal of no more than two double-spaced pages that states the topic (subject and argument) of the research to be undertaken as clearly as possible, and add a one-page bibliography of the most relevant books and major articles to be consulted for the project. This three page application should be submitted, along with a resumé and a printout of the student's most recent available transcript and submitted to the Department with a short cover letter stating who you feel the most appropriate advisor and second readers are for the thesis and why, and what your preparation is for this project. Clarity and brevity are considered persuasive virtues in this process. Applicants will be notified about the success of their applications at the end of the semester.
3. For admission to the Honor Program you must include with your proposal a letter of support from a faculty member of the History of Art and Architecture Department who has agreed to serve as your thesis advisor. You should discuss the thesis topic with your advisor before you submit your proposal. During the process of researching and writing you will meet regularly with your advisor to discuss your work.

### Writing the Honors Thesis

1. If you are accepted into the Honors Program you will register for HIAA 1990 during the two semesters when you are working on a thesis. This is a seminar led by the Department Undergraduate Concentration Advisor in which all honors students meet once a month to present the current progress of their work. It is a valuable opportunity to share ideas and receive feedback from your fellow honors students and faculty alike. The honors seminar also offers a practical framework around which you can organize the progress of your work.
2. You will meet regularly with your thesis advisor and with a second reader to develop your ideas and writing.
3. Finished drafts of the thesis, which will generally be no more than 30-35 pages in length (exceptions to be determined in consultation with the instructor), not counting bibliography and visual materials, will be due to the advisor and second reader by April 1 of the Spring semester or by November 1 of the Fall semester if you plan on graduating in December. Comments will be returned to the students for final corrections at that point. There will be a public presentation of the Honors work at the end of the Spring semester.

## History of Art and Architecture Graduate Program

The department of History of Art and Architecture offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) degree.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/history-art-and-architecture>

## Courses

### HIAA 0001. Architectural Design.

Design principles presented in the first semester are further developed through a series of projects involving actual sites with their concomitant physical and historic-cultural conditions. Issues of context, methodology, program and construction are explored for their possible interrelated meanings and influences on the making of architectural form. Location RISD Main Campus BEB 3rd floor  
Estimated Cost of Materials: \$55.00

**HIAA 0002. Advanced Design Studio.**

These studios, three of which are required for graduation, are offered by individual instructors to students who have successfully completed the core curriculum. They are assigned by lottery on the first day of classes. Once assigned to an advanced studio, a student may not drop studio.

**HIAA 0003. Architectural Projection.**

This course introduces the beginning student to the origins, media, geometries and role(s) of projection drawing in the design and construction process. The student will learn systems of projection drawing from direct experience, and be challenged to work both from life and to life. Subjects such as transparency, figure/ground, sciagraphy, oblique projection, surface development, volumetric intersections, spatial manipulation and analytic operations will build on the basics of orthographic and conic projection. The course involves line and tone drawing, hand drafting, computer drawing(Autocad) and computer modeling(Rhino).

**HIAA 0004. Architectural Analysis.**

This course will develop one's ability to critically read and understand architecture through formal, geometric, tectonic and spatial analytic processes. Analysis acts as an intermediary between observation, expression, and understanding, offering deep insights into works of architecture. The course builds upon the processes introduced in Architectural Projection. Through various conceptual and representational frameworks, the issues of mapping-layers. Point of view, scale, morphology, topography and tectonics will be explored as part of a larger creative process, embracing visual imagination, communication and critique. RISD Main campus BEB 1st or 3rd floor studio

Estimated Material Cost: \$50.00.

**HIAA 0005. Structural Analysis.**

The basic content will be statics and strength of materials. The first portion will deal with force vectors, trusses, cross-sectional properties, and shear/moment diagrams, followed by stresses, strains, material applications and the analysis procedures necessary to compute structural behaviors. This class is foundational to all future structural design classes such as Wood Structures and Steel Structures. A math test will be given prior to the first class to determine which students are required to attend a supplemental lecture class instructed by the teaching assistant. This course is a pre-requisite for Steel Structures, Wood Structures, and Concrete Structures.

**HIAA 0006. Wood Structures.**

This course will review the fundamentals of wood in architecture with a focus on wood materials and construction systems and lumber and timber structural analysis and design. Work includes timber systems consisting of conventional framing trusses, laminates, built-up sections and connections. In addition, this course will review the principles of structural loads; gravity, lateral, live and dead. The concept of lateral resistance through standard wood framing systems will be explored. Manufactured lumber has become a major part of today's wood construction industry and the design and detailing of these materials will be explored in depth.

**HIAA 0007. Environmental Design II.**

The study of basic concepts of Human Environmental Comforts. Inherent within 'physio-environ' considerations are principles of temperature, humidity, heat transfer, air movement, and hydrostatics. These principles will be studied in terms of their abstract physics and mathematics, through empirical benchmarking and as the basis for a design proposal that includes considerations of larger scale strategies as well as assemblies. Emphasis will be placed on the principles behind the technology, the behavioral characteristics and the qualities of the systems' operation considered in making building design decisions.

**HIAA 0008. Environmental Design I.**

The study of basic concepts of Human Environmental Comforts. Inherent within 'physio-environ' considerations are principles of temperature, humidity, heat transfer, air movement, and hydrostatics. These principles will be studied in terms of their abstract physics and mathematics, through empirical benchmarking and as the basis for a design proposal that includes considerations of larger scale strategies as well as assemblies. Emphasis will be placed on the principles behind the technology, the behavioral characteristics and the qualities of the systems' operation considered in making building design decisions. No Pre-requisites. Hour TBD

**HIAA 0010. A Global History of Art and Architecture.**

Introduction to the global history of art, architecture and material culture from cave paintings to installation art. The course is both an historical survey as well as an analysis of case study examples. In addition to examining visual strategies of representation, the course explores the varied ways in which art shapes and reflects cultural, social, religious, and political concerns. Weekly one-hour conference required. Limited to 225. A

**HIAA 0011. Introduction to the History of Architecture and Urbanism.**

Western architecture and urbanism from classical antiquity through the eighteenth century: patterns of development; major architects and monuments; methods of interpretation. Does not presume previous knowledge or special skills. A

**HIAA 0012. Theories of Architecture from Vitruvius to Venturi.**

Theories and Design from Classicism to Postmodernism: An inquiry into the ways in which the nature of architecture has been thought, both inside the profession and outside, since Vitruvius first defined its study and practice as an "interdisciplinary discipline." The seminar will study selected texts and designs in the culture of western architecture from antiquity to the present. Drawn from works in architectural, social, political, and aesthetic theory the seminar will deepen our understanding of historical architecture and open up ways of interpreting contemporary design culture. A

**HIAA 0013. Introduction to Indian Art.**

This course presents aspects of Indian art over a period of 2,000 years, and introduces the art of Buddhism, Jainism, Hinduism, Islam, and colonial and post-colonial India. Emphasis is placed on characteristic features, functions and socio-political contexts of stupas, temples, mosques, churches, and other architectural sites as well as sculptures, painted manuscripts, paintings, and photography. A

**HIAA 0022. The Art of Enlightenment.**

This course surveys the history of Buddhist art-making from the earliest representations of the Buddha to the curatorial practices of modern museums. Ranging from the great mandala of Borobudur in Java to the Zen monasteries of Japan, we will examine the complex ways in which theology and scripture interacted with the particularities of time and place in the long development of Buddhist art. Throughout these inquiries, the sensorial qualities of the art will remain at the forefront of our analysis. Together, we will explore the mechanisms by which artists transformed inert matter into powerful implements of the Buddhist dharma.

**HIAA 0023. The Arts of India.**

How does art aspire to beauty, participate in political action, motivate the economy, and engage with the divine? In this introduction to the arts of India, 1600 to the present, we will consider these questions. From the floral designs adorning the Taj Mahal to popular clay figurines, and from the British colonial production of turning cotton into patterned cloth to Gandhi's movement for independence based on the hand-spun, we will examine the arts of painting, sculpture, and monumental architecture alongside the decorative arts of textiles, furniture, ceramics, and bronze, and modern artists' contemplation of earlier traditions to create the contemporary.

**HIAA 0031. Pre-Islamic Empires of Iran.**

Introduction to art and architecture of the Ancient Near Eastern empires that flourished between the 6th century BCE and the Islamic conquests of c. 630 CE. We will consider the material culture of the Achaemenids, Seleucids, Parthians, and Sasanians, empires that inhabited primarily the areas of Mesopotamia and the Persian plateau, but spread at times as far afield as the Mediterranean coast, Egypt, the Caucasus, and the Indus Valley. Lectures will prioritize close analysis of the most illuminating art and architecture, so that you leave the course knowing not only the material evidence but also current approaches to interpreting it. A

**HIAA 0040. Introduction to Medieval Art and Architecture.**

A comparative examination of the three artistic cultures of the medieval Mediterranean: Islam, the Byzantine empire, and the predominantly Christian regions of western Europe. Medieval Jewish art is also treated. Topics include medieval attitudes toward the use of images, the architecture of worship (churches, synagogues, and mosques), royal and domestic art, and instances of contact among all three cultures. Weekly one-hour conference required. A

**HIAA 0041. The Architectures of Islam.**

Through selected case study examples, the course examines the varied manifestations of Islamic architectures. The course spans fourteen centuries and three continents, and examines religious as well as secular buildings. We will trace the sources and 'invention' of Islamic architecture in the Umayyad dynasty of the seventh and eighth centuries, and will explore its varied manifestations up to the contemporary period. By examining cross-cultural and trans-regional interactions, we will also investigate the relationship between Islamic and non-Islamic architectural traditions. A

**HIAA 0042. Islamic Art and Architecture.**

The formation of an Islamic artistic expression in art and architecture and the regional manifestations of that art from central Asia and the Middle East to Sicily and Spain. Weekly one-hour conference required. A

**HIAA 0050C. Illustrating Knowledge.**

This seminar will investigate the history of illustration from the first manuscript maps and printed herbals to the present, including paintings, photographs, and computer imaging. We will investigate the role of pictures in the exchange of scientific ideas, and modes of representation developed in both the arts and the sciences. Enrollment limited to 15 first year students.

**HIAA 0061. Baroque.**

The course surveys the visual culture of Rome from 1564-1700. During that time Rome became the center of Artistic change in Europe, the seat of the Counter-Reformation Catholic Church and the dominant source of classical learning. All media that participated in these historical developments are included: from papal urban plans to Bernini's fountains and Caravaggio's paintings.

**HIAA 0062. Dutch and Flemish Art: Visual Culture of the Netherlands in the Seventeenth Century.**

Surveys the amazing art in Holland and Flanders that revolutionized all media. We will see how paintings, sculpture, and architecture formed the historical environment of life in the 17th-century Netherlands. The work of such artists as Rubens, Rembrandt, Van Dyck, and Vermeer is presented as part of this history of art in a "golden age." Weekly one-hour conference required.

**HIAA 0070. Introduction to American Art: The 19th Century.**

This undergraduate lecture course traces the rise of American painting in the period from the Revolution to the dawn of modernism in the 20th century. Major figures, such as Thomas Cole, Frederick Church, Winslow Homer and Albert Pinkham Ryder, will be examined, as will significant movements, such as the Hudson River School and Tonalism. Discussion will help place American art within the context of history, the invention of national identity, and parallel developments in popular visual culture. Enrollment limited to 50.

**HIAA 0072. Introduction to American Art: The Twentieth Century.**

This lecture/seminar examines the advent of modernism and the rise of modern art in the United States from 1900-1980. Through discussion and presentations, the major figures of the period--Georgia O'Keeffe, Frank Lloyd Wright, Jackson Pollock, and Andy Warhol among them--will be placed in historical and cultural context. Readings by leading scholars will allow a wide-ranging consideration of art historical methods of interpretation.

**HIAA 0075. Introduction to the History of Art: Modern Photography.**

This class will survey the history of photography as an art form and means of visual communication in the modern era. The photograph will be considered from both esthetic and social perspectives; photography's rise as a medium of personal expression will be examined, as will technology's role in the creation of new regimes of spectatorship, and the mass dissemination of visual information. The class follows the rise of photography's acceptance as an art form in the twentieth century, and culminates with its prominence within the phenomenon of postmodernism. Prior coursework in modern history or art history is helpful. Enrollment limited 80.

**HIAA 0077. Revolutions, Illusions, Impressions: A History of Nineteenth-Century Art.**

Over the long nineteenth century (1789-1900) revolutions replaced kings with citizens. Capitalist and colonial expansion mobilized armies, goods, and slaves across continents. New class and gender dynamics changed patterns of sociability. Technological innovations mass produced images and goods. In this course, we will discern such social and historical factors in Europe and across the globe alongside artistic ones to interrogate what makes art in this period irrepressibly modern. We will study the turbulence that has defined the century, including the art historical swings in style from Classicism to Romanticism to Impressionism, with care. Course includes visits and assignments in museums.

**HIAA 0081. Architecture of the House Through Space and Time.**

This undergraduate lecture course focuses on one building type, the house, through time in Mesopotamia, China, Japan, the Islamic world, the African diaspora, India, Britain, Rhode Island, and Germany and France. Houses can be minute or monumental, vernacular or high art, provide minimal shelter or afford the material and psychic satisfaction of home. By studying houses, we can bypass some of architectural history's biases, and explore some of the major debates in the discipline: What is architecture? Who determines what is included/excluded in this category? And on what basis do they make these claims? A

**HIAA 0084. Postwar to Postmodernism: Art Since 1945.**

This lecture course will survey major artistic movements and strategies that developed from the postwar period through the 1980s. Styles and schools discussed will include art informel, Abstract Expressionism, Happenings, expanded cinema, kinetic art, Fluxus, Situationists, Pop, minimalism, conceptual art, performance, Institutional Critique, video art, and appropriation. Taking a globally comparative approach, emphasis will be on the historical conditions that gave rise to such a multiplicity of practices, as well as the theoretical frameworks used to advance and understand them.

**HIAA 0087. Contemporary Art.**

This lecture course will survey the major movements and artistic strategies of contemporary art since 1989. Topics include installation art, new documentary, performance/re-performance, new genre public art, relational aesthetics, arte útil, critical geography, post-production, para-fiction, research-based art, and post-colonial, post-critical, and post-internet practices. As suggested by the prevalence of "posts," our discussion will center on the persistence of history in the art of the present.

**HIAA 0089. Contemporary Photography.**

This course surveys the rise of photography in the art world in the period after 1960. It examines both the development of photography as an independent medium and the appropriation of lens-based imagery by Pop Art, conceptual art, minimalism, and eventually Postmodernism.

**HIAA 0090. The Other History of Modern Architecture.**

This lecture course presents modern architecture as the product of the cultural, technological, political, and intellectual developments associated with capitalist expansion across the globe. By exploring the trans-Atlantic slave trade and its effects on Western industrialization, European Jesuit gardeners in China, modernization efforts in 19th century Turkey and Japan, and tropical climate and colonial policy in India, Nigeria, and other global sites; the course will expose students to the "99 percent" who are frequently excluded from discussions about modern architecture, but whose labor and cultural traditions were crucial to the heroic modernism of the West.

**HIAA 0100. Introduction to Architectural Design Studio.**

Introduces students to basic tools and strategies in architectural design. A number of exercises will introduce students to questions about form, function and structure and teach them to learn from close observation of the built environment. The second half of the semester is devoted to the design of a small house by each student, which will be presented in a scale model and a full set of drawings at the end of the semester. A jury of invited architects and professors will conduct a discussion of each project. Enrollment limited to 15. Instructor permission required.

**HIAA 0321. Toward a Global Late Antiquity:200-800 CE.**

Competing empires, the division of the eastern and western halves of Roman territory; long distance trade, the rise of monotheism, the spread of Buddhism: how did these factors affect the art and architecture associated with the Roman west, Constantinople, Ctesiphon, Alexandria, the Han Dynasty capitals, and Gandhara? This course takes an expanded view of Late Antiquity, extending beyond typical that associate the period with the post-classical west, to explore the dynamic creativity and intercultural connectivity of an era once considered a "Dark Age" in a world history.

**HIAA 0322. The Arts of Religion and Ritual in the Ancient World.**

This course explores how humans have imagined and conceptualized notions of divinity throughout the history of the ancient world (circa 3000 BCE to 1000 CE). We will consider a variety of visual representations, architectural monuments, and urban centers to investigate the types of places, natural phenomena, and individuals that were considered sacred. The class also explores how the art and architecture of temples and sanctuaries informs the nature of ancient ritual in a cross-cultural setting (A).

**HIAA 0340. Roman Art and Architecture: From Julius Caesar to Hadrian.**

An introduction to the major monuments in Roman art at the point when the Empire emerged up to the time of the creation of the Pantheon. No prior background required. A

**HIAA 0400. Early Christian, Jewish, and Byzantine Art and Architecture.**

No description available. A

**HIAA 0420. Cathedrals and Castles.**

The course aims to engage critically with the major architectural features of the medieval world: the cathedral and the castle. In addition to examining specific buildings as case studies, we will also interrogate the cultural context and the material culture associated with the construction, use and meanings of these important spaces. The course is arranged thematically rather than chronologically. A

**HIAA 0440. Gothic Art and Architecture.**

Examines Gothic art and architecture to explore its sources and "invention" in mid-12th-century France and to trace its varied manifestations in European art to the 16th century. Special attention is given to cathedral architecture and decoration. Weekly one-hour conference required. A

**HIAA 0460. Muslims, Jews and Christians in Medieval Iberia.**

The cultural diversity of medieval Spain and Portugal is proclaimed by their Christian churches, Islamic mosques and Jewish synagogues. The three distinct cultures that produced these buildings lived together for centuries in medieval Iberia, sometimes in peace, sometimes not. For almost eight centuries (711-1492) writers, scholars and artists emerged from a cultural environment of intellectual borrowing nurtured by uninterrupted contact through marriage, conversion, commerce and travel. This convivencia of Jews, Muslims and Christians will be examined from the perspectives of literature, music, art, architecture, archaeology, and history.

**HIAA 0550. Gold, Wool and Stone: Painters and Bankers in Renaissance Tuscany.**

Examines the paintings, sculpture, graphic art, and architecture of Tuscany in the 15th century, primarily in Florence but also venturing into Siena, Arezzo, Borgo San Sepolcro. Using Renaissance critical terms and analytical tools, we take into account the technical and commercial habits of craftspeople, the economy of the cities and towns, and the forms and functions of art in domestic, civic, and religious spheres. Weekly one-hour conference required. A

**HIAA 0560. Constructing the Eternal City: Popes and Pilgrims in Early Modern Rome.**

Examines painting, sculpture, architecture and printing in the context of the unique urban character of Early Modern Rome: site of ancient myth, religious pilgrimage, and a cosmopolitan court with power and influence across both visible and invisible worlds. Beginning with late medieval art, and the artists Filarete and Fra Angelico, we move through the Renaissance (Michelangelo and Raphael), and Counter-Reformation (Fontana, Tempesta, Barocci), tracing the formation of modernity in artists' workshops and academies, and through the streets with expanding papal urbanization programs. A

**HIAA 0570. The Renaissance Embodied.**

Renaissance depictions of the body range from muscular, idealized nudes to decaying, but ambulatory, corpses. Artists dissected human cadavers and, for the first time since antiquity, reflected the use of living models in their workshops and studios. In this course, we examine art that embodied power and sexuality, death and disease, the divine and demonic, the marginalized and the fantastic. We consider a diverse set of bodies as they were represented in paintings, sculpture, drawings, decorative arts and prints in relation to contemporary religious, political and social concerns.

**HIAA 0580. Word, Image and Power in Renaissance Italy.**

This undergraduate lecture class is designed to introduce cultural and historical perspectives on Italy from Siena in the Middle Ages to Renaissance Florence and the early modern Veneto. Team taught by professors of Italian Art History, History, and Literature, we will move across Italy and the centuries focusing on monuments of literature, art, architecture, and history through different disciplinary lenses. In English.

**HIAA 0600. From Van Eyck to Bruegel.**

Artists of Flanders and Holland effected a revolution in the techniques and subjects of painting during the 15th and 16th Centuries. This course explores the roots of artistic change in religion, urban history, politics, Italian humanism, economics, and craft traditions. The focus is on the great works of such artists as Jan van Eyck, Hieronymus Bosch, and Pieter Bruegel the Elder.

**HIAA 0630. Cultural History of the Netherlands in a Golden Age and a Global Age.**

Between 1580 and 1690 two nations emerged in Europe from what had been one unified region. To the north, the Dutch Republic gained its independence from Spain and developed as a bastion of liberty, ideas in ferment, visual arts, Calvinist faith, science, technology, and global economic reach. To the south, the "loyal" Netherlands, now Belgium, returned to the Spanish and Catholic fold, but sustained its leading position in the arts, competed in global trade, and negotiated a new compromise of government. In this course we present an interdisciplinary, comparative view of the "two" Netherlands and their legacy in the world.

**HIAA 0660. Giotto to Watteau: Introduction to the Art of Europe from Renaissance to French Revolution.**

Giotto to Watteau introduces the great works of European art from the Renaissance to French Revolution. What ideas and forces enabled artists such as Leonardo da Vinci, Hieronymus Bosch, El Greco, Caravaggio, and Rembrandt to transform the visual world so profoundly that their innovations still radiate outwards through history into the present? What are the best terms and concepts to describe and understand the new styles that developed between 1300 and 1800? Lectures, discussion, reading, and direct looking consider these questions in a way that works for students at an introductory level. A

**HIAA 0710. The Other History of Modern Architecture.**

This lecture course presents modern architecture as the product of the cultural, technological, political, and intellectual developments associated with capitalist expansion across the globe. By exploring the trans-Atlantic slave trade and its effects on Western industrialization, European Jesuit gardeners in China, modernization efforts in 19th century Turkey and Japan, and tropical climate and colonial policy in India, Nigeria, and other global sites; the course will expose students to the "99 percent" who are frequently excluded from discussions about modern architecture, but whose labor and cultural traditions were crucial to the heroic modernism of the West. A

**HIAA 0770. Architecture and Urbanism of Africa.**

This course introduces African built environments from the earliest known examples to the contemporary moment. Through recent debates about heritage and preservation, we will interrogate "Africa" as both an imagined construct and a concrete geographic entity characterized by diverse cultures, contexts, and histories. We will also explore competing interpretations of Africa's architectural and urban history and their contemporary relevance. Weekly one-hour section required. A

**HIAA 0771. African American and Caribbean Architectures: Domestic Space.**

This course explores domestic landscapes occupied by African-Americans between the earliest years of slavery and the Second World War. We will examine some of the most common housing forms that diasporic Africans inhabited during those years—plantation slave quarters, tenant shacks, and urban tenements, to name a few. Our premise is that study of domestic life can reveal how political, economic, and social forces inform everyday life. The goals of the class are twofold: to improve our understanding of the social history of diasporic Africans and to develop sensitivity to the study of ordinary, everyday landscapes—or "vernacular architecture." A

**HIAA 0801. Art After '68.**

The tumultuous social unrest of the 1960s was concretized in a worldwide succession of civic revolts in 1968. Throughout this period, art was an organizing tool for various political events. In turn, the concept of 1968 generated an aesthetic response that supported, documented and historicized the period. This course will examine the art and new art forms created in the wake of 1968. We will also look closely at the strategies of contemporary art making that are influenced by the spirit of 1968.

**HIAA 0810. 20th Century Sculpture.**

Writing in 1937, sculptor Naum Gabo posed the question, "What are the characteristics which make a work of art a sculpture?" Gabo's question has a general resonance for the entirety of the twentieth century, where the medium of sculpture formed many of the significant debates within art. This lecture course is a survey of sculpture in the twentieth century. We will examine the medium through its definitions, material (metal, paper, plastic, stone, wood, etc.), methods (carving, casting, modeling, welding, etc.), practitioners, movements, theories and related practices, like architecture.

**HIAA 0820. Art and Technology from Futurism to Hacktivism.**

This course will introduce students to the central role of technological media in art of the twentieth and twenty-first centuries. From telephones to computers, the Sony Portapak to the Internet, artists have creatively engaged technology to transform how their art was made, circulated, and received. We will pay equal attention to technology as a medium and the ways artists responded to broader technological change. Looking at works from Europe, the Americas, and Japan, we will interrogate the varying social conditions and political motivations that drove artists to use technology in order to radically change the making and meaning of art.

**HIAA 0830. Revolutionary Forms: 100 Years of Art and Politics in Latin America.**

This course surveys Latin American art within the context of socio-political and intellectual concerns in the region. We will consider a wide variety of media with an eye to local and global events that prompted their production. We will examine how artworks embodied, challenged, and helped to shape history. We will survey major trends in art production: from photography during the Mexican Revolution to participatory and activist art in the beginning of the 21st century. Students will acquire visual and critical analysis skills in order to actively engage with their visual surroundings. Previous knowledge of art history is not required.

**HIAA 0840. History of Rhode Island Architecture.**

This course examines the historical development of architecture and building in Rhode Island within the larger context of colonial and national trends and with a focus on important manifestations of a distinct regional identity. Emphasis will be placed on stylistic developments, new building types and technologies, and the social and economic influences on the creation of the built environment. A

**HIAA 0850. Modern Architecture.**

The "classic" period of European and American modern architecture from the turn of the century to the 1950s. Presents both the established canon of masterpieces by among many others, Frank Lloyd Wright, Mies van der Rohe, and LeCorbusier, and counterbalances this approach with information about new building materials, changing conditions of architectural production, and the "mechanisms of fame." A

**HIAA 0860. Contemporary Architecture.**

Stylistic, technological, and theoretical developments in architecture from the 1960s to the present. Analyzes movements such as "Brutalism," "Postmodernism," and "Deconstruction" and works by architects such as Frank Gehry, I. M. Pei, and Zaha Hadid. Emphasizes the complex conditions of architectural production in different parts of the world. Complements HIAA 0850, but may be taken independently. A

**HIAA 0861. City and Cinema.**

An examination of the mutual influence between two of the major art forms of the 20th century: film and architecture. Concentrates on European and American film sets throughout the 20th century and explores their formal and iconographical sources in contemporary architectural discourse. Presentation and examination of sketches, paintings, still photographs, and film clips as well as writings by directors, set designers, critics, and architects (Eisenstein, Reimann, Kracauer, Bunuel and many others). A

**HIAA 0870. 20th Century British Art: Edwardian to Contemporary.**

The field of British art offers a wide view onto the history of art and aesthetics. This survey of British art in the twentieth century will examine the nation's art, artists, and art movements alongside its current events. Readings will be drawn from periodicals, primary documents (artist's letters and manifestos) and secondary texts (Alloway, Hall, Read and others). Architecture, literature (Martin Amis, Joseph Conrad, Lynton Kwesi Johnson and others) and music will be considered throughout the course.

**HIAA 0900. City and Cinema.**

An examination of the mutual influence between two of the major art forms of the 20th century: film and architecture. Concentrates on European and American film sets throughout the 20th century and explores their formal and iconographical sources in contemporary architectural discourse. Presentation and examination of sketches, paintings, still photographs, and film clips as well as writings by directors, set designers, critics, and architects (Eisenstein, Reimann, Kracauer, Bunuel and many others).

**HIAA 0901A. African American Art History at Tougaloo College.**

This course covers the history of the contributions of Black artists and artisans to the Art and Architecture of the United States from 1600 to the present. We examine the careers, works, and lifestyles of African-American artists positioning them within the larger canon of American art and artist. The course exposes the student to African American artists beyond the textbook, with studio visits to Clementine Hunters former studio, and museum visits to have firsthand encounters with artworks. The course is project based with no exams and includes a research component that utilizes the Tougaloo Art Collection and the works of Edward Bannister.

**HIAA 0931. Eco-aesthetics.**

This course examines a movement in contemporary art and visual culture – termed "eco-aesthetics" – that works to raise awareness of global climate change and to resist forces of environmental degradation. We will begin by tracing a history of emerging artistic-ecological consciousness in the US and Europe in the 1960s and 70s, and then take a more global, interdisciplinary look at shifting methods of photographic, filmic, and new media documentation and representations of a "post-natural" landscape in the Anthropocene Age. We will analyze collective eco-aesthetic activism in the 21st century, exploring artistic collaborations in various local, regional, and global contexts.

**HIAA 1020. Topics in East Asian Art.**

Topics in East Asian Art. Topics will be listed separately.

**HIAA 1090. Writing About the Arts.**

Writing is a critical skill for those who engage in the practice of art history, art criticism, and art theory. This writing-intensive workshop/seminar will offer students the opportunity to encounter various kinds of art in various real-world settings, then write about them. Different genres of art writing will be explored (reviews, museum wall texts, scholarly analyses, etc.) and, through frequent short assignments, participants will learn to write with greater clarity, precision, and organization. Readings will explore the problems entailed in art historical description and what happens when visual ideas become texts.

**HIAA 1101A. Illustrating Knowledge.**

This seminar will investigate the history of illustration from the first manuscript maps and printed herbals to the present, including paintings, photographs, and computer imaging. We will investigate the role of pictures in the exchange of scientific ideas, and modes of representation developed in both the arts and the sciences. Enrollment limited to 19 first year students.

**HIAA 1101B. Seeing and Writing on Contemporary Arts.**

The purpose of this writing intensive seminar (especially designed for freshmen) is to train the students in both seeing and writing on contemporary art. The class will be based on looking at specific works of art of the twentieth century in museum context (using nearby collections, notably) and on how to translate visual observations into analytical and critical writing.

**HIAA 1105. Otherworldly and Other Worlds: Representing the Unseen in Early Modern Europe.**

This course will examine European beliefs about vampires, witches, angels, demons, “monstrous races” and other enchanted and unseen beings between 1500-1800—the era of the famous witch hunts and a period of confrontation between belief and disbelief about these figures. Spurred by new instruments like the telescope, new technologies in printing and cartography, and unprecedented travel across the globe, knowledge about the universe increasingly expanded in this period to incorporate new discoveries and observations. Close analysis of several case studies will highlight how dramatic debates about these creatures played out in visual form in early modern Europe.

**HIAA 1120B. History of Urbanism, 1300-1700.**

Examines major themes in the history of urbanism by concentrating on selected towns and cities in order to explore general issues (e.g. the relationship of town and countryside and the emergence of capital cities) and characteristic urban building (e.g. fortifications, designed squares, civic monuments). No prerequisites. A short oral presentation and term paper are required.

**HIAA 1120C. History of Western European Urbanism 1200-1600.**

Examines major themes in the history of urbanism by concentrating on selected towns and cities in order to explore general issues (e.g. the relationship of town and countryside and the emergence of capital cities) and characteristic urban building (e.g. fortifications, designed squares, civic monuments). No prerequisites. A short oral presentation and term paper are required.

**HIAA 1150C. El Greco and Velazquez.**

This course will study the great Spanish artists El Greco and Velázquez in relation to the major developments in 16th- and 17th- century European painting and in the context of the social, political, and intellectual concerns of Habsburg Spain, as well as the particular cultural milieu in which they each worked. We will trace El Greco's career from his native Crete to Venice and Rome and finally to Toledo, and Velázquez's from the commercial metropolis of Seville to the court in Madrid. In addition, we will examine their modern reception by art historians, artists, and collectors in Spain and beyond.

**HIAA 1150D. El Greco and the Golden Age of Spanish Painting.**

This seminar examines the career of the Greek painter from Crete known as El Greco in Spain where he worked in the late sixteenth and early seventeenth centuries. Emphasis will be given to the interaction of various European traditions in the culture of Counter Reformation Europe. Weekly readings and discussion and individual projects required. Enrollment limited to 25 students.

**HIAA 1151. Painting Indigenous Histories in Colonial Mexico.**

This seminar considers the ways in which indigenous histories and cultures were represented in manuscripts made by indigenous and missionary artists/authors of colonial Mexico. Part of our corpus will include manuscripts held in the John Carter Brown Library. Of particular importance to our inquiry will be definitions of writing and literacy; configurations of space and time; modes of recounting the past; representations of indigenous identities, the evolution and invention of pictorial forms; and the role of pictures in juridical contexts. The course will culminate with the creation of an online exhibition featuring books and manuscripts from the JCB's collection.

**HIAA 1170B. Twentieth-Century American Painting.**

HIAA 0800 is a suggested prerequisite. Weekly one-hour section required.

**HIAA 1181. Prefabrication and Architecture.**

Architects have been captivated prefabrication since the Industrial Revolution revealed the benefits of mechanized human labor. This undergraduate project seminar will examine the provenance and relevance of prefabrication. We will consider the prefabricated traditions of Africa and Asia as the foundation for the discipline of “vernacular architecture”; and conceptualize prefab as a technology of colonial expansion, solution to the postwar housing crisis, expression of 1960s counterculture, and response to climate change. Case studies will be drawn from Africa, Australia, Asia, Europe, and North America. A

**HIAA 1182. Spaces and Institutions of Modernity.**

This undergraduate seminar will explore canonical and emerging theories of modernity as they intersect with our understanding of space and the role of the built environment and designed objects within it. The seminar will be organized as a series of case studies of the iconic sites and institutions of modernity (the metropolis, the world's fair, the museum, the prison) as well as others that have also come to exemplify it (the ship, the plantation, the railroad, the colony). Class time will include analysis of primary documents and field trips to local sites. A

**HIAA 1200A. Ancient Art in the RISD Collection.**

The RISD Museum's ancient collection will be studied firsthand and in light of recent scholarship in Greek and Roman art and archaeology. Using the collection as a springboard, the course will explore original contexts for museum objects; issues of cultural property and museum ethics; conservation, restoration and display in museums; and notions of historical interpretation in museum display.

**HIAA 1200D. Pompeii.**

Pompeii and its neighboring towns are the best examples for studying the life, art, and architecture of a Roman town. This seminar covers the works of art and the life in the town as reflected in the monuments excavated over the past 250 years. Instructor permission required. A

**HIAA 1201. Brushwork: Chinese Painting in Time.**

How did the tenor of the individual brushstroke become the locus of value in traditional Chinese painting? What other possible standards of excellence—such as verisimilitude—were displaced in the process? This course pursues these questions by analyzing the great monuments of Chinese painting from the perspective of the aesthetic debates that defined them over the centuries. Proceeding from the famous Six Laws of Painting down to the aesthetic watershed of the Northern and Southern Schools, the course traces the fraught interplay of artistic practice and critical judgment in China over more than a thousand years. No prior knowledge required. A

**HIAA 1212. The Pictured Text.**

Writing makes language visible, and thus concerns images. Language also delimits the legibility of imagery. Turning words into images and images into words occurs at great speed around us. This course explores the relation of text and image across world traditions—Chinese, Mayan, Egyptian, Islamic, Greco-Roman, and others, extending up to the present. Topics include: calligraphy, context, scribal practice, the form and shape of writing, including typography, hidden or pseudo-writing, graffiti, and contemporary art.

**HIAA 1300. Topics in Classical Art and Architecture.**

No description available. Topic courses listed separately.

**HIAA 1301. The Palaces of Ancient Rome.**

This seminar addresses the palatial art and architecture of the ancient Roman Empire. Key themes include the architectural articulation of political power; the role of international relations in expressing cultural power; the interplay of influence among palaces and villas; the art of adornment, luxury, and collecting; the interaction of architecture and landscape, including interior gardens and urban environments; the critical analysis of archaeological evidence, reconstruction, and legacy. A

**HIAA 1302. Women and Families in the Ancient Mediterranean.**

What was life like for the women of the ancient Mediterranean? What rights, roles, responsibilities, and expectations defined their lives? Why is the examination of art and architecture such an important source for answering these questions? This course will provide a comparative perspective exploring Greek, Etruscan, and Roman case studies.

**HIAA 1303. Pompeii: Art, Architecture, and Archaeology in the Lost City.**

Buried by the eruption of Vesuvius in 79 CE, Pompeii stands as a time capsule of city life in the Roman Empire of the 1st century. Exploring the city's grand public baths, theaters, and amphitheaters, its seedy bars and businesses, its temples for Roman and foreign gods, and its lavishly decorated townhomes and villas, this seminar will reconstruct a panoramic view of Roman daily life and consider the Vesuvian region's modern reception since its rediscovery in the 18th century. A

**HIAA 1304. Spectacle! Games, Gladiators, Performance, and Ceremony in the Roman World.**

Theaters, amphitheaters, baths, circuses, and imperial residences pepper the former territory of the Roman Empire. Modern films conjure the fantastic, yet ephemeral, events of days long past, amplifying the fascination of these ubiquitous ruins. For the Romans, however, spectacle was not only about fun and games. What really took place in these spaces, and why? Learn to separate fact from fiction as we consider artistic, architectural, and archaeological evidence to understand how and why spectacles were fundamental to Roman daily life.

**HIAA 1305. Pre-Columbian Art + Architecture.**

Survey of ancient art and building in ancient America, with a focus on Mexico, Central America, and the Andes. Underlying concepts include: meaning and method, cosmos and kingship, narrative and symbol, personality and authorship, empire and royal court. Rich collections of the Haffenreffer museum will form the focus of work in the class.

**HIAA 1306. Art and Crime: The History and Hazards of Collecting the Classical.**

What if almost everything you thought you knew about Classical art was wrong, or at least highly suspect? This course will introduce and debate the epistemological and ethical problems entangled in the collection, display, and study of ancient art. Topics of discussion, among others, will include: How have decontextualized artifacts shaped narratives of ancient art? How are looting and forgery intertwined? Do museums and collectors unwittingly support the illegal trade of artifacts? What should be done with the thousands of unprovenanced objects in museum collections? What is repatriation and why is it such a complex issue?

**HIAA 1307. Politics and Spectacle in the Arts of Ancient Rome.**

This seminar investigates the intersection of politics and spectacles in the artistic production of ancient Rome. We will explore a variety of public monuments to reveal how they codify essential aspects of Roman culture. Topics include the architecture of entertainment spaces such as theaters, amphitheaters, and circuses, as well as the social functions of spectacles such as gladiatorial games and triumphal processions. We will look at expressions of imperial propaganda in monuments such as tombs and honorific arches. The class also considers how these ideas entered the private realm in the form of domestic wall paintings, mosaics, and sculpture gardens. A

**HIAA 1310. Topics in Hellenistic Art.**

Topics course. Topics listed separately.

**HIAA 1360X. The Aesthetics of Color: History, Theory, Critique (GNSS 1960X).**

Interested students must register for GNSS 1960X.

**HIAA 1400F. Research Seminar Gothic Art.**

No description available.

**HIAA 1410A. Topics in Islamic Art: Islamic Art and Architecture on the Indian Subcontinent.**

This course focuses on architecture, manuscript paintings, and decorative arts produced under the patronage of Islamic rulers, who dominated the Indian subcontinent between 1192 and 1858. The class will examine works of art as instruments in the process of establishing an empire as well as expressions of political and religious power. A

**HIAA 1410B. Painting in Mughal India 1550-1650.**

The Mughal (Muslim) rulers of north India in the sixteenth and seventeenth centuries presided over what was then the richest, most cosmopolitan culture in the world. The earliest rulers were open-minded and intellectually voracious; they brought together Persian, Turkish, and a variety of indigenous Indian traditions to create a distinctive new way of representing and living in the world. This cultural interaction, and the important role played by Portuguese missionaries and English traders, will be the focus of this seminar.

**HIAA 1430A. The Visual Culture of Medieval Women.**

Considers women as patrons and producers of medieval art and architecture, and examines the imaging of women in medieval works of art. Topics include: feminist perspectives in medieval history and art history, patronage by royal and aristocratic women, costume and textile production, and the art and architecture of female monastic communities. Optional FLAC French conference offered.

**HIAA 1440B. Architecture of Solitude: The Medieval Monastery.**

Religious men and women, as well as their patrons, sought to establish places of devotion and learning across the medieval landscape. This course examines the rise and development of the medieval monastery from its late antique beginnings in the deserts of Africa to the rise of the preaching orders in early thirteenth-century Europe. Emphasis will be placed upon the material expressions of western monasticism and upon the notion of the monastery as an architectural, archaeological and historical research problem through examination of individual case study examples. Instructor permission required. Enrollment limited to 12. A

**HIAA 1440D. The Gothic Cathedral.**

A

**HIAA 1440E. The Body and the Senses in Medieval Art.**

The seminar considers the contradictory aspects of embodiment in the visual and material culture of the Middle Ages. We will examine the veneration of holy bodies through living holy individuals, and through body parts (relics) and the Eucharist enshrined in sumptuous containers. We will look at the iconography of death and resurrection, the representation of the body in painting and sculpture, attitudes toward sexuality, the performance of identity through clothing, and the sumptuary laws that governed clothing and behavior. We will investigate funerary rituals and burial, and the movement of living bodies in dance and in civic and religious processions. A

**HIAA 1440F. Architectural Reuse: The Appropriation of the Past.**

This seminar will consider the survival, revival and adaptive reuse of older objects, texts and built spaces in the visual and material culture of successor cultures. We will look critically at the literature on the archaeology of memory, "Renaissance and revival" spolia studies and adaptive reuse. The seminar will examine selected case studies, including the reuse of sculptural elements in the Arch of Constantine, the conversion of Pantheon into a church and Hagia Sophia into a mosque, appropriated elements in the Qutb mosque in Delhi and the adaptation of the Bankside Power Station as the Tate Gallery.

**HIAA 1460. Topics in Medieval Archaeology.**

No description available.

**HIAA 1550A. Prints and Everyday Life in Early Modern Europe.**

Uses the resources of the RISD Museum in graphics and decorative arts (weaponry, embroidery, textiles, and ceramics) from the early modern period. Examines the use of ornament and mythological and sacred themes as they relate to crafts and the transmission of culture, focusing on the making, distribution, materiality, and histories of objects of everyday life.

**HIAA 1550B. Topics in the Early History of Printmaking: Festival and Carnival.**

This course looks at the printed festival books made for recording ideal versions of royal entries, funerals, weddings and other printed expressions of regal celebration, alongside printed, painted and otherwise recorded evidence of popular celebrations such as carnival, and civic and religious festivals such as the Sienese palio. Although beginning with circulated prints and books, we will also look at the material culture of these events in their widest sense to investigate the advertisement and control of festival cultures. The class will focus on early modern Italy but students are welcome to broaden our geographic horizons. Enrollment limited to 20.

**HIAA 1550C. Dreaming of Food in the Early Modern World.**

Floods, wars, trade, climate change, class distinctions, carnivals and public feasts kept food at the forefront of the early modern imagination. Focusing on Italy, but including its global connections, we will look at the cultures of food as the material of art and literature in markets, vineyards, courts, recipe books, medicine, kitchens, and the dreams of the hungry. Investigating the cultivation, presentation and consumption of food through related arts and the evolution of manners allows us to consider the design of tableware, food sculpture, and tapestries alongside more canonical arts. Some previous art history required, languages helpful. Upperclass seminar.

**HIAA 1560A. Italy and the Mediterranean.**

Sicily, Venice, and Rome were Medieval and Renaissance international centers whose populations of pilgrims, traders, soldiers, and diplomats occasioned opportunities for cultural cooperation and violence between East and West. We will study mosaics and architecture of the multi-ethnic Norman rule following the Islamic conquest of Sicily; Venetian relations with the Ottoman Empire and its Greek colonies in goods, painting styles, architecture and atlases; and in Rome obsessions with Egyptian engineering, the vitality of Arabic studies, and reports of travelers resulting from papal efforts to incorporate Eastern Christians under the umbrella of the Roman church. Enrollment limited to 20 juniors and seniors.

**HIAA 1560B. Mannerism.**

This class provides an opportunity to study courtly painting, sculpture, prints, drawing and architecture of the movement that became known as Mannerism. The material will focus most strongly on the art of Florence and Rome, but we will also be looking at France and Bohemia, and at the history, literature and literature of art of those centers.

**HIAA 1560C. Renaissance Venice and the Veneto.**

This course explores the visual culture, theater, ritual, architecture, and urban development of Venice and the Veneto from the late medieval period through the 16th century, tracing the development of painting, sculpture, architecture and a literature of art within the city's unique physical configuration and relationship with the East. For advanced students, written permission required and given at first meeting. A

**HIAA 1560D. Siena from Simone Martini to Beccafumi.**

This course will focus on the art and architecture of republican Siena over the 250 year period before its annexation to Tuscany in 1555. We will study the relationships between piety, work, and politics in a rich period of building and decorating that has determined the look and, to an extent, the culture of the city until the present day.

**HIAA 1560E. The Arts of Renaissance Courts.**

Courts were active patronage centers in the areas of secular and religious painting, sculpture and architecture, book illumination, rich narrative textiles for interior use and ornamental ones for costume, as well as ephemeral works for theatrical productions, triumphal entries and festivities. Artists working at court were able to ignore guild regulations, and acquired a status for themselves that set them apart from other urban practitioners. Centering our investigation on primary sources as far as possible, we will study a wide range of works, materials, ideologies and practices that contributed to the reputation of the Italian courts as centers of opulence and power. Final project and weekly class meetings required. Enrollment limited to 20. Instructor permission required.

**HIAA 1560F. Topics in Italian Visual Culture: The Visible City, 1400-1800.**

We will look at the image of the city in all media, attending to the contexts in which they are illustrated, the technologies of representation and the reasons for imagining cities, taking into account iconic and symbolic representations, personifications, maps and views, and comparing visual and textual descriptions of the places of early modern urban life.

**HIAA 1600A. Bosch and Bruegel: Art Turns the World Upside Down.**

An in-depth look at the work of these two enigmatic Netherlandish artists. After seeing how art history uses various methods to establish what they actually painted and drew, we will move outwards to interpretation and historical study of their images of comedy, proverbs, religion, and landscape. Artworks in local museums will be important focuses of discussion. Prerequisite: HIAA 0010 or 0500.

**HIAA 1600B. Caravaggio.**

Caravaggio is one of the great revolutionary artists and a real cultural phenomenon in his own time and ours. This seminar considers in-depth the nature of his work, the different historical strategies used to explain it, and possible new approaches.

**HIAA 1600C. Italian Baroque Painting and Sculpture.**

Examines developments in painting and sculpture in 17th century Italy with focus on the impact of the Catholic church and the rediscovery of antiquity on church and palace decoration, public and private commissions, and the rhetoric of Baroque style and iconography. Study of individual artists, including Caravaggio, Artemisia Gentileschi, and Gianlorenzo Bernini, as well as academies, the mechanics of patronage and writings about art and artists.

**HIAA 1600D. The Art of Peter Paul Rubens.**

The seminar will study the seminal work of Rubens in all its aspects.

**HIAA 1600E. The World Turned Upside Down.**

Seminar examining the comic and satirical traditions in Netherlandish art, including works by Hieronymus, Bosch, Pieter Bruegel the Elder, Adriaen Brouwer, and Jan Steen. How do visual images connect with writers such as Erasmus and Rabelais, with polemical satires of the Reformation, and with popular literature along the lines Renard the fox. What historical developments were at play in the formation of comic stereotypes and the representation of charged events such as the celebration of carnival?

**HIAA 1600F. Antwerp: Art and Urban History.**

No description available.

**HIAA 1600G. Art + Religion in Early Modern Europe.**

In this seminar we will reconstruct the various ways in which visual communication participated in the practice and changes of religious life during the early modern period (1400-1800). Topics will range from the role played by prints in the spread of the Reformation to the design of new kinds of architecture for the implementation of the Catholic Counter Reformation. Close attention will be given to the significance of iconoclasm (destruction of images), ideals of visual communication for religious persuasion, the invention of new methods of meditation with visual focus, and the relationship between sacred words and images. Enrollment limited to 20.

**HIAA 1600H. Comedy in Netherlandish Art From Hieronymus Bosch to Jan Steen.**

No description available.

**HIAA 1600I. Collections and Visual Knowledge in Early Modern Europe: 1400-1800.**

Examines the ways in which collections organized and developed new kinds of knowledge and practices. Collections were decisive in the formation of art, history, science, religion, politics, and international relations. We will discuss the rationales behind these different kinds of collections, the order in which things were placed, the visual organization and architecture that created the first museums, and the economics of collections. Attention to the collections of kings, artists, natural scientists, middle class citizens, humanists, and the devout will provide examples from a wide variety of perspectives. Enrollment limited to 20.

**HIAA 1600J. Rembrandt.**

This seminar will concentrate on art of Rembrandt. We will study his technique, development, and varied subject matter in all media from drawings to etchings and paintings. Rembrandt's work will be related to the historical contexts in which it was created and displayed. Prerequisite: previous courses in History of Art and Architecture. Enrollment limited to 20.

**HIAA 1620. Arts Between Europe and the World: 1500-1700.**

How did arts and visual objects of all kinds mediate between Europe and regions of the world opened to contact through trade, conquest, religious conversion, and the exchange of knowledge? This seminar will search for the major contexts of these exchanges and for the best methods to understand their histories. What conditions enabled or prevented mutual recognition? How were foreign materials imported and integrated, as with Chinese porcelain in the Netherlands or European glass in China? What balances of power determined exchanges, from the colonial extinction of Pre-Columbian art to the adaptation of western perspective in Japanese prints?

**HIAA 1631. Authority, Identity, and Visual Culture in Colonial Latin America.**

This course will consider the ways in which visual culture in colonial Latin America functioned as leveraging tools, means to assert authority and/or identity, ways to maintain the status quo, and forms of resistance. We will examine objects from Mexico and Peru related to religious practice, domestic life and the political realm with emphasis on understanding the roles various participants played in their production and reception.

**HIAA 1650A. About Face: English Portraiture: 1600-1800.**

About Face: English Portraiture, 1660-1800: This course will consider the function and meaning of portraiture in England from Sir Peter Lely's 'Beauties' of Charles II to James Gillray's social and political satires. We will pay particular attention to the interrelationships between official portraiture and unofficial forms such as caricature.

**HIAA 1650B. Visualizing Revolutionary Bodies 1785-1815.**

The French Revolution was accompanied by crisis in representation that was both political and cultural. This seminar will examine the problem of how artists and their publics sought to image, or literally to "embody" new forms of individual and communal identity in painting, prints, public festivals, and sculpture. Students will be encouraged to draw on the resources of the John Hay Library, the RISD museum, and other local museums and archives for their research projects.

**HIAA 1650C. Visual Culture and the Production of Identity in the Atlantic World, 1700-1815.**

This seminar will examine the production, reception and circulation of visual culture within the vortex of the 18th century Atlantic world (including such sites as Britain, France, colonial America, Mexico and the Caribbean). Enrollment limit 20.

**HIAA 1650D. Souvenirs: Remembering the Pleasures and Perils of the Grand Tour.**

Examines visual image and objects, ranging from portraits, landscape watercolors and graphic satires, to cork models of antiquities, which served to remind and remake travelers' ideas of Italy and other sites on the eighteenth century Grand Tour of the European continent. We will examine the role of anxiety, laughter, pleasure and danger in a rite of passage that was designed to elevate and educate young men, artists, and increasingly, women and men from the middling orders. Enrollment limited to 20.

**HIAA 1711. Black and White: Imagining Africans and African Americans in Visual Culture.**

Examines forms of visual culture—paintings, prints, photographs, sculpture—that participate in the formation of racial, social, and national identity in the U.S. from c. 1776-1930. Focuses on how visual culture figured African and African Americans in their interrelationships with each other and with other social groups in the U.S.

**HIAA 1720. The Art of Portraiture: Pre-Histories of the Selfie.**

The selfie is ubiquitous today, but posing for a portrait has a history. This seminar examines the art of portraiture—from the celebrity to the beloved pet to its medium in paint, print, and stone—during the period of its modern formation in the eighteenth century. How are new concepts of the self represented through expression, environment, and stuff? How do people fake it in portrayal to redeem or elevate their pasts? How can a portrait serve as a stereotype and how can it visualize a more equitable society? Course includes visits and assignments in museums.

**HIAA 1770. Architecture and Visual Culture of Empire.**

This combined undergraduate and graduate seminar examines important urban and architectural concepts and practices that accompanied the expansion of colonial rule across much of the world during the 19th and 20th centuries. Topics to be considered include: how early cultural encounters prefigured later representations of colonizing/colonized communities and their corresponding material cultures; colonial spatial orders and their implied relationship to forms of governance; debates on colonial domesticity and the proper arrangement of the home; and post-colonial architectural developments that grew out of the historical experience of de-colonization. We will consider primarily territories formerly under British, French, and German rule. A

**HIAA 1771. Eclectic Arts in the Global 19th Century.**

How does art motivate the economy, participate in political action, develop society, and aspire to beauty? In this introduction to the arts of South Asia, 1650 to the present, we will consider these questions. From the floral designs adorning the Taj Mahal to popular clay figurines, and from the British colonial production of turning raw cotton into patterned cloth to Gandhi's movement for independence based on the hand-spun, we will examine the arts of painting, sculpture, and monumental architecture alongside the decorative arts of textiles, furniture, ceramics, and bronze, and modern artists' contemplation of earlier traditions to create the contemporary.

**HIAA 1810. Contemporary Art and Activism.**

This seminar will trace the ways that art has been conceived as a form of political activism since 1989. We will analyze strategies such as social practice, relational aesthetics, new genre public art, tactical media, critical geography, useful art, and the interactions among artists and Occupy. Emphasis will be on these recurrent issues: the relationship between aesthetics and politics, conceptions of community and the public, and the practical aims of art, both intended and actual. Close readings, class discussion, and weekly response papers will culminate in a final research paper interrogating the political implications of a single artist or artwork.

**HIAA 1811. Possible Futures: Art and the Social Network before the Internet (1950-1979).**

Decades before the invention of the Internet, artists used computers, cybernetics, and systems theory to envision and engender social networks in their art. This seminar will examine these creative and conceptual experiments with new media, from programmable objects that invite audience participation, to interactive installations accentuating viewers' connection to the environment, to televisual and video works that illuminate how media structure identity and society alike. We will grapple with the extent to which this period gave birth not only to the technologies of the present but ideas about what society can and should be.

**HIAA 1820. Abstraction in Theory and Practice.**

This seminar will examine the proliferation of abstraction in the first half of the twentieth century. Looking closely at artworks and primary texts from movements such as Cubism, Futurism, Orphism, Expressionism, Suprematism, Constructivism, the Bauhaus, and De Stijl, our discussion will emphasize the politics of form—that is, how artists understood their artworks to directly engage with and even restructure their audiences and the world. enrollment limited to 20

**HIAA 1822. Dada and Surrealism: Anarchy, Exile, Alterity.**

This seminar will examine the experimental practices of Dada and Surrealism with a focus on the historical conditions, theoretical influences, and political ambitions that shaped them: the trauma of war; experiences of exile and displacement; uses and abuses of psychoanalysis, anthropology, and political theory; Communist allegiances; as well as anti-colonial projects and counterparts in the Caribbean, Latin America, and North Africa. We will consider a range of artistic practices (performance, assemblage, the "readymade," photomontage, poetry, painting, sculpture, exhibitions) with the aim of complicating our understanding of these movements and assessing the relevance of their subversive project today.

**HIAA 1850A. Frank Lloyd Wright.**

Seminar concentrating on the architecture of Frank Lloyd Wright—usually considered the most important architect in American history—and the critical discourse surrounding it. Selected scholarship serves as a paradigm for broader discussions about the history, contemporary roles, and shortcomings of architectural criticism and historiography. Examines the Frank Lloyd Wright Foundation's approach to critical scholarship and the commercialization of Wright's oeuvre.

**HIAA 1850D. Film Architecture.**

Since the 1920s, a far-reaching discussion about the mutual influence between the two most important art forms of the 20th century - film and architecture - has engaged set designers, architects, cinematographers and critics. Apart from a fascination with the impact that the techniques of the new medium, such as montage, slow motion, close-ups and camera movements, would have on the perception and presentation of architecture, there continuously has been an enormous interest in the potential of film sets as a realm where visionary, historic, mystical or psychological space could be developed. This seminar will study selected chapters in the history of cinematic set design through the twentieth century and examine masterpieces, major movements, protagonists, and crucial theoretical debates. In addition, the course looks at the depiction of the city through film and the role of the movies as a reflection, commentary, and experimental laboratory for contemporary architecture. A

**HIAA 1850E. Architecture, Light and Urban Screens.**

This seminar explores the history, theory and practice of architectural illumination and the notion of electric light as a "building material." We will also consider the current interest in urban screens and media facades. The course will follow a historic trajectory from ca. 1900 to the present and will introduce the students to the most important techniques, protagonists and critical debates over the past 100 years. We will critically examine the broader implications of lighting design, the tension between luminous advertising and architectural illumination, the relationship to stage lighting, the implications of a "nocturnal modernity" and the use of light for propaganda purposes. Enrollment limited to 20. Instructor permission required. A

**HIAA 1850G. Contemporary American Urbanism: City Design and Planning, 1945-2000.**

Examines the history of American urban planning from the canonization of the modernist tradition following WWII to its effect on urbanism over the remainder of the twentieth century. We will examine the influence of the modernist tradition on major urban processes of the time period, including urban renewal, sprawl, suburbanization, and downtown revival. The class considers how modernism was received and will include discussion on postmodern urban analysis and contemporary approaches to green planning. No prerequisites, but prior courses in twentieth century architecture, art, or visual culture will be helpful. Enrollment limited to 20. Instructor permission required. A

**HIAA 1850H. Berlin: Architecture, Politics and Memory.**

This course deals with the architecture and urbanism of the German capital and the way the city's traditions of commemoration in different phases of its history and under different political regimes. Students will research historic structures and sites of the 19th through 21st Centuries and engage with the intense German debate about historic preservation and commemoration. The course will travel to Berlin during spring break. There we would meet with local architects, politicians and artists to discuss the city's engagement with its dramatic past. Course enrollment by application. A

**HIAA 1870. Cannibalism, Inversion, and Hybridity: Creative Disobedience in the Americas.**

This seminar examines how artists and intellectuals have depicted, constructed, and defied the notion of "America". While focusing on Latin America in the 20th and 21st centuries, we will also consider Chicano/a artistic production in the U.S. We will look at a series of concepts—cultural cannibalism, inversion, hybridity, in-betweenness, and tropicity—that shape our present understanding of the continent and subvert the legacy of colonialism and imperialism. This seminar considers these terms as current theoretical modes of inquiry and as recurring themes in cultural production, including literature and the visual arts.

**HIAA 1870B. SoCal: Art in Los Angeles, 1945 to the Present.**

Recent exhibitions, scholarship and media have turned to Los Angeles as a site of exploration of both American art and the larger frameworks of the Americas and international contemporary art. The character of media is directly connected to the circumstances of Los Angeles as a creative community built around an industry of visuality (film). This undergraduate seminar will examine postwar architecture, exhibitions, installation, land art, painting, performance, photography, public art and sculpture in Los Angeles and its impact on art history. This course may be open to a limited number of graduate students.

**HIAA 1880. Criticality and Modern Art.**

This seminar will interrogate a central way of understanding the politics of twentieth-century art: criticality. The notion that art's relationship to society is one of negation, diagnosis, and destabilization pervades modern art history. This seminar will trace the development of criticality as an artistic practice and art-historical methodology. Alongside texts on critique in philosophy and theory, we will examine artists for whom criticality is paramount: Dada's ballistic mission, repetitions of the neo-avant-garde, anti-art, institutional critique, critical postmodernism, art as undercommons. We will end with recent claims of critique's collapse and assess the viability of criticality in art of today.

**HIAA 1881. Architectural Replicas in the Modern and Contemporary Eras.**

From World's Fairs to Disney World, copies of buildings are an important part of the architecture of entertainment in the modern and contemporary eras. But replicas, once valued as part of 'serious' architectural practice, also exist outside of the world of theme parks. This seminar will explore what it means to build an architectural replica in a discipline focused on originality. What forms do these replicas take? What might propel an architect to copy part or all of a building in their own work? What place might these replicas occupy in the canon of architectural history?

**HIAA 1882. Indigenous Art, Issues and Concepts.**

This seminar will map out the field of indigenous art with an emphasis on artworks from English-speaking settler colonial countries, concentrating on Native North American and Aboriginal Australian artists. We will approach indigenous art theoretically, outlining major issues and concepts of this global topic. Units will include defining indigeneity and indigenous art terms, anthropology in relation to art, and curatorial practice. We will begin by addressing the concept of indigeneity through legal and sociopolitical frameworks, continuing with museological display of indigenous art across time, and seeing how museums are working to better contextualize their anthropological collections.

**HIAA 1888. Exhibition as Medium.**

This seminar will examine "the exhibition" as a medium for artists in the modern and contemporary period, with particular focus on developments since the 1960s. We will look at artists who have staged alternative exhibitions in non-traditional spaces, worked within museums and galleries to dismantle curatorial conventions, and, most of all, created exhibitions that stand alone as single works of art. Emphasis will be on the relationship between form and content, the definition of audience and the public, and the intersections and tensions between art and history.

**HIAA 1890E. SoCal: Art in Los Angeles, 1945-Present.**

Recent exhibitions, scholarship and media have turned to Los Angeles as a site of exploration of both American art and the larger frameworks of the Americas and International contemporary art. The character of media is directly connected to the circumstances of LA as a creative community built around an industry of visuality (film). This UG seminar will examine postwar architecture, exhibitions installation, land art, painting, performance, photography, public art and sculpture in LA and its impact on art history. This course may be open to a limited number of graduate students.

**HIAA 1890G. Contemporary Art of Africa and the Diaspora.**

Will explore the art of contemporary Africa and its diaspora with an eye towards understanding the political and economic context in which it is produced and consumed. Our approach will be interdisciplinary, putting key theoretical texts from anthropology on the political economy of Africa in dialog with the works of contemporary artists. However, the intent here is not to reduce creativity to an economic activity alone, though we will be addressing the topic of art markets. Rather, we will explore artistic practices that surmount "the tyranny of the 'already,'" as Malian writers Konate and Savane have eloquently said. Enrollment limited to 20 juniors, seniors, and graduate students.

**HIAA 1910A. Providence Architecture.**

Seminar examining selected aspects of the architecture of downtown Providence from the late 19th century to the present. Projects require research at local archives, libraries, and architectural drawings collections. Instructor permission required. A

**HIAA 1910B. Project Seminar: The Architecture of Bridges.**

No description available.

**HIAA 1910D. Water and Architecture.**

The seminar explores the varied ways in which water is manipulated in architecture and urban planning. We examine several case studies, including Roman aqueducts such as the Pont du Gard, medieval urban and monastic hydraulic systems, Renaissance and early modern garden (and fountain) design, and the local examples of Slater Mill and the Providence water supply. A

**HIAA 1910E. Project Seminar for Architectural Studies Concentrators.****HIAA 1910F. City Senses: Urbanism Beyond Visual Spectacle.**

Architecture and urbanism provide synesthetic experiences of space that don't necessarily privilege visual perception. This project seminar explores alternative approaches to design and an understanding of the city through explorations of all the senses. We will examine case studies of cities through the sounds of church bells, traffic, and water fountains; the smells of foods, plants, and sewers; or even the feelings of light and shade. Students are encouraged to work on projects that map the city through unconventional sensory markers, record sounds, distill scents, or film different corporal means of navigating the urban environment.

**HIAA 1920. Individual Study Project in the History of Art and Architecture.**

Reading and reports on an approved topic, supervised by a member of the staff. Project proposals must be submitted and approved no later than the first week of the semester. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**HIAA 1930. The History and Methods of Art Historical Interpretation.**

This seminar provides an overview of the methods and theories used by art historians and introduction to the history of the discipline. Through readings and discussions, we will examine how art history emerged as an intellectual pursuit and humanistic discipline in the modern era, and review its foundations in the Western philosophical tradition. The transformations wrought by the advent of critical theory and the incorporation of approaches from outside the discipline of art history will receive particular attention in the second half of the course. Open to juniors and seniors concentrating in History of Art and Architecture or Architectural Studies.

**HIAA 1931. Museums, Histories, Critiques.**

This course offers a historical and theoretical examination of the art museum from its eighteenth century inception to contemporary expectations and institutional critiques. We will explore the philosophical and social implications of collection and classification, architecture and display practice; institutional mission and audience experience; interpretive strategies and educational goals; curatorial practice and the artist as curator. This critical framework will offer a means to examine the museum's role in structuring knowledge and facilitating experience and its place within intellectual discourse and public life.

**HIAA 1990. Honors Thesis.**

The subject of the thesis and program of study will be determined by the needs of the individual student. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**HIAA 2212. The Pictured Text.**

Writing makes language visible, and thus concerns images. Language also delimits the legibility of imagery. Turning words into images and images into words occurs at great speed around us. This course explores the relation of text and image across world traditions—Chinese, Mayan, Egyptian, Islamic, Greco-Roman, and others, extending up to the present. Topics include: calligraphy, context, scribal practice, the form and shape of writing, including typography, hidden or pseudo-writing, graffiti, and contemporary art.

**HIAA 2300B. Research Seminar in Roman Art and Architecture: Topography of Rome.**

Major monuments of the city of Rome from the Republic to the rise of Christianity.

**HIAA 2300C. Allegories/Symbols in Roman Art, Origins in Hellenistic Art, Augmentation in Early Christian Art.**

Roman historical relief sculpture.

**HIAA 2400A. The Visual Culture of Medieval Women.**

The course treats the history of women as commissioners, creators and subjects of medieval art. Case studies will be drawn from western Europe, Byzantium and Islam. Weekly seminars consider feminist perspectives in medieval history and art history; imaging of women in medieval art; archaeological approaches to gender and the analysis of gendered spaces; and the art and architecture of female spirituality.

**HIAA 2410C. Representing the Past: Archaeology Through Image and Text.**

The archaeological past exists for us through intermediaries that may be written or visual. Drawings, descriptions, photographs, graphs, charts and computer visualizations all display a considered image of the past. This seminar takes a critical look at the literature on visualization, and at the strategies by which scholars have re-presented the archaeological past of a range of cultures.

**HIAA 2430B. The Afterlife of Antiquity.**

Examines the survival and revival of classical art and architecture in the Middle Ages. Discussion focuses on selected case studies from across Europe and critically engages the secondary literature on classical revival.

**HIAA 2440A. Recent Approaches to the Gothic Cathedral.**

No description available.

**HIAA 2440B. Architecture of Solitude: The Medieval Monastery.**

Religious men and women, as well as their patrons, sought to establish places of devotion and learning across the medieval landscape. This course examines the rise and development of the medieval monastery from its late antique beginnings in the deserts of Africa to the rise of the preaching orders in early thirteenth-century Europe. Emphasis will be placed upon the material expressions of western monasticism and upon the notion of the monastery as an architectural, archaeological and historical research problem through examination of individual case study examples. Instructor permission required. Enrollment limited to 12.

**HIAA 2440C. Recent Approaches to the Gothic Cathedral.**

No description.

**HIAA 2440D. Architectural Reuse: The Appropriation of the Past.**

This seminar will consider the survival, revival and adaptive reuse of older objects, texts and built spaces in the visual and material culture of successor cultures. We will look critically at the literature on the archaeology of memory, "Renaissance and revival, spolia studies and adaptive reuse." The seminar will examine selected case studies, including the reuse of sculptural elements in the Arch of Constantine, the conversion of Pantheon into a church and Hagia Sophia into a mosque, appropriated elements in the Qutb mosque in Delhi and the adaptation of the Bankside Power Station as the Tate Gallery. Limited to 15.

**HIAA 2450. Exchange Scholar Program.****HIAA 2540A. Book Illustration in the Early Modern Period.**

This course will examine book illustration in the early modern period, seeking to identify the ways visual information is produced and how it relates to information in the text. Relationships between decoration in illustration and in architecture and painting will also be explored with an eye to the roles of pattern and visual convention in overtly didactic visual material.

**HIAA 2540B. Print Culture in Early Modern Europe.**

Examines the uses of prints, book illustration, and other pictorial printed schema in the early modern period, seeking to explain some of the ways visual information was produced and reproduced. Relationships between the prints and other arts are explored, with an eye to the roles of visual convention in overtly didactic materials such as maps and charts.

**HIAA 2540C. Illustrating Knowledge in Early Modern Europe.**

We will look at the history of scientific illustration in the age of the first printed books, using works in special collections libraries to investigate the exchange of ideas and the development of specializations in the arts and sciences from about 1450-1800. Focusing primarily on Italian examples, comparative projects may be chosen from any country in which the student can read the language.

**HIAA 2540D. The Theater that was Rome.**

"The Theater that was Rome" is a digital research site uniting text and images to portray the development of Rome (1500-1800) in the flood of printed information that proceeded from interest in the physical and mythological city. Our goal is to provide historical and critical interpretation of these illustrated books and prints that created Rome as a theater for the most advanced technological and decorative feats of an international group of artists, architects, engineers, authors, and publishers, looking at their productive collaborations, and using original materials, often in languages other than English, at the Hay Library and on the website. For graduate students; qualified upper-level undergraduates should contact the instructor. Enrollment limited to 15.

**HIAA 2550A. The Visual Cultures of Southern Italy.**

A workshop devoted to the visual cultures of Southern Italy, a geographical location with an unstable ruling population and sense of cultural identity from the late medieval through the early modern period. Projects about any aspect of art/architecture of Italy from south of Rome to Sicily are welcome. Research requires reading ability in Italian, Spanish, or French.

**HIAA 2550B. Art and Charity in the Renaissance.**

This seminar looks at the roles of art and architecture in commissioning charitable works in the service of maintaining a healthy civic body, including the design and decoration of hospitals, orphanages, ghettos, homes for women, immigrants and the poor, in the context of institutional structures that provide for marginal people. Examples will be from Italy, but students may work in other areas.

**HIAA 2550C. Color.**

How do we understand color as an integral part of a visual object? How shall we think about the artist's decision and the viewer's responsibility? This seminar will look at color (and its purposeful repression) in painting, sculpture and the decorative arts of the early modern period, also considering the discourses of color in 20th-century painting and other eras, such as antiquity, when color was a profitable topic through which to discuss the senses. We will also look at the economy and science of pigments, and the value of color in different discourses and objects. Graduate students, or by permission.

**HIAA 2600B. Flemish Art.**

No description available.

**HIAA 2600C. Rubens.**

No description available.

**HIAA 2600D. The Visual Culture of Religion in Antwerp: 1585-1794.**

The seminar will study the central role of visual culture in Counter Reformation Antwerp.

**HIAA 2600E. Jesuit Global Strategies in Art and Conversion.**

The purpose of this seminar is to examine the first global strategy to use art for the purpose of persuasion and conversion. In Europe, Asia, and the Americas during the early modern period, the Jesuits adapted their messages of visual communication, in architecture, prints, paintings, maps, dress, and rituals, to meet what they calculated would be the conceptual frameworks and customs of their target audiences, whether Chinese court officials, Flemish peasants. The seminar will search for the deeper historical roots of this strategy which up to now have not been traced. Open to graduate students only.

**HIAA 2620. Arts Between Europe and the World: 1500-1700.**

How did arts and visual objects of all kinds mediate between Europe and regions of the world opened to contact through trade, conquest, religious conversion, and the exchange of knowledge? This seminar will search for the major contexts of these exchanges and for the best methods to understand their histories. What conditions enabled or prevented mutual recognition? How were foreign materials imported and integrated, as with Chinese porcelain in the Netherlands or European glass in China? What balances of power determined exchanges, from possible the colonial extinction of Pre-Columbian art to the adaptation of western perspective in Japanese prints?

**HIAA 2650A. Visual Culture and Cicum-Atlantic Exchange in the Long Eighteenth Century.**

This course examines art and other forms of visual representation that imaged the colonial exchange between Europe and the Caribbean from the late 17th through the early 19th centuries. Readings include current scholarship in postcolonial theory devoted to theorizing colonial relationships in terms of transculturation and exchange. Students are encouraged to select research topics that allow them to take advantage of the rich trove of primary resources at the John Carter Brown and John Hay libraries.

**HIAA 2760C. Paris in the 1860s.**

No description available.

**HIAA 2850A. Architectural Theory in the Nineteenth and Twentieth Centuries.**

Examines key texts in the history of architecture since the 1800s. Contrasts texts by architects with their actual work and places them into the social, political, and art historical context of their time. Texts by Schinkel, Semper, Ruskin, Viollet-le-Duc, Louis Sullivan, Frank Lloyd Wright, Otto Wagner, Le Corbusier, Walter Gropius, Mies van der Rohe, Louis Kahn, Robert Venturi, and others.

**HIAA 2850B. Architecture of Frank Lloyd Wright.**

A seminar concentrating on the architecture of Frank Lloyd Wright and the surrounding critical discourse. Wright is usually considered the most important architect in American history. Selected scholarship serves as a paradigm for broader discussions about the history, contemporary roles, and shortcomings of architectural criticism and historiography. Examines the Frank Lloyd Wright Foundation's approach to critical scholarship and the commercialization of Wright's oeuvre.

**HIAA 2850C. Architecture, Urbanism, and Post-Colonial.**

This graduate seminar explores the relationship among architecture and urban design, colonial empire, and national development, via a comparative analysis of cultural interactions between Europe and its non-western "others" from ca. 1800 to the present. We will draw upon recent critical debates on orientalism, colonialism and empire, and politics of representation as well as interdisciplinary studies of modernity and identity.

**HIAA 2850D. Ludwig Mies van der Rohe.**

This seminar will explore the work of Ludwig Mies van der Rohe, one of the most influential architects of the 20th Century. While Mies has been continually discussed and exhibited (the Museum of Modern Art alone held 7 exhibitions about him since 1947, most recently in 2001), to this day, his work has neither been contextualized sufficiently nor has its reception been critically examined. Apart from studying and understanding Miles van der Rohe's work in its context, this seminar will explore responses by contemporary critics and compare those to later interpretations.

**HIAA 2850E. Architectural History's Future.**

Through readings of new, cutting edge texts, this graduate seminar will reconsider how we write and teach architectural history. We will explore provocative recent frameworks such as the "global," the shift from considering objects to thinking about processes, systems, networks, institutions etc. Our goal is to develop a self-reflexive praxis as historians, teachers, designers, and cultural workers.

**HIAA 2860A. The Museum and the Photograph.**

This graduate seminar examines the relationship between two rapidly evolving modern institutions: the history of photography and the modern art museum. Through readings, discussions, and independent research, we will look at how the history of photography has been affected by its unique association with the museum, and what this means for it as a field of intellectual inquiry. Enrollment limited to 18.

**HIAA 2860B. Photographic Origins.**

Through a series of directed readings and discussions, this seminar explores the origins and implications of photography's invention in the wake of Enlightenment philosophy, the industrial revolution, and Romanticism in Europe. No prerequisites, but background in the history of photography and/or 19th century Western art is encouraged.

**HIAA 2860C. Roland Barthes.**

In the past few decades, the ideas of the French philosopher Roland Barthes have been indispensable to our understanding of the photograph as a theoretical object. This graduate seminar will critically examine Barthes' writings on the subject, from *Mythologies* to *Camera Lucida*, placing them within the larger context of Barthes' structuralist project as a whole and contemporary analyses of photography and lens-based imagery.

**HIAA 2860D. Photography and Objectivity.**

From the moment of its arrival in Western culture, the photograph has been characterized as the product of a machine, of optics and chemistry. The mechanical nature of the medium seemed to guarantee it a special relation to its subject: the photograph showed something real, through an analog technology that was essentially objective. This graduate level seminar will investigate the notion of objectivity, as it has been analyzed in the history of science and other fields, and as it has been discussed in relation to photography. Enrollment limited to 15 graduate students.

**HIAA 2860E. Topics in the History of Photography: Photography and Philosophy.**

Throughout its history, the photograph has posed a special problem—and special opportunity—for thinkers. As a technology, an artform, and a ubiquitous aspect of modern culture, photography has also been an object of theoretical speculation; as a form of pictorial representation perceived to stand in unique relation to "truth" and "reality," the photograph has invited the attention of philosophers. This graduate seminar will survey the ways philosophy and critical theory have handled photography, from its origins in Enlightenment thought to the most recent speculations about its essence. Enrollment limited to 20.

**HIAA 2860G. Photography in Theory and Practice.**

Photography's advent in 1839 brought into the world two inventions: a practical, functional means of making images with a camera, and a suggestive idea. This idea took many overlapping forms—the concept of nature automatically reproducing itself, of a picture radically dissimilar from the hand-made art that preceded it, of an analogic trace of the real world. This graduate-level seminar will use selected readings and class discussion to interrogate the relationship of photography as it has been theorized with its actual deployment in society and the world. Issues like medium specificity, ontology, the "index," and cultural memory will be explored.

**HIAA 2870H. What is Contemporary Art History.**

Contemporary art history is a field in formation. As such, it is often contested and embraced, misunderstood and championed. Is contemporary art history a radical new field with a discrete set of practices, methodology and historiography? Or is contemporary art history simply a study of the present? Is the study of the contemporary relevant to other areas of art history? Is contemporary art history a model for other disciplinary approaches to the present? Throughout the term, this graduate seminar will discuss each of these questions. This course is open to students of all art historical periods.

**HIAA 2920. Methods of Research and Art Historical Interpretation.**

Required of first-year and second year history of art and architecture A.M./ Ph.D. students. Enrollment limited to 20. Instructor permission required.

**HIAA 2930. Practicum Working with Wood in the Middle Ages.**

The graduate Practicum for 2015 will engage with the significant and understudied collection of medieval and early modern wooden sculpture at the RISD Museum. We will examine the collection from the perspective of its changing contexts: from forest to workshop, to the decorative, devotional and ceremonial roles objects played in medieval and early modern spaces. We will then consider the later contexts of these works: their use and reuse in early modern and modern sites, the circumstances of their transfer to collections of individuals and institutions and finally their installation as single works of art in the RISD museum.

**HIAA 2940. Master's Qualifying Paper Preparation.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**HIAA 2980. Individual Reading (Single Credit).**

Single credit. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**HIAA 2981. Individual Reading (Double Credit).**

Double credit. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**HIAA 2982. Individual Reading for the Doctoral Candidate.**

Single Credit. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**HIAA 2983. Dissertation Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**HIAA 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**HIAA 2991. Dissertation Preparation.**

For graduate students who are preparing a dissertation and who have met the tuition requirement and are paying the registration fee to continue active enrollment.

**HIAA 2992. Master's Thesis Preparation.**

For students preparing a terminal MA thesis, may be repeated in the following semester. Sign up for sections according to individual primary advisor.

**HIAA XLIST. Courses of Interest to Concentrators.**

## Italian Studies

### Chair

Caroline Castiglione

Italian Studies at Brown not only teaches language and literature to students but guides their research toward problems that are cross-disciplinary in both content and method, rather than merely confirming a fixed canon or predetermined field of study. To investigate these problems, we can draw at Brown on traditional alliances with Anthropology, Art History, Classics, Comparative Literature, History, Musicology, and

Philosophy, but we also join forces with disciplines such as History of Science, Film Studies, Cultural Studies, and Gender Studies.

For additional information, please visit the department's website: <https://www.brown.edu/academics/italian-studies/>

## Italian Studies Concentration Requirements

Inherently interdisciplinary, the Italian Studies concentration allows students to strengthen their language skills in Italian and deepen their knowledge of Italian literature, history, art, and culture. Most concentrators have some background in Italian language. However, it is possible to concentrate in Italian studies without having studied the language before coming to Brown, although doing so requires an early start. After fulfilling the language requirement by completing up to Italian 0600 (or the equivalent), students enroll in a variety of advanced courses, reflecting the interdisciplinary nature of the concentration. Junior concentrators often study abroad in the Brown Program in Bologna. All senior concentrators participate in the "senior conference" by delivering brief presentations on academic topics of their choice in Italian Studies. Concentrators might also pursue capstone research, writing, or multimedia projects.

The concentration requires that students demonstrate proficiency in the Italian language by completing up to ITAL 0600 (or the equivalent in Bologna). ITAL 0400 is the first language course that counts toward the ten required courses for the concentration (except for students who place out of ITAL 0400, who will need to complete a total of nine courses). At least four of the ten courses should be taken in Italian.

### ITALIAN STUDIES COURSES

ITAL 0550	Gold, Wool and Stone: Painters and Bankers in Renaissance Tuscany (HIAA 0550)
ITAL 0560	Constructing the Eternal City: Popes and Pilgrims in Renaissance Rome (HIAA 0560)
ITAL 0600	Advanced Italian II
ITAL 0750	Truth on Trial: Justice in Italy
ITAL 0751	When Leaders Lie: Machiavelli in International Context
ITAL 0950	Introduction to Italian Cinema: Italian Film and History
ITAL 0951	The Grand Tour, or a Room with a View: Italy and the Imagination of Others
ITAL 0975	Let's Eat, Italy: Italian History and Culture through Food
ITAL 0981	When Leaders Lie: Machiavelli in International Context
ITAL 0985	Visions of War: Representing Italian Modern Conflicts
ITAL 1000A	Luigi Pirandello: Masks and Society
ITAL 1000B	Reading Recent Italian Fiction
ITAL 1000C	Nord - Sud e Identità Italiana
ITAL 1000D	Italian National Identity: Criticisms and Crises
ITAL 1000E	Masterpieces of Italian Cinema - Capolavori del cinema italiano
ITAL 1000F	20th Century Italian Poetry
ITAL 1000G	Italian Identity
ITAL 1000H	Resounding Cinema
ITAL 1010	Dante in English Translation: Dante's World and the Invention of Modernity
ITAL 1020	Boccaccio's Decameron
ITAL 1029	World Cinema in a Global Context
ITAL 1030A	Fellini
ITAL 1310	Literature of the Middle Ages

ITAL 1320	Great Authors and Works of Italian Renaissance
ITAL 1340	The Panorama and 19th-Century Visual Culture
ITAL 1350A	Transmedia Storytelling and the New Italian Epic.
ITAL 1350B	Non Fiction
ITAL 1360	Renaissance Italy
ITAL 1380	Italy: From Renaissance to Enlightenment
ITAL 1390	Modern Italy
ITAL 1400A	"Italian (Mediterranean) Orientalisms" Major Italian Writers and Filmmakers
ITAL 1400B	Fascism and Antifascism: Culture and Literature between the Two World Wars
ITAL 1400C	Literature and Adolescence
ITAL 1400D	Photography and Literature: Italian Examples of an Uncanny Relationship
ITAL 1400F	Twentieth Century Italian Culture
ITAL 1400H	Early Modern Italy
ITAL 1400I	Rituals, Myths and Symbols
ITAL 1400J	The Many Faces of Casanova
ITAL 1400K	Italy as Other
ITAL 1400L	History of Masculinity and Femininity from the Unification to 1968
ITAL 1400M	Giorgio Agamben and Radical Italian Theory
ITAL 1400P	The Southern Question and the Colonial Mediterranean
ITAL 1400Q	From Neorealism to Reality TV
ITAL 1420	Sex and the Cities: Venice, Florence, and Rome, 1450-1800
ITAL 1430	Popular Culture, 1400 - 1800
ITAL 1431	Truth on Trial: Justice in Italy, 1400-1800 (HIST 1262M)
ITAL 1550	Italian Representations of the Holocaust
ITAL 1550B	Topics in the Early History of Printmaking: Festival and Carnival (HIAA 1550B)
ITAL 1560A	Italy and the Mediterranean (HIAA 1560A)
ITAL 1580	Word, Image and Power in Early Modern Italy
ITAL 1590	Word, Media, Power in Modern Italy
ITAL 1610	The Divina Commedia: Inferno and Purgatorio
ITAL 1620	The Divina Commedia: Dante's Paradiso: Justifying a Cosmos
ITAL 1920	Independent Study Project (Undergraduate)
ITAL 1990	Senior Conference
ITAL 2100	Introduction to Italian Studies
ITAL 2190B	Fascism and Antifascism: Culture and Literature between the Two World Wars
ITAL 2190G	Letteratura Italiana del Novecento
ITAL 2220	New Perspectives on Fascism
COURSES IN OTHER DEPARTMENTS	
HIAA 0340	Roman Art and Architecture: From Julius Caesar to Hadrian
HIAA 0550	Gold, Wool and Stone: Painters and Bankers in Renaissance Tuscany
HIAA 0560	Constructing the Eternal City: Popes and Pilgrims in Early Modern Rome
HIAA 1200D	Pompeii
HIAA 1301	The Palaces of Ancient Rome

HIAA 1302	Women and Families in the Ancient Mediterranean
HIAA 1303	Pompeii: Art, Architecture, and Archaeology in the Lost City
HIAA 1550B	Topics in the Early History of Printmaking: Festival and Carnival
HIAA 1560A	Italy and the Mediterranean
HIAA 1560C	Renaissance Venice and the Veneto
HIAA 1560D	Siena from Simone Martini to Beccafumi
HIAA 1560F	Topics in Italian Visual Culture: The Visible City, 1400- 1800
HIAA 1600C	Italian Baroque Painting and Sculpture
ARCH 1155	Cities, Colonies and Global Networks in the Western Mediterranean
MUSC 0071	Opera

## Italian Studies Concentration and the Brown Program in Bologna

Concentrators who enroll in the Brown in Bologna program should fulfill the requirements according to the following sequence: prior to departure, the student should complete the level of Italian language study required (ITAL 0300) and enroll in one of the courses in the four distribution areas -- Italian literature; Italian History; history of Italian art and architecture; film or performance. Upon return from Bologna, the student should enroll in at least one advanced course offered by the department, preferably a course taught in Italian. Any student returning from the Bologna program must enroll in a course above the language level of ITAL 0600.

Credits toward the Italian Studies concentration may also be transferred from the Brown in Bologna Program. Concentrators may count three courses per semester toward the concentration (or six courses total for the year), although the course content must focus on Italy if the student wishes to count the course toward the concentration requirements. Concentrators should consult the concentration advisor to know which courses may or may not transfer as credits toward the concentration.

## Honors in Italian Studies

Concentrators are encouraged to expand their understanding of Italian language, history, or culture through independent research that will result in a thesis, a translation, or a multimedia project, developed in consultation with the undergraduate concentration advisor and the individual faculty member who will advise the student's project. The Honors thesis in Italian Studies is a two-semester thesis. Students who intend to complete an honors project should enroll for the first semester in ITAL 1920 (Independent Study), and have their project approved by their advisor by October 15. During the second semester, honors students enroll in ITAL 1990 and continue to work with their advisor to complete the project. ITAL 1990 does not count as one of the eight courses required for the concentration.

## Capstone Experiences in Italian Studies

A Capstone experiences in Italian Studies would consist of a course or project that a student, in consultation with the undergraduate advisor, feels would integrate the various intellectual engagements of this interdisciplinary concentration, and constitute a culminating experience in Italian Studies at Brown. Such experiences are strongly encouraged, and should be arrived at through conversations with the concentration advisor or a professor in the department. This could include the Brown Program in Bologna, typically taken in the Junior year, and/or the honors thesis in the senior year. However, students may also apply early in the Fall or Spring semester of their senior year for permission to designate one of their courses (1000-level or above) a Capstone course. In consultation with the professor, students in Capstone courses complete an independent research, writing, or multimedia project that is well beyond the required assignment for the course. ITAL 1920 (Independent Study) may also be designated a Capstone course with the permission of the instructor.

## Italian Studies Graduate Program

The department of Italian Studies offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree.

Italian Studies at Brown not only teaches language and literature to students, but guides their research toward problems that are cross-disciplinary in both content and method, rather than merely confirming a fixed canon or predetermined field of study. The interdisciplinary program in Italian Studies offers students the opportunity to study the literature, history and culture of Italy under the guidance of internationally renowned scholars in Anthropology, History, History of Art, Literature and Media. Our program draws on traditional alliances with Comparative Literature, Musicology, and Philosophy, but we also join forces with disciplines such as History of Science, Film Studies, Cultural Studies, Women's Studies, and the use of Computers for the Humanities. Recent Ph.D. graduates have consistently published their dissertations on topics ranging from medieval to contemporary literature and culture, and currently teach at such institutions as the University of Massachusetts, the University of Pennsylvania, Stanford University and Wellesley College.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/italian-studies>

## Courses

### ITAL 0100. Elementary Italian.

Elective for students without previous training in Italian. No credit for first semester alone. Fundamentals of Italian grammar and development of skills in speaking, comprehension, and writing. Overview of contemporary Italian society. Four meetings per week, audio and video work, two Italian films. Note: This is a year course.

### ITAL 0110. Intensive Elementary Italian.

Covers the same material presented in Italian 100-200. One semester equivalent to the standard two-semester sequence. Daily meetings plus audio and video assignments.

### ITAL 0200. Elementary Italian.

See Elementary Italian (ITAL 0100) for course description.

### ITAL 0300. Intermediate Italian I.

Review of the fundamentals of grammar, with emphasis on speaking and writing. Reading of representative short stories. Weekly compositions, presentations, and a paper. Three Italian films. Prerequisite: ITAL 0100-0200, or ITAL 0110, or placement by examination. Requirement for enrollment in the Bologna Program.

### ITAL 0400. Intermediate Italian II.

Review of specific grammar problems. Reading of one novel and newspaper articles. Compositions and oral presentations. Three Italian films. Prerequisite: ITAL 0300, or placement by examination.

### ITAL 0500. Advanced Italian I.

The purpose of this advanced course is to improve speaking and writing skills by offering extensive practice in a variety of styles and forms. Students will discuss various aspects of contemporary Italian culture. Reading, analysis and class discussion of texts (articles, songs, pictures, short stories, movies and television), oral presentations, based on research, and a writing portfolio (compositions, essays, blog and a journal). Prerequisites: ITAL 0400, or placement by examination.

### ITAL 0550. Gold, Wool and Stone: Painters and Bankers in Renaissance Tuscany (HIAA 0550).

Interested students must register for HIAA 0550.

### ITAL 0560. Constructing the Eternal City: Popes and Pilgrims in Renaissance Rome (HIAA 0560).

Interested students must register for HIAA 0560.

**ITAL 0600. Advanced Italian II.**

A sixth semester course with intensive practice in speaking and writing. Short stories, poems, music, and movies will be used to discuss Italian Society from the Second World War through the present. We will explore some important themes—family, religion, gender, and politics. Class discussion, compositions, oral presentations, and a final paper. Prerequisite: ITAL 0500, placement by examination.

**ITAL 0750. Truth on Trial: Justice in Italy.**

This seminar analyzes controversial trials in Italy between 1500 and 1800. From the persecution of heretics to the trial of Galileo and the increasing use of courts by marginal members of society, the judicial arena was crucial in defining political, social, scientific, and religious truth. Were law courts successful sites for the resolving what constituted deviance, legitimate knowledge and individual rights?

**ITAL 0751. When Leaders Lie: Machiavelli in International Context.**

This course examines the writing of Niccolò Machiavelli, a Renaissance author praised and condemned for his insistence on analyzing the realities of politics, rather than the ideals of political behavior. Machiavelli's view of the tenuous relationship of ethics to politics has cast him as the founder of political science and the proponent of "consequential morality" or the notion that the ends justify the means. We will also examine precedents for his ideas in the Greek and Islamic world and conclude by examining the relevance of Machiavelli's insights for understanding political practices and ethics in the twenty-first century. Enrollment limited to 19 first year students. Instructor permission required.

**ITAL 0810. Performing Italy - Body, Voice and Politics: a Journey within Italian Theatre.**

How does performance comment on, interact with, and influence society? And to what extent is this question culturally specific? Performing Italy focuses on Nobel-prize-winner Dario Fo, Franca Rame, *Commedia dell'Arte*, and *Teatro di Narrazione*. Engaging with theatrical materials, we will conduct comparative work driven by the students' own experiences and explore how Italian theater intervened in historical and political discourses within Italian society between the 1960s and the 2000s. Topics will include: the years of lead (1970s terrorism); the influence of the Catholic church on Italian society; the Italian State and organized crime; gender and sexuality in modern Italian society.

**ITAL 0950. Introduction to Italian Cinema: Italian Film and History.**

How do we visualize the past? How has cinema influenced our understanding of contemporary history? The course will focus on how key moments of 20th-century History (Fascism, WWII, the Mafia and Terrorism) have been described or fictionalized by major Italian filmmakers (including Benigni, Bertolucci, Cavani, Fellini and Pasolini). Subtitled films, readings and discussion groups. Reserved for First Year students. Enrollment limited to: 19.

**ITAL 0951. The Grand Tour, or a Room with a View: Italy and the Imagination of Others.**

Italy has for many decades been the place to which people traveled in order to both encounter something quite alien to their own identities and yet a place where they were supposed to find themselves, indeed to construct their proper selves. This course introduces students to some of the most important texts that describe this "grand tour." Readings, both literary and travelogues by Goethe, De Stael, Henry James, Hawthorne, Freud, among others, and films like "A Room With a View" - all in order to determine the ways in which Italy "means" for the cultural imagination of Western civilization. Enrollment limited to 19 first year students.

**ITAL 0975. Let's Eat, Italy: Italian History and Culture through Food.**

We are what we eat. This course focuses on Italian traditions and its daily culinary practices to understand how food shaped and continues to shape Italian culture and identity. We will explore the historical, economic and social factors that have influenced the development of a national cuisine. How does food connect memory and identity? Sources considered are family memoirs and cookbooks; political programs of Futurism and Fascism and their relationship to Italian foodways; food representations in literature and cinema. Course will look at Italian - American cuisine and its key role in shaping identities in the new world.

**ITAL 0981. When Leaders Lie: Machiavelli in International Context.**

This course examines the writing of Niccolò Machiavelli, a Renaissance author praised and condemned for his insistence on analyzing the realities of politics, rather than the ideals of political behavior. Machiavelli's view of the tenuous relationship of ethics to politics has cast him as the founder of political science and the proponent of "consequential morality" or the notion that the ends justify the means. We will also examine precedents for his ideas and conclude by examining the relevance of Machiavelli's insights for understanding political practices and ethics in the twenty-first century.

**ITAL 0985. Visions of War: Representing Italian Modern Conflicts.**

This interdisciplinary course addresses issues of war within Twentieth century Italy. As a phenomenon that crucially defines the "short century," war occupied a central role in various cultural products. This class will embrace fictional, non-fictional, musical, and visual texts that recount the experience of conflicts as seen through the eyes of Italian intellectuals. We will discuss works by authors such as Ungaretti, Calvino, Levi, and Monicelli, and analyze sources such as soldier's songs and military posters. Readings will range from literary theory and trauma studies to history. Prerequisite: ITAL 0600 or Brown in Bologna Program. The course will be conducted in Italian.

**ITAL 1000A. Luigi Pirandello: Masks and Society.**

Twentieth century Italian society as seen through the eyes of an outstanding contemporary author, Nobel Prize winner Luigi Pirandello. Focuses on the relationship between literature, theatre, and social reality through linguistic and stylistic analysis of texts (fiction and play) and their filmic or other media (e.g. radio) adaptations. Conducted in Italian, as a seminar-type discussion followed by writing assignments.

**ITAL 1000B. Reading Recent Italian Fiction.**

Readings of contemporary Italian fiction. The course aims to develop students written and oral expression in Italian. A broad range of themes will be discussed. Prerequisite: ITAL 0600, a semester in Bologna, or by placement.

**ITAL 1000C. Nord - Sud e Identità Italiana.**

Sebbene l'Italia sia da tempo uno stato unitario, permangono ampie differenze tra le varie regioni, specialmente tra Nord e Sud. Tra gli studiosi e' sempre vivo il dibattito sull'identità italiana. Facendo ricordo a materiali letterari, cinematografici e d'attualità in una prospettiva interdisciplinare, ci porremo la domanda: esistono realtà che possono definire l'Italia o sarebbe più corretto parlare di "Italie"?

**ITAL 1000D. Italian National Identity: Criticisms and Crises.**

This course investigates Italian identity since its inception in 1860 to the present through multiple perspectives: literature, history, politics, film, music and art. We will focus on important crisis points in this trajectory: the founding of the national state, the collapse of liberalism and the fascist experiment, the birth of the republic and Italy in the new Europe. In English.

**ITAL 1000E. Masterpieces of Italian Cinema - Capolavori del cinema italiano.**

The course will consist of a broad and varied sampling of classic Italian films. We will consider the works which typify major directors such as Rossellini, De Sica, Visconti, Fellini, Pasolini, Antonioni, Germi, Risi, Scola, Olmi, and Rosi. The aims of the course is offering a historical survey, and discuss the way how Italian cinema has reflected, amplified, and criticized important moments of Italian history, books and national identity. Classes will include close visual analysis of films, and its relations with the sisters arts (literature, painting, music). The course will be taught in Italian. Prerequisite: ITAL 0600.

**ITAL 1000F. 20th Century Italian Poetry.**

This course examines representative poets and poetic movements of Italy from the late 19th through the 20th centuries within and cultural and historical context. We will read works by internationally renowned poets such as D'Annunzio, Montale, Quasimodo, Marinetti, Ungaretti and Pasolini, and look into the development of Italian poetry through the major literary and artistic movements of the 20th century, including Crepuscularism, Futurism, Hermeticism, Neo-Realism and the Neo Avant-garde. We will address issues related to the shaping of a literary canon and consider the ways in which poetry reflects and defines a culture. The course will also incorporate translation and composition exercises as a technique of text analysis. Intensive practice in spoken and written Italian is an essential component of this course. Conducted in Italian. Advanced knowledge of Italian required. Prerequisites: ITAL 0600 or permission by the Director of the Italian Language Program.

**ITAL 1000G. Italian Identity.**

This course examines the process of the construction of Italian identity from National Unification until today. Through a close reading of Manzoni, De Amicis, Verga and Lampedusa's works, we investigate the formation of Italian identity through language, literature, food, and opera. We will also examine the problems of Post-Unification Italy: the economic and cultural gap between North and South and the Southern Issue. Finally, we will examine documentaries and readings that assess Italy today to analyze the feeling of not-belonging and estrangement, and the problematic search for a cohesive identity in a multicultural Italy within the European Union. Taught in Italian.

**ITAL 1000H. Resounding Cinema.**

This course explores the significance of sound, noise and music in Italian film: from recording, editing, mixing, to spatializing, emotionalizing and politicizing through the score. We will watch, and listen to, films by major Italian directors (Fellini, Antonioni and Pasolini) who worked 'ear to ear' with such award-winner composers as Nino Rota and Ennio Morricone. Materials include also exemplary horror and comedy genre films. The synergetic impact of sound will be discussed drawing upon critical listening and elaboration of most influential sound theories.

**ITAL 1010. Dante in English Translation: Dante's World and the Invention of Modernity.**

Primarily for students with no knowledge of Italian. Given in English. Concentrators in Italian should enroll in ITAL 1610; they are expected to read the material in the original. Close study and discussion of Dante's deployment of systems of retribution in the *Inferno* and rehabilitation in the *Purgatorio* with a view to imagining a society based on love and resistant to the effects of nascent capitalism and the money economy. Dante's work summarizes and transforms the entire ancient and medieval tradition of literature, philosophy, and science.

**ITAL 1020. Boccaccio's Decameron.**

Close study and discussion of Boccaccio's collection of 100 tales told by ten young Florentines over a period of two weeks, while in flight from the devastating plague of 1348. The Decameron defined the standard of Italian prose narrative for four centuries and deeply influenced Renaissance drama. We will also pay particular attention to visualizations and adaptations of the Decameron into a variety of media, from manuscript illumination to painting, theatre and film. Students will contribute to the Decameron Web, the award-winning Boccaccio web site administered by the department of Italian Studies. Sections in English and Italian. Enrollment limited to 40.

**ITAL 1029. World Cinema in a Global Context.**

Introduction to World Cinema and history through an original lens: The Cinema Ritrovato film festival at the Cineteca of Bologna, one of Europe's most renowned film restoration centers. Looking at World Cinema as a polycentric global phenomenon, students will become acquainted with recently restored mainstream, art house, alternative, experimental and avant-garde films, ranging from the silent period to world classics and Italian neorealism. Students will also attend a production workshop at the Bologna Cineteca, with one of Italy's young award winning directors. Lectures and seminars in English by Brown and University of Bologna scholars and screenings.

**ITAL 1030A. Fellini.**

The career of one of the undisputed masters of 20th-century film, revisited on the 20th anniversary of his death: from his contributions to neo-realism (Oscar nomination as screenwriter of Rossellini's *Open City*) to the "magic" realism of the 1950s (Fellini's first of four Oscars for *La strada*); and from his modernist masterpieces (*La Dolce Vita*, *8 1/2*) to his meta-cinematic fictions (*Intervista*, *The Voice of the Moon*). In reviewing Fellini's oeuvre, we will focus on issues of authorship, art film and psychoanalysis, myth and memory, realism and hyperrealism. Taught in English with a discussion group in Italian.

**ITAL 1030B. Modernity, Italian Style.**

The Golden Age of Italian Film. The legacy of Neo-Realism and the rise of the New Wave, against the backdrop of the neo-capitalist modernization of Italian society in the 1960s. Review the cinematic construction of the Modern in 11 B/W films from a six year-period (1960-66), focusing on issues of space/composition, time/narrative, fashion/form, and genre/gender. Analyze and discuss major works by Fellini, Antonioni, Rosi, Olmi, Germi, Bertolucci and Bellocchio within the context of European Art cinema and the politics of Auteurs, and in light of the most influential critical theories of the 1960s (Bazin, Metz, Pasolini and Deleuze). Taught in English. All films subtitled. Discussion group in Italian.

**ITAL 1262. Women, Gender, and Feminism in Early Modern Italy.**

This course explores the variety of Italian women's histories, issues of gender and sexuality, and ingenious responses to circumvent the social, economic, religious, and political limitations placed upon them during the early modern period (1400-1800). Italian women produced some of the foundational texts of historical feminism, the intellectual and cultural movement that advanced the idea of equality across genders and the necessity of equal access to opportunity and education. This course surveys the alternatives proposed to the gender hierarchies of Italian society and will include selections from archival documents, letters, literature, treatises, and the visual arts.

**ITAL 1310. Literature of the Middle Ages.**

Readings in early Italian literature, including religious writers and love poets of the 13th century, Petrarch, Boccaccio, the Humanists of 15th-century Florence, Ferrara, etc.

**ITAL 1320. Great Authors and Works of Italian Renaissance.**

The major authors and trends of 16th-century Italy (Machiavelli, Giucciardini, Ariosto, Tasso, classicism and anti-classicism, petrarchism, mannerism).

**ITAL 1340. The Panorama and 19th-Century Visual Culture.**

Throughout the 19th-century, the Panorama was a wildly popular 'vision machine,' the model for many later attractions from theme park rides to immersive educational spectacles like IMAX movies. In this course, we will use 21st-century vision technology to study the role of these cultural artifacts, optical media and storytelling devices in the shaping of 19th-century "virtual reality." We will focus on three case studies: the Garibaldi panorama at the Brown library; the panorama of the Pilgrim's Progress at the Saco, Maine museum; and the Whaling Voyage 'round the world, at the New Bedford Whaling Museum. Taught in English.

**ITAL 1350A. Transmedia Storytelling and the New Italian Epic..**

Transmedia Storytelling and the New Italian Epic. "New Italian Epic" describes a network of stories blending fiction and non-fiction across a variety of media, from books to blogs and zines, from feature or documentary films to TV/YouTube series and video games. These Unidentified Narrative Objects often explore conflictual aspects of contemporary society, such as migration, organized crime, trafficking and corruption, environmental upheavals, from a militant perspective. We will look at the way these UNOs both exploit and evade technological and industrial constraints in order to shape their realistic, utopian or dystopian strategies. Sections in both Italian and English.

**ITAL 1350B. Non Fiction.**

What is fiction and what is nonfiction? How to read a nonfictional text (diary, description, memoir, etc). Examples from well known Italian writers and further examples from photo and documentary cinema. Taught in English.

**ITAL 1360. Renaissance Italy.**

This course explores the history of the Italian Renaissance, a period of remarkable intellectual, artistic, and cultural change between the fourteenth and the sixteenth centuries. Renaissance innovations will be considered in a broad context: how did the Renaissance happen and how far did its transformations extend in society? Course topics include the changes in learning, art, political theory, and science, as well as transformations in family life, court culture, urban and rural society. Enrollment limited to 40.

**ITAL 1380. Italy: From Renaissance to Enlightenment.**

Between 1500 and 1800, Italians made significant contributions to European debates about the boundaries between orthodoxy and heresy; the legitimacy of social and gender hierarchies; the future of republics in an age of empires; and the possibilities for reform. Works by Machiavelli, Bernini, Galileo, Tarabotti, Goldoni, and Beccaria (among others) enrich this survey of early modern Italian history.

**ITAL 1390. Modern Italy.**

A look at the dramatic events that transformed Italy over the past two centuries and the ways that this history has been represented in film. For the nineteenth century, the focus is on the violent birth of the modern Italian nation-state. For the twentieth century, the course focuses on the drama of Benito Mussolini and the birth, life, and death of Italian Fascism. In addition to examining the transformation of Italian history, the course investigates the many issues involved in turning a book of history into a commercial film.

**ITAL 1400A. "Italian (Mediterranean) Orientalisms" Major Italian Writers and Filmmakers.**

Major Italian writers and filmmakers (including Amelio, Antonioni, Bertolucci, Celati and Pasolini) have attempted to incorporate non-European (African, American, Asian or Balkan) perspectives in their work (fiction, travelogues, documentaries etc.). The course will discuss these works, giving particular attention to their reception in the cultures they portray. Subtitled films, readings and discussion group in English.

**ITAL 1400B. Fascism and Antifascism: Culture and Literature between the Two World Wars.**

Introduces and examines the most significant aspects of literary, cultural, and political life in Italy between the two world wars. The most significant tendencies in the various literary genres (novel, descriptive prose, mass market fiction, propaganda, poetry) are considered against the backdrop of a general historical and literary overview and situated in the context of the debate carried forward by the most important literary periodicals of the '20s, '30s, and '40s, from *La Ronda* to *Solari*.

**ITAL 1400C. Literature and Adolescence.**

From Collodi's *Pinocchio* and De Amicis's *Cuore* to works by Saba, Pavese, D'Arzo, Moravia, and Calvino, the course focuses on some of the most remarkable literary treatments of childhood and coming of age in late 19th- and 20th-century Italian literature. In Italian.

**ITAL 1400D. Photography and Literature: Italian Examples of an Uncanny Relationship.**

The course will explore the interrelation of Italian Literature and Photography from early Modernism (Luigi Pirandello) to post- Modernism (Antonio Tabucchi). Major theoretical essays on photography (Sontag, Barthes) will set the stage for close readings of narrative texts by two of the most important authors of Twentieth Century Italian literature.

**ITAL 1400F. Twentieth Century Italian Culture.**

Contact the department for course information.

**ITAL 1400H. Early Modern Italy.**

A survey of Italian history between 1500 and 1800. Italy's varied political cultures from absolutism to republicanism; impact of Catholic reformation and the baroque; the woman's question and transformations in family life and the social order; the contribution of Italian writers to the debates of the Enlightenment and ordinary people to social change in the eighteenth century.

**ITAL 1400I. Rituals, Myths and Symbols.**

The course will analyze the diverse forms of sacralization and the esthetics of politics utilized by nationalism and Italian fascism to encourage participation by the masses in a collective liturgy. The study will begin with the Risorgimento and the nationalization of the Italians. It will then turn to the end of the nineteenth century and the period preceding the First World War with the birth of futurism and the Nationalist Party. It will look at the fascist creation of a symbolic-monumental machinery capable of inventing new rituals or of re-elaborating old myths and giving life to innovative symbolic forms. The final part will be dedicated to the years of the regime and the progressive acceleration of its fascistization of society. The analysis from inside the symbolic universe of these political movements will instead be effected through the study of culture, art, the collective imaginary, the lifestyles, the dispositions, the ceremonies, the cults and the rites of these two new lay and secular religions.

**ITAL 1400J. The Many Faces of Casanova.**

Philosopher or charlatan, magician or trickster, seducer or seduced, Casanova's life contains multitudes. His name, unlike those of Sade or Sacher Masoch, does not designate a "perversion," but a sort of exuberant hetero-sexual "normalcy." He is the Venetian alter-ego (and possibly real-life inspiration) of Mozart's Don Juan. In this course, we will dissect the myth of Casanova, from his own monumental autobiography to novels, films and plays which cast him as protagonist (films by Federico Fellini, Ettore Scola, Lasse Hallström, impersonations by Donald Sutherland, Marcello Mastroianni and Heath Leger). Lectures in English; discussion group in Italian.

**ITAL 1400K. Italy as Other.**

This course traces the variety of ways in which Italy has been viewed as the Other of the European and American imagination. We will read some of the key texts in a long tradition that traverses a broad spectrum of disciplinary fields: literature, art history, travel narrative and cinema. Works include the writings of De Stael, Goethe, Stendhal, James among others.

**ITAL 1400L. History of Masculinity and Femininity from the Unification to 1968.**

The first part of the course will concentrate on gender and queer studies to provide students with a general theoretical framework of these topics. It will then focus more specifically on the analysis of the evolution of sexuality, homosexuality, masculinity and femininity from the Unification of Italy until 1968. An interdisciplinary approach will be adopted using novels, films, newsreels, paintings, sculptures, manifestoes and advertising posters. Anthropology, art, literature, politics and history will be interwoven in order to reveal changes and continuities in the image of woman and man and the dynamics of the relationship of couples. Finally ample space will also be given to the medical and judicial treatment of these topics and to the transformation in lifestyles and the collective imaginary. Using this historical approach fosters understanding of how the dichotomous and hierarchic distinction between sexual norm and transgression becomes an essential paradigm of scientific, political, religious, judicial and artistic thought. Course is taught in Italian.

**ITAL 1400M. Giorgio Agamben and Radical Italian Theory.**

This course is dedicated to a close reading of the work of the Italian philosopher Giorgio Agamben and to an analysis of what has come to be known as "radical Italian theory." We will read the major works by Agamben, some key texts by other thinkers who were influential for Agamben (Carl Schmitt, Walter Benjamin, Michel Foucault etc), as well as other theorists who play an important role today in Italy: Roberto Esposito, Antonio Negri, Paolo Virno among others.

**ITAL 1400P. The Southern Question and the Colonial Mediterranean.**

This course examines Antonio Gramsci's interpretation of the Southern Question (questione) in an attempt to better understand the politics and culture informing the colonial Middle East. Through an analysis of Gramsci's critique of Southernism –the representation of Southern Italy as a semi-barbarous territory inhabited by "biologically inferior beings"– and his sociological description of pre-World War II Italy, we will acquaint ourselves with some of the key-concepts characterizing his political thought. Next, we will examine how critics of European colonialism in the Mediterranean have adopted this rich epistemological and analytical vocabulary.

**ITAL 1400Q. From Neorealism to Reality TV.**

This course explores the development of the aesthetic of reality in audiovisual media from film to television and portable screens in the context of modern Italian history while tackling notions of the pervasive infiltration of mass mediatic imagination into reality. The appeal and power of the medium to capture, show, and imbricate reality is intricately related with modes of production and distribution, social/ethical discourse, and any current political order. We will analyze the deployment of 'reality' on screen from the post WWII neorealist redemptive project after Fascism, through the contaminated explorations of art cinema, to television's twisted tales of reality.

**ITAL 1400T. From the Hypernovel to Paranoid Fiction.**

How can storytelling help us cope with complexity? How can novels help us detect and debunk conspiracy theories? We will read major works by Italian fiction masters Italo Calvino (*If On A Winter's Night A Traveler*, 1979) and Umberto Eco (*The Name of the Rose*, 1980, Foucault's *Pendulum*, 1988, *The Prague Cemetery*, 2010), tackling the paradoxes of "fake news" and "conspiratorial evidence" from Luther Blissett's *Q* (1999) to *Q'Anon*. Taught in English with a discussion section in Italian.

**ITAL 1420. Sex and the Cities: Venice, Florence, and Rome, 1450-1800.**

This course examines the politics of sexuality and the sexuality of politics in Italy between the Renaissance and the Enlightenment. Italy's urban settings saw the development of some of the most sophisticated political systems in Europe, and issues of gender identity and sexual practices figured prominently in the political symbolism, political criticism, legal and social orders of these regimes. Lectures and course discussions also explore everyday practices and their implications for defining and defying the social and political norms of gender and sexuality in early modern Italy. Suggested prerequisites are HIST 0010 or any Italian Studies course at level 1000 or above. No prerequisites are required. Lectures in English. Discussion groups in English and Italian.

**ITAL 1430. Popular Culture, 1400 - 1800.**

From folktales to rebel songs, carnival play and everyday rituals, popular culture shaped the lives of ordinary people of the early modern world. In this course we explore the materials available at Brown for examining popular culture before 1800. Students write a final paper from the materials they select. Italy will be examined comparatively with other geographical areas in order to prepare students for their research. Topics will include the multiplicity of popular cultures; the relationship between popular culture and elite culture; transformations in the beliefs, rituals, and practices that provided meaning for peoples of the early modern world. (P)

**ITAL 1431. Truth on Trial: Justice in Italy, 1400-1800 (HIST 1262M).**

Interested students must register for HIST 1262M.

**ITAL 1550. Italian Representations of the Holocaust.**

A survey of some of the most important texts (fiction, history, philosophy, films) that deal with both the Holocaust in Italy, and representations of the Holocaust by Italians. Readings include Levi, Bassani, Loy, Agamben; films those of Benigni, Cavani, Wertmuller. There will also be discussion of the aesthetic and political complexities regarding portrayals of the Holocaust, such as trauma, witnessing, historical truth, kitsch. Taught in English, with the possibility of a section in Italian.

**ITAL 1550B. Topics in the Early History of Printmaking: Festival and Carnival (HIAA 1550B).**

Interested students must register for HIAA 1550B.

**ITAL 1560A. Italy and the Mediterranean (HIAA 1560A).**

Interested students must register for HIAA 1560A.

**ITAL 1580. Word, Image and Power in Early Modern Italy.**

This undergraduate lecture class is designed to introduce cultural and historical perspectives on Italy from Siena in the Middle Ages to Renaissance Florence and the early modern Veneto. Team taught by professors of Italian Art History, History, and Literature, we will move across Italy and the centuries focusing on monuments of literature, art, architecture, and history through different disciplinary lenses. In English.

**ITAL 1590. Word, Media, Power in Modern Italy.**

The role of media (print, news, art, music, photography, cinema, radio, television) in shaping national identity, nationalistic agendas, imperial aspirations, democratic revivals and populist consensus in Italy, from the post-Risorgimento age to the Fascist regime, and from the post-WW2 renaissance to the "decadent" Berlusconi era. The most influential genres and trends in Italian culture, from opera to futurism, from neo-realist cinema and literature to post-modern fashion and industrial design, will be analyzed against the backdrop of the most important social and political turning points of Italian and European history.

**ITAL 1610. The Divina Commedia: Inferno and Purgatorio.**

A close reading of the first two canticles of Dante's poem in the light of contemporary European and American critical interpretations. In Italian. Enrollment limited to 40.

**ITAL 1620. The Divina Commedia: Dante's Paradiso: Justifying a Cosmos.**

Close study of the third and final part of Divine Comedy, in which Dante unfolds how, in his view, the planetary and stellar spheres condition human life and fashion the Providential plan of history. There will be ancillary readings from Dante's other works: *Convivio*, the *Monarchia*, and the *Epistles*. In Italian. Prerequisite: ITAL 0500 or 0600, or instructor permission. Enrollment limited to 40.

**ITAL 1920. Independent Study Project (Undergraduate).**

Undergraduate Independent Study supervised by a member of the Italian Studies Faculty. Students may pursue independent research in order to prepare for their honors thesis or honors multimedia project, or they may enroll in the course in order to work individually with a faculty member on a specific area of Italian Studies not covered in the current course offerings. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ITAL 1990. Senior Conference.**

Special work or preparation of an honors thesis under the direction of a member of the staff. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ITAL 2050. Microhistory.**

Microhistory emerged in the 1970s in Italy, but was quickly embraced by scholars across the globe. Microhistory questioned totalizing explanations of historical change; rejected anachronism in all forms; and recovered the voices of individuals left out of traditional historical narratives. This course explores and critiques the method. Participants write an article in their area of interest, informed by microhistory.

**ITAL 2100. Introduction to Italian Studies.**

This seminar, a requirement for graduate students in Italian Studies, has three objectives: 1) to provide a panoramic view of the current research in the interdisciplinary field of Italian studies (literature, history, arts and media); 2) to provide a picture of the professional state of the field, within the framework of more global developments in academia and the job markets; 3) to provide useful information about the resources and the new tools and techniques for research available to students at Brown and elsewhere (special collections in the Brown libraries, digital resources such as data bases, electronic journals, web projects, etc.).

**ITAL 2130A. Dante's Paradiso.**

A close reading of the third canticle of the *Commedia* in its medieval context. While not essential, a knowledge of the *Inferno* and the *Purgatorio* would be desirable. Open to qualified undergraduates.

**ITAL 2130B. The Lyric of Petrarch.**

The style and structure of Petrarch's *Canzoniere* and *Triumphs* and their relationship to Latin and Romance precedents. In Italian.

**ITAL 2150C. Monographic Studies in Major Sixteenth- and Seventeenth-Century Authors.**

Renaissance thought. From Pico della Mirandola to Giordano Bruno.

**ITAL 2160. Family History: Early Modern Methods and Sources.**

This course examines the world's oldest institution during the early modern period (1500-1800). Italian scholars have been especially innovative in advancing our understanding of the early modern family, relying on legal, quantitative, religious, literary, and visual sources in their efforts. Students may concentrate in their longer essay on controversies in family history currently debated in or beyond the Italian context.

**ITAL 2170A. Seminar on Giacomo Leopardi.**

Word and image, thought and feeling in the poetry (*Canti*), dialogues (*Operette Morali*), and philosophical writings (*Pensieri*, *Zibaldone*) of one of the major figures of European Romanticism. In Italian.

**ITAL 2170B. Italian Modernity and the Novel: Twelve Great Books from the Long Nineteenth Century.**

This seminar is designed as a survey of the Italian contribution to the novelistic genre. The course will be structured around 11 great Italian novels in 12 weeks and supplemented by theoretical, methodological and historical considerations that pertain to questions of reading and interpretation, to the novel as a literary genre, and to those problems centered on the specificity of Italian modernity. We will read novels by Foscolo, Manzoni, Verga and Pirandello, among others. Reading knowledge of Italian required.

**ITAL 2190A. Carducci, Pascoli and D'Annunzio.**

Close textual reading of the poetic works of the three great Italian Victorians. In Italian.

**ITAL 2190B. Fascism and Antifascism: Culture and Literature between the Two World Wars.**

No description available.

**ITAL 2190C. La Poesia del Novecento (Twentieth-Century Italian Poetry).**

No description available.

**ITAL 2190D. Non Fiction.**

What is fiction and what is nonfiction? How to read a nonfictional text (diary, description, memoir, etc). Examples from well-known Italian writers (Campana, Ortese, Delfini, Calvino, Celati, Bompiani) and further examples from photo and documentary cinema. All texts, films, and lectures are in Italian.

**ITAL 2190E. Problems and Figures from 1860 to the Present.**

Modern Italian poetry.

**ITAL 2190F. Reading Recent Italian Fiction.**

"Reading" here implies a special kind of attention to the linguistic formulation of the text and the construction of an imaginary hypertext based on the stimuli the text provides. The instructor exemplifies the process and students construct hypertexts of their own based on the texts. Of particular interest is the openness and interpretive richness derived from the readers not belonging to the cultural context in which the texts were produced.

**ITAL 2190G. Letteratura Italiana del Novecento.**

In questo seminario, leggeremo e discuteremo alcune delle più significative opere di narrativa e poesia novecentesca, da Svevo a Calvino e da Montale a Zanzotto, sullo sfondo delle grandi trasformazioni della società e della cultura italiana, dal fascismo alla seconda Guerra mondiale e alla prima repubblica, alla luce delle teorie critiche più influenti, dal futurismo all'ermetismo e dal neo-realismo al post-modernismo. Taught in Italian.

**ITAL 2220. New Perspectives on Fascism.**

Examines the new light shed by recent research on Italian Fascism, placing Italy's Fascist ventennio (1922-45) in a larger European context. Among the questions to be addressed: What explains Mussolini's rise to power and his ability to stay in power? To what extent did Italians become Fascist? What role did force play in ensuring popular allegiance to the regime? What role did the Church play? Did Fascism remake concepts of gender? Attention will be paid to the role of the media, writers, intellectuals, and the arts. Comparison with Nazi Germany and other regimes labeled "Fascist" will be explored.

**ITAL 2300. Seminar in Italian Literature, Culture, and Criticism.**

This seminar focuses on some of the most important contributions made to critical theory made by modern Italian thinkers, beginning with Antonio Gramsci and ending with Giorgio Agamben. Readings include, other than Gramsci and Agamben, works by Antonio Negri, Roberto Esposito and Adriana Cavarero. Open to juniors, seniors, and graduate students.

**ITAL 2450. Exchange Scholar Program.****ITAL 2540D. The Theater that was Rome (HIAA 2540D).**

Interested students must register for HIAA 2540D.

**ITAL 2550. Gender Matters.**

This course examines the impact of gender as a category of analysis, focusing upon its varied repercussions on the study of history, with Italian history serving as one field of focus. Participants interested in other geographical, chronological, and disciplinary areas will have ample time to pursue their interests. The study of gender has profoundly shaped the practice of history in the last half century, and the course outlines its impact and its transformations. The course places in conversation diverse but overlapping historical developments: the impact of the study of gender on history; influences from beyond history that have shared or shaped historians' approach to gender and sexuality; the particular inflections of the study of gender in the case of Italy (1400-1800); the impact of the turn to the study of sexuality and queer studies. The course explores and critiques the limits of our gender constructs (theoretical, methodological, and modern) for explaining the culture of people in the premodern world and beyond the western hemisphere, fields of scholarship where the universality of contemporary notions of gender have been challenged. In English.

**ITAL 2820. Italian Studies Colloquium.**

The Italian Studies Colloquium is a forum for an exchange of ideas and work of the community of Italian scholars at Brown and invited outside scholars. Graduate students present their work in progress, and engage the work of faculty and visitors. They are expected to come prepared with informed questions on the topic presented. Presentations in both Italian and English. Instructor permission required.

**ITAL 2900. Theory and Methods of Foreign Language Teaching.**

Theory and practice of foreign language learning and teaching (theory of language, language learning and acquisition, approaches, methods and techniques, curriculum design, materials development, testing and evaluation). In English.

**ITAL 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**ITAL 2980. Reading and Research.**

Courses on special subjects individually planned and supervised. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ITAL 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## John Nicholas Brown Center for Public Humanities and Cultural Heritage

The John Nicholas Brown Center for Public Humanities and Cultural Heritage supports and strengthens the work of arts and cultural organizations that strive to preserve, interpret, and make the humanities meaningful and accessible. We do this through teaching, research and public engagement initiatives that connect individuals and communities to art, history, and culture. The Center offers innovative hands-on projects and educational programs, including professional development workshops and an Masters degree program, that help practitioners, students, and scholars who want to better understand and contribute to a vibrant culture.

## The A.M. Program in Public Humanities

The Center for Public Humanities administers the master's program in Public Humanities, degree granted by the department of American Studies (<http://bulletin.brown.edu/americanstudies>). This program offers a dynamic interdisciplinary opportunity for students interested in careers in museums, historical societies, cultural planning agencies, heritage tourism, historic preservation, and community arts programs.

For more information regarding admission and program requirements please visit: <http://www.brown.edu/academics/gradschool/programs/public-humanities>

## Public Humanities Courses

The Center lists courses under the American Studies rubric: AMST. Our flexible program draws on Brown University's open curriculum. Elective courses can be selected from approved 1000 and 2000 level courses offered at Brown or RISD. The disciplinary field or departments are not limited to Public Humanities/American Studies course offerings sponsored by the Center for Public Humanities, list as follows:

AMST 1550 Methods in Public Humanities  
 AMST 1903G Oral History and Community Memory  
 AMST 1903Z Shrine, House or Home: Rethinking the House Museum Paradigm  
 AMST 1904I Art/Place  
 AMST 1904L Cultural Heritage, Curation and Creativity  
 AMST 1904R New Narratives, New Media, New Museums  
 AMST 1904U Museum Collecting and Collections  
 AMST 2220D Museums in Their Communities  
 AMST 2540 Methods in Public Humanities **\*required for the A.M.**  
 AMST 2650 Introduction to Public Humanities **\*required for the A.M.**  
 AMST 2651 The Responsive Museum  
 AMST 2652 Community Documentary and Storytelling  
 AMST 2653 Public Art: History, Theory, and Practice  
 AMST 2656 Cultural Policy Planning  
 AMST 2658 Releasing the Imagination in Public Humanities Practice  
 AMST 2660 Projects in Public Humanities  
 AMST 2680 Semester Practicum in Public Humanities **\*required for the A.M.**  
 AMST 2690 Management of Cultural Institutions  
 AMST 2691 Poetry in Service to Schools and the Community  
 AMST 2693 Community Arts with Young People  
 AMST 2695 Museum as Idea  
 AMST 2697 Museum Interpretation Practices  
 AMST 2699 Digital Storytelling

## Public Humanities Faculty

The Center appoints visiting faculty to teach Public Humanities curriculum via the Department of American Studies (<http://bulletin.brown.edu/americanstudies>).

For more information on the John Nicholas Brown Center for Public Humanities & Cultural Heritage, our current courses, faculty, events, exhibits, and initiatives, please visit our website <http://www.brown.edu/Research/JNBC/>.

# Joukowsky Institute for Archaeology and the Ancient World

## Director

Peter Van Dommelen

The Joukowsky Institute for Archaeology and the Ancient World is dedicated to the academic study and public promotion of the archaeology and art of the ancient Mediterranean, Egypt, and the Near East (the latter broadly construed as extending from Anatolia and the Levant to the Caucasus); our principal research interests lie in the complex societies of the pre-modern era.

Although the core efforts of the Joukowsky Institute are archaeological in nature and are located within this broadly defined zone, close ties with all individuals interested in the ancient world, and with archaeologists of all parts of the globe, are welcome and actively encouraged. Joukowsky Institute faculty and students are from a wide range of countries and backgrounds -- and Brown University's fieldwork and research in archaeology and the ancient world reflects and builds on that multiplicity of perspectives.

The goal of the Institute is to foster an interdisciplinary community of interest in the archaeology of the ancient world, and in the discipline of archaeology more generally. Its mandate is to promote research, fieldwork, teaching, and public outreach, with the Institute's associated faculty, students, and facilities serving as a hub for this activity.

For additional information, please visit the Institute's website: <http://brown.edu/go/archaeology>

## Archaeology and the Ancient World Concentration Requirements

The concentration in Archaeology and the Ancient World provides an opportunity to explore the multi-faceted discipline of archaeology while examining the critical early civilizations of the so-called 'Old World'-- that is, the complex societies of the Mediterranean, Egypt, and the Near East. Students will learn about the art, architecture, and material culture of the ancient world, exploring things of beauty and power, as well as the world of the everyday. Concentrators will also learn "how to do" archaeology - the techniques of locating, retrieving, and analyzing ancient remains - and consider how material culture shapes our understanding of the past. Concentrators are encouraged to pursue research opportunities through summer fieldwork, museum experience, or independent study projects.

The undergraduate concentration in Archaeology and the Ancient World provides students with an opportunity to explore the multi-faceted discipline of archaeology, and encourages an interdisciplinary approach to engaging with the ancient world. While the core focus of Archaeology and the Ancient World at Brown University is archaeology and art of the ancient Mediterranean, Egypt, and the Near East, this concentration encourages students to reach beyond this geographic area, to engage with Brown's many strengths in history, epigraphy, art, ethics, engineering, religious studies, and the sciences -- to name just a few. The concentration, with its three distinct but overlapping tracks, is intended to allow students flexibility in structuring their own path through this diverse field of study. All three tracks begin with the same foundation. Students are then expected to experiment with and define their own areas of specialty, establishing expertise in topics such as cultural heritage, archaeological theory, or materials analysis, or in particular regions or time periods. The concentration is also designed to allow students to build progressively upon what they have learned, moving from introductory courses to upper-level seminars.

It is expected that, in completing the requirements for this concentration, students will incorporate courses that offer new perspectives on the complex dynamics of social inequity, exclusion, and difference, and which encourage engagement with the community -- both by enrolling in classes designated as Diverse Perspectives in Liberal Learning (DPLL) and through non-DPLL classes that explore similar themes. Research opportunities, through summer fieldwork, internships, museum experience, or independent study projects, are strongly encouraged.

Within this concentration, the three tracks are:

- **Archaeology and the Ancient World:** the most flexible of the concentration tracks, allowing students to explore any region or time period, and to develop their own areas of focus, such as museum studies, ethics and politics of the past, engineering and materials analysis, cultural heritage, or environmental studies.
- **Classical Archaeology:** for those interested chiefly in the 'classic' civilizations of the Mediterranean (especially Greece and Rome), as well as for those interested in both earlier (prehistoric) and later (medieval) periods in that geographic region.
- **Egyptian and Near Eastern Archaeology:** for those interested chiefly in the cultures of Egypt and the ancient 'Near East' -- Anatolia, the Levant, Mesopotamia -- from prehistoric through Islamic times.

**Required Courses:**

The student must take a total of 10 courses, including:

<b>CORE REQUIREMENTS:</b>	4		
All three tracks share four Core Requirements: two introductory courses providing an overview of archaeology's two central aspects (field methodologies, and art history); and two introductory courses in the core geographical focus of the Joukowsky Institute (Classical/Mediterranean archaeology and Egyptian/Near Eastern archaeology).			
One introductory course in archaeological methodology and/or scientific approaches, preferably:	1		
ARCH 0100 Field Archaeology in the Ancient World			
or a course that addresses similar methodological/scientific topics, which must be approved by the concentration advisor. Appropriate courses could include, for example:			
ARCH 1900 The Archaeology of College Hill			
ANTH 0500 Past Forward: Discovering Anthropological Archaeology			
One introductory course in ancient art history, preferably:	1		
ARCH 0030 Art in Antiquity: An Introduction			
or an ancient art history course approved by the concentration advisor. Appropriate courses could include, for example:			
ARCH 0150 Introduction to Egyptian Archaeology and Art			
ARCH 0520 Roman Archaeology and Art			
One introductory ARCH course in Egyptian or Near Eastern archaeology, art, and/or architecture, for example:	1		
ARCH 0152 Egyptomania: Mystery of the Sphinx and Other Secrets of Ancient Egypt			
ARCH 0360 East Meets West: Archaeology of Anatolia			
One introductory ARCH course in Classical or Mediterranean-archaeology, art, and/or architecture, for example:	1		
ARCH 0270 Troy Rocks! Archaeology of an Epic			
ARCH 0420 Archaeologies of the Greek Past			
<b>TRACK REQUIREMENTS:</b>			
In addition to the Core Requirements above, each of the three tracks requires six additional courses, which allow students to define their own areas of geographic and/or topical specialty.			
<b>Archaeology and the Ancient World:</b>	6		
One ARCH course, of any level, that focuses on a particular thematic or theoretical topic pertaining to archaeology, for example:	1		
ARCH 0315 Heritage In and Out of Context: Museum and Archaeological Heritage			
ARCH 1800 Contemporary Issues in Archaeological Theory			
One ARCH course, of any level, that focuses on a part of the world OTHER than Mediterranean, Egyptian, or Near Eastern, for example:	1		
ANTH 0066U An Archaeology of Native American Art			
ARCH 0160 Buried History, Hidden Wonders: Discovering East Asian Archaeology			
Two additional ARCH courses, on any aspect of archaeology and art, at the 1000 level (or above). Students are encouraged to use these upper-level courses to define a particular core specialty or track, such as a focus on archaeological theory, museum studies, archaeological ethics, materials analysis, cultural heritage, or climate change, for example:	2		
ARCH 1550 Who Owns the Classical Past?			
ANTH 1720 The Human Skeleton			
Two non-ARCH courses which EITHER relate to the study of the ancient world OR to the discipline of archaeology. Outside courses are chosen with the approval of the Concentration Advisor from appropriate 1000 level (or above) offerings in other departments such as, but not limited to: Anthropology, Classics, Egyptology and Assyriology, Environmental Studies, Geological Sciences, History, History of Art and Architecture, Religious Studies. One term of language study, in any relevant (usually ancient) language, may also be counted toward this requirement.	2		
<b>Classical Archaeology:</b>	6		
One course in ancient Greek or Roman history, for example:	1		
CLAS 1210 Mediterranean Culture Wars: Archaic Greek History, c. 1200 to 479 BC			
CLAS 1220 The Fall of Empires and Rise of Kings: Greek History 478 to 323 BC			
CLAS 1310 Roman History I: The Rise and Fall of an Imperial Republic			
CLAS 1320 Roman History II: The Roman Empire and Its Impact			
One course in either Ancient Greek or Latin, at a level beyond the first year of study, for example:	1		
GREK 0300/0400 Introduction to Greek Literature			
LATN 0300/0400 Introduction to Latin Literature			
Two courses in Mediterranean (prehistoric, Greek, Roman, medieval) archaeology and art, at the 1000 level (or above).	2		
One ARCH course, of any level, that focuses on a part of the world OTHER than Mediterranean, Egyptian, or Near Eastern OR focuses on a particular thematic topic pertaining to archaeology, for example:	1		
ARCH 1490 The Archaeology of Central Asia: Alexander in Afghanistan, and Buddhas in Bactria			
ARCH 1540 Cultural Heritage: The Players and Politics of Protecting the Past			
One non-ARCH course which EITHER relates to the study of the ancient world OR to the discipline of archaeology. Outside courses are chosen with the approval of the Concentration Advisor from appropriate 1000 level (or above) offerings in other departments such as, but not limited to: Anthropology, Classics, Egyptology and Assyriology, Environmental Studies, Geological Sciences, History, History of Art and Architecture, Religious Studies.	1		
<b>Egyptian and Near Eastern Archaeology:</b>	6		
Two courses in Egyptian and Near Eastern archaeology and art at the 1000 level (or above).	2		
Two terms of course work in a pertinent ancient language (such as Akkadian, Coptic, Classical Hebrew, Middle Egyptian).	2		
One ARCH course, of any level, that focuses on a part of the world OTHER than Mediterranean, Egyptian, or Near Eastern OR focuses on a particular thematic topic pertaining to archaeology, for example:	1		
ARCH 0335 Archaeology of the Andes			
ARCH 1170 Community Archaeology in Providence and Beyond			
One non-ARCH course which EITHER relates to the study of the ancient world OR to the discipline of archaeology. Outside courses are chosen with the approval of the Concentration Advisor from appropriate 1000 level (or above) offerings in other departments such as, but not limited to: Anthropology, Classics, Egyptology and Assyriology, Environmental Studies, Geological Sciences, History, History of Art and Architecture, Religious Studies.	1		
<b>TOTAL (including Core and Track Requirements):</b>	10		

<sup>1</sup> All formally cross-listed courses, regardless of home department, can be considered ARCH courses and can fulfill the relevant concentration requirement(s). There is no limit on the number of cross-listed courses that can count toward the completion of a concentration.

<sup>2</sup> Students who are doing a double concentration are allowed up to two courses that are also counted toward (i.e., overlap with) their second concentration to fulfill Archaeology concentration requirements.

## Fieldwork, Study Abroad, and Capstone Experiences

Students are strongly encouraged to consider participating in a field project, most typically after sophomore or junior year. The Joukowsky Institute's Assistant Director and other faculty members can provide suggestions about how to explore and fund possible field projects. For each of the tracks, a capstone experience may be substituted for one of these required courses. With the permission of the Assistant Director or the Director of Undergraduate Studies, up to three successfully completed courses, from relevant and accredited study abroad programs, may be counted towards the concentration requirements. Field school courses that provide formal university transfer credit, and official transcripts, may also be used to fulfill concentration requirements.

## Honors Concentrations

An Honors concentration in any of these tracks requires the successful completion of all the standard requirements with the addition of an Honors thesis. For the preparation of this thesis, students will ordinarily enroll in ARCH 1970 during the first semester of the senior year and ARCH 1990 during the second semester of the senior year (these courses may not be taken S/NC, nor may they be used to satisfy the standard requirements of the concentration). In order to qualify for honors, students must have received more A's than B's in concentration courses completed.

Honors concentrations are recommended for students considering graduate work in the discipline of archaeology. Any student interested in a course of graduate study should speak to the Joukowsky Institute's Assistant Director and faculty members as soon as possible, not least for advice about additional forms of preparation. Graduate work in the archaeology of the ancient world, for example, requires knowledge of appropriate ancient, as well as modern, languages. Students should start work on acquiring these skills as early as possible.

## The Honors Thesis

The Honors thesis is an extended essay, usually of between 40 and 60 pages in length, researched and written under the supervision of a faculty advisor and second reader during the senior year (during which the student must be enrolled in ARCH 1970 in the Fall and ARCH 1990 in the Spring semester).

Where appropriate, the advisor or the reader, but not both of them, may be in a unit other than the Joukowsky Institute for Archaeology and the Ancient World. The specific topic and approach of the thesis are worked out between the student and the thesis advisor, with assistance from the student's second reader. This process should begin in the latter part of the student's junior year.

A preliminary title and one page outline of the proposed Honors thesis is due to the Joukowsky Institute's Assistant Director and the thesis advisor by May 15th of the junior year.

The deadlines for thesis drafts, and for final thesis submission, will be agreed between the student and the faculty advisors. It is expected that students will have submitted at least one full chapter to their primary advisor by the end of the student's penultimate semester. The deadline for final thesis submission typically should be on or before April 15th, and must be no later than the first day of Reading Period in the final semester of senior year. Both a bound and an electronic version of the final thesis must be submitted to the Joukowsky Institute by May 1, via email to [joukowsky\\_institute@brown.edu](mailto:joukowsky_institute@brown.edu).

The completed thesis will be evaluated by the advisor and second reader, who will discuss its strengths and weaknesses in a joint meeting with the student; they will then make a recommendation concerning Honors, and also agree a grade for ARCH 1990.

The Honors concentrators will be asked to make a short public presentation about their work; this event will be organized by the Joukowsky Institute's Assistant Director, and usually occurs during or shortly after Reading Period.

## Evaluation

The Director of Undergraduate Studies will review the student's overall record, in addition to the thesis evaluations. If all requirements have been successfully met, the recommendation will be made that the student graduates with Honors.

## Archaeology and the Ancient World Graduate Program

The Joukowsky Institute offers graduate study leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) in Archaeology and the Ancient World.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/archaeology-and-ancient-world-0>

## Courses

### ARCH 0030. Art in Antiquity: An Introduction.

What went into the creation of the Parthenon? Who lived in the Tower of Babel? Why do we still care? This course offers an introduction to the art, architecture, and material culture of the ancient world. Things of beauty and of power will be explored, from Egyptian pyramids and Near Eastern palaces, to the 'classical' art of Greece and Rome.

### ARCH 0033. Past Forward: Discovering Anthropological Archaeology (ANTH 0500).

Interested students must register for ANTH 0500.

### ARCH 0050. Archaeological Field Work.

Focuses on the aims, scope, and tools of field archaeology, and the nature of archaeological evidence. Emphasizes interdisciplinary field work techniques and the composition, function, and responsibilities of an excavation staff. Examines systematic versus ad hoc excavations and their respective problems of preservation. Students excavate model sites in a laboratory and present a team report upon completion.

### ARCH 0100. Field Archaeology in the Ancient World.

Always wanted to be Indiana Jones? This course, focusing on the Mediterranean world and its neighbors in antiquity, interprets field archaeology in its broadest sense. In addition to exploring "how to do" archaeology - the techniques of locating, retrieving, and analyzing ancient remains - we will consider how the nature of these methodologies affects our understanding of the past.

### ARCH 0150. Introduction to Egyptian Archaeology and Art.

An introductory survey of the archaeology, art and architecture of ancient Egypt, ranging in time from the prehistoric cultures of the Nile Valley through the period of Roman control. While the course will examine famous features and characters of ancient Egypt (pyramids, mummies, King Tut!), it will also provide a wide-ranging review of the archaeology of this remarkable land.

### ARCH 0152. Egyptomania: Mystery of the Sphinx and Other Secrets of Ancient Egypt.

The pyramids, tombs, and mummies discovered during the first excavations in Egypt created a colorful but highly romanticized image of this Land of the Pharaohs. More recent archaeological research has unearthed new details about the daily lives of the workers who built those pyramids, or Egypt's cultural and economic connections throughout the Mediterranean. This course will explore how both early and recent archaeology has enriched our perception of the Gift of the Nile, while still leaving more mysteries yet to solve.

### ARCH 0153. The Pyramids in Context: Archaeology of Life and Religion of Death in Old Kingdom Egypt (EGYT 0500).

Interested students must register for EGYT 0500.

**ARCH 0155. People Without History: Archaeology of Atlantic Africa and the Diaspora.**

Too often 'Western' historical narratives consider Africans and African Diasporans as 'People Without History'. Such a notion also refers to peoples who cultures do not, or possess few formally written histories. This class employs archaeological evidence in order to dismantle the colonial library, exploring local histories that have been erased, silenced and marginalized, investigating histories of imperialism, colonialism, genocide, slavery, resistance and black nationalism. Enrollment limited to 50.

**ARCH 0156. Architecture and Urbanism of the African Diaspora (HIAA 0770).**

Interested students must register for HIAA 0770.

**ARCH 0160. Buried History, Hidden Wonders: Discovering East Asian Archaeology.**

What do Peking Man, human sacrifice, buried armies, lost cities, and silk routes have to do with one another? All are part of the rich and varied legacy of East Asian archaeology, which is today being re-written by spectacular new discoveries little known to the West. Beginning with Asia's earliest hominin inhabitants, this course will explore the origins of agriculture, early villages and cities, ancient writing systems, and changes in ritual practice through time. We will also discuss the current state of archaeological research in Asia, focusing on site preservation and the political roles of archaeology.

**ARCH 0161. Arts of Asia (HIAA 0021).**

Interested students must register for HIAA 0021.

**ARCH 0162. Introduction to Chinese Art and Culture (HIAA 0040).**

Interested students must register for HIAA 0040.

**ARCH 0200. Sport in the Ancient Greek World.**

Athletics and sports were as popular and significant in the ancient Greek world as they are today, and so offer an excellent introduction to its archaeology and history. This class will discuss the development of Greek athletics, the nature of individual events, the social implications of athletic professionalism, women and athletics, and the role of sport in Greek education.

**ARCH 0201. Sport in the Ancient Greek World (CLAS 0210O).**

Interested students must register for CLAS 0210O.

**ARCH 0201L. Who Owns the Classical Past? (CLAS 0210L).**

Interested students must register for CLAS 0210L.

**ARCH 0203. Who Owns the Past? (ANTH 0066D).**

Interested students must register for ANTH 0066D.

**ARCH 0220. Fake! History of the Inauthentic.**

What is a fake? Who gets to decide what is authentic? Greek statues, Chinese bronzes, Maya glyphs. Have fraudulent objects always existed? Galileo's signature, a centaur's skeleton, Buddhas bearing swastikas. Are all fakes the same? If not, how are they different? Why do people make forgeries? This course revolves around the history of the inauthentic through a diachronic exploration of objects.

**ARCH 0250. Intimate Stories, Imagined Landscapes.**

Stories carry us to imaginary worlds other than our own. An arresting story engages us deeply, opening the doors to fantastic places and times. Such enthralling narratives have even shaped archaeology's assumptions about places and the people who inhabit them -- and, in turn, archaeological discoveries have influenced ideas about real landscapes through fiction. This course explores novels and narrative fiction as a way of understanding how people and cultures imagine landscapes and these places' roles in human lives past and present.

**ARCH 0270. Troy Rocks! Archaeology of an Epic.**

What do Brad Pitt, Julius Caesar, Dante, Alexander the Great, and countless sports teams have in common? The Trojan War! This course will explore the Trojan War not only through the archaeology, art, and mythology of the Greeks and Romans but also through the popular imaginings of cultures ever since, to figure out what "really" happened when Helen ran off and Achilles got angry and the Greeks came bearing gifts. Enrollment limited to 19 first year students.

**ARCH 0293. Postcolonial Matters: Material Culture between Colonialism and Globalization (ANTH 0066T).**

Interested students must register for ANTH 0066T.

**ARCH 0295. Crafts and Production in the Ancient World: Making Material Culture.**

The manufacture of artifacts distinguishes us from all other species. However, archaeologists often struggle with interpreting material culture without understanding its origins and production. This course will examine how things are made, considering craftsmanship and agricultural production, from raw materials to finished objects: sculpture and mosaics, bricks and concrete, ceramic and glass, metallurgy, tanneries, oil, wine, and perfumes. Through case studies and hands-on activities, students will consider the importance of the technological processes that produce artifacts for archaeology's investigation of our human past.

**ARCH 0297. Material Culture: Material Nature.**

We are living in a material world (Madonna, 1984). Why do you love your phone, or car, or shoes so much? Each week this course explores a moment in the human experience: childhood and coming of age, marriage and divorce, home-making and transience, grief, death, and burial. In thinking about the material culture of past societies, we will challenge archaeological concepts of acculturation and cultural appropriation. And, in examining our own everyday objects we will contemplate how style impacts identity -- or vice versa.

**ARCH 0300. 13 Things: Archaeology, Material Culture, Science Studies and Design.**

The course will explore a range of approaches -- material culture studies, science studies, design studies, consumption studies, the sociology of technology, archaeology, phenomenology -- in dealing with 13 things: the wheel, a Neolithic Megalith, an Ancient Greek perfume jar, the castle of Acrocorinth, Greece, a Moroccan watermill, a map, the pocket watch, barbed wire, the light bulb, a surgical blade, the portable radio, a Leica IIIc 35mm camera, and the personal computer. Returning to the etymology of a thing, the course argues that things are best conceived as gatherings of achievements that are neither wholly exclusive to any single era nor any immediate set of relations.

**ARCH 0302. Object Histories: The Material Culture of Early America (HIST 0550A).**

Interested students must register for HIST 0550A.

**ARCH 0303. tiny: Miniature Might and Meaning.**

Egyptian pyramids, Roman aqueducts, Easter Island heads—colossal artifacts are immediately recognizable as embodiments of power. The diminutive—though less theorized among archaeologists, anthropologists, and art historians—is just as potent and alluring. Even across vast stretches of space and time, tiny things enchant and incite wonder. A microscopic Bible, a Renaissance micro-mosaic, a sculpture of hell complete with sinners carved out of a human tooth. This course is a cross-cultural exploration of the power of the miniature, the undersized, the teeny-weeny.

**ARCH 0305. Glass from the Past: Glimpses into the History, Technology, and Artistry of Molten Material Culture.**

Glass is unquestionably a fundamental part of modern life, but what is the story of glass and what makes it special? We will trace the 5000-year history of glass, from its discovery in the third millennium BC to its mass production in the 19th-20th centuries, exploring themes like technology, innovation, and craft. Archaeological and art historical evidence will be combined with anthropological and ethnographic approaches, including discussions with artisans, museum visits, and trips to the RISD "hot shop" to see glassblowers in action. Enrollment limited to 20.

**ARCH 0307. Gold: The Culture of a "Barbarous Relic" (ANTH 0250).**

Interested students must register for ANTH 0250.

**ARCH 0310. Interactions with the Dead: Past and Present.**

Eventually, face it, you are going to die. Death is an inevitable, and an inescapable component of life. There are, however, certain moments that bring the living closer to the dead, which this course will explore by analyzing interactions between the dead and the living in a range of contexts -- including religious, cultural, commercial, legal, and ethical. We will survey the diversity of human reactions to death and dead bodies by considering examples from the ancient and modern world.

**ARCH 0311. Death and the Afterlife in the Ancient World (RELS 0750).**  
Interested students must register for RELS 0750.

**ARCH 0312. History of Medicine I: Medical Traditions in the Old World Before 1700 (HIST 0286A).**  
Interested students must register for HIST 0286A.

**ARCH 0315. Heritage In and Out of Context: Museum and Archaeological Heritage.**

We understand the past in part through a complex blend of artifacts, monuments, and landscapes. Yet each of these categories poses major issues regarding their preservation, conservation and curation, and how we use them to educate and to indoctrinate. This course will not preach any specific line, but encourage students to debate these highly complicated issues. Case studies will include the international diaspora of antiquities from the Enlightenment to the present, the impact of war and revolution, and numerous aspects of museum practice. Enrollment limited to 50.

**ARCH 0317. Heritage in the Metropolis: Remembering and Preserving the Urban Past.**

Urban heritage – from archaeological sites and historic architecture to longstanding cultural practices – is increasingly threatened by the exponential growth of cities around the globe. Most critically, the complex histories and lived experiences of the diverse communities who have inhabited and shaped cities are often in danger of being erased and forgotten today. This course examines how we might remember and preserve this urban past – and the tangible sites and artifacts that attest to it – in light of the social and political dynamics of cities in the present.

**ARCH 0320. Media in Archaeology, or Archaeology in Media?.**

Indiana Jones, Lara Croft, the Discovery Channel: media has, to an unprecedented degree, shaped public perceptions of the discipline of archaeology, its practices and its values. This course will build critical awareness of how the media uses archaeology and how archaeologists use the media, for good and ill. Students will create digital narratives from their own research, and become competent ambassadors for presenting archaeological research and work in a scientific and engaging way. Enrollment limited to 40.

**ARCH 0325. Dead White Guys: Greco-Roman Civilization and American Identity.**

Why does classical antiquity matter? How did a group defined as white and European come to represent America's ancestors? And by emphasizing this "heritage," who do we exclude? This course looks at film, popular non-fiction, education policy, public art, architecture, and archaeology, to understand how the myth of Greco-Roman origins was adopted by America's founders, and how this affects issues of race and belonging today.

**ARCH 0332. Classic Mayan Civilization (ANTH 0520).**

Interested students must register for ANTH 0520.

**ARCH 0334. Introduction to South American Archaeology (ANTH 0505).**

Interested students must register for ANTH 0505.

**ARCH 0335. Archaeology of the Andes.**

Provides a survey of the archaeology of the Andean region of South America (parts of modern-day Peru, Bolivia, Ecuador, Chile, Colombia, and Argentina). From the arrival of the first Americans to the transformation of indigenous societies under Spanish rule, the course will introduce vital "new World" civilizations such as the Moche and Inka. The course will also explore the politics and practice of archaeological research in the region today. Enrollment limited to 55.

**ARCH 0338. An Archaeology of Native American Art (ANTH 0066U).**

Interested students must register for ANTH 0066U.

**ARCH 0340. Bad Things: Archaeologies of New World Vices.**

Drinking, smoking, prostitution, gambling, chocolate, and witchcraft – this may sound like a lot of fun, but are these bad things? Since the first European contact in the Americas, colonists were introduced to new substances, practices, and worldviews and brought their own vices to new territories. This course will use material culture to analyze the everyday lives of these New World inhabitants who were so good at being so bad; we will also discuss how colonial discourse and histories affect our lives today.

**ARCH 0351. Introduction to the Ancient Near East (ASYR 0800).**

Interested students must register for ASYR 0800.

**ARCH 0360. East Meets West: Archaeology of Anatolia.**

The crossroads between East and West in the ancient Mediterranean, Anatolia (modern Turkey) gave rise to the great Hittite Empire, the legendary kings Croesus and Midas, and was the scene of battles between Greeks, Persians, Romans, Byzantines, and Turks for world supremacy. In this course, we survey the archaeological history of human settlement in Anatolia from the Ice Age to the Middle Ages, tracing changes in art, economy, landscape, and religion.

**ARCH 0370. Before the Islamic State: The Archaeologies of Ancient Mesopotamia.**

Front-page news stories report the often-horrific actions and assertions of the Islamic State of Iraq and Syria (ISIS). This part of the world -- ancient Mesopotamia, the "cradle of civilization" -- is home, however, not only to modern geopolitical conflict, but to the world's often equally violent earliest states and empires. This class introduces students to the archaeology and history of this extraordinarily rich region, whose cultures also pioneered the development of writing, astronomy, mathematics, urbanism, and beer.

**ARCH 0380. Archaeology of Iran.**

An archaeological survey of the origins and development of the Iranian civilizations. Analysis of settlements, history, art, architecture, and characteristics of specific archaeological sites and their artifacts ranging from prehistoric to the Hellenistic period.

**ARCH 0382. Pre-Islamic Empires of Iran (HIAA 0031).**

Interested students must register for HIAA 0031.

**ARCH 0390. Archaeology of Palestine.**

Traces the prehistory of Palestine (modern Israel, Syria, Lebanon, Jordan) from its beginnings in the Paleolithic to end of the Byzantine period. Surveys history of archaeological research in this area, emphasizing significant excavations and their artifacts. Develops an understanding of the art, architecture, and modes of life of humankind from age to age, the changes introduced from one period to another, and causes and effects of those changes.

**ARCH 0400. City and Sanctuary in the Ancient World.**

Examines the physical dimensions of the ancient city and the ancient sanctuary through archaeological evidence with special attention to aesthetic planning, urban planning and management, and the concept of public monumental art as developed in the ancient world.

**ARCH 0402. Muslims, Jews and Christians in Medieval Iberia (HIAA 0460).**

Interested students must register for HIAA 0460.

**ARCH 0404. Cathedrals and Castles (HIAA 0420).**

Interested students must register for HIAA 0420.

**ARCH 0405. State of Siege! Walls and Fortifications in the Greek and Roman World.**

Warfare was endemic in the ancient world, and walls were therefore ubiquitous. This course will examine the most spectacular fortifications of the Graeco-Roman world, from Bronze Age citadels in Greece to the Roman frontiers. We will learn how to build walls and fortresses, how to defend them, and how to breach them by studying some of the best walls and famous sieges of Antiquity. Enrollment limited to 50.

**ARCH 0407. Hadrian's Wall: Soldiers and Civilians on Rome's Northern Frontier.**

Explore the archaeology of one of Great Britain's grandest monuments, Hadrian's Wall, and follow its path through the history and archaeology of Roman Britain. Using the fortification as both inspiration and guide, students will learn about the life on Rome's northern frontier, from Rome's first occupation in the Iron Age to Roman withdrawal centuries later. The wall's symbolic and real impact will illuminate the tangible ways archaeology can teach us about religion, race, the military, politics, art, architecture, and the everyday lives of people in one of Rome's most distant provinces.

**ARCH 0410. Mediterranean Bronze Age.**

Snake goddesses and bull leaping, labyrinths and gold masks, Linear B and Homeric heroes: these are only some of the most famous things about the Minoan and Mycenaean cultures of Bronze Age Crete and Greece. This class will also explore questions about the historicity of the Trojan War, trade and exchange; ritual landscapes; the origins of writing; death and burial; the eruption of the Thera volcano; and the collapse of the Mycenaean palaces.

**ARCH 0412. From Gilgamesh to Hector: Heroes of the Bronze Age.**

Swift-footed Achilles, god-like Hector, and Gilgamesh the tall, magnificent, and terrible! They are heroes of the Bronze Age, which produced the world's first cities, empires, and texts. This class explores the concept of "hero" by placing it within its eastern Mediterranean Bronze Age context, using archaeological evidence alongside contemporary and later textual evidence.

**ARCH 0420. Archaeologies of the Greek Past.**

The Onion once reported that ancient Greek civilization was a complete modern fraud, since obviously no one culture could have invented so much, not least all that Great Art and Architecture. But they did. This course will explore the material world of ancient Greece, from the monumental (the Parthenon) to the mundane (waste management), and everything in between. Enrollment limited to 50.

**ARCH 0423. Monuments and Monsters: Greek Literature and Archaeology (COLT 0811H).**

Interested students must register for COLT 0811H.

**ARCH 0425. The Agora: History at the Heart of Athens.**

Part city hall, part church, part mall, part stadium, part law court, part red light district, the Agora of ancient Athens has seen it all, from Neolithic to modern times. This "marketplace" is most famous for its Classical history, when figures such as Pericles, Socrates, and Demosthenes walked and talked there. This course, however, will consider the long life and impact of this civic space, including its ongoing and often problematic archaeological heritage. Enrollment limited to 50.

**ARCH 0440. Archaeologies of the Ancient "Middle East".**

What were Neanderthals really like? Why stop hunting and start farming? This course will explore these and other questions through an examination of the earliest archaeologies of the Middle East. Topics will include the evidence for the first hominids and humans in the region, the nature of hunter-gatherer existence, the origins of cultivation and pastoralism, and the rise of social inequality.

**ARCH 0446. War and Peace in the Hebrew Bible and its Environment (JUDS 0670).**

Interested students must register for JUDS 0670.

**ARCH 0450. Archaeology of Jerusalem.**

Examines the archaeology of the city of Jerusalem from David's conquest in ca. 1000 B.C.E. through the Crusaders' defeat in 1187 A.D. The contemporary literary sources as well as the more recent scholarly debates and discoveries help us understand the material remains of the relevant periods.

**ARCH 0520. Roman Archaeology and Art.**

Anyone who has ever watched 'Gladiator', 'Spartacus', 'Life of Brian' or 'Bugs Bunny: Roman Legion Hare' has some image of Rome, the Romans and their empire. This course, while exploring and assessing these influential popular preconceptions, introduces a more balanced view of Roman archaeology and art, examining not only the 'eternal city' of Rome, but its vast and diverse imperial domain.

**ARCH 0523. Roman Art and Architecture: From Julius Caesar to Hadrian (HIAA 0340).**

Interested students must register for HIAA 0340.

**ARCH 0525. The Other Side of Rome: Daily Life in the Roman Empire.**

What did the Romans ever do for us? Toilets, bars, firefighters, and dry cleaning, to name just a few things. Surprisingly, daily life in the Roman empire was not too different from our own. This course will examine numerous aspects of Roman life – including housing, street life, shopping, military, sanitation, and even sex – largely from the perspective of the archaeological evidence, especially from some of the best preserved cities, Rome and Pompeii.

**ARCH 0530. Hannibal ad portas! Fact and Fiction on Carthage and the Punic World.**

"Hannibal stands at the gates": Roman parents would terrify their children with these words. And many others have been haunted by Hannibal Barca: the Carthaginian general still fascinates the European imagination, not least his epic trek over the Alps with three dozen elephants. This course explores fact and fiction about Hannibal and his world, holding up historical and mythical records against hard archaeological evidence. Enrollment limited to 50.

**ARCH 0535. Labor and Technology in the Roman World.**

Recent television programs like the History Channel's "Engineering an Empire" depict the Romans as geniuses pursuing a "remarkably advanced" lifestyle, but who were the people behind these technological accomplishments and what were the implications for the average Roman? This course investigates the implications of Roman technology on daily life and labor. Topics include transportation and trade, agriculture, crafts production, mining, sanitation, and warfare. We will also explore issues concerning ancient and modern perspectives on Roman technology and labor. Enrollment limited to 20.

**ARCH 0540. Ancient Rome: Art, Archaeology and Civic Life from the End of the Republic through the Early Empire.**

This survey course will familiarize students with the art and architecture of Rome during the early Imperial era (ca. 40 BC – AD 140), through investigation of significant sites, monuments and museum collections in Rome and locations throughout southern Italy. Items considered will include both monumental and domestic architecture, wall painting, mosaics, sculpture, coins, epigraphic evidence, as well as maps and ancient sources.

**ARCH 0542. The Visual Culture of Early Modern Rome (HIAA 0560).**

Interested students must register for HIAA 0560.

**ARCH 0550. Late Roman and Early Christian Art and Architecture.**

An introduction to the relationship between Roman art and the art of emerging Christianity. The course begins with the Pantheon and ends with the Hagia Sophia.

**ARCH 0563. Toward a Global Late Antiquity: 200-800 CE (HIAA 0321).**

Interested students must register for HIAA 0321.

**ARCH 0600. Archaeologies of the Muslim World.**

Muslim societies are built upon a rich archaeological heritage that spans a region from Spain to China. Since the spread of Islam in the 7th century, its legacy of cities, monuments, and artifacts trace more than a millennium of cultural transformations among the various peoples and traditions of the Mediterranean, Middle East and beyond. Through discussion of major sites and hands on work with a collection of artifacts this course explores that heritage for what it can tell us about the social practices and historical processes that have formed the Muslim world.

**ARCH 0643. The Architecture of Islam (HIAA 0041).**

Interested students must register for HIAA 0041.

**ARCH 0650. Islamic Civilizations.**

This introduction to early Islamic civilization will examine the interrelationship between the emerging Islamic religious tradition and the development of specifically Muslim social institutions, the role of ethnic and religious minorities, and the flowering of Islamic thought and material culture. Students will study archaeology, political and social histories, visual arts, and textual traditions to explore the evolution and institutionalization of Islam from Spain to Central Asia.

**ARCH 0666. Cult Archaeology: Fantastic Frauds and Meaningful Myths of the Past.**

The pyramids and Stonehenge built by aliens? The power of the Mummy's Curse? These myths couldn't be true... or could they? Cult Archaeology examines popular and fantastic interpretations of archaeological remains presented in the press and popular media. This course finds the logical flaws in pseudoscientific explanations and the biases that underlie them. Discover the "truth" about archaeology!

**ARCH 0676. Pirates of the Caribbean: Scalawags, Sailors, and Slaves.**

Avast ye scurvy dogs! Come study the barbarous buccaneers that roved the high seas of the Caribbean from the sixteenth to the eighteenth century: their daily lives and plundered goods, their ships and hideaways. We will explore the havoc piracy caused, and the legends left behind -- Blackbeard, Captain Morgan, and even Captain Jack Sparrow. Just as importantly, we will investigate the economics and geopolitics behind the rise of piracy, with an emphasis on the trans-Atlantic slave trade.

**ARCH 0677. Pirates! Archaeologies of Piracy in the Atlantic World (ANTH 0515).**

Interested students must register for ANTH 0515.

**ARCH 0678. Underwater in the Mediterranean: An Introduction to Maritime Archaeology.**

Shipwrecks, sunken cargoes, coastal ports: all contribute to our understanding of the maritime world of the past, not least that of the Mediterranean Sea. This course will explore the Mediterranean's ancient seafaring heritage over time, in particular by studying ancient ships and harbors as remarkable examples of social and technological innovation and enterprise. The methodological challenges faced by archaeologists working on underwater and coastal 'sites' will also be examined. Enrollment limited to 50.

**ARCH 0680. Water, Culture and Power.**

Water is the source of life. In the midst of global climate change, environmental crises over water resources, and increasingly ubiquitous political debates over water, we are beginning to recognize humans' complete dependence on water. This course investigates our long-term attachment and engagement with water from the point of view of archaeological, environmental, visual, literary, and historical sources. From flowing rivers to churning seas and from aqueducts to public fountains, we will explore the cultural and environmental aspects of water in the Near East, Mediterranean, and Europe beginning with the Last Ice Age and ending in the modern day.

**ARCH 0682. Powering the Past: Environmental Histories of Energy Use and Social Change (ENVS 0710).**

Interested students must register for ENVS 0710.

**ARCH 0683. From Fire Welders to Empire Builders: Human Impact on the Global Environment before 1492 (HIST 0270A).**

Interested student must register for HIST 0270A.

**ARCH 0717. Architecture of the House Through Space and Time (HIAA 0081).**

Interested students must register for HIAA 0081.

**ARCH 0720. Pilgrimage and Travel in the Ancient World.**

From Canterbury to Mecca, Rome to Lake Titicaca, throughout history people have traveled far and wide, often under difficult conditions, to visit sacred places. But who were these people, where and why did they go, and how did they get there? This course will explore the practice and pragmatics of pilgrimage, relying on material and literary evidence from modern and ancient case studies around the world. Enrollment limited to 20.

**ARCH 0730. The Secrets of Ancient Bones: Discovering Ancient DNA.**

New analyses of ancient DNA preserved for millennia in bones and soils have revolutionized the field of archaeology. Suddenly, archaeologists have gained new insight into human origins and migrations, diseases, agriculture, and even the slave trade. Recent genetic case studies will provide a lens for learning about the archaeology of diverse world regions and time periods, from Oceania to Mesoamerica and from the Paleolithic through recent history. Topics will include: genetic relationships between humans, Neanderthals, and Denisovans; the peopling of the globe; diasporas; extinction and de-extinction; and plant and animal domestication.

**ARCH 0740. Revolutions and Evolutions in Archaeology.**

Humankind has had a revolutionary past -- or so archaeology would lead us to believe. The earliest evidence for language, ritual, and the arts -- dating back to the extinction of the Neanderthals -- is known as the "Human Revolution". The time when hunter-gatherers became farmers? The "Neolithic Revolution". And when they started living in cities? The "Urban Revolution". This course will explore the historical reasons for these revolutionary labels, and consider instead these "revolutions" as gradual processes (or evolutions). Enrollment limited to 50.

**ARCH 0750. Women in the Ancient Mediterranean World.**

Women represent half of humanity, but they have been greatly underrepresented in studies of past cultures. This course examines not only what women of the Near East, Egypt, Greece, and Rome actually did and did not do, but also how they were perceived in society. Focusing on material and visual cultures, but also incorporating historical and literary evidence, we will investigate the complexities of women's lives in the ancient Mediterranean, as well as the roots of modern conceptions and perceptions of women.

**ARCH 0760. Palaces: Built to Impress.**

Ancient palaces capture the imagination as grand, breathtaking manifestations of power and wealth. These were the residences of kings, queens, and courtiers, built to impress with their echoing halls, exquisite paintings and statuary, fragrant gardens, and sumptuous reception rooms. This course explores the palaces of ancient Egypt, Sudan, Syria, Israel, Turkey, Greece, and beyond, delving into how these monumental structures manipulated the senses, the body, behavior, and the mind. We also visit "palaces" in and around Providence, exploring firsthand how such architecture is designed to inspire awe, respect, and subservience.

**ARCH 0763. The Private Life of the Privy: A Secret History of Toilets.**

It's usually unspoken, but we all know the truth: everybody poops. This class starts with some basic questions: what is poo; what are toilets, cesspits, and latrines; and how have these changed over time. But where we go, what "equipment" we use, what goes into the loo, and the morals and ideals imbued in that act vary vastly between cultures -- touching on complex questions of gender, religion, disease, technology, and science. Combining advanced scientific approaches with material and cultural analyses, this course will demonstrate that even a seemingly simple biological act can reveal a culture's most fundamental secrets.

**ARCH 0770. Archaeology of Eating and Drinking.**

Everybody eats -- but patterns of eating and drinking vary dramatically from culture to culture. This course will examine the social roles and meanings of eating and drinking from prehistory to the present, using case studies from the Mediterranean and other parts of the world. How are identity, gender, and power negotiated through food and drink? What are the roles of the body, the senses, and memory? What does a history of humanity look like from the point of view of the consuming body?

**ARCH 0771. Foragers, Farmers, Feasts, and Famines: An Anthropology of Food (ANTH 0680).**

Interested students must register for ANTH 0680.

**ARCH 0775. Farm to Table: Foodways and Gastro-Politics in the Ancient Near East.**

This course provides an introduction to the culture, economy, and politics of food in the ancient Near East. We will not only investigate the day-to-day mechanics of food production, cooking, and consumption; we will also develop an appreciation for changing food fashions, for the etiquette of eating and drinking, and for the complex world of gastro-politics. We will even explore the ancient kitchen using our own hands, mouths, and stomachs as a guide.

**ARCH 0785. Of Dice and Men: Games in Human Societies Past and Present.**

From ancient dice games, marathons, and gladiator battles to virtual worldbuilding and mobile phone games, students in this course will explore the roles of competition and play in cultures. But, equally importantly, students will play games! We will consider games through the lenses of anthropology, archaeology, psychology, and philosophy. And by playing games, both ancient and modern, students will question how games are a distinctly human phenomenon and play essential parts in human lives, in ways that are not entirely obvious or expected.

**ARCH 0800. Alexander the Great and the Alexander Tradition.**

This course focuses on a single historical figure, Alexander the Great, using him as a point of departure for exploring a wide range of problems and approaches that typify the field of Classical Studies. How knowledge of Alexander has been used and abused provides a fascinating case study in the formation and continuous reinterpretation of the western Classical tradition.

**ARCH 0801. Alexander the Great and the Alexander Tradition (CLAS 0810A).**

Interested students must register for CLAS 0810A.

**ARCH 1050. Old World and New World Perspectives in Archaeology.**

This course examines how archaeologists working on different sides of the world study the past. Archaeology in the Old World and New World has developed on parallel, but separate, trajectories. While these approaches share methods and theories, they often interpret archaeological data in alternative or even contradictory ways. In this course we will view archaeological topics from both perspectives, using examples from the Mediterranean and Mesoamerica, to try to better understand, and perhaps bridge the gap between, some of our differences. Prerequisite: An introductory course in archaeology, either through the Joukowsky Institute or the Anthropology department.

**ARCH 1052. Global Historical Archaeology (ANTH 1620).**

Interested students must register for ANTH 1620.

**ARCH 1053. Global Origins of Plant and Animal Domestication (ANTH 1670).**

Interested students must register for ANTH 1670.

**ARCH 1054. Indians, Colonists, and Africans in New England (ANTH 1624).**

Interested students must register for ANTH 1624.

**ARCH 1056. Indigenous Archaeologies (ANTH 1125).**

Interested students must register for ANTH 1125.

**ARCH 1100. Archaeology in the Age of Augustus.**

Rome's first Emperor, Gaius Octavian Augustus, ruled an empire stretching from Spain to Syria, from Britain to Egypt. Students will explore the social, artistic, and political successes and failures of this "golden age" of Rome's past. The course will assess a broad range of topics -- such as the creation of empire, art as propaganda, and the role of women -- within the context of Augustan ideology and history.

**ARCH 1101. Age of Augustus: Topography, Architecture, and Politics (CLAS 1120T).**

Interested students must register for CLAS 1120T.

**ARCH 1105. The Face of Power: Representing Roman Emperors.**

The infallible Augustus; Nero fiddling as Rome burns; Constantine the Christian emperor: the roster of Roman rulers includes some of ancient history's most beloved and notorious characters. Meet the men (and women!) who ran the Roman state, discover how art and architecture were used to craft a public impression of imperial power, and learn how material and literary sources have shaped emperors' post-classical reputations. This course will give special attention to how emperors attempted to appeal to diverse factions at home, while ensuring their power was legible to enemy competitors abroad.

**ARCH 1107. Spectacle! Games, Gladiators, Performance, and Ceremony in the Roman World (HIAA 1304).**

Interested students must register for HIAA 1304.

**ARCH 1120. Under Pompeii's Ashes: Contesting Roman Identities.**

Everybody knows Pompeii, the city that was buried under the ashes of the Vesuvius in AD 79. No site, it seems, preserved the daily life of the Romans as well. But how "Roman" was Pompeii? This course will challenge existing views on Roman cultural and social identities and material remains, using Pompeii as a case study. Pompeii, in fact, offers a unique playground to test ideas about the relationships between material culture, style, and societies in the past and the present.

**ARCH 1120L. Archaeology of Feasting (CLAS 1120L).**

Interested students must register for CLAS 1120L.

**ARCH 1121. Pompeii: Art, Architecture, and Archaeology in the Lost City (HIAA 1303).**

Interested students must register for HIAA 1303.

**ARCH 1122. Pompeii: Life and Death in the Shadow of Vesuvius (CLAS 1750S).**

Interested students must register for CLAS 1750S.

**ARCH 1125. Building an Empire: The Sacred and Civic Architecture of Ancient Rome.**

The Colosseum, Pantheon, and imperial palaces loom large in our impression of Roman civilization. Roman architecture set the standard for some of the most iconic buildings in the West. This course will examine the rise and development of Roman architectural principles and analyze how they were employed to create such a lasting image of empire. We will consider technological advancements and territorial expansion, as well as the shifting political and religious dynamics that shaped Rome's buildings.

**ARCH 1140. The Death of the Ancient City? Roman Cities After the Fall of Rome.**

As in our own increasingly urban-based world, cities were the engines driving the political and economic success of the Roman empire. But what happened to such places after the empire disintegrated and "fell"? This course will explore the varied fate of Roman cities in Late Antiquity (4th-7th centuries C.E.), a period witnessing numerous changes -- from political fragmentation and "barbarian" invasion to "Christianization" -- that directly impacted both the roles of cities and the organization of urban space.

**ARCH 1150. Cities and Urban Space in the Ancient World.**

Using contemporary approaches to cities and urban space, this course will explore cities of the ancient Near Eastern and Mediterranean world. What makes a city and how do we define "urban"? How do cities start? Do cities die? What are the primary factors that affect their development? We will analyze not only how the development of cities responded to specific historical and geographical conditions, but also how cities in different times and places were surprisingly similar in form and social activity.

**ARCH 1153. Cities by the Sea: An Economic, Structural, and Social Examination of Mediterranean Ports.**

Athens, Alexandria, Carthage, Ostia. Ports circled the ancient Mediterranean, and the sea infused these cities' hierarchies, structures, and daily patterns. This course will analyze the architecture and economy of key harbor cities of the Roman Empire by discussing their genesis or antecedents, their dynamics, and their role in the imperial era. To contextualize urban maritime landscapes across both time and space, we will consider issues pertaining to urbanism, trade, production, infrastructure, epigraphy, and iconography. Students will evaluate the traditional "port model" and other theoretical approaches, to reach a more complex understanding of these cities by the sea.

**ARCH 1155. Cities, Colonies and Global Networks in the Western Mediterranean.**

How did cities develop? This course will explore the connections between colonialism and urbanism in the West Mediterranean of the first millennium BCE. It is taught in close conjunction with a parallel class in Barcelona, and includes a week-long field trip to Barcelona and Catalunya, with practical work at the site and museum of the ancient Greek foundation of Emporion (Spain). Enrollment limited to 12. Instructor permission is required.

**ARCH 1160. The World of Museums: Displaying the Sacred.**

This course will examine critically the collection and display of ancient objects, especially those of a sacred nature. Through functional, historical, material and aesthetic lenses an analysis of the relationships between the cultural contexts of objects will be examined. Case studies, guest lectures and site visits (virtual and real) will be used to demonstrate evolving theory, practice, and ethical implications of displaying archaeological objects. Enrollment limited to 15 undergraduates.

**ARCH 1162. Anthropology in/of the Museum (ANTH 1901).**

Interested students must register for ANTH 1901.

**ARCH 1163. The Art of Curating (MCM 1700R).**

Interested students must register for MCM 1700R.

**ARCH 1164. Methods in Public Humanities (AMST 1550).**

Interested students must register for AMST 1550.

**ARCH 1167. Museum Histories (AMST 1903I).**

Interested students must register for AMST 1903I.

**ARCH 1170. Community Archaeology in Providence and Beyond.**

Modern archaeology is about far more than just digging in the dirt. During this seminar, we will discuss how archaeologists can engage with the public—including collaborations with indigenous and local communities, increased multivocality in interpretations, the mass media, museums, educational outreach programs, and the use and abuse of the past by governments and others in power. The second half of this course will involve a hands-on project in the Providence public school system.

**ARCH 1175. Archaeology Matters! Past Perspectives on Modern Problems.**

This is not the first era to face many of today's global problems – rising temperatures, sea-level change, sustainability, pollution, fire, water scarcity, urban blight, social violence, and more. Archaeology is more than the understanding of peoples long ago and far away, but a discipline whose long-term perspective could offer potential solutions to current crises. Through case studies and discussion of key issues, this class asks how archaeology – and archaeologists – might just change the world.

**ARCH 1177. Occupy Archaeology! Interrogating Inequality, Past and Present.**

We are the 99%! Black Lives Matter! These rallying cries bring inequality to the front-and-center of western political and media discourses. Yet a social system dividing the haves and have-nots is hardly a modern phenomenon. This course considers injustice diachronically and on a global scale, examining ways in which the material world studied by archaeologists creates – and is created by – social divisions, and critiquing the ways that archaeology as a discipline is a part of the problem.

**ARCH 1200A. Early Italy.**

Focuses on the Bronze Age background to the emergence of Greek, Roman, and Etruscan Italy in the Iron Age. Emphasizes the results of recent excavations, the problems of contact between the Aegean and Tyrrhenian areas in the Bronze Age, Greek colonization, and the urban development of the Etruscan/Latium region.

**ARCH 1200B. Pompeii (HIAA 1200D).**

Interested students must register for HIAA 1200D.

**ARCH 1200C. Roman Iberia.**

The archeology, art, and architecture of Iberia during the Roman presence from the Punic Wars to the beginning of the Arab conquest. The artifacts and monuments discussed will not only represent artistic production from Roman administrative expressions, but also a mixture of styles between indigenous art (such as Celtic) or expressions of syncretism or other cultural symbioses.

**ARCH 1200E. Topography and Monuments of Rome.**

Rome has been the scene of notable recent discoveries. This course will concentrate on the evidence for the so-called "regal period" but other topics, among them commemorative arches, the topography of the Campus Martius, and Christian basilicas, will also be taken up. A reading knowledge of Italian is highly recommended.

**ARCH 1200F. City and the Festival: Cult Practices and Architectural Production in the Ancient Near East.**

This course will explore urbanization, formation of urban space, and architectural projects in relation to cult practices and commemorative ceremonies in the Ancient Near East. Investigating case studies from early cities of fourth millennium BC Mesopotamia to Iron Age Syria and Anatolia, we will study the processes of the making of urban and extra-urban landscapes in the socio-religious context of festivals.

**ARCH 1200G. Arabia and the Arabs: The Making of an Ethnos.**

This course will survey the archaeology and history of the Arabs and Arabia from before their emergence in the historical record to the modern period. Our particular focus concerns their relationship with the rise of Islam as well as the imperial politics of the pre-Islamic Near East. A major issue that frames these inquiries is the concept of ethnicity and its projection into the past.

**ARCH 1200H. Islamic Landscapes: Cities, Frontiers and Monuments.**

This course will examine the built environments of the Islamic Period Middle East through the growing archaeological and historical record of its cities, monuments, and other spaces. We will explore what these landscapes tell us about the diverse nature of Muslim societies, relations between Muslim and non-Muslim inhabitants, and ways in which cultures engage with space and place through their physical, emotional, and intellectual resources. Prerequisites: At least two courses in either archaeology, anthropology, art history, or Middle East studies.

**ARCH 1200I. Material Worlds: Art and Agency in the Near East and Africa.**

This course investigates technological processes of artifact production in the material culture of ancient and contemporary Near East and Africa. Archaeological and ethnographic case studies will be explored to understand the social relations behind skilled craftsmanship in architecture and "art". Circulation of craft knowledge, cultural biography of artifacts, constitution of cultural identities and memory through material processes will be central topics. Enrollment limited to 20.

**ARCH 1209. The Visual Culture of Medieval Women (HIAA 1430A).**

Interested students must register for HIAA 1430A.

**ARCH 1213. The Medieval Monastery (HIAA 1440B).**

Interested students must register for HIAA 1440B.

**ARCH 1214. The Viking Age (HIST 1210A).**

Interested students must register for HIST 1210A.

**ARCH 1220. Byzantine Archaeology and Art: Material Stories of a Christian Empire.**

The world of Byzantium is often considered as a dark age separating the glories of Rome and the Renaissance. Yet Byzantium was among the longest living empires in world history, with an artistic and cultural impact felt far beyond its borders. The course will introduce students to a series of art works, architectural masterpieces, and archaeological discoveries that illuminate our understanding of the much underestimated, and much misunderstood, Byzantine Empire. Enrollment limited to 50.

**ARCH 1231. Kings, Courts, and Aristocracy (ANTH 1231).**

Interested students must register for ANTH 1231.

**ARCH 1232. The City, the Maroon and the Mass Grave (ANTH 1630).**

Interested students must register for ANTH 1630.

**ARCH 1233. Ancient Maya Writing (ANTH 1650).**

Interested students must register for ANTH 1650.

**ARCH 1235. Vertical Civilization: South American Archaeology from Monte Verde to the Inkas (ANTH 1505).**

Interested students must register for ANTH 1505.

**ARCH 1236. Maize Gods and Feathered Serpents: Mexico and Central America in Antiquity (ANTH 1640).**

Interested students must register for ANTH 1640.

**ARCH 1237. Pre-Columbian Art and Architecture: A World That Matters (HIAA 1305).**

Interested students must register for HIAA 1305.

**ARCH 1238. Classic Mayan Civilization (ANTH 1031).**

Interested students must register for ANTH 1031.

**ARCH 1250. Minoans and Mycenaeans: Greece in the Bronze Age.**

This class offers an introduction to the archaeology and art of the civilizations that arose on mainland Greece, Crete, the Aegean and Cyprus in the third and (especially) the second millennium B.C. The principal emphasis is on understanding the rise and collapse of palatial/state-level societies in these regions, with consideration of their sociopolitical, ideological and economic organization, and their interactions with neighboring cultures.

**ARCH 1282. Mediterranean Culture Wars: Archaic Greek History, c. 1200 to 479 BC (CLAS 1210).**

Interested students must register for CLAS 1210.

**ARCH 1283. Society and Population in Ancient Greece (CLAS 1130).**

Interested students must register for CLAS 1130.

**ARCH 1287. Holy Places and Sacred Spaces in Ancient Greece (CLAS 1750R).**

Interested students must register for CLAS 1750R.

**ARCH 1300. Greek Architecture.**

This course will trace the history of Greek Architecture from the Bronze Age through the Hellenistic Period. Emphasis is placed on the Archaic and Classical Periods and on the formation and implementation of the three major Greek orders (Doric, Ionic, Corinthian). Importance is placed on understanding construction techniques and the intricate relationship between form and function of the Greek orders.

**ARCH 1310. Ancient Painting.**

Examines selected topics in ancient painting with emphasis on the remains of ancient fresco decoration. Topics are Palaeolithic Painting, Aegean Bronze Painting, Etruscan Painting, Greek Painting of the Fifth and Fourth Centuries (text evidence), Roman Painting, Roman Painting as reflected in Mosaic.

**ARCH 1430. The Philistines.**

The Philistines were long considered to be trouble-makers and uncultured; however, recently their true character has been revealed. The origin, culture, social organization, political affiliations, religion, artwork, and technology of the Philistines, who inhabited Palestine during the Iron Age (ca. 1200-734 B.C.E.), will be elucidated through the examination of archaeological data and some textual evidence and pictorial representations.

**ARCH 1436. The Archaeology of Jerusalem: From the Origins to the Ottomans (JUDS 1610).**

Interested students must register for JUDS 1610.
