**ARCH 1437. The Archaeology of Palestine (JUDS 1615).**

Interested students must register for JUDS 1615.

**ARCH 1438. Jerusalem since 1850: Religion, Politics, Cultural Heritage (JUDS 1620).**

Interested students must register for JUDS 1620.

**ARCH 1440. Synagogues, Churches, and Mosques.**

Reviews the discoveries and related scholarship of ancient synagogues, churches, and mosques in ancient Palestine. Focuses on their architectural and decorative as well as their spiritual and religious characteristics, and examines how those institutions influenced each other throughout their history of development.

**ARCH 1441. Ancient Synagogues, Churches, and Mosques in Palestine (JUDS 1670).**

Interested students must register for JUDS 1670.

**ARCH 1443. Pilgrimage and Sacred Travel in the Lands of Islam (RELS 1520).**

Interested students must register for RELS 1520.

**ARCH 1448. Digging for the Bible: Science, Religion, and Politics (JUDS 1974).**

Interested students must register for JUDS 1974.

**ARCH 1450. Qumran and the Dead Sea Scrolls.**

Examines the scholarly interpretations of the site and the scrolls. Attempts to determine the relationship between the archaeological and textual evidence.

**ARCH 1475. Petra: Ancient Wonder, Modern Challenge.**

The rose-red city of Petra in southern Jordan is a movie star (Indiana Jones and the Last Crusade). It is a tourist mega-hit (over half a million visitors annually). It was recently voted one of the New 7 Wonders of the World. This class will explore the history and archaeology of Petra and debate how best to present and preserve the site, as well as discussing (and planning!) Brown's ongoing fieldwork at this beautiful, but fragile, place. Enrollment limited to 15. Not open to first or second year students.

**ARCH 1481. The Silk Roads, Past and Present (HIST 1974A).**

Interested students must register for HIST 1974A.

**ARCH 1482. Power, Profit, and Pillage: The Rise and Fall of Trading Kingdoms in Asia (ANTH 1540).**

Interested students must register for ANTH 1540.

**ARCH 1484. Attachment to Objects in Chinese Literature (EAST 1950P).**

Interested students must register for EAST 1950P.

**ARCH 1487. Environmental History of East Asia (HIST 1820B).**

Interested students must register for HIST 1820B.

**ARCH 1490. The Archaeology of Central Asia: Alexander in Afghanistan, and Buddhas in Bactria.**

Central Asia (from ca. 500 BC to AD 200) has tended to be treated as the ultimate frontier zone -- on the fringes of the Mediterranean, the Near East, and India. Scholarly perspectives today are radically changing, with Central Asia emerging as a cultural and political entity in its own right. This course will explore the archaeology, art and history of what is today modern Afghanistan and the formerly Soviet Central Asian Republics, considering the region's development under the Persian empire, the rule of Alexander the Great, and finally of his Greek-named successor kings. Enrollment limited to 50.

**ARCH 1492. The Priest-Kings and Village Life of Ancient Pakistan and India.**

The Indus Civilization was the largest culture in the Bronze Age, extending over Pakistan and much of India. It produced sculptures of priest-kings and dancing girls, seals imprinted with magical beings, vast water systems, and monumental structures. But it remains such a mystery that archaeologists can't even read its texts: the Indus script is still undeciphered. This course will look at the remarkable material culture of the Indus and famous sites like Harappa and Mohenjo Daro, but will also introduce current research examining grassroots change effected by villagers in their daily lives.

**ARCH 1494. Southeast Asia's Entangled Pasts: Excavated, Curated, and Contested.**

Behind the caricature of Southeast Asia as an exoticized land of temples and tradition lies a conflicted past entangled with competing claims to power, identity, and territory. This course explores the history of that region (Indonesia, Singapore, Malaysia, Thailand, Myanmar, Cambodia, Laos, Vietnam, and the Philippines), examining how ancient ruins were used to justify postcolonial national states; how museums and monuments have bolstered authoritarian regimes and sparked democratic protests; and how circulation of artifacts and artworks sets off diplomatic disputes and connects diasporic communities. Students will also engage with relevant material cultures and artistic practices in the Providence area.

**ARCH 1500. Classical Art from Ruins to RISD: Ancient Objects/ Modern Issues.**

The RISD Museum's collection of Greek and Roman art will be studied first-hand and in light of recent scholarship in art history, archaeology, and museum studies. Through the lens of bodies in Classical art, the course will take a critical look at the materiality of art, particularly around issues of representation and display. Students will explore original contexts for museum objects; issues of cultural property and museum ethics; visitors' perception and experience of exhibitions; and notions of historical interpretation in museum display.

**ARCH 1518. Women and Families in the Ancient Mediterranean (HIAA 1302).**

Interested students must register for HIAA 1302.

**ARCH 1520. Encountering the Foreign: The Archaeology of Diplomacy.**

Human societies have long been both intrigued and frightened by the foreign and exotic, from objects, peoples, and practices that appear "different". Out of these encounters with the unknown evolved a way to manage these interactions: what we now call diplomacy. This course focuses on the earliest forms of diplomacy in the societies of the Bronze Age eastern Mediterranean, examined through the lens of material culture, texts, and art, while also considering how disciplines such as sociology, psychology, and anthropology might expand our understanding.

**ARCH 1525. Struggle and Domination in the Prehistoric Mediterranean: Sex Power God(s).**

Humans seek to survive, adapt, develop, and thrive. Yet our species is also prone to power struggles, violence, and domination. This strife can be seen in the findings of the latest archaeological and ethnographic research – which casts doubt on the peaceful, egalitarian societies sometimes imagined in the prehistoric past. This course will examine power and inequality in the prehistoric Mediterranean, considering such vectors as religion, human-nonhuman relationships, monument building, technological innovations, death, and sexuality.

**ARCH 1536. Archeological Ethnographies: Heritage and Community in the Mediterranean (ANTH 1126).**

Interested students must register for ANTH 1126.

**ARCH 1538. Divided Places: From Conflict to Understanding, Memory, and Reconciliation.**

This course examines the intricate relationships between history and contemporary archaeology in divided places such as Cyprus, Jerusalem, Kosovo, and Belfast. Discussions will include the political and moral issues entangled in cultural heritage preservation, biases inherent in the archaeology of divided places, the use of archaeology to legitimize division, and ethics of archaeological research of places of conflict. How can we reconfigure imbalances resulting from decades of hiatus in research in divided places? How can archaeology contribute to fostering reconciliation?

**ARCH 1540. Cultural Heritage: The Players and Politics of Protecting the Past.**

From Antarctica to Zimbabwe, cultural heritage encompasses the very old and the still in use, the man-made and the natural, the permanent and the ephemeral -- even the invisible and the edible. This course will explore issues of modern threats to cultural heritage such as tourism and development, questions of authenticity and identity, and archaeology's intersection with law, ethics, public policy, and economics.

**ARCH 1541. ISIS, NAGPRA, and the Academy: Archaeology and Global Issues in Cultural Heritage (ANTH 1580).**

Interested students must register for ANTH 1580.

**ARCH 1543. Decolonizing Classical Antiquity: White Nationalism, Colonialism, Ancient Material Heritage (MGRK 1220).**

Interested students must register for MGRK 1220.

**ARCH 1549. Art and Crime: The History and Hazards of Collecting the Classical (HIAA 1306).**

Interested students must register for HIAA 1306.

**ARCH 1550. Who Owns the Classical Past?**

The purpose of this course is to offer a forum for informed discussion of a variety of difficult questions about access to the classical past, and its modern-day ownership and presentation, seen primarily from the perspective of material culture (archaeology, art, museum displays, etc.).

**ARCH 1570. Cold Hard Cash: The Materiality of Money in Ancient and Modern Finance.**

Now more than ever we are in need of new perspectives on the value and meaning of money. This course examines the origins of a metal-based financial system in ancient Mesopotamia and the development of finance over time -- including not only the valuation of metal but also of gifts and other commodities. We will prioritize archaeological and anthropological approaches as a way to offer both time depth and insight into today's troubled financial climate. Enrollment limited to 50.

**ARCH 1572. Economy of Ancient Greece: New Approaches (CLAS 1930E).**

Interested students must register for CLAS 1930E.

**ARCH 1575. Lost and Found: Coinage and Culture in the Roman Empire.**

Coins tend to be overlooked as sources of information about the ancient world, being used principally to date other objects. This is quite short sighted, for coins are themselves rich and revealing archaeological artifacts. Evidence of how coins were made, used, and lost will be explored during the seminar, in connection with recent debates about the ancient economy, the expression of identity through material culture, Roman colonialism and ethics of collecting cultural property.

**ARCH 1600. Archaeologies of the Near East.**

Writing, urbanism, agriculture, imperialism: the ancient Near East is known as the place where earliest agriculture flourished, cities were developed and writing was invented. This course offers a detailed examination of the region's archaeological history and current archaeological practice, in connection with its political engagements including Western colonialism and the formation of nation states. The social and cultural history of the Near East from prehistory to the end of Iron age (300 BC) will also be discussed. Studying the material remains of the ancient past, we will investigate various interpretive approaches and concepts used within Near Eastern archaeology. The main goal of the course is to develop a critical understanding of ancient societies and their material culture from an interdisciplinary, post-colonial perspective.

**ARCH 1603. Color and Culture in the Ancient Near East (ASYR 1160).**  
Interested students must register for ASYR 1160.

**ARCH 1605. Holy Spirits: Ancestor Worship in the Ancient Near East and Beyond.**

Looking at ancestor veneration in both the ancient and the modern world – from Mesopotamia and Egypt, to the Classical World and the Americas – this course will focus on three different angles: individual, communal, and material. We will consider grief, mourning, loss, and death's impact on families, kin, or elites. How did ancestors shape communities' social memories, identities, and religious practices? Finally, we will explore spirits' material traces, examining specific ancestral monuments and landscapes.

**ARCH 1606. Imagining the Gods: Myths and Myth-making in Ancient Mesopotamia (ASYR 1100).**

Interested students must register for ASYR 1100.

**ARCH 1609. Ancient Babylonian Magic and Medicine (ASYR1500).**

Interested students must register for ASYR 1500.

**ARCH 1615. Art/Artifact: The Art and Material Culture of Africa.**

The course introduces students to the central ideas and controversies in African art and material culture (pre-colonial, colonial and post-colonial). We will explore visual and spatial representations of Africa, such as personal adornment, utilitarian objects, sculpture, textiles, painting, masquerade, rock art, and architecture. Paying attention to issues such as identity, religion, politics, collecting practices, and activist art, students will examine African material culture through the multiple lenses of cultural biography, primitive art, tourist art, heritage ethics, and repatriation. Students will have the opportunity to study, handle, and curate African objects from the Haffenreffer Museum's collections. Enrollment limited to 20. First year students require instructor permission to enroll.

**ARCH 1616. Between Sahara and Sea: North Africa from Human Origins to Islam.**

From the early stages of human evolution to the present, this course explores the deep past of North Africa. Rejecting the colonialist perspectives typical of the study of the region, we will study its indigenous peoples and their long-term relationships with the Mediterranean, the Near East, the Sahara and Tropical Africa. Students are encouraged to bring their own interests (art, music, literature, technology) to their experience of the class.

**ARCH 1618. Barbarians, Byzantines, and Berbers: Early Medieval North Africa, AD 300-1050 (HIST 1963L).**

Interested students must register for HIST 1963L.

**ARCH 1620. Conquest to Conversion: The Formation of the Islamic World.**

How did the Arabs, originally a small group of tribes, come to conquer and rule a vast region from Spain to Iran? And how did their faith – Islam – become a major world religion? Moving between past to present, we will use the evidence of texts, landscapes, architecture and images to examine how an Arab state emerged, to explore what it meant to be Muslim and/or Arab, and to follow the spread of Islam.

**ARCH 1621. History of Egypt I (EGYT 1430).**

Interested students must register for EGYT 1430.

**ARCH 1623. Ancient Egyptian Art and Architecture (EGYT 1500).**

Interested students must register for EGYT 1500.

**ARCH 1624. Ancient Egyptian Art II (EGYT 1510).**

Interested students must register for EGYT 1510.

**ARCH 1625. Temples and Tombs: Egyptian Religion and Culture.**

Religion was central to life in ancient Egypt, and this course will examine Egyptian religion through its material culture. Students will explore temples and tombs as the physical settings for priestly ritual and private devotion, including feeding and clothing the gods and communication with the dead. The course will also address evidence for private domestic cult and the overlap between religious and magical practice.

**ARCH 1627. Daily Life In Ancient Egypt (EGYT 1465).**

Interested students must register for EGYT 1465.

**ARCH 1630. Fighting Pharaohs: Ancient Egyptian Warfare.**

When and why did the ancient Egyptians engage in war? Who was fighting? What were their weapons like and what were their military strategies? What were the political situations that caused them to go to war? How did warfare impact Egyptian society? In studying Egyptian history and society through the pervasive motif of war, we will gain an understanding of the forces that shaped Egyptian culture. Enrollment limited to 55.

**ARCH 1633. Black Pharaohs: Nubian Rule over Egypt in the 25th Dynasty (EGYT 1455).**

Interested students must register for EGYT 1455.

**ARCH 1635. The Great Heresy: Egypt in the Amarna Period.**

At the height of Egypt's power in the New Kingdom, King Amenhotep IV initiated a religious revolution that affected all aspects of Egyptian high culture. Declaring the sun-disc, Aten, to be the sole god, this king changed his name to Akhenaten and moved the capital city to a new site at Amarna. Along with this move came massive shifts in everything from temple worship to art, international relations to funerary religion. This course will set the Amarna period in its context, examining remains from the reign before Akhenaten to the restoration of traditional Egyptian religion under his immediate successors, including King Tutankhamun. Enrollment limited to 50. Not open to graduate students.

**ARCH 1637. Egypt After the Pharaohs: Archaeology and Society in the Coptic and Early Islamic Periods (EGYT1470).**

Interested students must register for EGYT 1470.

**ARCH 1650. The Etruscans: Italy before the Rise of the Romans.**

The Etruscan people dominated the Italian peninsula for centuries before the Romans became a Mediterranean power, but left behind little textual evidence of their culture. Focusing on architecture, artistic production, and funerary practice, we will study the "enigmatic" Etruscans and their contacts with the Greeks and early Romans, and consider their impact on Rome and on modern Italian archaeological scholarship.

**ARCH 1666. Archaeologies Out of the Mainstream: Representing the Past from Ancient Aliens to Modern Nationalism.**

Have you ever wondered what's beyond academic archaeology? Have you ever watched "Ancient Aliens" or "Searching for the Lost Giants", or read "Chariots of the Gods"? "Alternative" archaeologies are the most popular form of presenting the human past. This course will take a critical look at different types of alternative archaeologies, both past and present, to understand how they intersect and interface with academic understandings of archaeology and human history. Be prepared to quell academic prejudices and rattle your comfort zone.

**ARCH 1700. Architectural Sculpture of Ancient Greece and Rome.**

What would Times Square or Rockefeller Center have looked like in antiquity? What would have been advertised, and by whom? This course examines the themes, style, and contexts of the sculptural programs that decorated public buildings from the Greco-Roman world, their connections to other visual media and to the landscape, and their reflections of different cultural, civic, and elite identities.

**ARCH 1703. Water and Architecture (HIAA 1910D).**

Interested students must register for HIAA 1910D.

**ARCH 1705. The Palaces of Ancient Rome (HIAA 1301).**

Interested students must register for HIAA 1301.

**ARCH 1707. Seven Wonders of the Ancient World (CLAS 1120Q).**

Interested students must register for CLAS 1120Q.

**ARCH 1709. Places of Healing: Memory, Miracle, and Storytelling (HMAN 1970D).**

Interested students must register for HMAN 1970D.

**ARCH 1710. Architecture and Memory.**

Buildings and monuments have been mediators of the past, with their powerful presence and often turbulent histories. Stories cling to their stones, which become residues of the human lives that shape them. Memories, imaginations and experiences, collectively shared or individual, give meaning to architectural spaces. This course explores the intersections of memory and architecture through various archaeological case studies from the ancient world.

**ARCH 1715. Building Big! Supersized Architectural and Engineering Structures From Antiquity.**

Sometimes size does matter. The need and desire to "build big", to create colossal architectural or sculptural things, was a constant feature of antiquity, from temples to portraits, from tunnels to fortifications. Who and what lay behind this apparent architectural megalomania? What practical challenges to construction had to be overcome? And how have such monuments affected our understanding, both of the ancient world and of modern means of self-representation? Enrollment limited to 50.

**ARCH 1720. How Houses Build People.**

Archaeologists usually worry about how people in the past built houses. This course will flip the question on its head and ask: how do houses build people? Just what is a 'house'? What is a 'home'? Making use of an array of regional case studies, from different time periods, we will question how cultural values and norms can be extracted from, and explore the idea of the domestication of humans through architecture. Enrollment limited to 50. Not open to first year students.

**ARCH 1764. Under the Microscope: 250 Years of Brown's Material Past.**

An archaeologist will tell you that to learn a university's history, you must uncover and investigate its treasures, trash, tools and toys. An engineer will tell you that to understand such objects, you must study how these things were made, in what materials and with what technologies. This co-taught course unites these two disciplines for a unique exploration of Brown's past, combining interdisciplinary discussions, hands-on laboratory work, and individual historical and material analysis of an artifact selected from 250 years of life on College Hill.

**ARCH 1768. The Culture of Death in Ancient Rome (CLAS 1420).**

Interested students must register for CLAS 1420.

**ARCH 1769. Unearthing the Body: History, Archaeology, and Biology at the End of Antiquity (HIST 1835A).**

Interested students must register for HIST 1835A.

**ARCH 1770. Grave Matters: The Archaeology of Death, Decay, and Discovery.**

How do archaeologists study coffins, tombs, and human remains to learn about ancient societies? This course will explore the theory and practice of the archaeology of death. Topics will include the inference of social organization from mortuary remains, the experience of death and dying, social memory, identity, and others. Students will learn approaches to mortuary excavation and consider the politics and ethics of conducting burial archaeology globally. Enrollment limited to 55. Not open to first year students.

**ARCH 1771. Archaeology of Death (ANTH 1623).**

Interested students must register for ANTH 1623.

**ARCH 1772. The Human Skeleton (ANTH 1720).**

Interested students must register for ANTH 1720.

**ARCH 1775. Animals in Archaeology.**

Food, foe, friend: animals play all these roles, and more, in their relationship to humans, in the past as well as the present. This course will explore how zooarchaeology -- the study of animal remains (bones, teeth, and shells) -- allows us to reconstruct ancient human-animal-environmental interactions. We will cover a range of topics and analytical techniques, including hands-on sessions for the identification and quantification of faunal remains. Additional topics will include ancient DNA in zooarchaeology, bone stable isotope analyses, human-caused extinctions, animal domestication, bone artifact production, and animal sacrifice. Enrollment limited to 20. Not open to first year students.

**ARCH 1776. Animal Acts (ERLY 1150).**

Interested students must register for ERLY 1150.

**ARCH 1777. Animals in the Ancient City: Interdependence in the Urban Environment (ERLY 1155).**

Interested students must register for ERLY 1155.

**ARCH 1778. Animal, Vegetable, Mineral: Environmental Histories of Non-Human Actors (HIST 1976C).**

Interested students must register for HIST 1976C.

**ARCH 1780. Violence and Civilization: A Deep History of Social Violence.**

Why do we do violence to one another? This course will foster a sustained and critical reflection on social violence, history and humanity. We will explore social orders through time, together with their practices and moral economies of permissible and impermissible violence. Different conceptions of violence ("symbolic," "structural," and "routine") will be considered, in conjunction with their intersections with the many, ambivalent meanings of "civilization." No prerequisites required.

**ARCH 1787. Alcohol in the Ancient World.**

From the earliest Neolithic experiments with fermentation to the elaborate drinking cultures of the Classical world, alcohol has infused and influenced social life for thousands of years. This course provides an introduction to the production and consumption of beer, wine, and other beverages in the ancient world. Case studies from across the globe demonstrate that alcohol was (and is) a uniquely potent form of material culture, embedded within complex webs of social, political, economic, and ritual activity.

**ARCH 1790. The Nature and Culture of Disaster.**

Our view of nature forms the basis of environmental studies, ecotourism, heritage management, and contemporary debates over global warming that impact both public policy and the very way we lead our lives. This course draws from theorists (such as Douglas, Latour, Strathern and Spivak), as well as recent anthropological test cases from Amazonia, Papua New Guinea, and South Africa to look at how humans in the 21st century view nature in terms of stability, instability and disaster. How should we assess the 'risk culture' in which we currently live?

**ARCH 1791. Slavery, Materiality, and Memorialization (AFRI 1050X).**

Interested students must register for AFRI 1050X.

**ARCH 1792. The Archaeology of Slavery.**

No one would question that slavery leaves invisible and painful marks on all individuals and societies touched by it. But slavery leaves behind many physical, recoverable traces as well: plantations, slave forts, slaving wrecks, burial grounds. From such evidence, this course will explore four centuries of slavery in the Atlantic world, asking not only about how people coped in the past, but about the legacy of slavery in our world today.

**ARCH 1793. Slavery in the Ancient World (CLAS 1120E).**

Interested students must register for CLAS 1120E.

**ARCH 1794. Questions of Remembrance: Archaeological Perspectives on Slavery in the New World (ANTH 1625).**

Interested students must register for ANTH 1625.

**ARCH 1795. Living and Material Landscapes of the African Diaspora (HIAA 1191).**

Interested students must register for HIAA 1191.

**ARCH 1797. A Migration Crisis? Displacement, Materiality, and Experience (MGRK 1210).**

Interested students must register for MGRK 1210.

**ARCH 1800. Contemporary Issues in Archaeological Theory.**

This course will explore how archaeologists have placed material remains in the context of human practices, cultural processes and long-term history. Following a brief review of the history of the discipline as a social science, contemporary issues such as social complexity, technology and agency, ideology and narrative, gender and sexuality, production of space and construction of landscapes will be discussed. Case studies of archaeological materials will be drawn mostly from the ancient Western Asian and Mediterranean worlds. Enrollment limited to 15.

**ARCH 1805. The Archaeology of Us: A Material Approach to the Contemporary World.**

Archaeology is traditionally seen as exclusively concerned with the past. However, the budding field of contemporary archaeology considers that our own material culture and built environment are equally important to examine archaeologically. This course explores materially-oriented approaches to analyzing our contemporary world, from the study of garbage to the destruction of heritage sites by ISIS. Course material will examine geopolitical crises including migration, militarism, inequality, and environmental devastation. Students will engage with local communities and the Providence area.

**ARCH 1810. Under the Tower of Babel: Archaeology, Politics, and Identity in the Modern Middle East.**

Present-day political ideologies profoundly impact our understanding of the past. Here we will explore the use and abuse of archaeological pasts in the modern nation states of the Middle East. What do pharaohs mean to modern Egyptians? Why did Saddam Hussein consider himself the last Babylonian king? This course will explore the role of imagined ancient pasts and cultural heritage in the making of collective identities and state ideologies.

**ARCH 1816. The Ancient Body: Past Ideas about Human Physicality (ANTH 1660).**

Interested students must register for ANTH 1660.

**ARCH 1817. Ancient Christianity and the Sensing Body (RELS 1300).**

Interested students must register for RELS 1300.

**ARCH 1821. (De)Constructing the Other: The Subjectivity of Objects.**

Archaeologists rely on interpretation of material remains to construct conceptions of humans in the past. This course explores this creation of archaeology's subjects, with a critical eye toward the inherently political nature of this inventive process. Topics include the deconstruction of the "pots to people" analogy, racial and gendered disciplinary bias, and exposing the problems of unequal representation in the discipline. In connecting past, present, and future, this course seeks to develop strategies for building a more equitable and inclusive brand of archaeological method and thought.

**ARCH 1822. Anthropology of Place (ANTH 1910B).**

Interested students must register for ANTH 1910B.

**ARCH 1835. Inventing the Past: Amulets, Heirlooms, Monuments, Landscapes.**

Long before archaeology and art-history were academic disciplines, individuals and communities manipulated the physical traces of the past in order to imagine and explain their own antiquity. Who cared about these objects and why? What did pre-modern excavations, catalogues, and collections look like and what do they tell us about our own engagements with antiquities? This course delves into the origins of antiquarianism and archaeology, from pre-history to the Renaissance. Enrollment limited to 50.

**ARCH 1850. Comparative Empires and Material Culture.**

The political, military, and cultural unit of "empire" has, by now, been the subject of numerous and varied studies. This seminar will explore the tangible effects of empires, that is, the art and architecture created when societies are engaged in what can be viewed as asymmetrical power relationships. In order to understand how conditions specific to empire influence the creation, dissemination, and reception of material culture, this course will examine the artifacts of a range of different empires -- the Roman, the Chinese, the British, and the American -- and their unique political, social, and cultural contexts. Enrollment limited to 25.

**ARCH 1852. Material Culture Practicum (ANTH 1621).**

Interested students must register for ANTH 1621.

**ARCH 1854. Handmade: An Archaeological Exploration of Materials and Making.**

This interactive course provides an introduction to the archaeology of materials and making. With the goal of developing an embodied appreciation for the archaeological record, we will engage in a series of hands-on activities, each dedicated to the exploration of a different type of material (e.g., clay, stone, wood, and bone). We will also examine theoretical perspectives on the topic and archaeological case studies that highlight the range of techniques employed to transform these materials into objects of use and value. Enrollment is limited to 15.

**ARCH 1855. Archaeology and Craft: Experimental Archaeology and the Materials Science of Ancient Technologies.**

How did people in the past make the things that archaeologists find today? How can archaeologists learn about processes of design, engineering, and technological change from ancient objects? Students will approach production questions cross-culturally through firsthand involvement with craft processes and materials analysis - from raw materials to finished objects. Practicums will range from participation in blacksmithing and kiln design to learning about pyrotechnology, mechanical properties, and archaeometric techniques. The final class project will be an exhibit affiliated with the Haffenreffer Museum. Enrollment limited to 15. First year students require instructor permission.

**ARCH 1860. Engineering Material Culture: An Introduction to Archaeological Science.**

Unlikely bedfellows? No way! This course demonstrates how well archaeology (the humanities) and engineering (the hard sciences) can do business together. An introduction to the world of archaeological science, presented from the dual perspectives of material culture studies and materials science. Students will be introduced to a range of methodologies, instrumentation, and interpretive approaches through a combination of hands-on laboratory work, guest lectures, and interdisciplinary group research. Student must have already completed at least two university courses in archaeology, engineering, or any related discipline. Enrollment is limited to 20. Priority will be given to admitting a proportional number of students from archaeology, engineering and related fields.

**ARCH 1867. Pastoralism and Power: Lush Lives of Arid Landscapes.**

Deserts are often viewed as harsh, unwelcoming landscapes. However, human activity flourishes on these arid margins of civilization. Beginning with the physical landscape – the geology, geography, and hydrography – this class will then trace its influence on deserts' social and political landscapes: communities, kinship and tribes, pastoral nomadism, trade, and territorial power struggles. Through case studies from the Negev, Sinai, and Arabian Deserts, we will explore how archaeology and archaeological science inform us about desert people, their world views and ideologies, and their strategies for thriving in arid landscapes.

**ARCH 1870. Environmental Archaeology.**

From Neanderthals on the brink of extinction to the smog of the Industrial Revolution, humans have been impacted by the environment for millions of years. How has climate change affected the development of human society? How have people adapted to their environments in the past? What does "sustainability" mean over the long term? Environmental archaeology is the study of these questions through the use of scientific techniques to analyze soils, plants, artifacts, and human and animal remains from ancient archaeological contexts. These methods will be introduced with an eye toward how they allow us to interpret human-environmental interactions in the past, as well as the present and future.

**ARCH 1873. Imperialism and Environmental Change (HIST 1976I).**

Interested students must register for HIST 1976I.

**ARCH 1874. The Anthropocene: The Past and Present of Environmental Change (ENVS 1910).**

Interested students must register for ENVS 1910.

**ARCH 1877. The Pictured Text (ANTH 1830).**

Interested students must register for ANTH 1830.

**ARCH 1878. Illustrating and Interpreting the Past: Visual Representation in Archaeology (ANTH 1470).**

Interested students must register for ANTH 1470.

**ARCH 1879. A World in Color: Seeing and Experiencing Colors in Ancient Times.**

Filtered through the lens of western aesthetics, history books often describe the past in black and white. Scholars even receive death threats for asserting that marble statues were not pristine white in antiquity. But imagining the ancient world in all its colors is to see a fuller picture of the art, fashion, values, and struggles of the past. This class investigates the meaning of color as a culturally mediated and charged phenomenon, using not just art historical approaches, but contemporary critical theory, linguistics, and economics.

**ARCH 1880. Archaeo-Geophysical Survey and Visualization.**

Geophysical survey data act as primary information for locating archaeological sites, and contribute new perspectives when investigating existing sites. This course will develop students' understanding of basic geophysical processes, through hands-on field-based data acquisition with ground penetrating radar, magnetometry, and resistance survey techniques. We will also experiment with approaches to data management and visualization. The course will conclude with students conducting a comprehensive multi-technique field survey of an archaeological site. Enrollment limited to 20 juniors, seniors, and graduate students.

**ARCH 1881. An Introduction to GIS and Spatial Analysis for Anthropologists and Archaeologists (ANTH 1201).**

Interested students must register for ANTH 1201.

**ARCH 1882. Introduction to Geographic Information Systems for Environmental Applications (GEOL 1320).**

Interested students must register for GEOL 1320.

**ARCH 1883. Global Environmental Remote Sensing (GEOL 1330).**

Interested students must register for GEOL 1330.

**ARCH 1884. Remote Sensing of Earth and Planetary Surfaces (GEOL 1710).**

Interested students must register for GEOL 1710.

**ARCH 1900. The Archaeology of College Hill.**

A hands-on training class in archaeological field and laboratory techniques. Topics include the nature of field archaeology, excavation and survey methodologies, archaeological ethics, computer technologies (such as GIS), and site and artifact analysis and conservation. Students will act as practicing archaeologists (i.e., actually dig and analyze the results!) through the investigation of local historical and archaeological sites in the College Hill area (e.g. the First Baptist Church of America and Brown University's Quiet Green).

**ARCH 1902. Material Culture Practicum (ANTH 1621).**

Interested students must register for ANTH 1621.

**ARCH 1970. Individual Study Project in Old World Archaeology and Art.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ARCH 1990. Senior Honors Thesis in Archaeology and the Ancient World.**

Honors students in Archaeology and the Ancient World who are completing their theses should enroll in this course in their final semester. The subject of the thesis and program of study will be determined by the needs of the individual student. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ARCH 2000. Research Methods in Archaeology.**

Familiarizes beginning old world archaeology and art graduate students and graduate students from neighboring disciplines, as well as advanced undergraduate students, with the methods, history, and bibliography of the field.

**ARCH 2006. Principles of Archaeology (ANTH 2501).**

Interested students must register for ANTH 2501.

**ARCH 2010A. Ancient Numismatics.**

Deals with problems in ancient numismatics from these topics: introduction of coinage, major coinages of archaic Greece, coinage of 4th C.B.C. in the Greek west and Roman coinage of 3rd C.B.C.

**ARCH 2010B. Approaches to Archaeological Survey in the Old World.**

Recent decades have witnessed a marked development of interest in regional approaches to the ancient world and its landscapes. This seminar will explore the history of this development, as well as survey's impact on the work of both ancient historians and archaeologists. Topics to be covered include survey design and methodology, and the wider implications and lessons of regional analysis.

**ARCH 2010C. Architecture, Body and Performance in the Ancient Near Eastern World.**

This seminar investigates the relationship between bodily practices, social performances, and production of space, using case studies drawn from ancient Mesopotamia, Anatolia, and Syria. Employing contemporary critical theories on the body, materiality, and social practices, new theories of the making of architectural spaces and landscapes will be explored with respect to multiple geographical, historical contexts in the Ancient Near East.

**ARCH 2010D. Archaeology and Religion: Excavating the Sacred from Prehistory to Islam.**

This course explores methodological approaches and theoretical underpinnings of scholarly (and sometimes unpopular) interpretations of the archaeological record as evidence for the religious life of past societies, considering how archaeologists have treated the analytical categories of ritual, religion, ideology, and the sacred. These discussions will be examined through Mediterranean case studies as a key region in the archaeology of religion.

**ARCH 2010E. Archaeology in the Information Age.**

Archaeology must circulate the material past in two dimensions. The right combination of image (maps, plans, photographs) and text has long defined professional archaeology. However, the current explosion of digital media has spurred profound shifts in all domains of archaeological practice and documentation. This course encourages reevaluation of archaeological media, which pertains to information technology across the humanities and sciences.

**ARCH 2010F. GIS and Remote Sensing: Advanced Applications in Archaeology.**

Geographical Information Systems (GIS) and various forms of remote sensing are increasingly essential components of good archaeological practice. This advanced course is intended primarily for students with some background in GIS software, and who have evolved a relevant research project to develop over the course of the term. Less advanced graduate students may enroll with permission of the instructor and will be provided with additional tutorial instruction.

**ARCH 2010G. Ethical Issues in Archaeology.**

Graduate students will certainly confront ethical, legal, and professional issues in the course of their own doctoral research and subsequent careers. This seminar offers a forum for open, but well-informed, discussion of a variety of significant ethical problems and dilemmas currently facing the discipline of archaeology worldwide. We will give attention to practical matters arising from archaeological field research, as well as a wide range of difficult questions concerning ownership and presentation of the past. Open to graduate students only.

**ARCH 2020A. Greek Vase Painting.**

No description available.

**ARCH 2020B. Topography of the City of Athens.**

No description available.

**ARCH 2020D. Greek Painting.**

Major developments in the history of Greek painting with special emphasis on archaic and classical Greek culture as reflected in vase painting. There will be field trips to area museums which may take longer than class time.

**ARCH 2020E. Economy and Trade in the Later Bronze Age Aegean and East Mediterranean.**

Beginning with an examination of the workings of the Mycenaean palace economy, including the evidence of Linear B documents, this seminar will then turn to a more inclusive consideration of trade and exchange involving Aegean states and their counterparts further east, and of the nature and extent of cultural interaction between them during the later Bronze Age (ca. 1600-1100 BC).

**ARCH 2030A. Late Roman and Early Christian Mosaics.**

Study of Christian, Jewish, and secular mosaics of the Late Roman period.

**ARCH 2030G. Wall Paintings from Pompeii.**

Interpretations of Campanian frescoes.

**ARCH 2040D. Genealogies of Complexity in East Asia (3000-221 BCE).**

Despite East Asia's rich archaeological and historical record, its early political (pre)histories have been more sites for theoretical projection than theoretical innovation. Focusing on mainland East Asia, we will engage political theory and its applications in case studies from the Neolithic to the first Empires. Topics will range from mortuary rituals to practices of social violence and sources include both material culture and text.

**ARCH 2040E. International Cultural Heritage: Creating a Future for the Past.**

From the Parthenon to Puccini to pizza, cultural heritage can be defined as places, objects, and ideas from the past that have survived to the present. This course will examine the theories, methods, and questions that shape the effort to protect and interpret cultural heritage today as well as responses to them. We will explore issues such as current threats to cultural heritage, the role of tourism and impacts of development, questions of authenticity and identity, international law, ethics, and emerging and non-traditional areas of the field.

**ARCH 2040F. Public Culture and Heritage in Postapartheid South Africa.**

This course examines the complex processes whereby issues of culture, race, identity/ subjectivity, globalization, memory and heritage are being reframed and rethought in post-apartheid South Africa. We will be guided by three broad themes: public histories; archives and knowledges; and questions of performance. Of all possible settings, post-apartheid South Africa may present one of the most challenging - at times troubling - contexts through which to consider such public negotiations and meanings.

**ARCH 2040G. Designing Heritages: From Archaeological Sensibilities to Relational Heritages (AMST 2654).**

Interested students must register for AMST 2654.

**ARCH 2040H. Imperial Cities.**

What does Athens have to do with Jerusalem? Tenochtitlan with London? Beijing with Rome? Cuzco with Persepolis? All are capital cities of imperial systems, each shaping and reflecting the nature of the empire, its ruling ideology, and its social and economic infrastructure. The category of "imperial cities", however, must extend beyond these primate centers, to consider the urban networks in play across each empire's territorial reach, and beyond.

**ARCH 2041. Mesoamerican Archaeology and Ethnohistory (ANTH 2520).**

Interested students must register for ANTH 2520.

**ARCH 2100. Things! The Material Worlds of Humanity.**

This course explores the relationships between people and things. From archaeology to material culture studies, from philosophy to science studies, we will examine a wide variety of approaches to the world of objects, artifacts, and material goods. Perspectives will include materialist approaches, consumption studies (including notions of fetish), phenomenology, social constructivism, cognitive approaches, actor-network-theory, and more.

**ARCH 2105. Ceramic Analysis for Archaeology.**

The analysis and the interpretation of ceramic remains allows archaeologists to accomplish varied ends: establish a time scale, document interconnections between different areas, and suggest what activities were carried out at particular sites. The techniques and theories used to bridge the gap between the recovery of ceramics and their interpretation within anthropological contexts are the focus of this seminar. This course will include hands-on, lab-based materials analysis of ceramics and their raw materials.

**ARCH 2110F. Greek Palaeography and Premodern Book Cultures (GREK 2110F).**

Interested students must register for GREK 2110F.

**ARCH 2112. Roman Epigraphy (LATN 2120A).**

Interested students must register for LATN 2120A.

**ARCH 2114. Archaeologies of Text (ASYR 2800).**

Interested students must register for ASYR 2800.

**ARCH 2140. The Marriage of Archaeological Science and Social Theory.**

What do ceramics, lithics, building materials and metals tell us about the people who used them? Do high-tech analytical methods contribute to a deeper understanding of the past or simply muddy the waters? Theoretically, we will challenge the objectivity of 'science' and the value of archaeological taxonomies, as they relate to the construction of archaeological narratives. The ultimate objective in this course is to access the symmetrical social relationships between people and things, through the medium of the archaeological materials, as understood through the application of scientific techniques. Enrollment limited to 15.

**ARCH 2141. Biomolecular Approaches in Archaeology.**

This seminar will focus on the key principles of biomolecular techniques used in archaeological research. Topics will include residue analysis, collagen fingerprinting, stable isotopes, and ancient DNA. We will discuss recent advancements in these scientific methods, best practices for collecting samples, how to build collaborations between archaeologists working in the field and in the laboratory, and new possibilities for using cutting-edge methods to address archaeological and anthropological research questions.

**ARCH 2145. Technology and Production in Archaeology: Anthropological Foundations and Contemporary Theory.**

An intensive focus on theoretical approaches to technology and production that have shaped archaeological thinking over the past century and have formed the basis of many of the contemporary issues in the field. Students will read and critically assess key works about concepts of production and technology in various cross-cultural archaeological contexts. Seminar themes include political economy, specialization, technology transfer, cross-craft production, power dynamics, ritual, and tool use. Enrollment limited to 20 seniors and graduate students.

**ARCH 2150. Theoretical Issues in Archaeology.**

The goal of this seminar is to examine the state of archaeological theory, with special emphasis on archaeological practice and interpretation in the Mediterranean, Egypt and ancient western Asia. While providing some measure of historical overview, the class chiefly offers an opportunity for students to read and critique recent writings that exemplify the variety of contemporary approaches to this subject.

**ARCH 2151. Slow Archaeology: Thinking Things through in Archaeological Theory and Philosophy.**

This course questions the so-called paradigm shifts in archaeology -- "the spatial turn", "the material turn", or the "the ontological turn" -- and analyzes the way archaeological theory has developed in our discipline. Students will explore theoretical angles other than the "usual suspects" in archaeological theory to creatively rethink individual research. We will take a philosophical approach to critically and carefully discuss academic archaeology and our roles, our engagement, and future as scholars within an institutional culture that often seems to be dominated by individual achievement, speed, and efficiency. What ideas might emerge if we all just slowed down?

**ARCH 2155. History, Anthropology, and Archaeology: Disciplinary Dialogues.**

Archaeology has always occupied an uneasy space between the fields of anthropology and history. This seminar examines the interplay of theories and methods in all three spheres of scholarship, with an emphasis on current inter- and trans- disciplinary research. Several fundamental 20th century dialogues between anthropologists and historians will be reviewed, and key topics in contemporary archaeology explored in relation to those debates.

**ARCH 2160. The Archaeology of Democracy: Social Transformations in Ancient Greece, ca. 900-323 BCE.**

Between 900 and 600 BCE, profound social transformations took place in Greece, setting the stage for a revolution in political form: by 500, Athens was collectively governed by its citizen body. This course engages with the everyday materialities underlying Greek democracy of this era. Focusing on relationships among people and things, students will reassess the composition of the demos from the ground up.

**ARCH 2165. The "Second Sophistic": Archaeological and Literary Approaches.**

The cultural phenomenon of the "Second Sophistic" affected both the material fabric and the intellectual life of the eastern Roman empire of the second/third centuries CE. This course will examine how awareness of "Greek" learning (*paideia*) and the "Greek" past informed people's literary and artistic tastes, as well as their responses to changing political and religious pressures, affecting everything from civic coinage to elite dining habits and even bodily comportment. Enrollment limited to 15.

**ARCH 2170. Archaeology of Greek and Punic Colonization.**

This course investigates cultural interaction at local and regional scales between 'colonists' and locals, introducing students to a range of case study material across the Mediterranean. This will focus on material from the eighth to sixth centuries BC from Iberia, France, Italy, North Africa, and the Black Sea. Examples of Etruscan colonization will also be explored. The concept of 'colonization' will be critically examined, along with how it has been treated by archaeologists and ancient historians over the past century. Enrollment limited to 15 juniors, seniors, and graduate students.

**ARCH 2178. Architectural Reuse: The Appropriation of the Past (HIAA 2440D).**

Interested students must register for HIAA 2440D.

**ARCH 2180. Memory and Materiality.**

What is the difference between memory, facts, and knowledge? This course uses memory as a lens through which to view recent critical theory and questions how theories of memory and materiality can be used by archaeologists to better understand the past.

**ARCH 2184. Material Culture and the Bodily Senses: Past and Present.**

How do the senses shape our experience? How many senses are there? How do ancient and modern art and material culture relate to bodily senses? What is material and sensorial memory, and how does it structure time and temporality? Using media and objects, including archaeological and ethnographic collections at Brown and beyond, this course will study how a sensorial perspective on materiality can reshape and reinvigorate research dealing with past and present material culture. Furthermore, we will explore how sensoriality and affectivity can decenter the dominant western modernist canon of the autonomous individual.

**ARCH 2185. Sensing Antiquity: New Approaches to Ancient Aesthetics and Sensoria.**

How did the Greeks and Romans perceive and discuss the beautiful and the ugly? The fragrant or malodorous? The ticklish and the tart? These may seem like difficult questions, even bizarre, and yet, in many ways, those past opinions inform our own experience of the world. This course is an exploration, through archaeological and literary primary sources, of the many ways in which ancient men and women interacted through their senses with the world around them and how they reflected upon that interaction.

**ARCH 2225. Beyond Decline and Fall: New Perspectives on the Late Antique Mediterranean.**

This seminar will examine the Mediterranean from the fall of Rome to the Arab conquests (AD400-700), interrogating models of decline, catastrophe and transformation through the most recent archaeology of the region. We will explore key themes such as decline and fall, post-Roman state-formation, urbanism, rural settlement, Christianization and ethnic, social and religious identities, and compare the different trajectories of Europe, Northern Africa and the Eastern Mediterranean in this period.

**ARCH 2235. One Sea for All: Economic, Social and Artistic Interaction in the Medieval Mediterranean.**

This seminar explores the phenomenon of interaction in the Medieval Mediterranean. We will study how, even in times of conflict, Byzantines created and maintained networks of ideological, commercial and artistic communication with the Arabs, the Slavs, the Latins, and the Ottomans. How did such encounters, among people of such different faiths, languages, and world-views, influence the political, economic and social transformations of the Medieval world? Enrollment limited to 15 juniors, seniors, and graduate students.

**ARCH 2240. Key Issues in Mediterranean Prehistory.**

This course's scope is the entire Mediterranean basin, from its first peopling until ca. 500 BC. The focus is on key transformations in economic, social, and political structures and interactions; on explanations for these changes; and on current issues where fresh data or new approaches are transforming our understanding. This seminar is intended for students both with and without prior knowledge of this field, and particularly for those preparing for the Joukowsky Institute's Mediterranean Prehistory field exam. Enrollment limited to 15 juniors, seniors, and graduate students.

**ARCH 2245. Rural Landscapes and Peasant Communities in the Mediterranean.**

The aim of this course is to explore rural settlement and agrarian production in the Mediterranean, both in the ancient and the recent past. The archaeological starting-point is provided by the numerous scatters of surface remains that archaeological surveys across the Mediterranean have collected and that are usually interpreted as 'farmsteads' broadly datable to Classical Antiquity. We will look beyond these scatters to examine the social and economic significance of rural settlement through comparison with ethnographic and historical rural studies from across the Mediterranean and to explore household and community organisation and agrarian production in Classical Antiquity. Enrollment limited to 15.

**ARCH 2250. Island Archaeology in the Mediterranean.**

The Mediterranean is a world of islands, *par excellence*, and the island cultures that have developed there over the millennia have great archaeological distinctiveness. This seminar will consider the concept of insularity itself, in cross-cultural archaeological, anthropological, and historical perspective. We will then turn to the rich, specifically Mediterranean literature on island archaeology (exploring issues of colonization, settlement, interaction).

**ARCH 2255. Coastal Values: Archaeology and Paleoecology of Coastal and Island Environments.**

People like to live by the water. What characteristics (social, economic, environmental) make coastal environments so attractive? What are the effects of human settlement on these environments? How do societies adapt (or not) to changing coastal environments? This seminar takes an interdisciplinary approach to these questions, applying the lessons of the past to the challenges of the present through an explicitly diachronic, cross-cultural, and data-driven approach to examining human-environmental interaction in coastal settings. Enrollment limited to 15.

**ARCH 2300. The Rise of the State in the Near East.**

A seminar on the origins of food production and complex societies in the period from ca. 9000 to 2200 B.C. Topics will include: the first domestication of plants and animals, the earliest village communities in the Levant, Anatolia, and Mesopotamia, and the economic and social transformations accompanying the emergence of urbanized state societies in fourth and third millennia B.C. Mesopotamia.

**ARCH 2310. Cities in the Sand: The Archaeology of Urbanism in Mesopotamia.**

Images of legendary Mesopotamian cities, now wired with explosives or pockmarked with looters' pits, flit daily across our screens. For more than a century, archaeologists have been working to uncover these early urban centers in Iraq and Syria, where the very idea of the city was first imagined. This seminar offers an introduction to the archaeology of urbanism and a detailed examination of the cities of Mesopotamia – from Uruk and Ur to Babylon and Baghdad.

**ARCH 2320. Household Archaeology in the Ancient Near East and Beyond.**

House, home, household, family: defining these terms is not as easy as it might seem, especially across space and through time. After introducing the principles of household archaeology, this class will explore the state of this growing archaeological subfield in the Near East and eastern Mediterranean. We will also draw on developments in New World archaeology in analyzing the potential and problems of household archaeology and in articulating its future directions.

**ARCH 2330. Roman Asia Minor: The Empire Goes East.**

If one is curious about the dynamics of life within the Roman empire, the province of Asia makes an excellent case study. Its numerous urban centers and rural landscapes were socially and economically differentiated and frequently monumentally elaborated, as an increasing amount of varied archaeological data reveal. Asia offers a rich laboratory for exploring issues of provincial development, and ultimately decline, over the course of the empire.

**ARCH 2335. In the Wake of Empire: Anatolia After the Hittites, Before Alexander.**

Kings Croesus, Midas, and the much lesser known Warpalawas... Who were these people, when and where did they rule, and why does any of this matter? During the first millennium BCE, Anatolia was an astonishingly varied, multicultural and multilingual environment. This course will tackle head on the myriad archaeological, historical, and even linguistic challenges posed by this fascinating, but often-overlooked period in the history of the region. Enrollment limited to 15 juniors, seniors, and graduate students.

**ARCH 2340. The Archaeology of the Assyrian Empire: Cities, Landscapes and Material Culture.**

Ritual, war and conquest! The Assyrian Empire was a powerhouse in the ancient Near East with fearsome military expeditions, sumptuous cult festivals, grand cities, and complex governing systems. This course investigates the archaeology of Assyria from the trading center of Ashur in the second millennium BCE to the collapse of the empire in the 7th c. BCE. Using published excavations, surveys, and texts, we will explore Assyria's material culture, landscape, cult practices and state ideology. Enrollment limited to 15 seniors and graduate students.

**ARCH 2350. Archaeology of the Caucasus.**

The goal of this seminar is to provide students with an overview of the long-term archaeological record from the Caucasus and its near neighbors, as well as an understanding of the history of research in this area during Imperial Russian, Soviet, and contemporary times. Readings will cover a range of periods, prehistoric and historic, following the interests of the class.

**ARCH 2400. Sacred Space: Archaeological and Religious Studies Perspectives.**

Innumerable cultures, past and present, have singled out specific locales and even whole landscapes as powerful vectors for communicating with the divine. This course will analyze such spaces for their ability to transform body, escape the material plane, and reconstitute social relations and bodily practice. Case studies will largely be drawn from the Mediterranean world and will employ an archaeological attention to the materiality of these sacred spaces. Key concepts will include: ritual practice, landscape production, memory and agency. Prerequisites: three upper-level courses in Archaeology and the Ancient World, Religious Studies, or Anthropology.

**ARCH 2406. The Body in Medieval Art and Architecture (HIAA 2440E).**

Interested students must register for HIAA 2440E.

**ARCH 2407. Lived Bodies, Dead Bodies: The Archaeology of Human Remains (ANTH 2560).**

Interested students must register for ANTH 2560.

**ARCH 2410. Archaeologies of Place.**

Places are understood as sites of human interaction in and with the material world. This course explores how archaeological and ethnographic research addresses material complexities and cultural meanings of places in the context of broader landscapes. We will investigate critical theories of place and landscape, while working with fieldwork data from the ancient Near East, particularly Hittite Anatolia. Enrollment limited to 20.

**ARCH 2412. Space, Power, and Politics (ANTH 2590).**

Interested students must register for ANTH 2590.

**ARCH 2425. In Ruins: Traces of the Past in the Present.**

Ruins -- the debris and skeletons of monuments from the past -- constitute the leftovers of people and places that once were. Yet archaeologists have not thought critically about this seemingly essential concept. Ruins and ruination are fundamental to deeper understandings of culture contact, the rise and fall of civilizations, state power and political factionalism, urbanism, colonialism, capitalism, and deindustrialization. This course will examine, across a broad geographic and temporal scope, ruins as things, as well as ongoing processes, that affect the landscape.

**ARCH 2450. Comparative Empires and Material Culture.**

The political, military, and cultural unit of "empire" has, by now, been the subject of numerous and varied studies. This seminar will explore the tangible effects of empires, that is, the art and architecture created when societies are engaged in what can be viewed as asymmetrical power relationships. In order to understand how conditions specific to empire influence the creation, dissemination, and reception of material culture, this course will examine the artifacts of four different empires - the Roman, the Chinese, the British, and the American - and their unique political, social, and cultural contexts. The creation of a "virtual exhibit" of a range of illustrative artifacts is currently envisioned as an outcome of the class.

**ARCH 2500. Art and Archaeology of Civic Identity.**

Every urban community in the Greco-Roman world presented itself in a specific way to other communities and to foreign entities. Looking at coins, public monuments, programmatic sculpture, and epigraphic and textual evidence, we will address different concerns related to the formation and propagation of civic identities. Comparative material from other historical periods and theoretical and anthropological literature on group identity, social cohesion, and empire will contextualize the visual and archaeological evidence. Prerequisites: three previous courses in Archaeology and the Ancient World.

**ARCH 2501A. Problems in Archaeology: Archaeology of Colonialism (ANTH 2500A).**

Interested students must register for ANTH 2500A.

**ARCH 2501C. GIS and Remote Sensing in Archaeology (ANTH 2500C).**

Interested students must register for ANTH 2500C.

**ARCH 2502. Historical Archaeology: From Colony to City (ANTH 2540).**

Interested students must register for ANTH 2540.

**ARCH 2535. The Levant and Egypt: Cultural Contacts and Connections.**

A land steeped in story and history, the Levant (now Syria, Lebanon, Israel, Palestine, and Jordan) was a dynamic crossroads of ancient civilizations, from Mesopotamia and Anatolia and stretching across Europe. But this region is nearly always viewed through the lens of its larger, well-known neighbor: Egypt. This course will shift this viewpoint by exploring the nature and agency of trade, colonization, diplomacy, migration -- and even war -- between the Levant and ancient Egypt, paying particular attention to the archaeological record in reconstructing these interactions and cultural interconnections.

**ARCH 2540. Roman, Byzantine and Early Islamic Jerusalem.**

Jerusalem constitutes one of the most important archaeological sites connected to the origins of Judaism, Christianity, and Early Islam. Early and recent studies and discoveries, as well as old and new theories, will be examined in the seminar with special emphasis on the Roman, Byzantine, and Early Islamic periods. Prerequisite: knowledge in archaeological methodology.

**ARCH 2550. Qumran and its Archaeological Context.**

This course is structured as a seminar on the archaeology of Qumran and the Dead Sea Scrolls. The site will be examined in its larger geographical, historical, and archaeological context. The goal is to become familiar with the different scholarly interpretations of the site. Prerequisites: solid background in at least one of three fields: archaeology, Judaism, and Early Christianity.

**ARCH 2551. Archaeological Research Methods, Theory and Practicum (ANTH 2550).**

Interested students must register for ANTH 2550.

**ARCH 2552. Museums in Their Communities (AMST 2220D).**

Interested students must register for AMST 2220D.

**ARCH 2553. Introduction to Public Humanities (AMST 2650).**

Interested students must register for AMST 2650.

**ARCH 2554. Decolonizing Public Humanities: Intersectional Approaches to Curatorial Work + Community Organizing (AMST 2694).**

Interested students must register for AMST 2694.

**ARCH 2557. Critical Approaches to Architectural Preservation and Cultural Heritage (AMST 2685).**

Interested students must register for AMST 2685.

**ARCH 2600. Gender and Sexuality in Roman Art.**

The study of the body and embodiment in Roman art encourages us to make use of multiple theoretical models for interrogating both the art and the bodies involved. Gender and sexuality provide the lenses through which this course will explore a variety of topics (for example, the homoerotic gaze, sexualized spectacles of pain, gendered architectural typologies, and the body in rabbinic imagery) in Roman imperial art. Open to graduate students only.

**ARCH 2601. Approaching Women and Gender in Roman Culture.**

Gender as a hierarchical concept was a fundamental basis of Roman culture, but women often played active roles in shaping political, religious, and social ideologies in both public and private contexts. Drawing on material, visual, and literary evidence, as well as theoretical concepts of gender in the ancient world, this course will examine not only how the concepts of women and gender were constructed and perpetuated, but also how they were simultaneously resisted and subverted.

**ARCH 2620. All Italia: City and Country in Ancient Italy.**

This seminar approaches the urban and rural landscapes of peninsular Italy from the Early Iron Age until the Gothic Wars, with the goal being to examine key points of intersection (and departure) between the spheres of 'town' and 'country'. Overall the seminar aims to contextualize Italian landscapes across both time and space and to that end we will consider issues pertaining to urbanism, economy, production, infrastructure, administration, architecture, and iconography. Enrollment limited to 20 seniors and graduate students.

**ARCH 2640. Hispania: the Making of a Roman Province.**

How were Roman provinces created and incorporated into the Roman Empire? What traces exist in the archaeological record of the bonds between the provinces and the metropolis? This course approaches the complex issue of colonialism, material culture, change and continuity in connection with the Roman conquest of new territories in the Mediterranean, taking as an example the impressive pool of new archaeological data available from Roman Spain. Restricted to Juniors, Seniors, and Graduate students.

**ARCH 2710. The Archaeology of Nubia and Egypt.**

Egypt and Nubia share the distinction of ancient civilizations along the Nile river, but Nubia remains much more poorly known than Egypt. This seminar will examine the archaeology of Nubia, including its relationship to Egypt, from the introduction of ceramics and agriculture to the medieval period. This long-term perspective will allow comparative study of issues such as state formation, imperialism and religious change. Enrollment limited to 15 graduate students.

**ARCH 2740. Social Life in Ancient Egypt.**

This course will draw upon recent discussions in anthropology and sociology that explore issues of identity by examining hierarchies of difference - age, sex, class, ethnicity. We will focus on linking theory with data and on discussing modern and ancient categories of identity. Taking the lifecycle as its structure, the course covers conception to burial, drawing on a range of data sources, such as material culture, iconography, textual data and human remains. The very rich material past of ancient Egypt provides an excellent framework from within which to consider how identity and social distinctions were constituted in the past.

**ARCH 2851. Skills Training in Material Culture Studies I.**

When dealing with material culture, one must possess a solid foundation in a range of skills. How does one document and analyze artifacts, architecture and landscapes; what techniques are appropriate in what cases? How should all this information be securely stored and promulgated? This "hands on" class, intended for students in multiple disciplines, will consider the study of particular types of material or bodies of evidence (e.g., pottery, lithics, epigraphy, numismatics). This is a half-credit course, meeting for the first seven weeks of the semester only. S/NC.

**ARCH 2852. Skills Training in Material Culture Studies II.**

When dealing with material culture, one must possess a solid foundation in a range of skills. How does one document and analyze artifacts, architecture and landscapes, what are the appropriate techniques? How should all this information be securely stored and promulgated? This "hands on" class, intended for students in multiple disciplines, will revolve around techniques of documentation and analysis (e.g. architectural drawing, GIS [Geographic Information Systems], data bases and digital media). This is a half-credit course, meeting for the first seven weeks of the semester only. S/NC.

**ARCH 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**ARCH 2980. Individual Reading.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ARCH 2981. Thesis Research.**

Individual reading for the Master's degree. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ARCH 2982. Individual Reading for Dissertation.**

Reading leading to selection of the dissertation subject. Single credit. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ARCH 2983. Dissertation Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**ARCH 2990. Thesis Preparation.**

For graduate students who are preparing a thesis and who have met the tuition requirement and are paying a registration fee to continue active enrollment.

## Judaic Studies

### Director

Saul Olyan

The Program in Judaic Studies is dedicated to the study of Jewish history, literature, language, politics and religions. Offering an interdisciplinary undergraduate concentration, the program provides students with the opportunity to explore Jewish culture and civilization across the ages. Since Christianity and Islam have deep roots in Judaism, and the Western world has been profoundly shaped by a deep and abiding tension with both Jewish religious tradition and the Jewish communities in its midst, the concentration puts particular importance on studying the interactions of Jews and non-Jews in both ancient and modern periods. The history and culture of the State of Israel and its place in the Middle East is also a major focus of study. These are all issues with significant contemporary resonance, so the concentration offers its students many new insights on the world in which we live.

The critical reading of texts - from the Hebrew Bible to contemporary Israeli poetry, from the kabbalah to modern Jewish autobiography, from philosophical treatises to communal record books - is central to the Judaic Studies concentration. Students are required to complete at least one year of course work in Hebrew, the language of foundational Jewish texts from antiquity to modern-day Israel. They are also encouraged to further improve their Hebrew, and where feasible, to study other

appropriate languages such as Yiddish, Aramaic, ancient Greek, Arabic, or contemporary European languages.

For additional information, please visit the department's website: <http://www.brown.edu/academics/judaic-studies/>

## Judaic Studies Concentration Requirements

Jews have lived and flourished over thousands of years in a variety of social contexts, stretching from the Land of Israel and the eastern Mediterranean to Asia, Africa, Europe, and the Americas. Concentrators will have the opportunity to study Jews in these contexts, getting to know their social structures, and what they have created. The subjects of study cover an astonishing range, including history and society, Jewish law and philosophy, and Jewish literature and ritual. Students will learn to unlock this wealth in both the ancient and the modern worlds through a number of academic disciplines - History, Religious Studies, and Literature. These also provide tools for studying and analyzing human societies and cultures in general, for which Jewish experiences provide an important perspective.

### PROGRAM IN JUDAIC STUDIES

#### Required Coursework

A concentration in Judaic Studies includes the following requirements:

- 1) All students are required to take a total of ten courses.
- 2) All students must take one full year of Hebrew (two of the ten required courses). Generally, this requirement will consist of two courses in Elementary Hebrew (HEBR 0100/HEBR 0200) or the equivalent as determined by a proficiency examination. Fulfillment of the Hebrew requirement through examination does not reduce the requirement to take ten courses for the concentration.
 

Students choosing to continue with Hebrew language study may apply up to two additional Hebrew language courses (HEBR 0300, HEBR 0400, or HEBR 0500) to the additional four required courses for the concentration.
- 3) Upon declaring a concentration in Judaic studies, each student must define his or her primary disciplinary track (History, Religious Studies, or Language/Literature). Concentrators will then be assigned a faculty mentor in that discipline (within the JS faculty) to help the students select courses and construct a coherent concentration plan.
- 4) Of the courses required in the Program in Judaic Studies, at least one should focus on the ancient period and one should focus on the modern period.
- 5) Each student, in discussion with his/her mentor, is required to designate an advanced course (1000 level) in his/her senior year either within the Judaic Studies program or in the corresponding disciplinary department as the capstone for his/her concentration. Within the frame of this capstone course, the concentrator will write a final paper on a topic in Judaic Studies that displays in an appropriate way the theoretical and interpretive issues of the concentration focus. If students opt to fulfill this requirement in a course outside the Program in Judaic Studies, the student must get permission in advance both from his/her mentor and from the professor of the course in question since the student's final project will address a Judaic Studies topic or theme.
- 6) Double concentrators may count up to two courses that deal with Jewish history, culture, or practice that they have used to complete their concentration requirements in another department towards their concentration in Judaic Studies.

The following are required for the completion of each track:

#### History or Religious Studies Track:

Students are expected to complete:

1. HEBR 0100/HEBR 0200
2. A minimum of four courses offered in the Program in Judaic Studies
  - a. Students with a disciplinary focus in History should take at least one course focusing on the ancient period.
  - b. Students with a disciplinary focus in Religious Studies should take one course focusing on the modern period.

3. At least one course (but no more than two) should be taken outside the program in Judaic Studies in the department of disciplinary focus (preferably methods courses, such as in the History department or RELS 1000).
4. Students in this track, in consultation with the concentration adviser and faculty mentor, may apply up to two additional Hebrew language courses (HEBR 0300, HEBR 0400, or HEBR 0500) to the additional four required courses for the concentration.

#### Language/Literature Track:

Students are expected to complete:

1. Five courses in Hebrew language (HEBR 0100 / HEBR 0200; HEBR 0300/HEBR 0400; HEBR 0500).
2. "Issues in Israel in Hebrew" (HEBR 0600)
3. One further course in Judaic Studies with a disciplinary focus upon Literature.
4. Two additional courses in the disciplinary focus, at least one of which must be outside the Program in Judaic Studies in a department of shared disciplinary focus (e.g. English or Comparative Literature).
5. Fulfillment of the Hebrew requirement through proficiency examination does not reduce the requirement to take ten courses for the concentration.
6. Of the courses required in this track one should focus on the ancient period.
7. A 1000-level Capstone

#### **Study Abroad:**

Students who study at other institutions, either in the United States or abroad, may apply a maximum of four courses (two topical and two language courses) to the concentration.

### Honors Program

Any student who wishes to engage more deeply in research related to Judaic Studies in any of its disciplines or branches is invited to consider writing an Honors Thesis.

#### **The Honors Thesis**

The goal of the thesis is to add to the existing scholarship in the field of Judaic Studies. It should be based on original research, involving the close reading of primary sources. The honors thesis is expected to present an argument based on the student's own analysis and will engage an ongoing debate or discussion in the field, demonstrating an awareness of the major research done until now and clearly identifying its own contribution, however limited. Since it is the equivalent of two semester-long courses, it should be a substantial piece of work (typically between 35,000-55,000 words) containing a sustained and consistently supported argument. To be successful, the student needs to adopt both a critical research methodology and a logical research strategy, both of which should be discussed in the thesis itself. In addition to being assessed in all these aspects, the thesis will also be graded on its organization (the way in which it is structured into separate and clearly defined chapters to support the main argument) as well as the quality and precision of its writing.

Work that simply describes and summarizes its sources along with previous research is not acceptable. The goal here is original research and analysis.

#### **Entering the Program**

In order to be considered a candidate for Honors, students will be expected to have maintained an outstanding record (at least A in Judaic Studies courses. The Honors thesis, which fulfills the capstone requirement, will normally be written as a two-semester individual study project (numbered JUDS 1975/JUDS 1976) during the senior year.

A student contemplating a thesis should approach the faculty member with whom he or she hopes to work during the sixth semester. Once he or she has agreed to be the advisor (or helped find another member of the program better suited to the project), the student begins a process of consultation in order to determine a topic for the thesis, its sources, and proposed methodology. The contours of the project should also be laid out so that the student can commence productive research at the very beginning of the seventh semester. After this, a second reader for the

thesis should be chosen by the advisor in consultation with the student.

This may be a faculty member of the Judaic Studies program, one of the affiliate faculty, or, should the topic require it, a member of a different department. By the last week of the semester, the student should submit a thesis information form detailing the thesis topic with a short description of the proposed project, countersigned by advisor and second reader.

#### Thesis Proposal

During the first three weeks of the seventh semester, the student should work with the faculty advisor to write a thesis proposal.

This should be a brief document (1,500-2,000 words) explaining the topic chosen for the thesis and its significance to the field of Judaic Studies, with reference to previous research on the subject. The proposal should detail the questions to be asked and the kind of argument that will be made as well as explaining the primary sources and research methodology that will be employed. The proposed research strategy (i.e. the stages by which research and writing will be done) and timetable should be appended together with a brief, one page bibliography of primary sources and major research to be consulted.

Once the advisor is satisfied with the proposal, the student will be considered fully accepted into the Honors program and can enroll in the required independent study course by the last day to add a course in the fourth week of the term.

#### Research and Writing

It is the responsibility of the student to carry out the research program outlined in the proposal, as well as to write the thesis in an organized and timely fashion. During the process of research and writing, the advisor will continue to work closely with the student, providing guidance on research methods and suggesting further secondary reading. A regular meeting schedule will be set up to help the student meet the short- and long-term deadlines he or she has set. The advisor will also evaluate the progress of the research, providing any necessary direction and detailed feedback on written drafts.

The second reader will also be available to provide a measure of input and guidance during the process of research and writing. This may be particularly important in those areas where the primary advisor has limited expertise. The second reader may also be willing to help with giving feedback on various sections of the thesis drafts. All these roles should be determined by a process of consultation involving the advisor, the student, and the second reader him/herself.

The final thesis should have a complete scientific apparatus - citations and a full bibliography - in a form determined by the advisor.

It should be submitted no later than April 15 for May graduates and November 15 for December completers.

#### Assessment

The thesis will be assessed independently by the advisor and the second reader in written reports. In order to receive Honors, it should be deemed excellent according to the following standards:

- Is the scope of the work appropriate for an Honors thesis?
- To what extent does it qualify as original research?
- To what degree does it sustain an analytic argument throughout?
- To what degree is it rooted in an engagement with previous research?
- How well does it reflect critically on its method and process?
- To what extent is the organization adequate to the argument presented?
- How well is the thesis rooted in the common conventions of the field?
- To what degree is the writing clear, cogent, and free of errors of grammar, tone, and style?

The two reports will be circulated to all faculty members in the program, who will review them before making the final determination at the next faculty meeting whether the thesis merits Honors. The meeting must be held, the decision reached, and the candidate informed before the Registrar's deadline for that semester.

#### Further Information

Students who are interested in further information about the concentration should contact the Judaic Studies Office at 163 George Street to make

an appointment with the undergraduate concentration advisor. [Tel: 401.863.3910] or Judaic@brown.edu.

HEBR 0100/HEBR 0200

## Courses

### Biblical Hebrew

#### BHBR 0100. Introduction to Biblical Hebrew.

An intensive introduction to the fundamentals of biblical Hebrew grammar and vocabulary intended to prepare students to read biblical texts in the original language. For students with little or no prior knowledge of Hebrew.

#### BHBR 0200. Readings in Biblical Hebrew.

An introduction to the reading of biblical texts in Hebrew. Reading of selected texts from narrative, law, and poetry in the Hebrew Bible, with a few texts in post-classical Hebrew (the Dead Sea Scrolls and the Mishnah) introduced late in the semester. Intended for students who have completed BHBR 0100; others should consult the instructor.

## Hebrew

#### HEBR 0100. Elementary Hebrew.

An introduction to the skills of reading, writing, and conversing in contemporary Israeli Hebrew. Students also read Hebrew texts adapted for their level of Hebrew based on biblical, rabbinic, and modern Hebrew literature, which introduce them to the approaches of Hebrew writers in various periods and to a variety of cultural issues. If registration is closed, please contact the professor and a wait list will be created. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special permission. Enrollment limited to 20.

#### HEBR 0200. Elementary Hebrew.

This is the second half of a year-long course, an introduction to the skills of reading, writing, and conversing in contemporary Israeli Hebrew. Students also read Hebrew texts adapted for their level of Hebrew based on biblical, rabbinic, and modern Hebrew literature, which introduce them to the approaches of Hebrew writers in various periods and to a variety of cultural issues. Prerequisite: HEBR 0100. Students must have taken HEBR 0100 for credit to receive credit for this course. Exceptions must be approved by both the academic department and the Committee on Academic Standing. Enrollment limited to 20.

#### HEBR 0300. Intermediate Hebrew.

Develops the skills of reading, writing, and conversing in contemporary Israeli Hebrew at the intermediate level and of reading Hebrew texts of the biblical, rabbinic, and modern periods (biblical stories, rabbinic legends, modern Hebrew poems, stories, essays, newspaper articles). Discussions and compositions focus on the psychological, cultural, political, and social issues reflected in the Hebrew sources that we study. Prerequisite: HEBR 0200 or equivalent. Enrollment limited to 20. If unable to enroll because of closed registration, please contact the professor and a wait list will be created.

#### HEBR 0400. Intermediate Hebrew.

Develops the skills of reading, writing, and conversing in contemporary Israeli Hebrew at the intermediate level and of reading Hebrew texts of the biblical, rabbinic, and modern periods (biblical stories, rabbinic legends, modern Hebrew poems, stories, essays, newspaper articles). Discussions and compositions focus on the psychological, cultural, political, and social issues reflected in the Hebrew sources that we study. Prerequisite: HEBR 0300 or equivalent. Enrollment limited to 20. If unable to enroll because of closed registration please contact the professor and a wait list will be created.

#### HEBR 0500. Writing and Speaking Hebrew.

Enables students to improve their skills in speaking and writing Hebrew on a variety of topics. Features advanced work on language structure and active language practice in the classroom. Class discussions of Israeli current events draw on Israeli stories, poems, television programs, and films and on the Israeli press. Students also compose essays and stories in Hebrew. Prerequisite: HEBR 0400 or equivalent. Enrollment limited to 20.

**HEBR 0600. Issues in Contemporary Israeli Society, Politics, and Culture in Hebrew.**

An exploration of current issues in contemporary Israeli society, politics, and culture: the Israeli-Palestinian conflict, tensions between ultra-orthodox and secular Jews, religion and state, Israel as a Jewish and democratic state, the economic gap between rich and poor, the integration of citizens from a variety of backgrounds (Jews of Middle Eastern, North African, Russian, and Ethiopian origin; Arab citizens of Israel), gender relations. Sources include films, television programs, Internet news, works of literature. Conducted in Hebrew. Emphasizes strengthening Hebrew reading, writing, and speaking skills. Prerequisite: HEBR 0500. Students who have not taken HEBR 0500 should see instructor for permission to enroll.

**Judaic Studies****JUDS 0050A. Believers, Agnostics, and Atheists in Contemporary Fiction and Memoirs.**

In recent decades, there has been a resurgence of religiosity in contemporary society, while at the same time many have been skeptical and even hostile to religious belief and practice. Others are just not sure what to believe. We will study selections of fiction and memoirs by writers of Christian and Jewish background that explore such situations as the affirmation or negation of the existence of God, the role of religious ritual in a person's life, and the positive and negative impacts on society of religious institutions and the clergy who lead them. Enrollment limited to 19 first-year students.

**JUDS 0050E. From Amsterdam to Istanbul: Christians, Muslims, and Jews.**

This course combines text, picture, and music to study the history of Europe and the wider world in the early modern period through the eyes of a minority. Examines the new Jewish centers in the Atlantic world, the Ukrainian steppe, and the Middle East from 1500-1800, and how they shaped these environments. Students study cultural revolutions, such as the spread of printing, the renaissance and new religious movements. See how the development of the modern state and the blurring of social, religious, and gender boundaries created new definitions of religious and cultural identity. Enrollment limit: 19 first year students.

**JUDS 0050H. Israel's Wars.**

Israel's history has unfolded under the shadow of its prolonged conflict with the Palestinians and its Arab neighbors. This first year seminar will survey the military aspect of this conflict. The major aim of the course is to present an historical survey of the Israeli-Arab wars and Jewish-Palestinian encounters in the 20th century. This will provide some of the necessary background for understanding the present phase of the Arab-Israeli conflict in the Middle East, and help in comprehending the roots and causes of contemporary controversies between Israel and the Palestinians and/or its Arab neighboring states. Enrollment limited to 19 first year students.

**JUDS 0050J. Friendship in the Ancient World (RELS 0090F).**

Interested students must register for RELS 0090F.

**JUDS 0050L. The Jew in the Modern World.**

How have Jews come to terms with dynamic nature of the Modern World? How has life in new places and new times affected Jewish life? We will look at the changing structures of Jewish identity in the modern period as the Jews came to terms with their new, and ever changing situation in society. Each week a different form of Jewish identity will be examined in its specific historical setting. Among others we will look at a Court Jew, an Enlightened Jew, a Jewish Nationalist, a Jew in a Nazi Ghetto, an Israeli Jew, and a contemporary American Jew. Enrollment limited to 19 first year students.

**JUDS 0050M. Difficult Relations? Judaism and Christianity from the Middle Ages until the Present.**

Jewish and Christian identity in Europe has traditionally been closely connected to the ways the two religions view each other. Mutual admiration, influence, and hatred have combined together in a difficult relationship, fundamental to European history. In this course, we will survey that relationship, examining some key issues and events which shaped it. The Jews' attitudes and actions will be examined alongside those of their Christian neighbors. Topics covered include: medieval revulsion and attraction; early modern re-evaluations of Judaism and Christianity; modern Christian anti-Semitism, Jewish diplomacy, and the Holocaust; the effects of Vatican II; Israel and the contemporary Christian world.

**JUDS 0050N. Death and Afterlife in the Biblical Tradition (RELS 0090J).**

Interested students must register for RELS 0090J.

**JUDS 0060. The Bible and Moral Debate.**

How was the Bible employed in past moral debates that divided American society, e.g., debates over the legitimacy of slavery? How is the Bible used in contemporary moral discourse, e.g., concerning abortion, capital punishment and gay rights? What does the Bible really have to say about such issues? This course will consider these and other questions through a close reading of pertinent texts which address topics such as abortion, homosexuality, capital punishment, immigration, gender, family violence, race and slavery, disability, genocide, the environment and inequality of wealth. No prerequisites.

**JUDS 0061. Foreigners, Refugees, and the Ethics of Minority.**

This class interrogates the legal and ethical definitions of persons and homelands by examining the relationship between concepts of native and foreigner, hospitality and neighbour, refuge and exile, minority and majority. We will adopt historical, philosophical, and legal perspectives and take the Jewish historical experience of exile and minority as a jumping off point for discussing the contemporary refugee and migration crisis. The goal of this class is to contextualize liberal democratic debates over rights to migration and mobility with historical religious and moral sources as well as to explore the possibilities for social integration of difference within pluralism.

**JUDS 0062. Intro to the New Testament (RELS 0022).**

Interested students must register for RELS 0022.

**JUDS 0063. Antisemitism: A History.**

Antisemitism is sometimes called the "longest hatred," and from Pittsburgh to Paris it is on the rise. This course will examine the history of antisemitism and antisemitic tropes; theoretical approaches to its persistence; and individual case studies. Topics will include: Christian and Muslim anti-Judaism; racism; economic stereotypes; and modern manifestations in the U.S. and Europe. Class assignments will be largely be project-based.

**JUDS 0064. Angels and Demons: Past and Present.**

What are angels and demons, what roles do they play in religious thought, and how do their roles change or remain consistent over time? These are only a few of the questions this course seeks to address. Texts to be considered include the Hebrew Bible (Old Testament), the New Testament, the Dead Sea Scrolls, rabbinic literature, the Kabbalah, records of the Salem Witch Trials, Milton's Paradise Lost, Goethe's Faust, the Book of Mormon, contemporary Evangelical literature and New Age writings, and representations of angels and demons in film and television. No prior knowledge of the Bible, Judaism or Christianity is assumed.

**JUDS 0065. Ancient Israelite and Jewish Narrative and Artistic Image.**

Ancient Israel produced a great body of narrative art that is preserved in the Bible—Genesis, Exodus, the warriors of Judges, the story of David's founding of Israel and the succession to Solomon. The Jewish culture that followed extended the story-telling tradition in new directions—Daniel, the "novel women" of Esther, Susanna, and Judith. These brilliant and powerful stories inspired equally powerful images in art and sculpture. Both story and image still affect us. This course will explore the ancient narratives as story and the art they inspired as visual image.

**JUDS 0080A. Ethics After Auschwitz?.**

Can we still speak of a "human condition"—a moral term—when human beings are capable of genocide? Does ethical responsibility have meaning if another's death can be manufactured by the state? Can traditional morality and religion still find a place in a world of which it cannot make sense? In this class, we will take the Holocaust as the beginning of a tragic account of contemporary humanity and examine the possibilities for human life and morality in light of the social and political orchestration of mass killing and oppression. Authors include, Adorno, Agamben, Arendt, Fackenheim, Foucault, Levi, and Levinas.

**JUDS 0090C. Intermediate Biblical Hebrew.**

An intermediate course for those who have completed JUDS 0090A and 0090B, the introductory level courses. Focus on reading a single biblical book (translation, grammar and syntax, interpretation).

**JUDS 0090D. Intermediate Biblical Hebrew II.**

An intermediate course, the continuation of JUDS 0090C. Focuses on reading a single biblical book (translation, grammar and syntax, interpretation). Intended for students who have completed JUDS 0090C; others should consult the instructor.

**JUDS 0601. Authority and Autonomy.**

This course will introduce the history of Jewish thought, focusing upon the problems of authority and autonomy, normativity and agency, law and freedom. We will investigate the relationship between legally mandated actions and an individual's responsibility to tradition and community and question whether the concept of revealed "law" imposes a "necessary" obligation upon ethical agency or rather serves a pedagogical function (virtue). By focusing upon Jewish philosophical critiques and endorsements of the modern conception of autonomy, we will ask whether "I" am the legitimate authority of my own actions or whether I require tradition or community to set an example.

**JUDS 0602. Gender in Early Jewish and Christian Texts (RELS 0195).**

Interested students must register for RELS 0195.

**JUDS 0603. Race, Religion, and the Secular.**

The most "secular" presidential election in American history saw the language of Christian America apparently yield to a rhetoric of racism, misogyny, and white identity. But racialization and secularization are very much intertwined. In an effort to understand how "whiteness" is tied to the history of Christianity and secular, liberal democracies, this class will trace the figure of the "Jew" in the Christian imagination, and examine the racial and religious othering of Judaism as an entry point for reflecting upon contemporary American social and political struggles surrounding religious and racial identities.

**JUDS 0606. Gender in Early Jewish and Christian Narratives.**

Many of the favorite narratives of Jews and Christians in the ancient period (for this course, about 400 BCE to 300 CE) featured women characters or emphasized issues of gender: Esther, Judith, and Susanna; Mary Magdalene and other gospel women, or Thecla, the perhaps legendary companion of Paul. Both Jewish and Christian texts used gender to explore new ways of constructing heroic women and men that either re-inscribed or challenged traditional roles. This seminar takes up a close reading of narrative texts, compared also with wisdom texts (Proverbs, Ben Sira, Wisdom of Solomon, Avot).

**JUDS 0625. Israelite Religion (RELS 0320).**

Interested students must register for RELS 0320.

**JUDS 0630. The Old Testament/Hebrew Bible and Its World.**

An introduction to the historical-critical study of the Hebrew Bible and a reconstruction of the history of Israel to the end of the Persian period (332 B.C.E.). Topics include biblical source criticism; Israel's obscure origins; reconstructing the settlement period; an imperial Israel under David and Solomon; institutions-law and authority, covenant, prophecy, temple cult and priesthood. All readings in translation. No prerequisites.

**JUDS 0670. War and Peace in the Hebrew Bible and its Environment.**

An examination of the role of war and peace in the Hebrew Bible and in texts and art of ancient Israel's neighbors. Topics include divine beings, war and peace-making; peace treaties; explaining defeat and victory; ideologies of warfare; the treatment of prisoners, corpses and captured bones; the warrior as masculine ideal; civil war and coups; treaty obligations; ritual dimensions of war and peace (e.g., mourning, animal sacrifice, child sacrifice, divination, memorializing war); visual representations of war as propaganda; the idea of a future, eschatological war between the forces of good and the forces of evil. No prerequisites.

**JUDS 0671. Sex and Gender in Ancient Israel.**

An investigation of Israelite views of the sexes, restrictions on sexual expression, and the construction of gender as evidenced by biblical sources and archeological data. Topics include creation stories on human origins and the human condition, including the origin of the two sexes and reproduction; marriage and family life (inheritance, intermarriage, divorce, the widow, status of the fetus); sexual boundaries (adultery, rape, incest, prostitution, homoeroticism); purity and sexual expression; male and female religious professionals and votaries; constructing gender: masculine and feminine behaviors.

**JUDS 0680. Judaism, Christianity, and the Bible.**

No book in human history has exercised as much influence as the Bible. Over the past 2,000 years, people have killed and died for the Bible, and it continues to exercise a powerful if contested role in modern politics. Yet how did it achieve this power? This course will trace the development of the Hebrew Bible (Old Testament) from its origins in ancient Israel to its development about five hundred years later as a foundational text of both Judaism and Christianity. The focus will be on how Jews and early Christians throughout antiquity understood and ascribed authority to the Bible.

**JUDS 0681. Great Jewish Books.**

A survey of classic Jewish texts, from the Bible to modern literature. Each text will be discussed from the perspective of both its own historical and social context and its engagement with earlier ones. Attention will be paid on how these authors address perennial issues of human concern and how their answers are shaped by their experience as Jews.

**JUDS 0682. How the Bible Became Holy.**

Over the past 2,000 years, people have killed and died for the Bible, and it continues to exercise a powerful if contested role in modern politics. Yet how did it achieve this power? This course will trace the development of both the Hebrew Bible (Old Testament) and the New Testament, from their origins to their status of foundational texts of Judaism and Christianity. The focus will be on how Jews and early Christians throughout antiquity understood and ascribed authority to the Bible. No prior knowledge necessary.

**JUDS 0683. Jews and Money.**

In the West, there has always been a complicated relationship between Jews and money. In the first part of this course, we will examine, both theoretically and empirically, the complex relationship between Jews, capitalism, socialism, nationalism, and anti-Semitism. In the second part of the course, we will return to the one aspect of the "cultural capital" that is sometimes said to have helped Jews to prosper: their religious tradition. We will put these religious teachings into conversation with pressing modern questions such as: What is "wealth" and "ownership"? Do the rich and poor have obligations to each other?

**JUDS 0684. Great Jewish Books (RELS 0323).**

Interested students must register for RELS 0323.

**JUDS 0685. Judaism, Christianity, and Islam (RELS 0088).**

Interested students must register for RELS 0088.

**JUDS 0686. The Ten Commandments.**

A history of the Ten Commandments from the Bible to today. How have the commandments been understood by Jews and Christians throughout time? What symbolic importance have they had?

**JUDS 0820. The Language of Religious Faith.**

A course on the ways poetry provides a language of religious faith that emerges from the sense of a divine presence in human experience. We will explore how this language of religious faith expresses a wide range of both negative and positive responses by those seeking a relationship with this divine presence, including fear, doubt, guilt, abandonment, ecstasy, gratefulness, hopefulness, and security. Our study of this phenomenon will yield insights into the relationship between psychology and spirituality. Sources will include the biblical books of Psalms and Job and contemporary Jewish and Christian poetry.

**JUDS 0830. The Bible as Literature.**

Explores how methods of literary analysis can be applied to the reading of narratives of the Old Testament/Hebrew Bible (in English translation). Also compares the ways that modern writers have transformed biblical stories into new interpretive literary works. For students interested in an introduction to the Bible, as well as students with a knowledge of the Bible who want to deepen their understanding of biblical narratives and investigate the influence of the Bible on modern literature. All readings in English.

**JUDS 0840. "Coming Out" Jewish, Gay or Black: Mistaken Identity in Literature from USA and Brazil (POBS 0820).**

Interested students must register for POBS 0820.

**JUDS 0901. Brothers Betrayed: Jews and Poles from 1500 until Today.**

Jews have lived on Polish lands for some nine hundred years. In that time, they and their non-Jewish neighbors have interacted in a wide range of ways, from friendship and co-operation to hatred and violence. In this course, we examine this centuries long relationship, focusing particularly on how peaceful co-existence between Poles and Jews could rapidly change to bitter hostility. Topics include: Jews and the early-modern nobility; the nineteenth-century "Polish-Jewish Brotherhood"; the exclusionary politics of the interwar Polish republic; Poland's role in the Holocaust; the post-war Communist regime and the Jews; Polish-Jewish relations following the collapse of communism.

**JUDS 0902. History of the Holocaust.**

Explores questions raised by the Holocaust regarding how such barbarism erupted in our so-called civilized and enlightened age. Attempts to analyze the meaning of the Holocaust from three vantage points: that of European, and more particularly, German history; that of Jewish history; and that of those states and religious institutions which shared responsibility. Enrollment limited to 40. If unable to enroll because of closed registration please contact the professor and a wait list will be created.

**JUDS 1002. Targumic Aramaic.**

A systematic study of the grammar of Targumic Aramaic followed by readings from Targum Onqelos to the Book of Exodus. Prerequisite: knowledge of the grammar of a Semitic language (preferably Hebrew). Open to undergraduates and graduate students with the necessary background. Regular attendance and thorough preparation are mandatory for all students in this class. By the end of the semester, we will have translated at least four chapters of the Onqelos Targum to Exodus. This course will serve as a foundation for any further work students intend to do with Aramaic (e.g., Old, Imperial, Biblical, Talmudic).

**JUDS 1530. Prophets and Priests in Exile: Biblical Literature of the 6th Century BCE.**

The exile of Judah's elite to Babylon elicited profound and conflicting literary responses. We will undertake a literary and historical analysis of a number of the most important works produced in response to the crisis of exile, including Jeremiah, Ezekiel, Second Isaiah, Lamentations, Psalm 137, the Priestly Writing, and the work of the exilic deuteronomists. Enrollment limited to 20.

**JUDS 1601. Jewish and Christian Identity in the Ancient Period.**

The modern engagement with the many ways that we construct identity has been matched by a similar wave of studies about identity construction in the ancient world. In this course we will discuss the rise of "Judaism" and "Jewish identity" in the ancient period (looking at roughly 400 BCE-200 CE), and compare it with the movement of the followers of Jesus as a negotiation of a new identity within Judaism (roughly 30 CE-200 CE). We will conclude with the question of the "Parting of the Ways" of these two groups.

**JUDS 1602. Mishnah and Tosefta.**

An examination and close reading of the Mishnah and Tosefta, two third-century CE documents foundational to rabbinic Judaism. The class will focus on both contemporary scholarly understandings of these texts and readings, in the original Hebrew, of the text itself. Knowledge of Hebrew (biblical, rabbinic, or two years of modern or its equivalent) required.

**JUDS 1603. On the Margins of the Bible: Jewish and Christian Non-Canonical Texts.**

Ancient Jews and Christians produced many texts that were not canonized in the Bible, texts often as interesting, beautiful, or theologically rewarding as those later canonized. Why were they not also included? What was the process of canonization, and who was in charge? What were the contexts that produced the non-canonical texts? Were the texts omitted at odds with the mainstream, or even dangerous? What value did they have in the ancient world, and what value do they hold today for historical understanding? We will study some of the best of these texts, comparing them to biblical texts.

**JUDS 1605. Social World of the Early Christians (RELS 1320).**

Interested students must register for RELS 1320.

**JUDS 1610. The Archaeology of Jerusalem: From the Origins to the Ottomans.**

Jerusalem earned a special eminence among the world's famed ancient cities. Its sanctity to Jews, Christians, and Muslims made the city a focus of discussions and controversies regarding the evolving and changing identities throughout its long urban history. 1700+ archaeological excavations and surveys in and around the Old City have been conducted over the last 150 years. Examine the material remains of the city from the beginnings in the Chalcolithic period through the Ottoman period, 1917 CE. The contemporary literary sources as well as the more recent scholarly debates and discoveries help us understand the material remains of the relevant periods.

**JUDS 1611. The Dead Sea Scrolls.**

The Dead Sea scrolls have been rightly celebrated as changing our fundamental understanding of ancient Jewish and Christian history as well as the Bible. But what is in them, and why do they matter? In this course we will read through most of the scrolls in English translation and cover topics such as: authorship; historical context; religious practice; and scripture and its interpretation. The course will develop skills in analytical writing, close reading, and historical reasoning. Enrollment limited to 20.

**JUDS 1613. Religion and Postcolonialism.**

When eighteenth- and nineteenth-century Western scholars turned their gaze toward the East they began fetishizing the wonders and mysteries of the "Orient". This powerful myth of the Orient helped to reimagine the Jews of Europe as an "internal colony" and also helped justify the colonization of and Christian missionizing among peoples abroad. This course will examine the social, political, and scholarly representations of religious and cultural otherness of Jews, Muslims, and Hindus who experienced Christianity as both a colonizing force as well as a model for imagining the nationalist projects of their post-colonial states.

**JUDS 1614. Heidegger, the Jews, and the Crisis of Liberalism.**

This class explores the enduring legacy of Heidegger's critique of Western philosophy in political, theological, and social thought. Focusing primarily upon Heidegger's reception in 20th-century Jewish philosophy, we will explore the allure of Heideggerian thought and its implication in both left and right political critiques of liberalism. Topics include onto-theology, phenomenology, and radical historicism; science, hermeneutics, and methodology in the humanities; liberalism and the secular; ethics, politics, action; de-structuration and deconstruction; time and the Other. Authors include Adorno, Arendt, Butler, Derrida, Levinas, Löwith, Marcuse, Rosenzweig, Schmitt, Strauss.

**JUDS 1615. The Archaeology of Palestine.**

Palestine constitutes one of the most important archaeological regions connected to the origins of Judaism, Christianity and Islam. In this class we will examine the material remains of the region beginning in pre-historic times until the end of the Ottoman period in 1917. Literary sources as well as the more recent scholarly debates and discoveries help us understand the material remains of the relevant periods.

**JUDS 1616. Adam and Eve in Early Biblical Interpretation (RELS 1144).**

Interested students must register for RELS 1144.

**JUDS 1617. Jewish Women: Between Conformity and Agency.**

This seminar studies Jewish women in different temporal and geographical contexts, internally within their own communities and externally with other neighboring religious groups. Visual and material sources (iconography, artifacts, architectures, film) are examined in dialogue with texts (biblical and Talmudic writings, medieval and modern commentaries, contemporary literature) to explore the binary of male authority and female agency. Case studies will encompass the Middle East and Europe from antiquity to the present.

**JUDS 1625. Problems in Israelite Religion and Ancient Judaism.**

A series of topics in Israelite religion and ancient Judaism which are of current scholarly interest are explored in a seminar setting. Students are encouraged to read widely and pursue individual research interests. The course assumes a basic knowledge of biblical literature and scholarly criticism. Enrollment limited to 20.

**JUDS 1630. The Talmud.**

Written from the first - seventh centuries CE, the Talmud (which runs to 20 volumes) contains law, lore, theological speculation, and complex argumentation. We will read a selection in depth and examine both traditional and modern critical (e.g. historical and literary) approaches to this fundamental text. No prerequisites; all texts in English translation. Enrollment limited to 20.

**JUDS 1635. Problems in Israelite History.**

Topics of recent and current debate among specialists in the field of Israelite history. Problems include (1) the historicity of the patriarchs and matriarchs; (2) the historical evidence relevant to the question of an exodus; (3) the nature of Israel's settlement in Canaan; (4) the 10th century, era of empire or literary fiction? (5) the land of Judah after the Babylonian conquest. Enrollment limited to 20.

**JUDS 1640. Judaism: History and Religion.**

Surveys the major practices, traditions, and beliefs of the Jews, with an emphasis on modern Jewish communities. How does a Jewish community shape its practices and beliefs against its own specific historical circumstances to create a coherent and meaningful religious system? What is "Judaism," and how do scholars of religion explain and interpret it?

**JUDS 1645. Jews and Judaism in the Greco Roman Mediterranean.**

An advanced survey of the evidence for Jews and Judaism in the Greco-Roman Mediterranean (Egypt, Asia Minor, Rome, North Africa, etc.). Sources include synagogue mosaics, burial and donor inscriptions, personal documents, and references in non-Jewish writers, including Christians. Also considers what theoretical models best enable us to reconstruct the identity, practices and beliefs of the ancient diaspora Jewish communities. Enrollment limited to 20.

**JUDS 1650. Religion and Sexuality.**

For millennia, religious thinkers have wrestled with the nature of sexuality. This class will examine how these thinkers have dealt with the essential questions that sexuality raises. Why do humans have sexual desire? Are there proper limits to sexual activity? While the focus of this class will be on Judaism and Christianity from antiquity to the present, we will also discuss Hindu, Muslim, and Tantra views. Topics to be addressed include: the nature and purpose of human sexual desire; contraception; adultery; homosexuality; abortion; and masturbation. No prerequisites.

**JUDS 1654. Russian Jewish Literature and Film (RUSS 1900).**

Interested students must register for RUSS 1900.

**JUDS 1655. Religion in the Dead Sea Scrolls (RELS 1150).**

Interested students must register for RELS 1150.

**JUDS 1665. Imposing Orthodoxy: "Jews," "Pagans" and "Heretics" when Constantinian Christianity Won (HMAN 1970I).**

Interested students must register for HMAN 1970I.

**JUDS 1670. Ancient Synagogues, Churches, and Mosques in Palestine.**

Reviews the discoveries and related scholarship of ancient synagogues, churches, and mosques in ancient Palestine. Focuses on their architectural and decorative as well as their spiritual and religious characteristics, and examines how those institutions influenced each other throughout their history of development.

**JUDS 1675. Parting of the Ways: The Separation of Judaism and Christianity.**

Jesus may have been Jewish, but for many centuries, Jews and Christians alike have considered their religions and their self-identifications to be mutually exclusive. When, why and how did these differences become definitive? Some modern scholars argue that "the ways parted early": others contend that they never parted at all! We focus on the period before Christianity becomes the official religion of the Roman Empire (late 4th century C.E.), with attention to persons in antiquity who contested these distinctions, and even to some in our own time ("Hebrew Christians," "Messianic Jews," and "Jews for Jesus"). Enrollment limited to 20.

**JUDS 1680. The Archaeology of Qumran and the Dead Sea Scrolls.**

Qumran is one of the most prominent archaeological sites in the world. Its fame derives from its proximity to a series of caves in which some 800 ancient scrolls were found. Scholars have debated the relevance of this site to the histories of Judaism and Christianity. This seminar will examine the debates regarding the character of Qumran through the material finds from old and new excavations conducted at the site itself and in the Dead Sea region. The lectures and readings are intended to stimulate a discussion about how to use texts and material culture for reconstructing the past. Enrollment limited to 20.

**JUDS 1690. Prophets and Priests in Exile: Biblical Literature of the 6th Century BCE.**

The exile of Judah's elite to Babylon elicited profound and conflicting literary responses. We will undertake a literary and historical analysis of a number of the most important works produced in response to the crisis of exile, including Jeremiah, Ezekiel, Second Isaiah, Lamentations, Psalm 137, the Priestly Writing, and the work of the exilic deuteronomists. Enrollment limited to 20.

**JUDS 1695. Philo (RELS 1130).**

Interested students must register for RELS 1130.

**JUDS 1696. Kabbalah: An Introduction to Jewish Mysticism (HMAN 1971U).**

Interested students must register for HMAN 1971U.

**JUDS 1701. Jews and Revolutions in the 20th Century.**

The 20th century was an age of revolutions, both political and social, in which Jews played pivotal roles. The student uprisings of the 1960s, the Feminist revolution, and the rise of the LGBTQ movement were crucial moments of change in the development of the western world. We will discuss the Jews' roles in all these revolutionary movements, as well as in the great political revolutions of the time.

**JUDS 1702. Creating the Global Economy: Entrepreneurial Jews, 1690-2010.**

What can the experience of the Jews teach us about the growth of the modern economy in the era of globalization? What were the economic, political, and cultural conditions that allowed Jewish bankers to create the economic networks that helped underpin the modern world? We will answer these questions by examining the careers and interactions of the major Jewish bankers and banking dynasties such as the Rothschilds, Jacob Schiff, and Gerson Bleichroder. We will see how these Jewish economic networks helped create - and were exploited by - the modern European economic systems of Europe, the United States and Israel.

**JUDS 1711. History of the State of Israel: 1948 to the Present.**

This course surveys the history of Israel from its Proclamation of Independence in 1948 until today. Israel's history has unfolded under the shadow of its prolonged conflict with the Palestinians and its Arab neighbors. At the same time, an entirely new, vibrant and dynamic society and culture has developed there. This course aims to familiarize the student with the major outlines of Israel's development, and with different narratives and interpretations of that history. The reading materials and class discussions will examine not only the Arab-Israeli conflict, but also its influence on Israeli politics, society and culture.

**JUDS 1712. History of Zionism and the Birth of the State of Israel.**

Examines the history of the Zionist movement within the context of the history of European nationalism and as one of numerous Jewish political responses to rising antisemitism. Explores the ideological and political foundations of the Zionist movement until Israel's establishment as well as broader concerns of Jewish politics in the late 19th and early 20th centuries.

**JUDS 1713. Introduction to Yiddish Culture and Language.**

Yiddish was the language spoken by most Jews in Eastern Europe and the countries to which they emigrated (including the U.S., England, South Africa, South American countries, and Israel) from the nineteenth century until after the Holocaust. It was the basis for a transnational Jewish culture and literature, and it played a central role in modern Jewish political life. We will explore the history of Yiddish culture and the development of the Yiddish press, literature, and cinema. The connection between Yiddish and modern Jewish politics will also be discussed. Students in this course will also have the opportunity to develop a basic knowledge of the Yiddish language.

**JUDS 1714. Memoirs and Memory: The Individual Experience of Modern Jewish Life.**

By comparing memoirs from the early modern period through contemporary times and from widely divergent geographical settings such as eastern, central and western Europe, North Africa, the U.S., and Palestine/Israel, this course considers how Jews in different historical settings have understood their "Jewishness" and their relationship to their past, as well as the historian's role in this relationship. Enrollment limited to 20.

**JUDS 1715. Women and Gender in the Modern Jewish World.**

This course will focus on Jewish women's encounters with modernity in a variety of contexts: Western and Eastern Europe, United States, and Israel. The goal of this course is to uncover the experiences of Jewish women and to use gender analysis as a means of enriching our understanding of Jewish life. Students will consider how gender has shaped Jewish women's experience in the context of immigration, assimilation, religious observance, home, work, motherhood, family, and feminism.

**JUDS 1716. The End of Modern Jewish History.**

This course addresses the changes to the Jewish diaspora throughout the second half of the twentieth century. It begins by considering the constellation of processes that defined modern Jewish history from the 1750s until the 1940s, including demographic growth; geographic spread; the struggle for political and legal emancipation; cultural, social, and economic integration; and the birth of modern anti-Semitism. The course then asks in what ways the Holocaust and the birth of Israel transformed Jewish life in the diaspora, positing that in the 1940s a new era of Jewish history began.

**JUDS 1718. Modernity, Jews, and Urban Identities in Central Europe.**

The course will explore the distinct cultural identities that Jewish modernist intellectuals like Walter Benjamin, Gershom Scholem, Sigmund Freud, Franz Kafka and Karl Kraus forged for themselves in response to the conflicting challenges of assimilation, anti-semitism and modernization. Readings will be based on primary sources and special emphasis will be placed on the historical contexts of Berlin, Vienna, Budapest and Prague where these thinkers lived their lives.

**JUDS 1721. Making Sparks Fly: Mysticism and Politics in the History of Hasidism.**

Hasidism was a social movement founded on mystical ideas. Using the texts of its greatest masters, we will learn how revolutionary new ideas about God and the world became a powerful movement for social change. We will examine Hasidism's kabbalistic background, and the mystical ideology of the Ba'al Shem Tov and his followers. We will focus on the development of the *Zaddik* and the Hasidic Court, as well as their conflicts with the rabbinic and community establishments in the eighteenth and nineteenth centuries. The seminar will involve critical reading of primary sources in translation and class discussions of historiography.

**JUDS 1722. Money, Power, Sex and Love: Gender and the Family in Modern Jewish History.**

Traditional Jewish society was patriarchal, though the forms this power took changed over time. It was also limited, even subverted, by various roles played by women. Since Jewish family life was very much under the control of Jewish women, the family was another place where women were able to wield power. Examining the history of gender and family allows us to examine the limits of patriarchal control and construct a new, often surprising picture of how Jewish society actually functioned. It also sheds new light on how the various forms of modern Jewish family we recognize today grew and developed.

**JUDS 1723. Jews and Muslims.**

This course considers interactions between Muslims and Jews in various historical settings from the early Islamic world, to Medieval Spain, to contemporary Europe and the Middle East. The goal is to move beyond simplistic histories of interfaith utopia, Islamic persecution, and Zionist domination to consider the complexities of ethno-religious interaction in a variety of social, cultural, economic and political contexts.

**JUDS 1726. Jewish Humor and Commercial Entertainment in Early 20th-Century Europe and America.**

The seminar explores the relationship between humor, popular culture and Jewish ethnic identity in early 20th-century Europe and America. It argues that self-deprecating humor and satiric performance of Jewish stereotypes were not expressions of self-hatred, but complex cultural gestures that led to integration within mainstream society. Topics to be considered are: the joke as a social gesture; the Jewish music hall as an urban institution; the politics of blackface in American Vaudeville; the East-European Jews in Hollywood.

**JUDS 1728. Slavery in the Early Modern World (HIST 1964L).**

Interested students must register for HIST 1964L.

**JUDS 1729. Revolution and Romanticism in 19th Century Europe (HIST 1230A).**

Interested students must register for HIST 1230A.

**JUDS 1730. The Lower east side: Immigration and Memory.**

For many, Manhattan's Lower East Side symbolizes the immigrant Jewish experience in America. Its image is highly romanticized: descriptions of everyday life and commerce as well as Jewish cultural and political life present the L.E.S. as a thriving center of authentic Jewish experience. The reality however was more complex. Most American Jews never lived in the Lower East Side and those who did found life there extremely difficult and challenging. This class will explore Jewish immigrant experience in the United States and trace the ways in which the L.E.S. has become part of the American collective memory.

**JUDS 1731. A Commonwealth of Many Nations? Early Modern Poland-Lithuania (HIST 1551).**

Interested students must register for HIST 1551.

**JUDS 1732. New York, Warsaw, Tel Aviv, Buenos Aires: Transnational Jewish Cultures in the 20th Century.**

Being a diasporic people without a nation-state until the mid-20th century, the Jews in Eastern Europe created Jewish cultures that were also influenced by the non-Jewish environment. How did these cultures develop in the age of mass migrations? How did the new Jewish cultures express the ideas of "homeland" and "diaspora?" Was the Jewish/Hebrew culture created in Israel part of the Jewish cultural discourse, or did it define itself separately? During the course, we will explore Jewish culture in four cities, also examining their relations with each other, in order to understand the transnational nature of these unique Jewish cultures. Enrollment limited to 40.

**JUDS 1733. Early Modern Globalization: Jewish Economic Activity, 1500-1800 (HIST 1974M).**

Interested students must register for HIST 1974M.

**JUDS 1734. German Jews and Capitalist Markets in the Long Nineteenth Century (GRMN 1660L).**

Interested students must register for GRMN 1660L.

**JUDS 1739. Kabbalah: An Introduction to Jewish Mysticism (HMAN 1971U).**

Interested students must register for HMAN 1971U.

**JUDS 1740. Kabbalah: Jews, Mysticism, and Magic.**

What are the relationships between Man, God, and the World? Over the centuries, Jewish mystics have sought and found many different answers to this question. In doing so, they created new spiritual formations for Judaism to supplant rational philosophy as bearer of the truth about the Cosmos. We will examine the most important mystical texts produced by Jews to understand this crucial strand of Jewish - and Human - religious, spiritual, and cultural development. Among other books, we will read from the Zohar, Lurianic Kabbalah, the false messianic testimonies of the Sabbathean movement, Hasidism, and the thought of Martin Buber. Enrollment limited to 20.

**JUDS 1742. Modern Jewish History and Society.**

The study of Jews in their historical and contemporary communities of western and eastern Europe, the U.S., and Israel. Major themes include emancipation and assimilation; secularization and new religious expressions; the Holocaust and modern anti-Semitism; Zionism; immigration, ethnicity, and nationalism; family and intermarriage; education, Jewish culture, and politics.

**JUDS 1743. American Jewish History.**

By the mid-20th century, the U.S.'s Jewish population was one of the world's largest and most important. In 1654, however, when 23 Jews landed in New Amsterdam, their position was far from assured. The history of American Jewish settlement is considered by exploring the interaction between the political, social, and cultural environment and successive waves of Jewish migrants.

**JUDS 1745. History of the Holocaust.**

Explores questions raised by the Holocaust regarding how such barbarism erupted in our so-called civilized and enlightened age. Attempts to analyze the meaning of the Holocaust from three vantage points: that of European, and more particularly, German history; that of Jewish history; and that of those states and religious institutions which shared responsibility. Enrollment limited to 50. If unable to enroll because of closed registration please contact the professor and a wait list will be created.

**JUDS 1746. Renewal in 20th Century Europe (HIST 1230C).**

Interested students must register for HIST 1230C.

**JUDS 1750. Jews in the World of Islam.**

This course introduces students to Jews in the Islamic World from the beginnings of Islam through the modern era. Topics include the legal and social status of Jews under Islam, the structure and schisms of the Jewish community in Islamic empires, Jewish-Muslim relations, the intellectual transformations of Judaism under the impact of Islamic and Arabic culture, and historiographic perspectives. Students will be exposed to a range of primary and secondary source materials and have an opportunity to pursue a research topic in depth.

**JUDS 1751. Jews Between Christians and Muslims in the Early Modern World.**

What were the different experiences for Jews living among Christians and Muslims? How did Islam and Christianity affect the development of Jewish society and culture? Examine these questions by looking at two flourishing Jewish centers from 1500-1800: one in the Muslim Ottoman Empire, the other in the Christian Polish-Lithuanian Commonwealth. Topics to be discussed include: Christian and Muslim attitudes towards Jews and the Jews' response to them; Jewish communities in Polish and Ottoman towns; the development of Jewish law in both settings; Christianity, Islam, and anti-Jewish violence; the interactions of Jewish, Muslim, and Christian mystical movements. Enrollment limit: 20.

**JUDS 1752. Zionists Anti Zionists and Post Zionists: Jewish Controversies in the 20th Century.**

In Jewish historical memory, Zionism is seen as the dominant Jewish national ideology throughout the 20th century. However, emerging in 1897, the Zionist movement aroused significant Jewish opposition. Many different Jewish ideologies developed, ranging from non-Zionism to anti-Zionism. This course will discuss the different arguments used by both Zionists and their opponents. We will look at the various options: Zionism, Diaspora Nationalism, Socialism and Communism, and Reform Judaism (before 1967), as well as Israeli Zionism and the opposition it aroused from Post-Zionists. Our focal question will be: why did Zionism evoke so much opposition among different Jewish groups.

**JUDS 1753. Blacks and Jews in American History and Culture.**

African Americans and American Jews have interacted throughout the history of the United States. Through readings, images, and films, this course will explore this complex, sometimes tortured relationship in its religious, cultural and political aspects. It will discuss the role of Jews in the slave trade, the contributions of both groups to American popular culture, both groups' involvement in the struggle for the Civil Rights Act of 1964, the rise of Black Power, attitudes to Zionism, affirmative action and more. We will try to answer the question how the experiences of both groups both overlapped and led to conflict.

**JUDS 1801. Jewish Magic.**

This course is designed to introduce you to a wide variety of texts representing magical beliefs and practices found in mainstream and marginal Jewish life from the biblical and rabbinic through the early modern periods (with some present-day comparison). It is also designed to acquaint you with some of the kinds of literature (legends, liturgical compositions, chronicles, exempla, amulets, magic recipe books) that describe magical practices with varying degrees of sympathy. One question we will ask in our discussions is how the literary representations of magic relate to actual magical beliefs and practices of their time.

**JUDS 1810. Israeli Literature in Hebrew.**

For students interested in reading selections of Hebrew fiction, drama, and poetry. Concentrates on major issues of the State of Israel, for example: the relationship between modernity and tradition, responses to the Holocaust, the Arab-Israeli conflict, and other cultural, social, and political issues. Israeli feature films are viewed and discussed. Conducted in Hebrew. Emphasizes strengthening Hebrew reading, writing, and speaking skills. Prerequisite: JUDS 0500. Students who have not taken JUDS 0500 should see instructor for permission to enroll.

**JUDS 1820. Holocaust Literature.**

Readings in works of prose and poetry by victims and survivors of the Holocaust that portray experiences in ghettos, in concentration camps, and in hiding. Additional readings in works of the post-war era by survivors and their offspring. Discussion of the moral, psychological, religious, and cultural dimensions of the Holocaust and its ongoing impact on humanity.

**JUDS 1830. Esthers of the Diaspora (POBS 1500H).**

Interested students must register for POBS 1500H.

**JUDS 1840. The 'New Jew' and the Diaspora: Voices from Israel, Brazil and America (POBS 1500W).**

Interested students must register for POBS 1500W.

**JUDS 1933. Early Modern Globalization (HIST 1974M).**

Interested students must register for HIST 1974M.

**JUDS 1970. Individual Study Projects.**

Section numbers vary by instructor. Please see Banner for the correct course reference number (CRN) to use when registering for this course.

**JUDS 1974. Digging for the Bible: Science, Religion, and Politics.**

Archaeological exploration in the "Holy Land" began in the mid-19th century and was motivated by the quest to discover the biblical sites. This region features among the most important visual and material remains connected to the origins of Judaism, Christianity, and Islam. This seminar will explore the relevant material remains from the Bronze Age through the end of the Ottoman period, and examine how these finds and their interpretations were shaped by religious and political motivations from the earliest endeavors to the present day.

**JUDS 1975. Honors Thesis Semester I.**

First of two semesters working with a faculty member in the Program in Judaic Studies to complete an honors thesis. Instructor permission required.

**JUDS 1976. Honors Thesis Semester II.**

Second of two semesters working with a faculty member in the Program in Judaic Studies to complete an honors thesis. Instructor permission required.

**JUDS 2040. Yiddish for Research.**

This is a course in Yiddish reading for research purposes designed primarily for advanced undergraduates and graduate students. This means that the emphasis will be on learning how to read and decipher a range of texts in modern Yiddish in different genres written. We will read the Yiddish classics and discuss their language, style and content, as well as newspaper articles published at the beginning of the 20th century and various historical documents. We will learn to read and understand non-standard pre-1930s Yiddish as well as American and Soviet Yiddish. Participation in this course requires the instructor's permission. Enrollment limited to 40.

**JUDS 2060B. Methods in Ancient History (HIST 2970I).**

Interested students must register for HIST 2970I.

**JUDS 2450. Exchange Scholar Program.**

## Center for Language Studies

### Director

Jane Sokolosky

Members of the Center for Language Studies share intellectual interests in issues of learning and teaching second languages and their cultures. The mission of the center is to facilitate contact and cooperation among second language faculty across individual department boundaries. CLS aims to promote research in the field of language study, to develop experimental or innovative language teaching materials, and to design new curricular configurations which stress the central position and interdisciplinary nature of language study. The center supports the application of emerging technologies to language learning, it seeks to improve the professional development of graduate and undergraduate teaching assistants, and it strives to forge new links within the second language community as a whole.

The Center for Language Studies is dedicated to improving the study of languages at Brown University, to extending the field of second language study, and to increasing the collaboration between language specialists and faculty and students in other disciplines. Such collaboration may be pursued: 1. through the development of interdisciplinary programs (e.g., the "Languages Across the Curriculum" program); 2. through collaborative grants and research projects; 3. through lectures and conferences involving professionals in language education; and 4. through community-oriented initiatives and projects. Individuals interested in creating new opportunities for language study are invited to share their ideas with us.

For additional information please visit the Center's website at: <https://www.brown.edu/academics/language-studies/>

## Courses

### American Sign Language

**SIGN 0100. American Sign Language I, II.**

An immersive approach using authentic communication inside and outside of the classroom will be used to develop introductory communicative skills in American Sign Language. Authentic materials from diverse sources will provide an overview of the American Deaf community. Basic media literacy skills will be taught.

This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade at the end of the course work in SIGN 0200 covers the entire year and is recorded as the final grade for both semesters.

**SIGN 0200. American Sign Language I, II.**

Introduces basic ASL conversation. Features core vocabulary, common signing phrases, non-manual components (facial expression, body postures), signing space, fingerspelling, numbers, loan signs, cultural protocols, rules of ASL grammar and structure. Deaf cultural behavior is introduced in the classroom and through readings, videotapes, and Deaf community events.

This is the second half of a year-long course. Students must have taken SIGN 0100 to receive credit for this course. If SIGN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

**SIGN 0300. American Sign Language III.**

This course will use an immersive approach incorporating authentic communication to develop intermediate communicative skills in American Sign Language. Through authentic materials from diverse sources, students will engage in classroom discussion and produce media to explore Deaf cultural topics related to family dynamics, language and literacy, and education. Prerequisite SIGN0200 or placement interview.

**SIGN 0400. American Sign Language IV.**

Intensive use of expressive and receptive skills in complex grammatical structures, advanced classifiers, dialogues, and storytelling techniques. Discussion of social factors that give rise to code-switching; regional and ethnic sign variations; social, political, and cultural evolution of U.S. Deaf community. Interaction with Deaf community in directed and non-directed activities. Prerequisite SIGN 0300 or placement interview.

**SIGN 0500. American Sign Language V.**

This course increases American Sign Language skills by introducing advanced vocabulary and grammar in various registers and settings, including informal and formal discussions, presentations, and storytelling. Through authentic materials from diverse sources, students will explore American Sign Language literature and oral traditions. Prerequisite SIGN0400 or placement interview.

**SIGN 0900. Introduction to Deaf Studies.**

Introduction to the Deaf Community and Deaf Culture. Discussion of similarities to, and differences from, mainstream hearing culture. Supplemental videotapes focus on aspects of the culture including Deaf education and history, autobiographical sketches, Deaf norms and values, and Deaf literature, art and folklore. Theoretical issues of culture and linguistics applied to Deaf culture, American Sign Language, and the variety of cultural perspectives of the Deaf community. Students also engage in a research project related to course content. Voice interpreter will be provided; all students are welcome; no previous knowledge of American Sign Language or Deaf Studies is needed.

**SIGN 1910. Independent Study in Sign Language/Deaf Studies.**

Independent study in an area of special interest to the student, with close guidance by a member of the faculty, and leading to a major paper/project. Required of candidates for honors, and recommended for third year students. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Prerequisite: SIGN 0500 or instructor permission.

## Arabic

### ARAB 0100. First-Year Arabic.

Builds basic listening, speaking, reading, and writing skills, introducing the Arabic language in its cultural environment. Five contact hours per week, with an emphasis on grammar and communication, plus written, audio, and video assignments outside of class. This is the first half of a year-long course whose first semester grade is normally a temporary one. Neither semester may be elected independently without special written permission. The final grade at the end of the course work in ARAB 0200 covers the entire year and is recorded as the final grade for both semesters. If course is full, please sign the wait list in Room 205, 195 Angell Street. Enrollment limited to 18.

### ARAB 0110. Egyptian Arabic.

This course will introduce students to one of the major colloquial variants of contemporary Arabic. The native language of Egyptian citizens, used predominantly in everyday communication, has long since become widely understood throughout the Arab world, since popularized by the media and pop culture. The beginning oral proficiency that students will acquire in this course, by examining a range of sources, from textbooks to short stories, movies, social media posts and personal accounts by guest-speakers, and by practicing conversation in class, will facilitate their communication with native speakers of Arabic in a variety of informal situations. Prerequisite: ARAB 200. Enrollment limited to 18.

### ARAB 0120. Intensive Summer Arabic.

This intensive summer course (Equal to ARAB 0100 and ARAB 0200) is an introductory course designed to build basic listening, speaking, writing, and reading skills in Arabic. MSA is the medium of formal oral and written communication used throughout the Arab world, and the course will mainly focus on this form of the language. This course will introduce essential colloquial vocabulary and grammar necessary for understanding and conducting simple acts of communication with native speakers.

### ARAB 0200. First-Year Arabic.

Builds listening, speaking, reading, and writing skills, at the low intermediate level of Arabic proficiency. Five contact hours per week, with an emphasis on grammar and communication, plus written, audio, and video assignments outside of class. This is the second half of a year-long course. Students must have taken ARAB 0100 to receive credit for this course. If ARAB 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing. Enrollment limited to 18.

### ARAB 0210. Egyptian Arabic.

This course will introduce students to one of the major colloquial variants of contemporary Arabic. The native language of Egyptian citizens, used predominantly in everyday communication, has long since become widely understood throughout the Arab world, since popularized by the media and pop culture. The beginning oral proficiency that students will acquire in this course, by examining a range of sources, from textbooks to short stories, movies, social media posts and personal accounts by guest-speakers, and by practicing conversation in class, will facilitate their communication with native speakers of Arabic in a variety of informal situations. Prerequisite: ARAB 200.

### ARAB 0300. Second-Year Arabic.

Develops listening, speaking, reading and writing skills at the intermediate level of language proficiency through extensive use of various texts and multimedia. Promotes better understanding of Arabic cultural traditions. Five contact hours weekly, plus written, audio, and video assignments outside of class. Prerequisite: ARAB 0200. This is the first half of a year-long course. Neither semester may be elected independently without special written permission. The final grade at the end of the course work in ARAB 0400 covers the entire year and is recorded as the final grade for both semesters.

### ARAB 0320. Intermediate Arabic.

This course (equal to ARAB 0300 and ARAB 0400) builds on the skills acquired in ARAB 0100 and ARAB 0200. In addition to al-Kitaab, Parts One and Two, coursework will incorporate poetry, prose, music, and films, to broaden your vocabulary, underpin complex grammatical norms, and increase your understanding of contemporary Arab culture. Colloquial usages are naturally integrated in conversation practice. This course will also introduce you to important figures and ideas associated with the cultural history and present of Arab societies. Elements of classical Arabic will be presented, preparing you to access the literary and cultural heritage of the Arab peoples.

### ARAB 0400. Second-Year Arabic.

Develops listening, speaking, reading and writing skills at the intermediate level of language proficiency through extensive use of various texts and multimedia. Promotes better understanding of Arabic cultural traditions. Five contact hours weekly, plus written, audio, and video assignments outside of class. Prerequisite: ARAB 0300. This is the second half of a year-long course. Students must have taken ARAB 0300 to receive credit for this course.

### ARAB 0500. Third-Year Arabic.

Offers comprehensive training in listening, speaking, reading, and writing, with grammar review as needed. Broadens students' perspective of Arabic culture using selections from the classical and modern traditions of Arabic writing and various art forms. Four contact hours weekly. Prerequisite: ARAB 0400.

### ARAB 0600. Third-Year Arabic.

Offers comprehensive training in listening, speaking, reading, and writing with grammar review as needed. Broadens students' perspective of Arabic culture with selections from the classical and modern traditions of Arabic writing and various art forms. Four contact hours weekly. Prerequisite: ARAB 0500.

### ARAB 0700. Advanced Arabic: Tales of the City.

The Arab city, current site of a major political upheaval, is the central theme of this integrated-skill language and culture course. Images of cities, as multifaceted as the people who inhabit them, animate cinema screens and daily news reports, inspire masters of writing, artists, and musicians, arouse political activism. By engaging the complex representation of the urban theme in contemporary discursive and art forms, this course will enhance students' understanding of the dynamics of urban politics and culture in the Middle East, while building a content-specific lexicon and advanced communicative ability. Prerequisite: ARAB 0600, or an equivalent. Enrollment limited to 12.

### ARAB 0800. Advanced Arabic: Language & Culture through Cinema.

This integrated-skill language and culture course stresses oral interaction in class. We will view and discuss films from the Arab World as vehicles to understanding the cultural and linguistic diversity of Arabic-speaking countries. Our selection of films will focus on issues of economic inequality, family dynamics, and gender, as well as the effects of war and immigration on society. By engaging the complex representation of these themes in contemporary cinema, this course will enhance students' understanding of Middle Eastern culture, while building a content-specific lexicon and advanced communicative ability. Prerequisite: ARAB0600, or an equivalent. Enrollment limited to 12.

### ARAB 1100. Love, Revolution and Nostalgia in Modern Arabic Poetry.

This course aims to introduce students to the most prominent Arabic poets of the 20th and 21st century. Students will strengthen their language skills while reading and discussing texts by major modern poets from the Middle East and North Africa, including Nizar Qabbani, Darwish and Adonis. Through the works of these poets, they will explore a range of themes from politics and oppression, to love and eroticism, personal freedom and women's liberation.

Conducted in Modern Standard Arabic; designed for students with advanced language skills. Prerequisite: Four years of Arabic, or by instructor permission.

**ARAB 1200. Modern Arabic Literature in Exile.**

Modern Arabic Literature in Exile is a course that aims to improve the students' skills in reading and critical writing through studying and analyzing narrative texts in their linguistic, cultural, historic and literary contexts. In this course, students will read short stories, critical essays, and chapters from novels written by some of the most important Arab writers living in exile, including but not limited to Taieb Salih, Gassan Kanafani, Hanan al-Sheick, Abdulhadi Saadoun and Ibtissam Azem.

Conducted in Modern Standard Arabic; designed for students with advanced language skills.

**ARAB 1990. Special Topics in Arabic Language, Literature, and Culture.**

Advanced level integrated skill course focusing on specific reading and writing topics derived from the traditions and arts of the Arabic language. Course prerequisites include advanced capacity in Arabic grammar and reading comprehension. Enrollment limited to 10.

**ARAB 1990B. Advanced Egyptian Arabic: Displacement and Diaspora in a Modernizing Egypt.**

This is a course offered to students with at least six semesters of language study experience. Students must be comfortable with the script, sounds, structure and grammar of the language. The course will familiarize students with one of the major colloquial variants of contemporary Arabic. Egyptian Arabic is the dialect of Egyptian citizens and is used predominantly in everyday communication. Students will acquire proficiency by examining content-based sources related to its theme of displacement. Sources will range from books and articles to video clips, social media posts and accounts by speakers and guests.

**ARAB 2450. Exchange Scholar Program.****Catalan****CATL 0100. Introduction to Catalan.**

CATL100 will provide students with a basic foundation in Catalan through the practice of the four fundamental communicative skills: speaking, listening comprehension, reading and writing, but also by mediating and interacting in class. Students can expect to be able to maintain simple conversations by the end of the course. Additionally, the subject will provide an exploration of the Catalan culture, which will be carried out through cinema, performance art, architecture, design, literature and sociopolitical contents. Additionally, academic bibliography on various subjects will be available, opening the doors to the fascinating artistic heritage and current production in the Catalan-speaking areas.

**CATL 0200. Catalan Language and Culture.**

An intermediate course which introduces students to Catalan culture and allows them to review and extend their knowledge of all basic patterns (e.g. grammar, vocabulary, phonetics, sociocultural norms) of the language. Students will develop their oral and written skills by describing, narrating, and presenting arguments. They will work with texts and audio-visual material that will provide them with a deeper understanding of Catalan literature, culture, and contemporary society. Classes will be conducted in Catalan. Therefore a basic knowledge of Catalan literature is a prerequisite or students may request the instructor's permission to take the course.

**CATL 0300. Catalan Language and Culture.**

This course continues to develop and strengthen students' proficiency in the Catalan language. The cultural component plays a central role in these classes, as a means to access diverse uses of the language within a cultural context. Varied cultural sources will be explored, such as Catalan cinema, music, artistic expressions, sociocultural elements and literature. These will play a role in enhancing the student's confidence in their knowledge of the Catalan language and the context in which it is inserted. Students can expect to develop their language skills further, and to be active agents in their learning process.

**CATL 1910. Independent Study in Catalan.**

An open content course, which may be offered each semester. Offered as an Independent Study, this course will be adapted to students' needs that are not currently covered by our curricular offerings.

**English for Internationals****EINT 2100. Academic Discourse for Internationals.**

This course develops the English skills of first-year international graduate students who are preparing to be teaching assistants. Students improve their listening comprehension and fluency in conversational interactions typical of academic settings. Areas of spoken English that are addressed include pronunciation, stress patterns, intonation, vocabulary, and structure. Instructor permission required.

**EINT 2200. Academic Interactions.**

This course develops the English language skills of first-year international graduate students who are preparing to be teaching assistants. Students improve their fluency and expression of complex ideas in a variety of linguistic situations typical of classroom interactions. Students also increase their control of vocabulary, pronunciation and listening comprehension when communicating with American undergraduates. Instructor permission required.

**EINT 2300. Negotiating an American Classroom.**

In this course, international graduate students increase their abilities to communicate accurately and fluently in English with American undergraduates. International students develop their ability to interact, in culturally appropriate ways, in a variety of teaching situations common to an institution of higher education, where they are responsible for expressing and explaining complex information and ideas in English. Instructor permission required.

**EINT 2400. Speaking Professionally for Internationals.**

This course develops the English communication skills of international graduate students with an emphasis on intelligibility of speech and clarity of expression in a variety of teaching and professional situations (e.g. presenting material, responding to questions, directing discussions). Students develop increased facility of English in extended discourse when they are the authority in a teaching or other professional context. Instructor permission required.

**EINT 2500. Advanced Articulation Tutorial.**

This course is an advanced pronunciation tutorial for international graduate students who have achieved a near-native speaker level of fluency in English, but who require greater precision of English articulations, pronunciation, fluency and/or expression. Instructor permission required.

**Haitian Creole****CROL 0100. Basic Haitian Creole.**

Fast-paced course for beginners. Course stresses acquisition of skills in speaking and listening comprehension; writing included to a lesser degree. Strong emphasis on cultural as well as linguistic competency. Enrollment limited to 18.

**CROL 0200. Early Intermediate Creole.**

Fast-paced course for beginners. Course stresses acquisition of skills in speaking and listening comprehension; writing included to a lesser degree. Strong emphasis on cultural as well as linguistic competency. Enrollment limited to 18. Prerequisite: Beyond basic level of reading, writing and comprehension or having successfully completed CROL 0100.

**CROL 0300. Advanced Intermediate Haitian Creole.**

Fast-paced course for advanced/intermediate students of Haitian Creole. Designed for those who speak and understand Haitian Creole with some fluency but are seeking ways of perfecting their language skills, overcoming grammatical snags, increasing vocabulary, and mastering the idiomatic use of the language and proverbs. Reading and responding to authentic literature in Haitian Creole will be the focus of the course. Prerequisite: CROL 0200. Enrollment is limited to 18.

**CROL 0400. Advanced Haitian Creole.**

Designed for those who wish to develop more advanced level conversational, reading, and writing skills. Students work with a variety of readings (stories, poems, plays), films, interviews, and popular songs that promote in-class discussion and written analysis. Extensive practice in translating from English to Haitian and vice versa, with the aim of developing accuracy, speed, and appropriateness (lexical, grammatical, and cultural). Prerequisite: CROL 0300. Enrollment limited to 20.

## Hindi-Urdu

### **HNDI 0100. Beginning Hindi or Urdu.**

Introduces conversation, reading, and writing of modern standard Hindi and the Devanagari script. Those who already know Devanagari but have rusty conversation skills may join the class second semester; obtain instructor's permission during the first semester. Those who prefer to learn Urdu and the Persian script should contact the instructor.

### **HNDI 0200. Beginning Hindi or Urdu.**

Introduces conversation, reading, and writing of modern standard Hindi and the Devanagari script. Those who already know Devanagari but have rusty conversation skills may join the class second semester; obtain instructor's permission during the first semester. Those who prefer to learn Urdu and the Persian script should contact the instructor. Prerequisite: HNDI 0100.

### **HNDI 0300. Intermediate Hindi-Urdu.**

A continuation of HNDI 0100-0200, which is a prerequisite. Introduces the variation of the Arabic script used for Urdu. Prepares students to communicate in written and spoken language. Activities are conducted in Hindi/Urdu. Meets four hours weekly.

### **HNDI 0400. Intermediate Hindi-Urdu.**

A continuation of HNDI 0100-0200. Introduces the variation of the Persian script used for Urdu. Prepares students to communicate in written and spoken language. Activities are conducted in Hindi/Urdu. Meets four hours weekly. Prerequisite: HNDI 0300.

### **HNDI 1080. Advanced Hindi-Urdu.**

Each student follows an independent reading list determined in consultation with the instructor. The readings may include folk tales, journalistic prose, 20th-century literature, classical Urdu poetry of the 17th to 19th centuries, or subjects in nonfiction. The class meets together three hours weekly for discussion. Each student also spends one hour weekly with the instructor. Prerequisite: HNDI 0400.

## Language Studies

### **LANG 1900. Independent Study in Languages.**

This course will meet the needs of students who are not studying one of the languages offered by the CLS faculty. Beginner, Intermediate or Advanced integrated skill course focusing on specific reading and writing topics selected by the faculty advisor and the student. Enrollment limited to 10.

### **LANG 2900. The Theory and Practice of Foreign Language Learning and Teaching.**

The course is intended for graduate students in departments of foreign languages and literatures, who are interested in acquiring a theoretical understanding of second language acquisition (SLA) and language teaching methodologies and, by extension, developing a pedagogically sound teaching practice, grounded in research.

## Persian

### **PRSN 0100. Basic Persian.**

Fast-paced course for beginners. Course stresses acquisition of Persian alphabet and basic grammatical patterns, beginning levels of speaking, listening, reading, and writing. Strong emphasis on the links between language and culture.

### **PRSN 0200. Basic Persian.**

Fast-paced course for beginners. Course stresses acquisition of Persian alphabet and basic grammatical patterns, beginning levels of speaking, listening, reading, and writing. Strong emphasis on the links between language and culture.

This is the second half of a year-long course. Students must have taken PRSN 0100 to receive credit for this course. If PRSN 0100 was taken for credit then this course must be taken for credit; if taken as an audit, this course must also be taken as an audit. Exceptions to this policy must be approved by both the academic department and the Committee on Academic Standing.

### **PRSN 0300. Intermediate Persian Language and Culture.**

Expands students' proficiency in modern Persian language and culture; develops listening, speaking, reading and writing skills at the intermediate level through various texts and multimedia. Prerequisite: PRSN 0200.

### **PRSN 0400. Intermediate Persian Language and Culture.**

Expands students' proficiency in modern Persian language and culture; develops listening, speaking, reading and writing skills at the intermediate level through various texts and multimedia. Prerequisite: PRSN 0300.

### **PRSN 0500. Advanced Persian Language and Culture I.**

For students who have completed PRSN 0400 or have acquired language skills above the intermediate level through contact with Persian in other ways. The main goal of this course is to improve speaking, listening, reading and writing skills and promote exposure to the culture. It will enable students to expand their knowledge of the language by studying samples of modern and classical Persian literature in order to advance toward mastery of contemporary literature. The course will motivate students to communicate both in written and spoken Persian by utilizing the adequate grammatical order and correct vocabulary. Prerequisite: PRSN 0400.

### **PRSN 0600. Advanced Persian Language and Culture II.**

Designed for students who have completed PRSN 0500 or have acquired language skills above the advanced level through other means. The main goal of the course is to improve speaking, listening, reading and writing skills and promote exposure to the language and culture through in depth study of samples of Persian literature, history, journals, newspapers, radio and TV material to advance toward mastery of contemporary literature. Students will be motivated to communicate both in written and spoken Persian by utilizing adequate grammatical order and vocabulary. Activities will include poetry reading, informal gatherings and translation from and into Persian. Prerequisite: PRSN 0500.

### **PRSN 1200. Iranian Cinema: Before and After the Islamic Revolution.**

This course provides an overview of Iranian Cinema in general and explores in detail Iranian cinema after the Iranian revolution. It explores the politics, history, techniques and the art of cinema of the past several decades in Iran. Classes consist of screenings, discussions and lectures. Conducted in English, open to all students. Enrollment limited to 25.

### **PRSN 2980. Reading and Research.**

Work with individual students in connection with special readings, problems of research, or preparation of theses. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

## Turkish

### **TKSH 0100. Introduction to Turkish Language and Culture I.**

This is a proficiency oriented introductory course to Turkish Language and Culture. It adopts an integrated skills approach and is designed for students with little or no prior knowledge of Turkish. The course combines an emphasis on the development of communicative competences with an understanding of language structures and grammar as well as insights into Modern Turkish society and culture. The aim is to introduce students to basic linguistic structures and develop the ability to comprehend and produce text, as well as to speak and understand speech, in a variety of contexts and registers. Enrollment limited to 18.

### **TKSH 0200. Introduction to Turkish.**

This is the second semester of a proficiency oriented introductory course to Turkish Language and Culture. It adopts an integrated skills approach and is designed for students who have taken Turkish 0100 or have placed into the class after consultation with the instructor or a placement exam. The course combines an emphasis on the development of communicative competences with an understanding of language structures and grammar as well as insights into Modern Turkish society and culture.

**TKSH 0300. Intermediate Turkish.**

This course is the continuation of TKSH 0200 designed for students who are interested in learning about other cultures and languages. New students can place into it, after special arrangements with the instructor. The course places equal emphasis on the development of the four language skills: speaking, listening, reading and writing. It combines an emphasis on the development of communication skills with an understanding of language structures and grammar and insights into Modern Turkish society and culture. There will be one additional hour TBD in consultation with the instructor and students.

**TKSH 0400. Intermediate Turkish II.**

TKSH 0400 is designed for students who have taken TKSH 0300 and already studied Turkish language to develop proficiency at an advanced level. New students can place into it, after special arrangements with the instructor. The course places equal emphasis on further developing four skills (reading, listening, speaking, and writing) at an advance proficiency level as well as advanced compound and subordinate structures in grammar. It combines an emphasis on the development of communication skills with an understanding of the language and insights into Modern Turkish society and culture. There will be one additional hour TBD in consultation with the instructor and students.

**TKSH 1100A. Understanding Modern Turkey Through Film, Literature, and Media.**

This course introduces students to modern Turkey and offers a wide range of perspectives on its society and culture. Themes include family and gender in Turkish society; Turkish social classes; Istanbul and its neighborhoods; Turkey's role within Europe; ethnic identities and their recognition by Turkish society; Turkish media and entertainment; modernism and political Islam; important events in the very recent history of Turkey including the Hrant Dink assassination, terror attacks, and the 2016 coup d'état; education and academic freedom; modern literature; specific cultural practices and rituals; foreigners' perspectives on Turkish society; and modern Turkish sensory experiences including music and cuisine.

**TKSH 1100B. Istanbul, Global Metropolis Seminar in English.**

This course will introduce Istanbul as a global metropolis, by examining a wide range of issues and challenges facing the city and its people. Each week, we will focus on a single aspect such as: a brief historical outline of the city; the Istanbulites; the power distribution between elites and underdogs; the effects of urbanization and rapid economic development; the uniqueness and interconnection of Istanbul's neighborhoods; cultures and their politicization; social movements and city squares as symbols of social resistance; the city's architectural masterpieces; the representation of Istanbul in cinema and Turkish TV Series; and imagining Istanbul in modern Turkish literature.

**Yoruba****YORU 0100. Introduction to Yoruba I.**

The first semester of a two-semester beginner's course in Yoruba Language and Culture. This class aims to offer Yoruba language skills and proficiency in speaking, reading, listening, writing, and translation. Focus is placed on informal and formal contexts, e.g., home, school, work, family, social situations, politics, etc. First semester focuses on conversation, speaking, and listening. Both semesters are required in order to earn credit in the course. This class is offered through distance learning from Cornell to a class of no more than 4 students. You must attend class on the first day of the semester to be considered. One hour to be arranged.

**YORU 0200. Introduction to Yoruba II.**

The second semester of a two-semester beginner's course in Yoruba Language and Culture. This class aims to offer Yoruba language skills and proficiency in speaking, reading, listening, writing, and translation. Focus is placed on informal and formal contexts, e.g., home, school, work, family, social situations, politics, etc. Course uses Yoruba oral literature, proverbs, rhetoric, songs, popular videos, and theater, as learning tools for class comprehension. First semester focuses on conversation, speaking, and listening. Both semesters are required in order for students to earn credit in the course. This class is offered to Brown students through distance learning. The instructor broadcasts from the Cornell campus to a Brown classroom of no more than 3 students. You must attend class on the first day of the semester to be considered. One hour to be arranged.

**YORU 0300. Intermediate Yoruba I.**

Prerequisite: YORU 0200 or instructor's approval. Learners will be able to read basic Yoruba texts and understand them. They are introduced to Yoruba literature. Learners will be able to listen to basic dialogue in Yoruba language as spoken by native speakers and understand them. Some of these may include some radio jingles. Learners will be able to describe basic situations such their apartment, give directions, describe their first day in school, describe their first day at work etc. Learners will be introduced to some current affairs and social, artistic and cultural events and issues in Nigeria. This class is offered to Brown students through distance learning. The instructor broadcasts from the Cornell campus to a Brown classroom of no more than 3 students. You must attend class on the first day of the semester to be considered. One hour to be arranged.

**YORU 0400. Intermediate Yoruba II.**

Prerequisite: YORU 0300 or instructor's approval. Learners will be able to speak and read Yoruba texts at ACTFL/ILR level 1/1+. Learners will be able to write a basic Yoruba text which compares two cultures—a Nigerian / African Culture and a non-Nigerian/African culture at a level comparable to their oral proficiency-ACTFL level 1/1+. Learners will be able to discuss some aspects of African cultural lives—such as education, fashion, music etc. Learners will be able to write Yoruba with tones. This class is offered to Brown students through distance learning. The instructor broadcasts from the Cornell campus to a Brown classroom of no more than 3 students. You must attend class on the first day of the semester to be considered. One hour to be arranged.

## Latin American and Caribbean Studies

The Center for Latin American and Caribbean Studies (CLACS) at Brown University facilitates the study of this dynamic region from a multidisciplinary perspective. CLACS organizes academic conferences, lectures, and cultural programming, and supports our over 100 faculty affiliates as well as graduate and undergraduates interested in the region. The undergraduate concentration was first approved in 1973 and was later incorporated into the Center for Latin American Studies (eventually renamed CLACS) after its establishment in November of 1984.

For additional information, please visit the department's website: <http://www.watsoninstitute.org/clacs/>

## Latin American and Caribbean Studies Concentration Requirements

The concentration in Latin American and Caribbean Studies (LACA) leads to a strong, interdisciplinary understanding of culture, history, and contemporary issues in Latin America, the Caribbean, and the Latinx diaspora.

Requirements are intentionally broad and flexible to accommodate the focused interests of students in understanding the diverse reality of this region. Concentration requirements include four themes: language, area studies, research, and internship or service work. A wide selection of courses from departments across the University expose students to the methods and materials of different disciplines and provide a background in the contemporary and historical contours of Latin American, Caribbean, and Latinx societies. For more information,

contact the Director of Undergraduate Studies, Professor Erica Durante (erica\_durante@brown.edu?subject=LACA concentration).

## Concentration Requirements

### 1. Ten courses on Latin American, Caribbean, and/or Latinx subjects.

These may be explicitly designated as LACA classes, but do not need to be. Up to two of these courses can be language learning classes. Relevant courses from study abroad may count toward this total. For double concentrators, up to two classes can count toward the course requirements of both LACA and another concentration. At least two different academic disciplines should be represented in the ten courses. Courses in which the student did substantial work on a Latin American, Caribbean, or Latinx subject may count toward this total, even if the course as a whole has a more general subject matter. Concentrators should periodically update their courses on ASK and confirm with the Director of Undergraduate Studies that they are on track to meeting the coursework requirement.

The courses must include at least one survey course providing a comprehensive and comparative view of the region. Examples include the following:

LACA 0500	Around Latin America in 80 Days: An Historical and Cultural Journey
LACA 1504G	Latin American Environmental Humanities
LACA 1510I	Urban Latin America
LACA 1630	Engaged Humanities: Storytelling in the Americas
HISP 0730	Encounters: Latin America in Its Literature and Culture
HISP 1330Z	Tropical Fictions: Geography and Literature in Latin American Culture
HIST 0234	Modern Latin America
HIST 1966Q	Colonial Encounters and the Creation of Latin America
POLS 1210	Latin American Politics
POBS 0280	Mapping Food, Eating Meaning, Making Community: A Welcome to the Lusophone world

### 2. Competence in a Latin American and/or Caribbean language.

Competence in Spanish, Portuguese, French, Haitian Kreyol, Kaqchikel Maya, etc. may be demonstrated through a departmental test, AP credit, language courses at Brown or elsewhere, study abroad, etc; please contact the concentration advisor to confirm. (If the student's primary area of study is the Anglophone Caribbean, a field language is not necessary.)

**3. An internship or volunteer service**, located in the U.S. or overseas, for one semester or one summer. Work completed during study abroad may count toward this requirement. The service work will connect theory to practice, applying scholarly knowledge to social challenges. Students are encouraged to consult with the Swearer Center for Public Service for assistance finding a volunteer placement. Students should also meet with the DUS by the beginning of junior year to discuss their work plan for their service component. Upon completion of the internship or service work, students fill and submit via ASK the Internship, Work or Volunteer Service Form, available online in the LACA Undergraduate Concentration webpage (<https://watson.brown.edu/clacs/education/undergraduate>).

In addition they are expected to submit via ASK a short letter from a supervisor confirming the completion of the work.

**4. A capstone project.** This may be a senior honors thesis or creative project, supervised by a primary advisor and a secondary reader; a non-honors research paper; or a reflective paper about non-academic work (such as service or foreign study) related to Latin America, the Caribbean or the Latinx experience.

The project may be completed for honors if the student is eligible (see Honors, below).

Students undertaking a capstone project are encouraged to enroll in LACA 1900. Alternatively, they may elect to enroll in one or two semesters

of independent study (LACA 1990, LACA 1991) with their thesis/project advisor.

## Writing Requirement

To satisfy Brown's writing requirement as a LACA concentrator (which must be completed by the end of the 7th semester), students are encouraged to consider courses that have an emphasis on revision and feedback such as the following:

LACA 1900	Preparation for Honors and Capstone Projects on Latin American and Caribbean Topics
ETHN 1200D	Latinx Literature
LACA 0500	Around Latin America in 80 Days: An Historical and Cultural Journey
LACA 1504G	Latin American Environmental Humanities
LACA 1630	Engaged Humanities: Storytelling in the Americas
COLT 0710I	New Worlds: Reading Spaces and Places in Colonial Latin America
HISP 0730	Encounters: Latin America in Its Literature and Culture
HIST 0233	Colonial Latin America
HIST 1977I	Gender, Race, and Medicine in the Americas

## Engaged Scholars Program

The concentration also allows students to pursue the Engaged Scholars Program (<http://watson.brown.edu/clacs/node/654>). The Engaged Scholars Program (ESP) in Latin American and Caribbean Studies (LACA) is designed for LACA concentrators who are especially interested in making deeper connections between their academic work and local communities in Providence and beyond. Engaged Scholars combine hands-on experiences such as internships, public service, humanitarian, and development work with their academic learning in order to develop a deeper understanding of, and appreciation for, social engagement.

## Honors

Qualified undergraduates may work towards the A.B. in Latin American and Caribbean Studies with Honors.

### Requirements to graduate with Honors:

- Maintenance of at least an A- average in the ten courses counting for the Latin American and Caribbean Studies concentration
  - Maintenance of at least a B+ average in all course work at Brown
  - Completion of a senior honors thesis or project with a grade of A
- Grades of S do not negatively affect the eligibility for honors.

Graduating seniors with Honors in Latin American and Caribbean Studies are eligible for an award administered by the concentration for Outstanding Senior Thesis or Project.

### Senior Honors Thesis or Project Timeline:

For Senior-Year Students-

- By end of sixth semester:** Students fill and submit a one page proposal to the concentration advisor the Honors Thesis Declaration Form available online in the LACA Undergraduate Concentration webpage (<https://watson.brown.edu/clacs/education/undergraduate>). In the form, they are expected to indicate their thesis or project title and short description. The Honors Thesis Declaration Form must be signed by a primary advisor. Students who study abroad spring semester junior year may apply for admission to the Honors Program but must meet the application deadline. Students in this position should start thinking about a proposal and contact advisors well in advance.
- By October 15:** Students submit the first section of their thesis or project to their research advisor for review. They should agree with their advisor on the schedule for the remaining portions.
- By March 15:** A draft of the entire thesis or project is due to the primary advisor and the secondary reader for review and feedback.

- **By 5 pm on April 15:** The final, complete senior honors thesis or project is due.
- Students submit one copy each to the primary advisor and the secondary reader.
- Students submit one paper copy and one electronic copy to the concentration advisor and one electronic copy to the Brown Library Digital Repository (BDR).

For Mid-Year Completers-

Mid-year completers must apply for the Honors Program their 6th semester, as 2nd semester Juniors. They undertake the thesis in their 7th and 8th semesters, allowing them to complete the following Honors course sequence:

- **By the end of the 6th semester:** Students fill and submit to the concentration advisor the Honors Thesis Declaration Form available online in the LACA Undergraduate Concentration webpage (<https://watson.brown.edu/clacs/education/undergraduate>). In the form, they are expected to indicate their thesis or project title and short description. The Honors Thesis Declaration Form must be signed by a primary advisor.
- **By May 15:** Students submit the first section of their thesis or project to their research advisor for review. They should agree with their advisor on the schedule for the remaining portions.
- **By October 15:** A draft of the entire thesis or project is due to the primary advisor and the secondary reader for review and feedback.
- **By 5 pm on November 15:** The final, complete senior honors thesis or project is due.
- Students submit one copy each to the primary advisor and the secondary reader.
- Students submit one paper copy and one electronic copy to the concentration advisor and one electronic copy to the Brown Library Digital Repository (BDR).

## Latin American and Caribbean Studies Graduate Program

Brown offers no advanced degree in Latin American Studies, but our faculty work closely with interested graduate students in other departments such as Hispanic Studies, History, Economics, American Civilization, Anthropology, Sociology, Political Science, Portuguese and Brazilian Studies, and the A.M. in Development Studies. Information about these degrees may be obtained directly from these departments or programs.

### Courses

**LACA 0030. Health of Hispaniola (PHP 0030).**

Interested students must register for PHP 0030.

**LACA 0066N. People and Cultures of Greater Mexico (ANTH 0066N).**

Interested students must register for ANTH 0066N.

**LACA 0090A. The Border/La Frontera (ETHN 0090A).**

Interested students must register for ETHN 0090A.

**LACA 0190A. Islands of Empire (ETHN 0190A).**

Interested students must register for ETHN 0190A.

**LACA 0210. Afro Latin Americans and Blackness in the Americas (AFRI 0210).**

Interested students must register for AFRI 0210.

**LACA 0232. Clash of Empires in Latin America (HIST 0232).**

Interested students must register for HIST 0232.

**LACA 0233. Colonial Latin America (HIST 0233).**

Interested students must register for HIST 0233.

**LACA 0234. Modern Latin America (HIST 0234).**

Interested students must register for HIST 0234.

**LACA 0271. Introduction to Latina/o History (ETHN 0271).**

Interested students must register for ETHN 0271.

**LACA 0500. Around Latin America in 80 Days: An Historical and Cultural Journey.**

This course will be constructed as a journey throughout the complex and diverse region of Latin America. By exploring the main geographical, historical, cultural and ethnic characteristics of this area of the globe, students will discover some critical junctures, and personalities that in the past centuries have defined Latin America as a unique, transnational and multilingual subcontinent. The course will be structured around three axes (foundational and modern myths, nation-building and cultural identities, and icons of popular culture) that will be explored from an interdisciplinary perspective, combining insights from the fields of archaeology, anthropology, arts, history, literature, and political science. The languages of instruction will be Spanish and English. Students will be expected to be able to conduct their readings in Spanish, when English translations of the reading material are not available, although during class discussion and assignments they will be permitted to use the language of their choice.

**LACA 0510F. Fidel Castro and Che Guevara: The Men and the Myths (COLT 0510F).**

Interested students must register for COLT 0510F.

**LACA 0537A. Popular Culture in Latin America and the Caribbean (HIST 0537A).**

Interested students must register for HIST 0537A.

**LACA 0537B. Tropical Delights: Imagining Brazil in History and Culture (HIST 0537B).**

Interested students must register for HIST 0537B.

**LACA 0580M. The Age of Revolutions, 1760-1824 (HIST 0580M).**

Interested students must register for HIST 0580M.

**LACA 0610. Mapping Portuguese-Speaking Cultures: Brazil (POBS 0610).**

Interested students must register for POBS 0610.

**LACA 0610E. Crisis and Identity in Mexico, 1519-1968 (COLT 0610E).**

Interested students must register for COLT 0610E.

**LACA 0646. Brazilian Choro Ensemble (MUSC 0646).**

Interested students must register for MUSC 0646.

**LACA 0670. Global Black Radicalism (AFRI 0670).**

Interested students must register for AFRI 0670.

**LACA 0710A. (En)Gendering the Text: Gender & Sexuality in Latin American Literature and Film (GNSS 0710A).**

Interested students must register for GNSS 0710A.

**LACA 0710B. Hispanic Culture Through Cinema (HISP 0710B).**

Interested students must register for HISP 0710B.

**LACA 0710I. New Worlds: Reading Spaces and Places in Colonial Latin America (COLT 0710I).**

Interested students must register for COLT 0710I.

**LACA 0710N. A Comparative Introduction to the Literatures of the Americas (COLT 0710N).**

Interested students must register for COLT 0710N.

**LACA 0711. Brazilian Democracy in Literature and History (POBS 0711).**

Interested students must register for POBS 0711.

**LACA 0711G. The Realist Novel (Europe, America, Latin America) (COLT 0711G).**

Interested students must register for COLT 0711G.

**LACA 0730. Encounters: Latin American in its Literature and Culture (HISP 0730).**

Interested students must register for HISP 0730.

**LACA 0750B. The Latin American Diaspora in the US (HISP 0750B).**

Interested students must register for HISP 0750B.

**LACA 0750E. Topics in Hispanic Culture and Civilization (HISP 0750E).**

Interested students must register for HISP 0750E.

- LACA 0750G. Wildeyed Stories (HISP 0750G).**  
Interested students must register for HISP 0750G.
- LACA 0750Q. Health, Illness and Medicine in Spanish American Literature and Film (HISP 0750Q).**  
Interested students must register for HISP 0750Q.
- LACA 0760. Transatlantic Crossings: Readings in Hispanic Literatures (HISP 0760).**  
Interested students must register for HISP 0760.
- LACA 0760A. Rastafarianism (AFRI 0760A).**  
Interested students must register for AFRI 0760A.
- LACA 0810. Belonging and Displacement: Cross-Cultural Identities (POBS 0810).**  
Interested students must register for POBS 0810.
- LACA 0820U. Drug War Politics (POLS 0820U).**  
Interested students must register for POLS 0820U.
- LACA 0850. Comparative Approaches to the Literatures of Brazil and the United States (POBS 0850).**  
Interested students must register for POBS 0850.
- LACA 0901W. The Space Within: Contemporary Borderland Moving Image Practice (MCM 0901W).**  
Interested students must register for MCM 0901W.
- LACA 0990. Mapping Cross-Cultural Identities (POBS 0990).**  
Interested students must register for POBS 0990.
- LACA 1020C. The Afro-Luso-Brazilian Triangle (AFRI 1020C).**  
Interested students must register for AFRI 1020C.
- LACA 1030. Pre-Columbian Art and Architecture: A World That Matters (ANTH 1030).**  
Interested students must register for ANTH 1030.
- LACA 1031. Classic Mayan Civilization (ANTH 1031).**  
Interested students must register for ANTH 1031.
- LACA 1050W. Transnational Hispaniola: Haiti and the Dominican Republic (AFRI 1050W).**  
Interested students must register for AFRI 1050W.
- LACA 1070. The Burden of Disease in Developing Countries (PHP 1070).**  
Interested students must register for PHP 1070.
- LACA 1071. On Both Sides of the Lens: Latin American Women Filmmakers (GNSS1070).**  
Interested students must register for GNSS 1070.
- LACA 1080. Performing Brazil: Theater, Language and Culture (POBS 1080).**  
Interested students must register for POBS 1080.
- LACA 1120. Peoples and Cultures of the Americas (ANTH 1120).**  
Interested students must register for ANTH 1120.
- LACA 1151U. Literatura Puertorriqueña: Cruce-Ficciones y Contra-Poemas (LITR 1151U).**  
Interested students must register for LITR 1151U.
- LACA 1200D. Latina/o Literature (ETHN 1200D).**  
Interested students must register for ETHN 1200D.
- LACA 1210. Afro-Brazilians and the Brazilian Polity (AFRI 1210).**  
Interested students must register for AFRI 1210.
- LACA 1210A. Latin American Politics (POLS 1210).**  
Interested students must register for POLS 1210.
- LACA 1281. Migration in the Americas (SOC 1281).**  
Interested students must register for SOC 1281.
- LACA 1285. The Quality of Democracy in Latin America (POLS 1285).**  
Interested students must register for POLS 1285.
- LACA 1310. History of Brazil (HIST 1310).**  
Interested students must register for HIST 1310.
- LACA 1312. Brazil: From Abolition to Emerging Global Power (HIST 1312).**  
Interested students must register for HIST 1312.
- LACA 1320. Rebel Island: Cuba, 1492-Present (HIST 1320).**  
Interested students must register for HIST 1320.
- LACA 1330C. Indigenous Literatures of Latin America (HISP 1330C).**  
Interested students must register for HISP 1330C.
- LACA 1330Q. Short Forms: Major Works in a Minor Key (HISP 1330Q).**  
Interested students must register for HISP 1330Q.
- LACA 1330T. El Amor en Español (HISP 1330T).**  
Interested students must register for HISP 1330T.
- LACA 1330U. Hauntings: Gothic Fictions, Banditry and the Supernatural in Latin America (HISP 1330U).**  
Interested students must register for HISP 1330U.
- LACA 1330V. Gender Trouble in Spanish America (HISP 1330V).**  
Interested students must register for HISP 1330V.
- LACA 1330X. The Nature of Conquest: Scientific Literatures of the Americas (HISP 1330X).**  
Interested students must register for HISP 1330X.
- LACA 1330Z. Tropical Fictions: Geography and Literature in Latin American Culture (HISP 1330Z).**  
Interested students must register for HISP 1330Z.
- LACA 1331. The Rise and Fall of the Aztecs: Mexico 1300-1600 (HIST 1331).**  
Interested students must register for HIST 1331.
- LACA 1331A. Writing Animals in the Iberian Atlantic (HISP 1331A).**  
Interested students must register for HISP 1331A.
- LACA 1331E. Visions and Voices of Indigenous Mexico (HISP 1331E).**  
Interested students must register for HISP 1331E.
- LACA 1333. The Mexican Revolution (HIST 1333).**  
Interested students must register for HIST 1333.
- LACA 1370. The United States and Brazil: Tangled Relations (HIST 1370).**  
Interested students must register for HIST 1370.
- LACA 1370B. Gaborium: Memory, Fiction, and Reading in Gabriel García Márquez (HISP 1370B).**  
Interested students must register for HISP 1370B.
- LACA 1370V. Mujeres Malas (HISP 1370V).**  
Interested students must register for HISP 1370V.
- LACA 1370Y. Literature and Film of the Cuban Revolution (HISP 1370Y).**  
Interested students must register for HISP 1370Y.
- LACA 1371B. Sports and Culture in Latin America (HISP 1371B).**  
Interested students must register for HISP 1371B.
- LACA 1371C. "El gran zoo": Animals in Latin American Culture (HISP 1371C).**  
Interested students must register for HISP 1371C.
- LACA 1371F. Narrating the Borderlands: Literature, Legality, and Solidarity (HISP 1371F).**  
Interested students must register for HISP 1371F.
- LACA 1381. Latin American History and Film: Memory, Narrative and Nation (HIST 1381).**  
Interested students must register for HIST 1381.
- LACA 1411D. Antigones (COLT 1411D).**  
Interested students must register for COLT 1411D.
- LACA 1420F. Fantastic and Existentialist Literatures of Argentina, Uruguay and Brazil (COLT 1420F).**  
Interested students must register for COLT 1420F.
- LACA 1500M. Queer Aesthetics and Intimacies en español (HISP 1500M).**  
Interested students must register for HISP 1500M.

**LACA 1501A. Exclusion, Gender and Respect: Understanding Youth Violence in Latin American Cities.**

Urban crime and fear is perhaps the most important concern for Latin Americans in countries across the region such as Colombia, Brazil, Mexico, and Venezuela. In this course we will develop a thorough analysis of youth violence departing from the structural forces that drive youths to violent lifestyles. We will then pass through cultural dispositions associated with gender identities and the lived experience of violence, youth subjectivities and emotions expressed (such as the sense of hopelessness engendered by these experiences). Finally we will discuss the possibility of alternatives to violence for youths.

**LACA 1501G. Remembering and Forgetting the Portuguese Colonial Empire (POBS 1501G).**

Interested students must register for POBS 1501G.

**LACA 1503F. Art and the Global City: Buenos Aires, Rio de Janeiro and Mexico City.**

This seminar studies recent literature and visual art through a strategic focus on the cities of Buenos Aires, Rio de Janeiro and Mexico City. Artistic inquiry and evolving issues in contemporary art are discussed. The very limits of literary forms are also explored, inviting questions on the intersections of images and words, or art and literature. Although the history of key artworks and movements in 20th-century Latin America will provide a foundation for our seminar, special attention will be paid to the present. We will examine recent experimentation, looking into the ideas that animate art practices today.

**LACA 1503G. Music, Gender + Sexuality in the Americas.**

This course studies popular music as a space in which gender and sexuality are performed, focusing on the ways in which popular music has both reflected and challenged gender constructs and norms. The course is structured as a series of case studies illustrating a range of popular music styles from throughout the Americas (Cuban, Mexican, and Puerto Rican bolero, Argentine tango and cumbia, and United States R&B, disco, and pop duets), and the performance of a rainbow of gender and sexual identities (including heterosexual femininity and masculinity, gay and lesbian identities, and queer subjectivities).

**LACA 1503H. Sexuality, Human Rights and Health: Latin American Perspective and Brazilian Experiences.**

This course is presented in 4 sections. Section 1. Provides an overview on how sexuality and health, both defined by biological paradigms, met social constructionism and human rights perspectives which flourished in Latin America. Section 2. Provides an overview of the human rights based health approach and provide Brazilian cases. Section 3. Provides an overview to the multicultural human rights based approach to sexuality education. Section 4. Expands the dialogical approach of this course by discussing sexuality research and human rights health based interventions in relation with students brought cases.

**LACA 1503I. Fiction and Methods in Social Research: Debates on Inequality, Poverty, and Violence.**

In this course, students will read, comment, and discuss renowned novels on inequality, exclusion, poverty, and (political, religious, racial, and gender) violence in cases as diverse as Nigeria, India, and Afghanistan.

These novels will submerge students in some of the complexities and richness of the selected cases. By reading them, students will explore and discuss concepts, stories and historical context, political and socioeconomic processes, the roles of characters, and arguments.

**LACA 1503J. Latin American Urban Interventions.**

This seminar engages with narratives of modernization and their relation to time and space in Latin America through cultural artifacts that represent urban interventions designed to improve "the human condition." Is there an informal Latin American mode of modernity? Are urban interventions condemned to reproduce social exclusion? We review literature on Latin American urban complexes and a case study on a massive residential and commercial complex built in downtown Caracas in the 1970s called Parque Central, including original brochures, shorts stories, poems, excerpts from novels, photos, artwork, films, plays, songs, and performances. Readings will be in English and Spanish and the course will be conducted in Spanish.

**LACA 1503K. Mosquito: Performing Epidemics in Latin America and the Caribbean.**

This course offers an anthropological overview of the *Aedes aegypti* mosquito and its epidemics in Latin America and the Caribbean. Yellow fever, dengue, Zika and chikungunya fever are the mosquito-borne diseases. For almost two centuries, they have been the focus of scientific controversies and state health department actions for the control, prevention or surveillance of humans, animals, artifacts, and environment. Moreover, this course examines how epidemics, biosurveillance and their health public policies have been performed from the global infrastructures of science, technology, and their international corporations involving local and ecological entanglements. Class is taught 80% in Portuguese and 20% in English.

**LACA 1503L. History of Central America from the 16th Century to the Present.**

This seminar examines the history and cultures, from the 16th century to the present, of Central America, a region ethnically diverse but with economic and political elements in common. We will center on the resistance, contradictions, and history of the region and its people. We begin with an overview of the appreciation of rich cultural diversity of Central America starting with the time before the Spanish Conquest, moving on to the impact of Spanish colonialism, the independence movements, and the obstacles of the twentieth century.

**LACA 1503M. Indigenous Resistance and Contradictions in Latin America.**

This seminar examines Indigenous People's knowledge through community resistance and social movements to consider the multiple ways in which globalization impacts their lives. The objective of the course is to achieve an in-depth appreciation of Indigenous resistance through the experiences of specific countries of Latin America, and learning how those practices vary according to each region and circumstance. Across the semester, we will develop critical perspectives on diverse academic approaches. Students will read and analyze path breaking documents that marked several indigenous peoples' histories and that at times come from voices historically marginalized.

**LACA 1503N. Race, Racism, and Indigeneity in the Americas.**

This upper division seminar focuses on the history and cultures of Latin America's indigenous peoples, emphasizing the impact of colonial rule, capitalism, and twentieth- and twenty-first century transformations on indigenous communities. Students will trace the effects European conquest and colonization through Latin American history ending with the displacement and emigration of indigenous people from their communities as result of social upheaval and neoliberal policies. Students will frame the experiences of indigenous immigrants through a transnational lens, analyzing how indigenous peoples navigate racial and social institutions in both the U.S. and Latin America.

**LACA 1503O. Networked Movements. Mobilizations for change in Latin America in the 21st century.**

Networked Movements examines the characteristics of social movements emerging in Latin America since 2007. These movements combine the non-violent occupation of public spaces and the intensive use of digital technologies for autonomous political communication. The course starts with foundations of networked social movement theories. Topics will include: the social appropriation of technological innovations; the construction of collective identity and the movement's aesthetics; collective action for the occupation of public space; counter-public or counter-hegemonic political action; dynamics of social capital combining strong and weak ties; small-world structure of the movement networks; and mobilizing ideas by information cascades and network contagion.

**LACA 1503P. Consuming the Cold War in the Caribbean.**

How was the Cold War experienced in the Caribbean? How did refrigerators, automobiles, washing machines, stereos, and blue jeans become proxies of the world superpowers and mechanisms of impersonal rule in the hands of local regimes? How were Caribbean populations transformed by modernizing and developmentalist policies, and how did they resist the marketed allure of empires? Consuming the Cold War in the Caribbean answers these questions, exploring the politics of modern material and visual regimes in Cuba and the region during the post WWII era, addressing such regimes as mechanisms of soft power, impersonal rule, political critique, and resistance.

**LACA 1503Q. Politics of Indigeneity in Brazil.**

This course examines the politics of indigeneity in Brazil. First, it examines the relationship between native peoples and settlers, especially the Jesuits, Portuguese colonists, and the Portuguese Crown. Our purpose is to understand images of savagery and innocence as part of colonial imaginary in Brazilian's imaginary about natives. Next, we will explore how indigenous peoples were understood by scientists and naturalists, and how these discussions are important in understanding notions about race in Brazil. Finally, we examine the relationships between native peoples and the State during the Republic, with a focus on contemporary issues, such as development, the environment, and social movements.

**LACA 1504A. Violence and Urban Poverty in Latin America: Ethnographic and Qualitative Perspectives.**

Living in a barrio, favela, villa, or colonia means living in a state of emergency, caught in the middle of armed confrontations between state and non-state actors. This course has three main objectives: 1) to understand urban violence from the perspective of people living in poor and marginalized areas; 2) to analyze how ethnographic and interpretive research on urban violence in Latin America is presented; and 3) to consider the ethnographic narrative, the voice of the ethnographer and the challenges of conducting research in violent settings where the research itself is a social problem.

**LACA 1504B. Indigenous Politics in Latin America.**

Indigenous peoples began participating politically in Latin America in the early 1990s, and have dramatically changed the political dynamics of most countries in the region ever since. In the last two decades, Latin America has experienced mass indigenous mobilizations and the rise of ethnic parties. This course covers a wide range of issues related to ethnicity in Latin America, including indigenous movements and parties, ethnodevelopment and environmental politics, ethnic radicalization and violence, transnational ethnic activism, and indigenous groups and gender politics, among others. This class introduces students to the main empirical and theoretical debates about indigenous politics in Latin America.

**LACA 1504C. Representation and Governance in the Federations of Latin America.**

This course analyzes the relationships between federalism and four large topics: political stability in plural societies, economic development, democratic representation, and equality. The discussion focuses on the evolution of Latin American federations. Students will learn where federations come from, what they do, and why it matters. They will be able to compare alternative approaches to federalism and to recognize the normative problems at stake in the organization of federations. The course is intended for advanced undergraduate students in political science or international relations. It could also be useful for students majoring in economics, sociology and history.

**LACA 1504D. The Art of Revolution in Latin America.**

This course considers the role of the arts—visual, literature, music, film, and performance—in Latin American social movements. We will study the work of artists and activists in the Mexican Revolution, Cuban Revolution, Nicaraguan Revolution, South American dictatorship resistances, and contemporary social movements such as the Chilean student movement and narco-trafficking. We will trace the use of the arts in organizing, social critique, collective action, and propaganda, and how they have shaped ideology and culture in Latin America and beyond. We will study a range of political art through comparative, interdisciplinary approaches including literary, cultural and performance studies, and art criticism.

**LACA 1504E. Latinx Music in the U.S..**

This course considers U.S. Latinx experiences by examining diverse musical genres associated with Latinx peoples, including salsa, corrido, rock, and reggaeton. We will take a critical lens to understanding the transformations of Latinx musics, investigating the processes by which they became central to Latinx identity. Over the course of the semester, we will explore the connections between music and cultural, social, and political forces including the entertainment industry, race, migration, and language. The course focuses on ethnographic and historical approaches as a context for understanding current trends. Prior coursework in music, Latin American studies, American studies, or cultural anthropology preferred.

**LACA 1504F. Latin American Authors Encounter the Sciences.**

This course offers a scientific and literary journey through diverse Latin American landscapes and societies. The readings are focused on the period 1830-1950. We will trace how natural, social, and medical sciences such as geography, psychiatric, ethnology, and archaeology, have discursively created territories and peoples as part of their own process of disciplinary characterization. We will then explore how writers embraced, discussed, and confronted these scientific discourses on topics such as nature, illness, progress, and indigenous people, among others.

**LACA 1504G. Latin American Environmental Humanities.**

Latin America is one of the regions where the worldwide environmental crisis has manifested itself most forcefully over the past decades—with high levels of environmental toxicity, endangered species, and habitat loss. This course will introduce students to how artists, filmmakers, and writers are representing and raising awareness about key environmental issues in the region. The course is structured around five case studies: the desert, agriculture, oil extraction, water pollution, and waste management. The languages of instruction will be Spanish and English. When the reading material is not available in translation, students are expected to be able to read in Spanish.

**LACA 1505. Vertical Civilization: South American Archaeology from Monte Verde to the Inkas (ANTH 1505).**

Interested students must register for ANTH 1505.

**LACA 1510B. Environment and Development in Latin America.**

This seminar introduces a “developmental challenges approach” to thinking about resource-based development. The approach is critically used to survey the development of extractive industries and other environmental issues in Latin America.

The main questions to be examined are:

Is resource abundance a curse?

Is Latin America too poor to be green?

Do institutions end up defining these issues, and how?

Assignments will help students develop a research project to study one case or a set of cases in comparative perspective (countries or sub-national units).

**LACA 1510C. Ethnicity and the Politics of Development in Latin America.**

Over the past decades, the realities of ethnicity and the politics of development have repeatedly presented themselves for reflection in Latin America. This course seeks to identify the interfaces and interactions among the two. During the semester, we will examine four questions: First, why is ethnic inequality so persistent in the region? Second, why and how do ethnic boundaries become politicized in the region? Third, can national development and local and indigenous livelihoods coexist? Fourth, is ethnic and environmental contentious politics driving institutional transformation in Latin America?

**LACA 1510D. Popular Music and Social Change in Latin America.**

This course is designed to illuminate the many ways that popular musicians shape, and are shaped by, the broader social milieu within which they act. Focusing largely on twentieth-century case studies from Cuba, Brazil, and Peru, it illustrates how social dynamics particular to Latin America have constrained popular musicians' efforts to communicate, circumscribed their artistic and political goals, and enabled them to intervene in sociocultural debates in specific ways. Issues to be considered include the sanctioning of musical styles as national symbols; the harnessing of music to project promoting racial diversity; its use as a medium of political protest as well as a vehicle for populist politics; the shifts in style wrought by industrialization, migration, and urbanization; the importance of media dissemination and commercialization, both in driving musical change and in determining its scope of influence; and the ambivalent role of the processes variously dubbed "westernization," "Americanization," and "globalization."

**LACA 1510E. Race, Music and Literature in the Spanish Caribbean.**

The course provides an interdisciplinary approach to racial representations in the Literature and Popular Music of the Spanish Caribbean. It explores the different definitions and representations of the Spanish Caribbean cultures and identities from a comparative view of the Anglo and French Caribbean writers.

**LACA 1510F. Institutions of Justice and Democracy in Latin America.**

The course will examine the relationship between democracy building and the performance of Institutions of Justice in Latin America. We will address issues of human rights violations, globalization and its threats, and the Challenges that Latin American regimes faces to build democratic institutions and the rule of Law. The course will focus will be both on the normative and sociological and analysis of the institutions of Justice in Latin America.

**LACA 1510G. Literature and Popular Culture in Latin America.**

Latin American cultures were built on the humanistic and intellectual perspectives exposed by José Enrique Rodó and José Martí, among many others, which propose the artistic aesthetic as a social ideal and the spreading of education as a sign of progress. But these cultural and national projects were developed in "the era of mechanical reproduction" and their literary project soon was menaced by the "cultural industry." This course explores the dialogues and tensions between what has been branded as the "lettered" and the "real city" in Latin American societies in a selection of literature, film, television, and popular music. This course will be given in Spanish.

**LACA 1510H. Shaping the Brazilian Nation through Music.**

This course provides an introduction to the music of Brazil, with a particular emphasis on its role in creating and contesting visions of nationhood during the twentieth century. Focusing upon a limited number of musical practices, from different regions and periods, it is not intended to provide a comprehensive survey. Rather, using a small set of case studies, it highlights key dynamics that have shaped the relation between Brazilian music and Brazilian society more broadly. Topics range from traditional practices, such as *candomblé* and *folias de reis*; to *samba*, *bossa nova*, and Northeastern regional styles; to the work of composer Heitor Villa-Lobos; to the contemporary hip hop scene of São Paulo. There are no prerequisites, but it is recommended that students have either some knowledge of Latin American culture and/or history, or some musical background. Enrollment will be limited to twenty people, with preference given to those matching these criteria.

**LACA 1510I. Urban Latin America.**

This course provides an introduction to the study of cities and urban life in modern Latin America. We will explore major themes in the past 200 years of Latin American urban life, with a particular focus on the perspectives of overlooked and subaltern actors. Some of the topics we will examine are urban slavery, informality, populism, migration and immigration, urban environments and ecology, queer/LGBTQ+ urban studies, urban planning and modernism, and social movements. By exploring cities during this broader historical period, we will trace the debates and shifting politics that have influenced urban research across multiple disciplines.

**LACA 1510J. The Making of Modern Brazil.**

Will focus on the building of the Brazilian nation and the meanings of social phenomena involved in this process. Based on studies of contemporary Brazilian society, it will analyze different aspects of that country: urbanization, popular culture, revival of tradition, hybridization, imageries, symbolic aspects of money and consumption, popular music.

**LACA 1510K. Human Rights in Twenty-First Century Latin America.**

Course offers a multidisciplinary introduction to the key advances in and challenges for the protection of human rights in contemporary Latin America. In contesting autocratic governments in the 1970's and 1980's, Latin America social movements and non-governmental organizations (NGOs) played a central role in the creation of the institutions and norms that constitute the international human rights system today. Enrollment limited to 20.

**LACA 1510L. The Politics of Latin America: Dilemmas and Opportunities.**

A survey course on the politics of Latin America which aims at exploring the transformations experienced by the region in the last few decades. The course combines the discussion of themes (the emergent economic realities, the quality of democracy) with a more detailed look at countries of particular relevance because of their importance (Brazil, Mexico, Argentina) their unique trajectories (Chile, Cuba) and their relationship with the United States (Venezuela). Enrollment limited to 20.

**LACA 1510M. New Latin American Populisms in Comparative Perspective: Bolivia, Argentina, Venezuela + Ecuador.**

Seminar: this course is based on the notion that there is more to populism and old dichotomies such as rational/irrational, rural/urban or modern/traditional. It will discuss and identify a more precise definition of populism, characterize the "new Latin American populism" and compare it with the classic populisms of the Post War era and the "neo-populisms" of the nineties. It will discuss the commonalities and differences of these regimes in terms of their coalitions of support and their public policies. Limited to 25 juniors and seniors.

**LACA 1510N. Political Systems and Political Parties in Latin America.**

This course will explore the seemingly contradictory reality of Latin American political systems and political parties. The goals of the course are to analyze the transformations of the political parties and the political party systems in Latin America from the year 2000 to the present day and to highlight the manner in which the party systems transformations had to do the transformations in the representative linkage between the political parties and the civil and political societies that they are rooted in.

**LACA 1520. Latin American Horror (GNSS 1520).**

Interested students must register for GNSS 1520.

**LACA 1560. Economic Development in Latin America (DEVL 1560).**

Interested students must register for DEVL 1560.

**LACA 1570. The Economics of Latin Americans (ECON 1570).**

Interested students must register for ECON 1570.

**LACA 1601A. Latin American Literature in an Era of Globalization.**

This course will explore the impact of globalization on contemporary Latin American Literature. We will analyze novels, short stories and critical discourses produced by Latin American writers in the past thirty years and shed light on how the awareness of the globalized world has transformed writing practices as well as the setting and the construction of narratives. The course will examine the trade-offs associated with the process of globalization, highlighting the beneficial aspects of hypermobility, fluidity, and transnationalism, as well as the dark sides of globalization linked to the rise in inequality and the intensification of narcotrafficking and illegal migration.

**LACA 1620B. Latin America and the Caribbean: Challenges of the Global South.**

This course will explore contemporary political, cultural, and ethnic challenges that characterize Latin America and the Caribbean. It will be structured around five themes (1. Hunger and poverty, 2. Slums and environmental degradation, 3. Political regimes and human rights, 4. Race and indigeneity, 5 Global market and cultural subalternity). The course will adopt an interdisciplinary perspective, based on a variety of cultural productions and scholarly contributions. The languages of instruction will be Spanish and English. Students will be expected to conduct their readings in Spanish. During class discussion they will be permitted to use the language of their choice.

**LACA 1621. Material Culture Practicum (ANTH 1621).**

Interested students must register for ANTH 1621.

**LACA 1630. Engaged Humanities: Storytelling in the Americas.**

This course explores the role of storytelling in the transmission of cultural narratives across societies in Latin America, the Caribbean and Latinx diaspora. We will examine a wide variety of stories as well as mediums (e.g., podcasts, photos, art works, textiles, and music) that are exemplary of this cultural transmission, and we will be exposed to practitioners from the local and international community who will share with us their insights. Students will be engaged in the art of storytelling through collaborative workshops, and will create their original narratives inspired by social and cultural issues of Latin American and Caribbean countries.

**LACA 1650. Ancient Maya Writing (ANTH 1650).**

Interested students must register for ANTH 1650.

**LACA 1700. Beyond Sun, Sea and Sand: Exploring the Contemporary Caribbean (DEVL 1700).**

Interested students must register for DEVL 1700.

**LACA 1700B. Rhythm and Silence: A Creative Writing Workshop (HISP 1700B).**

Interested students must register for HISP 1700B.

**LACA 1700K. Race in the Americas: A Hemispheric Perspective (AMST 1700K).**

Interested students must register for AMST 1700K.

**LACA 1702M. The U.S. War on Drugs: From History to Policymaking and Beyond (PLCY 1702M).**

Interested students must register for PLCY 1702M.

**LACA 1703A. Youth Politics and Culture in the Americas: Explorations through Ethnography (PLCY 1703A).**

Interested students must register for PLCY 1703A.

**LACA 1711N. Monsters in our Midst: Reading Spaces and Places in Colonial Latin America (ENGL 1711N).**

Interested students must register for ENGL 1711N.

**LACA 1750A. Immigrant Social Movements: Bridging Theory and Practice (ETHN 1750A).**

Interested students must register for ETHN 1750A.

**LACA 1750I. Indigeneity, Sustainability and Resistance in Food Politics (ETHN 1750I).**

Interested students must register for ETHN 1750I.

**LACA 1750L. Latina Feminisms (ETHN 1750L).**

Interested students must register for ETHN 1750L.

**LACA 1800E. The Brazilian Puzzle: Confronting the Post-Colonial Legacy (POBS 1800E).**

Interested students must register for POBS 1800E.

**LACA 1800F. The Lusophone World and the Struggle for Modernity (POBS 1800F).**

Interested students must register for POBS 1800F.

**LACA 1802S. Human Security and Humanitarian Response (PHP 1802S).**

Interested students must register for PHP 1802S.

**LACA 1803R. Bringing Small States In: How and Why They Matter (DEVL 1803R).**

Interested students must register for DEVL 1803R.

**LACA 1803S. US-Mexico Borderlands (INTL 1803S).**

Interested students must register for INTL 1803S.

**LACA 1803W. Roots of Crisis in Central America (INTL 1803W).**

Interested students must register for INTL 1803W.

**LACA 1900. Preparation for Honors and Capstone Projects on Latin American and Caribbean Topics.**

This workshop is designed for junior and seniors in any concentration who are researching and writing about Latin America and the Caribbean. It will help students to enhance their research and organization skills, refine their research or creative projects, and develop or complete a Capstone Project (e.g. honors thesis, honors project, substantial research paper).

**LACA 1900I. Latina/o Cultural Theory (AMST 1900I).**

Interested students must register for AMST 1900I.

**LACA 1923. Music in the Andean Countries: From Cumbia to Carnavalito (MUSC 1923).**

Interested students must register for MUSC 1923.

**LACA 1935. Beyond Bossa Nova: Brazilian Music and Society (MUSC 1935).**

Interested students must register for MUSC 1935.

**LACA 1958A. Archives of Desire: Non-Normative Genders and Sexualities in the Hispanophone World (HIST 1958A).**

Interested students must register for HIST 1958A.

**LACA 1961L. Postcolonial Horror: Political Specters in Non-Western Literature and Film (GNSS 1961L).**

Interested students must register for GNSS 1961L.

**LACA 1966Q. Colonial Encounters and the Creation of Latin America (HIST 1966Q).**

Interested students must register for HIST 1966Q.

**LACA 1967C. Making Revolutionary Cuba (HIST 1967C).**

Interested students must register for HIST 1967C.

**LACA 1967E. In the Shadow of Revolution: Mexico Since 1940 (HIST 1967E).**

Interested students must register for HIST 1967E.

**LACA 1967F. The Maya in the Modern World (HIST 1967F).**

Interested students must register for HIST 1967F.

**LACA 1967L. Politics and Culture Under the Brazilian Military Dictatorship, 1964-1985 (HIST 1967L).**

Interested students must register for HIST 1967L.

**LACA 1967T. History of the Andes from the Incas to Evo Morales (HIST 1967T).**

Interested students must register for HIST 1967T.

**LACA 1972C. Picturing Paradise: Art and Science in the Americas (HMAN 1972C).**

Interested students must register for HMAN 1972C.

**LACA 1976H. Environmental History of Latin America 1492-Present (HIST 1976H).**

Interested students must register for HIST 1976H.

**LACA 1977I. Gender, Race, and Medicine in the Americas (HIST 1977I).**

Interested students must register for HIST 1977I.

**LACA 1979E. Wise Latinas: Women, Gender, and Biography in Latinx History (HIST 1979E).**

Interested students must register for HIST 1979E.

**LACA 1979L. Urban History of Latin America (HIST 1979L).**

Interested students must register for HIST 1979L.

**LACA 1990. Individual Thesis Preparation.**

For Latin American + Caribbean Studies concentrators writing senior projects or honors theses.

**LACA 1991. Individual Thesis Preparation.**

For Latin American + Caribbean Studies concentrators writing senior projects or honors theses.

**LACA 1992. Senior Seminar: Interpreting Latin America and the Caribbean Today.**

This seminar serves as a capstone course for the Latin American and Caribbean Studies concentration. Its purpose is to enable students to synthesize the diverse material covered throughout their interdisciplinary coursework in the concentration and to reflect on overarching questions, issues, and concepts related to Latin America and the Caribbean. Open to senior Latin American Studies concentrators. Instructor permission required.

**LACA 1993. Senior Seminar: Interpreting Latin America and the Caribbean Today.**

This seminar serves as a capstone course for the Latin American and Caribbean Studies concentration. Its purpose is to enable students to synthesize the diverse material covered throughout their interdisciplinary coursework in the concentration and to reflect on overarching questions, issues, and concepts related to Latin America and the Caribbean. Open to senior Latin American Studies concentrators. Instructor permission required.

**LACA 1994. Independent Readings in Latin American and Caribbean Studies.**

For upper-division students interested in pursuing topics in Latin American and Caribbean Studies not currently taught in the Brown curriculum. Students must have significant prior coursework, language skills, and sufficient background knowledge to put together a comprehensive reading list and to produce a final paper that meets the research requirement in the LACA concentration.

Class requirements include weekly meetings with the instructor, reading responses submitted before each meeting, and a self-assessment at the end of the semester by the student. The independent study will culminate in a research paper of sufficient depth and sophistication to meet the research requirement for the concentration in Latin American and Caribbean Studies.

Registration requires a comprehensive reading list developed by the student in consultation with the faculty member and a written agreement on course requirements. The concentration advisor's approval is required if the course is to count toward the concentration.

No more than two (2) semesters of LACA 1994/1995 may be used toward concentration requirements in Latin American and Caribbean Studies.

**LACA 1995. Independent Readings in Latin American and Caribbean Studies.**

For upper-division students interested in pursuing topics in Latin American and Caribbean Studies not currently taught in the Brown curriculum. Students must have significant prior coursework, language skills, and sufficient background knowledge to put together a comprehensive reading list and to produce a final paper that meets the research requirement in the LACA concentration.

Class requirements include weekly meetings with the instructor, reading responses submitted before each meeting, and a self-assessment at the end of the semester by the student. The independent study will culminate in a research paper of sufficient depth and sophistication to meet the research requirement for the concentration in Latin American and Caribbean Studies.

Registration requires a comprehensive reading list developed by the student in consultation with the faculty member and a written agreement on course requirements. The concentration advisor's approval is required if the course is to count toward the concentration.

No more than two (2) semesters of LACA 1994/1995 may be used toward concentration requirements in Latin American and Caribbean Studies.

**LACA 2080F. Latin in America (LATN 2080F).**

Interested students must register for LATN 2080F.

**LACA 2350H. The History of Wonder in Colonial Spanish American Lettres (HISP 2350H).**

Interested students must register for HISP 2350H.

**LACA 2520L. Latin American Existential Literature (HISP 2520L).**

Interested students must register for HISP 2520L.

**LACA 2620O. Authorship and Authoritarianism in Spain and Latin America (HISP 2620O).**

Interested students must register for HISP 2620O.

**LACA 2971E. Latin American Historiography (HIST 2971E).**

Interested students must register for HIST 2971E.

## Program in Literary Arts

### Chair

John H. Cayley

Since 1968, Literary Arts at Brown University has been a creative and intellectual center for the U.S. literary avant-garde. Along with a handful of other writing programs nationwide, Brown provides a home for innovative writers of fiction, poetry, digital language arts and cross-disciplinary. Established in the mid-1960s by poet, translator and critic Edwin Honig, Literary Arts at Brown continues its tradition of hiring and retaining a faculty comprised of nationally and internationally known authors. Each year, the program offers 60 – 70 classes, awards the M.F.A. degree to approximately 12 graduate student writers, and confers Honors on about 35 talented seniors who will have completed the undergraduate concentration in Literary Arts.

For additional information, please visit the department's website: <http://brown.edu/academics/literary-arts/home/literary-arts>

### Literary Arts Concentration Requirements

Brown's Program in Literary Arts provides a home for innovative writers of fiction, poetry, playwriting, screenwriting, literary translation, electronic writing and mixed media. The concentration allows student writers to develop their skills in one or more genres while deepening their understanding of the craft of writing. Many courses in this concentration require a writing sample; students should consult a concentration advisor or the concentration website for strategies on getting into the appropriate course(s).

Candidates for the Bachelor of Arts degree with concentration in Literary Arts will be expected to complete the following course work:

1. At least four creative writing workshops from among the following series: LITR 0100A, LITR 0100B, LITR 0110A, LITR 0110B, LITR 0110D, LITR 0110E, the various courses under LITR 0210, LITR 0310, LITR 0610, LITR 1010, LITR 1110, LITR 1150/1151 and LITR 1410. At least two genres must be covered within the four courses taken. An independent study in literary arts (LITR 1310 and LITR 1510) may count toward the workshop requirement. Other writing-intensive courses may also count, at the discretion of the advisor.

2. Six elective reading and research in literary arts courses, which must include:

- a course in literary theory or the history of literary criticism
- a course that primarily covers readings and research in literary arts created before 1800
- a course that primarily covers readings and research in literary arts created before 1900
- a course that primarily covers readings and research in literary arts created after 1900

These courses, selected in consultation with a concentration advisor, may come from (but are not limited to) the following departments: Africana Studies, American Civilization, Classics, Comparative Literature, East Asian Studies, Egyptology, French Studies, German Studies, Hispanic Studies, Italian Studies, Judaic Studies, Linguistics, Literatures and Cultures in English, Middle East Studies, Modern Culture and Media, Music, Portuguese and Brazilian Studies, Slavic Studies, South Asian Studies, Theatre, Speech and Dance, Visual Arts. With approval from the concentration advisor, courses covering pre-20th century time periods may be distributed in a variant manner, so long as they cover two distinct literary time periods that precede the 20th century

3. Among the ten required courses, at least four must be at the 1000-level or above. At least six classes (workshops and reading/research courses)

that shall count toward the concentration must be taken at Brown through the Literary Arts Department; up to one of the six LITR courses may be a course taken in another department but cross-listed by Literary Arts. No more than two of the ten required courses for the concentration may also count toward fulfilling a second concentration.

4. During the senior year, all students must take at least one course within the Literary Arts course offerings (courses with LITR designation by the Registrar, or courses approved by the concentration advisor).

Honors in Creative Writing: Course requirements are the same as those for the regular concentration (four workshops, six elective literature-reading courses), with the following changes and additions: honors candidates must include two 1000-level workshops or independent studies among their courses; and complete a thesis. Students who are enrolled in or have completed at least one 1000-level workshop (or independent study) may submit honors applications to the Literary Arts Department from the first day of the fall semester to 25 September. Interested students should obtain information from the office of the Literary Arts Department.

## Literary Arts Graduate Program

The Graduate Program in Literary Arts offers a Master of Fine Arts (M.F.A.) degree with courses in fiction, poetry, digital language arts and work that cross the boundaries of discipline.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/literary-arts>

## Courses

### LITR 0100A. Introduction to Fiction.

A workshop for first year students, introducing them to the art of writing fiction. This course is reading and writing intensive. Enrollment limited to 17. S/NC required.

### LITR 0100B. Introduction to Poetry.

A workshop for first year students, introducing them to the art of writing poetry. This course is reading and writing intensive. Enrollment limited to 17. S/NC required.

### LITR 0110A. Fiction I.

A workshop for students who have little or no previous experience in writing fiction. Enrollment limited to 17 per section. This course is limited to undergraduates. S/NC.

### LITR 0110B. Poetry I.

A workshop for students who have little or no previous experience in writing poetry. Enrollment limited to 17 per section. This course is limited to undergraduates. S/NC.

### LITR 0110D. Digital Language Art I.

Project-oriented workshop for writers, visual/sound artists, filmmakers and programmers who wish to explore digital media techniques. No experience working in this field (or with computer programming) required. You'll learn through doing, reading, talking and collaborating on works in various traditions. Enrollment limited to 17. S/NC.

### LITR 0110E. Screenwriting I.

This workshop introduces the fundamentals of screenwriting through a variety of readings, exercises and assignments. Our main focus will be on students' writing, with particular emphasis on exploring the cinematic potential of your stories and themes, and on developing structures that best suit your material and intentions. This course is limited to undergraduates. S/NC. Enrollment limited to 17.

### LITR 0200Z. Faking It: Literature in the Age of the Hoax.

How is society simultaneously constructed and undermined by the persistence of fakes? With its cousins the hoax and the forgery, the fake plays the straw man in much of political, religious, and philosophical discourse, but the fake's insistence on re-conceiving notions of originality and purity is more substantial. Pursuing a definition of the fake, we will consider its many forms in contemporary society alongside novels that parody and complicate the history of these particular deceptions. Authors include: Borges, Bolano, Ishiguro, Byatt, and McCarthy. Enrollment limited to 17.

### LITR 0210A. Fiction Writing II.

Topics often include stylistic matters related to tone and point of view, and structural matters like controlling switches in time. See general course description above for course entry procedures for all intermediate workshops. Enrollment limited to 17. Instructor permission required. S/NC.

### LITR 0210B. Poetry Writing II.

Emphasis is placed on verse strategies, meter, rhythm, imagery and rhyme. Writing includes frequent exercises in various poetic traditions. See general course description above for course entry procedures for all intermediate workshops. Written permission required. S/NC.

### LITR 0210D. Digital Language Art II.

Project-oriented workshop for writers, visual/sound artists, filmmakers, and programmers wishing to explore techniques for effective and innovative use of text in digital media. Topics include hypertext narrative, kinetic poetry, and recombinant and computer-generated texts. Collaboration encouraged. Work sample (writing, programming, website) due on first day of semester. Enrollment limited to 17. Instructor permission required. S/NC.

### LITR 0210E. Screenwriting II.

Emphasis is placed on filmic devices, such as dialogue, voice-over, montage and time. Writing includes frequent exercises. See general course description above for course entry procedures for all intermediate workshops. This course is limited to undergraduates. Enrollment limited to 17. Instructor permission required. S/NC.

### LITR 0310A. Poetry in Service to Schools and the Community.

We shall be reading, writing and talking about poetry and letting this medium reflect back on other artistic practices -- what it means to live, work & think (in) this way; another key component will be an engagement with community practice through bringing poetry to local schools, a direct personal and enlightening exchange of enlightening ideas and experience. Participants will work independently, in groups, in classes (including this one); you produce, and work with others to produce, art individually as well as communally; you are the gaffer, you are also, and simply, a member of the guild. This feels more like a teacher's enterprise, though I call it, simply, community practice-- what happens when people just put themselves in the position to give their gifts, while allowing, at the same time, others to give equally of themselves. Limited to 17. S/NC. Permission will be granted by the instructor after the first class session.

### LITR 0310B. City/Spaces: An Introduction to Psychogeography.

Psychogeography is an artistic discipline concerned with the subconscious ways in which we respond to and interact with the physical environment of the city. This course will focus on the intersection of psychogeography and text--both narrative and non-narrative-- and the possibilities for walking to inform text and narrative.

### LITR 0310C. Ethnic Writing (ETHN 0300).

Interested students must register for ETHN 0300.

### LITR 0310D. Imagining the City: Visions from Film and Literature.

This course will look at representations of urban space both in films and fiction, and through the lens of critical writings on the intersections between city space, architecture, film, and narrative. How do cities affect us aesthetically and emotionally? How have film and fiction examined, reinvented and revolutionized urban space in the twentieth century? What is the future of cities? These are some of the questions we'll address through readings, screenings, and discussion. As a class we will do weekly creative writing exercises inspired by the films and designed to explore the ways in which poetic space might be evoked through text.

### LITR 0310E. Making the Written Word.

While our primary focus will be on language, we shall explore its relationship to sound, video, and performance. Although no prerequisites are required, students should be competent in visual and language arts -- we shall work with equal sensitivity in both. Works created shall interrogate the space between image and text as a single composite medium, therefore illuminating advantages and pitfalls of each. We'll consider works by Linda Montano, Jenny Holzer, Lyn Hejinian, Susan Sontag. Required lab sessions in new technologies (Final Cut Pro, Audacity, Logic, Processing) will provide skills necessary to produce conceptually driven works of digital language art. Enrollment limited to 17.

**LITR 0310F. Visual Poetry.**

This interdisciplinary workshop explores the visual possibilities of language. Considering the page as a starting point, we'll create new works between writing and visual art. Through researching early writing systems, concrete poetry, asemic writing and contemporary works, students will gain a deeper understanding of their own practices. We'll examine the works of Dieter Roth, Carl Andre, Sol Lewitt, Aram Saroyan, Kenneth Goldsmith, Rosmarie Waldrop and more. All visual media welcome. "[Blank space on a page means] freedom. The possibility of anything happening. Every mark on that paper is an interruption, an insertion into a kind of peace." -Susan Howe

**LITR 0310G. COMIX: Words + Image.**

In this course we will be exploring the expansive genre of comics. You will learn how to read, analyze, compare, and create/write sequential art. This will be done through a variety of readings, in class exercises, discussions, and assignments. We will apply these reading and writing forms to the digital.

**LITR 0310H. Art of Film: An Introduction to Filmmaking.**

This is a course in the art of film writing, directing, editing picture and sound, and producing, be it narrative or avant-garde. Students will engage the theory and practice of the art of filmmaking via readings, viewings, writings, and making their own films. S/NC required.

**LITR 0310I. Exploding the Book: An Introduction to Hybrid + Cross-Disciplinary Poetry.**

How might poetry exist in three dimensions? In four? How might it interact with images? With sound? With performance? This course invites students to reimagine the ways in which human beings experience text. Exploding The Book is both an introduction to hybrid/cross-disciplinary poetry—poetry intersected with other media including image, sound, video, etc.—as well as a writing workshop. Students will be introduced to hybrid poets and text-based visual artists challenging the possibilities for where and how text exists. Additionally, students will develop a hybrid and experimental writing practice of their own.

**LITR 0310J. The Voice of Text.**

The Voice of Text will explore the voice as mediator among text, sound and performance. The vocal instrument will be thoughtfully investigated with examination of extreme and unorthodox iterations of voice/text/sound, including: castrati repertoire, extended technique ranging from Diamanda Galas to black metal, coded shortwave radio transmissions, electronic vocal synthesis and the ecstatic speech of glossolalia. Additionally, voiced text will be given historical context through fiction and poetry, film, theater and music. Through individual and collaborative projects, students will explore a variety of techniques and technologies, harnessing the expressive potential of the voice across a wide variety of disciplines.

**LITR 0310K. The Web Video: Narrative Installed in the Screen.**

Godard once joked, "I have a secret ambition...to be put in charge of the French newsreel." He imagined a digestible form of consumption that blended text with pictures, documentation with advertisement, intimacy with objectification. And now we have it. The computer allows access to thousands of newspapers, also television shows, social media sites, email, reddit, first person shooting games, everything really. Looking at artists like Hito Steyerl, Jenny Holzer, Harun Farocki, Young Hae Chang Heavy Industries, Trinh Minh Ha, Sondra Perry, Angela Washko, Douglas Kearney, Xu Bing and others, we'll explore narrative in the on screen video format.

**LITR 0310L. Coding for Language: An Introduction.**

In a time when almost every word and sentence will become digitized by computers, language becomes programmable. In this project centered workshop we are going to explore what possibilities, questions and challenges programming bring to language, especially in reading and writing practices. For students who are interested in language, coding, poetics, and creative writing, you'll learn through doing, reading, discussing and collaborating on works in programmable media. Some previous experience with programming is desirable. If you have a basic understanding of programming and are willing to spend more time to code for language, this course is for you.

**LITR 0310M. Refusing Objecthood: Web-Based Language Art as Site.**

This studio course addresses the history and practice of web-based language art, or literature/art made for and inseparable from the web. Web-based language art is space/place/landscape/setting/site; it is not held or beheld, but filled and inhabited. We focus on what this means for web-based language artists, especially those who occupy bodies that have not historically tended to own or control physical sites. Supplementary readings consider other site-building or site-altering language art practices and the materiality of the internet. Final projects will be web-based language artworks, for which participants are encouraged but not required to learn to code for the web.

**LITR 0310N. Machine Learning and Language Arts: Approaches to AI Art Practice.**

We'll consider the question: what does the rise of so-called artificial intelligence mean for the language and for arts practice in general? Contemporary artists in fields as diverse as music, architecture, cinema, poetry and painting use machine learning tools to support their work. Through technical workshops, project critiques and critical discussions, we'll grapple with the anxiety and catharsis AI tools can bring to the arts. Students will be expected to work on projects using multiple machine learning tools. No coding experience is required for this course. A writing sample will be due in the front hall of the Literary Arts building (located at 68 1/2 Brown Street) by 4 pm on the first day of classes. Interested students should also complete the survey here: <https://www.brown.edu/academics/literary-arts/survey-litr-0210-310-and-1010-workshops>.

**LITR 0510A. Masters and Servants.**

We will consider the relationship between servants and masters as portrayed in fiction and films. We shall examine the basic relation of servitude to sovereignty, extrapolating to the broader power dynamics of two-person relationships. Beginning with the Hegelian dialect of the master and the servant, and building as well on a philosophical framework provided by Nietzsche, Kojève and Bataille, we shall look at the complexities of the relationship between masters and servants, exploring the psychological, social and ethical dimensions of two-person relationships that value each person differently. We shall focus on issues of class and power and look at literature and film in which there are explorations of several complicated manifestations of servitude and mastery: overlaps into gender power dynamics and fetishism, power dynamic reversals both to comic and tragic effect, and questions of boundaries and violation of social propriety and human communication. Core texts will include work from Ishiguro, Wodehouse, D.H. Lawrence, Miabeau, Richardson, Bronë, and Stanley Crawford, and film texts will include Joseph Losey's *The Servant* and Luis Bunuel's *Diary of a Chambermaid*.

**LITR 0510B. Into the Machine.**

Starting from Turing's work on artificial intelligence, we shall examine the cultural and artistic ramifications of the rise of the machine, using Marx and Walter Benjamin to provide a framework. We will look at how machines generate anxiety, with special emphasis on robots, puppets and automatons; and we shall also consider utopian and dystopian images of machines, and visions of near and distant futures. Finally we will look at authors who utilize machine models of operation to generate artistic work. Authors and filmmakers include: Capek, E.T.A. Hoffman, Asimov, Lem, Breton, Redonet, Fritz Lang, Chaplin, Tati. Enrollment limited to 20 first year students.

**LITR 0510C. The Pleasures of the Text.**

Enter the radiance of literature, music and film through devotional readings, viewings and listening experiences that will result in a series of weekly creative writing experiments. Dissolve into a narrative or sound or image the way a writer might and return from these experiences inspired and changed. Be prepared for the awe and wonder that only art can afford. Texts may include stories, poems and/or novels by Adler, Baldwin, the Bible, Coetzee, Cortazar, Gluck, Muller, Munro, Morrison, Pancake, Rankine, Schwartz, Wolf and others. Films by Akerman, Anderson, Kurosawa and Herzog. Music by classical, jazz and hip-hop artists.

**LITR 0510D. Why Don't We Fall In Love?**

How do we fall in love? Why? The title of our seminar was inspired by the 2002 summer pop-hit, written and produced by Rich Harrison, and famously performed by Amerie Rogers. Through poetry, film, and music, we will be critical, clinical, and sometimes implicated observers of the dynamics which structure erotic desire, the selfless (or selfish) ambition of love, and its representations.

**LITR 0610A. Unpublishable Writing.**

This workshop explores writing projects which do not fit into conventional avenues of print publication (i.e. books). Through a series of prompted artistic projects we will explore how writing can interweave in new relationships with time, materials, sequence, procedural approaches, performance, and collaboration. Independent research will support your creative projects throughout the semester. Enrollment limited to 12. S/NC.

**LITR 0610B. Fiction Through Poetry.**

This course is designed for poets, fiction writers, and cross-genre enthusiasts interested in looking at narrative as it occurs at the level of the sentence, even the level of the word. We will use a variety of poetic texts as well as other fractured content as a means to think about fiction and the borderlands of storytelling. Students will be given weekly writing exercises. Enrollment limited to 12 first year students. S/NC.

**LITR 0610C. Books By Hand.**

We shall explore small press publishing and bookmaking from historical, contemporary and hands-on perspectives. Students will be asked to design and carry out small creative projects throughout the semester as well as research particular concerns in the field. Enrollment limited to 12 first year students. S/NC.

**LITR 0610D. Four Performance Texts.**

Performance studies is a capacious, interdisciplinary field that can traverse theater, visual art, music, literature, and dance, as well as aspects of lived life that are not necessarily considered art: ritual, sporting event, political protest. It is time-based, and thus for the most part, ephemeral. An artist may stage, orchestrate, or frame a set of behaviors, actions, events or even just intentions – they may or may not be the actual performer. Because of the embodied nature of performance, aspects of identity such as race, gender, and sexuality often play a visible role in the dynamics of the work.

The documentation of performance can exist in a wide range of formats, and usually endure for much longer than the performance itself. In this course, we will engage a “deep dive” on four distinct books that document performance. We will consider them both as records of the past, as well as a vehicle loaded with possibility for future actions – and we will perform some of those actions ourselves. This course will be a combination of the study of texts, the activation of texts, and the creation of texts. Individual and group work is expected.

**LITR 0610E. To Gather, To Sever, To Mix, To Turn.**

This highly generative workshop's goal is to stimulate and provide students with formal tools to develop a chapbook-length series of poems by the term's end. Students will bring materials to be transformed through processes including but not limited to collage, erasure, and translation. Such materials could be self-generated or found, and may include journal entries, dream logs, letters, text messages, images, archival matter, and much else. As examples of procedural approaches we will read poets such as Jen Bervin, Caroline Bergvall, Lyn Hejinian, Christian Hawkey, Susan Howe, Tyehimba Jess, Tan Lin, Claudia Rankine, and Stacy Szymaszek.

**LITR 0610F. Choose Your Own Adventure.**

This game is lit. I mean this Lit is a game. How do the design elements of a novel resemble the design elements of a game? And to what extent have interactive [video] games been designed with novelistic conceits? Your adventure begins here, starting with what lies at the dark heart of the literary adventure genre (Defoe, Conrad, Behn). We'll sojourn at contemporary indie video games (Undertale, Walking Dead, Broken Age, Gone Home), along the way analyzing how “choice” is utilized to build reciprocal fictions. We will also undertake semester-long projects—creating our own “Choose Your Own Adventure”s.

**LITR 0710. Writers on Writing Seminar.**

Offers students an introduction to the study of literature (including works from more than one genre) with special attention given to a writer's way of reading. This course will include visits to the course by contemporary writers who will read to the class and talk about their work. Enrollment limited to 19 first year students.

**LITR 0900A. Classic Short Stories.**

This course introduces you to a selection of works by important writers of the short story. We shall explore the richness and diversity of short fiction through close reading and discussion, affording you an appreciation of the short story in general and of our writers' countries and histories in particular. Our focus will be on authorial strategies and themes explored. Artistic and political movements will be introduced as they impact the works. Furthermore, you will learn the appropriate terminology as tools for textual and critical analysis. Finally, this course will to develop your capacity for self-expression.

**LITR 0999. Graphic Novels and Comic Masterworks.**

Focused on the influence of graphic novels and comic art, this course examines graphic novels and comic art from seminal texts like Art Spiegelman's Maus through a range of mainstream and independent comics from Marjane Satrapi, Grant Morrison, Alan Moore, David B., Lynda Barry, Daniel Clowes, Frank Miller, and many others, including graphic memoir, reportage, and Indie and DIY zines. The course explores image and language in collaboration, seeking a better understanding of this influential genre. Assignments are critical and creative, both individual and collaborative, and will involve daily reading and writing assignments. Enrollment limited to 20.

**LITR 1000. The Arts Workshop for Practice and Practice-Oriented Research.**

This collaborative course will provide a forum for discussing in-progress creative research and practice. Offered jointly by the Brown Arts Initiative and Brown's arts departments, the weekly workshop will host an interdisciplinary group of faculty, graduate students, and undergraduates. Each participant will apply with a specific creative practice/research project to be workshopped and developed during the course of the semester. In the semester following the seminar, participants will have access to production assistance from the BAI for further project development. The course requires an online application process, and successful applicants will be provided with instructor permission to enroll.

**LITR 1010A. Advanced Fiction.**

The writing of short stories or longer works in progress in regular installments, along with appropriate exercises and reading assignments. See general course description above for course entry procedures for all advanced workshops. Written permission required. S/NC.

**LITR 1010B. Advanced Poetry.**

Course work includes a body of exercises, close reading of poetry, workshop conversations and conferences. See general course description above for course entry procedures for all advanced workshops. Instructor permission required. S/NC.

**LITR 1010C. Advanced Playwriting.**

Course work includes a body of exercises, significant reading, workshop conversations and conferences. See general course description above for course entry procedures for all advanced workshops. Enrollment limited to 12. Instructor permission required. S/NC.

**LITR 1010D. Advanced Digital Language Arts.**

An advanced writing working for which participants produce, individually or in collaborative arrangements, a significant work of language-driven, digitally-mediated art in networked and programmable media. This work will be given historical and critical context, as participants become more aware of what it is they are doing when they use digital systems to write, or when they create instruments for and of writing. Throughout the course — and especially before final projects become the focus — there will be seminar-style reading and discussion: readings from other works of digital language art and from selected critical writing in the field.

**LITR 1010E. Advanced Screenwriting.**

Screenwriting for feature-length and episodic works. Participants should already have experience writing short screenplays and be prepared to develop a longer piece. See the Literary Arts Department website for course entry procedures for all advanced workshops. Work sample and instructor permission required. S/NC.

**LITR 1010F. Advanced Translation.**

Translation draws from many fields including linguistics, comparative literature, literary studies, anthropology, cultural studies, cognitive science, and creative writing. While we consider different theories and approaches to translation, students will embark on a semester-length translation project. Expect to read and energetically discuss readings, to give a presentation on your ongoing translation, and to write a critical essay and numerous translation exercises on your way toward completing a manuscript in translation (the length of which will be determined by the work itself and an agreement between professor and student). Enrollment limited to 12. Instructor permission required. S/NC.

**LITR 1010G. Writing3D.**

An advanced experimental workshop for writing in immersive 3D, introducing text, sound, spatial poetics, and narrative movement into Brown's Legacy Cave (now house in the Granoff Center for the Creative Arts) with links to the YURT (Yurt Ultimate Reality Theater in the Center for Computation and Visualization). An easy-to-learn and easy-to-use application allows non-programmers to create projects on laptops and then to run them in immersive 3D audiovisuality without the necessity for specialist support. Broadly interdisciplinary, the course encourages collaboration between students with different skills in different media, who work together to discover a literary aesthetic in artificially rendered space.

**LITR 1110B. American Political Drama.**

What exactly is an American political play? We'll examine issues of personal freedom, community rights, and the positioning of public power. Are we different from the myths of America? Political theater enables us to see our moral choices and aspirations. From Aristophanes to Suzan-Lori Parks, we will look at various political texts while we attempt to create new approaches to the writing of American Political Theater.

**LITR 1110E. Innovative Narrative.**

Stereotexts: a project-driven writing workshop focused on innovative multidimensional approaches to narrative. Projects using two or more media such as print and digital formats or texts and sound, filmed text, hyperfictions, narratives with multiple voices or even multiple spaces, text installations, fictions that put contraries into play, etc., are all welcome. Writing samples and project descriptions required.

**LITR 1110F. Narrative Strategies.**

A course essentially geared to the creative and critical writer interested in experimenting with some of the narrative structures suggested by the great films. To include films of Akerman, Antonioni, Eisenstein, Hou Hsiao, Hsien, Goddard, marker, Tarkovsky and others and texts by Duras, Sebald and Vittorini. Instructor permission required.

**LITR 1110G. Narrative Voice: Fact and Fiction.**

No description available.

**LITR 1110J. The Short Story.**

Experiments in writing; extensive reading in traditional and experimental collections of fiction in shorter forms. Writing samples of no more than ten pages should be left at 68 1/2 Brown Street on the first day of the semester. Instructor permission required. S/NC.

**LITR 1110L. Aspects of Contemporary Prose Practice.**

Using Chimamanda Ngozi Adichie's *Purple Hibiscus*, Tayeb Saleh's *The Wedding of Zein and Other Stories*, Luis Bernard Honwana's *We Killed Mangy Dog*, and *Our Sister Killjoy*, this course will look at prose narrative in contemporary African Literature, for a background to general narrative practice. Among areas of special interest, the course will examine the contents and structure of the short story, not as an abbreviated novel, but as an autonomous genre. We shall also look at literature in translation, and discuss what the reader loses in the process if anything, and how much that matters, if at all. Students will be expected to work on short stories and novel chapters. Instructor permission required. Enrollment limited to 12. S/NC.

**LITR 1110M. Stereotexts: Experimental Multidimensional Fiction Workshop.**

A project-driven writing workshop focused on innovative multidimensional approaches to narrative. Projects using two or more media such as print and digital formats or text and sound, filmed text, hyperfictions, narratives with multiple voices or even multiple spaces, text installations, fictions that put contraries into play, etc., all are welcome submissions.

**LITR 1110N. Workshop for Potential Literature.**

A novel without the letter "E", 100,000-billion sonnets by permutation and texts that take the shape of a Mobius-Strip-- all this time and more, as workshop participants try their hands in writing in response to problems created by and inspired by a group of writers engaged in strange constraints and procedures. Instructor permission required. S/NC.

**LITR 1110O. Hybrid Texts, Hybrid Thinking.**

In neither being fiction, poetry, memoir, theory, nor art writing but a crossing of these genres, the hybrid text proffers an open and complexly layered environment for engaging questions of perception, knowledge and articulation. In this course, we will study exemplary works of literature and venture briefly into visual art. Both critical and creative responses will be required.

**LITR 1110P. Alternative Scriptwriting: Writing Beyond the Rules.**

This course will consider various screenwriting genres and how to write against genre or extend the traditional screenwriting forms. Students applying must have already completed either a 90+ page screenplay or have taken Advanced Playwriting (LITR 1010C) or Advanced Screenwriting (LITR 1010E) at Brown. S/NC.

**LITR 1110R. Performance Dimensions of Text.**

This workshop (modeled on a traditional "atelier") explores the relationships between the performative and the printed/textual, asking in particular how the page can serve as a dynamic blueprint for sound, video, movement, and theatrical practice. Weekly examples of works that have pushed the boundaries of literary genres by incorporating performative elements will be combined with student experimentation in long and short pieces. As an interdisciplinary workshop, this course invites students from all backgrounds. S/NC. Instructor's permission required. Enrollment limited to 12.

**LITR 1110S. Fiction into Film.**

A study of various directors' attempts to transfer masterpieces of fiction into film. Concerning both genres we will ask Gertrude Stein's question: What are masterpieces, and why are there so few of them? Includes fiction by Austen, Bierce, Carter, Cowley, Doyle, Faulkner, Forster, Fowles, Kelsey, Joyce, McCullers, Morrison, Nabokov, O'Connor, Thompson, Walker, Spielberg, Woolf, Yamamoto as directed by Burton, Forman, Fellini, Gilliam, Huston, Jordan, Kurasawa, Lee, Potter, and others. Class and weekly screenings. Enrollment limited to 12. S/NC.

**LITR 1150A. Ecopoetics in Practice.**

What we have perpetrated on our environment has certainly affected a poet's means and material. But can poetry be ecological or display values that acknowledge the economy of interrelationship between human and non-human realms? Aside from issues of theme and reference, how might syntax, line break, or the shape of the poem on the page express an ecological ethics? How might poetry register the complex interdependency that draws us into a dialogue with the world? Readings, discussion, essays and creative writing. See general course description above for course entry procedures for all special topics workshop/seminars. Written permission required. S/NC.

**LITR 1150B. The Foreign Home: Interdisciplinary Arts.**

Project-centered workshop for exploration beyond one's "home" genre, whether in video, poetry, fiction, music, performance or visual arts. Contemporary and art-historical interdisciplinary works will ground our investigation into the tension between expertise and "beginner's mind". Collaborative and individual work expected. See general course description above for entry procedures for all special topics workshops/seminars. Written permission required. S/NC.

**LITR 1150C. Unpublishable Writing.**

Before becoming the dominant form of book-marking, "the codex" meant a tree stump where criminals were tied. After examining conventions of western print culture, we will explore literary practices which are performative, sculptural, multimedia, or out-scale. Through the course is primarily for creative projects, critical research will also be expected.

**LITR 1150E. Strange Attractors: Adaptations/Translations.**

A workshop for students from all genres and disciplines to explore adaptation as creative process. Adaptation can be between any genres and from any source. See general course description above for entry procedures for all special topics workshops/seminars. Written permission required. S/NC.

**LITR 1150F. Home and Abroad.**

This course combines seminar and workshop sessions for students with special interest in the writing of novels and short fiction. Attention will be given to the ways certain English and American writers - Herman Melville, Joseph Conrad, E. M. Forster, Graham Greene - have interpreted the lives of people in other and foreign cultures. These are classic examples of the meeting of insiders and outsiders in the house of fiction. Instructor permission required. Enrollment limited to 12.

**LITR 1150G. Books by Hand.**

As both a seminar and workshop, this course will explore small press publishing and bookmaking from historical, contemporary and hands-on perspectives. Students will be asked to design and carry out small creative projects throughout the semester as well as research particular concerns in the field. See general course description above for course entry procedures for all special topics workshop/seminars. Written permission required. S/NC.

**LITR 1150H. Latin American Poetry Live.**

We focus on 18 essential poets from Latin America. If you do not weep and run naked shouting through the streets of Providence you will not have read the poems closely. Bilingualism is not a prerequisite, but all the texts are bilingual and we will consider translation issues in a way that is accessible to and engaging for everyone. Several of the poems we consider are book length magisterial works. The poems are political, erotic, domestic, colloquial, innovative, or incendiary, and sometimes all at once. This section does not require permission from instructor.

**LITR 1150I. The Lyric Essay.**

Advanced level workshop for graduates and undergraduates to explore the possibilities of creative nonfiction in a radical or hybrid mode. See general course description above for course entry procedures for all special topics workshop/seminars. Written permission required. S/NC.

**LITR 1150J. The Cinematic Essay.**

A creative writing seminar in which we take the Essay Film as the primary inspiration for weekly writing exercises. Works by Marker, Godard, Ivens, Resnais, Varda, Akerman, Herzog, Morris, Su Friedrich, Sadie Benning and Trihn Mon-Ha to be included. Also writing by Cannetti, Gass, Handke, Cha, Hong Kingston and more. See general course description above for course entry procedures for all special topics workshop/seminars. Written permission required. S/NC. Students MUST register for the lecture section and the screening.

**LITR 1150M. Short Fiction Experiments.**

A course in fiction which pushes against the very definitions of stories and fictions. Using short forms, we will examine our habits and assumptions of story telling and engage in willful adventures of mind, spirit, and language. Prerequisites include a passion for trying everything and anything once. No prior writing experience needed. Written permission required.

**LITR 1150N. The Novella: An Adventure in Writing.**

In this workshop/seminar, we will explore the ever elusive world of the novella - how to think of this work, what the rules are, where the boundaries lay. Alongside their reading of writers such as Marguerite Dumas and Michael Ondaatje, students will embark on their own novella-writing journeys. Written permission required. S/NC.

**LITR 1150P. John Cage and Meditative Poetics.**

Primarily an interdisciplinary literature course, we will experience the writing and thinking of John Cage in the context of a wider exploration of creative process with a basis in American and European interpretations of Buddhist practice and thought. We will explore the work of contemporary artists such as Bill Viola, Philip Glass, Meredith Monk, Allen Ginsberg and Anne Waldman, as well as Samuel Beckett and others. Students in the course will be expected to write in both creative and critical modes. Instruction in basic meditation practice is recommended but optional throughout the semester. Written permission required.

**LITR 1150Q. Reading, Writing and Thinking for the Stage.**

Composed of contemporary dramatic literature for playwrights. Contemporary texts are studied. Use of each author's dramatic techniques, the influence of the times on his drama, his themes, the demands of market driven theater and popular art considered. Simultaneously students will write an original 60-page manuscript. Students applying must have already completed plays of 60 pages or have advanced playwriting experience. Written permission required. S/NC.

**LITR 1150R. Exemplary Ancient Fictions.**

We shall discuss and examine a selection of pre-Gutenberg narratives from *Gilgamesh* and *Genesis* through Ovid and fairytales and medieval romance, with a focus on the ancient art of narrative. We shall also try our hands at exercises in the alternative fictional strategies these works suggest. Course entry based on the submission of a writing sample (and in-class writing in response to an assignment) at the first class session.

**LITR 1150S. What Moves at the Margins.**

A multi-genre seminar/workshop based on fiction, non-fiction and dramatic literature that has been banned or otherwise marginalized because it is critical, interrogative and alternative. Weekly writing exercises based on readings and discussions in class. A term project is required. For students who love literature. For admission, students may submit fiction, non-fiction or drama. Enrollment limited to 12. S/NC.

**LITR 1150T. Foreign Home.**

Project-centered workshop for exploration beyond one's "home" genre, whether in video, poetry, fiction, music, performance or visual arts. Contemporary and art-historical interdisciplinary works will ground our investigation into the tension between expertise and "beginner's mind". Collaborative and individual work expected. Instructor's permission required.

**LITR 1150U. Prose City: The Making of Spatial Texts.**

In this workshop/seminar, we will explore, through selected reading and writing exercises, some basic questions of "writing city": how is place captured, encompassed; how can the city emerge in language as a character, an event, as reflective space; how do we enter the city; how do we recognize its borders? Students will be asked to create a portfolio of texts for an imagined city, as well as to think through concepts such as "structure," "location," "encounter," and "identity" as they occur in the paragraph. Instructor's permission required.

**LITR 1150V. The Novel in Brief.**

This workshop/seminar takes the novel form on a wild ride as it investigates concepts such as compression, fragmentation, miniaturization, and sequencing in the construction of narratives. Students will be required to write their own brief novel over the course of the semester. Writing sample due at first class session. Instructor permission given after review of manuscripts. Enrollment limited to 12.

**LITR 1150W. Clown Aesthetics.**

Clown as literary structure and trope as well as character will be our focus. We will ask if this "clown aesthetic" exists, could exist, should or might continue to exist -- in fiction, performance, and film in particular. Clowning of all kinds considered from history, theory, literary and performing arts. Graduate and undergraduate students from all disciplines invited. This workshop course includes individual research as well as collaborative projects. Come to first class for permission. Enrollment limited to 12. S/NC.

**LITR 1150X. Reading, Writing and Thinking.**

We will explore various ways to engage with a work of art in order to fuel one's imagination and projects. Close textual reading of several books with writing assignments based on the readings. Writers will include Woolf, Stein, Beckett, Coetze, Kertesz and others. Writing samples due at first class session. Instructor permission given after review of manuscripts. Enrollment limited to 12. S/NC.

**LITR 1150Y. Fiction Through Poetry.**

This course is designed for poets, fiction writers, and cross-genre enthusiasts interested in looking at narrative as it occurs at the level of the sentence, even the level of the word. We will use a variety of poetic texts as well as other fractured content as means to think about fiction, and the borderlands of storytelling. Instructor permission required (bring a writing sample to the first class meeting). Enrollment limited to 12. S/NC

**LITR 1150Z. Reading for Writers.**

We will look closely and deeply and with a writer's passion and agenda to the various formal decisions used in a variety of astonishing and evocative texts with the objective of utilizing some of these strategies in weekly compositions of our own. Writers include: Aria, Berssenbrugge, Coetzee, Kertesz, Kincaid, Lispector, Mueller.

**LITR 1151B. Figures of Thought.**

What can you say about what can't be said, and what form does such a saying take? From the gnostic gospels to Agamben, Yeats to Yves Bonnefoy, we'll follow these fleeting figures of thought and their messages. We will read a variety of writings from the deep past to the present. These writings will come in a variety of forms but illuminate a path ahead of the one we daily follow. Students will keep journals that respond to the world and writing and bring these as material for discussion in class. Each one will give a presentation during the term.

**LITR 1151C. Virginia Woolf: Four Novels.**

This is a class for writers and will entail close devotional readings of the texts and weekly writing experiments based on methods, motions, patterns, rhythms, abstractions and other narrative strategies employed by the novels. We'll read the following books by Woolf: *Jacob's Room*, *Mrs Dalloway*, *To the Lighthouse*, and *Between the Acts*. S/NC required. Writing samples due at first class meeting.

**LITR 1151D. Art of Film.**

This is a course in the art of film writing, directing, editing picture and sound, and producing, be it narrative or avant-garde. Students will engage the theory and practice of the art of filmmaking via readings, viewings, writings, and making their own films. Each student will complete four films from initial conception to the final film in a collaborative environment.

**LITR 1151E. Latin American Death Trip.**

Death is the subject of many of the greatest (most moving, innovative, funny, haunting, political, oneiric) Latin American poems of the 20th century, from Gorostiza's *Death without End* to Villaurrutia's *Nostalgia for Death* to Saenz' *The Night*. What particularities of culture, gender, age, faith or experience might account for the visionary clarity of death as constant companion or permeable border, etc.? What makes the poems great? Our class will read classic Latin American books in bilingual editions (so Spanish literacy is not a requirement, but we will talk about translation issues).

**LITR 1151F. Choose Your Own Adventure.**

This game is lit. I mean this Lit is a game. How do the design elements of a novel resemble the design elements of a game? And to what extent have interactive [video] games been designed with novelistic conceits? Your adventure begins here, starting with what lies at the dark heart of the literary adventure genre (Defoe, Conrad, Behn). We'll sojourn at contemporary indie video games (*Undertale*, *Walking Dead*, *Broken Age*, *Gone Home*), along the way analyzing how "choice" is utilized to build reciprocal fictions. We will also undertake semester-long projects—creating our own "Choose Your Own Adventure"s.

**LITR 1151G. Everything Emily.**

This is a course that wallows in Emily Dickinson—one of the most important poets at the foundations of American poetry and, still today, one of our most exacting and most experimental practitioners. No one in the ensuing 150 years has surpassed her radical modes of expression, invention, and vision. We will engage with her poetry, her letters, her biography, and many of the works of criticism, visual art, film, and poetry that her work has inspired, as well as exploring the Dickinson collections in Brown's Hay Library and visiting her Amherst home.

**LITR 1151H. Discomfort.**

Comfort is overrated! This course is an invitation to leave our comfort zones and dive into texts that invite us to rethink the way we view history, the world, fiction, writing, race relations etc. We will read recommended texts and discuss them in class. Discussions will include but not be limited to the narrative techniques employed by the writers and our response to the texts, both as readers and as writers.

**LITR 1151I. Remaster + Remix.**

This workshop/seminar will use the intuition, logic and esthetics of popular music forms such as punk, house, dub step, reggae and blues to delve into the complex connections between a selection of classic novels and versions of these novels retold. What tensions get reset when writers on an empire's margin write back? What assumptions get shifted when women refocus a novel's concerns? What are the possibilities and dangers in reconstructing classics while trying to mash them up? And why are we breathless when a stylist riffs? French Antillean notions of *creolité* will offer guidance. Main guide—the books.

**LITR 1151J. Bob Marley: Lyrics and Legend.**

Bob Marley is one of the most accomplished songwriters of all time. We're going to engage with the lyrics of this postcolonial Caribbean writer; contemplate him as a subject of memoirs, biographies and documentaries; and explore him as a figure in the creative imaginations of novelists and poets such as Marlon James and Lorna Goodison. We're also going to look at reggae as an important literary esthetic. And of course listen to a lot of his music. Special attention will be paid to the albums and singles produced under the guidance of Lee "Scratch" Perry.

**LITR 1151K. Art of Assemblage: Collage, Reportage + Re-Appropriation.**

In this class we will examine works of literature that challenge and re-imagine the poetic form using re-purposed text, research, fragment and image to enter into conversation with history and contemporary culture, and illuminate the every day realities of life. We'll explore the use and effect of collage in visual work and music, and investigate how the form operates when transformed for the page through reading, class discussion, and creative writing exercises.

**LITR 1151L. World Tour: Recent Poetry in Translation.**

This is a reading, writing, translation, and discussion class. Commit to a vigorous combination of all four. Some translation theory will be reviewed, but the emphasis of the course is upon models of translations. Texts will include translations of books by Laszlo Krasznahorkai, Jean Fremon, Yoshimasu Gozo, Kim Hysoon, Anja Utler, Adonis, and others. Enrollment limited to 12. S/NC

**LITR 1151M. Cross-Fertilizations: Text-Based Performance.**

Gabrielle Civil is a conceptual and performance artists whose stated aim is to "open up space." With that in mind, the aim of this course is to open up -- and engage -- multiple spaces of language as it operates in the interstices of poetry, visual art, music, performance, shamanism, documentation, and activism. Among the texts we shall read are those by Theresa Hak Kyung Cha, Guillermo Gómez-Peña, Yoko Ono, LaTasha N. Nevada-Diggs -- through them, we shall consider how performed language can activate various forms of engagement, perception, dissemination and understanding.

**LITR 1151N. Zoologic: Wild Animals in the Surveillance State.**

This interdisciplinary course asks students to research and deeply engage with the current status of wild animals in various states of surveillance (either through conservation and preservation, or for entertainment), trafficked for the pet trade, or living essentially as "refugees" in the human world. Original critical research will result in creative and collaborative projects. Site visits to animal sanctuaries, and lectures from people working with animals in a number of disciplines will be featured. Selection will prioritize seniority and relevant experience (any discipline.)

**LITR 1151O. Ideas of Narration Before Don Quixote.**

We shall read fictional narratives (and some narrative poetry) from the first moments of preserved literature up to Don Quixote, for clues about how earlier writers thought about form and narration. Of what was narrative fashioned before "omniscience" was a relevant term? Before there was a science of psychology that could speak to the protagonists? What can we say about the diversity and unpredictability of early narrative writing, and how does that contrast with the more consistent look and feel of the nineteenth century? How can these "ancient fictions" inform an interest in narrative innovation and formal ingenuity today?

**LITR 1151P. Documentary Poetics.**

This course will explore 20th and 21st century documentary poetic texts to provide points of discussion and inspiration for our own investigative poetry. We'll look at a range of works, from those confronting the legal record to those creating their own record of the infraordinary quotidian (Perec's term), and discuss the various aesthetic, ethical, social, and procedural questions raised. Participants will be asked to develop and create their own final documentary poetry projects. Readings will include works by Reznikoff, Niedecker, Williams, M. NourbeSe Philip, C.D. Wright, Bernadette Mayer, Cole Swensen, Raúl Zurita, Anne Carson, Cristina Rivera-Garza, and many others.

**LITR 1151Q. Great Adventure.**

This hybrid seminar/prose workshop will take you to Antarctica, Japan, France, Cambodia, outer space—and to other places too. But much of your writing will be about yourself. Your cross-genre wandering through novels, essays, and indefinable hybrid works by a fascinating list of thinkers and stylists, will lead to questions about your own sense of place, belonging, contextual otherness, and the pleasures, powers and implications of your gaze. You'll search for answers through the medium of your own creative work—lyric essays, fictional vignettes, pictures.

**LITR 1151R. Ecstatic Alphabets: Poetry by Other Means.**

How to do things with words? How to do words with things? The latter is a question whose answers might prove as—if not more—compelling than its familiar inverse. Both are at the core of this course focusing on interdisciplinary works for which notions intrinsic to poetry serve as either springboard or endpoint. We will study contemporary examples as well as historical antecedents, and will experiment with producing genre-defying works that animate the written word. Among the strategies we will cover are verbivocovisual works, cut-ups and collage, sound poetry and concrete poetry, happenings, agitprop, poets theater, and dance.

**LITR 1151S. Fan\_Fic.**

Fan fiction is a thing, right? And, let's be honest, we all secretly love this kinda thing! O, to relive those Microsoft '95 nights spent reading semi-romantic Legend of Zelda fan fiction... What compels us to reinvent the stories we're already attached to? The texts we might consider fan fiction exist on a spectrum somewhere between high literary and kitsch, between Milton and My Immortal. If not a proper genre, let's imagine that fan fiction is a particular (perhaps ancient) practice of literary mimesis. The question is whether it's possible to create a wholly original derivative.

**LITR 1151T. Poetry for Healing Territories.**

The texts we'll be reading in this seminar/workshop address the will to heal and recuperate after loss. These are poets with courage enough to reclaim lost territory—and from their reclamations, we too are given permission to claim that which we've lost, that which has been taken, and that which is constantly pursued and harassed in us. How are these poets able to write through dissolution in a way that substantiates healing? What is gained in every/any instance of loss?

**LITR 1151U. Literatura Puertorriqueña: Cruce-Ficciones y Contra-Poemas.**

The purpose of this course is to analyze the myriad ways Puerto Rico and the United States have influenced each other through literature, music, and art. In 1898, the island was ceded to the U.S. by Spain following the Spanish American war. Since then, an ongoing exchange (often one-sided) regarding the political status of the island and its people has informed a wealth of literary materials, musical hybridity, and radically avant-garde arts.

**LITR 1151V. Black Box Poetics.**

We live in an age when most of the language we read and write runs through proprietary digital systems we do not understand. Accordingly, this course approaches poetry in terms of code[s], data collection, overflow, opacity, and one-way mirrors. We will consider ununderstandability itself as an aesthetic property, discuss compositional strategies of selective clarity and obscurity, and use poetics to probe the unknowable. We will look closely at source code, but our purposes will be more conceptual than technical. No coding experience is required.

**LITR 1151W. The Restless Desk: Hybrid Writing, Performance, Collaboration.**

Immersion in a range of writing possibilities linked to performance and collaboration. Assigned readings will explore multiple genres, theory, and engage writing prompts that are "experiments of attention", working with voice, instrumentation, movement, visuals, improvisation. We will invoke "documentary poetics" as a method that engages inquiry and research and consider historical and contemporary literary performance practices. Students will design semester-long creative projects out of these multiple trajectories. Several guest musicians, performers, writers will be visiting. We will have use of the University's recording studio and prepare a final class performance.

**LITR 1151X. Interdisciplinary Arts Workshop: Translation of Concept.**

Art-making is an act of translation – a thought, process, question, object, declaration, desire, system, or intention is filtered through the artist and subsequently finds new existence in the form of art. This project-centered workshop is a cross-genre exploration of that filter, where participants working in differing genres will be asked to engage a wide range of materials to "translate" into their art-making process. Please be prepared to write, dance, sing, mix, draw, ask, reach, and fail, in and out of your comfort zone. Individual and collaborative work expected. For writers, dancers, architects, musicians, painters, digital artists, "non-artists." Written permission required.

**LITR 1151Y. Against Genre.**

An experimental workshop in creative writing hybridized with other forms—not only literary work that does not adhere to traditional genres, like prose-poetry, but writing that includes video, or music, or collage, and which includes practices like appropriation and non-traditional distribution. Including weekly reading assignments (Kenneth Goldsmith, Paul Metcalf, W. G. Sebald, Robert Smithson, Vito Acconci, the Surrealists, Public Enemy/The Bomb Squad, Shelley Jackson, Thalia Field, etc.), weekly writing prompts, one oral presentation.

**LITR 1151Z. Paysagisme and the Art of Eco-Responsibility.**

Though the French word paysagisme is usually translated as "landscaping," "landscape design," or "landscape architecture," the field also incorporates many land-based issues, including urban planning, public space use, sustainable agriculture, land reclamation, botany, ecology; also, it has provided a pronounced aesthetic element in garden and park design, and overlaps with late 20th-century and contemporary art movement known as land art. This course seeks to make this alternative way of viewing the environment available to students at Brown, emphasizing the way that paysagisme and its inclusive gesture of bringing art, aesthetics, and land use together, fosters new modes of ecological responsibility. This intensive half-credit course begins half-way through the semester, starting on October 25. Students MUST register by the deadline for adding a class; the course still operates within the academic calendar and students will not be able to attend class prior to registering for the course. Contact the instructor with any questions.

**LITR 1152A. Survey of the Historic Avant-Garde.**

The avant-garde is a famously slippery category; the definition we'll be working from, more or less, is the series of movements and individuals from 1900 to 1940, based mostly in Europe, that led culture and the arts in directions that talked back to power, pushed aesthetic limits outward, and explored ways to give the arts social and political weight. While largely focused on writers, we'll also spend a lot of time with visual artists and other media and will address questions such the line between Modernism and the Avant-Garde and the roles of women in these movements.

**LITR 1152B. Ekphrasis in Action.**

Ekphrasis, according to its most basic definition, is simply poetry that addresses art; we'll be stretching that definition, making it into a way of interacting with art and even into a way of looking at things in the world that makes them into art. We'll be visiting art in action, from painting studios to dance rehearsals to a natural history museum, using these visits as premises for writing that we will then share in a workshop format, giving copious feedback. The whole will be supported by readings of theoretical and creative works that address ekphrasis.

**LITR 1152C. Writers-in-the-Community Training & Residencies.**

This course will operate mostly "in the field." We will spend some weeks discussing pedagogical approaches to teaching creative writing in community settings. We will thereafter train in residence, observing a poetry residency at a local elementary school, with visits to other community settings as well (sites to be determined). We will continue to discuss pedagogy, classroom practices and management, administrator-writer relations, and all other necessary logistical planning throughout the semester. By week 7, students will engage in their own writing residencies in pairs or small teams, working in a community setting of their choosing (K-12 school, shelter, library, etc.).

**LITR 1152E. Between the Seams: Hybrid Works.**

Michael Ondaatje's *The Collected Works Of Billy The Kid* is part novel, poetry sequence, and visual collage; Anne Carson's *Autobiography of Red* is novel and poem. If, as Georges Bataille has put it, literature is a series of dislocations rather than a continuum, these "hybrid" works and others mark important breaks in the literary status quo. We will take inspiration from writing in which structures rub up against each other. Using poetry and prose, we'll seek intuitive logics in juxtaposition of text and image, and look at writers using hybrid forms as models for documenting ways of knowing and unknowing.

**LITR 1152F. The Shape of Longing.**

What are some of the formal shapes longing takes in poetry and fiction, film and music? Through a devotional experience with great works of art, creative pieces will be generated by the students and shared in class. Texts shall include Wagner, Sappho, Tagore, Rumi, St John of the Cross, Desnos, Kawabata, Woolf, Frisch, Valentine, Howe, Pessoa, Vuong, Angelopoulos, Weerasethakul, Kieslowski, Chacon, Jenkins, Coltrane and West.

**LITR 1152G. Rebuilding the Book.**

In the face of digital and other emergent technologies, where is the book today—what are its limits? Conversely, what is its essence? We'll blend the history of the book and its relationship to the visual arts with the creation of inventive book structures. Slide lectures and discussions will cover the emergence of writing and its gradual incorporation into book structures from tablet through scroll to codex, focusing on the development of the relationship between text and image, with a focus on late 19th century *livre d'artiste*, the "democratic multiple" (1960s); and two contemporary developments: the sculptural book and the altered book.

**LITR 1152H. Writing from the Archives/In the Subjunctive Mood.**

Memory, history, and trace haunt the present, perception, and the cultural contexts in which we live. When we turn to the archival record, we note its focus on the powerful, and its critical exclusion of Black, Brown, Indigenous, and LGBTQ people, people with disabilities, and "wild" women.

A growing number of writers employ new means to open the lens to render the present more clearly through counter-narrative, critical fabulation, and reparative technique.

We will read and write in this vein toward a new poetics of archive and study methods that give attention to the "unrecorded" incident, emotion, image, and music.

**LITR 1152I. Poets' Tour of the Essay.**

In this advanced workshop seminar, we will read essays that draw us into the question of art and evidence, surveying prose forms that fall across the spectrum. A sub-genre of nonfiction with the ability to shapeshift across forms, essays' elastic, bridging and blurring qualities span memoir, epistle, catalog, argument, observation, travelogue and more. We will read essays written in the past that demonstrate as much ingenuity as the post-modern, and contemporary essays that straddle genre. We will discuss the "poetics" of the essay as we look for innovation within the form to examine what new insight is gained through experiment. Interested students should bring a literary writing sample to the first class meeting. The instructor will announce at the first class the date/time that a class list and waitlist will be posted (typically a few days after the first class meeting).

**LITR 1152J. Hybrid Writing Workshop: The Long Engagement.**

In this course we will explore the tradition and possibilities of open-form hybrid writing via extended engagement with other works of literature and artworks, as well as with the writing practice itself. We will read a range of writers' such engagements and class time will largely be devoted to reading discussion, workshop, and occasional in-class writing exercises. In weekly writing assignments we will work across genres, with chance procedures and exploratory modes designed to extend, deepen and complicate our writing practices. Students' final project will be a long engagement with the work of another writer of their choosing.

**LITR 1200. Writers on Writing.**

Offers students an introduction to the study of literature (including works from more than one genre) with special attention given to a writer's way of reading. This course will include visits to the course by contemporary writers, who will read to the class and talk about their work. Enrollment is limited to 30 students.

**LITR 1220A. History and Practice of English Versification.**

An opportunity to study through reading and imitating poems that represent a variety of poetic eras and traditions. S/NC.

**LITR 1220B. Samuel Beckett.**

This course will mark the centenary of the author by reading and discussing a range of works from Samuel Beckett's substantial output of fiction, poetry, drama and translation.

**LITR 1220C. The Cantos in their Environment.**

A reading of Pound's *Cantos*, with attention to their origin and developments, their background and their influence.

**LITR 1220D. The Bible as Literary Source.**

A survey of the English Bible and its presence in English and American literature. Students will learn to notice and account for Biblical echoes in a wide variety of writings from several cultures.

**LITR 1220E. Dada and Surrealism.**

Two of the most famous modernist movements, studied through their writings, their visual arts, their performances, and their manifestoes; their origins and influence; their place in history. S/NC.

**LITR 1220F. Restoration Drama.**

A survey of English drama and theatrical practice from the reopening of the theaters at the Restoration to the early eighteenth century. Works of the major playwrights, including Dryden, Congreve, Wycherly, Gay. S/NC.

**LITR 1220G. The Waste Land and After.**

We shall examine Eliot's poem, and then deal with early poems by W.H. Auden and the work of Charles Williams and David Jones. S/NC

**LITR 1220H. Gertrude Stein and What Comes After (ENGL 1711M).**

Interested students must register for ENGL 1711M.

**LITR 1220I. Zoopoetics (ENGL 1900J).**

Interested students must register for ENGL 1900J.

**LITR 1230C. Poetry Newly in Translation in English.**

This is a reading, writing, translation, and discussion class. Commit to a vigorous combination of all four. Some translation theory will be reviewed, but the emphasis of the course is upon models of translations. Texts will include works by Iva Blatny, Inger Christensen, Luljeta Lleshanaku, David Huerta, Takashi Hiraide; new translations of Rimbaud and Baudelaire and others. Enrollment limited to 20. S/NC

**LITR 1230D. Poetry, Mind, World.**

How does the poetic mind negotiate between an account of itself and an account of the world? How have poets used landscape as a model of mind, as an erotics, as elegy? Merleau-Ponty, Hardy, Houle, Alexander, Dewdney, Hass, D'Aquino, Audubon and others. Presentation, several short essays, a poem, and one final essay.

**LITR 1230E. Form and Theory of Fiction.**

"Form and Theory of Fiction" offers an exploration of narrative theories directed particularly at creative writers, in conjunction with a hands-on examination of contemporary fictional narrative practices. Theoretical readings include historical essays on fiction and work by Gaston Bachelard, Mieke Bal, Gilles Deleuze, and others. Enrollment limited to 20.

**LITR 1230F. Writing, Reading City.**

In this course, we will explore correlations, points of convergence, and possible mimesis between city and text. Students will be expected to keep a weekly journal, to have a city in question, and to write both imaginatively and critically in response to readings and class discussion.

**LITR 1230G. Master Poets of Apartheid Streets: Sterling Brown, Robert Hayden, Margaret Walker, Gwendolyn Brooks.**

With the theme of "Slavery and Justice" in recent Brown University review, [4] "Master Poets of Apartheid Streets: Perpetual Resistance against de jure and de facto Segregation" is the formal and precise embouchure as Critical Realism which legislates as antidote to pernicious social, economic and educational racism: the aesthetic stance of this seminar is "An Integer Is a Whole Number." Through close attention to the conventions of poetry as praxis by these four master poets, in social context, the modality of this study is poetic discourse (what Frederick Douglass called "a sacred effort" in Douglass' description of President A. Lincoln's 'Second Inaugural.' Peripheral insights will be provided by Brown University researchers of the past: Charles H. Nichols, Winthrop Jordan, Richard Slotkin, in their three dissertations, and James R. Patterson's most recent book on "Brown v. Board of Education." Written permission required. Enrollment limited to 20. S/NC.

**LITR 1230H. Being in Time.**

In this discussion-based course, we will examine the many roles time plays in the building of narratives as well as its impact on contemporary concepts of self. We will use both literary and philosophical texts to explore the spaces between time and perception, time and memory, time and experience, and time and grammar. Written permission required.

**LITR 1230I. The Documentary Vision in New Literature of the Americas.**

A study of genre-defiant works, lyric treatments, atypical narratives, film poems, etc., including works by Anne Carson, Elena Poniatowska, W.S. Merwin, Maggie Nelson, Raoul Zurita and others. Enrollment limited to 20.

**LITR 1230J. Writing: Material Differences.**

An exploration of practices that make a material difference to writing, that may change what writing is in specific cultural circumstance and locations. We will look for such differences through transcultural and translingual experiments with writing, beginning "West" and moving "East." We will engage with a selection of widely divergent writers and genres, with emphases on poetics - particularly a translated rendition of Chinese poetics (such as was taken up by Pound and became influential in English literature) - and on theories that we can use for our practice, from: Fenollosa, Foucault, Derrida, and others. Enrollment limited to 20.

**LITR 1230K. Latin American Death Trip.**

Death is the subject of many of the greatest (most moving, innovative, funny, haunting, political, oneiric) Latin American poems of the 20th century, from Gorostiza's *Death without End* to Villaurrutia's *Nostalgia for Death* to Saenz' *The Night*. What is up with Latin Americans and death? What particularities of culture, gender, age, faith or experience might account for the visionary clarity of death as constant companion or permeable border, etc.? What makes the poems great? We shall read classic Latin American books in bilingual editions (so Spanish literacy is not a requirement, but we'll talk about translation issues). Students will be expected to participate in literary discussions, to write essays and a death poem. Enrollment limited to 20.

**LITR 1230L. Eros: Hot and Sour.**

Literature, early and late, distant and near, at the intersection of love and loathing. A seminar on selected texts deriving their blood from poetry, their flesh from fiction, their anatomy from form and theory. Including works by Rikki Ducornet, Anne Carson, Roland Barthes, Helen Cixous, Gertrude Stein, Catullus, Henry Miller, et al. Enrollment limited to 20.

**LITR 1230M. Poetry and Ethics (COLT 1812J).**

Interested students must register for COLT 1812J.

**LITR 1230N. Robert Coover -- Foremost Storyteller.**

We shall examine the works of contemporary American fiction writer, Robert Coover. During his long, celebrated career, Coover has imaginatively responded to writers and forms that have come before him. We'll investigate how Coover appropriates earlier traditions and think about how he simultaneously preserves and subverts literary traditions. We shall consider such concepts as myth, religion, and history, and determine how Coover applies these. We'll focus on authorial strategies and themes explored. Furthermore, we'll define literary terminology as a tools for textual and critical analysis. Finally, through this experience you can develop or refine the capacity for self-expression and communication. Enrollment limited to 20.

**LITR 1230O. Suppression and Invention in Modern Persian Literature.**

This course begins with symbolic elements from classical mystic Persian literature and journeys into pre- and post-revolution Persian short fiction and poetry. We shall analyze creative responses to restricted expression, study efforts to modernize in a variety of genres, and finish with the rise of the woman writer in Iran. Enrollment limited to 20.

**LITR 1230P. The New Wave in Iranian Cinema.**

We shall explore this movement that produced remarkable award-winning films in Iran. Applying author (auteur) theory, we will study new Iranian movies, analyzing "signs and meaning" in their cinematic language, also investigating effects of Iranian culture on this new artistic wave. Enrollment limited to 20. S/NC

**LITR 1230Q. London Consequences.**

This course focuses upon a selection of British prose from the 1960s and 1970s, and gives particular attention to post-war literary history in Britain, autobiographical fiction and the legacy of neo-modernism. We'll consider the work of, among others, Anna Kavan, J.G. Ballard, Nicholas Mosley, Muriel Spark, Christine Brooke-Rose, Stefan Themerson, Ann Quin and B.S. Johnson, along with (if available) *London Consequences*, a collaborative novel co-edited by Johnson.

**LITR 1230T. The Origins of the Detective Story.**

This class will explore the development of the Detective genre, focusing on its roots in the 19th century and considering more broadly how genres develop and change. Readings include E.T.A. Hoffmann's "Mademoiselle de Scudery", Edgar Allan Poe's Auguste Dupin stories, Wilkie Collins, Arthur Conan Doyle, Martin Hewett, and selections from *Detection by Gaslight* and *The Penguin Book of Gaslight Crime*. We will also look at theoretical texts, including Franco Moretti's "Clues". This course fulfills Literary Arts' pre-20th century literature requirement. Enrollment limited to 20.

**LITR 1230U. Samuel Beckett.**

This course will examine the works of Samuel Beckett--novels, plays and stories--from the beginning of his career to his death. We will read the majority of Beckett's work, with a major focus on his novel trilogy (*Molloy*, *Malone Dies*, and *The Unnamable*) and on the other work Beckett published between 1948 and 1961 (especially *Endgame* and *How It Is*).

**LITR 1230V. Why Don't We Fall in Love?**

We focus here on intersections of the erotic and poetry. How do we fall in love? Why? We will explore joy and happiness, love and lust, devotion and seduction. We will also, unfortunately, explore longing, heartbreak, jealousy, unrequited love. We will explore, through literature and film, the ageless enigma that prompted Ruth Stone to proclaim, "there is no choice among the voices / of love..."

**LITR 1230W. Spectroscopy: [Identifying] Black Bodies in Narrative.**

We shall focus on character development and narrative structure through the formation and presence of textual and cinematic black bodies. Our discussions will focus on the identification of that which is not allowed to speak -- the prototypical foil (Caliban), the other (Man Friday), the black body (Jim). How are narratives (how are we) shaped by that which cannot be acknowledged?

**LITR 1230X. The New Long Poem.**

An energetic study of powerful, book-length poems recently published in English, including texts as core to 20th c. literature as Juan Rufo's *Pedro Paramo* to books as archly exacting as John Ashbery's *Flow Chart*, as affably innovative as Lyn Hejinian's *My Life*, as ingeniously formal as Inger Christiansen's *alphabet* and as unruly as Frank Stanford's *The Battlefield Where the Moon Says I Love You*. Also: Bernadette Mayer's *Midwinter Day*, Evan S. Connell's *Notes Found in a Bottle on a Beach at Carmel*, W.S. Merwin's *The Folding Cliffs*, and the intra-genre Cecilia Vicuna's *Spit Temple*.

**LITR 1230Y. Structuring (and De-Structuring) Novels: Special Topics Literature Seminar.**

How to structure a novel? This is a question most novelists approach with dread, because, a) all the good plots and structures have been used up; b) plots can feel annoying anyway, like a capitulation to cinema or theater; and c) nevertheless, it is impossible to write in total darkness. We'll dispel this darkness by reading works by a range of novelists. How do these authors strike a balance between complex thought and elegant/unusual structure? And how can we, as writers, maintain narrative coherence over the course of hundreds of pages?

**LITR 1230Z. Syncretic Gods.**

Is it possible to kill a God? What happens within a generation to change the face of a God? To change the nature of a God itself? In this course we will research the various transformations of the myths of Yoruba deities as they too traverse middle passage in the suffocating holds of merchant ships. We will commit to the (subversive) task of imagining and re-imagining the myths of the Orishas. Using as a foundation the seventeen drawings in Cuban artist Alberto del Pozo's *Orichas* series, we will cover the storied lives of these our immortal and syncretic Gods.

**LITR 1231A. Time Mechanics: Poetry as Translation.**

This seminar focuses on experimental translations and transcreations in the spirit of Spicer's claim in *After Lorca*: "A poet is a time mechanic not an embalmer." Various approaches to leading a text across the time and space divide will be studied. If for Pound to "make new" is to look elsewhere, for Zukofsky it's to listen closely. If Hawkey's *Ventrakl* posits the poem's decomposition over time, Bang gives us a current, self-obliterating version of Dante's hell. And while Hsia Yü's poems stage the clash of analogue and digital transmission technologies, Brandon Brown offers contemporary readers *Fleur du mal* version 2.0.

**LITR 1231B. The Enchantment of Re-Imagining.**

The author, Sam Leith, likened the recent Jane Austen project (in which six authors are tasked with rewriting Jane Austen for a modern audience) to "writing fiction as literary criticism." In this course, we are invited to think more speculatively about the role of re-imagining in literature and society by reading texts which do not only re-imagine the past by reframing history but which also re-imagine life and the present to offer us an alternate view. In some cases, these texts re-write existing classics. We will engage closely with the texts and relevant works of criticism.

**LITR 1231C. Experimental Poets of Color.**

In this course we'll read and critically engage with contemporary experimental poets of color writing in English in the US and Canada. Exploring the intersection of poetics, aesthetics, critical race (and mixed race) theory, and social justice activism in the arts, we will question the modernist and post-modernist assumptions that experimentation and innovation are exclusively the domain of whiteness. We will explore how racism, colonialism, and other contemporary systems of oppression condition responses to poets of color, and consider how poets of color respond to and engage with these systems both overtly and through their aesthetic experimentation.

**LITR 1231D. Narrative Possession: spirits, shamans and the walking dead.**

*Narrative Possession* offers a creative and critical investigation of the nature of possession as it manifests in film, fiction, and theory, exploring narrative depictions of possession across a wide range of international cultural practices including shamanism, voodoo, Spiritualism and séance. We will explore the theoretical and political ramifications of possession as it pertains to embodiment, sovereignty, private property and personal identity. Texts include works by Toni Morrison, Muriel Spark, Antoine Volodine, Zora Neal Hurston, Lafcadio Hearn, Ishmael Reed, Cesar Aira, Kobo Abe, Derrida, Sartre, and De Certeau. Films include works by Cocteau, Camus, Tourneur, and Russell.

**LITR 1231E. Rereading Writing.**

We will study writing and, more generally, language art in terms of reading, both reexamining theories and practices of writing — in linguistics, the philosophy of language, and in the actual making of literature — and also by proposing that reading is constitutive of language regardless of its medium. What is reading, historically, theoretically, and in the digitally mediated future of culture? If reading brings language into being, then how should we read and what should we compose to be read? Readings from Saussure and Ong to Hayles, Derrida, and beyond. Optional critical-creative project.

**LITR 1231F. Listening/Voicing.**

"How you sound??" the poet Amiri Baraka once asked. This seminar is concerned with acts of communication as pertains to voicing and listening. How do poets sound out in the world, and to whom? We will explore notions of voice as more than a site of identity production, looking at, for example, the various fractures possible in Sappho's "voice" and what is carried to us through history, while also considering forms of singular and collective sounding via a range of poets and writers. On the other side of voice, we'll read into and experiment with acts of deep listening.

**LITR 1231G. Traditions of Rupture: the Latin American Avant-Garde.**

We will read and write creative responses to poetry and hybrid works by the generation of early 20th-century Latin American writers who shaped a distinct corpus owing as much to the European tradition as to the region's postcolonial history and vernacular: Huidobro, Vallejo, Neruda, Borges, and Guillén, and the Brazilian Modernists. We will also study postwar innovators—Berenguer, di Giorgio, Paz, Pizarnik, Parra, and the Brazilian Concrete Poets—as well as contemporary writers' contributions to the expansion of the field. Special focus will be devoted to translation matters, indigenous writing, and eco-poetics. Knowledge of Spanish and/or Portuguese is not necessary.

**LITR 1231H. New York City 1965-2001.**

NYC's a city constantly in crisis. It's a city in protest, turning over its own history, its fatal oversights. A place where missteps made in the blink of an eye might mean death—or sliding into the dark groove between princes(ses) and peasants. We're looking for NYC's story from 1965 to 2001. Why these years as bookends? Why this city made of boroughs held together by a sticky substance of uncertain origin we might call pride or ideology...? More importantly, what does it take to write historical fiction? To write about the places most important to us?

**LITR 1231I. The Sacred & Profane: Dante, Milton, Rushdie.**

We will explore a variety of sacred texts in the Abrahamic tradition to better understand the major works of four radical makers (in chronological order): Dante Alighieri, John Milton, Charles Mingus, and Salman Rushdie. We will read supplementary texts by Durkheim, Eliade Mircea, Simone Weil, Carl Jung, and Edward Said.

**LITR 1231J. Histories.**

Historical figures like Herodotus, Hannibal, Billy the Kid and Calamity Jane have all served as energy nodes around which writers have built significant works of prose. In this seminar we will examine texts like Michael Ondaatje's *Coming Through Slaughter*, Toni Morrison's *Beloved* and W.G. Sebald's *The Emigrants* as part of an exploration of that prose which, if we can kick awake that poor overworked pearl, posits the historical as its grain of sand. Students can expect a substantial weekly reading load of primary and secondary source material and should come to each class prepared to discuss the assigned texts.

**LITR 1300. Independent Study in Reading, Research, and Writing About Literature.**

Provides advanced students with an opportunity to pursue tutorial instruction oriented toward a literary research topic.

**LITR 1310. Independent Study in Creative Writing.**

Offers tutorial instruction oriented toward some significant work in progress by the student. Typically taken by honors or capstone candidates in the antepenultimate or penultimate semester. See instructor to seek permission during the semester before undertaking the course of study. One advanced-level workshop is prerequisite. S/NC.

**LITR 1410A. Fiction Honors.**

A workshop setting for the completion of theses by advanced writers of fiction. See general course description above for course entry procedures for all honors workshops. Instructor permission required. Enrollment limited to 12 senior Literary Arts concentrators. S/NC.

**LITR 1410C. Playwriting Honors.**

A workshop setting for the completion of theses or capstone projects by advanced writers of dramatic literature. See general course description above for course entry procedures for all honors/capstone workshops. Written permission required. S/NC.

**LITR 1510. Honors Independent Study in Creative Writing.**

Provides tutorial instruction for students completing their theses or capstone projects. Typically taken by honors or capstone candidates in their final semester. See instructor to seek permission during the semester before undertaking the course of study. S/NC.

**LITR 2010A. Graduate Fiction.**

Advanced practice of the art: a writing seminar, limited to graduate students in Literary Arts. Emphasis is placed on developing a better understanding of the creative process, strategies and forms. Written permission required. S/NC.

**LITR 2010B. Graduate Poetry.**

Advanced practice of the art: a writing seminar, limited to graduate students in Literary Arts. Emphasis is placed on developing a better understanding of the creative process, strategies and forms. Written permission required. S/NC.

**LITR 2010C. Graduate Playwriting.**

Advanced practice of the art: a writing seminar, limited to graduate students in Literary Arts. Emphasis is placed on developing a better understanding of the creative process, strategies and forms. Written permission required. S/NC.

**LITR 2110A. Theatrical Styles on Stage and Page.**

An investigation of theatrical forms and for collaborations among actors, directors and playwrights. This course is limited to participants in the MFA programs in acting, directing and playwriting. Instructor permission required. S/NC.

**LITR 2110C. Reading, Writing and Thinking.**

A course for graduate prose writers. We will explore various ways to engage with a work of art in order to fuel one's imagination and projects. Close textual reading of several books with writing assignments based on the readings. Writers will include Woolf, Stein, Beckett, Coetzee, Kertesz and others. Written permission required. S/NC.

**LITR 2110E. The Foreign Home: Interdisciplinary Arts.**

Project-centered workshop for exploration beyond one's "home" genre, whether in video, poetry, fiction, music, performance or visual arts. Contemporary and art-historical interdisciplinary works will ground our investigation into the tension between expertise and "beginner's mind". Collaborative and individual work expected. Written permission required. S/NC.

**LITR 2110F. Essays Without Borders.**

A workshop for writing, performing, or media artists exploring essay or non-fiction forms in any genre. No project too strange, no essay too fanciful. Readings and research into experimental non-fiction. Individual and group work as well as critical and artistic projects. Literary Arts MFAs will be given priority. Come to first meeting for permission. Enrollment limited to 12. Permission required. S/NC.

**LITR 2110G. Writing The Novel.**

For advanced fiction writers who wish to work in long form. Through this course, participants will read a selection of novels and investigate the form; the primary emphasis will be placed on the work being undertaken by the members of the workshop itself. S/NC.

**LITR 2110H. Embodying the Book.**

What are the limits of the book? How far can it go? Alternatively, what is its essence? What is absolutely essential to it? This collaborative class brings writers together with RISD industrial designers and graphics artists to consider these questions and to create inventive book structures. Focus will be on collaboration itself, with texts addressing various aspects, such as the ethics of cooperation and group dynamics, as well as on the history and nature of the book as a cultural tool and force. Working in teams of three, students will invent their own structures and work together to embody them.

**LITR 2110K. Deep Rivers, Lost Roads, Bent Symbols: Poets and Poetry Outside the Frame.**

Geographically and/or aesthetically suspect, often shelved under the wrong rubric. Word-works by hermits and wanderers, sots and sot nots, whose language confirm, as Sister Rosetta Tharpe sang: *Strange Things Happening Every Day*. Including work by Besmair Brigham, Wong May, Bernadette Mayer, Mary Ruefle, Frank Stanford, David Fisher, a new translation of Beowulf (by an American! A Woman!), and others. Their may also be music.

**LITR 2110M. Challenging the Single Story: Reading Africa.**

In recent years, there has been an explosion of new writing from Africa on the international scene, even as the single narrative of the continent persists. In this course, we will engage with fiction published in the last 15 years as well as critical texts and essays. Students will read fiction written in different genres. We will examine, among other things, how these writers negotiate their themes without compromising the integrity of their craft with a view to excelling in our own writing.

**LITR 2110O. Dialogue, Monologue, & Dialect.**

This hybrid workshop/seminar for graduate students will use works of fiction, cinema, theater, and narrative poetry as beginning points for experiments and discussions centered on a wide range of concepts and practices designed to widen how they hear and see the possibilities of voice and body language in their work. Special attention will be paid to regional and international, especially hybrid, forms of English.

**LITR 2110P. World of Echoes: The Poet as Translator.**

How is a poet's translation different from other translations? What factors determine a poet's choice to translate a specific author? For this seminar we will read innovative poetry recently translated by a diverse group of poets. Examples include Jennifer Scapettone's rendering of Amelia Rosselli's *Locomotrix*, Sawako Nakayasu's translations of Chika Sagawa, and Daniel Borzutzky's version of Raúl Zurita's *The Book of Planks*. Besides the translated materials, we will consider their relationship to the translator/poets' own works and the politics of cultural transmission. Students may engage in translation projects themselves or respond creatively to the materials, thereby also engaging in translation.

**LITR 2210A. House Language.**

We shall explore the house and its adjacent places and categories, with a focus upon narrative mannerism, terror and the grotesque, and the creation of literary form. We'll discuss stories, essays, household artifacts and etiquette, architectural plans and dangerous parlor games. Works by, among others: Georges Perec, H.G. Wells, Shirley Jackson, Isabella Beeton, Alain Robbe-Grillet, Frank Lloyd Wright, Rube Goldberg and Edith Wharton.

**LITR 2230. Graduate Independent Study in Reading, Research, and Writing About Literature.**

Provides graduate students with an opportunity to pursue tutorial instruction oriented toward a literary research topic.

**LITR 2310. Graduate Independent Studies in Literary Writing.**

Offers tutorial instruction oriented toward some significant work in progress by the graduate student. S/NC.

**LITR 2410. Graduate Thesis Independent Study in Literary Writing.**

Provides tutorial instruction for graduate students completing their graduate creative theses. Typically taken in the final semester. See instructor to seek permission during the semester before undertaking the course of study. S/NC.

**LITR 2450. Exchange Scholar Program.****LITR 2600. Seminar in Teaching Creative Writing.**

A course focused on how to design and lead a creative writing workshop. Reading, writing and laboratory workshop sessions. Designed for first-year Literary Arts graduate students. S/NC.

**LITR 2700. Pedagogy Seminar.**

The Pedagogy Seminar examines ideas about teaching in a literary arts/creative writing environment. The pros and cons of the "workshop"-style will be discussed alongside alternative models, and general topics of exploration will include: creative process pedagogy, writing-to-learn, multi-genre approaches, uses of readings/research, and general classroom management. Designing an inclusive classroom and syllabus as well as exploring generative and innovative practices will be covered as well. A special emphasis will be on preparing students to feel confident and to explore a range of creative process issues. Personal writing as well as syllabus design will be expected.

## Mathematics

### Chair

Jeffrey Hoffstein

The Mathematics Department at Brown balances a lively interest in students and teaching with a distinguished research reputation. Our several strong research groups, Analysis, Algebraic Geometry, Geometry and Topology, and Number Theory, all have active weekly seminars that draw speakers ranging from the local to the international. We support 40 to 50 graduate students in a Ph.D. program whose graduates populate top mathematics departments and prominent positions in industry. Our joint graduate courses and seminars with the adjacent Division of Applied Mathematics add to the breadth of offerings available to our graduate students. The undergraduate program in mathematics at Brown is designed to prepare students for careers in the mathematical sciences and other careers requiring strong analytical skills, while engaging more ambitious students in creative projects that can culminate in a senior thesis.

For additional information, please visit the department's website: <http://www.math.brown.edu/>

## Mathematics Concentration Requirements

Mathematics is a grouping of sciences, including geometry, algebra, and calculus, that study quantity, structure, space, and change. Mathematics concentrators at Brown can explore these concepts through the department's broad course offerings and flexible concentration requirements. The concentration leads to either the Bachelor of Arts or Bachelor of Science degree (the latter is strongly recommended for students interested in pursuing graduate study in mathematics or related fields). Concentrators begin their learning with multivariable calculus,

linear algebra, and abstract algebra. Beyond these prerequisites, students take a variety of advanced topics on the 1000 and 2000 level based on their interests. Students also have the option of completing a thesis project.

Concentrators in mathematics should complete the prerequisites by the end of their sophomore year. It is strongly recommended that students take MATH 1010 before taking MATH 1130.

## Standard program for the A.B. degree

**Prerequisites:**

Multivariable calculus and linear algebra (choose one of the following sequences):	2
--	---

MATH 0180 & MATH 0520	Intermediate Calculus and Linear Algebra
-----------------------	--

MATH 0180 & MATH 0540	Intermediate Calculus and Honors Linear Algebra
-----------------------	---

MATH 0200 & MATH 0520	Intermediate Calculus (Physics/Engineering) and Linear Algebra
-----------------------	--

MATH 0350 & MATH 0540	Honors Calculus and Honors Linear Algebra
-----------------------	---

Or the equivalent

**Program:**

MATH 1530	Abstract Algebra	1
-----------	------------------	---

Five other 1000- or 2000-level Mathematics courses . The year-long sequence 0750/0760 may be substituted for one of these course credits.	5
---	---

Total Credits	8
---------------	---

## Standard program for the Sc.B. degree

**Prerequisites:**

Multivariate calculus and linear algebra (choose one of the following sequences):	2
---	---

MATH 0180 & MATH 0520	Intermediate Calculus and Linear Algebra
-----------------------	--

MATH 0180 & MATH 0540	Intermediate Calculus and Honors Linear Algebra
-----------------------	---

MATH 0200 & MATH 0520	Intermediate Calculus (Physics/Engineering) and Linear Algebra
-----------------------	--

MATH 0350 & MATH 0540	Honors Calculus and Honors Linear Algebra
-----------------------	---

Or the equivalent

**Program:**

MATH 1130 & MATH 1140	Functions of Several Variables and Functions Of Several Variables	2
-----------------------	---	---

MATH 1530	Abstract Algebra	1
-----------	------------------	---

MATH 1540 or MATH 1560	Topics in Abstract Algebra Number Theory	1
------------------------	--	---

Four other 1000- or 2000- level Mathematics courses. The year-long sequence 0750/0760 may be substituted for one of these course credits.	4
---	---

Four additional courses in mathematics, science, economics, or applied mathematics approved by the concentration advisor.	4
---	---

Total Credits	14
---------------	----

## Honors

Honors degrees may be recommended for students who have exhibited high achievement in mathematics. Candidates must complete at least eight mathematics courses at the 1000 or 2000 level with sufficiently good grades and must write an honors thesis under the guidance of a faculty member. The honors thesis is usually written while the candidate is enrolled in MATH 1970. The candidate should consult with the concentration advisor for the precise grade requirements.

Those interested in graduate study in mathematics are encouraged to take:

MATH 1130	Functions of Several Variables
MATH 1140	Functions Of Several Variables
MATH 1260	Complex Analysis
MATH 1410	Topology
MATH 1540	Topics in Abstract Algebra

## Mathematics-Computer Science Concentration Requirements

Students may opt to pursue an interdisciplinary Bachelor of Science degree in Math-Computer Science, a concentration administered cooperatively between the mathematics and computer science departments. Course requirements include math- and systems-oriented computer science courses, as well as computational courses in applied math. Students must identify a series of electives that cohere around a common theme. As with other concentrations offered by the Computer Science department, students have the option to pursue the professional track (<http://www.cs.brown.edu/ugrad/concentrations/professional.track.html>) of the ScB program in Mathematics-Computer Science.

### Requirements for the Standard Track of the Sc.B. degree.

#### Prerequisites

Three semesters of Calculus to the level of MATH 0180, MATH 0200, or MATH 0350 3

MATH 0520 Linear Algebra 1  
or MATH 0540 Honors Linear Algebra  
or CSCI 0530 Coding the Matrix: An Introduction to Linear Algebra for Computer Science

#### Core Courses

MATH 1530 Abstract Algebra 1

Select one of the following series: 2

##### Series A

CSCI 0150 Introduction to Object-Oriented Programming and Computer Science and Introduction to Algorithms and Data Structures & CSCI 0160

##### Series B

CSCI 0170 Computer Science: An Integrated Introduction & CSCI 0180 Computer Science: An Integrated Introduction

##### Series C

CSCI 0190 Accelerated Introduction to Computer Science (and an additional CS course not otherwise used to satisfy a concentration requirement; this course may be CSCI 0180, an intermediate-level CS course, or a 1000-level CS course)

CSCI 0320 Introduction to Software Engineering 1  
or CSCI 0330 Introduction to Computer Systems

CSCI 0220 Introduction to Discrete Structures and Probability 1  
or CSCI 1010 Theory of Computation

Three 1000-level Mathematics courses 3

Three advanced courses in Computer Science<sup>1, 2</sup> 3

Three additional courses different from any of the above chosen from Mathematics, Computer Science, Applied Mathematics, or related areas<sup>3</sup> 3

A capstone course in Computer Science or Mathematics<sup>4</sup> 1

Total Credits 19

<sup>1</sup> These courses must be at the 1000-level or higher. Two of these courses and the intermediate courses must satisfy one of the CS pathways (<https://cs.brown.edu/degrees/undergrad/concentration-requirements/pathways-for-undergraduate-and-masters-students>).

<sup>2</sup> Note: CSCI 1010 may be used either as a math-oriented intermediate course or as an advanced course. CSCI 1010 was formerly known as CSCI 510: they are the same course and hence only one may be taken for credit. CSCI 1450 was formerly known as CSCI 450: they are the same course and hence only one may be taken for credit. Applied Math 1650 or 1655 may be used in place of CSCI 1450 in CS pathway requirements (<https://cs.brown.edu/degrees/undergrad/concentration-requirements/pathways-for-undergraduate-and-masters-students>). However, concentration credit will be given for only one of Applied Math 1650, 1655, and CSCI 1450.

<sup>3</sup> These must be approved by a concentration advisor.

<sup>4</sup> A one-semester course, taken in the student's last undergraduate year, in which the student (or group of students) use a significant portion of their undergraduate education, broadly interpreted, in studying some current topic in depth, to produce a culminating artifact such as a paper or software project. The title and abstract of the artifact, along with the student's and faculty-sponsor's names, will be placed in the CS website. The inclusion of a relevant image or system diagram is strongly encouraged. The complete text of the best artifacts of each class will be featured on the CS website. A senior thesis, which involves two semesters of work, may count as a capstone (<http://cs.brown.edu/degrees/undergrad/concentrations/capstone>).

Requirements for the Professional Track of the Sc.B. degree.

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four-month full-time professional experiences, doing work that is related to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

## Mathematics-Economics Concentration Requirements

The Mathematics Economics concentration is designed to give a background in economic theory plus the mathematical tools needed to analyze and develop additional theoretical constructions. The emphasis is on the abstract theory itself. Students may choose either the standard or the professional track, both award a Bachelor of Arts degree.

## Standard Mathematics-Economics Concentration

### Economics

ECON 1130	Intermediate Microeconomics (Mathematical) <sup>1</sup>	1
ECON 1210	Intermediate Macroeconomics	1
ECON 1630	Mathematical Econometrics I	1
Two courses from the "mathematical-economics" group: <sup>2</sup>		2
ECON 1170	Welfare Economics and Social Choice Theory	
ECON 1225	Advanced Macroeconomics: Monetary, Fiscal, and Stabilization Policies	
ECON 1460	Industrial Organization	
ECON 1470	Bargaining Theory and Applications	
ECON 1490	Designing Internet Marketplaces	
ECON 1640	Mathematical Econometrics II	
ECON 1660	Big Data	
ECON 1670	Advanced Topics in Econometrics	
ECON 1750	Investments II	
ECON 1820	Theory of Behavioral Economics	
ECON 1850	Theory of Economic Growth	
ECON 1860	The Theory of General Equilibrium	
ECON 1870	Game Theory and Applications to Economics	
One course from the "data methods" group: <sup>2</sup>		1
ECON 1301	Economics of Education I	
ECON 1305	Economics of Education: Research	
ECON 1310	Labor Economics	
ECON 1360	Health Economics	
ECON 1410	Urban Economics	
ECON 1480	Public Economics	
ECON 1510	Economic Development	
ECON 1530	Health, Hunger and the Household in Developing Countries	
ECON 1629	Applied Research Methods for Economists	
ECON 1640	Mathematical Econometrics II	
ECON 1650	Financial Econometrics	
Two additional 1000-level economics courses <sup>3</sup>		2
<b>Mathematics</b>		
Calculus: MATH 0180 or higher		1
Linear Algebra - one of the following:		1
MATH 0520	Linear Algebra	
MATH 0540	Honors Linear Algebra	
Probability Theory - one of the following:		1
MATH 1610	Probability	
MATH 1620	Mathematical Statistics	
APMA 1650	Statistical Inference I	
Analysis - one of the following:		1
MATH 1010	Analysis: Functions of One Variable	
MATH 1130	Functions of Several Variables	
MATH 1140	Functions Of Several Variables	
Differential Equations - one of the following:		1
MATH 1110	Ordinary Differential Equations	
MATH 1120	Partial Differential Equations	
One additional course from the Probability, Analysis, and Differential Equations courses listed above		1
Total Credits		14

<sup>1</sup> Or ECON 1110 with permission.

<sup>2</sup> No course may be "double-counted" to satisfy both the mathematical-economics and data methods requirement.

<sup>3</sup> Students may use either ECON 1070 or ECON 1090 toward the concentration, but not both. Note that ECON 1620, ECON 1960, and ECON 1970 (independent study) cannot be used for concentration credit. However, ECON 1620 and ECON 1960 can be used for university credit and up to two 1970s may be used for university credit.

## Honors and Capstone Requirement:

Admission to candidacy for honors in the concentration is granted on the following basis: 3.7 GPA for Economics courses, and 3.5 GPA overall. To graduate with honors, a student must write an honors thesis in senior year following the procedures specified by the concentration (see Economics Department website).

## Professional Track

The requirements for the professional track include all those of the standard track, as well as the following:

Students must complete two two-to-four month full-time professional experiences, doing work that is relevant to their concentration programs. Such work is normally done within an industrial organization, but may also be at a university under the supervision of a faculty member.

On completion of each professional experience, the student must write and upload to ASK a reflective essay about the experience addressing the following prompts, to be approved by the student's concentration advisor:

- Which courses were put to use in your summer's work? Which topics, in particular, were important?
- In retrospect, which courses should you have taken before embarking on your summer experience? What are the topics from these courses that would have helped you over the summer if you had been more familiar with them?
- Are there topics you should have been familiar with in preparation for your summer experience, but are not taught at Brown? What are these topics?
- What did you learn from the experience that probably could not have been picked up from course work?
- Is the sort of work you did over the summer something you would like to continue doing once you graduate? Explain.
- Would you recommend your summer experience to other Brown students? Explain.

## Mathematics Graduate Program

The department of Mathematics offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. Ph.D. students may also earn a transitional A.M. or Sc.M. en route to the Ph.D.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/mathematics>

## Courses

### MATH 0010A. First Year Seminar: A Taste of the Infinite.

The concept of infinity occurs in many disciplines - philosophy, mathematics, physics, religion, art, and so on. This class will focus on the mathematical aspects of infinity, surveying some of the ways that the infinite arises in mathematics. Topics will include: the sizes of infinity, rates of growth, computational complexity, construction of the real numbers, the notion of compactness, geometric spaces, transcendental numbers, and fractal sets. I will not assume any prior knowledge of mathematics beyond a good grounding in high school algebra and geometry.

**MATH 0010B. Exploring the Fourth Dimension.**

This interdisciplinary seminar explores all the mathematics students have seen or even will see, concentrating on an engaging topic that begins with elementary geometry and branches out to literature, history, philosophy, and art as well as physics and other sciences. Guideposts to the fourth dimension include Salvador Dali's *Corpus Hypercubicus*, Edwin Abbott Abbott's *Flatland*, and Jeff Weeks' *The Shape of Space*. Students will investigate new mathematical topics such as combinatorics, regular polytopes, topology, and non-Euclidean geometry. Although students will use computers for visualization, no computer experience is required. There are no specific mathematical prerequisites except curiosity and a willingness to participate actively. Students considering concentrations in humanities, social sciences, and the arts are especially invited to this first-year seminar. Enrollment limited to 19 first year students.

**MATH 0010C. From 'Flatland' to the Fourth Dimension.**

No description available. Enrollment limited to 15 first year students. Instructor permission required, after initial placement of students.

**MATH 0050. Analytic Geometry and Calculus.**

MATH 0050 and 0060 provide a slower-paced introduction to calculus for students who require additional preparation. Presents the same calculus topics as MATH 0090, together with a review of the necessary precalculus topics. Students successfully completing this sequence are prepared for MATH 0100. May not be taken for credit in addition to MATH 0070 or MATH 0090. S/NC only.

**MATH 0060. Analytic Geometry and Calculus.**

A slower-paced introduction to calculus for students who require additional preparation. Presents the same calculus topics as MATH 0090, together with a review of the necessary precalculus topics. Students successfully completing this sequence are prepared for MATH 0100. Prerequisite: MATH 0050 or written permission. May not be taken for credit in addition to MATH 0070 or MATH 0090. S/NC only.

**MATH 0070. Calculus with Applications to Social Science.**

A survey of calculus for students who wish to learn the basics of calculus for application to social sciences or for cultural appreciation as part of a broader education. Topics include functions, equations, graphs, exponentials and logarithms, and differentiation and integration; applications such as marginal analysis, growth and decay, optimization, and elementary differential equations. May not be taken for credit in addition to MATH 0050 or MATH 0060 or MATH 0090. S/NC only.

**MATH 0090. Introductory Calculus, Part I.**

An intensive course in calculus of one variable including limits, differentiation, maxima and minima, the chain rule, rational functions, trigonometric functions, and exponential functions. Introduction to integration with applications to area and volumes of revolution. MATH 0090 and MATH 0100 or the equivalent are recommended for all students intending to concentrate in the sciences or mathematics. May not be taken for credit in addition to MATH 0050 or MATH 0060 or MATH 0070. S/NC only.

**MATH 0100. Introductory Calculus, Part II.**

A continuation of the material of MATH 0090 including further development of integration, techniques of integration, and applications. Other topics include infinite series, power series, Taylor's formula, polar and parametric equations, and an introduction to differential equations. MATH 0090 or the equivalent are recommended for all students intending to concentrate in the sciences or mathematics.

**MATH 0170. Advanced Placement Calculus.**

Begins with a review of fundamentals of calculus and includes infinite series, power series, paths, and differential equations of first and second order. Placement in this course is determined by the department on the basis of high school AP examination scores or the results of tests given by the department during orientation week. May not be taken in addition to MATH 0100.

**MATH 0180. Intermediate Calculus.**

Three-dimensional analytic geometry. Differential and integral calculus for functions of two or three variables: partial derivatives, multiple integrals, line integrals, Green's Theorem, Stokes' Theorem. Prerequisite: MATH 0100, 0170, or 0190.

**MATH 0190. Advanced Placement Calculus (Physics/Engineering).**

Covers roughly the same material and has the same prerequisites as MATH 0170, but is intended for students with a special interest in physics or engineering. The main topics are: calculus of vectors and paths in two and three dimensions; differential equations of the first and second order; and infinite series, including power series and Fourier series. The extra hour is a weekly problem session.

**MATH 0200. Intermediate Calculus (Physics/Engineering).**

Covers roughly the same material as MATH 0180, but is intended for students with a special interest in physics or engineering. The main topics are: geometry of three-dimensional space; partial derivatives; Lagrange multipliers; double, surface, and triple integrals; vector analysis; Stokes' theorem and the divergence theorem, with applications to electrostatics and fluid flow. The extra hour is a weekly problem session. Recommended prerequisite: MATH 0100, 0170, or 0190.

**MATH 0350. Honors Calculus.**

A third-semester calculus course for students of greater aptitude and motivation. Topics include vector analysis, multiple integration, partial differentiation, line integrals, Green's theorem, Stokes' theorem, the divergence theorem, and additional material selected by the instructor. Prerequisite: Advanced placement or written permission.

**MATH 0420. Introduction to Number Theory.**

An overview of one of the most beautiful areas of mathematics. Ideal for any student who wants a taste of mathematics outside of, or in addition to, the calculus sequence. Topics include: prime numbers, congruences, quadratic reciprocity, sums of squares, Diophantine equations, and, as time permits, such topics as cryptography and continued fractions. No prerequisites.

**MATH 0520. Linear Algebra.**

Vector spaces, linear transformations, matrices, systems of linear equations, bases, projections, rotations, determinants, and inner products. Applications may include differential equations, difference equations, least squares approximations, and models in economics and in biological and physical sciences. MATH 0520 or MATH 0540 is a prerequisite for all 1000-level courses in Mathematics except MATH 1260 or MATH 1610. Recommended prerequisite: MATH 0100 or equivalent. May not be taken in addition to MATH 0540.

**MATH 0540. Honors Linear Algebra.**

This course provides a rigorous introduction to the theory of linear algebra. Topics covered include: matrices, linear equations, determinants, and eigenvalues; vector spaces and linear transformations; inner products; Hermitian, orthogonal, and unitary matrices; and Jordan normal forms. MATH 0540 provides a more theoretical treatment of the topics in MATH 0520, and students will have opportunities during the course to develop proof-writing skills. [Recommended prerequisites: MATH 0100 or equivalent.]

**MATH 0550. Problems from the History of Mathematics.**

This course presents a history of mathematics through the lens of famous mathematical problems. Beginning in Ancient Greece and Babylon and continuing to the present, we discuss the problems that shaped the development of modern mathematics. Sample topics include the impossible constructions of Ancient Greece, paradoxes from the birth of calculus, the problems that gave rise to graph theory, and the rise of computer-assisted proofs.

**MATH 0580. Mathematical Forms in Architecture.**

This project will explore and advance innovative applications of mathematics to architecture using computational methods. Historically, architecture has been guided primarily by an intuitive creative process. In contrast to the end-results of intuitive design, many "optimal" forms--i.e. geometric shapes and configurations that satisfy extremal conditions--are unique because they are the result of systematic physical experiments or explicit mathematical study in addition to imaginative input. Classic questions for which human intuition alone has been incapable of finding a solution include: What is the exact shape of the optimal arch?, or What is the shape of a child's slide that minimizes the time of travel? The use of computational methods to generate solutions to these problems will be made considerably simpler via optimization libraries in Mathematica. The application to architecture in this project will provide students a unique concrete backdrop to visualize solutions to these problems.

**MATH 0750. Introduction to Higher Mathematics.**

This year-long class will expose students to six fundamental areas of mathematics. It will be team taught by six members of the faculty. Fall topics will include logic, combinatorics, and analysis. Spring topics will include number theory, algebra, and geometry. Approximately 4 weeks will be devoted to each topic.

**MATH 0760. Introduction to Higher Mathematics.**

This year-long class will expose students to six fundamental areas of mathematics. It will be team taught by six members of the faculty. Fall topics will include logic, combinatorics, and analysis. Spring topics will include number theory, algebra, and geometry. Approximately 4 weeks will be devoted to each topic.

**MATH 1010. Analysis: Functions of One Variable.**

Completeness properties of the real number system, topology of the real line. Proof of basic theorems in calculus, infinite series. Topics selected from ordinary differential equations. Fourier series, Gamma functions, and the topology of Euclidean plane and 3-space. Prerequisite: MATH 0180, 0200, or 0350. MATH 0520 or 0540 may be taken concurrently. Most students are advised to take MATH 1010 before MATH 1130.

**MATH 1040. Fundamental Problems of Geometry.**

This class discusses geometry from a modern perspective. Topics include hyperbolic, projective, conformal, and affine geometry, and various theorems and structures built out of them. Prerequisite: MA 0520, MA 0540, or permission of the instructor.

**MATH 1060. Differential Geometry.**

The study of curves and surfaces in 2- and 3-dimensional Euclidean space using the techniques of differential and integral calculus and linear algebra. Topics include curvature and torsion of curves, Frenet-Serret frames, global properties of closed curves, intrinsic and extrinsic properties of surfaces, Gaussian curvature and mean curvature, geodesics, minimal surfaces, and the Gauss-Bonnet theorem.

**MATH 1110. Ordinary Differential Equations.**

Ordinary differential equations, including existence and uniqueness theorems and the theory of linear systems. Topics may also include stability theory, the study of singularities, and boundary value problems.

**MATH 1120. Partial Differential Equations.**

The wave equation, the heat equation, Laplace's equation, and other classical equations of mathematical physics and their generalizations. Solutions in series of eigenfunctions, maximum principles, the method of characteristics, Green's functions, and discussion of well-posedness. Prerequisites: MATH 0520 or MATH 0540, or instructor permission.

**MATH 1130. Functions of Several Variables.**

A course on calculus on manifolds. Included are differential forms, integration, and Stokes' formula on manifolds, with applications to geometrical and physical problems, the topology of Euclidean spaces, compactness, connectivity, convexity, differentiability, and Lebesgue integration. It is recommended that a student take a 1000-level course in analysis (MATH 1010 or MATH 1260) before attempting MATH 1130.

**MATH 1140. Functions Of Several Variables.**

See Functions Of Several Variables (MATH 1130) for course description. Prerequisite: MATH 1130 or instructor permission.

**MATH 1150. Machine Learning for Scientific Modeling: Data-Driven Discovery of Differential Equations.**

This junior/senior level course will explore the use of Machine Learning to automate the discovery and calibration of models involving differential equations directly from data. After introducing the basic machine learning tools (Gaussian Processes and Neural Networks) we will see how they can be combined with ODE and PDE computational methods to generate models in physics, medicine, and finance. The course will progress to a survey of recent research works on the topic. No prior knowledge of machine learning is required.

**MATH 1230. Graph Theory.**

This course covers important material about graph theory, such as spanning trees, network flow problems, matching problems, coloring problems, planarity, Cayley graphs, spectral theory on graphs, and Ramsey Theory. The emphasis will be on a combination of theory and algorithms. Depending on the instructor, connections to such fields as combinatorics, geometry, or computer science might be emphasized. Prerequisite: MATH 0180, 0200 or 0350 and MATH 0520 or 0540 are recommended. Enrollment limited to 40.

**MATH 1260. Complex Analysis.**

Examines one of the cornerstones of mathematics. Complex differentiability, Cauchy-Riemann differential equations, contour integration, residue calculus, harmonic functions, geometric properties of complex mappings. Prerequisite: MATH 0180, 0200, or 0350. This course does not require MATH 0520 or 0540.

**MATH 1270. Topics in Functional Analysis.**

Infinite-dimensional vector spaces with applications to some or all of the following topics: Fourier series and integrals, distributions, differential equations, integral equations, calculus of variations. Prerequisite: At least one 1000-level course in Mathematics or Applied Mathematics, or permission of the instructor.

**MATH 1410. Topology.**

Topology of Euclidean spaces, winding number and applications, knot theory, fundamental group and covering spaces. Euler characteristic, simplicial complexes, classification of two-dimensional manifolds, vector fields, the Poincaré-Hopf theorem, and introduction to three-dimensional topology. Prerequisites: MATH 0520 or MATH 0540, or instructor permission.

**MATH 1530. Abstract Algebra.**

An introduction to the principles and concepts of modern abstract algebra. Topics include groups, rings, and fields; applications to number theory, the theory of equations, and geometry. MATH 1530 is required of all students concentrating in mathematics.

**MATH 1540. Topics in Abstract Algebra.**

Galois theory together with selected topics in algebra. Examples of subjects which have been presented in the past include algebraic curves, group representations, and the advanced theory of equations. Prerequisite: MATH 1530.

**MATH 1560. Number Theory.**

A basic introduction to the theory of numbers. Unique factorization, prime numbers, modular arithmetic, quadratic reciprocity, quadratic number fields, finite fields, Diophantine equations, and additional topics. Prerequisite: MATH 1530 or written permission.

**MATH 1580. Cryptography.**

The main focus is on public key cryptography. Topics include symmetric ciphers, public key ciphers, complexity, digital signatures, applications and protocols. MATH 1530 is not required for this course. What is needed from abstract algebra and elementary number theory will be covered. Prerequisite: MATH 0520 or MATH 0540.

**MATH 1610. Probability.**

Basic probability theory. Sample spaces; random variables; normal, Poisson, and related distributions; expectation; correlation; and limit theorems. Applications in various fields (biology, physics, gambling, etc.). Prerequisites: MATH 0180, 0200 or 0350.

**MATH 1620. Mathematical Statistics.**

This course covers the basics of mathematical statistics and applications to data analysis, pattern recognition and machine learning. Estimation, hypothesis testing, classification and regression using linear models, tree-based methods, support vector machines, and neural networks, with other subjects as time permits.

**MATH 1810A. Applied Algebraic Topology.**

Topology is a powerful tool for identifying, describing, and characterizing the essential features of functions and spaces. In the recent years some of these methods have been adapted to study the shape of data collected from a range of different fields, including graphics and visualization, computational biology, etc. This course is an introduction to the basic concepts and topological structures behind these developments, focusing on persistent homology and mapper. Projects will involve using these methods to analyze and describe the shape of concrete data sets.

**MATH 1810B. A Second Course in Linear Algebra.**

We'll study various aspects of multilinear algebra, including tensors, differential forms and homological algebra, with emphasis on coordinate-free constructions and universal properties.

No background in abstract algebra, differential/algebraic geometry or manifold theory will be assumed. The only pre-requisites are a well-understood first course in linear algebra, a desire to do more with it, and a willingness to think abstractly.

**MATH 1820A. Introduction to Lie Algebras.**

Lie groups and Lie algebras are important, because they are the symmetries of structures such as quadratic forms, differential systems and smooth manifolds. The prototype of a Lie algebra is the space of 3-vectors together with their cross product, which is closely related to the Lie group of rotations. We will see how this basic example generalizes, mostly in the context of matrices. We'll examine special types of Lie algebras, such as nilpotent, solvable and semi-simple, study root systems and their diagrams, explore some representation theory, and end with the classification of the simple Lie algebras. Prerequisite: MATH 1530.

**MATH 1970. Honors Conference.**

Collateral reading, individual conferences. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**MATH 2010. Differential Geometry.**

Introduction to differential geometry (differentiable manifolds, differential forms, tensor fields, homogeneous spaces, fiber bundles, connections, and Riemannian geometry), followed by selected topics in the field.

**MATH 2050. Algebraic Geometry.**

Complex manifolds and algebraic varieties, sheaves and cohomology, vector bundles, Hodge theory, Kähler manifolds, vanishing theorems, the Kodaira embedding theorem, the Riemann-Roch theorem, and introduction to deformation theory.

**MATH 2060. Algebraic Geometry.**

See Algebraic Geometry (MATH 2050) for course description.

**MATH 2110. Introduction to Manifolds.**

Inverse Function Theorem, manifolds and submanifolds, tangent and cotangent bundles, transversality, flows and vector fields, Frobenius Theorem, vector bundles, tensors and differential forms, Sard's Theorem, introduction to Lie groups.

**MATH 2210. Real Function Theory.**

Real numbers, outer measures, measures, Lebesgue measure, integrals of measurable functions, Holder and Minkowski inequalities, modes of convergence,  $L^p$  spaces, product measures, Fubini's Theorem, signed measures, Radon-Nikodym theorem, dual space of  $L^p$  and of  $C$ , Hausdorff measure.

**MATH 2220. Real Function Theory.**

The basics of Hilbert space theory, including orthogonal projections, the Riesz representation theorem, and compact operators. The basics of Banach space theory, including the open mapping theorem, closed graph theorem, uniform boundedness principle, Hahn-Banach theorem, Riesz representation theorem (pertaining to the dual of  $C_0(X)$ ), weak and weak-star topologies. Various additional topics, possibly including Fourier series, Fourier transform, ergodic theorems, distribution theory, and the spectral theory of linear operators.

**MATH 2250. Complex Function Theory.**

Introduction to the theory of analytic functions of one complex variable. Content varies somewhat from year to year, but always includes the study of power series, complex line integrals, analytic continuation, conformal mapping, and an introduction to Riemann surfaces.

**MATH 2260. Complex Function Theory.**

See Complex Function Theory (MATH 2250) for course description.

**MATH 2370. Partial Differential Equations.**

The theory of the classical partial differential equations; the method of characteristics and general first order theory. The Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential geometry, and the applied sciences. Semester II concentrates on special topics chosen by the instructor.

**MATH 2380. Partial Differential Equations.**

The theory of the classical partial differential equations; the method of characteristics and general first order theory. The Fourier transform, the theory of distributions, Sobolev spaces, and techniques of harmonic and functional analysis. More general linear and nonlinear elliptic, hyperbolic, and parabolic equations and properties of their solutions, with examples drawn from physics, differential geometry, and the applied sciences. Semester II of this course concentrates on special topics chosen by the instructor.

**MATH 2410. Topology.**

An introduction to algebraic topology. Topics include fundamental group, covering spaces, simplicial and singular homology, CW complexes, and an introduction to cohomology.

**MATH 2420. Algebraic Topology.**

This is a continuation of MATH 2410. Topics include cohomology, cup products, Poincaré duality, and other topics chosen by the instructor.

**MATH 2450. Exchange Scholar Program.****MATH 2510. Algebra.**

Basic properties of groups, rings, fields, and modules. Topics include: finite groups, representations of groups, rings with minimum condition, Galois theory, local rings, algebraic number theory, classical ideal theory, basic homological algebra, and elementary algebraic geometry.

**MATH 2520. Algebra.**

See Algebra (MATH 2510) for course description.

**MATH 2530. Number Theory.**

Introduction to algebraic and analytic number theory. Topics covered during the first semester include number fields, rings of integers, primes and ramification theory, completions, adeles and ideles, and zeta functions. Content of the second semester varies from year to year; possible topics include class field theory, arithmetic geometry, analytic number theory, and arithmetic K-theory. Prerequisite: MATH 2510.

**MATH 2540. Number Theory.**

See Number Theory (MATH 2530) for course description.

**MATH 2630. Probability.**

Introduces probability spaces, random variables, expectation values, and conditional expectations. Develops the basic tools of probability theory, such fundamental results as the weak and strong laws of large numbers, and the central limit theorem. Continues with a study of stochastic processes, such as Markov chains, branching processes, martingales, Brownian motion, and stochastic integrals. Students without a previous course in measure theory should take MATH 2210 (or APMA 2110) concurrently.

**MATH 2640. Probability.**

See MATH 2630 for course description.

**MATH 2710A. Probability, Quantum Field Theory, and Geometry.****MATH 2710B. Solitary Waves.****MATH 2710C. Gluing Constructions in Differential Geometry.****MATH 2710D. Lie Groups and Lie Algebras.****MATH 2710E. Arithmetic Groups.****MATH 2710F. Stable Homotopy Theory.**

No description available.

**MATH 2710G. Topics in Free Boundary Problems in Continuum Mechanics.****MATH 2710H. Topics in Complex and p-adic Dynamics.**

No description available.

**MATH 2710I. Topics in Effective Harmonic Analysis.**

Graduate topics course in Harmonic Analysis.

**MATH 2710P. Harmonic Analysis on Polytopes and Cones.**

Graduate Topics course in harmonic analysis.

**MATH 2710R. Problems of the Uncertainty Principle in Harmonic Analysis.**

Graduate Topics course in Harmonic Analysis.

**MATH 2710T. Random Walks, Spanning Trees, and Abelian Sandpiles.**

This is an advanced level discussion seminar for specific topics in probability. We will study random walks on networks, the uniform spanning tree model, and the abelian sandpile model of self-organized criticality, and their connections to one another. Using these connections, we will derive properties of these objects on large graphs. We will also cover related topics such as the random walk loop soup.

**MATH 2720A. Topics in Harmonic Analysis.****MATH 2720B. Multiple Dirichlet Series.****MATH 2720C. Curves on Surfaces and the Classification of Finitely Generated Kleinian Groups.**

This is a course in the study of geometry and topology of hyperbolic 3-manifolds.

**MATH 2720D. Piecewise Isometric Maps.**

This class will cover a variety of topics, all more or less related to dynamical systems that are defined by piecewise isometric maps. Topics may include: polygonal billiards and flat cone surfaces; outer billiards; interval exchange maps; The Gauss map and continued fractions; aperiodic tilings, such as the Penrose tiling; cut and paste theorems about polyhedra; and Ashwin's conjecture about piecewise rotation maps. A fairly large part of the class will be devoted to the explanation of the instructor's proof of the Moser-Neumann conjecture for outer billiards. For this part, the instructor will use his book on the subject. For other parts of the course, a variety of sources will be used.

**MATH 2720E. Advanced Topics in Mathematics.****MATH 2720F. Topics in Geometric Analysis.**

No description available.

**MATH 2720G. Introduction to Hodge Structures.**

No description available.

**MATH 2720H. Discrete Groups, Ergodic Theory and Hyperbolic Geometry.**

No description available.

**MATH 2720I. Automorphic Representations for  $GL(2)$ .**

Graduate topics course in automorphic representations for  $GL(2)$ .

**MATH 2720N. Groups Acting on Trees.**

This course will be an introduction to geometric group theory from the viewpoint of groups acting on trees. Some topics that may be covered included Bass-Serre theory, R-trees and the Rips machine and groups acting on quasi-trees.

**MATH 2720P. Interfaces in Fluids.**

The course will explore the description of the motion of interfaces in fluids from the points of view of modeling, numerical simulation and rigorous analysis. We will focus primarily on planar vortex sheets, but we also discuss other examples of interfaces.

**MATH 2970. Preliminary Exam Preparation.**

No description available.

**MATH 2980. Reading and Research.**

Independent research or course of study under the direction of a member of the faculty, which may include research for and preparation of a thesis. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**MATH 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**MATH XLIST. Courses of Interest to Students Majoring in Mathematics.**

## Medieval Studies

### Director

Mercedes Vaquero

Medieval Cultures offers two distinct areas of historical focus: the Medieval and the Late Antique. The former focuses on the sixth through the fifteenth centuries, combining interdisciplinary perspectives with in-depth study of one or two related disciplines. Late Antique Cultures deals with the third through the ninth centuries, when ancient cultural forms were still in place but medieval cultures were beginning to take shape simultaneously. The first undergraduate degree of its kind in this country, Late Antique Cultures facilitates the study of human activity in all of its variety. A traditional area of study in Medieval Cultures is Western Europe, but students are encouraged to work in other cultural areas such as Byzantine, Islamic, Judaic and Slavic. The concentration serves students interested in the changing relation of cultural practices, social patterns, political and economic forms, and artistic and literary traditions in this important transitional period.

For additional information, please visit the department's website: [http://www.brown.edu/Departments/Medieval\\_Studies/](http://www.brown.edu/Departments/Medieval_Studies/)

## Medieval Cultures Concentration Requirements

The program in Medieval Studies offers a concentration in Medieval Cultures with two tracks with distinct foci: one in Medieval Cultures and the other in Late Antique Cultures. **Medieval Cultures** focuses on the 6th-15th centuries, combining interdisciplinary perspectives with in-depth study of one or two related disciplines.

**Late Antique Cultures** deals with the 3rd-9th centuries, when ancient cultural forms were still in place but medieval cultures were beginning to take shape simultaneously. The first undergraduate degree of its kind in this country, Late Antique Cultures studies the changing relation of cultural practices, social patterns, political and economics forms, and artistic and literary traditions in this important transition period.

A traditional area of study in Medieval Cultures is Western Europe in the High Middle Ages, but students are encouraged to work comparatively in Byzantine, Islamic, Judaic and/or Slavic cultures in the middle ages.

### Medieval Cultures Track

It is recommended that prospective concentrators take the introductory course, Medieval Perspectives, during their freshman or sophomore year.

### Requirements

Ten courses approved by the Program in Medieval Studies, including two courses in medieval history and one 1000- or 2000-level course that uses primary texts in a medieval language other than Middle English. Interested students are invited to discuss their plans with an appropriate faculty member of the Program. A concentration proposal should be prepared in

consultation with the faculty advisor and submitted to the Program Chair for approval.

Under the supervision of the director of the program, students may choose courses from the following:

RELS 0025	Wealth: Religious Approaches
JUDS 0050M	Difficult Relations? Judaism and Christianity from the Middle Ages until the Present
ENGL 0100D	Matters of Romance
RELS 0110	Christians
RELS 0150	Islam Unveiled
HIST 0150B	The Philosophers' Stone: Alchemy From Antiquity to Harry Potter
ENGL 0150C	The Medieval King Arthur
RELS 0290D	Islamic Sexualities
ENGL 0300F	Beowulf to Aphra Behn: The Earliest British Literatures
ENGL 0310F	Prose Sagas of the Medieval North
HIAA 0321	Toward a Global Late Antiquity:200-800 CE
MDVL 0360	Cities: Medieval Perspectives
RELS 0410	Christianity in Late Antiquity
RELS 0415	Ancient Christian Culture
HIAA 0460	Muslims, Jews and Christians in Medieval Iberia
COLT 0510K	The 1001 Nights
HIST 0521A	Christianity in Conflict in the Medieval Mediterranean
HIST 0521M	The Holy Grail and the Historian's Quest for the Truth
CLAS 0600	The Literary Worlds of Late Antiquity
MDVL 0620	Muslims, Jews, and Christians in Medieval Iberia
HIST 0621B	The Search for King Arthur
RELS 0640	Dying To Be With God: Jihad, Past and Present
CLAS 0660	The World of Byzantium
JUDS 0681	Great Jewish Books
HISP 0750E	Topics in Hispanic Culture and Civilization
MUSC 0910	Medieval and Renaissance Music
ITAL 1010	Dante in English Translation: Dante's World and the Invention of Modernity
PHIL 1100C	Medieval Arabic Philosophy
LATN 1110F	Fortunatus
LATN 1110H	Literature at the Court of Charlemagne
LATN 1110L	Medieval Latin Lyric
GREK 1110Q	Greek Erotic Literature: From Plato to the Medieval Romances
GREK 1110T	Rhetors and Philosophers: Intellectual Thought and Sophistic Style in the Ancient World
LATN 1120C	Survey of Late and Medieval Latin
LATN 1120D	Alcuin
CLAS 1120G	The Idea of Self
CLAS 1120V	The Age of Constantine: The Roman Empire in Transition
HIST 1205	The Long Fall of the Roman Empire
HIST 1210A	The Viking Age
HIST 1211	Crusaders and Cathedrals, Deviants and Dominance: Europe in the High Middle Ages

HIST 1260D	Living Together: Muslims, Christians, and Jews in Medieval Iberia
HIST 1280	Death from Medieval Relics to Forensic Science
RELS 1300	Ancient Christianity and the Sensing Body
COLT 1310E	A Classical Islamic Education: Readings in Arabic Literature
ENGL 1310T	Chaucer
ENGL 1310V	Chaucer: The Canterbury Tales
ENGL 1311E	History of the English Language
ENGL 1311H	Sagas Without Borders: Multilingual Literatures of Early England
ENGL 1311L	From Mead-Hall to Mordor: The Celtic and Germanic Roots of Tolkien's Fiction
RELS 1325D	Desire and the Sacred
HISP 1330T	El amor en español
ENGL 1360F	Quest, Vision, Diaspora: Medieval Journey Narratives
ENGL 1360H	Introduction to the Old English Language
ENGL 1360J	Middle English Literature
ENGL 1360U	Europe in the Vernacular
ENGL 1361D	Women's Voices in Medieval Literature
ENGL 1361K	Seminar in the Old English Language II
HIST 1440	The Ottomans: Faith, Law, Empire
HIAA 1440B	Architecture of Solitude: The Medieval Monastery
RELS 1520	Pilgrimage and Sacred Travel in the Lands of Islam
RELS 1530A	Methods and Problems in Islamic Studies: Narratives
RELS 1530D	Medieval Islamic Sectarianism
HIAA 1560A	Italy and the Mediterranean
ASYR 1600	Astronomy Before the Telescope
JUDS 1630	The Talmud
CLAS 1750L	Erotic Desire in the Premodern Mediterranean
COLT 1813P	Captive Imaginations: Writing Prison in the Middle Ages
ENGL 1900Y	Medieval Manuscript Studies: Paleography, Codicology, and Interpretation
HIST 1963L	Barbarians, Byzantines, and Berbers: Early Medieval North Africa, AD 300-1050
HIST 1963M	Charlemagne: Conquest, Empire, and the Making of the Middle Ages
HIST 1963Q	Sex, Power, and God: A Medieval Perspective
MDVL 1970	Independent Study
HIST 1979H	Prostitutes, Mothers, + Midwives: Women in Pre-modern Europe and North America
MDVL 1990	Honors Thesis
HISP 2030D	Fifteenth-Century Sentimental Romances and Celestina
GREK 2110F	Greek Palaeography and Premodern Book Cultures
ENGL 2360Q	Manuscript, Image, and the Middle English Text
HIST 2970A	New Perspectives on Medieval History

## Honors

This is awarded to students who present a meritorious honors thesis in addition to completing the required courses of the concentration. The thesis permits the student to synthesize various disciplines or interests,

or to pursue a new interest in greater depth. To be eligible for Honors, candidates must complete a minimum of six approved courses in Medieval Studies by the end of their third year with more grades of A than B. Students should apply for admission to Honors and should meet with their faculty advisor(s) no later than spring of the junior year to plan the thesis project. Accepted candidates write the thesis in a two-semester course sequence under the supervision of a director and second reader drawn from the Medieval Studies faculty.

Interested students should contact the concentration advisor for further details or consultation (863-1994).

## Late Antique Cultures Track

### Requirements:

One course in Roman history:	1
CLAS 1310 Roman History I: The Rise and Fall of an Imperial Republic	
CLAS 1320 Roman History II: The Roman Empire and Its Impact (recommended)	
One class in medieval history	1
One course at the advanced level (numbered at least 1000) in one approved language <sup>1</sup>	1
Six other courses drawn from appropriate offerings and with the approval of the concentration advisor. These courses should support a concentrational area of special interest.	6
<b>Total Credits</b>	<b>9</b>

<sup>1</sup> The language in most cases will be Latin, but students will present different competencies and interests; other languages, such as Greek, Hebrew, or one of the medieval vernaculars can be substituted for Latin, with the approval of the concentration advisor and in conjunction with a clearly articulated program of study.

Under the supervision of the director of the program, students may choose courses from the following:

CLAS 0660	The World of Byzantium
CLAS 1120G	The Idea of Self
CLAS 1120V	The Age of Constantine: The Roman Empire in Transition
CLAS 1750L	Erotic Desire in the Premodern Mediterranean
COLT 0510K	The 1001 Nights
COLT 1813P	Captive Imaginations: Writing Prison in the Middle Ages
ENGL 0100D	Matters of Romance
ENGL 0150C	The Medieval King Arthur
ENGL 0300F	Beowulf to Aphra Behn: The Earliest British Literatures
ENGL 0310F	Prose Sagas of the Medieval North
ENGL 1310T	Chaucer
ENGL 1310V	Chaucer: The Canterbury Tales
ENGL 1311H	Sagas Without Borders: Multilingual Literatures of Early England
ENGL 1311L	From Mead-Hall to Mordor: The Celtic and Germanic Roots of Tolkien's Fiction
ENGL 1360F	Quest, Vision, Diaspora: Medieval Journey Narratives
ENGL 1360H	Introduction to the Old English Language
ENGL 1360J	Middle English Literature
ENGL 1360U	Europe in the Vernacular
ENGL 1361D	Women's Voices in Medieval Literature
ENGL 1900Y	Medieval Manuscript Studies: Paleography, Codicology, and Interpretation

ENGL 2360Q	Manuscript, Image, and the Middle English Text
GREK 1110Q	Greek Erotic Literature: From Plato to the Medieval Romances
GREK 1110T	Rhetors and Philosophers: Intellectual Thought and Sophistic Style in the Ancient World
GREK 2110F	Greek Palaeography and Premodern Book Cultures
HIAA 0321	Toward a Global Late Antiquity:200-800 CE
HIAA 0460	Muslims, Jews and Christians in Medieval Iberia
HIAA 1440B	Architecture of Solitude: The Medieval Monastery
HISP 2030D	Fifteenth-Century Sentimental Romances and Celestina
HIST 0150B	The Philosophers' Stone: Alchemy From Antiquity to Harry Potter
HIST 0521A	Christianity in Conflict in the Medieval Mediterranean
HIST 0521M	The Holy Grail and the Historian's Quest for the Truth
HIST 0621B	The Search for King Arthur
HIST 1205	The Long Fall of the Roman Empire
HIST 1210A	The Viking Age
HIST 1260D	Living Together: Muslims, Christians, and Jews in Medieval Iberia
HIST 1211	Crusaders and Cathedrals, Deviants and Dominance: Europe in the High Middle Ages
HIST 1963L	Barbarians, Byzantines, and Berbers: Early Medieval North Africa, AD 300-1050
HIST 1963Q	Sex, Power, and God: A Medieval Perspective
HIST 1963M	Charlemagne: Conquest, Empire, and the Making of the Middle Ages
HIST 1974M	Early Modern Globalization
HIST 2970A	New Perspectives on Medieval History
JUDS 0050M	Difficult Relations? Judaism and Christianity from the Middle Ages until the Present
JUDS 0681	Great Jewish Books
JUDS 1630	The Talmud
LATN 1110F	Fortunatus
LATN 1110H	Literature at the Court of Charlemagne
LATN 1120C	Survey of Late and Medieval Latin
LATN 1120D	Alcuin
MDVL 0360	Cities: Medieval Perspectives
MDVL 0620	Muslims, Jews, and Christians in Medieval Iberia
MDVL 1970	Independent Study
MDVL 1990	Honors Thesis
PHIL 1100C	Medieval Arabic Philosophy
RELS 0025	Wealth: Religious Approaches
RELS 0110	Christians
RELS 0150	Islam Unveiled
RELS 0290D	Islamic Sexualities
RELS 0410	Christianity in Late Antiquity
RELS 0640	Dying To Be With God: Jihad, Past and Present
RELS 1300	Ancient Christianity and the Sensing Body

RELS 1520	Pilgrimage and Sacred Travel in the Lands of Islam
RELS 1530A	Methods and Problems in Islamic Studies: Narratives
RELS 1530D	Medieval Islamic Sectarianism

## Honors

When in Late Antique Cultures, these are awarded to students who present a meritorious honors thesis in addition to completing the required courses of the concentration. Application for admission to honors should be made in the spring of the junior year, by which time honors candidates must have completed a minimum of six approved courses in Late Antique Studies. Accepted candidates write the thesis in a two-semester course sequence (MDVL 1990) under the supervision of a director and a second reader to be determined in consultation with the advisor.

## Courses

### MDVL 0015. Sacred Stories (RELS 0015).

Interested students must register for RELS 0015.

### MDVL 0025. Wealth: Religious Approaches (RELS 0025).

Interested students must register for RELS 0025.

### MDVL 0041. The Architectures of Islam (HIAA 0041).

Interested students must register for HIAA 0041.

### MDVL 0100D. Matters of Romance (ENGL 0100D).

Interested students must register for ENGL 0100D.

### MDVL 0110. Christianity (RELS 0110).

Interested students must register for RELS 0110.

### MDVL 0150. Islam: An Introduction (RELS 0150).

Interested students must register for RELS 0150.

### MDVL 0150B. The Philosopher's Stone: Alchemy From Antiquity to Harry Potter (HIST 0150B).

Interested students must register for HIST 0150B.

### MDVL 0150C. The Medieval King Arthur (ENGL 0150C).

Interested students must register for ENGL 0150C.

### MDVL 0150E. Skill: From the Medieval Workshop to the Maker Movement (AMST 0150E).

Interested students must register for AMST 0150E.

### MDVL 0290D. Women, Sex and Gender in Islam (RELS 0290D).

Interested students must register for RELS 0290D.

### MDVL 0300F. Beowulf to Aphra Behn: The Earliest British Literatures (ENGL 0300F).

Interested students must register for ENGL 0300F.

### MDVL 0310F. Prose Sagas of the Medieval North (ENGL 0310F).

Interested students must register for ENGL 0310F.

### MDVL 0310G. Gender and Genre in Medieval Celtic Literatures (ENGL 0310G).

Interested students must register for ENGL 0310G.

### MDVL 0321. Toward a Global Late Antiquity: 200-800 CE (HIAA 0321).

Interested students must register for HIAA 0321.

### MDVL 0360. Cities: Medieval Perspectives.

Where did our modern cities come from? How does the medieval city still live in modernity? In this course, we study histories of cities, their making, transformation, or disappearance, through the lens of a series of medieval urban centers (such as Rome, London, Damascus, Constantinople/Istanbul, and Toledo), some of which had a continued existence into the modern world. We will focus on such topics as: the end of ancient cities; religious beliefs, conflict, and tolerance; the city and its margins; citizens and foreigners; societies without cities; book culture and bureaucracy; the city as metaphor; sex (and romance) and the city.

### MDVL 0410. Christianity in Late Antiquity (RELS 0410).

Interested students must register for RELS 0410.

### MDVL 0415. Ancient Christian Culture (RELS 0415).

Interested students must register for RELS 0415.

### MDVL 0420. Sacred Bodies (RELS 0420).

Interested students must register for RELS 0420.

### MDVL 0460. Muslims, Jews and Christians in Medieval Iberia (HIAA 0460).

Interested students must register for HIAA 0460.

### MDVL 0510K. The 1001 Nights (COLT 0510K).

Interested students must register for COLT 0510K.

### MDVL 0521A. Christianity in Conflict in the Medieval Mediterranean (HIST 0521A).

Interested students must register for HIST 0521A.

### MDVL 0600. Literary Worlds of Late Antiquity (CLAS 0600).

Interested students must register for CLAS 0600.

### MDVL 0620. Muslims, Jews, and Christians in Medieval Iberia.

The cultural diversity of medieval Spain and Portugal is proclaimed by their Christian cathedrals, Islamic palaces, and Jewish synagogues. The three distinct cultures that produced these buildings lived together for centuries in medieval Iberia, sometimes in peace, sometimes not. This *convivencia* of Jews, Muslims, and Christians will be examined from the perspectives of literature, art, architecture, archaeology and history.

### MDVL 0640. Dying to Be With God: Jihad, Past and Present (RELS 0640).

Interested students must register for RELS 0640.

### MDVL 0660. The World of Byzantium (CLAS 0660).

Interested students must register for CLAS 0660.

### MDVL 0681. Great Jewish Books (JUDS 0681).

Interested students must register for JUDS 0681.

### MDVL 0682. How Bible Became Holy (JUDS 0682).

Interested students must register for JUDS 0682.

### MDVL 0683. Jews and Money (JUDS 0683).

Interested students must register for JUDS 0683.

### MDVL 0710D. History of the Spanish Language (HISP 0710D).

Interested students must register for HISP 0710D.

### MDVL 0750E. Topics in Hispanic Culture and Civilization (HISP 0750E).

Interested students must register for HISP 0750E.

### MDVL 0812H. Literary Bestsellers of the Islamic World (COLT 0812H).

Interested students must register for COLT 0812H.

### MDVL 0910. Medieval and Renaissance Music (MUSC 0910).

Interested students must register for MUSC 0910.

### MDVL 0980G. The Search for King Arthur (HIST 0621B).

Interested students must register for HIST 0621B.

### MDVL 1010. Dante in English Translation: Dante's World and the Invention of Modernity (ITAL 1010).

Interested students must register for ITAL 1010.

### MDVL 1020. Living Together: Muslims, Christians, and Jews in Medieval Iberia (HIST 1020).

Interested students must register for HIST 1020.

### MDVL 1020A. Boccaccio's Decameron (ITAL 1020).

Interested students must register for ITAL 1020.

### MDVL 1030. The Long Fall of the Roman Empire (HIST 1030).

Interested students must register for HIST 1030.

### MDVL 1100C. Medieval Arabic Philosophy (PHIL 1100C).

Interested students must register for PHIL 1100C.

### MDVL 1110B. Augustine, Confessions (LATN 1110B).

Interested students must register for LATN 1110B.

### MDVL 1110F. Fortunatus (LATN 1110F).

Interested students must register for LATN 1110F.

### MDVL 1110G. En Marge: Exilés et Hors-la-Loi au Moyen Age (FREN 1110G).

Interested students must register for FREN 1110G.

**MDVL 1110H. Literature at the Court of Charlemagne (LATN 1110H).**  
Interested students must register for LATN 1110H.

**MDVL 1110L. Medieval Latin Lyric (LATN 1110L).**  
Interested students must register for LATN 1110L.

**MDVL 1110Q. Greek Erotic Literature: From Plato to the Medieval Romances (GREK 1110Q).**  
Interested students must register for GREK 1110Q.

**MDVL 1110T. Rhetors and Philosophers: Intellectual Thought and Sophistic Style in the Ancient World (GREK 1110T).**  
Interested students must register for GREK 1110T.

**MDVL 1120C. Survey of Late and Medieval Latin (LATN 1120C).**  
Interested students must register for LATN 1120C.

**MDVL 1120D. Alcuin (LATN 1120D).**  
Interested students must register for LATN 1120D.

**MDVL 1120G. The Idea of Self (CLAS 1120G).**  
Interested students must register for CLAS 1120G.

**MDVL 1120V. The Age of Constantine: The Roman Empire in Transition (CLAS 1120V).**  
Interested students must register for CLAS 1120V.

**MDVL 1205. The Long Fall of the Roman Empire (HIST 1205).**  
Interested students must register for HIST 1205.

**MDVL 1210A. The Viking Age (HIST 1210A).**  
Interested students must register for HIST 1210A.

**MDVL 1210C. History of the Spanish Language (HISP 1210C).**  
Interested students must register for HISP 1210C.

**MDVL 1211. Crusaders and Cathedrals: Europe in the High Middle Ages (HIST 1211).**  
Interested students must register for HIST 1211.

**MDVL 1220. Byzantine Art and Archaeology: Material Stories of a Christian Empire (ARCH 1220).**  
Interested students must register for ARCH 1220.

**MDVL 1260D. Living Together: Muslims, Christians, and Jews in Medieval Iberia (HIST 1260D).**  
Interested students must register for HIST 1260D.

**MDVL 1280. Death from Medieval Relics to Forensic Science (HIST 1280).**  
Interested students must register for HIST 1280.

**MDVL 1300. Ancient Christianity and the Sensing Body (RELS 1300).**  
Interested students must register for RELS 1300.

**MDVL 1310E. A Classical Islamic Education: Readings in Arabic Literature (COLT 1310E).**  
Interested students must register for COLT 1310E.

**MDVL 1310T. Chaucer (ENGL 1310T).**  
Interested students must register for ENGL 1310T.

**MDVL 1310V. Chaucer: The Canterbury Tales (ENGL 1310V).**  
Interested students must register for ENGL 1310V.

**MDVL 1311E. History of the English Language (ENGL 1311E).**  
Interested students must register for ENGL 1311E.

**MDVL 1311H. Sagas Without Borders: Multilingual Literatures of Early England (ENGL 1311H).**  
Interested students must register for ENGL 1311H.

**MDVL 1311L. From Mead-Hall to Mordor: The Celtic and Germanic Roots of Tolkien's Fiction (ENGL 1311L).**  
Interested students must register for ENGL 1311L.

**MDVL 1325C. The Virgin Mary in Christian Tradition (RELS 1325C).**  
Interested students must register for RELS 1325C.

**MDVL 1325D. Desire and the Sacred (RELS 1325D).**  
Interested students must register for RELS 1325D.

**MDVL 1330T. El amor en español (HISP 1330T).**  
Interested students must register for HISP 1330T.

**MDVL 1360F. Quest, Vision, Diaspora: Medieval Journey Narratives (ENGL 1360F).**  
Interested students must register for ENGL 1360F.

**MDVL 1360H. Introduction to the Old English Language (ENGL 1360H).**  
Interested students must register for ENGL 1360H.

**MDVL 1360J. Middle English Literature (ENGL 1360J).**  
Interested students must register for ENGL 1360J.

**MDVL 1360U. Europe in the Vernacular (ENGL 1360U).**  
Interested students must register for ENGL 1360U.

**MDVL 1361D. Women's Voices in Medieval Literature (ENGL 1361D).**  
Interested students must register for ENGL 1361D.

**MDVL 1361J. Seminar in Old Norse-Icelandic Language and Literature (ENGL 1361J).**  
Interested students must register for ENGL 1361J.

**MDVL 1361K. Seminar in the Old English Language II (ENGL 1361K).**  
Interested students must register for ENGL 1361K.

**MDVL 1440. The Ottomans: Faith, Law, Empire (HIST 1440).**  
Interested students must register for HIST 1440.

**MDVL 1440B. Architecture of Solitude: The Medieval Monastery (HIAA 1440B).**  
Interested students must register for HIAA 1440B.

**MDVL 1440E. The Body and the Senses in Medieval Art (HIAA 1440E).**  
Interested students must register for HIAA 1440E.

**MDVL 1520. Pilgrimage and Sacred Travel in the Lands of Islam (RELS 1520).**  
Interested students must register for RELS 1520.

**MDVL 1530. Methods and Approaches to Islamic Studies (RELS 1530).**  
Interested students must register for RELS 1530.

**MDVL 1530D. Islamic Sectarianism (RELS 1530D).**  
Interested students must register for RELS 1530D.

**MDVL 1560A. Italy and the Mediterranean (HIAA 1560A).**  
Interested students must register for HIAA 1560A.

**MDVL 1600. Astronomy Before the Telescope (ASYR 1600).**  
Interested students must register for ASYR 1600.

**MDVL 1610. The Divina Commedia: Inferno and Purgatorio (ITAL 1610).**  
Interested students must register for ITAL 1610.

**MDVL 1630. The Talmud (JUDS 1630).**  
Interested students must register for JUDS 1630.

**MDVL 1744. Difficult Relations? Judaism and Christianity from the Middle Ages until the Present (JUDS 1744).**  
Interested students must register for JUDS 1744.

**MDVL 1750L. Erotic Desire in the Premodern Mediterranean (CLAS 1750L).**  
Interested students must register for CLAS 1750L.

**MDVL 1801. Jewish Magic (JUDS 1801).**  
Interested students must register for JUDS 1801.

**MDVL 1813P. Captive Imaginations: Writing Prison in the Middle Ages (COLT 1813P).**  
Interested students must register for COLT 1813P.

**MDVL 1835A. Unearthing the Body: History, Archaeology, and Biology at the End of Antiquity (HIST 1835A).**  
Interested students must register for HIST 1835A.

**MDVL 1900Y. Medieval Manuscript Studies: Paleography, Codicology, and Interpretation (ENGL 1900Y).**  
Interested students must register for ENGL 1900Y.

**MDVL 1963L. Barbarians, Byzantines, and Berbers: Early Medieval North Africa, AD 300-1050 (HIST 1963L).**  
Interested students must register for HIST 1963L.

**MDVL 1963Q. Sex, Power, and God: A Medieval Perspective (HIST 1963Q).**

Interested students must register for HIST 1963Q.

**MDVL 1970. Independent Study.**

Tutorial instruction on an approved topic in Late Antique and/or Medieval cultures, supervised by a member of staff. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. May be repeated once for credit.

**MDVL 1971U. Kabbalah: An Introduction to Jewish Mysticism (HMAN 1971U).**

Interested students must register for HMAN 1971U.

**MDVL 1972H. Sex, Power, and God: A Medieval Perspective (HIST 1972H).**

Interested students must register for HIST 1972H.

**MDVL 1976R. Early Modern Globalization: Jewish Economic Activity, 1500-1800 (HIST 1976R).**

Interested students must register for HIST 1976R.

**MDVL 1979H. Prostitutes, Mothers, + Midwives: Women in Pre-modern Europe and North America (HIST 1979H).**

Interested students must register for HIST 1979H.

**MDVL 1990. Honors Thesis.**

Independent research and writing on a topic of special interest to the student, under the direction of a faculty member. Required of candidates for honors. Permission should be obtained from the Director of the Program in Medieval Studies.

**MDVL 2030D. Fifteenth-Century Sentimental Romances and Celestina (HISP 2030D).**

Interested students must register for HISP 2030D.

**MDVL 2040D. Arts du récit, 1100-1400 (FREN 2040D).**

Interested students must register for FREN 2040D.

**MDVL 2110F. Greek Palaeography and Premodern Book Cultures (GREK 2110F).**

Interested students must register for GREK 2110F.

**MDVL 2360Q. Manuscript, Image, and the Middle English Text (ENGL 2360Q).**

Interested students must register for ENGL 2360Q.

**MDVL 2970A. New Perspectives on Medieval History (HIST 2970A).**

Interested students must register for HIST 2970A.

**MDVL 2971I. New Perspectives on Medieval History (HIST 2971I).**

Interested students must register for HIST 2971I.

## Center for Middle East Studies

### Director

Shahzad Bashir

The Center for Middle East Studies (CMES) at Brown University promotes greater understanding of the cultural, social, and political dynamics that have impacted and continue to impact the Middle East and the people who inhabit it. MES seeks to increase knowledge and informed discussion of the region and its societies through research, teaching, and public engagement.

Since 2012, Middle East Studies has grown from an undergraduate concentration into one of the top centers in the country. Eschewing the hothouse legacy structures of the conventional Oriental and Area Studies models, CMES is driven by thematic research initiatives that tap into Brown's tradition of interdisciplinary, critical, and engaged scholarship. Organized through partnerships, CMES seeks to integrate Middle East and Islamic Studies into the larger streams of intellectual life at Brown University by building a cutting-edge research community, producing innovative programming, and offering an exciting array of courses and opportunities for undergraduate and graduate students.

For more information please visit: <http://middleeastbrown.org>

## Middle East Studies Concentration Requirements

The concentration in Middle East Studies (MES) seeks to build a strong, interdisciplinary understanding of historical and contemporary issues within the Middle East, broadly defined. Requirements are intentionally flexible to accommodate the focused interests of students in understanding the diverse dynamics, histories, and societies of this region. A variety of courses from departments across the University, addressing subjects from antiquity to the present day, expose students to methods and materials of different disciplines and help them build a framework for understanding the Middle East in historical and contemporary context. Concentration requirements are structured around four major cornerstones: language, foundational knowledge and methods, multidisciplinary area studies, and research.

### Standard Program for the AB Degree

Foundational Courses: All MES concentrators are expected to take both of the following foundational courses. It is recommended that students take the first foundational course (MES 0100: The Middle East: Cultures and Societies—offered every spring) before taking the second foundational course (MES 1968: Approaches to the Middle East—offered every fall). Foundational course requirements cannot be fulfilled via independent study, study abroad, or transfer credits.

MES 0100	The Middle East: Cultures & Societies <sup>1</sup>	2
MES 1968	Approaches to the Middle East (HIST 1968A) <sup>2</sup>	

Electives: Students must take at least three elective courses chosen in consultation with the Director of Undergraduate Studies (DUS) from the list of courses offered within MES or that are cross- or X-listed by MES. To allow for exposure of different disciplinary approaches to the Middle East, students must take at least one course in the humanities (offered within the departments of Archaeology and the Ancient World, Classics, Comparative Literature, History of Art and Architecture, Modern Culture and Media, Philosophy, or Religious Studies) and at least one course in the social sciences (offered within the departments of Anthropology, History, International Relations, Political Science, Sociology, or Urban Studies). Some examples of recent courses that would fulfill these requirements include:

Humanities			3
CLAS 0660	The World of Byzantium		
HIAA 0041	The Architectures of Islam		
PHIL 0203	Introduction to Islamic Philosophy		
RELS 0088	Judaism, Christianity, and Islam		
Social Sciences:			
ANTH 1150	Middle East in Anthropological Perspective		
HIST 0244	Understanding the Middle East: 1800s to the Present		
POLS 1822I	Geopolitics of Oil and Energy		
SOC 1871L	Migration, Displacement and Emerging Community Experiences: Contemporary Turkey		
URBN 1870K	Jerusalem Since 1850: Religion, Politics, Cultural Heritage		

Language Semesters: Middle East Studies concentrators are expected to achieve competence in at least one of the modern Middle Eastern languages, such as Arabic, Persian, Hebrew, or Turkish. This entails the completion of at least six semesters of Brown language coursework in one of these languages, or the equivalent through transfer or study abroad credits. Students who have reached proficiency in a Middle Eastern language but have not received six credits at Brown (including transfer and/or study abroad credits) can fulfill this requirement: <sup>3</sup>

- Through advanced reading and writing courses in that language. Recent examples include:

COLT 1310J The Arab Renaissance

COLT 1431B Modern Arabic Poetry

- Through taking courses in a second Middle Eastern language.

- Or through courses in a non-Middle Eastern language to be used in a senior capstone project (for example, Spanish for the study of Andalucía or French for the study of North Africa).

Capstone/Honors Project: MES requires all concentrators to conduct a capstone project within their senior year (i.e., in their last two semesters before graduation). The purpose of the capstone is to synthesize and apply the skills and knowledge that MES concentrators have acquired through the MES curriculum—including disciplinary perspectives, methodological and theoretical approaches, background in the historical and contemporary dynamics of the region, and language competency—to particular interests developed through the concentration. Capstones offer students the opportunity to integrate and build upon their experiences within the concentration, while demonstrating intellectual creativity, research skills, and effective communication, and should serve in some sense as a culmination of or reflection on what one has gained in the concentration. All students are expected to present their capstone research in the final semester before graduation. Presentations of honors theses will be approximately twenty minutes long, and those of non-honors capstone projects will be approximately ten minutes long, both followed by a question-and-answer session. Capstone projects must fulfill the following requirements:

- Must be taken in the final two semesters before graduation (excluding summer and winter sessions)
- Must incorporate research in a Middle Eastern language.
- Must be taken for a letter grade.
- Must be approved or overseen by a MES or MES-affiliated faculty member.
- Must be presented in the final semester before graduation.

Capstones can take one of three forms:

- A Middle East-focused research paper of at least 20 pages for an existing concentration-eligible (MES-coded or X-Listed) course, undertaken with the permission and supervision of the instructor.
- An independent study or project (artistic, research, or otherwise), approved by the DUS and supervised by at least one faculty member for at least one semester under the MES 1970 - Independent Study designation.
- A two-semester honors thesis, completed under the supervision of a primary reader (who is an MES or MES-affiliated faculty member) and a secondary reader (who can be from other Brown departments and programs), and in coordination with the DUS.<sup>4</sup>

Total Credits 12

<sup>1</sup> For concentrators graduating before 2023, courses designated “Foundational Courses” under previous concentration requirements may be used to fulfill this requirement. Please meet with the MES Director of Undergraduate Studies (DUS) to discuss any such arrangements.

<sup>2</sup> Previously HIST 1968 or HIST 1968A: Approaches to the Middle East. Any student who has taken HIST 1968 or HIST 1968A: Approaches to the Middle East, will have fulfilled this requirement.

<sup>3</sup> Concentrators are encouraged to discuss options for fulfilling language requirements with the DUS.

<sup>4</sup> Two semesters of Independent Study (MES 1970 & MES 1971) are required for honors and will raise the number of required courses to 13. One of these Independent Study courses should take the form of a thesis writing workshop supervised by the DUS or other designated MES faculty during the first semester of thesis writing. Students must declare their intention to write an honors thesis and submit a thesis prospectus (to include a thesis proposal, research plan, proposed thesis outline, initial literature review, and initial bibliography) by April 25<sup>th</sup> of their junior year (for May graduates) or November 20<sup>th</sup> of their junior year (for December graduates).

#### \* Study Abroad

Concentrators may apply up to two courses per semester of study abroad toward their MES concentration requirements, with a maximum of four courses (for two semesters abroad). Students must meet with their advisors and have them sign off on their specific course selections prior to embarking upon their program. Study abroad transfer credits may only be applied toward fulfilling elective and language requirements. Study abroad transfer credit may not be used to fulfill foundational course requirements.

#### \*\* Dual Concentrators

Middle East Studies concentrators may apply up to two courses that fulfill MES concentration requirements toward fulfilling the requirements of another concentration. Language courses do not count toward this two-course limit on overlapping courses.

## Honors

To be eligible for honors, students will have earned an “A” in the majority of courses for the concentration. Honors students will be required to have at least six semesters of language study (Advanced), two semesters of which may be counted toward the elective requirement. Two semesters of Independent Study (MES 1970 and MES 1971) towards the Honors Thesis with the thesis advisor(s) are required. This is typically done during senior year and will raise the total number of required courses to 13.

## Courses

### MES 0100. The Middle East: Cultures & Societies.

This course highlights major cultural, social, and political developments in the amorphous region known, since the 20th century, as the Middle East. Covering expanses of space and time, this course attends to a diversity of peoples and polities, and considers different regional concepts that include some or all of the territories normally included in the Middle East (including the Fertile Crescent, the Mediterranean world, the Indian Ocean world, the Arab world, and the Muslim world) and addresses the region’s coherence in terms of shared historical and political experiences, religious and cultural references or practices, and/or socialities and ways of being.

### MES 0155. Cultures of the Contemporary Middle East.

In our exploration of Middle Eastern social movements, this course addresses the role of culture and art in social change; the relationship between faith and politics; as well as the impact of national, regional, and transnational discourses on identity, ethics, and citizenship. The study of social movements in the region will address the impact of technology, media, women’s rights and LGBT movements, as well as economic liberalization, entrepreneurship, and the politics of oil. Finally, we will trace the emergence and consequences of the “Arab Spring.”

### MES 0165. How Did We Get Here: Middle East City from Antiquity to the Present.

This course examines the origins, evolutions, and radical transformations of Middle Eastern cities. By combining essential and original texts in religion, law, and politics with studies of architectural form and urban morphology we explore the cultural significance and ethical claims from historically situated cities. From the ancient Levantine household to the contemporary Gulf megalopolis, analysis of the relationships between subtle and articulated cultural meanings and corresponding concrete architectural embodiments reveals rich depth in each case. While we might see ancient hierarchies long buried by modernity’s desire for a capitalist city, our analysis shows they are very much alive and struggling.

**MES 0170. Visual Expressions of Social Change in the Contemporary Middle East.**

This course explores the relationship between the visual arts and social change in the contemporary Middle East. With a specific focus on visual art, architecture and cinema we examine how visual creativity expresses the desires of social and political groupings and, existing within historic traditions, give form and shape to larger social-political movements across the area. From the 20th century, we see the intertwining religious, political, and social movements, large and small, nationalist and separatist, embodied in visual expressions. This interdisciplinary course will uncover the iconographic origins of contemporary art to understand how visual expressions convey meanings in shaping our world.

**MES 0750. Forced Displacement: History, Ecologies and Impacts.**

Course covers the basis, processes and consequences of forced displacement in an interdisciplinary and historical perspective. Forced displacement is unintended mobility of humans in large groups who move out of their place of origin for extended periods or often permanently. It has played a vital role in shaping our modern world. Drivers of forced displacement have persisted while others subsided. Wars, religious persecution and targeting of specific ethnic groups displace millions annually. Forced displacement is implicated in the creation of nation states, altering group identities and organizing people, and the responses of the host community, the state and wider world.

**MES 0825. From Blind Owls to Mute Dreams: A Introduction to Modern Iranian Literature (in translation).**

This is a survey of the modern Persian literature of Iran (in translation) for students who have little to no background in the topic. Starting in the early twentieth century and continuing until the present day, we will examine the major themes and aesthetic techniques of some of the most important writers who have shaped modern Persian literature throughout the twentieth century, paying significant attention to the socio-political context and formal characteristics of texts. Prose-fiction (novels and short stories) will be the focus, also read a number of poems, essays and memoirs. All readings will be available in English translation.

**MES 0850. The Wall, the Drone and the Tunnel-Theaters of Sovereignty and Resistance.**

Israel/Palestine is a site for experimenting with technologies of security and warfare, including those serving resistance and insurgency. The seminar examines three technologies: drones used for collecting intelligence and "targeted killings;" heavily surveilled separation walls used to enforce a strict regime of movement; tunnels used by insurgency forces for undercover movement. We will study these technologies' modes of operation; the discourse that represent and justifies their actual deployment; the local and global economy of violence in which they are embedded; the system of state sovereignty which they enable or undermine; and the political regime which they help reproduce or destabilize.

**MES 0950. Cultures, Societies and Resistance in the Arab World.**

This course examines the manifestations of counter-hegemony, resistance and dissent in the Middle East and North Africa. It studies the ways in which dominant forms are countered in cultural production and every day cultural practices, analyzing how subcultures, social movements and individuals have negotiated with, subverted and resisted these forms of social and political hegemonies through the use of art forms such as writing, poetry, music, political film, political posters and pamphlets, performance art and public art and the mixed outcomes of many of these struggles. The readings cover major issues in cultural theory, cultural sociology, cultural studies.

**MES 1000. Tradition and Protest: Persian and Iranian Music.**

Examines Persian and Iranian musical approaches to tradition and protest. First half focuses on traditional Iranian music. Students will learn the basic cultural and musical traditions underpinning Persian/Iranian musical styles. Through directed reading and listening, and occasional in-class performance by the instructor, students will learn the primary characteristics of Iran's classical music traditions and instruments; relevant musical concepts and terminology, and develop critical listening skills. Second half examines how modern Iranian musicians are disrupting these traditional concepts as a form of protest, making the music relevant to modern listeners while fundamentally changing conceptions of classical poetry in the process.

**MES 1001. Revolution and Poets: Content and Form in Iranian Poetry.**

Explains classical rules of Persian poetry and development of poetic content by several different modern Iranian poets. Examines how modern poets such as Shamlou, Akhavan, and Forough have been influenced by Nima Yooshij, the father of modern poetry in Iran. We will explore different formalistic approaches to poetry in Iran from the 1960's to present, and examine various literary movements and their relation to the Islamic Revolution and post revolutionary context. We will examine the new postmodern poets from the 1990's to present and the ways in which classical form is repurposed to achieve social commentary in subversive ways.

**MES 1050. Israel/Palestine: A Critical Lexicon.**

This is an introductory course to the question of Israel/Palestine. The course uses a series of alphabetically ordered and carefully selected concepts as a way to cut through the dense history of the region and the conflicting forces that shape its present. From "Colonialism" to "Zionism", each concept will be surveyed with respect to its history, the pattern of its present usages, the discursive formations to which it belongs, and its political impact, taking into account the inevitable, conflicting ideological biases and discursive constraints of the many kinds of knowledge about Israel/Palestine.

**MES 1055. Zionism and some of its Jewish Critics: Political, Philosophical, and Theological Perspectives.**

Zionism is an idea, an ideology, a national movement that sought to solve "the Jewish question" in Europe, a political project that morphed into a political regime, a mighty colonial force, a form of Jewish secularization and an engine for religious revival. As such Zionism has been accompanied with criticism from its inception. The first part of the seminar will study of Zionism through the eyes of some of the major thinkers who shaped its ideology and practices. The second part will look at Zionism through the eyes of some of its (more and less sympathetic) Jewish critics.

**MES 1120. Art, Culture, and Society in Tehran.**

This course explores the city as physical and metaphorical space and aggregator of possibilities. It focuses on Tehran, in its historical, geographical, artistic and virtual specificity, and artists who have lived there, including: Kamal-al-molk (and his followers in the early twentieth century; artists associated with Saqqakhaneh (modern school of art) at mid-twentieth-century, artists of the Revolution and the Iran-Iraq war in the 1980s and 1990s, and contemporary urban and transnational artists. By examining urban participation, aesthetics, and politics in Tehran across more than a century, the course provokes critical reflection on experience and representations of urban space, citizenry and creativity.

**MES 1150. Labor and the Long Downturn in the Middle East.**

This course examines the question of labor in the contemporary Middle East. The 1970s saw a global economy defined increasingly by deindustrialization, intensified competition, financialization, and squeezes on profitability. For workers, these changes meant that technological development, agrarian change, debt, and increasing precarity have transformed who works, where they work, and the sorts of politics that work (or its absence) gives rise to. This course examines these wider concerns within the context of the Middle East. Through a focus on social history and ethnographic accounts, it illuminates the ways different groups of workers experience and grapple with these broader transformations.

**MES 1170. Iranian Art: Sites and Sights.**

This course introduces students to the modern and contemporary history of art in Iran, including architecture, visual art, cinema, theatre, and politics. It starts with the transition from the Qajar period (1781-1925) and its visual culture to the modern 20th-century nation-state, addressing; processes of urbanization; spread of modern technologies; revolutionary sentiment of 1979; displacement and formation of diasporic communities after the Islamic revolution; and the emergence of Internet technology in the 21st century. This historical backdrop informs investigation into artistic milieus, platforms, and the ever-changing notion of creativity. Course readings consist of excerpts from primary sources in addition to textbook assignments.

**MES 1200. Ways of Seeing: The Arab World in Global Perspective.**

The course examines visual politics in contemporary Middle Eastern society and grapples with fundamental debates in the study of cultural politics and visual cultures of the Arab region in a global context. We will contextualize the region's contemporary visual cultures within wider debates and scholarship on the construction of subjectivities, the distribution of power, the formation of identity and belonging, and culture and representation. Emphasis is on translation and reception in a global context and transnational frame by focusing on how states and security, conflicts and displacements, social movements and revolution, aesthetics, art and global media are linked, characterized, analyzed.

**MES 1235. Policing and Imprisonment in the Modern Middle East.**

Policing figured prominently in recent events, from the self-immolation of Tunisian street vendor Mohamed Bouazizi to the rise of the Islamic State. Repressive regimes relied heavily on police, prisons, and criminal law to maintain power and authority. This course examines recent uprisings and ongoing conflicts, and questions of state and non-state violence. Major topics are: the role of Islam in law and criminal justice; the imposition of European colonial rule; the rise of police states; the production and maintenance of a gendered social order; non-state and informal mechanisms of maintaining "law and order"; and the role of law and security.

**MES 1240. Middle East as Global History: Comparing and Connecting Theories and Approaches.**

This seminar explores a global history perspective to the Middle East and a Middle Eastern perspective to global history since the late eighteenth century to the twentieth century and beyond. This is a time in which shifting global orderings and ties between regions of the world become reconfigured around newly visible, large-scale processes and shifting flows of power: statesmen, thinkers, revolutions, war and migration render themselves to new forms of global imagination beyond imperialism and colonialism. The seminar intends to provide a rich expose on new trends in history writing focus on global history and transnational perspectives.

**MES 1243. Understanding Palestine-Israel: Ideologies and Practices.**

"Palestine-Israel" is a name designating a territory between the east shores of the Mediterranean Sea and the Jordan River. In addition to the two national movements that fight over this territory, the Jewish (Zionist) and the Palestinian, this land is a matter of ongoing engagement, investment, and entanglement for foreign powers, religious orders, and international organizations. This course will introduce main aspects of this ongoing struggle, its history, and its recurring patterns. Each of these perspectives will be part of what needs to be narrated and explained, not imposed as a framework for the narrative and the explanation at stake.

**MES 1244. Orientalism and the Question of Palestine.**

Edward Said's ground breaking work, *Orientalism*, was published in 1978. A year later, Said published *The Question of Palestine*, whose explicit task was to present the Palestinian story and cause to an American and European audience. We will be acquainted with some moments from the history of "the question of" as a form intellectual intervention and a politics of discourse that both expresses and takes part in polarized relations of power. We will ask who is authorized to be an author of such a question and who is placed in the position of its problematized object and its context.

**MES 1250. Palestinians and Kurds: The Condition of Statelessness.**

This seminar seeks to achieve three interrelated goals: to introduce students to the condition of statelessness experienced by two ethnic groups in the Middle East, the Kurdish and Palestinian peoples; to examine the contours and potency of, and the problematics associated with, the concept of statelessness; and to offer the production and management of statelessness as a viable perspective for the study of the modern Middle East. We look for analogies and distinctions between the two cases, and qualify and multiply the condition of statelessness for each, guided by categories of Nation, State, Nationalism, Colonization, Settler Colonialism, Citizenship, and Precariousness.

**MES 1265. Culture and Politics in the Modern Middle East.**

This seminar examines the various cultural and artistic manifestations of protesting histories of violence in the Middle East. By studying the ways in which dominant understandings are countered in cultural production and everyday cultural practices, it will analyse how collective and personal memories have been appropriated by artists, writers and filmmakers throughout the region to protest social and political hegemonies. The readings cover major issues in cultural theory, cultural sociology, cultural studies and visual cultures. The seminar will theorize themes such as the aesthetics of resistance, memory, dissensus, social movements and global culture through specific case studies.

**MES 1270. Histories of Watching and Surveying.**

How are surveillance practices historically embedded in social fabric? How have surveillance technologies altered social life throughout history? This course explores these questions by mapping the complex ways that technologies and societies interact to produce security, fear, control, and vulnerability. Some of the areas covered include close-circuit television (CCTV) in public and quasi-public spaces, biometric technologies on the border, and a host of monitoring technologies in cyberspaces, workplaces, and the home. Readings are drawn from the critical theories in visual culture, science-fiction, and popular media.

**MES 1290. War and Cultural Representation in the Modern Middle East.**

This is an overview of contemporary Arabic and Persian literatures and cinemas through war in literature and film originating from the Eastern Arab World, Iran and Afghanistan. Using contemporary works of prose fiction, poetry and film, we interrogate the various ways in which the people of the region have grappled, through literature and film, with some of the most brutal conflicts that the world has witnessed in the late twentieth and early twenty-first centuries. We will explore the Lebanese Civil War, the Israeli-Palestinian conflict, the Iran-Iraq War, Iraq since 1991, Afghanistan since 1979 and the current Syrian Civil War. While this course is open all students it is especially geared towards students concentrating in MES and who have upper-level reading/ translations ability in Persian or Arabic. Students at the advanced language level will do translation in lieu of a second paper.

**MES 1300. Intellectual Change: From Ottoman Modernization to the Turkish Republic.**

A critical survey of Ottoman intellectual history in the 19th and early 20th centuries. Modernization, formation of the modern state and issues of nationalism and other ideologies of the time form the main framework, analyzing their political, social and cultural impact on intellectual production in the Ottoman Empire and through the making of Republican Turkey. It is a history of mentalities organized around thematic/chronological modules, each representing a set of concepts, ideas, movements as well as facts and problems, which will be compared to the larger world of modern state formation both in thought and practice.

**MES 1350. Israel/Palestine: The One State Condition.**

This course follows the formation and transformation of the Israeli Regime, since its inception in the last years of the British Mandate in Palestine. At the theoretical level, we shall explore the difference between State and regime, ask what is a political regime, how to classify types of regimes and how to determine the regime of any given state. At the historical level we shall reconstruct and question the structural transformations and continuities of the Israeli regime, giving special attention to the impact of Palestinians' civic status and almost half a century of "occupation" of Palestinian territories.

**MES 1450. The Archival of Gestures.**

Often people think about archives as static spaces. How to develop a gestural archive able to translate instances and desires of justice? This course provides students with a theoretical and practical background on the archival of gestures in performance and the role that artists-archivists can play in contributing to change through exploring and problematizing social and political memories. We explore how Arab artists have sought and investigated this role after the "Arab Spring" and of civil disobedience against Arab regimes. We then look closely at a series of performance works, by Arab, Israeli and international artists. No dance experience required.

**MES 1550. Non-Jews in the Jewish State: A Study in the Constitution of Otherness.**

This course approaches multiple aspects of otherness by examining major sites where the work of "othering" takes place: debates relating to the "Jewishness" of the Jewish State; the legal and theological debates over the question who is a Jew; immigration and naturalization law; the regulation of marriage, burial, and religious conversion, and the recent racialization of non-Jewish aliens. The course materials are drawn from Zionist thinkers, legal documents, news items and analyses, and academic studies, as well as from literary and cinematic works. Students may concentrate on the more theoretical texts, the legal documents, or the literary and cinematic works.

**MES 1650. The Pen and the Gun: Literature and the Political Body.**

This course will examine the sphere and influence of literature and film as vehicles of expression and memory reconstruction during and following periods of dictatorship. We will explore themes such as history and/as fiction, the structuring of truth and national narrative, the intersection of human rights and medicine, and discourse of the nation as a body. Taking a transnational and cross regional approach, we will include prominent writers from Latin America (with a focus on the political 'disappearances' of the 1970's), Africa (post-colonial and civil war texts), and the Middle East (writing of, within, and through the Arab Spring).

**MES 1968. Approaches to the Middle East (HIST 1968A).**

Interested students must register for HIST 1968A.

**MES 1970. Individual Research Project.**

Limited to juniors and seniors. Section numbers vary by instructor. Please check Banner for the correct section and CRN to use when registering for this course. Required: all proposals for independent study must be approved by the faculty sponsor and the MES program director. Students should not register for any section of MES 1970 without this approval.

**MES 1971. Senior Honors Thesis.**

The purpose of this course is to guide you through the development and construction of your senior thesis project. It will provide you with empirical, methodological, and theoretical toolkits, as well as practical writing strategies, to help you bring your thesis to fruition. Open only to Senior students pursuing honors in Middle East Studies. Instructor permission required.

**MES 1985. Understanding Modern Iran.**

This course examines the history of modern Iran through primary historical documents, secondary studies and cultural production, beginning with an historical overview and attempts at historical narrative in the modern era, from the latter half of the Qajar dynasty (~1850) until today. Topics include modernist reform in the late-nineteenth and early twentieth centuries, Iranian identity, attempts at political reform, women's movement and foreign affairs. The course emphasizes the debates of Iranian intellectuals and artists and how cultural representations of major historical events and socio-political changes contribute to and challenge historical narratives and how contemporary history and politics affects cultural representation.

**MES 1990. Middle East Studies Pro-Seminar.**

This course explores the current state of Middle East Studies scholarship with an eye to its current moment of crisis. We will begin by situating MES within its institutional history, then survey classic works from its core disciplines. The second half of the course will trace contemporary debates over the significance and origin of political Islam.

**MES 1993. Middle East Politics.**

The Middle East and North Africa has consistently dominated global headlines as one of the most penetrated regional state systems in the world. Analyses of the MENA region are often bound by this monolithic rubric that has shaped how we view and understand state-society relations across the region. We examine historic and contemporary dynamics that have shaped domestic, regional, and international politics and analyze issues relating to comparative politics and international relations of the region, issues relating to colonialism and state formation, institutional configuration, authoritarianism and regime typologies, the politics of oil, identity politics, and social and economic development.

**MES 1994A. Islamic Economics.**

Despite the fact that the scriptural and early historical legacy of Islam is widely considered to be market-friendly, debates about the relationships between Islam and capitalism abound. This course moves beyond simplistic concerns of compatibility or conflict, and delves into the diverse ways by which Muslims from around the globe have devised a range of social, cultural, religious, legal and fiscal strategies that enable them to both remain true to their faith and live in today's swiftly-evolving economic context.

**MES 1995. Zionism: Political, Philosophical, and Theological Perspectives.**

Zionism has been an idea, an ideology, a national movement, a political project morphed into a political regime, and a colonial force that transformed the history of the Middle East and the landscape of Palestine. It was a Jewish response to the persecutions of Jews in Europe, a renaissance of the Hebrew language and Jewish culture, and a form of Jewish secularization that has yielded religious revival and transformation. The ideology and practice of Zionism, its politics and political theology will be studied from the perspectives of four great thinkers: Martin Buber, Hannah Arendt, Edward Said and Judith Butler.

**MES 1995B. Israel/Palestine: Holy Land – Profane Spaces.**

Seizing land in Israel/Palestine, colonizing it, shaping its boundaries, and reconstructing it as a governed space have played a major role in the struggles between Jews and Palestinians. Space has been a medium of domination and resistance, a scene of dispossession, construction and destruction, and its governmentalization has become a powerful state apparatus. Using concepts drawn from political theory, human geography, and postcolonial studies we shall examine and contrast the mental geographies and actual government of land and space(s) in Israel/Palestine and use space as a privileged perspective for understanding the history and structure of the Land's political predicament.

**MES 1996A. The Anglo-Arab Novel.**

This course examines a new development in the contemporary novel: the rise of the Arab-British novel from the late 1980s onwards. The aim is to understand this emerging genre in its historical and aesthetics specificity, and to determine how Arab immigrant writers responded to a time of profound cultural and political change. At the intersection of such processes, and in a literary culture marked by postmodernism and cosmopolitanism, does the Anglo-Arab novel develop a distinctive aesthetic form? Writers studied are: Ahdaf Soueif, Jamal Mahjoub, Leila Aboulela, and Hisham Matar.

**MES 1997A. Islam and Human Rights.**

Are Islam and human rights compatible? Both human rights and Islam raise universal claims that may conflict in some cases. We will consider various attempts by religious and legal theorists to reconcile these claims through reinterpreting Islam or deriving human rights from Islamic sources. We will explore the practical side of these issues by examining legal documents and legal practices in various Muslim countries, paying special attention to the status of women and non-Muslim minorities. We will examine tensions arising from Muslims living in Europe and N.America, such as recent debates over secularism and religion, multiculturalism and the scope of tolerance.

**MES 1997B. Visualizing the Middle East.**

How has the capacity to visualize been both an enabling and limiting condition in relation to the post-colonial production of knowledge in the Middle East? The act of seeing is taken up in its practical dimension in the ways that it requires one to pay attention to the cultural and historical specificity of mechanisms of visibility and modes of representation. Through readings and discussions, we will take heed of the following questions: What is allowed to be seen? By whom? Under what circumstances? How is the visible structured?

**MES 1997C. Ethnographic Perspectives of Islam: Tradition, Religiosity and Modernity.**

Media coverage presents two ways of thinking and approaching modern Islam. One assumes Islam to be an entire way of life and single set of religious beliefs with compulsive adherence to the Quran and the Prophetic Sunna. The other reduces Islam to a set of essentialist principles, rules and spiritual values that even many Muslims have trouble grasping.

Recent anthropological scholarship makes every-day practical interpretations, practices and living social relationships central towards understanding Islam. This class will explore socio-historical and cultural specificities by which Muslims grapple with their faith, and how they shape these resources into every-day beliefs and practices.

**MES 1997D. The Politics of Heritage, Tradition and Culture in the Middle East.**

Western media has pervasively portrayed the Middle East as "a-historical", "timeless", an "Other" that is beyond the logic of modern time. Simultaneously, it is also considered the cradle of "Western Civilization" where vital elements of "world" patrimony may be traced. But how do those who inhabit the region relate to their past and what are the various ways by which its discourses are drawn upon to embody different socio-political and ethical life-worlds? This course explores recent texts on heritage and memory while offering insights of ways in which modalities of history and memory have shaped the postcolonial dynamics of this region.

**MES 1998. The Arab Spring.**

The Middle East has witnessed significant socio-cultural, political, and economic transformations in recent decades. This seminar will explore the role of both state and non-state actors in these processes. In the face of globalization, liberalization, democratization, conflicts, and regional instability, what social movements have emerged and in what specific contexts? Additionally, how have civil society, mass media, global discourses, and Islamist groups and ideologies shaped the contemporary reality? What are the prospects for security, prosperity, and pluralism in the region? These are central questions we will attempt to address in this course.

**MES 1999. Arab Youth: Movements, Cultures, and Discourses.**

"Youth" has become a central social concept in the contemporary global economy. In the wake of 9/11, the discussion of "youth" in the Arab world became a global priority. This course takes an anthropological and sociological approach to studying youth. Why has "youth" become a focus of concern now? How does this shape our thinking about social, economic, political, and historical issues in the Arab world, and what issues does it obscure? The course examines the historical emergence and transformation of categories of "youth," "teen" and "adolescent" in the contexts of capitalist industrialization, nationalism, post/colonialism, state formation and globalization. Enrollment limited to 20.

**MES 1999A. Cultures of Neoliberalism in the Middle East.**

The course focuses on debates in the social sciences in the Arab world around contradictions of the cultures of neoliberalization in contemporary Arab culture(s), society (ies) and economy (ies). We will explore the relevance of neoliberalism to the increasing relevance of consumption and consumerism, for citizens and scholars alike, in shaping selfhood, society, identity and even epistemic reality, the concomitant eclipse of such modernist categories as social classes, the burgeoning importance of generation, ethnicity, gender, identity and social movements. Also covered, the relation of political Islam to neoliberalism, and the rise of labour migration in/out of the Arab world.

**MES 1999B. Colonialism and Human Rights.**

Are anti-colonial struggles human rights struggles? Is emancipation the objective of these struggles? Where and when do anti-colonial and human rights discourses converge and diverge? What is the role of violence in the moral, political and discursive trajectories of anti-colonialism and human rights? This course takes up these questions, starting with the reconstruction of the historical relationship between colonialism, anti-colonial struggles and the post-World War II formation of the international human rights regime. We then turn to discuss different authors who developed their anti-colonial thought and dealt with, appropriated or ignored human rights in their different conceptions of anti-colonial justice.

**MES 1999C. Elites in Arab Culture and Society.**

Social science studies the marginalized while ignoring elites and their role. This is especially the case with "Arab" Elites. Yet, to understand the conditions of the poor and marginalized, one must study elites. Elites are a lens to historically understand class formation in the Arab World, and influences beyond. We will consider how and why we study elites, different theories and methodologies of studying elites, and focus on elites in Arab societies. The course will deal with elites in the mandate period and early independence. The last part of the course will focus on elites in contemporary Arab society.

**MES 1999D. Anthropology /Sociology of Development in the Arab World.**

After the Second World War, questions of economic growth, poverty, and inequality were internationalized, leading to the rise of national and international agencies which aimed to promote development in the "Third World." This course examines the anthropological study of development. Touching on development theory (and the political context of each model), we examine connections to anthropological models of socio-cultural change, and consider the relationship between anthropology and the development industry. How can cultural relativist and applied anthropology approaches be reconciled? Can anthropologists and anthropological knowledge contribute to improving development interventions and outcomes, or are they merely critical of such interventions?

**MES 1999E. Displacement and Refugees in the Middle East.**

Displacement and refugees constitute one of the most significant sources of upheaval, instability, and uncertainty in our time. In 100 years, the Middle East saw waves of displaced persons, with no singular explanation and no end in sight: Armenians, Circassians, Palestinians, Iraqis, Yazidis, Kurds, and Syrians. The impetuses for displacement include wars, fall of empires and nations, crafting of new states, and modernization attempts and environmental disasters. These stories of displacement are distinctive for their multitude of causes and protracted defiance of resolutions. They challenge the narratives of the durability of nation-states, ascendancy of capitalism, and emplaced, "timeless" Arab populations.

**MES 2000A. Decolonizing the Racialized Female Subject: Black and Indigenous Women's Self-Making Under Empire.**

This study grapples with conceptions of freedom and humanity emergent in Black and Indigenous women's practices under empire. Colonialism is prefaced on construction of an "other." Aimé Césaire refers to this as "thingification," whereby colonial subjects are dehumanized and the colonizer "decivilized". Totalizing dehumanizing forms are resisted by praxes and epistemologies which challenge the prevailing symbolic order and assert the humanity of those regarded as subhuman. We will examine how epistemological and political contestations of the human inform discourses on freedom and sovereignty and interrogate how various categories of identity refract and re-frame conceptions of humanity, freedom, and sovereignty.

**MES XLIST. Courses of Interest to Students Concentrating in Middle East Studies.**

For information on courses which may be of interest to students concentrating in Middle East Studies, please refer to the MES XLIST in the Class Schedule menu.

## Modern Culture and Media

### Chair

Janet A. Blume

Modern Culture and Media (MCM) is committed to the study of media in the context of the broader examination of modern cultural and social formations. Our curriculum proposes a distinctive subject matter, stresses comparative analysis and theoretical reflection, and highlights the integration of theory and practice, creative thought and critical production. In research and teaching at both the graduate and undergraduate level, MCM combines the analysis of diverse texts — visual and verbal, literary and historical, theoretical and popular, imaginative and archival — with the study of contemporary theories of representation and cultural production and creative practice in a range of media. Through studying MCM, students will become critically sophisticated and knowledgeable about the theory, history, and analysis of media and cultural forms. They will also learn to produce innovative work — whether in theory, media practice, or historical scholarship — that interrogates and transforms conventional understandings of these forms.

For additional information, please visit the department's website: <http://www.brown.edu/academics/modern-culture-and-media/>

## Modern Culture and Media Concentration Requirements

Modern Culture and Media (MCM) is an interdisciplinary concentration that explores the ties between media and broader cultural and social formations. We stress creative thinking and critical production: comparative analysis and theoretical reflection, as well as work that integrates practice and theory. We thus bring together aspects of modern culture that are normally separated by departmental structures such as film and media studies, fine art, literature, literary arts and philosophy. This concentration offers the student a range of possible specializations. A student might decide to focus on the critical study and production of a certain type or combination of media (print, photography, sound recording, cinema, video, television, and digital media); or they might focus on certain cultural, theoretical and/or social formations (for example, gender/sexuality in post-Cold war television, postcolonial theory and film, the changing form of the novel, theories of subjectivity and ideology, video games and theories of representation).

These paths are united by a commitment to critical thinking/practice: rather than reproducing conventions, MCM concentrators learn how conventions emerge, what work they do, and explore ways to change them.

### Track I

Track I concentrators may choose to study a particular historical moment, a medium, or a mode of textual production, in combination with theoretical studies that examine the categories of cultural analysis: for example, the distinction between high and low culture. Examples of areas of interest include but are not limited to film, gender/sexuality, digital media, television, post-coloniality, the novel, modern thought, the modern arts, sound, and theories of ideology and subjectivity. Productive work in some modern medium or textual mode is encouraged for all concentrators. MCM's approach to production recognizes the inextricable link between theory and practice, and the possibility of a fruitful complicity between them. Production, in the sense defined here, is a theoretically informed sphere or practice, one within which acknowledged forms of cultural creation are tested and extended in close complementarity with the analyses conducted elsewhere in MCM.

Track I consists of 11 courses.

#### Core courses

MCM 0150	Text/Media/Culture: Theories of Modern Culture and Media	1
Select two of the following: <sup>1</sup>		2
MCM 0220	Print Cultures: Textuality and the History of Books	
MCM 0230	Digital Media	
MCM 0240	Television Studies	
MCM 0250	Visuality and Visual Theories	
MCM 0260	Cinematic Coding and Narrativity	
MCM 1110	The Theory of the Sign	

<b>Additional courses</b>	5
One must be an upper level course from the MCM 1200 series	
Two must be senior seminars from the MCM 1500 or MCM 1700 series	
Two must be at any level in MCM above MCM 0260	
Three additional courses. These courses must be in MCM or in related departments. <sup>2</sup>	3
<b>Total Credits</b>	<b>11</b>

<sup>1</sup> No more than three courses from this list may count for concentration requirements.

<sup>2</sup> The specific courses must be approved by an MCM concentration advisor as part of a coherent program of study.

#### Other Requirements:

1. Focus Area: Of the 11 courses required for the concentration, at least 3 courses must be in a focus area approved by a concentration advisor. These courses may be MCM courses, related courses, or a combination of the two, and they must represent a focus on some aspect of modern literature, theory, media, art or culture. Examples of possible focus areas are: mass/popular culture, gender/sexuality, language/representation/subjectivity, narrative, digital media, film, modern thought, television, the modern arts, the novel, colonialism and post-colonialism. This is **not** an exhaustive list. Production courses may be in the focus area but must be in addition to the minimum 3 courses.
2. Production: Work in production is encouraged but not required for Track I concentrators. Of the 11 courses required for concentration, as many as 3 may be in production. These may be production courses offered by MCM (film, video, digital media) or courses in creative writing, painting, photography, journalism, etc., provided they do not bring the total number of concentration courses taken outside MCM to more than 3.

### Honors:

The honors program in MCM is designed for students who wish to integrate their skills in a special project. Students who qualify for Honors in Track I are eligible to apply to do an Honors project or thesis. Students should submit a letter of intent in their 6<sup>th</sup> semester, and a formal proposal by the first day of their 7<sup>th</sup> semester. Applications will be screened by the MCM Honors Committee. (Application forms are available in the MCM office.) If approved, a student must then register for MCM 1980 (taken in the 7<sup>th</sup> semester), a one-credit course which can count towards their Focus Area requirements, and MCM 1990 (taken in the 8<sup>th</sup> semester), a one-credit thesis course in which they complete the Honors project/thesis.

### Track II

Track II concentration combines production courses with the critical study of the cultural role of practice. It aims to engage students in the analysis of theories of production elaborated within philosophical, artistic, and technological traditions, while encouraging them to produce works that interrogate these traditions.

Track II consists of 11 courses:

Two core courses:

MCM 0150	Text/Media/Culture: Theories of Modern Culture and Media	1
Select one MCM Introductory Practice course (MCM0700 series). Introductory practice courses in other disciplines may fulfill this requirement and should be selected in consultation with the concentration advisor. Possible disciplines include Literary Arts, Music, Theatre Arts and Performance Studies, Visual Art.		1
MCM 0700A	Introduction to the Production Image	
MCM 0710A	Introduction to Filmic Practice: Time and Form	
MCM 0730A	Introduction to Video Production: Critical Strategies and Histories	
MCM 0750A	Art in Digital Culture	

One additional course from the following:	1
MCM 0220 Print Cultures: Textuality and the History of Books	
MCM 0230 Digital Media	
MCM 0240 Television Studies	
MCM 0250 Visuality and Visual Theories	
MCM 0260 Cinematic Coding and Narrativity	
MCM 1110 The Theory of the Sign	
Three additional courses from the MCM 1200 or MCM 1500 series	3
Four practice courses selected in consultation with an advisor. <sup>2</sup>	4
One Senior Seminar from the MCM 1700 series or other equivalent in production	1
<b>Total Credits</b>	<b>11</b>

<sup>1</sup> At least one must be from the MCM 1500 series.

<sup>2</sup> Courses can be in any medium or combinatory sequence of media from the following departments: Modern Culture and Media, Visual Art, Music, Literary Arts, Theatre Arts and Performance Studies, Computer Science, Engineering, supplemented by approved courses at Rhode Island School of Design and study abroad. This list is not exhaustive.

## Honors:

The honors program in MCM is designed for students who wish to integrate their skills in a special project. Students who qualify for Honors in Track II are eligible to apply to do an Honors project or thesis. Students should submit a letter of intent in their 6<sup>th</sup> semester, and a formal proposal by the first day of their 7<sup>th</sup> semester. Applications will be screened by the MCM Honors Committee. (Application forms are available in the MCM office.) If approved, a student must then register for MCM 1980 (taken in the 7<sup>th</sup> semester), a one-credit course which can count towards their Focus Area requirements, and MCM 1990 (taken in the 8<sup>th</sup> semester), a one-credit thesis course in which they complete the Honors project/thesis.

## Modern Culture and Media Graduate Program

The department of Modern Culture and Media offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. There is no terminal Master's program, but students who enter the doctoral program only with an undergraduate degree may earn an A.M. en route to the Ph.D.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/modern-culture-and-media>

## Courses

### MCM 0110. Theory and Analysis of Modern Culture and Media.

An introduction to critical theory, cultural studies, and media analysis that addresses print, photography, film, television, and digital media. We will examine these media in relationship to influential theoretical approaches such as structuralism and post-structuralism, ideological analysis and psychoanalysis, feminist and queer theory, critical race theory and theories of post-colonialism and globality, and media and technology studies.

### MCM 0150. Text/Media/Culture: Theories of Modern Culture and Media.

This introductory course will explore its three key terms "modern," "culture," and "media" through a variety of theories, historical narratives, and media objects. We will ask how different media—including print, photography, cinema, television, digital art, online video, archival practices, and social media—yield distinct modes of seeing, thinking, and feeling, structure the ways we act and engage with the common world, and communicate and collaborate. We will read semiotic theory, critical race studies, feminist, post-colonial, queer and political theory, and examine concepts such as textuality, visuality, and networks. Open to undergraduates only.

### MCM 0220. Print Cultures: Textuality and the History of Books.

Print media are ubiquitous, appearing in myriad forms, material configurations, and genres. This course investigates the concept of print as a mass medium, the first produced by means of mechanical reproduction. We will give particular attention to the theoretical problematics that govern its analysis and to competing concepts of print as a form. The course will trace the emergence of mass literacy and reading habits, print culture and the public sphere, the rise of the novel and history of the book, as well as concepts of literariness and representation, mediation and signification, narrativity and virtuality, the work and the text.

### MCM 0230. Digital Media.

This course introduces students to the critical study of digital media: from surveillance to activism, from cyberpunk fiction/films to art installations, from social media to video games. We will analyze the aesthetics, politics, protocols, history and theory of digital media. Special attention will be paid to its impact on/relation to social/cultural formations, especially in terms of new media's "wonderful creepiness," that is, how it compromises the boundaries between the public and private, revolutionary and conventional, work and leisure, hype and reality.

### MCM 0240. Television Studies.

Introduces students to the rigorous study of television, concentrating on televisual formations (texts, industry, audience) in relation to social/cultural formations (gender, generational, and family dynamics; constructions of race, class, and nation; consumerism and global economic flows). That is, this course considers both how television has been defined and how television itself defines the terms of our world. Students MUST register for the lecture section, the screening, and a conference section. Open to undergraduates only.

### MCM 0250. Visuality and Visual Theories.

How do we see the world? Not only through our own eyes but through the eyes of others and with the mediation of technologies, perspectives, and points of view, giving us an embedded language to interpret what we see. In the last centuries, this construction of our visual field has been heavily indebted to imperial and racial capitalist modes of production. We will examine these constructions through a variety of technological devices: the camera obscura, panorama, photography, and cinema, and their use in processes of colonization and decolonization, drawing on the case of Algeria and other cases as well.

### MCM 0260. Cinematic Coding and Narrativity.

Introduces students to rigorous study of the structural and ideological attributes of cinema, concentrating on the dominant narrative model developed in the American studio system and alternatives to that model. Attention to film theory in relation to questions of representation, culture, and society. Students become conversant with specific elements and operations of the cinematic apparatus (e. g. camerawork, editing, sound-image relations) and how they produce discursive meanings. Students MUST register for the lecture, section and one screening. A sign-up sheet will be available for conferences after the first class meeting. Open to undergraduates only.

### MCM 0700. Introduction to the Moving Image.

The purpose of this course is to provide a basic introduction to film and video production and to begin to consider the kinds of texts that might be produced using these media. Students are expected to work in an intelligent manner, take risks with the content and form, engage in empirical research of the medium, and in so doing, examine common presumptions about media production. Students will utilize 16mm non-synch film cameras and small format video to produce a series of short projects emphasizing the creative use of these media in various social and visual arts contexts. Classes will consist of screenings and discussion of a wide variety of works, basic technical demonstrations, and critiques of student work. No previous production experience necessary. Prerequisites (two of the following or equivalent): MCM 0100, 0150, 0230, 0240, 0250, 0260, 1110. Application required. Enrollment limited to 15. Written permission required. Mandatory S/NC.

**MCM 0700A. Introduction to the Production Image.**

The course will provide students with a basic introduction to digital sound and image acquisition and post-production, and to consider the particular capabilities of these digital technologies, especially as these relate to the production of meaning. Of particular interest will be the representational limits of these technologies at the intersection of science and art. Classes will be organized as workshop environments where extensive class time will be devoted to hands-on learning with digital film cameras, lighting, and digital sound recorders. There are no prerequisites for this class.

**MCM 0700B. Mediating the Live: Making and Documenting Performance Art.**

This course focuses on performance art and how artists use recording technologies to document their acts. We will look at key examples of performance art from the past five decades to understand how artists have explored gesture, movement, conduct, speech, embodiment. Documentation is especially important to performance because of the ephemeral nature of the art form. While the performance document is not the same as the performance, it is central to our understanding of the medium and often intrinsic to the works themselves. Students will experiment with various presentation platforms and recording technologies to understand their relationship to performance art.

**MCM 0700C. Screenwriting I (LITR 0110E).**

Interested students must register for LITR 0110E.

**MCM 0710A. Introduction to Filmic Practice: Time and Form.**

A studio-style course on working with time based media, focused specifically on the technology of 16mm film production. With its focus on photographic and montage processes, as well as lighting and sound, the principles established in this course provide a solid foundation for all subsequent work in media, whether cinematic, video or new media, and it is strongly advised as a foundation level, skills oriented media course. Students produce a series of short, non-sync films. No previous experience required. Screenings, demonstrations and studio work.

**MCM 0720. Intermediate Filmmaking: Cinematic Space.**

Introduces more sophisticated film production techniques, including sync sound and lighting technique. Explores the influence of digital technologies on cinematic practice. Studio work supplemented by screenings, demonstrations, and discussions. Group and individual projects. Prerequisite: MCM 0710. Application required. Application is available in the MCM office or from <http://www.brown.edu/Departments/MCM/>. Students must bring a completed application to the first class to be considered for admission. Class list will be posted 2 days after the first class meeting. Enrollment limited to 12. Instructor's permission required. S/NC.

**MCM 0730A. Introduction to Video Production: Critical Strategies and Histories.**

Provides the basic principles of independent media production through a cooperative, hands-on approach utilizing digital video. Emphasizes video as a critical intervention in social and visual arts contexts. A major project, three shorter works, and in-class presentations of work-in-progress required. Weekly screenings contextualize student work. No previous experience required.

**MCM 0730C. Foundation Media (VISA 0120).**

Interested students must register for VISA 0120.

**MCM 0740. Intermediate Video Production: Sound, Image, Duration.**

Expanded principles of independent video production utilizing small format video (Mini DV). Emphasizes video as a critical intervention in social and visual arts contexts. A major project (10-20 minutes) and a class presentation concerning your project are required. Prerequisite: MCM 0730. Application required. Application is available in the MCM office or from <http://www.brown.edu/Departments/MCM/>. Students must bring a completed application to the first class to be considered for admission. Class list will be posted 2 days after the first class meeting. Enrollment limited to 15. Instructor's permission required. S/NC.

**MCM 0750A. Art in Digital Culture.**

How do we produce, disseminate, and exchange images in a global networked society? How do digital technologies challenge conventions about art making, authorship, and audience? This production course introduces students to the practice, and critical inquiry into art in digital culture. The class will engage in contemporary debates on art and new media and will experiment with digital photography, video, and coding. Throughout the semester, students will work on a series of short projects, and a final individual or collaborative work. Artist case studies include Harun Farocki, Oliver Laric, and anonymous-memes-creators; readings include, Hito Steyerl, David Joselit, and Boris Groys.

**MCM 0750C. Subtle Machines: Designing for Engagement and Response-Ability.**

We will build novel individual and collaborative extensions enabling engagement in dialogues and in structures of communication otherwise difficult due to social, political, technological, habitual, and/or unavowable circumstances. Students will develop individual and collective hypotheses, project plans, built apparatuses and systems, actions and performances. We will read and discuss excerpts from Donna Haraway's *Staying with the Trouble*, Maurice Merleau-Ponty's *Phenomenology of Perception*, D. W. Winnicott's *Playing and Reality*, and Karen Barad's *Meeting the Universe Halfway*. We will build with familiar and experimental electronic and other materials. Work may occasion collaboration with multiple departments at Brown as well as more broadly.

**MCM 0750D. Dynamic Futures: Speculative Media.**

In this co-learning course we will articulate the effects rapid adoption of AI has in culture to speculate possible actions, technologies, systems, and performances for futures which value ethical relationships. What contributions can artists uniquely bring to cybernetics? Can we reach beyond the limits of technological "fixes" and the veil of novelty 'clout' or 'influencer' culture? How do we design for the benefit of differently abled bodies? Can artists reconcile systems designed for endless growth on a finite planet? This course will be driven by readings and discussions as we build to present collaborative proposals for dynamic holistic futures.

**MCM 0760. Intermediate Digital Media Production.**

How do technologies enabling new forms of media and communication reconfigure notions of geography, location, speed, presence, community, autonomy, public, private, and one's ability to participate in culture? This class is an exploration of how artists and other cultural producers use these new technologies and new conditions to activate networks, form communities, create access, self-publish, proliferate, draw attention to context, demand agency, redefine property, and develop spaces for exchange and play.

**MCM 0780A. Soundtracks: Sound Production and Visual Media.**

A production course that examines the role of sound in film, video, and installation forms. The listening assignments and visual media screenings will foreground the usage of audio in the works of selected artists/filmmakers. The course also considers works of sound art. Readings by sonic theorists and producers will examine the possibilities of sound production as a key register of modern social and aesthetic experience. Class members should have completed at least one time-based media class. Students are expected to be competent technically.

**MCM 0790. This is a Public Service Announcement.**

This course will examine the broad mission of "public service" media in its various iterations, both in commercial broadcast television, state run television, and in numerous forays by artists and collectives into public space. Students will produce a series of short video and/or installation projects that will explore critically the content and form of the Public Service Announcement and its historical precedents. In addition, the class will also collectively design, shoot, and produce, in collaboration with the RI Department of Education, their own Public Service Announcement that will air on local television stations. This will be a rare opportunity for undergraduate students not only to gain hands-on production experience, but also to think about and exhibit work outside of the University classroom context. Prerequisite: MCM 0700, MCM 0710, MCM 0720, MCM 0730, or MCM 0740.

**MCM 0800A. Agency and Representation.**

Agency is one of the most popular concepts across the disciplines today, but its definitions are often far from satisfactory in relation to representational forms such as literature and film. Using both fictional and theoretical texts, this course will examine some common assumptions about agency and develop a range of possible interpretations that will make the term viable in the study of artistic representation. For first year students only.

**MCM 0800B. Freshman Seminar on Visuality.**

An examination of the key texts (from such diverse fields as philosophy, visual arts, cultural studies) which describe the historical transformation of personal and social visual space. We will explore, for example, Renaissance and Cartesian optics, the mechanization of vision in the late nineteenth century and recent hypotheses around machine-centered visuality. For first year students only.

**MCM 0800C. Marx, Nietzsche, Freud: History of Theory.**

Many of the most pressing theoretical issues addressed by contemporary cultural analysis were first investigated in the works of these three groundbreaking intellectuals. This course will survey some of their major works, with attention to such concepts as ideology and the commodity; the will to power and truth in language; the unconscious and sexual difference. For first year students only.

**MCM 0800D. Sound for A Moving Image.**

A production/seminar. An examination of the role of sound in the works of five exemplary artists/filmmakers while we produce sound works for filmic projects. For first year students only.

**MCM 0800E. Race and Imagined Futures.**

Why is race so important to imagining utopian or dystopian futures - to signaling world peace or Malthusian disaster? What do these imaginings tell us about contemporary anxieties over / desire for multiculturalism and globalization? This course responds to these questions by examining speculative, science and utopian fiction and films by African-, Asian- and Euro-American authors/film makers. Readings will be theoretical, as well as literary. Enrollment limited to 19. Students MUST register for the lecture section and the screening.

**MCM 0800F. The Face in Cinema.**

Cinema has always been obsessed with the thematics of the human face. The close-up is most frequently associated with a revelation of intense human signification, with a rendering legible of the face as the signifier of the soul, and with the face as the privileged signifier of individuality, truth, beauty, and interiority as well as the most basic support of intersubjectivity. We will examine the face in the cinema in relation to the star system, theories of desire and affect, and a history of representation of the face (Darwin, Galton, Duchenne, etc.). Films by Dreyer, Hitchcock, Warhol, Wiseman, and others. Students must register for the primary meeting and one film screening. Enrollment limited to 19 first year students.

**MCM 0800H. TV/Not TV: Theory and Production.**

This freshman seminar examines both commercial television and non-commercial media forms, considering the dialogue and/or tensions between them. What are the critical potentials and political stakes of viewing TV and of making independent media? How can we re-write TV's cultural codes by stimulating alternative readings, fostering new interpretive practices, creating different texts, or developing diverse modes and sites of distribution? Combining theory and practice (media studies, televisual and anti-televisual screenings, and simple production assignments using available technologies), this course encourages students to read and critique commercial television through both analysis and their own creative media practices. Enrollment limited to 19 first year students.

**MCM 0800I. Victim Testimonies.**

This seminar will explore primarily first person narratives and historical and other accounts that seek to recreate victim's voices (of the Jewish Holocaust, Stalin's terror, the Algerian War, the Rwandan genocide) in order to understand the cultural contexts and narrative styles that fashion victims, shape readers' views of them, and lead us to take some more seriously than others. Enrollment limited to 19 first year students.

**MCM 0800J. The Revolution is Being Photographed.**

The course will examine the following idea: revolution is not an epoch making event but a dialect, a genre and grammar of practices and gestures. Images and moving images will be read as the "written" signs of this dialect, which document more and less known revolutionary moments. The recurrent familiar gestures repeated by the demonstrators will be studied as components of a language rather than planned actions carried out to achieve a given goal. The recurrence of the same idioms and gestures in various parts of the world requires questioning the universal and regional dimension of this language. Enrollment limited to 19 first year student.

**MCM 0800K. Pirates!.**

This course examines the figure of the pirate and understandings of piracy from Treasure Island and Pirates of the Caribbean to Pirate Bay and the WTO—that is, from sea-faring pirates and early print culture to the Internet and "pirate modernity." What do pirates do, mean, stand for, teach us? Readings, discussions and screenings will focus on both the history of pirates and piracy as well as the contemporary (media) pirate and issues related to creativity and originality, intellectual property rights and global governance, participatory cultures and democratization, information feudalism and the pirate modernities of the Global South, enclosures and the common. Enrollment limited to 19 first year students.

**MCM 0800L. "I Don't Even Know Why They Call It Color TV": Television and Race in America.**

Our era has been called both "post-televisual" and "post-racial," yet images that define and are defined by (mis)understandings of race fill our screens (whether on TV sets or other means for disseminating TV). Formations of television and race not only remain pressing concerns but are intertwined, mutually constructing one another. This course thus explores how notions of race have been mediated and how media have figured race. Topics include: stereotype analysis; race in television history; scandal and crisis; intersections of gender and sexuality; consumerism and commodification; racial representation across TV genres (comedy, drama, sports, reality TV), and new media possibilities.

**MCM 0800M. The Terrible Century (ENGL 0150U).**

Interested students must register for ENGL 0150U.

**MCM 0800N. Hitchcock! (ENGL 0151A).**

Interested students must register for ENGL 0151A.

**MCM 0800O. Global Anime.**

This course provides a systematic introduction to the forms, history, and culture of Japanese animation (anime). Surveying the historical developments, artistic styles, major themes and subgenres of anime under both the national context of Japan and a wider trajectory of globalization, this course focuses on analyzing the forms and idioms of anime in relation to changing technological conditions and their cultural ramifications. The students are expected to relate anime culture with their experience of new media technologies, and to expand their artistic interest in anime to wider theoretical questions such as posthumanism, globalism, techno-orientalism, and media convergence.

**MCM 0900A. Cinema and Stardom: Image/Industry/Fantasy.**

Focuses on the star within the "machinery" of Hollywood cinema: how stars function in the film industry, within cinematic and extra-cinematic texts, and at the level of individual fantasy and desire. Including screenings of films which exploit, foreground, or critique star images, also considers the ideological implications and cultural consequences of stardom.

**MCM 0900B. Global Cyberpunk.**

Examines how cyberpunk functions both as a global phenomenon and as a way to imagine the global. Texts include American science fiction by authors such as Octavia Butler and Neal Stephenson; anime such as *Akira* and *AD Police Force*; feature films such as *Blade Runner*; as well as theoretical texts on globalization, science fiction, and animation.

**MCM 0900F. Real TV.**

This course will investigate the construction of reality on U.S. television, considering not only specific reality genres (news and "magazine" programs, crisis coverage, docudrama, talk and game shows) but the discursive and representational modes that define the "reality" of commercial television as a whole. Issues include: "liveness"; social relevancy"; therapeutic discourse; TV personalities; media simulation; independent television; and new technologies/realisms.

**MCM 0900G. Representing the Internet.**

Investigates popular representations of the Internet (many of which precede the WWW) from cyberpunk to Supreme Court decisions, from mainstream film to Internet map sites. Considers the relationship between representation, ideology, culture, and technology. All written work for the seminar will be digital.

**MCM 0901C. Photography/Film/Art: Memory, History and Ruin.**

Questions of the nature of the photographic image have come to the fore in some of the most exciting modern art, such as the work of Cindy Sherman and Andy Warhol. In particular, the question of how the photograph relates to film and history has generated important questions about art and media. This course will analyze these questions through the work of such artists as Jeff Wall, Jean-Luc Godard, and Hiroshi Sugimoto. We will examine these in relation to writings that theorize the relationship of photography to film and art after World War Two. Readings include Benjamin, Barthes, and Krauss. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 undergraduates.

**MCM 0901D. Film Comedy.**

What makes some films so funny? This course will investigate many different forms of film comedy-- from slapstick physical gags involving hapless men and umbrella-wielding matrons, to eccentric verbal banter, to parodies that subvert state politics using puppet characters. Instead of treating film comedy as "just mindless escapism," we will study how comedy's complex and slippery devices are central to the history of cinema. Readings in critical discourses about comedy, film history and film theory, e.g. Freud, Bergson, Benjamin, Rob King, Miriam Hansen, and Kathleen Rowe. Screenings range from silent slapstick, to communist satire, to romantic comedy, to political mockumentary. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20.

**MCM 0901E. The Fantastic in Contemporary Cinema.**

This course addresses the idea of the Fantastic from its definition to its articulations in contemporary cinema. Focusing more on form than on content, we will privilege a reading of the Fantastic as an effect rather than a genre or a theme: specific attention will be given to the relationships between filmic texts, spectatorship and the production of meaning. Screenings will include popular Hollywood cinema as well as European and independent films. We will discuss works by directors such as Lynch, Nolan, Fincher, Spielberg, Gondry, Cronenberg and Haneke. Readings will range from literary theory and psychoanalysis to film theory and semiotics. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 undergraduates.

**MCM 0901F. "America" in Diaspora Literatures.**

How have diasporic and immigrant writers come to see the United States? How do these writers negotiate dominant understandings of race, gender, ethnicity, religion, and language that come to define "the nation"? Is all immigrant/minority writing necessarily (auto)biographical? How are notions of history, memory, and futurity taken up by writers of diasporic and hybrid cultures in the US? These are some of the questions that this course will take up through a close reading of canonical and contemporary African-American, South/Asian-American, and Arab-American texts. This course is ideal for students interested in minority literatures, diaspora studies, and Ethnic Studies.

**MCM 0901G. Digital Culture and Art after 1989.**

How can we contextualize new media art alongside earlier forms of media such as photography and cinema? Is its relation to the "outside world" primarily conceived as representation, or as process? What are the cultural effects of this mediatic shift? Taking as our starting point the fall of the Berlin Wall and the resulting spread of capitalism as a near-global political-economic system, we will "read" a variety of works of art and culture from several contemporary theoretical perspectives. Topics include digital media, the Internet, European cinema, and popular music. Readings from Galloway, Fukuyama, Deleuze, Hardt and Negri, Freud, Jameson, etc. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20.

**MCM 0901H. Uncomfortable Media.**

Why are we often addicted to that which disgusts us? This course analyzes why "uncomfortable media" – media that plays with notions of the perverse, the abject, and the taboo – remain so popular in the American cultural imaginary. Studying a variety of popular television programs and films, this course will approach these viscerally transgressive media texts through analyzing representation (how cultural taboos appear in popular culture) and analyzing spectatorship (how viewers perform discomfort). We will examine how developments in genre and narrative form, affect studies, performance studies, and queer theory have contributed to theorizing the perverse. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20.

**MCM 0901I. Body Count: Technologies of Life and Death.**

From the War on Terror and the global obesity crisis to self-help reality TV and new biotechnologies, questions of life and death have come to center stage of contemporary politics. This course investigates the theoretical and historical contexts under which "life itself" has emerged as a key arena of social, cultural, and technological importance. We will read critical studies of race, media, embodiment, and the state, tracing how distinctions between life and its others have structured the distribution of death, risk, and freedom in modernity. Topics include biocolonialism, cyborgs and swarms, U.S. prison regime, computer viruses, "bugchasing," suicide bombing. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20.

**MCM 0901J. Adaptation Culture: New Media <----> Traditional Theatres (TAPS 0080).**

Interested students must register for TAPS 0080.

**MCM 0901K. Statelessness and Global Media: Citizens, Foreigners, Aliens.**

What is citizenship? What does it mean to be granted or refused state protection within the global system? To better understand how nation-states govern subjects, we will consider the condition of refugees, displaced persons, illegal residents, undocumented aliens, and stateless persons. We will read the representations of non-citizenship in global media texts (humanitarian graphic narrative, migrant diary, atrocity photography, world cinema, war fiction, crowdsourced crisis mapping). This course will place a special emphasis on how perpetual warfare, territorial re-mappings, and nationality legislation continue to generate sliding scales of non-citizenship. Readings include Arendt, Balibar, Chatterjee, Foucault, Lowe, and Said. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20.

**MCM 0901L. African American Media Visibility: Image, Culture, Crisis.**

This course explores the "problem" of the black image in 20th - 21st century U.S. film and television. What is the role of spectacle and scandal in (re)presenting blackness to the public? Emphasis placed on the tension between invisibility and (hyper)visibility of the black subject in relation to gender and sexuality as well as the political, ethical, social, and psychical implications of such varying degrees of visual exposure. Topics include the aesthetics of black celebrity from Josephine Baker to Beyoncé, cinematic practices from filmmakers Spike Lee to Tyler Perry, and television blackness from *The Cosby Show* to *Flavor of Love*. Prerequisite: MCM 0110, 0220, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20.

**MCM 0901M. Ishiguro, Amongst Others (ENGL 0710L).**

Interested students must register for ENGL 0710L.

**MCM 0901N. Body/Gesture/Cinema.**

Antonin Artaud once called the body “a language to which it seems we no longer have the key.” This course is an attempt to take up his challenge in light of our experience at the cinema. Two questions will guide our investigation: Do the bodies on film “signify”? If so, how does this signifying practice trigger our own corporeal unconscious? We will explore a wide range of texts across film studies, theatre, anthropology, linguistics, and critical theory. Topics include gesture, ethnography, disability, violence, horror, and phenomenology. Readings include Didi-Huberman, Benjamin, Ricoeur, Merleau-Ponty, Kristeva, Shaviro, Sobchack, Naremore, Clover, Linda Williams, etc.

**MCM 0901O. Reinventions of Life: Aesthetics, Biopolitics, and the Avant-Gardes.**

The impulse to connect art with life runs through the avant-gardes of the early and mid-twentieth century. Yet recently, the question of what constitutes life itself has emerged with increasing persistence. In this course, we will reconsider the history of the avant-gardes – and avant-garde cinema particularly – in relation to this question. Drawing broadly on theories of how contemporary forms of life have been managed and made productive, we will explore the links between the avant-garde’s aesthetic and political practices and its ongoing efforts to redefine and reinvent social existence. Readings include Benjamin, Foucault, Lacan, Fanon, Debord, Mulvey, and Agamben.

**MCM 0901Q. Governing Sex: Citizenship, Violence, Media.**

From the photographs of Abu Ghraib, to Tyler Clementi’s suicide, and the rise of “revenge porn,” contemporary media have been central to understanding the ways in which sexuality, law, and citizenship are negotiated in our present moment. This course will take these moments of public crisis as instances from which to understand the politics of belonging within the framework of the contemporary nation-state. We will examine the inter-related problematics of sexuality as a site of state governance, and the anxieties about sexual violence as national crises. Assigned readings will include queer of color critique, critical race theory, feminism, and postcolonialism.

**MCM 0901R. Altered Cinema: The Cultural Politics of Film Revision.**

Repetition and variation define contemporary cinema texts. Media producers create multiple “cuts” of the same picture for domestic/international theater, television and home video markets. Meanwhile, consumers use new technologies to create their own textual variations and share them using informal distribution channels. This is a primary concern of Altered Cinema, which examines the history and culture of film revision from multiple perspectives, including originality, authorship, censorship, globalization, preservation, translation, copyright, fandom, new media and piracy. Screenings compare and contrast different editions, including director and fan cuts, of *Metropolis*, *Star Wars*, *Dune* and *Night Watch* among others.

**MCM 0901S. Mediating Reproduction: Feminism, Art, Activism.**

How have feminist artists and activists imagined and transformed the politics of reproduction? This course explores the complex meanings of “reproduction” across media, performance, and public culture, with a focus on questions of sexuality, race, labor, and aesthetic practice. Situating reproduction in an expanded frame, we will consider the relationship between biological reproduction and the gendered labor of reproducing social life (e.g., domestic labor, sex work, care work). Throughout, we will pay special attention to the entanglements of artistic labor with women’s reproductive labor. Topics include: eugenics, housework/welfare activism, art workers movements, biotechnologies, queer kinship, and feminist utopias.

**MCM 0901T. Shakespeare: The Screenplays (ENGL 0310E).**

Interested students must register for ENGL 0310E.

**MCM 0901U. What is Colonialism - Archives, Texts and Images (COLT 0812B).**

Interested students must register for COLT 0812B.

**MCM 0901W. The Space Within: Contemporary Borderland Moving Image Practice.**

In this course we will examine post-NAFTA moving images that take as their subject the culture and politics of the Mexico-US Borderlands. We will tackle problems such as globalization, neoliberalism, the drug war, securitization, migration, biopolitics, and femicide. To make our claims we will place importance on film form as we unpack how the films figure and/or represent the bodies and spaces of the Borderlands. More, we will think seriously about how the concepts we adopt—including that of “border” itself—function as epistemological tools. This will be a course for those invested in Borderland issues and political moving image practice.

**MCM 0901X. Digital Cinema and the Inhuman.**

From the incursions of biopolitics to the specter of ecological collapse, the problem of how life is organized, sustained, and functionalized strikes at the heart of contemporary society. And yet to whom or what “life” belongs remains an open and evolving question. This course examines contemporary digital cinema as a textual, technological, and political site to rethink the concept of “the human.” Drawing on theoretical traditions that investigate the nature of vitality, automation, and the distinction between human and nonhuman, we will study how bodies, identities, and categories of thought are troubled and transformed by moving images.

**MCM 0901Y. Puzzle Films.**

This course explores a group of diverse and increasingly popular films termed “puzzle” or “mind game” films. The first unit of the course focuses on a sample of the debates surrounding post-classical cinema and its stylistic and institutional features. We will then explore these films against the background of the economic and political shift to Post-Fordism and Neoliberalism. Since many of these films explicitly with philosophical issues, we will also examine these. The topics will include skepticism and its relation to a changing and expanding media environment, and the importance of speculation in neoliberal economics and culture.

**MCM 0901Z. Reading Practices: An Introduction to Literary Theory (ENGL 0700P).**

Interested students must register for ENGL 0700P.

**MCM 0902A. Cultures, Societies, and Resistance (MES 0950).**

Interested students must register for MES 0950.

**MCM 0902B. Film Classics: Greeks on the Silver Screen (MGRK 0810).**

Interested students must register for MGRK 0810.

**MCM 0902C. Digital Media in the Time of Ecological Crisis.**

In a time characterized by anthropogenic climate change, militaries forecast climate refugees, scientific communities broadcast the end of ‘nature’ while politicians engineer influence in a media ecosystem. What are the politics of how media represents science, the environment and ecological crisis? This course considers the historical emergence of digital media alongside ecology. By studying the exchange between scientific knowledge, digital technology and the communication of environmental crises at local and global scales, we will attempt to establish an interpretive framework for the matrix of politics, power, inequality and violence that accompanies the historical and temporal conditions consistent with climate change.

**MCM 0902D. The Visual Culture of Suffering.**

This seminar explores how suffering is constructed as a visual phenomenon. Through close analysis of photographs, films, monuments, and exhibitions, we will explore how suffering has been deployed, and the sort of meanings it has been assigned. We will examine four specific scenes of historical suffering: Lynching and Reconstruction, The Holocaust, Hiroshima, and 9/11.

**MCM 0902E. In Design: Layouts of Modern Media and Design.**

This course aims to engage with media and design by thinking critically about them and asking questions about their relationship to the larger culture. We will survey design elements and principles and show how they construct products and media. Beginning from the basics, we will move onto systems to demonstrate how they lay out the rules of design. We will then move to digital media in which the design elements are re-organized by new uses of old principles and inventions of new ones. Readings include: Ranciere, Latour, Flusser, Bloch, and Baudrillard, alongside with Lupton, Buchanan, Papanek, Dunne and Raby.

**MCM 0902F. Post Cinema? Histories and Politics in the "Digital Revolution".**

The rapid influx of digital technology and so-called "new media" around the new millennium has led some to suggest that Cinema—conceived of as a photochemical technology experienced publicly as a mid-twentieth century cultural phenomenon—is dead or dying. This course explores the political and historical stakes of this claim, taking an archaeological and genealogical approach to problematize notions of technological progress and periodization. Rather than seeking to "rescue" cinema, we will instead explore how "the cinematic" has been adopted and dismantled by the logics of neoliberal governmentality, and what it can still offer for modes of political resistance.

**MCM 0902G. Visual Cultures of Repair and Resistance.**

This seminar will explore the poetics and politics of cultural production that engages war, state violence, and intersecting social inequalities through processes of repair and resistance. Using methodologies of visual culture analysis, we will examine how images shape the political imagination, paying special attention to the politics of looking, witnessing, and (not) being seen. Addressing various historical and political contexts, we will focus on a few primary loci: Afrofuturism and what Saidiya Hartman calls "critical fabulation" in the "afterlife of slavery"; acts of witnessing and speculation in Palestine-Israel; and transnational resistance to surveillance, drone warfare, and global networks of control.

**MCM 0902H. Cinema and Revolution: A Global Perspective.**

This course provides a critical introduction to the history and theory of revolutionary cinema. Students will be exposed to a range of filmic modes and textual practices that mediated the political idea of revolution, including such celebrated movements as Soviet formalism, Surrealism, 60s Counter Cinema, and Third Cinema. We will investigate the role of film in the revolutionary renewal of life, the dialectic of repetition and emergence that structures revolutionary temporality and the modernist work of art, the compulsive drive to reconstruct revolutions as cinematic events, and the political antagonisms that prevent the revolutionary project from achieving representational closure.

**MCM 0902I. Never Work! History, theory and media of work and its refusal.**

This course attempts to clarify some of the intricacies of the category of work and examine the role of media in its articulation. We will explore the characterization of historical epochs and articulation of theoretical binaries that have contributed to a contemporary understanding of labor and productivity: the transition from feudalism to capitalism, idleness and leisure, productive and reproductive labor, etc. Throughout the course we will explore both media produced with the intent to glorify, enforce and structure work as well as media intended to reflect critically on conditions of labor and instigate work refusal.

**MCM 0902J. The Humanities in Context: Literature, Media, Critique (HMAN 0800A).**

Interested students must register for HMAN 0800A.

**MCM 0902L. Film Classics: The Greeks on the Silver Screen (MGRK 0810).**

Interested students must register for MGRK 0810.

**MCM 0902M. The end of politics as we know it? New Media & Political Imagination.**

Technical inventions have always spawned utopian visions of total social amelioration, followed closely by dystopian fears and moral panics. Digital information technologies are no different. Producing the full range of reactions—from celebrations of "networked protests" to wild accusations of "fake news"—responses to today's media environments proclaim the end of politics as we know it. Reading works by political theorists alongside scholars of the digital, this course will question both triumphant digital utopianism and fatalist assumptions of ubiquitous manipulation, and instead engage in more complex readings of the ways media shapes and is shaped by subjects and communities alike.

**MCM 1110. The Theory of the Sign.**

A survey of three late twentieth-century theorists: Louis Althusser, Jacques Derrida, and Michel Foucault. Our analyses will focus on these figures as they emerge from and reorient the broad field of semiotics, with particular attention to the evolution of each oeuvre, the continuities and discontinuities that distinguish their theoretical claims, and their diverging legacies. Readings will include Althusser's Reading Capital and "Contradiction and Over-determination," Derrida's Of Grammatology and Spurs; and Foucault's This is Not a Pipe and History of Sexuality. Critical concepts to be examined include signification, reading, discourse, subjectivity, power, historicism, archaeology, the supplement, and difference.

**MCM 1200D. African Cinema.**

Subsaharan African cinemas 1960-present, primary emphasis on narrative films. We will analyze cultural and aesthetic strategies, (cinematic style, narrative, and subjects). in the context of postcolonial African and international film histories. Themes include: anticolonial resistance/nationalist ideologies; third cinema/international art cinemas; oral aesthetic culture and cinematic style; political critique (e.g., gender, state politics); media globalization and resistance; the struggle for a mass audience. Enrollment limited to 50. Previous coursework in MCM, Africana Studies, or related areas highly recommended.

**MCM 1200G. Cinema and Stardom: Image/Industry/Fantasy.**

This course focuses on the role of the star within the "machinery" of Hollywood: how stars function in the film industry, within cinematic and extra-cinematic texts, and at the level of individual fantasy and desire. The paradoxes posed by stars—represented as like yet unlike us, public yet privately known, commodities yet (super)human—suggest complex formations and implications of the star system. We will read film theories and histories and investigate films in which star images are foregrounded to explore these issues.

**MCM 1200K. Hollywood as Global Cinema.**

Commonly treated as a U.S. national cinema, Hollywood film has long been a global institution dominating worldwide distribution. We reread U.S. narrative filmmaking and its products in relation to its global ambitions. Topics include: internationalizing the history of U.S. cinema; rethinking theories of the classical and anticlassical text; local, national and global spectatorship; concepts of cultural imperialism and cultural globalization; etc. Students interested in the class who have not fulfilled the prerequisite may apply to the instructor for permission to enroll. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50. Students must register for the primary meeting and one film screening.

**MCM 1200Q. Publicity and Surveillance.**

Investigates the converging technologies and practices of publicity and surveillance. Considers phenomena such as webcams, face recognition technology and networked art, as well as concepts such as enlightenment, paranoia and exhibitionism. Theoretical, historical and legal readings.

**MCM 1201C. Imagined Networks, Glocal Connections.**

This course examines emergent "imagined networks" (Arab Spring activists, global anti-globalization networks, global climate and financial systems) impacted by new media technologies and applications. Emphasis will be placed on understanding the changing relationship between the local and the global, and how "glocal" phenomena affect national and personal identities. Readings will be theoretical, historical, political and literary. Enrollment limited to 50 sophomores, juniors, and seniors.

**MCM 1201E. Feminist Theory and the Question of Sexual Subjectivity.**

Many contemporary theories of sexual subjectivity have to do not with the body but with gender. Gender is seen to have liberated people from the dictates of biology. But there are other feminist theories that see sexual subjectivity as reducible neither to anatomy (biologically male/female) nor to gender (culturally male/female/other). We'll look at current debates among theorists and will ask what these debates have to do with the canonical work of earlier feminist film theorists on questions of spectatorship. Readings include Butler, Copjec, Freud, Lacan, Irigaray, Kristeva, Mulvey, Doane, and others. Prerequisites: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50 sophomores, juniors, and seniors.

**MCM 1201J. Aesthetics and Politics (ENGL 1900E).**

Interested students must register for ENGL 1900E.

**MCM 1201K. Queer Relations: Aesthetics and Sexuality (ENGL 1900R).**

Interested students must register for ENGL 1900R.

**MCM 1201O. Global Media/Global War.**

The 20th Century has been called the age of total war. Alongside the globalized military conflicts of the past 100 years is a corresponding globalization of visual media technologies. This course is a study of the links between the technologies, strategies, tactics and technologies of the military and those of various media industries. Topics include "target markets"; flight simulators; Google Earth; "the logistics of military perception;" the bombing of television and radio stations in Serbia and Iraq; the global presence of U.S. military bases and their role in the Americanization of global culture; and Michael Bay's Pentagon contracts. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50. First year students require instructor permission.

**MCM 1201P. Freedom in Africana Political Thought (AFRI 1020B).**

Interested students must register for AFRI 1020B.

**MCM 1201R. Music and Modern Life (MUSC 1920).**

Interested students must register for MUSC 1920.

**MCM 1201T. Russian Cinema (RUSS 1250).**

Interested students must register for RUSS 1250.

**MCM 1201W. Modernity, Italian Style (ITAL 1030A).**

Interested students must register for ITAL 1030A.

**MCM 1201X. Global Media: History, Theory, Production (INTL 1800N).**

Interested students must register for INTL 1800N.

**MCM 1201Y. Reading Michel Foucault.**

This course will explore Foucault's work and impact primarily through his own writings, but also by exploring the transformation his thought has effected on traditional ways of approaching state and society, the body, social discipline, and a number of other areas of study. In short, this course seeks to put his work in the context of ideas he meant to challenge and how those challenges have been met and incorporated in current thought about politics, society, and culture. We will follow Foucault's trajectory from what he termed "archaeology" to "genealogy." Prerequisites: MCM 0110, 0230, 0240, 0250, 0260 or 1110. Enrollment limited to 50 Sophomores, Juniors and Seniors.

**MCM 1202A. The Poetics of Confession (ENGL 1561J).**

Interested students must register for ENGL 1561J.

**MCM 1202B. Literature and Politics (ENGL 1900D).**

Interested students must register for ENGL 1900D.

**MCM 1202C. Camera Works: The Theory and Fiction of Photography (ENGL 1900V).**

Interested students must register for ENGL 1900V.

**MCM 1202D. China Through the Lens: History, Cinema, and Critical Discourse (EAST 1270).**

Interested students must register for EAST 1270.

**MCM 1202E. Extreme Asian Cinema: Contemporary Genre Cinemas in an East Asian Context.**

Since the late 1990's, a discourse of "extreme Asian cinema" has gained traction among aficionados of global cinema, transforming our understandings of "national cinema." In this course, we will interrogate the spectacular aesthetics of "extremity," with its violence, polymorphous perversion, and grotesquerie, in relation to social and cultural phenomena in contemporary East Asia. By analyzing the genres of the gangster film, the revival of wuxia (heroic martial arts genre) and samurai films, horror, revenge films, and techno-dystopia and ecological disaster anime, we will explore "extreme Asian cinema," as a response to cultural shifts in global identities and film experience. Enrollment limited to 50 sophomores, juniors, and seniors.

**MCM 1202F. Science Fiction Cinema.**

Although it raises compelling philosophical, aesthetic, and socio-historical questions, science fiction cinema has been underrepresented in scholarly literature and the academic curriculum. This course surveys the modern science fiction film from experiments in the silent era through the contemporary science fiction blockbuster (with particular emphasis on the latter). Covers various thematic concerns (disaster, post-apocalypse, the future, simulation, space travel and inhabitation, future cities, alien arrivals/invasions, posthumanity) and is international in scope. Films by Kubrick, Cameron, Scott, Verhoeven, Gilliam, Bigelow, Boyle, Emmerich, and others. Readings in theory, philosophy, cultural studies, film studies, gender studies, and fiction. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50. Not open to first-year students.

**MCM 1202H. French Cinema: The First Fifty Years (FREN 1150C).**

Interested students must register for FREN 1150C.

**MCM 1202I. Warriors, Gangsters, and Misanthropes: Violence and Sociality in Asian Genre Cinemas.**

By analyzing films from a variety of popular genres, from war to horror, gangster, action-thriller, and disaster films, we will consider the problem-solving function, visual pleasure, visceral thrills, and ethical stakes of multiple forms of film violence, including state violence, gendered violence, heroic and anti-heroic violence, and spectacular, extreme, or fantasmatic violence. Further, we will ask what forms of sociality or intersubjective relations these differing modes of violence posit or problematize, to gain insight into broader questions concerning the anti-sociality of violence and the prevalence of film violence in the social, cultural, and historical contexts of contemporary East Asia. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50 sophomores, juniors, and seniors.

**MCM 1202J. Faking Globalization: Media, Piracy and Urbanism.**

This course explores issues related to media, piracy, and development—centering on two entangled processes: faking and globalization. It asks: how do we understand globalization? And what does it mean to fake, forge or fail at it? We will examine theories of globalization and global media as well as challenges to dominant models of neoliberal modernity. Key examples include "pirate modernity," "information feudalism," parasites, terrorists, copycats and other markers of excess or imitation. Rather than dismissing alternative or counter-globalization practices as aberrations, the course examines how faking globalization enables both new forms of control and capacities in political society. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50 sophomores, juniors, and seniors.

**MCM 1202K. Garibaldi Panorama: the Invention of a Hero (from pre-cinema to digital) (ITAL 1340).**

Interested students must register for ITAL 1340.

**MCM 1202L. The Many Faces of Casanova (ITAL 1400J).**

Interested students must register for ITAL 1400J.

**MCM 1202M. Issues in Contemporary Hollywood Cinema.**

How can we begin to think about contemporary Hollywood? This course examines Hollywood filmmaking from the end of the studio era through the present. It interrogates the concept of "classical Hollywood cinema" as it persists, develops, and/or attenuates outside of its natural habitat under the studio monopolies, addressing topics and areas like genre revisionism, New Hollywood, technological development, postmodernity/simulation, digitization, corporatization, merchandising, globalization, Vietnam, counterculture, Reaganism, 9/11, etc. Films by the likes of Sirk, Fuller, Hitchcock, Peckinpah, Kubrick, Scorsese, Coppola, Cassavetes, Polanski, Malick, Spielberg/Lucas, Carpenter, Bigelow, Cameron, Scott, Verhoeven, Lynch, Nolan, Peter Jackson, Jonze, P.T. Anderson, Rian Johnson, Winding Refn. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50 sophomores, juniors, and seniors.

**MCM 1202N. Global Theatre and Performance: Paleolithic to the Threshold of Modernity (TAPS 1230).**

Interested students must register for TAPS 1230.

**MCM 1202P. Fellini (ITAL 1030A).**

Interested students must register for ITAL 1030A.

**MCM 1202Q. Word, Media, Power in Modern Italy (ITAL 1590).**

Interested students must register for ITAL 1590.

**MCM 1202R. Rhetorics of New Media.**

Digital technologies have shaped culture, but they've also shaped how we talk about culture, and about art, bodies, and communities. Is there political potential in the trend toward computerization? Or might technophilia and technocracy obstruct collective betterment? We'll study the legitimizing rhetorics of our increasingly digital present, and read electronic literature, print sci-fi, film, games, and art, along with cultural theory spanning the past half century. Historically arrayed, our topics range from globalization to the aesthetics of code, the newness of new media, technics-out-of-control, gamification of war, technologies of race and gender, digital narratology, and the ideology of computationalism. Prerequisite: MCM 0110, 0220, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 50 sophomores, juniors, and seniors.

**MCM 1202S. Click Here to Continue: Bodies, Identities and Practices in a Digital Age.**

Why is the notion of 'post-racial' synonymous with this digital age? How are political and social effects visible not only in the practice of digital technology, but in the underlying structure itself?

Crossing the fields of digital humanities, critical theory, feminist theory, race studies, and new media studies, this course considers how technology is a constant reflection of fantasies and fears. We will consider the interplay between users, humans, bodies, avatars, code and systems as we simultaneously practice and critique the prevalent forms of digital technology in our lives today. Readings include work by Nakamura, Gonzalez, Haraway and Coleman.

**MCM 1202T. Perverse Cinema (ENGL 1762A).**

Interested students must register for ENGL 1762A.

**MCM 1202U. Sex and Sexuality in American Film.**

What is the connection between "sex" and "sexuality," and how do these terms intersect in film and theory? In this course, we take a long historical view of both mainstream and experimental American film. We look at how sex and sexuality have been depicted on screen, while exploring cinema's role in the construction of diverse, often radical, identities and practices. We test a range of critical approaches—deconstruction, feminism, close reading, queer historiography—to the theory of sexuality, and read major figures in film from Greta Garbo, Orson Welles, and Rock Hudson to Lizzie Borden, Divine, and the Brokeback cowboys.

**MCM 1202X. Twentieth-Century Western Theatre and Performance (TAPS 1250).**

Interested students must register for TAPS 1250.

**MCM 1202Y. World Cinema in a Global Context (ITAL 1029).**

Interested students must register for ITAL 1029.

**MCM 1202Z. Native Americans in the Media: Representation and Self-Representation on Film (ETHN 1890G).**

Interested students must register for ETHN 1890G.

**MCM 1203A. Gaming of the Oppressed: Theory and Design.**

This course gives an overview of various types of "serious games" or "anti-oppressive games" that range from videogames to immersive transmedia storytelling games. We will explore issues of why gaming is so enticing and the potential games have through their history, procedure, and design. We will then examine the role games play in our everyday lives and games' potential for understanding motivation, education, and labor. Students will also work with complimentary theories of race formation, queer theory, and gender identity. At the end of the semester, students have the opportunity to create their own game.

**MCM 1203B. Politics + Aesthetics of Hollywood.**

Hollywood is an industry, a cultural bellwether, and a globally distributed artform. This course will consider these functions together, asking how Hollywood's aesthetics connect to its ideology and commerce. Focusing on the post-studio life of Hollywood, and on Hollywood's preoccupation with sex and violence, we'll pay special attention to the genres of melodrama and crime film, 1945-2000. We'll read film theory, "Hollywood novels," and documents of film culture, and watch films by filmmakers who were central to the industry (like Hitchcock and Minnelli) as well as by those at its margins (from Lupino and Waters to Burnett and Cronenberg).

**MCM 1203C. Tv Time Machine: History, Representation, Politics.**

How does television both document and represent historical events? This course examines American history "as seen on TV": how viewers watch noteworthy events live; how television archives crucial moments and time periods; and how genres such as the news, period drama and sitcom, and reality TV differ in their representations. We consider what makes television a unique medium for which to study history, particularly focusing on questions of gender, class, race, and sexuality. Utilizing approaches including the study of collective memory, historiography, aesthetic and textual analysis, and media theory, we will assess the imbrication of American history and popular culture.

**MCM 1203D. Back to the Future: Nostalgia and Futurity in Contemporary Sci-Fi TV and Telefantasy.**

How do contemporary science fiction and fantasy television programs not only imagine our future, but also our past? How do visions of the future from the past inform both of these genres today? And what does contemporary TV's nostalgic longing for futures past suggest about where the medium is headed? This course addresses these and other related questions while providing students with an overview of contemporary English-language sci-fi and fantasy television. The course combines elements of both the lecture and seminar, and will include screenings of such varied programs as *Babylon 5*, *True Blood*, and *Dr. Who*.

**MCM 1203E. Intellectual Life and Culture in the Post-Western World.**

No one alive today has experience of a world in which the United States is not the leading economic power. This is the world we shall all encounter, however, very soon. Such headlines are small indices of an emerging post-Western future. We will investigate the intellectual, political and aesthetic culture of this future. What will change when Judaeo-Christian societies no longer monopolize global conversation? When societies that have historically rejected Western capitalism come to dominate it? What new ideas will be unleashed in such a world, and what will their consequences be for our thinking about politics, economy and identity? This is a half-credit course.

**MCM 1203F. The Aesthetics of Political Cinema: Montage, Political Modernism, and Beyond.**

In the 1920s, Russian filmmakers with political concerns blended mass cinema and innovative avant-garde and modernist filmmaking styles. Their most famous filmmaker, Sergei Eisenstein, elaborated his concept of montage to explain his ideas of cinema. This course will examine the heritage and strategies of political filmmaking which draws on modernist aesthetics, beginning from the montage filmmaking of the 1920s. Some emphasis on 1920s-30s and 1960s-70s, but not limited to those years. Work by filmmakers such as Eisenstein, Vertov, Brecht, Ivens, Capra, Godard, Marker, Oshima, Bertolucci, Taviani, Kluge, Fassbinder, Akerman, Rainer, Mulvey, Solanas, Hondo, Gerima, M. Moore, Oppenheimer, and/or others.

**MCM 1203G. East Asian Internet Cultures.**

This course examines the social, cultural, and aesthetic dimensions of internet life in China, Japan, and South Korea. Our focus will be on the formal diversity of internet use (including websites, social media, mobile phones, blogs, gaming, and streaming video); the relationship between the internet and other media (literature, film, animation, documentary); and interdisciplinary methods for studying online life. By considering how the internet has developed in each country and how it has reshaped identity, sociality, politics, public space, and aesthetic form, we will work towards building a conceptual and critical vocabulary for the comparative study of internet cultures.

**MCM 1203H. The Visual Culture of Freedom.**

Organized around three classics of anticolonial thought by M.K. Gandhi, C.L.R. James, and Frantz Fanon, this course aims to formulate the relationship between visual media and the pursuit of freedom across the globe. We will critically examine various forms of resistance, from insurgency to civil disobedience, from fugitivity to refusal, in the theatre of colonialism. Through visual materials like the monster film, human rights photos, and new wave cinema, we will consider the cultural mechanisms of othering, stereotyping, removal, and exoticization that constitute the history of colonial rule and determine the course of resistance against it.

**MCM 1203I. Media, or Affect.**

The concept of affect—what we feel, what our bodies do and can do—is now at the center of vibrant theoretical debates. This course selectively surveys the “affective turn,” focusing on four related areas: 1) the philosophy of Baruch Spinoza and its influence today; 2) the work of Deleuzian theorist Brian Massumi, who rejects the very concepts of media and mediation; 3) developments in film theory and new media theory following from Spinoza, Deleuze and Massumi; 4) psychoanalytic accounts of affect that endeavor to reaffirm mediation, representation, and sexuation against affective immediacy. Films by Malick, Cronenberg, Resnais, and others.

**MCM 1203J. Anime Studies.**

The scholarly study of anime has rapidly matured over the past few years, and now represents a key site for debates over the social status of drawn characters, the role of animation within larger media ecologies, and the transnational reach of Japanese popular culture. Through close engagement with the central books in anime studies and the major works of anime history, this course examines how anime has forced the rethinking of gender, sexuality, labor, intellectual property, narrative form, and the convergence of on and off-screen space.

**MCM 1203L. Media and Everyday Life in Japan.**

This course examines how media use intersects with the aesthetics of everyday life in modern Japan. We will examine the role of mediation through Japan's tumultuous modern history, from the early 20th century to the early 21st, drawing on accounts from a range of creative works and critical studies. In the process, we will map out shifts in the circulation of emotion, the border between private and public, the deployment of routine and habit, and the objective design of the ordinary.

**MCM 1203N. The Collapse of the Nation-State System: An Intellectual Preparation.**

The century-long dominance of the nation-state idea is ending. Radical Islamic internationalism, at war with twentieth-century state divisions, has created post-national forms of personal identity which bewilder the old archetypes. Russia and China are reverting to a nineteenth-century model of regional empires. Even the most stable nations are contorted by global currents which increasingly undermine the national sense in favour of new forms of localism, regionalism and internationalism.

Looking at theory and contemporary culture we will consider the long dominance of the nation-state idea, and study the emerging territorial concepts with which a world “after nations” might organise itself.

This course begins half-way through the semester. The first screening will start, before the lecture begins, on Sunday, March 5, 2017. The first lecture will begin on Thursday, March 9, 2017 and the last lecture will be Thursday, May 4, 2017. The instructor, Rana Dasgupta, will make contact with all students via email in the first half of the semester to establish the rapport of the group and answer any queries students may have. Contact information: rana@ranadasgupta.com

**MCM 1203O. Modernity, Italian Style (ITAL 1030B).**

Interested students must register for ITAL 1030B.

**MCM 1203P. Fashion as Technology.**

The course explores the interplay between fashion, subjectivity and technology, tracing a genealogy of clothing and adornment as a fundamental tool for gendering and racializing subjects – from analog prosthetics to the Click-and-Buy apps of today, from tattooing to the burkini. Central to the course will be the status of the material body (along with its cosmetic and pharmacological appendages and enhancements) in an increasingly digital world. We will gain critical literacy in the history of fashion and luxury, assessing the role of dress in fabricating sexual difference and holding it into place, as well as fashion's potential for subversion.

**MCM 1203R. Visual Politics in Contemporary Middle East (MES 1200).**

Interested students must register for MES 1200.

**MCM 1203T. Digital Masculinities.**

Masculinity has historically been associated with agency over objecthood. What happens, then, to masculinity's strategies of survival within a context of perpetual digital representation? This course examines the ways male and masculine bodies – cis, trans, queer – perform themselves online, and how the digital may threaten masculinity's undoing whilst revealing its modus operandi in unprecedented ways. Through digital media theories, queer theory and psychoanalytic concepts, we investigate the various virtual, fleshly and fantasmatic assemblages that prop up phallic power in late capitalism: from trolling and online misogyny to drone warfare, from racial and gender passing to digitally enabled terrorist networks.

**MCM 1203U. East Asian Cinemas in a Global Frame.**

Arguably, cinema has political value because it manipulates the texture of our collective imaginations, shaping how the world, races, nations and regions appear before globally differentiated audiences. By analyzing films from Hollywood, the PRC, Japan, Korea, Hong Kong and Taiwan, this course charts how “East Asia” emerged cinematically as a textured cultural and geopolitical entity within the framework of a broader global circulation of images. Topics covered include Hollywood Orientalisms, Japanese Empire, postsocialist China, and New Korean Cinema.

**MCM 1203W. Social Media Networks: From Local to Global.**

Social media networks have played an increasingly conspicuous role in national and transnational politics, from the Arab Spring uprisings, to the 2013 Gezi Park demonstrations in Turkey, to the viral spread of fake news leading up to the 2016 US election. In this course, we will discuss how media connect people across the globe to an unprecedented degree, as well as the stark divisions and borders they reveal, complicating any utopian visions of a “global village.” We will explore how individuals' networked identities and national and global scales of social media communities are mutually constituted.

**MCM 1203X. Digital Bodies: Cyborgs, Biometrics, and Corporeal Data.**

In this course we will learn about the ways human bodies interface with digital technologies. Medical scans, prosthetic limbs, and technologies like the Pacemaker promise to protect and supplement the human body, and feminists and disability scholars have at times embraced the empowering potentials of the cyborgian body. Yet the ways in which the human body is digitized—its data harvested, charted, and merged with technologies—also have more dystopian valences. We will discuss how medical technologies, CGI, phone apps, and corporations have translated and used the data of the human body, and how this changes definitions of “human.”

**MCM 1203Y. Rhythm Beyond Music (MUSC 1240L).**

Interested students must register for MUSC 1240L.

**MCM 1203Z. Race, Ethnicity, and American Film.**

This course asks what a study of selected American films offers to our understanding of "race," "ethnicity," "power" and "resistance." We ask how cinema participates in shaping our collective sense of race and ethnicity, of racialization, and of racial and ethnic identity. We seek to answer our questions by attending to cinematic productions that offer insights in the history and contemporary situations of African Americans, Asian Americans, Chicanos and Latinx, Native Americans, and European Americans. An aim is to work towards a comparative analysis of racialization that reveals not only differences between these groups, but also commonalities among them.

**MCM 1204B. China Modern: An Introduction to the Literature of Twentieth-Century China (EAST 1070).**

Interested students must register for EAST 1070.

**MCM 1204C. Ways of Seeing: The Arab World in Global Perspectives (MES 1200).**

Interested students must register for MES 1200.

**MCM 1204D. Politics of Chinese Cinemas.**

Focusing on films produced since 1949, this course explores how "Chinese cinema" delimits a field of political contest, a global arena for antagonism over the meaning of revolution, the definition of art, the reach of propaganda, the articulation of gender, and the boundaries of culture. We begin with an examination of cinema in the Maoist PRC, moving on to a discussion of China's international Cold War presence, and finally to contemporary themes of independent film production, women's and queer cinema, and the place of Hong Kong and Taiwan in the shadow of the PRC's "rise."

**MCM 1204E. The Politics of Perspective: Post-war British Fiction (ENGL 1711K).**

Interested students must register for ENGL 1711K.

**MCM 1204F. Critical Video Game Studies.**

This course serves as a gateway into the study of video games from an analytical humanities perspective. Because reception, design, and, ultimately, interpretation are intimately entwined in gaming culture today, students will also engage the popular and corporate discourses surrounding gaming, particularly as they address issues of social justice, gender, race, and sexuality. Over the course of the semester, students will fine-tune interpretive skills that have been developed in other humanities courses for the unique challenges presented by video games and other interactive texts.

**MCM 1204I. On Both Sides of the Lens: Latin American Women Filmmakers (GNSS 1070).**

Interested students must register for GNSS 1070.

**MCM 1204J. A New Black Gaze.**

What is a 'black gaze'? The title of this course is a provocation that poses the question of whether we can identify the existence of a black gaze, while asserting the transformative potential such a gaze both promises and portends. Starting from a close examination of theories of the gaze, we will engage the relationship between contemporary black visuality and what constitutes a black gaze in the twenty-first century. Focusing on a select group of black contemporary artists, we will explore how their work challenges traditional notions of what constitutes the power/politics of the gaze.

**MCM 1204K. From Analog to Analogue: Digitality and Ephemerality in Audiovisual Archives.**

This seminar explores histories of moving image and sound archives in relation to social movements, technological change, and philosophies of cultural memory and value that dictate the content of archives and shape perceptions of their use value. We begin by exploring archives as physical entities (buildings), structures of information (catalogs, databases, finding aids) and arbiters of meaning (collections). We also consider enterprises that increasingly present themselves as archives of our contemporary selves and collective existence: Facebook, Instagram, Tumblr, YouTube, Twitter. As well as exploring these issues historically and theoretically, we will visit local archives and engage in hands on activities.

**MCM 1204L. Transmedia Storytelling and the New Italian Epic (ITAL 1350A).**

Interested students must register for ITAL 1350A.

**MCM 1204M. Latin American Horror Film (GNSS 1520).**

Interested students must register for GNSS 1520.

**MCM 1204N. TV and/as Popular Culture.**

TV and/as Popular Culture is a broad critical exploration of to U.S. television, broadcasting, popular culture, and media convergence from the 19th century to the current day. Students will explore the roles of industry, advertising, representation, and technology in the development of broadcast media, and learn to analyze these texts within their cultural and historical contexts. Special attention will be paid to issues of class, gender, race, and reception.

**MCM 1204O. Post-1989 Chinese Media: The Culture and Politics of Control.**

1989 is a dramatic turning point in China's recent history, when the crackdown of the democratic movement in Tiananmen Square led to profound socio-political changes that significantly transformed the nation's media culture. This course maps the history, politics, and culture of contemporary China through the changing lenses of post-1989 Chinese media including film, television, digital videos, visual arts, and the Internet. The focus is the culture and politics of control in post-1989 China. We will examine the controlling mechanisms in Chinese media in public and commercial domains, as well as the counter-control practices among media artists and general audience.

**MCM 1204P. Nationalism and Transnationalism in Film and Fiction (COLT 1440P).**

Interested students must register for COLT 1440P.

**MCM 1204Q. Anime Culture: Theory and Media Ecology of Animation.**

This course introduces students to the critical study of Japanese animation (anime) in a global context of media environment. We will study the history, aesthetics, politics, and theory of anime and its socio-cultural formations. The focus is to analyze the forms and idioms of anime in relation to changing media technologies and their impacts. Students are expected to explore the technological and cultural characteristics of anime in tandem with the studies of media theory and history, and to expand their interest in anime to wider questions such as posthumanism, techno-orientalism, cyborg feminism, media convergence, and participatory cultures

**MCM 1204S. Asian Extreme: Beauty and Violence in Korean Media (EAST 1292).**

Interested students must register for EAST 1292.

**MCM 1500C. Archaeology of Multimedia.**

A historical and theoretical study of "multimedia" from magic lanterns to the Internet. Examines the ways in which media have always been multiple and have always impacted on each other, as well as the ways that various media discourses constitute an "archive" of the knowable and sayable.

**MCM 1500D. Contemporary Film Theory.**

Major arguments in film theory from the late 1960s to the present, contextualized by contemporaneous intellectual tendencies and selected films. Some key issues: cinematic specificity and signification, the politics of form and style, subjectivity/spectatorship, gender/sexuality, postmodern media, digital theory and cinema. Readings from figures such as Baudry, Bordwell, Deleuze, Doane, Elsaesser, Gunning, M. Hansen, Heath, Jameson, Koch, Manovich, Metz, Mulvey, Pasolini, Rodowick, L. Williams, Willemsen, Wollen, etc. Enrollment limited to 15. Prerequisite: one MCM core course.

**MCM 1500J. Feminist Theory and the Problem of the Subject.**

Readings in contemporary feminist theory and 20th-century theories of subjectivity. Topics include interpellation, modes of address, apostrophe, positionality; texts include Butler, Haraway, Spillers, Spivak. Previous work in feminist theory strongly recommended.

**MCM 1500K. Film and the Avant-Garde.**

An examination of film's historical relations with various avant-garde movements from surrealism, French Impressionism, German Expressionism, and Dadaism to the theoretically informed independent film of the 1970s and beyond. However, the goal of the course is not a historical survey but the investigation of various conceptualizations of "avant-gardism" and its relation to modernity, mass-culture, and technology.

**MCM 1500L. Film Theory.**

Major positions in the history of film theory, contextualized by both contemporaneous filmmaking and intellectual approaches (phenomenology, Marxism, structuralism/poststructuralism, feminism, etc.) Key issues include: cinematic specificity, cinematic representation and the real, the politics of form and style, cinema and language, subjectivity and spectatorship, film and postmodern "media." Readings in Munsterberg, Arnheim, Kracauer, Bazin, Balazs, Metz, Heath, Mulvey, Williams.

**MCM 1500O. Film Theory: From Classical Film Theory to the Emergence of Semiotics.**

Readings from earliest film theory through the emergence of cinema semiotics, with awareness of contemporaneous filmmaking and underlying philosophical and ideological tendencies. Some key issues: cinematic specificity and relations to other media; the politics of cinema; filmic representation and the real; cinema, modernity, and modernism; mass culture debates; cinema, language and signification. Readings drawn from Adorno, Arnheim, Balázs, Bazin, Benjamin, Bergson, Debord, Eco, Eisenstein, Epstein, Kracauer, Lukács, Merleau-Ponty, Metz, Munsterberg, Pasolini, Sartre, Wollen, etc. Enrollment limited to 20 juniors, seniors and graduate students.

**MCM 1500S. In the Public's Eye: Publicity and Surveillance.**

Investigates the converging technologies and practices of publicity and surveillance. Considers phenomena from the paparazzi to digital surveillance, from the commodification of privacy to reality television, in order to analyze this convergence's impact on theories of public sphere. Theoretical and historical readings. Class hours include viewing time.

**MCM 1500X. Middlemarch and the Sopranos.**

The world of *The Sopranos* has been called "a postmodern *Middlemarch*, whose inhabitants' moral and spiritual development (or devolution) unfolds within a parochial social milieu." This course offers a comparative analysis of Eliot's 1871-72 novel and HBO's (continuing) television drama, juxtaposing these two very popular, very powerful serializations in formal, thematic, ideological and narrative terms.

**MCM 1501B. Nation and Identity: The Concept of National Cinema.**

Comparative study of constructions of nationhood in films and written texts about cinema. Interrogation of the discursive, political and epistemological power achieved by different version of the concept "national cinema" and the kinds of collective identities they imagine, from early cinema to globalized media. Readings by theorists, historians and filmmakers. Screenings from pertinent contexts (e.g. Weimar Germany, U.S. classical cinema, Japanese 1930s, third cinema, New German Cinema, New Chinese cinema, multinational corporate cinema, etc.)

**MCM 1501C. National Cultures/Global Media Spheres.**

Contemporary cultural practices and media processes are often described as being implicated in "globalization," but this is a linkage that may well predate the present. This course examines theoretical, historical, and critical texts that conceive of media culture through notions of globalization, with attention to the status of nation and cultural identity in a transnational context.

**MCM 1501I. Reading Marx.**

What is it to read Marx now? We will begin with a group of key texts written by Marx drawn from different points in his development, including the first volume of *Capital* and sections from the other volumes. We will study influential later reinterpretations and commentaries on Marx that argue for his contemporary importance (drawn from figures such as Althusser, Balibar, J. Butler, Derrida, Haraway, Hardt, Negri, Virno, Zizek, etc.

**MCM 1501K. Seeing Queerly: Queer Theory, Film, Video.**

While cinema has typically circumscribed vision along (hetero) sexually normative lines, can film also empower viewers to see "queerly"? How do we, as sexual subjects (gay and straight), "look" in the cinema, in both senses of the word? How have sexual desires been portrayed across film history, and how might audiences wield the look, appropriating or creating imagery with which to (re)formulate subjectivity and sexuality? This course addresses such questions as it considers both "mainstream" and "alternative" productions. Enrollment limited to 20 juniors, seniors and graduate students. Prerequisite: MCM 0110, 0230, 0240, 0260, or 1110, or instructor permission. Students MUST register for the lecture section and the screening.

**MCM 1501N. Television Time and Space.**

Explores television's temporal and spatial construction, considering how television demarcates time (regulating it through flow and segmentation, articulating work and leisure times, marking familial and national events, encouraging rhythms of reception) and space (mapping public and private space, defining a "global media culture" through local viewings, representing and enacting travel and exchange, creating imaginary geographies and communities).

**MCM 1501O. Television, Gender, and Sexuality.**

This course investigates how television produces and reproduces constructions of gender and sexuality through its institutional form (as it maps relations between the public and the private, the domestic and the social, the inside and the outside), narrative patterns (as it circulates family romances, links gender and genre, and mediates sexual and social tensions), and spectatorial relations (as it variously addresses viewers as sexed and gendered subjects, consumers and commodities, familial and defamiliarized viewers).

**MCM 1501Q. The Close-Up: Theory and Practice.**

An examination of the use of the close-up in film and theory, from the "primitive" cinema to IMAX and from Münsterberg to Aumont and Deleuze. Special attention to the way in which the close-up has been associated insistently with the face and its heightened cultural significance, with the advent of a "cinematic language," and with questions of cinematic space and scale.

**MCM 1501W. The Rhetoric of New Media.**

An examination of contemporary theories and practices of "new media," but in particular cyberspace; investigates the ways in which information technologies are challenging our inherited ideas about knowledge and ethics. All written work for the seminar will be digital. Application required. Occasional screenings to be announced during semester.

**MCM 1502B. Publicity and Surveillance.**

Investigates the converging technologies and practices of publicity and surveillance. Considers phenomena such as webcams, face recognition technology and networked art, as well as concepts such as enlightenment, paranoia and exhibitionism. Theoretical, historical and legal readings.

**MCM 1502C. Race And/As Spectacle.**

Theoretical and historical examination of race and/as spectacle, from 19th century world fairs and exhibitions to 20th century media events. Focuses on the productive relationship between race and media, from early cinema to the Internet.

**MCM 1502E. Theories of the Photographic Image.**

Examines the history of attempts to assimilate the photographic image to a theory of representation. Will analyze theories of photography, chronophotography, film with respect to issues of time, subjectivity, historicity, the archive. Will also address the rise of the digital image and its potential threat to photography. Readings in Kracauer, Benjamin, Bourdieu, Barthes, Batchen, Marey, Bazin, Aumont and others.

**MCM 1502H. Information, Discourse, Networks.**

What is information and how can we understand its relation to narrative, networks and power? this course offers a historical and theoretical examination of the rise of information and networks. Key issues include: the relationships between cybernetics and humanistic theories, information and language, the rise of big data, questions of gender, sexuality and race.

**MCM 1502J. Race as Archive.**

Examination of the importance of race to the logic and practice of biological, technological and cultural archives. Engaging the similarities and differences between the categorization of race in these fields, the course will focus on race as a justification for archives more broadly, and race as an archival trace "evidence" of a biological or cultural history. Readings will be theoretical, historical and literary. Preferences given to students in Modern Culture and Media, Art-Semiotics, Modern Culture and Media- German, Modern Culture and Media-Italian, Semiotics-French, Ethnic Studies, and Science & Technology Studies. All others seek permission from the instructor.

**MCM 1502K. Real TV.**

How does television bring "real" events to us? How do we know what's "real"? What kinds of "realities" exist on television, and how do they operate (in relationship to one another, to TV fantasy, and to our everyday lives)? This course will consider not only some specific "reality genres" (news, catastrophe coverage, "surveillance programming," documentary and docudrama, talk and game shows, reality series and "docu-soaps") but the representational modes that define the reality of commercial television as a whole. Issues to be addressed include: TV "liveness," crisis and scandal, therapeutic discourses, "surveillance society," media simulation, realism and anti-realism, civic and commercial discourses, and television's construction of history and knowledge. Preference given to graduate students, seniors, and juniors in Modern Culture & Media and Art-Semiotics. Prerequisites - two of the following: MCM 0100, 0150, 0230, 0240, 0250, 0260, 1110. Interested students who cannot pre-register should come to the first day of class for an application for admission by instructor permission.

**MCM 1502N. Derrida and Telecommunications.**

Derrida famously proclaimed that writing preceded speech, rendering all communications a form of writing, but he also argued that the history of psychoanalysis would have been different if Freud had used e- instead of snail-mail. Tracing Derrida's thought re. telecommunications from Grammatology to Writing Machines, as well as engaging his interlocutors (Samuel Weber, Avital Ronell, etc.), this course examines the importance of medium-specificity to post-structuralism. Prerequisite - two of the following: MCM 0100, 0150, 0230, 0240, 0250, 0260, 1110. Preferences given to juniors and seniors in Modern Culture and Media, Art-Semiotics, Modern Culture and Media-German, Modern Culture and Media-Italian, Semiotics-French, Science Studies, Anthropology, Comparative Literature, English, Gender Studies, and Philosophy. All other seek permission from the instructor.

**MCM 1502P. Nation and Identity in Cinema.**

Comparative study of constructions of nationhood in films, different cinematic strategies, and written texts about cinema. We will examine the discursive, political and epistemological power achieved by different versions of the concept of "national cinema" and the kinds of collective identities they imagine, from early cinema to current globalized media. Readings by theorists, historians and filmmakers. Screenings from pertinent contexts (for example, Weimar Germany, U.S. classical cinema, Japanese 1930s, third cinema, New German Cinema, New Chinese cinema, multinational corporate cinema, etc). Enrollment limited to 20 juniors, seniors and graduate students. Prerequisite: MCM 0110, 0230, 0240, 0260, or 1110, or instructor permission. Students MUST register for the lecture section and the screening.

**MCM 1502T. Film Noir: Femmes Fatales, Urban Space, and Paranoia.**

An examination of film noir, concentrating on the classic films of the 1940s and 1950s, but also investigating film noir's relation to German Expressionism as well as remakes and reincarnations of the genre such as Blade Runner. We will discuss various methodologies: psychoanalysis, ideological analysis, close textual analysis, the historiography of noir. Films by Lewis, Tourneur, Wilder, Hawks, Lang, Pabst, Welles, Preminger, Hitchcock, Ray. Readings in Copjec, Zizek, Naremore, Dimendberg, Vernet, Jameson. Enrollment limited to 20. Primarily for MCM senior concentrators and MCM graduate students; other qualified students must obtain permission from the instructor.

**MCM 1502U. Media and Memory: Representing the Holocaust.**

The Holocaust has been described as unimaginable, at the limits of representation. Yet there have been numerous attempts to imagine and represent it, across media (film, television, graphic novels), genres (documentary, melodrama, comedy, fantasy), and modalities (through history and memory, "high" and "low" culture, fiction and nonfiction, reporting and marketing). Considering such attempts to represent the unrepresentable and "mediate" the immediacy of trauma, this course will explore media texts and theoretical/philosophical reflections on the Holocaust. Enrollment limited to 20. Prerequisite: one of the following: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Preference given to juniors, seniors, and graduate students. All others seek permission from the instructor.

**MCM 1502V. Theories of the Body and the Limits of Constructionism.**

Scholars currently argue that cultural constructionism went too far, that theories of subjectivity that dominated the academy for over two decades neglected the materiality of the body. We will examine these criticisms as well as what it means to theorize the body. Readings include Merleau-Ponty (phenomenology), Freud and Dolto (psychoanalysis), Damasio (neurology), Fausto-Sterling (biology), Butler, Grosz, Kirby, Moore, Wilson, etc. Enrollment limited to 20. Prerequisite: one related MCM course.

**MCM 1502X. Race and/as Technology.**

This course asks: to what extent can race be considered a technology? That is, not an identity that is true or false, but rather a technique that one uses, even as one is used by it? Ranging from contemporary cyborgs to early 20th century eugenics, it investigates what race does, regardless of what we think it is. Readings will be theoretical, historical and literary. Enrollment limited to 20 juniors, seniors and graduate students. All other seek permission from the instructor. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110.

**MCM 1502Y. Simulation Speed Implosion: Theories of Media Technology.**

Jean Baudrillard and Paul Virilio are generally regarded as two of media studies most notorious pessimists and hyperbolists. Yet they are also theorists who treat the media as technological systems that transcend the traditionally held boundaries of the cultural, economic, social and political. This course will place Baudrillard and Virilio in a context of media theory and technology studies rooted in the work of Harold Innis and Marshall McLuhan while demonstrating important differences between these figures. We will engage in close readings of Baudrillard's and Virilio's major works as well as some of the writings of their interlocutors. Enrollment limited to 20 juniors, seniors and graduate students. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110.

**MCM 1502Z. Art Cinema and Its Legacy.**

Art cinema is associated with directors who achieved international prominence after World War II, with unconventional narrative films that were understood as expressions of original artistic subjectivities and film movements like the French New Wave (e.g., Antonioni, Bergman, Fellini, Godard, Resnais, and many others). Art cinema defined how many imagined non-Hollywood cinema in a global context, but was neither avant-garde nor necessarily political. Its legacy persists to the present, for example, in the reception of recent Iranian cinema and New Taiwanese cinema. We will study its aesthetic and textual strategies, its significance in global film history, and its theoretical implications. Enrollment limited to 20 juniors, seniors, and graduate students. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110.

**MCM 1503A. The Ethics of Romanticism (ENGL 1560Y).**

Interested students must register for ENGL 1560Y.

**MCM 1503B. Jane Austen and George Eliot (ENGL 1560A).**

Interested students must register for ENGL 1560A.

**MCM 1503C. "Terrible Beauty": Literature and the Terrorist Imaginary (ENGL 1760I).**

Interested students must register for ENGL 1760I.

**MCM 1503D. W. G. Sebald and Some Interlocutors (ENGL 1761Q).**

Interested students must register for ENGL 1761Q.

**MCM 1503E. Aesthetic Theory/Cultural Studies.**

Aesthetic thought has a long and varied history, but aesthetic categories have recently become a central concern of cultural studies. This course combines readings in the history of aesthetics; twentieth-century work on aesthetics from various philosophical and disciplinary perspectives (from the "anti-aesthetic" to "a return to aesthetics"); and recent scholarship addressing (while not necessarily celebrating) the reemergence of aesthetic questions in cultural and media studies and the evolving relationship of the aesthetic to categories such as ideology, form, and virtuality. Readings from Schiller and Kant to Adorno, Berube, Foster, Ranciere, and Spivak.

**MCM 1503F. Critical Methodologies: Contemporary Literary Theory (ENGL 1900I).**

Interested students must register for ENGL 1900I.

**MCM 1503G. Representations of Suffering in History and Media.**

This course will explore accounts of suffering in works on slavery, genocide, as well as extra-legal violence (lynching, gay bashing) in order to explore debates about the representation of violence and the use of new technologies of representation. Readings include historians, critical and legal theorists, and journalists. We will also explore recent debates around images of suffering and the reemergence of "shame" as a topic in the context of combatting violence and asserting identity in queer theory. Enrollment limited to 20 juniors, seniors and graduate students. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110, or instructor permission.

**MCM 1503H. Literature and the Ideology of the Aesthetic (ENGL 1950B).**

Interested students must register for ENGL 1950B.

**MCM 1503I. Digital Media and Race: Ethnicity, Technicity, Embodiment.**

Are we becoming post-racial in the digital age? This course questions what constitutes "race" through exploration of the ways technology affects identity. Turning to examples from new media art, World of Warcraft, cyborgs and cyberculture, the role of race in the "natural" body, and the formation of identity in online communities, we will explore the relationship between race and digital media. We draw upon critical race theory, critical theories of new media and technology, postcolonial theory and posthumanism to provide a clear and nuanced understanding of race and identity, situating it within the digital culture of our increasingly virtual world. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 juniors and seniors.

**MCM 1503J. Film Authors and Authorship.**

Who is the "author" of a film? Drawing on readings about authorship from literary theory, semiotics, poststructuralism and film studies, and close attention to films by major American and international directors (e.g. Hitchcock, Welles, Mizoguchi, Antonioni, Tarkovsky, Godard, Akerman, Jodorowsky, Deren, Brakhage, Malick, Scorsese, Lynch, Kiarostami, Aronofsky, Nolan, Bigelow), this course examines theories and practices of film authorship and the historical development of the idea of film directors as authors within film criticism and theory. Film authorship will also be considered in relation to other formations such as genre, national cinema, gender, race, coloniality, etc. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 juniors and seniors.

**MCM 1503K. Memory and Modern Media: Permanence and Presence in Film and Digital Media.**

Film and digital media, often claim to remember or preserve our experiences. But what does it mean to capture, catalogue and archive experiences by such media? How are mediated memories encoded within a larger cultural order? How do these media make fleeting moments permanent, lend an air of truth to the image, compose an archive of experiences? We will study key examples in photography, experimental and mainstream cinema, video art, and new media, which engage with memory and visuality. Readings include key critics and theorists concerned with these issues. Screenings will include Marey, Brakhage, Kurosawa, Tarkovsky, Frampton, and Marker. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 juniors and seniors.

**MCM 1503L. South Korean Cinema: From Golden Age to Korean Wave (EAST 1950U).**

Interested students must register for EAST 1950U.

**MCM 1503O. Market Economy, Popular Culture, and Mass Media in Contemporary China (EAST 1950G).**

Interested students must register for EAST 1950G.

**MCM 1503Q. Communication Culture and Literary Politics.**

A common concept of "medium" ties communication culture to art and literature. But what's a medium? Is it basic material for a work of art, like a sculptor's clay? Is it a communications device, like a telephone? Or is it a means to share information, like a network? The course explores the social ramifications of these questions, while also considering how politics can mediate art and technology, not just the other way around. Materials include novels by Delany, Yamashita, Mackey, and LeGuin; video art; and media and community theory by Nancy, Terranova, Rancière, Riley, Mattelart, and Liu. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 juniors and seniors.

**MCM 1503S. Cinema and Memory.**

This course investigates some of the major ways in which cinema has been associated with memory from the late nineteenth century to the present day. Drawing from the history of cinema practice and criticism, as well as from key theories of memory, it provides multiple frameworks for making sense of cinema as a technology of memory. While we will examine popular films, emphasis is also placed on local, minority, non-theatrical, and small-scale cinemas. Topics to be covered include film archives, prosthetic memory, trauma, community and home movies, race, migration, nostalgia, and postmodernism. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110. Enrollment limited to 20 juniors and seniors.

**MCM 1503T. Sensing Time: Affect and the Moving Image (GNSS 1960R).**

Interested students must register for GNSS 1960R.

**MCM 1503V. Reading Michel Foucault.**

A study of Foucault's work from his early texts through his last. We will look at the ways Foucault challenged conventional thinking with his theories of discourse, epistemic rupture, disciplinary formations, power, sexuality, biopolitics, governmentality, and the care of the self. We will examine the questions and tensions that drive Foucault's work internally and will consider the ways his thinking has been both used and perhaps abused. Enrollment limited to 20 juniors and seniors. Prerequisite: MCM 0110, 0230, 0240, 0250, 0260, or 1110.

**MCM 1503W. Getting Emotional: Passionate Theories (ENGL 1560W).**

Interested students must register for ENGL 1560W.

**MCM 1503X. The Ekphrastic Mode in Contemporary Literature (ENGL 1762B).**

Interested students must register for ENGL 1762B.

**MCM 1503Z. Dialogues on Feminism and Technology.**

This experimental course asks students to reexamine the critical practices and discourses of science and technology through a feminist lens. "Dialogues on Feminism and Technology" is part of a worldwide network of feminist scholars, artists, and activists called femtechnet. We will ask students to consider how feminist thought contributes to computing, hacker culture, new media, nanotechnology, surrogacy, genetic culture, bioart, and a wide range of related topics. Students will be expected to participate in the discussion of the class both online and in person, give short presentations, write a research paper, and complete a creative assignment outlined in the syllabus. Limited to 20 juniors and seniors.

**MCM 1504B. Democracy Among the Ruins (POLS 1823M).**

Interested students must register for POLS 1823M.

**MCM 1504G. Chinese Women, Gender, and Feminism from Historical and Transnational Perspectives (EAST 1950B).**

Interested students must register for EAST 1950B.

**MCM 1504H. The Panorama and 19th-Century Visual Culture (ITAL 1340).**

Interested students must register for ITAL 1340.

**MCM 1504I. Image, Music, Text (ENGL 1762C).**

Interested students must register for ENGL 1762C.

**MCM 1504J. Kubrick (ENGL 1762).**

Interested students must register for ENGL 1762D.

**MCM 1504L. Radical Poetics + World Cinema.**

"Cinema is a language," so they say. But what kind of language? Is it prose, telling stories about the world? Or is it poetry, with no formal rules but those it imposes upon itself, and with enough creative energy to remake or shatter the world? As we'll see, "film poetry" has, since cinema was born, been a watchword to filmmakers and theorists for whom cinema might deform the world's grotesque structures of power. We'll read manifestoes of radical poetics and "film poetry"—authors range from Glissant and Kristeva to Ruiz and Pasolini—and watch political films from all seven continents.

**MCM 1504M. The Politics and Practices of Digital Media.**

Crossing the fields of digital humanities, critical theory, feminist theory, race studies, and new media studies, this course considers how technology is a constant negotiation of fantasies and fears, politics and practices. We will consider the negotiation between users, bodies, code and systems as we simultaneously practice and critique the prevalent forms of digital technology. We will address questions such as: how are political and social effects visible not only in the practice of digital technology, but in the underlying structures themselves? How are digital technologies both producing and produced by certain forms of sociality and cultural discourse?

**MCM 1504Q. Reading Narrative Theory (ENGL 1950G).**

Interested students must register for ENGL 1950G.

**MCM 1504R. Iranian Cinema.**

The emergence in the 1990s of Iranian cinema onto the world stage caught many by surprise. This cinema has, however, had a long and illustrious history. While attempting to provide an historical survey of these films, we will focus primarily on those produced in the last two decades. We will pay close attention to cinematic form but will also examine the ways the films intersect with cultural-political events, including the Revolution and the subsequent Islamicization of the culture, the institutionalization of the "modesty system," and the alteration of divorce laws.

**MCM 1504S. 1948 Photo Album: From Palestine to Israel (COLT 1440F).**

Interested students must register for COLT 1440F.

**MCM 1504T. Literature and Judgement (COLT 1813Q).**

Interested students must register for COLT 1813Q.

**MCM 1504V. Technologies of/and the Body: Mediated Visions (GNSS 1720).**

Interested students must register for GNSS 1720.

**MCM 1504X. Landscape and Japanese Cinema.**

This class explores what a hundred years of Japanese cinema can reveal of the shifting meanings, emotions, and values ascribed to human and non-human landscapes. What role has film played in crafting our collective imagination of landscape and lived space? How does the meaning of "landscape" shift across time and culture? Engaging with a range of interdisciplinary approaches to these questions (including cultural studies, environmental history, philosophy, geography, and film theory), this seminar pairs an introduction to key works of Japanese film with a close look at the shifting landscapes at the base and the "background" of this cinema.

**MCM 1504Y. Spatial Audio: Envelopment & Immersion.**

Spatial Audio: Envelopment and Immersion investigates historical and contemporary theories and creative sound practices involving the perception, interpretation, and production of auditory space. Course participants analyze and explore how the sensation of space is activated in the listener through soundscapes, built environments, and audio technologies. Readings from psychology, philosophy, the arts, and sound studies support class discussions and students' writings and projects that examine the reception and composition of works that exploit acoustic phenomena to create immersive experiences. Spatial audio techniques are introduced including the use of multichannel loudspeaker arrays, binaural and surround sound formats, reverberation effects, and recording strategies.

**MCM 1505B. Hitchcock: The Theory.**

The films of Hitchcock bind together compelling narratives and meta-cinematic reflections by means of a single, distinctive shape or form. This method of construction has piqued the attention not only of cinema theorists, who look to Hitchcock to tell us about the nature of cinema and spectatorship, but also philosophers, who look to him to tell us about the nature of thinking, promising, doubting, and obsession. Examining the films themselves, alongside the philosophical speculations they have inspired, we will try to define the complex pleasure -- cinematic and cerebral -- they elicit.

**MCM 1505C. Cinema's Bodies (COLT 1440T).**

Interested students must register for COLT 1440T.

**MCM 1505E. Theory and Practice of the Essay: Word/Image/Remix.**

This course will approach the art of the essay in its written and cinematic renditions as we experiment with -- and critique -- the interactive and remix configurations of essayistic thinking in contemporary digital culture. What is (in) an essay? How do we write essays for the digital era? The goal is to develop essayistic literacy through the crafting of ideas in various platforms (word, image, interaction), highlighting the maker's subjective position while finding new ways of enjoying the pleasures of argumentation. How do we choose the technologies to best support and perform our thinking?

**MCM 1505F. The Child and the Digital: Queer Theory, Psychoanalysis and New Media.**

The child as victim and master of digital technology; the trans-national child; the fetishized child; the queer child as a redundancy; the child as site of futurity and panic, anxiety and eroticism... We will explore the intersections and frictions between queer theory and psychoanalysis in the face of new media through the figure of the child. What's the role of Desire in the formation of new media objects, i.e. toys for adults and children alike? We will develop a strong literacy in psychoanalytic and queer theory as we utilize digital technologies to complicate them.

**MCM 1505I. Writing and the Ruins of the Empire (ENGL 1561D).**

Interested students must register for ENGL 1561D.

**MCM 1505J. Oppositional Cinemas.**

This seminar explores the ways in which cinema is mobilized in the service of "opposition," that is critique, revolution, resistance, and the invention of alternative pleasures. It asks how films and their spectatorship become matters of political urgency. The arc of our screening itinerary moves at a deliberate pace from the historical avant-garde's interest in the revolutionary potential of cinema as a new industrial medium to an examination of the themes of realism, gender, race, geopolitics and temporality. Discussions and readings will emphasize close reading, theoretical concerns, and historical contexts of production, distribution and exhibition.

**MCM 1505K. Blackness and the Cinematic.**

This course equips students to think creatively and well about what might be encountered under the categories of "Blackness" and "cinematic reality" even as it aims to expose students to how "Blackness" and "legibility" have been thought in selected recent scholarly and expressive works. Our emphasis will be on Black diasporic audio-visual culture. We will consider scholarship in the cinema and media studies, performance studies, art history, and visual studies. Though most of the material we will consider was published recently, we will strive to understand the ideas and expressions that have created the fundament for our present concerns.

**MCM 1505L. Framing Gender in Middle Eastern Studies (GNSS 1961G).**

Interested students must register for GNSS 1961G.

**MCM 1505M. From Nanobots to Space Probes: Media and Scale.**

Bridging science studies and media studies, this course asks how media represent and make accessible scales of time and space that are otherwise outside the scope of human perception. We will cover how media translate nano, micro, somato, local/global, cosmic scales of space, addressing scientific visualizations and questions of representation and exhibition across media forms (including cinema, electron microscopes, radio telescopes, video games, IMAX, Planetariums, space probes, and more). We will also discuss media representations of diverse scales of time. This will involve the exploration of speculations, simulations, and questions of visualizing and narrating “deep time,” both past and future.

**MCM 1505N. Gender, Sexuality and the Imagination.**

This seminar is designed to encourage students to think creatively and well about what might be encountered under the categories of “gender,” “sexuality,” and “media.” We will take up “the Imagination” as a concept that has a history and therefore a discernible (even if contradictory) set of politics and as an injunction to create from within existing paradigms. Please note, this course is not a survey of existing scholarship, nor is it an engagement with or production of a canon. It is instead an opening to the possibility that gender, sexuality, and media might be thought otherwise.

**MCM 1505O. Does Utopia Still Exist? Media, politics and the hope of something else.**

Why, in so many of our fantasies, do we leave behind a ruined earth in search of new planets? Is it really easier to imagine the end of all life on earth than to imagine the end of capitalism? In this course we examine Utopia—its philosophical architecture and its media history—in an attempt to diagnose (and overcome?) our present inability to think ourselves into any world better than this one. This is a global course, in which we journey through theory, literature, cinema and art from all over the world.

**MCM 1505S. Cinema and Imperialism.**

This seminar examines how cinema has been utilized in the service of and in opposition to imperial projects from the twentieth century to the present. We will consider the close kinship between the capture of moving images and practices of imperial war and domination. We will also explore how movements such as Third Cinema have sought to create oppositional space within global culture industries. Films we will discuss include non-fiction such as U.S. Information Agency shorts and the work of Harun Farocki, as well as narrative features such as *Apocalypse Now*, *Zero Dark Thirty*, *Battle of Algiers*, and *Perfumed Nightmare*.

**MCM 1505V. Reading Sex (ENGL 1900K).**

Interested students must register for ENGL 1900K.

**MCM 1505W. Queerness & Games.**

This advanced seminar introduces students to the intersection of LGBTQ issues and video games, or “Queer Game Studies,” a growing area of interest for scholars, game developers, critics, and artists. Both an overview of a field in formation and an invitation to participate in the creation of this new area of critical theory and practice, this course asks students to familiarize themselves with games, books, and articles in the field, to engage critically through game design and scholarly writing, and to (virtually) attend the Queerness and Games Conference, an annual event which will be held this year in Montreal Canada.

**MCM 1505X. TRANS/MEDIA: Transgender Studies and (Trans)Media Narratives.**

The field of transmedia studies addresses the travel of intellectual properties across the world and across media platforms, conceptualizing the “trans” prefix through transnational, transmedia intertextuality (Kinder 1991), and transmedia storytelling (Jenkins 2006). Yet new work in film and media studies on transgender film and media authorship also demands attention to the work of trans media producers in this transmedia landscape. This course asks a set of questions to address the need for representation of trans media producers in transmedia studies. Is transmedia trans? Is trans media transmedia? What would happen if we understood transgender as central to transmedia?

**MCM 1505Y. In Order to Write About the Twenty-First-Century City, We First Have to Imagine It (ENGL 1160L).**

Interested students must register for ENGL 1160L.

**MCM 1506A. Digital Media and Virtual Performance (MUSC 1971).**

Interested students must register for MUSC 1971.

**MCM 1506I. Fanon and Spillers (ENGL 1901J).**

Interested students must register for ENGL 1901J.

**MCM 1506J. Representing Sexuality and Gender on Screen.**

Representing Sexuality and Gender On Screen explores the relationship between censorship and self-expression, with a particular focus on queer and feminist readings of Hollywood cinema and the history of the adult film and video industry in the United States. Students will learn queer and feminist reading strategies, performative strategies of resistance, and artistic movements including the New Queer Cinema within the histories of regulation that shaped them, from the Motion Picture Production Code, to the ratings system, to SESTA-FOSTA.

**MCM 1506K. Image, Spectacle, Everyday Life.**

In 1967, Guy Debord famously declared that we inhabit a “society of the spectacle,” a society in which images dominate everyday life. In the decades since, this state of affairs seems only to have intensified. Yet how exactly might we understand spectacle today? How, given our current social and political climate, might we conceive spectacle’s role in shaping our ideas and perceptions? Foregrounding cinema but also examining television and new media, we will consider these questions in broad historical perspective, emphasizing in turn both the wide-ranging political implications of spectacle and the critical counter-practices that have arisen to contest it.

**MCM 1506L. Small Screens.**

While television is often called “the small screen,” digital distribution finds TV, film, video, and games coexisting on the small screens of mobile devices, and the big, HD screens of home entertainment systems. Yet smallness persists in aesthetic modes of the everyday, toy, mobile, cute, viral, indie, trashy, and pirated. Small Screens (MCM 1506L) is an advanced seminar exploring the theory and aesthetics of the small. It considers film, video, television, video games, and digital media within global distribution networks, and the changing meaning of media reception in the home.

**MCM 1506M. Art, Culture and Society in Tehran (MES 1120).**

Interested students must register for MES 1120.

**MCM 1700A. Approaches to Digital Cinema.**

An advanced seminar for students of film and video production. Examines the impact of digital technologies on the forms and practices of time-based media. A production seminar in which students undertake a semester-long project. Requires technical competence and completion of an intermediate level production class. Projects may include digital films, video, installations, and other media-based works. Application required.

**MCM 1700B. Approaches to Narrative.**

A production seminar for intermediate to advanced students in film and/or video production. Students complete a substantial media project in the course of the semester. Class meetings will focus on close readings and critical feedback of students’ work during all phases of production. Texts related to narrative theory and production will be discussed. Screenings of exemplary works will supplement the class. Class members should have completed at least one time-based media class. Students are expected to be competent technically. An application will be completed during the first class session and the final class list will be determined after this meeting, with permission of the instructor. S/NC

**MCM 1700D. Reframing Documentary Production: Concepts and Questions.**

An advanced seminar for students of video and/or film production. Focuses on the critical discussion and production of documentary media. A major project (10-20 minutes), three shorter works, and in-class presentations of work-in-progress required. Readings on the theory and practice of the form and weekly screenings augment the presentation of student work. Class members should have completed at least one time-based media class. Students are expected to be competent technically. Application required. Application is available in the MCM office. Students must bring a completed application to the first class to be considered for admission.

**MCM 1700F. Theory for Practice / Practice as Theory.**

This advanced seminar explores the tensions between theory and practice in contemporary media and art works. The course examines how recent creative practices use theoretical concepts, and how practices today often include textual production or crucial theoretical implications. Requirements include: a major production project, short papers, presentations of work-in-progress, and weekly readings and screenings. Application required. Application is available in the MCM office. Students must bring a completed application to the first class to be considered for admission. The final class list will be determined after this meeting, with permission of the instructor. Enrollment limited to 20. S/NC.

**MCM 1700J. Tv/Tv: Commercial and Alternative Television.**

Given the centrality of commercial television in our culture, what possibilities exist for independent television viewing and/or independent television production? How might we re-write TV, either by stimulating alternative readings and new interpretive practices or by creating alternative texts and new modes of transmission? Combining theory and practice (television studies and video production), this course will encourage students to critique commercial television through both media analysis and their own video work. Enrollment limited to 20. Preference given to advanced students (graduate students, seniors, juniors) in Modern Culture & Media, Art-Semiotics, MCM German, MCM Italian, Semiotics French and Visual Arts. Prerequisites: any two previous MCM courses. Interested students who cannot pre-register should come to the first day of class to fill out an application for admission by instructor permission.

**MCM 1700M. Techniques of Surveillance.**

In the decades since George Orwell wrote 1984, Big Brother has evolved from a menacing specter of government power into a form of entertainment—a reality TV show that makes a game of the camera's watchful eye. Yet from NSA wiretapping to Facebook, our images and words are relentlessly tracked and profiled. This production seminar investigates surveillance as an object of cultural fascination and as a means of production in cinema, television, social software, and media art. Students give presentations and produce media art projects. Readings include Michel Foucault, Gilles Deleuze, and Laura Mulvey. Enrollment limited to 20. S/NC

**MCM 1700N. Open Source Culture.**

Where do we draw the line between sampling and stealing? What would it mean to call a urinal a work of art? This production seminar explores the tension between artistic appropriation and intellectual property law, considering open source software as a model for cultural production. We will trace a history of open source culture from Cubist collage and the Readymades of Marcel Duchamp through Pop art and found footage film to Hip Hop and movie trailer mashups. Students give presentations and produce media art projects. Readings include Roland Barthes, Nicholas Bourriaud, and Rosalind Krauss. Enrollment limited to 40. S/NC

**MCM 1700P. Radical Media.**

Walter Benjamin wrote that in the age of mechanical reproduction art ceases to be based on ritual and "begins to be based on another practice—politics." What is the relation between art and politics in an age of digital distribution? This course explores the nexus of media production and political action from the films of Sergei Eisenstein to WikiLeaks. Students give research-based presentations produce media art projects. Readings include Walter Benjamin, Jacques Rancière, and Claire Bishop. The final class list will be determined by the instructor. Enrollment limited to 40. S/NC

**MCM 1700Q. Approaches to Media Form.**

A production seminar for advanced students, organized around the completion of a substantial film or video project. Screenings and discussions will emphasize alternative approaches to media practice. Students will conduct a series of presentations on their own work as it progresses. Intermediate level production class required. Application required. Applications (available at the MCM department) should be completed and returned. Decisions will be posted on the MCM office door at the beginning of pre-registration. Enrollment limited to 20. Instructors permission required. S/NC. Students MUST register for the lecture section and the screening.

**MCM 1700R. The Art of Curating.**

It is sometimes said in contemporary art circles that curators are the new artists. Curating involves a wide range of activities, including research, selection, commissioning, collaboration with artists, presentation, interpretation, and critical writing. This production seminar considers curatorial practice as a form of cultural production, paying particular attention to questions of audience, ethical responsibility, and institutional context. Students give presentations, develop exhibition proposals, curate online exhibitions, and collaborate on gallery exhibitions, screenings, performance art presentations, or public art programs. Visiting curators present case-studies on recent projects. Readings include Pierre Bordieu, Douglas Crimp, and Boris Groys. Enrollment limited to 40. S/NC

**MCM 1700S. Narrative and Immersion.**

A production course examining the potentials for engagement in new media installations. The course draws on techniques of narrative to establish engagement in immersive environments. Students will be introduced to cinematic concepts, interactive technologies, multi-channel video and surround sound environments. Classes meetings will consist of viewing and analysis of exemplary work, discussion of readings, and critiques of student projects. An additional 1-hour technical workshop will be devoted to learning Jitter. Class members should have completed advanced work in film/video, digital sound, and/or creative writing. Open to upper-level undergraduate students and graduate students. The final class list will be determined after the first class meeting, by permission of instructor. Lab times to be announced. S/NC

**MCM 1700T. Approaches to Narrative.**

A media production course concerned with practical and conceptual aspects of narrative in contemporary film and dv cinema. After attention to technique (use of 16mm film and digital cameras, lighting, sound and editing), the second half of the semester will be devoted to individual projects and discussion of them. Screenings and close analysis of contemporary narrative films from the current global renaissance in narrative cinema, involving filmmakers in China, Thailand, the Philippines, Argentina, Greece, Portugal, etc. — partly led by feature filmmakers with backgrounds in the art world. Requirements include a group project and an individual, advanced level project in film/video. Application required. Application is available in the MCM office. Students must bring a completed application to the first class to be considered for admission. The final class list will be determined after this meeting, with permission of the instructor. Enrollment limited to 20 juniors and seniors. S/NC

**MCM 1700U. Experimental Data Representation.**

Experimental Data Representation (EDR) focuses on generatively composed, multimedia experiences utilizing the large-scale, video wall within the Digital Scholarship Lab. This interdisciplinary course brings together students from Brown and RISD to explore the creation of screen-based visualizations via programs authored by course participants. EDR provides a platform for students to examine and design ways in which experiential variables (as output) may be algorithmically determined by data sets (as input). Readings and projects will engage areas such statistical graphics, cartography, multimodal interaction, data visualization, sonification, and media art. Instruction will be offered in programming environments: NodeBox, Processing, Max/MSP, and Pure Data. Enrollment limited to 20.

**MCM 1700V. The Place of the Moving Image.**

Our experience of moving image-based media is intimately connected to our experience of place. Moving images have a unique ability to record, document, and archive places, and to alter or even produce the experience of place itself. Through readings, screenings, and production work, this hybrid production/theory course confronts place as a dynamic process, as more than the backdrop against which concrete actions and concepts form. Readings in philosophy, critical theory, and media theory. Screenings from popular, art, and experimental film/media. Students will produce three media projects related to questions of place. Previous production experience and technical competence are required.

**MCM 1700W. History, Theory and Practice of Storytelling Using Stereoscopic ("3D") Motion Pictures (HMAN 1971C).**

Interested students must register for HMAN 1971C.

**MCM 1700X. New Genre: Site and Sound (VISA 1710).**

Interested students must register for VISA 1710.

**MCM 1700Y. Expanded Storytelling: Capture, Share and Expose.**

How can we shoot a documentary inside an online videogame? How can we transform a historical archive into a dynamic narrative platform? How can we tell a story together with hundreds of other people? How can we create portraits with data retrieved from the Internet/mobile companies about ourselves? In this production course we will explore how emerging technologies and new habits of image making/sharing are challenging traditional forms of storytelling. In particular, we will focus on collaborative authorship, citizen journalism, fictional online persona creation, big data, and digital archives editing. Includes screenings, readings, technical-workshops (video/lighting/editing/coding), assignments, and a final project.

**MCM 1700Z. What is Happening to Narrative?**

An advanced media production seminar about the impression of digital technology on the practice of media based storytelling. We begin with questions: are we still interested in telling stories? What kinds of stories do we tell? Are there narratives specific to particular technics? What happens when technology makes things "easier?" We explore forms that work well online, on smart devices, or in theaters and TV. This workshop includes group experiments and a major individual project that may be linear, installation, or interactive in format. Projects should function as a stimulus and a challenge to conventional practices of duration-based narrative.

**MCM 1701A. Art/Gender/Technology.**

This production course explores and actively engages digital media and art practices that investigate questions of technology, gender, sexuality, and the body. Key topics include: cyberfeminism, gaming and virtual worlds, the social and the deep web, health apps and the datafication of the body, gendered social media bots, and affective digital labor. Technical workshops (on video/editing/coding/live-video-performance), guest speakers, and in-depth analysis of relevant case studies will provide students with the necessary skills and theoretical understanding to develop their own artworks during the course. This class is a Distributed Open Collaborative Course networked with FemTechNet.

**MCM 1701B. Hearing Image, Seeing Sound.**

This course explores how composers, filmmakers, painters, and others have forged connections between sound and image, and how we might learn from them to create our own meaningful creative work. Our readings and screenings will dig deep into the genealogies of film sound, and students will create their own imaginative combinations of sound and image throughout the semester. Final projects will be screened, performed, and/or exhibited publicly at the end of the semester. Note: although there will be a few labs, students should have experience with media production of some kind, be it sonic or visual.

**MCM 1701C. Advanced Digital Language Arts.**

Interested students must register for LITR 1010D.

**MCM 1701D. Writing3D (LITR 1010G).**

Interested students must register for LITR 1010G.

**MCM 1701E. Experimental Narrative.**

With film well into its 2nd century, a large body of work has emerged that plays with, around, and against conventions of classical cinema. Specifically, what we understand to be traditional narrative structures, such as drama, documentary, and action films. In fact, experimental narrative now has some of its own genres, which are to be found in both mainstream and fringe media. The goal of this class is to investigate some of these forms of experimental narrative. It is predicated on a basic understanding of narrative conventions, and designed to encourage students to make work that challenges those conventions.

**MCM 1701G. Text in Time-based Art.**

Semiotics has taught us to regard each film as a text. What, then, is the role of written text in film? This advanced production seminar explores the interplay of film's desire to image language and language's desire to produce images, not to mention the temporal constraints placed on reading when it is no longer a private, self-regulated activity. We will consider text as a purely visual character, the impact of subtitles, television's gluttonous use of text, and film's appropriation of literary forms. In addition to screenings and readings, students will create their own instantiations of written language in time-based art.

**MCM 1701I. Digital Worlding: Terraforming Future, Fact, Fiction and Fabulation.**

Inspired by Marilyn Strathern's concept of 'worlding,' this production course, will speculate on technologies of the future as a way to address the present. We'll work in the game designing platform, Unity, Adobe Premiere, and Photoshop to fabricate and co-create our worlds. Although not a gaming course, tools, theories, and vernaculars of game design may be utilized/subverted. Expect readings, discussions, technical workshops, and weekly assignments leading to a final project. "Art in the biological, ecological, and cyborg modes are all aspects of worlding. We cannot denounce the world in the name of an ideal world" - Donna Haraway

**MCM 1701J. Data Visceralization and Climate Change.**

The body - our biological corpus, and its social, environmental, and technological extension - grounds our ability to sense and make sense. In ever-changing ways, the sensing and acting body is extensible. Apparatuses, networks, patterns, and affects are central in sculpting consciousness, addressability, and accountability. In contrast to Data Visualization, in which perspectival representations of data are arranged and optically received, Data Visceralization foregrounds information via translations that are physically experienced. In this course, students will focus on climate change and will develop individual and collective hypotheses, projects, and actions disrupting habitual procession and enabling active engagement.

**MCM 1701K. AS ABOVE, SO BELOW: Spatial Relations in Film Practice.**

We commonly watch most time-based media through a rectilinear frame, and just as commonly acknowledge that what we are seeing are two-dimensional representations of three-dimensionality. However, it is less common to examine closely the functions of scale, perspective, distortion, and proprioception in the cinematic image. This course proposes to delve deeply into the myriad manifestations of how spatial relations impact our viewing experience. Since this is a production seminar, students will make a series of short videos that attend to various aspects of our investigations, completing the semester with a longer piece on a relevant topic of their choosing.

**MCM 1701L. Time Deformation (VISA 1740).**

Interested students must register for VISA 1740.

**MCM 1701M. Advanced Screenwriting.**

Interested students must register for LITR 1010E.

**MCM 1701O. The Arts Workshop for Practice and Practice-Oriented Research (LITR 1000).**

Interested students must register for LITR 1000.

**MCM 1970. Directed Research: Modern Culture and Media.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Time dedicated to the project should fall within the recommended range for independent studies (10-20 hours per week).

**MCM 1990. Honors Thesis/Project in Modern Culture and Media.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Eighth semester students only. Time dedicated to the project should fall within the recommended range for independent studies (10-20 hours per week).

**MCM 2100A. Contemporary Feminist Theory and the Problem of the Subject.**

Recent feminist theory represents the persistence of identity politics and the problem of the subject in various forms: through the "intersectionality" of race, class and gender; in the idioms of psychoanalysis; in terms of the "queer" subject. We will examine these often conflicting theories and the subjects of feminism they invoke with particular attention to the modes of address.

**MCM 2100B. Culture and Criticism in Marxist Theory.**

Readings in major 20th and 21st century texts, with emphasis on Western Marxist thought, from Lukács through the present. Focus on problems in the conception and reading of culture and cultural texts, with some attention to cinema and other media where possible. Where appropriate, consideration of interaction with other major theoretical frameworks (such as aesthetics, phenomenology, semiotics, psychoanalysis, feminism, postcolonial criticism, globalization theory, affect theory etc.) Readings may include figures such as Lukács, Benjamin, Eisenstein, Bakhtin, Adorno, Sartre, S. Hall, Haraway, Heath, Mouffe, Virno, Spivak, Lazaratto, Jameson, Zizek, etc. Some screenings.

**MCM 2100G. Freud and Lacan.**

Readings of major texts by Freud and Lacan will stress the relations between language, subjectivity and sexuality and the feminist use and/or critique of psychoanalytic concepts. We will also look at texts by other theorists (e.g. Melanie Klein, Heinz Kohut) and investigate the clinical implications of various approaches. Familiarity with semiotic and poststructuralist theory required. Enrollment limited to 20. Primarily for MCM graduate students; other qualified graduate students and MCM seniors must obtain permission from the instructor.

**MCM 2100J. Space and Time in Media Discourse.**

The course asks how space and time are conceptually, socially and aesthetically constructed thru different media. Perspectival constructions of space and time were always in the center of analysis when it came to cultural representations of the subject. Here will be the main focus of the course: Reconstructing the discourses on perspectivism (Nietzsche), pictorial perspective (Renaissance perspective) and temporalities of media like seriality, repetition, duration etc. During the course we will look on concepts of narrative and temporal perspectives in the context of general theories of time as well as in the context of specific media as photography and film.

**MCM 2100O. Queer Theories.**

This course will engage with possibilities and problems of queer theorizing, from the emergence of queer theory, through its (precarious) institutionalization, to its multiplied interventions. Rather than understanding queer theory as a unified approach, we will consider a range of queer theoretical work as well as challenges within queer analysis itself. Issues to be explored include formations of gender and sexuality, race and nation, epistemology and ethics, politics and communities, subjectivities and socialities, identifications and disidentifications, bodies and pleasures, publics and privates, and the temporalities and locations of our world. Preference given to graduate students; all others seek instructor permission.

**MCM 2100Y. Solidarities: Sharing Freedom, Inventing Futures (HMAN 2971H).**

Interested students must register for HMAN 2971H.

**MCM 2110B. Freud and Lacan.**

This course will stress the relations between language, subjectivity and sexuality and the feminist use and/or critique of psychoanalytic concepts. Familiarity with semiotic and poststructuralist theory required. Additional readings in Laplanche, Weber, Zizek, Gallop, Butler.

**MCM 2110E. The Reading Effect and the Persistence of Form (ENGL 2900M).**

Interested students must register for ENGL 2900M.

**MCM 2110M. Literary Theory I: Continental Aesthetics and the Questions of Politics (COLT 2650M).**

Interested students must register for COLT 2650M.

**MCM 2110N. Literary Theory II: Post-Structuralism and the Problem of the Subject (ENGL 2901B).**

Interested students must register for ENGL 2901B.

**MCM 2110S. Ethical Turns in Psychoanalysis and Literature (ENGL 2900N).**

Interested students must register for ENGL 2900N.

**MCM 2110V. The Ethics of Psychoanalysis.**

Jacques Lacan's seminar VII: The Ethics of Psychoanalysis examines theories of ethics, from Aristotle through Bentham and Kant, before proposing an ethics proper to psychoanalysis. The seminar concludes with a fascinating analysis of Sophocles' *Antigone*. We will read the seminar closely alongside texts by Freud, Lacan, Badiou, and other contemporary thinkers. Why does psychoanalysis bother to enter ethical debates rather than reject the category altogether?

**MCM 2120A. Media Archaeology.**

Provides an intellectual history of "Media Archaeology," focusing on contributions by the "SophienstraBe" departments of Humboldt University in Berlin and on the importance of Marshall McLuhan and Michel Foucault, amongst others, to its development. Readings by Friedrich Kittler, Wolfgang Ernst, Cornelia Vismann.

**MCM 2120B. New Media Theory.**

An interdisciplinary investigation of "New Media Theory," bringing together historically significant texts from the fields of media, film, literary, music, visual, HCI and cultural studies, with more recent texts in new media studies. As well as exposing students to the canon (from hypertext theory to software studies, HCI to media archaeology), the course will also address the question: what is at stake in the creation of this canon and this discipline? This course is for Graduates only. Upperclass undergraduates require instructor's permission.

**MCM 2120C. Cinema, State Violence and the Global.**

Theoretical and political conceptions of state and global violence posed against the theory and history of cinema, as representational apparatus and as instruction. Special attention to the establishment of film as global medium around World War I; current issues around the global, state, and biopower; "postmodern media culture;" etc. Readings from sociopolitical theorists (e.g. Weber, Schmitt, Arendt, Foucault, Agamben, Hardt and Negri, etc.) and media scholars/theorists (e.g. Virillio, Prince, L. Williams, Miller, etc.) Enrollment limited to 20. Permission required for undergraduates only.

**MCM 2120D. Derrida and Telecommunications.**

Derrida famously proclaimed that writing preceded speech--rendering all communications a form of writing--but he also argued that the history of psychoanalysis would have been different if Freud had used e-instead of snail-mail. Tracing Derrida's thought re. telecommunications from Grammatology to Writing Machines, as well as engaging his interlocutors (Samuel Weber, Avital Ronell, etc.), this course examines the importance of medium-specificity to post-structuralism. Enrollment limited to 20 graduate students. Permission required for undergraduates only.

**MCM 2120E. Cinema, Media Culture and Political Theory: Rancière and Others.**

There is a strand of contemporary thinkers concerned with political theory, in whose writings media and especially film play significant roles. Jacques Rancière has produced a major body of work on political theory, on aesthetics, and on film as well as media culture. This class will focus on a close examination of his political theory, his conceptions of film and media, and relations between the two fields in his writings. For comparison, we will also look at smaller samples of texts on political theory and film drawn from figures such as Agamben, Badiou, Jameson, etc. Enrollment limited to 20. This class is for Graduates only. Upperclass undergraduates require instructor permission.

**MCM 2120F. Concepts of Space and Time in Media Discourses (HMAN 2970C).**

Interested students must register for HMAN 2970C.

**MCM 2120H. Objects of (and in) Animation.**

The course focuses on the notion of animation as a general concept. This includes more than just the genre of animation films. It also includes the animation of objects that are neither organic nor alive: The animation of the machine. The technical object plays here an important role. The focus will be on the discussion of concepts of film as medium of animation per se and on different procedures of animating. Our debates here will cover: cartoon, the digital, experimental and animated effects in film. The aim is to gain a deeper understanding of the animated character of film.

**MCM 2120I. Why and How We are Looking for the Comical? Theories and Objects.**

The course focuses on the notion of the comical as a general concept. This includes more than just different genres and techniques of comedies. We will start with a close reading of old and new theories of the comical in philosophy, psychoanalysis, and poetics. Why and about what are we laughing? This is a general question that concerns the specific cinematic and visual strategies in film. Along film theoretical and analytical texts we will further focus on visibility and vision and on picture/language gaps as media for filmic jokes, wit and humour. Course is for Graduates only. Upperclass undergrads require permission.

**MCM 2120J. Realism - Concepts, Forms and Styles.**

The course focuses on the notion of realism as a general concept. Realism is a philosophical concept that defines the relationship between the external world and the subject and the media involved establishing this connection. At the same time, it is in the center of many artistic styles with many aesthetic and political consequences (cp. Italian neo-realism) Bringing this two dimensions together opens the field of attention to the borders between fact and fiction, fiction and documentary etc. The aim of the course is to enhance a broader understanding of the notion by exemplifying the problem. Enrollment limited to 12. This course is for Graduates only. Upperclass undergraduates require instructor's permission.

**MCM 2120K. Deleuze and Cinema.**

This seminar is devoted to reading Gilles Deleuze's two volume work on cinema, *Cinema 1: The Movement-Image*, and *Cinema 2: The Time-Image*, and assessing its impact on and continuing relevance to the study of film and culture. We will screen selected films of significance to Deleuze's own study of cinema, as well as a few not referenced by him that nonetheless might prove relevant to or provocative in the context of a sustained study of Deleuze's cinema book. We will read selections from work that influenced Deleuze as well as from the secondary literature on Deleuze and cinema.

**MCM 2120N. Critical Theories of Mass Media.**

The rise of mass media from print to social media was accompanied by critical discourses that emphasized both euphoric acclamation for the new media and emphatic warnings about the dangers. We will discuss how these critiques are conceptualized in terms of culture, media and of mass in three blocks, each based on the emergence of a specific medium and its technology. The main focus is the reconstruction of basic notions in the critique of mass media and the analysis of specific works by Adorno, Benjamin, Kracauer, Dewey, Lippman and others.

**MCM 2300A. Real TV.**

This course will investigate the construction of reality on U.S. television, considering not only specific reality genres (news and "magazine" programs, crisis coverage, docudrama, talk and game shows) but the discursive and representational modes that define the "reality" of commercial television as a whole. Issues include: "liveness"; social relevancy; therapeutic discourse; TV personalities; media simulation; independent television; and new technologies/realisms.

**MCM 2300B. Television, Gender and Sexuality.**

This course investigates how television produces and reproduces constructions of gender and sexuality through its institutional form (as it maps relations between the public and the private, the domestic and the social, the inside and the outside), narrative patterns (as it circulates family romances, links gender and genre, and mediates sexual and social tensions), and spectatorial relations (as it variously addresses viewers as sexed and gendered subjects, consumers and commodities, familiar and defamiliarized viewers). Enrollment limited to 20. Preference given to graduate students, and then to seniors and juniors in Modern Culture & Media, Art- Semiotics, MCM-German, MCM-Italian, Semiotics French and Gender and Sexuality Studies. Instructors permission required for all undergraduate students. Interested students who cannot pre-register should come to the first day of class to fill out an application for admission.

**MCM 2300C. After Postmodernism: New Fictional Modes (ENGL 2760X).**

Interested students must register for ENGL 2760X.

**MCM 2300D. Historicism/Photographic Media: From Kracauer and Benjamin to the DEFA Documentary (GRMN 2660H).**

Interested students must register for GRMN 2660H.

**MCM 2300E. Things Not Entirely Possessed: Romanticism and History (ENGL 2561B).**

Interested students must register for ENGL 2561B.

**MCM 2300F. Animation.**

The course focuses on the notion of animation as a general concept. This includes more than just the genre of animation films. We will start with an introduction into the tradition of the notion of 'liveliness' and the concept of the soul (e.g. anima): How is the spectator animated by film? Further we will proceed to texts that are discussing anthropological meanings of animation in the sense of animism. The main focus will then be on the discussion of general concepts of film as medium of animation per se and on different procedures of animating of and in film. Enrollment limited to 20.

**MCM 2310C. Eisenstein and Political Modernism.**

Eisenstein's theories and films are a formative moment in cinema and media history, bringing together the ambitions of politicized film and modernist aesthetics. From the first, they were invoked by a range of radical theorists and filmmakers all the way from Brecht and Benjamin to Metz and Deleuze, as well as a variety of filmmaking practices such as militant documentary, third cinema and Godard. In this seminar, we will intensively study Eisenstein's theories, filmic practices and shifting historical contexts, from the heady days of the politically and aesthetically avant-garde 1920s, through the transformations of his theories in the 1930s and 1940s (many only available posthumously) and of his later film projects (several unfinished). We will also trace out some filiations and rereadings of Eisenstein within the history of politically conversant modernist film practices and theories. Permission required for undergraduates only; undergraduates seeking permission must attend the first class session.

**MCM 2310D. The Idea of a Medium.**

What is a "medium" (a term we often seem to take for granted)? An examination of issues of medium specificity, intermediality, convergence, formalism and the idea of a "post-medium era," in relation to the media of print, photography, film, television, and digital media. We will also investigate the role of the museum and alternative screening or exhibition spaces as well as "virtual space" in delineating reception of the media. Enrollment limited to 20. Primarily for MCM graduate students; other qualified graduate students and MCM seniors must obtain permission after the first class. Students MUST register for the lecture section and the screening.

**MCM 2310E. TV Space and Time.**

Explores television's temporal and spatial construction, considering how television demarcates time (regulating it through flow and segmentation, articulating work and leisure times, marking familial and national events, encouraging rhythms of reception) and space (mapping public and private space, defining a "global media culture" through local viewings, representing and enacting travel and exchange, creating imaginary geographies and communities). Enrollment limited to 20. Preferences given to graduate students. All others seek permission from the instructor. Students MUST register for the lecture section and the screening.

**MCM 2310G. Cultural Studies and the Problem of Form.**

This course examines the emergence and contemporary practice of "cultural studies" with a focus on concepts of form. We will consider cultural studies critiques of disciplines, canons, and the aesthetic; the politics of form; theories of reading and spectatorship; "popular" and "mass" forms; and competing definitions of culture as form arising in fields from visual and media studies to postcoloniality and queer theory. Readings from Williams, Hall, Mulvey, Althusser, Spivak, Deleuze, Hartman, Agamben, Sedgwick, Galloway. Instructor permission required. All students seeking permission must attend first class.

**MCM 2310H. Television Realities.**

How does television bring "real" events to us? How do we define or know what's "real"? What kinds of "realities" exist on television, and how do they operate (in relationship to one another, to TV fantasy, to social structures, and to our everyday lives)? This course will consider not only some specific "reality genres" (news, catastrophe coverage, "live" and "historical" programs, "surveillance programming," documentary and docudrama, talk and game shows, reality series and "docu-soaps") but the representational modes that define the reality of commercial television as a whole. This course is for Graduates only. Upperclass undergraduates require instructor's permission.

**MCM 2310I. At the Limits: Media Representation of the Holocaust.**

The Holocaust has been described as unimaginable, at the limits of representation. Yet there have been numerous attempts to imagine and represent it, across media (film, television, graphic novels), genres (documentary, melodrama, comedy, fantasy), and modalities (through history and memory, "high" and "low" culture, fiction and nonfiction, reporting and marketing). Considering such attempts to represent the unrepresentable and mediate the immediacy of trauma, this course will explore media texts and theoretical/philosophical reflections on the Holocaust. Enrollment limited to 12. This course is for Graduates only. Upperclass undergraduates require instructor's permission.

**MCM 2330. Critical Genres.**

Introduces graduate students to specific aspects of the history, methods, and arguments of the academic interdiscipline known as "cultural studies." In a workshop forum, we discuss the conventions governing academic genres and consider the evidence, argumentation, rhetoric, and the construction of expertise.

**MCM 2450. Exchange Scholar Program.****MCM 2500A. Film and Modernity.**

An examination of films and film movements from 1895 through the 1930s in relation to the rise of modernity, modernization, and modernism. We will analyze the films through the lenses of theories of technology, temporality, the avant-garde, and the emergence of mass culture. Readings in Gunning, Bergson, Simmel, Kracauer, Benjamin, Jameson, Hansen, and others.

**MCM 2500C. Media Archaeology.**

Provides an intellectual history of "Media Archaeology," focusing on contributions by the "Sophienstraße" departments of Humboldt University in Berlin and on the importance of Marshall McLuhan and Michel Foucault, amongst others, to its development. Readings in Friedrich Kittler, Wolfgang Ernst, Cornelia Vismann. Permission required for undergraduates only.

**MCM 2500D. Archaeologies of the Projected Image.**

Analysis of the history and theory of projected images from the magic lantern to IMAX. We will examine theories of scale, architecture, and perspective in order to consider the changing size of moving images, from the flip book to the cinema screen to the cell phone. We will also consider theories of mass culture, aesthetic technologies, the sublime, and public art. Readings in Jonathan Crary, Siegfried Kracauer, Sigmund Freud, Walter Benjamin, Henri Lefebvre, Jean-François Lyotard, Friedrich Kittler, Laurent Mannoni, Erkki Huhtamo, and others. Enrollment limited to 20 graduate students. Permission required for undergraduates only.

**MCM 2500E. Temporality in/and the Cinema.**

An examination of the cinema's historical and theoretical position as a mode of representing time. Is time recorded or produced by film? How can we analyze duration in the cinema? What is the cinema's relation to the archive and to modernity? We will read work by Bergson, Freud, Marey, Kracauer, Benjamin, Deleuze, and others. Films by Lumière, Griffith, Snow, Tsai Ming-Liang, Hitchcock, and others. Enrollment limited to 20. This course is for Graduates only. Upperclass undergraduates require instructor's permission.

**MCM 2510A. Art Cinema as Transnational Textual Strategy.**

In the 1960s, Antonioni, Bergman, Buñuel, Fassbinder, Fellini, Godard, Resnais, etc. achieved *international, global*, prominence by bending mainstream narrative cinema conventions in the name of original *national* and artistic subjectivities. But such "art cinema" has pervaded film history, from the 1920s (e.g. German Expressionism) to the present (e.g. New Iranian Cinema). Investigation of art cinema's textual strategies, conceptual underpinnings, and historical functions. Enrollment limited to 20.

**MCM 2510B. Cinema, State Violence and the Global.**

Theoretical and political conceptions of state violence and global violence, posed against the history of cinema as representational apparatus, textuality and institution. Attention to the establishment of film as a global medium through World War I, and current work around textual norms and strategies for configuring violence, "global media culture," etc. Readings from sociopolitical theorists (e.g. Weber, Benjamin, Schmitt, Arendt, Fanon, Agamben, Foucault, Hardt and Negri) and cinema/media scholars (e.g. Virillio, Prince, L. Williams, Oppenheimer, Koch, etc.). This course is for Graduates only. Upperclass undergraduates require instructor's permission.

**MCM 2510C. The Adventures of Dignity.**

What is the ideological function of "dignity" as it is invoked in human rights discourses? What concepts of humankind and what fantasies of wholeness are assumed and reiterated? Readings include histories of human rights, treatises on dignity from Kant to Foucault, Elaine Scarry, and other theorists. Enrollment limited to 20. This class is for Graduates only. Upperclass undergraduates require instructor permission.

**MCM 2510F. The Racial Lives of Affect (ENGL 2761F).**

Interested students must register for ENGL 2761F.

**MCM 2510I. Italian Thought: Inside and Out (HMAN 2400U).**

Interested students must register for HMAN 2400U.

**MCM 2510K. Media Regionalism: Between Empires and Territories.**

This graduate seminar sets out to rethink media theory and history from the perspective of regionalism, and to confront the dominant model of a distributive, deterritorialized media unfolding with a regional approach that is tethered to particular territories, milieus, geo-environments, and ecological surroundings. What happens when the presumed geography and topology of media formation, as a distributed global network, is called into question? What might the regional models developed within area studies and postcolonial theories have to contribute to media studies? The purpose is to explore multitudes of theories and methods that help us reconsider "where" and "what" media is.

**MCM 2980. Independent Reading and Research in Modern Culture and Media.**

Individual reading and research for doctoral candidates. Not open to undergraduates. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

Time dedicated to the project should fall within the recommended range for independent studies (13-20 hours per week).

**MCM 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## Music

### Chair

Emily I. Dolan

The study of music—a phenomenon known to all people in all ages—lies naturally at the heart of a liberal education. The Department of Music at Brown provides an ideal environment for such an education, with its integrated faculty of scholars, performers, composers, and theorists.

The curriculum of the Department of Music combines studies in history, theory, ethnomusicology, and musicianship with courses in composition, technology, and performance. Application merges with analysis, creation

with cultural study, and multimedia experiments with broad meditations on sound, in a unique department that welcomes all.

For additional information, please visit the department's website: <https://www.brown.edu/academics/music/>

## Music Concentration Requirements

The concentration in Music integrates theory, history, ethnomusicology, technology, composition, and performance. Upon completing two foundational courses in theory and musicianship, concentrators have the flexibility to craft an intellectual pathway based on their particular interests and goals. The curriculum is supported by the Orwig Music Library, a state-of-the-art facility with holdings of over 40,000 books and scores and an equal number of sound and video recordings. Concentrators are encouraged to participate in one or more of the departmentally sponsored performing organizations: Chorus, Orchestra, Jazz Band, Wind Symphony, Chamber Music Performance, Electroacoustic Ensemble, Sacred Harp/ Shape-Note Singing, Old-time String Band, Javanese Gamelan, or Ghanaian Drumming.

### Concentrating in Music

If you choose Music as a Concentration\*, you will be expected to achieve well-rounded training as a musician, regardless of the genre(s) in which you specialize. This training is manifested in the following general components:

**Fundamental skills** are important for any musician, and therefore a minimum of two music theory/musicianship courses are required of all students who wish to Concentrate. Students have the opportunity to enter into various theory courses according to their interest and experience.

**Historical and cultural knowledge** of music is another key area from which Concentrators are required to complete courses. These courses may be studies of Western or non-Western forms of music.

**The creation of music** is also central to the Music Concentration. Students are encouraged to make music in a number of ways, including participation in ensembles, solo performance, composition, music production, and/or conducting.

Music faculty will be available to advise students on shaping the flexible parts of their Concentration and achieving their goal at Brown.

**Students who declare a concentration prior to Fall 2019 can view concentration requirements here:** <https://bulletin.brown.edu/archive/2018-19/the-college/concentrations/music/>

### Concentration Requirements:

#### Music Theory

- Two courses in music theory, which may include one 400-level and one 500-level course, or two 500-level courses.

MUSC 0400A	Introduction to Music Theory	1
MUSC 0400B	Introduction to Popular Music Theory and Songwriting	1
MUSC 0550	Theory of Tonal Music I	1
MUSC 0560	Theory of Tonal Music	1
MUSC 0570	Jazz and Pop Harmony	1

#### Music Scholarship, Production and Advanced Theory

A minimum of four upper-level courses above 1000, must include:

- One upper-level course in musicology or ethnomusicology
- Any three upper-level courses, including graduate-level courses

#### Additional Electives (according to student interest)

Four additional elective courses, may include:

- Up to four half-credit courses in performance - AMP music instruction and/or Ensemble Participation (2 credits)
- Up to two courses outside of the department
- One music course below the 1000 level

#### Senior Project

All music concentrators will choose a culminating experience for their senior year, either a capstone project or honors project. This may take the form of a performance, scholarly study, or original creative work. All students will have a primary advisor for their Senior Project. The work may

be done independently of a course for credit, as an independent study, or within the framework of an existing course.

#### Additional Notes

All concentration substitutions and/or exceptions must be approved by the concentration advisor in consultation with the Director of Undergraduate Studies. A substitution or exception is not approved until specified in writing in the student's concentration file in ASK.

### Honors in Music (optional)

Faculty Rules stipulate "Brown University shall, at graduation, grant honors to students whose work in a field of concentration has demonstrated superior quality and culminated in an honors thesis of distinction."

In order to apply for Honors in Music, a student must fulfill the following criteria:

- The student must have acquired a 3.5 cumulative grade point average overall.
- The student must also have acquired a 3.5 cumulative grade point average in courses that count toward the concentration. ("S with distinction" equates with "A". Grades of "S" are not computed in the grade point average.)

#### Departmental Procedures:

The Department designates three kinds of projects leading to honors in music:

- Research project in history, theory, or ethnomusicology.
- Performance project accompanied by pertinent research of lesser scope than (a). (Scholarly program notes required)
- Composition/Computer Music project. (score required if applicable; recording and/or video documentation desired, short project description)

*NOTE: the term HONORS COMMITTEE refers to a student's honors thesis advisor and readers.*

A student wishing to propose a project should proceed as follows:

- An honors candidate must secure a faculty advisor and a second reader to serve as an honors committee for his or her project by the end of the year before graduation—typically, the end of the sixth semester. At the beginning of the penultimate semester the student will submit a proposal describing the project to the honors committee for approval. The proposal must receive committee approval and be given to Mary Rego for distribution to the full faculty by the first day of the first full week of classes of the semester. The department faculty will vote on the proposals at the next regularly scheduled meeting. Decisions will be based on the student's overall performance in music courses and on the quality of the proposal. The advisor will notify the student of the faculty's decision.
- It is expected that honors projects will normally take two semesters to complete. Students pursuing honors may choose to register for MUSC 1970 in the Fall and/or in the Spring. In any case, they will establish a series of regular meetings with their advisor. By finals week of the penultimate semester, honors candidates must demonstrate substantial progress by submitting to the honors committee a partial draft of a paper or composition or, for performance projects, by playing a significant portion of the programmed repertoire. Failure to make sufficient progress may result in the termination of the honors project.
- Last semester deadlines: Honors candidates must submit a complete draft to their honors committee by the first day of classes following the eighth week of the last semester. The committee will comment on the project and suggest revisions. Revisions must be completed, and the final project submitted to the honors committee by the first day of classes two weeks later. In the case of performance projects, this means that both the public performance and the scholarly component must have been completed by this date. In the case of research projects, all figures, notes, bibliography, and other critical apparatus must have been completed. Failure to make the deadline may result in the forfeiting of honors by the candidate, though the student may complete the project as a capstone project.
- The honors committee will confer to determine their views on their projects. If the second reader is outside Music, the advisor may solicit a written recommendation about the merits of the project.

5. The advisor will deliver a copy of the completed thesis to the Mary Rego by the middle of the eleventh week of the last semester so that it may be made available for review by the full faculty. (Online, or hard copy on reserve in the Music Library.)
6. During the twelfth week of the last semester, the advisor will report on the project at a meeting of the Department faculty for a vote. The advisor will notify the student of the faculty's decision.
7. Honors recipients will present their projects at a Department of Music Convocation held once annually at noon on the first day of final examination period in Semester II.

## Music Graduate Program

The Department of Music currently offers the Ph.D. in Music in two areas of study: Musicology & Ethnomusicology (<https://www.brown.edu/academics/music/graduate/musicology>) and Music & Multimedia Composition (<https://www.brown.edu/academics/music/graduate/composition>). The long-standing doctoral program in Ethnomusicology, established in 1968, is one of the first in the country. It was combined with the study of Musicology in 2018. The Composition doctoral program had previously been known as Computer Music & Multimedia (or MEME) since it became a fully-fledged Ph.D. in 2004. The small size of both programs allows for significant cross-talk between the students.

For more information on admission and program requirements, please visit the following website:

<https://www.brown.edu/academics/gradschool/programs/music-and-multimedia-composition>

<https://www.brown.edu/academics/gradschool/programs/musicology-and-ethnomusicology>

## Courses

### **MUSC 0010. Music in History, from Hildegard to Hamilton.**

A study of a thousand years of music of Europe and America through CDs, DVDs, and YouTube. We'll explore how individuals, institutions, and societies create music, use it, experience it, pay for it, and control it. We'll discuss music and time, music and politics, music and identity. Still, the heart of the course is listening to great music, and learning how it works.

### **MUSC 0020. Popular Music in Society.**

Critical survey of a variety of contemporary American popular music styles (including rock'n'roll, folk revival, heavy metal, progressive rock, reggae, punk, rap, world beat) and their sociocultural contexts. Aural analysis of musical examples and critical reading of media texts, with study of the music's relationship to commerce, racial and ethnic identity, subculture, gender, and politics.

### **MUSC 0021B. Reading Jazz.**

This course will explore the musical aesthetics of jazz in texts about its world. Students will listen to music and read poetry, fiction, autobiography and criticism to investigate techniques (including improvisation, rhythm, timbre and articulation), which authors such as Langston Hughes, Ralph Ellison, Charles Mingus, Stanley Crouch and Jack Kerouac employed to describe and support a creative community. Enrollment limited to 19 first year students.

### **MUSC 0021E. Good Vibrations: The Music of Everyday Objects.**

This seminar will investigate the sonic properties of everyday objects and environments, and how they can transform into musical expression. Through a focus on listening and experimentation, the seminar will explore resonance, reverberation, field recording, feedback, circuit bending, archaeological acoustics, and other topics. Students will create individual and collaborative compositions and performance situations. No formal music background is required. Enrollment limited to 19 first year students. Instructor permission required.

### **MUSC 0021F. Popular Music and Society in Latin America.**

This course examines how Latin American musics shape, and are shaped by, their social environment and the political histories of their homelands. Focusing especially on Cuban and Andean styles, it explores the way that sounds connect with the lived experiences of local audiences, the artistic and political goals that have motivated key performers, and the effect of their actions on broader social debates. Issues covered include the relationship between music, race, and national identity; sound as a medium for social politics; the roles of industrialization, migration, urbanization, and media dissemination in driving musical change. Enrollment limited to 19 first year students.

### **MUSC 0021G. Duke Ellington.**

This class will be an examination of the life and work of Duke Ellington. We will use recordings, scores, films, autobiographies, interviews, oral histories and other primary source materials as well as biographical, theoretical and analytical readings to study Ellington's three careers: the composer, the performer and the band leader. We will analyze his work largely within the musical parameters of form, improvisation techniques, orchestration, instrumentation, rhythmic and chordal structures, and concepts of tone quality. Although musical literacy is not required for this course, students who so want may receive tutorials in the rudiments of theory and score reading. Enrollment limited to 19 first year students.

### **MUSC 0021H. Manifestos: Art, Politics and the Idea of Progress.**

Ever since Karl Marx and Friedrich Engels wrote their "Communist Manifesto" (1848), artists, activists and politicians have used manifestos to announce radical change and justify provocative new ideas or practices. This seminar examines the manifesto as a genre of writing with a particularly strong influence on artistic movements in 20th century Modernism. Looking at examples by poets, musicians, and visual artists, we consider how they are informed by visions of progress, social action, political efficacy, and artistic or historical necessity. Authors include Russolo, Apollinaire, Schoenberg, Munch, Klee, Kandinsky, Stravinsky, Dali, Borges, Artaud, Frank O'Hara, Duchamp, Mallarmé, and Boulez. Enrollment limited to 19 first year students.

### **MUSC 0021J. Stephen Sondheim and the American Musical.**

This seminar considers the theater shows of Stephen Sondheim in relation to the history of the American musical. Through close study of selected scenes and shows, we examine how and why Sondheim and his collaborators "reinvented" the genre. Special emphasis will be given to Sondheim's critical skepticism concerning the myths, characters, and ethos of social optimism that have been central to the Broadway tradition. We examine links between the shows and post-WWII historical contexts, and consider the political implications of the circumscribed social universe—predominantly white, urban, and affluent—within which most of his shows take place.

### **MUSC 0030. History of Jazz.**

The development of jazz from its roots to the present. Focuses on the study of style types (including New Orleans style, early piano jazz, swing, bebop, and cool jazz) and their major instrumental and vocal exponents. Jazz as a social phenomenon is studied in relation to contextual aspects of folk, popular, and art music traditions in the U.S.

### **MUSC 0032. Music and Meditation (RELS 0032).**

Interested students must register for RELS 0032.

### **MUSC 0033. From the Blues to Beyoncé: Popular Music in America.**

This course seeks to view American cultural and social history of the last century through the lens of popular music. We will investigate the history of popular music from its roots in the early twentieth-century to the present. We will examine the social, cultural and political contexts that gave birth to various genres of popular music by exploring the music through the lenses of race, class, gender, advances in technology, and developments in the music business. No musical background is required. There are conference sections for this course that meet every week.

**MUSC 0040. World Music Cultures (Africa, America, Europe, Oceania).**

A survey of a variety of musical styles from Africa, the Americas, Europe, and Oceania outside the Western art music tradition. Introduces these musics in their historical, social, and cultural context, in an attempt to understand them in their own theoretical systems and aesthetic frameworks.

**MUSC 0041. World Music Cultures (Middle East and Asia).**

Introductory survey of several of the world's musical traditions, with an emphasis on East, South, and Southeast Asia. Expands powers of musical appreciation through lectures, guided listening, and active participation in music-making. Focuses on traditional music and its relations to dance and theatre, and to its social, religious, and historical contexts, but also includes popular music and the effects of modernization. No prerequisites.

**MUSC 0043. Music of Africa.**

How do Senegalese rappers mix traditional and African American musical meanings and traditions? How did drumming and dancing traditions become emblematic of the African continent abroad? How did South African musicians challenge apartheid? This course explores the diversity of popular and traditional musics on the African continent. Approaching music as inextricably linked to culture, students will explore how musics live in communities and interact with issues such as globalization, race, and nationalism. Framing their study within the fields of ethnomusicology, cultural anthropology, cultural studies, and history, students develop practical and theoretical bases for the study of music and culture.

**MUSC 0044. East Asian Popular Music.**

This course provides a critical overview of the production, reception, and circulation of East Asian popular music. The course applies broad themes—nationalism, race, gender, diaspora, technology, and globalization—to specific case studies in Japan, North and South Korea, Mainland China, Taiwan, and areas outside of this region where the music circulates. Rather than approaching “East Asian popular music” as a distinctive category of music from a particular region, we will consider how such designations rely on certain ideas of origin, authenticity, and identity. Course materials include academic scholarship, music, music videos, documentaries, reviews, and journalistic accounts. No prerequisites.

**MUSC 0045. Music, Nation, and Identity in the Middle East.**

The Middle East, generally understood to include Iran, Turkey, the Arabian Peninsula, Egypt, and the Levant, is home to a diversity of musical traditions that mirrors the region's diversity of religions, languages, and other cultural expressions. In this course, we will take an in--depth look at several of these traditions; by listening closely to music and to the people who engage in it, students will be able to understand the always--shifting role of music in several Middle Eastern societies. There are no prerequisites, but a background in music or a willingness to listen deeply will be very helpful.

**MUSC 0063. Contemplative Music of India.**

Contemplative Music of India provides a comprehensive overview of many important traditions within the contemplative musical heritage of India, including a detailed exploration of Vedic hymnology, the classical musical traditions of both North and South India (Hindustani and Carnatic musics), the devotional music of the medieval bhakti mystics, and the ecstatic modes of the Sufi saints. With these varied practices in mind, the class will explore the myriad ways in which South Asians have used music as a vehicle to achieve and sustain contemplative states of mind. The class is open to everyone regardless of musical background. Enrollment limited to 20.

**MUSC 0064. Honky Tonk Heroes.**

This course explores country music from its origins to the present day. We will trace its development through the careers of foundational artists like the Carter Family, Hank Williams, Loretta Lynn, and Willie Nelson, and evaluate the way that their legacy is reflected in the work of contemporary artists like Corb Lund, Hayes Carll, and Neko Case. Beyond the individual creativity of these figures, we will consider the way that country music has been shaped by the recording industry, the relation it has to race, gender, and political identities, and the international spread of the American country sound.

**MUSC 0065. Music and Social Protest.**

This class will explore music as a vehicle for social protest, including historical examinations of music within the U.S. labor and civil rights movements, music and political campaigns, contemporary activist street bands (with a field trip to the Providence HONK! festival), and other examples from global independence and social justice movements in Nigeria, South Africa, Brazil, Estonia, Indonesia, and others. Students will write: two short papers on the role of music within recent protest movements, a midterm essay, and a final research paper on a protest topic of their choice. No previous musical background necessary; open to all students.

**MUSC 0066. The Guitar: Sound, Society, and Six String Studies.**

This course treats the guitar as a point of entry into key sonic, social, and technical developments that have shaped music-making around the world over the last two centuries. Through reading, viewing, and listening assignments, we will study topics such as the craft of guitar making; its ecological relation to natural and synthetic materials; the sheer variety of guitar traditions that have emerged in Europe, North America, Latin America, and Africa; the meaning of virtual and video game guitars; and the instrument's ever-shifting ties to race, class, gender, and sexuality.

**MUSC 0071. Opera.**

A survey of the history, aesthetics, and politics of opera from 1600 to the present day. Analyzes operas and scenes by Monteverdi, Purcell, Mozart, Rossini, Verdi, Wagner, Strauss, and others. Ability to read music not required.

**MUSC 0075. Jazz: Race, Power and History.**

Explores jazz in relation to American history, discussing how economics, war conditions regional differences and race relations shaped the music and its public reception. With readings from A. Baraka, L. Levine, R. Ellison, L. Erenberg, E. Lott, G. Early, S. DeVeaux and others, we address how jazz embodies social and political values or expresses national character. Open to non-musicians. Music proficiency preferred but not required. Enrollment limited to 60.

**MUSC 0080. Adaptation Culture: New Media <---> Traditional Theatres (TAPS 0080).**

Interested students must register for TAPS 0080.

**MUSC 0170D. Musical Youth Cultures (AMST 0170D).**

Interested students must register for AMST 0170D.

**MUSC 0200. Computers and Music.**

Examine the history, literature, production and theory of music technology. Track development of musical inventions and their impact on musical thought, production and culture. Develop theoretical and practical knowledge of computer music based on first-hand experience in the Multimedia Lab, using computer music software and hardware to complete creative assignments. Gain an appreciation for the pioneering work done in previous decades, both in research and composition. Become familiar with the literature of electronic music and learn about the impact of technology on popular and experimental genres. Permission granted based on questionnaire given in first class. Preference given to lower-level students.

**MUSC 0202U. Under the Beat: Mapping Music in Providence.**

In this course students will conceptually map music in Providence. From field research in/with music scenes, students will produce multimodal projects through ethnographic, analytic, and poetic writing, mixtape curation, and zine making. Projects will be triangulated on the keyword "under" (see underground, underrepresented, underappreciated, and misunderstood) and will be informed by studies across many disciplines and fields that establish popular music as a site of intersectionality (with ethnicity, race, gender, sexuality, and disability).

**MUSC 0210A. Introductory Topics in Interactive Performance and Composition: Performing with Media.**

This studio course is for choreographers, directors, film-makers, designers or anyone interested in the collision between new media and performance. Through the creation of new works we will explore practical issues, compositional strategies, and aesthetic aspects of hybrid performance. Students will create collaborative and independent multimedia works. Some instruction in video, sound, and advanced media software will be offered.

**MUSC 0210F. Audio Recording and Production for Multimedia.**

The understanding and use of multimedia materials is an important tool for an academic, not only to effectively present one's research, knowledge and skills in their field of study, but also to realize their creative ideas. In this course students will acquire operational and theoretical knowledge in audio that enhances multimedia works. Home recording studio design, using smartphones in production, and basic video editing will be also covered. By the end of the course, students will create audio production for multimedia work suitable for their purposes—a documentary video in anthropology research or an art/music project are good examples.

**MUSC 0220. Electroacoustic Improv Ensemble.**

An ensemble devoted to free improvisation with new media. Experimental approaches to sound and focused listening techniques are explored with acoustic instruments, live electronics, real-time video, together with networked improvisation, and more. Enrollment limited to 12 students; by audition.

**MUSC 0221. MEME Ensemble: Anti-Fascist Drum Machines.**

Anti-Fascist Drum Machines is a group improvisation course that evolves around the idea of the "drum machine:" machines that make beats and which exist in complex relationships with their human users. We will use political metaphors, such as conforming to versus resisting a dominant force, to critically develop schemes for musical improvisation with rhythm. Machines of all sorts will serve as our instruments: analog synthesizers and drum modules, objects like old metronomes, megaphones, and our phones, and we will also build our own drum modules using software such as Max, PureData, and Python3. Interested students must come to first class.

**MUSC 0300. Listening, Agency, Collectivity.**

What is listening? Why does it matter? How does it interface with the musics and sounds we encounter on a daily basis? This discussion- and writing-forward class delves into various forms of listening. We will consider listening as an active practice, both culturally mediated and self articulating. We will listen together to a wide variety of music and sound - including Billie Holiday, Chopin, Kendrick Lamar, onkyō, and some student-selected works - and use writing and discussion to unpack our individual assumptions and approaches to listening. No prerequisites; some musical experience preferred.

**MUSC 0400A. Introduction to Music Theory.**

An introduction to musical terms, elements, and techniques. Topics include notation, rhythm and meter, intervals, scales, chords, melody writing, harmonization, and form. Students will develop their musicianship skills, including sight-singing and keyboard, in labs which meet twice weekly. No prior musical experience is necessary. MUSC 0400A or 0400B may fulfill part of the theory requirement for the music concentration. Enrollment limited to 40. Permission granted based on questionnaire given in first class. Preference given to lower-level students.

**MUSC 0400B. Introduction to Popular Music Theory and Songwriting.**

An introduction to musical terms, elements, and techniques, with an emphasis on how they apply to Western popular music. Topics include notation, rhythm and meter, intervals, scales, chords, melody writing, harmonization, and form. Students will develop their musicianship skills, including sight-singing and keyboard, in labs which meet twice weekly. No prior musical experience is necessary. MUSC 0400A or MUSC 0400B may fulfill part of the theory requirement for the music concentration. Enrollment limited to 40. Permission granted based on questionnaire given in first class. Preference given to lower-level students.

**MUSC 0450. On Songs and Songwriting.**

A study of the art and craft of song from the perspective of the listener, the critic, the writer, and the performer. Students will examine a large range of music, from the middle ages to the present. Topics to include: song and memory; voice and literary register; declamation and delivery; melody and melodrama; rhyme and rhythm; phrasing and form. Emphasis will be on both criticism and creation, as students perfect their ear, hone their analytical skills, and try their hand at writing music. Some prior knowledge of music desirable. Course will feature at least one visit by a living songwriter, and will culminate in a performance and a recording of original songs by students enrolled in the class. Enrollment by audition and limited to 25. Instructor permission required.

**MUSC 0460. Opera and Musical Theatre Workshop.**

This course will familiarize the student with the processes necessary to be an effective singing actor. Performance opportunities within the parameters of the class will both broaden the musical palette of the student and enhance his/her understanding of preparation, coaching, and performance. Enrollment is by audition. Enrollment limited to 16. Instructor permission required.

**MUSC 0505. The Humanities in Context: Literature, Media, Critique (HMAN 0800A).**

Interested students must register for HMAN 0800A.

**MUSC 0550. Theory of Tonal Music I.**

Intensive study of the building blocks of tonal music traditions including western and popular music with focus on melody, harmony, counterpoint, keyboard skills, ear training, sight-singing from musical notation, and composition. Prior keyboard experience helpful but not required. A required placement exam is administered at first class meeting. Students who do not have experience reading music notation should take MUSC 0400 prior to MUSC 0550. MUSC 0550 is a prerequisite to many music courses and is a requirement for the music concentration.

**MUSC 0560. Theory of Tonal Music.**

See Theory Of Tonal Music (MUSC 0550) for course description. Prerequisite: MUSC 0550 or permission of the instructor.

**MUSC 0570. Jazz and Pop Harmony.**

For students with knowledge of rudiments of music, including scales, intervals, key signatures, rhythm and meter. Keyboard skills strongly recommended. Intensive study of chord scales, chord progressions, modulation, voice leading, melody writing, harmonization, reharmonization, chord symbols, and lead sheet construction. Lab sessions will focus on ear training, keyboard exercises, and sight singing. Emphasis will be on the vocabulary of jazz theory and the repertoire will be American popular song.

**MUSC 0600. Chorus.**

Half credit each semester. A practical study of choral literature, techniques, and performance practice from Gregorian chant to the present, offered through rehearsals, sectionals, and performance. Enrollment is by audition, based on voice quality, experience, and music-reading ability. Instructor permission required.

**MUSC 0601. Chorus.**

See Chorus (MUSC 0600) for course description.

**MUSC 0610. Orchestra.**

Half credit each semester. A practical study of the orchestra repertory from Bach to the present, offered through coaching, rehearsals, and performances. Enrollment is by audition. Students will be notified of audition results within the first seven days of the semester. Restricted to skilled instrumentalists. May be repeated for credit.

**MUSC 0611. Orchestra.**

See Orchestra (MUSC 0610) for course description.

**MUSC 0620. Wind Symphony.**

Half credit each semester. A practical study of the wind band repertory from Mozart to the present, offered through coaching, rehearsals, and performances. Enrollment is by audition. Restricted to skilled instrumentalists. Instructor permission required.

**MUSC 0621. Wind Symphony.**

See Wind Symphony (MUSC 0620) for course description.

**MUSC 0630. Jazz Band.**

Half credit each semester. A practical study of jazz from the 1920s to the present through coaching, rehearsals, and performance. Seminars on arranging, ear training, and improvisation are conducted for interested students but the focus is on performance. Enrollment is by audition. Restricted to skilled instrumentalists and vocalists. Instructor permission required.

**MUSC 0631. Jazz Band.**

See Jazz Band (MUSC 0630) for course description.

**MUSC 0640. Ghanaian Drumming and Dancing Ensemble.**

A dynamic introductory course on drumming, dancing, and singing of Ghana and the diaspora. Students learn to perform diverse types of African music, including Ewe, Akan, Ga, and Dagomba pieces on drums, bells, and shakers. No prerequisites. May be repeated for credit. Enrollment limited to 15. Instructor permission required.

**MUSC 0641. Ghanaian Drumming and Dancing Ensemble.**

A dynamic introductory course on drumming, dancing, and singing of Ghana and the diaspora. Students learn to perform diverse types of African music, including Ewe, Akan, Ga, and Dagomba pieces on drums, bells, and shakers. No prerequisites. May be repeated for credit. Enrollment limited to 15. Instructor permission required.

**MUSC 0642. World Music Ensemble.**

This ensemble focuses on global percussive and song traditions, especially those of the African diaspora (based on instructor's vast musical experiences). Here western instrumentalists fuse with traditional musicians from every culture: bongo, gyl, ukulele, tabla, etc. Students will grow and develop their musical skills by learning new techniques on their own instrument, exploring a range of repertoire representing genres such as highlife, reggae, salsa, afrobeat, Afro-jazz, and global fusions. There will be unique opportunities to work on improvisation taking influence from Steve Reich, Tito Puente, Randy Weston, Hugh Masekela, Paul Simon, Miriam Makeba, Ghanaba, and Milton Nasimiento.

**MUSC 0645. Brazilian Choro Ensemble.**

Half credit each semester. Students will play this popular Brazilian style, which emerged in the late 19th century and is often compared to early jazz. Classes run according to the traditional roda model, a structured jam session where performers read through, improvise upon, and hone their abilities to play familiar tunes. Prior familiarity with choro music not required, but some instrumental expertise is. Ability to read notation preferred. Typical instruments include guitar, cavaquinho (Brazilian ukulele), mandolin, flute, and pandeiro (Brazilian tambourine), but others may participate on instructor approval. Enrollment limit 20.

**MUSC 0646. Brazilian Choro Ensemble.**

Half credit each semester. Students will play this popular Brazilian style, which emerged in the late 19th century and is often compared to early jazz. Classes run according to the traditional roda model, a structured jam session where performers read through, improvise upon, and hone their abilities to play familiar tunes. Prior familiarity with choro music not required, but some instrumental expertise is. Ability to read notation preferred. Typical instruments include guitar, cavaquinho (Brazilian ukulele), mandolin, flute, and pandeiro (Brazilian tambourine), but others may participate on instructor approval. Enrollment limited to 20.

**MUSC 0650. Javanese Gamelan.**

Half credit each semester. Instruction, rehearsals, and performances in the gamelan music of Java, on instruments owned by the department. No prerequisites. Enrollment limited to 18 students.

**MUSC 0651. Javanese Gamelan.**

See Javanese Gamelan, MUSC0650, for course description. Enrollment limited to 18 students.

**MUSC 0670. Old-Time String Band.**

Half course each semester. Instruction and ensemble playing. Music taught by ear. American (southern Appalachian Mountain) traditional music on violin (fiddle), 5-string banjo, mandolin, and guitar. Enrollment limited to 20 students.

**MUSC 0671. Old-Time String Band.**

See Old-Time String Band (MUSC 0670) for course description. Enrollment limited to 20 students.

**MUSC 0680. Chamber Music Performance.**

Half credit each semester. The practical study of the literature of chamber music through participation in a small ensemble. Regular rehearsals, coaching by department staff, and performances are required. Enrollment is by audition. Students will be notified of audition results within the first ten days of the semester. Restricted to skilled instrumentalists. May be repeated for credit.

**MUSC 0681. Chamber Music Performance.**

See Chamber Music Performance (MUSC 0680) for course description.

**MUSC 0690. Middle Eastern Ensemble.**

Instruction, rehearsals, and performances in music from Turkey. String players (violin, viola, cello, bass), percussionists, brass and reed instruments as well as singers are welcome. We will explore classical Ottoman music, a variety of Turkish, Greek, Kurdish and Sephardic Jewish folk music as well as Turkish Sufi music, Greek-Orthodox church music and Maftirim music in Hebrew. Students audition at first class. This is a half-credit course. May be repeated for credit. Enrollment limited to 24. Final class list will be determined after the first meeting. S/NC

**MUSC 0691. Middle Eastern Ensemble.**

Instruction, rehearsals, and performances in music from Turkey. String players (violin, viola, cello, bass), percussionists, brass and reed instruments as well as singers are welcome. We will explore classical Ottoman music, a variety of Turkish, Greek, Kurdish and Sephardic Jewish folk music as well as Turkish Sufi music, Greek-Orthodox church music and Maftirim music in Hebrew. Students audition at first class. This is a half-credit course. May be repeated for credit. Enrollment limited to 24. Final class list will be determined after the first meeting. S/NC

**MUSC 0810. Applied Music Program: Instruction in Vocal or Instrumental Music.**

Half credit each semester. Restricted to skilled musicians. Openings are limited. Enrollment and re-enrollment is by audition and jury. Lessons are given by consultants to the Applied Music Program. A fee is charged for enrollment. Copies of the Applied Music Program Guidelines giving detailed information are available online at [www.brown.edu/music](http://www.brown.edu/music). May be repeated up to four times for credit.

**MUSC 0825. Social Justice and the Musical Afrofuture (RELS 0822).**

Interested students must register for RELS 0822.

**MUSC 0910. Medieval and Renaissance Music.**

Western Music 1000-1700 Topics addressed - among many others! How was music notated before the staff was invented? What repertoire developed when Notre Dame was built- 1099? What did the Crusaders sing? What is Polyphony? What was sung for the dedication of the Florence Duomo in 1440? How did the rise of printing change music? What music drove the Pilgrims to distraction? What did Bach hear as a child? Why did Opera develop, and what sort of music was written for its first 100 years? A few of the composers studied: Hildegard, Machaut, Dufay, Josquin, Palestrina, Byrd, Gesualdo, Schütz, Purcell, and Monteverdi.

**MUSC 0920. Baroque and Classic Music.**

A history of music in European society from Monteverdi's opera *Orfeo* to Beethoven's Ninth, studied through texts, scores, CDs, DVDs, and YouTube. We'll spend two-thirds of our time on five composers: Bach, Handel, Haydn, Mozart, and Beethoven. Prerequisite: MUSC0550 or equivalent.

**MUSC 0930. Romantic and Modern Music.**

A history of European and American art music from Beethoven to the Postmodernists. Prerequisite: MUSC 0550 or permission of instructor.

**MUSC 1001. Introduction to Generative Animation.**

Interactive graphics are used in a variety of artistic pursuits from audiovisual performance to interactive installation. Students in this production course learn to program real-time animations and video processing in the Max/MSP/Jitter environment and apply these skills through the creation of video and multimedia work. Topics include video synthesis, audio-reactive visuals, OpenGL programming and generative art. This course does not have any prerequisites, though class size is limited and admission is determined by an entrance questionnaire completed at the first class meeting.

**MUSC 1005. Arts Workshop for Practice and Practice-Oriented Research (LITR 1000).**

Interested students must register for LITR 1000.

**MUSC 1010. Advanced Musicianship I.**

Training in advanced musicianship skills relevant to Western art music from the sixteenth Century to the present, including sight singing, ear training, score reading, keyboard harmony, improvisation, and musical transcription. Prerequisite: MUSC 0560 or MUSC 0570, or permission of the instructor.

**MUSC 1011. Advanced Musicianship II.**

Continuation of MUSC 1010. Prerequisite: MUSC 1010 or permission of the instructor.

**MUSC 1020. Modal Counterpoint.**

An introduction to contrapuntal techniques of the 16th century with particular attention to the music of Lassus and Palestrina. Two hours per week of ear training and sight singing. Prerequisite: MUSC 0560.

**MUSC 1030. Tonal Counterpoint.**

The contrapuntal techniques of the 18th century with emphasis on music of Bach. Written exercises in and analysis of several genres including fugue. Prerequisite: MUSC 0560 or permission of instructor.

**MUSC 1040. Analysis of Romantic Musics.**

This is an analysis course focusing on music of 19th-century Western concert tradition. The primary goal is to improve and introduce new analysis skills related to chromatic harmony and form. The course proceeds by distinctive genres, including examples of solo piano works, lieder, string quartets and other chamber works, symphonies, tone poems, and opera. Though the emphasis is primarily on analyzing purely musical elements, we will also touch on broader issues of Romantic aesthetics and cultural contexts, such as fragmentation, virtuosity, nostalgia, and the debate over absolute and programmatic music.

**MUSC 1050. Advanced Music Theory II.**

A study of theories of Western art music since Debussy. Exercises in analysis and composition, focusing on works of Debussy, Stravinsky, Schoenberg, Webern, Bartok and Ives. Students give presentations on selected later composers. Prerequisite: MUSC 0560 with grade of B, or the equivalent.

**MUSC 1060. Analysis and Performance of Music.**

Study of the implications of musical analysis for performance. Students prepare solo or chamber works for performance in a formal concert presented at the end of the course. Focuses on problems of interpretation and their resolution through analysis of musical structure. Short analytical assignments and an extended analytical project required. Prerequisite: MUSC 0560 or permission of the instructor and proficiency on a musical instrument.

**MUSC 1100. Introduction to Composition.**

Composition students begin by using technical resources developed in their previous theoretical studies. Analysis and discussion of contemporary music provides examples of alternatives to traditional compositional strategies, which students integrate into later assignments. A study of contemporary notational practices and computer-based manuscripting and sequencing is also included. Prerequisite: MUSC 0560 or MUSC 0570 or permission of the instructor. Enrollment limited to 20 students.

**MUSC 1110. Seminar in Composition.**

This is a seminar-based course with a creative component focusing on specific compositional techniques such as writing transitions and motivic development, and writing for specific kinds of ensembles. These techniques are applicable to all kinds of music, from concert music to popular genres. The course will also address aesthetic issues, trends and influences and how they affect living composers' individual voices. Besides studying notated repertoire from the concert tradition, we will also examine approaches to film scoring, improvisation, and environmental sound worlds outside of the traditional concert hall.

**MUSC 1120. The Technique of Orchestration.**

The study of orchestration includes the ranges, sounds, and idiosyncrasies of the individual instruments, and the combination of those instruments into ensemble textures. A series of graduated assignments, including pieces for solo cello, string quartet, wind quintet, wind ensemble, and full orchestra, form the basis of this course. Prerequisite: MUSC0560 or permission of the instructor. Not open to first year students.

**MUSC 1130. Jazz Composition and Arranging.**

A review of jazz theory topics, including rhythmic structures, scales and modes, harmonic progressions and substitutions, improvisation techniques, forms and development. Weekly writing assignments for two to five parts with rhythm section accompaniment. Students compose and orchestrate three works for small and large jazz ensembles. Guest composers review students' compositions and various Brown jazz bands rehearse and record them. Prerequisites: MUSC 0550.

**MUSC 1140. Classical Improvisation.**

A historical and practical study of improvisation in western classical traditions from the middle ages to the 19th century, with emphasis on the common practice period 1700-1850. Students will apply theoretical knowledge in harmony and counterpoint to in-class improvisations, learning such skills as melodic ornamentation, chaconne-bass elaborations, variations, prelude, and free improvisation starting with simple exercises and gradually elaborating more complex pieces. These practices will be studied in relation to their historical contexts and shifting aesthetic purposes. Historical topics include cadenzas, harmonic experimentation, the relationship between oral and written transmission, and the social contexts of performance. MUSC0560 and consultation with instructor recommended. Prerequisite: MUSC 0550. Enrollment limited to 15.

**MUSC 1200. Seminar in Electronic Music: Recording Studio as Compositional Tool.**

A study of advanced studio techniques taught in parallel with topics in psychoacoustics. Students will create original studio work while developing listening and technical skills for audio production. Technical topics include recording, signal processing and mixing software, microphone technique, and live sound engineering. Class size is limited. Preference will be given to students who have completed MUSC 0200. Students will be evaluated for potential future work in the MEME program (Multimedia and Electronic Music Experiments) and past participation in MEME. Admission is determined by an entrance questionnaire completed at the first class meeting. Prerequisite: MUSC 0200

**MUSC 1205. Reality Remix - Experimental VR.**

This course pursues collaborative experimentation with virtual and augmented reality (AR and VR). The class will work as a team to pursue research (survey of VR/AR experiences, scientific and critical literature review), reconnaissance (identifying VR/AR resources on campus, in Providence and the region), design (VR/AR prototyping). Research findings are documented in a class wiki. The course makes use of Brown Arts Initiative facilities in the Granoff Center where an existing VR laboratory will be expanded through the course of the semester based on student needs. Class culminates in the release the class wiki as a resource for the Brown community.

**MUSC 1210. Seminar in Electronic Music: Real-Time Systems.**

Seminar in Electronic Music is a study of music employing electronic media, including real-time digital signal processing, multimedia, and live performance. Technical aspects of the course focus on programming using Max/MSP to create interactive projects and algorithmic compositions. Permission of instructor required. Interested students must come to the first class. Preference will be given to students who have completed MUSC 0200.

**MUSC 1215. Site and Sound (VISA 1710).**

Interested students must register for VISA 1710.

**MUSC 1220. Interactive Installation.**

Production class exploring ideas and techniques using multiple digital media to create audio-video installations. Technical issues focus on programming with Max/MSP/Jitter and using various types of sensors for human-computer interaction. Collaborative projects may combine performance, sculpture, computer music, hypertext, live video processing, and graphics in order to stimulate experimentation with new integrated art-forms. Enrollment is limited to 14. Preference will be given to students who have completed Music 200. Others will be evaluated for potential future work in the MEME program (Multimedia and Electronic Music Experiments) and past participation in MEME. Admission is determined by an entrance questionnaire completed at the first class meeting. May be repeated for credit. S/NC

**MUSC 1221. Studies in Electroacoustic Improvisation.**

According to Pauline Oliveros, “[i]n improvisation you can’t change your mind [...] in composition you can.” This class integrates critical and creative approaches in order to develop individual and collective improvisation, a practice which values presence and listening over traditional accuracy. We will consider scholarship by prominent improvisers and undertake a variety of exercises to practice and improve at improvisation. As a class we will give several performances at Brown and in Providence over the course of the semester. Instrumental and/or music software experience preferred. Interested students strongly recommended to attend first day; final class list determined by questionnaire.

**MUSC 1230. Sound/Image Composition.**

This seminar examines various ways that image and sound can be combined in unified artworks. The course will include extensive reading assignments and analysis of preexisting works, as well as the creation of new mixed-media works. Some experience with music composition required and knowledge of current video editing, animation and/or image processing techniques also highly recommended. Course admittance is by permission of the instructor. For graduate and advanced undergraduates (with prerequisite MUSC0200).

**MUSC 1235. Exploration in Video Art (VISA 1730).**

Interested students must register for VISA 1730.

**MUSC 1240A. Sonic Psychogeography.**

Psychogeography loosely describes a cluster of art practices that explore the effects of the geographical environment on the emotions and behaviors of individuals. How can sound, uniquely powerful in triggering memory and connecting us to the present moment, be used in psychogeographical work? Traveling, mapping, walking, and otherwise getting around both urban and rural landscapes will inspire class projects: audio collages, video works, headphone tours, interactive installations, public interventions. Come prepared to walk, to read, to listen, to look, and to make. Some experience with sound or video editing required. Permission will be granted based upon a questionnaire given in the first class. Enrollment limited to 14 students.

**MUSC 1240B. Narrative and Immersion.**

A production course examining the potentials for engagement in new media, drawing on narrative techniques to establish engagement in immersive works. Students will be introduced to cinematic concepts, interactive technologies, multi-channel video and surround sound environments. Classes will consist of viewing and analysis of exemplary work, discussion of readings, critiques of student projects, and technical workshops on Max/Jitter. Class members should have completed advanced work in film/video, digital sound, and/or creative writing. Open to upper-level undergraduate and graduate students. The class list will be determined after the first class, by permission of instructor. S/NC

**MUSC 1240D. Experimental Musical Instrument Design (VISA 1800Q).**

Interested students must register for VISA 1800Q.

**MUSC 1240E. Experimental Data Representation (MCM 1700U).**

Interested students must register for MCM 1700U.

**MUSC 1240F. Circuit Bending and Hardware Hacking as Musical and Artistic Expression.**

Creative experimentation with hardware electronics and re-appropriated technologies is the main focus of this course. No prior experience of electronics is required. Initially, we will build a range of simple electronic circuits and explore a variety of strategies to animate and interpret pre-existing electronic devices. Students will then develop individual instruments and/or performance environments and engage in a number of solo and collaborative projects. The aesthetics of handmade electronic music and post-digital performance practice will be foregrounded throughout. Permission of instructor is required.

**MUSC 1240I. Building Musical Instruments.**

In Building Musical Instruments, we will study and create expressive musical sound by building electronic instruments. Using sonic goals as inspiration for design features, we will build contact microphones, basic synthesizers, digital controllers, and physical enclosures, and we will consider the ways in which these distinct objects can unite to form a musical performance system. Topics include: musical listening and design, resonance of different materials, soldering, breadboarding, reading a basic schematic diagram, creating an enclosure, and expressive interaction with instruments. Override codes required; interested students must attend first day and complete questionnaire, only after which will override codes be distributed.

**MUSC 1240M. Composing with Ableton.**

In Composing with Ableton, we will study and use the well known music-making software Ableton Live and its subsidiary Max for Live (M4L). We will consider sound in Live and M4L from a variety of perspectives, from popular music vocabularies to experimental sound practices. This project-based class teaches production techniques in tandem with critical investigation of genre and development of personal style. Topics include: DAW-style production, control information, interactivity, and digital signal processing. Override codes required; interested students must attend first day and complete questionnaire, only after which will override codes be distributed.

**MUSC 1240N. Analog Practice.**

Analog sound is uniquely tactile, expressive, and flexible. Through a series of solo, collaborative, recorded, and live-performed projects, this class explores the practice of creating analog sound. We will use a wide array of modular and semi-modular analog synthesizers, including the rare ARP 2500. Beginning with broad concepts of voltage flow and modulation, we will expand into considering the unique affordances of various synths, addressing questions such as tone color, ease of sound production and variation, and conduciveness to combination with other sound sources. Interested students strongly recommended to attend first day; final class list determined by questionnaire.

**MUSC 1240P. Sound Art.**

This hands-on course explores the historical and technical innovations involving sound as a material and/or metaphor in artmaking. Students will map out and respond to the unique ways sound-based creative practices (produced after World War II) are sites of intersectionality. Students will foreground the generative possibilities of non-normative forms and question structures of audibility and inaudibility, collision and resistance. Students will develop a critical awareness of how sound art emerged from the experimentation with emerging technologies used in the science, military and industrial complexes. The tools and methodologies students experiment with will be contextualized with readings of everyday sonic praxis. Permission will be granted based upon a questionnaire given in the first class.

**MUSC 1240Q. Audio-Visual Programming and Performance.**

A digital production course exploring the coding and creation of immersive visual and auditory experiences. The class aims to enhance students skills in manipulating a variety of visual and sound media, both live and in the studio and will serve as an introduction to the techniques and materials used in audio-visual performances and installations. Classes will consist of viewing and analysis of exemplary work, critiquing of students projects, and coding workshops in the programming environment Max/MSP/Jitter. Technical topics will include real-time audiovisual interaction, multi-channel video, and projection mapping. Open to upper-level undergraduate and graduate students.

**MUSC 1240R. Rap as Storytelling.**

This is a weekly production seminar in which students will explore various aspects of hip hop songwriting from the perspective that rap verses can constitute compelling stories. Over the course of the semester we will examine several different storytelling approaches, song structures, and techniques through deep listening sessions, class discussions, and lectures from a range of invited guests. Students will be expected to record verses or parts of verses as part of their weekly writing assignments as well as perform prepared material for their classmates at three points during the semester.

**MUSC 1240S. Feminist Sonic Futures.**

This course is a weekly discussion seminar that examines the intersections of feminist praxis and sound studies. Students will survey a range of feminist discourses that inform and are informed by various sonic practices—from the production of pop songs to the documentation of disappearing soundscapes. Over the course of the semester students will critically engage with the work of feminist and womanist scholars, activists, sound engineers, performers, and composers who are largely concerned with the ways in which the sonic is deeply implicated in the coproduction and resistance of categories of difference like gender, race, class, sexuality, and ability.

**MUSC 1240Z. Public Art in Sound and Listening.**

This course is about public artmaking and critical inquiry through sound and listening. Students will collaborate with particular people in Providence and Newport on projects. Students will foreground the generative possibilities of non-normative forms and question structures of audibility and inaudibility, collision and resistance. The creative tools and methodologies students experiment with will be contextualized with readings of everyday sonic praxis, site-specific art, storytelling, speculative design, social sculpture, and teaching community.

**MUSC 1250. Sound Design.**

This production seminar is a study of techniques and aesthetics used to create sonic environments and effects that enhance a variety of media including video, radio and audio art, new media, theater, and installation art. Technical topics include audio production in multi-channel formats, advanced audio editing, mixing and synthesis techniques, and audio system design. Enrollment limited to 12 students. Preference will be given to students who have completed MUSC 1200. Others will be evaluated for potential future work in the MEME program (Multimedia and Electronic Music Experiments) and past participation in MEME. Admission is determined by an entrance questionnaire completed at the first class meeting. Prereq: MUSC 1200.

**MUSC 1255A. Making the 21st Century Musical (TAPS 1251A).**

Interested students must register for TAPS 1251A.

**MUSC 1260. Seminar in Electronic Music: Advanced Studio Techniques.**

This course will focus on developing and reinforcing technical skills, musical concepts, and critical listening abilities associated with the practice of composition in an electronic music studio. These studies will be tied to a broad range of aesthetic approaches and discussions of sound synthesis and processing, spatialization, and recording techniques.

Through a series of projects and focused study, students will expand their knowledge and craft, and will provide each other with a forum for exploring their creative studio work. MUSC 1200 is a prerequisite, and preference will be given to students who have also taken MUSC 1210, and/or 1250.

**MUSC 1280. Electronic Music Aesthetics, Perception and Analysis.**

This advanced production seminar investigates new ideas and developments in electronic music from 1990-present. Consists of discussing seminal texts and compositions, and investigating various analysis methods. Students respond to materials with a series of compositions. The purpose is to provide a wide variety of perspectives that students integrate into their artistic practice. Students undertake a research project resulting in a paper, presentation and original composition. Open to upper-level undergraduates and graduate students with significant electronic music experience. Enrollment limited to 16. By permission of the instructor. The final class list will be determined based on a questionnaire on the first day.

**MUSC 1290. Analog/Digital Hybrids.**

This course is focused on advanced synthesis techniques and analog/digital hybrid systems. Students will engage with the university's hardware synth equipment and examine how digital tools, such as the "Max" programming language can be used to supplement them. Emphasis will be placed on generative "real time," systems in order to create complex, evolving synth patches capable of producing non-repeating musical gestures. We will also explore "feedback," and how it can be utilized as both an audio and control signal.

**MUSC 1400. Music, Civil Society, and Public Service.**

The course will explore questions of an artist's role in the world, and will include an inquiry into a set of ideas in philosophy of aesthetics; an inquiry into activism and developing social practice as artists; discussion on philosophy of education as it relates to the question of positive social change; and an exploration of musical and artistic initiatives that have been particularly focused on a positive social impact.

**MUSC 1500. Major Masters and Repertoires of Music.**

The advanced study of the music of selected composers. Prerequisites: MUSC 550 or permission of the instructor.

**MUSC 1500A. Major Masters and Repertoires of Music: Bach.**

An examination of the life and work of Bach, including its place in German church music, views of his contemporaries and explanation of his manuscript and publishing history.

**MUSC 1500B. Messiaen.**

Oliver Messiaen is one of the most influential and eclectic musicians of the 20th century, yet he remains a highly enigmatic figure. This seminar explores Messiaen's life, theoretical writings, and above all his music. Critical listening and analysis will focus on Messiaen's idiosyncratic harmonic and rhythmic language as well as performance practice issues. We will investigate Messiaen's use of color, plainsong, "modes of limited transposition," birdsong, serialism, and rhythm via representative works. We will also examine Messiaen's formation and his legacy as teacher/composer/performer. Prerequisite MUSC 0560.

**MUSC 1510. Baroque and Classic Music.**

A history of western music from Monteverdi's *Orfeo* (1607) to Beethoven's *Ninth Symphony* (1824). Prerequisite: MUSC 0550 or equivalent.

**MUSC 1600B. Adorno and Jankelevitch in Dialogue.**

Philosophers Theodor Adorno and Vladimir Jankelevitch were both leading philosophers of the mid-20th century (in Germany and France respectively). Both were also avid pianists who produced several philosophical books on music. This course examines their musical writings both independently and comparatively. Jankelevitch's ethical and metaphysical questions, together with Adorno's sociological and historical ones, will be studied in relation to the philosophical traditions they inherited and transformed. Their work will also be evaluated in the volatile European context of the period 1930-70. Enrollment limited to 20 students.

**MUSC 1610. Writing about Music.**

A study of music criticism through three intertwined enterprises: analyzing classic 19th- and 20th-century writings on Western art music; analyzing representative writings on popular music in recent newspapers and magazines; and writing short critical pieces on a mixture of art and popular music, some assigned, some chosen by the student. Non-music concentrators welcomed. Prerequisite: MUSC 0550 or instructor permission. Enrollment limited to 15. Instructor permission required.

**MUSC 1612A. Writing about Music.**

A study of music criticism through three intertwined enterprises: analyzing classic 19th- and 20th-century writings on Western art music; analyzing representative writings on popular music in recent newspapers and magazines; and writing short critical pieces on a mixture of art and popular music, some assigned, some chosen by the student. Non-music concentrators welcomed. Prerequisite: MUSC 0550 or written permission.

**MUSC 1622. Seminar in Music and Theater.**

Students compare selected Broadway musicals with their principal sources (novels, short stories, dramas, films, another musical) and, in some cases, their subsequent transformations (a film, another musical). Emphasis is on primary sources; students largely determine and run the film component of the course. The class is likely to study *Porgy and Bess*; *Pal Joey*; *Kiss Me Kate*; *My Fair Lady*; *Flower Drum Song*; *Cabaret*; and *Wizard of Oz / The Wiz / Wicked*. Students may choose other works for individual projects. Majors and non-majors are encouraged to enroll. Prerequisite: MUSC0550 or written permission. May be repeated for credit.

**MUSC 1632A. The Great American Songbook (Part I: The Songs).**

This course analyzes interests and values exhibited in American popular songs in the period between 1914 and 1945. Topics range from sexual mores and work ethic to race relations and the Melting Pot. Emphasis is on the songs and their writers; performance and performers will be emphasized in a subsequent course.

**MUSC 1640A. Opera, Politics, History, Gender.**

The will to social order and the desire to transgress it: this conflict in modern culture has been negotiated dramatically in opera. This seminar concentrates on operas by Mozart, Wagner, Verdi, Debussy, and Puccini. Each opera will be placed into dialogue with historical and theoretical texts and analyze how opera engages power in relation to gender, nationalism, modernism, and crises of representation.

**MUSC 1640B. Seminar in Opera Studies: Performance Analysis and Opera.**

The seminar will explore current tendencies in (radical) opera productions in Germany and elsewhere as well as methods to analyze opera in performance. Based on the premise that the performative dimension of opera is to be understood as the ephemeral and reciprocal process between performing actors/singers and recipients, this seminar will raise the question of how this special relationship can be theorized and analyzed.

**MUSC 1640C. Wagner's Ring.**

This seminar will pursue a rigorous musical, textual, historical, and political analysis of Wagner's tetralogy *The Ring of the Nibelung*. It will include an analysis of production styles, with specific attention to the production currently in joint development at the Teatro alla Scala, Milan, and the Berlin State Opera, to be directed by Guy Cassiers. We will address themes such as globalization and its discontents, the interplay of music drama and visual technologies, and the contextual importance of serial novels such as those of Marcel Proust, Robert Musil, and Hermann Broch. Enrollment limited to 20 students. Instructor override required.

**MUSC 1640D. Opera: History, Theory, Practice.**

This seminar will analyze the history, theory, and practice of opera in its textual (words and music), and performative (in the theater and in society) dimensions. We will focus paradigmatic works of Mozart, Verdi, and Wagner alongside key works in philosophy, cultural theory, and gender/performance/opera studies. We will also discuss the genesis and implementation of key productions. In addition, each student will select a 20th or 21st-century work for individual research and presentation to the group.

**MUSC 1640E. Seminar in Opera Studies: Mozart's Operas Then and Now.**

Mozart wrote seven operas during his Vienna years. While we'll touch on all of them, the heart of this seminar will be his three Italian comic operas - *The Marriage of Figaro*, *Don Giovanni*, and *Così fan tutte* - and his German opera, *The Magic Flute*. We'll examine them as musical dramas, psychological studies, social documents, and sites for stage directors. We'll give special attention to Mozart's characterizations of women and the issues these raise for directors and singers. Work will include DVDs, CDs, readings, and scores for those who read music. Students will adopt an opera for the course.

**MUSC 1640G. The Case of Wagner.**

Richard Wagner (1813-83) changed forever the forms, meanings, and contexts of European music, especially the symphonic and operatic traditions. He transformed the way we listen to music written before him. This course will pay close attention to several major music dramas, especially *Lohengrin*, *The Ring of the Nibelung*, and *Parsifal*, focusing on music, words, and the history and variety of staged productions. We will also consider Wagner's relation to literature, philosophy, and history, including such issues as nationalism, modernism, anti-Semitism, and the persisting controversies around his work in Germany and Israel. This is an upper-level seminar but open to all.

**MUSC 1641. History and Theory of Listening.**

This upper-level seminar will explore the phenomenon of listening as related to musical works and musical experience. How do we listen to music, how do we understand musical works to be listening, and how do we listen to musical works as they seem to us to be listening to themselves, their pasts and their futures? We will examine spaces for music (architecture and acoustics) as well as cultures of listening including religious, psychological, and political contexts.

**MUSC 1645. Seeing Through Sound: Music and Film in Mainstream, Indie, and Experimental Cinema.**

Film has long attracted artists working outside the mainstream. Yet most surveys of music and film still privilege Hollywood cinema and the classical film "underscore" as the exemplar of cinematic multimedia. In this course, we will set this important tradition within a wider historical narrative that also embraces avant-garde and underground genres, from abstract animation and the city symphony to graphical sound and found-footage films. And in weekly special screenings ranging from opera films to backstage musicals to "mock rockumentaries," we will examine films that self-consciously thematize their own music, or in which music itself becomes a character in the narrative.

**MUSC 1650. Adorno Goes to the Opera.**

"Of all the tasks awaiting us in the social interpretation of music", wrote T.W. Adorno, "that of Mozart would be the most difficult and the most urgent." Using writings by Adorno on opera as a point of departure, this course goes on to a critical examination of selected Italian, German and French operas between *Fidelio* and *Wozzeck*. Finally, it takes up Adorno's challenge by reconsidering some of Mozart's mature operas, from *Figaro* through *The Magic Flute*, in terms of later opera history and theory.

**MUSC 1660A. Mahler's Century.**

This seminar will explore key works of Gustav Mahler in multiple contexts, including critical/interpretive traditions, conducting and performance practices, and the contexts of political, cultural, intellectual, and aesthetic history. Readings will include work of Sigmund Freud, Theodor Adorno, Carl Schorske, Julia Kristeva, Judith Butler, and others; we will think about problems such as modernism, orientalism, Jewishness, montage, noise, shock, and melancholy.

**MUSC 1661. Death and Dying.**

A study of the cultural treatment of death in Europe and America from the French Revolution to the Vietnam War. Using CDs, DVDs, and YouTube, we'll listen to operas, songs, Requiems and oratorios, and instrumental and orchestral works, from Mozart's *Don Giovanni* to Crumb's *Black Angels*. We'll also read short stories, novels, and poems; watch war films; and study art, architecture, cemetery sculpture and design, mourning rituals, and state funerals.

**MUSC 1662. Music and Childhood in the Western Tradition.**

This seminar examines significant moments in the history of children as creators, performers, consumers, and subjects of music in the Western tradition. From Mozart to Michael Jackson, medieval psalmody to Stockhausen, we will survey the enlisting of children, childhood, and the childlike across a range of performance contexts and pedagogical, aesthetic, and cultural-political agendas. We will sharpen our critical awareness of the ways Western music mediates negotiations of childhood agency, innocence, and authenticity. For their final project, students may work with a historical item of children's musical culture, or undertake a "mini-ethnography" of a local children's music program or ensemble.

**MUSC 1663. Women in Music.**

This course comprises a chronological survey of female art music composers from the ninth century to the present day. This will include the study of many pieces of music by women, accompanied by readings addressing the social, economic, cultural, and political circumstances that surrounded their composition. Additional readings address the larger context for women's composition and its reception over time as well as the development of a feminist perspective in music scholarship.

**MUSC 1671. Conductors, Orchestras and Repertory.**

A study of conductors and the orchestras they directed, and an exploration of great musical compositions of the past 200 years. We will cover the evolving function and status of conductors from Arturo Toscanini and Wilhelm Furtwängler to Allan Gilbert and Gustavo Dudamel; orchestras from Berlin and Vienna to New York and Los Angeles; and music from Beethoven to Stravinsky. Our work will involve scores, CDs, DVDs, YouTube, memoirs, letters, and secondary sources. Each student will adopt two conductors and orchestras for the course.

**MUSC 1672. Hitler's Gift.**

The flight of musicians from Europe in 1933-45 exile changed the face of Western music, and it changed them. Among them were many of the great musicians of the 20th century, including Bartok, Casals, Klemperer, Rubinstein, Schoenberg, Toscanini, and Weill. We examine patterns of emigration, settlement, and adaptation through memoirs, letters, essays, newspaper articles, biographies, recordings, and videos.

**MUSC 1673. Interpreting Debussy.**

A study in musical poetics. Debussy forms the launching point for a discussion of pleasure and liberty in harmony, melody, rhythm and form; of orchestral impressionism and of music's links to poetry and painting. Close readings of scores and recorded performances will yield different approaches to interpretation, leading to two analytical papers and a final class concert. Prerequisite: MUSC 0550, 0560 or permission of instructor.

**MUSC 1675. Music, Religion, Politics.**

This is a course about the cultural origins and the national and global legacies of central European musical traditions and their role in the building, survival, and transformations of the city of Berlin. How do we understand the cultural importance of musical works, performance, and experience at the intersection of art, politics, and religion (including the process of and debates over secularization)? How has music served to build both inner life and community, including the "imagined community" of the nation? How do we understand the legacy of European and national musics for the age of globalization? Prerequisites: Prior to the first class, interested students must submit a brief paragraph to the instructor indicating why they wish to take this course and how it will fit in with their course of study. Limited to 12. Permission required.

**MUSC 1680. Musical Performance: Theatricality, Body, and Spectacle.**

Explores the visual and theatrical dimensions of music performance--both recent and historical--through the analysis of live performances, video clips, and historical documents. Using the critical methods of performance studies, we seek to uncover those aspects of musical experience that have become transparent or normalized by their familiarity, and which are eluded by a traditional focus on music as "sound alone." We concentrate on five genres--rock, classical, pop, jazz, and experimental--and consider figures such as Arturo Toscanini, David Bowie, Jimi Hendrix, Louis Armstrong, Miles Davis, Pauline Oliveros, John Zorn, Diamanda Galás, Madonna and Michael Jackson. Enrollment limited to 24. First year students require instructor permission.

**MUSC 1690A. Miles Davis: An Evolution in Jazz.**

This seminar examines the life, music, and iconic status of Miles Davis, the most complex and varied figure in the history of jazz. From the mid-40s, when he emerged as a sideman to bebop virtuoso Charlie Parker, to his death in 1991, Davis was often on the cutting edge of jazz's evolution, spurring on the development of cool jazz, hard bop, progressive jazz, modal jazz, post-bop, and various forms of fusion. He was at the same a powerful though elusive personality who continues to inspire critical controversy. We will examine his creative evolution in the context of the history of popular music taste, race relations, gender roles, and social class in America. Readings include biographies, studies of his music, and collections of critical essays. There will be extensive listening assignments and occasional required video screenings.

**MUSC 1690B. Seminar in Jazz Studies: Transatlantic Jazz.**

Chronicles the interaction of African American, American and European jazz perspectives over the past century of accelerating transatlantic musical and cultural exchange. Using a number of case studies, we will examine these interrelated and shifting perspectives in the context of broader geopolitical developments that have structured (and continue to structure) their interaction. Accordingly, we will divide the course roughly into three chronological periods: interwar, cold war, and post-cold war. Discussions will focus upon source readings, recordings and other materials and also important theories of transatlantic cultural exchange drawn from American, European, and African and African American Studies. Enrollment limited to 20 juniors, seniors, and graduate students. Instructor permission required.

**MUSC 1700. Score Reading and Conducting.**

The art of reading, analyzing, and conducting a musical score. Studies in clef reading, transposition, ear-training, and structural analysis to develop the skills needed for full comprehension of an orchestral score. Introduces the theory and technique of conducting with practice in the art of physical gesture. Selected repertoire from the Baroque through contemporary periods are studied and conducted in class. Prerequisite: MUSC 0550 or permission of the instructor. May be repeated for credit.

**MUSC 1701. Orchestral Conducting.**

We will discuss, study and practice various technical approaches to conducting through the examination of standard repertoire. Students will develop skills in score reading and analysis. This course will provide a supportive workshop environment. Students will be given the opportunity to conduct an in class ensemble. Repertoire will small to large symphonic works from Händel through Stravinsky, depending upon the needs of each student and over all class level. Pre-Requisites: MUSC 0550-0560. Audition on the first day of class with Händel's Messiah Overture. Students will play for their colleagues. Prior knowledge of orchestration and instrumentation is helpful. Knowledge of transposition and C clefs is helpful. If you have placed out of music theory at Brown or have questions, please contact the instructor at: brandon\_brown@brown.edu

**MUSC 1710. Choral Conducting.**

An introduction to the art of conducting, with emphasis on choral training. A study of the relationship of gesture to sound will be combined with a survey of the choral repertoire, beginning with Gregorian Chant and covering renaissance motets, masses and madrigals, Baroque works with instruments, excerpts from Mozart's vespers, 19th-century Romantic partsongs, and selected 20th-century. Issues of basic vocal production, warm-ups, rehearsal planning, editing, programming and concert production will also be included. Prerequisite: MUSC 0400 or 0550. Written permission required. May be repeated for credit.

**MUSC 1810. Applied Music Program: Instruction in Vocal or Instrumental Music.**

Half credit each semester. Restricted to skilled musicians. Restricted to skilled musicians demonstrating mastery of an advanced repertoire in their fields. Openings are limited. Enrollment and re-enrollment is by audition and jury. Lessons are given by consultants to the Applied Music Program. MUSC 0830, 0840 is prerequisite to this course. A fee is charged for enrollment. Copies of the Applied Music Program Guidelines giving detailed information are available online at [www.brown.edu/music](http://www.brown.edu/music). Prerequisite: MUSC 0400, or MUSC 0550, MUSC 0560. Written permission required. May be repeated up to four times for credit.

**MUSC 1900. Introduction to Ethnomusicology.**

This seminar offers an introduction to theory and method in ethnomusicology, a discipline grounded in ethnographic research and writing on musical practices. We will think, talk, and write about how and why people make music, as well as how and why ethnomusicologists go about their work. Students will undertake independent fieldwork projects on musical communities, learning first-hand about both the special potential and the practical/ethical challenges of this type of research. Case studies highlight such issues as tradition, appropriation, postcolonial politics, and the ethics of fieldwork. Prerequisites: sophomore standing; MUSC 0400/0550 or ETHN 1000 or instructor permission.

**MUSC 1900Z. Echoes of the Everyday: Telling Stories with Sound.**

This course explores the many modes of nonfiction story-telling made with sound (sonic ethnography, audio documentary, sound art, and audio internet archives). Students will learn the tools of audio technology to record, edit, and produce critically aware sound works that interpret culture and everyday lived experience. Students will make location sound recordings, critically analyze those recordings, and re-present them through their own independent audio works. Exploring fine-grained aesthetic and ethical details between artistic and ethnographic representation, students will offer and receive constructive feedback throughout their process. Student projects will be contextualized with readings that help them interrogate everyday sonic praxis.

**MUSC 1905A. Music and Cultural Policy.**

What is to be done about music and the people who make it? All over the world, individuals, governments, NGOs, and other groups are making plans for music: to ensure its survival, to make it known to a wider public, or to use it as an engine of economic growth. This course will examine various social engineering projects involving music. Topics will include media and internet regulation; ownership of music and intellectual property law; the role of institutions such as UNESCO; music in war and peace; music, heritage, and cultural tourism; and conservation, stewardship, and sustainability. No prerequisites.

**MUSC 1905B. Indigenous Music of the Americas (ETHN 1890D).**

Interested students must register for ETHN 1890D.

**MUSC 1905C. Open Source Culture (MCM 1700N).**

Interested students must register for MCM 1700N.

**MUSC 1905D. African American Musical Theatre.**

This seminar explores the rich history of African American musical theater, from the first black musical (*A Trip to Coontown* (1897)) through *Dreamgirls* and beyond. The class will encompass shows with all-black performance and creative teams as well as those with white producers and black casts. Drawing on the resources of the African American Sheet Music Collection at the John Hay Library, there will be a special focus on the lesser-known musicals of the early twentieth century. Issues of race, representation, and performance will be explored through theoretical and historical readings, as well as through available scores, recordings, and films.

**MUSC 1905E. Music in the Middle East and North Africa.**

This course provides an introduction to the music of the eastern Mediterranean, north Africa, Turkey, and Iran. Throughout this tour we will view music culture through a variety of thematic lenses. We will see how music is implicated in identitarian discourses; how musical forms transcend political boundaries, ethnic lines, and religious divides; how religion constrains and stimulates musical expression; and how music intersects with gender and sexuality. We will explore elite, folk, and popular genres. Though we will also discuss musical structures and terminology, no musical training is necessary for this course.

**MUSC 1905F. Latinx Music in the U.S. (LACA 1504E).**

Interested students must register for LACA 1504E.

**MUSC 1905K. Governing Culture: Music and the Arts in Political Life (HMAN 1974K).**

Interested students must register for HMAN 1974K.

**MUSC 1910. Music and Mind.**

Explores music perception in terms of auditory and cognitive processes such as auditory perception, memory, and learning. Lectures, discussions, and demonstrations review and analyze a body of scientific research on the psychology of music. Problem sets and a collaborative laboratory project. Prerequisites: PY 1 (PSYC0010) and MU 1 (MUSC 0010) or permission of the instructor.

**MUSC 1920. Music and Modern Life.**

Examines topics related to the everyday use of music: the determinants of musical taste; music for emotional self-management (in the health club or Iraq War); "high" vs. "low" music; eclectic taste; popular music and the music industry; mp3blogs; new business models. Readings (in sociology, history, and cultural studies) and original field research by class members. Instructor permission required. Enrollment limited to 20.

**MUSC 1921. Music, Nature, Ecology.**

Explores how music mediates human relations to the natural world. Via case studies drawn from Western and non-Western societies, we will examine how theorists use sound to think through the difference between humans and non-humans; how composers and soundscape artists like Grieg, Ives, Westerkamp, and John Luther Adams shape listeners' perceptions of natural worlds and ecological systems; how people in Papua New Guinea, Mongolia, and the Bolivian Andes use sound to coordinate ecological awareness; how instruments are implicated in human relationships with the environment; and the ways that sound art helps to challenge longstanding distinctions between nature and its others.

**MUSC 1923. Music in the Andean Countries: From Cumbia to Carnavalito.**

This course provides an introduction to the music of South America's Andean countries. Through texts, listenings, and hands-on instruction, students will explore the social histories and stylistic principles of genres like Colombian and Peruvian cumbia, Afro-Peruvian festejo and landó, Chilean nueva canción, and the sikuri and huayno music of South Andean Quechua and Aymara peoples. Class sessions balance cultural analysis with opportunities to play, and students are expected to develop some facility with key songs and rhythms. No experience is necessary, though inexperienced musicians can expect to focus on instrumental or vocal parts that present a lower bar to participation.

**MUSC 1926. Gospel Music from the Church to the Streets (RELS 1650).**

Interested students must register for RELS 1650.

**MUSC 1930. Music of Indonesia.**

The traditional music of Java, Bali, and Sumatra, with special attention to the bronze percussion orchestras (gamelan) and their use in ritual, dance, and drama. Topics include: music and trance; the impact of colonialism; nationalism, modernization, and tourism; and Indonesian music and "world beat." Theory and practice are integrated through extensive instruction on Brown's gamelan instruments. Enrollment limited to 20 students.

**MUSC 1931. Music of Ireland.**

An introduction to the traditional music of Ireland through readings, lectures, listening, and participation. The historical and cultural context of the music is considered as well as the instruments, genres, and styles.

**MUSC 1932. American Roots Music.**

This seminar offers a critical and comparative exploration of American roots music, a category comprising folk, traditional, and popular genres that have been labeled "heritage music" or "ethnic music" in the context of American multiculturalism. Major case studies include African American, Mexican American, and Anglo American traditions/repertoires, with geographical emphases in Appalachia, the city of Chicago, and the state of California. Readings draw on both historical and ethnographic scholarship. Some background coursework in ethnomusicology, cultural anthropology, American Studies, and/or ethnic studies is required. Prerequisite: MUSC 1900 or ETHN 1000 (formerly ETHN 0500) or instructor permission. Registration permission granted based on questionnaire distributed at first class meeting.

**MUSC 1933. Music of India.**

A survey of the music cultures of India. Intensive study of the classical traditions as well as an introduction to folk, tribal, and urban popular musics. Reading, listening, and class discussions focus on theory, history, and aesthetics. Improvisation; music and the dramatic arts; the social organization of music-making; and music as an expression of class, culture, and subculture in modern India. Prerequisite: MU 55 (MUSC 0550) or permission.

**MUSC 1934. Music of Turkey.**

A study of the traditional, classical, folk, and popular music traditions of Turkey. Through directed reading, listening, and video viewings, students will become familiar with Turkey's major music traditions and instruments, learn relevant musical concepts and terminology, and develop critical listening skills. Students will also learn to perform the basic modes and rhythmic cycles of several Ottoman/Turkish musical styles. No instrumental skills are required. Students will be expected to learn to sing Turkish melodies, but will not be graded on their vocal performances.

**MUSC 1935. Beyond Bossa Nova: Brazilian Music and Society.**

With a musical culture that ranges from roots samba to favela funk, and from the music of indigenous Amazonian peoples to the neo-African sounds of candomblé ritual, Brazil's soundscape rivals its social and geographic diversity. This course provides an introduction to the "erudite," traditional, and mass-popular sounds of Brazil, emphasizing their role in creating and contesting visions of nationhood and Brazilian society over the twentieth century. There are no prerequisites, but a background in either music or Latin American studies will greatly aid students' progress in the course. Open to sophomores, juniors, and seniors.

**MUSC 1936. Tradition and Protest: Persian and Iranian Music (MES 1000).**

Interested students must register for MES 1000.

**MUSC 1937. Dancing the African Diaspora.**

This course investigates the politics of movement, across oceans and dance floors, at the rich intersection of African Diaspora and Dance Studies. We examine the relationship between dance, movement, gesture and music in the expressive practices of the African Diaspora. Students will engage with theoretical and ethnographic approaches to transnationalism, music, performance and the body, and race and gender, alongside multimedia and experiential workshops. Espousing a broad geographical focus, we will explore music and dance practice from Chicago's clubs to the Broadway stage to the streets of Rio and Cape Town. No previous musical knowledge required. Enrollment limited to 20.

**MUSC 1940. Applied Ethnomusicology.**

Theory and practice in applying the cultural study of music outside the academic world and in the public interest. Students will research, document, interpret and present music from local and regional ethnic communities. Prerequisite: MU 5, 6, 120 (MUSC 0050, 0060, 1200), graduate standing, or written permission from the instructor.

**MUSC 1950. Transcription and Analysis of Jazz.**

Transcriptions from major jazz recordings are made by the students. The personal styles of the musicians are defined through analysis in the context of the various trends in jazz history. The transcriptions are analyzed within the parameters of rhythmic and harmonic structures, tone quality, motivic design, and idiomatic performance. Singing, ear-training, and dictation are used to develop transcription skills. Instructor permission required.

**MUSC 1960. Advanced Ghanaian Drumming and Dancing Ensemble.**

Students with experience in African and related musical traditions perform drumming, dancing, and singing of Ghana and the diaspora. Focus on a more challenging repertoire with emphasis on multi-part, lead, and improvisational playing. Prerequisite: audition. May be repeatable for credit. Instructor permission required. Enrollment limited to 15 students.

**MUSC 1961. Advanced Ghanaian Drumming and Dancing Ensemble.**

Students with experience in African and related musical traditions perform drumming, dancing, and singing of Ghana and the diaspora. Focus on a more challenging repertoire with emphasis on multi-part, lead, and improvisational playing. Prerequisite: audition. May be repeatable for credit. Instructor permission required. Enrollment limited to 15 students.

**MUSC 1970. Individual Independent Study.**

Directed undergraduate research for advanced students. Prerequisite: permission of the instructor. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**MUSC 1971. Digital Media and Virtual Performance.**

This seminar investigates digital media practices at the intersection of virtual and embodied experience, exploring overlapping genres of play, performance, pedagogy, and participatory culture. Topics include digital games, viral videos, online music and dance lessons, and the performative aspects of virtual communities. Theoretical approaches draw on scholarship in media ethnography, performance studies, human-computer interaction studies, gender studies, and ethnomusicology. We will give equal attention to production, circulation, and reception practices, and consider their contemporary convergence. The course requires critical engagement with a diverse range of media, genres, and cultural contexts, encouraging students to examine their own media practices. Registration permission granted based on questionnaire distributed at first class meeting.

**MUSC 1980. Group Independent Study.**

Directed undergraduate research for advanced students. Prerequisite: permission of the instructor. Section numbers vary by instructor. Please see the registration staff for the correct section number to use when registering for this course.

**MUSC 2000. Theory and Method in Ethnomusicology.**

This core seminar offers a graduate-level survey of the discipline of ethnomusicology and its history, building on previous coursework in ethnographic methods and the history of anthropological theory. Students will complete independent research projects as well as shorter assignments geared to professional development (e.g., exam field proposal, scholarly book review, historical investigation of the Society for Ethnomusicology). Prerequisites: MUSC 1900 and ANTH 2000 or instructor permission.

**MUSC 2010. Field Research in Ethnomusicology.**

Introduction to the theory and practice of fieldwork with people who make music. Project design, interviewing, still and video photography, recording, ethics, the researcher's roles, relations with human subjects, and strategies for documenting music in its human context. Prerequisite: Graduate standing or written permission.

**MUSC 2020. Interpretation in Ethnomusicology.**

How to think and write about people making music. Ethnomusicological representation and authority; analytical, interpretive and experiential approaches; postmodern and postcolonial considerations; hypertext multimedia representations. Prerequisite: Graduate standing or written permission.

**MUSC 2030. Modernizing Traditional Music.**

This course examines two types of modernization: changes in the sounds of traditional music, and changes in its social-ideational contexts. We examine general theories of modernity, and the association of modernity with the urban, rational, secular, mobile, and technologically advanced. We then inspect the processes of modernization at work in four case studies taken from four very different societies. Prerequisite: Graduate standing or written permission.

**MUSC 2040. Current Directions in Ethnomusicology.**

The field of ethnomusicology has become increasingly interdisciplinary over the past decade, drawing inspiration from cultural studies, gender studies, popular culture studies, performance studies, psychology, phenomenology, postcolonial studies, and science and technology studies. In this seminar we will read major works of musical scholarship (most from the past ten years) that illustrate the key theoretical approaches alive in ethnomusicological research today.

**MUSC 2050. Musical Thinking.**

An ethnomusicological approach to the analysis of musical structures and processes. Case studies include jazz, Irish music, French-Canadian fiddling, North Indian singing, Javanese gamelan, African drumming, and Japanese court music. Topics include linguistic, psychological, and oral-formulaic theories; historical change; cross-cultural modal theory; improvisation; the nature of African rhythm; "insider" versus "outsider" accounts. Readings, discussion, and first-hand experience of selected musics. Facility with Western staff notation required.

**MUSC 2060. The Efficacy of Music.**

The power of music to influence the human body and mind is widely acknowledged but poorly understood. This course considers the efficacy of music in general and connections between music and altered states of consciousness in particular. Perspectives come from musical ethnography, participant observation, phenomenology, religious studies, and neuroscience.

**MUSC 2070. Music and Identity.**

From 19th-century European nationalism to 20th-century American multiculturalism, people have used music to affirm their identities. Drawing on anthropological and sociological theory, we examine the variety of connections between music and identity in several case studies. We consider the possible contributions of music to cross-cultural understanding, and discuss the ethics of musical border-crossing.

**MUSC 2080A. Music and Technoculture.**

This seminar explores ethnographic and theoretical approaches to the study of music technologies in cultural and historical context. How do emergent technologies affect the nature of musical experience? What does technology have to do with ideologies of musical creativity, authenticity, virtuosity, and aesthetic value? We will give equal attention to production, distribution, and consumption practices (and their convergence). Major topics include "liveness" and recording, remix and remediation practices, interfaces/instruments, labor and property, virtual scenes, and digital gameplay. Prerequisite: graduate standing or written permission.

**MUSC 2080B. Ethnography of Popular Music.**

This seminar explores ethnographic work on popular music, including scholarship rooted in ethnomusicology, sociology, and performance studies. We will discuss case studies from around the world and will compare contemporary ethnographic research with other approaches to popular music (e.g., Frankfurt School critical theory, Birmingham School cultural studies, and text-oriented popular music studies). Prerequisite: graduate standing or written permission.

**MUSC 2080C. Music and Memory.**

This graduate seminar will investigate how music is bound up with human memory (individual and collective, cultural and cognitive). Readings will draw on scholarly work in ethnomusicology, anthropology, history, and cognitive science. Key themes include diaspora, nostalgia, oral and written transmission, ritual commemoration, and music's place-making potential. Students will undertake individual research projects. Prerequisites: graduate standing or written permission.

**MUSC 2080D. Music, Nation, and Nationalism.**

This course explores the relation between music and nationhood, as a historically particular form of collective identity, and a dominant political category in late modern societies. Students will work with key texts in the study of nationhood and nationalism, applying them to musical case studies from different world regions. Touching upon art and popular music, these cases will explore the use of nationalist rhetoric to draw citizens into state projects; the appropriation of minority expressions in defining a national self; efforts by postcolonial societies to forge national sentiment from the fragments left by decolonization; and the nation's fate after globalization.

**MUSC 2080E. Seminar in Ethnomusicology: Historiography of Music and the Performing Arts.**

Advanced seminar in methods of historical research and their relevance to the interpretation of music, the performing arts, and culture. Readings include Foucault, Collingwood, Schorske, Said, Adorno, Pierre Nora and Diana Taylor, as well as musicological essays by Taruskin, DeVaux, Nettl, Tomlinson, Treitler, Lawrence Kramer, Susan McClary, Kerman, and Nicholas Cook. Open to juniors, seniors, and graduate students.

**MUSC 2080F. Music Beyond Borders: Transnational Sounds in Theory.**

This course explores the effects that follow when music is set in motion beyond local spaces of creation. Bringing a variety of different theoretical perspectives to bear upon case studies from around the globe, it surveys the distinct social and technological networks that enable sounds to travel, and considers the way that methods of circulation give rise to different kinds of social groups. It explores the way that such processes challenge inherited cultural and political boundaries, and shows how technological changes present musicians and listeners with novel means to resituate musical meaning, in new contexts. Open to graduate students only.

**MUSC 2080G. Seminar in Ethnomusicology: Sound Studies.**

Explores sound studies through readings of exemplary texts and discussions of the key debates that enliven this interdisciplinary field of inquiry. Drawing on philosophical, musicological, anthropological, and other kinds of writings, it explores issues like the way that relations between sound, noise, silence, and music have formed in different cultures and different historical periods; ideological structures that determine the place of sound in artistic practice and in everyday life; the power relations that are implicated in the design of local soundscapes; and the place of aural perception within the sensorium, among other potential topics. Enrollment limited to graduate students.

**MUSC 2080H. Key Concepts in Sociocultural Theory.**

Ethnomusicology has always been interdisciplinary, and is becoming more so. The student today may encounter concepts from semiotics, linguistics, cultural studies, literary theory, political economy, sociology, cognitive psychology, media studies, sound studies, science and technology studies, organizational studies, and material culture studies, and other disciplines as well. We will examine some of the key concepts of these fields and consider their possible uses in the study of the performing arts. From 'affordances' to the 'type/token distinction,' from 'actor-network theory' to the 'third-person effect,' we will learn to apply (and criticize) concepts presupposed by much current socio-cultural theorizing.

**MUSC 2090A. Seminar in Ethnomusicology: Hypertext, Multimedia.**

Instruction in, and critical discussion of, computer-based hypertext and multimedia representation and interpretation of people making music. Sounds, pictures, texts, animations, movies. Students will complete a non-linear, reflexive hypermedia project to take advantage of the experimental moment in musical ethnography. Prerequisite: graduate standing or permission of instructor.

**MUSC 2100A. The Instrumental Sonatas of Beethoven.**

An analytic survey of Beethoven's sonatas for piano, violin and piano, and cello and piano from a variety of perspectives, including: topical, semiotic, and hermeneutic analysis; Schenkerian analysis; historical and critical studies; and recent developments in theory of sonata form. Students who have taken MUSC 1040 may request permission to enroll in this course. Written permission required.

**MUSC 2200. Composition Seminar.**

A forum for graduate composers to share and critique current projects. Visiting artists and analysis of relevant outside repertoire will augment the group and one-on-one meetings. Enrollment is limited. Written permission required. May be repeated for credit.

**MUSC 2210. Digital Performance.**

A production seminar examining the artistic impact and creative potential of digital media in the context of live performance. Readings and analysis of work examine innovations in performance practice from dance, theatre, performance art and music. Collaborative assignments investigate video projection, sound design and interactive sensor technology, culminating in a final large-scale performance. Permission will be granted based upon a questionnaire given in the first class.

**MUSC 2220. Designing and Playing Alternative Controllers.**

This seminar will explore the science and aesthetics of designing alternate controllers for musical performance. Topics will include basic electronics and hardware prototyping, instrument construction, theories of gesture, human-computer interface issues, and the challenges of mapping sensor data to meaningful musical parameters. Previous experience with MaxMSP or other real-time programming required. Permission of instructor required.

**MUSC 2221. Seminar in Computer Music and Multimedia Composition.**

A weekly forum for graduate composers to share and critique current projects. Visiting artists and analysis of relevant modern repertory will augment class discussion of student work. Individual private lessons - taught in addition to the three-hour seminar - help students focus on compositional technique and other problems of expression specific to their own projects.

**MUSC 2230. Composing for Real-Time Systems.**

This course examines complementary issues of time and space in 20th and 21st Century music, providing a nuanced discussion of how composers have attempted to redefine musical temporalities and portray or actively use acoustic or environmental spaces. From early spatialization experiments of Ives and Mahler to music that eschews traditional development - thus freezing temporality (Feldman) - or is in a constant state of transition (spectral music), we will also examine ideas of orchestrated spaces produced by timbral and material constructions of instruments, and advances in complex timbres and electronics. Enrollment limited to 15. Instructor's permission required for undergraduates.

**MUSC 2240. Composing and Improvising with Real-time Systems.**

This seminar will explore the use and creation of interactive computer music systems from the point of view of the performer/programmer. Using improvisation as a starting point, we will explore the aesthetics and philosophy of performance, designing real-time systems in MaxMSP that enhance the relation between action and event using network strategies.

**MUSC 2245. Experimental Voice.**

In Experimental Voice, we will study and undertake acoustic and electronic modifications of voice. We will consider applications of voice by diverse practitioners such as Jaap Blonk, Ami Yoshida, and Pamela Z. Using these pieces as inspiration, we will make creative and critical work aimed at challenging and broadening our notions of what voice and vocal performance can be. Students from all departments are welcome. Prerequisites: none. Permission required for undergraduates. Maximum enrollment: 12.

**MUSC 2255. Sound Networks.**

This graduate-level seminar explores the creative and critical underpinnings and ramifications of "networks" in mediated sound practice. We will study various extant approaches to networking, including transmission of audio signals and control information in musical ensembles and interactions with big data and corpus composition, and we will make new sonic works based on these techniques. We will also examine the institutional contexts of networks, relating to scholarly notions of liveness, community, scene, and genre. Override codes are required for enrollment, and will be distributed based on first-class attendance and questionnaire responses.

**MUSC 2260. Topics in Computer Music Theory and Analysis.**

Explores the science and aesthetics of designing alternate controllers for musical performance. Topics include basic electronics and hardware prototyping, instrument construction, theories of gesture, human-computer interface issues, and the challenges of mapping sensor data to meaningful musical parameters. Written permission required.

**MUSC 2270A. Exploring Technologically Mediated Performance via Attali's 'Noise: The Political Economy of Music'.**

This course configures Attali's notions of 'representing', 'repeating', and 'composing' as theoretical catalysts for the development of contemporary creative practice. The course is structured around seminars, collaborative ensemble work, and individual projects. We negotiate Attali's text in its entirety and realize appropriate responses in a variety of formats, including: performance, installation/intervention, audio/video documentation. Additional short readings and presentations enrich critical discussion and practical activity. This course is intended to follow on from various MEME courses such as 1210, 1240F, 1240G, 2220, 2230, 2280. Enrollment is restricted to fourteen. Permission of instructor is required.

**MUSC 2270B. Performance in a Virtual World.**

A co-taught production course exploring emerging technology in the context of live performance, focusing on techniques where the body appears both on stage and on screen. What does it mean to be "live" in a virtual world, and how does that impact movement, interaction and expression? Students participate in a series of hands-on workshops that examine embodied performance using projections, motion capture, video processing, and sound design, along with various interactive and immersive techniques. The course culminates in a public performance of new works created in collaborative groups. Open to graduate and advanced undergraduate students. Permission required.

**MUSC 2280. Designing Large-Scale Projects.**

A production seminar designed for students to create a single, large project in Multimedia, Video, Performance and/or Electronic Music. The course covers planning and implementation strategies, including brainstorming sessions, visual storytelling, and sketching. Each project receives group feedback at several points in the process, such as initial proposals, prototype presentations and work-in-progress. The proposal includes an annotated bibliography of research materials that students present on in class. The course culminates a public presentation of the projects. The class is open to graduate students and seniors working on a capstone or thesis project. Permission will be granted after the first class.

**MUSC 2290. Seminar In Sonic Practice.**

This studio and seminar course provides an exploration of contemporary sonic practice, facilitates the development of sound-based creative work, and encourages a critical approach to producing work in the field. Through discussion, reading, listening exercises, independent research, creative production and critiques, we will examine a number of intersecting areas of sonic practice including sound as a cultural, environmental, and artistic medium, phonography, sound installation, mobile audio, noise as strategy and material, linguistic and other sonic narrative structures. Students will develop sound-based pieces individually and in groups which function as creative research into the subjects areas of the course.

**MUSC 2300A. Critical Improvisation Studies.**

Advanced seminar exploring improvisation from various perspectives: historical, anthropological, philosophical, ethical, and creative. We study improvisation in diverse musical traditions, in other arts, and in problem-solving contexts such as business, technology, and games. Discussion topics include individual vs. group improvisation, the status of "freedom" in creative processes, and the social and artistic functions of improvisation. Instructor permission required.

**MUSC 2450. Exchange Scholar Program.**

**MUSC 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**MUSC 2980. Reading and Research.**

Directed graduate research. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**MUSC 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## Pembroke Center for Teaching and Research on Women

### Director, Pembroke Center for Teaching and Research on Women

Suzanne Stewart-Steinberg

### Director, Gender and Sexuality Studies

Jeremy Lehnen

The Pembroke Center supports interdisciplinary research on the ways gender systems—understood as systems of meaning—structure both the

concrete and the symbolic organizations of social and cultural life; and the ways gender systems intersect with other systems of difference such as ethnicity, race and class. Faculty associated with the Center are available to advise students, who may concentrate in gender and sexuality studies or who may develop a cluster of gender and sexuality studies courses to enrich a standard concentration. In addition to its curricular interests, the Pembroke Center funds postdoctoral fellows for a year of research in residence at Brown, conducts an annual two-semester research seminar, and sponsors numerous research initiatives.

For additional information please visit the Center's website at: <https://www.brown.edu/research/pembroke-center/>

## Gender and Sexuality Studies Concentration Requirements

Gender and Sexuality Studies is an interdisciplinary concentration that examines the construction of gender and sexuality in social, cultural, political, economic, or scientific contexts. Each concentrator focuses on a well-defined topic or question and works closely with a concentration advisor to develop a program that investigates this focus area rigorously and supplements it with foundational courses in the relevant disciplines. Typical areas of focus include the acculturation of gender, sexuality and race in American politics or activism, the construction of sexual and gendered identities in educational institutions or in various forms of visual media, a contrast between different cultural understandings of sexual identity, a particular national literature and history. Such topics will frequently bring questions of gender and sexuality together; however students may also organize their concentrations to emphasize questions specifically related to gender or to sexuality. Introductory and methodology courses in the disciplines appropriate to students' focus will help them understand the principles grounding such practices as historical research, literary interpretation, and sociological analysis.

### Requirements:

The concentration requires 10 courses, 12 for honors concentrators. No more than two courses may count for multiple concentrations.

1. GNSS 0120. Introductory course on gender and sexuality across the disciplines
2. Four-course focus on some thematic, theoretical, or historical aspect of gender and sexuality
3. Two introductory or methodology courses in disciplines pertinent to the focus
4. One course in gender history, women's history, or history of sexuality
5. One course in feminist theory or theory of sexuality
6. GNSS 1990. A senior seminar which counts as your capstone course. Senior seminar participants are expected to write a research essay. The senior seminar fulfills the second half of Brown's writing requirement.
7. Prior to Commencement, all graduating senior concentrators are required to give a short presentation of either their senior essay or thesis project.

### Honors

Candidates for honors must apply to the program's director at the beginning of their seventh semester. Honors concentrators fulfill the regular requirements plus completing a two-semester thesis as their capstone project.

For more information, including current cross-listed courses and sample concentration plans, please consult the GNSS concentration webpage (<http://www.brown.edu/research/pembroke-center/gender-and-sexuality-studies/undergraduate-concentration-gender-sexuality-studies>) at [h](http://www.brown.edu/research/pembroke-center/gender-and-sexuality-studies/undergraduate-concentration-gender-sexuality-studies) (<http://www.brown.edu/research/pembroke-center/gender-and-sexuality-studies/undergraduate-concentration-gender-sexuality-studies>) (<http://www.brown.edu/research/pembroke-center/gender-and-sexuality-studies/undergraduate-concentration-gender-sexuality-studies>) (<http://www.brown.edu/research/pembroke-center/gender-and-sexuality-studies/undergraduate-concentration-gender-sexuality-studies>)

## Courses

### GNSS 0090B. Bodies Out of Bounds.

In this seminar we will examine what happens to bodies - and the world around them - when they refuse to stay within "normal" boundaries. We will focus our readings on literature, essays, and memoir from the past two centuries, and use film and contemporary cultural theory for comparison and context. Readings range from Jeannette Winterson's *Written on the Body* to fiction by Octavia Butler. Enrollment limited to 19 first-year students.

### GNSS 0090C. Reproductive Health: Science and Politics.

Reproductive health issues such as contraception, abortion, sexually transmitted infections and gay and lesbian health are some of the most controversial and politically charged issues in the US today. After an introduction to the interpretation of medical literature we will explore scientific, political, religious and cultural aspects of these important public policy issues. Successful national and international programs will be discussed. Although all views are welcome, it is expected that students will be respectful of other's opinions and will incorporate the best available scientific data into their conclusions. Enrollment limited to 19 first year students. Instructor permission required.

### GNSS 0100. Introduction to Feminist Theory.

An historical and cross-cultural introduction to the various strands of feminist theory. The course will cover a range of theoretical frameworks, examine the connections and discomfords between theory and activism, and explore the impact of feminist theories on contemporary thought.

### GNSS 0120. Introduction to Gender and Sexuality Studies.

Explores the interdisciplinary fields of Gender and Sexuality Studies, considering the relation between formations of gender and those of sexuality across a range of historical and disciplinary contexts. Considers how both sexuality and gender are shaped in relation to race and ethnicity, economic inequality, and the postcolonial legacy.

### GNSS 0610. Convulsive Beauty: Hysteria and the Arts.

Hysteria marks the presence of a traumatic memory that arouses wild bodily symptoms, treated psychologically by putting feeling into words. Often considered a particularly female ailment, hysteria has been read by feminist scholars as a deviant, desirous language of the female body. This course considers the boundaries of pain and pleasure, madness and lucidity, and the personal and the political.

### GNSS 0710A. (En)Gendering the Text: Gender & Sexuality in Latin American Literature and Film.

This course investigates films and literature within the context of Latin America since the later-half of the twentieth century, privileging works from the last two decades. It offers an overview of contemporary Latin American film and literature read through the theoretical lens of trans, queer and gender studies. The course focuses on how the films and literary works in question employ sex, gender and sexuality to contest and at times inadvertently reinforce dominant societal power structures. This course offers students an overview of theoretical readings focused on gender and sexuality, as well as the basics of formal film and literary analysis.

### GNSS 1070. On Both Sides of the Lens: Latin American Women Filmmakers.

Working from a selection of both feature films and documentaries, we will discuss how women filmmakers are employing and changing these two film genres. The class will endeavor to highlight the work of women filmmakers, and through the reading of these films, students will gain an understanding of some of the debates in the field of gender and sexuality, and acquire a grounding in some of the key moments of twentieth-century Latin American cinema, social, political and economic history. Additionally, students will acquire key technical knowledge of film form and the analytical apparatus necessary to critically view and debate film.

**GNSS 1090W. Bodies Out of Bounds.**

What happens to bodies--and the world around them--when they refuse to stay within "normal" boundaries? Against the backdrop of fiction written over the past four decades, and within the context of contemporary theory and film, we will look at what is considered normal in various locations and by whom. When are bodies we would consider "normal" somehow not suitable? How are bodies constructed/deconstructed/reconstructed? We will think about bodies in terms of gender, especially gender as it intersects with other markers of identity, including race, gender identity and expression, dis/ability, and hybridity.

**GNSS 1101. A Gender Perspective on Women and Enterprise.**

A distinctive pattern of economic inequality marks the female population of every nation, each with the same mechanisms standing behind the disadvantages. Everywhere, the barriers to women's economic engagement reach beyond work and salary to encompass property ownership, capital, credit, and markets. When considered as a whole, these barriers constitute economic exclusion, not just economic inequality. To date, policy, scholarship, and activism on the economic status of women have tended to focus on inequality in the formal workplace, but the full pattern is much more visible when women-owned businesses are examined.

**GNSS 1201. Feminist Utopias and Dystopias.**

From the religious overtones and abhorrence of heterosexual sex in the all-female world of *Millenium Hall* (1762), to the need for a new race of cyborg in Octavia Butler's *Lilith's Brood Trilogy* (1987-89), to the gender-inflected environmental apocalypse of Margaret Atwood's *Oryx and Crake*, feminist writers have used their utopian and dystopian fiction to imagine worlds where the standard system of male/female (or even human/machine) does not work. This course will examine feminist utopias and dystopias across historical periods and within the context of contemporary feminist and queer theory about gender, "race," sexuality, environmental justice, and interspecies communication. Sophomore seminar.

**GNSS 1500. The Art of Being Cared For - Gender, Race, and The Politics of Humanitarianism.**

This course will explore the nature and language of humanitarianism and its political and ethical effects. We will interrogate humanitarianism as a set of practices emerging from specific contexts and historical circumstances, rather than as a normative set of laws and rules. We will explore humanitarianism not as a triumphal project that transcends violence but as a mediated space that demands reckoning with the violence, uncertainties, and possibilities inherent in contemporary humanitarianism. We will examine cases throughout the world where humanitarianism simultaneously functions as a remedy for absent justice, a rationale for intervention, and an ally for state-sponsored violence.

**GNSS 1510. Transnational Sexualities.**

The goal of this course is to explore the formation of both normative and non-normative sexualities within the intertwinement of local, national and global social contexts. Using historical and cross-cultural research on gender and sexuality, the course will explore how social forces such as global capitalism, citizenship, nationalism, human rights, securitization, neoliberalism, settle colonialism, tourism, mass media and migration shape and produce desires, sexual identities, sexual labor, sexual practices, bodies and genders.

**GNSS 1520. Latin American Horror.**

Latin American horror film is often overlooked within the world of film studies. This course will delve into the dark and intriguing world of the Latin American horror film genre. We will study Latin American horror cinema considering works across time periods, national contexts, and directors. This course will ask the following questions: How does the genre express individual and national anxieties in the cultural, social, political and economic realms? To what degree does horror film serve as a social barometer that explores, negotiates, and at times reifies social anxieties about difference, identity, sexuality, normativity, repression, technology, the environment, etc.?

**GNSS 1600. Embodying Feminisms/Feminist Embodiments.**

For much of its history, feminism has revolved around and centered on the gendered body, whether in terms of the body contextualized within time, space, and culture; in terms of the mind and body as oppositional forces; in terms of health, reproduction, or representation; or in terms of the body as part of or outside "nature." This course will examine feminist relationships to the gendered body in terms of various social and historical locations, as well as in relationship to dis/ability, queerness, reproduction, and the "natural" and built environment.

**GNSS 1651. Feminist Theory and Critiques of Capitalism.**

Feminist theory has long been a central site of critique of the excesses and inequalities of capitalist modes of production and social relations, whether calling for reform or theorizing a revolution. In this course, we will examine feminist critiques of capitalism, focusing in particular on questions of labor, housework and reproduction, property, and the experiences of sexuality and pleasure. We will attend first to Marxist (and anti-Marxist) feminist theory before turning to feminist critique of capitalism in the contemporary era marked by biopolitics and neoliberal government. Finally, we will consider (feminist) alternatives to capitalism and examine the possibilities for post-capitalist politics.

**GNSS 1700. Iranian Women's Resistance Strategies: Gender Discrimination and the Law Since 1979.**

After the Islamic Revolution in Iran in 1979, the new government targeted women's legal rights in the name of Islam. Family Law, Criminal Law, and even Constitutional Law were designed or amended in ways that imposed gender discriminations on Iranian women's public and private lives. Iranian women from both secular and religious backgrounds have employed diverse strategies to resist these laws. Students will learn about the rules and regulations imposed on Iranian women and also the creative and innovative ways through which they overcome these discriminatory laws. Enrollment limited to 20.

**GNSS 1710. Sex and the Law: Strange Bedfellows.**

This class will examine legal debates about sexual activity and sexual speech generated by alternate, incompatible views of the source and function of laws and the role of the legal system in enforcing moral codes. We will look at works that see the law as given by God, later natural law traditions intended to enforce a common morality, and texts that see law as a human construct. Not open to first year students.

**GNSS 1711. Speech and Silence, Trust and Fear: A Feminist Philosophical Inquiry into Sex Equality.**

This seminar examines problems that arise in marriage from the failures of couples to speak to each other, and when they do, from their failures to speak openly, honestly, and from a position of social equality. We examine from a metaphysical and moral perspective the agency in men and women as it is reflected in what couples say and think. We look at whether marriages fail when women consciously choose or unconsciously fall into oppressive, subordinate postures and examine whether men take advantage of these postures. Class materials will be primarily novels and films, supplemented with philosophical, sociological, and legal essays.

**GNSS 1712. Issues for Feminism in Ethics.**

This seminar will examine some of the issues that seem to change the focus of the ethical when considered against a background of feminist values. The class will not attempt to examine all possible issues which should be addressed by the values of feminism, but will look at some which are relevant today and/or in which going forward feminist values appear to be at risk. We will examine issues in Consensual and Nonconsensual Sex; Honor Killing; Erotic Speech, Art and Pornography; Birth Control and Abortion; the Ethics of Care vs. Duty; Freedom and Risk in marriage and long-term committed partnerships.

**GNSS 1720. Technologies of/and the Body: Mediated Visions.**

The relationship between body and machinery, technology and biology is often thought in terms of the mechanical doll, the animated robot and other hybrid figures. Science fiction films for example offer double visions of the gendered body: women are masters/slaves of the technology and still symbolic bodies of biological surviving of the human species. We will explore mediated visions in films and other media of different kinds spanning a bridge between SciFi-films and performance art. We will also study theoretical texts (Donna Haraway et al.) on the problem of the merging of technology and body.

**GNSS 1721. Cinema's Bodies.**

The course explores the cinematic construction of bodies – female, male, animal, and other. Cinematic bodies do not stand alone as they are framed, cut, exposed, veiled, enlarged, distorted, and gendered. The body is screened and composed into an image of beauty, of death, of sex, of work. Cinematic devices like the close-up, camera angle, light are transform bodies into the body of the film and its specific style. This leads to the question of the spectator's body as a screen for the filmic body and to theoretical explorations of the embodied visions cinema entails and stimulates.

**GNSS 1810. Independent Study and Research.**

Independent reading and research for upper-level students under the direction of a faculty member. Please check Banner for the correct section number and CRN to use when registering for this course.

**GNSS 1820. Independent Study and Research.**

Independent reading and research for upper-level students under the direction of a faculty member. Please check Banner for the correct section number and CRN to use when registering for this course.

**GNSS 1960C. Gender, Sexuality, and Science.**

Examines how American and European science has naturalized differences in the human body and gendered the natural world from the seventeenth through the twenty-first centuries. Will consider historical changes in the scientific study of sex, gender, race, and sexuality, as well as the participation of men and women in scientific work. First-year students require an instructor override to register.

**GNSS 1960D. Feminist Theory/Feminist Activism.**

Some complain that feminist theory is "too academic", that it has no ties to social justice or activism. On the other hand, there are those in the academy who accuse gender/women's studies of not being sufficiently academic, of not being intellectually rigorous. With those two stereotypes in mind, we will read a variety of feminist theorists, some generally thought of as "academic", and some generally seen as "activist". Can academic theory be useful to political and social activists? Can activism inform academic theorizing? Prerequisite: one theory course, one gender and sexuality studies course, or permission of instructor.

**GNSS 1960E. Advanced Feminist Theory.**

Feminism and Poststructuralism are two major theoretical approaches to the understanding of society, politics, and culture. What do they have in common? Where do they part company? We'll examine their views on agency, the subject, language, and materiality; and their engagements in the "cultural wars." Readings include Butler, Deleuze, Derrida, Irigaray, Kristeva.

**GNSS 1960K. Gender and the Modernist Self.**

Are women more modern than men? In the early decades of the twentieth century it may have seemed so, for in these years the figure of woman came to stand as emblematic for modernity itself. In this course, we will read the literature of the turn-of-the-century (including Ibsen's *A Doll's House*, Grant Allen's *The Typewriter Girl*, Freud's *Dora*, Woolf's *A Room of One's Own* and *To the Lighthouse*) alongside the sociology, psychology, and philosophy from the same period to see how exaggerated portraits of hyper-modern women came to seem descriptive of a new, twentieth-century version of selfhood. Enrollment limited to 20.

**GNSS 1960L. The Laws of Violence: Lawful Killings in Law Enforcement, Punishment, War and the War on Terror.**

States kill: law enforcement officers kill to protect innocent victims and the military kills to protect the nation. This seminar explores the constitutive relation between law and violence. Since the rise of modern statehood, sovereignty depends on the ability of a state to hold monopoly over the legitimate use of violence and thus enforce its order. But without law, bare violence is incapable of establishing order, in the absence of order there is no sovereign. Without violence law has no enforcement power, in the absence of a coercive obligation, there is no law. Enrollment limited to 20. First year students require instructor permission.

**GNSS 1960M. Sense and Scientific Sensibility: Beyond Vision, From the Scientific Revolution to Now.**

Scientific inquiry is often considered an endeavor pursued using one's sense of vision: researchers peer into microscopes and telescopes and stare at graphs, diagrams, and computer screens. But on what other senses do scientists rely? Do they also gather evidence using senses of smell, taste, hearing, and touch? This class combines readings in the history, philosophy, and anthropology of science with primary sources to address questions such as: why non-visual senses historically have been devalued in the sciences, what a sensuous approach to scientific practice might be, and how attention to sensory epistemologies could contribute to feminist science studies. Enrollment limited to 20. First year students require instructor permission.

**GNSS 1960N. Theories and Politics of Sexual Consent.**

What is sexual consent good for? Does the language of sexual consent facilitate useful ethical interrogation? Or does it neutralize any worthwhile inquiry into power inequalities? This course interrogates sexual consent through surveying political theory texts, liberal and feminist legal scholarship, studies in sex and gender, court cases, and literature. We query how and to what effect the idea of consent organizes sexual politics and politicizes sex. We first consider consent in legal and political discourse; we next turn to modern theories and doctrines of sexual consent; we then explore case studies. The last weeks focus on youth. Enrollment limited to 20. Instructor permission required.

**GNSS 1960O. Desiring the Nation: Gender and Nationalism in South Asia.**

Examines the development and afterlives of nationalisms in South Asia to consider the attachments that tie citizens and subjects to the nation and to one another. What are the political, personal, and ideological commitments that allow or prevent individuals from belonging to the nation? Beginning with early 20th century anticolonialism, will trace multiple nationalist movements that lead up to the 1947 Partition of British India, and to the 1971 independence of Bangladesh. Through novels, short stories, and films, will examine the role of gender in anticolonial protest and in early nation-building in India, Pakistan, and Bangladesh. Enrollment limited to 20.

**GNSS 1960P. Post-Colonial Technoscience and the Body.**

This seminar examines the intersections of race, gender, culture, and sexuality with science and technology in colonial and post-colonial contexts. How is the body a site of contestation for power enacted through medical, scientific, or technological interventions? What are the social and historical dimensions of such encounters between the global North and South? Drawing on colonial-era primary sources and accounts by science studies scholars, post-colonial theorists, historians, and anthropologists, we analyze how the uneven flow of technoscientific experts, practices, objects, and knowledge reconfigures and transforms bodies, selves, and societies. The course's geographic focus is sub-Saharan Africa. Enrollment limited to 20.

**GNSS 1960Q. On Love and Intimacy.**

Love and Intimacy are terms that have a lot of cultural cache. In this course, we will analyze the ways in which intimacy has been embedded within certain discourses of privacy, rights, and individuality. In addition to the couple form, we will examine friendship, celibacy, therapy and relationships people form with pets and with objects to flesh out intimacy's multiplicities to see how these forces impact these affective tides. This course will bring together history, critical theory, and film to think through various expressions of intimacy and what it means to relate to the other. Enrollment limited to 20.

**GNSS 1960R. Sensing Time: Affect and the Moving Image.**

Through screenings and transdisciplinary readings, this film-philosophy seminar explores concepts of time, affect, death and subjectivity. We will examine the cinema's capacity to convey events and experiences of twentieth and twentieth-first century history. Philosopher Gilles Deleuze echoes Shakespeare: "The time is out of joint." What can this mean for cinema, thought and life? What is a 'time-image' and can filmic images of time reveal or heal past wounds, those scars that haunt all time to come? How does an image conceal or expose time? How do such images respond to intimate experiences, and even shape politics, history and cultural memory? Enrollment limited to 20.

**GNSS 1960S. Media and Modern Childhood.**

Will explore a range of key themes in children's media and material culture since the nineteenth century. Through readings, screenings, and the close analysis of media objects themselves (including books, toys, film, television, and digital media), the class will investigate a variety of constructions of and attitudes toward children as they are visible in these cultural forms. Will explore several methodological approaches to studying children's media, and will observe how particular values, economic and political interests, and assumptions about childhood are encouraged, discouraged, and variously position children as consumers, active agents, citizens and cultural participants. Enrollment limited to 20.

**GNSS 1960T. Commodity Fetishism: Theoretical and Historical Perspectives.**

This course will provide an introduction to critical theory focusing on Marx's mature analysis of capitalism as a social formation founded on the fetishism of commodities. Our examination of this analysis will serve as a point of departure for a wider discussion of the relationship between Marxism and other methodologies and modes of critique, including feminist theory, deconstruction and psychoanalysis. In addition, we will also consider the contemporary relevance and implications of Marx's conception of commodity fetishism from different disciplinary perspectives, including anthropology, aesthetics, postcolonial criticism and the philosophy of law. Enrollment limited to 20.

**GNSS 1960U. Reinventing Cinema and Media in Post-Mao China.**

Focuses on cinematic production and media culture in mainland China since the late 1970s. How was cinema reinvented beyond the conventions of socialist realism? How did cinema transform itself as a result of its intersections with other forms of media, such as television, cassette and video tape, video games and the internet? What does this mediascape tell us about the society of post-Mao China? How do we not only "see," but also "listen to" post-socialist culture? Examines films ranging from 1980s experimental and entertainment films to more recent documentaries, as well as gaming and internet culture-inspired video art. Enrollment limited to 20.

**GNSS 1960V. The Communist Experience in Eastern Europe: Genres of Interpretation.**

Almost twenty-five years after the disintegration of the communist regimes across Eastern Europe, the question of how to remember the communist experience is highly contested. This interdisciplinary course highlights the complexities of the collective memory of communism, which fluctuates between attempts to come to terms with communist crimes and tendencies to idealize state socialism. Focusing on a range of issues—such as nostalgia, consumer culture, sexuality, gender, violence, the legacy of repression, and attempts at transitional justice—we will explore the nature of communist and post-communist realities by discussing scholarly studies and weekly screenings of full-length feature and documentary films. Enrollment limited to 20.

**GNSS 1960W. Fiction/Addiction.**

In eighteenth-century Britain, the rise of global mercantile capitalism coincided with the novel's consolidation as a cultural form. Each in its own way poses questions about habit and volition: do we control what we consume, or does what we consume control us? This course explores aspects of narrative form and character representation in the early English novel with relation to the cultural history of addiction. To anchor our approach to 18th-century fiction (Defoe, Haywood, Lennox, Burney, Edgeworth), we will investigate discussions of appetite, reason, motivation, and compulsion in philosophy and critical theory (Plato, Locke, Johnson, Foucault, Derrida, Sedgwick, Gallagher).

**GNSS 1960X. The Aesthetics of Color: History, Theory, Critique.**

This course introduces undergraduate students to the central themes and debates in the vibrant history of color from antiquity through the present. While we focus on color in modern and contemporary visual art, design, and media, we begin with the premise that color—like the feminine—has long been subordinated and marginalized as the "Other" within Western culture. We then challenge this assumption using an interdisciplinary approach rooted in feminism, art, visual studies, film theory, fashion, and education. Through descriptive writing, responses to critical texts, and subjective encounters with color in art and culture, students learn the fundamental paradoxes and properties of color.

**GNSS 1960Z. Hysteria's Women: Literature, Psychoanalysis, and Feminist Theory.**

This course interrogates how psychoanalysis understands the relation between the sexuated body, femininity, knowledge, and desire. We will read texts at the intersection of literature and film, feminist studies, continental philosophy, and postcolonial studies to consider the specific challenges that feminism poses for psychoanalysis, particularly an international feminism that is attentive to class, race, and history. Readings will include texts by Freud, Lacan, Beauvoir, Irigaray, Gallop, Rose, Cornell, Spivak, and Djebbar. Films could include: "A Dangerous Method" (Dir. John Kerr), "Her" (Dir. Spike Jonze), and "Fire" (Dir. Deepa Mehta).

**GNSS 1961A. The Matter of Abstraction: Feminism and the Arts.**

How does feminist art help us think through the matter of abstraction? How does feminism's emphasis on the social constructiveness of needs, desires, bodies, and subjectivities affect - and resist - the terms of not only formal abstraction but also economic and political abstraction? This course considers the influence of feminist theories and practices in the arts, especially their impact upon debates about abstraction versus representation, formalism versus realism. We begin with feminist art in the 1960's, and proceed to the recent resurgence of abstraction in contemporary art alongside analyses of an ever more abstracted world of capital.

**GNSS 1961B. Queer Discipleship.**

"Queer theory" names both a set of reading practices and a series of reflections on the dangers, and the possibilities, of being taught. This course will pair fictions of discipleship with recent queer accounts of why we read and what we read for. As we encounter a range of leaders and followers, fans and teen idols, bad teachers and impressionable students, we will attend to the place of queer discipleship in the discipline of queer theory. Students will gain familiarity with this discipline's history and methods, as well as a critical vocabulary for the analysis of modern cultural forms.

**GNSS 1961C. Radical Italian Feminisms and the Contemporary Politics of Refusal.**

This course will assess 1970's and 80's radical Italian feminism as a blueprint for a new kind of networked and bodily-oriented form of political resistance. Often overlooked in favor of the French and American feminist traditions, the Italian militant tradition, a development within the workers' movement, has recently come to be recognized as a repository of innovative tactical and theoretical responses to various forms and imprints of contemporary domination. It has clear resonances within revolutionary contestation and the politics of refusal today. Thus, the course seeks to assess the implications of radical Italian feminist movements for contemporary resistance.

**GNSS 1961D. Politics of Resistance.**

States claim to benefit the people they represent. But the relationship between the state and the people is not always a happy one, nor devoid of conflict and violence. In this course, we will examine the conditions of state power and forms of resistance to it. We will explore these questions through a wide range of literature from Sophocles' *Antigone* to Martin Luther King's Letter from Birmingham Jail. Different examples of resistance around the world will be considered including anticolonial resistance, hunger strikes, conscientious objection, the civil rights movement in the US, and on women's agency in shaping these movements.

**GNSS 1961E. Feminist Freedoms.**

Because feminism understands itself to be fundamentally concerned with increasing liberty, specifically of women, this course will focus on the theme of freedom. We will consider 1) what it means to be a free political actor, 2) whether freedom is the highest political good, 3), whether, and how, freedom is compatible with other values, and 4) how different forms of government and political structures contribute to, or detract from, attempts to increase freedom. We will read contemporary works from a range of genres that ask what it means to exist on the 'margins' of politics, where freedom seems most tenuous.

**GNSS 1961F. Local Color: Multi-Ethnic American Literature, 1880-1920.**

American literary regionalism ushered in new stylistic forms focused on characters, dialect, customs, topography, and other features particular to specific regions. This "local color writing" emerged, in part, as a response to the rapid growth and changing face of an industrializing nation. This course positions itself at the center of this tense moment in America's history, reading works that pursue both diverse regional and ethnic interests. In particular, we will primarily read women authors and critics to focus on how gender and sexuality intersect with race as it relates to the question nation (re)building.

**GNSS 1961G. Framing Gender in Middle Eastern Cinema.**

This course examines how gender is framed in Middle Eastern cinema. Through weekly readings in film theory and culture, in-class discussion, and written and oral assignments, students will learn not only how to analyze cinema but also about gender in the modern and contemporary Middle East more generally. Most weeks students will also attend the screening of a film dealing in some way with gender in the Middle East. We will watch films from or about: Iran, Afghanistan, Egypt, Tunisia, Palestine, Israel, Iraq, Lebanon, and Canada.

**GNSS 1961H. Literary Imaginations of the Law: Human Rights and Literature.**

Did you know that Robinson Crusoe was critical for the drafting of the "Universal Declaration of Human Rights"? Or that autobiography has been a literary genre crucial for the articulation and propagation of both human and civil rights? Through a study of the relationship between human rights and literature, this course will explore forms of writing that enable the legal protocols, proceedings, and predicaments that make up human rights discourse. We will pair key human rights documents with literary and cinematic works that inspire and question the universal ideals of the law.

**GNSS 1961I. Global America: Gender, Empire, and Internationalism Since 1890.**

This course explores the cultural history of America's relationship to the world across the twentieth century with particular attention to ideas about gender and sexuality. We will locate U.S. culture and politics within an international dynamic, exposing the interrelatedness of domestic and foreign affairs. While exploring specific geopolitical events like the Spanish-American War, World War I and II, and the Global Cold War, this course emphasizes the political importance of culture and ideology rather than offering a formal overview of U.S. foreign policy. This course analyzes the processes through which Americans come to think and feel particular ways about the world.

**GNSS 1961J. Make a Body Riot: Laughter, Resistance, and African American Literature.**

How does what makes us laugh position us, either as audience or collaborator? What do comedy and performance have to show us about identity formation in relation to race, class, and gender? How might laughter—as release, as physical expression, as indicator of one's interior life, or as protest—help us understand aesthetic, thematic, rhetorical, and political aspects of African American literature? This course centers on the development of African American literature throughout the twentieth century—including the role of Black literature in society; the intersections of race, class, and gender; slavery's afterlives; the historical novel; and the role of humor in community formation.

**GNSS 1961K. Art Against Empire: Aesthetics of the "New Man" circa 1968.**

This course charts dissident aesthetic practices and theories that emerged along multiple transnational axes in the "long 1960s" under the banner of anti-imperialism. Organized from a global perspective, this class considers the contributions and collaborations of radical and militant artists, filmmakers, and thinkers in Africa, Asia, Europe, and the Americas. Our primary concern will be to analyze the masculinist dynamics of these movements. Above all, we will examine the deeply entrenched conceptions of gender and sexuality that frequently determined who could be seen on the front lines of these struggles, whether on the ground or in the field of representations.

**GNSS 1961L. Postcolonial Horror: Political Specters in Non-Western Literature and Film.**

This course explores the genre of "postcolonial horror" in contemporary non-Western literature. How are world writers and filmmakers utilizing elements of horror—including shock, supernaturalism, gore, and psychological realism—to derange viewers' relationships to everyday life? Can horror capture controversial themes like war, genocide, and human rights crimes without exploiting violence? Or does horror merely objectify human suffering to reproduce sexist, racist, homophobic, and xenophobic stereotypes? We will take a transnational, decolonial feminist approach to supernatural motifs, including ghosts, zombies, aliens, witches, vampires, demons, and psychopaths, in films and fiction from Africa, Latin America, the Caribbean, and South Asia.

**GNSS 1961M. Humanity or Nah? Blackness, Gender, Resistance, and Memory in Monuments, Maps, and Archives.**

This course explores the liberatory archaeologies of racialized, gendered, and sexual memory(-ies) articulated by Xicanx, Latinx, Native American, and Africana scholars, artists, activists, and cultural workers that resist regimes of antiblackness, colonialism, and white supremacy. Students will engage scholarly and artistic works that exemplify how Blackness rejects, while simultaneously marking in many ways, the limits and logic of gender and sexuality, exposing the colonial underpinnings of "Man" and modern ideas of "human." This course focuses on monuments, maps, and archives as three distinct sites where antiblackness, colonialism, and white supremacy are both sanctioned and defied in the public sphere.

**GNSS 1961N. Scenes of Instruction: Pedagogy, Punishment, Perversion.**

This course investigates the interrelation between pedagogy, sexuality, and violence. It seeks to investigate the classroom as a site of violent interaction and a potentially sexualized space. Appraising the erotic dimension of the production and transmission of knowledge, the course will critically trace a discourse of the utmost actuality and relevance: from campus rape culture, via the prominent question of consent, through current debates around Title IX, the connection between learning and sex marks a highly problematic dimension of our academic environments deserving of scholarly attentiveness and critical scrutiny.

**GNSS 1961O. Masquerade as Critique.**

Critique is most often figured as an act that reveals a reality that was previously hidden, as though one were pulling back a curtain or lifting a veil. But, as the critic Craig Owens points out, "in a culture in which visibility is always on the side of the male, invisibility on the side of the female...are not the activities of unveiling, stripping, laying bare... unmistakably male prerogatives"? This seminar develops an alternate genealogy of critique informed by feminist and queer of color perspectives. It eschews the modernist drive toward transparency, instead examining masquerade, mimicry, code-switching, duplicity, fugitivity, passing, and appropriation.

**GNSS 1961P. Poetics of the World: The Making and Unmaking of the African Diaspora.**

This course critically engages with the meaning and making of African Diaspora literature by examining a range of novels, poetry, and memoirs, as well as theoretical texts. Part of the work of this course will be to examine the genre of Afro-diasporic literature. What does it mean to belong to a diaspora? How do writers from across the diaspora communicate with one another? What unexpected models of sociality and community does this literature produce? How do writers engage with one another across national boundaries? Our discussions will delve into themes of opacity, entanglement, identity, race, gender, and sexuality.

**GNSS 1970. Directed Research and Thesis.**

Independent research under the direction of a faculty member, leading to a thesis. Required of honors candidates. Open to seniors only. Instructor permission required.

**GNSS 1980. Directed Research and Thesis.**

Independent research under the direction of a faculty member, leading to a thesis. Required of honors candidates. Open to seniors only. Instructor permission required.

**GNSS 1990. Senior Seminar.**

A research seminar focusing on the research and writing of the participants. Required of senior concentrators; open to other advanced students by permission.

**GNSS 2000. Method, Evidence, Critique: Gender and Sexuality Studies across the Disciplines.**

Gender and Sexuality Studies is by its very nature transdisciplinary. Can we speak of a single methodology that ties GNSS together? How might scholars work on gender and/or sexuality while respecting disciplinary boundaries and training? We will start with the premise that studies in gender and sexuality are tied together by critique that questions foundational assumptions and takes account of its own position within a given field of knowledge. By studying canonical theoretical texts alongside disciplinary studies characterized by a feminist and/or queer focus, we will investigate how critique operates and how standards of evidence are marshaled in particular disciplines.

**GNSS 2010D. The Power and Mystery of Expertise.****GNSS 2010E. Pembroke Research Seminar: The Question of Consent.**

No description available. Instructor's permission required.

**GNSS 2010G. Pembroke Research Seminar in Feminist Theory: Socialism and Post-Socialism.**

An advanced feminist research seminar in feminist theory and gender studies. Presentations made by Brown faculty, Pembroke Center fellows, visiting scholars, and students. Offered in conjunction with the Pembroke Seminar. Enrollment limited to 8.

**GNSS 2020D. The Power and Mystery of Expertise.****GNSS 2020E. Pembroke Research Seminar: The Question of Consent.**

No description available. Instructor's permission required.

**GNSS 2020G. Pembroke Research Seminar in Feminist Theory: Socialism and Post-Socialism.**

An advanced feminist research seminar in feminist theory and gender studies. Presentations made by Brown faculty, Pembroke Center fellows, visiting scholars, and students. Offered in conjunction with the Pembroke Seminar. Enrollment limited to 8.

**GNSS 2450. Exchange Scholar Program.****GNSS 2720. Graduate Independent Study.**

Section numbers vary by instructor. Instructor's permission required.

**GNSS XLIST. Courses of Interest to Concentrators in Gender and Sexuality Studies.**

## Philosophy

### Chair

Paul D. Guyer

Like all of Brown's fine departments, the Philosophy Department takes a special pleasure in contributing to the teaching and training of undergraduates, as part of Brown's overall commitment to a liberal education. The Department offers a range of courses suited to newcomers to philosophy, covering subjects from the philosophy of religion, to the philosophy of science, to the philosophy of literature, as well as survey courses on various periods of the history of philosophy.

For additional information, please visit the department's website: <http://www.brown.edu/Departments/Philosophy/>

### Philosophy Concentration Requirements

The Philosophy concentration offers courses covering subjects from the philosophy of religion to the philosophies of science and literature. It also provides survey courses on various periods in the history of philosophy. Concentrators can expect to strengthen their knowledge of and skills in ancient philosophy, early modern philosophy, logic, epistemology and metaphysics. Students are asked to identify an area of specialization. There is also a related, but separate concentration in physics and philosophy.

### Standard Concentration

10 courses total, of which no more than one may be below PHIL 0350, and at least three must be at or above PHIL 0990.

**A. Five Area Requirements:**

One course in Ancient Philosophy, e.g.		1
PHIL 0350	Ancient Philosophy	
PHIL 1250	Aristotle	
PHIL 1260	Plato	
PHIL 1310	Myth and the Origins of Science	
One course in Early Modern Philosophy, e.g.		1
PHIL 0360	Early Modern Philosophy	
PHIL 1700	Locke, Berkeley, Hume and Others	
PHIL 1710	17th Century Continental Rationalism	
PHIL 1720	Kant: The Critique of Pure Reason	
One course in Epistemology or Metaphysics, e.g.		1
PHIL 1660	Metaphysics	
PHIL 1750	Epistemology	
PHIL 1760	Philosophy of Language	
PHIL 1770	Philosophy of Mind	
One course in Ethics or Political Philosophy, e.g.		1
PHIL 0500	Moral Philosophy	
PHIL 0560	Political Philosophy	
PHIL 0880	Ethical Themes in the Contemporary American Short Story	
PHIL 1400	Ethics in the Novel	
PHIL 1640	The Nature of Morality	
PHIL 1650	Moral Theories	
One course in Logic, e.g.		1
PHIL 0540	Logic	
PHIL 1630	Mathematical Logic	
PHIL 1880	Advanced Deductive Logic	

**B. Five further courses, chosen to include an item under each of the following three headings: 5**

1) One seminar: a course from the PHIL 0990 series or a seminar at the 2000-level

2) Either a Specialization: Three related courses from one single area of philosophy: e.g., logic and language; philosophy of science; epistemology; philosophy of mind; moral philosophy; political philosophy; ancient philosophy, etc. See Notes below for further details.

Or: a broader selection of courses chosen with the approval of the department's Director of Undergraduate Studies (DUS)

3) Capstone: One of the following four options

a. Reading Course (PHIL 1990): a reading course for one semester involving one professor and one student, leading to the preparation of a substantial research paper on a particular topic. The Reading Course may accompany a 1000-level course being taken concurrently. In this case, the 1000-level course would provide a general overview of the topic and the reading course would consist of a deeper foray into the topic. A one-semester Reading Course may also be a first step towards writing an Honors Thesis.

b. Senior Seminar (PHIL 0990 or 0991): Seminars aimed primarily at advanced undergraduates, on varying topics each year, requiring the completion of substantial research and writing.

c. Graduate Seminar (PHIL 2000-level): seminars mainly aimed at graduate students, but also open to advanced undergraduates, requiring the completion of substantial research and writing. (A 0990- or 2000-level seminar taken as a Capstone also fulfills requirement (B, 1) for a seminar).

d. Honors Thesis: a piece of work expected to be more substantial than the above-mentioned research papers, typically researched and written over the course of the entire senior year (with enrollment in PHIL 1995 Senior Thesis for two semesters) under the supervision of a thesis advisor (possibly, though not necessarily, the specialization advisor). See also Honors Requirements below.

Total Credits 10

## Notes:

- Up to two courses from departments other than the Philosophy department may be included among the ten courses required for the Concentration; no more than one of these two outside courses may count toward the three specialization requirements.
- One course, but not more, may fulfill both an Area Requirement and a Specialization requirement.
- The specialization and the courses that will fulfill it are standardly declared at some point in the course of the Junior year. Those making a Concentration Declaration at an earlier time (e.g. at the end of their Sophomore year) may make a provisional choice of courses which can be revised at a later date with the approval of the department's DUS (Director of Undergraduate Studies).

## Honors Requirements:

- Philosophy GPA must be greater than 3.5. (This refers to the GPA at the beginning of the senior year in all philosophy courses, and including at least six courses, five of which were taken for a letter grade).
- Thesis: for further details, see "Senior Year Options" and "Thesis" on the Departmental website.

## Physics and Philosophy Concentration Requirements

The Physics and Philosophy concentration is for students with a deep interest in physics who do not need to acquire the laboratory and computational skills of a professional physicist. The concentration allows students to grapple with computational problems and deepen their investigation of conceptual and epistemological issues. By the end of the program, concentrators possess an excellent conceptual understanding of the most philosophically interesting physics, relativity and quantum mechanics.

This concentration should prepare a student either for graduate study, especially in a history and philosophy of science (HPS) program, or for employment in science education or journalism. Other professions such as law and medicine will look favorably on such concentrators for having versatile interests and being able to master difficult material. The concentration may serve as an excellent preparation for a law school since physics and philosophy both exercise a rigorous approach to problems of immediate relevance to life but at the same time assume two complimentary and sometimes competing viewpoints.

## Advising

Concentration advisors from the Departments of Physics and Philosophy will guide students working towards the A.B. degree.

## Curriculum

The curriculum builds around the fields of physics that have had the biggest impact on philosophy, especially Quantum Physics, and the fields of philosophy most relevant for physics, such as Epistemology, Metaphysics and Philosophy of Physics. It is strongly recommended that students complete at least one relevant history course.

There are 11 required courses (5 in Physics, 5 in Philosophy or History, one course in mathematics) and a final project. The choice of the courses is dictated by the following considerations. The field of physics with both deepest philosophical implications and deepest influence on the rest of physics is Quantum Mechanics. Thus, a 1000-level course in Quantum Mechanics or a closely related field such as Statistical Mechanics is indispensable. The second field of physics most relevant for the concentration is Relativity. This field touches upon and serves as a foundation for a broad list of subjects with major philosophical implications of their own, for example: PHYS 1170, PHYS 1280, PHYS 1510, PHYS 1100. This requires another 1000-level physics course in the concentration. 1000-level Physics courses cannot be taken without certain preliminary work, most importantly, PHYS 0470, which serves as a prerequisite for most higher-level physics courses and which relies in turn on PHYS 0160 or PHYS 0060. Another lower-level physics course is necessary for a student to develop familiarity with the tools which have been employed in producing the physics knowledge.

A natural introduction into philosophy of physics comes from a course in Early Modern Philosophy. To a large extent, Early Modern Philosophy was shaped by scholars who combined interest in philosophy and physics (e.g., Rene Descartes, Blaise Pascal, Gottfried Wilhelm Leibniz). The influence of the XVII century physics revolution on other central figures such as Kant is unquestionable. Early Modern Philosophy sets an intellectual stage for many subsequent developments in the Philosophy of Physics and directly addresses some of the most perplexing issues like the connection (or lack thereof) between physics and religion. The core of the Philosophy requirement involves two courses in Epistemology, Metaphysics and Philosophy of Science. One course in this field would not be sufficient due to its very broad nature. Students are strongly advised to take a relevant History course. This requirement can be substituted by an additional philosophy course to reflect interests of those students who want a deeper background in Epistemology, Metaphysics and Philosophy of Science or have other related interests such as Ancient Natural Philosophy.

In addition to the above philosophy courses, PHIL 0210 (Science, Perception, and Reality) serves as a gateway into the concentration. It may be substituted by other relevant courses such as PHYS 0100 (Flat Earth to Quantum Uncertainty: On the Nature and Meaning of Scientific Explanation).

A course in calculus is a prerequisite for most physics and some philosophy classes.

**Required courses for the A.B. degree are listed below:**

### Physics Courses

Select one of the following introductory courses in Modern Physics:

PHYS 0060	Foundations of Electromagnetism and Modern Physics	1
-----------	--	---

PHYS 0160	Introduction to Relativity, Waves and Quantum Physics	
One course in Special Relativity and Classical Field Theory:		1
PHYS 0470	Electricity and Magnetism	
Select one of the following in Methods of Experimental and Theoretical physics:		1
PHYS 0500	Advanced Classical Mechanics	
PHYS 0560	Experiments in Modern Physics	
Select one of the following in Quantum Mechanics and its applications		1
PHYS 1410	Quantum Mechanics A	
PHYS 1530	Thermodynamics and Statistical Mechanics	
One more 1000-level Physics course		1
<b>Philosophy Courses</b>		
Select one of the following gateway courses:		1
PHIL 0210	Science, Perception and Reality	
PHIL 0100	Critical Reasoning	
PHIL 0060	Modern Science and Human Values	
PHIL 0540	Logic	
Select one of the following courses in Early Modern Philosophy:		1
PHIL 0360	Early Modern Philosophy	
PHIL 1700	Locke, Berkeley, Hume and Others	
PHIL 1710	17th Century Continental Rationalism	
PHIL 1720	Kant: The Critique of Pure Reason	
Select two of the following courses in Epistemology, Metaphysics and Philosophy of Science:		2
PHIL 1590	Philosophy of Science	
PHIL 1620	Philosophy of Quantum Mechanics	
PHIL 1660	Metaphysics	
PHIL 1670	Time	
PHIL 1750	Epistemology	
<b>History Courses</b>		
Select one of the following courses in History of Science:		1
HIST 0522N	Reason, Revolution and Reaction in Europe	
HIST 1825M	Science at the Crossroads	
HIST 1976I	Imperialism and Environmental Change	
<b>Calculus</b>		
Select one of the following:		1
MATH 0180	Intermediate Calculus	
MATH 0200	Intermediate Calculus (Physics/Engineering)	
MATH 0350	Honors Calculus	
<b>Final Project</b>		
Select one of the following:		1
PHIL 1990	Independent Studies	
PHYS 1990	Senior Conference Course	
A course from the PHIL 0990 Senior Seminar series		
Any graduate seminar in Philosophy		
Total Credits		12

<sup>1</sup> Or one more Philosophy course.

## Honors

Seniors wishing to earn honors by presenting a senior honors thesis should consult their concentration advisor during their sixth semester or at the start of the seventh semester concerning procedures and requirements. Students may earn honors by presenting a senior thesis judged to be of honors quality by two readers. In addition to completing the usual nonhonors requirements, the student should also have a grade point average of over 3.4 in physics, philosophy and history of science courses

(of which at least five must be taken for a letter grade). Honors theses are usually prepared over a period of two semesters with an advisor from the Department of Physics or the Department of Philosophy.

## Philosophy Graduate Program

The department of Philosophy offers graduate programs leading to the Master of Arts (A.M.) degree and the Doctor of Philosophy (Ph.D.) Degree. The A.M. degree is only awarded as part of the Ph.D. program.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/philosophy>

## Courses

### PHIL 0010. The Place of Persons.

We'll concentrate on some fundamental moral and metaphysical issues concerning ourselves as persons: What (if anything) gives us a moral status different from that of other animals? Do we have the sort of free will required for us to be morally responsible for our actions? What makes you one individual person or self at a particular time? What makes you today the same individual person as that obnoxious 5-year old who went by your name a few years back?

### PHIL 0020. Mind and Matter.

The purpose of this course is to introduce students to philosophical problems, arguments, and theories about the nature of the mind and its place in nature. Questions that will be examined include: What is consciousness? What is the mind-body problem and what are the prospects for solving it? Does the existence of consciousness imply that the world is not wholly physical? How is mental causation possible? Are there souls or selves, and, if so, what are they? Do we have free will? We will approach these and other questions by examining how contemporary analytic philosophers have responded to them.

### PHIL 0030. Skepticism and Knowledge.

What is knowledge? What is the extent and basis of one's knowledge about physical objects, other people, oneself, the future, morality, and religion? No overrides will be granted for this course.

### PHIL 0040. Reason and Religion.

This is an introductory course in the philosophy of religion. We will be considering central questions in the philosophy of religion, e.g. the existence of God, from a contemporary analytic perspective. As this is a course in *analytic* philosophy, we will be addressing these issues in a way that stresses clarity and rigor.

### PHIL 0050. Aesthetics: Art and Morality.

From Plato to the present, the power of the arts to trigger powerful emotions has been seen by some thinkers as a threat to morality, by others as a vital support. This debate raises such issues as whether aesthetic experience is a distinctive kind of experience and whether the creation and reception of art are autonomous activities free from the constraints of morality and politics. Beyond Plato, authors to be read will include such figures as Hume, Mendelssohn, Rousseau, Kant, Schiller, Hegel, Schopenhauer, Ruskin, Tolstoy, Collingwood, Stanley Cavell, Martha Nussbaum, Alexander Nehamas, and others.

### PHIL 0060. Modern Science and Human Values.

Devoted to the critical study of moral problems that have been raised or affected by modern science and technology, with a particular emphasis on problems in bioethics and environmental ethics. Possible topics include abortion, euthanasia, organ transplantation, pharmaceutical enhancement, animal rights, population control, and climate change. Throughout the course we will keep track of recurring questions about obligations, rights, harm, and justice, as well as the various ways in which philosophers have attempted to answer these questions.

**PHIL 0070. The Individual and the State.**

Chief among the demands that states make of individuals is that they obey. But why should we? This introductory-level course takes this challenge as a touchstone for a broader examination of political philosophy that falls into three main categories: arguments over the basis of the state's claim to an individual's obedience; arguments over the scope of its claim to authority; and arguments over the existence of our obligation to obey in the face of that claim.

**PHIL 0080. Existentialism.**

An introduction to philosophical thinking through the study of existentialist themes, including being oneself, loving others, the limits of morality, and the meaning of life in the face of suffering and death. Readings are drawn primarily from Schopenhauer, Dostoyevsky, Nietzsche, Kierkegaard, Heidegger, Sartre, de Beauvoir, and Camus.

**PHIL 0090. Philosophy East and West.**

Investigates themes associated with what is known as the "Western" philosophical tradition—e.g., idealism, skepticism, and the limits of understanding—as they arise in various philosophical traditions in the East (including Upanishadic, Buddhist, and Taoist traditions). The "Western" philosophers studied include key historical figures such as Wittgenstein, Kant, and Plato, as well as more recent philosophers.

**PHIL 0100. Critical Reasoning.**

This course will teach students critical reasoning skills needed to analyze a diverse range of challenging arguments, as well as the tools required to develop compelling arguments of one's own. Together we will investigate the following broad topics: validity and soundness, argument decomposition and construction, deductive and inductive arguments, evidential assessment, and fallacious reasoning. We will also consider the various ways our critical reasoning faculties can breakdown and be impeded by bias (in explicit and implicit forms), stereotypes, and prejudice, as well as potential mitigation strategies.

**PHIL 0110. The Nature of Fiction.**

This course is concerned with philosophical questions arising from the concept of fiction. Topics will include: What makes a story a fiction? What are fictional characters? Are fictions "created"? Are fictions physical things, like books? How do fictions make us care about things we don't even believe in? How do fictions affect our moral beliefs.

**PHIL 0111. Personal Identity.**

What makes me the same person over time? How can we decide whether a person at a time is identical with a being alive at another time? We will consider the continuing existence of the body, the ability to remember experiences, and other criteria. Readings from classic (17th and 18th century) and contemporary sources.

**PHIL 0120. Freedom and Responsibility.**

An introduction to philosophy by way of consideration of such issues as: whether we are, can be, or ought to be free to think and act as we choose; whether we are or can be responsible (morally or legally) for our thoughts or actions or their consequences; and whether we ought to be punished for any of our thoughts or actions or their consequences. Readings from classical and contemporary sources.

**PHIL 0130. Introduction to Analytic Philosophy.**

This course will be an introduction to some of the main issues and methods in contemporary analytic philosophy. We will look at work on free will, the mind-body problem, knowledge and skepticism, truth and relativism, morality, and value. We will also take note of some of the main methodological tools employed in that work, such as reflective equilibrium, use of counterexamples, appeal to the best explanation, and thought experiments.

**PHIL 0140. Introduction to Buddhist Philosophy.**

This course will introduce students to Buddhist philosophy through the lens of contemporary philosophical themes. We will look at questions of personal identity, ethics, metaphysics, and free will, among others. There will be two related focuses: one historical and one critical. We will first get clear on the various accounts, and then will evaluate the arguments offered. No prior knowledge of either philosophy or Buddhism is required; both will be introduced in tandem, so that students will leave the course with an introductory understanding of both Buddhist philosophy and the philosophical themes discussed.

**PHIL 0160. An Introduction to Pain and Suffering.**

What are pain and suffering? Do they matter, and if so, why? What can we do about them? What should we do about them? The goal of this course is to answer those three central questions – what we might call the 'what?', 'who cares?', and 'now what?' – of pain and suffering. The course is designed to give an introduction to the philosophy, neuroscience, and psychology relevant to answering those questions, as well as to how they are addressed in Buddhism.

**PHIL 0170. College Ethics.**

As college students, you face a number of ethical decisions. Should you use cognitive-enhancing drugs? If there is a speaker you oppose, is it okay for you to engage in disruptive protest? Should you support calls for the university to take political positions, or should a university be politically neutral? In this course we'll be looking at these and other issues relevant to your lives as college students. There are no prerequisites for the course.

**PHIL 0180. Topics in Feminist Philosophy.**

This survey course is designed to introduce students to core issues of feminist philosophy. We will investigate foundational and topical questions of feminist theory, by both classic and contemporary authors. Topics include: the nature of gender, oppression, masculinity and femininity, objectification, and the relationship between social inequality and knowledge. Emphasis will be placed on understanding these issues in relation to social categories such as race, sexuality and (dis)ability.

**PHIL 0190. Contemporary Moral Problems.**

Is it ever morally permissible to get an abortion? Is euthanasia morally permissible? Can capital punishment be ethical? Do non-human animals have the same moral status as humans? Is it morally acceptable to keep more resources than one needs? These are examples of questions that contemporary applied ethics attempts to answer. In this introduction to contemporary moral problems, we will discuss potential answers provided by contemporary philosophers to these and other controversial questions.

**PHIL 0200A. Consciousness.**

This course will provide an introduction to the main philosophical theories of consciousness, and also to the relevant experimental work in neuroscience and cognitive psychology. Among the issues to be considered are: the different forms of consciousness, the relationship between consciousness and attention, the role of consciousness in perception, and the "hard problem" of consciousness (that is, the problem of determining how "qualitative" psychological characteristics like pain and the taste of lemons are related to neurobiological characteristics of brain states).

**PHIL 0200B. Time Travel.**

Although time travel is a commonplace of popular fiction, considering it closely reveals some interesting paradoxes. Studying these paradoxes provides a natural introduction to many core topics in metaphysics, including causation, possibility, personal identity, free will and the relationship between philosophy and physics. For first year students only.

**PHIL 0200C. Personal Identity.**

What makes me the same person over time? How can we decide whether a person at a time is identical with a being alive at another time? We will consider the continuing existence of the body, the ability to remember experiences, and other criteria. Readings from classic (17th and 18th century) and contemporary sources. Enrollment restricted to first-year undergraduates.

**PHIL 0200D. Thinking Through Faith.**

Since the dawn of science, reason has been seen as a threat to faith. We will approach the issue obliquely, reading contemporary authors who approach it from very different directions. Writers include: Dietrich Bonhoeffer, Marcus Borg, Rita Brock, John Crossan, William Jones, Jon Levenson, Elaine Pagels, Rebecca Parker, and Barbara Taylor. Faith is no prerequisite, but those who have no appreciation for what it might mean to "live faithfully" may find it difficult to engage with the readings, as will those who regard it as blasphemous to subject the claims of faith to critical appraisal. Enrollment to 15 first year students.

**PHIL 0200F. Language, Race, and Gender.**

We will explore slurs, pejoratives, epithets and normative generics. Topics include: How do these expressions express contempt? How can they be used to derogate social groups? Is the derogatory element and the contempt they express part of the meaning or is it implied when they are used in certain contexts? Is it a feature of semantics or pragmatics? Do they refer? What are their semantic values? Do they have an expressive content? This course will serve as an introduction to philosophy of language. The nature of linguistic meaning, how language represents the world, the interface between semantics/pragmatics will be discussed.

**PHIL 0200G. Personal Identity and Moral Responsibility.**

First year seminar on personal identity and moral responsibility.

**PHIL 0201. Philosophy of Death.**

This course is about death: what it is, why it's bad (and good?), and how we should approach our death, and others'. The course will be divided into three parts. In part one, we will consider questions regarding the nature of death. In part two, we will look at questions regarding the value of death and immortality. In part three, we will look at questions regarding the ethics of death.

**PHIL 0202. Causation.**

A topic of interest to philosophers has been the existence and nature of causal relations. Philosophers have asked what sorts of causal relations, if any, there are in the world and how human beings come to have knowledge of them. In this course, we examine the main answers to these and other questions that have been proposed by philosophers throughout the history of philosophy to the present. Throughout the course, students will be taught the principles of careful textual analysis, some of the basic presuppositions of analytical philosophy, and how to present philosophical arguments clearly, both orally and in writing.

**PHIL 0203. Introduction to Islamic Philosophy.**

The purpose of this course is to introduce students to the major thinkers, schools, themes and concepts of Islamic philosophy. We will begin with the translation movement from Greek into Arabic and the influence of the Koran, then look at texts by and about al-Kindi, Farabi, Avicenna, Averroes, Suhrawardi, and Mulla Sadra, among others. Students are required to read the assigned texts, to submit weekly reading response, and to write three 4-page papers or one 12-page paper on a chosen topic. While all assigned texts are in English, interested students can attend meetings devoted to reading sources in Arabic.

**PHIL 0204. Philosophy of Attention.**

This course is meant to provide and introductory exploration into the concept of attention, with special focus on methods of phenomenology, conceptual analysis, and interpretation. We will give special consideration to the role of attention in relation to self-understanding, morality, and aesthetic experience. We will consider questions such as: What is attention? How is attending related to consciousness, awareness, and the unconscious? What role does attentiveness play in agency and embodied action? How can attention be cultivated and shaped? Can we attend too much or too little, too narrowly or too widely, or even in the wrong ways?

**PHIL 0205. Understanding Arguments.**

In this course you'll learn how to analyze arguments philosophically, extracting their essential elements and mapping their structure in order to determine how they work, what assumptions they're relying on, and whether they're any good. You'll develop your critical faculties by examining arguments from both mass media and the philosophical literature, on topics ranging from voting rights and prison sentencing to free will and the existence of God. You'll also learn to direct these faculties inward, clarifying your own thinking so that you can produce rigorous and effective argumentative writing of your own.

**PHIL 0206. Introduction to Aesthetics.**

This is an introductory course on aesthetics, giving an overview of the history of (western) aesthetics and of contemporary debates in analytic aesthetics. Among the historical figures to be read are Plato, Aristotle, Kant, Nietzsche, and Adorno. Some of the contemporary debates concern the right theory of art (representationalism, the expression theory, formalism), the definition of art, and the ontology of works of art. We will consider some general criticisms of western aesthetics. Students will be introduced to prominent positions in aesthetics, but they will also learn how to engage in rigorous philosophical argumentation in the face of those positions.

**PHIL 0207. Food and Philosophy.**

This course will deal with questions about the epistemology, metaphysics, aesthetics, ethics and politics of food: how we should reason about the things we eat, what makes them tasty or artistic, and what we ought and ought not to eat and how we ought to structure the environment in which food is produced and distributed. This seminar is meant as a general introduction to philosophy, in which you will familiarize yourself with long-standing kinds of philosophical questions and modes of reasoning. Food will be our anchor topic, the subject matter that gives us the occasion for such philosophical reflection.

**PHIL 0209. Nothingness.**

Many philosophers have written a great deal about nothing: whether there can be nothing, why there isn't only nothing, whether we can talk about nothing, and what it is like to experience nothing. Can there be any meaning to this sort of talk? Is there some important metaphysical role to be played by nothing or nothingness? Is such questioning merely a confusion resulting from misuse of language? This course will survey writings on nothing, with particular attention to the problem of ineffability. We will develop necessary skills to come to terms with and rationally argue about obscure topics and challenging texts.

**PHIL 0210. Science, Perception and Reality.**

It is implausible that scientific discoveries could make us give up commonsensical beliefs. It is even less plausible that commonsense could make us reject established scientific theories. So when science and commonsense appear to clash, as they do over colors, solidity, mental content, values, and death, serious philosophical problems arise. We will investigate possible responses to these problems.

**PHIL 0220. Introduction to Philosophy.**

This course will introduce the student to the how, what, and why of philosophical enquiry through engagement with some of the major themes, and major figures, of the field. We will follow our wonder about the world around us, ourselves and about how we should act in it, using classical as well as contemporary writings. Through a combination of lectures, readings, class discussions, and assignments the student will develop their ability to understand and engage with philosophical texts, evaluate arguments, and express their critical and reflective opinions in writing.

**PHIL 0230. Human Knowledge and Truth.**

Science is widely considered our best way of gaining knowledge about the world, and so we believe it deserves a privileged place in our epistemic lives. But is the view that gives science its privileged position correct? If so, why? What is the methodology of science, and does this methodology produce rational and reliable beliefs? And what does it mean to give some belief formation system a privileged position anyway? Why should any belief formation system be privileged over another? We will discuss some of these questions by looking at central issues in the philosophy of science and epistemology.

**PHIL 0240. Dreams.**

This course is concerned with philosophical questions arising from dreams and dreaming. We will be dealing with contemporary and historical philosophers' work in an exploration of this mysterious and fascinating, yet extremely widespread, activity.

**PHIL 0260. Philosophy of Social Science.**

This is a general introduction to the philosophy of social science. Social science brings with it certain specific problems and modes of explanation. This course is designed to introduce students to some of the issues surrounding social science. What sorts of problems and phenomena are social scientists concerned with explaining? How are they different from the problems tackled by natural scientists? Is there a mode of explanation distinctive of social science? What sorts of theoretical tools do social scientists use? We'll consider all these questions, and more.

**PHIL 0300A. Introduction to the Philosophy of Wittgenstein.**

The course will be a careful guided reading of Wittgenstein's main works: the *Tractatus Logico-Philosophicus* and the *Philosophical Investigations*, together with some of the authors he was arguing against, Gottlob Frege and Bertrand Russell.

**PHIL 0300B. Feminist Philosophy in the 21st Century.**

The essential predicate of feminism is that men and women are equal, that each is entitled to all the rights that flow from full personhood and moral agency. Feminism contrasts with sexism—the view, express or implied, that men and women are not equal and shouldn't have the same rights. Feminism has gained a central place in much of western culture. Nonetheless, there remain philosophical disagreements about the implications of feminism and the extent to which sexism remains in our social and legal institutions and philosophical assumptions. The subject matter of the class will be taken from these areas of disagreement.

**PHIL 0300C. Unacceptable Conclusions: Arguments Against Common Sense.**

Consider three claims: "Plants obtain energy from sunlight." "The earth will not suddenly lurch out of orbit tomorrow." "Hurting people is morally wrong." Probably, we take these claims to be objectively true. And probably, we take ourselves to know them to be true. According to both the relativist and the skeptic, we are wrong. This course introduces students to the two most fundamental challenges to views widely taken to be core tenets of "common sense." We will first consider the challenges in their most general forms and then examine domain specific challenges, with special regard to the domains of science and morality.

**PHIL 0300D. Love and Friendship.**

Love and friendship are of central importance to a flourishing life. But what are love and friendship? This course will begin with a study of a few key historical texts (Plato, Aristotle, and Montaigne). After that we will turn to contemporary philosophy. We will consider the following questions: What is the nature and value of friendship?; Do we have reason to love the people we love?; What may parents do for their children and what do grown children owe their parents?; Ought we to love our country? An emphasis will be placed on careful reconstruction and evaluation of philosophical arguments.

**PHIL 0300E. Causes and Effects.**

This course will introduce students to the methodology, aims, and concerns of analytic philosophy by way of an extended study of a particular issue in metaphysics over time: causation. Students will become familiar with identifying, reconstructing, and evaluating philosophical arguments and the philosophical methodology practiced in the analytic tradition, as well as reading some central figures in the philosophical canon.

**PHIL 0300F. Animals and Ethics.**

We will consider some philosophical questions that confront us when we reflect on the place of animals within our moral thinking. What do we owe to the other animals, and why? What kinds of treatment and relationships are consistent with what we owe to animals? Should or could animals have rights? What is the moral significance of sentience, rationality, and species membership? In what ways is the de facto subjugation of animals similar and dissimilar to the subjugation of other groups? We will consider and evaluate different answers to these questions, and students will be encouraged to develop their own.

**PHIL 0300G. Introduction to the Philosophy of Wittgenstein.**

This course examines Wittgenstein's two groundbreaking works, the *Tractatus Logico-Philosophicus* (1921) and the *Philosophical Investigations* (1953), both of which reshaped 20th-century thought. What are the limits of language? What is the nature of philosophy? Can there be such a thing as a private language? Wittgenstein addresses these and other questions in both works. His answers are at times cryptic, such as when he says "The limits of language mean the limits of my world". The primary goal of this course is to come to grips with the main claims of both works and the development of Wittgenstein's thought.

**PHIL 0350. Ancient Philosophy.**

This course will introduce students to the major concerns of Greek philosophy, and how they are addressed by the Presocratics, Plato, Aristotle, and the Stoics. We will have two related ends: historical and critical. On the one hand, we will get clear so far as we are able what it is that these thinkers thought; on the other, it is important to evaluate their arguments. This course will emphasize the identification of the problems and the solutions to them that seemed pressing to these thinkers, especially if such problems seem alien to us.

**PHIL 0360. Early Modern Philosophy.**

An introduction to central themes in Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant. Major topics include: reason, experience, and knowledge; substance and the nature of the world as it really is; induction, causation, and the origin of our ideas; skepticism, realism, and idealism. Connections are made with the scientific revolution of the 17th century. There will be discussion and advice on ways to approach philosophical reading, research and writing.

**PHIL 0390. Global Justice.**

Is it unjust that people in some countries have less wealth, worse health, etc., than those in other countries? Does this depend on whether the better off countries partly caused the disparity? Does it depend on whether the worse off are poor, or is it enough that they are relatively worse off? If there are global injustices, what obligations are there, and on whom do they fall, to remedy them? We will study (mostly) recent philosophical work on such questions, including attention to special contexts such as immigration, climate change, poverty, colonialism, secession, intervention, and war.

**PHIL 0400. Marxism.**

In the first part of the course, we will examine Marx's economic, political, and philosophical writings, focusing on his analysis of capitalism, his critique of liberal democracy, and his theory of history. Then in the second part, we will look at some recent attempts to renew and extend the Marxist tradition.

**PHIL 0410. Marxism after Marx.**

A study of current debates in Marxist theories concerning such issues as dialectic market socialism; class, race, and gender; and democracy. Prerequisite: PL 40 or permission of the instructor.

**PHIL 0450. The Meaning of Life.**

This is an introductory course in ethics, with a focus on the question of what is the nature of the human good, or of a life lived well. Readings will be from classical sources (Aristotle, Epicurus, Kant, Nietzsche, Camus) as well as from contemporary authors. In investigating this question, the course will also introduce students to some of the main problems and positions in moral philosophy. Central concepts such as obligation, responsibility, pluralism, and moral knowledge will be discussed, but in the larger context of what is the nature of the good life. No prior work in philosophy will be presupposed.

**PHIL 0500. Moral Philosophy.**

What is the right thing to do? What should a good person be like? More generally, what determines what is right and wrong, good and bad, virtuous and vicious? In this course, we will consider three greatly influential moral theories – utilitarianism, Kantianism, and Aristotelian virtue ethics — as well as feminist perspectives on morality. Towards the end, we'll also consider more general questions that any moral theory faces. For instance: Does morality depend on God? Is morality relative or subjective (whatever that's supposed to mean)? And why should we care about being moral in the first place?

**PHIL 0540. Logic.**

An introduction to perhaps the most fundamental tool of rational thought: deductive logic. Course begins with basic sentential logic, then moves on to deduction, quantification, and predication. Argumentation and reasoning may also be addressed at times. No previous experience with logic or philosophy is required.

**PHIL 0550. Free Speech.**

Freedom of speech is a challenging and controversial ideal. Legal questions are central, but the issues range into moral and political philosophy as well. We will study John Stuart Mill's influential 19th century treatment of the idea, and then concentrate mostly on discussions within the last fifty years, including much that is on the cutting edge of current thinking about freedom of speech. Topics will vary, including such things as: political speech, art and offense, pornography, hate speech, protest, copyright, internet and new media, and campaign finance laws.

**PHIL 0560. Political Philosophy.**

An analytic investigation of some central problems and topics in political philosophy, including political obligation and civil disobedience, liberty, rights, equality, and democracy. Readings are drawn from recent work in the field, along with a few classics.

**PHIL 0570. Environmental Ethics.**

In the first half of the course, we will ask what sorts of things have value. Does the realm of moral consideration extend past human beings to include animals, plants, and nature itself? How does environmental concern figure into the worthwhile life? What role do consumer goods play in a good life? How do we know?

Good intentions are not enough to make good policy. Thus, in the second half of the course, we will try to determine what sorts of policies actually help to protect the environment. We will learn what economics and other social sciences tell us about human behavior and how to shape institutions. We will examine issues in wildlife management, human population, resource use, and more.

**PHIL 0580. Philosophy of Economics.**

In this course, students will investigate the historical and contemporary overlap between philosophy and economics, from the writings of Adam Smith and Karl Marx to recent works in philosophical and economic theory. We will consider the following questions: Are economists committed to a particular theory of ethics or well-being? How should economists and philosophers understand the welfare of individuals? What is the link between free markets and important conceptions of individual freedom? How might moral and political philosophy benefit from economic analysis? How might philosophy inform or enrich economic analysis? Finally, how can economic analysis and philosophy together inform public policy?

**PHIL 0650. Psychology and Philosophy of Happiness.**

The course explores four fundamental questions about happiness: What is happiness—pleasure, life satisfaction, something else? How is happiness achieved—what are the myths and realities about what conduces to happiness? Can happiness be achieved—are we naturally well suited to be happy? Why pursue happiness—is it sufficient, or even necessary, for a good life? The course examines classic contributions from philosophy and psychology, the two disciplines that have studied happiness most extensively. Team-taught by professors from both philosophy and psychology, it invites students to compare and combine both approaches.

**PHIL 0660. Philosophy of Psychology.**

An introduction to philosophical issues concerning the foundations of psychology and the cognitive sciences. Possible topics include behaviorism and functionalism, mentality and neural processes, mental representation, the computational model of mind, the implications of artificial intelligence, the connectionist model, the role of consciousness in psychology, and the status of psychology as a science.

**PHIL 0670. Art, Music, and Science: An Introduction to Aesthetics.**

Topics will include: art and representation; art and the emotions; beauty, form, and aesthetic experience; and the definition of art. We will focus especially on the visual arts, though we will consider examples drawn from music as well. We will be looking throughout to understand how empirical research bears on traditional topics in the philosophy of art, drawing from empirical perception science, evolutionary biology, and cognitive neuroscience. The course will be example driven: We will try out philosophical theories against our lived reactions to many dozens of images of visual art, and against our reactions to a number of music selections.

**PHIL 0700. Philosophy of Religion.**

This course will discuss a representative group of philosophical issues and problems that arise in connection with religious worldviews. Specific topics may include but are not limited to the following: concepts of a god, the existence and attributes of God, the problem of evil, miracles, religion and morality, faith and science, and the possibility of religious knowledge. Prerequisite: At least one previous philosophy course.

**PHIL 0770. Introduction to the Philosophy Mind.**

Examines three central mysteries in the philosophy of mind: the relationship between the mind and the body; the nature of thoughts; and the nature of consciousness. Prephilosophical and historical approaches, and discussion of the currently dominant themes.

**PHIL 0850. Introduction to the Philosophy of Language.**

Discussion of the nature of linguistic meaning and other topics, such as vagueness; metaphor; and language, thought, and culture.

**PHIL 0880. Ethical Themes in the Contemporary American Short Story.**

Consideration of contemporary American short stories in terms of their treatment of such philosophical themes as love, loyalty, envy, belief, despair, and charity. Focuses on themes in moral philosophy, rather than themes in social and political philosophy. This course has no prerequisites.

**PHIL 0990A. Distributive Issues in Health Care.**

No description available.

**PHIL 0990B. Equality in Political Theory.**

A study of the connections and conflicts between the liberal democratic commitment to political equality of all citizens, and the more leftist goal of economic equality, or equality of well-being. For example, do the purported rights that produce economic inequality override those that support political equality, or vice versa? Texts will be mostly contemporary.

**PHIL 0990C. Foucault and Epistemology.**

Provides both an overview of Foucault's major contributions to philosophy and a focused analysis of his theory of knowledge, especially the links between power, discourse, and knowledge. Considers debates over Foucault's claims and whether his account leaves us with an epistemic nihilism.

**PHIL 0990D. Justice, Resource Allocation, and Health Care Rationing.**

Three main sections: first, the main philosophical theories of distributive justice and their implications for the right to health care; second, a number of specific moral issues in allocating, prioritizing, or rationing health care resources; and, third, fair institutional procedures for health care rationing. Readings drawn both from philosophical work on justice and from literature in health policy and bioethics. Prerequisite: one course in ethics or political philosophy. Preference given to concentrators in philosophy or biomedical ethics.

**PHIL 0990E. Kant's Moral Philosophy.**

No description available.

**PHIL 0990F. Perception.**

Begins with a reading of some classic works, and then moves on to contemporary work. Topics include: naive realist versus representational theories of sensory experience, the possibility that sensory experience is massively illusory (so that we already occupy a kind of "virtual reality"), the role of the brain in shaping sensory experience, and the alleged foundational role of sensory experience in knowledge. The focus will be on vision but we will also discuss other sense-modalities. Suggested prerequisite: at least one course in philosophy (2 or more preferred).

**PHIL 0990G. Plato.**

A close reading of Plato's major dialogues from a philosophical perspective. Topics may include his ethics, politics, metaphysics, epistemology, philosophy of mind, philosophy of language, or aesthetics. Readings are from original sources (in translation) and contemporary secondary literature. (Students wishing to read the texts in the original Greek should make arrangements with the instructor.)

**PHIL 0990H. Race and Racism.**

With special attention to the U.S., this course examines the origins of the concepts of race and racism and current controversies about it.

**PHIL 0990I. Self-Respect.**

We often act as if the sole object of morality were treating others properly. In this course, we will consider how we ought to treat ourselves. Among the questions we will consider are: What is self-respect? How is it attained, preserved, and lost? Can self-respect exist in the absence of personal and moral integrity? This course is a Senior Seminar; lectures and discussions will be led at the level of advanced undergraduates.

**PHIL 0990J. The Concept of Alienation.**

We will read texts concerning the concept of alienation from Hegel, Marx, Kierkegaard, Nietzsche, and Sartre with a view to developing a concept of alienation that proves useful for an understanding of contemporary conditions.

**PHIL 0990K. Topics in the Philosophy of Language.**

During the first half of the semester, we read several of the classic works that form the background for contemporary philosophy of language, including works by Frege, Russell, Ayer, Quine, and others. During the second half, we take up one or more topics of contemporary discussion, chosen from the following: vagueness, paradoxes of self-reference, the nature of truth, realism versus antirealism.

**PHIL 0990L. Valuing Persons.**

We all have notions of good, bad and ordinary people, but reality defies our concepts. Many otherwise "nice" people voted for Hitler. People with stupid views about morality are sometimes better "in practice" than their smart counterparts. The same person may be honest with her husband but dishonest with the IRS, brave in battle but scared of public speaking. This class will explore this complexity, touching upon topics like free will and rationality, through the work of contemporary philosophers.

**PHIL 0990M. Descartes Meditations.**

This seminar will focus on the main arguments and overall goals of Descartes' *Meditations*, read in conjunction with the *Objections and Replies* and some of Descartes' other writings. Also discussed will be some philosophically engaging studies of the *Meditations* by contemporary writers such as Harry Frankfurt and Bernard Williams.

**PHIL 0990N. Moral Metatheory: What is Moral Theory Good For?.**

Moral theory investigates morality, but moral metatheory investigates moral theory. Some problems we'll consider include: Is moral theorizing worthwhile? What's the point of moral theory? What should good theories do? Does widespread disagreement or the reliance on questionable intuitions invalidate moral theorizing? What exactly does the moral theorist know? What counts as good philosophical methodology, and how do we know?

**PHIL 0990O. The Structure of Scientific Revolutions.****PHIL 0990R. Rational Belief.**

We'll examine a number of issues concerning rational belief. Specific questions will probably include: What is the relationship between rational belief and logic? Is what's rational for me to believe completely determined by my evidence? Does what's rational for me to believe depend on my practical interests? Can I be rational in holding opinions that are denied by others who are seemingly as smart, unbiased, well-informed, etc., as I am? We'll look at these questions from a couple of different perspectives, one which sees beliefs as all-or-nothing states (either one believes P or one doesn't), and the other which sees belief as coming in degrees.

**PHIL 0990S. The Problem of Political Obligation.**

No description available. Enrollment limited to 20 seniors.

**PHIL 0990T. Paradox and Infinity.**

This course will focus on several important paradoxes that arise within philosophy and mathematics. We will use these paradoxes to investigate central issues in metaphysics, the philosophy of language, decision theory, physics, mathematics, and logic. Among the paradoxes we will discuss are Zeno's paradoxes of space, time, and motion; the paradoxes of set theory; the paradoxes of truth and reference; the sorites paradox; and paradoxes of rational action and rational belief. Enrollment limited to 20.

**PHIL 0990V. Current Questions About Rational Belief.**

We'll study some "hot topics" in epistemology. Some possible questions: (1) What's the relationship between rational belief and logic? (2) Is belief best thought as all-or-nothing, as coming in gradations, or both? (3) Can the same evidence support divergent belief-states? (4) Is rational belief completely determined by evidence, or also by values or practical interests? (5) Are graded beliefs best seen as coming in precise degrees, or as more "spread-out"? (6) Can I have rational beliefs I know are denied by others just as intelligent, unbiased, well-informed, etc., as I am? Enrollment limited to 20 juniors and seniors.

**PHIL 0990W. Early Modern Theories of Ideas.**

Early modern philosophers routinely employed the notion of ideas in their epistemologies. But what are ideas? Where do they fit in the prevalent substance-mode ontology of the period (if at all)? How are they supposed to avoid skepticism? And how was Hume able to turn them to his advantage? This course is a study of the evolution of theories of ideas from Descartes, Arnauld, Malebranche, Locke, Leibniz, Berkeley and Hume. Recommended prerequisites: PHIL 0220 or 0360. Enrollment limited to 20. Not open to first-year students.

**PHIL 0990X. Conditionals.**

In this seminar we will look at different theories of what "if" means. Is it a truth-functional connective, like the material conditional used in logic? Do sentences of the form "If P, then Q" even have truth conditions? Some logic will be very helpful; some familiarity with philosophy of language also helpful. Enrollment limited to 20 juniors and seniors.

**PHIL 0990Z. Where Theory Meets Experience: French Philosophy of Science, 1900-1950.**

Philosophy of science was greatly influenced by the views of Henri Poincare and Pierre Duhem. We will read their works along with contemporaries such as Emile Meyerson and Gaston Bachelard. All readings will be in English. Prerequisite: one course in Philosophy, or instructor permission. Enrollment limited to 20 juniors and seniors.

**PHIL 0991A. Seminar on Ethics, Education, and Fiction.**

This seminar focuses on fiction as a vehicle for discussing ethical issues in education. It also uses works by philosophers. Topics include the following: What are appropriate aims for various types and levels of education? What are appropriate student-teacher relationships? How much, if at all, should schools concern themselves with the non-academic side of students' and teachers' lives? How should the performance of students and teachers be evaluated? How can fiction enrich the philosophical discussion of such questions? This seminar is open to students with backgrounds in philosophy, literature, or the social sciences (including the study of education). Enrollment limited to 20 undergraduates.

**PHIL 0991B. Causation.**

This course will explore the relation between cause and effect from multiple perspectives. We will investigate how humans normally conceive of causation, how scientists investigate causality, how to apply judgments of causation in legal and moral situations, and what ultimately ties everything in the universe together. Enrollment limited to 20 juniors and seniors.

**PHIL 0991C. Reasons and Ought.**

Contemporary philosophical problems of the fundamental deontic concepts. Topics will include: ought implies can, 'buckpassing' accounts of value, narrow and wide scope requirements, subjective and objective reasons (and ought). Enrollment limited to 20.

**PHIL 0991E. Identity and Authenticity.**

Identity and authenticity are typically thought to be closely allied in that being oneself (authenticity) presupposes and depends on a conception of what one is (identity). However, close scrutiny of the ideal of authenticity and of the nature and development of identity exposes significant tensions between the two concepts. Drawing on sources from philosophy, psychoanalytic psychiatry, and sociology, the course will examine these concepts and the tensions that arise between them.

**PHIL 0991H. Medieval Philosophy.**

This course is a survey seminar on major philosophical topics in medieval philosophy in the Latin tradition, which spans from about the 5th to the 15th century, with a special concentration on thinkers and texts in the hundred years between 1250 and 1350. The goal is to gain an overall view of the issues that were important to thinkers of this time period and the approaches taken to try to solve them.

**PHIL 0991M. Mental Representation.**

Discussion of contemporary philosophical and scientific work on intentionality and mental representation. Topics will include: types of mental representation (language of thought, spoken language, perceptual states, images, cognitive maps, trees, object files, etc.), relations between mental representations and the world (reference, informational semantics, teleological semantics), the nature of perceptual content, the differences between perceptual representation and conceptually grounded representation, philosophical theories of concepts, psychological theories of concepts, theories of belief, ethological work on animal beliefs and concepts, and the nature of conscious thought (particularly, evidence pro and con the theory that thought consists of auditory imagery and articulatory imagery).

**PHIL 0991P. Aesthetics: What is a Picture?.**

This course will consider various issues about pictures and their role in art. What is a picture as opposed to other kinds of symbols? What is pictorial meaning? How does our response to pictures differ from other aesthetic responses? How do photographs differ from paintings? Readings will be drawn from historical as well as contemporary sources, such as Plato, Alberti, Harris, Kames, Winckelmann, Lessing, Herder, Kant, as well as Goodman, Gombrich, Wollheim, Robert Hopkins, Dominic Maclver Lopes, and Diarmud Costelloe.

**PHIL 1002. Avicenna.**

This course will familiarize students with the life, works, ideas and legacy of one of the most influential thinkers of classical Islamic philosophy, Avicenna (d. 1037). We begin with Avicenna's life and works, then look into some major themes in his logic, natural philosophy, epistemology and metaphysics. Then, we will consider Avicenna's controversial views on God's knowledge of the particulars, the nature of his Pointers and Reminders and the commentary tradition it inspires, as well as Avicenna's heritage in Islamic thought and beyond. Throughout the course, we will read selections from his opus magnum, *The Cure*, in English translation.

**PHIL 1100A. Plato and His Opponents.**

This class offers a close, contextual study of five major Platonic dialogues: Republic, Gorgias, Protagoras, Phaedo and Meno. Our special interest is the particular thinkers, movements and ideas that Plato is opposing or responding to in these works. So we will examine his opposition to Presocratic naturalism, his rejection of empirical science, his critiques of humanistic ethics (hedonism and the social contract) and of rhetoric and democratic process, and his dispute with Homer and tragedy. We will treat these several opponents as charitably as possible, to get the fullest possible overall sense of Plato's motives and interests.

**PHIL 1100B. Life and Money.**

Money is not just an economic, but a deeply philosophical issue. It figures in theories of interaction based on exchange and contracts. Money is said to be an "abstract" form of happiness, thus it permeates the debates on well-being, welfare, and wealth. By opening up a vast horizon of possibilities, money also sharpens our sense of temporality. Issues of social cooperation and cohesion come into play, questions of personal identity and individual life-plans are to be raised. In the aftermath of the latest economic crisis it is recommendable to reappraise philosophical texts scrutinizing the role of money in our lives.

**PHIL 1100C. Medieval Arabic Philosophy.**

Medieval Arabic philosophy is, broadly speaking, a derivation and continuation of the philosophy of the Hellenistic world. This course is a general study of the most important figures and ideas in this philosophical tradition with a special emphasis on metaphysical thought. The goal is to gain an overall view of the issues that were important to thinkers of the tradition and of the approaches taken to try to solve them. This course is a sort of philosophical journey into the past aiming at getting to know it as best as we can.

**PHIL 1100D. Conditionals.**

In this course, we will look at different theories of what "if" means. Is it a truth-functional connective, like the material conditional used in logic? Do sentences of the form "If P, then Q" even have truth conditions? Some logic will be very helpful; some familiarity with philosophy of language also helpful.

**PHIL 1100E. Moral Emotions.**

This class ultimately considers the ethical relevance of how we feel. Throughout, we will focus our attention on emotions that arguably have the greatest ethical significance: significance for our interactions with others, for what they express about our characters, and what they reveal about our assessments of the characters of others. Specific emotions that we will discuss include: respect, anger, resentment, guilt, contempt, shame, disgust, pride, gratitude, and love.

**PHIL 1210. Issues for Feminism in Ethics (GNSS 1712).**

Interested students must register for GNSS 1712.

**PHIL 1250. Aristotle.**

This is an introduction to the hugely influential philosophy of Aristotle, covering his natural philosophy, philosophy of mind, metaphysics, and ethics. We will closely read some of Aristotle's most famous works as well as a selection of contemporary secondary literature. The goal of the course is both historical and philosophical: On the one hand, students will familiarize themselves with Aristotle's philosophical positions, on the other hand, they will further develop their philosophical skills in analyzing Aristotle's arguments for those positions. The course will combine lecture and discussion.

**PHIL 1260. Plato.**

A close reading of Plato's major dialogues from a philosophical perspective. Topics may include his ethics, politics, metaphysics, epistemology, philosophy of mind, philosophy of language, or aesthetics. Readings are from original sources (in translation) and contemporary secondary literature. (Students wishing to read the texts in the original Greek should make arrangements with the instructor.)

**PHIL 1270. Pragmatism.**

Course examines the central themes of American pragmatism - the belief/doubt model of inquiry, assertibility theories of truth, the critique of philosophical dualisms - with some attention to their applications to social philosophy. The focus will be on the classical theories of Peirce, James, and Dewey, as well as on contemporary philosophers such as Quine, Rorty, and Putnam.

**PHIL 1280. History of Ethics.**

The project of British moral philosophers after Hobbes was to rebut what they all perceived as an ethics based solely on enlightened self-interest with one based on disinterested concern for others. We will examine the early responses to Hobbes of Richard Cumberland and the Earl of Shaftesbury; the moral sense theorists Francis Hutcheson, Joseph Butler, David Hume, Lord Kames, and Adam Smith; and the rationalists Ralph Cudworth and Samuel Clarke. This course is recommended preparation for PHIL 1290, Kant's Practical Philosophy.

**PHIL 1282. Hellenistic Ethics.**

TO BE DETERMINED

**PHIL 1290. Kant's Moral Philosophy.**

An introduction to the central themes of Kant's moral philosophy, including autonomy, freedom, happiness, obligation, and virtue. Kant's position in the history of moral philosophy will also be considered. Readings to include all of Kant's major writings in this field, thus *Groundwork for the Metaphysics of Morals*, *Critique of Practical Reason*, *Religion within the Boundaries of Mere Reason*, and *Metaphysics of Morals*, as well as several essays and lectures. Work will include two short papers and one term paper.

**PHIL 1300. Philosophy of Mathematics.**

This course provides an introduction to the philosophy of mathematics. We will discuss the nature of mathematical objects: Are they mental constructions, do they inhabit some Platonic realm, or are there no mathematical objects at all? We will also discuss the status of our knowledge of mathematics: How is that we are justified in reasoning as we do in mathematics? The first part of the course will be devoted to discussing the history of the philosophy of mathematics. The second part of the course will focus on contemporary debates in the philosophy of mathematics.

**PHIL 1310. Myth and the Origins of Science.**

Examines explanations of the origin of the cosmos, human beings and issues of human concern, such as illness, death and the afterlife, with readings from literary, philosophical, and scientific sources from the ancient Near East and Greece. We will ask how we and the ancients distinguish science from non-science and how ancient science differs from our own.

**PHIL 1400. Ethics in the Novel.**

Consideration of novels in terms of their treatment of such ethical themes as love, friendship, envy, death, courage, faith, integrity, betrayal, responsibility to others, revenge, justice, and mercy. The course deals with twentieth-century and twenty-first-century novels and also with Malory. No pre-requisites. No overrides will be granted for this course.

**PHIL 1420. Philosophy and Poetry.**

An examination of philosophy and poetry as rival avenues to the apprehension of truth, as well as an introduction to the basic problems of aesthetics. Philosophical readings will range from Plato to Hegel to contemporary writers. The focus of the course will be three philosophical poems: Lucretius' *On the Nature of Things*, Wordsworth's *Prelude*, and Eliot's *Four Quartets*. One previous course in philosophy is recommended.

**PHIL 1430. Feminist Philosophy.**

A rigorous philosophical examination of five topics addressed in contemporary feminist writing: justice and gender; gender justice and developing countries; the social construction of gender, sexuality, and sexual orientation; the claim that women reason differently and have different ways of knowing and arguing; and radical feminism on pornography, rape, and intercourse. Prerequisite: one semester course in philosophy.

**PHIL 1440. Virtues and Vices.**

How should one live? Consequentialist moral theories direct us to do the most good. Deontological theories tell us we must do what is right, where this might prohibit us from doing the most good. (E.g., acting rightly might require refraining from harvesting a non-consenting person's kidney in order to save another's life.) Opposed to both these prominent theories are philosophers who advocate returning concepts of virtue and vice to the central place they enjoyed in ancient ethics. This course provides an introductory survey of the motivations for, prospects of, and opposition to the return to virtue in contemporary ethical theory.

**PHIL 1450. Aesthetics.**

This course will treat Kant's contribution to philosophical aesthetics. We will study his theory of the beautiful as well as his theory of the sublime; the latter one has been particularly appreciated in post-modern debates. Our work will be centered upon two guiding issues: (1) Kant's distinction between aesthetics and ethics on the one hand, and his exploration of their deep-rooted connection on the other hand; (2) the importance of the reflective power of judgment within the scope of Kant's overall philosophical project. Both issues lead to the question of what it means for human beings to be capable of approaching the world aesthetically.

**PHIL 1490. Philosophy of Sex.**

What is sex? What are 'sexual' desires? Does sexually desiring someone necessarily objectify them? Is objectifying someone always bad? What makes some act (solo or partnered) sexual? Are all 'consensual' sexual acts morally unexceptionable? Or are some sexual acts so 'perverse' that even consent cannot excuse them? Is it all right to fantasize about cheating? or bestiality? or rape? Are literary, photographic, or cinematic presentations of such fantasies (i.e., certain sorts of pornography) always morally or politically problematic? Students should have taken at least one prior philosophy (or other related) course.

**PHIL 1500. Methodology of Philosophy.**

Does successful philosophical inquiry yield new facts or new ways of looking at old facts? Is philosophical truth absolute or relative? Relative to what? Why does philosophy lack not only a body of generally agreed-upon truths, but even an established method of settling disputes? Must the results of philosophical inquiry accord with "common sense" and if so, why?

**PHIL 1520. Consciousness.**

Topics will include: (i) the different features of various types of consciousness; (ii) dualist, physicalist, and representationalist theories of experience; (iii) the nature of pain and other bodily sensations; (iv) the nature of conscious thought; (v) the qualitative dimension of perception; (vi) introspection; (vii) the roles of attention and working memory in perceptual consciousness; (viii) blindsight, inattention blindness, hemineglect, and related phenomena; (ix) the unconscious; and (x) what it is for a state of consciousness to be unified.

**PHIL 1530. Experimental Philosophy.**

Experimental philosophy (X-phi) is the offspring of a marriage between traditional conceptual analysis and scientific method. It investigates intuitions about such traditional philosophical topics as free will, moral responsibility, knowledge, and causation, but it does so systematically and rigorously, by giving carefully worded questionnaires to samples drawn from the general population, and subjecting the results to statistical analysis. The samples may include but are not limited to philosophers and philosophy students. Thus far X-phi has achieved interesting results in moral philosophy, metaphysics, philosophy of mind, and epistemology. The course will survey some of these results, examine the current objections to X-phi, and provide some instruction in the art of designing X-phi questionnaires. Open to juniors and seniors.

**PHIL 1550. Decision Theory: Foundations and Applications.**

Decision theory is a formal apparatus for analyzing preferences and choices. Students learn the formal theory and then examine its foundations and philosophical implications. Specific topics: the role of causation in decision problems, the status of the axioms of the theory, problems of infinite utility, rudimentary game theory, social choice functions, utilitarianism as a theorem.

**PHIL 1590. Philosophy of Science.**

Some very general, basic questions concerning science. Can evidence justify belief in theories which go beyond the evidence? What is the nature of good scientific reasoning? Is there a single scientific method? What is a scientific explanation? Does science reveal truths about unobservable reality, or merely tell us about parts of the world we can measure directly?

**PHIL 1600. Philosophy of Law.**

Philosophical examination of the chief classical and contemporary theories of the nature and function of law. Topics include the definition of law, the nature of legal systems, the logic of legal reasoning, the analysis of basic legal conceptions (e.g., of right and duty), legal rules and principles, law and justice, and law and morality.

**PHIL 1610. Philosophy of Relativity Physics.**

This course will examine how Einstein's Special and General Theory of Relativity bears on important philosophical issues with a focus on whether spacetime constitutes a kind of substance and what spacetime structures are required to support explanations of physical phenomena. Also discussed are connections with logical positivism, cosmology, spacetime singularities, determinism, wormholes, time travel, causation, and the passage of time.

**PHIL 1620. Philosophy of Quantum Mechanics.**

Can cats be both dead and alive? Can baseballs tunnel through solid walls? Is the universe constantly branching? What does that even mean? In this course we'll examine the standard non-relativistic quantum mechanical formalism and show how various interpretations of that formalism give surprising answers to the questions above. Among the philosophical issues at stake: the nature of explanation and probability in the physical world, how if at all we can make choices between empirically equivalent theories, and the role of appeals to intuition, common sense, and simplicity in science. Prerequisite: One previous course in philosophy. No physics experience required.

**PHIL 1630. Mathematical Logic.**

This course provides a rigorous introduction to the metatheory of classical first-order predicate logic. Topics covered include the syntax, formal semantics, and proof theory of first-order logic, leading up to the completeness theorem and its consequences (the compactness and Lowenheim-Skolem theorems). There will be some discussion of philosophical issues, but the focus of the course will be on the technical material. This course provides a more rigorous and mathematical treatment of material covered in PHIL 0540. No previous familiarity with logic is required, but it may be taken after 0540.

**PHIL 1640. The Nature of Morality.**

Investigates major theories and issues concerning the nature of moral value. Readings from 20th-century authors. Issues include naturalism, supervenience, moral motivation, subjectivity/objectivity of value, skepticism, moral relativism, and moral realism.

**PHIL 1650. Moral Theories.**

A systematic examination of the main alternative normative moral theories: consequentialism; moral rights; moral duties; moral virtues. Focuses on the principal issues in the formulation of the different theories, on the main points of conflict between them, and on the critical evaluation of each. Readings are drawn mainly from contemporary work in moral philosophy.

**PHIL 1660. Metaphysics.**

A survey of some major topics in metaphysics, with a particular focus on radical metaphysical arguments – arguments that call into question our most basic beliefs about the world. Topics covered may include: What is personal identity? Does personal identity matter? Do personal identity and consciousness matter? Is there right and wrong and objective value? Is there free will? Are there any good arguments for God? Prerequisite: at least one course in philosophy (2 or more preferred).

**PHIL 1670. Time.**

This course will survey the major topics in the philosophy of time from Augustine's Confessions and the Leibniz-Clarke correspondence to contemporary philosophical work on the possibility of time travel. Although the main focus will be on philosophical theories of time, and students will be learning to read, think, and write like philosophers, we will also consider the portrayal of time in various works of fiction, and the role of time in various scientific theories.

**PHIL 1680. Medieval Philosophy.**

Since the Renaissance, medieval philosophy has often been unjustly dismissed as arcane and irrelevant, despite impressive innovations in ethics, philosophy of mind, metaphysics, and logic. Instead of surveying so vast a field, the course focuses on one or two sets of problems, such as the problem of evil, the freedom of the will, the existence of God, universals, substance, mind and meaning.

**PHIL 1690. The Problem of Free Will.**

If everything we do is causally determined, is there still moral responsibility? Is there still meaning in life? Is there still a sense in which we can be said to choose our actions? These and related questions will be discussed through the writings of contemporary philosophers.

**PHIL 1700. Locke, Berkeley, Hume and Others.**

A detailed study, both historical and critical, of central issues in Locke, Berkeley, and Hume. Topics include a selection from: innate ideas; substance; personal identity; abstract ideas; theory of language; perception, materialism, and idealism; induction and causation; and skepticism. Also includes some discussion of later critics of classical empiricism.

**PHIL 1710. 17th Century Continental Rationalism.**

The course will focus on the principle of sufficient reason and involve a close reading of Spinoza's Ethics, along with other texts from Leibniz, Schopenhauer, Heidegger, and some contemporary writers.

**PHIL 1720. Kant: The Critique of Pure Reason.**

We will cover the main topics of Kant's masterpiece, including his third way between rationalism and empiricism, his approach to skepticism and idealism, his foundational approach to science and everyday experience, and his limitation of knowledge to leave room for practical faith. Prerequisites: PHIL 0360, 1700, 1710 or instructor permission.

**PHIL 1730. Nietzsche.**

A systematic study of Nietzsche's philosophy as it developed throughout his works. Substantial attention also given to Nietzsche's major philosophical predecessors (e.g., Kant and Schopenhauer) as well as to the most significant recent secondary literature on his philosophy. Prerequisite: at least one prior course in philosophy.

**PHIL 1740. Nineteenth-Century Philosophy.**

This course will treat 19th century German philosophy. We will examine the development leading from German Idealism to Nietzsche. Starting and focal point of all debates in 19th century German philosophy is the work of Immanuel Kant. Therefore basic ideas of Kant's philosophy will be discussed first. The German idealists criticized Kant for what they called his "dualism" which they thought splits up life's unity into unrelated aspects. A special concern brought up was Kant's alleged negligence of both what is different from reason and what is beyond its scope. In this context we will be reading Jacobi's famous letter to Fichte in which he raised the issue of impending nihilism, parts of Hegel's *Faith and Knowledge*, and Schelling's *Philosophical Investigations into the Essence of Human Freedom*. Arthur Schopenhauer passionately opposed the systems of German Idealism (though his own philosophy has quite a bit in common with them). He emphasized the limitations of reason's power. We will be studying selected pieces from his main work *The World as Will and Representation*. Thus prepared, we will move on to Nietzsche who reflects and criticizes all the tendencies of 19th century philosophy, casting doubt on traditional conceptions of reason, morality, truth, and religion. The threat of nihilism reappears, even stronger and even more provocative. We will be studying Nietzsche's analyses as well as his answers.

**PHIL 1750. Epistemology.**

We'll concentrate on several issues involving knowledge and rational belief: What is knowledge, and how does it relate to rational or justified belief? Does a person's knowing something depend on non-evidential factors such as the practical importance of the person's being correct? Does the justification of a person's belief depend just on facts internal to the person—or might it depend on her environment? And what can we learn from thinking about the skeptical position which claims that we're not justified in believing even the most ordinary things about the world around us? Pre-req: Must have taken one course in Philosophy.

**PHIL 1760. Philosophy of Language.**

How is language used both to express and to communicate our beliefs and other thoughts? What is the relation between the meaning of a sentence and the meanings of the words that comprise it? We will discuss philosophical work on these and related questions including, potentially: the meanings of metaphors; the way meaning depends upon context; the nature of slurs and hate speech.

**PHIL 1765. Sense and Reference.**

Introduction to issues in philosophy of language and mind relating to sense and reference, including: definite descriptions, proper names, rigid designation and the description theory of names, the internalism--externalism debate, demonstratives ("this", "that"), and indexicals ("I", "here"). At least two prior courses in philosophy strongly recommended.

**PHIL 1770. Philosophy of Mind.**

Questions concerning the nature of mentality and its relation to the body. Selections from the following topics: mind and behavior, mind as the brain, mind as a computing machine, thought and language, action and mental causation, intentionality and consciousness. Prerequisite: at least one course in philosophy (2 or more preferred).

**PHIL 1780. Philosophy of Biology.**

General problems in the philosophy of science as they apply specifically to the biological sciences. Issues include the status of biological and neurobiological laws, "property reductionism" and emergentism in relation to the thesis of vitalism, evolutionary explanation, ethical and cultural influences on genetic research, and gender bias in scientific theorizing and gender research in the biological sciences.

**PHIL 1790. Philosophy of the Social Sciences.**

An examination of philosophical questions raised by the idea of distinctively social sciences such as economics, political science, sociology, history, and psychology. Readings from traditional and contemporary philosophers on such topics as individualism, rationality, interpretation, and value neutrality. Three short papers and weekly (very) short writing assignments.

**PHIL 1800A. Anarchism, Libertarianism, and Authority.**

Examines arguments challenging the idea that state power is ever morally justified, and the idea that there is any obligation to obey the law. Also considers a more moderate class of views that holds that state power is justified only for very narrow purposes such as keeping peace, but not including most of the things that modern states do. A previous course in moral or political philosophy is recommended.

**PHIL 1810B. Expressivism.**

Expressivism is a theory (or family of theories) of the language of ethics (and perhaps other things), according to which we best understand the meanings of ethical statements not by grasping their truth conditions, but by understanding what a person does (and what state of mind a person expresses) by making them and otherwise using them.

**PHIL 1810C. Recent Work in Philosophy of Language.**

Consideration of recent work in philosophy of language. Topics may include: meaning and truth; proper names and reference; demonstratives and context-sensitivity; semantics and pragmatics; metaphor and figurative expression. Prerequisites: One course in logic, and at least one other course in philosophy.

**PHIL 1820. Philosophy and Psychoanalysis.**

The course proposes a philosophical examination of a variety of psychoanalytical theories beginning with classical Freudian theory and including ego psychology, various relational theories (object relations, intersubjectivity, and attachment theories), and self psychology. The course might also consider some of the philosophical sources of psychoanalytic theory, its interaction with recent developmental research, and its applications in literary and cultural studies.

**PHIL 1830. Twentieth-Century Analytic Philosophy.**

This course provides an introduction to major philosophers and movements within the analytic tradition. Our focus will be on the groundbreaking work done in the first few decades of the 20th century. We will read selected works of Gottlob Frege, G. E. Moore, Bertrand Russell, Ludwig Wittgenstein, and A.J. Ayer. We will discuss central issues in the philosophy of language, metaphysics, epistemology, and metaethics. One recurring theme will be the nature and correct methodology of philosophy itself.

**PHIL 1840. Twentieth-Century Continental Philosophy.**

The course will focus on the main figures of the German tradition-- Husserl, Heidegger, Cassirer, Gadamer, Adorno, Habermas, and Tugendhat, with emphasis on their efforts to rethink such key concepts as consciousness, history, reason, and the self. Some attention will be paid to points of intersection with German-language philosophers standardly considered "non-Continental"--Frege, Wittgenstein, and the Vienna Circle.

**PHIL 1850. Philosophical Logic.**

An examination of various philosophical issues arising in the foundations of logic, such as the following: existence, definite description, reference and truth, semantic paradoxes, implication and presupposition, modalities and "possible worlds," logical truth, the nature of logical knowledge, and logic in natural language.

**PHIL 1870. Theories of Truth.**

Philosophers have been worrying about truth for just about as long as there've been philosophers. They've worried about what truth is; about what kinds of things are true; about what it is for one of these things to be true; about how its being true is related to our knowing or thinking that it is true; and so on. We'll discuss these issues and also the so-called Liar Paradox, which threatens to show that there's an inconsistency lurking in the very notion of truth.

**PHIL 1880. Advanced Deductive Logic.**

This course provides an introduction to the metatheory of first-order logic. We will prove the completeness of first-order logic. We then move on to the major "limitative" results, including the undecidability of first-order logic, the Gödel incompleteness theorems, and the undefinability in arithmetic of arithmetical truth. Prerequisite: PHIL 0540 or instructor's permission.

**PHIL 1885. Incompleteness.**

Gödel's two incompleteness theorems are among the most important results in the history of logic. We will study these results, and explore related topics, by working through some of the classic papers on the subject. Authors to be read include Gödel, Tarski, Feferman, and Visser. Prerequisites: PHIL 0540 or PHIL 1630, or special permission from instructor.

**PHIL 1890A. Contextualism and Naturalism in Twentieth-Century Epistemology.**

Topics include the epistemological ideas of the later Wittgenstein; the "epistemological naturalism" that P. F. Strawson finds in Wittgenstein (and in Hume), and adopts as his own philosophy, early and late; naturalized epistemology, as defined by W. V. Quine; and varieties of contextualism in the epistemology of recent decades, including selections from the work of Robert Nozick, Fred Dretske, Peter Unger, and, most recently, David Lewis.

**PHIL 1890B. Wittgenstein.**

This course will focus on the Philosophical Investigations and its treatment of various questions in the philosophy of language and the philosophy of mind. Some attention will also be given to his Remarks on the Foundations of Mathematics. Prerequisite: Two courses in philosophy.

**PHIL 1890C. Philosophy and Science of Perception.**

This course is structured around close examination of Wilfrid Sellars's classic essay "Empiricism and the Philosophy of Mind". Additional readings set the work in its historical context (reductionist views of mind, foundationalist epistemology, and scientific instrumentalism), and include Ayer, Carnap, Chisholm, Hempel, Price, Schlick, Skinner, and Ryle.

**PHIL 1910A. Currents in American Pragmatism: Peirce to Putnam.**

Pragmatism is a uniquely American contribution to philosophy. This course analyzes the development of pragmatism by investigating the work of Peirce, James, Quine, Richard Rorty, and Putnam. Special emphasis is placed on the role played by recent pragmatism in the realism/antirealism debate.

**PHIL 1910B. Intentionality in Brentano, Meinong, Husserl.**

Intentionality--that feature of our mental states in virtue of which they are of or about something--was a central theme for a number of philosophers working in Vienna at the turn of the century, including most prominently Franz Brentano, Alexius Meinong, and Edmund Husserl. Their work influenced both phenomenological and analytic traditions, including Freud, Heidegger, Moore, Russell, and Ryle.

**PHIL 1910C. German Idealism.**

A study of the major figures and unifying themes of classical German Philosophy, focusing on Kant, Fichte, Schelling, and Hegel. Also includes discussion of such figures as Jacobi, Reinhold, Maimon, Hölderlin, and Novalis.

**PHIL 1910E. Hegel's Metaphysics.**

Hegel is famous (or rather infamous) for entertaining and endorsing startling and obscure claims like "Contradiction is the rule of truth," "The Truth is the whole," and "What is rational is real, and what is real is rational." Before one is in the position to evaluate, to criticize (and to dismiss) these claims one has to become familiar with their philosophical background. The aim of the seminar is to find out what is meant with claims like these and why Hegel thought of them as reasonable.

**PHIL 1990. Independent Studies.**

An elective for students with at least six previous courses in philosophy. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHIL 1995. Senior Thesis.**

An elective for students writing a thesis. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHIL 2020M. Speech, Thought, and Agency: Understanding Ourselves and Others.**

We begin with Donald Davidson's work on radical interpretation as a theory about how we gain entry into other minds—that is, other agent's meanings and thoughts. We will then consider the theory theory vs. simulation theory controversy regarding mind-reading. There is also a more basic question: How do we manage to attribute thoughts and meanings to ourselves? That is, how is self-interpretation possible? Next, we will take up action explanation—how we understand actions, our own and those of others. We will explore cases in which such understanding fails—cases of alienation, defective agency, and failure of empathetic understanding. Enrollment limited to 40 graduate students in Philosophy.

**PHIL 2020Q. Perception.**

A survey of contemporary philosophical views about the nature of perception, with occasional lingering looks at relevant parts of the scientific literature. Topics will include appearance and reality, colors, the nature of perceptual representation, perceptual consciousness, the relationship between perception and cognition, the controversy about whether perceptual content is thick or thin, and the relationship between perceptual experience and epistemic rationality.

**PHIL 2030A. Moral Psychology.**

This seminar will examine in depth some problems associated with morality, rationality, and the human psyche. Possible topics: acting for reasons, moral responsibility, practical reasoning, moral character, love, modesty, being too good, moral luck, desire, weakness of will. Undergraduates require instructor permission to enroll.

**PHIL 2040G. The Ethics of Belief.**

Will focus on the nature of belief, on the sense in which belief is subject to norms, and on what this fact can tell us about the ethics of action. There will be some attention to classical texts—Locke, Hume, Clifford, and James—but the focus will be on contemporary writings. Undergraduates require instructor permission to enroll.

**PHIL 2040H. Rawls.**

A close study of *A Theory of Justice* and *Political Liberalism*, with attention to some of Rawls' most famous critics: Dworkin, Habermas, Cohen, Sen. Open to graduate students only; others may enroll with instructor permission.

**PHIL 2050E. Level-Connections in Epistemology.**

Long ago, Alston warned against "level-confusions" in epistemology. Being justified in believing that P, he argued, cannot require being justified in believing that one is justified in believing P. One might accept this, while still thinking that there are some important inter-level connections. For example, one might hold that the justification of one's belief that P could be undermined by a justified belief that one was not justified in believing P. These sorts of connections have played a part in recent discussions of the epistemology of disagreement, bootstrapping, and higher-order evidence. We'll look at a number of papers which deal, in different ways, with the rational relationships between ordinary beliefs, and beliefs about those beliefs. Open to graduate students only; others may enroll with instructor permission.

**PHIL 2050F. Recent Work in Epistemology.**

Philosophical Perspectives 2010 presents a nice cross-section of current work by both younger and more established epistemologists of varied interests and orientations. We'll read a number of papers from this volume, perhaps supplemented by other readings for context. Enrollment limited to 40 graduate students concentrating in Philosophy.

**PHIL 2060A. Concepts.**

Topics will include: The individuation of concepts, the relationship between concepts and language, the relationship between concepts and perception, the semantic, representational, and informational properties of concepts, the nature of propositions, "conceptual truth" and the a priori, intuitions and experimental philosophy, and conceptual combination. Most of the readings will be from such philosophers as Peacocke, Prince, Brandom, Gibbard, and Machery, but we will also look the work of several psychologists, including Larry Barsalou and Susan Carey.

**PHIL 2060B. Perception.**

This seminar will be mainly concerned with the metaphysics of perception. One topic will be recent work on the content of perceptual experience, including especially work on the question of whether there is perceptual awareness of natural kinds, and the question of whether there is perceptual awareness of Gibsonian affordances. We will also consider questions about the degree to which perception is influenced by higher cognition. Another topic will be the question of whether the fundamental objects of perceptual awareness are viewpoint-dependent or "perspectival" properties. And a fourth will be the comparative merits of representational and acquaintance-based theories.

**PHIL 2060E. Consciousness.**

No description available.

**PHIL 2060F. Epistemology and Metaphysics of Perception.**

After a review of such traditional epistemological topics as Cartesian and Pyrrhonian skepticism about perceptual knowledge, the argument from hallucination, and the argument from perceptual relativity, we will consider the account of the relationship between perception and knowledge that is provided in Anil Gupta's recent book, *Empiricism and Experience*. We will then turn our attention to topics in the metaphysics of perception, including colors and color experience, the representational content of perceptual experience, perceptual quality spaces, and perceptual consciousness.

**PHIL 2060I. Introspection.**

This course will examine the nature of our introspective access to our sensory experiences and to our non-experiential mental states (e.g., propositional attitudes.) Topics covered will include: the Cartesian idea that we have "special access" to (or "direct acquaintance with") our mental states; empirical and philosophical arguments questioning the reliability of introspection; the transparency model of introspection, in the case of experience (Tye, Dretske, Byrne) and in the case of propositional attitudes (Evans, Byrne); Peter Carruther's interpretive sensory access theory of our knowledge of our non-experiential mental states; and recent empirical work that involves combining introspective testimony with fMRI readings.

**PHIL 2070J. Measuring Value.**

Some things are better than others. Maybe we can also ask, how much better? We will sort out what has to be true for this question to have a real answer, and then think about whether those things are true. Topics include: the aggregation of expected value, value and time, equality and the separateness of person. The main texts will be John Broome's *Weighing Goods and Weighing Lives*. Some experience with formal decision theory is helpful, though not required.

**PHIL 2070K. New Wave Reasons Realism.**

No description available. Open to graduate students only; others may enroll with instructor permission.

**PHIL 2100H. Ideal Theory and Political Philosophy.****PHIL 2100I. Groups as Agents.**

There are some things that only groups can do, such as sing a G7 chord, or invade a country. We also commonly speak of methods by which groups make decisions. These attributions raise the question whether groups are agents in only a metaphorical sense—with individuals being the only "real" agents—or whether action, intention, choice (and then belief?, responsibility?) genuinely characterize groups as such. Text will be the book by Pettit and List, "Group Agency: The Possibility, Design, and Status of Corporate Agents." Other authors include Bratman, Gilbert, Tuomela, Kutz. Enrollment limited to 40 graduate students concentrating in Philosophy or Political Science. Senior undergraduates may request permission to enroll.

**PHIL 2100P. Political Philosophy.**

Graduate seminar on Political Philosophy

**PHIL 2110H. Color and Perception.**

A study of the science and philosophy of color-perception. We will study the varieties of color as phenomena in the world, the processes thanks to which we become aware of them, and what as philosophers we should say about the nature of colors. We will also study some of the "color measurement" systems developed for scientific and technical purposes. Readings will include a selection from: Maxwell and Helmholtz, Hurvich and Jameson; philosophical readings from C. L. Hardin and the useful anthology edited by Byrne and Hilbert. Open to graduate students only; others may enroll with instructor permission.

**PHIL 2120J. Philosophy of Language.**

Our goal in the course is to read two recent papers proposing a somewhat new idea about how to deal with so-called "Frege cases." These are my paper "Solving Frege's Puzzle," and an as yet unpublished paper by Jim Pryor, "Mental Graphs." We'll read these toward the end. Most of our time will be spent developing the background that is necessary to see why such a radical approach might seem like a good idea. As it happens, our focus will be more on philosophy of mind than on philosophy of language, but this kind of issue tends to straddle that border.

**PHIL 2140B. Recent Works in Epistemology.**

In this seminar, we will discuss contemporary work in epistemology.

**PHIL 2140E. The A Priori.**

This seminar concerns the nature of a priori knowledge and justification. The course will focus on the following issues: (1) Is there a coherent conception of the a priori? (2) What must an account of the a priori explain? (3) Are a priori justified beliefs possible? If so, how? (4) Are contemporary accounts of the a priori – e.g., those based on rational insight or concept-possession – tenable? Enrollment limited to 40 graduate students concentrating in Philosophy.

**PHIL 2150G. Aristotle's Metaphysics.**

Aristotle's *Metaphysics*, books VII, VIII, and IX, investigate the question, what is substance? Do these books revise Aristotle's view in the *Categories* that individual living things are primary substances? We will work through the central books of the *Metaphysics* systematically, discussing the nature of Aristotle's project, his essentialism, his views about matter and form, potentiality and actuality, particulars and universals, and attempt to understand his conclusions about substance. Enrollment limited to 40.

**PHIL 2150I. Plato's Theaetetus.**

In this seminar, we will discuss Plato's *Theaetetus*, his investigation of knowledge, and associated topics, including relativism, perception, true and false judgment, and accounts, with a view to understanding how Plato distinguishes knowledge from true belief. Open to graduate students only; others may enroll with instructor permission.

**PHIL 2160I. Philosophical Issues About Human Longevity.**

No description available. Undergraduates require instructor permission to enroll.

**PHIL 2160K. To Be Determined.**

This seminar focuses on fiction as a vehicle for philosophical discussion of conceptual and moral issues involving disability, illness, and death. These issues include the definitions of 'death,' 'illness,' and 'disability,' euthanasia and assisted suicide, hospices vs. life-extending care for the dying, decision-making for the incompetent, and the disability-rights movement's challenge to traditional approaches to disability. In addition to novels, short stories, and disability-rights material, we will read work by philosophers and bioethicists to provide philosophical grounding. In order to include students with varied backgrounds, this seminar is open to undergraduates and has no prerequisites, despite the high course number.

**PHIL 2160S. Fiction and Ethical Issues in Education.**

This seminar uses novels and short stories as well as conventional philosophical and sociological pieces as vehicles for exploring ethical issues in education. Topics will include admission to selective schools, grading, student discipline, teacher evaluation, student-teacher relationships, curriculum content, and the relation of education to society as a whole. In order to include students with a wide range of interests and backgrounds, this seminar has no prerequisites.

**PHIL 2170G. Alienation.**

The seminar will explore certain aspects of alienation, understood as the peculiar consciousness of "not being myself" (also called "self-alienation"). The seminar will first examine fundamental questions, propedeutic to an exploration of alienation (What is consciousness of self? Does it come in different forms? Is it dependent on, or affected by, the consciousness of others?), and then turn to more specific cases of alienation (e.g., the view of shame as an *heteronomous* emotion, an assessment of oneself by the standards of others). Readings will include works by Frankfurt, Velleman, Strawson, Sartre, Calhoun, as well as recent research in social psychology. Open to graduate students only; others may enroll with instructor permission.

**PHIL 2170H. Nietzsche on Morality and Psychology.**

The seminar proposes a close systematic examination of *On the Genealogy of Morality* and relevant portions of other works. The purpose of the seminar is to attempt to understand in what sense, if any, there can be a "psychological" critique of morality. Besides primary sources from Nietzsche's works, we will also consider relevant works from contemporary moral psychology and recent scholarly literature. Enrollment limited to 20 graduate students and seniors.

**PHIL 2170K. The Concept of a Meaningful Life.**

The seminar will explore some fairly recent work on attempting to canvas the concept of a meaningful life. Specific topics will include, besides some classic analyses of the concept, the relevance of mortality to meaningfulness, the role of love in a meaningful life, and the relation between meaningfulness and a number of other goods, such as happiness, well-being, and morality. We will read works from philosophers including Thomas Nagel, Robert Nozick, Harry Frankfurt, Susan Wolf, Jay Wallace, and Kieran Setiya, among others.

**PHIL 2180A. Kant's Philosophy of Arithmetic, Before and After Frege.****PHIL 2190E. Medieval Metaphysics.**

A seminar on medieval metaphysical theories, both in the Arabic and Latin traditions, covering topics such as matter, substance, extension and unity.

**PHIL 2190F. Kant and the Development of German Idealism.**

The purpose of the course is to give a survey of the development of German idealistic thought from Kant to the early Schelling. It will deal mainly with the metaphysical and the epistemological aspects of this movement and focus primarily on those aspects that are related to Kant's theoretical philosophy. Topics that are dealt with include: (1) Kant's criticism of metaphysics and his epistemological program; (2) reactions to Kant's approach by F. H. Jacobi, K. L. Reinhold and G. E. Schulze; (3) Fichte's 'subjective' idealism; and (4) Schelling's search for 'lacking premises'.

**PHIL 2190G. Recent Work on Moral Obligation.**

What, if anything, is added when one claims a morally recommended course of action is an obligation? May I have an obligation simply to perform or refrain from certain actions, or are all obligations directional, in the sense of being owed to a particular other who holds a correlative right? Do I have certain obligations to everyone? To strangers, for example? What about my enemies or moral adversaries? And what of so-called special obligations? Are there some things that I morally owe to my family, friends, compatriots, and/or professional colleagues that I do not owe to just anyone?

**PHIL 2190H. Theories of Self-Consciousness in Classical German Philosophy (Kant, Fichte, Hegel).**

Theories of consciousness and self-consciousness play an important role in the philosophical systems of the main representatives of classical German philosophy. In particular Kant, Fichte and Hegel share the conviction that without a convincing understanding of consciousness and self-consciousness a coherent conception of both mental and physical reality is unattainable. The aim of the course is to look more closely into their approaches to this topic and to discuss critically the metaphysical, epistemological and psychological claims these philosophers connect with their respective views concerning consciousness and self-consciousness.

**PHIL 2190I. Aristotle's Analytics.**

Aristotle's Analytics formed deep and informed reflection on scientific knowledge for much of the history of Western philosophy. The Prior Analytics present the first formal theory of deduction, known as the syllogistic. The Posterior Analytics include heterogeneous material within the framework of a theory of demonstration, i.e. of knowledge-bearing deduction. The question of how Aristotle's logic (Prior Analytics) and epistemology of science (Posterior Analytics) intersect remains contested, as is the relationship between logic and epistemology generally in philosophy since Kant. In this course we shall focus on this fraught point, beginning with a general introduction to the syllogistic.

**PHIL 2190J. Kant and the Development of German Idealism.**

The purpose of the course is to give a survey of the development of German idealistic thought from Kant to the early Schelling. It will deal mainly with the metaphysical and the epistemological aspects of this movement and focus primarily on those aspects that are related to Kant's theoretical philosophy. Topics that are dealt with include: (1) Kant's criticism of metaphysics and his epistemological program, (2) reactions to Kant's approach by F. H. Jacobi, K. L. Reinhold and G. E. Schulze. (3) Fichte's 'subjective' idealism, (4) Schelling's search for 'lacking premises'.

**PHIL 2200. Graduate Proseminar.**

Will cover classics of philosophy from the end of the 19th century to the end of the 20th; including ethics as well as metaphysics, epistemology and philosophy of language.

**PHIL 2450. Exchange Scholar Program.****PHIL 2700. Third Year Workshop.**

Students will receive training and practice in writing papers for publication in philosophy journals. Each student will complete a paper that has significantly greater scope and depth than a normal seminar paper. The paper will normally have some relevance to an envisioned dissertation, but there will be more emphasis on the quality of work than on relevance to future projects.

**PHIL 2800. Dissertation Workshop.**

No description available. Course for graduate students during their 4th year or above.

**PHIL 2900. Thesis Preparation.****PHIL 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**PHIL 2980. Research in Philosophy.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHIL 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**PHIL XLIST. Courses of Interest to Philosophy Concentrators.**

## Physics

### Chair

Gang Xiao

The department aims to develop in its students a comprehensive grasp of the principles of physics, together with a productive capacity in research.

The courses of study are flexible in subject matter and are conducted by means of lectures, seminars, laboratories, and colloquia. Undergraduate as well as graduate students have opportunities to carry out research in fields of current interest.

The principal research fields of the department are condensed matter physics, elementary particle physics, low-temperature physics, nonlinear optics, physical acoustics, astrophysics, biological physics, and cosmology. Interdisciplinary study and research, coordinated with other departments, is encouraged for students interested in brain and neural science, semiconductor physics, geophysics, physics of solid continua, polymer physics, and computational physics, as well as other fields.

For additional information, please visit the department's website: <http://www.brown.edu/academics/physics/>

## Physics Concentration Requirements

Physics is the scientific study of the fundamental principles governing the behavior of matter and the interaction of matter and energy. Mathematics is used to describe fundamental physical principles, the behavior of matter, and the interactions of matter and energy. As the most fundamental of sciences, physics provides a foundation for other scientific fields as well as the underpinnings of modern technology. The Physics department is unique because of the breadth of its faculty expertise and research, and the relatively intimate size of its classes above the introductory level. Physics concentrators may choose to pursue either the A.B. or the more intensive Sc.B. degree. Course work on either path covers a broad base of topics (for example, electricity and magnetism, classical and quantum mechanics, thermodynamics, and statistical mechanics). The Sc.B. degree requires additional advanced topics as well as a senior thesis project.

### Standard concentration for the A.B. degree

Select one of the following Series:	2	
PHYS 0070 & PHYS 0160	Analytical Mechanics and Introduction to Relativity, Waves and Quantum Physics	
PHYS 0030 & PHYS 0040	Basic Physics A and Basic Physics B	
PHYS 0050 & PHYS 0060	Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics	
PHYS 0470	Electricity and Magnetism	1
PHYS 0500	Advanced Classical Mechanics	1
PHYS 0560	Experiments in Modern Physics	1
PHYS 1410	Quantum Mechanics A	1
PHYS 1530	Thermodynamics and Statistical Mechanics	1
One additional 1000-level course or a mathematics course beyond the introductory level.		1
Total Credits		8

### Standard program for the Sc.B. degree

<b>Prerequisites:</b>		
Select one of the following series:	2	
PHYS 0070 & PHYS 0160	Analytical Mechanics and Introduction to Relativity, Waves and Quantum Physics	
PHYS 0050 & PHYS 0060	Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics	
Select one of the following:	1	
MATH 0190	Advanced Placement Calculus (Physics/ Engineering)	
Or MATH 0090, MATH 0100		
<b>Program:</b>		
PHYS 0470	Electricity and Magnetism	1
PHYS 0500	Advanced Classical Mechanics	1

PHYS 0560	Experiments in Modern Physics	1
PHYS 1410	Quantum Mechanics A	1
PHYS 1420	Quantum Mechanics B	1
PHYS 1510	Advanced Electromagnetic Theory	1
PHYS 1530	Thermodynamics and Statistical Mechanics	1
PHYS 1560	Modern Physics Laboratory	1
One additional 1000 or 2000 level Physics course or upper level course in related fields of science chosen by the student with agreement of his or her advisor.		1
Four Mathematics courses beyond MATH 0190 or 0090, 0100 including choices from Applied Mathematics <sup>1</sup>		4
PHYS 1990	Senior Conference Course <sup>2</sup>	1
<b>Total Credits</b>		<b>17</b>

<sup>1</sup> In addition, courses in computer programming are recommended.

<sup>2</sup> A senior thesis is required. This is to be prepared in connection with PHYS 1990 under the direction of a faculty supervisor. The topic may be in a related department or of interdisciplinary nature. In any event, a dissertation must be submitted.

## Honors

Candidates for honors in physics will be expected to pursue a more rigorous and extensive program than those merely concentrating in the subject. In addition they will be required to begin an honors thesis during the seventh semester and to complete it (as part of PHYS 1990) during the eighth semester. Honors candidates are also expected to take a special oral examination on the thesis at the end of the eighth semester. Further details about the program may be obtained from the chair of the department or the departmental honors advisor.

## Astrophysics Track for the Sc.B. degree

### Prerequisites:

Select one of the following Series: 2

PHYS 0070 & PHYS 0160	Analytical Mechanics and Introduction to Relativity, Waves and Quantum Physics	
PHYS 0050 & PHYS 0060	Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics	
PHYS 0270	Astronomy and Astrophysics	1
Select one of the following Series:		2
MATH 0170 & MATH 0180	Advanced Placement Calculus and Intermediate Calculus	
MATH 0190 & MATH 0200	Advanced Placement Calculus (Physics/Engineering) and Intermediate Calculus (Physics/Engineering)	
MATH 0350	Honors Calculus (or equivalent)	
PHYS 0470	Electricity and Magnetism	1

### Program:

MATH 0520	Linear Algebra	1
or MATH 0540	Honors Linear Algebra	
or PHYS 0720	Methods of Mathematical Physics	
Select one of the following Math courses:		1
APMA 0330	Methods of Applied Mathematics I, II	
APMA 0340	Methods of Applied Mathematics I, II	
APMA 0350	Applied Ordinary Differential Equations	
APMA 0360	Applied Partial Differential Equations I	
MATH 1110	Ordinary Differential Equations	
MATH 1120	Partial Differential Equations	
PHYS 0500	Advanced Classical Mechanics	1
PHYS 0560	Experiments in Modern Physics	1
PHYS 1410	Quantum Mechanics A	1

PHYS 1530	Thermodynamics and Statistical Mechanics	1
Three of the following:		3
PHYS 1100	Introduction to General Relativity	
PHYS 1250	Stellar Structure and the Interstellar Medium	
PHYS 1270	Extragalactic Astronomy and High-Energy Astrophysics	
PHYS 1280	Introduction to Cosmology	
Two additional 1000- or 2000-level courses in physics or a related field which are not listed as requirements.		2
PHYS 1990	Senior Conference Course <sup>1</sup>	1
<b>Total Credits</b>		<b>18</b>

<sup>1</sup> A senior thesis is required. This is to be prepared in connection with under the direction of a faculty supervisor. The topic may be in a related department or of interdisciplinary nature. In any event, a dissertation must be submitted.

## Biological Physics Track for the Sc.B. degree

### Foundations of Physics

PHYS 0070	Analytical Mechanics	1
or PHYS 0050	Foundations of Mechanics	
or ENGN 0040	Dynamics and Vibrations	
PHYS 0160	Introduction to Relativity, Waves and Quantum Physics	1
or PHYS 0060	Foundations of Electromagnetism and Modern Physics	
PHYS 0470	Electricity and Magnetism	1
PHYS 0500	Advanced Classical Mechanics	1
PHYS 1410	Quantum Mechanics A	1
PHYS 1530	Thermodynamics and Statistical Mechanics	1

Select one of the following Series: <sup>1</sup> 1-2

#### Series A

PHYS 0720 Methods of Mathematical Physics

#### Series B

Select one of the following:

APMA 0330 Methods of Applied Mathematics I, II  
APMA 0350 Applied Ordinary Differential Equations  
MATH 1110 Ordinary Differential Equations

And select one of the following:

MATH 0180 Intermediate Calculus  
MATH 0200 Intermediate Calculus (Physics/Engineering)  
MATH 0350 Honors Calculus  
MATH 0520 Linear Algebra  
MATH 0540 Honors Linear Algebra

### Basic Biology and Chemistry

BIOL 0200	The Foundation of Living Systems (or placement out of BIOL 0200)	1
BIOL 0500	Cell and Molecular Biology	1
CHEM 0330	Equilibrium, Rate, and Structure	1

### Advanced Biophysical Topics and Techniques

PHYS 1610	Biological Physics	1
PHYS 1990	Senior Conference Course	1

**Elective Courses (four chosen from the following list, with at least two 1000-level courses, or additional courses approved by the concentration advisor):** 4

APMA 0360 Applied Partial Differential Equations I  
APMA 0410 Mathematical Methods in the Brain Sciences

APMA 0650	Essential Statistics	
APMA 1070	Quantitative Models of Biological Systems	
APMA 1080	Inference in Genomics and Molecular Biology	
BIOL 0280	Biochemistry	
BIOL 0470	Genetics	
BIOL 1050	Biology of the Eukaryotic Cell	
BIOL 1200	Protein Biophysics and Structure	
BIOL 1270	Advanced Biochemistry	
BIOL 1870	Techniques and Clinical Applications in Pathobiology	
CHEM 0350	Organic Chemistry	
CHEM 0360	Organic Chemistry	
MATH 0090	Introductory Calculus, Part I	
MATH 0170	Advanced Placement Calculus	
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	
MATH 1610	Probability	
MATH 1620	Mathematical Statistics	
PHYS 0560	Experiments in Modern Physics	
PHYS 1510	Advanced Electromagnetic Theory	
PHYS 1560	Modern Physics Laboratory	
PHYS 2620F	Selected Topics in Molecular Biophysics	
PHYS 1990	Senior Conference Course <sup>2</sup>	1
Total Credits		17-18

<sup>1</sup> Select Series A alone or two from Series B as indicated.

<sup>2</sup> A senior thesis is required. This is to be prepared in connection with under the direction of a faculty supervisor. The topic may be in a related department or of interdisciplinary nature. In any event, a dissertation must be submitted.

## Mathematical Physics Track for the A.B. degree

### Prerequisites:

MATH 0090	Introductory Calculus, Part I	1
or MATH 0100	Introductory Calculus, Part II	
or MATH 0190	Advanced Placement Calculus (Physics/Engineering)	
PHYS 0050	Foundations of Mechanics	1
or PHYS 0070	Analytical Mechanics	

### Mathematics Courses<sup>1</sup>

MATH 0180	Intermediate Calculus	1
or MATH 0200	Intermediate Calculus (Physics/Engineering)	
or MATH 0350	Honors Calculus	
MATH 0520	Linear Algebra	1
or MATH 0540	Honors Linear Algebra	
MATH 1110	Ordinary Differential Equations	1
Select at least one of the following:		1
MATH 1060	Differential Geometry	
MATH 1120	Partial Differential Equations	
MATH 1610	Probability	

### Physics Courses<sup>1</sup>

PHYS 0060	Foundations of Electromagnetism and Modern Physics	1
or PHYS 0160	Introduction to Relativity, Waves and Quantum Physics	
PHYS 0470	Electricity and Magnetism	1
PHYS 0500	Advanced Classical Mechanics	1
PHYS 0560	Experiments in Modern Physics	1
Select at least two of the following:		2

PHYS 1410	Quantum Mechanics A	
PHYS 1420	Quantum Mechanics B	
PHYS 1510	Advanced Electromagnetic Theory	
PHYS 1530	Thermodynamics and Statistical Mechanics	
PHYS 1560	Modern Physics Laboratory	
Total Credits		12

<sup>1</sup> Concentrators are required to take at least one course in mathematics and one in physics in each of their last two semesters.

## Mathematical Physics Track for the Sc.B. degree

### Prerequisites:

Select one of the following series:		2
PHYS 0070 & PHYS 0160	Analytical Mechanics and Introduction to Relativity, Waves and Quantum Physics	
PHYS 0050 & PHYS 0060	Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics	
Select one of the following:		1-2
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	
MATH 0090 & MATH 0100	Introductory Calculus, Part I and Introductory Calculus, Part II	

### Required courses:

PHYS 0470	Electricity and Magnetism	1
PHYS 0500	Advanced Classical Mechanics	1
PHYS 0560	Experiments in Modern Physics	1
PHYS 1410	Quantum Mechanics A	1
PHYS 1530	Thermodynamics and Statistical Mechanics	1
MATH 0180 & MATH 0200	Intermediate Calculus and Intermediate Calculus (Physics/Engineering)	1-2
or MATH 0350	Honors Calculus	
MATH 0520	Linear Algebra	1
or MATH 0540	Honors Linear Algebra	
or PHYS 0720	Methods of Mathematical Physics	
MATH 1260	Complex Analysis	1
Four additional 1000 or 2000 level Physics courses		4
Two additional 1000 or 2000 level Math courses		2
PHYS 1990	Senior Conference Course <sup>1</sup>	1
Total Credits		18-20

<sup>1</sup> A senior thesis is required. This is to be prepared in connection with under the direction of a faculty supervisor.

## Physics and Philosophy Concentration Requirements

The Physics and Philosophy concentration is for students with a deep interest in physics who do not need to acquire the laboratory and computational skills of a professional physicist. The concentration allows students to grapple with computational problems and deepen their investigation of conceptual and epistemological issues. By the end of the program, concentrators possess an excellent conceptual understanding of the most philosophically interesting physics, relativity and quantum mechanics.

This concentration should prepare a student either for graduate study, especially in a history and philosophy of science (HPS) program, or for employment in science education or journalism. Other professions such as law and medicine will look favorably on such concentrators for

having versatile interests and being able to master difficult material. The concentration may serve as an excellent preparation for a law school since physics and philosophy both exercise a rigorous approach to problems of immediate relevance to life but at the same time assume two complimentary and sometimes competing viewpoints.

## Advising

Concentration advisors from the Departments of Physics and Philosophy will guide students working towards the A.B. degree.

## Curriculum

The curriculum builds around the fields of physics that have had the biggest impact on philosophy, especially Quantum Physics, and the fields of philosophy most relevant for physics, such as Epistemology, Metaphysics and Philosophy of Physics. It is strongly recommended that students complete at least one relevant history course.

There are 11 required courses (5 in Physics, 5 in Philosophy or History, one course in mathematics) and a final project. The choice of the courses is dictated by the following considerations. The field of physics with both deepest philosophical implications and deepest influence on the rest of physics is Quantum Mechanics. Thus, a 1000-level course in Quantum Mechanics or a closely related field such as Statistical Mechanics is indispensable. The second field of physics most relevant for the concentration is Relativity. This field touches upon and serves as a foundation for a broad list of subjects with major philosophical implications of their own, for example: PHYS 1170, PHYS 1280, PHYS 1510, PHYS 1100. This requires another 1000-level physics course in the concentration. 1000-level Physics courses cannot be taken without certain preliminary work, most importantly, PHYS 0470, which serves as a prerequisite for most higher-level physics courses and which relies in turn on PHYS 0160 or PHYS 0060. Another lower-level physics course is necessary for a student to develop familiarity with the tools which have been employed in producing the physics knowledge.

A natural introduction into philosophy of physics comes from a course in Early Modern Philosophy. To a large extent, Early Modern Philosophy was shaped by scholars who combined interest in philosophy and physics (e.g., Rene Descartes, Blaise Pascal, Gottfried Wilhelm Leibniz). The influence of the XVII century physics revolution on other central figures such as Kant is unquestionable. Early Modern Philosophy sets an intellectual stage for many subsequent developments in the Philosophy of Physics and directly addresses some of the most perplexing issues like the connection (or lack thereof) between physics and religion. The core of the Philosophy requirement involves two courses in Epistemology, Metaphysics and Philosophy of Science. One course in this field would not be sufficient due to its very broad nature. Students are strongly advised to take a relevant History course. This requirement can be substituted by an additional philosophy course to reflect interests of those students who want a deeper background in Epistemology, Metaphysics and Philosophy of Science or have other related interests such as Ancient Natural Philosophy.

In addition to the above philosophy courses, PHIL 0210 (Science, Perception, and Reality) serves as a gateway into the concentration. It may be substituted by other relevant courses such as PHYS 0100 (Flat Earth to Quantum Uncertainty: On the Nature and Meaning of Scientific Explanation).

A course in calculus is a prerequisite for most physics and some philosophy classes.

**Required courses for the A.B. degree are listed below:**

### Physics Courses

Select one of the following introductory courses in Modern Physics:	1
PHYS 0060	Foundations of Electromagnetism and Modern Physics
PHYS 0160	Introduction to Relativity, Waves and Quantum Physics
One course in Special Relativity and Classical Field Theory:	1
PHYS 0470	Electricity and Magnetism

Select one of the following in Methods of Experimental and Theoretical physics:

PHYS 0500	Advanced Classical Mechanics	
PHYS 0560	Experiments in Modern Physics	
Select one of the following in Quantum Mechanics and its applications		1
PHYS 1410	Quantum Mechanics A	
PHYS 1530	Thermodynamics and Statistical Mechanics	

One more 1000-level Physics course 1

### Philosophy Courses

Select one of the following gateway courses: 1

PHIL 0210	Science, Perception and Reality	
PHIL 0100	Critical Reasoning	
PHIL 0060	Modern Science and Human Values	
PHIL 0540	Logic	

Select one of the following courses in Early Modern Philosophy: 1

PHIL 0360	Early Modern Philosophy	
PHIL 1700	Locke, Berkeley, Hume and Others	
PHIL 1710	17th Century Continental Rationalism	
PHIL 1720	Kant: The Critique of Pure Reason	

Select two of the following courses in Epistemology, Metaphysics and Philosophy of Science: 2

PHIL 1590	Philosophy of Science	
PHIL 1620	Philosophy of Quantum Mechanics	
PHIL 1660	Metaphysics	
PHIL 1670	Time	
PHIL 1750	Epistemology	

### History Courses

Select one of the following courses in History of Science: <sup>1</sup> 1

HIST 0522N	Reason, Revolution and Reaction in Europe	
HIST 1825M	Science at the Crossroads	
HIST 1976I	Imperialism and Environmental Change	

### Calculus

Select one of the following: 1

MATH 0180	Intermediate Calculus	
MATH 0200	Intermediate Calculus (Physics/Engineering)	
MATH 0350	Honors Calculus	

### Final Project

Select one of the following: 1

PHIL 1990	Independent Studies	
PHYS 1990	Senior Conference Course	
A course from the PHIL 0990 Senior Seminar series		
Any graduate seminar in Philosophy		

Total Credits 12

<sup>1</sup> Or one more Philosophy course.

## Honors

Seniors wishing to earn honors by presenting a senior honors thesis should consult their concentration advisor during their sixth semester or at the start of the seventh semester concerning procedures and requirements. Students may earn honors by presenting a senior thesis judged to be of honors quality by two readers. In addition to completing the usual nonhonors requirements, the student should also have a grade point average of over 3.4 in physics, philosophy and history of science courses (of which at least five must be taken for a letter grade). Honors theses are usually prepared over a period of two semesters with an advisor from the Department of Physics or the Department of Philosophy.

## Chemical Physics Concentration Requirements

Chemical Physics is an interdisciplinary field at the crossroads of chemistry and physics and is administered jointly by the two departments. The concentration provides students with a broad-based understanding in fundamental molecular sciences, as well as a background for graduate studies in physical chemistry, chemical physics, or molecular engineering. Concentrators are required to take twenty courses in chemistry, physics, and mathematics, although approved courses in applied mathematics, biology, computer science, geological sciences, or engineering may be substitutes. Chemical Physics concentrators are also advised to take at least six courses in the humanities and social sciences. Chemical Physics concentrators at all levels (first-year through seniors) are actively involved in research with faculty members in both departments.

### Standard program for the Sc.B. degree

Twenty-one semester courses<sup>1</sup> in chemistry, physics, and mathematics, with a minimum of four semester courses in mathematics. The expectation is that courses required for a concentration in Chemical Physics will be taken for a letter grade. Core courses are:

CHEM 0330	Equilibrium, Rate, and Structure	1
CHEM 0350	Organic Chemistry	1
CHEM 0500	Inorganic Chemistry	1
CHEM 1140	Physical Chemistry: Quantum Chemistry	1
PHYS 0070	Analytical Mechanics	1
PHYS 0160	Introduction to Relativity, Waves and Quantum Physics	1
PHYS 0470	Electricity and Magnetism	1
Select one of the following laboratory courses:		1
CHEM 1160	Physical Chemistry Laboratory	
PHYS 0560	Experiments in Modern Physics	
PHYS 1560	Modern Physics Laboratory	
Select one course in statistical mechanics:		1
CHEM 1150	Physical Chemistry: Thermodynamics and Statistical Mechanics	
PHYS 1530	Thermodynamics and Statistical Mechanics	
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	1
MATH 0200	Intermediate Calculus (Physics/Engineering)	1
MATH 0520	Linear Algebra	1
Seven courses, primarily at the 1000 or 2000 level, in chemistry or physics.		7
Select two semesters of independent study:		2
CHEM 0970/0980	Undergraduate Research	
PHYS 1990	Senior Conference Course	

Total Credits 21

<sup>1</sup> Other approved courses in applied mathematics, biology, computer science, geological sciences, or engineering may be substituted for some of the twenty-one. Students are advised to take at least six courses in the humanities and social sciences.

### Honors Requirements for Chemical Physics

All ScB Chemical Physics concentrators who completes the following requirements are candidates for Honors; no separate application is necessary.

The requirements for Honors in Chemical Physics are:

\* A strong grade record in concentration courses. This means a grade point average for the concentration that is higher than 3.50.

\* Two semesters of Independent Study (CHEM 0970, CHEM 0980, PHYS 1990 or equivalent). Guidelines and requirements associated with Independent Study are in the Undergraduate Concentration Handbook which can be found at the department website (<http://www.brown.edu/academics/chemistry/undergraduate>).

\* A Thesis in a form approved by the research advisor, and recommended by the research advisor. Additional information about thesis guidelines will be provided by the Concentration Advisor in the first half of the fall semester.

\* A Poster presentation at the chemistry department's spring undergraduate poster session.

## Engineering and Physics Concentration Requirements

The Sc.B. program in Engineering and Physics is sponsored jointly by the School of Engineering and the Department of Physics. The program is designed to ensure that students take a significant portion of the usual curriculum in Engineering and in Physics, obtain substantial laboratory experience, and take several upper-level elective courses, focusing on applied science. Students may take either the standard Physics or Engineering programs during their freshman and sophomore years and then switch to this combined program. The Sc.B. degree program in Engineering and Physics is not accredited by ABET.

The following standard program assumes that a student begins mathematics courses at Brown with MATH 0170 or its equivalent. Students who begin in MATH 0200 can substitute an additional science, engineering or higher-level mathematics course for the MATH 0170 or MATH 0190 requirement. To accommodate the diverse preparation of individual students, variations of the following sequences and their prerequisites are possible with permission of the appropriate concentration advisor and the instructors involved. We recommend that each student's degree program be submitted for prior approval (typically in semester four) and scrutinized for compliance (in semester seven) by one faculty member from the Department of Physics and one faculty member from the School of Engineering.

Select one of the following two course sequences:		2
ENGN 0030 & ENGN 0040	Introduction to Engineering and Dynamics and Vibrations (ENGN 0031 may be substituted for ENGN 0030)	
PHYS 0050 & PHYS 0060	Foundations of Mechanics and Foundations of Electromagnetism and Modern Physics	
PHYS 0070 & PHYS 0160	Analytical Mechanics and Introduction to Relativity, Waves and Quantum Physics	
MATH 0190	Advanced Placement Calculus (Physics/Engineering)	1
or MATH 0170	Advanced Placement Calculus	
MATH 0200	Intermediate Calculus (Physics/Engineering)	1
or MATH 0180	Intermediate Calculus	
or MATH 0350	Honors Calculus	
Select three additional higher-level math, applied math, or mathematical physics (PHYS 0720) courses.		3
CSCI 0040	Introduction to Scientific Computing and Problem Solving	1
or APMA 0160	Introduction to Scientific Computing	
or CSCI 0111	Computing Foundations: Data	
or CSCI 0150	Introduction to Object-Oriented Programming and Computer Science	
or CSCI 0170	Computer Science: An Integrated Introduction	
or CSCI 0190	Accelerated Introduction to Computer Science	
ENGN 0510	Electricity and Magnetism	1
or PHYS 0470	Electricity and Magnetism	
ENGN 1560	Optics	1

or PHYS 1510	Advanced Electromagnetic Theory	
PHYS 0500	Advanced Classical Mechanics	1
or ENGN 1370	Advanced Engineering Mechanics	
PHYS 1410	Quantum Mechanics A	1
PHYS 1420	Quantum Mechanics B	1
PHYS 1530	Thermodynamics and Statistical Mechanics	1
or ENGN 0720	Thermodynamics	
ENGN 1620	Analysis and Design of Electronic Circuits	1
CHEM 0330	Equilibrium, Rate, and Structure	1
or ENGN 0310	Mechanics of Solids and Structures	
or ENGN 0810	Fluid Mechanics	
or PHYS 1600	Computational Physics	
ENGN 0410	Materials Science	1
or ENGN 1690	Photonics Devices and Sensors	
or PHYS 0560	Experiments in Modern Physics	
PHYS 1560	Modern Physics Laboratory	1
or ENGN 1590	Introduction to Semiconductors and Semiconductor Electronics	
	or an approved 2000-level engineering or physics course.	
A thesis under the supervision of a physics or engineering faculty member:		1
PHYS 1990	Senior Conference Course	
or ENGN 1970	Independent Studies in Engineering	
or ENGN 1971	Independent Study in Engineering	
* Students are also encouraged to take courses dealing with the philosophical, ethical, or political aspects of science and technology.		
Total Credits		19

## Astronomy Concentration Requirements

Along with Greek, Latin, and Mathematics, Astronomy counts as one of the oldest continuously taught subjects in the Brown curriculum. It is the study of the properties of stars, galaxies, and the Universe, and as such combines elements from the disciplines of both Physics and Planetary Geology. Students pursuing this concentration complete introductory coursework in classical mechanics, relativity, and astrophysics, along with mathematics and electromagnetism. They go on to complete courses in stellar and extragalactic astrophysics as well as cosmology. Facilities available to concentrators include the historic Ladd Observatory.

### Standard concentration for the A.B. degree

Eleven or twelve courses are required (depending on the satisfaction of prerequisites).

#### Prerequisites

PHYS 0070	Analytical Mechanics	1
PHYS 0160	Introduction to Relativity, Waves and Quantum Physics <sup>1</sup>	1
PHYS 0270	Astronomy and Astrophysics	1
Select one of the following Series:		1-2
MATH 0170 & MATH 0180	Advanced Placement Calculus and Intermediate Calculus	
MATH 0190 & MATH 0200	Advanced Placement Calculus (Physics/Engineering) and Intermediate Calculus (Physics/Engineering)	
MATH 0350	Honors Calculus (or equivalent)	
PHYS 0470	Electricity and Magnetism	1
<b>Program</b>		
Select one of the following mathematics courses:		1
MATH 0520	Linear Algebra	
MATH 0540	Honors Linear Algebra	

PHYS 0720	Methods of Mathematical Physics	
APMA 0330	Methods of Applied Mathematics I, II	
APMA 0340	Methods of Applied Mathematics I, II	
Select two of the following astrophysics courses:		2
PHYS 1100	Introduction to General Relativity	
PHYS 1250	Stellar Structure and the Interstellar Medium	
PHYS 1270	Extragalactic Astronomy and High-Energy Astrophysics	
PHYS 1280	Introduction to Cosmology	
Three additional 1000- or 2000-level courses in physics or a related field, suggestions:		3
APMA 1670	Statistical Analysis of Time Series	
EEPS 0810	Planetary Geology	
EEPS 1710	Remote Sensing of Earth and Planetary Surfaces	
EEPS 1810	Physics of Planetary Evolution	
ENGN 1860	Advanced Fluid Mechanics	
MATH 1060	Differential Geometry	
PHYS 0500	Advanced Classical Mechanics	
PHYS 0560	Experiments in Modern Physics	
PHYS 1410	Quantum Mechanics A	
PHYS 1510	Advanced Electromagnetic Theory	
PHYS 1530	Thermodynamics and Statistical Mechanics	
PHYS 1560	Modern Physics Laboratory	
Total Credits		11-12

<sup>1</sup> PHYS 0050 and PHYS 0060 can be taken in lieu of PHYS 0160

## Physics Graduate Program

The department of Physics offers graduate programs leading to the Master of Science (ScM) degree and the Doctor of Philosophy (PhD) Degree. For more information on admission and program requirements, please visit the following website: <http://www.brown.edu/academics/gradschool/programs/physics>

### Master of Science (ScM)

A total of 8 credits in 2000 level courses form the main requirement for the ScM degree in Physics, typically taken over 4 semesters. Of the eight required courses, four must be selected from the six core courses of the graduate program.

#### Core Courses

PHYS 2010	Techniques in Experimental Physics
PHYS 2030	Classical Theoretical Physics I
PHYS 2040	Classical Theoretical Physics II
PHYS 2050	Quantum Mechanics
PHYS 2060	Quantum Mechanics
PHYS 2140	Statistical Mechanics
Four additional credits at the 2000 level are required. These courses are to be selected from the remaining core courses or the large number of other upper level physics courses. Up to two of these can be taken in research, or taken in another department with prior approval of the program director.	
PHYS 2020	Mathematical Methods of Engineers and Physicists
PHYS 2070	Advanced Quantum Mechanics
PHYS 2170	Introduction to Nuclear and High Energy Physics
PHYS 2280	Astrophysics and Cosmology
PHYS 2300	Quantum Theory of Fields I
PHYS 2320	Quantum Theory of Fields II

PHYS 2340	Group Theory
PHYS 2410	Solid State Physics I
PHYS 2420	Solid State Physics II
PHYS 2430	Quantum Many Body Theory
PHYS 2470	Advanced Statistical Mechanics
PHYS 2600	Computational Physics
PHYS 2980	Research in Physics
or PHYS 2981	Research in Physics

## Courses

### PHYS 0030. Basic Physics A.

Survey of mechanics for concentrators in sciences other than physics-including premedical and life science students. Students with more advanced math training are advised to take PHYS 0050, which covers the same topics in physics. Lectures, conferences, and laboratory. Six hours of attendance.

### PHYS 0040. Basic Physics B.

Survey of electricity, magnetism, optics, and modern physics for concentrators in sciences other than physics-including premedical students or students without prior exposure to physics who require a less rigorous course than PHYS 0050, 0060. Lectures, conferences, and laboratory.

### PHYS 0050. Foundations of Mechanics.

An introduction to Newtonian mechanics that employs elementary calculus. Intended for science concentrators. Potential physics concentrators, who do not have adequate preparation for PHYS 0070, may enroll, but are urged to continue with PHYS 0160 rather than PHYS 0060. Lectures, conferences and laboratory. Six hours of attendance. Recommended: MATH 0090 or MATH 0100.

### PHYS 0060. Foundations of Electromagnetism and Modern Physics.

An introduction to the principles and phenomena of electricity, magnetism, optics, and the concepts of modern physics. Recommended for those who wish to limit their college physics to two semesters but seek a firm grounding in the subject, including but not limited to those with some previous knowledge of physics. Lectures, conferences, and laboratory. Six hours of attendance. Prerequisite: PHYS 0050. Recommended: MATH 0100.

### PHYS 0070. Analytical Mechanics.

A mathematically more rigorous introduction to Newtonian mechanics than PHYS 0050. For first-year students and sophomores who have studied physics previously and have completed a year of calculus. Lectures, conferences, and laboratory. Six hours of attendance. Prerequisites: high school physics and calculus or written permission. S/NC

### PHYS 0100. Flat Earth to Quantum Uncertainty: On the Nature and Meaning of Scientific Explanation.

Physics has had a dramatic impact on our conception of the universe, our ideas concerning the nature of knowledge, and our view of ourselves. Philosophy, sometimes inspired by developments in physics, considers the impact of such developments on our lives. In this seminar, students will explore how classical and modern physical theory have affected our view of the cosmos, of ourselves as human beings, as well as our view of the relation of mathematical or physical structures to 'truth' or 'reality.' Through a study of physics as well as selected philosophical readings, we will consider how we can know anything, from seemingly simple facts to whether a machine is conscious. Enrollment limited to 19 first year students. Instructor permission required.

### PHYS 0110. Excursion to Biophysics.

This new course aims at freshmen with good preparation in high school physics, chemistry and biology, but who have not had a set mind what specific disciplines to focus on in their college study at Brown. The course will introduce important physics concepts and techniques relevant to biology and medicine, such as diffusion and transport of molecules and intracellular components, Brown motion and active swimming of microbes, motion of particles confined by a harmonic potential, Boltzmann distribution, exponential growth or decay, and statistics of single molecule behavior. The goal of the course is to cultivate interest and provide essential basics for more rigorous study of biological physics as a branch of interdisciplinary science. Enrollment limited to 19 first year students. Instructor permission required.

### PHYS 0111. Are There Extra Dimensions Under Your Bed?.

Discusses some of the most exciting questions confronting contemporary physical science in a fashion suitable for both humanists and scientists. What are particles, antiparticles, superstrings, and black holes? How are space and time related? How are mass and gravity related to space and time? Do we live in a three-dimensional world, or are there extra dimensions? The seminar will address such questions with conceptual explanations based upon current research on campus, and highlight the experiments at the energy frontier, being carried out by the world's largest scientific instrument to-date, the Large Hadron Collider, located in Geneva, Switzerland. Enrollment limited to 19 first year students.

### PHYS 0112. Extra-Solar Planets and the Search for Extraterrestrial Life.

The course will cover the significant developments in the detection and characterization of extra-solar planetary systems in the past almost 30 years. We will study the techniques for detecting planets outside of our solar system, the properties of the exoplanets discovered so far, and the prospects for future discoveries, with an emphasis on the search for "Earth-analogues" and the implications for astrobiology.

### PHYS 0113. Squishy Physics.

A freshman seminar to explore everyday applications of physics. It offers practical training on project based learning. The course involves hands-on experimentation, data analysis and presentation. The course is designed for students interested in any field of science with no pre-requisite. The topics covered include motion, forces, flow, elasticity, polymers, gels, electricity, energy, etc. Students will be guided to work on several projects over the semester. They are required to report their projects in both written and oral reports. There is no exam for the course. Students are required to register for one of the labs.

### PHYS 0114. The Science and Technology of Energy.

Energy plays fundamental roles in society. Its use underlies improvements in the living standard; the consequences of its use are having a significant impact on the Earth's climate; its scarcity in certain forms is a source of insecurity and political conflict. This course will introduce the fundamental laws that govern energy and its use. Physical concepts to be covered: mechanical energy, thermodynamics, the Carnot cycle, electricity and magnetism, quantum mechanics, and nuclear physics. Technological applications include wind, hydro, and geothermal energy, engines and fuels, electrical energy transmission and storage, solar energy and photovoltaics, nuclear reactors, and biomass. Enrollment limited 19.

### PHYS 0120. Adventures in Nanoworld.

Richard Feynman famously said, "There's plenty of room at the bottom," about the possibility of building molecular-size machines operating according to Quantum Mechanics. Scientists are now learning the art, and students in this course will use basic physics and simple mathematical models to understand the phenomena and materials in the nanoworld. Non-science concentrators and potential science concentrators alike will learn about important classes of nanosystems such as macromolecules, nanotubes, quantum dots, quantum wires, and films. We will learn how people make nanosystems and characterize them. We will consider existing and potential applications of nanotechnology, including molecular motors, nanoelectronics, spintronics, and quantum information. Enrollment limited to 19 first year students.

**PHYS 0121. Introduction to Environmental Physics: The Quantum Mechanics of Global Warming.**

We will use basic physics and simple mathematical models to investigate climate change, energy and entropy, the dispersal of pollutants, solar power, and other aspects of environmental science. Lectures will be supplemented with demonstrations of key physical principles. Emphasis will be placed on quantitative reasoning.

**PHYS 0150. The Jazz of Modern Physics.**

This course, aimed at both students in the humanities and sciences, will explore the myriad surprising ways that jazz music is connected to modern physics. No background in physics, mathematics or music is required, as all of these foundational concepts and tools will be introduced.

The Jazz of Physics has three interconnected components:

- (1) Using concepts and analogies from music and acoustics to explore the key conceptual ideas in modern physics such as quantum mechanics/information, general relativity, particle physics, dark energy and big bang cosmology.
- (2) Exploring the parallels between jazz and physics through the lens of 20th century physics and jazz history, as well as key innovations in both fields with an eye towards future innovations.
- (3) Students will learn the tools of signification in physics and develop group projects with a final product.

The course will consist of lectures, related homework sets, weekly discussion meetings, and a final study where groups of students will select a topic of interest.

**PHYS 0160. Introduction to Relativity, Waves and Quantum Physics.**

A mathematically rigorous introduction to special relativity and quantum mechanics. The second course in the three-semester sequence (PHYS 0470 being the third) for those seeking the strongest foundation in physics. Also suitable for students better served by an introduction to modern physics rather than electromagnetism. Lectures, conferences, and laboratory. Six hours of attendance. Prerequisite: PHYS 0070 or 0050. Recommended: MATH 0180 or 0200. S/NC

**PHYS 0180. Physics for Non-Physicists: An Introduction to Classical and Modern Physics.**

This course is an introduction to many major concepts in physics. It is intended for a general audience, and calculus is not required. Along the way, we will address the question "what goes into making a scientific theory?" using the works of Euclid, Galileo, Newton and others as examples. Concepts range historically from planetary motion (addressed at least as early as Ancient Greece) to modern physics topics that are still under debate today. These concepts include (but are not limited to) motion, forces, energy, electricity and magnetism, special relativity and quantum mechanics.

**PHYS 0220. Astronomy.**

An introduction to basic ideas and observations in astronomy, starting with the observed sky, coordinates and astronomical calendars and cycles, the historical development of our understanding of astronomical objects. Particular emphasis is placed on the properties of stars, galaxies, and the Universe as a whole, including the basic ideas of cosmology. The material is covered at a more basic level than PHYS 0270. Knowledge of basic algebra and trigonometry is required, but no experience with calculus is necessary. The course includes evening laboratory sessions.

**PHYS 0270. Astronomy and Astrophysics.**

A complete survey of basic astronomy, more rigorous than is offered in PHYS 0220. Requires competence in algebra, geometry, trigonometry, and vectors and also some understanding of calculus and classical mechanics. Laboratory work required. This course or an equivalent required for students concentrating in astronomy. The course includes conferences and evening laboratory sessions.

**PHYS 0470. Electricity and Magnetism.**

Electric and magnetic fields. Motion of charged particles in fields. Electric and magnetic properties of matter. Direct and alternating currents. Maxwell's equations. Laboratory work. Prerequisites: PHYS 0040, 0060, or 0160; and MATH 0180, 0200 or 0350. Labs meet every other week.

**PHYS 0500. Advanced Classical Mechanics.**

Dynamics of particles, rigid bodies, and elastic continua. Normal modes. Lagrangian and Hamiltonian formulations. Prerequisites: PHYS 0070, 0160 or 0050, 0060 and MATH 0180 or 0200; or approved equivalents.

**PHYS 0560. Experiments in Modern Physics.**

Introduction to experimental physics. Students perform fundamental experiments in modern quantum physics, including atomic physics, nuclear and particle physics, and condensed matter physics. Visits to research labs at Brown acquaint students with fields of current research. Emphasizes laboratory techniques, statistics, and data analysis. Three lecture/discussion hours and three laboratory hours each week. Required of all physics concentrators. Prerequisites: PHYS 0070, 0160 or 0050, 0060; 0470.

**PHYS 0720. Methods of Mathematical Physics.**

This course is designed for sophomores in physical sciences, especially those intending to take sophomore or higher level Physics courses. Topics include linear algebra (including linear vector spaces), Fourier analysis, ordinary and partial differential equations, complex analysis (including contour integration). Pre-requisites: PHYS 0060 or 0160, MATH 0180, 0200 or 0350, or consent of the instructor.

**PHYS 0790. Physics of Matter.**

An introduction to the principles of quantum mechanics and their use in the description of the electronic, thermal, and optical properties of materials. Primarily intended as an advanced science course in the engineering curriculum. Open to others by permission. Prerequisites: ENGN 0040, APMA 0340 or equivalents.

**PHYS 1100. Introduction to General Relativity.**

An introduction to Einstein's theory of gravity, including special relativity, spacetime curvature, cosmology and black holes. Prerequisites: PHYS 0500 and MATH 0520 or MATH 0540 or equivalent, or permission of the instructor. Recommended: PHYS 0720. Offered every other year.

**PHYS 1170. Introduction to Nuclear and High Energy Physics.**

A study of modern nuclear and particle physics, with emphasis on the theory and interpretation of experimental results. Prerequisites: PHYS 1410, 1420 (may be taken concurrently), or instructor permission.

**PHYS 1250. Stellar Structure and the Interstellar Medium.**

This class is an introduction to the physics of stars and their environment. The course covers the fundamental physics that set the physical properties of stars, such as their luminosity, size, spectral properties and how these quantities evolve with time. In addition, it includes a study of the physics that takes place in the gaseous environment surrounding stars, the InterStellar Medium (ISM). The ISM is very important because it contains a wealth of information on the evolutionary history of galaxies, their composition, formation and future. Prerequisites: PHYS 0270, PHYS 0470, or instructor permission. PHYS 1530 (perhaps taken concurrently) is strongly recommended but not required.

**PHYS 1270. Extragalactic Astronomy and High-Energy Astrophysics.**

This course provides an introduction to the astrophysics of galaxies, their structure and evolution, with an emphasis on physical introduction of the observations. Underlying physics concepts such as radiative transfer, nuclear reactions and accretion physics will be introduced. Intended for students at the junior level. Prerequisites: PHYS 0270 and PHYS 0470, and either MATH 0190 or MATH 0200, or instructor permission.

**PHYS 1280. Introduction to Cosmology.**

The course presents an introduction to the study of the origin, evolution and contents of the Universe. Topics include the expansion of the Universe, relativistic cosmologies, thermal evolution, primordial nucleosynthesis, structure formation and the Cosmic Microwave Background. Prerequisites: PHYS 0160, MATH 0190, MATH 0200, or MATH 0350, or instructor permission.

**PHYS 1410. Quantum Mechanics A.**

A unified treatment of quanta, photons, electrons, atoms, molecules, matter, nuclei, and particles. Quantum mechanics developed at the start and used to link and explain both the older and newer experimental phenomena of modern physics. Prerequisites: PHYS 0500 and 0560; and MATH 0520, 0540 or PHYS 0720; or approved equivalents.

**PHYS 1420. Quantum Mechanics B.**

See Quantum Mechanics A, (PHYS 1410) for course description.

**PHYS 1510. Advanced Electromagnetic Theory.**

Maxwell's laws and electromagnetic theory. Electromagnetic waves and radiation. Special relativity. Prerequisites: PHYS 0470; and MATH 0180, 0200, or 0350; or approved equivalents.

**PHYS 1530. Thermodynamics and Statistical Mechanics.**

The laws of thermodynamics and heat transfer. Atomic interpretation in terms of kinetic theory and elementary statistical mechanics. Applications to physical problems. Prerequisites: MATH 0180 or 0200 or 0350. Corequisite: PHYS 1410.

**PHYS 1560. Modern Physics Laboratory.**

A sequence of intensive, advanced experiments often introducing sophisticated techniques. Prerequisites: PHYS 0470, 0500 and 0560; and MATH 0520, 0540 or PHYS 0720; or approved equivalents.

**PHYS 1600. Computational Physics.**

This course provides students with an introduction to scientific computation, primarily as applied to physical science problems. It will assume a basic knowledge of programming and will focus on how computational methods can be used to study physical systems complementing experimental and theoretical techniques. Prerequisites: PHYS 0070, 0160 (or 0050, 0060) and 0470 (or ENGN 0510); MATH 0180 or 0200 or 0350; the ability to write a simple computer program in Fortran, Matlab, C or C++.

**PHYS 1610. Biological Physics.**

Introduction on structures of proteins, nucleotides, and membranes; electrostatics and hydration; chemical equilibrium; binding affinity and kinetics; hydrodynamics and transport; cellular mechanics and motions; biophysical techniques including sedimentation, electrophoresis, microscopy and spectroscopy. Suitable for undergraduate science and engineering majors and graduate students with limited background in life science. Prerequisites: MATH 0180.

**PHYS 1720. Methods of Mathematical Physics.**

Designed primarily for sophomore students in physical sciences. Basic elements of and practical examples in linear algebra, the solution of ordinary and Partial Differential Equation, Complex Analysis and Application to Contour Integrals. Intended to prepare students for the mathematics encountered in PHYS 0500, 1410, 1420, 1510 and 1530. Pre-requisites: PHYS 0060 or 0160, MATH 0180, 0200 or 0350, or consent of the instructor.

**PHYS 1970A. Stellar Physics and the Interstellar Medium.**

No description available.

**PHYS 1970B. Topics in Optics.**

Introduction to optical principles and techniques. Offered to students who have a foundation in physics and are especially interested in optics. The course covers the interaction of light with matter, geometric and wave optics, polarization, fluorescence, and optical instruments (e.g. interferometer, spectrometer, microscope and telescope). Recommended are one physics course (PHYS 0040, PHYS 0060, or ENGN 0040) and one calculus course (MATH 0180, MATH 0200, or MATH 0350), or per instructor's permission.

**PHYS 1970C. String Theory for Undergraduates.**

This course will concentrate on String Theory. It will be given at introductory/intermediate level with some review of the background material. Topics covered will include dynamical systems, symmetries and Noether's Theorem; nonrelativistic strings; relativistic systems (particle and string); quantization, gauge fixing, Feynman's sum over paths; electrostatic analogy; string in curved space-time; and supersymmetry. Some advanced topics will also be addressed, i.e., D-Branes and M-Theory. Recommended prerequisites: PHYS 0470 and 0500, or 0160.

**PHYS 1970F. Quantum Information.**

Quantum information is the modern study of how to encode and transmit information on the quantum scale--in many ways fundamentally different from classical information. This course will connect a standard treatment of Quantum mechanics with information theory. Some topics will overlap with phys 1410, but information will be presented from a different viewpoint and with new applications. Topics covered will include: measurement, quantum states, bits, density of states, entanglement, quantum information processing, computing, and some special topics. Students will be expected to complete an end of term project for successful completion of the course.

**PHYS 1970G. Topological Matter.**

Topology is a study of the robust properties of geometry, the global stuff that survives wiggles. Topological matter is matter that possesses robust properties that can survive a bit of crud, to the delight of its discoverers. It has breathed new life into topics that have been in textbooks for 75 years. Topics covered include Band Theory, Berry Phase, Topological Insulators, and the Quantum Hall Effect.

**PHYS 1970J. Introduction to Fluids.**

An introduction to fluids from the perspective of a physicist, this course will use discussion-based, small-group, and interactive pedagogy to explore and learn fundamental aspects of fluids: ideal, viscid, and planetary flows as well as turbulence, boundary layers, and waves. Student preference and feedback will be a major component in determining the topics to be covered as well as how class time is spent. This is recommended as an advanced undergraduate course for Physics majors who have completed their core coursework.

**PHYS 1980. Undergraduate Research in Physics.**

Designed for undergraduates to participate, individually or in small groups, in research projects mentored by the physics faculty. Students must have taken one year of college level physics. An average of 8 to 10 hours per week of guided research is required as are weekly meetings with the supervising faculty member. Students should consult with faculty to find a mutually agreeable research project and obtain permission to enroll. Section number varies by instructor (students must register for the appropriate section).

**PHYS 1990. Senior Conference Course.**

Preparation of thesis project. Required of candidates for the degree of bachelor of science with a concentration in physics. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHYS 2010. Techniques in Experimental Physics.**

No description available.

**PHYS 2020. Mathematical Methods of Engineers and Physicists.**

An introduction to methods of mathematical analysis in physical science and engineering. The first semester course includes linear algebra and tensor analysis; analytic functions of a complex variable; integration in the complex plane; potential theory. The second semester course includes probability theory; eigenvalue problems; calculus of variations and extremum principles; wave propagation; other partial differential equations of evolution.

**PHYS 2030. Classical Theoretical Physics I.**

No description available.

**PHYS 2040. Classical Theoretical Physics II.**

No description available.

**PHYS 2050. Quantum Mechanics.**

No description available.

**PHYS 2060. Quantum Mechanics.**

No description available.

**PHYS 2070. Advanced Quantum Mechanics.**

No description available.

**PHYS 2100. General Relativity and Cosmology.**

Given every other year.

**PHYS 2140. Statistical Mechanics.**

No description available.

**PHYS 2170. Introduction to Nuclear and High Energy Physics.**

No description available.

**PHYS 2280. Astrophysics and Cosmology.**

This course serves as a graduate-level introduction to modern cosmology, including current topics of research on both observational and theoretical fronts. Topics include relativistic cosmology, inflation and the early Universe, observational cosmology, galaxy formation. Prerequisites for undergraduates: PHYS 1280 and PHYS 1530.

**PHYS 2300. Quantum Theory of Fields I.**

No description available.

**PHYS 2320. Quantum Theory of Fields II.**

No description available. Instructor permission required.

**PHYS 2340. Group Theory.**

Offered every other year.

**PHYS 2410. Solid State Physics I.**

No description available.

**PHYS 2420. Solid State Physics II.**

No description available.

**PHYS 2430. Quantum Many Body Theory.**

No description available.

**PHYS 2450. Exchange Scholar Program.****PHYS 2470. Advanced Statistical Mechanics.**

No description available.

**PHYS 2600. Computational Physics.**

This course provides students with an introduction to scientific computation at the graduate level, primarily as applied to physical science problems. It will assume a basic knowledge of programming and will focus on how computational methods can be used to study physical systems complementing experimental and theoretical techniques. Prerequisites: PHYS 2030, 2050, 2140; the ability to write a simple computer program in Fortran, Matlab, C or C++.

**PHYS 2610A. Selected Topics in Modern Cosmology.**

Aims to provide a working knowledge of some main topics in modern cosmology. Combines study of the basics with applications to current research.

**PHYS 2610B. Theory of Relativity.**

No description available.

**PHYS 2610C. Selected Topics in Condensed Matter Physics.****PHYS 2610D. Selected Topics in Condensed Matter Physics.**

The objective of this course is to introduce recent development in condensed matter physics. Selected topics include: nanoscale physics, materials, and devices; spintronics and magnetism; high temperature superconductivity; strongly correlated systems; Bose-Einstein condensate; and applications of condensed matter physics. In addition to discussing physics, some experimental techniques used in current research will also be introduced. The course will help students broaden their scope of knowledge in condensed matter physics, learn how to leverage their existing background to select and conduct research, and develop a sense of how to build their professional career based on condensed matter physics.

**PHYS 2610E. Selected Topics in Physics of Locomotion.**

This special topics graduate course deals with the physical processes involved in the locomotion of organisms, with a particular focus on locomotion at small scales in fluids. Topics include mechanisms of swimming motility for microorganisms, fluid mechanics at low Reynolds number, diffusion and Brownian motion, physical actuation, hydrodynamic interactions, swimming in complex fluids, artificial swimmers, and optimization. Prerequisites: (PHYS0470 or ENGN0510) and (PHYS 0500 or ENGN0810 or ENGN1370), or permission of the instructor.

**PHYS 2610F. Selected Topics in Collider Physics.**

The course will cover basic aspects of conducting precision measurements and searches for new physics at modern high-energy colliders, with the emphasis given to physics at the Large Hadron Collider. The course will cover major aspects of conducting physics analysis from the underlying theory to experimental methods, such as optimization of the analysis, multivariate analysis techniques, use of statistical methods to establish a signal or set the limit. There will be reading assignments, in-class student presentations, and hands-on exercises offered as the part of the course. Prerequisite: PHYS 1170 or 2170. Open to graduate students in Physics and Math.

**PHYS 2620A. Astrophysical and Cosmological Constraints on Particle Physics.**

No description available.

**PHYS 2620B. Green's Functions and Ordered Exponentials.**

No description available.

**PHYS 2620C. Introduction to String Theory.**

No description available.

**PHYS 2620D. Modern Cosmology.**

No description available.

**PHYS 2620E. Selected Topics in Quantum Mechanics: Fuzzy Physics.**

No description available.

**PHYS 2620F. Selected Topics in Molecular Biophysics.**

No description available.

**PHYS 2620G. The Standard Model and Beyond.**

Topics to be covered will include: Yang-Mills theory, origin of masses and couplings of particles, effective field theory, renormalization, confinement, lattice gauge theory, anomalies and instantons, grand unification, magnetic monopoles, technicolor, introduction to supersymmetry, supersymmetry breaking, the Minimal Supersymmetric Standard Model, and dark matter candidates. Prerequisite: PHYS 2300.

**PHYS 2630. Biological Physics.**

The course is the graduate version of Phys 1610, Biological Physics. The topics to be covered include structure of cells and biological molecules; diffusion, dissipation and random motion; flow and friction in fluids; entropy, temperature and energy; chemical reactions and self-assembly; solution electrostatics; action potential and nerve impulses. The graduate level course has additional pre-requisites of Phys 0470 and 1530, or equivalents. It requires homework assignments at the graduate level. The final grades will be assigned separately from those who take the course as Phys 1610, although the two groups may be taught in the same classroom.

**PHYS 2710. Seminar in Research Topics.**

Instruction via reading assignments and seminars for graduate students on research projects. Credit may vary. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHYS 2711. Seminar in Research Topics.**

See Seminar In Research Topics (PHYS 2710) for course description. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHYS 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**PHYS 2980. Research in Physics.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHYS 2981. Research in Physics.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**PHYS 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

# Political Science

## Chair

Wendy J. Schiller

Traditionally, political science splits into four subfields: (1) the study of politics in the United States (American politics); (2) the comparative study of different political systems and individual nations around the globe (comparative politics); (3) the study of relations among states and peoples (international relations); and (4) the philosophical study of political ideas (political theory). What particularly moves us at Brown are the big questions about political life – both at home and around the world. We engage these questions in a wide range of different political contexts, often in ways that cross between the traditional subfields. We also pay particular attention to how our analyses touch the real world of people and politics.

You'll find us involved all around the campus: at the A. Alfred Taubman Center for American Politics and Policy, the Watson Institute for International and Public Affairs, the Political Theory Project, Development Studies, India Initiative, Middle East Studies, China Initiative, Center for Latin American and Caribbean Studies, Pembroke Center, Cogut Center for the Humanities among many others.

For additional information, please visit the department's website: [http://www.brown.edu/Departments/Political\\_Science/](http://www.brown.edu/Departments/Political_Science/)

## Political Science Concentration Requirements

Why do Hindus and Muslims live in harmony in one city and fight bitterly in another just a few miles away? Why is the U.S. the only industrialized nation without a complete national health insurance? What is the legacy of slavery in the U.S.? Why are there so few women in Congress? How is radicalism in the Middle East changing? Why and how does democracy flourish? Just what is democracy? How do emotions shape our political behavior? What do war movies tell us about the USA? Would less government lead to more social justice? What is social justice? How does smuggling (of drugs, guns, and people) reshape international relations? How do immigrants see the American Dream? What is the American dream?

Political science is about questions like these. You can grapple with every one of them –and many more— in the classrooms of the Brown political science department. We study how people –nations, regions, cities, communities— live their common lives. How people solve (or duck) their common problems. How people govern themselves. How they think, talk, argue, fight, and vote. Students passionate about social challenges may also choose to pursue the Engaged Scholars Program, which allows them to connect theory and practice and gain hands-on experience working with community partners.

The undergraduate concentration is organized around three broad tracks, or programs of study: American politics, international and comparative politics, and political theory. Twelve courses are required overall: ten within the Department of Political Science and two from areas outside the department related to your chosen track. Thirteen courses are required if the methods requirement is fulfilled with a course outside the department.

### Requirements:

#### Two introductory courses:

2

For the American politics track, the following two introductory courses are required

POLS 0010 Introduction to the American Political Process

- and -

POLS 0110 Introduction to Political Thought  
or POLS 0200 Introduction to Comparative Politics  
or POLS 0400 Introduction to International Politics

For the international and comparative politics track; the following two introductory courses are required:

POLS 0200 Introduction to Comparative Politics

or POLS 0400 Introduction to International Politics

- and -

POLS 0010 Introduction to the American Political Process

or POLS 0110 Introduction to Political Thought

For the Political Theory track, the following two introductory courses are required

POLS 0110 Introduction to Political Thought

- and -

POLS 0010 Introduction to the American Political Process

or POLS 0200 Introduction to Comparative Politics

or POLS 0400 Introduction to International Politics

<b>One course in the American politics subfield</b>	1
<b>One course in the political theory subfield</b>	1
<b>Two courses in the international and comparative politics subfield</b>	2
<b>Three upper-level courses in the chosen subfield</b>	3
<b>One methods course from Political Science:</b> <sup>1</sup>	1
POLS 0500 Foundations of Political Analysis	
POLS 1600 Political Research Methods	
<b>One research seminar from the POLS 1820, 1821, 1822, 1823 or 1824 offerings that is track related</b>	1
<b>Two upper-level courses from outside the department related to the specialized track, chosen with the approval of the concentration advisor.</b> <sup>2</sup>	2

<sup>1</sup> A comparable course from an outside department (APMA 0650, ANTH 1940, CLPS 0900, ECON 1620, ECON 1630, EDUC 1100, EDUC 1110, EEPS 1320, PHP 1501, SOC 1100 or SOC 1120 may also be used). If the methods requirement is fulfilled by an outside department course, it will not count as one of the 12 required courses.

<sup>2</sup> Appropriate 1000-level courses offered in (but not limited to) Africana Studies, American Studies, Anthropology, Classics, Economics, History, International Relations, Philosophy, Public Policy, Religious Studies, Sociology or Urban Studies may apply. The concentration advisor may approve a course from another department if it clearly meets the intent of the outside course requirement.

To obtain an advisor contact the Concentration Coordinator Patti Gardner.

## Honors

Students wishing to undertake the honors program need to complete the same requirements as shown for the concentration. Completion of the methods requirement is required prior to applying to the Honors program. Students must also complete an honors research project and take POLS 1910 and POLS 1920 during the senior year. POLS 1910 and POLS 1920 will count as one credit towards the 10 required Political Science courses for the concentration.

## Political Science Graduate Program

The department of Political Science offers a 5-th year Masters (A.M.), a Master of Arts (A.M.) Degree\* and a Doctor of Philosophy (Ph.D.) Degree.

### Completion Requirements

#### 5-th year Masters (A.M.):

The 5th-Year Master's Degree option allows Brown undergraduates to continue at the University for a master's degree after completing their bachelor's degree.

- Eight 2000 level Political Sciences courses are required
- Students can take up to two graduate level courses during their undergraduate studies
- POLS courses must be completed with a grade of B or better
- A minimum of six semester courses must be taken during 5th year
- Courses taken as an undergrad cannot count for both concentration and the masters program

Students must apply for this program before they complete their undergraduate studies. They do so through the Graduate School's online application system. Admission must be approved by the Political Science department and by the Graduate School.

#### **Master of Arts (A.M.) Degree:**

**\*The Political Science department does not have a separate master's program; graduate students can earn the A.M. on the way to the Ph.D.** This A.M. requires passing eight 2000-level Political Science courses with a grade of B or better.

#### **Doctor of Philosophy (Ph.D.) Degree:**

- Pass thirteen graduate level courses with a grade of B or better
- A minimum of 10 courses must be within the Political Science department (two may be taken in a related discipline)
- Research Methods POLS2000
- Quantitative Research Methods I POLS2580
- Two field proseminars (choose two of four - POLS2100 American, POLS2110 Comparative, POLS2120 Theory or POLS2130 IR)
- One theory course
- The Prospectus Writing POLS2050 and POLS2051 sequence
- Pass written and oral preliminary examinations in two subfields
- Written and oral presentation of a dissertation proposal
- Written and oral presentation of a dissertation
- A minimum of two semesters as a teaching assistant

For more information on admission and program requirements, please visit the following website

<http://www.brown.edu/academics/gradschool/programs/political-science>

## **Courses**

#### **POLS 0010. Introduction to the American Political Process.**

This course is designed to be an introduction to the American political process, broadly defined. We will cover topics including but not limited to: Constitution, Federalism, Federal Budget, Congress, Presidency, Bureaucracy, Judiciary, Civil Rights, Civil Liberties, Public Opinion, Media, Interest Groups, Political Parties, Campaigns, Elections, and Participation.

#### **POLS 0110. Introduction to Political Thought.**

What is justice? What is freedom? What is the basis of political authority? What is the nature of the best regime? Why should we obey the laws? When may we legitimately resist? These and other perennial questions of political life are explored. Readings includes Aristotle, Machiavelli, Hobbes, Locke, Rousseau, Marx, and J.S. Mill.

#### **POLS 0200. Introduction to Comparative Politics.**

Introduces students to the sub-field of comparative politics or politics within states. Topics include types of regimes (i.e., democratic, authoritarian-with-adjectives, totalitarian); transitions to democracy; collapse of democratic regimes; democratizing, revolutionary and ethnic challenges to the state; and globalization. The course also pays attention to modes of analysis in comparative politics. Cases will be drawn from various regions, including Western and Eastern Europe, Asia, Africa, the Middle East, and Latin America.

#### **POLS 0220. City Politics.**

Bosses, reformers, states, bureaucrats, politicians, the poor, the homeless, and the citizen. An introduction to the major themes of urban politics.

#### **POLS 0400. Introduction to International Politics.**

This course provides a basic introduction to the central theoretical perspectives and debates in international relations. The second part of the course applies these models to current problems in international relations, including globalization, state failure, humanitarian intervention, NGOs, terrorist networks, environmental issues, and possible future change in international politics.

#### **POLS 0500. Foundations of Political Analysis.**

This course provides an introduction for undergraduate students to the methods that political scientists (and other social scientists) use to generate and answer questions about the world around us. This course will provide you with the tools to evaluate critically social science research, and it will improve your ability to pose and answer research questions of your own. Both quantitative and qualitative approaches are covered. Not open to first year students.

#### **POLS 0600. Introduction to Modern South Asia (SAST 0700).**

Interested students must register for SAST 0700.

#### **POLS 0820A. American Presidency.**

The origins and evolution of the current presidency and the role of the presidential institution in the American political and policy-making system. Evaluation of the present role of the office and critical examination of recent administrations.

#### **POLS 0820B. The Politics of Leadership.**

Many people are placed in leadership positions but most never become real leaders. What separates leaders and non-leaders? What are the characteristics of a real leader? The course will focus on American politics and investigate two institutional arenas: the presidency and congress. Several case studies will be investigated where people use different skills to perform leadership roles. Among the factors to be considered are; personal qualities, prior preparation, selection of a challenge and the use of rhetorical skills. Enrollment limited to 19 first year students.

#### **POLS 0820D. Freedom.**

What is freedom? Is it important? How do we know? What should we do about it? We will analyze the different conceptions of liberty - liberal egalitarian, classical liberal, Marxist, and fascist views. We will determine how the various aspects of freedom - political, personal, psychological, economic, and moral - are complementary, and determine what sorts of institutions promote or undermine these aspects. Enrollment limited to 19 first year students.

#### **POLS 0820E. Slavery and Political Philosophy.**

This course looks at the various ways in which the experience of slavery has shaped political philosophy and political thinking from its origins. In what ways has the experience of freedom not just been tied to but presupposed the slavery of others? What ways of thinking about freedom are or are not compatible with the external enslavement of others? What kinds of ideas had to change for a systematic critique of slavery to develop? Have we overcome all forms of slavery or are their forms that are still with us?

#### **POLS 0820F. Politics of Aviation.**

Who are the key players in aviation conflicts? Congress and congressional committees, bureaucratic agencies and pressure groups. Governmental regulation of airlines; past, present and future. Current market trends examined. Two dominant themes in aviation politics: avoid safety failures (crashes); avoid security problems (terrorism). How 9-11 changed the industry.

#### **POLS 0820G. Race and Political Representation.**

While representation is a central tenet of democracy, much disagreement exists over what political representation means and the best way to ensure equitable representation for all citizens. We will study representation and its various forms. We will then use these concepts to examine research on how well American democratic institutions capture the interest of racial and ethnic minorities. Enrollment limited to 19 first year students.

#### **POLS 0820H. Race and Visions of Justice.**

This course is both an introduction to and critical assessment of the tradition of liberalism and its ability or inability to address racial inequality. We will explore the re-emergence of liberalism in the 20th century and move on to critical accounts of the tradition by scholars of race, inequality, and social movements. Given that liberalism remains a fundamental aspect of our political lives in the United States, we want to know whether it is capable in theory and practice to address the on-going question for racial justice.

**POLS 0820I. Crime, Mafias and Prison.**

Will develop framework for analysis of criminal behavior in a variety of contemporary and historical settings. Examines the rationality behind criminal choices, how governments seek to control crime, alternatives to state-enforcement of criminal law, origins and operation of organized crime and mafia groups, and how crime affects regions characterized by failed or weak states. Study crime in a variety of contexts, including in the Sicilian Mafia, 18th century piracy, contemporary drug and sex markets, and prison gangs. Will develop tools that can be used to understand the observed variation in criminal activity, the organizational structure of criminal activity, and their broader consequences.

**POLS 0820L. Philosophy of the American Founding.**

In framing our political system in the Constitution, who did the Founders rely on for their theoretical framework? In this course, we will explore the works of Montesquieu, Adams, Franklin, Jefferson, Madison, Hamilton, and other contributors to the Constitution. Enrollment limited to 19 first year students.

**POLS 0820N. Political Thinking for a Global World.**

This course will consider how we should think, and act, in a world increasingly marked by global interconnectedness. We will devote our attention to the intellectual and epistemological issues raised by cross-cultural exchange, and survey how theorists in both "the West" and elsewhere have thought about and formulated responses to issues like citizenship, human rights, feminism, and cultural identity.

**POLS 0820P. Fourth Branch of Government.**

Administrative agencies have been called the fourth branch of government. They write regulations that have the force of law and they are responsible for the implementation of virtually all public policies. How do these agencies fit into our constitutional form of government? How do they relate to the other branches of government? This course traces the rise of the administrative state and it examines the basic elements of command-and-control regulation, along with various alternatives to regulation. Written permission required.

**POLS 0820Q. Politics of American Federal Holidays.**

Why were ten national holidays created? The answer requires a review of key events in American political history from 1775 to 1983. Why was the Civil War pivotal? Which presidents were most important in generating support for special days? Conflicts occurred not only in creating the day but which day would be the holiday. Enrollment limited to 19 first year students.

**POLS 0820R. Global Governance.**

"Global governance" denotes the myriad ways in which states, institutions, networks, and associations help administer global affairs. In this seminar, we will explore who governs the world and how, and we will evaluate different normative theories of global governance, including the liberal/ political, cosmopolitan democratic, and republican approaches. We will focus on the values and the global structure that their proponents deem most desirable. What values, if any, ought to govern the practice of global politics? And how should such values be institutionalized? Are there any good reasons for favoring a centralized global authority akin to a world state, or should we prefer a different global institutional arrangement? What role do we envision for the nation-state?

**POLS 0820S. Capitalism For and Against.**

What is capitalism? What are its defining traits and institutions, and the roles of the market and the state? How should individual rights and social responsibilities be balanced? What are capitalisms' strengths and weaknesses? Are capitalist societies or other types of systems the best way to achieve justice, promote excellence, and provide freedom, happiness, and material well-being? What are the coherent criticisms of and alternatives to capitalism? This course will study some of the seminal philosophical arguments about capitalism, focusing especially on Smith, Locke, Rousseau, Marx, and Hayek. Enrollment limited to 20 freshmen and sophomores.

**POLS 0820T. Women's Work and Welfare in Global Perspective.**

The seminar looks at how welfare systems structure women's participation in the workplace, family and society, including: women's roles in domestic economies; migration flows from poor to rich states, gendered divisions of labor; human trafficking; and pro-natalist responses to population decline. Attention is devoted to policies that support women and families, including welfare, work-and-family reconciliation; micro-financing, conditional income support programs; and the growing role of women's and non-governmental organizations in welfare policy. Cases are drawn from Europe, Latin America, Asia, Russia and the United States.

**POLS 0820U. Drug War Politics.**

This seminar examines the politics, practice, and consequences of government efforts to regulate mind-altering substances since the early 20th century. Although much of the focus is on the contemporary United States and Latin America, the coverage is broadly historical, comparative, and global. The main drugs focused on are cocaine, opium, and cannabis, but will include alcohol, tobacco, and synthetics. The course also evaluates policy alternatives and the obstacles to policy reform. The course draws on readings from fields such as political science, anthropology, criminology, and history. The seminar is reading intensive, and is designed to cultivate critical writing and presentation skills. Enrollment limited to 19 first year students. Instructor permission required.

**POLS 0820V. Land and Conflict.**

This first-year seminar considers the connection between land and political conflict. Disputes over territory have been a primary cause of war for centuries. Likewise, other types of conflicts over land continue to be a major factor in political struggles worldwide. Why, how, and when does territory become the subject of violent—or non-violent—conflict? The seminar will begin by thinking broadly about how land has factored into political conflict, both historically and today, and then we will move on to a series of case studies of recent or ongoing conflicts, including Israel/ Palestine, Kashmir, the South China Sea, the Arctic, and global farmland.

**POLS 0820W. Bleeding Heart Libertarianism.**

What is libertarianism? In what sense can libertarians claim to combine the best of the "right" with the best of the "left?" Why do libertarians emphasize private property? Why are they skeptical of political agency? Are libertarians anti-democratic? Can they care about social justice? How do libertarians approach problems such as racism, sexism, militarism, state surveillance, global inequality, and environmental sustainability? This course will explore such questions, as illuminated by a variety of texts in the libertarian tradition, classical and contemporary.

**POLS 0820X. Introduction to Modern South Asia.**

The seminar aims to introduce South Asia in terms of a plurality in ways of being. It shall study themes beginning with colonialism and ranging from the colonial mapping of tradition; anticolonial ethics; partition and the creation of a separate state; communalism; democracy; secularism; nationalism; welfare; and the global war on terror. The seminar will be an intensive reading and writing experience that transgresses academic disciplines. Writings include important tracts and speeches of intellectuals and thinkers of South Asia; writings of scholars and activists; and literary and artistic works. There are no prerequisites for taking this course.

**POLS 0920A. Bleeding Heart Libertarianism.**

What is libertarianism? In what sense can libertarians claim to combine the best of the "right" with the best of the "left?" Why do libertarians emphasize private property? Why are they skeptical of political agency? Are libertarians anti-democratic? Can they care about social justice? How do libertarians approach problems such as racism, sexism, militarism, state surveillance, global inequality, and environmental sustainability? This course will consider such questions from a variety of texts in the libertarian tradition, contemporary and classical.

**POLS 0920B. Introduction to Indigenous Politics with Pacific Islander Focus.**

This introductory course in Indigenous political thought engages with critical Indigenous thinkers in order to understand Indigenous political praxis, resurgence and decolonization. Because Indigenous study is place-based and kinship relationships to land and all existents of that land are fundamental to understanding Indigenous political thought, Indigenous politics must be studied in the context of particular indigenous peoples. To that end this course focuses on political movements of contemporary Kanaka Maoli (Native Hawaiian). In addition to developing a fuller understanding of Indigenous political thought, this class also explores what it means to move beyond colonial relationships with the State.

**POLS 0920C. Media and Democracy.**

What role should media play in democracy? What impact do media forms such as social media have on democracy? As Americans increasingly get their news through social media and a wide variety of partisan online sources, they face an array of new challenges in gathering the information necessary of citizenship. The 2016 election and its aftermath added to a long list of worries about how media interacts with democracy—from Russian trolls to partisan bubbles to fake news to manipulative social media algorithms. Yet, at the same time, social media has enabled citizens to participate in shaping and contesting their informational environment in previously unimaginable ways—from #BlackLivesMatter to #MeToo.

**POLS 0920F. The Passions in Modern Political Thought.**

We love. We hate. We are proud of ourselves. We are envious of others. Misery triggers sympathy. Fury triggers fear. These psychological phenomena appear natural to human beings. We can't help experiencing them. We try to understand ourselves and our world through them. We act accordingly and in this way make a difference to ourselves and the people around us, for better or worse.

All these phenomena can be linked to one concept: passion. But what is passion? Why does it matter to politics and society? This course examines several passions (sympathy, self-love, fear, resentment, etc.) and their social and political implications.

**POLS 0920G. US Populism in Comparative Perspective.**

When Donald Trump won the United States presidential election in 2016 with an unconventional "outsider" campaign, academics and journalists sought answers for the unexpected victory, examining explanations including attitudes of racial anxiety, deindustrialization, and growing economic inequality. This course introduces students to these debates through offering a wider comparative perspective on instances of populist movements and leaders around the world. We will work to build an understanding of the causes and consequences of this complicated phenomenon by comparing current and historical cases of US populism with those in Europe and Latin America.

**POLS 1010. Topics in American Constitutional Law.**

This course will examine major constitutional controversies within the context of wider debates in political and legal theory. Readings from Supreme Court cases and prominent texts in political/legal theory. Each year we will focus on a different theme and set of constitutional issues. Topics might include a mix of federalism, separation of powers, privacy, free speech, and abortion. We will also focus how political and legal theory helps us to consider these topics in tandem

**POLS 1020. Politics of the Illicit Global Economy.**

This course is about the "underside" of globalization. It introduces key sectors of the illicit global economy, including the clandestine flow of drugs, arms, people, body parts, arts and antiquities, endangered species, and toxic waste. The course compares these illicit sectors across time and place, and evaluates the practice and politics of state regulatory efforts. Particular attention is given to the role of the U.S. in the illicit global economy.

**POLS 1030. Modern Political Thought.**

What is justice? In a just society how would wealth be distributed? Would such distribution respect property rights? Does the state have the exclusive right to punish and if so why? Should the family be regarded as beyond justice? Is there a tension between democratic self-governance and freedoms from coercion? With an emphasize on both lectures and Socratic dialogue, this course is designed to engage students in conversations with the most important work in modern and contemporary political thought and to get them to engage with the most fundamental questions faced by our polity. We will draw on canonical modern and contemporary writers to see understand the most important debates of the modern period and as importantly to help us dig deep into fundamental questions of justice and legitimacy. Readings from Hobbes, Locke, Rousseau, Marx, Rawls, Okin, Cohen and others. Some prior work in political theory or philosophy suggested.

**POLS 1035. Democracy and Its Nineteenth Century Critics.**

What exactly is democracy, or 'the rule of the people'? Our unreflective support for democracy often blinds us to the fact that historically, democracy has not always been viewed favorably, but rather, with skepticism—particularly as it was rising to the forefront of political life in the United States and Western Europe in the 19th century. This course investigates claims about democracy through historical and philosophical readings. What exactly is democracy? How is it justified (or not)? How is democracy related to representation, gender, and class? We investigate these questions through Burke, Paine, Wollstonecraft, deTocqueville, Marx, Mill, Taylor, and Nietzsche.

**POLS 1040. Ancient Political Thought.**

The Greeks stand at the beginning of the Western tradition of political philosophy, yet their thought is somehow foreign. What was the special perspective from which they viewed political life? In what ways does their perspective vitalize, contest, deepen, or affirm our own thinking on justice, politics, and the good life? This course will examine these and other questions with a special emphasis on the works of Plato and Aristotle.

**POLS 1045. American Political Thought.**

This course will explore key themes that have (re)defined life in this country since its beginning, such as liberty, democracy, religion, and race. We will read core documents like the Declaration of Independence, along with important works by thinkers like John Winthrop, the Founding Fathers, Tocqueville, Lincoln, and more recent authors like Robert Dahl. Our goal is to understand what they thought the American enterprise was and should be. Can the country meet their expectations? This course assumes a basic familiarity with American government and history, that is, with important dates and events, as well as certain concepts and institutions.

**POLS 1050. Ethics and Public Policy.**

Examines moral foundations of important policy issues in the American national context as well as at Brown. Considers issues like: What is the just distribution of resources and opportunities in society? And complementary policy issues like: affirmative action, immigration, public provision of health care and social welfare. Asks whether/how liberal democracies can come to consensus on contentious moral issues like abortion, and what the ethical roles of politicians and citizens are in such struggles.

**POLS 1060. The Political Economy of U.S. Monetary Policy.**

This course will utilize political economy models of American political institutions to explain the relationship between politics and U.S. monetary policy. The course will provide a foundational understanding of how branches of the U.S. government relate to one another and how they relate to the Federal Reserve. We will explore several eras of monetary policy decisions in American history concluding with the recent financial crisis. In addition to providing a deeper understanding of American political institutions and the history of American monetary policy the course will explore how the Federal Reserve operates internally and how that impacts U.S. monetary policy. Instructor permission required.

**POLS 1070. Rights.**

Investigates the moral and political foundations of rights through a reading of classical and contemporary theories of rights. Readings include Hobbes, Locke, Tocqueville, Kant, J.S. Mill, Burke, Marx, Nozick, Waldron, Okin, Ignatieff, and others. Topics include rights and justice; multiculturalism and group rights; human rights in the global context; animal rights and environmentalism; communitarian and postmodern critiques of rights; and rights in the context of American citizenship.

**POLS 1075. Ancients and Moderns.**

Examines the political thought of Plato and Aristotle and three modern thinkers who were especially animated by these ancient views of politics: Machiavelli, Rousseau, and Nietzsche. Topics include the ends of politics and the nature of good government; the meaning of justice; the value of equality and of hierarchy; the nature of freedom; the role of virtue in political life; and the relationship between philosophy and politics. In reading these ancient and modern thinkers together, we gain a richer understanding of both the quarrels and the continuities between ancient and modern political thought – and the dynamic relationship between them.

**POLS 1080. Politics of Transportation Policy.**

Three transportation modes are emphasized: planes, trains, and automobiles. Three sets of actors are studied: Congress, pressure groups, and governmental agencies. The focus is on historical patterns of usage and current policy questions including airlines vs. airports, problematic drivers, and cars vs. transit. Background in the rudiments of American politics is desired.

**POLS 1085. Injustice.**

How should we respond to injustice? Violently or non-violently? Lawfully or disobediently? Should we try legal channels first or are some injustices too severe and urgent? When do we have an obligation to join those already resisting injustices? History presents us with an enormous repertoire of ways people have resisted injustice: conscientious refusal, passive resistance, non-violent direct action, sabotage, civil disobedience, strikes, mass protests, and revolution. This course will read works of political philosophy next to signature events of our own time, such as Arab Spring, Black Lives Matter Movement, the Tea Party, and labor strikes, to discuss the above questions.

**POLS 1090. Polarized Politics.**

Focus will be on growing partisan polarization in American politics. Existence of polarization in institutions like House of Representatives, Senate, the presidency, federal courts, media, and religion will be examined. Emphasis will include the roles of political elites, non-elites, lobbyists, money in politics, red states/blue states, House and Senate rules, particular pressures created by budget, domestic, foreign policy, defense and homeland security issues. Requires extensive reading, detailed paper, take-home final exam and active class participation. Expectation to remain informed about current events as they apply to partisan polarization and to weigh the impacts of polarized politics on a democratic nation.

**POLS 1100. U.S. Congress.**

The Founders established the U.S. Congress in Article I of the Constitution. It created that body as guardian of the nation's purse strings and empowered it to "make all laws necessary and proper." Will examine the Congress's structure, rules and procedures, traditions, precedents, campaigns, elections, parties, budget process, Member's constituencies and role in the system of checks and balances with the president and the courts. The impact of procedure on policy outcomes and the impacts of the 2020 election on the House and Senate will be explored. The course will consistently relate the characteristics and history of Congress to current events.

**POLS 1110. Mass Media.**

Dramatic changes are unfolding in the structure and operations of the U.S. media. We discuss how the media have changed over history; what the changes mean for American culture, society, and politics; and how we should evaluate the contemporary media.

**POLS 1120. Campaigns and Elections.**

This course is designed to survey both historical and contemporary elections at both the congressional level, emphasizing the 2012 elections. Topics include campaigns, parties, candidates, voting behavior, public opinion, and the media.

**POLS 1130. The American Presidency.**

The origins and evolution of the Presidency in the American political and policy-making system. Special emphasis on the impact of presidential policies from Franklin Delano Roosevelt through Donald Trump; the presidential nomination and general election system with special focus on the 2020 election; and an exploration of the future challenges facing the winner of the 2020 Presidential election. The course will consistently relate the characteristics and history of the presidency to current events.

**POLS 1140. Public Opinion and American Democracy.**

Public opinion is an essential component of democracy. Considering the lack of familiarity about current events, how does public opinion affect public policy? Perhaps more importantly, should it? To assess these questions, we will explore how to measure public opinion and what polls tell us. We will then assess the roots of public opinion and analyze the public policy and representational impact of people's preferences.

**POLS 1150. Prosperity: The Ethics and Economics of Wealth Creation.**

What is prosperity? Whom does prosperity benefit? Which institutions and attitudes produce prosperity? What is the relation of prosperity to other values such as efficiency, happiness, equality, fairness, religious faith or personal freedom? This course explores the problem of prosperity from a variety of disciplinary perspectives: philosophical, economic, historical, religious, and literary. No Prerequisites. Freshmen welcome.

**POLS 1160. Constitutional Law: Governmental Powers.**

This course examines governmental powers under the United States Constitution, addressing the powers of Congress, the President, and the courts, as well as the relationship between the national and state governments. The primary reading materials will be leading Supreme Court cases, supplemented by additional reading materials on history and legal theory. The course will consider the role of the courts in enforcing constitutional principles in a democratic system, as well as theories of constitutional interpretation and constitutional change.

**POLS 1170. Constitutional Law: Individual Rights.**

Examines the scope of individual rights under the United States Constitution and will focus on equal protection, due process, free speech, and religion. The primary reading materials will be leading Supreme Court opinions interpreting and applying the First and Fourteenth Amendments, supplemented by readings on legal history and theory. The course will consider the role of the courts in protecting individual rights in a constitutional democracy, as well as theories of constitutional interpretation and constitutional change.

**POLS 1180. Feminist Thoughts for a Heated Climate.**

The ecological crises - the "sixth extinction," "global warming," "the eruption of Gaia" - have forced many humans to challenge contingent boundaries drawn in more or less compelling ways in the Western world. Dualisms opposing nature to culture, the human and the nonhuman, the natural and the technological, the feminine and the masculine, seem more destabilized than ever. When geologists came up with a new epoch called the "Anthropocene," feminist theory was well equipped to problematize this allegedly omnipotent "anthropos." Reciprocally, queer, post-colonial, and feminist theories have re-thought the never so normative, hardly stable, greatly unknown, nature of nature.

**POLS 1185. Environmental Political Thought.**

In our context of ecological crises, Environmental Political Theory (or Ecosophy) has boomed, attesting of the need for new concepts with which to think our unprecedented situation. Ecosophers think of nuclear energy, GMOs, climate change, the 6th extinction, etc. in terms of responsibility toward future generations, "de-growth," sustainability, the anthropocene, Gaia, etc. This course will survey some major schools of thought within Ecosophy, highlighting the diversity of the environmentalist movement. We will focus on one common thread weaving eclectic ecosophical currents and concepts: the question of humans' relationship to the nonhuman.

**POLS 1190. The Politics of Climate Change.**

In 1992, the international community committed itself to the goal of preventing dangerous anthropogenic climate change. Taking stock more than a quarter century later reveals a still-warming world well and seemingly little progress. Why do we collectively find ourselves in this dangerous position? The purpose of this course is to provide a set of answers to this question from the perspective of political science. Our focus will be on exploring the range of our collective governance efforts from the international regime on down. Is there a pathway to successful climate governance?

**POLS 1200. Reimagining Capitalism.**

Debates over capitalism and its alternatives date back centuries. Proponents say that market institutions have enabled extraordinary productivity growth and life-saving innovations. Trade and the division of labor have been central to human progress in recent centuries. Capitalism's critics point out that the growth of market economies has often had unacceptable consequences. The course is organized around four main challenges facing market economies today: environmental degradation, labor exploitation, inequality, and crisis. Can capitalism be reformed to solve the problems that it has helped generate, or is a market system unequipped to grapple with social and environmental challenges?

**POLS 1210. Latin American Politics.**

Focuses on political and economic transformation in contemporary Latin America. Special attention is given to the processes of market-oriented economic reforms and democratization that have swept the region during the last twenty-five years. Includes in-depth country case studies where key themes can be discussed and elaborated.

**POLS 1215. Fiction and Methods in Social Research: Debates on Inequality, Poverty, and Violence.**

In this course, students will read, comment, and discuss renowned novels on inequality, exclusion, poverty, and (political, religious, racial, and gender) violence in cases as diverse as Nigeria, India, and Afghanistan. These novels will submerge students in some of the complexities and richness of the selected cases. By reading them, students will explore and discuss concepts, stories and historical context, political and socioeconomic processes, the roles of characters, and arguments.

**POLS 1220. Politics in Russia and Eastern Europe.**

How do Putin and other leaders in Eastern Europe maintain political power? Why did some states democratize after communism's collapse, and why are successful democratizers (Hungary, Poland) now moving toward semi-authoritarian populism? Why has Ukraine become a battleground between Russia and the West? We will study how international economic integration, the European Union, and the migrant crisis have affected the region's domestic politics. Focus will be on the Russian Federation, Ukraine, and Poland. Background in social sciences recommended.

**POLS 1240. Politics, Markets and States in Developing Countries.**

How can we explain fundamental differences in economic performance and policy across developing countries in the face of Globalization? Why are some countries praised as economic "miracles," yet others seem mired in inescapable stagnation? This course addresses these questions by introducing the basic topics, concepts, and theoretical approaches that comprise the field of political economy of development. The course draws on case studies from Asia, Africa, and Latin America.

**POLS 1250. The Politics of European Democracies.**

Topics covered include the state and challenges to the state of social class, ethnicity, immigration and religion; political parties and the formation of governing coalitions; new social movements and new political identities; voting behavior and other forms of mass politics; the European Union.

**POLS 1260. Maps and Politics.**

How do maps affect politics, and vice versa? Maps fundamentally shape the way that we see our world and how we interact politically, economically, and socially, but maps are also shaped by political actors, interests, and institutions. This course will consider historical and contemporary issues that link maps and politics, including the connections between mapping and nation-states, colonialism, warfare, democratic politics, and indigenous rights. The course is suitable for all students with an interest in the topic.

**POLS 1265. Political Institutions of East Asian Democracies.**

Will discuss present-day government and politics of South Korea, Taiwan and the Philippines as well as the decades leading up to democratic transitions in these countries. Will discuss economic miracles in Japan and the four "Asian tigers," and democratization in these high-growing regions. Throughout, reference will be made to similarities and differences – and implications thereof – between the "rules of the game" in these countries and in other new democracies. We will focus on several areas of policy that have been at the center of political science and economics debates concerning policy making in Korea, Taiwan and the Philippines.

**POLS 1270. Middle East Politics.**

For decades, the Middle East was widely perceived as a bastion of authoritarianism and a hotbed of identity politics and political violence. What has sustained these perspectives and how has the Arab Spring challenged them? This course combines analytical approaches with concrete case studies to provide an overview and critical understanding of regional developments. Students will gain insights on key questions and debates in Middle East politics. Topics include "persistent authoritarianism" in the Middle East, Political Islam, sectarian violence, economic development, and social mobilization. The course is suitable for students with all levels of knowledge on the region.

**POLS 1280. Politics, Economy and Society in India.**

This course will concentrate on three aspects of the "Indian experience": democracy, ethnic and religious diversity, and political economy. With a brief exception, India has continued to be democratic since 1947. No developing country matches India's democratic record. Second, remarkable cultural, ethnic and religious diversity marks India's social landscape, and influences its politics. Third, Indian economy has of late been going through a serious economic transformation, drawing comparisons with China. Is the comparison valid?

**POLS 1285. Quality of Democracy in Latin America.**

Focus on democratic quality in modern Latin America, its failures as well as its successes. Topics include police violence, the rule of law, indigenous movements, gender and gay rights, anti-poverty policy, and direct democracy. Will draw on material from across the Spanish and Portuguese speaking democracies in the region. We will engage with different theories of what makes democracies representative and accountable to their citizens. Not open to first years.

**POLS 1290. The Rise of China.**

This course examines the causes and consequences of China's societal transformation and emergence as a global power. Employing perspectives from comparative politics, international relations, and economics, the course explores the connections between China's domestic transformation and its integration with the global system. Lectures and readings cover the historical antecedents of China's rise, the contemporary relationship between state and citizen, the nature of China's global competitiveness, and likely future avenues for socio-political change.

**POLS 1300. Latino Politics and Public Opinion.**

Over 50 million Latinos reside in the United States today, making them the largest minority group in the country. The current population size, projected growth trajectory, and population density of Latinos in many political battleground states have made this group a favored topic among politicians, interest groups and mass media. Yet, what do we really know about the politics and opinions associated with the diverse and expanding Latino population? How are Latinos incorporated into American political life? What difference does it make to be of Latino descent in the U.S.? This course presents an in-depth examination of this important population.

**POLS 1310. African American Politics.**

Focuses on the contemporary African American politics in various spheres of the American political environment. Examines also how the concept of an African American community has evolved and shifted historically. We will pay particular attention to the growing diversity within the African American community and discuss what these changes mean for black political participation, representation, and organizing.

**POLS 1315. Social Groups in American Politics.**

In this course, students examine the politics of social groups in order to gain a broader perspective of the American political process. Topics can vary, and include a review of the major developments in American politics for historically discriminated groups including women.

**POLS 1321. Urban Politics and Urban Policy (URBN 1270).**

Interested students must register for URBN 1270.

**POLS 1325. Political Organizations and Social Change in America.**

Will examine efforts to create significant policy change in contemporary political and social life in United States. We examine strategies of social change; explore the characteristics of advocacy organizations; and consider how organizations can expand their political toolkits as they seek to create social change. In addition, we will examine the relationship between organizations, members, and activists. Why do so many organizations lack active members? What does it take to turn members into activists? Among the cases we examine are the Civil Rights Movement, the Tea Party, Alinsky organizations, Black Lives Matter, the Koch Brothers Network, Dreamers, and organized labor.

**POLS 1350. Asian American Politics.**

Examination of the historical and contemporary political experiences of Asian Americans and their respective pursuits for immigration, equality, citizenship, political identity, racial justice, cross-racial/ethnic coalition-building, and incorporation into the U.S. political system. The course will also explore the effectiveness of the "pan-ethnic" identity in contemporary US politics.

**POLS 1360. U.S. Gender Politics.**

This course covers the politics of U.S. women as activists, voters, candidates, and elected officials. What explains the emergence of the modern-day women's movement? How do women win political seats? Do women legislate differently than men? How did women become legislative and party leaders? How does sexuality and gender affect U.S. electoral politics? This course will also consider the ways in which social class, race-ethnicity, marital status, parenthood, feminism, religiosity, political orientation, and cultural beliefs or stereotypes influence women's public policy and social beliefs. To what extent does gender define all women's political and social viewpoints?

**POLS 1380. Ethnic Politics and Conflict.**

Course focuses on the politics of rising national consciousness and the development of ethnic conflicts. It covers sources of contemporary nationalism; nationalist political mobilization; emergence of conflicts; impact on societies of internal strife and wars; international interventions; explanations for resolution or persistence of conflict; politics of post-conflict states. The course combines analytical texts and case studies. Cases from Eastern and Western Europe, North America, South Asia, and Africa.

**POLS 1390. Global Governance.**

Examines the institutions and the processes by which states and other actors seek to provide "governance" in the international system. The class explores the history of, and various theoretical perspectives on, the role of the UN and other international organizations in the state system. It also considers their roles in a range of political, military, economic, environmental, and humanitarian issues. Pre-requisite: POLS 0400

**POLS 1400. Europe and America.**

Explores the contours of North Atlantic international politics through a variety of theoretical lenses. Examines the grand outlines of European, American, and transatlantic international affairs; the politics and legacies of the Cold War; and the history, theory, and politics of European integration. Then turns to North Atlantic affairs and transatlantic relations post-Cold War, and to Europe and America in the (twenty-first century) world to come.

**POLS 1410. International Security in a Changing World.**

Analyzes the most pressing global security problems today utilizing current theories of international politics. Examines the changing nature of security threats and considers the likely challenges we will face in the future. Issues covered include the causes of war and peace, weapons proliferation, terrorism and insurgencies, the role of technology, pandemics, humanitarian intervention and human security, and alliances and collective security. The course will include an international security simulation exercise. Pre-requisite: POLS 0400.

**POLS 1415. Classics of Political Economy.**

Traces the most important classical statements of political economy through consideration of the major contributions to the "political" study of the economy from the seventeenth century to the present; Locke, Ricardo, Smith, Rousseau, Mill, Bentham, Marx, Mill, Marshall, Keynes, Hayek, Friedman, and Lucas. By mapping the parallel evolution of the liberal/capitalist economy and the liberal/democratic notion of the individual, both a product of and a producer within this economy, the course will demonstrate the political nature of economics and the economic bases of politics. First year students require instructor permission.

**POLS 1420. Money and Power in the International Political Economy.**

Examines how the interaction of states and markets create distinct global monetary and political orders. Class analyzes the shift from the classical liberal Gold Standard through the Post-War Bretton Woods arrangements through to the globalized IPE of today.

**POLS 1430. Roots of Radical Islam.**

Why has radical political Islam emerged as a global threat in our lifetime? This course examines potential domestic sources, such as repressive governments and poverty, as well as international sources, such as U.S. foreign policy, with a special emphasis on the various strategies that governments of states with predominantly Muslim populations have taken toward political Islam. Instructor permission required.

**POLS 1440. Security, Governance and Development in Africa.**

Some of the fastest-growing economies in the world now lie in sub-Saharan Africa. Yet Africa is also home to some of the world's most corrupt and violent states. This course will provide a variety of lenses through which to view these and other paradoxes on the continent, with a focus on security, governance and economic development. Topics will include the long-term consequences of colonialism and the slave trade; the politics of independence; the causes and effects of crime, violence and civil war; democracy and democratization; the promise and pitfalls of foreign aid; and the challenges of building strong, stable states.

**POLS 1450. Development in Theory and Practice.**

Focuses on the political economy of development and underdevelopment. Topics include comparisons of state and market building among "early" and "late" developers, theories of development, prescriptions for development and their shortcomings, and the challenges for developing countries in the context of a globalizing economy.

**POLS 1460. International Political Economy.**

An introduction to the politics of international economic relations. Examines the history of international political economy and theoretical approaches to understanding it. Also analyzes several key contemporary issues in international institutions such as the International Monetary Fund and World Trade Organization, globalization and its consequences, and challenges in foreign economic policy-making.

**POLS 1465. Introduction to Political Economy.**

This class provides an introduction to topics in political economy with a focus on using basic models to understand both individuals and groups facing a variety of social dilemmas. Simple formal models will provide a framework for understanding problems in politics and political economy, including the collective action problem, prisoner's dilemma, coordination problems, and more generally the importance of formal and informal institutions in guiding social outcomes. The class surveys major thinkers in political economy and uses their ideas to understand major changes in society, markets, and states from an historical perspective.

**POLS 1470. International Negotiation and Conflict Resolution.**

Analyzes negotiation process in international relations. Emphasizes how the negotiation process impacts the relations among states, non-state actors, and multilateral institutions in international politics. Deals explicitly with the 'art and science' of negotiations as a means to resolve the conflicts and misunderstandings that are a ubiquitous feature of international relations. Includes simulation exercises and case discussions, drawing on issues ranging from formal diplomatic negotiations to the role of non-governmental organizations in promoting the resolution of international conflicts and on issues such as national and international security, as well as economic, environmental, and humanitarian concerns. Primarily for students with some prior background in the field of international politics. Prerequisite: POLS 0400 or instructor permission.

**POLS 1475. War and Peace.**

Why is armed force used in international politics? What are the causes of war, the preconditions for peace? How do political, moral and legal discourse shape the possibilities for peace? What is the role of violence in the formation of modern statehood and the contemporary international order? What are the interrelations between war and peace within a continuum of violence: what justifies both war and peace? When is military violence a solution to conflict, how is peace sustained? What are the psychological, social and economic effects of military conflict? What is the nature of military violence in peacetime?

**POLS 1480. Theory of International Relations.**

Provides an overview of basic thinking about international relations. Focuses on the conceptual fundamentals, grand intellectual traditions and main theoretical trajectories, and key scholarly disagreements that have shaped the discipline of international relations over the past century and on the principal theoretical fault lines that define it today. Also scrutinizes a number of central topics in contemporary international affairs. Prerequisite: POLS 0400 recommended but not required.

**POLS 1485. Global Justice.**

Traditionally, in a world formed by states, moral responsibilities of governments, private corporations and individuals have been confined within national boundaries. Today, economic and ecological interdependence as well as global migrations of capital, goods, people, ideas and diseases challenge the Westphalian distinction between the domestic and the international. Moreover, global problems challenge the traditional inter-state organization of the world. Does globalization also enlarge our moral responsibilities beyond state borders? If governments, private corporations and peoples begin to accept moral responsibilities beyond the boundaries of nation-states, how should the Westphalian inter-state structure be transformed to make room for cosmopolitan duties?

**POLS 1490. Building a Better World: Film and Social Change.**

This class explores some of today's key policy challenges: economic development and poverty alleviation, the provision of basic public services, corruption, management of natural resources, environmental protection, intergroup violent conflict, and related issues. For each topic, the course (1) presents the problem, (2) reviews potential solutions, (3) discusses failed approaches, and (4) identifies concrete successes. Examples are drawn from around the world. Instructor Permission required.

**POLS 1500. The International Law and Politics of Human Rights.**

Introduces students to the law and politics of international human rights; examines the construction of an international human rights regime and its influence on international politics. Will survey the actors and organizations involved in the promotion of human rights around the globe, as well as the obstacles. Will review competing conceptions of human rights, whether human rights are universal, problems of enforcement, and the role of human rights in foreign policy. Major topics include civil and political rights; economic, social and cultural rights; genocide, torture, women's rights, humanitarian intervention, and the international criminal court. POLS 0400 strongly encouraged as a prerequisite.

**POLS 1530. Gender, Slavery, and Freedom.**

Will examine how gender shaped slavery in the Americas. How did the experiences of enslaved men and women differ? Did the experiences of enslaved women result in specific practices that formed the basis for resistance to slavery and dehumanization? How did gendered experiences of slavery in turn affect the notions of freedom that were developed in post- emancipation societies? We will also consider how practices or ideas developed during slavery have contributed to the "afterlife" of slavery after official emancipation. We will analyze slavery as a concrete set of practices that were experienced and negotiated differently by enslaved men and women.

**POLS 1540. Politics of Nuclear Weapons.**

Nuclear weapons have occupied a central role in international politics since their introduction in 1945. As weapons of overwhelming destructive power, their use today would be widely regarded as a disaster, yet nations continue to rely on them for security and deterrence, as well as associate them with status and prestige. The advent of nuclear weapons has challenged traditional conceptions of power, security, defense, and even morality. Vast disagreements continue to exist about many aspects of these weapons. Today, nuclear weapons pose a major global governance challenge for the world.

**POLS 1550. War and Politics.**

This course provides an examination of the intersection between political ends and military means. This includes an overview of theories of military strategy and combat tactics including challenges related to terrorism, insurgency and counter-insurgency. The bulk of the class will cover, in depth, historical details of specific conflicts from the Peloponnesian War through the recent wars in Iraq and Afghanistan. Detailed discussion of the evolution of specific weapon systems and their impact on military tactics will be included. Student will be required to watch several films as part of the course requirements.

**POLS 1560. American Foreign Policy.**

This course provides an overview of American Foreign Policy since World War I. The emphasis will be on defense and security policy, and not on foreign economic policy. This course covers significant historical events and personalities over the course of the twentieth century. When events dictate, part of any given daily class may be devoted to current events in American Foreign Policy, with emphasis on their historical source and context. Prerequisite: POLS 0400.

**POLS 1570. International Law (INTL 1700).**

Interested students must register for INTL 1700.

**POLS 1600. Political Research Methods.**

Introduction to quantitative research methods in political science. Topics include research design, descriptive statistics, statistical hypothesis testing, and bivariate and multivariate regression. By the end of the course, students will have the requisite skills to intelligently consume and produce basic quantitative social science research. Enrollment limited to 24 sophomore, junior, and senior Political Science, International Relations, or Public Policy concentrators.

**POLS 1730. Politics of Globalization.**

This is the ultimate PPE course (Philosophy, Politics, and Economics). Will explain the big changes in world politics and political economy over the last two hundred years. Why did slavery end? Why did European imperialism and colonialism fade away? Why did World Wars happen? Why did the great powers set up a system of international trade and finance and who benefits from that system? What are the politics of migration? How do global oil politics work? Course is designed to provide students with a broad introduction to the field of international political economy to help address questions like these ones.

**POLS 1740. Politics of Food.**

How do politics and public policy shape the nature of farming and the price of food in the US? What is the extent of hunger and malnutrition in the country, and how do politics and public policy shape the responses to these issues? How well does government regulate the safety and healthfulness of food? This course will draw on a combination of case studies and scholarly work to examine these questions. The significance of globalization will also be considered but the emphasis of the course will be on American politics and policy. The course is not open to first-year students. This course is not capped but TA allocations are made based on pre-enrollment and the course might be closed the first day, depending on the availability of TAs beyond the original allocation.

**POLS 1750. Black Political Leadership.**

This course uses black political thought to understand historical and contemporary forms of black political leadership. It explores the diversity of voices, ideologies, and strategies adopted by black leaders to address an array of political and social challenges. It also focuses on how shifting goals, political contexts, and generational changes shape black leadership. Certain black leaders such as W.E.B. DuBois and Barack Obama are used to understand the different types of black political leadership.

**POLS 1760. Infrastructure Policy.**

The focus is on transportation infrastructure: roads, bridges, rail, transit and airports. How has our infrastructure developed over the past two centuries? Which presidents have been leaders? How does Obama compare with his predecessors? Who are the key actors in congress and bureaucracy that control the distribution of money? What are the key interest groups?

**POLS 1770. Education, Inequality, and American Democracy.**

How are public schools and the educational programs they offer products of political inequality? How might public schools remedy those inequalities or exacerbate them? This course examines the ways in which education contributes to democratic governance; how the development of American public schools builds on and reproduces political, economic and social privilege and inequality; and the promise and limitations of various types of reforms designed to redress inequality, including the Common Core. This course focuses primarily on the United States, but looks to other democracies, including Canada and Mexico, to understand the intersection of education, inequality and democratic governance.

**POLS 1780. Use of Symbols in American Politics.**

What do a flag, Martin Luther King, Jr. and socialized medicine have in common? They are all political symbols that have produced a strong public response. The political process is complicated beyond the understanding of most. But it becomes manageable when converted into sets of conflicting symbols. How does the public learn about political symbols? What is their role in the policy making process? Three types of symbols will be considered: community, regime and situational symbols. Course coverage limited to American domestic politics.

**POLS 1820A. American Political Development.**

No description available. Enrollment limited to juniors and seniors.

**POLS 1820B. Roots of Radical Islam.**

Why has radical, political Islam emerged as a global threat in our lifetime? This course examines potential domestic sources, such as repressive governments and poverty, as well as international sources, such as U.S. foreign policy, with a special emphasis on the various strategies that governments of states with predominantly Muslim populations have taken toward political Islam.

**POLS 1820C. The Political Theory of the Economy.**

What is an economy? Is an economy different from government? Or is 'the economy' a special way of governing people? Is capitalism an economy or a form of government? If the latter, what is distinctive about the ways of governing that are said to define capitalism? What principles should be invoked for the defense or criticism of a capitalist society? How should it be compared to its alternatives? This course asks these questions historically by pairing central figures in the history of political economy with important interpreters of them.

**POLS 1820D. Civil Liberties: Moral, Political and Legal Approaches.**

This course will examine major constitutional controversies within the context of wider debates in political and legal theory. Readings from Supreme Court cases and prominent texts in political/legal theory. Topics include free speech, privacy, abortion, takings and capital punishment. Prior course work in political theory or philosophy recommended. Enrollment limited to 20 juniors and seniors concentrating in Political Science.

**POLS 1820E. Pragmatism in Black and White: Race, Domination, and Democratic Faith.**

This course interrogates the emergence of the 19th century philosophical movement known as pragmatism, focusing on William James and John Dewey, and investigates its intimations and resonances in African American intellectuals such as Anna Julia Cooper, W. E. B. Du Bois, Alain Locke, and James Baldwin. We explore the crisis of religious certainty, and pragmatism's attempt to provide an alternative framework for thinking about democratic governance. We also investigate the persistence of racism that politicized a group of thinkers who, in various ways, overlapped with pragmatists as they offered a normative vision of democracy to address domination.

**POLS 1820F. Black Protest: Theory and Praxis.**

This course explores the theory and praxis of black protest in the Americas, which were formulated in response to the different racial orders that developed in the U.S. and Latin America. We will analyze how black populations mobilized to escape slavery, resist racial terror and white supremacy, gain rights from the state, protect black life, and overcome various forms of dehumanization. Examples will include anti-lynching campaigns in the U.S., the civil rights and other black movement of the 1960s, the Black Lives Matter movement, and mobilizations against "black genocide," police violence, and displacement in Brazil and other Latin American countries.

**POLS 1820G. Politics and Nature.**

This course investigates the politics of the relationship between people and the earth; examines the environmental consequences of this relationship as it currently exists, as well as its impact on human justice and freedom; and explores alternative political imaginaries and institutional forms that include the non-human, evaluating their implications for sustainability, justice, and freedom. In the course of considering the political relationship between human beings and the earth, we examine core political concepts including domination, freedom, agency, sovereignty, democracy, justice, liberalism, rights, representation, and the political. We also explore the relationship between politics and ethical life.

**POLS 1820H. Contraband Capitalism: States and Illegal Global Markets.**

This course explores the clandestine side of the global economy (including flows of drugs, people, weapons, and money) and state policing efforts. We will examine the organization of these activities, how they intersect with the state and legal economy, their relationship to armed conflicts, and how they shape (and are shaped by) domestic and international politics. Enrollment limited to 20 juniors and seniors concentrating in Development Studies, Political Science, or International Relations. Course is not open to students who have taken POLS 1020.

**POLS 1820I. Indigenous Politics in Hawai'i: Resurgence and Decolonization.**

Because kinship relationships to land and all existents of that land are fundamental to Indigenous Peoples, resurgence and decolonization must be studied in the context of specific Indigenous Peoples and the ways they resist colonial violence and build resurgent practices. This course then focuses on these issues with respect to Kanaka Maoli (Native Hawaiians). We will read works from Kanaka Maoli scholar/activists in order to understand the genealogy of Kanaka Maoli resistance and resurgent practices. We also engage with critical Indigenous thinkers in order to understand Indigenous political praxis that is shared across difference and those that are not.

**POLS 1820J. Dynamics of Agenda Building.**

How do new issues make the political agenda? Why aren't elections crucial? Who are the "problem pushers" and "solution savers?" How are they linked? What factors determine the life of an issue? The key processes include problem identification, conflict expansion through issue redefinition, the role of institutional actors and issue activists. Focus limited to domestic American politics. Prerequisite: POLS 0010. Enrollment limited to 20 juniors and seniors.

**POLS 1820N. International Relations in Europe.**

Reviews central issues in European international affairs from a variety of theoretical and analytic perspectives. Substantive issues considered include the politics of European integration, "Europeanization," European foreign and security policy, Europe as part of the North Atlantic world and transatlantic relations, issues of European identity and Europe in the world to come. Time also allocated for discussions of course participants' research. Designed mainly for advanced undergraduates, but graduate students are welcome. Enrollment limited to 20 juniors and seniors concentrating in Political Science or International Relations.

**POLS 1820O. Adam Smith: Philosophy, Politics and Economics.**

Referred to as the "father of economics" or "father of capitalism," Adam Smith was a moral philosopher, political thinker, and social scientist of the Scottish Enlightenment. A deep exploration of his major works including *The Theory of Moral Sentiments* and *The Wealth of Nations*, as well as the *Lectures on Jurisprudence* and his essays on philosophical subjects. We will grapple with big questions such as, "What is the nature of virtue and morality, and how do individuals learn moral behavior?", "What makes some societies rich and others poor?", and "What are the political preconditions and moral consequences of economic growth?"

**POLS 1820R. Extralegal Governance and the Problem of Social Order.**

This class studies cases of extra-legal governance to understand how people who cannot, or who choose not to, rely on strong, effective states facilitate social and economic order. The class does not cover or engage with normative and philosophical arguments. The entire focus is on a positive, social scientific question and the requisite engagement with empirical facts that this entails. The class will examine and test claims about whether it is possible for extra-legal governance to produce human flourishing.

**POLS 1820S. Two Liberal Traditions: English and French.**

What does it mean to be a liberal? In America, we regularly take our "liberal heritage" for granted, so much so that liberal principles are simply accepted as political necessities, even truisms. Many of these principles come to us from English thinkers like John Locke and John Stuart Mill. Yet theorists in the French tradition offered an equally rich, though distinct perspective on these values. We will consider the "two liberal traditions," Anglo-American and French, to gain a better grasp of liberalism's beginnings and its legacy. Can the study of liberal thought teach us anything about contemporary politics and economics?

**POLS 1820T. Race, Crime, and Public Policy.**

This course will provide students with an in-depth analysis of the social and political connections between criminal justice policies and race. The first section of the course will cover the concepts of race and ethnicity and the social construction of target populations. Secondly, students will learn what public policy is, how it is made, and methods of analysis. Next, we will cover the history of the criminal justice system and the creation of mass incarceration. Lastly, we will cover specific criminal justice policies and practices and their ramifications for the civil liberties and rights of racial minorities.

**POLS 1820V. Institutions: Questions of Power and Democracy.**

Institutions are constraints that structure political, economic, and social interactions. They consist of both informal and formal rules, evolve incrementally, connecting the past with the present and the future; history in consequence is largely a story of institutional evolution in which the historical performance can only be understood as a part of a story. Institutions shape the role of the state over time and are repeated patterns of behavior around which beliefs are deposited. Institutions are also political actors. Multiple disciplinary perspectives, careful scholarly analysis, and the search for recurrent historical patterns inspire this course offering and serve as its framework.

**POLS 1820W. Market Liberalism: Origins, Principles and Contemporary Applications.**

What is liberalism? What are the differences between capitalist, democratic and socialist versions of liberalism? Is it true that liberal theory has undergone a form of moral evolution between its "classical" and its "modern" forms? Are there common moral values that all liberals---capitalist, democratic and socialist---affirm? If so, by what dimensions of value are these rival liberal traditions to be distinguished? Enrollment limited to 20 juniors and seniors; all others require instructor permission.

**POLS 1820X. Democratic Erosion.**

This course explores the causes and consequences of democratic erosion in comparative and historical perspective. The course will provide an opportunity for students to engage, critically and carefully, with the claims they have doubtlessly already heard about the state of democracy in the US and Europe; to evaluate whether those claims are valid; and, if they are, to consider strategies for combating democratic erosion here and abroad. The course will be taught simultaneously at roughly two dozen universities, with a number of cross-campus collaborative assignments. Interested students should attend the first day of class to apply for admission.

**POLS 1820Z. The Rise of Populism and Illiberalism in East-Central Europe.**

Why are Poland, Hungary, and other East-Central European (ECE) States moving away from democracy, market economies and the European Union toward populist politics? After the collapse of Communism in 1989, ECE states embraced democracy, liberal economics and their 'return to Europe' after decades of Soviet domination. By 2007 all had entered the European Union, and political scientists viewed most as 'consolidated' democracies. In the years since, populist parties have emerged, won elections, and promoted illiberal, nationalistic and anti-EU policies. The class focuses on explaining this dramatic political change, focusing on economic pressures, identity politics, societal welfare, and other factors.

**POLS 1821C. Economic Freedom and Social Justice.**

Can capitalists care about social justice? This course considers the proposition that capitalists can, and should. Readings include a variety of classical and contemporary sources about the idea of economic freedom and its relationship to social justice. Enrollment limited to 20 seniors.

**POLS 1821G. Representation, Parties and Interest Groups.**

Examination of the role of political parties and interest groups in translating the will of citizens into policy outcomes. Covers the extent to which voters use party as a guideline, the possibility of a viable third party at the Presidential level, the effect of parties on Presidential/Congressional relations, and the interaction of interest groups and parties in politics. Enrollment limited to 20 juniors and seniors concentrating in Political Science and Public Policy.

**POLS 1821H. Authority and Legitimacy.**

What gives people in power the right to make and enforce laws? The course examines classic and contemporary conceptions of political authority and legitimacy. What is authority and when is it legitimate? Does legitimate authority depend on the consent of citizens, or on the justice of decisions? Can the people hold ultimate authority over the law, or is this merely empty rhetoric? Authors include Hobbes, Rousseau, Weber, Schmitt, Arendt, Althusser, Wolff, Nozick, and Habermas. Enrollment limited to 20 juniors and seniors.

**POLS 1821I. Issues in Democratic Theory.**

This seminar engages contemporary issues in democratic theory. Topics explored include the meaning of democracy (and the political consequence of different answers to that question); representation and citizenship; democracy and rights, (free speech, religious freedom, and privacy); democracy and judicial review; deliberative democracy. We will read works of political theory and United States Supreme Court cases. Enrollment limited to 20 juniors and seniors concentrating in Political Science.

**POLS 1821J. Rhode Island Government and Politics.**

Students participate in an approved internship in Rhode Island State Politics. Students will be expected to work 8-10 hours a week in an office of state government and, at the end of the semester, reflect on what they've learned. Enrollment limited to 20.

**POLS 1821K. Just War Theory.**

Survey of just war theory, with emphasis on ancient, medieval Christian, and contemporary thinkers. What standards should we use to judge the justness or rightness of a war and of conduct during war? Should our judgments on these separate phases of war be related? Who is the relevant agent? Where does its moral authority come from? Are there any post-war obligations? How has the ideal of the warrior/soldier changed over time and why? Prior coursework in the humanities or social sciences is required.

**POLS 1821L. International Relations of Russia, Europe and Asia.**

What role does Russia seek to play in the contemporary international system? Can NATO hold together as an effective military alliance willing and able to defend its member states? How is the rise of China affecting Russia, Europe and the international system? The seminar will discuss these and related questions, considering Russia's evolving relations with the centers of global power West and East, its efforts to retain control in the former Soviet space and to extend its reach into the Arctic; its agendas in trying to influence US and European domestic politics through 'soft' power, and related topics.

**POLS 1821M. War in Film and Literature.**

This course introduces students to a study of warfare, and some of the central issues raised in war, through the use of movies and novels. Central themes include civil-military relations, leadership, the role of women in war, managing the homefront as well as issues related to battlefield tactics and strategy. Students will be encouraged to address these topics in applications related to World War I, World War II, and Vietnam in particular. This course will take place in a seminar format which stresses discussion of the relevant materials. Enrollment limited to 20 juniors and seniors concentrating in Political Science.

**POLS 1821N. Political Journalism.**

Exploration of the development of political reporting and analysis of contemporary public affairs reporting. Will address key elements of the best political journalism, as well as the manner in which political journalism affects public opinion, political attitudes, and campaigns and elections. Enrollment limited to 20 junior and senior Political Science concentrators.

**POLS 1821O. Politics of Economic Development in Asia.**

It is accepted that development is not an economic phenomenon. Political processes are tied with economic development. Does the political system affect development? Does democracy slow down economic growth? If countries embrace political freedoms and market-oriented economic reforms, should one expect both to succeed equally? Since the Second World War, an enormous amount of intellectual effort has gone into understanding these issues. Asia has been at the heart of much of this literature. Emphasis will be on China, India and South Korea. Enrollment limited to 20 juniors and seniors concentrating in Political Science or International Relations.

**POLS 1821P. Political Psychology of International Relations.**

This course covers basic methods and theories in the use of political psychology to study topics in international relations. The second part of the course applies these models to particular topics, including leadership, group dynamics, and the role of emotion in decision making. Enrollment limited to 20 juniors and seniors.

**POLS 1821Q. The United States in World Politics.**

Examines major aspects of American foreign policy after the Cold War and 9/11 in terms of domestic and international challenges. Discussions of the United States as 'empire' and 'republic,' with independent research and a foreign policy game. Emphasis is on the connections between the processes of policy making and the substance of policies pursued. Prerequisite: POLS 0400. Open to senior Political Science and International Relations concentrators.

**POLS 1821R. State Sovereignty and International Law.**

How should international law affect domestic politics and authority? What kinds of international rules, regulations and norms are there? What authority do they have? Should states obey international law even when it conflicts with their interests and that of their citizens? Is a law-governed order attainable in a world of sovereign states? This seminar explores the evolution of international law and its relation to state sovereignty. Authors include Bodin, Gentili, Grotius, Pufendorf, Rabkin, and Held. Enrollment limited to 20 juniors and seniors.

**POLS 1821S. Women and Politics.**

How has the importance of gender in politics changed over time? Must women represent women? Can men also represent women? Do women and men participate politically in different ways? Why is there a persistent gender gap in political leadership? Do women campaign differently than men? What are "women's issues"? Do they affect all women equally? This course explores these and other questions, drawing on a range of literature from political science and public policy. We will also examine contemporary political debates and investigate varying ways in which the categories of gender, race and ethnicity, and other politically-relevant categories intersect. Enrollment limited to 20 juniors and seniors.

**POLS 1821T. Criminal Justice System.**

An examination of police, criminal courts, and prisons in the contemporary United States. Major topics include police discretion, plea bargaining, and theories of punishment. We will also examine the politics of crime, including federal efforts to influence these traditional state functions. Major assignments are based in the Rhode Island criminal justice system. Enrollment limited to 20 juniors and seniors concentrating in Political Science or Public Policy. Instructor permission required.

**POLS 1821U. Democracy and its Critics.**

To what degree does democracy help realize or impede important goals of social justice and prosperity? How much democracy do we really want, all things considered? Readings might include: Rousseau, Joshua Cohen, Alasdair MacIntyre, Jeffrey Stout, Diana Mutz, Bryan Caplan. Enrollment limited to 20 juniors and seniors.

**POLS 1821V. Democracy and Inequality in American Cities.**

Explores the relationship between democracy and inequality in contemporary American cities. The seminar considers different kinds of inequality - economic, political and group/horizontal - from the standpoint of national politics in the United States. The focus then shifts to the literature on urban politics in the United States, assessing the major contrasting theoretical perspectives on the causes of local inequalities in American cities. Finally, we focus on unequal access to public safety and justice. Over the course of the semester, students will be expected to carry out "fieldwork" involving first-hand observation of local inequalities in the Greater Providence area.

**POLS 1821W. The Politics of Race and Gender.**

Politicians and scholars make a number of predictions about political life based on assumptions about race and gender. This course examines the roles of race and gender in American politics with a particular emphasis on women of color. The course focuses in social movements, political participation, and political representation. Enrollment limited to 20 juniors and seniors.

**POLS 1821X. The Politics of Social Welfare in the Middle East.**

This seminar explores the politics of social welfare in the Middle East. The first section of the course examines the concept and origins of welfare systems in developing countries as well as the relationship between the state, NGOs, civil society and informal networks in social service provision. This segment of the course also provides an overview and brief history of welfare regimes in the Middle East as well as concepts of charity and justice in Islam. Enrollment limited to 20 juniors and seniors concentrating in Political Science and International Relations. Preference for remaining spots given to concentrators in Developmental Studies and Middle East Studies.

**POLS 1821Z. Peacekeeping and Statebuilding after Civil War.**

What can the international community do to keep peace in countries wracked by civil war? Why does peacekeeping succeed in some countries but not others? How has peacekeeping evolved over the past 50 years, what lessons have been learned, how can those lessons be applied to better anticipate, prevent and mediate civil wars in the future? This senior seminar addresses these questions through a combination of case studies, in-class discussions and debates, and readings from a wide variety of academic, policy and philosophical sources. While there are no prerequisites for the course, familiarity with quantitative data analysis will be useful.

**POLS 1822A. Nuclear Weapons and International Politics.**

This seminar explores the causes and consequences of nuclear weapons proliferation in international politics. Each week we will explore a different dimension of nuclear proliferation, drawing on academic theory and historical evidence. Specific topics examined include the causes of nuclear proliferation, nonproliferation and counterproliferation policies, nuclear strategy, the effect of nuclear weapons on international conflict, and nuclear terrorism. Enrollment limited to 20 junior and senior Political Science or International Relations concentrators.

**POLS 1822B. Foundations of Political Economy.**

This course is both historical and theoretical and overlaps with the disciplines of political science, history, economics, and political theory. Based around an in-depth reading of "the classics" of political economy, the course traces the evolution of political economy through a consideration of some of its major contributions from the seventeenth century to the present; Locke, Ricardo, Smith, Rousseau, Mill, Bentham, Marx, Keynes, Kalecki, Hayek, Friedman, Lucas and Minsky shall be examined.

**POLS 1822C. Congress.**

Takes a comprehensive view of the U.S. Congress, its structure, procedures, elections, parties, constituencies and its interactions with the president and the courts. The Constitution establishes the Congress as the first branch and guardian of the nation's purse strings. This course will examine the strengths and vulnerabilities of the modern Congress with its highly polarized political parties. Requires extensive reading, a detailed paper and active class participation. Students are expected to pay careful attention to current events in the U.S. Congress. Enrollment limited to 20 juniors and seniors in Political Science.

**POLS 1822D. Democracy and Education – A Focus on Jackson, MS.**

The primary purpose of this course is to immerse students in the history, culture, and politics of Jackson, MS, while developing research skills that help us better understand the current state of public education in Jackson. As a result, the course will draw on two different types of research. First, the course will cover humanistic research that informs us about the history and culture of Mississippi. Second, the course will also explore social science research that describes the way in which political and public schooling institutions of MS behave both in theory and in practice. Students will spend 7 days in Jackson, MS.

**POLS 1822E. Islam and Democracy in the Middle East.**

This course covers key questions, arguments, and debates concerning the relationship between Islam (as a rubric for identity and mobilization) and democracy (as a political form and value) in the Middle East. The course is organized around major topics concerning the history, culture, and politics of the Middle East since the end of World War I: Islam and modernity, nationalism and independence, authoritarian state building, the European imperial legacy, revolution and fundamentalist resurgence, political Islam and democracy, democracy promotion, and the future prospects for democracy in the region. Enrollment limited to 25 juniors and seniors.

**POLS 1822F. Social Movements and Struggles for Justice.**

Social movements struggle for many things: policy change, changes in social relations, fundamental changes in the structures of government. We will focus on how social movements struggle to achieve justice, and specifically consider how social movements interact with efforts to strengthen the accountability of states and the rule of law. We will examine the central debates of scholars who look at how social movements and the law interact, and reflect on whether and under what circumstances we think law is a useful tool for social movements, and when it may hinder the achievement of justice.

**POLS 1822G. The Political Economy of Hard Policy Problems.**

Will tackle the "hard problems" governments sometimes have to deal with. For example, while governments are often cajoled and enjoined to produce economic growth, especially during recessions, do something about economic inequality and social mobility, and improve the life chances of millions through purposive action, actually delivering these things is incredibly hard. These areas constitute "hard problems" for two main reasons. Economically, we don't really have much of a clue about how to do many of these things. Politically, there are powerful interests that like these areas of policy just as they are, and they work to keep them "hard problems."

**POLS 1822H. Patronage and Corruption in Comparative Perspective.**

In recent years, the issue of "governance" has attracted increasing attention. Why are some countries more corrupt than others? Why do some governments distribute government programs equitably, while others manipulate them for political ends? The purpose of this class is to characterize, examine, and, to the extent possible, explain the persistence of these "bad governance" practices in many democracies in the developing world. We will draw on examples from Latin America, Africa, and Asia, and we will also make comparisons with appropriate current and historical cases from Western Europe and the United States. Enrollment limited to 20 junior and senior Political Science concentrators.

**POLS 1822I. Geopolitics of Oil and Energy.**

Oil is the single most valuable commodity traded on global markets. This course is designed to introduce students to the international political economy and security dimensions of oil and energy. The course explores the industry's many impacts on politics and economics, including: Dutch disease and the resource curse; the relationship between oil, authoritarianism, and civil wars; the role of the rentier state; the influence of oil on international warfare; global energy governance (e.g., OPEC); political differences within OPEC; US energy policy and energy security. The materials focus primarily on the political economy of oil-exporters, especially those in the Middle East.

**POLS 1822J. Ethics of War and Peace.**

While killing another human being is widely considered a wrong, war - a social institution that involves such killing on a massive scale - is an accepted practice that brings honor to those who carry it out on behalf of their respective political communities. This course explores the ethical dimensions of this paradox: how and why institutionalized violence is sometimes conceived of as moral action and what moral distinctions make this conception possible. The course will investigate a range of ethical approaches to these issues - including just war, pacifist, feminist, and poststructuralist approaches - treating them both sympathetically and critically. Enrollment limited to 20 juniors and seniors.

**POLS 1822K. Laws of Violence.**

States kill. Law enforcement officers may kill to protect innocent victims. The military kills to protect the nation. And a handful of states still impose the death penalty. These are all lawful killings. This seminar introduces the basic elements of conventional theories of law and state, and explores the centrality that legalized violence plays in both the constitution of law and the state. The goal of the seminar is to identify and examine the constitutive though unstable relation between law and violence. Enrollment limited to 20 juniors and seniors.

**POLS 1822L. Comparative Constitutional Law.**

An introduction to constitutional law of other countries and a comparison of their constitutional law to U.S. constitutional law. We will read court cases and other materials from most of the G-20 countries including: Britain, France, Germany, Italy, Japan, India, Canada, Australia, Brazil, South Africa, Indonesia, the European Court of Human Rights, and the United States. Topics include: constitutionalism, judicial review, separation of powers, federalism, free speech law, freedom of religion, criminal procedure, rights to property or welfare, rights of privacy and human dignity, judicial policing of the political process, states of emergency, and constitutional amendment processes.

**POLS 1822M. Capitalism: For and Against.**

Is capitalism just, or is it exploitive? Does the value we place on freedom create a negative right to own property free from interference, or a positive right to a certain level of subsistence? Does capitalism ennoble culture, or debase it? Does it empower individuals, or alienate them? To what extent, if any, can capitalism's downsides be mitigated through redistributive schemes? This course will examine these questions through study of some of the seminal philosophical arguments for and against capitalism, from its origins to the present day.

**POLS 1822N. Freedom.**

This course examines the meaning and conditions of human agency and freedom with a special focus on the experiences of those who are marginalized. What do these experiences tell us about the social practices, political institutions, and self-understandings that are necessary to sustain individual freedom? How do ostensibly free societies such as the U.S. instantiate freedom successfully and where do they fail? How can we enhance the experience of individual freedom today, especially for members of marginalized or oppressed groups? Enrollment limited to 20 juniors and seniors.

**POLS 1822O. The Presidency.**

The individual who occupies the office of the President of the United States is one of the most powerful individuals in the world. The consequences of presidential leadership are enormous and well worth of study from multiple dimensions. This seminar will survey the origins of the modern presidency; leadership attributes of the chief executive; and how presidents have initiated, reacted, and managed domestic and foreign affairs. Topics include nominations, elections, staff and bureaucracy, rhetoric, public relations, the party system, the "imperial presidency," congressional relations, policies, and political science theories of the presidency. Enrollment limited to 20 junior and senior concentrators in Political Science and Public Policy.

**POLS 1822P. Defenses of Capitalism.**

The moral justification for laissez-faire capitalism accepted in late eighteenth century came under attack in the nineteenth. Will examine four schools of thought that arose to defend capitalism: schools of free-market economists, Protestants and Catholics, Ayn Rand's followers, and libertarians. We will find the differences between these schools are as charged and fundamental as any between capitalism and its critics. Primary sources (including Ayn Rand's *Atlas Shrugged*) will provide the bulk of our reading. The course will conclude with an application of the rival theories to a few current public policy issues. Enrollment limited to 20 juniors and seniors.

**POLS 1822R. The Politics of Food Security.**

There is enough food on the planet to feed everyone, and yet currently approximately 875 million people go hungry. Why is this the case? This course explores the politics of international food security, dividing the semester into four sections to examine food through the lens of development, human rights, governance, and security concerns.

**POLS 1822S. The Politics of Urban Transformation.**

This seminar examines political economic change in U.S. cities. The seminar considers various external forces that act upon the city, principally: (a) migration patterns, (b) economic and technological change, and (c) public policy. We will also consider how various groups and political leaders respond to these forces and on what resources they draw. The seminar pays special attention to political and economic change in Providence, Rhode Island. Enrollment limited to 20 juniors and seniors in Political Science, Public Policy, and Urban Studies.

**POLS 1822T. Politics of Health in the Global South.**

Public health poses some of the most pressing challenges of our times. Explores the political factors that shape health and access to health care in the Global South. How does the nature of the state and welfare policies and institutions shape health and access to health care? What is the role of non-state actors, whether NGOs, religious charities, "terrorist" organizations, or other groups, in assuring the basic health needs of populations in developing countries? How do ethnic or religious social divisions affect health and health systems? Why do some health crises capture the attention of powerful global actors? Instructor permission required.

**POLS 1822U. War and Human Rights.**

This seminar will begin by studying the rise and spread of the notion of human rights, examining some of the core debates over human rights, including their enforcement in times of war. It will then turn to the laws of war, focusing especially on the 1949 Geneva Conventions and the challenges posed to the Conventions by the rise of non-state actors wielding significant violence. Topics include child soldiers, war crimes, humanitarian intervention, torture, targeted killings, humanitarianism, and the international justice. Enrollment limited to 20 juniors and seniors concentrating in Political Science or International Relations.

**POLS 1822V. Pluralism and Democratic Imagination.**

In this course, we will investigate the contours of historical debates about pluralism and democracy in the public imagination. Our goal will be to make the terms "pluralism" and "democracy," which simultaneously serve as hollow tropes in contemporary political discourse and as the basis for a secular religious faith for many on the left and the right, more difficult. Rather than cleansing these terms of their complications, we will strive to see them from all sides, interrogating their maddening paradoxes and ugly undertones while never losing sight of their awesome possibilities. Enrollment limited to 20 juniors and seniors.

**POLS 1822W. Congressional Investigations.**

This seminar will explore the role that Congressional investigations have historically played at the intersection of politics, public policy, tension between the executive and legislative branches, law and media, focusing on certain of the seminal Congressional investigations that both reflected and re-shaped the politics of the day. These will include the Pecora investigation into the 1929 stock market crash, the Truman Committee investigation into defense contracting during World War II, the House Un-American Activities Committee, the McCarthy hearings, Watergate, the Iran-Contra hearings and the Senate Permanent Subcommittee on Investigations hearings into the financial services industry.

**POLS 1822X. Technology and International Politics.**

This seminar examines the connections between technological change and international politics. Technologies have always been central to how states conduct war, cooperate with one another, and rule their subjects. We will consider this connection both theoretically and through a number of historical and contemporary case studies of technological changes and their relationship to international politics, including the technologies of warfare, communication, and transport. It is strongly recommended that students have taken the introductory international relations course (POLS 0400) before enrolling in this seminar. Enrollment limited to 20 juniors and seniors.

**POLS 1822Y. Nuclear Nonproliferation.**

This seminar focuses on the challenges to the security of states and peoples posed by the spread of weapons of mass destruction and on efforts to control these weapons. The class will review the history and technology of weapons of mass destruction and will examine different explanations for arms control and nonproliferation outcomes. The course will analyze key contemporary issues including the prospects for the nuclear nonproliferation regime, global nuclear inequality, nuclear terrorism, nuclear energy, democratic control of nuclear weapons, and disarmament. Much of the course will focus on nuclear weapons but we will also consider chemical and biological weapons.

**POLS 1822Z. Social Attitudes and their Impact on U.S. Politics.**

The course first documents trends and sources of change in social attitudes. It then evaluates the debate between psychological, sociological and political explanations for opposition to social rights policies. We then transition from the policy realm to the impact of ethnic and gender attitudes on electoral politics. In this half of the class we will study how social attitudes have influenced present-day partisan and presidential politics, how parties and politicians use gender and ethnic appeals for electoral gain, how these attitudes affected presidential candidates in a post-social rights United States. Enrollment limited to 20.

**POLS 1823A. Constitutional Theory.**

Will introduce the key theories that have been put forward in the last 100 years in Constitutional interpretation and how the Supreme Court exercises the power of judicial review. We will read and study key works by famous constitutional theorists of the past like James Bradley Thayer, Alexander Bickel, Charles Black, and John Hart Elly as well as reading the works of contemporary theorists such as Ronald Dworkin, Richard Posner, Robert H. Bork Antonin Scalia, Richard Fallon, Larry Kramer, and Jack Balkin. We will devote one week to each theorist and class participation in discussions is expected. Open to juniors and seniors concentrating in Political Science and Public Policy. Prerequisite: POLS 1160 or 1170.

**POLS 1823B. Reforming the State in New Democracies.**

This course analyzes the politics and reform of the administrative state in new democracies. Our general focus will be on how electoral, legislative, and bureaucratic institutions affect the nature of governance in advanced and developing democracies. We will then focus specifically on the extent to which elected politicians are able to control bureaucrats. Finally, we will turn to several policy areas – civil service reform, regulatory and administrative procedural reforms and fiscal policy – and discuss the politics of each in comparative and theoretical terms. Enrollment limited to 20 juniors and seniors.

**POLS 1823C. Ancient Political Thought.**

What is the purpose of politics? Who should rule? What is justice? Plato and Aristotle instigated the tradition of political philosophy in the West, and our modern democracy is deeply indebted to their ideas. Yet their answers to many of the fundamental questions of politics differ dramatically from our own. Among other things, they valued virtue over personal freedom, duties over rights, and nobility of soul over equality of access. In this course we reflect critically on the value and implications of their ideas, and we evaluate our own modern political principles and practices in light of what they taught. Enrollment limited to 20.

**POLS 1823D. War and Peace in International Society.**

The decline in the frequency of interstate war and the illegality of international aggression are among the most significant changes in international relations in the last century. However, international violence has not disappeared from the world. This class charts and analyzes the changes in warmaking and peacemaking up to and through the twentieth century. How has the nature and practice of war changed? Are we entering an era of global peace? Other topics covered include mercenaries, plunder, peace treaties, and robots. Enrollment limited to 20 juniors and seniors in International Relations and Political Science.

**POLS 1823E. Market Democracy in Chile.**

Market democracy is a political philosophy that combines concern for social justice with concern for private economic liberty, a fusion of left and right ideologies in which governments and societies do not need to choose between social justice and economic freedom, but to strongly endorse both. Class discussions will focus on how to apply this model at the public policy level in Chile by examining a variety of texts in the libertarian tradition, classical and contemporary from both North and South American perspectives. Instructor permission required.

**POLS 1823F. Between Colonialism and Self-Determination: A History of the International Order.**

Explores the encounter between 'Europe' and the 'non-Western' world. The ways in which the Western international order has conceived and managed the encounter with the 'non-Western,' 'developing' or 'Third World.' This encounter has been fraught with violence and war. From the Spanish conquest of the 'New World' to the scramble for Africa in the 19th century, Western states have sought to extend their rule overseas by force. International order sanctioned violent colonial dispossession, recognizing titles to Western states – redefining overseas territories as terra nullius – and providing a general justification to colonialism. Enrollment limited to 20 juniors and seniors.

**POLS 1823G. Women and War.**

This course provides an examination of the links between the security of women and the security of nations. It explores the productive and reproductive roles of women in society from an evolutionary feminist perspective which identifies the female body as a site of important societal contestation. It investigates the reciprocal relationship between individual and societal choices and structures in areas as diverse as family law, development, education and the sex trade. Students will be required to watch several films as part of the course requirements. Enrollment limited to 20 juniors and seniors.

**POLS 1823H. Public Opinion.**

We will examine public opinion on a variety of current issues. The course's principal objective is to help students understand the role of public opinion in democratic governments. In addition, students learn how to integrate data analysis into their analysis of public opinion trends. Enrollment limited to 20 juniors and seniors concentrating in Political Science and Public Policy.

**POLS 1823I. Urban Politics and Policy.**

In this course, students examine the politics of urban America, and the causes and consequences of urban poverty and inequality. Enrollment limited to 20.

**POLS 1823J. Freedom, Work, Leisure.**

When are we most free, at work or at leisure? Is work the same as paid employment? Is leisure the same as idleness? When, in turn, are we unfree at work, and what kinds of unfreedom are we subject to that are peculiar to modern life? Such questions press with particular urgency at a time when both unemployment and overwork are major complaints, and when many people find that work takes up the majority of their day yet is unsatisfying. Readings will include philosophers like Aristotle, Bertrand Russell, G.A. Cohen and Charles Taylor, and writings from the sociology of work. Enrollment limited to 20 juniors and seniors.

**POLS 1823K. Are there Universal Political Values?**

Does one standard of goodness or rightness apply everywhere? Are political values local or relativistic? Are there different standards of justice and rightness, and so attempting to evaluate them all is simply hubris. Or might there be a spectrum with options somewhere between these two? Do such universal values exist and how to evaluate such values in the context of particular societies that change over time. We will read a number of texts on issues relating to liberalism, relativism, multiculturalism, and pluralism. Will focus on Montesquieu, whose insights raise fascinating questions as well as discuss contemporary issues.

**POLS 1823L. Human Rights: For and Against.**

Should, or do, human rights exist? If so, have they always existed? If not, where did they come from? We will search for historical and philosophical answers to these questions. Natural law and rights were invoked in the aftermath of the Conquest of the Americas, in the American, French and Haitian Revolutions, and in the founding of the United Nations. Yet, inalienable rights have not only had friends but also foes such as Jeremy Bentham or Karl Marx. We will examine how contemporary proponents and critics of human rights view their value and impact on domestic and international politics. Enrollment limited to 20 juniors and seniors.

**POLS 1823M. Democracy Among the Ruins.**

In 19th century US, certain kinds of motion/mobility were a new experience which, to some, meant freedom, and to others -- the end of meaning. Democracy was identified WITH speed, mobility, and destruction, specifically, the destruction of established public goods, social arrangements, traditions, laws of land inheritance, identities, and patterns of work. These day, these same things are identified with neoliberalism and are seen as threats to democracy, which is now often identified with slowness, deliberation, and procedure. In this seminar, we read two classic texts that explore these issues: Tocqueville's *Democracy in America* and Melville's *Moby-Dick*. Enrollment limited to 20 juniors and seniors.

**POLS 1823N. Nationalism: Problems, Paradoxes and Power.**

This seminar examines nationalism's historical evolution and reconstructs its role in contemporary political life. Drawing from a broad, interdisciplinary range of materials—from political philosophy to history and political science—the class interrogates the relationship between nationalism and other ideas considered constitutive of “modernity,” like capitalism and popular sovereignty. In so doing, the class aims to understand the sources of nationalism's enduring power. Despite predictions of nationalism's demise, we are currently witnessing its revival in the developed democracies of the West. What explains nationalism's persistence? What are the roots of nationalism's continued imaginative appeal and political potential?

**POLS 1823O. The Political Economy of Renewable Energy.**

Given the challenges presented by climate change, environmental degradation, and resource scarcity, virtually everybody agrees that “business as usual” in energy production and consumption is no longer tenable. Global-scale innovation has become imperative, particularly in the area of renewable energy. Costs must come down, new solutions must be developed, and new opportunities for deployment must be opened up. But there is more than just technology involved. As this course will demonstrate, energy systems involve the intersection of technologies, markets, domestic political institutions, interest groups, commercial strategies, and international competition. Enrollment limited to 20 juniors and seniors concentrating in Political Science and International Relations, others by instructor permission.

**POLS 1823P. Politics and Philosophy of Ayn Rand.**

This seminar will examine the political and philosophical thought of Ayn Rand (1905–1982). We will begin with her political ideology and continue to the philosophical foundations she claims justify that ideology. The latter quarter of the seminar will explore applications of her philosophy to foreign affairs, religion, current events, and areas of student interest. Our sources will include Rand's non-fiction essays, her novel *Atlas Shrugged*, the main exposition of her work *Objectivism: The Philosophy of Ayn Rand*, and criticisms by Robert Nozick and others. Enrollment limited to 20 juniors and seniors.

**POLS 1823Q. Democratic Theory and Globalization.**

What should democracy require in a globalized world? Is there a human right to democracy, so that all people should be governed democratically, or are there other legitimate forms of government? Should the United Nations and other international organizations be reformed to become more democratic? What does democracy call for when we affect the lives of people outside of our country? In this course, students will examine the leading ethical debates about democratic theory in an international context. It begins with three influential theories of democracy – the competitive, participatory, and deliberative – and applies them to important global issues. Enrollment limited to 20 juniors and seniors.

**POLS 1823R. Greek Tragedy in Politics, Philosophy, Theater and Film (MCM 1504C).**

Interested students must register for MCM 1504C.

**POLS 1823S. Crafting Citizens: Democratic Theory and Civic Education.**

How should liberal democracies educate members for citizenship? What is the appropriate role of the state in defining an appropriate civic education? Students will develop well-researched normative arguments on civic education policy. Will examine the tension in contemporary democratic theory between value pluralist calls for restraint on the part of the state and a liberal-democratic insistence on the need to promote and sustain allegiance to core values. Will draw on current empirical insights and controversies, will consider ways in which pressing needs for social action to counteract inequitable social dynamics may complicate a normative liberal democratic vision for civic education.

**POLS 1823T. Democracy and Crisis in Political Theory: Freedom, Order and Emergency Politics.**

What becomes of individual freedom, political equality, and the accountability of government to its citizens when a crisis breaks? What pressures are these core political values, and the institutions built to uphold them, placed under when our leaders have to tackle extraordinary circumstances where the security, integrity and perhaps survival of our societies are at stake? Can our representatives act outside the rules when protecting liberal democracy, without fatally undermining it? How can (and should) we think about and shape our political institutions and public debate to ensure our best chance of staying both free and safe?

**POLS 1823U. Individual Liberty and Mass Incarceration.**

Many of the most renowned theorists of classical criminologists were in fact self identified political economists and political philosophers amidst the classical liberal and enlightenment tradition. Patterns of crime and punishment have significantly changed since the enlightenment period. This course asks simply: what would the enlightenment classical liberals have to say about today's unique trends? Whereas Adam Smith was fascinated by and arguably successful in comprehending why some countries are rich and others poor; we borrow his analytical tool kit to investigate why some societies incarcerate more than others.

**POLS 1823V. Politics of Ethnic Conflict.**

Course looks at the politics of identity-based contention and conflicts. Why do some multi-ethnic states remain politically stable for decades, then collapse into conflict, while others end deep and violent divisions with peaceful resolutions? Why do authoritarian regional hegemony encourage or repress ethnic consciousness? Why are democratic federations under strain, and when does ethnic polarization result in genocide? The course addresses these questions through analytical case studies of recent and contemporary contention in post-Yugoslav states, Ireland, South Africa, Rwanda, China, Russia, and Iraq. We conclude with intensive case studies of the conflict in Ukraine and recent Scottish independence referendum.

**POLS 1823W. American Political Thought.**

This course surveys the various ideas and practices associated with the term “democracy” in the course of American political history. Its chief purpose is to give you an idea of how contested this term was in the course of our political tradition, as a means of situating our present political disputes in historical context. We examine rival conceptions and applications of democracy in the Revolutionary era, at the Founding, in Jacksonian and antebellum America, during the Civil War, in the Gilded Age and the Progressive era, through the New Deal, the 1950s, the 1960s, and the 1980s.

**POLS 1823X. Survey of Comparative Politics.**

Why do some countries develop authoritarian regimes, while others build democracies? Why do people protest only under some conditions? How do only some countries seem to thrive with a diverse, multiethnic society? These questions are among the most pressing within comparative politics yet we struggle to understand the underlying phenomena that yield the political behavior and institutions we observe across the globe. We will look at the methodological approaches comparative politics utilizes to answer these questions. As we do so, we will keep a critical stance as to what the field neglects or heralds as a concrete finding.

**POLS 1823Y. Global Governance.**

This seminar explores the changing nature of global governance. Governance refers to the systems of authoritative rules, norms, institutions, and practices by means of which the international community manages its common affairs. Emphasizing in-depth readings of sustained arguments, this seminar examines key global governance processes and how they differ across different issue areas. It explores the variety of actors involved in managing global issues, surveys emerging trends, and explores possible ways of improving the capacity of the international community to deal with global challenges. Key issues examined include the global economy, nuclear weapons, the global environment, and human rights and justice.

**POLS 1823Z. Gender and Public Policy.**

This course explores when and how gender matters to U.S. policymaking, and how views about gender affect the development and implementation of different kinds of public policies. The course will examine gender in the context of key parts of the policymaking process including agenda-setting, group mobilization, issue framing, institutional decision-making (in the executive, legislative and judicial branches), and policy implementation. Class readings will cover four different public policy domains including social welfare policy, health policy, abortion rights, and marriage equality. Students will be able to examine other policy domains in the course of classroom discussions and in their written work.

**POLS 1824A. Counterinsurgency and Civil War.**

Since the end of World War II, civil wars have killed vastly more people than interstate wars. Oftentimes, these conflicts have taken on the character of insurgencies, with rebels utilizing guerrilla tactics against more powerful state opponents. The goal of this course is provide students with a theoretical and historical understanding of this increasingly dominant form of conflict. Specific topics explored include the causes of civil war, mobilization and recruitment into rebel groups, patterns of violence, counterinsurgency, war termination, conflict recurrence, and the aftermath of civil war. Enrollment limited to 20 junior and senior Political Science or International Relations concentrators.

**POLS 1824B. Post Conflict Politics.**

What, if anything, can the international community do to keep peace in countries wracked by civil war? Why does international intervention succeed in some countries but not others? How can war-torn societies overcome the myriad challenges inherent in post-conflict politics, including disarmament, demobilization and reintegration of ex-combatants; repatriation of refugees; transitional justice; and reconciliation of wartime adversaries. This senior seminar addresses these questions through a combination of case studies, in-class discussions and debates, and readings from a wide variety of academic, policy and philosophical sources. While there are no prerequisites for the course, some familiarity with quantitative data analysis will be useful.

**POLS 1824C. Political Communication.**

This course will focus on the importance of written and oral communication in public decision-making, particularly in the Congressional context. The course will examine the impact on political interactions, and the influencing of public policy decisions and outcomes. The course will emphasize some of the practical tools for producing relevant, useful material in the professional policy and the political communications arenas. The course requires several writing assignments focusing on different public policy analyses and political communications tools as well as active class participation including oral presentations.

**POLS 1824D. Power and Prosperity in Urban America.**

Over the past twenty years, many American cities have experienced comebacks: growing numbers of upper-income residents have relocated to cities; downtowns have been transformed into lively arts and entertainment districts; and crime has fallen. How did cities achieve these transformations? Why were some cities more successful than others? How has the revitalization of cities affected the urban poor? The course will also examine the impact of the "Great Recession" on cities. Did the recession jeopardize recent gains in urban prosperity? How have cities coped with the fiscal strains presented by reduced tax revenues and limits on state and federal assistance?

**POLS 1824E. Liberalism.**

Liberalism is a political theory about the limitation of state power based on basic constitutional rights. These institutional mechanisms have been justified on a liberal philosophical outlook. This course examines the central values of the liberal worldview including freedom, equality, toleration, individualism, secularism, pluralism, constitutionalism and the public and private divide. The course offers a philosophical analysis of the main tenets of liberalism as well as critical and competing interpretations of each of the liberal values examined. The purpose of this philosophical and conceptual exploration is to understand the justificatory basis of liberalism and eventually assess its achievements and limitations.

**POLS 1824F. Meritocracy.**

First we will discuss the role of merit in politics. In a democracy, the most popular candidate wins. Often this is not the most competent candidate. Is that a problem? Could we justifiably constrain the democratic process in order to get more meritorious people in government? What are the theoretical limitations, and the benefits, of democracy? Second, we will consider how wealth and income should be distributed. In a meritocracy, citizens are not guaranteed equal prosperity, but they are guaranteed an equal opportunity to pursue prosperity. How efficient is such a society? And how just?

**POLS 1824G. Farms, Fisheries, and Politics.**

This seminar compares and contrasts the politics of agriculture and the politics of fisheries in the United States. The course examines the rise of the farm bloc and the agricultural welfare state, along with the evolving politics of the farm bill. It then turns to the governance of fisheries and the apparent disconnect between fisheries management and "fish as food." The final part of the course is devoted to a synthesis of perspectives on food and fisheries, including case studies developed through student research. Limited to Political Science concentrators.

**POLS 1824H. Minority Political Behavior.**

This seminar is meant to examine the history and contemporary role of minority groups in the U.S. political system. We will focus on political relationships between several minority groups and their relationship to political participation, party affiliation, voting coalitions, and public opinion, in addition to other groups. Throughout American history, the United States passed laws to restrict the rights of racial and ethnic minorities to purposely keep them outside the political system. In recent years, there has been a growing trend by political parties and politicians to court minority voters and promote diversity. We will explore the current state of racial and ethnic politics in the U.S.

**POLS 1824J. Culture, Identity and Development.**

There is a consensus, in scholarly and policy circles, on the importance of cultural processes and identity for a range of development outcomes across the world. There is far less understanding of how culture and identity influence development. The aim of this course is to develop this understanding. We will draw on readings across the social sciences as well as an analysis of development interventions across the globe to gain a comprehensive understanding of the ways in which culture and identity, conceptualized as actively constructed and changing, influence a range of outcomes including health, sanitation, education, inequality and economic development.

**POLS 1824K. The American Welfare State in Comparative Perspective.**

Will examine the development of social policy in the United States and the political conflicts that drive contemporary debates. We begin by identifying the distinctive features of American public policy, limited spending on the poor and the use of tax expenditures to achieve social goals. How the politics of race, immigration, gender, and federalism have shaped American approaches to social welfare. We will explore the role of public opinion, interest groups, and partisan polarization in shaping the agenda and outcome of reform efforts. Topics include diverse forms of public assistance, employment policy, health care, and social security.

**POLS 1824L. Environmental Political Thought.**

In our context of ecological crises, Environmental Political Theory (or Ecosophy) has boomed, attesting of the need for new concepts with which to think our unprecedented situation. Ecosophers think of nuclear energy, GMOs, climate change, the 6th extinction, etc. in terms of responsibility toward future generations, “de-growth,” sustainability, the anthropocene, Gaia, etc. This course will survey some major schools of thought within Ecosophy, highlighting the diversity of the environmentalist movement. We will focus on one common thread weaving eclectic ecosophical currents and concepts: the question of humans’ relationship to the nonhuman.

**POLS 1824M. The Politics of Race and the Criminal Justice System.**

This course examines the politics of race and the criminal justice system in the U.S. It proceeds in three parts. First, it examines the political origins and consequences of racial disparities in citizens’ interactions with the police, courts and prisons. Next, it considers how the public, the media, and politicians relate and respond to these issues. Finally, the course concludes by examining the prospects for reform and the consequences of inaction.

**POLS 1824N. Feminist Theory for a Heated Planet.**

The ecological crises - the “sixth extinction,” “global warming,” “the eruption of Gaia” - have forced many humans to challenge contingent boundaries drawn in more or less compelling ways in the Western world. Dualisms opposing nature to culture, the human and the nonhuman, the natural and the technological, the feminine and the masculine, seem more destabilized than ever. When geologists came up with a new epoch called the “Anthropocene,” feminist theory was well equipped to problematize this allegedly omnipotent “anthropos.” Reciprocally, queer, post-colonial, and feminist theories have re-thought the never so normative, hardly stable, greatly unknown, nature of nature.

**POLS 1824O. Democracy.**

In this course we will seek to understand the evolution of democracy as a word, as a regime type, as a decision-making mechanism, as a *modus vivendi*, and as an essentially contested concept. We will also probe the relationships between democracy and law, democracy and peace, and democracy and sovereignty.

**POLS 1824P. Markets Without Limits.**

In the last sixty years, the market economy has experienced a unique triumph across the globe. The main goal of this seminar is to analyze the moral boundaries of the marketplace. In particular, we will focus on getting a better understanding of which conditions make it morally permissible for modern societies to rely on markets to meet individual needs and to achieve social goals. In order to get a better understanding of the limits of the market, this course will focus on a few complex examples, such as the organ trade, prostitution, sweatshops, and surrogacy.

**POLS 1824Q. The International Politics of Climate Change.**

Addresses the problem of climate change from the perspective of political science, and in particular its international dimensions. Will provide students a chance to discuss the current state of affairs and to ultimately be able to form an opinion of what can and should be done to address the problem. Broadly, the course has two parts. The first part is a three-week introduction to the subject matter, addressing basic themes, mechanisms, and institutions. The second part is a seven week set of three units, each addressing a set of issues: common solutions to climate change, geopolitical debates, and future controversies.

**POLS 1824R. Democracy, Race and Education.**

This course is to be an in-depth investigation of the relationship between democracy and public education. We will explore different normative theories of democracy in education. We will highlight the centrality of race to education politics and policy. We will also analyze different forms of governance structure and key policy areas where questions of democracy become vital. The material covered in this course includes: political theory, empirical studies of political science, and applied studies of policy.

**POLS 1824T. Foreign Policy in the People's Republic of China.**

Will examine the foreign policy of the People's Republic of China. Will teach students theoretical perspectives on international relations and critically evaluate whether these theories explain past and present Chinese foreign policy. What explains China's historical use of military force? Why did the alliance between China and the Soviet Union fall apart despite their institutional and ideological similarities? Has China's leaders or its domestic institutions affected its international behavior? Why is China modernizing its military and how concerned should we be? To what extent has the world changed China and to what extent does it seek to change the world?

**POLS 1824U. Bleeding Heart Liberalism.**

What is libertarianism? In what sense can libertarians claim to combine the best of the “right” with the best of the “left?” Why do libertarians emphasize private property? Why are they skeptical of political agency? Are libertarians anti-democratic? Can they care about social justice? How do libertarians approach problems such as racism, sexism, militarism, state surveillance, global inequality, and environmental sustainability? This course will explore such questions, as illuminated by a variety of texts in the libertarian tradition, classical and contemporary. Instructor permission required.

**POLS 1824V. Women in Western Political Thought.**

Much of the tradition of western political philosophy has either ignored or justified the subordination of women, despite elucidating principles of alleged universality. This course challenges the traditional “canon” of western political thought by recovering a long—and often forgotten—history of debates, ideas, and texts written by, about, and for women. This course is intended for upper-division undergraduate students. Its methodological approach emphasizes close readings of texts in their historical context, but also draws on the approaches of contemporary feminist political philosophy as a framework for discussion and debate.

**POLS 1824W. Political Violence.**

This course explores the main debates on the causes and consequences of political violence. We will focus on three major topics: civil wars, state-sponsored violence, and terrorism. Since the end of World War II, domestic conflict has largely outpaced international wars as the dominant type of violence. But what makes civil wars so prevalent in recent years? What are the conditions under which a state decides to attack its own citizens? Why do some groups resort to terrorism while others use nonviolent tactics?

**POLS 1824X. People and populism: constructions, discourses and critique.**

Populism and populist politics are everywhere. However, it is far from being entirely clear what populism is and what this category ought to include. Prominent philosophical paradigms conceive populism as an ideology, as a discursive frame, as a strategy of mobilization, as a special configuration of political power inside and (maybe) outside liberal democracies. By combining sources from history of political thought and ideology critique with the most recent developments in the field, this seminar looks at how the people has been constituted, re-constituted, constructed and de-constructed in modern and contemporary times.

**POLS 1825F. Moral Pluralism.**

Moral pluralism is an unmistakable characteristic of modern liberal societies. Even though the dire conflicts of religion which fuel wars and civil unrest appear to be a thing of the past, fundamental moral disagreements are still plentiful today. These disagreements expose tensions among the core of ideas upon which liberal societies are built. This course explores moral pluralism and engages with questions such as: should the state be neutral in relation to different religious and moral convictions? Are there common values? How should citizens engage with each other when they debate controversial moral questions in the public forum?

**POLS 1825G. Race, The Classics and Democratic Theory.**

Rather than looking establishing wholly new traditions, many black political thinkers have chosen to engage with ancient narratives and concepts to arm contemporary struggles. Political theorists often overlook this strange choice. After all, these concepts have been used to justify anti-black assumptions. In this course we explore a series of black 'classical receptions' in which authors take up key classical concepts and enrich and extend them in their critiques of the US racial order. We will discuss this approach as well as the broader implications it has for democratic theory.

**POLS 1826I. Politics of Poverty in America.**

This course will examine various measures of poverty, debates about the nature of poverty, perspectives on what causes poverty, the characteristics of poverty in America, how the federal government uses policy to fight poverty, particularly since the War on Poverty began in 1964. The course will discuss recent trends in American poverty, and focus on the political effects of poverty and anti-poverty policy in the United States. This course will examine the relationships between poverty & civic participation, poverty & public opinion, poverty & race, poverty & health, and poverty & education.

**POLS 1826J. The History of Liberalism.**

Liberalism, we often hear today, is in crisis. Yet, do we know what 'liberalism' is? In this course, we will study liberalism's origins, development and legacy. Students will encounter a series of well-known and less well-known figures such as Montesquieu, Benjamin Constant, Tocqueville, Mill, Hayek and Raymond Aron. Four questions will guide our thinking: (1) are there different ways of justifying individual liberty? (2) What are the institutional conditions under which liberty can be preserved? (3) Is liberalism 'democratic'? (4) Do liberals require a certain type of morality from citizens?

**POLS 1910. Senior Honors Thesis Preparation.**

Concentrators who have given evidence of superior work in political science may be admitted to honors seminar on the basis of an application submitted in the spring of their junior year. Application and guidelines will be obtained on the Department of Political Science website. Prerequisite: Fulfillment of Methods requirement. Enrollment limited to 20 senior Political Science concentrators. Instructor permission required.

**POLS 1920. Senior Honors Thesis Preparation.**

This course is a continuation of POLS 1910. Political Science Honors students who are completing their theses should enroll. Prerequisite: POLS 1910. Instructor permission required.

**POLS 1924C. Political Communication (PLCY 1702F).**

Interested students must register for PLCY 1702F.

**POLS 1970. Individual Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**POLS 1971. Individual Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**POLS 2000. Strategies of Inquiry and Research Design.**

Introduction to research methods common in political science research. Topics include theory development, problems of explanation and causation, problem identification, research design, and other fundamentals of empirical research. FIRST YEAR POLITICAL SCIENCE GRADUATE STUDENTS ONLY. Enrollment limited to 14.

**POLS 2020. American Political Development.**

No description available.

**POLS 2025. American Social Policy in Comparative Perspective.**

This course provides a graduate-level survey of the politics that shape social and redistributive policies in the United States. We will consider what is distinctive about American social policy compared with social protection in other advanced economies. Will begin with different approaches to understanding variation in welfare states. Will examine distinctive features of American policy including reliance on tax benefits, federalism, racial politics, politics of gender, strategies of privatization, and housing in economic security. We conclude by considering factors that will shape the future of social policy including the politics of retrenchment, social investment, and racial and ethnic diversity.

**POLS 2030. Seminar in the History of Modern Political Thought.**

An advanced seminar in the history of modern political thought from Machiavelli to Foucault. Themes include the nature of political sovereignty and the basis of civil authority; the emergence of liberal constitutionalism; democratic, socialist and aristocratic critiques of liberalism; the meaning of freedom; the relation between liberty and equality; and the ideas of social progress and individual development. Graduate students only; qualified undergraduates with instructor's permission.

**POLS 2040. Institutions, Crime, and Violence.**

Will examine relationships and interactions among institutions, criminal actors, and violence. State-based institutions play an important role in explaining the level of disorganized or organized crime. Organized crime groups, in turn, influence both state-based institutions (for example, through corrupting officials) and other criminal activity, often by creating the "rules of the game" by which other criminals can act. Finally, both state-based and criminal actors and institutions influence the level of violence in society. Each of these three influences, and is influenced by, the others. This course offers the opportunity to better understand how these three factors relate to each other.

**POLS 2050. Preparing the Prospectus I.**

This course covers selected topics in research design and methodology and is designed to help students enrolled in the Political Science PhD program to write and defend a prospectus in their third year of study.

**POLS 2051. Preparing the Prospectus II.**

This course covers selected topics in research design and methodology and is designed to help students enrolled in the Political Science PhD program to write and defend a prospectus in their third year of study. Prerequisite: POLS 2050.

**POLS 2060. International Relations and History.**

This graduate seminar considers history both as a topic and as a method of international relations scholarship, and in other subfields of political science as well. We will read and discuss works that fall at the intersection of history and international relations, on topics including the sources of interstate conflict, the origins of the nation-state, and colonialism and postcolonialism. Open to Political Science Graduate students only.

**POLS 2070. U.S. Public Opinion.**

This class provides an introduction to the major theoretical approaches and applied research in the study of U.S. public opinion. We examine opinions on a variety of topics. Enrollment limited to 14 Political Science graduate students.

**POLS 2075. Social Groups in U.S. Politics.**

This class provides students an introduction to the major theoretical approaches and applied research in the study of the role of social groups in U.S. politics. This course surveys a number of social groups, including ethnics, non-ethnic women, and other social groups, including the poor. This course will identify the theoretical perspectives that structure the research on social groups in U.S. politics. What are the strengths and weaknesses of the methodological approaches used? Also, how could research in this area be improved? What are the major implications of the findings for public policy, policymakers, and democratic theory?

**POLS 2080. Market Democracy.**

Social democracy was the progressive political program of the 20th Century. Social democracy treats economic liberty as morally less important than civil or political liberty. Social democracy is often contrasted with libertarianism, a political system that treats the economic liberties of citizens as moral absolutes. Between social democracy and libertarianism there is conceptual space for a third view: market democracy. Market democracy treats economic liberty as on a par with civil and political liberty. This course examines the moral foundations of social democracy, libertarianism, and market democracy. Could market democracy be a progressive political program for the 21st Century? Graduate students only; qualified undergraduates with instructor's permission.

**POLS 2090D. Models of Excellence in Comparative Research: Classic Works and the Scholars Who Produced Them.**

Explores major works that span the range of theoretical approaches and intellectual styles in modern comparative research. Includes in-depth interviews with leading scholars where they reflect on their intellectual formation, their works and ideas, the nuts and bolts of the research process, and the evolution of the field. Enrollment limited to 14. Graduate students only; qualified undergraduates with instructor permission.

**POLS 2090G. Readings in American Institutions.**

This course is designed as a readings and research course for graduate students and advanced undergraduate students. Students will be required to read and analyze the latest work in political science in the subfields of American politics, including but not limited to: public opinion, voting behavior, presidency, racial politics and representation, legislative institutions, political economy, and bicameralism. Open to graduate students only.

**POLS 2090H. Readings in Comparative Politics.**

A research and readings course on political behavior -from voting to violence, which applies rational choice theory, the Michigan model, the social logic of politics, and other theoretical perspectives.

**POLS 2090I. American and Comparative Political Behavior.**

This course is designed for graduate students to explore the core theoretical concepts and empirical research in the fields of political behavior and political participation in the American and Comparative context.

**POLS 2100. Proseminar in American Politics.**

Introduction to broad issues in American politics. Topics include the interplay of political institutions in the American setting, public opinion formation, the process of policy-making, and voting behavior. Enrollment limited to 14. Graduate students only; qualified undergraduates with instructor permission.

**POLS 2110. Proseminar in Comparative Politics.**

Provides a survey of major approaches, issues, and debates in the field of comparative politics. Topics: state formation, revolutions and civil wars, ethnic conflict and nationalism, state-market relations; systems of representation, hegemony and domination, etc. Works of theoretical importance on each topic, focusing on authors' arguments and controversies within the literature. Open to graduate students only.

**POLS 2111. Comparative Politics Grad Research Workshop.**

The Comparative Politics Research Workshop will be a new core element of the doctoral program in the Political Science department aimed at helping students transition effectively from the coursework phase of the PhD to doing their own independent scholarship and presenting it in a public forum. The course will be required for all Political Science PhD students working in the area of comparative politics, will also be an available resource for doctoral students in other social science departments who are conducting research on topics relating to the politics, political economy, and society of countries around the globe.

**POLS 2112. Comparative Politics Grad Research Workshop.**

This course is a continuation of POLS 2111.

**POLS 2120. Proseminar in Political Theory.**

An overview of central debates in political theory today. Readings include contemporary writings on justice, liberalism, democratic theory, critical theory, feminism, power, multiculturalism, and citizenship and political economy. Enrollment limited to 14 graduate students in Political Science; advanced undergraduates may enroll with permission of the instructor.

**POLS 2121. Writing and Methods in Political Theory I.**

The study of politics requires historical and analytic, interpretive and normative, critical and genealogical, humanist and post-humanist methods. We will first look at reading and discussing assigned methodological material on language, interpretation, causality, history, gender, and genre, all relevant to the various approaches to political thought. Second will be the circulation, presentation and critique of graduate student papers. Each participant will be expected to present a pre-circulated, article length paper, and respond to a designated discussant, as well as field questions from seminar participants. The aim is to help students learn how to prepare their work for publication.

**POLS 2122. Writing and Methods in Political Theory II.**

The study of politics requires historical and analytic, interpretive and normative, critical and genealogical, humanist and post-humanist methods. We will first look at reading and discussing assigned methodological material on language, interpretation, causality, history, gender, and genre, all relevant to the various approaches to political thought. Second will be the circulation, presentation and critique of graduate student papers. Each participant will be expected to present a pre-circulated, article length paper, and respond to a designated discussant, as well as field questions from seminar participants. The aim is to help students learn how to prepare their work for publication.

**POLS 2130. Proseminar in International Relations.**

Surveys the main theoretical trajectories and intellectual disagreements that define International Relations as a discipline today. Positions examined include varieties of rationalism and constructivism; realism-liberalism-sociological approaches; and systemic and subsystemic theories. Also considers debates about the contours of contemporary world politics, America and the world, moral issues, and the links between theory and policy. Enrollment limited to 14. Not open to undergraduates.

**POLS 2131. Politics of Gender.**

Topics include gender and personal identity; the impact of gender on moral reasoning and political agency; feminism in relation to liberalism and radical democracy, feminism and the law; the gendering of political institutions and interstate relations; and the implications of multiculturalism for feminist politics. Open to qualified undergraduates with permission of the instructor.

**POLS 2135. International Order.**

This course investigates the roots of international conflict and security, with a special emphasis on political economy factors. As a field, international relations has gradually separated into two fairly distinct sub-fields, international political economy and international security. This course seeks to bridge the two. Special attention will be paid to understanding macro-historical shifts, such as the end of empire and the emergence of the Long Peace after World War II.

**POLS 2140. Contemporary Security Issues.**

This graduate seminar explores the transformed security landscape of the 21st century. We will cover prominent contemporary security issues and debates in the field of international relations, including internal war and international intervention, American primacy and the rise of China, the privatization of security, nuclear proliferation, cross-border crime and border security, and terrorism and counterterrorism in the aftermath of 9/11. Enrollment limited to 14. Graduate students only; qualified undergraduates with instructor permission.

**POLS 2145. Transnational Governance in the Global Economy.**

Will examine an array of transnational governance schemes which seek to address social and environmental problems in a globalized world. Whether it is global warming, deforestation in the Amazon, inhumane working conditions in Asian factories of global supply chains, limited access to medicine, or child poverty – the elaboration of cross-border institutions that potentially can help to resolve these problems is likely to require the involvement of variety of actors with different types of information and knowledge from geographically and socially distant parts of the world.

**POLS 2150. Democratic Theory, Justice, and the Law.**

This course will examine contemporary and historical work in the area of democratic political and legal theory. Topics include the relationship between democracy and individual rights, deliberative vs. aggregative conceptions of democracy, the substance/procedure controversy, and the role of judicial review in a democracy. Open to graduate students only.

**POLS 2155. The Political Economy of Labor and Development: The Future of Work.**

This seminar explores the relationship between work and technological change. New technologies have enabled machines to perform predictable (and in some cases unpredictable) tasks with increasing skill. The widely discussed improvements of “machine intelligence” have the potential to reshape labor markets across the world. Reactions among scholars, policymakers, and the public have varied from optimism about the social and economic benefits of these innovations to fears about the joblessness and inequality that might result. How can we understand the impact of new technological developments on the labor market, the experience of working, and the identity of workers?

**POLS 2160. International Political Economy.**

Graduate seminar that surveys the subfield of international political economy. Outlines the historical development of the subfield as it moved from questions of US decline to issues of international cooperation and compliance and back to issues of US decline. Places the US research agenda in comparison with schools of IPE in the rest of the world. Topics covered include globalization and distribution, development, IGOs and NGOs in the IPE, Public and Private Authority, the rise and fall of nations. Open to graduate students only.

**POLS 2165. Territorial Conflict.**

This graduate seminar examines the relationship between territory and conflict. Territorial claims have been central to numerous violent and intractable disputes, both between states and within them. Why, how, and when does territory become the subject of violent conflict? Topics covered in this seminar include the origins of territoriality, historical and contemporary territorial disputes, and theoretical explanations for these conflicts. Graduate students only.

**POLS 2170. Market-Liberalism: Origins, Principles and Contemporary Applications.**

This course explores the relationship between economic freedom and social justice. The economic liberties of capitalism have often been said to be in tension with the moral ideal of distributive justice. What are the economic liberties of capitalism and what moral value, if any, do they have? What does a commitment to social justice require? Why are libertarians traditionally skeptical of social justice as a moral ideal? How do liberal conceptions of social justice compare to socialist ones? Can capitalists care about social justice? Should they? Enrollment limited to 14. Open to graduate students concentrating in Political Science.

**POLS 2175. Ideas, Institutions and Politics.**

A Graduate level survey of the literatures on institutions and ideas in political science, and on occasion, in related fields. These literatures are often seen as rival bodies of literature. These literatures are in fact compliments, with much empirical work combining both approaches in a productive manner. The point engaging the literature in this way is to question the presumption that interests should remain the most popular conceptual tool for political science explanation. This is a puzzle when one considers that interests are always formed within, and are causally affected by, both institutional environments and the ideas that they enshrine.

**POLS 2180. Business-State Relations in the Advanced Industrial Countries.**

This seminar provides an introduction to debates in comparative political economy, focusing on the creation, evolution and reform of market institutions. Readings emphasize the affluent democracies, it covers debates that have direct implications for other regions, which are explored by interested students through related readings. We begin by surveying the classic works in political economy, including those of Smith, Marx, Polanyi, and Gerschenkron. We then examine the central historical challenges precipitated by economic growth over the last two centuries. Topics include the Great Depression, postwar reconstruction, inflation, corporate governance, social protection, economic development, post-socialist transformation, and the globalization of competition.

**POLS 2185. Political Theory of the American Constitution.**

This course will examine major constitutional controversies within the context of wider debates in political and legal theory. Readings will come from Supreme Court cases and prominent texts in political/legal theory. Topics will include free speech, privacy, abortion, and capital punishment. Our aim is two fold. We want to understand the basic framework and content of the United States constitution as it has been elaborated by the Supreme Court. But we also want to go beyond this legal understanding and to challenge existing jurisprudence. To this end we draw on classic and contemporary texts in political theory.

**POLS 2190. Comparative and Global Politics of Welfare States.**

Why and how have welfare states been constructed, and how are they adapting to globalization? How does gender map onto contemporary welfare states, and how do different systems of welfare provision affect women and men in labor markets, families, access to health care and education? How do growing markets, insecurity, and labor migration affect welfare provision? The course looks at formal and informal social provision, changing roles of men and women, privatization and informalization of welfare, drawing on case studies from Europe, Latin America, Asia and Africa. Enrollment limited to 20 graduate students and advanced undergraduates (with instructor's permission).

**POLS 2195. The Politics of Love and Friendship.**

What is the relationship between love, friendship, and politics? To what extent do the desires for care, affection, and companionship make themselves felt in political life? To what extent does politics require channeling or repressing them? This course examines prominent thinkers in the history of political thought who have dealt with these questions. By considering their compelling and contrasting perspectives on relationship between politics and the various forms of affection, love, and longing that are present in political communities, the course aims to equip students to think carefully about the proper place of love and friendship in politics today.

**POLS 2200. Fundamentals of Security Studies.**

This seminar surveys foundational and cutting edge research in the security studies subfield. The course largely takes a traditional view of the subfield in that it (1) focuses on the threat or use of military force, and (2) examines interstate rather than intra-state dynamics. The first four weeks of the course are devoted to reading and discussing several “great books” in the subfield, while the remainder of the course will expose students to a large number of classic and contemporary studies on various subtopics within security studies. Enrollment is limited to graduate students.

**POLS 2210. Governing Federal Systems.**

Federated systems of government present opportunities and challenges for democratic accountability, managing collective action problems, economic stability, and distribution of goods and services. Course will take up the theory and practice of governing federated systems using a comparative approach that examines federated systems in several countries including the United States, Canada, Germany, Brazil, and India. Questions this course will examine include: What helps explain the emergence, persistence, and erosion of federalism? What are the implications of federalism for democratic accountability? What are the implications of federalism for fiscal stability? What are the implications of federalism for political, social, and economic inequality?

**POLS 2220. Urban Politics.**

Covers a number of topics linked to urban politics and urban public policy. Topics include the politics of urban education, affordable housing, downtown development. Examines how state and federal policy actions have contributed to the nature of the urban condition; and how race, class and ethnicity are interwoven with urban politics and urban public policy. Enrollment limited to 14. Graduate Students only; all others by permission only.

**POLS 2230. Political Loss.**

This course will explore the concept of political loss as it has been sketched by political theorists. Questions of grief and grievance have been at the center of contemporary political debates in the U.S. and elsewhere, even as political theorists have begun to pay increasing attention to the relation between affect and politics more generally, and to the role of mourning and loss in political life specifically. While the course explores the concept of loss generally, it is particularly concerned with the central role narratives of loss have played in debates about racial justice.

**POLS 2235. Disobedience and Resistance.**

Should we to obey the laws that states make? Unsurprisingly, there are numerous counter-theories, practices of disobedience: revolution, mass strikes, sabotage, civil disobedience and conscientious objection. Other kinds of resistance – like mass protests, political strikes, and boycotts – hover on the border of disobedience itself. This course begins with a brief examination of theories of political obligation before moving to a discussion of different, concrete examples of disobedience and the political ideas that they produced. We will discuss revolution, mass strikes, and civil disobedience as paradigm cases of the political problems raised by actually existing, illegitimate laws and governments.

**POLS 2245. The International Political Economy of Global Finance.**

Although global finance is back in vogue since the 2008 crisis, it remains a frontier of research in mainstream political science. It is an excellent area to conduct research since it remains an 'open range' of inquiry. The course is divided into three parts. First covers classic accounts of the politics of global finance from within political science and related areas. Second focuses in on the best accounts of the 2008 crisis. Third discusses areas such as Risk Management, Hedge Funds, Money Laundering, Quantitative Finance, and Sovereign Debt that occupy the new frontier of political science research.

**POLS 2250. Extreme Politics: How Radicals Affect Political Change.**

Scholarship has increasingly focused on why radical groups emerge. Yet, there is little research to date on how and whether these groups actually have a socio-political impact. This course will examine the mechanisms whereby and the conditions under which political extremists affect political and/or social change across time and space. We will base our analysis on several historical case studies that deliberately vary radical groups according to important characteristics such as: the degree of their prominence in social and political discourse; the extent of their lifespan in a particular country; and whether their tactics include the use of violence. Graduate students only; qualified undergraduates with instructor's permission.

**POLS 2260. Comparative Politics and China.**

Will explore the main theoretical, empirical, and methodological approaches to the study of contemporary Chinese politics. Will relate these approaches to broader analytical issues in the field of comparative politics. What phenomena are generally studied in Chinese politics, and how are they studied? How are arguments made, and how could they be made more effectively? What is not studied that should be? How should regionally-focused empirical research be structured? What are the most effective ways to integrate area studies, broader comparative approaches, and theory? Course will prepare graduate students for dissertation research on China specifically and comparative politics more generally.

**POLS 2270. Political Economy of Industrial Development.**

Will explore the mechanisms by which assets, institutions, and governance interact to shape patterns of industrial development across the world. The seminar has four main objectives: 1) to review competing schools of thought on why some countries have attained the cutting edge of industrial development and upgrading while others have not, 2) to examine the relationship between evolving structures of industrial production and evolving conditions of politics in particular national settings, 3) to consider how conditions of globalization affect the developmental challenge for industrializing nations, and 4) to consider how new concerns surrounding environmental sustainability affect the process of industrialization.

**POLS 2280. Ecology and Political Theory.**

Explores the field's most important recent contributions to the study of political theory and the environment with a focus on several core questions: (1) What are the political challenges that current environmental issues generate today, and what challenges can we expect in the near future? (2) What obligations do we have to the natural world, including non-human animals and the inanimate environment? What are our obligations to other human beings and to ourselves in relation to environmental matters? (3) What political principles, institutions, and practices might best enable us to meet these obligations? Readings reflect diverse perspectives and methodological approaches.

**POLS 2290. Particularism in Latin America and Comparative Perspective.**

This course will characterize, examine, and explain the use of particularistic practices in today's democracies in Latin America and in comparative perspective. Among these practices, we pay most attention to the phenomenon known as clientelism. Graduate students only; qualified undergraduates with instructor's permission.

**POLS 2300. Latin American Political Thought.**

Latin American political thinkers, who have been tremendously influential in their own region, remain marginal to the canon of Western political thought. This course is an overview of the various traditions in the history of Latin American political thought. It examines the answers Latin American thinkers have given to some of the fundamental preoccupations of political theory from the perspective of the region's social and political realities. The course will introduce students to figures in Latin American political thought—such as Bartolomé de las Casas, Simón Bolívar, Domingo F. Sarmiento, José Martí, José Vasconcelos, José Carlos Mariátegui, and contemporary Latino political theorists.

**POLS 2320. Ethnic Conflict.**

What is ethnicity? What does it share with nationalism and in what respects is it different? Why do ethnic groups fight violently and kill wantonly, especially after living peacefully for a long time? Under what conditions do they manage their relations peacefully? Do people participate in ethnic insurgencies because of greed or grievance? Will ethnic groups disappear as modernity proceeds further? These questions will guide our intellectual journey over the semester. Graduate students only; qualified undergraduates with instructor's permission. Enrollment limited to 14.

**POLS 2330. Politics in India.**

This seminar will present Indian politics in a comparative and theoretical framework. It will focus on four themes: British India and Indian Nationalism; India's democratic experience; politics of ethnic and religious diversity; and political economy, concentrating especially on India's economic rise. Readings include the classics of the subfield of Indian politics and political economy, but also quite a lot of recent scholarship. Enrollment limited to 14 graduate students.

**POLS 2340. Political Philosophy of W. E. B. Du Bois.**

Through close readings of Du Bois's texts, we will explore the relationship between his political philosophy and his conceptualization of race at different stages of his intellectual and activist career as well as his understanding of democratic politics, the place of the black masses therein, and the status of women. We will also pay attention to Du Bois's retrospective self-criticisms, to his reliance on fictional and other artistic genres of writing to advance philosophical claims. Drawing on reflections by Du Bois and Locke, we will reflect on how to think about art as a site of moral and political transformation in matters of race.

**POLS 2350. Freedom.**

Examines the meaning of freedom together with the self-understandings, social practices, and political institutions that underlie and constitute it. Considers literature on freedom from the contemporary liberal, republican, and democratic traditions, including Berlin, Pettit, Arendt, Butler, and others. Open to graduate students only.

**POLS 2360. Ancients and Moderns: Quarrels and Continuities.**

Examines the political thought of Plato and Aristotle together with three modern thinkers whose work was especially influenced (or animated) by engagement with these ancient views of politics: Machiavelli, Rousseau, and Nietzsche. In exploring these moderns in particular, we also get a view of early modern, high modern, and postmodern receptions of the ancients. Enrollment limited to 14. Open to graduate students.

**POLS 2370. Political Philosophy and Economic Theory.**

Political philosophy relates to economic theory in two ways. It takes primary texts of economic theory and draws out their philosophical, ethical, and political implications. It also begins from normative theory, like theories of justice, and brings these independently developed principles to bear on economic concerns. This class takes both approaches. The first half will attempt read foundational economic thinkers (e.g. Jevons, Keynes, Schumpeter, Hayek, Polanyi) as political philosophers. The second half will take an external approach, looking at how competing libertarian, socialist, post-socialist, classical liberal and high liberal traditions (e.g. Smith, Friedman, Rawls, Cohen, Tomasi) think about economic freedom. Enrollment limited to 14.

**POLS 2450. Exchange Scholar Program.****POLS 2580. Introduction to Quantitative Research Methods.**

This course introduces students to statistical theory and quantitative methods commonly used in political science and public policy. The course focuses on statistical inference using multiple techniques of regression analysis and gives students opportunities to become proficient users of the statistical software package Stata as they develop statistical models and analyze their data. Enrollment limited to 14. Open to graduate students in Political Science only.

**POLS 2590. Quantitative Research Methods.**

An intermediate statistics course for graduate students. Topics include multiple regression, statistical inference, categorical dependent variable models, instrumental variable models, and an introduction to time series. Course readings and applications examine models used in different fields of political science and public policy including American institutions, comparative politics, and international relations. Open to graduate students concentrating in Political Science or Public Policy.

**POLS 2600. Survey Research.**

Public opinion is an essential element in politics. Understanding how and what mass publics think is critical for assessing the capacity of mass electorates to participate politically and how well political institutions represent mass interests. To understand public opinion we rely on the sample survey which allows us to make inferences about populations from representative subsets. But how should we design survey questionnaires, identify and properly construct survey samples, and analyze these data? This course addresses these topics and more.

**POLS 2970. Preliminary Examination Preparation.**

An independent study directed by a tenure-line faculty member of the Department of Political Science. Only second-year graduate students may register for the course; it is intended to provide a framework to help prepare for preliminary examinations.

**POLS 2971. Preliminary Examination Preparation.**

An independent study directed by a tenure-line faculty member of the Department of Political Science. It is intended to provide a framework to help prepare for preliminary examinations. This course is open to second and third year graduate students only.

**POLS 2975. Field Survey and Research Design.**

An independent study directed by a tenure-line faculty member of the Department of Political Science. Only third-year graduate students may register for the course; it is intended to provide a framework for producing a formal research design modeled on the dissertation prospectus.

**POLS 2976. Field Survey and Research Design.**

An independent study directed by a tenure-line faculty member of the Department of Political Science. Only third-year graduate students may register for the course; it is intended to provide a framework for producing a formal research design modeled on the dissertation prospectus.

**POLS 2980. Individual Reading and Research.**

An independent study course directed by a tenure-line faculty member in the Department of Political Science. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**POLS 2981. Individual Reading and Research.**

An independent study course directed by a tenure-line faculty member in the Department of Political Science. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**POLS 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**POLS 2991. Thesis Research and Preparation.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

## Population Studies and Training Center

The Population Studies and Training Center (PSTC) is a multidisciplinary unit organized to facilitate and strengthen research and graduate training in demography at Brown. Its core faculty associates are from the Departments of Sociology, Economics, and Anthropology. Other PSTC faculty are affiliated with the Department of Education, the Department of History, the School of Public Health, Institute at Brown for Environment and Society, the Watson Institute for International Studies, and the Spatial Structures in the Social Sciences initiative. This combination has led to an extraordinarily dense network of collaborations both within and across disciplines. The PSTC is a source of infrastructure and research support for associated scientists, and the nexus of intellectual activity for empirically driven and theoretically grounded scholars with population interests at Brown. The PSTC is a leader among demographic centers in several areas, including anthropological demography, multi-method data collection in the developing world, and the demography of Africa. The PSTC is also a key player in terms of the development of multi-method analysis and in the integration of demographic perspectives into the study of the process of economic development.

The PSTC provides a competitive interdisciplinary demography training program conducted in cooperation with Ph.D. programs in Sociology, Anthropology, Economics and the School of Public Health. The program is designed to prepare demography trainees to be successful scholars in their respective disciplines, and to give students the skills to successfully participate in the broad intellectual community of population studies. Degree requirements are described under the departmental listings, although all trainees are required to complete selected methods and interdisciplinary course requirements. Many PSTC students receive funding for their studies through Center training awards. Students who are not supported by PSTC fellowships obtain funding through research assistantships and support from the Graduate School. PSTC students also have an excellent record of obtaining competitive external support for their studies and research.

Those interested in learning more about research and training activities at the PSTC should visit the Center's website at [www.pstc.brown.edu](http://www.pstc.brown.edu).

## Portuguese and Brazilian Studies

### Chair

Leila M. Lehnen

Established in 1977 as a multidisciplinary center and granted departmental status in 1991, the Department of Portuguese and Brazilian Studies has a national and international reputation for excellence in research and teaching on the Portuguese-speaking world — a vast geographical area encompassing eight different countries on four continents (Brazil, Portugal, Angola, Cape Verde, Mozambique, Guinea-Bissau, São Tomé and Príncipe, and East Timor), in addition to long-standing immigrant communities in the United States. The department's programs focus on

the global nature of the Portuguese-speaking world, as well on specific geographical areas: Continental and Insular Portugal, Brazil, Lusophone Africa, and Luso-America. Undergraduate and graduate students are able to work with a distinguished faculty committed to both research and teaching, and to take advantage of the extensive resources on the Portuguese-speaking world at the Rockefeller, John Hay, and John Carter Brown libraries. Besides offering academic programs in Portuguese language, Portuguese and Brazilian literature, history, and culture, and ESL/cross-cultural studies, the Department of Portuguese and Brazilian Studies extends its resources beyond the immediate university community by organizing a varied program of cultural events, including lectures, concerts, and symposia. Exchanges with Brazilian and Portuguese universities, the publication of books and two scholarly journals, and consultation in bilingual/ESL curricular and technical assistance exemplify the department's broader social and educational contributions.

For additional information, please visit the department's website: <https://www.brown.edu/academics/portuguese-brazilian-studies/>

## Portuguese and Brazilian Studies Concentration Requirements

Portuguese and Brazilian Studies examines the Portuguese-speaking world, a large and diverse geographical and cultural area spread over five continents. Inhabited by two hundred fifty million people, this area includes Brazil, Continental and Insular Portugal, Lusophone Africa and Luso-America. Although concentrators are encouraged to examine the global nature of the Portuguese-speaking world, typically they focus on one of the specific geographical entities mentioned above. Concentrators will strengthen their Portuguese language skills (Portuguese 400 or the equivalent is a pre-requisite) and explore relevant Lusophone literature, education, history and social science. The concentration offers one program in language and literature and another that is interdisciplinary. Most concentrators study abroad in either Brazil or Portugal.

### Requirements

POBS 0610	Mapping Portuguese-Speaking Cultures: Brazil <sup>1</sup>	1
POBS 0620	Mapping Portuguese-Speaking Cultures: Portugal and Africa <sup>1</sup>	1
POBS 1030	Portuguese Stylistics: Advanced Language Study and Creative Writing	1
POBS 1800E or POBS 1800F	The Brazilian Puzzle: Confronting the Post-Colonial Legacy <sup>2</sup> The Lusophone World and the Struggle for Modernity	1
	Four additional courses from Portuguese and Brazilian Studies and/or related departments, such as History, Africana Studies, Political Science, Anthropology, Sociology, Music, and the Watson Institute. These courses are intended to develop students' specific interests within the concentration.	4
Total Credits		8

<sup>1</sup> One or both of these courses may be replaced by more advanced literature courses conducted in Portuguese.

<sup>2</sup> Conducted in Portuguese, the seminar brings the concentrators together for an interdisciplinary consideration of key topics in the Portuguese-speaking world. A research paper written in Portuguese is required.

### Senior Project (optional)

In addition to taking a POBS 1800-series concentration seminar, students may choose to complete a senior project attached to any course in Portuguese and Brazilian Studies and related fields, including the Concentration Seminar, the latter possibility to be made at the discretion of the instructor. The advisor of the senior project is the professor of the course from which the project stems. Projects are not limited to papers, and may include short documentaries, a visual arts project, or an oral history project.

## Portuguese and Brazilian Studies Graduate Program

The department of Portuguese and Brazilian Studies offers five graduate programs.

- Doctor of Philosophy (Ph.D.) in Portuguese and Brazilian Studies. For more information on admission and program requirements, please visit the following website: <http://www.brown.edu/academics/gradschool/programs/portuguese-and-brazilian-studies>
- Master of Arts (A.M.) in Brazilian Studies. For more information on admission and program requirements, please visit the following website: <http://www.brown.edu/academics/gradschool/programs/brazilian-studies>
- Master of Arts (A.M.) in Portuguese and Brazilian Studies. For more information on admission and program requirements, please visit the following website: <http://www.brown.edu/academics/gradschool/programs/portuguese-and-brazilian-studies>
- Master of Arts (A.M.) in Portuguese-Bilingual Education and Cross-Cultural Studies OR Master of Arts (A.M.) in ESL and Cross-Cultural Studies. For more information on admission and program requirements, please visit the following website: <http://www.brown.edu/academics/gradschool/programs/portuguese-bilingual-or-esl-education-and-cross-cultural-studies> (<http://www.brown.edu/academics/gradschool/programs/portuguese-bilingual-or-esl-education-and-cross-cultural-studies>)

## Requirements for A.M. Portuguese-Bilingual Ed and Cross-Cultural Studies

### All 8 courses required

POBS 1720	Literacy, Culture, and Schooling for the Language Minority Student	1
POBS 1750	Language, Culture, and Society	1
POBS 2010A	Language Theory and Curriculum Development	1
POBS 2020A	Applied Linguistics for ESL	1
POBS 2020B	Cross-Cultural Growth and Development	1
POBS 2020D	Theories in First and Second Language Acquisition	1
POBS 2020E	Research Seminar in ESL Education	1
POBS 2120A	ESL Methodology Assessment and Evaluation	1

## Requirements for A.M. ESL and Cross-Cultural Studies

### All 8 courses required

POBS 1720	Literacy, Culture, and Schooling for the Language Minority Student	1
POBS 1750	Language, Culture, and Society	1
POBS 2010A	Language Theory and Curriculum Development	1
POBS 2020A	Applied Linguistics for ESL	1
POBS 2020B	Cross-Cultural Growth and Development	1
POBS 2020D	Theories in First and Second Language Acquisition	1
POBS 2020E	Research Seminar in ESL Education	1
POBS 2120A	ESL Methodology Assessment and Evaluation	1

## Courses

### **POBS 0100. Elementary Portuguese.**

Designed for students with little or no preparation in the language. Stresses the fundamental language skills of understanding, speaking, reading and writing. Aspects of Portuguese and Brazilian culture are also presented. Uses a situational/natural approach that emphasizes communication in Portuguese from the very first class. A year course; only in exceptional circumstances is credit given for one semester alone.

### **POBS 0110. Intensive Portuguese.**

A highly intensive course for students with little or no preparation in the language. Stresses the fundamental language skills of understanding, speaking, reading, and writing. Aspects of Portuguese and Brazilian culture are also presented. Uses a situational/natural approach that emphasizes communication in Portuguese from the very first class. A two-semester sequence in one semester with ten contact hours each week. Carries double credit and covers the equivalent of two semesters. This course should be chosen, in the fall, by students beginning the study of Portuguese as sophomores who would like to participate in the Brown-in-Brazil Program as juniors. Offered every semester.

### **POBS 0200. Elementary Portuguese.**

Designed for students with little or no preparation in the language. Stresses the fundamental language skills of understanding, speaking, reading and writing. Aspects of Portuguese and Brazilian culture are also presented. Uses a situational/natural approach that emphasizes communication in Portuguese from the very first class. A year course; only in exceptional circumstances is credit given for one semester alone. Prerequisite: POBS 0100.

### **POBS 0280. Mapping Food, Eating Meaning, Making Community: A Welcome to the Lusophone world.**

This course explores the Lusophone world vis-à-vis the local, regional, and national culinary traditions of Brazil, Portugal, Luso-Africa, and Goa. Through a broad selection of cultural materials (music, film, television series, short stories, poems, visual art, etc) about cuisine in the Lusophone world. Students will gain introductory knowledge of Portuguese through brief instructional lessons. The class meets every 3-4 weeks to prepare and cook a class meal based on regional cuisines. This course focuses on creating: from a class zine to creative projects. The class will be taught in English with elements of Portuguese. No previous Portuguese language experience required.

### **POBS 0400. Writing and Speaking Portuguese.**

Designed to improve the students' ability in contemporary spoken and written Portuguese. Using such cultural items as short stories, plays, films, videos, newspaper and magazine articles, and popular music, students discuss a variety of topics with the aim of developing good communication skills. Attention also given to developing writing ability. A systematic review of Portuguese grammar is included. Prerequisite: POBS 0200, or POBS 0110, or placement. Conducted in Portuguese. Completion of POBS 0400 is the minimum requirement for participation in the Brown-in-Brazil Program. Offered every semester.

### **POBS 0610. Mapping Portuguese-Speaking Cultures: Brazil.**

Selected literary and cultural texts that serve as vehicles for a deeper understanding of Brazilian society. Literary materials will be taken from several genres and periods with special attention to contemporary writings. Other media such as film and music will also be included. Considerable emphasis on strengthening speaking and writing skills. Prerequisite: POBS 0400, placement or instructor's permission. Conducted in Portuguese.

### **POBS 0620. Mapping Portuguese-Speaking Cultures: Portugal and Africa.**

Selected literary and cultural texts that serve as vehicles for a deeper understanding of Portuguese and Luso-African societies. Literary materials will be taken from several genres and periods with special attention to contemporary writings. Other media such as film and music will also be included. Considerable emphasis on strengthening speaking and writing skills. Prerequisite: POBS 0400, placement or instructor's permission. Conducted in Portuguese.

### **POBS 0710. Modern Brazil Goes to the Movies.**

Looks at Brazil through the eye of the camera and focuses on topics such as migration, race relations, gender and family dynamics and social inequities in contemporary Brazilian culture and society. Students will read articles and critical essays relating to the themes of each film as they develop their oral and written language skills. Conducted in Portuguese.

### **POBS 0710A. (En)Gendering the Text: Gender & Sexuality in Latin American Literature and Film (GNSS 0710A).**

Interested students must register for GNSS 0710A.

### **POBS 0720. Racial and Gender Politics in Contemporary Brazil (AFRI 0710A).**

Interested students must register for AFRI 0710A.

### **POBS 0810. Belonging and Displacement: Cross-Cultural Identities.**

Focuses on the representation of immigrants, migrants and other "border crossers" in contemporary literature from Brazil and other countries. How do people respond to the loss of home and the shift to a new culture? Is "going home" possible? How do individuals deal with their dual or triple identities? Piñon, Lispector, Scliar, Rushdie, Saih, Cristina Garcia, V. S. Naipaul and others. Conducted in English. Enrollment limited to 19 first year students.

### **POBS 0820. "Coming Out" Jewish, Gay or Black: Mistaken Identity in Literature from USA and Brazil.**

Understood as the opposite of passing or assimilating, "coming out" evokes socio-psychological and cultural tensions between public and private identities that are becoming increasingly blurred. Ambivalent identities incite concerns about belongingness, marginalization, citizenship, dislocation, and diaspora. Feeling unfamiliar or displaced as a manifestation of cultural alterity can also lead to situations of mistaken identity. Recognizing today's shift away from essentialisms, this seminar will read fiction from the USA and Brazil by applying the tropes of "coming out" and belonging to illustrate the complex formations and ambiguous practices of identity construction. Enrollment limited to 19 first year students. Conducted in English.

### **POBS 0850. Comparative Approaches to the Literatures of Brazil and the United States.**

Brazil and the United States have much in common: continental territories, huge natural resources, dynamic economies and multi-ethnic populations. Yet, their histories and cultures are distinctive and unique, as suggested in Vianna Moog's classic symbolic contrast between the Brazilian bandeirante and the American pioneer. We will undertake a comparative study of the two countries' literatures over the past eighty years with an eye towards exploring contextual, thematic and technical analogies as well as differences. Faulkner, Ramos, Lispector, Morrison, Rosa, Scliar, DeLillo, Carvalho, and Doctorow. Some attention to music, film and the visual arts. Enrollment limited to 15. Conducted in English.

### **POBS 0910. On the Dawn of Modernity.**

We will analyze how a new mindset that would later be called modernity slowly emerged from the medieval world and how the trials and errors of the 15th and 16th century navigators helped shape that transformation. The seminar is interdisciplinary insofar as the readings will include developments in astronomy, geography, shipbuilding, mathematics, philosophy, as well as what could be called early anthropology, as stepping stones to the first scientific revolution. Conducted in English. Enrollment limited to: 19. Reserved for First Year students.

### **POBS 0915. On Cultural and Personal Identity.**

A close analysis of concepts such as cultural and personal identities by means of a variety of interdisciplinary readings, including a combination of essays and a set of works of literature by diverse authors from various countries and cultures.

### **POBS 0970. Tropical Delights: Imagining Brazil in History and Culture (HIST 0537B).**

Interested students must register for HIST 0537B.

**POBS 0990. Mapping Cross-Cultural Identities.**

How do we construct our own identity as life becomes a multitude of narrative threads intersecting and overlapping like roadways on a map? How do we reconfigure identities vis-à-vis those who surround us? We will investigate the ever-changing map of cultural identities and its repercussions on human existence via contemporary literature and a series of projects that incorporate the arts (visual, digital, literary) and oral history. Some of the writers include Julia Alvarez, Kiran Desai, Junot Diaz, Milton Hatoum, Chang-Rae Lee, Clarice Lispector, Dinaw Mengestu, Néilda Piñon, Salman Rushdie, Taiye Selasi and others. No experience in the arts necessary.

**POBS 1025. The Future of the Past: 21st-Century Fiction from the Portuguese-Speaking World.**

About a sixth of the twenty-first century is already over. What perspectives have contemporary writers of the Portuguese-speaking world brought to bear on the burning issues of the new century? How do literary narratives mold our thinking about the challenges of the present and the burdens of the past? What can the writing and reading of fiction do to change the way we see ourselves and each other? Readings and films from Angola, Brazil, Guiné-Bissau, Mozambique, and Portugal. One previous course in literature recommended. Conducted in English.

**POBS 1030. Portuguese Stylistics: Advanced Language Study and Creative Writing.**

An intensive writing course covering basic genres: letter, short essay, diary, short story, and poetry. Students write five pages per week on five different preassigned topics that range over a wide variety of subjects. Exposes students to idiomatic and stylistic writing in a multitude of areas. In class, students read and comment on each other's writings. Enrollment limited to 20. Conducted in Portuguese.

**POBS 1070. Plugging into Brazil: Print, Television, and the Internet.**

We will investigate the many nuances of the Brazilian media in its various forms and discuss Brazil using newspapers, leading magazines, current television broadcasts and the Internet. What are the characteristics of the Brazilian media? How does the media shape the views of Brazilians living in Brazil and those abroad? What is the role of the Brazilian media in a globalized world? Conducted in Portuguese. Prerequisite: One of the following: POBS 0610, 0620, 0710, or consent of the instructor.

**POBS 1080. Performing Brazil: Language, Theater, Culture.**

Designed to deepen the students' understanding of Brazilian culture and society through the performing arts. Students will read a series of plays and respond to them in a variety of ways: in writing, verbally, and through performance. The course will include poetry and music as these can also be performed. Throughout the semester students will also be working on creating their own performance pieces. Conducted in Portuguese.

**POBS 1090. Portuguese-speaking Cultures Via Film.**

We will view and discuss films from Brazil, Lusophone Africa, Portugal and other regions as vehicles to understand the cultural diversity of Portuguese-speaking countries. Readings will include related fiction and non-fiction focusing on immigration, gender, race, family dynamics and social inequality. Students will write a series of short papers and develop a final project in consultation with the instructor. Particular attention will be paid to contemporary Brazilian cinema. Prerequisite: POBS 0610, 0620, 1030, or 1080, or instructor permission. Enrollment limited to 20. Conducted in Portuguese.

**POBS 1210. Afro-Brazilians and the Brazilian Polity (AFRI 1210).**

Interested students must register for AFRI 1210.

**POBS 1370. US and Brazil: Tangled Relation (HIST 1370).**

Interested students should register for HIST 1370.

**POBS 1500A. African Literatures of Portuguese Expression.**

A survey of representative African narrative literature of Portuguese expression (Cape Verde, Guinea-Bissau, São Tomé e Príncipe, Angola, and Mozambique). The selections will cover the periods before and after the independence of these former Portuguese colonies. Conducted in Portuguese. Enrollment limited to 40.

**POBS 1500B. The Azores – A World through Literature.**

For 500 years, the Azores – a nine island archipelago in the middle of the North Atlantic, have been a mandatory connecting entrepot between the world at large and Portugal and between the Western Hemisphere and Europe. The archipelago has produced an impressive body of literature that, particularly in the last century, has evolved into a body of works that reflects a collective personality with distinctive features. The course will analyze the most significant works of literature produced in the islands and in the Portuguese-American communities. Conducted in Portuguese.

**POBS 1500C. Brazilian Literature in Translation: Clarice Lispector-a Woman of Spirit.**

As Brazil's foremost woman writer of the XXth century, Clarice Lispector has received critical attention from French, Brazilian and American feminists. With the aim of appreciating her work comparatively, this course will examine four novels and four story collections from the following theoretical perspectives: existentialist, feminist, poststructuralist and Jewish hermeneutics. Conducted in English.

**POBS 1500D. Brief Encounters: Modernist and Postmodernist Brazilian Short Fiction.**

With Modernism and Postmodernism as the primary theoretical frames, we will examine the aesthetics of short fiction by discussing short stories and novellas from the 1920s to the 1990s that foreground the characteristics of these literary currents and their respective regional and urban expressions. As images of Brazil, this fiction will also be read within the context of feminist, hybrid, subaltern, and postcolonial stances. Conducted in Portuguese.

**POBS 1500E. Contemporary and Brazilian Fiction: New Paths and New Perspectives.**

Selected prose narratives from the 1970s to the present are read with the aim of identifying new paths and perspectives in contemporary Brazilian literature and culture that challenge traditional literary and cultural hierarchies as well as canonized aesthetics. Milton Hatoum, João Gilberto Noll, Caio Fernando Abreu, Marlilene Felinto, Sônia Coutinho, Roberto Drummond, Sérgio Sant'Anna, Rubem Fonseca, and others. Conducted in Portuguese.

**POBS 1500F. Contemporary Portuguese Women Writers.**

Analyzes women's discourse and proposes an interpretation of female characters in the works of six contemporary Portuguese women writers: Maria Velho da Costa *Maina Mendes*, Maria Teresa Horta *Ana*, Agustina Bessa-Luís *O Mosteiro*, Teolinda Gersão *Paisagem com Mulher ao Fundo*, Lídia Jorge *O Jardim sem Limites*, and Ivetta Centeno *Os Jardins de Eva*. By way of contrast, Mário Ventura's *A Revolta dos Herdeiros* is discussed as an example of how a male writer fictionalizes a woman as narrator.

**POBS 1500G. Cultural Politics of Hybridity in Modern Brazilian Fiction.**

Explores Brazilian fiction that manifests intersections between erudite, popular and mass cultures. With the aim of challenging unnatural polarities that separate these forms of cultural expression, the theme of hybridity will be examined in prose fiction from the 1960s to the present within the context of the development of the modern Brazilian novel and recent theories on cultural hybridization. Readings will focus on the socio-political and cultural implications of hybridization in prose fiction by such authors as Caio Fernando Abreu, Ivan Angelo, Ignácio de Loyola Brandão, Roberto Drummond, Rubem Fonseca, Clarice Lispector, José Agrippino de Paula, Adélia Prado, Sergio Sant'Anna, and others. Conducted in Portuguese.

**POBS 1500H. Esthers of the Diaspora: Female Jewish Voices from Latin America.**

Fiction by and/or about Jewish women from Brazil, Argentina, Venezuela, Mexico, Chile, and Cuba. Evoking the image of the biblical Queen Esther who lived between two worlds, these Jewish voices will be discussed from the perspectives of feminist, hybrid, diasporic, and transcultural theories. Special attention to Brazil's Clarice Lispector. The expression of the role of women vis-à-vis the immigrant experience will also be discussed. Conducted in English.

**POBS 1500I. Fiction and History (COLT 1810G).**

Interested students must register for COLT 1810G.

**POBS 1500L. Prophets in the Tropics-Latin American Jewish Writing.**

Compares the differences and the parallels between the narratives of the Jewish diaspora in Brazil, Argentina, Mexico, and Peru. As decentered dissenters in literature, these writers invariably address their diasporist situation vis-à-vis the larger society via such issues as immigration, cultural diversity, exile thinking, nationalism, discrimination, and postcolonialism. Prose by female and male writers, along with background materials in history, biography, memoirs, essay, and film. Conducted in English. Prerequisite: one 100-level literature course.

**POBS 1500M. Rereading Colonial Brazil.**

In the first part of the course we will discuss major literary and artistic achievements in Brazilian society during the first three centuries after Brazil's "discovery." In the second part of the course we will consider how novelists, poets (including song writers), filmmakers, visual artists and social scientists since Independence have reassessed the colonial period from a post-colonial position. Conducted in Portuguese.

**POBS 1500O. The "I" of the Beholder: Self-Examination and Self-Display in Modern Brazilian Fiction.**

This course will address the first-person impulse in modern Brazilian fiction with the aim of analyzing the process of self-consciousness vis-à-vis national identity, individualism, memorialism, authoritarianism, and subjectivity. The course will also consider the first person in the context of realism, modernism, regionalism, and postmodernism. Discussion will center upon prose by Mário de Andrade, Rachel de Queiroz, Antônio Olavo Pereira, Clarice Lispector, Lygia Fagundes Telles, Nélide Piñon, Ivan Ângelo, Rubem Fonseca, and others.

**POBS 1500P. The Personal Dynamics of Witnessing: Self-Interpretation in Brazilian Autobiographical Fiction.**

Analyzes first-person narration and the ethics of self-examination, self-display, and self-invention. First-person narrators are read as self-chroniclers who become subject and object, or spectator and spectacle, of their own lives. Readings from such writers as Mário de Andrade, José Lins do Rego, Cyro dos Anjos, Antóio Olavo Pereira, Clarice Lispector, Lygia Fagundes Telles, Nélide Piñon, Rubem Fonseca, and Sérgio Sant'Anna. Conducted in Portuguese.

**POBS 1500Q. The Sage of Suspicion: The Skepticism of Machado de Assis.**

Focuses on the major novels and short stories of Brazil's foremost realist. Presentations and discussions address character and narrative distrust as well as skepticism related to unreliable narrators and ironic voices. Also explores the sociopolitical picture of Brazil in the second half of the 19th century in the context of Machado's *Human Comedy*. Conducted in Portuguese.

**POBS 1500R. Twentieth-Century Portuguese Prose.**

Reading and textual analysis of some significant writers from Portugal, along with information related to their historical context. José Saramago, Lídia Jorge, Vergílio Ferreira, Helder Macedo, Agustina Bessa-Luís, and Rosa Lobato de Faria. Conducted in Portuguese.

**POBS 1500U. The Leaping Chameleon:Reconfiguration of Self-Identity and Culture in Contemporary Brazilian Fiction.**

Focuses on reconfigurations/redefinitions of concepts of identity -- personal and cultural in Brazilian prose fiction from the 1980s to the present. Protean forms and unstable subjectivities become apparent in fictional portrayals of aberrant and disfigured beings in liminal spaces, these serving as vehicles critical of urban strife, cultural instability, estrangement, and social segregation, written by authors such as André Sant'Anna, Bernardo Carvalho, Lilian Fontes, Marcelino Freire, Cíntia Moscovich, Ivana Arruda Leite, Luiz Ruffato, and others. Conducted in Portuguese.

**POBS 1500V. Modern Brazilian Theater: Nelson Rodrigues and the Dynamics of Performance.**

Reading the psychological, mythical and Carioca plays by Nelson Rodrigues will serve to define modern Brazilian theater. Exploring influences from Greek tragedy to Freud, discussions will focus upon social rituals and taboos Rodrigues dramatized to unmask Brazilian society. Film/taped performances and criticism will be studied for interpreting modes of performativity and as tools for cultural analysis to understand the distance between self and behavior. Conducted in Portuguese.

**POBS 1500W. The 'New Jew' and the Diaspora: Voices from Israel, Brazil and America.**

Studies Jewish identity and belongingness in Israel and the Jewish Diasporas of Brazil and America within the context of multiple homelands. If the concept of the 'New Jew' suggests alternative Jewish universes in which Israel is not the center, does this imply the end of the Jewish Diaspora? This course will debate this question via novels and short stories by some of the representative writers from the above three nations. Conducted in English. Enrollment limited to 20.

**POBS 1500X. Modern and Contemporary Brazilian Poetry: From Text to Performance.**

Introduces students to Brazilian poetry from modernists like Oswald de Andrade, Murilo Mendes, Cecília Meireles, Carlos Drummond de Andrade, and João Cabral de Melo Neto to contemporaries such as Augusto de Campos, Francisco Alvim, Arnaldo Antunes, and Ricardo Aleixo. In addition to the reading and discussion of significant works by a variety of poets and literary critics, the course includes a workshop component, in which participants will be encouraged to share their oral interpretation of poems of their choice. The course concludes with a poetry performance by the course members and other interested parties. Conducted in Portuguese. Enrollment limited to 15.

**POBS 1501A. Out of Portuguese Africa: Deconstructing Portuguese Colonialism in Literature.**

Examines both fictional narratives written in Portuguese by African authors and fictional works by Portuguese authors that focus on the colonial experience of Angola, Mozambique, and Cape Verde. Aims in particular at the critical analysis of Portuguese colonialism as a means to verify its specificity or lack thereof within the larger context of overarching European colonialisms. Conducted in Portuguese.

**POBS 1501B. Brazilian Biographies (HIST 1313).**

Interested students must register for HIST 1313.

**POBS 1501C. Interwar Fascisms and the Portuguese Estado Novo (1932-1945).**

Focusing on the interwar period and, this course studies the political nature of the Salazar's dictatorship (the so-called Estado Novo, New State) in its various facets: nationalism, political representations, repression, social policy, Church and State relationship). The Portuguese history will be placed within a wider context, privileging transnational connections and comparative approaches. Was the Portuguese regime a fascist one? What are the affinities and distinctiveness in terms of contemporary dictatorships (Fascism, Nazism and Francoism)? To what extent those regimes were connected? Conducted in English.

**POBS 1501D. Pathways of Brazilian Narrative.**

The seminar investigates Brazilian narrative from Modernism to the present, at relevant moments from 20th to 21st centuries. Modernism and modernization have dismantled the romantic emphasis on narrative forms and themes as a unitary vision of social and cultural identity. Macunaíma (1928), by Mario de Andrade opened to Brazilian literature a new kind of fiction that considers the multiplicity of a hybrid nation process of identification; a new paradigm re-using themes of exile, mobile identities, violence, terrorism, and interaction between the national and the global environments. Conducted in Portuguese.

**POBS 1501E. Histories of Global Health from Lusophone Africa: Biomedical Actions in Angola, Mozambique, Guinea.**

To explore histories of health, disease and global public health actions in Lusophone Africa: Angola, Mozambique, Guinea-Bissau. A broad approach to health considers sociocultural, economic, political and environmental factors. The anthropological take draws students' attention to the existing links between global structures, historical processes and power relations and patterns of ill-health, epidemics and biomedical responses or research in urban areas or in remote African villages in this part of the global south (c.1880s-2015). It unveils a century-old (western) morality underlying in public health programs, eradication visions, humanitarian actions, development discourses, security preparedness or other global health actions/mantras. Conducted in English.

**POBS 1501F. The Enlightened Censor.**

In this course we will follow the trajectories of 18th century Portuguese censors as they permit or forbid books by Voltaire, Rousseau or Locke, but also sermons, plays and dissertations. Is it possible that the censorship of the 18th century has shared with the Enlightenment so many key elements that it could be regarded more as an enlightened censorship than as an anti-Enlightenment censorship? The answer to this question will allow us to better understand the difficult birth of modernity and pluralism and the challenges both face today. In English.

**POBS 1501G. Remembering and Forgetting the Portuguese Colonial Empire Public Memory.**

This course explores the public memory and forgetting of the Portuguese colonial empire, from the colonial to the postcolonial period. Concentrating on the construction and reproduction of an official memory about the empire in the public space of Portugal, the course will also highlight the entangling between the former imperial metropolis and its former colonies. Also, broader connections will be established between the Portuguese-speaking world and wider European and global contexts. The purpose is to draw attention to the many ways in which colonial legacies are present today as a field of hegemony and ideological disputes.

**POBS 1520. Latin American Horror (GNSS 1520).**

Interested students must register for GNSS 1520.

**POBS 1600A. The Afro-Luso-Brazilian Triangle (AFRI 1020C).**

Interested students must register for AFRI 1020C.

**POBS 1600B. Colonialism, Nationalism and Gender in Portuguese India.**

This seminar focuses on Portuguese rule and discourse in India, from an anthropological and historical perspective. Colonialism and nationalism in India will be studied in relation to former Portuguese colonies in Africa as well as to other experiences in India under the British raj. Gender issues will also be addressed. Attention to the case of the *devadasi* (ritual dancers). Conducted in English.

**POBS 1600C. Cross-Cultural Perspectives on Education: Education and the Portuguese-Speaking World.**

A comparative education course focusing on schooling in Brazil, Portugal, Cape Verde, and these Portuguese-speaking populations in the U.S. The role of education in these diverse societies, as well as theories and methodologies for cross-cultural research and analysis, are explored from both historical and contemporary perspectives. Conducted in English.

**POBS 1600D. Portuguese Discoveries and Early Modern Globalization.**

Introduces the study of global early modernity through the lens of the Portuguese empire c. 1400-1700. Maps out the origins, motivations, and nature of Portugal's imperial expansion. Establishes the patterns of the Portuguese presence in the Atlantic and Indian Ocean. Emphasizes the dependence of the Portuguese empire on other societies, its institutional fragility, its social complexity, and the difficult relations between ideology and economy. Explores the idea of an early "cultural globalization" in religion, art and politics from Iberia to Japan via Brazil, Africa and India. Avoids the traditional idea of an exceptionality of the Portuguese overseas experience. Conducted in Portuguese.

**POBS 1600H. Politics and Culture under the Brazilian Military Dictatorship 1964-85 (HIST 1967L).**

Interested students must register for HIST 1967L.

**POBS 1600I. The End of Empires? A Global History of Decolonization.**

A comparative analysis of decolonization in the twentieth century. Provides a multidisciplinary analysis of case studies drawn from the Portuguese, Belgian, French and British colonial empires. Themes: genesis and rise of anticolonial nationalism; the role of international organizations in the end of empires; the role of the Cold War in the development and demise of colonial empires; the importance of the "global color line," and of human and civil rights debates on the crisis of legitimacy of the imperial and colonial worlds; the "modernizing missions" of late colonial empires and the legacies of colonialism in post-imperial societies. Conducted in English.

**POBS 1600J. Conflicts, Diasporas and Diversities: Religion in the Early Portuguese Empire.**

Focuses on the history of the early modern Portuguese religious world, covering such topics as religious diversity and oppression, the Portuguese Jews and their experiences of persecution and Diaspora, the role of the Inquisition, the establishment of the Society of Jesus in Portugal and the creation of a network of Jesuit missions in the Portuguese world, the Counter-Reformation and the evangelization of so-called gentiles and infidels, and messianic beliefs in the Kingdom of God. Primary sources include works by Portuguese chroniclers in translation, as well as the original editions housed at the John Carter Brown Library. Conducted in English.

**POBS 1600K. On the Dawn of Modernity.**

A look at the emergence of modernity and its conflicts with the classical world view as revealed in the writings of the Portuguese navigators (XVth and XVIth centuries) on their encounters with the non-European world. Readings will focus on fields such as astronomy, cartography, geography, shipbuilding, and anthropology, as stepping stones to the first scientific revolution. This literature has been practically unknown to non-Portuguese readers. Conducted in English.

**POBS 1600N. Portuguese-Speaking Africa and Anthropology from Colonialism to Postcolonialism.**

This course focuses on the anthropological knowledge of African sub-Saharan societies, the conditions and limitations of these studies during the colonial period and their continuity in contemporary subjects. Stresses the Portuguese colonial experience and the evolution of social sciences in African Portuguese-speaking countries. Conducted in English.

**POBS 1600O. Displacement: Colonialism, Migration and Transnationalism in Lusophone Societies.**

"Displacement" will be the starting point for the study of a range of classic and contemporary debates on colonialism, migration, slavery, plantation systems, gender inequities, racism, urbanization, transnationalism and global health issues. We will mostly refer to cases related to Portuguese colonialism and contemporary Portuguese-speaking societies - Brazil, Portugal, Cape Verde, Mozambique, Angola, the Asian enclaves and lusophone diaspora.

**POBS 1600P. The Last Empire: Portuguese Colonialism and Decolonization in Comparative Perspective.**

Adopting a comparative perspective, the course gives special emphasis to political, ideological and military dimensions of colonial rule in Africa. The first part deals with the evolution of Portuguese colonialism since World War II. The second part focuses on the process of decolonization after 1974, integrating the dissolution of the Portuguese Empire in the international context of the Cold War. Conducted in English.

**POBS 1600Q. Perceptions of the Other and Ethnographical Writing in Early Modern Portugal.**

Focuses on the privileged situation of Portugal as far as the knowledge of extra-European cultures in early modern Europe is concerned. The course examines agents, instruments and mechanisms of information gathering and diffusion of the "outer world" in Europe via Lisbon. The most important *topoi* of these Portuguese ethnographical representations will be discussed through a close analysis of a wide range of contemporary texts and visual records. Conducted in English.

**POBS 1600R. The Lusophone Black Atlantic: Cultures and Religions Across the Ocean.**

Addresses the cultural unity and differentiation within the Lusophone Black Atlantic, with a special focus on mobility, diaspora, and transnationalism. After a general introduction on the historical and cultural construction of the triangular relations between Portugal, Brazil, and Africa, including the consideration of such issues as luso-tropicalism, "creolization," and colonialism, we will move into the topic of Afro-Brazilian religions like Umbanda and Candomblé as a way to analyze how a matrix civilization was transported across the Atlantic to Brazil and back to Portugal. The issue of the transnationalism and mobility of such religions, accompanying the diaspora of Africans and Brazilians to Portugal over the last 20 years, will provide the basis for further discussion of the notion of "lusophone black cultures." The course bibliography includes anthropological texts as well as current Luso-African and Brazilian literature. Conducted in English.

**POBS 1600S. 17th Century Portuguese World.**

Analyzes the major historical events that influenced the Portuguese world under Habsburg rule and during the baroque movement. To question definition of Empire, nation, national identity, colonial spaces. It will examine Brazil during the Dutch invasion; the expectations of a future independence from the yoke of Spain; political, economic and religious situation after the Portuguese restoration in 1640; political and economic struggle that followed; the Portuguese Inquisition and the missionary efforts undertaken in Brazil; the prophetic and messianic expectations of the Iberian world (Catholic and Jewish); and the political and cultural aspects of seventeenth-century Ibero-American baroque culture. Conducted in Portuguese.

**POBS 1600T. Beyond Bossa Nova: Brazilian Music and Society (MUSC 1935).**

Interested students must register for MUSC 1935.

**POBS 1600X. Urban Latin America (LAST 1510I).**

Interested students must register for LAST 1510I.

**POBS 1600Y. The Portuguese Colonial Empire in a Comparative Perspective (XIX-XX Centuries).**

Provides an analysis of the historical transformation of the Portuguese colonial empire in Africa since the beginning of the nineteenth century, adopting a systematic comparative perspective, mainly with the French and British empires. Engages with some of the fundamental historiographical issues and debates that characterize the contemporary comparative study of *new imperialism*, and offers several case-studies for its understanding. Addresses issues such as slavery and forced labor, race relations, colonial science and law, colonial modernization and development, and colonial wars, while also examining political, religious and economic interimperial competition in a global context. Deals with a comparative assessment of the end of the European colonial empires and the legacies of imperialism and colonialism. Conducted in English. Not open to first year students.

**POBS 1600Z. The Making of Modern Brazil (LAST 1510J).**

Interested students must register for LAST 1510J.

**POBS 1601A. The Birth of the Modern World: A Global History of Empires.**

A multidisciplinary comparative analysis of the role of empires in the formation of the modern world and globalization since the 'new' imperialism of nineteenth century to the end of the colonial empires in the second half of the twentieth century. Case studies from several empires (Portuguese, American, Soviet, French and British) offer a global history of imperialism and colonialism. The links between imperialism, internationalism, nationalism, and modern racism; the relationship between imperial and colonial societies and cultures; the role of international and transnational institutions in the transformation of imperialism and the global emergence of human rights. Conducted in English. Enrollment limited to 40.

**POBS 1601B. Defying the Wind of Change: Portugal, Rhodesia and South Africa, 1961-1980.**

Examines the political, military, intelligence and economic ties between Portugal, Rhodesia (before and after its Unilateral Declaration of Independence in 1965) and apartheid-era South Africa as the three countries resisted calls for equal political representation for men and women of all races while exploiting their growing financial muscle as well as the circumstances of the Cold War. The bloc was undone by the Portuguese revolution of April 1974, which led to the independence of Angola and Mozambique, and left Rhodesia's borders exposed. Extensive use of recently declassified material gathered in Lisbon and Pretoria. Conducted in English. Enrollment limited to 25.

**POBS 1601C. From Dictatorship to Democracy in the Iberian Peninsula: Transformations and Current Challenges.**

Studies the origins and nature of the Franco and Salazar dictatorships, outwardly similar and largely concurrent, but in fact different in their aims, outlook and methods. Special attention to the personalities of the two dictators as well as the legacy of Spain's Civil War and Portugal's colonial Empire as elements of differentiation between the two regimes. The creation of democratic regimes in Spain and Portugal in the mid-1970s in the aftermath of prolonged dictatorships and the current political and economic challenges faced by these two countries are also considered in detail. Conducted in English. Enrollment limited to 25.

**POBS 1601E. Travels and Exhibitions: Writing, Collecting + Displaying the World in the 19th + 20th Centuries.**

To explore a cultural and intellectual history of the Portuguese-speaking world, concentrating on the circulation of objects, images, ideas and people within Brazil, Angola, Goa and different European spaces, from Lisbon to Paris. To discuss the history of science, the relationship between knowledge and colonial contexts, the interdependence between ideological agendas and exhibitions, the affirmation of national and imperial identities through spaces of visual and material knowledge. Through a series of comparative and transnational case studies this course will promote the crossing of contemporary theoretical questions engaging with historical written and visual sources. Conducted in English.

**POBS 1601F. Portuguese Literature and Cinema.**

This course consists of two main parts: studying the cinematographic adaptations of Portuguese literary texts; and examining the presence of a cinematographic influence in contemporary Portuguese novels. We will conclude with the study of films by Manoel de Oliveira. This is to trace the history of the inter-semiotic relationship between literature and the seventh art. To involve the analysis of diverse theories and methodological approaches in regards to the filmic adaptation of literary texts, (re)creative component of the transposition; to instill critical methods that will enable the student to analyze literary texts full of narrative techniques modeled on screen.

**POBS 1601G. The Politics and Government of Lusophone Countries.**

Ranging from regional powers to small island states, from consolidated democracies to hybrid regimes, from good governance to weak states and petro-states, the Lusophone world represents a diverse and stimulating political context. This course provides a systematic analysis of Lusophone political institutions and behavior, while considering the wider implications of the Lusophone experience. It is organized thematically, with topics including democratization; state structures; political institutions and culture; clientelism; and party systems. Each topic focuses on a set of Lusophone countries. While all Lusophone countries are considered, the cases of Portugal, Brazil, Cape Verde, Guinea-Bissau and Angola are particularly emphasized.

**POBS 1601H. Contemporary Migrations: Movements, Experiences and Policies of Belonging.**

Addresses theme of contemporary migrations, its visibility and strategic relevance (social, economic, political, demographic and cultural). Drawing on plural theoretical contributions, as well as empirical results from research carried out with Portuguese migrants in various sites and with diverse migrant populations based in Portugal, discussing: Contemporary global migration present and future trends; Portugal as an emigration and immigration context (particularities, tendencies, potentialities, obstacles); Daily-life aspects and experiences of migration (work, family, domestic life, culture consumption practices, transnational networks of belonging, association life); Identity, belonging and cultural (re)production strategies, tools and products. Approach to contemporary migration, emphasizing the discussion of data emerging from qualitative research.

**POBS 1601I. Media + Propaganda in Contemporary History.**

This course intends to study what was the role of the media and propaganda in the construction of the political reality by means an interdisciplinary and empirical analysis of several paradigmatic cases of the contemporary history in the lusophone and Iberian worlds. Special attention is paid to the following relevant topics: the historical evolution of the Portuguese media in the United States of America; the creation of the New State of Salazar in Portugal and the New Spain of Franco; the Portuguese diplomacy in the Spanish Civil War; or the transition to democracy in the Iberian Peninsula. Conducted in English.

**POBS 1601M. Migrants, Political Activism and the Racialization of Labor.**

Histories of white nationalism in US law and discourse to criminalize, marginalize and racialize migrant progressive politics and labor activities are explored through first-hand and secondary sources, discussions and site visits. Migrants challenging limitations on civic rights as a result of fluid and contradictory intersections of racial and ethnic categorizations are examined through a primary case example of Portuguese-speaking workers in North America over the 20th century from Europe, Atlantic Islands and Africa. Topics include socialist and communist labor movement; anti-immigrant laws; industrial capitalism's exploitation of migrant workers and role in racial marginalization; migrant agency and action for change. In English

**POBS 1601N. Politics of Indigeneity in Brazil (LACA 1503Q).**

Interested students must register for LACA 1503Q.

**POBS 1601O. The Portuguese Estado Novo. Visual Propaganda, Public Use of Past and Self-Representation.**

Starting with Pierre Nora's concept of *Lieux de Memoire* – places where the exhausted capital of collective memory condenses and is expressed – this course explores from two perspectives, the history of Portuguese Estado Novo. It embarks upon a chronological study of the period following the economic, political, and social transformations that had affected Portugal. ScrutinizeS how the Estado Novo created, used and re-adapted some Portuguese *Lieux de Memoire* in order to legitimize itself; shape the way Portuguese understand their country; generate a favorable image in Portugal and abroad. Conducted in English.

**POBS 1670. History of Brazil (HIST 1310).**

Interested students must register for HIST 1310.

**POBS 1671. Brazil: From Abolition to Emerging World Power (HIST 1312).**

Interested students must register for HIST 1312.

**POBS 1694. Comparative History of Abolitionism in the Atlantic World.**

To develop a transnational approach to the rise of abolitionism in the Atlantic world. In a comparative framework, tracing the rise of abolitionism in Europe, Americas, and Africa, examining the suppression of the transatlantic slave trade, the rise of colonialism in Africa, and the growth of forced labor in the wake of transatlantic slave trade. Deals with key debates in the literature of African, Atlantic history, including causes and motivations of abolitionism, relationship between the suppression of the slave trade and the growth of forced labor in Africa, the historical ties between abolitionism and the early stages of colonialism in Africa.

**POBS 1720. Literacy, Culture, and Schooling for the Language Minority Student.**

Focuses on increasing awareness of the intersection of language and literacy, the sociocultural influences on literacy development, and the application of diverse strategies that support the acquisition of second-language literacy. Combines a theoretical exploration of literacy processes and methodological implications with a clinical requirement of four hours weekly in a second-language field-teaching practicum. Conducted in English.

**POBS 1740. Artful Teaching: Intersecting the Arts with Foreign and Second Language Acquisition.**

How can we create meaningful experiences for those learning a foreign or second language? What makes the creative arts (art)iculate so powerfully and naturally with foreign and second language acquisition? How do the arts enable students to become aware of surrounding cultures while simultaneously acquiring a new language? This course will explore connections between the arts--visual, literary and performing--and language acquisition in a combined workshop and seminar approach. Readings will include authors Sheridan Blau, Augusto Boal, Shirley Brice Heath, Paulo Freire, Jan Mandell, Twyla Tharp, Jeffrey D. Wilhelm and others.

**POBS 1750. Language, Culture, and Society.**

Investigates the meanings of language, culture, and society and the interrelationship among them. Examines the functional and dysfunctional uses they can play in public education, particularly from the public school administrators' and teachers' viewpoints. Explores concerns directly related to the nature, quality, and future of English-as-a-Second-Language programs. Reflective activities, lectures, simulations, case studies, role plays, and small group discussions. Conducted in English. Enrollment limited to 25.

**POBS 1800A. "Que país é este?" Twentieth-Century Definitions of Brazil and Brazilianness.**

Focuses on three major areas: the portraits of Brazil from the late 1930s to the early 1960s, mainly by left-leaning intellectuals; the economic and political model of Brazil imposed by the military regime of 1964-1985; and the subversion of the official definitions of Brazil in the "anti-histories" of the *Abertura* period (1975-1985). Materials drawn from the social sciences, history, literature, and film. Authors include Sérgio Buarque de Holanda, Gilberto Freire, Vianna Moog, Paulo Freire, Golbery do Couto e Silva, Roberto da Matta, Caio Prado Jr., Richard Morse, and others. Conducted in Portuguese.

**POBS 1800B. Lusofonia: National Identities and Transnational Challenges.**

The creation of the Commonwealth of Portuguese-Speaking Countries has reignited debate concerning the roots, history, contemporary developments, and future prospects of the Portuguese-speaking world. This seminar focuses on key issues regarding the identities of the Portuguese-speaking nations, their interrelations, and their interactions with the wider world. A. de Quental, T. de Pascoais, Pessoa, G. Freyre, S. Buarque de Holanda, Vianna Moog, A. Sérgio, E. Lourenço, A. Cabral, and R. DaMatta. Conducted in Portuguese.

**POBS 1800C. Constructing Men, Projecting Masculinity: Questioning Gender, Sex, and Sexuality in Brazil.**

In this course we will examine how contemporary Brazilian cultural production – particularly literature and cinema – (re)formulates/questions/preserves traditional configurations of male gender identity. We will discuss constructions and representations of the male subject within contemporary cultural production, particularly focusing on the later-half of the twentieth century. More specifically, employing ideas of gender as a form of performance we will question gendered stereotypes and their intersections with race and socio-economic position, destabilize binary gender constructions / understandings, and offer queer readings of a multiplicity of texts. Conducted in Portuguese.

**POBS 1800E. The Brazilian Puzzle: Confronting the Post-Colonial Legacy.**

Brazilian intellectuals have often attempted to understand and explain the challenges in modern Brazilian society (political, economic, racial, educational) by pondering Brazil's Iberian roots and assessing the legacy of Portuguese colonialism. Manuel Bonfim, Sérgio Buarque de Holanda, Paulo Prado, Gilberto Freyre, Vianna Moog, Caio Prado, Celso Furtado, Paulo Freire, Oswald the Andrade, Roberto DaMatta. Attention to film, music and the visual arts. Conducted in Portuguese.

**POBS 1800F. The Lusophone World and the Struggle for Modernity.**

A study of classical writings from the Portuguese-speaking world dealing with the issue of modernity, focusing particularly on the Counter-Reformation and Baroque paradigms versus the Enlightenment. Portuguese, Brazilian and African writers such as Antero de Quental, Sérgio Buarque de Holanda, Vianna Moog, Amílcar Cabral and others will be read critically and in a comparative approach. Conducted in Portuguese. Enrollment limited to 40.

**POBS 1967L. Politics and Culture Under The Brazilian Military Dictatorship, 1964-1985 (HIST 1967L).**

Interested students must register for HIST 1967L.

**POBS 1970. Reading and Guided Study.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**POBS 1990. Research and Preparation of Honors Projects.**

This independent study course is designed for students working on honors projects. Written permission of the concentration advisor (Prof. Sobral) is required. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**POBS 2010A. Language Theory and Curriculum Development.**

Focuses on the application of language theory, methodology, and curriculum development procedure for classes enrolling English language learners. Participants focus on setting appropriate goals and objectives aligned with learning standards and develop appropriate curricula in several subject areas. Conducted in English.

**POBS 2020A. Applied Linguistics for ESL.**

Focuses on the linguistic development of bilingual children. Addresses three major dimension of language acquisition-linguistic, cognitive and sociocultural-within educational contexts for students of all ages. Conducted in English. Enrollment limited to 15 graduate students.

**POBS 2020B. Cross-Cultural Growth and Development.**

Explores physical, cognitive, social and emotional human development from a cross-cultural perspective. Part one analyzes child-rearing practices in agrarian and industrialized societies. Part two is based on case studies involving the ethnolinguistic groups in the Providence area, which are studied and discussed with implications for teaching and learning. Conducted in English.

**POBS 2020C. Educational Leadership in Diverse Settings: Research, Policy, and Practice.**

A series of lectures and discussions representing various perspectives and styles. Individual sessions focus on leadership issues surrounding standards, high stakes testing, and school reform initiatives. Most topics address leadership for low performing schools and for diverse student populations. Discussions led by prominent educational leaders. Some lectures may be open to the public. Conducted in English.

**POBS 2020D. Theories in First and Second Language Acquisition.**

Theory and current research relating to first and second language acquisition and learning are examined from a pedagogical perspective. Focuses on both learning and teaching a second language. Conducted in English.

**POBS 2020E. Research Seminar in ESL Education.**

Focuses on preparing students to conduct qualitative research in diverse educational settings. As a final project, students develop a comprehensive framework for a self-designed study. Conducted in English.

**POBS 2120A. ESL Methodology Assessment and Evaluation.**

An overview of the current principles, practices and approaches that inform assessment and evaluation for English language learners. Participants engage in class activities that duplicate selected assessment approaches and identify strategies for integrating assessment with planning and instruction appropriate to the language proficiency of students. Participants explore assessment research and theoretical background for an understanding of the complexity of evaluating student achievement. Conducted in English.

**POBS 2120B. Practicum in English as a Second Language.**

The practicum in ESL is an integrating and culminating experience in the Master's Program in ESL and Cross Cultural Studies. The course provides a review of the theories and concepts related to English as a Second Language. Throughout the course students apply what they have learned about teaching English language learners and reflect on their assessment, planning and implementation of second language teaching through group discussions and seminars. To participate in this course students must have access to ELs in a classroom setting.

**POBS 2500B. Portuguese Overseas Encounters.**

A critical analysis of some classic Portuguese travel writings from the 15th to the 20th century. The readings include Zurara, Camões, Fernão Mendes Pinto, *História Trágico-Marítima*, Ramalho Ortigão, Raul Brandão, as well as the contemporary Pedro Rosa Mendes. Conducted in Portuguese.

**POBS 2500E. Portuguese Cultural and National Identity.**

A critical reading of some key issues in Portuguese intellectual history regarding Portuguese national identity. Classical authors such as Verney, Antero de Quental, Teixeira de Pascoais, Fernando Pessoa, Antonio Sérgio, and Eduardo Lourenço are read along with contemporary theoretical works on the issue of cultural and national identity. Conducted in Portuguese.

**POBS 2500F. Tales of the "Sertão".**

The reality and mythology of the "sertão" have long been a source of inspiration for Brazilian writers, visual artists, and filmmakers. This seminar considers the transformations of the "sertão" motif since the second half of the nineteenth century. Fiction by José de Alencar, Euclides da Cunha, Graciliano Ramos and João Guimarães Rosa. Films by Glauber Rocha and Sandra Kogut. Conducted in Portuguese.

**POBS 2500G. Nation and Narration.**

The invention and transformation of the idea of Brazil as a nation narrative texts since the middle of the 19th century. Manuel Antônio de Almeida, José de Alencar, Adolfo Caminha, Machado de Assis, Monteiro Lobato, Mário de Andrade, Adalzir Bittencourt, Antônio Callado and João Ubaldo Ribeiro. Theoretical texts by Benedict Anderson, Homi Bhabha, Edward Said, Eric Hobsbawm, Frantz Fanon, Roberto Schwarz and others. Conducted in Portuguese.

**POBS 2500H. The City and the Street: Tradition, Modernity and Human Subjectivity in Brazilian Urban Literature.**

From Machado de Assis's streetcar chronicles, João do Rio's belle-époque flâneur crônicas, and modernists' views of São Paulo down to the urban paranoia of Rubem Fonseca's crime narratives and the destabilizing subjectivities of contemporary writers, this seminar examines diverse urban bodies and cartographies for understanding spatial and temporal relationships between the city and bodies, sexual cultures, gender roles, violence, peripheries, and metropolitan apocalyptic tensions. Conducted in Portuguese.

**POBS 2500I. The Portuguese Essay.**

Focuses on some key themes of Portuguese social, political and cultural life that have been dealt with in the essay form, in the 19th and 20th century, such as Portugal's decline, modernization, regeneration and national identity. Special attention to literature on the essay as a genre. Readings include Antero de Quental, Oliveira Martins, Silvio Lima, Joaquim de Carvalho, Antonio José Saraiva, Eduardo Lourenço and others. Conducted in Portuguese.

**POBS 2500K. Senses and Sensibilities in the Nineteenth Century Portuguese Novel.**

The works to be read are representative of the main literary trends in 19th century Portuguese literature. They will be analyzed with a focus on literary aesthetics, but also on meanings (or senses), both culturally and personally, by exploring the textual construction of emotions, i.e., the engagement of sensibilities in the written word. Authors to be studied include Almeida Garrett, Camilo Castelo Branco and Eça de Queirós. Conducted in Portuguese.

**POBS 2500L. Latin American Historiography (HIST 2971E).**

Interested students must register for HIST 2971E.

**POBS 2600A. Medieval and Renaissance Portuguese Literature.**

An analysis of Portuguese literature from the Middle Ages to the 16th century. Special attention given to the poetry of the Cancioneiros, Fernão Lopes, Gil Vicente, and Luís de Camões. Conducted in Portuguese.

**POBS 2600B. Saramago and His Contemporaries.**

Focuses mainly on the "oeuvre" of José Saramago, the recently deceased Portuguese Nobel Prize winner. Four other well-known Portuguese writers (Vergílio Ferreira, Agustina Bessa-Luís, António Lobo Antunes, Lídia Jorge) are also studied as a way of contextualizing Saramago's work but, more importantly, for their own merit as outstanding novelists. Complementary readings will mostly consist of theoretical texts concerning an approach to contemporary novels based on the nexus between history and fiction on the one hand, and the construction of emotions in literature on the other. Conducted in Portuguese. Enrollment limited to 25.

**POBS 2600C. Foundations of Literary Theory.**

Designed to provide a solid foundation on the development of literary theory from its ancient roots in Plato, Aristotle, Horace and Plotinus to the contemporary period. Includes Kant, the Russian Formalists, Lukács, Jakobson, Bakhtin, Barthes, Derrida, Ricoeur, Said and others. Conducted in English.

**POBS 2600G. Decolonizing Brazil: The Postcolonial Dilemma of "Not Being And Being Other".**

Considering the "ambivalent construction of the Brazilian's cultural existence" as the basic stance for reexamining Brazil from a revised postcolonial approach, this seminar will contextualize the Brazilian postcolonial from the viewpoints of diversity, difference, hybridity, and heterogeneity. Authors to be read are Manuel Antônio de Almeida, Machado de Assis, Adolfo Caminha, Oswald de Andrade, Graciliano Ramos, Samuel Rawet, Silviano Santiago, and Lygia Fagundes Telles. Conducted in Portuguese.

**POBS 2600I. Modern and Contemporary Brazilian Poetry.**

An intensive reading of selected Brazilian poets of the past eighty years, including Carlos Drummond de Andrade, João Cabral de Melo Neto, Mário Faustino, Paulo Leminski, Ana Cristina Cesar, the "concretistas", and Salgado Maranhão. Each student will be responsible for an oral presentation about an additional poet, to be chosen in consultation with the instructor. Conducted in Portuguese.

**POBS 2600J. The "I" of the Beholder: The Autobiographical Mode in Modern Brazilian Fiction.**

Analyzes first-person fictional narration and the ethics of self-examination, self-display and self-invention. Examines questions of truth in fiction, the self and the other, autobiographical theory, and the concept of witnessing and reporting in relation to self-representation. Mário de Andrade, Cyro dos Anjos, Antônio Olavo Pereira, Clarice Lispector, Lygia Fagundes Telles, Helena Parente Cunha, Rubem Fonseca, Sérgio Sant'Anna and Bernardo de Carvalho. Conducted in Portuguese.

**POBS 2600M. The Word in the Dark: Passion, Quest and Identity in the Universe of Clarice Lispector.**

This seminar will examine the major novels, short story collections, and crônicas by the Brazilian writer Clarice Lispector and analyze the development of her literary voice and her unique use of language. Reading her work through and beyond the existential, feminist and poststructuralist views manifested in the best critical and theoretical analyses of her work, this seminar will focus especially upon her passionate struggle with language as well as her genre-breaking narratives, alongside her ontological quest for narrative subjectivity. Seminar presentations and papers will explore these issues with the aim of understanding Clarice's spiritual and philosophical impulses as well as her original linguistic contribution to Brazilian and World Literatures. Conducted in Portuguese.

**POBS 2600N. Transgressing Gender: Female Voicing in Modern Brazilian Literature.**

This seminar looks at theoretical and critical essays on gender and beyond in relation to the fiction of three major Brazilian female writers: Rachel de Queiroz, Lygia Fagundes Telles, and Clarice Lispector. Discussion addresses issues of gender identity and ambiguity, female voicing, gender politics, alterity, feminist consciousness, as well as power and resistance. Readings include two or more works by each of the three writers. Conducted in Portuguese.

**POBS 2600O. The Sage of Suspicion: Machado de Assis and the Agencies of Narrative.**

Novels and short stories of Machado de Assis within the context of the socio-political reality of nineteenth-century Brazil. Attention to the ideologies of Brazil's ruling class, its self-image and views on national identity, class and race; the issue of fiction vs. reality; and/or such topics as irony, symbolism, and narratology. Conducted in Portuguese.

**POBS 2600P. Fernando Pessoa and Co.**

An analysis of key writings by the major Portuguese Modernist poet Fernando Pessoa, as well as by his more important heteronyms, particularly Alvaro de Campos, Alberto Caeiro, Ricardo Reis, and António Mora. The course will emphasize the recurrent themes of identity, divided self, meaning, disquietude, and displacement. Conducted in Portuguese.

**POBS 2600W. Contemporary Brazilian Women Writers in the Culture of Money: A Literature of Their Own.**

This advanced seminar will study, comment and debate seven contemporary Brazilian novels and two collections of short stories written by women during the last thirty years. Some of the main subjects to be addressed are fear, love, loneliness and exclusion that characterize current turning points for women. The literary works stemming from this kind of environment tend to lead to a labyrinth that maps their characters' and society's emotional behavior, thereby transforming meaning and redirecting the pathways of aesthetic form, while modifying the conventions that shed light upon the authors' construction of their stories.

**POBS 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**POBS 2980. Reading and Guided Study.**

Reading in Portuguese language, literature, civilization, and bilingual studies. Conducted via Portuguese readings and discussions. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**POBS 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## Center for the Study of Race and Ethnicity in America

The Center for the Study of Race and Ethnicity in America was established in 1986 as one of the nation's earliest academic centers dedicated to research, scholarship, and academic exchanges on issues of race and ethnicity. In 1996 it became the home of the newly established concentration in Ethnic Studies. In the Fall of 2013, as part of changes to the CSREA and to better support students, Ethnic Studies joined a long-standing established Brown department, American Studies.

CSREA supports and generates rigorous and accessible research, performance, art and scholarship on a broad range of issues pertaining to race and ethnicity in America. We aim to build community among scholars and students working on race and ethnicity, develop new and enhance existing research networks, foster generative public conversations on pivotal issues, enhance public knowledge about racial and ethnic discrimination, and contribute to national and community efforts to create a more just society.

For more information, please visit <https://www.brown.edu/academics/race-ethnicity/>

## Religious Studies

### Chair

Mark Cladis

The Department of Religious Studies at Brown University provides students with an understanding of diverse religious traditions, an exposure to a variety of approaches employed within the academic study of religion,

as well as an opportunity to explore diverse intellectual, social-theoretical, and ethical issues that arise when one considers the various manifestation of religion in human affairs. While the graduate program in religious studies, with select areas of concentrated strength, is one of the finest in the world, the undergraduate program is broad and creative, serving a large number of students both inside and outside the concentration.

For additional information, please visit the department's website: <http://www.brown.edu/academics/religious-studies/>

## Religious Studies Concentration Requirements

The concentration in Religious Studies cultivates understanding of societies and cultures throughout the world by exploring religious thought and practice in various historical, geographic, and political contexts. Concentrators discover new ways of engaging the complex world in which they live by studying the public and private concerns that the study of religion highlights, including understandings of self, community, good, evil, authority, and inequality. Equipped with interdisciplinary skills of interpretation and analysis, students learn how political affairs, institutions, conflicts, and social spheres commonly recognized as secular have taken shape through the formation and transmission of religious beliefs, behaviors, values, and rituals. These skills include: close analysis of texts, images, artifacts, artistic works, and other social data; synthesis of research through written and verbal expression; interpretation of the past and present through multiple forms of evidence; and engagement with contemporary social issues and communities.

### 1. Basic Requirement

A concentration in Religious Studies includes a minimum of *nine* semester-long courses. Those nine courses include RELS 1000 (a seminar in theories and methods in the study of religion) and eight other courses, which must satisfy the concentration's distribution requirements. Students who transfer to Brown or study abroad must complete at least five courses in Religious Studies at Brown.

### 2. Distribution of Introductory, Intermediate, and Advanced courses:

Among the eight concentration courses, no more than *four* courses (out of nine) can be at the introductory level (0001-0199). In addition to any introductory courses and RELS 1000, the plan of study must include at least *two* intermediate-level courses (0200-0999) and *two* advanced-level courses (above 1000).

### 3. Distribution of Focus and Approach:

Concentrators are encouraged to develop a broad understanding of religious activity as well as a deep understanding of particular forms of religion. A concentrator's course plan should include courses that examine a variety of geographic and cultural contexts, through a variety of approaches. The eight concentration courses (that is, the courses other than RELS 1000) must: 1) examine more than one religious tradition or culture; and 2) reflect more than one primary approach to the study of religion (e.g., philosophical, historical, textual).

To help students create a program of study that balances breadth of focus and approach with attention to the concentrator's particular interests and objectives, concentrators will meet with the Director of Undergraduate Studies (or an approved advisor from within the department) when declaring the concentration to discuss their intellectual priorities and provisional course plans. (In the concentration declaration form, concentrators will describe their priorities and plans.) Through these initial discussions as well as advising meetings in subsequent semesters, concentrators and their advisors will work together to recognize and cultivate each concentrator's theoretical, interpretive, or thematic interests in a way that engages the faculty's multidisciplinary expertise.

### 4. Courses in Other Departments

Courses cross-listed from other departments and courses listed in other departments but taught by Religious Studies faculty count toward the program of study. Up to three courses taught by faculty in other

departments also can count toward the program (pending approval by the DUS) if relevant to the student's program of study. Students who transfer to Brown, study abroad, or otherwise petition to include Brown courses not cross-listed with Religious Studies must complete at least five courses in Religious Studies at Brown.

## 5. Capstone Project

In the final year of study, concentrators will undertake a capstone project that builds upon a student's previous work in the department and provides a culminating focus for a student's concentration. Concentrators may complete a capstone project within an existing course (subject to approval by its instructor) or an independent study. Concentrators also may satisfy the capstone requirement by undertaking an honors thesis. Whichever context concentrators choose to complete their capstone within, they will develop a plan for their project no later than the end of the spring semester of the junior year, in consultation with the Director of Undergraduate Studies and other faculty as appropriate.

### Honors Thesis (Optional)

A thesis is an opportunity for students to conduct extended independent research under the guidance of faculty. If a student chooses to write an honors thesis, in addition to completing the typical eight concentration courses (in addition to RELS 1000) the student will enroll in RELS 1999 during both semesters of the senior year. Whether or not a student receives honors, RELS 1999 will serve as the student's capstone course. To be eligible to write a thesis, a student must have earned a grade point average of greater than 3.5 (A=4, B=3, C=2) on courses that count toward the concentration. Additionally, to be eligible for honors, concentrators may take no more than two of the concentration courses with the "S/NC" option, after declaring a Religious Studies concentration.

(Note: if a student is philosophically committed to taking the majority of her or his courses at Brown as "S/NC," that student may petition the Department to waive this "S/NC" limit.) Writing the thesis is a necessary, but not sufficient, condition for receiving Honors. In order to receive Honors, the student's thesis must earn an A from its two readers, and the student must have earned a grade point average of greater than 3.5 in the concentration and satisfied all other concentration requirements.

Daniel Vaca, Director of Undergraduate Studies  
Tina Creamer, Departmental Administrator

## Contemplative Studies Concentration Requirements

The concentration in Contemplative Studies investigates the underlying philosophical, psychological, and scientific bases of human contemplative experience. Students pursue a "third person" academic approach drawn from the humanities and sciences to analyze the cultural, historical, and scientific underpinnings of contemplative experiences in religion, art, music, and literature. This is developed in combination with a "critical first-person" approach based in practical experience of contemplative techniques and methods to provide an integrated understanding of the role of contemplative thought and experience in societies and on the individuals who constitute them.

### Concentration Core (6 courses including the Senior Concentration Seminar)

COST 0100	Introduction to Contemplative Studies	1
Two introductory science courses addressing the biological, psychological, and neurological functioning of the human body/mind complex with health implications, and how contemplative practices affect it.		
Select one from the following list:		
BIOL 0200	The Foundation of Living Systems	1
CLPS 0200	Human Cognition	
CLPS 0500	Perception and Mind	
NEUR 0010	The Brain: An Introduction to Neuroscience	
Others with approval		

Select one from following list: 1

COST 0200	Meditation and the Brain
COST 1020	Cognitive Neuroscience of Meditation
COST 1080	Meditation, Mindfulness and Health

Two humanities courses that present important themes that can emerge from bringing a Contemplative Studies perspective to the study of contemplative religious traditions and to the philosophical analysis of the key questions of human existence. 2

ANTH 1240	Religion and Culture
CLAS 0990	Concepts of the Self in Classical Indian Literature
CLAS 1120G	The Idea of Self
COST 0040 or RELS 0040	Great Contemplative Traditions of Asia
COST 0145 or RELS 0145	Karma, Rebirth and Liberation: Life and Death in South Asian Religions
COST 0410	Engaged Buddhism
COST 0420	The Theory and Practice of Buddhist Meditation
COST 0450	Stages of the Contemplative Path
PHIL 0010	The Place of Persons
PHIL 0220	Introduction to Philosophy
PHIL 0650	Psychology and Philosophy of Happiness
PHIL 1520	Consciousness
PHIL 1770	Philosophy of Mind
RELS 0056	Spiritual But Not Religious: Making Spirituality in America
RELS 0065	On Being Human: Religious and Philosophical Conceptions of Self
RELS 1370B	Philosophy of Mysticism
Others with approval	
COST 1950	Senior Concentrators' Seminar

## Track Requirements (6 additional courses Including a Capstone Course)

Students must complete either a Science or Humanities track in addition to the concentration core.

### Science Track

The Science track in Contemplative Studies gives concentrators a foundational understanding of the scientific methods used to investigate the biological, psychological, and neurological effects of contemplative practice and their potential implications on physical and mental health both for individuals and for the general public. Students will be taught how to critique current research as well as how to develop, operationalize, and test hypotheses related to contemplative practice. Students will become well-versed in how to study first-person reports related to the *phenomenology* of contemplative experience as a foundation for formulating third-person tests of the effects of practice on brain function and behavior. The Contemplative Studies Science Track trains students to investigate these types of questions not only for academic scholarship, but also to provide a method of self-inquiry that can be used to augment any area of life.

**Five thematic science courses, including a Capstone Course, drawn primarily from BIOL, COST, NEUR, CLPS, and PHP, at least one of which must include laboratory work and two of which must be 1000-level; and one Statistics course for a total of six courses.** 5

The Capstone Course is intended to be a culmination of the students' concentration in which they will bring to bear what their interests have been in developing their focused work in the program. The Capstone course can be either:

a. A one semester Independent Reading and Research course, either COST 1910 or 1920 OR BIOL 1950 or 1960, depending on the semester; OR

b. A special project done within an existing Contemplative Studies core or related course at the 1000-level in which the student brings to bear the larger concerns of her concentration on a problem or issue within the course. It is expected that such Capstone research papers will be more substantial than a term paper.

BIOL 0280	Biochemistry (lab)
BIOL 0470	Genetics (lab)
BIOL 0530	Principles of Immunology
BIOL 0800	Principles of Physiology (lab)
BIOL 1880	Comparative Biology of the Vertebrates
CLPS 0700	Social Psychology
CLPS 0710	The Psychology and Philosophy of Happiness
CLPS 1193	Laboratory in Genes and Behavior
CLPS 1194	Sleep and Chronobiology Research
CLPS 1291	Computational Methods for Mind, Brain and Behavior
CLPS 1400	The Neural Bases of Cognition
CLPS 1490	Functional Magnetic Resonance Imaging: Theory and Practice
CLPS 1492	Computational Cognitive Neuroscience
CLPS 1570	Perceptual Learning
CLPS 1590	Visualizing Vision
CLPS 1791	Laboratory in Social Cognition
COST 0200	Meditation and the Brain
COST 1020	Cognitive Neuroscience of Meditation
COST 1080	Meditation, Mindfulness and Health
NEUR 1020	Principles of Neurobiology
NEUR 1030	Neural Systems
NEUR 1540	Neurobiology of Learning and Memory
NEUR 1600	Experimental Neurobiology
NEUR 1940I	Neural Correlates of Consciousness
PHP 1600	Obesity in the 21st Century: Causes, Consequences and Countermeasures
PHP 1920	Social Determinants of Health
Others with approval	

**One statistics course (others with approval) 1**

APMA 0650	Essential Statistics
APMA 1650	Statistical Inference I
BIOL 0495	Statistical Analysis of Biological Data
CLPS 0900	Statistical Methods
EDUC 1100	Introduction to Qualitative Research Methods
PHP 1501	Essentials of Data Analysis

### Humanities Track

The Humanities track explores the origin and development of contemplative practices within specific religious, cultural, and historical contexts and gives students a foundation in the Philosophy of Mind relevant to the scientific study of contemplative practice. Students will choose a concentration program that includes three intermediate and three advanced seminars drawn from the two areas below. While it is recommended that students focus primarily on one of these two areas, the precise balance of the individual concentration program for each student will be established with the concentration advisor when the student applies to enter the concentration, normally in their fourth semester of study.

**Six courses, including a Capstone Course, from across the two areas below: 6**

The Capstone Course is intended to be a culmination of the students' concentration in which they will bring to bear what their interests have been in developing their focused work in the program. The Capstone course can be either:

- A one semester Independent Reading and Research course, either COST 1910 or 1920 OR BIOL 1950 or 1960, depending on the semester; OR
- A special project done within an existing Contemplative Studies core or related course at the 1000-level in which the student brings to bear the larger concerns of her concentration on a problem or issue within the course. It is expected that such Capstone research papers will be more substantial than a term paper.

#### Contemplative Religious Traditions

CLAS 0210Y	The Philosophy of Classical Indian Yoga
CLAS 0820	Epics of India
CLAS 0850	Mythology of India
CLAS 0990	Concepts of the Self in Classical Indian Literature
CLAS 0995	India's Classical Performing Arts
CLAS 1140	Classical Philosophy of India
CLAS 1160	Love and Devotion, Power and Poverty: India's Literary Classics
COST 0145	Karma, Rebirth and Liberation: Life and Death in South Asian Religions
COST 0420	The Theory and Practice of Buddhist Meditation
COST 0530	Laozi and the Daodejing
COST 0550	Tibetan Buddhism and the West
COST 0855	The Bhagavad Gītā (CLAS 0855)
EAST 0180	Japan: Nature, Ritual, and the Arts
EAST 1420	The Confucian Mind
EAST 1880D	Early Daoist Syncretism: Zhuang Zi and Huainan Zi
RELS 0045	Buddhism and Death
RELS 0100	Buddhist Thought, Practice, and Society
RELS 0120	The Classical Chinese Philosophy of Life
RELS 1441	Zen Meditation in China, Korea, and Japan
RELS 0570	Science, Religion, and the Search for Happiness in Traditional Asian Thought
RELS 0580	Experiencing the Sacred: Embodiment and Aesthetics in South Asian Religions
RELS 1370B	Philosophy of Mysticism
RELS 1425	Buddhist Poetry
RELS 1442	The History, Philosophy, and Practice of Rinzai Zen Buddhism

#### The Philosophy of Mind

COST 1520	Consciousness
PHIL 0350	Ancient Philosophy
PHIL 0650	Psychology and Philosophy of Happiness
PHIL 0990L	Valuing Persons
PHIL 0990M	Descartes Meditations
PHIL 1290	Kant's Moral Philosophy
PHIL 1590	Philosophy of Science
PHIL 1650	Moral Theories
PHIL 1660	Metaphysics
PHIL 1720	Kant: The Critique of Pure Reason
PHIL 1750	Epistemology
PHIL 1770	Philosophy of Mind
PHIL 2150G	Aristotle's Metaphysics

UNIV 1520 The Shaping of World Views

Others with approval

## Honors Requirement

Students with a minimum GPA of 3.5 in the concentration may apply for entrance into the Honors program in the middle of their sixth semester. To apply, students submit a proposal for a senior thesis project describing the work to be undertaken and its relevance to the field of Contemplative Studies, along with a copy of their academic transcript. Students accepted into Honors must complete the required Capstone seminar, UNIV 1010, and enroll in an additional semester of independent study in their advisor's department. Students must complete an Honors Thesis to the satisfaction of their advisor and present the results of their studies in formal talks or poster sessions open to all interested faculty and students.

## Religious Studies Graduate Program

The graduate program in Religious Studies at Brown is one of the finest in the nation. From among a large pool of highly qualified applicants, the department admits four to six doctoral students a year. Our students receive five years of full funding; additional funding is possible but not guaranteed. The department's graduates have an excellent placement record, teaching in such institutions as Harvard, Stanford, Indiana University, University of California, Brooklyn College, Reed College, Haverford, and University of Wisconsin (Madison). Current graduate students have distinguished themselves by presenting papers at international conferences and earning recognition and support from prestigious external funding organizations.

We offer a fifth year Master's Degree for current Brown undergraduate students:

Eight graduate level courses are required, including RELS 2000, "Theory of Religion." Students must demonstrate competency in French or German, as well as in whatever other languages are relevant to their research interests. A thesis is required.

We offer Ph.D. studies in four areas:

- Asian Religious Traditions (ART) (<http://www.brown.edu/academics/religious-studies/graduate/doctoral-tracks-phd/asian-religious-traditions-art>)
- Islam, Society and Culture (ISC)
- Religion and Critical Thought (RCT) (<http://www.brown.edu/academics/religious-studies/graduate/doctoral-tracks-phd/religion-and-critical-thought-rct>)
- Religions of the Ancient Mediterranean (RAM) (<http://www.brown.edu/academics/religious-studies/graduate/doctoral-tracks-phd/religions-ancient-mediterranean-ram>)(including Ancient Judaism, early Christianity, early Islam, and numerous others)

For more information on these programs, please click on the program link above.

<http://www.brown.edu/academics/gradschool/programs/religious-studies>

## Courses

### Contemplative Studies

#### **COST 0030. Sound, Song and Salvation in South Asia.**

Sound, Song and Salvation in South Asia explores both the theoretical formulations and the performative expressions that constitute the inextricable nexus of sound, music and religious practice in South Asia. By investigating fundamental concepts such as *nāda*, *rāga*, *bhakti* and *rasa*, this course historicizes the ongoing discourse on the soteriological underpinnings of several genres of South Asian music from Vedic chanting to Hindustani and Carnatic music traditions.

**COST 0032. Music and Meditation.**

Music and Meditation explores the contemplative nature of sonic experience from humanistic, artistic and scientific perspectives. By drawing from various traditions across both time and space, and by engaging with a variety of disciplinary methodologies from Contemplative Studies, Ethnomusicology, Religious Studies and Cognitive Science, we will seek to better understand how diverse religious communities have used music as a meditative tool, a mystical philosophy, a communal exercise, a ritual performance, and more. We will examine the philosophies of thinkers, scientists and musicians to investigate music making as both an instrument, and a goal, of contemplative practice.

**COST 0034. Dharma: A History of Classical Indian Civilization.**

Dharma—a Sanskrit word encompassing duty, ethics, law, and religion—is a common thread running through the cultures of premodern India. This course offers a history of Indian civilization from its origins up through the end of the classical period. Drawing on a rich array of textual, material, and expressive cultures, we trace the arc of human history on the subcontinent, paying special attention to the intersections of religion and politics. The sources at hand reveal the dynamic interplay between tradition and innovation, and attest to human efforts to redefine what it means to live a life according to dharma.

**COST 0035. Saints and Mystics of India.**

Saints and Mystics of India explores the rich variety of religious experience in India as expressed in the inspired poetic productions of several mystics through time. By critically listening to these powerful voices of the past, we will endeavor to understand how mystical poems from divergent Indian traditions exhibit multiple points of interaction, influence and convergence. Our investigation will draw on the spontaneous literary outpourings of several mystics including but not limited to: Nammalvar, Andal, Kabir, Mahadeviyakka, Nanak, Mira, Tukaram, Caitanya, Ramakrishna and Ramana Maharshi.

**COST 0036. Love and War in India.**

Love and War in India explores two fundamental cultural tropes that have significantly shaped the religious, literary, social and political life of South Asia. Building on the ancient Tamil conceptions of *aham* (love/interiority) and *puram* (war/exteriority), and the Sanskrit ideas of *kama* (desire), *dharma* (duty) and *ahimsa* (non-violence) we will investigate a variety of texts on religious devotion, ethical behavior and political theory in order to contextualize the concepts of love and war within multiple arenas of Indian social and cultural life.

**COST 0037. Sensing the Sacred: Sensory Culture in South Asian Religions.**

This course explores South Asian religions through the body, the senses, and aesthetics. Drawing on Hindu, Buddhist, and Jain traditions, and concentrating on embodied practices such as meditation, chanting, eating, sex, asceticism, ritual, possession, and performance, we will examine experiences of the sacred in India, past and present. How has sensory culture shaped lives, practices, and doctrines? What place do the senses have in South Asian traditions? Drawing on premodern law codes, erotic handbooks, and medical treatises; and integrating new media from ethnographic films to graphic novels, we will plunge into the rich sense-worlds of religions in South Asia.

**COST 0040. Great Contemplative Traditions of Asia.**

Introduction to the critical study of contemplative practices and experiences emphasizing philosophical and scientific analyses of works from the major Asian contemplative traditions of South and East Asian Buddhism and Chinese Daoism in historical context. Theoretical studies of mysticism and studies from the psychological sciences will be included. Additional weekly meditation lab section.

**COST 0100. Introduction to Contemplative Studies.**

Introduction to the new field of Contemplative Studies focusing on identifying methods human beings have found, across cultures and across time, to concentrate, broaden and deepen conscious awareness. We will study what these methods and experiences entail, how to critically appraise them, how to experience them ourselves, and how they influence the development of empathy, health, and well-being. Prerequisites: None. Enrollment limit is 40.

**COST 0140. Food, Religion and Politics in South Asia.**

Why study food? What can food tell us about religion, politics, and culture? Food in South Asia often shapes identity, social status, ritual purity, religious belonging, and political activism—the notion that you are what you eat has wide currency. Whatever form it takes, food embodies histories of migration, trade, empire, colonialism, and ethics. Through reading primary texts and ethnographic articles, watching films, and (of course) eating delicious food, we will explore the rich foodways of South Asia and their social, religious, and political ramifications.

**COST 0145. Karma, Rebirth and Liberation: Life and Death in South Asian Religions.**

Karma, Sanskrit for the "action" that makes up a human life, has been a central concern for the religious traditions of South Asia throughout their history. Hinduism, Buddhism and Jainism share the belief that after death people are reborn, taking on lives according to their actions in lives previous. In these traditions, liberation from the cycle of rebirth becomes the ultimate goal of human existence. This course examines the ideas of karma, rebirth and liberation in Hinduism, Buddhism and Jainism from historical, cosmological, ritual, narrative, iconographic and theological points of view. We also look at these ideas in Western culture.

**COST 0200. Meditation and the Brain.**

This course provides an exploration and critique of psychological and neuroscientific research on meditation by situating the current applications of meditation in the West in the broader historical context of the development of Buddhism. In this course, we will critically evaluate the findings of scientific and clinical studies of meditation in terms of their methodological rigor, implicit assumptions, and biases. We will also study the transmission of Buddhism from Asia to the West in order to understand the influence of Buddhism norms and worldviews on contemporary applications of meditation. This course will also feature first-person experiential learning in select meditation practices.

**COST 0440. Contemplation and the Natural World.**

The course begins with an examination of contemplative practices in select Buddhist and Christian contexts and their associated goals, values, and worldviews. Particular emphasis will be placed on the significance of nature as a context for or object of contemplative practices. The course then turns to modern Western naturalists and nature writers to uncover the contemplative dimensions to their craft. Throughout, the course investigates how human relationships to the natural world are defined and influenced by the cognitive, perceptual, and emotional dimensions of human experience. The course includes contemplative practice labs and field trips to the natural world.

**COST 0450. Stages of the Contemplative Path.**

One common metaphor for human life and self-transformation is the journey or the path. Contemplative traditions have also employed this image, offering both concise and expansive maps of the stages of practice and anticipated end goals of the contemplative life. The study of path structures allow us to carefully compare the relationship between specific cognitive, affective, and somatic practices, their resultant states and traits of human experience, and the meaning and value ascribed to them in different historical and cultural contexts.

**COST 0480. Buddhist Ethical Theory.**

Discussions of ethical questions in the classical Buddhist philosophical literature focus not only on how one should act, but also – perhaps more fundamentally – on which habits of mind and heart should be cultivated. In this course, students will (1) gain an understanding of Buddhist approaches to ethical questions, (2) learn to compare Buddhist approaches to ethical questions and ethical theorizing with prominent approaches in Western philosophy, and (3) examine whether and how classical Buddhist approaches to ethical questions might improve on and move forward contemporary discussions in the philosophical literature on ethics, and in society more broadly.

**COST 0520. Tai Chi, Qigong, and Traditions of Energy Cultivation in China.**

In recent years Taijiquan (Tai Chi) and Qigong have become increasingly popular forms of exercise, alternative medicine and contemplative practice. This course aims to provide students with a foundation for understanding these practices through an exploration of their roots in Chinese medicine, philosophy and religion, as well as their more recent history in modern China and the rest of the world. In addition to studying historical and scholarly interpretations of these practices, students will also have the opportunity to learn basic Qigong and Taijiquan in weekly labs.

**COST 0525. The History and Practice of Yoga in India and Beyond.**

From its roots in premodern India to its current popularity worldwide, yoga has a rich a complex history. As a practice of the mind, body, and spirit, yoga has taken many forms—meditation, chanting, breath control, postures—in order to achieve a range of goals: liberation from rebirth, supernatural powers, strength, pleasure, peace, wellness. As its reputation and commodification have increased, yoga has attracted deep interest, debate, and even controversy. In this course we will study yoga from its earliest texts to its status in the modern world, addressing its historical, religious, social, and political ramifications in many different contexts.

**COST 0526. This Whole World is OM: Mantras in Indian Religions.**

A mantra is a syllable or formula used in ritual and meditation. Mantras are central to Indian religions—not only Hinduism, but also Jainism, Buddhism, Sufism, and Sikhism. Some mantras are made up of words and language—usually in Sanskrit—while others are sound fragments with no semantic meaning. The sacred syllable OM, now a global symbol of Eastern spirituality, exemplifies the power and authority of mantra. What are mantras? What do they accomplish? How do they shape identities, beliefs, and practices? Engaging with sacred utterance in various media, this course explores the world of mantras in India and beyond.

**COST 0550. Tibetan Buddhism and the West.**

This course traces the history and development of the various lineages of Tibetan Buddhism from its origins in Indian Buddhism through to encounters between Tibet and the West in the modern period. The course investigates the religious, political, and geographical conditions in Tibet that influenced the development of some of the unique characteristics of the lineages of Tibetan Buddhism. The course explores key doctrines, practices, institutions, and religious leaders of the major lineages, and delves into key events in the modern period, beginning with the age of missionaries and explorers and ending with the Cultural Revolution and subsequent diaspora.

**COST 0555. Zen: An Introduction.**

"Zen" has become a common trope in modern North American Culture but few people know what the term really means. This course will study Zen's origins in Indian Perfection of Wisdom teachings, follow its meanderings through China from the legend of Bodhidharma through the Five Houses of Chan, and chart its arrival and developments in Japan and eventual transplanting to the West. We will focus on several important Zen teachers: Huineng and Linji in China, Dōgen, Bankei and Hakuin in Japan. We will also explore the essential technique of kōan meditation and the practice of "just sitting."

**COST 0650. Psychology and Philosophy of Happiness (PHIL 0650).**

Interested students must register for PHIL 0650.

**COST 0855. The Bhagavad Gītā (CLAS 0855).**

Interested students must register for CLAS 0855.

**COST 0990. Concepts of the Self in Classical Indian Literature (CLAS 0990).**

Interested students must register for CLAS 0990.

**COST 1020. Cognitive Neuroscience of Meditation.**

Buddhist philosophy describes a model as to how the mind works. Neuroscientists have begun to study the impact of meditation on brain structure and function, often using Buddhist philosophy to guide their hypotheses. We will review neuroscientific literature and discuss how it relates to Buddhist philosophy, using the four foundations of mindfulness as the primary framework. The course will be a mixture of lecture, discussion of a primary scientific paper that is assigned each week, and presentations by students. Pre-Requisites: NEUR0010 or Declared Contemplative Studies Concentration.

**COST 1082. Me, Myself, and I: Exploring Senses of Self from a Multidisciplinary Perspective.**

Human beings have long puzzled over how precisely to conceptualize and understand what and how it is that we are. Questions about the nature of the self have informed the speculations of philosophy, the soteriologies of religion, the trajectories of self-cultivation in contemplative traditions, and the therapeutics of psychology. Recently, cognitive science and phenomenology have developed new explanations for how multiple senses of self shape lived experience and give rise to various self-concepts. Students in this course will engage with dimensions of selfhood that we often take for granted by studying senses of self from multidisciplinary and cross-cultural perspectives.

**COST 1520. Consciousness.**

Topics will include: (i) the different features of various types of consciousness; (ii) dualist, physicalist, and representationalist theories of experience; (iii) the nature of pain and other bodily sensations; (iv) the nature of conscious thought; (v) the qualitative dimension of perception; (vi) introspection; (vii) the roles of attention and working memory in perceptual consciousness; (viii) blindsight, inattentive blindness, hemineglect, and related phenomena; (ix) the unconscious; and (x) what it is for a state of consciousness to be unified.

**COST 1700A. The History, Philosophy, and Practice of Rinzai Zen: Zen Master Hakuin Ekaku.**

Explores Japanese Rinzai Zen Buddhist tradition by focusing on its seminal figure, Hakuin Ekaku (1686-1769). Examines his biography, core practices, and key philosophy by looking at selections from his essential autobiographical and philosophical writings as well as his artwork. Focuses on the following aspects of Hakuin's importance in the history of Japanese Buddhism: Hakuin as reviver of Rinzai Zen, especially kōan practice: Hakuin as a meditation master; Hakuin as talented artist; Hakuin as social critic. Readings will be primary sources in translation.

**COST 1705A. Principles and Practices of Contemplative Studies.**

Advanced study of the distinctive methods of the field of Contemplative Studies that includes third-person, second-person, and critical first-person perspectives. Will focus on the study of meditative practices in their cultural contexts and on essential scientific research on their nature and effects. Prerequisite: COST 0100 or Permission of Instructor. Meditation Lab to be scheduled

**COST 1870. Neuroethics (SCSO 1700P).**

Interested students must register for SCSO 1700P.

**COST 1910. Individual Study Project – Semester 1.**

COST Individual Study Project Semester 1, directed reading and research arranged with individual faculty. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**COST 1920. Individual Study Project - Semester 2.**

COST Individual Study Project Semester 2, directed reading and research arranged with individual faculty. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**COST 1950. Senior Concentrators' Seminar.**

A selection of topical readings that will enable concentrators in the Sciences and Humanities Tracks of the concentration to synthesize their knowledge of the field of Contemplative Studies and its current principal issues. Students will also share ideas and methods regarding the research and writing of their Capstone Projects, which typically they will be working on concurrently via their other course.

**COST 1980. Thesis Preparation.**

Required of seniors in the honors program, (second semester of two-semester sequence that includes COST 1950 in first semester). Open to others only by permission of the Director. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

## Religious Studies

### RELS 0011. Faith and Violence.

Explores the relationship between religious texts and rhetoric and violence. How do sacred texts promote or discourage violence, and how have later religious communities understood (and continue to understand) these texts? While the course will focus mainly on Judaism, Christianity, and Islam, occasional Asian examples will be used. No prerequisites.

### RELS 0014. Jesus.

Who was, and is, Jesus? Who decides? What can we know about the historical Jesus and who he became? In this course, we will begin with the earliest accounts of Jesus as recounted in the canonical gospels and outside it (e.g., the Gospel of Judas). Then we will turn to the many ways that later generations of Christians (both heretical and orthodox) and non-Christians depicted Jesus, especially in art, literature, theology, politics, and entertainment. We will read canonical and non-canonical Christian texts, Jewish accounts of Jesus, the Quran, modern Christian apologetic literature, and analyze films like the Life of Brian.

### RELS 0015. Sacred Stories.

What do stories do? How do stories underlie who we are, where we are, or why our world is as it is? Ancient religious stories have been formative for western culture in all of its expressions, lasting into our modern, secularized times. Sacred stories underlie how we think about life, death, suffering, or joy. How do they work? This course will examine narrativity - the telling, sharing, and contesting of stories - as a means for constructing and maintaining religious identity, community, and world view in western history. Jewish, Christian, and Muslim materials. Lecture and discussion.

### RELS 0022. Introduction to the New Testament.

The New Testament, the product of a Jewish social movement two thousand years ago, remains one of the most interesting and important collections of texts in history. This course explores the origins of these texts in their social context, and through close readings, the development of the various theologies contained within them. Comparisons will also be made to ancient Jewish, Greek, and Roman texts and the non-canonical Christian texts that were contemporary with the New Testament. In addition, the modern appropriation of the "Jesus paradigm" in film and pop culture will be discussed.

### RELS 0025. Wealth: Religious Approaches.

This course will survey religious approaches to the acquisition and use of wealth: How do religious thinkers understand the notion of ownership and private property? Is the fact of ownership of significant possessions seen as a moral good or an impediment to the spiritual life? Are there better or worse ways to acquire wealth? To spend it? The course will focus primarily on Judaism and Christianity, although examples from Islam and perhaps eastern religions will be brought in as appropriate. Topics to be covered will include religious understandings of poverty, charity, finance, and the link between religion and capitalism.

### RELS 0030. Sound, Song and Salvation in South Asia.

Sound, Song and Salvation in South Asia explores both the theoretical formulations and the performative expressions that constitute the inextricable nexus of sound, music and religious practice in South Asia. By investigating fundamental concepts such as *nāda*, *rāga*, *bhakti* and *rasa*, this course historicizes the ongoing discourse on the soteriological underpinnings of several genres of South Asian music from Vedic chanting to Hindustani and Carnatic music traditions.

### RELS 0032. Music and Meditation.

Music and Meditation explores the contemplative nature of sonic experience from humanistic, artistic and scientific perspectives. By drawing from various traditions across both time and space, and by engaging with a variety of disciplinary methodologies from Contemplative Studies, Ethnomusicology, Religious Studies and Cognitive Science, we will seek to better understand how diverse religious communities have used music as a meditative tool, a mystical philosophy, a communal exercise, a ritual performance, and more. We will examine the philosophies of thinkers, scientists and musicians to investigate music making as both an instrument, and a goal, of contemplative practice.

### RELS 0034. Dharma: A History of Classical Indian Civilization.

Dharma—a Sanskrit word encompassing duty, ethics, law, and religion—is a common thread running through the cultures of premodern India. This course offers a history of Indian civilization from its origins up through the end of the classical period. Drawing on a rich array of textual, material, and expressive cultures, we trace the arc of human history on the subcontinent, paying special attention to the intersections of religion and politics. The sources at hand reveal the dynamic interplay between tradition and innovation, and attest to human efforts to redefine what it means to live a life according to dharma.

### RELS 0035. Saints and Mystics of India.

Saints and Mystics of India explores the rich variety of religious experience in India as expressed in the inspired poetic productions of several mystics through time. By critically listening to these powerful voices of the past, we will endeavor to understand how mystical poems from divergent Indian traditions exhibit multiple points of interaction, influence and convergence. Our investigation will draw on the spontaneous literary outpourings of several mystics including but not limited to: Nammalvar, Andal, Kabir, Mahadeviyakka, Nanak, Mira, Tukaram, Caitanya, Ramakrishna and Ramana Maharshi.

### RELS 0036. Love and War in India.

Love and War in India explores two fundamental cultural tropes that have significantly shaped the religious, literary, social and political life of South Asia. Building on the ancient Tamil conceptions of *aham* (love/interiority) and *puram* (war/exteriority), and the Sanskrit ideas of *kama* (desire), *dharma* (duty) and *ahimsa* (non-violence) we will investigate a variety of texts on religious devotion, ethical behavior and political theory in order to contextualize the concepts of love and war within multiple arenas of Indian social and cultural life.

### RELS 0037. Sensing the Sacred: Sensory Culture in South Asian Religions.

This course explores South Asian religions through the body, the senses, and aesthetics. Drawing on Hindu, Buddhist, and Jain traditions, and concentrating on embodied practices such as meditation, chanting, eating, sex, asceticism, ritual, possession, and performance, we will examine experiences of the sacred in India, past and present. How has sensory culture shaped lives, practices, and doctrines? What place do the senses have in South Asian traditions? Drawing on premodern law codes, erotic handbooks, and medical treatises; and integrating new media from ethnographic films to graphic novels, we will plunge into the rich sense-worlds of religions in South Asia.

### RELS 0040. Great Contemplative Traditions of Asia.

Introduction to the critical study of contemplative practices and experiences emphasizing philosophical and scientific analyses of works from the major Asian contemplative traditions of South and East Asian Buddhism and Chinese Daoism in historical context. Theoretical studies of mysticism and studies from the psychological sciences will be included. Additional weekly meditation lab section.

### RELS 0045. Buddhism and Death.

Death is universal but seldom discussed in contemporary culture. In this class we will address how the varieties of Buddhist religion represent and understand dying, death, and the afterlife. Using images, films, and texts, we will ask, How should we die? How does death influence the living? Is there an afterlife? What should be done with dead bodies? The class will move between theories and practices, and past and current events. Coming to terms with these diverse materials may reveal to us some of our own assumptions about death, dying, and the afterlife.

### RELS 0050. Love: The Concept and Practice.

A study of love (in classical and modern texts and in film) that provides a window into a host of religious, philosophical, and ethical issues. Topics include the potential conflict between divine and human love, between transcendent and earthly love, and the nature of friendship, romance, marriage, and love at the crossroads. Although the scope is love in the West, the Kamasutra and other texts furnish a comparative component. All students must register for one conference in addition to the primary section.

**RELS 0055. Modern Problems of Belief.**

Some say it is impossible to be both a modern person and a religious person. What are the assumptions behind this claim? And what is it about the modern (or postmodern) era that, according to some, has made religion difficult to believe in? These questions will be discussed as we explore the ways religion has been understood in Western culture from the Enlightenment to the present. We will read such influential thinkers as Hume, Kant, Hegel, Kierkegaard, Marx, Nietzsche, Freud, Durkheim, Buber, and Woody Allen. Each figure has left a decisive mark on the way we think about religion.

**RELS 0056. Spiritual But Not Religious: Making Spirituality in America.**

When people call themselves "spiritual but not religious," what does that mean? This course answers that question by exploring many of the diverse ideas, practices, and desires that the idea of spirituality has included. To see how spirituality has saturated American society, students will examine phenomena such as yoga, hip hop, ghosts, self-help gurus, countercultures, and protest movements. By studying the making of spirituality in the past and present, this course will enable students to recognize how Americans have made sense of their own lives and institutional attachments through shifting concepts of race, pluralism, science, capitalism, secularism, and more.

**RELS 0058. Christianity and Culture.**

The aim of this introductory level lecture course is to interrogate the relationship between culture and religion. The foundation for our study will be exemplary works by major cultural critics and theologians since the early 19th century. Our focus will be on forms of cultural criticism put forward by interdisciplinary thinkers that attempted to gain a better grasp of both modern social crises and sources of communal joy. The course shall rehearse debates in cultural studies, theology, postmodernism, and politics.

**RELS 0060. Judaic Studies Introductory Cross Listings.****RELS 0060B. Foreigners, Refugees, and the Ethics of Minority (JUDS 0061).**

Interested students must register for JUDS 0061.

**RELS 0060C. The Bible and Moral Debate (JUDS 0060).**

Interested students must register for JUDS 0060.

**RELS 0060D. Antisemitism: A History (JUDS 0063).**

Interested students must register for JUDS 0063.

**RELS 0060E. Angels and Demons Past and Present (JUDS 0064).**

Interested students must register for JUDS 0064.

**RELS 0060F. Ancient Israelite and Jewish Narrative and Artistic Image (JUDS 0065).**

Interested students must register for JUDS 0065.

**RELS 0065. On Being Human: Religious and Philosophical Conceptions of Self.**

An examination of classic and contemporary views on the nature of human existence. Central themes include human freedom, the relation between reason and emotion, and the significance of personal history and memory. We also ask how conceptions of who we are shape views about how we should live. Sources include religious and philosophical texts as well as recent films.

**RELS 0068. Religion and Torture.**

The debates about the moral and legal status of torture have acquired a new urgency since 9/11. People are now questioning the consensus of law and human rights declarations that torture is never permissible. Indeed, some argue that in extreme cases, it may be obligatory to torture a captive for information that could save many lives. This class explores the recent debates about torture from secular and religious perspectives. It also deals with more general themes related to torture: What are the nature and effects of pain? Are human beings sacred, and does sacredness involve a prohibition against torture?

**RELS 0072. Asian Classics.**

An introduction to the most influential religious writings of South and East Asia. These "Great Books of the East" depict the values, ritual concerns, symbols, and philosophical speculations of the major religious communities of ancient and medieval India, Tibet, China, and Japan. Emphasis will be on key ideas with an eye to their broader significance. Readings may be drawn from the Upanishads, Bhagavad Gita, Analects, Dao De Jing, Journey to the West, and Life of Milarepa, among others. No prerequisites.

**RELS 0080. Japan: Nature, Ritual and the Arts.**

This course is an introduction to Japanese cultural and aesthetic traditions as represented in literature, the fine arts, gardening, tea practice, and selected martial arts. Readings include translations of classic Japanese works of literature and aesthetic theory, as well as modern interpretive and historical scholarship. Audiovisual materials are used to supplement the readings whenever feasible. Students who have no previous exposure to Japanese studies are welcome; there are no prerequisites. The format of the course is a combination of lecture and discussion.

**RELS 0085A. Exodus: Freedom in the Modern Black and Jewish Religious Imaginations.**

A symbol of the journey from exile and captivity, slavery and oppression to liberation and freedom, the story of the Biblical Exodus of the Israelites from Egypt has helped many communities articulate narratives of suffering and redemption. In this class, we will examine Black and Jewish confrontations with catastrophic conditions in modernity and try to understand the distinctive and yet paralleled ways the Exodus narrative has helped these communities undertake projects of racial, ethnic, and collective struggle for freedom and cultural self-transformation.

**RELS 0085B. Blues People: Topics in African American Religion and Culture.**

African American religious practices and cultural expressions have been a significant force in American culture and a sustaining force for African-Americans. Some have argued there is nothing distinctive about African-American cultures, others contend that African American religion is merely a response and a regurgitation of European forms of Christianity, while others have erected strict boundaries about what does and does not constitute black culture and religion. This introductory course will investigate what constitutes African American religion and culture, the social and political impact of African American religion and culture, and their relationship, among other things.

**RELS 0086. Religion and Movement Politics.**

This course considers the relationship between religion and social movements in democratic societies. Political theorists often invoke social movements and the Civil Rights Movement, in particular, as examples of salutary political uses of religion. But what does "religion" mean in these debates? What is its relationship to race and gender? And under what conditions – and to whom – do religions and social movements pose problems for democratic politics? This course explores these questions using a range of theoretical sources as well as historical, ethnographic and personal accounts of twentieth- and twenty-first-century social movements.

**RELS 0087. Religion in America.**

From Native American traditions and Puritan migrations in the seventeenth century to Barack Obama's "crypto-Islam" and debates over gay rights in the twenty-first: American history is religious history. For centuries, religion has shaped how Americans have carried out their everyday lives, interacted with others, understood themselves, and perceived the wider world. Focusing primarily on religious life in the United States, this course invites students to explore the relationship between religion and society in North America by addressing key questions and critical tensions surrounding such issues as race, ethnicity, science, gender, capitalism, pluralism, sexuality, and secularism.

**RELS 0088. Judaism, Christianity, and Islam.**

A survey of the history and major beliefs and rituals of Judaism, Christianity, and Islam, with special attention to issues of contemporary concern. Will serve also to introduce basic methods for studying religion in an academic context.

**RELS 0090E. Faith and Violence.**

Explores the relationship between religious texts and rhetoric and violence. How do sacred texts promote or discourage violence, and how have later religious communities understood (and continue to understand) these texts? While the course will focus mainly on Judaism, Christianity, and Islam, occasional Asian examples will be used. No prerequisites. Reserved for First Year students. Enrollment limited to 19. Instructor permission required.

**RELS 0090F. Friendship in the Ancient World.**

How have ancient societies understood friendship, and how do ancient ideas about friendship differ from or resemble those of contemporary Westerners? This seminar, a comparative investigation of the ways in which friendship has been represented in the Hebrew Bible, Mesopotamian literature, and Greco-Roman texts, will address these and other questions through study of materials such as the Epic of Gilgamesh, the Iliad, the Book of Ruth, 1 and 2 Samuel (on Jonathan and David), the Wisdom of Ben Sira (Sirach), and Aristotle's Nicomachean Ethics. Enrollment limited to 19 first year students.

**RELS 0090I. Radical Romanticism: Politics, Ecology, and Religion.**

We will endeavor to create an intimate community of learning as we jointly explore political, environmental, and religious aspects of Romanticism (especially British Romanticism). It has become commonplace to think of Romanticism as nostalgic notions of the pastoral or narcissistic reports of the individual's private gaze on the sublime. In contrast to this approach, we will focus on the radical political and environmental perspectives embedded within Romantic religious and poetic sensibilities. In the process, we will reflect on how this Romantic heritage can serve as a contemporary public resource for the cultivation of interrelated environmental and democratic beliefs and practices.

**RELS 0090J. Death and Afterlife in the Biblical Tradition.**

A close analysis of the development of ideas about death and the afterlife in the Hebrew Bible and in the literatures of Second Temple Judaism and early Christianity. Topics: life and death in Israel and ancient West Asia; the abode of the dead and its denizens; from Sheol to Heaven, Hell, and the final judgment; religious specialists, rituals, and the literature of death: necromancy; burial and mourning rites; cults of the dead ancestor. No prerequisites. Enrollment limited to 19 first year students.

**RELS 0090K. Christmas in America.**

This course explores how Christmas became a religious, consumer, and social extravaganza. Every year, many Americans devote several months to preparing for and recovering from Christmas. Most participate as Christians, but others participate despite other religious identities. Yet Christmas has not always loomed so large. Through encounters with such phenomena as sacred stories, consumer practices, and legal controversies, this course invites students to ask how and why Christmas became an important event. By the end of the course, students not only will recognize how religion and culture take shape together but also will appreciate how popular practices develop.

**RELS 0090L. Pilgrimage and Quest.**

An exploration of pilgrimage broadly conceived, encompassing devotional visits to revered sites, personal travel quests, and literary or imagined journeys. Emphasis on the ritual dimension of specific pilgrimages across cultures, as well as the transformative effects of the travel process itself. Some consideration of relations between pilgrimage and tourism. Materials include historical and anthropological records as well as biographical, fictionalized, and poetic accounts.

**RELS 0090M. Islam, Violence and Media.**

One of the most controversial issues in contemporary political discourse is the question of Islamist violence and its relationship to Islamic religion and practice. In this course, we will explore the phenomenon and media representation of radicalization, and their relationship to a number of institutions and issues, including but not limited to: religious texts, global politics, colonialism, war, and nationalism. The goals of this course are to familiarize students with the historical and discursive issues pertaining to radicalism and religious violence in Islamic and non-Islamic contexts, and to posit questions about what constitutes "radicalism" in a given tradition or cultural context.

**RELS 0095A. Islam from the Ground Up.**

Current events and popular culture alike direct our attention to the centrality of discourse on the Islamic world. In this course, we examine the historical origins and development of Islamic religion and practice in light of the sources and communities that shaped them in a variety of contexts. The goals of this course are to learn the fundamentals of: how people have studied the Qur'an, the concept and development of "Shariah", sectarianism, approaches to gender and sexuality, and Muslim theology, philosophy, and mysticism in pre-modern and contemporary Muslim life.

**RELS 0096. The Imaginary Lives of Muslims.**

How have Muslims understood the natural and social world that forms the backdrop for human lives? We will use this question to chart a variety of Islamic perspectives pertaining to thought and action. Topics include: worldviews contained in the Quran and other early Islamic materials; formal cosmologies that reflect continuity with late antique ideas; mystical thought pertaining to Sufis and Shi'is; reflection on politics and ethics; impact of modern science; and contemporary perspectives concerning the environment, gender, race, and class. No prerequisites or presumption of prior knowledge regarding the subject.

**RELS 0100. Buddhist Thought, Practice, and Society.**

From its beginnings to the 21st century. Principal teachings and practices, institutional and social forms, and artistic and iconographical expressions.

**RELS 0105. Judaism.**

Surveys the major practices, traditions, and beliefs of the Jews, with an emphasis on modern Jewish communities. How does a Jewish community shape its practices and beliefs against its own specific historical circumstances to create a coherent and meaningful religious system? What is "Judaism," and how do scholars of religion explain and interpret it?

**RELS 0110. Christians.**

A historical survey of Christianity from its foundations to the present, tracing its development into three main branches: Orthodox, Catholic, and Protestant. Readings from a variety of Christian "classics" accompany the survey, pursuing the theme of how-in different times, places, and circumstances-Christians have understood their relations to the divine and to the world.

**RELS 0120. The Classical Chinese Philosophy of Life.**

An introduction to the origins and early development of the indigenous religious thought of China from the oracle bone divination of the Shang Dynasty to the ethical philosophy of Confucianism and the cosmology and mysticism of Daoism. The course will seek to identify and elucidate the basic elements of the distinctive Chinese world view and demonstrate how they have shaped the nature of religious practice and experience and how they have been shaped by them. Works of interpretive scholarship will be used to supplement the primary texts in translation that will form the course. Optional lab section.

**RELS 0140. Food, Religion and Politics in South Asia.**

Why study food? What can food tell us about religion, politics, and culture? Food in South Asia often shapes identity, social status, ritual purity, religious belonging, and political activism—the notion that you are what you eat has wide currency. Whatever form it takes, food embodies histories of migration, trade, empire, colonialism, and ethics. Through reading primary texts and ethnographic articles, watching films, and (of course) eating delicious food, we will explore the rich foodways of South Asia and their social, religious, and political ramifications.

**RELS 0145. Karma, Rebirth and Liberation: Life and Death in South Asian Religions.**

Karma, Sanskrit for the "action" that makes up a human life, has been a central concern for the religious traditions of South Asia throughout their history. Hinduism, Buddhism and Jainism share the belief that after death people are reborn, taking on lives according to their actions in lives previous. In these traditions, liberation from the cycle of rebirth becomes the ultimate goal of human existence. This course examines the ideas of karma, rebirth and liberation in Hinduism, Buddhism and Jainism from historical, cosmological, ritual, narrative, iconographic and theological points of view. We also look at these ideas in Western culture.

**RELS 0150. Islam Unveiled.**

In this course, the historical origins and development of Islam will be studied in light of the sources and communities that shaped it. Themes to be explored include the central doctrines of Islam as derived from the Qur'an and traditions (sunna), the development of Islamic law (shari'ah) the Shi'i alternative, the growth of Muslim theology, philosophy, and mysticism (Sufism), and controversial issues among contemporary Muslims.

**RELS 0195. Gender in Early Jewish and Christian Narratives.**

Many of the favorite narratives of Jews and Christians in the ancient period (for this course, about 400 BCE to 300 CE) featured women characters or emphasized issues of gender: Esther, Judith, and Susanna; Mary Magdalene and other gospel women, or Thecla, the perhaps legendary companion of Paul. Both Jewish and Christian texts used gender to explore new ways of constructing heroic women and men that either re-inscribed or challenged traditional roles. This seminar takes up a close reading of narrative texts, compared also with wisdom texts (Proverbs, Ben Sira, Wisdom of Solomon, Avot).

**RELS 0200A. Christianity and Economic Inequality.**

In the face of the vast, increasing economic inequality, this sophomore seminar interrogates the role of religious institutions and individuals. Do our religious institutions sustain or challenge economic inequality, and how? We will attempt to answer this question with a focus on three types of texts: classical texts that shaped 20th Century U.S. Christian consciousness (e.g., Weber, Niebuhr, and Ayn Rand); contemporary works that analyze the effects of economic inequality on the social fabric (e.g., Stiglitz, Freeland, Wilkinson/Pickett); and texts that clarify the vital roles some contemporary religious movements are playing in supporting economic inequality (e.g., Bowler, Walton, Byrne).

**RELS 0240. Judaism and Christianity in Conflict.**

Explores the tense relationship between Judaism and Christianity from antiquity to the present, with an emphasis on theological issues and polemics. Readings include selections from the New Testament and early Christian writers on Jews and Judaism, Jewish writings on Jesus and Christianity, transcripts of medieval debates, philosophical broadsides, parodies, and contemporary theological documents (e.g., Vatican II).

**RELS 0260. Religion Gone Wild: Spirituality and the Environment.**

A study of the dynamic relation between religion and "nature" or the more-than-human world. Religion, in this course, includes forms of religion within and outside the bounds of conventional religious traditions. In this course, then, religion includes Buddhism, Christianity, and Aboriginal religion, but also ecofeminism, nature literature, and environmentalism. Topics in this study of religion, ethics, and environmental humanities include: religious depictions of humans in relation to "nature" and the more-than-human; the contribution of religions to environmental degradation and environmental health; religion and environmental justice; and North American and Australian indigenous eco-spiritual perspectives. Enrollment limited to 20.

**RELS 0290D. Islamic Sexualities.**

In this course we examine gender and sexuality in Muslim cultures, as well the ways in which Islam is imagined in relationship to gender and sexuality. We will think about how particular constructions of gender and sexuality affect the representation of Islam and Muslims in the US and abroad, especially in films and documentaries, which form a critical component of this course. Students will learn to engage with and complicate key terms and themes including "masculinity," "cultural difference," "women's and LGBT rights," and "modernity/civilization" that are widely, and often uncritically, deployed in current representations of Islamic culture.

**RELS 0290E. Engaged Buddhism.**

"Engaged Buddhism" is a term used to describe social activism that applies Buddhist insight and ethics. This course will examine the historical background of engaged Buddhism, explore its central concepts, analyze it theoretically, and look at practical applications. Since many engaged Buddhist movements employ meditation, we will also study, first hand, the effects of meditation on prosocial attitudes in the "Meditation Labs" that are integral to the pedagogy of the course. Preference given to students who have taken RELS 0500 or UNIV 0540 or who have prior coursework in Buddhism. Additional weekly meditation lab section.

**RELS 0290H. Defense Against the Dark Arts in the Ancient World.**

Alongside their Jewish and Pagan neighbors, ancient Christians sought to control and defend themselves against unseen forces teeming around them. They bound powerful angels to their will and harnessed the spirits of the recently deceased to activate their spells. Though none found the Elixir of Life, they left behind spells, recipes, and talismans as evidence of their quest to master spirits both hostile and sympathetic. This course will interrogate Christian and non-Christian conceptions of magic, its relationship with "religion" and "philosophy," contextualize Christian magical practices alongside their neighbors, and conclude by examining the reception of "magic" into the modern West.

**RELS 0320. Israelite Religion.**

The origins and development of ancient Israel's religious beliefs, rituals and cultic institutions will be considered from an historical and contextual (i.e., wider West Asian) perspective. Topics include method in reconstructing religion; myth, epic and history; the identity of Yahweh, Israel's national god; covenant; Yahweh and other deities (monolatry and monotheism; angels; a consort of Yahweh?); temples, their iconography and ideologies; festivals and sacrifice; purity; death and afterlife; religious specialists (priests, prophets, mediums, professional mourners). No prerequisites.

**RELS 0323. Great Jewish Books.**

A survey of classic Jewish texts, from the Bible to modern literature. Each text will be discussed from the perspective of both its own historical and social context and its engagement with earlier ones. Attention will be paid on how these authors address perennial issues of human concern and how their answers are shaped by their experience as Jews.

**RELS 0325. How the Bible Became Holy.**

No book in human history has exercised as much influence as the Bible. Over the past 2,000 years, people have killed and died for the Bible, and it continues to exercise a powerful if contested role in modern politics. Yet how did it achieve this power? This course will trace the development of the Hebrew Bible (Old Testament) from its origins in ancient Israel to its development about five hundred years later as a foundational text of both Judaism and Christianity. The focus will be on how Jews and early Christians throughout antiquity understood and ascribed authority to the Bible.

**RELS 0410. Christianity in Late Antiquity.**

The communal struggles, personal rivalries, and theological conflicts that shaped Christianity in its formative centuries: heresy and orthodoxy, hierarchy and charisma, gender and class, persecution and martyrdom, paganism and classical tradition, creeds and councils, asceticism and the body, church and state, eastern and western Christianity. Focused in the 2nd through 6th centuries A.D.

**RELS 0415. Ancient Christian Culture.**

How did the Jesus movement that originated in a backwater of the Roman Empire become the Empire's dominant religion? What was it like to be a Christian in a world full of religions, cults and philosophical traditions, and of diverse social and cultural identities? An introduction to the history of early Christianity, and to the ancient Christian culture through the exploration of selected topics by means of textual, material and epigraphic evidence. Multiple Christianities; literacy and orality; visual culture; the episcopal authority; wealth and poverty; asceticism and monasticism; hagiography and the cult of saints; sacred landscape and pilgrimage; women, gender; burial.

**RELS 0420. Sacred Bodies.**

How did ancient Christians understand physical holiness? What did the bodies of saints demonstrate or reveal? How was bodily sanctity represented in actual practices, and in literary, artistic, or ritual expressions? We will consider three broad categories of saints: desert heroes, holy women, and virtuosos (pillar saints, holy fools).

**RELS 0430. Sacred Stories.**

Ancient Christian narrative imagination and the formation of Western culture. Emphasis will be on the ancient stories that accompanied the spread and "triumph" of Christianity, but attention will also be given to how these themes and images have prevailed in western history. Biblical legends, heroes and heroines, saints and sinners, the demonized Religious Other.

**RELS 0500. The Theory and Practice of Buddhist Meditation.**

Examines the theory and practice of Buddhist meditation in historical and modern contexts. Traces this practice from its origins in 6th-century B.C.E. India to its transmission through Sri Lanka, Myanmar, Thailand and on to modern insight meditation movements in the West. Students will examine selected textual sources and explore how Buddhist meditation is practiced today, both as an individual practice and as part of broader social institutions. Additional weekly meditation lab section.

**RELS 0505. Big Screen Buddha.**

"Big Screen Buddha" examines representations of Buddhism(s) in diverse Asian cinemas. Classic, contemporary, documentary, and experimental films include Thai ghost stories, a Tibetan comedy, and portrayals of Japanese priests as sound artists. We will survey major traditions of Buddhism, and closely examine local lived traditions. Students will confront problematic representations of race and ethnicity as well as misogyny. The existence of death, sex, and drugs will arise in discussion. Additional topics include sound and Buddhists experimenting with making the medium sacred. Background in the study of Buddhism or film not required, though preferred. Lecture with screening plus discussion each week.

**RELS 0510. Confucian Ethics.**

An examination of Confucian moral thinking as contained in the *Analects*, *Mengzi*, *Xunzi*, and *Records of Rituals*. Issues considered include the absence of a concept of transcendence, the relationship between moral and ritual norms, and moral activity as an aesthetic and spiritual discipline, against the background of Western patterns of moral thought. Prerequisite: Previous work in ethics or Chinese studies.

**RELS 0520. Tai Chi, Qigong, and Traditions of Energy Cultivation in China.**

In recent years Taijiquan (Tai Chi) and Qigong have become increasingly popular forms of exercise, alternative medicine and contemplative practice. This course aims to provide students with a foundation for understanding these practices through an exploration of their roots in Chinese medicine, philosophy and religion, as well as their more recent history in modern China and the rest of the world. In addition to studying historical and scholarly interpretations of these practices, students will also have the opportunity to learn basic Qigong and Taijiquan in weekly labs.

**RELS 0525. The History and Practice of Yoga in India and Beyond.**

From its roots in premodern India to its current popularity worldwide, yoga has a rich a complex history. As a practice of the mind, body, and spirit, yoga has taken many forms—meditation, chanting, breath control, postures—in order to achieve a range of goals: liberation from rebirth, supernatural powers, strength, pleasure, peace, wellness. As its reputation and commodification have increased, yoga has attracted deep interest, debate, and even controversy. In this course we will study yoga from its earliest texts to its status in the modern world, addressing its historical, religious, social, and political ramifications in many different contexts.

**RELS 0526. This Whole World is OM: Mantras in Indian Religions.**

A mantra is a syllable or formula used in ritual and meditation. Mantras are central to Indian religions—not only Hinduism, but also Jainism, Buddhism, Sufism, and Sikhism. Some mantras are made up of words and language—usually in Sanskrit—while others are sound fragments with no semantic meaning. The sacred syllable OM, now a global symbol of Eastern spirituality, exemplifies the power and authority of mantra. What are mantras? What do they accomplish? How do they shape identities, beliefs, and practices? Engaging with sacred utterance in various media, this course explores the world of mantras in India and beyond.

**RELS 0530. Laozi and the Daodejing.**

Introduction to classical Daoism, one of the two indigenous religions of China, through the history, philosophy, and contemplative practices found in its famous foundational work, the *Daodejing*. Through careful study of this text and its many early iterations, including the recently discovered manuscript versions from Ma-wang-tui and from Guodian and early commentaries, we will attempt to reconstruct the intellectual and experiential elements on which this tradition was based. Limit: 10.

**RELS 0550. Tibetan Buddhism and the West.**

This course traces the history and development of the various lineages of Tibetan Buddhism from its origins in Indian Buddhism through to encounters between Tibet and the West in the modern period. The course investigates the religious, political, and geographical conditions in Tibet that influenced the development of some of the unique characteristics of the lineages of Tibetan Buddhism. The course explores key doctrines, practices, institutions, and religious leaders of the major lineages, and delves into key events in the modern period, beginning with the age of missionaries and explorers and ending with the Cultural Revolution and subsequent diaspora.

**RELS 0555. Zen: An Introduction.**

"Zen" has become a common trope in modern North American Culture but few people know what the term really means. This course will study Zen's origins in Indian Perfection of Wisdom teachings, follow its meanderings through China from the legend of Bodhidharma through the Five Houses of Chan, and chart its arrival and developments in Japan and eventual transplanting to the West. We will focus on several important Zen teachers: Huieng and Linji in China, Dōgen, Bankei and Hakuin in Japan. We will also explore the essential technique of kōan meditation and the practice of "just sitting."

**RELS 0570. Science, Religion, and the Search for Happiness in Traditional Asian Thought.**

The search for true happiness is as relevant today as it was 2500 years ago in South and East Asia. Is it attained through sense pleasures or through spiritual satisfaction? Attained through self-indulgence or through self-denial? Can you be completely and truly satisfied in life if you flourish while others suffer? What are the roles of compassion for self and others and of mindfulness and meditation in the creation of a life of genuine happiness? This course will explore these issues through readings in the Buddhist, Confucian, and Daoist traditions and via recent scientific research on mindfulness, meditation and compassion.

**RELS 0580. Experiencing the Sacred: Embodiment and Aesthetics in South Asian Religions.**

This course explores South Asian religions through the body, aesthetics, and the senses, with a focus on Hindu, Buddhist, and Jain traditions. Concentrating on embodied practices like meditation, chanting, eating, sex, asceticism, ritual, possession, and performance, we will examine experiences of the sacred past and present. How have sensory and material cultures shaped lives, practices, and doctrines? What placed does the pursuit (or denial) of sensual pleasure have in South Asian religious cultures? This course will draw on texts as various as sermons of the Buddha and the *Kamasutra*, and integrating a range of media from ethnographic films to graphic novels.

**RELS 0600A. Islam Today: Religion and Culture in the Modern Middle East and Beyond.**

Lupe Fiasco, Al-Jazeera News, the so-called Arab Spring, surreal sectarianism and reality shows produced by Ryan Seacrest: Contemporary Islam is now having an impact on modern culture in unprecedented ways. Islam is often said to be the fastest growing religion in the world, and is second to Christianity in all the countries of Western Europe. In this class we will study the contemporary life, culture and thought of Muslims in the Middle East and beyond, including America and Europe.

**RELS 0600B. Islam in America.**

Lupe Fiasco, the Al-Jazeera News Network, and Mos Def: from films to fiction, poetry and music, contemporary Islam is having an impact on modern culture in unprecedented ways. Islam is often said to be the fastest growing religion in America, and in this class we will study the contemporary life, culture and thought of Muslims in the US. We will begin with exploring Muslims in the US from its beginnings, as a result of the Atlantic slave trade, through the civil rights movement and the Nation of Islam, Malcolm X and mainstream Sunnis, and conclude with the multicultural present.

**RELS 0600C. Radical Islam (?).**

One of the most controversial issues in contemporary political discourse is the question of radicalization and its relationship to Islamic religion and practice. In this course, we will explore the phenomenon of religious radicalization, and explore its relationship to a number of institutions and issues, including but not limited to: religious texts, terrorism, global politics, war, immigration, nationalism, and law.

**RELS 0600D. Black & Brown Islam in the US.**

This class is a survey of Black and Brown Islam in America, in which we explore the contemporary life, culture and thought of Muslims in the US-context. We will begin with exploring Muslim life in the US from its beginnings in the Atlantic slave trade, to the civil rights movement and the Nation of Islam, to Malcolm X and the Nation of Islam, and conclude the course with the multicultural present, Donald Trump's presidency and continuing the War on Terror in all its political complexity. There are no pre-requisites or previous knowledge of Islam required to take this course.

**RELS 0640. Dying To Be With God: Jihad, Past and Present.**

This course will examine the concepts of martyrdom and jihad, past and present. We will begin with a comparison of Jewish, Christian, and secular "martyrdom, but focus extensively on the concept and evolution of jihad and jihad ideology in Islam, asking: How are war and martyrdom presented in the sacred texts of religious traditions? Historically, how have religious people idealized and problematized the martyr in different ways? In what ways have modern religious revivalism, geopolitical conflict and nationalism changed how people appropriate martyrdom and jihad today? Enrollment is contingent on attendance on the first day of class.

**RELS 0700B. The Bible as Literature (JUDS 0830).**

Interested students must register for JUDS 0830.

**RELS 0700C. Race, Religion, and the Secular (JUDS 0603).**

Interested students must register for JUDS 0603.

**RELS 0700D. How the Bible became Holy (JUDS 0682).**

Interested students must register for JUDS 0682.

**RELS 0700E. The Language of Religious Faith (JUDS 0820).**

Interested students must register for RELS 0700E.

**RELS 0700F. War and Peace in the Hebrew Bible and Its Environment (JUDS 0670).**

Interested students must register for JUDS 0670.

**RELS 0700G. Gender in Early Jewish and Christian Texts (JUDS 0606).**

Interested students must register for JUDS 0606.

**RELS 0810. Conservatives vs. Liberals: Religion and Identity in America.**

This course explores how Americans have cultivated, articulated, and contested religious and cultural identities during the twentieth- and twenty-first centuries. Identifying and interrogating apparent oppositions between religious conservatives and liberals, students will consider whether and why such oppositions have developed and persisted. Throughout the seminar, students will engage varied theoretical, historical, and thematic approaches to the study of religious identity, evaluating how attention to such issues as politics, ideology, gender, and class illumine the ways in which people come to understand themselves and others.

**RELS 0820. African American Religious Strategies: Martin and Malcolm.**

MLK, Jr. and Malcolm X are two iconic figures in the pantheon of black religious leadership. Their profoundly influential ideas about justice, freedom, democracy and racism, along with their activist strategies and personal biographies have generated extraordinary interest over the past 50 years. Despite this, the rich and complex tradition out of which their ideas and world-views evolve; the 300 year old religious strategies and practices employed by African-Americans have been understudied, disconnected from our understanding of their significance. This course will examine these traditions and these two central figures' roles within them in order to shed important light on both.

**RELS 0822. Social Justice and the Musical Afrofuture.**

Afrofuturism is an Afrocentric aesthetic and politics drawing from African cultures and science fiction. This course surveys black American Afrofuturist music as works of social justice activism through imagination and representation of alternative cosmologies, epistemologies, and politics of black life. Students will examine the works of artists such as Sun Ra, George Clinton, Erykah Badu, Missy Elliott, and Janelle Monáe. Students will also study Afrofuturist music and sound in films such as *Coming to America* (1988), *Get Out* (2017), and blockbuster *Black Panther* (2018), and its soundtrack. Classes include discussion of audio/video recordings, other primary source material, and secondary texts.

**RELS 0825. Foundational Texts in African American Theology.**

Central topics and foundational texts in the field of scholarship historically known as Black Theology. Major African American responses to those writings by Marxists, Womanists, process theologians, and religious humanists.

**RELS 0830. Religion, Reason, and Ethics from Kant to Nietzsche.**

The nineteenth century witnessed revolutionary transformations in thinking about the power and limits of human reason, the relation between reason and religion, revelation, the role of humanity in creating religion, morality and religion, the significance of history, and the plurality of religions. This course examines major thinkers from this period who continue to shape our own assumptions and reflection.

**RELS 0835. Black and Brown Religion in America.**

This course explores Black and Brown religious experience in American life, mainly from the perspectives of Christianity and Islam. We will explore topics such as secularism, White supremacy, Orientalism, imperialism, immigration, the history of segregation, and democratic political thought. The course goals are to: understand the histories of Islam and African American religion vis a vis race, religion, and theory in historical, cultural, and political context. We will also explore connections between solidarity movements and politics such as Black Lives Matter and the Palestinian/Israeli conflict.

**RELS 0840. Religion and Politics.**

This course examines the role of religion in public life, especially in pluralistic, democratic societies. We consider whether religion and politics can or should be separated; what role government should have in regulating religion; and whether a cohesive society needs a shared religion. Readings from early modern Western thinkers, contemporary theorists, and recent Supreme Court decisions.

**RELS 0841. Far-Right Religious Terrorism.**

Since 9/11, far-right violent extremists in the U.S. have committed almost twice as many terrorist attacks as Islamist terrorists, and are responsible for nearly half of all terrorism fatalities. While not all of these attacks are religiously motivated, in many instances they are explicitly Christian in their orientation. This course examines domestic and international far-right religious terrorism – as well as the U.S. government's response to this violence – by looking at attacks that are anti-abortion, white supremacist, anti-government, and anti-immigrant.

**RELS 0843. How do you Feel? The History of Emotions.**

This online course is an introduction to the history of emotion. How do we feel, and how do we know what we feel? How did concepts like shame, pride, wonder, happiness, or grief change over time? Are emotions primarily the result of neurological processes, or are they learned and performed within culturally determined social constructs? And finally, what are the politics of emotional expression from the point of view of racial, religious, and gender differences? We will explore these questions and more through readings on the theory and history of emotion, various media sources, and pre-modern as well as modern literature.

**RELS 0845. Religious Freedom in America.**

This course examines the ideal of religious freedom, which often is seen a cornerstone of American society. Interrogating that view, students explore the idea and practice of religious freedom in the past and present, paying close attention to its limitations, contradictions, and ironies. Although the course draws especially upon studies of religion, law, and politics in the United States, students also consider forms of religion and secularism from around the world. Reading-intensive and discussion-driven, this course has no prerequisites.

**RELS 0850. Liberation Theology in the Americas.**

Liberation theology seeks to bring the social teachings of Christianity to bear on political and economic injustice. This course treats liberation theologies as socially grounded, politically engaged currents in religious thought. We will investigate the historical contexts and central themes of liberation theology: the relationship between theory and practice, the political function of the church, the relation between political freedom and salvation, and the role of intellectuals.

**RELS 0880D. Fascism: 1933 - Present (UNIV 0701).**

Interested students must register for UNIV 0701.

**RELS 0915B. The Bhagavad Gita (CLAS 0855).**

Interested students must register for CLAS 0855.

**RELS 0915C. Mythology of India (CLAS 0850).**

Interested students must register for CLAS 0850.

**RELS 0915D. Dreaming in the Ancient World (CLAS 0771).**

Interested students must register for CLAS 0771.

**RELS 1000. Methods in Religious Studies.**

Intensive introduction to classical and contemporary theories of religion and the principal methods for the study of religion. Junior seminar for religious studies concentrators. Enrollment limited to 25.

**RELS 1050A. Problems in Israelite Religion and Ancient Judaism (JUDS 1625).**

Interested students must register for JUDS 1625.

**RELS 1050B. Heidegger, the Jew and the Crisis of Liberalism (JUDS 1614).**

Interested students must register for JUDS 1614.

**RELS 1050C. Prophets and Priests in Exile: Biblical Literature of the 6th Century BCE (JUDS 1690).**

Interested students must register for JUDS 1690.

**RELS 1050D. Jewish Magic (JUDS 1801).**

Interested students must register for JUDS 1801.

**RELS 1050E. Jewish and Christian Identity in the Ancient Period (JUDS 1601).**

Interested students must register for JUDS 1601.

**RELS 1050F. Digging for the Bible: Science, Religion, and Politics (JUDS 1974).**

Interested students must register for JUDS 1974.

**RELS 1050G. On the Margins of the Bible: Jewish and Christian Non-Canonical Texts (JUDS 1603).**

Interested students must register for JUDS 1603.

**RELS 1050H. Problems in Israelite History (JUDS 1635).**

Interested students must register for JUDS 1635.

**RELS 1105. Kabbalah: An Introduction to Jewish Mysticism.**

In the 12th and 13th centuries, new ways of approaching Judaism sprung up in France and Spain that would come to be known as "kabbalah." These new approaches expressed aspirations for mystical illumination and elaborated vast mythological narratives about divine and demonic beings. The kabbalists radically departed from the then-conventional understandings of Judaism, particularly those of philosophers like Maimonides. However, they also claimed to find their new worldviews in the tradition's most ancient texts. This course will introduce students to kabbalah's founding period, focusing on primary texts (in translation), especially the Zohar, the magnum opus of classical kabbalah.

**RELS 1130. Philo.**

Examines Philo's life and writing, and their importance for the study of Judaism and Christianity in antiquity. How typical was Philo? How did he interpret the Bible? How does his thought "fit" into the religious landscape of the first century CE? Focuses on reading Philo's writings, but will also survey scholarly approaches to Philo. Knowledge of Greek helpful.

**RELS 1144. Adam and Eve in Early Jewish and Christian Interpretation.**

In antiquity, the biblical story of Adam and Eve generated an enormous volume of commentary. Early Jews and Christians saw in this story profound lessons about the nature of humanity, God, and the world. We will examine how, in antiquity, both religious groups interpreted this relatively short story. We will also pay close attention to the different ways that both Jews and Christians developed to interpret these texts. Genres such as allegory, inspired interpretation (pesher), midrash, and the letters of the New Testament will be covered.

**RELS 1150. Religion in the Dead Sea Scrolls.**

An examination of the Dead Sea scrolls and the archaeology of Qumran with a particular focus on the religious aspects of this community. How did the authors of these scrolls envision their relationship with the divine? How did they worship? How did they understand religious and moral perfection? This class will have an additional section for graduate students. Enrollment limited to 20.

**RELS 1190. Religious Japan.**

An introduction to the history of Japanese religion in the early and medieval periods, with some attention to related modern and contemporary manifestations. Emphasis on the development of both native practices ("Shinto") and Buddhism, and on the historical interaction between them. Readings include primary texts in translation and selected modern interpretations. A previous course in Asian religion or culture is recommended but not required.

**RELS 1300. Ancient Christianity and the Sensing Body.**

Bodily experience and sensory engagement became increasingly important for Christians during their first six centuries. This seminar examines how and why the body and its senses gained worth for ancient Christians as instruments for gaining knowledge of God. Prerequisites: RELS 0110, 0400 or 0410.

**RELS 1315. Religious Authority in an Age of Empire.**

How does one live in a hostile Empire? How do you carve out a niche? Where do you allow the Empire in and where do you draw a hard line? Such were the questions that both Jewish and Christian communities faced at various times in the Roman Empire. In this course, we will look at the variety of ways that both communities negotiated with and against Empire. We will read texts across religious lines, including gospels, gnostic texts, Rabbinic literature, apocalypses, and Church orders. To sharpen our thinking, we will also read literature associated with post-colonial critical thought.

**RELS 1320. Social World of the Early Christians.**

The followers of Jesus created a movement that spread quickly from rural Galilee to the largest cities of the Roman Empire, ultimately to become the largest religion in the world. Increasingly, scholars write a history of the early movement by learning more about its historical context, the Jewish, Greek, and Roman worlds. The fascinating texts of the followers of Jesus will be studied in comparison to equally fascinating non-Christian texts, with a focus on social categories: patterns of new religious movements, with reference to race, class, gender, ability, and other categories.

**RELS 1325A. Educating Bodies in Ancient Christianity.**

How did ancient Christians learn to be Christian? Did Christian education look different from the ways that "Pagans" learned to be Pagan, Jews Jewish, or "heretics" heretics? This course explores the many ways that Christians learned to be Christian, paying particular attention to the role of the family, city, liturgy, and, of course, "schools." We will adopt a comparative approach, looking at education among heretical "Gnostic" communities, on the one hand, and the rabbinic Jewish community, on the other. Some familiarity with the ancient Mediterranean world, through prior study of early Christianity, Judaism, Classics, or Ancient History, is recommended.

**RELS 1325B. Early Christian Asceticism: Rhetorics of Practice.**

A study of eastern Christian asceticism and its literary expressions during late antiquity, with attention to forms, motivation, theological understandings, and cultural impact. Particular focus on Egypt, Cappadocia, and Syria.

**RELS 1325C. The Virgin Mary in Christian Tradition.**

Who was the Virgin Mary? How did she become important, when and to whom? What was inherited? What was new? How were Mary's meanings demonstrated? A study in the developing theological and devotional traditions regarding Mary the Mother of Jesus, focused on the first thousand years of Christian history. Major theological positions; relationship to pre-existing religious practices and goddess traditions; the role of popular violence; Marian piety; Marian relics; Mary as cultural metaphor. Seminar format.

**RELS 1325D. Desire and the Sacred.**

Relationality, sexuality, and the quest for holiness in medieval and Byzantine Christianity. How did medieval and Byzantine Christians understand human relationships as instrumental in the human advancement towards God? How did they utilize erotic desire as an ontological aspect of embodiment? What sorts of relationships, lived in what kinds of social arrangements, enabled pursuit of human divine union? Seminar.

**RELS 1330A. The Life and Afterlives of the Apostle Paul.**

While the writings of the Apostle Paul are commonly understood as early Christian scriptures, the Apostle Paul never converted to "Christianity." He was and remained Jewish. We must therefore reexamine his writings within his Jewish context, not apart from it. We also need to see how the earliest "Christians" talked about Paul within the context of an emerging "Christianity." In this course, we will first dive into both the authentic and spurious letters of Paul in the New Testament. We will then turn to the figure of Paul in later Christian texts, both canonical and non-canonical.

**RELS 1340A. Roman Religion (CLAS 1410).**

Interested students must register for CLAS 1410.

**RELS 1370A. Augustine and Hegel.**

A theoretical comparison of Augustine of Hippo and G.W.F. Hegel, highly influential thinkers at different turning points in Western history, on various facets of their understanding of religion. Potential themes for comparison include the relationship between Christian faith and philosophy, God and the world, and religion in history and society.

**RELS 1370B. Philosophy of Mysticism.**

Covers important attempts to understand the nature of religious experiences and mysticism. We will look at several philosophical issues surrounding religious experience, including: (a) whether mystical experiences are too private for outsiders to understand or evaluate them; (b) what the relationship between religious experiences, language, and culture is; (c) whether religious experiences justify religious beliefs; and (d) how gender and religious experiences are related. We will treat theorists from various perspectives, including philosophical, historical, theological, psychoanalytic, and neuroscientific. Previous work in philosophy courses (or philosophically-intensive courses) is highly recommended. Enrollment limited to 20.

**RELS 1370C. David Hume and Religion.**

This course will consider and challenge traditional scholarly views of philosopher David Hume as a critic of Christianity, by examining a wide range of his writings (letters, historical writings, moral enquiries, philosophical and religious writings). How might his corpus inform work in philosophy of religion? Previous coursework in philosophy or philosophy of religion strongly advised. Enrollment limited to 20.

**RELS 1370D. Process Theology.**

This advanced seminar aims to familiarize students with the thought of Alfred North Whitehead and his theological interpreters. It will be dedicated to a close reading of the foundational texts of one of the most important theological developments of the twentieth century: Process Theology.

**RELS 1380A. Money, Media, and Religion.**

This course explores the relationship between religious life, forms of capitalism, and media technologies in the history of the United States. From constructing buildings and printing texts to disseminating teachings and communicating with members: essential aspects of religious life require both money and media. Yet forms of money and media continually have changed, and those changes have taken shape in dialogue with religious beliefs, practices, and sensibilities. This seminar examines this dialogue by visiting such varied sites as Puritan marketplaces, Santa Claus displays, Bible factories, television talk shows, and Occupy protests.

**RELS 1380C. Law and Religion.**

In our arguably "post-secular" age, conflicts over the relationship between religion and law have again moved to the forefront of international debate. In a multicultural and globalized world, such conflicts often provoke contestation over the very possibility of universal definitions of either "religion" or "law," let alone their proper relationship. Our interdisciplinary inquiries on these questions will include concrete legal disputes in domestic and international courts; theoretical debates over the construction of "religion" in fields such as anthropology, religious studies, and philosophy; and historiographical controversies about the relationship between "secularization" and sovereignty, particularly in light of the legacy of colonialism.

**RELS 1385. Religion and Postmodernism.**

This advanced seminar treats the central ideas in the thought of Zizek, Sloterdijk, Bauman, and others. It will pay particular attention to the idea of God in the works of Derrida, Foucault, and Deleuze as it filters through these contemporary, popular efforts. Students will trace some of the normative aspects of a postmodern ethics and theology by looking at "Emergent" churches, "New Thought", and post-foundational Christian theology in practice.

**RELS 1390A. Religion and Critical Theory.**

This course will give a critical overview of the Frankfurt School, particularly its contributions to the study of religion. Tracking the insights and blindneses of Adorno, Horkheimer, Habermas and Benjamin (among others), we will consider how technological developments in the 'culture-industry', late-modern capitalist forms of socialization, and post-Enlightenment philosophical claims regarding religion and theology bear on the ways we talk about autonomy, power and authority. Covering topics such as negative theology, the non-secular critique of religion, communicative praxis, and divine violence, our inquiry will emphasize the social features of theology, the aesthetic content of belief, and the communal aspects of religion.

**RELS 1410. Directed Readings in Chinese Religious Thought: Zhuangzi.**

Entails a careful reading of the entire text of the *Chuang Tzu* in translation. Secondary sources on the philosophy and textual criticism of the book--drawn from the writings of Graham, Liu Hsiao-kan, Ivanhoe, Mair, Roth, and others--are also read. Seminar format. Pre-requisites: At least one of the following courses: RELS0040; RELS0120; UNIV0540.

**RELS 1415A. Classical Daoist Thought.**

Considers philosophical issues in early Daoism. We will work with classical texts such as Guanzi's "Inward Training," the Laozi, the Zhuangzi, and the Huainanzi and examine issues in them that have been of interest to comparative philosophers, such as cosmology and cosmogony, the nature of religious experience, and the types of implicit and explicit moral thought. The course will feature primary works in translation and secondary works by authors such as Graziani, Ivanhoe and Kjellberg, Moeller, Ames, Yearley, Raphals, Cook, Roth, and Slingerlands. Prerequisites: RELS 0040 and 0120. Enrollment limited to 20.

**RELS 1420. The Contemplative Foundations of Classical Daoism.**

Introduction to classical Daoism, one of the two indigenous religions of China, through the history, philosophy, and contemplative practices found in its foundational works the Daodejing and the Zhuangzi. Through careful study of these texts, we will attempt to reconstruct the intellectual and experiential elements on which this tradition was based.

**RELS 1425. Buddhist Poetry.**

This course surveys Asian and Anglophone literary cultures that emerged in response to Buddhist teachings and practices. Through close reading, we will engage epic poetry celebrating the Buddha's life; verses in Buddhist scripture; the landscape poetry of Chinese hermits; the poetry of early nuns; Japanese poems of spiritual travel; American beatniks; and contemporary Taiwanese poetry. All readings are available in English. Students may complete a creative or imitative project, an original translation, or a research paper for the final project.

**RELS 1430. Buddhist Classics.**

An opportunity to read and understand the canonical texts of East Asian Buddhism. Through close reading, written analysis, and discussion, participants will become conversant with the major Mahayana Buddhist teachings in their original scriptural or literary articulations. Selected later interpretations may also be considered. All readings are in English translation. Previous study of Buddhism is recommended, but not required. Enrollment limited to 20 students.

**RELS 1435. Buddhism in Motion.**

This advanced seminar examines Buddhism as it moves across the edges of China. Telling histories of Buddhism in motion will challenge us to reimagine the encounters between the Indian Buddhist religion and native Chinese cultures. After reviewing foundational works in the field, including theories of cultural translation, we engage recent studies of Chinese Buddhism that focus on interstices, borders, and contact zones; examine sources for the study of Chinese Buddhism from cross-cultural perspectives, including objects, emigrants, medicine, and bathing practices; and practice critical thinking about how we talk about Chinese Buddhism when the object of study is in motion.

**RELS 1440A. Themes in Japanese Buddhism.**

An exploration of critical themes and debates in the study of Japanese Buddhism. Participants become conversant with the key features of medieval Japanese thought as well as the strengths and weaknesses of established conceptual models in Japanese Buddhist studies. Readings include primary texts in English translation and modern secondary interpretations. Recommended: a course in Buddhism or East Asian religions.

**RELS 1440B. The Archaeology of Japanese Buddhism.**

This course explores the history of Japanese Buddhism through archaeological sites, artifacts, and interpretations. It aims to introduce students to the major contours of Japanese Buddhist history by examining the relationships between religious transmission, belief, ritual, and material culture. We will first focus on the major issues surrounding material culture in the study of Buddhism, and religion more broadly. The remainder of the course will consist of a survey of the chronological transmission and development of Buddhism in Japan in the early and medieval periods through case studies of specific sites, objects, architectural features, sculpture, and human remains.

**RELS 1441. Zen Meditation in China, Korea, and Japan.**

Intensive study of the development of Zen Meditation in China, Korea and Japan featuring historical origins in Indian Mahayana Buddhism and Chinese Daoism. Historical and social contextualization will be balanced by first-person investigations. Examines both kōan and silent illumination methods. Weekly seminars on representative texts in translation; labs will experiment with meditation techniques directly drawn from the readings. Students register for both seminar and lab. Prerequisite: Any of the following: COST 0100, 0420, 0480; RELS 0040, RELS 0100, RELS 0145; RELS 0290E; RELS 0500, or UNIV 0540; or instructor's permission. Enrollment limited to 20. Additional weekly Lab section.

**RELS 1442. The History, Philosophy, and Practice of Rinzai Zen Buddhism.**

Follows Rinzai Zen Buddhism from origins in India to developments in China to its transmission to Japan and eventual transplanting to the West. Course will examine the nature of cultural and historical influences on the practices and adaptations through the Asian and American contexts, including the secular pedagogy of Contemplative Studies. This is a 2016 GELT course. This course has an experiential learning component that includes travel to Japan for on-site learning. Students admitted to the course must be able to travel to Japan in January of 2017.

Priority Given To: Students with declared Contemplative Studies or Religious Studies or East Asian Studies Concentration and who have taken three of the following courses: RELS 0040, RELS 0290E, RELS 0500, UNIV 0090, UNIV 0456, UNIV 0540, UNIV 1000, UNIV 1950; prior coursework in Buddhism or Japanese Religions at Brown will also be considered. Permission of instructor required.

**RELS 1500. From Moses to Muhammad: Prophets of the Ancient World.**

The figure of "the Prophet" forms the backbone to many of history's major religions. From well-known prophets like Moses and Muhammad to more obscure figures like Mani, ancient prophets claimed to have unique access to God(s). Yet the concept of prophethood, and its twin, "prophecy," was as diverse as those who claimed its mantle. This seminar will explore ancient discourses of prophethood and prophecy from the Ancient Near East up to the early medieval era. Our reading selection will include the Hebrew Bible, apocalypses, Greek theories of divination, the Manichaean corpus, the Qur'an, and other "non-canonical" texts.

**RELS 1510. Islam in South Asia.**

A survey of Muslim presence in South Asia. We will trace historical development of communities, including the arrival of Muslims in the subcontinent, establishment of various polities in the medieval period, and the evolution of modern colonial and postcolonial states. Paying attention to religious ideas, literary expression in numerous languages, and art and architecture, we will treat Islam as a multidimensional factor embedded within diverse South Asian intellectual and cultural contexts. Readings include original materials in translation and academic studies from various humanities and social science fields.

**RELS 1520. Pilgrimage and Sacred Travel in the Lands of Islam.**

This seminar focuses on pilgrimage and travel to *loca sancta* in the Islamic world. We will read travelogues and pilgrimage manuals in translation, and will address theoretical and anthropological studies on the phenomenon of pilgrimage and sacred travel in a variety of geographical and chronological contexts. We will study physical, artistic, and architectural aspect of pilgrimage shrines. Enrollment limited to 20 students.

**RELS 1530A. Methods and Problems in Islamic Studies: Narratives.**

Examines the problem of historical thinking and writing in the first six centuries of Islam. It will specifically emphasize the rise and development of Islamic narratives as they are discussed in contemporary scholarship on how to "do" Islamic studies. As such, we will discuss, in depth, theoretical issues pertaining to source criticism, Orientalism, the Cultural Turn, anthropology, and narrative. Enrollment is limited to 20 students.

**RELS 1530B. Heresy and Orthodoxy in Islamic Thought.**

Orthodoxy is defined as "right belief" while Heresy is just the opposite, but those definitions have always been in tension with society and culture. This course will interrogate theory and history to ask "What are Islamic Orthodoxy and Heresy?" From Islamic Law to who is or is not a "heretic" we will uncover interpretations of religious law, practice, and culture to learn how scholars apply orthodoxy or heresy to disrupt and unsettle notions of what "Islam" was at different moments, and how their interpretations force us to think of new ways to envision the formation of communities.

**RELS 1530D. Medieval Islamic Sectarianism.**

Sunni and Shi'i conflict and sectarian division have been an enduring issue in the Islamic world. From Iraq to Syria, Iran to Egypt, inter-Muslim conflict and conflicting ideologies seem to be central issues. But how accurate and historical is this impression? In this course, we examine the origins and evolution of Islamic sectarianism, with an emphasis on the politics of religious authority in the Islamic world, old and new. This is an upper level seminar, and juniors and seniors will be given preference for enrollment. Shoppers must attend the first day of class if they wish to enroll.

**RELS 1540. Monks, Mystics and Martyrs: Abrahamic Traditions Compared.**

This course explores the process of "standing out" from mainstream society, from traditional kinship relationships, from local practices of community and economic production, undertaken by ascetics and mystics in the three Abrahamic traditions. We will explore monasticism and mysticism in Judaism, Christianity, and Islam, from the period of late antiquity to the high Middle Ages. Using primary sources in translation and scholarship on the phenomena of asceticism and mysticism, we will address the motivations for and manifestations of non-traditional practices of worship and community-building in the Mediterranean and Middle-Eastern world.

**RELS 1610. Sacred Sites: Law, Politics, Religion.**

Sacred sites have long been flashpoints for inter-communal conflict the world over, as well as posing challenges to sovereign State authority. Such sites range from natural landscapes to architectural masterpieces. They often come to symbolize the perennial clash between the religious and the secular, the sacred and the political, tradition and modernity. We will discuss a diverse array of specific disputes and ask whether one may even speak of "sacred sites" cross-culturally. Can legal frameworks embrace different notions of the sacred? We will also examine the historical contexts that provoke such disputes, particularly the aftermath of colonialism.

**RELS 1612. Death: Religion, Philosophy, Law.**

Profound meditations on human life always confront its perhaps most baffling feature: death. We will study human mortality from a variety of perspectives, highlighting the powerful implications of death for the living. These include religious perspectives, with their paradox of the quest of mortal beings for the infinite, as well as of life after death; philosophical perspectives, with their insistence on confronting death for an authentic life; legal perspectives, with their enforcement of the intent of the deceased in the lives of survivors. That "our little life is rounded with a sleep" (Shakespeare) will be our central mystery.

**RELS 1620. Disability in Antiquity.**

An investigation into the ways in which physical deformities and mutilations are represented in texts from ancient Israel, Mesopotamia, Greece, and other Mediterranean cultures. Primary focus: texts of the Hebrew Bible.

**RELS 1650. Gospel Music from the Church to the Streets.**

Black gospel music has informed popular music artists including Beyoncé, Elvis, and Chance the Rapper. This course surveys African American gospel music as it is implemented for worship, evangelism, and popular consumption. Beyond analysis of key musical and lyrical characteristics of gospel, this class gives attention to the religious and sociocultural contexts that inform gospel composition and performance. Gospel music is integrally connected to the worship traditions of black American Pentecostals, Baptists, and Methodists. Consequently, this course is also a musical introduction to African American Christianity. Classes include interactive demonstrations in addition to discussion of audio/video recordings and required texts.

**RELS 1700A. The History, Philosophy, and Practice of Rinzai Zen: Zen Master Hakuin Ekaku.**

Explores Japanese Rinzai Zen Buddhist tradition by focusing on its seminal figure, Hakuin Ekaku (1686-1769). Examines his biography, core practices, and key philosophy by looking at selections from his essential autobiographical and philosophical writings as well as his artwork. Focuses on the following aspects of Hakuin's importance in the history of Japanese Buddhism: Hakuin as reviver of Rinzai Zen, especially *kōan* practice; Hakuin as a meditation master; Hakuin as talented artist; Hakuin as social critic. Readings will be primary sources in translation.

**RELS 1705A. Principles and Practices of Contemplative Studies.**

Advanced study of the distinctive methods of the field of Contemplative Studies that includes third-person, second-person, and critical first-person perspectives. Will focus on the study of meditative practices in their cultural contexts and on essential scientific research on their nature and effects. Prerequisite: COST 0100 or Permission of Instructor. Meditation Lab to be scheduled

**RELS 1741A. International Law (INTL 1700A).**

Interested students must register for INTL 1700A.

**RELS 1760. Religion and Suspicion.**

Religion has arguably been the classical locus of suspicious models of interpretation. Social and critical theorists from Marx to Foucault have argued that we only understand what religion really does if we interpret it with suspicion—if we refuse to take its claims at face value. Others have sought to redirect suspicion back against suspicion itself, and religious thinkers have sought to incorporate critiques of religion into their own theological projects. This seminar studies key figures in this complex interplay of religion and suspicion. Likely readings from Feuerbach, Marx, Nietzsche, Barth, Horkheimer, Adorno, Gadamer, Foucault, Said, Gutiérrez, Schüssler-Fiorenza, and Butler. Enrollment limited to 20.

**RELS 1830A. Pragmatism, Religion, and Politics.**

Pragmatism is a distinctive American school of thought that sees the goal of philosophy not as the apprehension of timeless truths but as a practical project of bettering individual lives and society. Pragmatists such as William James and John Dewey were devoted to deepening America's commitment to democracy. Both saw an important place for an unconventional sort of religion in democratic life. This course explores the pragmatist thought of James, Dewey, and others, looking especially at their views on religion and politics. We also will explore the influence of pragmatism on Barack Obama. Enrollment limited to 20 juniors and seniors.

**RELS 1880A. The Gift in Antiquity.**

This course is an interdisciplinary and cross-cultural examination of gift-giving in antiquity, with a focus on the Mediterranean in late antiquity. We will examine a range of gift-giving activities, such as sacrifices (gifts to the gods), civic donations, and almsgiving. Several visiting lecturers will participate in the course, and it will culminate in an international conference to take place at Brown.

**RELS 1990. Individual Study Project.**

Directed reading and research arranged with individual faculty. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**RELS 1999. Thesis Preparation.**

Required of seniors in the honors program. Open to others only by permission of the chair of the department. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**RELS 2000. Theory of Religion.**

Critical examination of major approaches to the study of religion, especially those of the anthropology and the history of religions, with attention to issues in current debate.

**RELS 2010A. Exegesis at Qumran.**

Focuses on Hebrew exegetical texts such as the Temple Scroll, MMT, pHab, 4QJub, CD. Intended for doctoral students and others with sufficient knowledge of Hebrew.

**RELS 2010B. 1 and 2 Kings.**

Translation and exegesis of Kings. Intended for those with advanced Hebrew.

**RELS 2100B. Exegesis at Qumran.**

Focuses on Hebrew exegetical texts such as the Temple Scroll, MMT, pHab, 4QJub, CD. Intended for doctoral students and others with sufficient knowledge of Hebrew.

**RELS 2100E. Literature of the Early Second Temple Period.**

A close reading of selections from surviving literary texts of the late sixth century (e.g., Isaiah 56-66, Zechariah 1-8, Haggai) and the fifth century (Ezra-Nehemiah, Malachi). Prerequisite: An advanced knowledge of biblical Hebrew and permission of the instructor.

**RELS 2100F. Seminar in Biblical Studies: Ugaritic.**

Survey of Ugaritic grammar followed by readings in mythic and epic literature (e.g. the Baal Cycle, Kirta, Aqhat) and ritual texts. Prerequisite: Knowledge of the grammar of one Semitic language. Open to graduate students only.

**RELS 2100G. Early Rabbinic Literature: The Mishnah.**

Readings in the Mishnah and related rabbinic literature. While the focus will be on gaining textual skills, we will also survey academic approaches to the Mishnah: What is the Mishnah and its relationship to earlier and contemporaneous texts? How was it composed, transmitted, and received? Prerequisite: Reading knowledge of Hebrew.

**RELS 2101. The Court Narrative in Ancient Israel.**

A number of ancient Israelite and Jewish narratives are set in the court of the foreign king: the story of Joseph in Genesis 37–50, Esther, Daniel 1–6 (along with the additions from the Apocrypha: Susanna and Bel and the Dragon), and the Prayer of Nabonidus from Qumran. These entertaining narratives are often set off from the more strictly historical tradition, and seem to have been part of a resilient and international genre of popular stories. In this course we will read and analyze these narratives in their original Hebrew, Aramaic, and Greek.

**RELS 2110A. Religion and Romanticism: Religion, Democracy, and the Environmental Imagination.**

The seminar will explore the central radical religious, democratic, and environmental dispositions and ideologies that mutually informed each other in eighteenth- and nineteenth-century British Romantic literature and their subsequent and sustained legacies in America. We will read such authors as William and Dorothy Wordsworth, Coleridge, Mary Shelley, Emerson, and Thoreau.

**RELS 2110B. Radical Romanticism: Progressive Democratic, Environmental, and Religious Traditions in North America.**

Is America fundamentally defined by Romanticism? We will explore the sustained legacies of Romanticism in America, giving special attention to the interrelated topics of religion, democracy, and the environment, by reading such authors as Emerson, Margaret Fuller, Thoreau, Whitman, and Frederick Douglass; William James, George Santayana, and W.E.B. Du Bois; and Terry-Tempest Williams, Barry Lopez, and Wendell Berry.

**RELS 2110C. Suspicion and Its Others.**

From the hermeneutics of suspicion to post-critique, a range of thinkers and theories have positioned suspicion as a central critical disposition of the modern age. In this collaborative seminar we will explore the concept and practice of suspicion both in relation to the classic objects over against which it emerged—morality, religion, and tradition—and through the lens of other modes of engagement more recently proposed, including charity, reconstruction, attunement, quiet, resonance, and reparative practices of reading. Readings will be drawn from philosophy, critical theory, race and ethnicity studies, gender and sexuality studies, and literary theory and criticism.

**RELS 2160. Aramaic Readings.**

A survey of epigraphic and biblical Aramaic intended for doctoral students and others with sufficient background in Aramaic grammar.

**RELS 2200B. Asceticism.**

A study of eastern Christian asceticism during late antiquity, with attention to forms, motivation, theological understandings, and cultural impact. The focus in this offering will be eastern Syriac monastic traditions, 4th through 8th century.

**RELS 2200E. Christianizing Antioch.**

Antioch from the first century CE until the Muslim conquest in the seventh, as Christians first utilized the city and its resources for their own formative developments, and then came to assume ascendancy over its society, culture, and landscape as the Roman Empire took on its Christianized identity.

**RELS 2200J. The Virgin Mary in Late Antiquity.**

A study in the developing theological and devotional traditions regarding Mary the Mother of Jesus, focusing on the fourth through the sixth centuries A.D. Major theological positions; relationship to pre-existing civic cults and goddess traditions; the role of popular violence in the Mariological definitions of the Council of 431; imperial Marian piety; Marian relics; Mary as cultural metaphor.

**RELS 2200M. Early Christian Hymnography.**

Select examples of early Christian hymnography, 2nd–6th centuries. Particular attention to poetic forms, types of content, ritual contexts and functions, and performative elements. Weekly readings in Greek.

**RELS 2200Q. Readings in Syriac.**

Dramatic narratives in liturgical poetry. Readings from Cyrillonas and Jacob of Serug.

**RELS 2300A. Seminar: Early Taoist Thought.**

The foundational philosophical texts of the Taoist tradition will be read in Classical Chinese and analyzed from a number of possible perspectives including comparative religious thought, and historical and textual criticism. Texts for each year's version of the course will be drawn from the following list: *Chuang Tzu*, *Lao Tzu*, *Huang-Lao po-shu*, *Lü-shih ch'un-ch'iu*, *Han-fei Tzu*, *Kuan Tzu*, and *Huai-nan Tzu*. Pre-requisites: reading knowledge of Classical Chinese and prior study of Taoist thought. Advanced undergraduates may be admitted.

**RELS 2300B. Huai-nan Tzu.**

No description available.

**RELS 2380A. Chinese Buddhist Texts.**

Each week we will engage in close reading through translation of Buddhist texts in the original Chinese. Selections will draw from sutras, commentaries, prefaces, colophons, biographies, and Chan literature. The course introduces research methods, major sources, dictionaries, and digital tools, and culminates in a seminar paper demonstrating original research using the tools and methods practiced in class. Prerequisite: Reading competence in classical Chinese.

**RELS 2380C. Buddhist Sutra.**

This course is about Buddhist scripture, and this year will focus on foundational Mahāyāna sūtras. Readings include selections from recently excavated manuscripts of the earliest known texts, The Buddhist Literature of Ancient Gandhara; the classical expression of emptiness in The Diamond Sūtra; and a likely apocryphal Chinese scripture, The Awakening of Faith in the Mahāyāna, source of an influential vision of intrinsic Buddhahood. Additional topics to be announced. Most readings available in English translation. Ability to read premodern Buddhist Chinese required for full participation. Students with previous background in Buddhist studies will be more able to fulfill course expectations.

**RELS 2400A. Orthodoxy and Heresy in Islamic Thought.**

This graduate seminar comprises advanced readings exploring the concepts of "orthodoxy" and "heresy" in a range of scholarly and theoretical contexts. We will explore the historiography of these two terms, their problematization and limits, and related concepts in primary and secondary literature. This course is best suited for graduate students with background training in Islamic Studies, and knowledge of Arabic and/or other relevant languages is preferred.

**RELS 2400B. Historiography of Islam.**

A critical appraisal of the field of Islamic history in light of issues in contemporary philosophy of history. We will discuss various ways in which 'Islam' has been imagined as an object of historical description and analysis. Topics include: historical thought generated by Muslims; relationship between historical projection and religious ideology; impact of contingent factors such as Mongol domination and modern colonialism; Orientalist views of the Islamic past; significance of narrative patterns, poetry, and modern historical fiction; and contemporary academic and popular trends. Intended for graduate students, with time devoted to materials in original languages (Arabic, Persian, and/or Urdu).

**RELS 2400C. Sufism Seminar.**

A survey of Sufism—as an Islamic religious phenomenon as well as a modern academic field—from the earliest sources to expressions in contemporary Muslim contexts. We will discuss Sufi mystical philosophies, liturgical practices, social organization, and historical development in Africa, Asia, and the Middle East. Readings consist of translations and academic treatments from various perspectives in the humanities and the social sciences. There will also be an optional weekly session dedicated to reading materials in original languages pertinent for course participants' research agendas.

**RELS 2400D. Orthodoxy in Antiquity.**

Examines the concept of "Orthodoxy" in ancient Mediterranean religion, with a focus on the development of Jewish orthodoxies from the third century BCE to the seventh century CE. How and why are orthodoxies and heresies created? Knowledge of at least one ancient language (typically Hebrew or Greek) required.

**RELS 2400K. New Directions in the Study of Islamic Worlds.**

This course is a pro-seminar in new methodological interventions for the study of religion, society and culture in the Islamic world, broadly speaking. We will consider methodological and theoretical approaches from multiple fields, including but not limited to religious studies, anthropology, Near Eastern and South Asian studies, and will design some of our investigations around the research specialties of graduate students in the seminar.

**RELS 2450. Exchange Scholar Program.****RELS 2600D. Pragmatism and Religion.**

Readings in the original American pragmatists and their recent admirers with special attention to the topic of religion.

**RELS 2600E. Seminar in Religion and Critical Thought: Hegel.**

To Be Determined

**RELS 2600G. Reason, Tradition and Modernity.**

The modern West has been defined largely by pervasive challenges to inherited religious beliefs, ethical mores, and political institutions. Since the Enlightenment, these developments have provoked widespread reflection on the nature and significance of tradition, the limits of reason, as well as the relation between reason and tradition. We will trace this current from the developments of German romanticism through recent "new traditionalist" thought, such as that of Alasdair MacIntyre.

**RELS 2600J. Religion, Power, and Practice.**

The turns to power and practice are among the most important recent events in the academic study of religion, and in the humanities generally. Power speaks of the ways in which social arrangements produce social differences, resulting in domination, cooperation, and resistance across lines of class, race, gender, sexual orientation, and ethnicity. Practice speaks of what people *do*, a broader emphasis than prior emphases on what people *think*. This seminar will look at the social theorists who initiated these methodologies and some of the figures who have appropriated these theorists in the field of religious studies. Open to graduate students only.

**RELS 2600K. Religion and Interpretation.**

One of the most influential approaches to the study of religion views religion as primarily a matter of meanings or symbols. The task of the scholar of religion, then, is to interpret these meanings and symbols. This course examines this theoretical perspective on religion by looking at its proponents and its critics, as well as philosophical treatments of meaning and interpretation that have influenced religious studies. Readings include Hans-Georg Gadamer, Paul Ricoeur, Clifford Geertz, Mary Douglas, Donald Davidson, and Robert Brandom. Open to graduate students only.

**RELS 2600L. Seminar: Afro-Theism.**

This graduate seminar places a theological lens on Black life in North America. Its premise is that Afro-Theisms, not the institutional "Black Church" or Black prophetic religion, have been seminal to the self-conception of Black people and their way of constituting racial "others". Different theistic emphasis at different historical moments demonstrates both the importance and fluidity of Afro-Theisms and sheds unique light on quest for equity and self-actualization. Starting with the conventional Christian theologies into which New World Africans under slave conditions were indoctrinated, this course will explore the role and impact of Afro-Theisms.

**RELS 2890. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for preliminary examinations.

**RELS 2910. Independent Research.**

The staff is willing to offer independent reading courses in selected areas. See the Instructor for more information. Please check Banner for the correct section number and CRN to use when registering.

**RELS 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## Center for the Study of the Early Modern World

### Director

Andrew J. W. Laird

The Center for the Study of the Early Modern World promotes interdisciplinary and multidisciplinary approaches to historical cultures around the world between the waning of feudalism and the arrival of global industrial capitalism, from the 1300s to the end of the 1800s. Characterized by new global aspirations as well as new modes of domination, resistance, and conflict, this period yielded significant technological transformations and cultural inventions whose study contributes to the historical understanding of the modern world.

Students take courses in a wide range of departments in the humanities and social sciences and from faculty affiliated with the Center for the Study of the Early Modern World.

The Center, which is part of the Cogut Institute for the Humanities, also hosts a lecture series, a graduate colloquium, and interdisciplinary opportunities for graduate students. Partnerships with the John Hay Library, the John Carter Brown Library, the Bell Gallery, as well as the RISD Museum and the Folger Institute in Washington, DC play a significant part in its activities.

For additional information, please visit the department's website at <https://www.brown.edu/academics/early-modern-world/>

### Early Modern World Concentration Requirements

The Concentration in Early Modern World promotes interdisciplinary and multidisciplinary approaches to historical cultures around the world between the waning of feudalism and the arrival of global industrial capitalism, from the 1300s to the end of the 1800s. Students take courses in a wide range of departments and with faculty affiliated with the Center for the Study of the Early Modern World. Concentrators have the opportunity to be mentored by faculty, staff at the special collections libraries at Brown, and graduate students working on contiguous topics.

Students are invited to take advantage of this breadth of offerings to enhance their understanding of the period, as well as to gain a sense of the uses, limitations, and interrelationships of particular disciplinary approaches.

The Center for the Study of the Early Modern World promotes interdisciplinary and multidisciplinary approaches to historical cultures around the world between the waning of feudalism and the arrival of global industrial capitalism, from the 1300s to the end of the 1800s. Characterized by new global aspirations as well as new modes of domination, resistance, and conflict, this period yielded significant technological transformations and cultural inventions whose study contributes to the historical understanding of the modern world.

Students take courses in a wide range of departments in the humanities and social sciences and from faculty affiliated with the Center. Students are invited to take advantage of this breadth of offerings in order to enhance their understanding of the period as well as to gain a sense of the uses, limitations, and interrelationships of particular disciplinary approaches.

#### Requirements

Concentrators are required to take a minimum of eight courses. These include the following:

- Three courses on early modern topics in one field in which the student has primary interest or training, e.g., literature, history of art and architecture, or history.
- Three courses related to the early modern period chosen from two other fields.
- A senior project. The senior project constitutes the capstone for all concentrators. Examples of possible senior projects include a senior thesis (roughly equivalent to a senior seminar paper), the staging of

an early modern play, the performance of early modern music, or an exhibition. The final project will be developed in consultation with two faculty advisors who work closely with the student. Credit is granted through registration for Independent Study in the department for which the topic of research lies.

- Other relevant courses of the student's choosing.

In addition, the student must be able to demonstrate a reading knowledge of a relevant modern or ancient language other than English. This language requirement does not count as one of the eight courses.

Under the supervision of the director of the program, students may choose courses from the following:

HIAA 0062	Dutch and Flemish Art: Visual Culture of the Netherlands in the Seventeenth Century
ENGL 0100C	Altered States
ENGL 0150D	Shakespeare's Present Tense
HIST 0286A	History of Medicine I: Medical Traditions in the Old World Before 1700
ENGL 0310A	Shakespeare
ENGL 0310E	Shakespeare: The Screenplays
HIAA 0550	Gold, Wool and Stone: Painters and Bankers in Renaissance Tuscany
HIAA 0560	Constructing the Eternal City: Popes and Pilgrims in Early Modern Rome
HIAA 0630	Cultural History of the Netherlands in a Golden Age and a Global Age
COLT 0710I	New Worlds: Reading Spaces and Places in Colonial Latin America
FREN 0720A	De l'Amour courtois au désir postmoderne
POBS 0910	On the Dawn of Modernity
ITAL 0981	When Leaders Lie: Machiavelli in International Context
FREN 1030A	L'univers de la Renaissance: XVe et XVIe siècles
FREN 1030B	The French Renaissance: The Birth of Modernity?
FREN 1040B	Pouvoirs de la scène: le théâtre du XVIIe siècle
FREN 1040C	Le Grand Siècle à l'écran
FREN 1040D	Molière et son monde
ENGL 1310A	Firing the Canon: Early Modern Women's Writing
ENGL 1310H	The Origins of American Literature
ENGL 1310J	Imagining the Individual in Renaissance England
ENGL 1310O	Restoration and Early Eighteenth-Century Literature
ENGL 1360K	Shakespeare and Company
ENGL 1360P	Shakespearean Tragedy
ENGL 1360S	Between Gods and Beasts: The Renaissance Ovid
ENGL 1360Z	Shakespeare and Embodiment
ITAL 1400J	The Many Faces of Casanova
COLT 1410P	Shakespeare
HIAA 1560A	Italy and the Mediterranean
ITAL 1580	Word, Image and Power in Early Modern Italy
HIAA 1600I	Collections and Visual Knowledge in Early Modern Europe: 1400-1800
JUDS 1751	Jews Between Christians and Muslims in the Early Modern World
HIST 1825H	Science, Medicine and Technology in the 17th Century

ENGL 1950A	Form and Feeling in Renaissance Poetry
HIST 1964A	Age of Impostors: Fraud, Identification, and the Self in Early Modern Europe
HIST 1974M	Early Modern Globalization
EMOW 1980	Independent Study in EMOW
LATN 2000A	Senecan Tragedy
FREN 2130E	Corps et esprits libertins
FREN 2130F	Façons d'aimer: Discourses of Sexuality in Early Modern France
HISP 2160G	Don Quixote: Contexts and Constructions
ENGL 2360O	Irony and Satire
ENGL 2360P	Thinking with Romance in the Renaissance
ENGL 2360S	Alternative Miltons
HISP 2520I	Sor Juana Inés de la Cruz in Her Literary Context
ITAL 2550	Gender Matters

## Liberal Learning

This concentration develops aesthetic awareness, close reading skills, collaborative skills, cultural understanding, facility with symbolic languages, historical awareness as well as speaking and writing skills.

## Honors

Interested and eligible students petition to write a thesis and the faculty chooses the Honors group for that year from the applications, making every effort to accommodate all eligible proposals. Selection is based upon the quality of the application, the preparedness of the student to undertake the project, and the availability of appropriate advisors for the subject.

Students accepted in the Honors program sign up for EMOW 1980 in the Fall and again in the Spring, with the section number of their advisor (REMS 1980 will become EMOW 1980 as of Fall 2019). Students must meet regularly with their advisors and second readers throughout the year according to a schedule determined by each student and advisor. Finished drafts of the thesis (which will be about 35 pages in length, not counting bibliography and visual or other supporting materials) will be due to the advisor and second reader on April 1 of the Spring semester. Comments will be returned to the students for final polishing and corrections at that point. Students will receive Honors when both their primary advisor and their second reader have provided written statements in support of the finished project. The finished paper, which should be a polished and revised, edited, professional work of original research, will be made available to the entire Early Modern World faculty for comments. There will be a public presentation of the Honors work at the end of the Spring semester.

Students planning a December graduation will not be eligible for the Honors Thesis program, but they are welcome to work out other ways to pursue projects of independent interest in consultation with an academic advisor.

Students wishing to write an honors thesis must have an A average in the concentration, which means that they will not have received more than one "B" or "S" in any course used for the concentration. Classes taken S/NC may be considered as qualifying the student for Honors if they are marked "S with distinction," meaning that had the student taken the course for a grade, the grade would have been an "A." It is advisable for them to have taken at least one class with the person who will advise the thesis, and have already written a research paper before choosing to undertake this year-long writing project. Honors students are strongly encouraged not to take more than 4 classes either semester of their senior year—the Honors class being considered one of the four classes.

### Honors Application Process

Applications are due to the Director of Center for the Study of the Early Modern World in mid-April of the student's junior year. Each application shall consist of:

1. A very brief (one or two paragraph) cover letter identifying the most appropriate advisor and second readers, and stating also the student's preparation for the project. Second readers may be professors who work in areas related to the topic, or in some very special cases (and with the advisor's approval) may be practitioners with whom the student already worked closely, for example.
2. A two-page double-spaced abstract stating and explaining the topic (subject and argument) of the research to be undertaken, written as clearly as possible.
3. A one-page working bibliography of the most relevant books and major articles to be consulted for the project.
4. A current resumé.
5. A printout of the most recent transcript.

## Courses

### **EMOW 0062. Dutch and Flemish Art: Visual Culture of the Netherlands in the Seventeenth Century (HIAA 0062).**

Interested students must register for HIAA 0062.

### **EMOW 0100C. Altered States (ENGL 0100C).**

Interested students must register for ENGL 0100C.

### **EMOW 0150H. Foods and Drugs in History (HIST 0150H).**

Interested students must register for HIST 0150H.

### **EMOW 0150Z. Hamlet/Post-Hamlet (ENGL 0150Z).**

Interested students must register for ENGL0150Z.

### **EMOW 0233. Colonial Latin America (HIST 0233).**

Interested students must register for HIST 0233.

### **EMOW 0310A. Introduction to Shakespeare (ENGL 0310A).**

Interested students must register for ENGL 0310A.

### **EMOW 0522G. An Empire and Republic: The Dutch Golden Age (HIST 0522G).**

Interested students must register for HIST 0522G.

### **EMOW 0550. Florence and Tuscany in the Fifteenth Century (HIAA 0550).**

Interested students must register for HIAA 0550.

### **EMOW 0580M. The Age of Revolutions, 1760-1824 (HIST 0580M).**

Interested students must register for HIST 0580M.

### **EMOW 0610E. Crisis and Identity in Mexico, 1519-1968 (COLT 0610E).**

Interested students must register for COLT 0610E.

### **EMOW 0630. Cultural History of the Netherlands in a Golden Age and a Global Age (HIAA 0630).**

Interested students must register for HIAA 0630.

### **EMOW 0660. Giotto to Watteau: Introduction to the Art of Europe from Renaissance to French Revolution (HIAA 0660).**

Interested students must register for HIAA 0660.

### **EMOW 0710I. New Worlds: Reading Spaces and Places in Colonial Latin America (COLT 0710I).**

Interested students must register for COLT 0710I.

### **EMOW 0810H. How Not to Be a Hero (COLT 0810H).**

Interested students must register for COLT 0810H.

### **EMOW 0855. The Bhagavad Gītā (CLAS 0855).**

Interested students must register for CLAS 0855.

### **EMOW 0910. On the Dawn of Modernity (POBS 0910).**

Interested students must register for POBS 0910.

### **EMOW 0910A. Medieval and Renaissance Music (MUSC 0910).**

Interested students must register for MUSC 0910.

### **EMOW 1000B. Littérature et culture (FREN 1000B).**

Interested students must register for FREN 1000B.

### **EMOW 1010. Dante in English Translation: Dante's World and the Invention of Modernity (ITAL 1010).**

Interested students must register for ITAL 1010.

### **EMOW 1020. Boccaccio's Decameron (ITAL 1020).**

Interested students must register for ITAL 1020.

### **EMOW 1040. Virgil: Aeneid (LATN 1040B).**

Interested students must register for LATN 1040B.

### **EMOW 1040B. Théâtre du XVIIe siècle (FREN 1040B).**

Interested students must register for FREN 1040B.

### **EMOW 1040C. Le Grand Siècle à l'écran (FREN 1040C).**

Interested students must register for FREN 1040C.

### **EMOW 1160. Classics of Indian Literature (CLAS 1160).**

Interested students must register for CLAS 1160.

### **EMOW 1216. The Paradox of Early Modern Europe (HIST 1216).**

Interested students must register for HIST 1216.

### **EMOW 1240A. Fashion and Fiction in the Early Modern Hispanic World (HISP 1240A).**

Interested students must register for HISP 1240A.

### **EMOW 1266C. English History, 1529-1660 (HIST 1266C).**

Interested students must register for HIST 1266C.

### **EMOW 1266D. British History, 1660-1800 (HIST 1266D).**

Interested students must register for HIST 1266D.

### **EMOW 1361G. Tolkien and the Renaissance (ENGL 1361G).**

Interested students must register for ENGL 1361G.

### **EMOW 1410I. Sorcellerie et Renaissance: le sort de la sorcière (FREN 1410I).**

Interested students must register for FREN 1410I.

### **EMOW 1410T. L'expérience des réfugiés/immigrés (FREN 1410T).**

Interested students must register for FREN 1410T.

### **EMOW 1430. Truth on Trial (HIST 1430).**

Interested students must register for HIST 1430.

### **EMOW 1440. The Ottomans: Faith, Law, Empire (HIST 1440).**

Interested students must register for HIST 1440.

### **EMOW 1440E. The Body in Medieval Art (HIAA 1440E).**

Interested students must register for HIAA 1440E.

### **EMOW 1500A. Major Masters and Repertoires of Music: Bach (MUSC 1500A).**

Interested students must register for MUSC 1500A.

### **EMOW 1510A. Jane Austen and Her Predecessors (ENGL 1510A).**

Interested students must register for ENGL 1510A.

### **EMOW 1560A. Italy and the Mediterranean (HIAA 1560A).**

Interested students must register for HIAA 1560A.

### **EMOW 1561C. Swift and His Contemporaries (ENGL 1561C).**

Interested students must register for ENGL 1561C.

### **EMOW 1561K. Restoration and Eighteenth-Century Drama (ENGL 1561K).**

Interested students must register for ENGL 1561K.

### **EMOW 1580. Word, Image and Power in Renaissance Italy (ITAL 1580).**

Interested students must register for ITAL 1580.

### **EMOW 1600A. Bosch and Bruegel: Art Turns the World Upside Down (HIAA 1600A).**

Interested students must register for HIAA 1600A.

### **EMOW 1600B. Caravaggio (HIAA 1600B).**

Interested students must register for HIAA 1600B.

### **EMOW 1610. The Divina Commedia: Inferno and Purgatorio (ITAL 1610).**

Interested students must register for ITAL 1610.

### **EMOW 1620. Arts Between Europe and the World 1500-1700 (HIAA 1620).**

Interested students must register for HIAA 1620.

### **EMOW 1701C. The First Scientific Americans: Exploring Nature in Latin America, 1500-1800 (STS 1701C).**

Interested students must register for STS 1701C.

**EMOW 1813N. Early Modern Women's Writing (COLT 1813N).**

Interested students must register for COLT 1813N.

**EMOW 1825F. Nature, Knowledge, and Power in Renaissance Europe (HIST 1825F).**

Interested students must register for HIST 1825F.

**EMOW 1825H. Science, Medicine and Technology in the 17th Century (HIST 1825H).**

Interested students must register for HIST 1825H.

**EMOW 1954J. The History of the Book in the Americas and Beyond (HIST 1954J).**

Interested students must register for HIST 1954J.

**EMOW 1964A. Age of Impostors: Fraud, Identification, and the Self in Early Modern Europe (HIST 1964A).**

Interested students must register for HIST 1964A.

**EMOW 1964B. The Enchanted World: Magic, Angels, and Demons in Early Modern Europe (HIST 1964B).**

Interested students must register for HIST 1964B.

**EMOW 1964D. Women in Early Modern England (HIST 1964D).**

Interested students must register for HIST 1964D.

**EMOW 1964F. Early Modern Ireland (HIST 1964F).**

Interested students must register for HIST 1964F.

**EMOW 1964K. Descartes' World (HIST 1964K).**

Interested students must register for HIST 1964K.

**EMOW 1967T. History of the Andes from the Incas to Evo Morales (HIST 1967T).**

Interested students must register for HIST 1967T.

**EMOW 1971U. Kabbalah: An Introduction to Jewish Mysticism (HMAN 1971U).**

Interested students must register for HMAN 1971U.

**EMOW 1980. Independent Study in EMOW.**

Tutorial instruction on a topic in the Renaissance or early modern period, supervised by a member of the core faculty. This number may be used by concentrators for the required Independent Project undertaken in the junior or senior year. Section numbers vary by professor; instructor permission required.

**EMOW 2160N. Antiquity and Innovation in the Hispanic Renaissance (HISP 2160N).**

Interested students must register for HISP 2160N.

**EMOW 2350H. The History of Wonder in Colonial Spanish American Lettres (HISP 2350H).**

Interested students must register for HISP 2350H.

**EMOW 2360Y. Lyric and Ecstasy (ENGL 2360Y).**

Interested students must register for ENGL 2360Y.

**EMOW 2400R. Tracing Translations: Artistic Migrations and Reinventions in the Early Modern World (HMAN 2400R).**

Interested students must register for HMAN 2400R.

**EMOW 2520I. Sor Juana Inés de la Cruz in Her Literary Context (HISP 2520I).**

Interested students must register for HISP 2520I.

## Science, Technology, and Society

The program for Science and Technology Studies at Brown operates under the premise that students and scholars in the field of science and technology studies want to know how scientific knowledge is produced. STS believes that the idealized accounts of knowledge production entrenched in our scientific belief system are inadequate, given the complexity of the process they claim to describe.

STS scholars seek to understand how science operates by analyzing historical case studies, observing contemporary scientists at work, examining representations of scientific ideas in textbooks or journals, and studying the infrastructure of scientific institutions.

This interdisciplinary field brings together anthropologists, philosophers, historians, art historians, literary theorists, sociologists and practicing

scientists and technologists. In addition to offering an undergraduate concentration program in Science and Society, Brown also offers interdisciplinary courses under the same rubric.

For more information on STS at Brown, please visit: <https://www.brown.edu/academics/science-and-technology-studies/>

## Science, Technology, and Society Concentration Requirements

Science, Technology, and Society (STS, formerly Science and Society) is an interdisciplinary concentration that examines the processes of scientific discovery and the establishment of scientific policies and systems of belief from historical, philosophical, anthropological, and sociological perspectives. Concentrators analyze the practices, norms, and values that reflect and shape our deepest convictions about what is considered "science." Students select courses in the physical sciences, life sciences, or mathematics and choose a thematic track that may include the history and philosophy of science; gender and science; race, science and ethnicity; health and medicine; environment and society; or they may create their own independent focus. STS prepares students to follow, guide, and shape scientific knowledge as it travels from the laboratory into the public arena.

### Requirements

Consisting of 12 courses, the program of study outlined below will be developed by each student in consultation with the concentration advisor. Where appropriate, independent reading, lab courses or GISPS may count for up to three of the twelve total courses. Students will take a minimum of 7 intermediate to advanced courses.

### Required Courses (2)

The concentration has two required courses.

- STS 1000 : Introduction to Science and Society: Theories and Controversies, or equivalent introductory course: usually taken in the second or third year.
- STS 1900 : Senior Seminar in Science and Society, also open to non-majors with the proper background, usually taken senior year.

### Thematic Track (3)

Students will organize their course of study around the choice of a thematic track. The theme may be thought of as the applied content portion of the concentration. Students will take a minimum of three courses, at least one of which must be at an advanced level, in one of the thematic areas listed below:

- History & Philosophy of Science
- Gender & Science
- Race, Science & Ethnicity
- Health & Medicine
- Representing Science in Literature & Culture
- Policy, Persuasion & the Rhetoric of Science
- Environment & Society
- Independent Focus

### Science Track (4)

Students will take a minimum of four courses in one of the following scientific areas: physical sciences, life sciences, mathematics/computer science. The chosen area should provide appropriate background and support for the chosen concentration theme. The science courses will be sequenced such that a concentrator will move enough beyond the introductory level to gain some understanding of the world view of scientists within a chosen field. The particular sequence of courses which best meets the science requirement will be chosen in consultation with the concentration advisor. When necessary, the concentration advisor will seek guidance from faculty within the chosen scientific field.

### Science and Technology Studies Theory (3)

Students will take three Science and Technology Studies-related courses in the social sciences and humanities. These courses, which will provide critical theoretical background for the study of Science and Society, should address questions of historiography, epistemology and methodology in the field of science and technology studies. A full list of such courses

and sample concentrations may be found at <https://www.brown.edu/academics/science-and-technology-studies/>

### Honors

To qualify for Honors a student must:

- Be in good standing
- Have completed at least two thirds of the concentration requirements by the application deadline
- Have earned a majority of "A" grades in the concentration. Classes taken S/NC will count as qualifying towards that majority if they are marked "S with distinction" or are accompanied by a Course Performance Report ([https://ask.brown.edu/performance\\_reports](https://ask.brown.edu/performance_reports)) indicating that had the student taken the course for a grade, the grade would have been an "A."

### Courses

#### **STS 0050. Science Fictions: The Misuse of Science in Public Life.**

People on all sides of the political spectrum distort or spin science to advance their own economic, policy, religious or other goals. The phenomenon is obvious today but it is not new, and it is visible on both the right and the left. In this seminar we consider what science is and how it works, how people learn about it, why they are vulnerable to spin about it (and how to avoid being spun) and how spin plays out with subjects like climate change, medicine, diet, the teaching of evolution, sex education, pollution and other issues.

#### **STS 0050H. Communicating Science: Animating Science (BIOL 0140C).**

Interested students must register for BIOL 0140C.

#### **STS 0050J. African American Health Activism from Emancipation to AIDS (AFRI 0550).**

Interested students must register for AFRI 0550.

#### **STS 0050K. Pride and Prejudice in the Development of Scientific Theories (BIOL 0190P).**

Interested students must register for BIOL 0190P.

#### **STS 0050L. Botanical Roots of Modern Medicine (BIOL 0190E).**

Interested students must register for BIOL 0190E.

#### **STS 0080. Data, Ethics and Society (DATA 0080).**

Interested students must register for DATA 0080.

#### **STS 0120. Culture and Health (ANTH 0300).**

Interested students must register for ANTH 0300.

#### **STS 0140A. Water, Culture and Power (ARCH 0680).**

Interested students must register for ARCH 0680.

#### **STS 0290. Humans, Nature, and The Environment: Addressing Environmental Change in the 21st Century (ENVS 0110).**

Interested students must register for ENVS 0110.

#### **STS 0294. Political Ecology: Power, Difference and Knowledge (ENVS 0715).**

Interested students must register for ENVS 0715.

#### **STS 0382. Foods and Drugs in History (HIST 0150H).**

Interested students must register for HIST 0150H.

#### **STS 0383. From Fire Welders to Empire Builders: Human Impact on the Global Environment before 1492 (HIST 0270A).**

Interested students must register for HIST 0270A.

#### **STS 0386. History of Medicine II: The Development of Scientific Medicine in Europe and the World (HIST 0286B).**

Interested students must register for HIST 0286B.

#### **STS 0400. The Phoenix and the Hummingbird: Natural History from Antiquity to Evolution.**

Scientists love to solve mysteries. From philosophers of antiquity to contemporary citizen naturalists, study of nature has focused on the creatures that have most puzzled humankind. These have inspired natural histories: encompassing studies covering everything that could be known about an animal—from what it symbolized and how it behaved to its place in the natural order. By looking at issues of truth and its relationship to myth, direct experience, and nature's systematization, this seminar provides an introduction to the history of science through what naturalists have written about the more mystifying creatures in the natural world.

#### **STS 0700B. Science and Social Controversy.**

In this course we examine the institution of science and its relations to the social context in which it is embedded. Scientific objectivity, scientific consensus, scientific authority, and the social and moral accountability of scientists will be considered in the context of discussing such controversies as: the AIDS epidemic, climate change, science and religion, the Manhattan Project, the Tuskegee Syphilis Experiment, genetic and pharmacological enhancement, the role of drug companies in science and medicine, psychiatric diagnosis and medication, robotics, and the implications of neuroscience for free will and moral responsibility. Enrollment limited to 20 first year students and sophomores.

#### **STS 0740. Health, Illness and Medicine in Spanish American Literature and Film (HISP 0750Q).**

Interested students must register for HISP 0750Q.

#### **STS 0760. Poetry and Science (ENGL 0710R).**

Interested students must register for ENGL 0710R.

#### **STS 1000. Introduction to Science and Society: Theories and Controversies.**

What is "science"? How do scientific ideas become knowledge? What is the nature of scientific objectivity, how can it be compromised? What is a scientific community, scientific consensus, and scientific authority? What roles does science play in our culture, and how is science related to other social institutions and practices? The interdisciplinary field of science studies is introduced through exploration of topics that include: gender and race, psychiatric classification, the drug industry, science and religion, and the use of nuclear weapons during World War II. Enrollment limited to 30 sophomores, juniors, seniors; others may enroll with permission of instructor.

#### **STS 1122. Bioethics and Culture (ANTH 1242).**

Interested students must register for ANTH 1242.

#### **STS 1161. Astronomy Before the Telescope (ASYR 1600).**

Interested students must register for ASYR 1600.

#### **STS 1161A. Scientific Thought in Ancient Iraq (ASYR 1725).**

Interested students must register for ASYR 1725.

#### **STS 1220A. Computers, Freedom, and Privacy (CSCI 1805).**

Interested students must register for CSCI 1805.

#### **STS 1220B. Cybersecurity Ethics (CSCI 1870).**

Interested students must register for CSCI 1870.

#### **STS 1300A. Science and Power: The Corruption of Environmental Health (ENVS 1552).**

Interested students must register for ENVS 1552.

#### **STS 1390I. Science at the Crossroads (HIST 1825M).**

Interested students must register for HIST 1825M.

#### **STS 1390J. From Medieval Bedlam to Prozac Nation: Intimate Histories of Psychiatry and Self (HIST 1830M).**

Interested students must register for HIST 1830M.

#### **STS 1390K. Nature, Knowledge, Power in Renaissance Europe (HIST 1825F).**

Interested students must register for HIST 1825F.

#### **STS 1390P. Environmental History of East Asia (HIST 1820B).**

Interested students must register for HIST 1820B.

#### **STS 1622. Philosophy of Science (PHIL 1590).**

Interested students must register for PHIL 1590.

**STS 1694A. Artists and Scientists as Partners (TAPS 1281W).**

Interested students must register for TAPS 1281W.

**STS 1694B. Artists and Scientists as Partners: Theory to Practice (TAPS 1281Z).**

Interested students must register for TAPS 1281Z.

**STS 1700C. Science and Technology Policy in the Global South.**

Junior-senior seminar exploring the relationships among science, technology, society, and public policymaking in the Global South. Exemplar countries are South Africa, Brazil, India, and China. Biotech, nanotech, public health, environment, and science training policies are among those closely examined. Three writing assignments, plus electronic conversations with counterparts in the Global South.

**STS 1700N. Race, Science, and Society: Genomics and Beyond.**

Why are drugs being marketed as racial saviors? What does biotechnology have to do with race? This course introduces students to interdisciplinary approaches to the study of race in science and society as an integrated natural and social scientific endeavor. Using a team-based pedagogy, interdisciplinary groups of natural and social science concentrators will explore real-world problems like validating knowledge about racial difference, the relationship between politics and science, and the newest findings in such scientific fields as anthropology, epidemiology, and cognitive science. Enrollment limited to 20. S/NC

**STS 1700P. Neuroethics.**

In this course, we will examine ethical, social, and philosophical issues raised by developments in the neurosciences. Topics will include: neurodevelopment and the emergence of persons; the impact of child abuse on brain development; aging, brain disease, and mental decline; life extension research; strategies and technologies for enhancement of human traits; "mind-reading" technologies; agency, autonomy, and excuse from responsibility; error and bias in memory; mind control; neuroscientific and evolutionary models of religious belief and moral judgement. Enrollment limited to 20. Instructor permission required.

**STS 1700V. The Changing Arctic Environment: Science, Society and Politics.**

The Arctic has become a lens through which to understand the world. An unstable Arctic poses threats not only to the future of the Arctic but the world itself. This seminar will explore the Arctic as a region and the challenges it faces due to climate change, the rising conflicts over its vast mineral reserves, and the competing interests within the nations. The course is intended for students who are interested in Science, Technology and Society, Environmental Studies, Environmental Policy, and International Relations. There are no prerequisites for this class.

**STS 1701A. Health Inequality in Historical Perspective (AFRI 1920).**

Interested student must register for AFRI 1920.

**STS 1701B. Race, Difference and Biomedical Research: Historical Considerations (AFRI 1930).**

Interested students must register for AFRI 1930.

**STS 1701C. The First Scientific Americans: Exploring Nature in Latin America, 1500-1800.**

Who were the "first scientists" in the Americas?, what exactly do we mean by "science" in this context?, and what has amounted to "America" in the past? Focusing on present-day Latin America, this seminar analyses the links between the exploration of the New World and scientific discovery in the early modern period. We will explore issues of primacy (why have both empires and scientists cared about "arriving first"); the nature of science (what kind of knowledge has been considered "scientific" in different periods); and locality in knowledge production (was there something special about the New World in fostering scientific thinking).

**STS 1701Q. The Fate of the Coast.**

This seminar focuses on what happens when science, politics and money intersect in a highly contested venue, in this case, the coast; the nation's most beloved and highly valued landscape. These issues form the heart of this seminar. Though the course will focus on the saltwater coasts of the contiguous 48 United States, it will also discuss the fate of low-lying island nations and other countries vulnerable to sea level rise; engineering efforts around the world to cope with the problem; and legal issues relating to climate refugees here and abroad, driven from their homes by rising seas.

**STS 1702A. Social Impact of Emerging Technologies: The Role of Engineers (ENGN 1931J).**

Interested students must register for ENGN 1931J.

**STS 1721. Anthropology of Addictions and Recovery (ANTH 1300).**

Interested students must register for ANTH 1300.

**STS 1790F. Animal Histories (HIST 1976G).**

Interested students must register for HIST 1976G.

**STS 1900. Senior Seminar in Science and Society.**

This is an advanced seminar that uses a Problem Based Learning style pedagogy to explore real-world problems in STS. To solve assigned problems students will want to explore critical scholarship in areas *such as* laboratory studies, feminist science and technology studies, the rhetoric and discourse of science and technology, expertise and the public understanding of science. Course is intended for Science and Society senior concentrators, but is open to others with appropriate background. Enrollment limited to 20.

**STS 1970. Independent Study in Science and Society.**

Independent reading and research work in Science and Society is available to students who have completed introductory and intermediate level work in Science and Society. A decision to enroll must be made via consultation with the concentration advisor and the faculty advisor for the course. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Prerequisite: STS 1400. Open to junior and senior concentrators in Science and Society; instructor permission required.

**STS 1971. Independent Study in Science and Society.**

Independent reading and research work in Science and Society is available to students who have completed introductory and intermediate level work in Science and Society. A decision to enroll must be made via consultation with the concentration advisor and the faculty advisor for the course. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Prerequisite: STS 1400. Open to junior and senior concentrators in Science and Society; instructor permission required.

**STS 2700A. The Politics of Knowledge (HIST 2981F).**

Interested students must register for HIST 2981F.

**STS 2700F. Special Topics in Ancient Sciences (ASYR 2700).**

Interested students must register for ASYR 2700.

## Slavic Studies

### Chair

Vladimir Golstein

The Department of Slavic Studies at Brown specializes in the cultures, literatures, and languages of Russia, the Czech Republic and Poland. We are one of the oldest Slavic departments the US (established in 1947, with a graduate program added in 1960). The department has been distinguished by academic excellence and dedication to teaching since its inception. Flexible and open to innovative approaches in the field, the department has remained in the vanguard of Slavic Studies. We are the center for campus study of the Slavic world at Brown and are strategically linked to a number of fields across the humanities and social sciences, including literature, performing arts, history, economics, and international relations. It is the particular strength of the department to enable students to view Slavic cultures *from within* through research and teaching based on solid knowledge of the relevant languages. The department helps students to discover the diversity of perspectives in those cultures and to examine and experience how they differ from the students' own.

For additional information, please visit the department's website: <https://www.brown.edu/academics/slavic-studies/>

## Slavic Studies Concentration Requirements

Slavic Studies is concerned with the languages, literatures, and civilizations of the Slavic world. Built on sound knowledge of one or

two Slavic languages (normally Russian or Czech) the program allows students to develop an in-depth appreciation and understanding of East European cultures and civilizations through a broad spectrum of interdisciplinary fields. Students take courses in literature, history, culture, theater, political science, economics, and international relations. Concentrators focusing on Russia learn one of the world's most commonly spoken languages and study some of the world's best-regarded authors and composers: Tolstoy and Dostoevsky, Gogol and Bulgakov, Tchaikovsky and Mussorgsky, and Rachmaninoff and Stravinsky. Focusing on Czech allows students to explore, for example, how Czechs distinguished themselves by peacefully transitioning from communism to capitalism (the "Velvet Revolution") and separating peacefully with the Slovak Republic (the "Velvet Divorce"). Most concentrators study abroad in a Slavic country, either during the academic year or the summer.

## Requirements for the AB Degree

**Six semesters of one Slavic language or the equivalent (normally Czech or Russian), or a combined total of eight semesters of two Slavic languages or the equivalent.**

RUSS 0100 & RUSS 0200 or RUSS 0110	Introductory Russian and Introductory Russian Intensive Russian
RUSS 0300	Intermediate Russian
RUSS 0400	Intermediate Russian
RUSS 0500	Advanced Russian
RUSS 0600	Advanced Russian

Summer courses offered on the Brown in Petersburg Program can enable advanced placement in academic year courses:

RUSS 0250	Introductory Russian in St. Petersburg
RUSS 0350	Intermediate Russian in St. Petersburg
RUSS 0550	Advanced Russian in St. Petersburg

In cases where a student's interests and course of study warrant it, and only upon consulting the concentration advisor, the student may apply more than one Slavic language to the concentration (Czech or Polish in addition to Russian), and would then need a combined total of eight semesters of two Slavic languages:

CZCH 0100 & CZCH 0200	Introductory Czech and Introductory Czech
CZCH 0410A	Boys and Girls: Relationships under Socialist Bohemia
CZCH 0410B	Coming of Age in Postwar Czechoslovakia
CZCH 0410C	Czech View of Self and Others
CZCH 0410D	Czechs and the Big Brother: Czech Lands in the 1980s
CZCH 0610A	Czech Lands under Occupation and Terror
CZCH 0610B	Psychosis of Occupation in the Czech Lands
CZCH 0610C	Czech Cultural Icons, Emblems, and National Identity
PLSH 0100 & PLSH 0200	Introductory Polish and Introductory Polish
PLSH 0300 & PLSH 0400	Intermediate Polish and Intermediate Polish

**The concentration in Slavic Studies requires students to complete a minimum of seven 1000-level courses devoted to the study of the East European civilizations: literature, history, culture, theater, political science, economics, international relations. Typically, at least four of these courses will be from within the Department of Slavic Studies. Students' choice of courses is subject to the approval of the concentration advisor.**

Courses in the Department of Slavic Studies:

RUSS 1110	Special Topics in Russian Studies I: Advanced Reading and Conversation
RUSS 1200	Russian Fantasy and Science Fiction

RUSS 1250	Russian Cinema
RUSS 1290	Russian Literature in Translation I: Pushkin to Dostoevsky
RUSS 1300	Russian Literature in Translation II: Tolstoy to Solzhenitsyn
RUSS 1320	Soviet Literature from 1917 to 1953
RUSS 1330	Soviet Culture: Propaganda, Dissidence, Underground
RUSS 1340	The Russian Novel
RUSS 1350	Putin, Russia and the New Conflict with the West: Reading Modern Russian Culture
RUSS 1450	Love, Adultery, and Sexuality
RUSS 1500	Approaches to Russian Literature
RUSS 1600	Literature and History: Russian Historical Imagination in the European Context
RUSS 1800	Pushkin
RUSS 1810	Tolstoy
RUSS 1820	Dostoevsky
RUSS 1840	Nabokov
RUSS 1860	Chekhov
RUSS 1900	Russian Jewish Literature and Film
SLAV 1300	Sociolinguistics (with Case Studies on the Former USSR and Eastern Europe)

Sample courses in other departments:

HIST 1268C	The Collapse of Socialism and the Rise of New Russia
POLS 1220	Politics in Russia and Eastern Europe
TAPS 1430	Russian Theatre and Drama
TAPS 2120	Revolution as a Work of Art

## Honors

Honors candidacy in Slavic studies assumes an excellent academic record, particularly in the concentration. Additional requirements are the same as those for a standard concentration, plus the writing of a senior thesis (SLAV 1990). For procedures and schedule for writing a senior thesis, please refer to the department guidelines.

## Slavic Studies Graduate Program

The Department of Slavic Studies offers a graduate program leading the Master of Arts (A.M.) and Doctor of Philosophy (Ph.D.) in Slavic Studies.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/slavic-studies>

## Courses

### Czech

#### **CZCH 0100. Introductory Czech.**

Introduces the performance of basic tasks in Standard Czech, highlights of Czech culture, and a worldview of a nation uniquely located on the threshold of western and eastern Europe. Emphasis on oral communication. Five meetings per week and use of audio/visual materials. Enrollment limited to 18.

#### **CZCH 0200. Introductory Czech.**

Introduces the performance of basic tasks in Standard Czech, highlights of Czech culture, and a worldview of a nation uniquely located on the threshold of western and eastern Europe. Emphasis on oral communication. CZCH 0200 includes readings of annotated literary texts on the Web. Five meetings per week and use of audio/visual materials. Enrollment limited to 18.

**CZCH 0320A. Czech Animation: Cross-cultural Dialogs.**

Czech animation has a long tradition and international reputation. Jiří Trnka beat Walt Disney at the post-war Cannes Film Festival. Karel Zeman is a pioneer in creating fantasy films with animation. Surrealist films by Jan Švankmajer continue to shock the audience. Younger animators such as Barta, Klímt, and Pospíšilová have been developing new modes of expression after the fall of socialism. This course explores a variety of Czech animated films from the 1960's to the 21st century and its cross-cultural dialog, especially with the Japanese anime. Readings in English and films with English subtitles.

**CZCH 0400. Intermediate Czech.**

Expression of abstract notions for discussion in complex structures; introduction to stylistic nuances. Listening comprehension exercises and discussion of Czech culture and history based on readings of literature and films. Prerequisite: CZCH 0200 or equivalent.

**CZCH 0410A. Boys and Girls: Relationships under Socialist Bohemia.**

Using Milos Forman's film "Loves of a Blonde" and supporting materials around it, we will discuss human relationships and how they can be interpreted culturally and politically. Equally important is the acquisition of language. Tasks for the course are adjusted to two different language levels (intermediate and advanced). Enrollment limited to 18.

**CZCH 0410B. Coming of Age in Postwar Czechoslovakia.**

Examines political and cultural changes in the post-WWII Czechoslovakia through the eyes of a child. Centerpiece of the course is a film on elementary school in post-war Prague as a symbolic representation of the society that is about to emerge. Other materials such as literary and journalistic texts are used. Places equal emphasis on the acquisition of language, including exposure to Colloquial Czech. Separate language tasks are given to students of two proficiency levels (2nd and 3rd year). Conducted in Czech. For students who completed CZCH 0200 or equivalent. Four meetings per week and use of audio/visual materials. Enrollment limited to 18.

**CZCH 0410C. Czech View of Self and Others.**

Examines the Czech view of themselves as well as others, one of the most debated topics in the current context of expanding European Union. The centerpiece is a film about a man-eating flower (animated by Jan Švankmajer) invented by a crazy scientist, which unfolds in Prague, involving a peace-loving Czech botanist and his daughter, the American detective Nick Carter (played by a Slovak actor), and the Czech police enforcement. The film is a treasure box of symbolic representations of Czechs and people Czechs view as others. Reading materials are drawn from literary and journalistic texts. Equal emphasis on the acquisition of language, including exposure to Colloquial Czech. Separate language tasks for students of two proficiency levels (2nd and 3rd year). Conducted in Czech. The course is for students who completed CZCH 0200 or the equivalent. Enrollment limited to 18.

**CZCH 0410D. Czechs and the Big Brother: Czech Lands in the 1980s.**

Events in Czechoslovakia in the late 1980's as represented in the Oscar-winning film *Kolja*. The Velvet Revolution and the Czech perspective on Russia. Readings from different genres. Equal emphasis on language acquisition, including Colloquial Czech. Separate language tasks for two proficiency levels (2nd-3rd year). Conducted in Czech. For students who have completed CZCH 0200 or the equivalent. Enrollment limited to 18.

**CZCH 0500. Advanced Czech.**

Consolidation of Standard Czech and active acquisition of stylistic registers. Discussion of emblems and icons in modern Czech culture. Focus on the process of myth-making specific to the nation, on the Czech cultural identity viewed from within and without. Prerequisite: CZCH 0400 or equivalent.

**CZCH 0600. Advanced Czech.**

Consolidation of Standard Czech and active acquisition of stylistic nuances. Discussion of emblems and icons in modern Czech culture. Focus on the process of myth-making specific to the nation and the debates on the Czech cultural identity viewed from within and without. Prerequisite: CZCH 0500 or instructor permission.

**CZCH 0610A. Czech Lands under Occupation and Terror.**

Examines German occupation of Bohemia and Moravia seen from the perspective of ordinary Czech citizens. The course ties together the film (Divided We Fall), journalistic texts and texts on Czech history. Readings on Czech-German relations, the Holocaust, Czech and Slovak resistance movements, visual art and politics in the 1930s and 40s. Oral and written tasks for the course are adjusted to two different language levels. Conducted in Czech. Minimum requirement: CZCH0410 or placement test. Enrollment limited to 18.

**CZCH 0610B. Psychosis of Occupation in the Czech Lands.**

Discussion of the Occupation period during WWII. The course is built around a Czech New Wave classic film about an eccentric director of a crematorium in Prague, who turns into a fanatic collaborator under the terror and demagoguery of the regime. We will also read excerpts from the original literary text on which the film was based, and work with the Czech National Corpus. Separate language tasks given to students of two proficiency levels (2nd, 3rd year). Conducted in Czech. The course is for students who completed CZCH0410 or the equivalent. Enrollment limited to 18.

**CZCH 0610C. Czech Cultural Icons, Emblems, and National Identity.**

The "most famous Czech" Jára Cimrman and his most active period, namely the late 19th to early 20th-century Bohemia. Highlights of Czech cultural icons and emblems, and discussions on what constitutes Czech national identity reflected in the Cimrman phenomenon. Readings on several Czech cultural icons. Two different sets of requirements for students of two language proficiency levels. The course is for students who have completed CZCH 0410 or the equivalent. Enrollment limited to 18.

**CZCH 1000. Dimensions of Czech Animation: Contexts, Interpretations, and Dialogs with the East.**

Cultural-historical contexts that gave rise to the internationally acclaimed Czech animation by Trnka, Švankmajer and others. Fascination with Czech animation in Japan used as an example to illustrate the mechanism of cross-cultural reception of Czech animation. Readings of related Czech literature/theory of animation. Selected Japanese animation and literature discussed. Readings in English. Films are dubbed or subtitled in English.

**CZCH 1050. Contemporary Czech Society and Literature in Translation.**

Surveys representative Czech prose texts mainly from the late 20th to 21st century, in English translation. No knowledge of Czech is required. Readings include Hasek, Capek, Kundera, Hrabal, and Havel. Films also part of course.

**CZCH 1250. Introductory Czech.**

CZCH 0100, 0200 and additional work in communicative practice, Web-based exercises, and reading.

**CZCH 1260. Introductory Czech.**

CZCH 0100, 0200 and additional work in communicative practice, Web-based exercises, and reading.

**CZCH 1350. Intermediate Czech.**

CZCH 0400 and additional work in communicative practice, Web-based exercises, and reading.

**CZCH 1360. Intermediate Czech.**

CZCH 0400 and additional work in communicative practice, Web-based exercises, and reading.

**CZCH 2710. Advanced Czech.**

CZCH 0500, 0600 and additional work in communicative practice, web-based exercises, and reading.

**CZCH 2720. Advanced Czech.**

CZCH 0500, 0600 and additional work in communicative practice, Web-based exercises, and reading.

## Polish

### **PLSH 0100. Introductory Polish.**

Introduction to Polish language and culture. Oral and written communication in Polish; emphasis on the literary and everyday culture of Poland. Five meetings per week, plus use of audio, video, and web materials.

### **PLSH 0200. Introductory Polish.**

Introduction to Polish language and culture. Oral and written communication in Polish; emphasis on the literary and everyday culture of Poland. Five meetings per week, plus use of audio, video, and web materials.

### **PLSH 0300. Intermediate Polish.**

This course is for students who have completed first-year Polish. In this course you will further develop skills in speaking, reading, writing and understanding Polish. By the end of this course, you will be able to carry on basic conversations in Polish on many topics from your daily life. You will be able to write notes and simple letters to Polish friends or keep a journal in Polish. You will also have the skills to read basic texts. Enrollment limited to 18.

### **PLSH 0400. Intermediate Polish.**

This course is designed for students who have completed the Introductory Polish language sequence (PLSH 0150/0100, 0200 and 0300) or have otherwise acquired basic proficiency required for the second year sequence. In this course you will continue to develop and refine your speaking skills and will be able to carry on conversation on many topics from your daily life. You will continue developing reading and writing skills by reading increasingly more elaborate authentic texts and writing essays, and your listening skills will be cultivated by in-class interactions and listening to authentic Polish audio and video recordings.

### **PLSH 0410. Intermediate Polish.**

This course is for students who have completed first-year Polish. In this course you will further develop skills in speaking, reading, writing and understanding Polish. By the end of this course, you will be able to carry on basic conversations in Polish on many topics from your daily life. You will be able to write notes and simple letters to Polish friends or keep a journal in Polish. You will also have the skills to read basic texts. Prerequisite: PLSH 0150. Enrollment limited to 18.

### **PLSH 0500. Advanced Polish.**

This course is designed for students who have completed the introductory and intermediate Polish language course sequence – PLSH 0100, 0200, 0300, and 0400, or have otherwise acquired basic proficiency required for the third year sequence.

In this course the students will further develop skills in speaking, reading, writing and understanding Polish. They will continue developing speaking, reading, and writing skills by reading and discussing increasingly more elaborate authentic texts and writing essays, and their listening skills will be cultivated by in-class interactions and listening to authentic Polish audio and video recordings.

### **PLSH 0600. Advanced Polish.**

In this course students will further develop their skills in speaking, reading, writing and understanding Polish. They will continue developing reading and writing skills by reading increasingly more elaborate authentic texts, writing essays, and learning about Polish stylistics, syntax, and grammar at the advanced level. Their listening skills will be cultivated by in-class interactions and listening to authentic Polish audio and video recordings. Emphasis in this course will be on mastering oral expression and vocabulary building, as well as comprehension of fiction and non-fiction texts of a moderate level of difficulty. The course will be conducted almost exclusively in Polish.

### **PLSH 1150. Polish for Reading Knowledge.**

This course is designed for advanced undergraduates (or graduate students), who wish to develop reading competence in Polish with the aid of a good dictionary. Using texts from various disciplines in the social sciences and humanities, as well as journalistic and technical writings, students will learn the fundamentals of grammar and syntax, and how to decipher the meaning of a text, proceeding from very basic to more and more complex readings. Students will acquire a basic reading vocabulary and understanding of Polish grammar through analytical discussion, grammar exercises, and extensive reading of selected texts in the field of individual students.

## Russian

### **RUSS 0100. Introductory Russian.**

Introduction to Russian language and culture. Oral and written communication in Russian; emphasis on the literary and everyday culture of Russia and the former U.S.S.R., including the changes that have reshaped everyday life for citizens of Russia. Five meetings per week, plus use of audio, video, and web materials. Enrollment limited to 18.

### **RUSS 0110. Intensive Russian.**

Intensively-paced introduction to Russian culture and language; completes one year of study in one semester (RUSS 0110 = RUSS 0100-0200). Comprehension and use of contemporary Russian; fundamentals of Russian grammar; vocabulary acquisition; focus on oral communication. Introduces aspects of everyday culture of Russia and the former U.S.S.R. Ten to fifteen hours weekly work outside the classroom. Enrollment limited to 18.

### **RUSS 0200. Introductory Russian.**

Introduction to Russian language and culture. Oral and written communication in Russian; emphasis on the culture of Russia and the former U.S.S.R., including the changes that have reshaped everyday life for citizens of Russia. Five meetings per week, plus use of audio, video, and Web materials. Prerequisite: RUSS 0100 or RUSS 0250. Enrollment limited to 18.

### **RUSS 0250. Introductory Russian in St. Petersburg.**

Intensive introductory language and culture taught in St. Petersburg, Russia, meeting 15 hours per week. Students develop communicative and cultural competence in Russian, emphasizing 1) culture of everyday life in Russia and 2) life in St. Petersburg. For students without previous study of Russian.

### **RUSS 0300. Intermediate Russian.**

Continues development of language proficiency while broadening understanding of contemporary Russian culture via readings in literature and history. Expansion of vocabulary for dealing with conversational topics and review of Russian grammar. Features literary and nonliterary readings in Russian, as well as video and computer resources. Five class meetings per week. Prerequisite: RUSS 0110 or RUSS 0200 or RUSS 0250 or placement by exam. Enrollment limited to 18.

### **RUSS 0320A. Dostoevsky's "The Brothers Karamazov" - The Art of the Novel.**

An in depth analysis of Dostoevsky's last novel as the culmination of his art and thought. Central religious and philosophical themes of the novel, such as the relations of faith to morality, modes of transgression, retribution, and epiphany, the question of theodicy, and the nature of authority. Discussion of Dostoevsky's poetics and of his contribution to the genre of the novel. Readings from literary criticism and from other pertinent literary texts, such as the Bible, Schiller, and Voltaire will also be discussed. In English. Enrollment limited to 19 first year students.

### **RUSS 0320B. Freshman Seminar: Gogol: A Journey into the Fantastic.**

Gogol's altered states of reality uniquely shape the rise of modern Russian literature and anticipate the fictional worlds of Kafka and Borges. Gogol unfolds a grotesque gallery of characters with radish-shaped heads and ghosts with moustaches, who live in a world, in which dogs can talk and noses can walk. Dostoevsky was among the first to relish the labyrinths of Gogol's fantasy scapes; we will follow in Dostoevsky's footsteps. Enrollment limited to 19. Written permission required.

**RUSS 0320C. Demons and Angels in Russian Literature.**

The literary images of fallen angels, as well as various poetic demonologies in Russian literature extend from the medieval apocrypha, up to famous works of the twentieth-century literature, like, for example, Bulgakov's *Master and Margarita* or Dostoevsky's *Demons*. Although, the Russian literary angels are in many respects related to their Western counterparts, the apocalyptic character of Russian spiritual culture makes them in many respects unique. Examining these images, the course addresses the important questions concerning the human condition in general. Angels as one critic said, "represent something that was ours and that we have the potential to become again"; their essence is otherness. Consequently, their literary representations explore the possibilities of human existence as well as its central paradigms like, love, rebirth, mortality, or 'fallenness.' The course will analyze the images of angels and fallen angels (devils) in the works of the nineteenth and the twentieth-century Russian prose, visual art, and film - from romanticism to 'postmodernism' - in the context of the world literature and culture. Authors to be studied: Byron, Lermontov, Balzac, Dostoevskii, Sologub, Bulgakov, Nabokov, Erofeev. We will also discuss films by Tarkovskii and Wenders, Russian icons, and paintings by Vrubel. In English. Enrollment limited to 19 first year students.

**RUSS 0320D. The Tolstoy Event: War and Peace.**

A close reading of Tolstoy's major novel, with a focus on its interweaving of fictional and historical narrative and metahistorical discourse. Attention to issues of genre (e.g. the tension between "epic and novel"), literary tradition, the poetics of time and space, as well as his iconoclastic ideas about narrative, art, religion, and society. Tolstoy's formal innovation will be considered in a broader historical and cultural context. Selected readings in Bakhtin, Lukacs, Shklovsky, Eikhenbaum, Hayden White and others. Enrollment limited to 19 first year students.

**RUSS 0320E. Crime and Punishment through Literature.**

The seminar will explore how texts of different epochs and cultures, ranging from Ancient to Modern and from drama to poem, novel, and film treat the issues of transgression, punishment, justice, and forgiveness. We will examine each text both in terms of its artistic merit and its place within its cultural and historical milieu. Enrollment limited to 19 first-year students.

**RUSS 0350. Intermediate Russian in St. Petersburg.**

Intensive intermediate language and culture taught in St. Petersburg, Russia meeting 15 hours a week. Continues development of language competence while broadening understanding of Russian culture via readings. Includes expansion of vocabulary for dealing with conversational topics and review of Russian grammar. Features literary and nonliterary readings in Russian. Five class meetings per week. Prerequisite: RUSS 0110 or RUSS 0200 or placement by language coordinator.

**RUSS 0400. Intermediate Russian.**

Continues development of language proficiency while broadening understanding of Russian culture via readings in literature and history. Includes expansion of vocabulary for dealing with conversational topics and review of Russian grammar. Features literary and nonliterary readings in Russian, as well as video and computer resources. Five class meetings per week. Prerequisite: RUSS 0300 or placement by exam. Enrollment limited to 18.

**RUSS 0500. Advanced Russian.**

Examines selected topics in Russian culture and history as depicted in readings, the media, and Russian and Soviet films. Language work emphasizes increasing facility with spoken Russian and developing writing skills. Includes work on advanced grammar and syntax. Five class meetings per week. Prerequisites: RUSS 0350 or RUSS 0400 or placement. Enrollment limited to 18.

**RUSS 0550. Advanced Russian in St. Petersburg.**

Intensive advanced language and culture taught in St. Petersburg, Russia, meeting 15 hours per week. Development of communicative and cultural competence in Russian, emphasizing topics in culture and history as depicted in film and short texts. Emphasizes increasing facility with spoken and written Russian. Features work on advanced grammar and syntax. Prerequisite: RUSS 0400. Enrollment limited to 18.

**RUSS 0600. Advanced Russian.**

Examines selected topics in Russian culture and history as depicted in readings, the media, and Russian and Soviet films. Language work emphasizes increasing facility with spoken Russian and developing writing skills. Includes work on advanced grammar and syntax. Four class meetings per week. Prerequisites: RUSS 0500 or placement. Enrollment limited to 18.

**RUSS 0770. Utopian Spaces in Fantasy Worlds in Literature and Film: East and West.**

A survey of Russian, Czech, Polish, and Austrian 19th- and 20th-century works of fiction that depict altered states of reality. Readings (in English translation) range from folk tales and tales of the supernatural, 19th-century utopias and works by such major writers as Turgenev and Dostoevsky, to accomplished novels of the 20th-century. Showings of contemporary fantasy and science fiction movies from the U.S., Russia, England, France, and Czechoslovakia.

**RUSS 0930. Cultures and Literatures of the Russian and Soviet Empires.**

Examines in depth various topics that constituted the cultural and literary landscape of the Soviet Union, examining their antecedents in the Russian empire and their reemergence in the post-Soviet world. Topics include: the Caucasus, from Tolstoy to modern Chechnya; Orientalism; the Civil War and Pasternak; Akhmatova and the experience of the totalitarian state. Enrollment limited to 30.

**RUSS 0990. The Black Experience in Russia and the Soviet Union.**

A study of the African-American experience in Russia and the Soviet Union through the prism of autobiographies, biographies, diaries, travel journals, and memoirs from the 18th century to the present, of actors, American Communists, domestic servants, journalists, musicians, poets, political activists, publishers, stage designers, students and writers, including W.E.B. Du Bois, Harry Haywood, Langston Hughes, Paul Robeson and Richard Wright. Enrollment limited to 30.

**RUSS 1000. Russian Modernism and the Arts.**

Russian culture in a period of revolutionary upheaval: developments in literature, film, design, visual and applied arts. Avant-garde experimentation and the creation of tradition: primitivism, futurism, constructivism, and other movements in literature and the arts.

**RUSS 1019. Revolution in Russian Women's Writing.**

This course will use Russian women's writing, primarily fiction, to develop a new understanding of Russian literary and cultural history. By weaving together literature, historical texts, and feminist theory from Russia and beyond, we will reveal a narrative of Russian literary and cultural history that is generally relegated to footnotes, a narrative that contains different cataclysmic shifts and revolutions than those that occurred at the state level, and we will examine the inception and development of the tradition of Russian women's writing. No knowledge of Russian required.

**RUSS 1020. Russia Rediscovered.**

Explores Russian culture in the pre-Revolutionary era (ca. 1861-1905): encounters between elite and popular culture in a period of immense social upheaval, in particular the attempt to recover indigenously Russian art forms and rural traditions. Analyzes the expressions of this nativist trend in literature, ethnography, religion, and visual and applied arts, and attempts to sketch out the sociohistorical contexts of this "rediscovery" of native Russian culture.

**RUSS 1050. Russian Culture: From Peter The Great to Putin.**

An interdisciplinary exploration of Russian cultural history through its literature, art, religion, social and political thought, and film. An examination of a wide range of cultural expressions: religious and civic rituals, values and practices, social customs and popular entertainment. In English.

**RUSS 1060. St. Petersburg: A Window on Russia.**

An interdisciplinary exploration of Russian cultural history through its literature, art, architecture, religion, social and political thought, theater and ballet. Elements of Russian culture will be presented through the prism of the city of St. Petersburg, its history, its urban and cultural landscapes. Regular field trips to museums, theater, and city tours focused on specific themes.

**RUSS 1090. Esoteric Russia.**

A survey of the main currents of mystical, esoteric, occult, and magical theories and practices in Russia from the 11th century onward. Topics include pagan survivals, Orthodox mysticism and magic, heresies and schisms, Freemasonry and Rosicrucianism, Mesmerism and Spiritualism, H. P. Blavatsky, and G. I. Gurdjieff. No knowledge of Russian is necessary. Prerequisite: HIST 1400, 1410, or UNIV 0820, or instructor permission.

**RUSS 1100. The Roots of Russian Culture.**

Study of the patterns and roots of Russian culture over the last millennium and how Russia's languages have determined its worldviews and cultural structures (the Whorf-Sapir thesis). Principal topics: Russian spirituality, diglossia, other kinds of literacy; speech and silence as means of knowing and unknowing; the shape of time and the rhythm of space; sacred vs. secular history; etc. Lectures and discussions in English. Prerequisite: Intermediate Russian.

**RUSS 1110. Special Topics in Russian Studies I: Advanced Reading and Conversation.**

An advanced course recommended for students who are either planning to go or are returning from abroad. Focus on Russian culture as seen through the prism of Russian poetry. Extensive classroom discussion and frequent writing assignments. Prerequisite: RUSS 0600 or written permission. May be repeated once with permission from the instructor. Enrollment limited to 18.

**RUSS 1120. Special Topics in Russian Studies II: Advanced Reading and Conversation.**

A continuation of Russian 1110. Examines aspects of Russian culture as manifested in Russian literature. Readings range from fairy tales to contemporary works. Extensive classroom discussion and frequent writing assignments. Prerequisite: RUSS 1110, 1700, or written permission. May be repeated once with permission of the instructor. Enrollment limited to 18.

**RUSS 1200. Russian Fantasy and Science Fiction.**

Survey of Russian literature, from fairy tales, utopias, and dream sequences to science fiction, which depict altered states of reality. Readings in English, supplemented with films in March and April. Seminar with emphasis on discussion. Russian concentrators and graduate students expected to cover most of the readings in Russian. Familiarity with Russian literary history is not required.

**RUSS 1220. Nationalism and Nationalities.**

This seminar course explores the meaning and significance of nationalism and national identity in modern culture and society, starting with the emergence of nation-states, up to the recent rise of nationalist and identitarian movements throughout the globe. We will study the main theories of nationalism, as well as some of the art and literary movements that this ideology inspired. By developing an open discussion about different incarnations of nationalism as an ideology and a social practice, we will retrace a cultural history of this concept, and shed light on its crucial role and impact on contemporary political processes.

**RUSS 1250. Russian Cinema.**

This seminar will provide a chronological overview of Russian cinema from its beginning to the present. The films will be considered against the background of some historical, political, and theoretical readings. The students will also be encouraged to juxtapose Russian and non-Russian films in order to evaluate the place of Russian cinema within a global film culture. Enrollment limited to 20.

**RUSS 1290. Russian Literature in Translation I: Pushkin to Dostoevsky.**

Survey of major works of Russian literature of the early and mid-19th century. Authors to be studied include Karamzin, Pushkin, Lermontov, Gogol, Turgenev, Leskov, and Dostoevsky. Lectures and discussion. No knowledge of Russian required. Discussion sections to be arranged.

**RUSS 1300. Russian Literature in Translation II: Tolstoy to Solzhenitsyn.**

Survey of major works of Russian literature of the late 19th and 20th centuries. Traces the development of Russian literature from realism to symbolism and decadence, from revolutionary experiments to socialist realism and dissent. Authors to be studied include Tolstoy, Chekhov, Sologub, Blok, Mayakovsky, Babel, Olesha, Zamiatin, Bulgakov, and Solzhenitsyn. Lectures and discussion. No knowledge of Russian required.

**RUSS 1310. Russian Poetry and Poetics.**

The technical study of verse; metrics and rhyme; linguistic analysis of poetic language; semiotic aspects of verse semantics, including genre and historical development. Primary focus on Russian verse, but some attention will also be given to other (Slavic and non-Slavic) traditions, as well as to general theoretical issues of poetic structure. Conducted in English.

**RUSS 1320. Soviet Literature from 1917 to 1953.**

Survey of Soviet literature and culture from the Bolshevik revolution to the death of Stalin, with particular emphasis upon intersections between politics, history and aesthetics. Texts by Akhmatova, Babel, Blok, Bulgakov, Gan, Mandelstam, Mayakovsky, Malevich, Platonov, Zamiatin and others, as well as films by Eisenstein, Vertov, and Alexancrov. Enrollment limited to 30.

**RUSS 1330. Soviet Culture: Propaganda, Dissidence, Underground.**

After the October Revolution of 1917, Soviet society became gradually split into official culture, dissidence, and the underground. Authors who did not conform to the limitations imposed by Soviet institutions often circulated their works illegally or published them abroad. Some of them were forced to emigrate. This course explores the complex intersections of propaganda, dissidence, and underground in Soviet literature, art, and film.

**RUSS 1340. The Russian Novel.**

When one considers the impact of Russian literature on world literature, one thinks first of all of the novel. And indeed, since the late nineteenth century its readers all over the world could not resist its artistic powers. The course explores selected Russian novels from the nineteenth- to the twenty-first century. Our in-depth (slow) reading and discussions will be guided by the questions concerning the stylistic peculiarities of the novel, and its development in changing historical and cultural contexts. The course includes: Gogol's *Dead Souls*, Goncharov's *Obломov*, Dostoevsky's *Idiot*, Bely's *Petersburg*, Nabokov's *Mary*, Platonov's *Chevengur*, among others.

**RUSS 1350. Putin, Russia and the New Conflict with the West: Reading Modern Russian Culture.**

The collapse of the USSR in 1991 was widely hailed in the West as a triumph of democracy over totalitarianism, and for some it even signaled the end of history as such. Today however it would seem history has returned with a vengeance, and there is now talk of a new Cold War, with Russia once again serving in its previous role as the enemy. This course will seek to understand this apparent reversal of vectors from within Russian culture, through analysis of literary works, films, television, and social media. No knowledge of Russian culture required. In English.

**RUSS 1400. The Black Experience and Russian Culture.**

The contact that began in the early eighteenth century between the Russian empire and the cultures of Africa and its diaspora reveals a mutual fascination that speaks powerfully about notions of racial identity in an increasingly global era. We will study the fateful misunderstandings as well as strong mutual influences between Russians, Africans and their descendants from the Abyssinian 'prince' Abram Gannibal's entry into the court of Peter the Great up to the tense dialogue over political values and conceptions of race, ethnicity and sexuality that underpins the volatile relations between Barack Obama's United States and Vladimir Putin's Russia.

**RUSS 1420. Twentieth-Century Russia (HIST 1420).**

Interested students must register for HIST 1420.

**RUSS 1440. Imagining Moscow: Utopia and Urban Spaces in 20th-Century Russian Culture.**

The course explores the role of Moscow in the Russian collective imagery throughout the 20th century. We will study how different utopian visions of the city in art, literature, film, and architecture affected the radical transformations of its urban landscape from the October Revolution to the present. We will start with the 1920s and 1930s, when the image of a new Moscow became closely associated with the creation of new socialist ways of life, and conclude with the neoliberal facelift of the city in the post-Soviet period, retracing a history of 20th-century Russian culture through its urban imagination.

**RUSS 1450. Love, Adultery, and Sexuality.**

Literary representations of love, marriage, adultery, and sexuality. Examines the formation of the notion of passionate romantic love, the myths of femininity, and various concepts of love and family. Emphasizes the way in which the notions of love and sexuality are linked to national identity. Readings include several Russian popular and revolutionary feminist writers as well as such classics as Rousseau, Racine, Pushkin, Flaubert, Tolstoy, Chekhov, and Kate Chopin.

**RUSS 1470. New Russia and Ukraine: Culture and Politics in Post-Soviet Space.**

Political and cultural aspects of transition from the authoritarian Soviet state to democracy. This transition will take considerable effort and time and will require change in people's mentality. Enrollment limited to 40.

**RUSS 1500. Approaches to Russian Literature.**

Reading in Russian of selected poetry and prose by important authors, among them Lomonosov, Karamzin, Derzhavin, Pushkin, Lermontov, Tyutchev, Gogol, Fet, Dostoevsky, Chekhov, Briusov, Akhmatova, Sologub, Remizov, Blok, Bely, Zamiatin, Pilnyak, and Mandelstam. Lectures in Russian on literary problems, literary terms, and important aspects of literary history. Prerequisites: RUSS 0600 plus RUSS 0290 or 0310 or written permission.

**RUSS 1520. Between Heresy and Orthodoxy: A Survey of Russian Religious Thought.**

This course focuses on Russian religious thought and its impact on culture, literature, and art. Beginning with a historical overview, it will examine the first engagements of 19th century thinkers including Fyodor Dostoevsky with Russian theology and with members of the clergy. The central unit will focus on the late 19th-early 20th century, particularly the works of Vladimir Soloviev, Pavel Florensky, and Leo Tolstoy. We will examine the impact of leading figures' writings and faith practices on the transformation of discourse around the Russian Orthodox Church as well as on key debates surrounding corporeality, sexual and platonic love, and salvation.

**RUSS 1550. Beyond the Kremlin: Russian Culture and Politics in the Twenty-First Century.**

This course explores the radical transformations of Russian cultural and political life after the end of the Soviet Union, with a specific focus on the Putin era. By combining the approaches of literary analysis and cultural anthropology, the course studies representations of social change, and attempts at producing social change, in Russian everyday life and language, as well as in contemporary art and literature. All readings and discussions in English, with Russian originals available for interested students.

**RUSS 1600. Literature and History: Russian Historical Imagination in the European Context.**

Relationships between fact and fiction between historiography and historical fiction, between ideology and various ways of reconstructing the past. Readings will include historical fiction of Shakespeare, Schiller, Walter Scott, Pushkin, Tolstoy *War and Peace*, and Pasternak, as well as theoretical texts from Aristotle to Nietzsche, White, and LaCapra. Enrollment limited to 30.

**RUSS 1660. Sexuality and Revolution in 20th-Century Russian Culture.**

The course explores the role of the body and sexuality in 20th-century Russian literature, art, film, and everyday life, covering the sexual revolution of the 1920s, the mass spectacles of the Stalinist period, and the prominent role of sexuality and the body in post-Soviet literature, film, and mass culture. We will focus in particular on the question of how artistic representations of, and reflections on, the body and sexuality, affected social and political revolutions throughout contemporary Russian history.

**RUSS 1700. Advanced Russian Grammar.**

Uses M. Bogojavlensky's *Russian Review Grammar*. Readings of selected passages from Russian literature as examples of Russian morphology and syntax. Prerequisite: RUSS 0600 or instructor permission.

**RUSS 1720. Decadent Identities.**

The course focuses on Decadent literature and culture and their responses to the loss of a unified human identity and their challenge to fundamental presuppositions about sexuality, social norms, and ethics around 1900. In our analyses of works of Russian and European literature and art, we will explore various meanings of the idea of "the decadent", and look at how these works put into play a range of theories of degeneration, evolutionism, the limits of the human, medical diagnostics, mystical ideologies, or criminal anthropology in their search for new models of identity and the world.

**RUSS 1750. Russian and East European Folklore.**

Introduction to the folklore of Russia and the Slavic countries of Eastern Europe, with occasional reference to the folklore of other regions. Among the types of folklore to be discussed: magical incantations, proverbs and riddles, ritual and lyric songs, folktales, epic poetry, and laments. Special attention to the relation of folklore to ritual and to mythology. Lectures and discussions geared to English translations.

**RUSS 1800. Pushkin.**

For generations of Russian readers and writers, Pushkin has been a cult figure, a true "national poet." This course focuses on Pushkin as the progenitor of Russian national mythology and examines the seminal nature of his writing. Analysis of the dazzling array of genres which became his greatest achievement: lyric poetry, narrative poetry, novel in verse, prose, drama, history, and other nonfictional narratives. Enrollment limited to 20.

**RUSS 1810. Tolstoy.**

Close readings of Tolstoy's major novels (*War and Peace* and *Anna Karenina*, in particular) and shorter narratives with special emphasis on his iconoclastic ideas about art, religion, philosophy, and society. Considers Tolstoy's formal innovation in a broader historical and cultural context. The course will discuss Tolstoy's contribution to the European novel. Focus on improving writing skills and critical thinking. Lectures and discussion. No knowledge of Russian required.

**RUSS 1812. Fathers and Children in Literature and Culture.**

This seminar explores the representations of generational conflict in both Western and Russian literature. We'll examine Russian culture's tendency to view social, political and religious conflicts in terms of a family model, thus merging psychology, politics, and religion. Focusing on formal and ideological aspects of these texts, we'll discuss the issue of genre, the use of rhetoric and ideology, and the connection between authors' politics and art. Russian application of a family model to such issues as political or religious radicalism will be considered from the perspective of Western studies of generational conflicts. Readings and discussions in English.

**RUSS 1820. Dostoevsky.**

An examination of Dostoevsky's major texts tracing his development as an artist, thinker, and religious visionary. The texts will be considered against the background of literary and cultural history of Dostoevsky's period. No knowledge of Russian required.

**RUSS 2040. Russian Symbolism.**

The origins and character of the Russian Symbolist movement; survey of major poets; the Symbolist novel (Sologub, Bely).

**RUSS 2320. Old Russian Literature.**

East Slavic literature from the Kievan period to the end of the seventeenth century.

**RUSS 2410. Movements and Genres in Russian Literary Culture.**

Seminar. Critical reading of selected texts from the Baroque period through the first half of the 19th century. Analysis is based on a study of the infrastructure of each work and the external influences of the period. Conducted mainly in Russian, with a focus on Russian critical terminology and approaches.

**RUSS 2610A. Chekov.**

No description available.

**RUSS 2610B. Gogol's *Dead Souls*.**

A research seminar for advanced students, including those with no Russian. Qualified undergraduates may be admitted with the instructor's permission.

**RUSS 2610C. Russian Romanticism.**

This course will examine the works of Zhukovsky, Batiushkov, Pushkin, Lermontov, Tiutchev, Bestuzhev-Marlinsky, Odoevsky, and Gogol in the context of Romanticist literary culture. Students will also read works by other European authors associated with Romanticism to elucidate the extent of the adherence of Russian writers to Romanticist aesthetics and philosophy.

**RUSS 2610D. Pushkin.**

No description available.

**RUSS 2620A. To Be Determined.****RUSS 2620D. Russian Freemasonry.**

No description available.

**RUSS 2710A. Pasternak.**

The poetry of Boris Pasternak, its structure and development over the entire span of his working life. Conducted in Russian. Open to undergraduates.

**RUSS 2710B. Poetic Structure.**

The technical study of verse; metrics and rhyme; linguistic analysis of poetic language; semiotic aspects of verse semantics, including genre and historical development. Primary focus on Russian verse, but some attention will also be given to other Slavic materials, as well as to general theoretical issues of poetic structure. Open to qualified undergraduates with instructor's permission.

**RUSS 2710C. In Memoriam in Russian Literature.**

A study of the philosophical vein in Russian poetry about the meaning of the poetic and cultural heritage of the past, as well as reactions of the rising voices in Russian poetry in succeeding generations to the individual deaths of their immediate predecessors.

**RUSS 2720B. Seminar in Russian Literature: Pushkin.****RUSS 2720C. Death and Immortality in Russian Poetry.**

No description available.

**RUSS 2720D. Derzhavin and His Epoch.**

No description available.

**RUSS 2810. Russian Poetry: Silver Age.**

Exploration of the writings of such Russian poets as Blok, Tsvetaeva, Pasternak, Mandelstam – in the context of social and cultural changes that shook Russia in first decades of the twentieth century. The class will be conducted in English, but the poetry will be read in the original. Primary goal of the class is to teach students to analyze and discuss the complexities of poetic expression. The class is geared toward graduate students in Slavic but it is open to qualified upper level undergraduates, i.e. to those who can read poetry assignments in original. Instructor permission required.

**RUSS 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**RUSS 2980. Advanced Reading and Research.**

Only for graduate students. Independent research project on topics related to Russian culture. Enrollment permitted only after the written proposal (instructions in the department office) is submitted to the DGS and Chair of the department (deadline: the last day of *Add a course without fee* period during the semester when the project is undertaken). Please check Banner for the correct section number and CRN to use when registering for this course. Each section limited to 10 students; instructor permission required.

**RUSS 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**Slavic****SLAV 0990L. Jews between Christians and Moslems in the Early Modern World (JUDS 0990L).**

Interested students must register for JUDS 0990L.

**SLAV 1200. Slavic Fantasy and Science Fiction.**

Slavic literatures, with emphasis on fairy tales, utopias, and dream sequences to science fiction, which depict altered states of reality. Readings in English, supplemented with films in March and April. Seminar with discussion. Slavic concentrators and graduate students expected to cover much of the readings in the original. Familiarity with Slavic literary histories is not required.

**SLAV 1250. Polish Culture Through Film.**

This course uses Polish film and media to introduce cultural issues central to the Polish nationality and identity. It is a survey of Polish cinema from before World War II to the present, in which cultural and socio-historical contexts as part of Polish and European traditions are shown and examined through the lens of the camera. The main objective of the course is to provide students with deeper knowledge of and insight into the sociological and cultural issues of Polish society, as well as their complex and multifaceted nature.

**SLAV 1300. Sociolinguistics (with Case Studies on the Former USSR and Eastern Europe).**

This seminar course examines the relationship between language and society: e.g. gender and language, politeness, terms of address, conversational analysis, dialects and language, language variation and social class, language policies and their consequences, language and national/ethnic identity. Case-study readings cover (but are not limited to) linguistic situations in East Europe, Russia, and the former republics of the USSR. Knowledge of Slavic languages not required. Open to advanced undergraduate and graduate students. Freshmen and sophomores who demonstrate their knowledge of the basic notions in linguistics or their familiarity with the former USSR and East Europe may enroll with the instructor's written permission. Enrollment limited to 20.

**SLAV 1310. Discourse Analysis: Approaches to Talk, Action, and Text.**

This course examines approaches to language phenomena beyond the sentence level. We will study four aspects of discourse, spoken and written, that are relevant to linguistics: the interaction between grammar (e.g. deixis, inflection, tense-aspect) and discourse; functions of larger units of text (e.g. discourse markers, turn-taking, repair, (im)politeness, structure of discourse); functions of text types (e.g. discourse and ideology). Discussion of methodologies: qualitative analysis, use of language corpora, and triangulation approach. Case studies on Slavic languages. Open to concentrators in Slavic Studies and students interested in languages and/or linguistics.

**SLAV 1350. Religion, Marriage and Gender in Russian Culture and Literature.**

With Russia as our case study, in this course we will examine the cultural history of marriage as an ecclesiastical and popular religious institution and as a nucleus of debates regarding ecclesiastical authority, popular piety, secularization, modernization, and gender. Examining the dissemination of the ecclesiastical view, we will consider the role of secular literature in challenging official views and practices. We will also examine marriage as folk religious practice and its role in the social thought of the intelligentsia and study its influence on the concepts of gender, sexuality and the body through interaction with European theology and literature.

**SLAV 1360. Deep Thoughts Versus Big Data: Dostoevsky's Underground Man in the 21st Century.**

This intensive Wintersession seminar centers on Fyodor Dostoevsky's novella, *Notes from the Underground*, which examines the plight of the underground man, an overly-conscious individual who struggles in a society that rewards conformity. We begin with an overview of the philosophy of the underground man in the context of nineteenth-century Russia and Russian literature (reading other related primary and secondary texts). Then we will apply our discussion to an investigation of our lives today, as our interactions increasingly occur on screens and not in person. Readings in English; no prior knowledge is required. 1/2-1/18 daily with longer meetings on weekends.

**SLAV 1500. The Literature and Cinema of Global Organized Crime.**

In this course we will examine the demonized, self-consciously romanticized, or pointedly de-glamorized images of organized crime in literature and cinema across the contemporary global village. We will discuss the ways in which literary and cinematic texts portray the lives of organized crime workers within the international marketplace, focusing on the countries within Eastern Europe and Mexico, Italy, France, Japan and India. We will also study theories of confessional and postmodernist narratology, in an effort to de-code representations of the criminal self that finds itself trapped in a world driven by the neoliberal economic policies of outsourcing and transnational mergers.

**SLAV 1552. Co-existence and Conflict: Polish-Jewish Relations from 1500 until Today (HIST 1552).**

Interested students must register for HIST 1552.

**SLAV 1760. Film, Theater and Culture of Poland.**

This course explores Polish twentieth-century culture with a special stress on literature, theatre, film, visual arts, and architecture. After the examining of the romantic roots of Polish twentieth-century culture through the works of two famous Polish poets, Mickiewicz and Krasinski, the course will explore the works of representative Polish modernist and avant-garde artists such as Przybyszewski, Wyspianski, Witkacy, Schulz, or Gombrowicz. The third part of the course is devoted to the Polish contemporary theatre and film, including the workshops of the two legendary European theaters Cricoteka and Gardzienice, and films of the famous Polish Film School. In English. First year students require instructor permission.

**SLAV 1770. Prague and St. Petersburg: A Tale of Two Cities.**

An exploration of the mythopoetic universe of Prague and Petersburg through literature and film. Both - one, ancient, the other "modern" - served at one point of the historical continuum as capitols of multinational empires (Holy Roman and Russian), yet also as loci of national identity, both factors thus contributing to their respective enigmatic states. The course will attempt to identify these enigmas and discuss their possible futures in the global polity and culture. Enrollment limited to 20.

**SLAV 1780. Economies and Politics of Transition.**

The course identifies, describes, and explains major social, economic and political processes that have started in the late 1980s and early 1990s with the collapse of the communist systems in Poland and other East-Central European countries. The transition from the centrally planned to free market economies and the present challenges and problems associated with joining the European Union will be discussed in the context of the political and social changes and related to specific historical conditions. The course puts a special stress on Poland, which in turn will allow students to develop models of patterns of transition applicable to the entire region of East-Central Europe. In English. First year students require instructor permission.

**SLAV 1800. Visual and Historical Imagination of Andrzej Wajda.**

The course explores the cinema of one of the world's greatest directors Andrzej Wajda (1926-2016). From his first film, "A Generation" (1955), to his last one, "Afterimage" (2016), Wajda unceasingly shaped visual and historical imagination of Polish post-war generations. His art-growing out of the trauma of WWII, and the experience of social and political changes in the twentieth-century Poland and Eastern Europe—shows the work of collective memory, and portrays individual lives enmeshed in history. His films—always in a dialogue with other forms of visual arts and literature—are also commentaries on the role of art and the artist in contemporary society.

**SLAV 1821L. International Relations of Russian, Eastern Europe, and Eurasia (POLS 1821L).**

Interested students must register for POLS 1821L.

**SLAV 1890. Twentieth-Century Russian Literary Theory: Bakhtin and the Formalists.**

In this seminar, we examine three schools of literary theory that emerged in Russia after the Revolution: in the twenties, Formalism, which is often credited for inventing literary theory as a distinctive scholarly discipline; Mikhail Bakhtin (1895-1975) and his circle of philosopher critics; and the Tartu School of Cultural Semiotics (1960-90s). We will learn how to apply these theories to a diverse range of literary texts (some chosen by students themselves, from their own areas of interest), and will also take into consideration their international influence on the work of critics such as Homi Bhabha, Elaine Scarry and Slavoj Žižek.

**SLAV 1950. Independent Study.**

Independent research project on topics in Slavic Studies. Enrollment permitted only after the written proposal (instructions in the department office) is submitted to the Concentration Advisor and Chair of the department (deadline: the last day of *Add a course without fee* period during the semester when the project is undertaken). Please check Banner for the correct section number and CRN to use when registering for this course. Each section limited to 10 students; instructor permission required.

**SLAV 1970A. Literature in the Changing Eastern Europe.**

Undergraduate seminar on the role of the intellectual in cultures subjected to enormous social and political change. Considers particularly the relevance of the intellectual's private and public selves to the literary, cultural and political life of society. Readings in English.

**SLAV 1970B. Spirituality in Russian Literature.**

Spirituality -- understood as the intimate, spiritual life of individuals as opposed to corporate expressions of religiosity -- occupies a large place in Russian national life, and its exploration has become the central issue of many famous literary texts. The course will examine selected Russian texts -- from symbolism to postmodernism -- from the perspective of the spiritual sensibility that combines atheism, Russian Orthodoxy, Gnosticism, and sectarian or unconscious religiosity. Authors to be studied include: Nabokov, Sologub, Rozanov, Erofeev, Sorokin and Pelevin. In English.

**SLAV 1970D. Vaclav Havel: Dissident, Playwright, and Politician.**

For Havel, life under communism represented "an inflated caricature of modern life in general" and the collective experiences of those who lived under such a totalitarian regime "stand as a kind of warning to the West, revealing to it its own latent tendencies." We will explore this hypothesis by studying Havel's texts and the cultural context where they arose.

**SLAV 1970E. Kafka/Schulz.**

The course explores the prose of Bruno Schulz and Franz Kafka, grasping a profound similarity between those two writers on many levels: cultural, religious, sexual, existential, and artistic. In English. For more information visit the Slavic Department web page.

**SLAV 1970F. Comparative Slavic Linguistics.**

An overview of the phonological and morphological development of Slavic languages from Common Slavic using readings and problem sets. The course will also examine the basic structure of Old Church Slavonic. Typological comparisons between contemporary Slavic languages. Familiarity with at least one Slavic language is required. Instructor permission required.

**SLAV 1970G. Polish for Reading and Research.**

An intensive course designed for students who wish to receive concise and systematic language instruction to read Polish for their research projects and/or to prepare for advanced language study in the study abroad context. The course does not require any previous knowledge of Polish. Students will develop functional reading and comprehension strategy in Polish through extensive activities focusing on grammar and reading of selected texts.

**SLAV 1970H. Gender and Identity in Modern and Contemporary East Central European Visual Arts.**

While issues of gender and identity are commonplace in Western modern and contemporary art discourse, due to isolation from the west for a better part of the twentieth century, East Central European modern and contemporary art has not been privy to similar conversations. This course will explore modernity in the Czech Republic, Slovakia, Poland and Hungary through discussions on Expressionism, Primitivism, Cubism, and Surrealism. Discussion on the role of the avant-garde artist, his manifestoes and art during heightened nationalism; the role of women as subject of modernity, significant female artists within the avant-garde context, especially in DADA and surrealist circles. Enrollment limited to 20.

**SLAV 1981. Independent Research in the Slavic Language(s).**

Independent research on various topics in Slavic cultures. Reading, discussion, research must be done in the chosen Slavic language (Czech/Russian). Close work with faculty on project is expected. Prerequisites: minimum RUSS0600/CZCH 0610 (3rd year-level) or placement evaluation by Russian or Czech language coordinator. Enrollment permitted only after the written proposal (instructions in the department office) is submitted to the Concentration Advisor and Chair of the department (deadline: the last day of *Add a course without fee* period during the semester when the project is undertaken). Each section limited to 10 students; instructor permission required.

**SLAV 1990. Senior Thesis.**

Only for Slavic concentrators writing their senior theses. For requirements and schedule, contact the department. Each section limited to 10 senior Slavic Studies concentrators.

**SLAV 2210. Old Church Slavonic.**

Introduction to Church Slavonic philology. Structural analysis of Old Church Slavonic. Readings in Old Church Slavonic texts.

**SLAV 2230. History of Russian.**

Elementary history of Russian, with emphasis on the standard languages, from the Kievan period to the 19th-century. Readings in early Russian texts. Some acquaintance with Old Church Slavonic is desirable. Not for graduate students in Slavic linguistics, who should take seminars in East Slavic historical dialectology and the history of the Russian literary language.

**SLAV 2320. Russian Syntax.**

Survey of approaches to the relationship between semantics and syntax in Russian. Discussion of morphosyntactic variation in Russian, including gender-number agreement, tense-aspect, case, reflexivization, and pronominalization. Some topics relevant to the teaching of Russian and stylistics.

**SLAV 2450. Exchange Scholar Program.****SLAV 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**SLAV 2980. Advanced Reading and Research.**

Only for graduate students. Independent research project on topics in Slavic Studies. Enrollment permitted only after the written proposal (instructions in the department office) is submitted to the DGS and Chair of the department (deadline: the last day of *Add a course without fee* period during the semester when the project is undertaken). Please check Banner for the correct section number and CRN to use when registering for this course. Each section limited to 10 students; instructor permission required.

**SLAV 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

**SLAV XLIST. Courses of Interest to Concentrators in Slavic Languages.**

## Sociology

### Chair

Patrick G. Heller

Sociology is the study of how groups and individuals interact in producing social systems. Sociologists study the norms, values, identities, power structures and institutions through which societies are organized. Sociologists have long been particularly concerned with the gap between the ideal of legal equality and the reality of social inequality.

The Sociology Department offers a comprehensive set of introductory and advanced courses through which students acquire a range of research and theoretical skills. The department's areas of strength include Globalization and Development, Demography, Race and Ethnicity, Gender, Inequality, Urban Sociology, Environmental Sociology, Organizations and Economic Sociology, Political Sociology, and Education.

At the undergraduate level, the department offers an A.B. in Sociology, as well as an optional track in Sociology Organizational Studies (S/OS), and a Sc.B in Social Analysis and Research (SAR). At the graduate level the department offers a PhD in Sociology as well as a Masters in Social Analysis and Research (MSAR).

Faculty and students in sociology have extensive and deep ties to a wide range of programs and centers at Brown. These include the Watson Institute for International and Public Affairs, the Population and Studies Training Center (PSTC), the Center for the Study of Race and Ethnicity in America (CSREA), Spatial Structures in the Social Sciences (S4), the Engaged Scholars Program, and the Institute at Brown for Environment and Society (IBES). The Graduate Program in Development (Watson Institute) and PSTC provide a range of interdisciplinary training opportunities for sociology graduate students.

For additional information, please visit the department's website: <http://www.brown.edu/Departments/Sociology/>

## Sociology Concentration Requirements

The concentration in Sociology (leading to a Bachelor of Arts) provides a foundation in sociological theory and methods and the opportunity to cultivate more specialized knowledge in the discipline's substantive interests. Students develop that focus through their coursework, taking courses in diverse areas such as social inequality, family and gender, organizations, environmental sociology, race and ethnicity and globalization. Students refine their interests during the senior seminar and through their completion of a senior thesis or capstone project. The concentration also allows students to pursue the Engaged Scholars Program (<https://www.brown.edu/academics/college/special-programs/public-service/engaged-scholars-program>) (ESP). ESP is for students with an interest in making deeper connections between their concentration and long-term community-engaged activities such as internships, public service, and many other possible forms of community involvement.

## Standard program for the A.B. degree

Ten courses are required to complete the concentration.

### Required core:

SOC 0010	Social Forces: An Introduction to Sociology	1
SOC 1010	Classical Sociological Theory	1
SOC 1020	Methods of Social Research	1
SOC 1100	Introductory Statistics for Social Research	1
or APMA 0650	Essential Statistics	
or ECON 1620	Introduction to Econometrics	
or CLPS 0900	Statistical Methods	
SOC 1950	Senior Seminar	1

### 5 additional courses: 5

a) At least three of the optional courses have to be 1000 level and one of them must be a substantive seminar (1870/1871).

b) Students can choose to take up to two (showcase) lower level (0100 level) courses.

c) Students can petition to take two courses outside of the discipline (this will be allowed only when the proposed course makes sense given the interests of the student, and there is no equivalent sociology course).

Total Credits 10

## Organizational Studies Track

Ten courses to complete the concentration

### Required Core:

SOC 0010	Social Forces: An Introduction to Sociology	1
SOC 1010	Classical Sociological Theory	1
SOC 1020	Methods of Social Research	1
SOC 1100	Introductory Statistics for Social Research	1
or APMA 0650	Essential Statistics	
or ECON 1620	Introduction to Econometrics	
or CLPS 0900	Statistical Methods	
SOC 1950	Senior Seminar	1

### Foundations of Organizational Studies (choose two of the following): 2

SOC 0300	Organizations and Society
SOC 1311	Micro-Organizational Theory: Social Behavior in Organizations
SOC 1315	Macro-Organizational Theory: Organizations in Social Context

### Advanced Organizational Studies Course (choose one course). The following are approved EXAMPLES. Please consult Courses@Brown/Concentration Advisor for current offerings. 1

SOC 1060	Leadership in Organizations
SOC 1070	Introduction to Economic Sociology
SOC 1115	The Enlightened Entrepreneur: Changemakers, Inspired Protagonists and Unreasonable People
SOC 1117	Focus Groups for Market and Social Research
SOC 1118	Context Research for Innovation
SOC 1120	Market and Social Surveys
SOC 1220	Future of Work
SOC 1260	Market Research in Public and Private Sectors

SOC 1311 Micro-Organizational Theory: Social Behavior in Organizations (If not used to meet the "Foundations" requirement, above)

SOC 1315 Macro-Organizational Theory: Organizations in Social Context (If not used to meet the "Foundations" requirement, above)

SOC 1870A Investing in Social Change

SOC 1870L The Economic Foundations of Everyday Life

SOC 1871C Sociology of the Legal Profession

SOC 1871O Law, Innovation and Entrepreneurship

SOC 1872B Sociology of Money

SOC 1872H Sociology of FIRE: Finance, Insurance, + Real Estate

### Two additional courses. Each of these courses must be either (a) offered by the Sociology Department, or (b) drawn from the following list of interdisciplinary "Organization-Relevant Electives:" 2

AMST 1610A American Advertising: History and Consequences

CLPS 1250 Human Factors

CLPS 1470 Mechanisms of Motivated Decision Making

CLPS 1730 Psychology in Business and Economics

ECON 0110 Principles of Economics

ECON 1760 Financial Institutions

EDUC 1650 Policy Implementation in Education

EDUC 1730 American Higher Education in Historical Context

ETHN 1890C Business, Culture, and Globalization: An Ethnographic Perspective

ENGN 1930S Land Use and Built Environment: An Entrepreneurial View

HIST 0150A History of Capitalism

POLS 1150 Prosperity: The Ethics and Economics of Wealth Creation

POLS 1240 Politics, Markets and States in Developing Countries

POLS 1820W Market Liberalism: Origins, Principles and Contemporary Applications

Total Credits 10

### Additional Restrictions to the Organizational Studies Track:

**Lower-level Coursework:** Students may count no more than two 0100-level (showcase) courses toward the Organizational Studies and Concentration Elective requirements (combined). SOC 0300, if taken, will count as part of this lower-level course allowance.

**Upper-level Coursework:** At least three of the five courses counted toward the Organizational Studies and Concentration Elective requirements (combined) must be at the 1000-level, and at least one must be a substantive seminar (1870/1871)

**Interdisciplinary Coursework:** Students may petition to count non-Sociology courses beyond the Organization-Relevant Elective list toward the Concentration Elective requirement. This will be allowed only when the proposed course makes sense given the interests of the student, and the Sociology Department offers no equivalent course.

## The Senior Seminar ( SOC 1950)

Sociology requires all concentrators to complete a thesis or capstone project in their senior year. The purpose of the thesis or capstone project is to allow students an opportunity to apply their sociological learning to a topic of their own interest. (Students in the Organizational Studies track are expected to focus their senior thesis or capstone project on

an Organizational Studies topic.) To fulfill this requirement students enroll in SOC 1950 Senior Seminar. This seminar allows each cohort of concentrators to discuss their diverse interests and exposes participants to the wide range of applications of Sociological knowledge.

A **senior thesis** must ask an original research question, answer it with appropriate evidence, and place that work within relevant scholarly literature in sociology. The thesis is supervised by a faculty member who serves as the primary advisor, and one additional faculty member who serves as a reader. By the end of the sixth semester, students must submit a prospectus for the senior thesis to the Co-Director of Undergraduate Studies. At the start of the seventh semester, students should submit to the Co-Director of Undergraduate Studies a thesis proposal (not more than four pages) accompanied by the signature of one faculty member indicating that he or she is willing to serve as primary advisor on the thesis. Students wishing to qualify for Honors must complete a senior thesis, rather than a capstone project (see below).

A **capstone project** is an independent, student-initiated project or experience developed during the Senior Seminar (SOC 1950) that connects in a meaningful way to learning in the concentration. A capstone project differs from a thesis in its scholarly content and form, and it depends only on the evaluation of the senior seminar instructor. Whereas the senior thesis follows the form of a conventional research paper, the capstone project allows a wider array of research and creative outputs, including but not limited to video documentaries, photographic exhibitions, and applied or policy related reports for an off-campus organization. Projects are complemented by a poster presentation, literature review, and report that situates the central subject matter of the project within the context of sociological scholarship.

## Independent Study

Students can use no more than one (1) Independent Study course (SOC 1970) to meet the concentration course requirements. An Independent Study course cannot serve as a substitute for any of the "required core" concentration requirements.

## Honors

In order to be considered for honors, students must achieve a grade point average of at least 3.5 (A=4, B=3, C=2) on all courses counted toward concentration requirements. No more than one (1) of the courses counted toward concentration requirements may be taken with the "S/NC" option. Honors also requires a senior thesis (as described above), that demonstrates an understanding of empirical research and that receives a recommendation of Honors from the advisor and reader.

## Social Analysis and Research Concentration Requirements

The Sc.B. concentration in Social Analysis and Research provides both a conceptual and a working knowledge of the techniques for data collection and analysis used for social research in academic and non-academic environments. The centerpiece of the concentration is a rigorous and comprehensive collection of courses: (1) that develop an understanding of the principles underlying the processes of data collection and analysis; and (2) that train students in the application of advanced statistical techniques for data description and analysis. The concepts and skills learned in these courses are reinforced through engagement in applied research with Sociology faculty and/or internships with local organizations in the for profit and not-for-profit sectors.

Concentrators also take courses that provide grounding in the theoretical approaches to social phenomena that are foundational to social research. Graduates develop an understanding of the concepts and processes that underlie the issues studied by sociologists and the analytic techniques that allow sociologists to understand social relations and individual behavior.

## Standard program for the Sc.B. degree

Required core:

MATH 0090	Introductory Calculus, Part I	1
SOC 1100	Introductory Statistics for Social Research	1
or APMA 0650	Essential Statistics	

or ECON 1620	Introduction to Econometrics	
SOC 1020	Methods of Social Research	1
SOC 2010	Multivariate Statistical Methods I	1
SOC 1010	Classical Sociological Theory	1
SOC 1950	Senior Seminar	1
Three (3) substantive or theory courses (non-methodological courses) in Sociology, two (2) of which must be at the 1000-level or above.		3
Three (3) of the following advanced analysis courses:		3
SOC 1117	Focus Groups for Market and Social Research	
SOC 1118	Context Research for Innovation	
SOC 1120	Market and Social Surveys	
SOC 1260	Market Research in Public and Private Sectors	
SOC 1340	Principles and Methods of Geographic Information Systems	
SOC 2020	Multivariate Statistical Methods II	
SOC 2210	Qualitative Methods	
SOC 2230	Techniques of Demographic Analysis	
SOC 2240	Event History Analysis	
SOC 2610	Spatial Thinking in Social Science	
SOC 2612	Geographic Information Systems and Spatial Analysis for the Social Sciences	
SOC 2960G	Spatial Data Analysis Techniques in the Social Sciences	
SOC 2960Y	Causal Analysis	
SOC 2961A	Advanced Spatial Data Analysis Techniques in the Social Sciences	
Research experience (1 course)		0-1
A one-semester research internship (not for credit or for credit as SOC 1970 - Independent Study), or a summer research internship (not for credit).		
Total Credits		12-13

\*\*\*See the Sociology website <http://www.brown.edu/academics/sociology/> for details regarding Honors and Independent Studies

**Course substitutions:** Students may petition the Director or Co-Director of Undergraduate Studies to use one advanced analysis course taken in another department to count toward the three required advanced analysis courses.

## Research Internship

A one semester or a summer research internship is required. The research internship is designed to provide students with hands-on experience in social research. Students will typically complete the research internship in their junior year or during the summer between their junior and senior years. Students need to submit an *Internship Proposal Form* to the Undergraduate Concentration Advisor for approval prior to starting the internship. Upon completion of the internship, students are required to submit to the Undergraduate Concentration Advisor a brief summary report of their experience, which must be signed by the supervisor of the student's internship.

*Academic research internships* involve work on a faculty member's research project. Activities may range from data collection, data entry, data file management, descriptive analyses, and more advanced model estimation. Students are encouraged to approach faculty about opportunities for working on their research projects. *Off-campus research internships* are arranged through the Sociology Department Students Affairs Coordinator or the Undergraduate Concentration Advisor. Academic and off-campus research internships will typically entail 5-10 hours of work per week and may or may not involve compensation.

Students may receive academic credit for academic research internships and off-campus internships completed during the academic year if they combine the internship experience with an academic component under

the direction of a faculty advisor. Students taking an internship for credit should register for an *Individual Research Project* (SOC 1970).

## The Senior Seminar

Social Analysis and Research requires all concentrators to complete a thesis or capstone project in their senior year. The purpose of the thesis or capstone project is to allow students an opportunity to apply the knowledge they acquired on a topic of their own interests. To fulfill this requirement students enroll in SOC 1950 – Senior Seminar. Participation in this seminar allows each cohort of concentrators to discuss their diverse interests and expose them to the wide range of applications of Sociological knowledge.

An undergraduate **thesis** must ask an original research question, answer it with appropriate evidence, and place that work within relevant scholarly literature in sociology. The thesis is supervised by a faculty member who serves as the primary advisor, and one additional faculty member who serves as a reader. By the end of the sixth semester, students must submit a prospectus of the senior thesis to the Co-Director of Undergraduate Studies. At the start of the seventh semester students should submit to the Co-Director of Undergraduate Studies a proposal (not more than four pages) accompanied by the signature of one faculty member indicating that he or she is willing to serve as primary advisor on the thesis. Only a senior thesis qualifies the student for Honors.

A **capstone project** is an independent, student-initiated project or experience developed during the Senior Seminar (SOC 1950) that connects in a meaningful way to the learning in the concentration. A capstone project differs from a thesis in its scholarly content and form, and it depends only on the evaluation of the senior seminar instructor. Whereas the senior thesis follows the form of a conventional research paper, the project allows a wider array of research and creative outputs, including but not limited to video documentaries, photographic exhibitions, and applied or policy related reports with an off-campus organization. Projects are complemented by a paper or report that situates the central subject matter of the project within the context of sociological scholarship.

### Honors

In order to be considered for honors, students must receive a grade point average of at least 3.5 (A=4, B-3, C=2) on all concentration courses taken, and no more than one (1) of the concentration courses with the "S/NC" option. Honors also requires a senior thesis, with a recommendation of Honors by the advisor and reader, that demonstrates an understanding of empirical research.

## Independent Study

Students can use no more than one (1) Independent Study course (SOC 1970) to meet the concentration course requirements. This course counts towards a 1000 level substantive requirement and will not serve as a substitute for any of the core concentration requirement.

## Sociology Graduate Program

### Master's (Sc.M.) Program in *Social Analysis and Research* & 5th-Year Master's (Sc.M.) Program in *Social Analysis and Research*

The master's (Sc.M.) program in Social Analysis and Research (MSAR) provides students with advanced methodological training in both quantitative and qualitative methods of data collection and analysis, with cores in spatial analysis and market research, and individualized supervision of applied, hands-on data analytic research on a faculty project or with an off-campus organization.

### Ph D. Program

The department of Sociology offers a graduate program leading to the Doctor of Philosophy (Ph.D.) degree. The department also offers a Master of Arts (A.M.) but this option is only open to Ph.D. candidates.

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/sociology>

## Courses

### SOC 0001S. The Social and Political Life of Food.

This course introduces students to sociological theory and methods through studying the production, distribution, and consumption of food. We will examine the forces that shape the global and national food systems, and will treat Rhode Island as a laboratory for answering pressing questions about how food systems work: How is food produced and who does the production? How is food distributed, and who wins and loses in the distribution? Finally, what social, political, cultural and economic forces help explain our eating choices? This seminar course will feature creative assignments, guest speakers, and a fieldtrip to a local farm.

### SOC 0010. Social Forces: An Introduction to Sociology.

Social forces constrain and empower us, bond us together and push us apart. Sociology explores the workings of societies large and small: nations, organizations, communities, families, and other groups. How do societies shape action and identity, and why are social pressures so hard to defy? How do societies distribute wealth and power, and why do inequalities so often coalesce around race, ethnicity, class, and gender? How do established practices persist, and when do movements arise to challenge them? Examining such themes across a range of issues and topics, this course provides a springboard for future study throughout the social sciences.

### SOC 0010A. Social Problems.

Revolution and Social Movements. Urbanization and Globalization. War and Genocide. These are all examples of social change, and sociology, the discipline for which this course serves as introduction, seeks to understand, and explain, them all and other transformations too. We focus in particular on how technology and power relations help us explain variations in social change, and how culture shapes our recognition and evaluation of those transformations. Although analyzing the USA today is our common ground, our method is both comparative (other societies) and historical (focusing especially on the 20th and 21st centuries).

### SOC 0020. Perspectives on Social Interaction: An Introduction to Social Psychology.

An introduction to the discipline of sociology examining the individual in society. Explores the social development of the person, the development of interpersonal relationships, and the problems of integrating the individual and social system. For each area, the personal and structural factors that bear upon the issue are investigated. The objective is to deepen understanding of the behavior of people in a social context.

### SOC 0111. Social Change, Dictatorship, and Democracy.

Why are some countries more democratic than others? What effects have industrialization and colonization had on developing world democracies? This course probes those questions from a sociological perspective. We'll explore the relationship between political regimes and socioeconomic factors, like class and race and look at Europe, the US, East Asia, and Latin America, using historical texts, sociological theory, novels, and films. This course will be of interest to concentrators in the social sciences, and students interested in Latin America and Asia. A foundational social science course is recommended. AP U.S. History or AP Comparative Politics is required for high school students.

### SOC 0130. American Heritage: Democracy, Inequality, and Public Policy.

America professes equality but exhibits many forms of inequality in schools, race relations, and income. An examination of contrasting elements of American society and a review of the role social science plays in public debate. To illuminate the debates, key topics, such as welfare, immigration, affirmative action, and environmental equity are considered.

### SOC 0150. Economic Development and Social Change.

Emphasis on understanding the interrelations among economic, political, and cultural aspects of change in developing countries. The experience of currently developing nations is contrasted to that of nations which industrialized in the 19th century. Compares the different development strategies which have been adopted by currently developing nations and their consequences for social change.

**SOC 0170. The Family.**

The state of the contemporary family generates debate within and beyond sociology. That debate is considered by examining different definitions of family, changing gender roles within the family, and the family in cross-cultural context. Special issues include new family forms, such as gay and lesbian families and biological and step-parenthood, as well as changing patterns of work and housework.

**SOC 0200. Population and Society.**

Introduces some of the major social issues relating to population size, growth, and change in industrialized and developing nations. Mortality, fertility, and migration levels and trends are analyzed. Also considers contemporary issues, such as HIV/AIDS epidemic, population aging, U.S. immigration, and national and international population policy debates.

**SOC 0210. The City: An Introduction to Urban America.**

What is special about urban life? How and why do cities differ? How has the way we think about the city changed over time? Can we solve urban problems? An interdisciplinary approach to cities in the U.S. and abroad: their history, physical design, spatial form, economy, government, subcultures, and social life.

**SOC 0230. Sex, Gender, and Society.**

An introduction to the sociological study of sex and gender. More specifically, this course explores how sexuality is perceived, defined, and experienced in the context of society. How sexuality influences our lives, is reflected in social norms, attitudes and beliefs, through public and private policies and practices, and the social institutions is also investigated. This class also focuses on how prevalent gender differences really are in our society and examines the social construction of gender.

**SOC 0240. The Nature of Community: Place, Space, and Identity.**

What is a community? How can it best be organized and strengthened? How can communities contribute to social justice? This course examines boundaries and identities, rights, responsibilities, cooperation and conflict, and the roles of volunteerism, sports, stories, language, meals and even sleep in community life. Concern about the nature and well-being of "community" has been at the heart of sociology since the discipline was born, so examining these issues provides an in-depth introduction to the sociological way of thinking. The course is particularly aimed at those working within community settings, such as residential units, student activities, and service programs.

**SOC 0270. The Sociological Imagination.**

Sociology is a study of the course and effect of social action. Sociologists study human societies by researching social groups, patterns, interactions, and institutions. This course introduces students to the discipline of sociology with the hope of showing students that, as Peter Berger states, "things are not what they seem." In other words, in this class students will learn to rethink several assumptions about society that are commonly taken for granted. The course strives to make the strange familiar, and the familiar strange.

**SOC 0300A. Contrasting Societies.**

Offers a cross-cultural examination of major social institutions and characteristics. Addresses questions such as how do families and intergenerational relations differ in various societies? How does the social safety net differ? What is the character of racial and ethnic relations? Integral is a comparison of the United States and other societies. Enrollment limited to 19 first year students.

**SOC 0300B. Environment and Society.**

This course examines the intersection between the environment and social structures and institutions. It is centered around environmental sociology, environmental justice, and environmental health. We cover climate change, risk perception and risk communication, environmental consciousness and environmental movements, government regulation, lay-professional differences in scientific knowledge, and various forms of toxic contamination and environmental disasters. Readings are very broad, including work of sociologists, physicians, biologists, journalists, epidemiologists, activists, toxicologists, lawyers, and anthropologists. This course has a required service learning component. Enrollment limited to 19 first year students.

**SOC 0300C. The Nature of Community.**

What is community? How can it best be organized and developed? How can communities contribute to social justice? This course investigates such questions by examining the nature of community life, rights and responsibilities of individuals in relation to communities, approaches to community service, and the roles of leadership, ritual, and narrative in community building. Enrollment limited to 19 first year students.

**SOC 0300D. Who Am I?.**

A study of self in contemporary society. We examine the structural and situational forces that shape the self and their impact on personal development, orientations to the world, and interpersonal behavior; we investigate the development of the self as a way of being in the world that makes everyday doings and, ultimately society, possible. Enrollment limited to 19 first year students. Instructor permission required.

**SOC 0300E. HIV/AIDS: Politics, Culture and Society.**

The current HIV/AIDS crisis is not merely medical. It also involves fundamental political, social and economic issues. Through extensive readings, class discussions and the writing of research papers, we will explore issues such as, what are the sociological barriers to changing sexual behavior? Why do some government, but not others, fail to commit resources to fight the disease? How was improved access to expensive drugs achieved? Instructor permission required. Enrollment limited to 19 first year students.

**SOC 0300F. Unequal From Birth: Child Health From a Social Perspective.**

Why are the children of immigrants so healthy? How do experiences in families, schools, neighborhoods and the health care system produce unequal health? What are the consequences of health for the economic and social welfare of individuals and populations? We will read, discuss and evaluate social science evidence to understand how social and economic inequalities produce and result from health inequalities among youth. Attention will be given to both industrialized and developing societies, and to potential ways that social policies can equalize children's health. This course is designed for first-year students and should appeal to a variety of interests, including social justice, medicine, research and law. Enrollment limited to 19 first year students.

**SOC 0300G. Populations in Danger.**

Examines populations confronted with dangerous social, economic, political, or health crises. These include small Amazon farmers in situations of environmental degradation, Catholics and Protestants in Northern Ireland in economic and social conflict and under peace agreement, Israelis under threat of random attack with neighbors who demand Israel's extinction, Palestinians under Israeli occupation with a largely powerless and corrupt Palestinian Authority, South Africans under HIV/AIDS pandemic, and undocumented Dominican immigrants in Providence. The seminar will include readings on these populations in danger, lectures by internationally known experts, student presentations and class discussion, and three short essays. Enrollment limited to 19 first year students. Instructor permission required.

**SOC 0300H. Organizations and Disasters: Living With the Reality of Really Big Mistakes.**

This new first year seminar will introduce students to the amazing world of organizational failures and disasters. Recent disasters will be examined within frames provided by several leading organizational theories about how and why modern organizations are so frequently plagued by mistakes that wreak havoc on many constituencies: from customers, patients and employers to innocent bystanders. Among the disasters we will explore as examples will be the Deepwater Horizon Oil Spill, the Challenger Disaster, the 9/11 attacks, and miscalculation of nuclear weapon devastation. We will consider Normal Accident Theory, High Reliability Theory, and the Normalization of Deviance. Enrollment limited to 19 first-year students.

**SOC 0300J. Becoming Adults: Adolescent Transitions to Adulthood.**

Adolescence and early adulthood is a critical period in our lives. During this time we experience a number of major life events that mark the transition into adult roles and relationships, and that are of major consequence for the rest of our lives. We leave school, start working, form romantic relationships, begin sexual activity, leave home, become financially independent, get married, and start having children. This seminar explores how adolescent transitions are studied, how they compare across different national contexts, and how individual, family, and community factors affect the type and timing of different transitions. Enrollment limited to 19 first year students.

**SOC 0300K. Inequalities and Health.**

We start from the assumption that the social organization of society shapes definitions and experiences of health and illness, the distribution of diseases, and the responses to them. We explore the relevance of social structure and social interaction to health and well-being, emphasizing socioeconomic status, race, ethnicity, gender, and social contexts such as relationships, families, schools, and neighborhoods. This is not a "sociology of medicine" course. It will not emphasize the profession of medicine, health care policy, or health care organizations. Enrollment limited to 19 first year students. Instructor permission required.

**SOC 0300L. Environment and Society in Africa.**

This seminar will actively examine contemporary environmental issues in Africa. The African setting is a key site for the world's environmental challenges and polices, with a large number of highly visible and valued flora, fauna, and ecosystems. At the same time, Africa nations are severely pressed with competing social issues: poverty, economic development, health, refugees. How can these be reconciled? What roles do the many actors play? This course is multidisciplinary in orientation and broad in scope geographically. Seminar discussion admits a variety of perspectives. Readings span a wide variety of approaches. Enrollment limited to 19 first year students. S/NC.

**SOC 0300M. Deviance, Crime and Social Capital.**

This course explores the reasons why society creates mandatory rules of behavior, the reasons why members of society sometimes break those rules, and the reasons why society responds to rule-breaking in the ways that it does. The course focuses, in particular, on the leading sociological and criminological explanations of deviance, crime, and social control. Rather than taking categories like "deviant" and "criminal" for granted, however, the course considers the ways in which society's decisions about rule-making and enforcement may be every bit as consequential as individuals' decisions about deviance and conformity.

**SOC 0300N. Social Inequality: Change and Continuity in the U.S..**

Although we like to believe the U.S. is the land of opportunity, it has lower equality of opportunity than most developed countries. What does inequality of opportunity in the U.S. look like and how has it changed or remained stable over the last several decades? We will examine theories, characteristics, and trends of socioeconomic inequality in the U.S., focusing on how this inequality shapes children's life chances. In the process, this course will help us think about what an ideal level of equality of opportunity might look like and social changes that could help us achieve it.

**SOC 0300T. Contrasting Societies: Democracy, Dictatorship, and Trump.**

How do we explain the rise of Trump and what does it represent? Is it a moment of popular legitimation or a challenge to democracy's development? To what extent is this turn something peculiar to the US? Does this resemble other transformations in the world? How do the last decades' technological transformations shape conditions both for domination, and resistance, in these times? This sociology seminar depends on your reading course materials and developing their articulations with your own interests. Beyond each week's preparation, you will be asked to write three 1500 word essays across the term that reflect that engagement.

**SOC 0310. Theory and Practice of Engaged Scholarship (ESP Seminar).**

Efforts are underway across university and college campuses -- in the United States and globally -- to increase opportunities for engaged learning and research. What is engaged scholarship and how does it challenge (and/or complement) more traditional concepts of scholarship and disciplinary knowledge? What are the ethical, practical, and other challenges associated with community-engaged scholarship? The course will use case studies, field work, team projects, and guest speakers from diverse disciplines and sectors to investigate these and other questions. Enrollment limited to Engaged Scholars Program participants. Limited to 40 students per section.

**SOC 0320. Critical Communities, Critical Engagements.**

This course offers an examination of community engagement and a deep dive into three social justice issues in Providence, RI through readings, case studies, participatory activities, and guest speakers (faculty and community practitioners whose work exemplifies key issues explored in the course). The Winter Break Providence program component will provide context and knowledge for the course. Upon returning from Winter Break Providence, students will attend a series of seminar meetings in continuation of the course, and prepare for a final presentation of learning at the end of the spring semester.

**SOC 0400. Deviance, Crime and Social Control.**

This course explores the reasons why society creates mandatory rules of behavior, the reasons why members of society sometimes break those rules, and the reasons why society responds to rule-breaking in the ways that it does. We focus on leading sociological, criminological explanations of deviance, crime and social control. Enrollment limited to 100.

**SOC 1010. Classical Sociological Theory.**

Why do we follow social rules and conventions? And how is social change -- that is, the making of new rules and expectations -- possible? When we respond to rules, do we act as free-willing individuals or do we follow social structures we have no control over? These questions have motivated generations of sociologists, but many of the arguments have been already developed by the four "forefathers" of sociology: Karl Marx, Max Weber, Emile Durkheim, and Georg Simmel. Looking at the transformations around them -- the rise of capitalism, the modern nation-state, rational bureaucracy, the metropolitan, the decline of religion, and much more -- they developed arguments that allow us to better understand ourselves, our actions, and the contemporary political, economic and social transformations around us.

**SOC 1020. Methods of Social Research.**

This course introduces students to the frameworks and methods of conducting sociological research -- from both a qualitative and quantitative perspective. The aim is that students develop the skills to ask and answer interesting and important questions about sociological phenomenon. The focus is on designing and executing research, from identifying an interesting question and reviewing the relevant literature, to collecting and analyzing data, to drawing reliable inferences and presenting meaningful results. There is a heavy focus on reading and discussing academic research and working in research teams. By the end of the semester students will complete their own research projects.

**SOC 1050. Methods of Research in Organizations.**

An introduction to the various methods used by social scientists to study organizations and to the skills needed by managers and administrators to soundly evaluate problems and assess performance within organizations. Explores both qualitative and quantitative methods. Students gain experience in developing research questions and linking those questions to appropriate research designs. Enrollment limited to 60.

**SOC 1060. Leadership in Organizations.**

What is leadership? What makes a great leader? Can leadership be learned? Improved? This course explores various theoretical approaches to leadership using a combination of lectures and case-study analysis. Additionally, it aims at developing your personal leadership skills by using self-exploration and reflection, self-assessment instruments, role-play, and feedback from peers. Enrollment limited to 100.

**SOC 1070. Introduction to Economic Sociology.**

Money makes the world go round. Money talks. Show me the money. This course addresses the ways money pervades social life. We examine money through multiple disciplines, from politics, history and finance, to gender, religion, and art. Relevant to concentrators in any of those fields, while also offering a critical perspective particular to sociology.

**SOC 1080. Groups in Organizations.**

Teamwork has become increasingly popular in organizations. Whether structured into the organizational makeup, or temporarily established around specific projects, teams are a critical competency of organizations. They are considered an effective performance unit, and expected to efficiently cope with the fast changes and demands of today's corporate environment. However, deriving the full benefits from teamwork requires correct management of its processes and dynamics. This course dwells on selected issues in team development, internal processes, and members' behavior, as well as management skills needed to effectively lead teams; therefore it can benefit anyone who works in a group, whether as a student or in the business world. Enrollment limited to 35.

**SOC 1100. Introductory Statistics for Social Research.**

Introduction to descriptive and inferential statistics: measures of central tendencies and variability, sampling, tests of significance, correlation, and regression. Also includes the use of computers in data analysis. Knowledge of elementary algebra is assumed. Enrollment is limited to 144 students.

**SOC 1114. Law and Society.**

A broad exploration of contemporary social-science scholarship on law and legal institutions, covering competing theoretical perspectives and drawing examples from diverse empirical settings. Lectures and discussions survey different ways in which social scientists study legal life, seeking contrasts and commonalities across the various perspectives. Coverage includes: Social-psychological models of rule-following and rule-breaking; social-structural linkages between law and the economy, stratification, and politics; and the dynamic relationship between law and social change—including the role of lawyers, judges and juries in giving law "independent causal significance." Strongly recommended: previous coursework in the social sciences.

**SOC 1115. The Enlightened Entrepreneur: Changemakers, Inspired Protagonists and Unreasonable People.**

This course explores the practices of enlightened entrepreneurs, with the intention of moving beyond the limiting social/commercial dichotomy to develop a more useful paradigm for understanding entrepreneurs whose ventures lead to positive developments in society and in the environment. You will be exploring the success stories and cautionary tales of entrepreneurs to develop an understanding of how ventures can have an impact on their fields of engagement as well as their fields of influence. Afterwards you will develop an assessment tool for understanding the spectrum of entrepreneurs whose ventures lead to positive developments in society and in the environment.

**SOC 1116. Criminal Courts and the Law in an Era of Mass Incarceration.**

This course provides a comprehensive introduction to America's criminal court system and all its institutional stakeholders. We will examine America's criminal court system from myriad of different perspectives: courts as organizations, courts as social arrangements of professionals, courts as providers of social services and courts as consumer institutions – providing the experience of justice to victims, witnesses, defendants and jurors. We will focus on state courts as well as the federal system.

**SOC 1117. Focus Groups for Market and Social Research.**

This course introduces students to a range of qualitative research methods commonly used in market and social science research. It is designed to provide students with a skill set that will allow them to conduct and design market and social research that gets below the surface of the traditional survey. Focus groups, ethnographic observation and user-centered research are widely used in product design, communications, marketing and entrepreneurship research. Students will learn and practice all of the methods introduced in the course by conducting a semester-long research project, will gain insight into which methods are most appropriate for particular research needs.

**SOC 1118. Context Research for Innovation.**

This course brings design thinking into conversation with qualitative research methods, examining the elements of a comprehensive perspective of context. It introduces students to design research methods, ethnographic research methods, and how they work together. Students will learn how to use these methods to identify and engage in "deep hanging out" with the problem, gap or inefficiency in question. They will then move on to patient contextualized opportunity identification for meaningful innovation. By the end of the course, students will have developed a process for effective, through innovation context analysis. Relevant for designers of products, services, organizations, and experience.

**SOC 1119. Understanding the Arab Spring: Sociology of the Middle East.**

What explains the continuous mass uprisings in different parts of the Middle East since the beginning of 2011? Have they been successful in transforming power structures? Or already been co-opt by the legacies of the older regimes? This class probes the "Arab Spring" comparatively and sociologically from a historical perspective. It is sociological, it assumes a strong relationship between different forms of exclusions (on the basis of religion, ethnicity, gender and class) and the uprisings. It is historical because it explores these exclusions through a close analysis of the historical particularities of nation-state formation in the region.

**SOC 1120. Market and Social Surveys.**

This course covers the theory and practice of survey research. Topics include questionnaire design and formatting; sample design and selection; interviewing techniques; data base design and data entry; and elementary data analysis and report production. Students individually design and conduct a survey on a topic of their choice, and collectively conduct and analyze a sample survey of the Brown student population.

**SOC 1121. Creative Companies: Entrepreneurship, Markets, and the Culture Industry.**

Firms in creative industries influence many physical and psychological aspects of our lives, from what we eat and wear to how we entertain ourselves, but markets for cultural goods are complex and difficult to navigate. Entrepreneurs must, therefore, understand the economic sociology of cultural market and ecosystem in order to capture economic value, a process that recursively relates to cultural norms. Students will analyze business cases of firms in a wide range of creative industries such as art, fashion, film, food, music, publishing, and theater to explore and understand the economic, organizational, and sociological underpinnings of culture, value(s), and markets.

**SOC 1128. Migrants, Refugees and the Mediterranean.**

The Mediterranean Sea is one of the deadliest bodies of water on the planet to cross. It is also one of the most frequently crossed for migrants and refugees. This course examines the history, the origins, the destinations, and the definitions of human population flows across the Mediterranean. We will explore push and pull factors as well as sending and host country classifications of people as they cross from one side to the other. We will focus in particular on the tensions between sending and host countries from individual, societal and institutional levels.

**SOC 1220. Future of Work.**

The Future of Work refers to technological advances in brain science, AI, blockchain, machine and deep learning that have the potential to substantially change our work experiences, organizations and society. These changes can bring many positive benefits and also raise ethical concerns when technology is used to predict human behavior, replace employees, create a contingent/low-wage workforce, or drive autonomous vehicles. This class will examine how the world of work is changing, how these changes relate to organizations and entrepreneurship, and what skills are necessary to shape the Future of Work in ways that are sustainable, ethical and inclusive.

**SOC 1230. What Do Schools Do?.**

Education is an important institution in modern societies. Schools influence all of our lives from an early age. Schools are the largest employer in many communities and are widely considered the major force for social equality. What does this mean for society? What do schools do? Why do some students learn more than others? How do schools reduce or reproduce social inequality? How do schools influence society and how does society shape schools? We will consider these and other related questions in this course.

**SOC 1240. Human Sexuality in a Social Context.**

How do we come to know ourselves as sexual beings? How do individuals develop attractions, make sexual choices, define and enact their own sexuality? What is social about sexuality, and how do institutions and organizations influence understandings of human sexuality over time? This course investigates these questions by examining the processes through which the human body is sexed, from without, by the society into which it is born, and from within, through self-definition, desire, and practice. Social science theories of sexuality will be considered, and cross-cultural and historical accounts of sexual practices will be reviewed. Not open to first year students.

**SOC 1250. Perceptions of Mental Illness.**

This interdisciplinary course centers on the need to understand mental illness in a broad social context. It covers personal experience of mental illness, history of psychiatric concepts and treatment, politics of diagnosis, mental health policy and deinstitutionalization, public attitudes toward mental illness, social factors and epidemiology of mental illness, and links between mental illness and creativity. There is much attention to artistic perceptions of mental illness through fiction, memoirs, drama, music, and art.

**SOC 1260. Market Research in Public and Private Sectors.**

Introduction to data and research methods for private and public sector organizations. Data used in market research include trends in the population of consumers, economic trends, trends within sectors and industries, analyses of product sales and services, and specific studies of products, promotional efforts, and consumer reactions. Emphasizes the use of demographic, GIS, and other available data.

**SOC 1270. Race, Class, and Ethnicity in the Modern World.**

Applies sociological analysis to understand present and historical cases of ethnic and race relations and conflicts. Topics addressed are the social construction of race and ethnicity; historical processes of racialization; ethnic conflict and the nation state; and the linkages between race, class, and social mobility. Focuses on racial and ethnic relations in the U.S., but also has a strong international comparative component.

**SOC 1281. Migration in the Americas.**

Examines historical trends and determinants of migration from Latin America to the United States. Each stage of the migration process is examined: the decision to migrate, getting across international borders, settlement and integration in destinations, and return to places of origin. The course integrates theories and empirical studies of international migration with hands-on analysis of survey data from the Mexican and Latin American Migration Projects, the two largest survey databases for studying migration in the Americas. Students will learn how to formulate and operationalize research hypotheses, read, process, and analyze survey data files, and present and interpret research results.

**SOC 1310. Social Change in Latin America.**

Analyzes the development of modern Latin American societies, focusing on three interrelated processes: the formation of states, the formation of nations, and the formation of socioeconomic systems. The approach is macrosociological, looking at broad processes of structural and institutional change, and historical-comparative, analyzing and comparing how the three processes above developed historically in different Latin American countries.

**SOC 1311. Micro-Organizational Theory: Social Behavior in Organizations.**

Micro-Organizational Theory focuses on the human dynamics of organizations as natural systems. It examines how individual attitudes, actions, and interactions make a difference for organizational processes and outcomes. This focus is contrasted with more macro-level approaches, which take the organization (instead of the individual) as the primary unit of analysis. For example, studies of organizations from an economic perspective are typically concerned with the performance of the organization relative to its competitors. Studies of organizations from a macro-sociological focus are typically concerned with an organization's routines and structures, contextualized by the broader environment. SOC 1311 takes a more micro and meso perspective that asks questions such as, "why do individuals in organization behave the way they do, how does this affect the organizations of which they are a part and how, in turn, are individuals affected by their organizations?"

**SOC 1315. Macro-Organizational Theory: Organizations in Social Context.**

Macro-Organizational Theory focuses on the organization and its social/economic environment. This class will explore various definitions of the organization's environment, and the many types of macro-level organizational structures in which sets of organizations interact, function, compete, and cooperate. Important questions to be asked include the following:

- What is an organizational environment and how do organizations "deal" with what is outside of their boundaries?
- How are the boundaries of organizations defined/recognized/function?
- How do environments influence organizational strategy and performance?
- What are the major theories for assessing macro-level organizational phenomena?
- What are the many ways in which organizations relate to other organizations?

**SOC 1330. Remaking the City.**

Cities are being reshaped by immigration, economic restructuring, and other forces. This course reviews these changes from several perspectives, including the patterns and causes of change, the role of politics and public policy, and how different groups of people (by class, race, and national origin) manage under the new conditions. Readings will emphasize historical and cross-national comparisons.

**SOC 1340. Principles and Methods of Geographic Information Systems.**

An introduction to the fundamental principles and methods of geographic information systems (GIS). Topics include (a) handling different types of geographic datasets, (b) geo-analytical and modeling tools in GIS, (c) conceptual and theoretical aspects of GIS application development, and (d) errors and uncertainty analysis of GIS applications. Laboratory assignments and the project work provide hands on experiences in GIS. Enrollment limited to 21 juniors and seniors.

**SOC 1352. Employment and Labor in the New Economy.**

This class will introduce students to classical and contemporary theories pertaining to work, employment, and labor markets. Readings and class discussions will specifically focus on individuals' careers and employment processes within organizations. The course will examine: (1) the sociology of labor markets, (2) employment and careers in the new economy and (3) job search, networks, and hiring decisions. Students will develop knowledge of these key theories, which will be applied in high-profile organizational settings.

**SOC 1400. Political Sociology.**

Analyzes "American Exceptionalism" through constitutional and cultural controversies. Considers relations between the state and such institutions as the market, the family, associations and churches. Examines the effects of class, race, ethnicity, and gender on American politics.

**SOC 1410. Aging and the Quality of Life.**

Provides a broad-based knowledge of the aging process and its impact on the quality of life of elders. Explores physical, psychological, social, cultural factors. Assesses different approaches to meeting needs of elders and providing high quality care and examines consequences of an aging population for social institutions. Prerequisites: SOC 0010 or 0020 and PHP 0070 or 0310, or permission of the instructor.

**SOC 1420. Violence and Society.**

The course focuses on the personal and structural sources and consequences of violence in the U.S. We investigate three levels of violence: interpersonal; institutional, wherein social institutions do violence to individuals or groups; and structural, examining the structures of society that tolerate or promote violence, both within the society and toward other societies. Next, we examine the culture of violence that permeates our society, including the mass media and violence. WE focus on specific forms of violence in our society, including gang violence, bullying, violence within schools, sex trafficking, war, religious violence, and terrorism.

**SOC 1430. Social Structure and Personal Development.**

The relationship between one's place in the social structure and one's own personal growth. Investigates the social aspects of individual growth and change throughout the life course. Also examines social factors involved in the failure to find a meaningful place for oneself in society.

**SOC 1440. Intimate Violence.**

Explores sociological perspectives of violence in intimate relationships. Begins with theories of violence, including social learning theory, the frustration-aggression hypothesis, and violence as catharsis. Examines the contributions of gender, race status, media violence, and pornography to the issue. Investigates specific forms of intimate violence: sexual aggression (including "acquaintance rape"), partner abuse, elderly abuse, and child abuse. Not open to first year students.

**SOC 1540. Human Needs and Social Services.**

The development of human services and a broad range of social welfare purposes are studied, including health and nutrition programs, job development, youth empowerment, and family, workforce, and educational policies. The role of nonprofit and nongovernmental organizations receives particular attention, and alternative models of human services are discussed. This semester will focus particularly on the impact of community-based programs, featuring case studies from projects funded through the course, "Investing in Social Change," in Fall 2010. The emphasis will be on different means and measures for evaluating impact and demonstrating sustainability and accountability. Instructor permission required.

**SOC 1550. Sociology of Medicine.**

The aim of this course is to give conceptual framework and some analytic tools to examine the context of health, illness and well-being at the micro, meso and macro levels. The focus of our attention will be on health inequalities: how they are produced, their relationships with socioeconomic status, and how to minimize their effects. Special attention will be given to the phenomenon of medicalization, to the ways in which a diagnosis is socially constructed, issues of social justice and equity, and the implications of biotechnological innovation and the rise of health and wellness-oriented culture.

**SOC 1600. Comparative Development.**

An exploration of the economic, political, and social changes that constitute development. Both the historical experience of Europe and the contemporary Third World are considered. Major processes examined include state and nation-building, agricultural modernization, colonialism, industrialization, revolution and socialism, authoritarianism and democracy, and socioeconomic distribution. Emphasis on the countries of Africa, Asia, and Latin America.

**SOC 1620. Globalization and Social Conflict.**

Examines the effect globalization is having on the economies and societies of the developed and developing world. Focuses in particular on how new forms of global production and networking are transforming the traditional role of the nation-state, creating new dynamics of wealth distribution, and generating new sources of social conflict and political contestation, including transnational social movements.

**SOC 1630. Transnational Social Movements and the Environment.**

Globalization presents distinct environmental challenges and alters the terrain upon which social movements mobilize and engage for change. How can we understand the relationships between globalization, the environment and society? In what ways is inequality being shaped in this context? How do social movements and advocacy networks engage transnationally to find leverage? Through readings, writing, film, multimedia projects, and engagement with case studies and social theory, this course explores how social movements and advocacy networks mobilize transnationally to achieve environmental justice and sustainability.

**SOC 1640. Social Exclusion.**

Why are some groups rejected and others accepted? This course examines the mechanisms of belonging and ostracism, social integration and exclusion, theories of diversity and hierarchy, and policies to reduce exclusion and inequality.

**SOC 1650. Unequal Societies.**

This course compares nation-states in terms of various forms of inequality and assesses theories explaining international inequalities. It examines why poverty, income inequality, and poor health are greater in the United States than in comparably affluent countries, why intergenerational mobility varies, and why some societies treat women more equally or are more accepting of immigrants and cultural minorities than others. It asks whether the high standard of living in the Global North comes at the expense of the Global South. What holds unequal societies together and pulls them apart? Can inequalities be reduced?

**SOC 1830. Mattering and Dysfunctional Behavior in Adolescence.**

No description available.

**SOC 1840. Mattering and Dysfunctional Behavior in Adolescence.**

No description available.

**SOC 1870A. Investing in Social Change.**

Philanthropy -- "giving away money" -- sounds attractive and simple. But the very acts of contributing and receiving resources affect dynamics and relationships among all involved. We explore philanthropic strategies, social change, the sociological dimensions of philanthropy in historic and current practice. Students engage in teams to investigate a particular community concern, design an investment strategy, recommend the investment of grant dollars. Instructor permission required. Course enrollment is by application only. Applications can be found at [swearercenter.brown.edu](http://swearercenter.brown.edu) shortly before the start of class. Students who pre-register must still be selected through the application process and attend the first class meeting. Enrollment limited to 18.

**SOC 1870B. Seminar in Contemporary Political Sociology.**

Explores how political power in society is structured from above and challenged from below. Using contemporary theory and comparative-historical analysis, this seminar critically addresses the power of the modern state, the politics of social class, the character of social movements, and the causes of social revolution. No formal prerequisites. Previous coursework in the social sciences is recommended. Enrollment limited to 20. Not open to first year students.

**SOC 1870C. African Development and Demography.**

Focuses on the relationship between socioeconomic developments in Africa and their demographic transitions. Particular emphasis will be placed on cultural issues in the analysis of population changes (mortality, morbidity, migration, family, and fertility) in the contexts of economic growth and dependency. Theories of development will be evaluated in the context of African demography; African population patterns will be assessed in their developmental diversity.

**SOC 1870D. Aging and Social Policy.**

This seminar examines the policy challenges of Americas aging population, centering on two major themes. The first has to do with the impact of the elderly on society and societal institutions. The second theme concerns alternate models for health and social service provision. We will explore the process of policy formation, focusing on the social and political construction of the problems of aging. Enrollment limited to 20.

**SOC 1870E. Alternatives to Violence.**

We examine nonviolence as a method for resolving serious social conflict. We consider psychological and sociological approaches to understanding why people choose violence, as a precursor to studying theories of nonviolence. We investigate practitioners of nonviolence throughout history and analyze nonviolence as a response to such issues as the death penalty, war, and terrorism.

**SOC 1870G. Capitalism, Democracy, and Social Welfare.**

This seminar for advanced undergraduate and graduate students explores long-term developments in modern societies. Empirical comparative historical analysis and theoretical assessments of causation, inevitability, and alternative possibilities will be complemented by normative reflections.

**SOC 1870H. Comparative Chinese Family Studies.**

Explores central issues in the social research of the Chinese family in both historical and contemporary contexts, with primary emphasis given to the latter and the family systems in China and in Taiwan. Two questions frame the course: "What is going on in Chinese families?" and "Why?"

**SOC 1870I. Contested Environmental Illness-Research Seminar.**

Examines "contested illnesses," focusing on environmental factors in Gulf War illnesses, asthma, breast cancer and other diseases. Students conduct interviews and do field work and document analysis to study lay, scientific, and governmental perspectives. Examines how these disputes can lead to progress in disease detection and etiology, and in the development of less toxic products.

**SOC 1870K. Demographics and Development.**

Assesses the social and economic determinants and consequences of changes in fertility, mortality, and migration and their impact on the size, distribution, and composition of population in developing societies. Implications of the evolving population structure for planning and policy. Enrollment limited to 20.

**SOC 1870L. The Economic Foundations of Everyday Life.**

Critically examines the relationship between markets and individual, inter-personal, and community level social phenomena. Aims to help students develop knowledge and skills to understand markets as social institutions, evaluate them through different theoretical lenses, analyze their impacts on social life. Students also learn the skills of critical analysis and argumentation needed to form thoughtful opinion, take a critical position, make a decision about important economic and social issues. Thus, students gain expertise as informed actors and advocates in the social and economic system. Prerequisite: SOC 1010, equivalent, or permission of the instructor. Enrollment to 20.

**SOC 1870M. Entrepreneurship and Good Work: Engineering Dreams.**

In this course, students examine the concepts of creation, organization, promotion, management and risk of ownership, to wit: entrepreneurship. This is done in the context of "good work". Using a combination of relevant case studies, readings, guest lectures and discussion, each participant builds a theory and framework to explore what defines innovative and meaningful engagement during one's working years.

**SOC 1870N. Environmental Sociology.**

Since its formal inception in the late-1970s, environmental sociology has developed as a highly interdisciplinary field that simultaneously confronts core sociological questions and challenges. This seminar provides students with a selective overview of major approaches, debates, and interdisciplinary cross-currents shaping the field of environmental sociology. The general goal of the course is to deepen collective understanding of the dynamic interrelationships shaping human societies and the natural environment. To do so, we will consider how sociologists and others have conceptualized society-environment relations and critically assess the various approaches developed to examine those relations, their causes, and outcomes.

**SOC 1870O. Ethnic Entrepreneurship.**

This course focuses on the dynamics of urban labor markets in Latin America. In spite of rapid industrialization, large numbers of people in Latin American cities depend on the informal economy for their livelihood. The course begins with a review of the different theoretical approaches to the urban labor markets and the informal economy in Latin America. It then focuses on the relationship between industrialization and urbanization in the region, the economic and social linkages of the informal economy, and the household strategies of labor market insertion. Enrollment limited to 20.

**SOC 1870P. Explaining China's Rise: Development and Accumulation in Contemporary China.**

Few questions pose more significance to scholars and policymakers than the "rise of China". As scholars grapple with explaining China's rise, they also provide tantalizing previews of the future of Chinese growth, by extension, the future of global economy. This course explores the character, conditions, consequences of the rapid Chinese economic growth that many have termed "capitalism with Chinese characteristics". 3 paradigms for explaining growth: a state-centered approach, a market-oriented approach, Marxist, accumulation-centered approach. 3 parts, each examining a separate paradigm of development, providing case studies this paradigm explains growth in specific industries and sectors of the Chinese economy.

**SOC 1870R. Groups in Organizations.**

Groups are the core social unit of organizations. This class examines the unique processes that make groups more than just the sum of their individual members, as well as the impact of groups on organizations, and the ways in which groups are constrained and influenced by organizational context. Enrollment limited to 20.

**SOC 1870S. Sociology of Gender.**

Gender is among the most prominent organizing principles in our society. From the day they are born—and even earlier as the result of reproductive technologies—on through to the day they die, individuals are gendered. Instead of understanding gender as a set of behaviors derived from innate, fixed biological differences between men and women, this course analyzes gender as a social arrangement shaped by social actors, organizations, and institutions. Drawing from social science research, the course analyzes everyday interactions of intimacy, language, and identity issues, as well as macro structures like the economy, religion, and education, to understand how they affect notions of gender. The course sustains an analysis of sexuality because ideas of femininity and masculinity are constructed around notions of "appropriate" sexual conduct and relations. Although this course focuses on everyday life in this country, the class will explore the production and institutionalization of gender relations in historical moments and spaces beyond the U.S. Enrollment limited to 20 juniors and seniors.

**SOC 1870T. Health Professions and Organizations.**

An in-depth study of the social history of the professions and institutions of medicine. Primary emphasis will be on the U.S., but some comparative reading will be done as well. Theories of social change will be applied to the medical profession, and organizational processes of change will be used to explain current developments in managed care organizations and in the use of strategic alliances in health care delivery.

**SOC 1870U. Household and Families.**

Examination of sociological, economic, anthropological, and historical research on the impact of change on family structure and the effect of family processes on demographic behavior. Trends considered include the rise of one-person households and one parent families.

**SOC 1870V. Households, Work, and Gender.**

Household membership typically entails coordinated behavior. We discuss the organization of work and its gendered dimensions. We explore the determinants and consequences of existing divisions of labor drawing on readings from multiple disciplines. The approach is sociological and comparative. Considerable time devoted to less developed settings. Seminar format. Individual research encouraged. Enrollment limited to 20.

**SOC 1871A. Sociological Perspectives on Mexico - United States Migration.**

This course examines the economic and social determinants of migration, and the consequences of migration for migrant families and communities. Each stage of the migration process is examined: the decision to migrate, getting across the border, adaptation and settlement in the U.S., return migration, and the impact of migration on origin communities.

**SOC 1871B. Sociological Perspectives on Poverty.**

Examines the personal experiences of socioeconomic status, with focus on the lower tiers of the hierarchy. We distinguish three levels of poverty: the working poor, marginal workers, and the underclass. Analysis will make use of issues of gender and family, race and ethnicity, and urban and rural settings. We investigate sociological perspectives on the problem of homelessness. Enrollment limited to 20.

**SOC 1871C. Sociology of the Legal Profession.**

This seminar explores the structure and functioning of the legal profession, with a particular focus on the role of lawyers in contemporary America. The approach is broadly sociological, emphasizing that lawyering, like all professional work, reflects the social dynamics of both the profession itself and the larger society in which the profession is embedded. Topics and materials focus on general social processes, not on the mechanics of getting into law school, choosing a practice area, or succeeding as a practitioner. Through readings and field observations, coupled with weekly discussions and e-mail dialogues, the seminar invites students to refine and extend their thinking on a series of important and controversial topics, including legal education, client relations, professional ethics, inter-professional competition and intra-professional stratification. Prerequisites: familiarity with other areas of sociology or law is helpful, but not essential; previous coursework in the social sciences is strongly recommended.

**SOC 1871D. Sophomore Seminar in Sociology of Development.**

This seminar provides an introduction to the study of development. It looks at the diversity of understandings of the concept of development as well as its practical importance in the world. Students will read texts that present pressing questions and issues concerning development practices, policies, and theories. Efforts to connect broad theoretical debates to understanding contemporary problems will be encouraged. Enrollment limited to 20 sophomores.

**SOC 1871E. Theory and Methods in Historical Sociology.**

An examination of work at the intersection of sociology and history. Explores the different theoretical traditions that guide the sociological analysis of history, the diverse approaches to conceptualization and comparison used in the investigation of large - scale structures, and the various methodological techniques that are available for generating valid explanations of historical patterns of change. Prerequisites: some background in sociology or history.

**SOC 1871F. The Sociology of Labor Markets.**

An introduction to the fundamental principles and methods of geographic information systems (GIS). Topics include (a) handling different types of geographic datasets, (b) geo-analytical and modeling tools in GIS, (c) conceptual and theoretical aspects of GIS application development, and (d) errors and uncertainty analysis of GIS applications. Laboratory assignments and the project work provide hands on experiences in GIS. Enrollment limited to 15 juniors and seniors. Instructor permission required.

**SOC 1871G. Social Goals, Motivation and Behavior in Organizations.**

Social goals such as status, reciprocity, and group solidarity take into consideration not only our individual needs, but also the social context. In this course we will learn about these three social goals, various types of organizational motivation, and the role the social goals may play in influencing people's behavior when they work in groups.

**SOC 1871H. Social Perspectives on HIV/AIDS.**

This seminar will build upon your understanding of the perspectives and research methods used in sociology through studying the vulnerabilities for HIV infection and the social consequences of the epidemic in east and southern Africa. The course relies heavily on student participation, which will include leading class discussions, making formal presentations, and contributing to class discussions. The readings have been chosen to frame our discussion and to fuel debate; therefore, all readings should be completed before the class for which they are assigned. It is helpful if you have had previous coursework in sociology; however, the course is open to all students interested in the topic.

**SOC 1871I. Advanced Geographic Information Systems.**

Advanced GIS will explore students in the social sciences to the tools of spatial analysis. Students will explore both the theoretical foundation for different types of spatial analysis as well the practical implementation of spatial analysis as presented in various software packages.

**SOC 1871J. Ethics, Justice, and Transformations in Engaged Scholarship.**

We seek to refine our understandings of the variations in engaged scholarship's ethics, conceptions of justice, and practices of transformation. In this seminar we shall work with a variety of experienced scholars and practitioners to identify best practices, recognize recurring and distinctive challenges, and to identify the conditions of consequential transformations that emerge from such engaged scholarship.

**SOC 1871K. Nanotechnology and Organizations.**

In recent years, nanotechnology has attracted enormous interests from a variety of organizations. This course examines how different organizations - public, private and non-profit - promote and shape the development of nanotechnology. To help students understand the emergence of this new high-tech science, this course also introduces theories and empirical studies in the literature of organizational studies.

**SOC 1871L. Migration, Displacement and Emerging Community Experiences: Contemporary Turkey.**

This course explores Anatolia as a dynamic territory of transit, through a critical lens. We will study communities that have been formed through internal and international migration, displacement, and Otherness that forces people to organize along identity lines, resulting in emerging diverse communities within Turkey. We will look briefly at Anatolia's past and focus primarily on contemporary Turkey. We will compare the reality of the population with the rhetoric and performance of ruling powers pertaining to indigenous status and belonging. Students will leave this course with a comprehensive understanding of population and identity formation in contemporary Turkey as they relate to migration and displacement.

**SOC 1871M. Theories of the Third Sector and Civil Society.**

Third Sector- consisting of non-government, nonprofit, social movements organizations-- is an increasingly important segment of societies worldwide. This seminar will train students to critically apply organizational theory to evaluate the contributions, opportunities and challenges of this sector. We will probe critical third sector issues, including: impact, accountability, and sustainability of sector activities; commons issues in the sector such as legitimacy and co-optation; the dynamics of government collaboration; and what constitutes social justice in the distribution of the sector's resources. Prerequisite: at least one course in Sociology. Enrollment preference given to Sociology and BEO concentrators.

**SOC 1871N. Military Health: The Quest for Healthy Violence.**

As an institution, the military trains individuals to conduct violence while remaining, at least ideally, healthy. From the standpoint of the organization, the successful soldier is someone who is good at violence at the same time that he or she is mentally and physically fit. Enrollment limited to 20.

**SOC 1871O. Law, Innovation and Entrepreneurship.**

This seminar explores the relationship between law and organizational change, with particular attention to the emergence of new technologies, new enterprises, and new fields. Topics focus on underlying sociological processes, not on technical or practical details of particular legal or industrial settings. The seminar is aimed at advanced students who are familiar with organizational sociology; familiarity with law is helpful, but not essential. Through shared and individual readings, weekly discussions, and e-mail dialogs, this course helps students to refine and extend their thinking on important and controversial topics at the intersection of contemporary organizational and socio-legal studies.

**SOC 1871P. Field Methods in Development Research.**

An introduction to the various techniques of field methods in development research, with a focus on qualitative and field methods.

**SOC 1871Q. Sociology of Culture.**

This upper level seminar reviews classic and contemporary approaches to the sociology of culture, with special attention to the cultural sociology, relational sociology, and questions of political culture.

**SOC 1871R. Knowledge Networks and Global Transformation.**

How do refined knowledge and the social relations that organize and distribute it influence changes in the institutions, inequalities and cultural systems and practices that define particular world regions and global formations? And how do global transformations influence the trajectories of knowledge production themselves? We will examine particular knowledge-identified agents, including universities, research institutes, think tanks, and professional associations, to consider why they approach global transformations in the way that they do. And we will consider how particular kinds of global transformations, from the end of the cold war and the transformation of information/communication technology to the last financial crisis, affect knowledge production itself. By exploring intersections between global complexity and reflexivity in this fashion, we hope to increase our own capacities for seeing the world not only as it is, but how knowledge might be used in making better alternatives for the future. Enrollment limited to 20 juniors and seniors.

**SOC 1871S. Legacies of Inequality: The U.S. and Beyond.**

Does education equalize or widen gaps between people and nations? Has mass imprisonment reduced crime or exacerbated U.S. racial inequality? Does biology determine destiny, or is society more fluid? This course introduces theory and research on social inequality, emphasizing temporal dimensions of social differentiation. Attention will be paid to the characteristics we are given (race, sex), those we achieve (education, income), and institutions and policies we encounter throughout the life cycle (schools, the justice system). By understanding the complexities of social inequality and the challenges of devising solutions, students will leave as informed citizens, better equipped to enter any profession. Enrollment limited to 20. First year students require instructor permission.

**SOC 1871T. Who Governs Markets?.**

This Course will introduce students to problems of market regulation. It begins with discussion of key turning points and debates around markets and states that shaped contemporary capitalism. We will then explore a wide array of governance institutions and mechanisms, raging from international organizations, private certification agencies to bottom-up social movements and protection rackets. Students will have an opportunity to apply theoretical knowledge to exploring one particular industry or company through design of a case study. They cases will help develop our understanding of how policies, labor and social movements or forces of competition influenced particular industries. Enrollment limited to 20.

**SOC 1871U. Sample Surveys in Social Research.**

This course covers the theory and practice of survey research. Topics include questionnaire design and formatting; sample design and selection; interviewing techniques; data base design and data entry; and elementary data analysis and report production. Students individually design and conduct a survey on a topic of their choice, and collectively conduct and analyze a sample survey of the Brown student population. Please note that this course is a seminar version of SOC 1120. Enrollment limited to 20.

**SOC 1871V. Update on American Society: Social Trends in the Last Decade.**

American society is always changing, and national data sources (especially the American Community Survey and Current Population Survey) provide updated information on social trends every year. This course will review the most significant recent social trends based on these sources, including such topics as income and wealth inequality, racial and ethnic change, immigration, marriage and family patterns, home ownership, and residential segregation. Enrollment limited to 30 juniors, seniors, and graduate students.

**SOC 1871W. Geographical Analysis of Society.**

Provides an introduction to a geographical approach to understanding the spatial organization of individuals, societies, and economies. The two main emphases are on theories/concepts and applied analytical tools. We will learn about key theories in geography, sociology, and economics that have attempted to organize and classify the spatial structures and interactions across space of social and economic actors and will work with related analytical techniques. Enrollment limited to 20 juniors, seniors, and graduate students.

**SOC 1871X. Comparative Urban Political Economy.**

For the first time, most people across the globe live in cities. Inequalities within both nations and cities are increasingly similar across national boundaries. This course ask how the politics of formal and informal institutions in cities produce and change inequalities of shelter, work, race, and other social identities, across urban space. We analyze cases from across the globe, along with a range of social science methods and theoretical perspectives.

**SOC 1871Y. Time and Social Inequality.**

This course explores the subject of time from a sociological perspective. The international adoption of a standardized time alludes to a universality in the experience of time. Yet, time is neither experienced nor distributed equally. In this course, we will explore temporal inequalities in contemporary U.S. society by considering how time is patterned, managed, and experienced across social boundaries.

**SOC 1871Z. Martial Arts, Culture, and Society.**

In this upper level undergraduate course for which there are no prerequisites, we consider how sociology, and other social sciences, help us understand martial arts and other bodymindful practices (including yoga!) and how they might inform the social sciences. We consider how these practices, their organizations, and their cultures shape, and are shaped by, different structures of power and privilege. We concentrate on martial arts because they straddle such an important axial dimension of society around violence. Enrollment limited to 20.

**SOC 1872A. Stratification and Labor Markets.**

This class examines theories pertaining to labor market inequality and wealth stratification. What organizational practices shape employment outcomes, and how can they be addressed? What factors are contributing to widening wealth stratification in the USA and abroad. How are establishments, technology, and executive compensation shaping labor market inequality today? These questions, and others, will be addressed by examining processes affecting: (1) organizations, (2) individuals and society, and (3) nations. Theoretical concepts will be explored through practical examples. In addition to discussing key factors shaping inequality and stratification outcomes, solutions to address these issues will be examined through organizational policy initiatives.

**SOC 1872B. Sociology of Money.**

What is money, wealth, their relationship? How have U.S. Markets for money changed this relationship? How have money markets changed? This is an introduction to current markets for money: how credit/debit is exchanged, how money is produced, what it represents in relation to global production, trade, and wealth distribution. Each week presents a question, than answers this question in two ways: 1st explaining how financial instruments work within U.S. market (economic explanation), 2nd examining how financial instruments change market outcomes (sociological critique). By the end students will understand how money markets work and how they effect the distribution of wealth.

**SOC 1872C. Race and Ethnic Relations, Identity, and Inequality.**

This course provides an overview of perspectives used in sociological studies of race and ethnicity. It focuses on race and ethnic relation, boundaries, and inequalities through empirical research on interracial or interethnic contact opportunities and racial, ethnic change and variation in interracial or interethnic relationship, romance, and marriage. The goal of the course is to deepen the understanding that racial/ethnic boundaries are rigid, yet may be crossed, blurred, or shifted over time and across generations.

**SOC 1872E. Global Sociology: Capitalism, Colonialism and the Making of the Modern World.**

This course seeks to question our sense of place in the world. Sociology often takes the nation as a bounded unit of analysis. Yet, the history of the modern world is one of empires, colonialism and transnational connections. These global racial and colonial histories are frequently ignored or silenced. This course focuses on Providence and Rhode Island to look at the embeddedness of local lives in global social processes. If we acknowledge that the world has always been global, how does that change our understanding of contemporary issues? How should we rethink sociology to break with its colonial origins?

**SOC 1872G. First-Generation College Students: A Sociological Perspective: A Sophomore Seminar.**

Colleges have expanded their focus on diversity to include the social class origins of prospective students. One consequence is the emergence of the notion of first-generation college students: those who are the first in their families to attend college. We examine the challenges facing first-gens as they pursue higher education, focusing on two sources of difficulty: gaining admission and acclimating oneself to college, both academically and socially. Our goals are two-fold: (1) To understand the social barriers, compromises, and internal conflicts that first-generation college students face, and, (2) consider how institutional and structural forces impact and shape these students.

**SOC 1872H. Sociology of FIRE: Finance, Insurance, + Real Estate.**

This seminar explores the sociology of finance, insurance, and real estate (the "FIRE" sector). Topics covered include: the causes and consequences of the growth of finance, the morality of life insurance, gender discrimination, race and the role of the state in the mortgage market, the interplay between innovation and regulation, and the 2008 financial crisis. We will ask whether the benefits of modern finance are worth its costs, and whether finance merely reflects existing social and economic inequalities, or if there are mechanisms by which finance creates or reinforces those inequalities.

**SOC 1872I. Revolutions and Social Change.**

Revolutions are some of history's most dramatic events, causing rapid social transformations to arise from direct human action. But what exactly is a revolution? What causes revolutions? How do revolutions unfold? What do revolutions accomplish? How can revolutions change the world? In this course, you will answer these questions by examining and comparing a wide range of revolutions across history and the world, from France and Russia to Cuba and Iran. You will explore their social and political dynamics, focusing on their causes, courses, and outcomes, and by the course's end will understand the role of revolutions in history.

**SOC 1872J. Engaged Research/Engaged Publics: The Science + Craft of Applied Policy Research.**

Policy problems are complex. Policy analysis and design is both a science and a craft. Increasingly, policymakers have begun to acknowledge that effective policy research requires not only multiple methods of inquiry, but also interdisciplinary teams of social science researchers, citizens, designers, scientists, artists, consultants, and engineers, among other experts. Generating innovative policy solutions, from this approach, is not a straightforward, linear scientific process, but instead a creative, collaborative, and engaged activity that requires not only iterative and dynamic research methods, but also storytelling, design, and other creative processes. Pre Requisites: Substantive courses in public policy, urban studies, sociology, political science, and anthropology are also recommended, but not required.

**SOC 1872K. Schools and Social Inequality.**

Education has long been conceived of as the engine of social mobility, yet many factors dog modern efforts to close persistent opportunity and achievement gaps between low-income and minority youth and their affluent and white peers. This community-engaged course has a dual focus on content and research methods. Working with partner schools in Providence, students will investigate the macro, meso, and micro-level processes that enable the replication or remediation of social inequality, while simultaneously developing data collection techniques and analytic capacities. Complimentary class reading, reflection, and assignments will give context to and refine students' learning in the field.

**SOC 1872L. 20th Century World – A Sociology of States and Empires.**

This course introduces students to the sociology of empires and states. With help from key theories and concepts it charts a course through the transformation of pre-WWI empires into nation-states and the international order of today. Using primary sources, chosen by the students, we focus on historical continuities and discontinuities that constitute(d) both empires and states and mark the making of the 20th century. Sources may vary from treaties and declarations to literary, film and art works – like Gore Vidal's *Narratives of Empire* or Chaplin's *Dictator* – that analyze, portray or reproduce state- and empire-making (or unmaking) efforts.

**SOC 1872N. Ethnography in Organizations.**

This course explores how ethnographers study organizations. You will explore ethnographic case studies of different types of organizations, from private companies to governmental agencies. You will also have the opportunity to practice methods by conducting a semester-long ethnographic study of an organization on campus. This course will give students a strong grounding in the theories and methods that define ethnographic studies of organizations.

**SOC 1872P. Healthcare Professions, Organizations, and Markets.**

When we are sick and seek treatment, we encounter a complex system of healthcare. This course explores variations in who provides care, how the care is delivered, and how it's paid for, and whether it has consequential impacts on patient outcomes. It also considers the important role of state regulations and patient driven social movements in shaping care. To untangle this system and understand the actors and structures that shape our healthcare experiences, both locally here in the United States as well as abroad, this course engages in a sociological analysis of healthcare professions, organizations, and markets.

**SOC 1950. Senior Seminar.**

Advanced seminar for sociology and social analysis and research (SAR) concentrators. Participants examine methods for analyzing, writing, and presenting capstone and thesis material and apply peer review techniques in assessing each other's work. Culminates in presentation of capstone or thesis to the department. Required for all sociology and social analysis and research (SAR) concentrators.

**SOC 1970. Individual Research Project.**

Supervised reading or research. Specific program arranged in terms of the student's individual needs and interests. Required of intensive concentrators; open to others only by written consent of the Chair of the department. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**SOC 1980. Senior Honors Thesis.**

Under the direction of a faculty advisor, students construct and carry out a research project. The written report of the research is submitted to the advisor for honors consideration. A second reader selected by the thesis advisor certifies that the thesis is of honors quality. Please check Banner for the correct section number and CRN to use when registering for this course.

**SOC 1990. Senior Honors Thesis.**

Under the direction of a faculty advisor, students construct and carry out a research project. The written report of the research is submitted to the advisor for honors consideration. A second reader selected by the thesis advisor certifies that the thesis is of honors quality. Please check Banner for the correct section number and CRN to use when registering for this course.

**SOC 2000. Theory and Research in Development.**

Explores a range of substantive debates in development by drawing on empirical and theoretical work from the disciplines of anthropology, economics, political science, and sociology. The course has four objectives: 1) to provide students with a broad understanding of current debates and research on development; 2) to explore a range of substantive issues including growth, inequality and democratization, 3) to develop interdisciplinary analytic skills that can be applied to concrete research questions; and 4) to foster cross-disciplinary conversation and debate.

**SOC 2000A. To Be Determined.**

No description available.

**SOC 2010. Multivariate Statistical Methods I.**

Introduction to probability, descriptive statistics and statistical inference. Coverage of the linear model, its assumptions and potential biases. Emphasis on hypothesis testing, model selection and interpretation through application with real data.

**SOC 2020. Multivariate Statistical Methods II.**

This course is a graduate-level introduction to multivariate regression models for categorical and limited dependent variables. Subject matter includes modeling nominal and ordinal outcomes; truncated distributions; and selection processes. The course also reviews strategies for sample design; handling missing data and weighting in multivariate models. The course employs contemporary statistical software. Special emphasis is placed on model selection and interpretation. Prerequisite: SOC 2010

**SOC 2030. Social Stratification, Inequality and Mobility.**

This course provides an introduction to contemporary literature on social stratification, social mobility, inequality in the United States, abroad, based on research articles and books. We focus on theories, data, methods, facts about categorical dimensions of inequality (race, ethnicity, gender, sexual orientation); core dimensions of stratification systems (income, earnings and wealth distributions; poverty; education; the intergenerational transmission of socioeconomic status; social mobility); social institutions that govern social stratification (families, schools, labor markets, and the justice system); key inequalities that stem from stratification systems (e.g., health). This is a reading course, not a research seminar. Prerequisites include Sociology 2010 or equivalent.

**SOC 2040. Classical Sociological Theory.**

This is a graduate-level course requires students to engage in detailed analysis and critical review of sociological thought of the 19th and early 20th centuries. The class will introduce students to the critical thinking, methodological innovation, and historical imagination of sociological theory by reading the original texts of the forefathers of sociology, including Karl Marx, Max Weber, Emile Durkheim and others.

**SOC 2050. Contemporary Sociology.**

This class offers a review of some of the most interesting contemporary social theorists and the most intense debates in current sociological thought. It thematically reviews the works of Jurgen Habermas on the public sphere, Michel Foucault on disciplinary and governmental modes of power, Bruno Latour on modernity and modern science, Pierre Bourdieu on field and habitus and among others. No prerequisites.

**SOC 2060. Complex Organizations and Health Policy.**

Application of organizational theory to health care organizations, with special emphasis on the development of multi-organizational provider structures, health policy formulation and reform and the influence of regulations and technology on healthcare organization relationships. Written permission required for undergraduates.

**SOC 2080. Principles of Population.**

An advanced introduction to theoretical and substantive issues in the social scientific study of population. Major areas within sociology are integrated with the study of population, including the comparative-historical analysis of development, family processes, social stratification, ethnicity, ecological studies, and social policy. Primarily for first year Graduate students.

**SOC 2090. Culture and Social Structure.**

An analysis of the interrelations of religious ideas, value patterns, and various forms of knowledge on the one hand, and of the societal structures and changes in organizations and roles on the other hand. Offered in alternate years.

**SOC 2112. Practicum in Social Research.**

Covers the steps involved in social survey research, from site selection and questionnaire design all the way through data dissemination. It assumes a basic level of familiarity with social science research methods, particularly the logic of causal inference. We will discuss the linkage between research questions, site selection, and questionnaire design. We will also discuss in detail many of the practical considerations involved in fielding a survey, including balancing available funds and personnel with ideal sampling strategies and balancing the focus on a particular research topic with the responsibility to collect enough general information to make the data useful to a variety of users.

**SOC 2130. Health, Illness and Medicine in Social Context.**

The influence of social and economic factors on the development of concepts of health and illness, on the cause and distribution of disease, and on responses to disease. Lay-professional disputes over disease identification and intervention. Implications of medicalization (the expanding social jurisdiction of medicine). The importance of the health care system in American society. Selected issues in recent health policy.

**SOC 2150. Socioeconomic Analysis of Development.**

Compares economic and sociological perspectives on the problems of development. Topics include problems of conceptualization and measurement, entrepreneurship, capital accumulation, labor force utilization, income distribution, the role of the state, and the impact of international economic relations on developing countries. Prerequisite: a basic undergraduate micro-macro economics course or permission.

**SOC 2200. Social Capital and Social Networks.**

Explores the consequences of social capital and social networks for economic development. Examines different types and combinations of social relations, network structures of these relations, institutional environments that impact them, and dynamic forms these social relations take. Multilevel development cases include urban ethnic entrepreneurship, rural Third World communities, business networks (financiers, firms), intranational regions, and state-society relations.

**SOC 2210. Qualitative Methods.**

Emphasis on ethnographic field work through participant observation and interviews. Some attention to content analysis and visual sociology. Technical training in developing observational and interview guidelines, data collection, coding, transcript analysis, and computer applications. Strong emphasis on quality writing. Analysis of ethnographic research in book and article format. Attention to recent developments in ethnography, especially reflexivity and autoethnography.

**SOC 2220. Advanced Quantitative Methods of Sociology Analysis.**

Analysis of limited variables (variables at a categorical or ordinal level of measurement). Topics include measures of association, contingency table analysis, binomial and multinomial logistic regression, ordered logistic regression, goodness-of-fit tests, and parameter interpretation. Prerequisite: SOC 2010.

**SOC 2230. Techniques of Demographic Analysis.**

Procedures and techniques for the collection, evaluation, and analysis of demographic data; measures of population composition, fertility, morality, and migration; construction of life tables, population and projections, population dynamics; responsible use of demographic methodology.

**SOC 2240. Event History Analysis.**

An introduction to hazard models and their application to event history data in sociology. Topics include survival distributions, standard parametric models, discrete time approaches, partial likelihood models, and the introduction of covariates. Attention is given to practical application and the estimation of these models with software packages, where possible.

**SOC 2250. Ethnography: Theory and Practice.**

This course is designed to introduce graduate students in sociology and related fields to the study and practice of ethnographic methods. We will discuss various qualitative methodological approaches, but we will concentrate on observational and interview-based research. In addition to considering some of the epistemological issues these methods raise at the theoretical level, students will also have the opportunity to learn by doing. The overall goal of this course is to cultivate and enhance students' skills in ethnographic data analysis and interpretation, and to employ these skills in the writing of a scholarly paper or book chapter.

**SOC 2260C. Perspectives on Family Planning.**

Reviews sociological and demographic perspectives on family planning. How and why did family planning programs develop? What do they entail? Who do they serve? What are the implications of family planning programs for individuals and family life? Individual case studies are considered. International family planning efforts are emphasized.

**SOC 2260D. Race, Ethnicity, and Nation: Boundaries, Identities, Inequalities.**

This seminar aims to provide students a solid base in the analysis of racial and ethnic boundaries, identities, and inequalities. The seminar addresses a number of central topics in the field and acquaints the students with some key works. The course is divided in three parts. The first part focuses on how race constituted the modern world and on contemporary forms of racialization. The second part focuses on the construction of nations and challenges to their ethnic and racial boundaries. The third part of the course looks at contemporary boundaries of race and ethnicity in the United States. Open to upper level undergraduates with permission of instructor.

**SOC 2260E. Structural Equation Models in the Social Sciences.**

Structural equation models as used in the social sciences and methodological issues pertaining to such models. Topics include the logic of causal modeling; theories and models; recursive and non-recursive structural equation systems (path analysis); reduced form equations; the problem of identification; unobserved variables and the analysis of covariance structures (using LISREL).

**SOC 2260F. Advanced Demographic Techniques.**

No description available.

**SOC 2260G. The Souls of Sociology: W.E.B Du Bois and Critical Sociologies of Race.**

This course investigates Du Bois' empirical and theoretical sociological work and its implications for contemporary sociology. W.E.B Du Bois is recognized as a pioneer of sociology of race, but his work is seldom explored. The first part of this course we discuss in-depth Du Bois work to construct the bases for a Du Boisian sociology. The second part we will read contemporary theories of race through the lens of Du Bois' work. The final section we will read contemporary empirical works in the field of race and ethnicity, reflect how we would conduct them differently from a Du Boisian perspective.

**SOC 2260R. Race and Ethnicity: Boundries, Inequalities, Identities.**

The goal of this seminar is to provide students with a solid base on the sociological theoretical and empirical base for the study of race and ethnicity. The course is divided in three parts: The first focuses on the place of race, ethnicity, and nation in the making of the modern world. The second part focuses on key topics and works in the American sociology of race, ethnicity and immigration. The third part focuses on the comparative study of nation making and ethnic and racial politics.

**SOC 2270. The Structures of Social Inequality.**

Examines the structural bases for social inequality in the U.S.: gender, race, and socioeconomic status. Investigates the processes by which we generate and preserve these social structures, as well as their effects on the individual. Finally, considers the changing nature of social inequality in a postmodern society and comparative issues across societies. Enrollment limited to 20. Instructor permission required.

**SOC 2280. Interdisciplinary Perspectives on Population.**

This course provides an introduction to interdisciplinary perspectives on population, drawing on insights from anthropology, economics and sociology in regards to population questions, theories, and methodologies. The focus is on three topical areas in population studies - understanding fertility change, HIV/AIDS, and population structure and process.

**SOC 2300. Welfare States.**

This seminar examines the political sociology of welfare states and social policies in the United States and abroad. It reviews major theories accounting for the origins and subsequent development of welfare states, explains the "exceptional" nature of American social policy, and discusses recent welfare reforms via institutional histories and in depth case studies.

**SOC 2310. Health Institutions and Professions.**

Structure and operation of health professions and health care institutions, both historically and at present. Emphasis on structural determinants of health-such as race, class, and gender differences in disease, mortality, environmental exposures, and health utilization-and the importance of nonmedical interventions in improving health status and reducing inequalities.

**SOC 2320. Migration.**

Examination of migration in its several manifestations: internal, international, and patterns of settlement and segregation. Consideration is given to both determinants of population movement and the socioeconomic adjustment of migrants in their destination. Includes comparative study across migrant groups and geographic settings.

**SOC 2350. Social Movements in Health.**

Study of social movements dealing with health and illness, with emphasis on contemporary movements such as women's health, environmental justice, environmental health, breast cancer activism, asthma activism. Examination of historical formation, recruitment, links to other movements, lay-professional interactions, research ethics, effects on science and medicine, and impacts on society.

**SOC 2360. Fertility.**

An introduction to the study of the social determinants of human fertility. Contemporary and historical populations are considered. Theories and frameworks used to guide fertility research are reviewed. Special topics include: fertility decision-making, gender and fertility, work and fertility, adolescent fertility, and population policies and family planning programs.

**SOC 2385. Environmental Sociology.**

As contestation over environmental concerns proliferates, it draws increasing attention from sociologists. But sociological research on environmental issues raises major challenges. Social-environmental relationships raise theoretical and methodological questions: How do we know an "environmental" issue when we see one? How can we effectively examine the relationships between environmental processes and social processes and structures?

**SOC 2420. Master's Thesis and Proposal Writing Seminar.**

Sociology 2420 is a graduate seminar on the craft of social-science writing. Writing is not easy for most of us, and it can sometimes be frustrating. Through out-of-class writing and recurrent in-class review the course explores strategies for making your writing more effective, more productive, and hopefully more enjoyable. The seminar's goal is to help graduate students to advance and complete their writing tasks, whatever they are working on. It is open to students working on a variety of goals such as writing their MA, their dissertation proposal, a research proposal, or a journal article.

**SOC 2430. Fields and Methods of Social Research.**

Introduction to strategies sociologists use to formulate theories and conduct methodologically sound research. Hypothesis formulation and research design; special emphasis on identifying causal mechanisms, techniques of operationalization, and choice of relevant comparisons.

**SOC 2450. Exchange Scholar Program.****SOC 2460. Sociology Paper Writing Seminar.**

This is a special seminar for graduate students in Sociology on the art of writing research papers for publication. The goals of the course are to: 1) learn the process of writing by drafting or redrafting a complete research paper, one section at a time 2) participate in the process of critical peer review 3) become knowledgeable about the process of submission/publication in peer-reviewed journals in Sociology and related social science fields 4) become more familiar with the often hidden processes of journal review, publication ethics, and interpreting/responding to editorial decisions

**SOC 2500. Teaching Practicum in Sociology.**

This course is designed for sociology graduate students whose funding has prohibited a teaching assistantship but who need to complete the departmental teaching requirement. The instructor for this course will default as the department chair but it is the graduate student's responsibility to identify an instructor to work alongside. This partnership must be approved by the director of graduate study.

**SOC 2510. Teaching Practicum in Sociology.**

This course is designed for sociology graduate students whose funding has prohibited a teaching assistantship but who need to complete the departmental teaching requirement. The instructor for this course will default as the department chair but it is the graduate student's responsibility to identify an instructor to work alongside. This partnership must be approved by the director of graduate study.

**SOC 2580. Health and Inequality: Race, Class, and Gender.**

Primarily emphasizes race, class, and gender inequalities, but also attends to inequalities of place, social control and official misconduct, and the responsibility of health care providers and researchers in dealing with inequality. Emphasizes social causation of morbidity and mortality rather than inequalities in access to health services and inequalities in clinical interaction, but touches on these other areas as well.

**SOC 2600. Comparative Historical Analysis.**

The seminar focuses on the application of theory and method in historical sociology. It will combine the reading of exemplary works, both classical and current, in comparative-historical sociology, with an exploration of historical methods that involves methodological readings but focuses on students' use of archives in their own individual research. For graduate students only.

**SOC 2610. Spatial Thinking in Social Science.**

This course reviews ways in which social scientists have incorporated concepts about space, place, and distance into their theories and research. Examples are drawn from many substantive areas, including the spatial organization of communities, spatial inequalities, and mobility. Separate laboratory meetings introduce methods of spatial analysis encountered in the course readings, including an introduction to GIS and related mapping tools.

**SOC 2612. Geographic Information Systems and Spatial Analysis for the Social Sciences.**

This course is intended for graduate students seeking to learn the basics of Geographic Information Systems (GIS) and how to incorporate spatial questions into social science research. The course is primarily a methods course and through required independent project work, students will learn how GIS and spatial analysis are typically employed across the social sciences. By the end students will be proficient in independent use of ArcGIS, most frequently used GIS software package, and will be able to apply the more common tools of spatial analysis. They will also know basics of cartography.

**SOC 2960A. Comparative Stratification.**

No description available.

**SOC 2960B. Democracy and Civil Society.**

No description available.

**SOC 2960C. Urban Sociology.**

This course will review alternative theoretical perspectives on urban and regional development with an emphasis on variants of ecological and political economy approaches. Substantive topics will include metropolitan restructuring in the U.S. and abroad, growth politics and growth control, neighborhood social networks and collective action, and incorporation of immigrants and minority groups in the metropolis.

**SOC 2960D. Organizations and Disasters.**

An overview of theory and research on organizations involved in various forms of disaster prevention, and organizations for whom mistakes can lead to major disasters (such as the Nuclear Regulatory Agency, the Office of Homeland Security, NASA, etc.). Students in this class will be involved in literature synthesis, hypothesis formulation, and the development of research designs to test those hypotheses.

**SOC 2960E. Poverty as Social Inequality.**

The objective of this seminar is to examine historical and contemporary poverty in the U.S. Topics covered include the measurement and analysis of poverty, individual and structural causes of poverty, the geographic distribution of poverty, poverty abroad, the consequences of poverty, and the policies that intend to address poverty. Course is organized around sociological perspectives, although multi-disciplinary scholarship is reviewed.

**SOC 2960F. Global and Transnational Sociology.**

The new phase of capitalism, commonly called "globalization," has radically transformed the postwar order. In this seminar, we will review several debates regarding current political-economic transformations, including: What caused the shift to neo-liberalism? What external economic pressures do states experience? Can domestic factors mediate such pressures? How do developing countries react to the new international environment? And what role does the United States and international organizations play in the new order?

**SOC 2960G. Spatial Data Analysis Techniques in the Social Sciences.**

Survey course of statistical methods that can be used to analyze spatial and/or clustered data at the individual and aggregate levels. Topics include multilevel analysis; fixed effects approaches; spatial choice; spatial autocorrelation, heterogeneity and dependence. Application with real data. Not a course about Geographic Information Systems (GIS) or mapping techniques.

**SOC 2960H. Demography of the Life Course.**

This seminar provides an overview of the development and current uses of the life course perspective in studies of demographic behaviors, process and change. Cohorts and age-graded patterns of behavior are considered as are the effects of social institutions, opportunity structures, and behavioral preferences all of which determine alternative life course pathways. Family origins and prior life experiences, along with ethnic/racial, gender, and cultural identities are examined as critical factors giving rise to inter-individual differences in demographic behaviors over the life course. The role of biography and agency in decisions about demographic behaviors and actual experiences are considered, as is their relationship to life course pathways, trajectories, and success. Graduate students and advanced Undergraduates with permission.

**SOC 2960I. Internal Migration.**

Critical analysis and discussion of current research on trends in, and causes and consequences of internal migration. Specific content of the course varies according to recent developments in the field.

**SOC 2960J. Comparing Institutional Forms: Public, Private and Non-Profit Organizational Forms.**

No description available.

**SOC 2960K. Comparative Political Sociology.**

This course explores both classic and contemporary debates in political sociology. The central thematic is the relationship between democracy and power and includes theories of the state, markets, social class and civil society. The debates are explored through historical and comparative lenses, covering both old and new democracies. Some background in political or sociological theory is recommended.

**SOC 2960L. Special Topics in Population.**

No description available.

**SOC 2960M. Sociology of Organizations Graduate Seminar.**

The sociology of organizations offers a burgeoning and vibrant literature, with relevance not only for self-identified organizational sociologists, but also for scholars in fields as diverse as politics, development, industrial relations, finance, education, health care, and the arts. This seminar offers an intensive exploration of the "state of play" in contemporary macro-organizational theory. Shared and individual readings, coupled with weekly discussions and email dialogues, allow students to refine and extend their thinking on a series of important and controversial topics in the recent literature. Although this course has no formal prerequisites, the syllabus is aimed primarily at graduate students who enjoy some prior familiarity with organizational theory, whether in sociology or a kindred discipline. Enrollment limited to 15.

**SOC 2960N. Governance in Development.**

No description available.

**SOC 2960P. Social Network Analysis.**

Provides a synoptic survey of the various methodologies and theoretical frameworks that collectively go by the name "Social Network Analysis" in the social sciences. Students will study the origin and history of social network analysis during the latter part of the 20th Century and work to develop core competencies in the construction, use and interpretation of basic network measures. Special attention will be given to the intersection of social network theory with broader social theory. Although there are no formal prerequisites, students should be advised that social network analysis relies heavily on matrix algebra and basic statistical theory. Open to graduate students in Sociology.

**SOC 2960Q. Sociology of Culture and Knowledge.**

We focus in this course on a few of the important theoretical and empirical developments in cultural sociology since the 1960s. In particular, we address ways in which culture is conceived and researched and how the sociology of knowledge and understanding underlies this address. We also consider the forms in which such a cultural sociology can inform a wide range of sociological questions, from the formation of the self to the articulation of historical epochs.

**SOC 2960R. Urbanization in a Global System.**

The world is undergoing an unprecedented wave of urban growth, and already more than half of the world's population in living in towns and cities. This course takes a global view of urban issues. In earlier developing regions such as North America and Europe, the focus is on a large scale restructuring of cities related to cycles of growth and decline, challenges to the social safety net, and replacement of local populations by immigrants with different racial, and ethnic or religious backgrounds.

**SOC 2960S. Statistical Methods for Hierarchical and Panel Data.**

A survey course providing an applied introduction to statistical methods for analyzing clustered and panel data. Topics include multilevel analysis, fixed effects models, and growth models. Our focus will be applied, with an introduction to underlying theory and emphasis on application and interpretation. Overall goals include highlighting the framework and assumptions for each approach; studying applications; understanding disciplinary and theoretical preferences for particular approaches; providing experience with software; and studying issues that arise in empirical research.

**SOC 2960V. Sociology of Law.**

This seminar explores central themes in contemporary social-scientific scholarship on law, law-oriented behavior, and legal institutions. The perspective is fundamentally sociological, with attention to such core sociological concerns as: social norms; law, power and culture; and law and social change. In addition, the course examines selected themes from the interdisciplinary "Law and Society" movement, for example: the psychology of justice; the anthropology of disputing; the economics of rulemaking; and the institutional politics of courts and legislatures. Other topics may include: law and inequality; law and social movements; law and globalization; the legal profession; legal consciousness; and the "Rule of Law."

**SOC 2960Y. Causal Analysis.**

"Does premarital cohabitation protect marriage?" "Does reducing class size improve elementary school education?" "Is there racial discrimination in the market for home loans?" We often use associations to claim causal effects. This course provides a broad introduction to causal analysis. We will address causal inference from observational and quasi-experimental research designs. Topics include instrumental variables estimation, difference-in-difference models, regression discontinuity, matching, propensity scores, heterogeneous treatment effects, and fixed effects models. The prerequisite of this course is SOC 2020 or equivalent.

**SOC 2961A. Advanced Spatial Data Analysis Techniques in the Social Sciences.**

This course provides a survey of advanced spatial data analytical techniques with particular focus on methods relevant to applications in the social sciences. Topics include spatial process models, Bayesian analysis of spatial data, spatial models for discrete dependent variables (spatial counts, spatial probit and tobit, spatial multinomial models), spatial panel data (time series of cross-sections with spatial effects). The course introduces use of specialized software packages included in R and the PySAL library for spatial analysis in Python. SOC 2960G or equivalent is a prerequisite. The course requires a solid background in multivariate statistics, basic spatial statistics and spatial regression analysis.

**SOC 2970. Preliminary Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**SOC 2980. Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**SOC 2981. Reading and Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**SOC 2982. Directed Research Practicum - MSAR Students Only.**

The Directed Research Practicum is a one semester course taken in conjunction with an on- or off-campus research internship. The course consists of a directed reading of methodological texts and research articles selected by the student and the faculty director that are directly relevant to the methodological issues/challenges encountered in the internship. The student and faculty director will meet weekly to review the readings. The practicum may include written assignments, literature reviews, and data analysis exercises. Faculty directors need not be involved with the actual internship work, unless the student is working on the faculty member's research project.

**SOC 2990. Dissertation Preparation.**

For Sociology PhD graduate students who have met the residency requirement and are continuing research on a full time basis.

**SOC XLIST. Courses of Interest to Students Concentrating in Sociology.**

## South Asian Studies

### Director of Undergraduate Studies

Sarah A. Besky

South Asian Studies is an interdisciplinary concentration in which students work across the humanities and social sciences, geographical locations, and time periods. The concentration emphasizes both the diversity of South Asia as a region, as well as the long-term historical connections among people and places in Pakistan, Nepal, Bhutan, India, Bangladesh, and Sri Lanka. The concentration takes a comparative approach, bringing attention to history, politics, and culture within the region, as well as in the equally vital global South Asian diaspora.

For additional information, please visit the department's website: <https://www.brown.edu/academics/south-asia/>

## South Asian Studies Concentration Requirements

The diversity and shared histories of South Asia's cultures, religions, languages, and nations are an important area of engagement in the world today. While India, Pakistan, Bangladesh, Sri Lanka, Nepal and neighboring nation-states constitute a recognizable geographic region, the equally vital diasporic communities from South Asia and their globally dispersed networks extend our understanding of an old and yet changing South Asia. South Asian Studies is an interdisciplinary concentration in which students work in a specified chronological period (e.g. ancient, medieval, early modern, or contemporary), in a geographical area (e.g. Bangladesh, Bengal, Maharashtra, North India, Pakistan, South India), or in a particular discipline (e.g. anthropology, Hindi/Urdu, history, religion, or Sanskrit) but also take courses outside of their chosen area of emphasis in disciplines such as economics, literature, philosophy, political science, or theatre arts.

### Course Requirements

All South Asian Studies concentrators must take and pass 10 courses as approved by their concentration advisor. Students who wish to earn honors must take 12 courses total (see Senior-Year Project below).

SAST 0700 or HIST 1620	Introduction to Modern South Asia Resisting Empire: Gandhi and the Making of Modern South Asia	1
---------------------------	---	---

#### Two courses in the Humanities with a majority focus in South Asia, such as:

CLAS 0995	India's Classical Performing Arts	2
CLAS 1140	Classical Philosophy of India	
COST 0034	Dharma: A History of Classical Indian Civilization	
RELS 1510	Islam in South Asia	
RELS 0036	Love and War in India	
RELS 0037	Sensing the Sacred: Sensory Culture in South Asian Religions	
RELS 0526	This Whole World is OM: Mantras in Indian Religions	
COST 0145	Karma, Rebirth and Liberation: Life and Death in South Asian Religions	
COST 0525	The History and Practice of Yoga in India and Beyond	

#### Two courses in the Social Sciences with a majority focus on South Asia, such as:

ANTH 0110	Anthropology and Global Social Problems: Environment, Development, and Governance	2
HIST 1979D	Ruined History: Visual and Material Culture in South Asia	
POLS 1280	Politics, Economy and Society in India	
SAST 0526	This Whole World is OM: Mantras in Indian Religions	
SAST 0525	The History and Practice of Yoga in India and Beyond	
SAST 0140	Food, Religion and Politics in South Asia	
SAST 0037	Sensing the Sacred: Sensory Culture in South Asian Religions	
SAST 0034	Dharma: A History of Classical Indian Civilization	

#### At least five additional elective courses. Students can take additional courses in the humanities or social sciences with a focus on South Asia, such as:

At least three of the five electives must be drawn from the CCSA pre-approved course listings (or be approved by the DUS/Concentration advisor). The courses on this pre-approved list have significant (at least 25%) South Asia content.

No more than two of the remaining electives can be courses with less empirical South Asia content, but these courses must have theoretical relevance to the study of South Asia (with the approval from the DUS).

ANTH 0100	Introduction to Cultural Anthropology
ANTH 2320	Ideology of Development
COST 0100	Introduction to Contemplative Studies
ECON 0510	Development and the International Economy
ECON 2510	Economic Development I
HIAA 0081	Architecture of the House Through Space and Time
HIST 1440	The Ottomans: Faith, Law, Empire
HNDI 0200	Beginning Hindi or Urdu
HNDI 0400	Intermediate Hindi-Urdu
HNDI 1080	Advanced Hindi-Urdu
MCM 1505O	Does Utopia Still Exist? Media, politics and the hope of something else
POLS 0200	Introduction to Comparative Politics
POLS 1380	Ethnic Politics and Conflict
RELS 0100	Buddhist Thought, Practice, and Society
SAST 1970	Independent Study
SANS 0200	Elementary Sanskrit II
SANS 0400	Classical Sanskrit Story Literature
SANS 1100	Vedic Sanskrit

Total Credits 10

### Language Requirements

Proficiency in a South Asian language is required for the concentration. Demonstrating proficiency can entail passing a written and oral examination, 4 semesters of formal language study at Brown or another institution, or a high school transcript indicating that the language of instruction for all courses was a South Asian language. Native Hindi/Urdu speakers are encouraged to fulfill the language requirement by taking another South Asian language for four semester, such as Sanskrit at Brown or a relevant language at another institution. Up to two language courses can count toward fulfilling the student's elective requirements.

### Senior-Year Project

Students must complete either a senior capstone project OR an honors thesis.

Capstone projects or honors theses are opportunities for students to creatively synthesize the thinking on South Asia that they have developed during the concentration. The project should exhibit an empirically and theoretically driven research question or argument about some aspect of South Asian Studies. The senior-year project should involve some research in at least one South Asian language.

All students are encouraged to start thinking about their capstones in their junior year.

**Capstones** can take two primary forms:

1. A research paper of approximately 30 pages on a topic related to South Asia for an existing concentration-eligible course, undertaken with the permission of the instructor.
2. An independent study-based project. The student produces and/or processes that constitutes this can be artistic, primary or secondary research-based, internship-related, or something else. The project must be supervised by at least one CCSA faculty member\* for at least one semester under SAST 1970. This course can count towards the five elective requirement.

At the end of the junior year, each student should meet with the Director of Undergraduate Study (DUS) to review their plan for completing their capstone. If pursuing a capstone project, students will be required to submit, by the end of the shopping period of the fall of their senior year, a short proposal (300 words) that describes how they are going to complete this requirement.

An **Honors Thesis** is a two-semester independent study supervised by a thesis advisor (SAST 1970). These two courses constitute the additional courses needed for honors in the concentration.

An honors thesis can be textual, or it can take other forms (multi-media, visual, artistic, or musical, for example). The form and substance of a non-textual honors thesis must conform to the rigorous regulations set out by the relevant department(s) and the Dean of the College.

#### Additional Honors Requirements

To be eligible for Honors, students will have earned an "A" in the majority of courses for the concentration.

Students may graduate with Honors in South Asian Studies by completing an undergraduate Honors thesis under the supervision of at least one reader drawn from the CCSA faculty\* and one additional reader from the Brown (or RISD, in the case of Brown-RISD students) faculty community.

In order to pursue Honors, students must submit the following materials to the CCSA DUS by April 25:

1. A prospectus (3-5 pages, describing the major research questions and methods to be used, complete with bibliography) that has been read and vetted by the student's intended primary reader.
2. An email from the faculty member who will serve as primary reader to the CCSA DUS noting their willingness to advise on the thesis.

In addition, students must:

1. Enroll in a two-semester sequence of Independent Study, SAST 1970 or under a relevant department course code
2. Designate a second reader by September 30 of the senior year. Second readers should also confirm their willingness to serve as a reader by sending an email to the CCSA DUS.
3. Be in regular contact with the thesis advisor about the progress of the project.
4. Present their research to the CCSA community during their final semester.

For **mid-year graduating students**, the topic and primary reader must be identified and confirmed by mid-November of the junior year, and a second reader must be arranged and confirmed by January 30 of the senior year.

A complete penultimate draft of the thesis is due to both readers on April 1.

A final draft that incorporates readers' comments is due back to the readers on April 15 of the student's senior year.

\* This includes all people listed under the Faculty, Postdoctoral Associate, and Visiting Scholars (limited to those in residence at Brown) tabs on the CCSA website.

## Courses

### SAST 0034. Dharma: A History of Classical Indian Civilization.

Dharma—a Sanskrit word encompassing duty, ethics, law, and religion—is a common thread running through the cultures of premodern India. This course offers a history of Indian civilization from its origins up through the end of the classical period. Drawing on a rich array of textual, material, and expressive cultures, we trace the arc of human history on the subcontinent, paying special attention to the intersections of religion and politics. The sources at hand reveal the dynamic interplay between tradition and innovation, and attest to human efforts to redefine what it means to live a life according to dharma.

### SAST 0037. Sensing the Sacred: Sensory Culture in South Asian Religions.

This course explores South Asian religions through the body, the senses, and aesthetics. Drawing on Hindu, Buddhist, and Jain traditions, and concentrating on embodied practices such as meditation, chanting, eating, sex, asceticism, ritual, possession, and performance, we will examine experiences of the sacred in India, past and present. How has sensory culture shaped lives, practices, and doctrines? What place do the senses have in South Asian traditions? Drawing on premodern law codes, erotic handbooks, and medical treatises; and integrating new media from ethnographic films to graphic novels, we will plunge into the rich sense-worlds of religions in South Asia.

### SAST 0140. Food, Religion and Politics in South Asia.

Why study food? What can food tell us about religion, politics, and culture? Food in South Asia often shapes identity, social status, ritual purity, religious belonging, and political activism—the notion that you are what you eat has wide currency. Whatever form it takes, food embodies histories of migration, trade, empire, colonialism, and ethics. Through reading primary texts and ethnographic articles, watching films, and (of course) eating delicious food, we will explore the rich foodways of South Asia and their social, religious, and political ramifications.

### SAST 0525. The History and Practice of Yoga in India and Beyond.

From its roots in premodern India to its current popularity worldwide, yoga has a rich and complex history. As a practice of the mind, body, and spirit, yoga has taken many forms—meditation, chanting, breath control, postures—in order to achieve a range of goals: liberation from rebirth, supernatural powers, strength, pleasure, peace, wellness. As its reputation and commodification have increased, yoga has attracted deep interest, debate, and even controversy. In this course we will study yoga from its earliest texts to its status in the modern world, addressing its historical, religious, social, and political ramifications in many different contexts.

### SAST 0526. This Whole World is OM: Mantras in Indian Religions.

A mantra is a syllable or formula used in ritual and meditation. Mantras are central to Indian religions—not only Hinduism, but also Jainism, Buddhism, Sufism, and Sikhism. Some mantras are made up of words and language—usually in Sanskrit—while others are sound fragments with no semantic meaning. The sacred syllable OM, now a global symbol of Eastern spirituality, exemplifies the power and authority of mantra. What are mantras? What do they accomplish? How do they shape identities, beliefs, and practices? Engaging with sacred utterance in various media, this course explores the world of mantras in India and beyond.

### SAST 0700. Introduction to Modern South Asia.

The seminar aims to introduce South Asia in terms of a plurality in ways of being. It shall study themes beginning with colonialism and ranging from the colonial mapping of tradition; anticolonial ethics; partition and the creation of a separate state; communalism; democracy; secularism; nationalism; welfare; and the global war on terror. The seminar will be an intensive reading and writing experience that transgresses academic disciplines. Writings include important tracts and speeches of intellectuals and thinkers of South Asia; writings of scholars and activists; and literary and artistic works. There are no prerequisites for taking this course.

### SAST 1970. Independent Study.

Section numbers vary by instructor. Please check CAB for the correct section number and CRN to use when registering for this course.

### SAST XLIST. Courses of Interest to Concentrators.

## Swearer Center for Public Service

The Swearer Center for Public Service is a community of scholars, students, practitioners, and community members that works together to build on community strengths and address community challenges. There are multiple opportunities available for students at the Swearer Center such as: providing direct service in schools and community organizations through Community Corps, funded fellowships for intensive and long-term engagement like the Bonner Community Fellowship, research-focused programs like the Royce Fellowship, or opportunities that allow students to engage away from Brown in places like Washington, D.C. or Tulsa, OK. Programs at the Swearer Center focus on partnership with communities

and are grounded in social justice and a commitment to working for systemic change.

In the summer of 2019, the Swearer Center moved to a new, larger location at 2 Stimson Avenue; it also has a satellite location at 339 Eddy Street in Providence's Jewelry District.

Some of the Swearer Center's signature programs include:

- **The Bonner Community Fellowship** is part of a national network of Bonner programs that aims to combine a student's community engagement with their academic and career goals. Bonner Community Fellows are committed to working in a sustained, intentional, and intensive way with a community partner that works to address issues in one of five focus areas: Education, Healthcare, Environment, Economic Justice and the Arts. Together with community partners, fellows strive to build socially just communities where people have the resources they need to reach their full potential.
- More than 600 Brown University students participate each year in the **Community Corps**. Students lead after-school enrichment, connect health resources to patients, engage with adult learners, provide one-on-one tutoring, assist classroom teachers, and support and advocate for people who are homeless. Strong, long-term relationships between the Swearer Center, Brown University students, and community partner organizations are an essential component of this program.
- **The Engaged Scholars Program (ESP)** enables students who are passionate about communities and the challenges they face to design courses of study and action as part of their concentration requirements. Through guided coursework, advising and hands-on experience working with community partners, students in ESP are able to contextualize abstract theories, challenge assumptions and develop skills that prepare them for lives of effective action. Students who complete the program receive an academic transcript notation as Engaged Scholars.
- **The Social Innovation Fellowship** provides meaningful community engagement and social innovation experiences for students. Focusing on local partnerships and social impacts through the lens of innovation, this two-year developmental program offers students the opportunity to explore modes of social innovation and the tools required for starting successful ventures or for making transformational changes within existing organizations. Additionally, students' work enhances the ability of nonprofit community organizations to use student talent effectively helping build organizational capacity while exploring ideas within the local social innovation ecosystem.

## A. Alfred Taubman Center for American Politics and Policy

### Director

Susan L. Moffitt

The A. Alfred Taubman Center for American Politics and Policy brings together scholars, practitioners, and students from different perspectives to address important problems facing American politics and policy. Since 1984, the Taubman Center has influenced local, national, and global policymakers working at the intersection of research and public engagement. The Taubman Center is one of several research centers within the Watson Institute for International and Public Affairs. Through their research and public engagement, Taubman Center Affiliates ([\[watson.brown.edu/taubman/people/affiliates\]\(http://watson.brown.edu/taubman/people/affiliates\)\) provide the intellectual foundation for the Center's work.](http://</a></p>
</div>
<div data-bbox=)

The Taubman Center's programming includes:

- Taubman Center public opinion polls (<http://watson.brown.edu/taubman/polls>);
- R (<http://watson.brown.edu/taubman/research>) research (<http://watson.brown.edu/taubman/research>) through workshops, conferences, and scholarship;
- Engagement with public leaders through a rich speakers series (<http://watson.brown.edu/taubman/events>);
- Internship and research funding for students (<http://watson.brown.edu/taubman/for-students>).

Visit the Taubman Center website (<http://watson.brown.edu/taubman>) to learn more.

## Theatre Arts and Performance Studies

### Chair

Patricia Ybarra

The Department of Theatre Arts and Performance Studies is the intellectual and artistic center at Brown for faculty and students interested in the aesthetic, historical, literary, practical and theoretical explorations of performance in global perspective – theatre, dance, speech, performance art, and performative “roles” in everyday life. The Department's distinguished faculty consists of leading scholars and artists who are at the forefront in researching and teaching new and innovative methodologies produced by the intersection of the study of craft and the study of history and theory.

Every season, the Department mounts both theatre and dance productions along with a multitude of special events. Students are active in every aspect of production - learning the rigors of craft through participation in production as well as through class work in acting and directing, dance, playwriting, movement, history, theory, design, technical theatre, intermedial performance, and performance ethnography.

For additional information, please visit the department's website: <http://www.brown.edu/academics/theatre-arts-performance-studies/>

## Theatre Arts and Performance Studies Concentration Requirements

The Department of Theatre Arts and Performance Studies (TAPS) is the intellectual and artistic center for the aesthetic, historical, literary, practical, and theoretical explorations of performance in global perspective – theatre, dance, speech, time-based art, and even performative “roles” in everyday life. The TAPS concentration offers three tracks with many points of overlap among them: Performance Studies, Theatre Arts, and Dance. Concentrators gain exposure to a broad spectrum of performance modes and methods -- acting, directing, dance, and writing, and chose an avenue of focus among them. In addition, TAPS concentrators with an interest in socially engaged performance that tackles complex social issues may pursue the Engaged Scholars Program (<https://www.brown.edu/academics/theatre-arts-performance-studies/undergraduate-program/engaged-scholars-program>). Everyone graduates having studied craft, gained familiarity with history, and investigated the role of performance arts in culture.

**Students who declared their concentration prior to fall 2019 can find their concentration requirements here:** <https://bulletin.brown.edu/archive/2018-19/the-college/concentrations/taps/>

### Theatre Arts Track

This concentration combines the study of dramatic literature, theatre history, performance theory, and studio work in the various theatre arts. All concentrators in Theatre Arts will gain practical experience through the study of acting and directing as well as in the technical production of plays, preparing students in the practical study of a cross-section of the vital

aspects of theatre craft, including one class in either dance or speech. An essential aim of the concentration track is the engagement of students in performance procedures (acting, dancing, directing, choreography, design, playwriting, dramaturgy, etc.) in order to experience the inter-relationships among social contexts, dramatic texts and theatrical enactments. Along with practical study in craft, concentrators will graduate having studied theatre history and performance theory in global perspective. The study of theatre history provides a Theatre Arts concentrator with the necessary background to understand a variety of dramatic and theatrical forms. The study of performance theory enhances a student's ability to ask fundamental questions about the role of theatre in social, political, cultural and cross-cultural arenas.

Students wishing to enroll as concentrators in Theatre Arts and Performance Studies and take the Theatre Arts track should see the undergraduate Theatre Arts track advisor, in order to discuss options that will best serve their interests.

TAPS 0700	Introduction to Theatre, Dance and Performance	1
One of the following:		1
TAPS 0220	Persuasive Communication	
TAPS 0230	Acting	
TAPS 0250	Introduction to Technical Theatre and Production	1
TAPS 1230	Global Theatre and Performance: Paleolithic to the Threshold of Modernity	1
TAPS 1240	Performance Historiography and Theatre History	1
TAPS 1250	Late Modern and Contemporary Theatre and Performance	1
Theatre Studies electives: 4 elective courses, one of which must be theory, history, or literature chosen in consultation with the advisor according to the area of interest (i.e., acting, direction, playwriting, design/technical theatre). Additionally, following consultation with the advisor, one of the electives may be taken outside the TAPS department.		4
Total Credits		10

## Performance Studies Track

The Performance Studies track in the Theatre Arts and Performance Studies concentration offers a base for students interested in a variety of performance forms, performance media, or in intermedial art. A concentrator in this track will study the multiple modes in which live performance articulates culture, negotiates difference, constructs identity, and transmits collective historical traditions and memories. Because Performance Studies is not primarily invested in one performance mode over another (such as theatre or dance), a concentrator will gain exposure to a broad spectrum of performance modes. Studying ritual, play, game, festival, spectacle and a broad spectrum of "performance behaviors" under the umbrella of Performance Studies, a concentrator will graduate having investigated the role of performance in culture, including performative acts in everyday life, political enactment, ritual behavior, aesthetic or representational practices, and social role or the performance of subjectivity. The history of aesthetic performance practices (such as the histories of theatre and/or dance) will be an important part of this track, serving to ground inquiry into the broader spectrum of performance study. Students will craft their electives on this track from a wide selection of courses both within the Department of Theatre Arts and Performance Studies and across the university. The study of performance behavior across mediums such as dance, theatre, ritual, and orature allows for geographic and historical flexibility as not all cultures parse theatre from dance, nor, historically, genres of religious or political ritual from genres of entertainment, play, or game. At least one of the ten required classes must show geographic or cultural breadth, and be approved as such by the undergraduate concentration advisor. Participation in practical classes in modes of performance is also required.

Students wishing to enroll as concentrators in Theatre Arts and Performance Studies and take the Performance Studies track should see

the undergraduate Performance Studies track advisor, in order to discuss options that will best serve their interests.

TAPS 0700	Introduction to Theatre, Dance and Performance	1
Three of the following courses:		3
TAPS 1230	Global Theatre and Performance: Paleolithic to the Threshold of Modernity	
TAPS 1240	Performance Historiography and Theatre History	
TAPS 1250	Late Modern and Contemporary Theatre and Performance	
TAPS 1280Y	Issues in Performance Studies	
Two primarily academic courses from within the Department with Performance Studies content to be selected with your advisor, such as (but not limited to):		2
TAPS 0210	Dancing the African Diaspora	
TAPS 0350	Black Performance Theory	
TAPS 1280N	New Theories for a Baroque Stage	
TAPS 1380	Mise en Scene	
TAPS 1425	Queer Performance	
TAPS 1630	Performativity and the Body: Staging Gender, Staging Race	
TAPS 1640	Theatre and Conquest in Greater Mexico: From Cortes to NAFTA	
TAPS 1690	Performance, Art, and Everyday Life	
TAPS 2120	Revolution as a Work of Art	
Two full-credit courses based in performance craft in either Dance, Acting, Directing, Playwriting, Speech, Design, Literary Arts, Visual Arts, Music, or Africana Studies approved by the concentration advisor.		2
Two additional courses in the academic study of performance and performance culture(s) from either within TAPS or throughout the University in consultation with the advisor.		2
Total Credits		10

## Dance Track

The Dance track of the Theatre Arts and Performance Studies concentration engages students in the study of dance, movement, and other forms of kinesthetic performance. Emphasizing dance technique, choreography/composition, and theories and histories of global forms of dance practice, concentrators in this track will study how multiple global dance forms articulate culture, negotiate difference, construct identity, and transmit collective historical traditions. Concentrators will receive instruction in composition and technique, and engage with dance, theatre, and performance production within the department to understand dance within a network of performance practices.

TAPS 0700	Introduction to Theatre, Dance and Performance	1
Critical Topics and Global Perspectives - three courses. Students should work with their advisor to ensure their courses offer theoretical and geographic breadth. Courses could include, for example:		3
TAPS 0210	Dancing the African Diaspora	
TAPS 1230	Global Theatre and Performance: Paleolithic to the Threshold of Modernity	
TAPS 1240	Performance Historiography and Theatre History	
TAPS 1250	Late Modern and Contemporary Theatre and Performance	
TAPS 1281W	Artists and Scientists as Partners	
TAPS 1281Q	Introduction to Critical Dance Studies	
TAPS 1330	Dance History: The 20th Century	
TAPS 1425	Queer Performance	

TAPS 1630	Performativity and the Body: Staging Gender, Staging Race	
MUSC 1971	Digital Media and Virtual Performance	
Techniques of the Body - two courses selected in consultation with an advisor, such as the following:		2
TAPS 0310	Beginning Modern Dance	
TAPS 0330	Mande Dance, Music and Culture	
TAPS 0930C	The Actor's Instrument: Stage Movement for Actors and Directors	
TAPS 1000	Intermediate Dance	
TAPS 1310	Advanced Modern Dance	
TAPS 1340	Dance Styles	
TAPS 1341	Introduction to Ballet	
Directing/Compositional Strategies - two courses selected in consultation with an advisor from courses such as the following:		2
TAPS 0320	Dance Composition	
TAPS 0360	Viewpoints Technique: The Moving Body in Relation to Time, Space, and Ensemble	
TAPS 1281E	Directing Theory and Practice	
TAPS 1320	Choreography	
TAPS 1350 & TAPS 1360	Dance Performance and Repertory and Dance Performance and Repertory	
TAPS 1370	New Works/World Traditions	
Design or Production - one course selected in consultation with an advisor from the following:		1
TAPS 0250	Introduction to Technical Theatre and Production	
TAPS 0260	Stage Lighting	
TAPS 1100	Stage Management	
TAPS 1280F	Introduction to Set Design	
TAPS 1281A	Director/Designer Collaborative Studio	
TAPS 1281M	Introduction to Costume Construction	
TAPS 1300	Advanced Set Design	
One additional TAPS elective		1
Total Credits		10

## For all concentrators, regardless of track:

In cases where dual concentrations are declared, the Department allows two courses to be counted toward both concentrations.

## Capstone

Each student will complete a capstone project by the second semester of the senior year. The purpose of this capstone is to synthesize the core tenets of theory and practice in our concentration learning objectives and to reflect on that synthesis. The following projects, completed in semesters 6, 7, and 8, qualify as a capstone:

- A senior slot production and a 5-page capstone reflection
- An honors thesis
- An engaged scholarship project and a 5-page capstone reflection
- Extension of an existing curricular, co-curricular, or extra-curricular project from the junior year or first semester senior year and a 5-page capstone reflection.
- Revision or expansion of an existing final paper from any prior class and a 5-page capstone reflection.
- Major participation in a non-departmental campus production, performance or academic event (i.e., student produced work at PW, etc., an event at the Granoff, etc.) and a 5-page capstone reflection
- The 5-page reflection will contain the following:
  - a brief description of the project completed, including details about who, when, and where the project took place (i.e., which class the paper was originally written for, where the show was produced, how you revised the paper, directed the production, etc.)
  - an examination of how you used knowledge acquired in the concentration conceptualize, do, and complete the project with a

frank assessment of the project's success or ways in which it could have been improved. What new skills and research methods were gained and how will they be incorporated into your artistry.

- The DUS will assess the paper, approving it if all of the criteria above are met. While this is not a formal research paper, the reflection will be assessed for clarity, honesty and depth of self-reflection, and reflection on your experience of the TAPS curriculum.

## Honors

The standard pattern above, plus an honors thesis course taken in Semester VII (TAPS 1990), the topic of which would be determined before Semester VII. Candidates for the honors program should have an outstanding academic record and must apply to the Department by April 1 of Semester VI. Proposals can be submitted electronically. Honors are awarded for theses in all concentration tracks. All theses are substantive pieces of writing. Some these are strictly academic. Other honors theses may include a creative component (such as the directing of a play, a solo performance piece, the study and performance of a major role, or the design of a production) but the thesis itself will be a critical, written work based in research relative to that artwork. For plays submitted for honors, the essay should accompany the play, reporting on the research and the process of writing, though the play itself counts as the substantive written work. See the Honors Advisor for more information about proposal and thesis guidelines.

## Theatre Arts and Performance Studies Graduate Program

The Department of Theatre Arts and Performance Studies offers the following graduate programs:

- **Doctor of Philosophy (Ph.D.) in Theatre Arts and Performance Studies.**

For more information on admission and program requirements, please visit the following website: <http://www.brown.edu/academics/gradschool/programs/theatre-arts-and-performance-studies>

- **Master of Fine Arts (M.F.A) in Playwriting.**

For more information on admission and program requirements, please visit the following website: <http://www.brown.edu/academics/gradschool/programs/theatre-arts-and-performance-studies-0>

## Required MFA Playwriting Courses:

The MFA Playwriting Program will consist of a minimum of 14 courses that include:

- Six (6) semesters of Graduate Playwriting Workshop (TAPS 2310)
- One (1) course in dramaturgy (TAPS 1600)
- Two (2) semesters of Thesis Preparation in the third year of the program (TAPS 2975)
- Five (5) elective courses from throughout the university, including Brown/Trinity courses where appropriate, of which one (1) should be a theory or history course in TAPS or cross-listed in TAPS at the 1000 or 2000 level.

Note: Up to two (2) independent studies may be used toward the total of elective courses. An independent study cannot be used to substitute for the TAPS Theory/History course listed above.

### First Year

FALL		
TAPS 2310	Graduate Playwriting	1
TAPS 1600	Dramaturgy	1
Elective		1
SPRING		
TAPS 2310	Graduate Playwriting	1
Elective		1
Elective		1

### Second Year

FALL		
TAPS 2310	Graduate Playwriting	1
Elective		1
SPRING		
TAPS 2310	Graduate Playwriting	1
Elective		1
<b>Third Year</b>		
FALL		
TAPS 2310	Graduate Playwriting	1
TAPS 2975	Thesis Workshop	1
SPRING		
TAPS 2310	Graduate Playwriting	1
TAPS 2975	Thesis Workshop	1
Total Credits		14

• **Master of Fine Arts (M.F.A.) in Acting or Directing through the Brown University/Trinity Rep MFA Program.**

For more information on admission and program requirements, please visit the following website: <http://www.brown.edu/academics/gradschool/programs/theatre-browntrinity-rep-acting-directing>

### Required Courses for MFA Actors:

<b>First Year</b>		
FALL		
TAPS 2505	Fundamentals of Acting: Modern and Contemporary Realism	1
TAPS 2515	Acting Technique: Fundamentals of Physical Awareness	1
TAPS 2535	Directing 1: Fundamentals in Analysis and Action for Brown/Trinity MFA Actors and Directors	1
TAPS 2545	Dramaturgy	1
SPRING		
TAPS 2555	Advanced Acting: Modern and Contemporary Realism	1
TAPS 2565	Acting Technique II: Strength, Expansion and Articulation	1
TAPS 2575	Theatre History in a Changing Present	1
TAPS 2585	Directing II: Collaborative Communication	1
<b>Second Year</b>		
FALL

TAPS 2770	Directing: Practical Application	2
Elective		
TAPS 2975	Thesis Workshop	1
Total Credits		22

### Courses

#### Theatre Arts and Performance Studies

##### TAPS 0030. Introduction to Acting and Directing.

Explores basic acting/directing concepts from a variety of perspectives including the use of the actor's imagination/impulsivity in the creation of truthful, dramatic performance; the body, as a way of knowing and communicating knowledge; and the voice, as a means of discovering and revealing emotion/thought. There is a mandatory tech requirement and some evening hours are required. Please go to the TAPS website for specifics on admission and the technical requirement (<http://brown.edu/go/TAPS0030>). Enrollment limited to 18 first year students. Instructor permission required. No permission will be given during pre-registration.

**TAPS 0080. Asian American Theatre and Performance in Transnational Contexts.**

From the founding of the East West Players in San Francisco in 1965 to Toronto's now thriving Fu-Gen Theatre, formed in 2002, embodied performance has long played a central role in the formation of an Asian diasporic identity, movement, and politics in the Americas. This intro-level course explores the history and development of Asian American theatre and performance. Through a variety of critical, historical, and aesthetic texts (theatre, literature, contemporary art) we will consider encounters and exchanges in Asian American and Asian Canadian theatre and performance histories as one way to critically engage the "transnational" within Asian American Studies.

**TAPS 0080A. Feminist Aesthetics and Performance Philosophy.**

A theoretical and practical investigation of art and performance from feminist and performance philosophical perspectives, focusing on the topics of perception, experience, thinking, embodiment, and the practice of everyday life. The course will introduce students to theories and methods from feminist aesthetics and the emerging field of performance philosophy. We will study feminist critiques of aesthetic categories (Battersby, Cixous, Grosz, Korsmeyer, Piper, Scheman, Ziarek) and feminist practices of art and performance. We will combine our theoretical work with practical explorations in the studio. No prior experience with art or performance-making required.

**TAPS 0085. Uncomfortable Media (MCM 0901H).**

Interested students must register for MCM 0901H.

**TAPS 0100. Playwriting I.**

A workshop for students who have little or no previous experience in writing plays. Students will be introduced to a variety of technical and imaginative considerations through exercises, readings and discussions. Course is not open to those who have taken Advanced Playwriting (TAPS 1500, formerly LITR 1010C and TSDA 1500). Enrollment is limited to 14 undergraduates per section. A limited number of spaces are reserved for incoming and transfer students. Instructor permission required. S/NC.

**TAPS 0110E. Screenwriting I (LITR 0110E).**

Interested students must register for LITR 0110E.

**TAPS 0150. Screenwriting I (LITR 0110E).**

Interested students must register for LITR 0110E.

**TAPS 0200. Playwriting II - Role Play.**

In this intermediate course, we will focus on bolstering our writerly voices while defining ongoing artistic practices. In this hybrid workshop and seminar, we will work toward writing one-act plays of our own, while investigating other writer's worlds. In the plays we will encounter this semester, characters engage in some form of role play. We end up asking: what does it mean to play? How does a play play? Through this study, we will ask what it means for characters to be active, how to write plot as an offering of contrasts and tensions, and where exactly character is composed. S/NC.

**TAPS 0210. Dancing the African Diaspora.**

This seminar/studio course introduces students to theories, debates, and critical frameworks in African Diaspora Dance Studies. It asks: What role does dance play throughout the African diaspora? What makes a dance 'black'? How do conceptualizations of gender and sexuality inform our reading of dancing bodies? Using African diaspora, critical dance, performance, and black feminist frameworks, we will examine the history, politics, and aesthetics of "black dance".

**TAPS 0220. Persuasive Communication.**

Provides an introduction to public speaking, and helps students develop confidence in public speaking through the presentation of persuasive speeches. Primarily for seniors. Limited to 18. Instructor's permission required. No permission will be given during pre-registration; interested students should sign up well in advance on the TAPS 0220 waitlist (application form is at <http://brown.edu/go/TAPS0220>) and attend the first day of class. Attendance is mandatory. The application/waitlist process does not apply to students registering for the Summer term through the School of Professional Studies.

**TAPS 0230. Acting.**

Focus on elements of dramatic analysis and interpretation as applied to the art of acting, and, by extension, directing. Monologues, scene study, and improvisation are basis for comment on individual problems. Reading of dramatic texts and theory. Substantial scene rehearsal commitment necessary. Attendance mandatory. Not open to first-year students. Enrollment limited to 20. Instructor permission required. No permission will be given during pre-registration. S/NC

**TAPS 0240. Africana Feminisms.**

Beginning with the institution of slavery and carrying on to the present day, we will examine the field of Black Feminist Thought—or, the political, social, and economic forces that shape black American women's lives. We will ask: How do black women's lives, labor, and cultural productions lay bare the limits of maleness and whiteness as dominant frames? Why and how do black women matter to us all? Together, we'll ride the three waves of black feminism to explore the ways black women's cultural production has been consequential to notions of citizenship, liberation, and culture.

**TAPS 0250. Introduction to Technical Theatre and Production.**

This course is an introduction to the basic principles of stagecraft, lighting and sound technology and the different elements of theatrical design. Instructor permission required. Enrollment limited to 15.

**TAPS 0260. Stage Lighting.**

This course is an introduction to stage lighting. Enrollment limited to 20.

**TAPS 0310. Beginning Modern Dance.**

Introduction to the art of movement. Focuses on building a common vocabulary based on ballet, vernacular forms, improvisation, Laban movement analysis, American modern dance, and the body therapies. Individual work is explored. One and one-half hours of class, four days a week. Enrollment limited to 40. S/NC.

**TAPS 0310E. Shakespeare: The Screenplays (ENGL 0310E).**

Interested students must register for ENGL 0310E.

**TAPS 0320. Dance Composition.**

Focuses on building the individual's creative voice. A movement vocabulary is developed from Western techniques (ballet, American modern dance, Laban/Bartenieff movement analysis, vernacular forms, space-harmony/movement physics, and the body therapies) along with group improvisations and collaboration with artists in other disciplines. Enrollment limited to 40. S/NC.

**TAPS 0330. Mande Dance, Music and Culture.**

Mande, Dance, Music and Culture explores three distinct life-cycle and celebratory dances from the Bambara, Malinke, Wasalu, and Khassonke peoples of Mali, West Africa. Each dance is taught in relationship to relevant oral histories, folklore and contemporary expressions. Emphasis is placed upon building a mindful community of committed thinkers and doers. Attendance at the first class is required. There is an application process for enrollment. Enrollment limited to 100. S/NC

**TAPS 0350. Black Performance Theory.**

This interdisciplinary, reading/writing-intensive course examines the notion of blackness through theorizations of performance. It pursues the following questions: What is black authenticity? What are the rubrics with which 'authentic' blackness is measured? How is black performance political? Discussions and written work will interrogate the slipperiness of, desire for, and policing of blackness in order to trouble conceptions of race as a biological essence.

**TAPS 0360. Viewpoints Technique: The Moving Body in Relation to Time, Space, and Ensemble.**

This course delves deeply into the Viewpoints as directors Anne Bogart and Tina Landau have adapted and defined them for training performers and generating composition. Viewpoints Technique systematically breaks down elements of time and space, providing a precise language for makers to communicate about dynamic staging and offering performing artists the tools to direct themselves more successfully from within composition. An indispensable practice for ensemble awareness, Viewpoints Technique invites us to break down the binary of the dance artist and theatre artist. All performers can benefit from this rigorous investigation of time and space and the pursuit of cohesive ensemble.

**TAPS 0510. Introduction to Shakespeare (ENGL 0310A).**

Interested students must register for ENGL 0310A.

**TAPS 0700. Introduction to Theatre, Dance and Performance.**

An introduction to the breadth of topics covered in the TAPS Department, this class is a gateway to the concentration open to all students interested in live arts. We will explore how, where, and why theatre, dance and performance are made and investigate their relationship to broader culture and society. Students will learn basics: how to read a play, how to appreciate dance, and how to approach the variety of venues, histories, and methods involved in production. Overlaps with other media will be explored. Visits from TAPS faculty will dovetail with the season of offerings on the TAPS main stage.

**TAPS 0800D. Asian/American Performance and Aesthetics.**

This course examines performances in and of the Asias, paying special attention to gendered and racialized constructions of Asias and Asians in the popular imagination. Working at the intersections of Asian/American Studies and Performance Studies, this course considers the ways in which Asianness emerges from performance along the multiple axes of race, gender, sexuality and class. In analyzing a broad spectrum of aesthetic practices, including theatre, film, music and performance art, we will explore what Asianness means within the gendered and racialized circuitry of global exchanges of commodities, labors, bodies, affects, and discourses.

**TAPS 0800E. Performance and Law: Staging Sovereignty in the Courtroom and the Theater.**

In this course we explore the relationship between law and performance, and investigate the political stakes of doing so across various historical moments. From scripted proclamations of sovereignty during scenes of conquest to witness testimony in the infamous witch trials, legal processes often seem to rely on spectacle, drama, choreography, scripting—i.e., features associated with theatrical performances. Through case studies we learn to interpret legal events as performances and vice versa (staged performances as legal events). Can a work of theater or dance legislate? Adjudicate? Restore justice? Reading intensive and interdisciplinary course. Students across arts and social science backgrounds welcome.

**TAPS 0800F. Performance and the Crisis of Scientific Reality.**

Trust is a constant public problem. We are bombarded by competing versions of reality. A century ago, a 'crisis of reality' emerged after the breakdown of positivist science. Enduring truths gave way to contingent particulars in modern life. This course investigates how the experiments of artists and scientists contributed to the philosophical re-shaping of 'reality' as something not only historically made, but also performed. By mingling key texts from the philosophy of science with complementary texts and media from aesthetics and performance, this course focuses on the way that reality has been re-staged across overlapping domains of art and science.

**TAPS 0810. Performing Italy - Body, Voice and Politics: A Journey within Italian Theatre.**

How does performance comment on, interact with, and influence society? And to what extent is this question culturally specific? Performing Italy focuses on Nobel-prize-winner Dario Fo, Franca Rame, Commedia dell'Arte, and Teatro di Narrazione. Engaging with theatrical materials, we will conduct comparative work driven by the students' own experiences and explore how Italian theater intervened in historical and political discourses within Italian society between the 1960s and the 2000s. Topics will include: the years of lead (1970s terrorism); the influence of the Catholic church on Italian society; the Italian State and organized crime; gender and sexuality in modern Italian society.

**TAPS 0901N. Body/Gesture/Cinema (MCM 0901N).**

Interested students must register for MCM 0901N.

**TAPS 0901Q. Governing Sex: Citizenship, Violence, Media (MCM 0901Q).**

Interested students must register for MCM 0901Q.

**TAPS 0901S. Mediating Reproduction: Feminism, Art, Activism (MCM 0901S).**

Interested students must register for MCM 0901S.

**TAPS 0930A. The Actor's Instrument: Voice and Speech.**

A complete and well-seasoned actor has the ability to perform with specificity and ease, both vocally and physically. Specificity comes from an integration of speech and movement technique. Ease is only possible when a mastery of technical skills reaches the point where the actor can integrate them without loss of spontaneity. The goal of this class is to give the student the fundamental techniques of voice and speech in relation to the body. Prerequisite: TAPS 0230. Enrollment limited to 16. Instructor permission required. S/NC.

Prerequisite does not apply to students registering for the Summer term through the Office of Continuing Education.

**TAPS 0930B. The Actor's Instrument: Improvisation.**

This course is designed to help students explore the development of relationships in theatrical space without the benefit (or confinement) of a script. By cultivating and developing basic performance skills including spontaneity, self-awareness, creative use of the body and mind, access to the imagination, and collaborativity, this course has applications for actors and other performers interested in all types of performance as well as those interested in improvised performance specifically.

One of the intentions of this course is to generate truthful, creative, and collaborative play, which can lead naturally to material that is funny or humorous as an organic outcome of the moment. However, "comedy" or "improv comedy," which has a different set of intentions altogether, will be strongly discouraged in this course. "Getting laughs," as a goal in and of itself, manufactures unproductive pressure to "be clever" or to "succeed" in ways that are inconsistent with truly creative engagement.

**TAPS 0930C. The Actor's Instrument: Stage Movement for Actors and Directors.**

Students engage in a process of exploration that centers on the physical relationship of the actor to the physical reality of live performance on stage. The class is structured as a survey introduction to a variety of methods and targets beginning movers with a range of interests and performance applications. Students investigate a broad spectrum of contemporary, classic and non-western movement theories/approaches to better enhance the ability to be 3-dimensionally present in time and space and to develop skills in the art of non-textually based storytelling and performance.

**TAPS 0930E. The Actor's Instrument: Clown.**

Derived from the teachings of Jacques Lecoq and Philippe Gaulier, this course is physically-based, improvisational, loud and messy. Emphasis is on organic and intuitive response, timing and rhythms inherent in comedy, non-verbal expression, the relationship of the Actor to the Audience, and Play! Enrollment limited to 20. S/NC

**TAPS 0930F. Explorations in Clown and Physical Play.**

Participating in this course, you will learn how to value and share your own unique ridiculousness by transforming mistakes into opportunities and limitations into creative expression. Based in physical exploration and improvisation, this work will implore you to recognize your relationship to fear, expand your sense of humor, connect to an audience, and play with abandon. Inspired by various kinds of clowns throughout history, you will begin to create your own vocabulary of play that will organically accumulate into solo and group performance pieces.

**TAPS 0971. Digital Art (MCM0750).**

Interested students must register for MCM 0750.

**TAPS 0980. Black Lavender: Black Gay/Lesbian Plays/Dramatic Constructions in the American Theatre (AFRI 0990).**

Interested students must register for AFRI 0990.

**TAPS 1000. Intermediate Dance.**

This is an intermediate-level modern dance class that extends and expands movement coursework for students who have taken TAPS 0310 or equivalent dance study. It is intended to challenge students' memory, capacity for rhythmic complexity, and improvisational competence, as well as foster a professional work ethic that can withstand abundant physical, emotional and organizational challenges.

**TAPS 1000A. The Arts Workshop for Practice and Practice-Oriented Research (LITR 1000).**

Interested students must register for LITR 1000.

**TAPS 1010. Performing Brazil: Language, Theater, Culture (POBS 1080).**

Interested students must register for POBS 1080.

**TAPS 1050E. RPM Playwriting (AFRI 1050E).**

Interested students must register for AFRI 1050E.

**TAPS 1080. Performing Brazil: Language, Theater, Culture (POBS 1080).**

Interested students must register for POBS 1080.

**TAPS 1100. Stage Management.**

To introduce students to the principles and techniques of modern stage management from script selection to closing. Through the study of various models of stage management (both professional and academic), students will develop an appreciation of the role of the stage manager as the facilitator, mediator and organizer of the production process. Students will apply theory learned in the classroom by stage-managing or assistant stage-managing a TAPS production and/or observing other TAPS and Trinity Rep stage managers during the production process. Enrollment limited to 12.

**TAPS 1110. Voices Beneath the Veil (AFRI 1110).**

Interested students must register for AFRI 1110.

**TAPS 1160. Style and Performance.**

For qualified sophomores, juniors, and seniors who offer TAPS 0230 as a prerequisite. Period scene study and monologues are basis for comment on individual progress in acting/directing. Extensive reading of dramatic texts and historic research materials. Work in voice, movement, and poetic text. Substantial commitment necessary for preparation of class scenes. Attendance mandatory. Prerequisite: TAPS 0230. Limited to 20. Instructor's permission required. No permissions will be given during pre-registration.

**TAPS 1170. Acting Methods for Period Texts.**

This course explores and hones the actor's craft of performing dramatic texts from various periods across theatre history.

**TAPS 1210. Solo Performance.**

An exploration of the challenges and rewards of performing solo. Students research, write, and perform a one-person show. Other projects may include performance art, stand-up comedy, and monologuing. Substantial time commitment. Attendance mandatory. For advanced students with appropriate background and experience. Submit proposal and resume in the fall. For guidelines and information contact [taps@brown.edu](mailto:taps@brown.edu). Permission required in advance. Enrollment limited to 20.

**TAPS 1230. Global Theatre and Performance: Paleolithic to the Threshold of Modernity.**

This course explores performance practices that predate the European Renaissance across disparate parts of the globe. Considered will be Paleolithic rock art and other evidence of ritual practices in Europe, Africa, and the Americas; ritual dramas of Egypt, Greece, and the Roman Empire; Sub-Saharan African traditions and theatre/dance forms in ancient India, medieval Japan and the indigenous Americas. In short, we will explore a wealth of differing ancestral theatrical modes and methods that continue to leave their mark in contemporary diasporic expressions.

**TAPS 1240. Performance Historiography and Theatre History.**

This course will provide an introduction to performance history and historiography by concentrating on analysis of dramatic texts, theatrical events, festival performances and "performative" state and religious ceremonies from 1500-1850. We will explore incidents in Asia, the Americas and Europe as related to state consolidation, colonization, incipient nationalism(s), urbanization, cultural negotiation, and the representational practices the enacted. Enrollment limited to 35.

**TAPS 1250. Late Modern and Contemporary Theatre and Performance.**

This class provides introduction to an array of theatre and performance forms of 20th- and 21st-century Europe and North America. We explore historical realism and naturalism to symbolism, the birth of avant-garde, constructivism, dada and surrealism, and myriad other modernist isms. After Stein, Artaud, and Brecht, we jump to Americas and indigenous theatre, the Harlem Renaissance, site specific art, and innovative companies and practitioners from Maria Irene Fornes to the Wooster Group, Augusto Boal and more. We study playwrights, directors, actors, dancers, designers, and performance artists. The focus is on "experimental" forms, recalling that even naturalism, in its day, was "revolutionary."

**TAPS 1251A. Making the 21st Century Musical.**

Songs are a powerful dramatic storytelling tool - we see them used all the time in media, alongside scripted dialogue and visual elements. In this class we will explore contemporary musicals, in all forms, and we will create songs that tell stories. Together we will investigate how dramatic songs are made, what they can be about, and who are our audiences. We will pay special attention to perspectives that have been left out of past musical storytelling, and we will discover ways that our songs can advocate for justice in the 21st century and beyond. Instructor permission required. Interested students should fill out the following questionnaire (LINK: <https://forms.gle/7gSamdrFZVuMNPu9>) and must attend the first class.

**TAPS 1260. Food as/in Performance.**

A theater maker has a rare relationship with an audience. It is a relationship that holds the opportunity to engage the five senses (six, if you count the heart). With this thought, let us consider the theatricality of food. How are theater makers creating conversation and experience using language, memory, touch, taste, and smell to shape dramatic action or tell story? Students will prepare "theatrical food experiences" that provide opportunities to write and perform texts.

**TAPS 1270. Masking, Trancing, Performing, and Spectating in Non-Western and Circumpacific Performance.**

An inquiry into specific traditions of performance - ritual, traditional theatre, contemporary theatre, and performed behavior in more or less day-to-day life - that exist or have existed in various (mostly) Asian settings and have been studied and documented by scholars, film-makers, and theatre artists. The emphasis will be on traditions that use masks as means of transforming the identity of the performer and of the world presented in performance. No prior experience in theatrical performance or in the study of Asia or anthropology is assumed.

**TAPS 1280B. The Creative Ensemble.**

Develops skills in acting, improvisation, directing, teaching, and writing. Through research, performance and collaboration, participants explore individual/group talents and creative passions. Ensemble-created final performance project. Prerequisite: TAPS 0230 or equivalent.

**TAPS 1280C. Stage Lighting II.**

This class is a continuation of Stage Lighting. The major portion of this class is to give the student opportunity to create an actual design on stage for the Theatre Arts & Performance Studies (TAPS). Each individual student's main project will be to create a light design and be part of the production team of a Sock and Buskin produced show. The class will be an open forum for students to share ideas about their perspective designs. The class is also set up for the continuation of expanding their Vectorworks Spotlight and Lightwright skills, as well as light console programming.

**TAPS 1280D. Perception/The Performativity of Neurology.**

Time-based art and "theater" more specifically is a perfect manipulator of experience. Many creators of time-based art look for the "universal." In this course we will explore the science behind what we all have in common beyond shared-experience: brains. What happens in the minds of all truly happens. How can we use art to make our brains experience the same things? And what experiences can we curate for our brains based on science? Show don't tell. How can art take place in the room in front of us? How do we experience a performance rather than just "watch" it.

**TAPS 1280F. Introduction to Set Design.**

Students will explore set/scenic design for live performance in a studio format. The main objective is to introduce the language, tools, and technical skills involved in the discipline of scenic design and to lay the foundation for further study while empowering students to actively engage as set designers in productions on campus after taking the course. A special feature of the course are guest visits which will give students the opportunity to engage in dialogue with a professional director and playwright in order to situate set design as a conceptual artistic discipline which utilizes technical tools. Enrollment limited to 10.

**TAPS 1280L. Modern American Drama.**

Modern American Drama is a broad overview of the field, from O'Neill through Kushner and Parks. Particular attention will be paid to the theatrical, social and performance context of the plays under study, although the plays themselves will be the only assigned texts.

**TAPS 1280N. New Theories for a Baroque Stage.**

This course re-conceptualizes and re-models seventeenth-century "baroque" theatricality through the lenses of Russian formalist theory, phenomenology, (post-)surrealist literature and objects, Oulipian literature of constraints, Deleuzian theory, ontological-hysteric theatre, film, etc.

**TAPS 1280Q. Hybrid Art (VISA 1800L).**

Interested students must register for VISA 1800L.

**TAPS 1280S. Libretto Workshop for Musical Theatre.**

This class is not only for the aspiring librettist but for any student desiring insight into the craft of book writing for musical theater. The course will cover the basics of storytelling (plot, character development conflict, etc.) but specifically in terms of the musical. It will also detail the fundamentals of lyric writing, musical narrative and basic composition. We will examine three libretti (SWEENEY TODD: the classic horror, LITTLE SHOP of HORRORS, the modern sci-fi and RENT, the contemporary adaptation). There will be lectures, group discussions, talks with guest professionals, and analysis of student assignments. Enrollment limited to 15 sophomores, juniors, and seniors.

**TAPS 1280V. Theatre and Conquest in the Americas, from Cortes to NAFTA.**

Explores the intimate relationship between theatre and conquest in the Americas as contained in missionary accounts, plays, performances and visual art from Cortés arrival to the present. Students will analyze plays and performances that stage the Spanish Conquest, consider the theatrical procedures of the conquest and examine theatrical representation as a methodology of conquest in the Americas.

**TAPS 1280Y. Issues in Performance Studies.**

Explores myriad ways of thinking, doing and talking about performance in the broad spectrum -- from social media to theatre, dance, film, and everyday life including identifications and disidentifications of gender, race, sex, and class. We may study museum installations, surgery, tourism, carnival, history reenactments, performance-based art, sports, and even dinner parties among other actions and sites. The objective is not to pin down a genre or category of performance but to understand performance variously as an analytic and practice, a form of lived history and way of being, including but not limited to traditional theater and dance practices.

**TAPS 1281A. Director/Designer Collaborative Studio.**

Students will explore the relationship between director and designer within the production process. The main objective is to improve collaboration and production output by learning the language, tools, and skills involved in each area of discipline so as to enhance creative output. Enrollment limited to 17 students.

**TAPS 1281C. Memory Plays: Theatricality and Time.**

This course will read philosophy and critical theory about memory and time beside dramatic works and performance art that take up the topic of history, repetition, and temporality in live art. Readings will be selected from Sophocles, Aristotle, Shakespeare, Noh, Freud, Benjamin, Bergson, Brecht, Muller, Stein, Duras, Homi Bhabha, Paula Vogel, Suzan-Lori Parks, W. G. Sebald, Gilles Deleuze, Thomas King, Philip Deloria, Coco Fusco, Diana Taylor, Charles Ludlam, Tching Hsieh, Wooster Group, Spiderwoman Theatre, *Ubu and the Truth Commission*, Errol Morris, Robin Soans, and Erik Ehn to ask about time, memory, history, act, *Mneme*, *anamnesis*, recognition, and "reconciliation."

**TAPS 1281D. Place-Based Dance and Performance.**

How can movement practices excavate buried histories and ignored rhythms to invite new understandings of place? In this hybrid studio-seminar course, we will develop critical and creative tools for making public performances that engage local sites through the body. Students will encounter site-specific techniques drawn from dance, performance art, and sculpture, as well as interdisciplinary decolonizing methods for doing place-based research. The class culminates in collaborative performance projects based on extensive research with a local site. This course is open to all who are interested in developing embodied methods of engaging with place and the public.

**TAPS 1281E. Directing Theory and Practice.**

Directing Theory and Practice is a hybrid academic and studio class designed to introduce students to the history, theory, and practice of the director's craft. Readings on the theoretical/practical methods of direction are examined closely in class discussions and directing projects. All students must serve as actors and directors throughout.

**TAPS 1281G. Queer Dance.**

In this course we will study the intersections of dance studies and queer studies, in an inquiry into the emerging field of Queer Dance. What does dance do for queer studies? How does queer studies further dance studies? What constitutes dance as queer? Students will study, observe, examine, discuss, and at times participate in queer dance from a range of historical and global perspectives. Course readings are drawn from dance studies, critical race studies, gender and sexuality studies, and performance studies. Readings are complemented by screenings, movement exercises, and live performance. No prior dance or performance experience is necessary.

**TAPS 1281H. Collaborations in Performance: Theory and Practice Moving Together.**

This is a hybrid theory and practice course, where students will study and experiment with contemporary collaborative practices. We will investigate collaborations between people, disciplines, theories, practices, spaces, places, mediums, cultures, and institutions. Our readings and theoretical inquiries draw primarily from texts about dance-focused U.S. contemporary performance. Readings will serve as case studies for a series of collaborative projects and experiments. This course will culminate in a final paper and final performance study. Makers and collaborators of all disciplines are welcome. A curious, generous, and open approach to working with others is required. No prior dance or performance experience is necessary.

**TAPS 1281M. Introduction to Costume Construction.**

An introduction to the study and practice of core costume construction skills. Topics include basic machine, hand sewing and patterning techniques. Instructor overrides will not be provided until the start of class.

**TAPS 1281O. Acting Outside the Box: Race, Class, Gender and Sexuality in Performance.**

Examines the relationship between social and cultural identities and their representations in dramatic literature and performance. Students will be expected to read critical essays and plays, conduct research, and prepare to act in scenes that challenge the actor to confront the specifics of character and situation beyond the Eurocentric ideal. The goal is to strengthen the actor's ability to construct truly meaningful characters by removing any reliance of "type" and/or immediate "identification" with the characters they will portray. Open to Any Brown/RISD graduate/undergraduate student that has taken TAPS 0230/Acting or the equivalent. Students should be aware that this is a hybrid Research and Performance class which may be counted as either a Performance Studies/Theatre Arts course for credit. Instructor Permission is Required. Interested students should attend the first class meeting in order to apply.

**TAPS 1281Q. Introduction to Critical Dance Studies.**

Critical dance studies centers dancing bodies as integral to various social, cultural, and political identity-making practices. In this course students will study, observe, examine, discuss, and at times participate in popular, classical, and social dance forms from a range of historical and global perspectives. Our driving inquiries include: How does dance travel and transform through time and space? How does dance produce identities? How does dance complicate notions of authorship and originality? Course readings are drawn from dance studies, critical race studies, gender and sexuality studies, and performance studies. Readings are complemented by screenings, movement exercises, and live performance.

**TAPS 1281S. The Precarious University (HMAN 1970E).**

Interested students must register for HMAN 1970E.

**TAPS 1281T. Native Americans in the Media: Representation and Self-Representation on Film (ETHN 1890G).**

Interested students must register for ETHN 1890G.

**TAPS 1281W. Artists and Scientists as Partners.**

This course focuses on current research on and practices in arts and healing, with an emphasis on dance and music for persons with Parkinson's Disease (PD) and Autism (ASD). Includes guest lecturers, readings, field trips, and site placements. Admission to class will be through application in order to balance the course between self-identified artists and scientists and those primarily interested in PD and those primarily interested in ASD. Enrollment limited to 30.

**TAPS 1281Z. Artists and Scientists as Partners: Theory to Practice.**

This course focuses on the application of current research in neuroscience, education, narrative medicine, and best practices in the arts for persons with neurological disorders. Through site placements, students provide arts experiences (primarily dance and music) for persons with Parkinson's Disease (PD) and Autism Spectrum Disorders (ASD). The course also includes guest lecturers, readings, curriculum development, analyzing and developing research methodology, ethnographic research, and planning of and participation in a convening of artists, scientists and educators in an intergenerational exploration. Completion of TAPS 1281W highly recommended, but course may be taken with no prior experience in science, dance or music.

**TAPS 1285. Film Acting.**

This intermediate acting class is designed to introduce and develop the tools necessary for acting on camera; to examine the application of the screenplay as a blueprint for the finished film; and to pursue the process and demands of working under limited and quickly changing conditions. Utilizing an extensive library of screenplays, the class will study film scene analysis and preparation, pro-active choice, and heightened connection. They will develop and hone the skill to remain present and vital through multiple takes of the scene, keeping emphasis on process rather than presentation.

**TAPS 1290. Advanced Costume Design.**

Costume design and rendering approaches to various genres of performing arts, including opera, musicals, and dance. Designed for the serious student of theatrical design. Advanced work on rendering emphasizing character, practicality, line, form, and color. Lab required.

**TAPS 1300. Advanced Set Design.**

The examination of the working relationship between designer and director. An emphasis on the design abilities needed to communicate varied visual approaches. Developing the creative, theatrical vocabulary needed to turn a director's vision into a fully articulated set design. A substantial amount of plays will be read and researched. Drafting and model rendering techniques will be applied. Prerequisite: TAPS 1280F. Instructor approval required prior to registration. Enrollment limited to 10.

**TAPS 1310. Advanced Modern Dance.**

This course is designed for students with several years of dance experience in any genre. The purpose of this class is to endow students with technical mastery of current contemporary movement vocabularies, with emphasis on Release Technique and Bartenieff Fundamentals. Enrollment limited to 40. S/NC.

**TAPS 1315. Digital Design for the Theatre.**

A comprehensive introduction to the use of two-dimensional computer aided tools to realize scenic design elements and diversify the designers' visual vocabulary. A thorough understanding of digital work-flow from concept development, input, to computer aided design and output will be achieved. The course will cover: Introduction to Drafting with Auto-cad and plotting, Introduction to the use of the Adobe Creative Suite including Photoshop, Illustrator and InDesign as they relate to set design and implementing designs in full-scale. We will also review Typography and basic Graphic Design elements and how they relate to scenic elements, scaling and technical applications.

**TAPS 1320. Choreography.**

Designed for those who have had some experience in composition and would like to work, under supervision, on making dances. Emphasizes making full-length dances for small and large groups and demands a sophisticated use of space, dynamics, and music. Further emphasis on viewing and interpreting classic and contemporary works from a choreographic viewpoint. S/NC.

**TAPS 1325. Experiments in Dance, Movement, and Performance.**

This course introduces students to the histories and methodologies; meanings and functions of experimental choreography in specific artistic, social, and political contexts. We examine the ways in which choreographers and dancers have experimented with the traditions and forms of dance, by mapping a series of interdisciplinary gestures in relation to creative and critical fields. The course builds on a series of composition exercises and creative assignments to culminate with the making and showing of a dance performance. No experience of dance is required, but an interest in thinking and experimenting with the roles of dance across art, society, and academia.

**TAPS 1330. Dance History: The 20th Century.**

An exploration of the major figures and trends in modern dance. While the main focus of the course is on American Dance, attention is given to earlier European and other dance traditions that have contributed to the American dance heritage. May be of particular interest Americanists, art historians, dancers, and theatre majors.

**TAPS 1335. Movement Theory: Choreography, Modernity, Subjectivity.**

This seminar examines theatrical choreography as a defining art of western modernity. Drawing from the publication of *Chorégraphie* in 1700—from the Greek *khoreia* (dancing) and *graphein* (writing)—as a system of dance notation, the course will follow the transformation of the relation between the score and the event; writing and moving; philosophy and dance from the Baroque period to contemporary experimentations. This course seeks to enable students to apply a diverse set of languages and concepts to the study of dance; to equip them with the critical tools through which to experience, analyze, and write on dance as a culturally meaningful practice.

**TAPS 1340. Dance Styles.**

This studio course focuses on Repertory Etudes created by diverse choreographers of 20th-century American dance. Ideal for students who have reached a beginner/intermediate-advanced technical level, the course builds on technical and improvisational concepts covered in TAPS 0310. Repertory includes: Jazz Swing Duet By Danny Buraczkeski; Rainbow Etude by Donald McKayle; Parsons Etude by David Parsons, and Limon Etude by Carla Maxwell based on works by Jose Limon. Upon completion this course students will be prepared to perform at least one of these dances within an educational setting. With further coaching, they might be prepared to perform in more formal performances.

**TAPS 1341. Introduction to Ballet.**

An introduction to the classical ballet vocabulary and basic movement patterns. We will focus on maintaining correct body alignment while increasing fitness and coordination, and develop a deeper appreciation for ballet in the context of the liberal arts. No prior ballet experience is necessary for this course, but advanced dancers who would like to brush up on basics are also welcome.

**TAPS 1342. Advanced Beginning Ballet.**

This course is designed for students who have some dance background, or who have successfully completed Introduction to Ballet (TAPS 1341). Apart from working on core strength, alignment, and flexibility, we will focus on faster paced movement sequences, and prepare for turns and jumps appropriate for an advanced beginner level.

**TAPS 1343. Intermediate Ballet.**

This course is designed for students who have successfully completed Advanced Beginning Ballet (TAPS 1342) and kept up with their dance conditioning, or for students with previous ballet experience at an advanced beginner/intermediate level. The main focus of this class is on center exercises, especially on pirouettes and petit, medium and grand allegro appropriate for an intermediate level.

**TAPS 1345. Dance and the Visual Arts after 1960: Performing the Everyday, Choreographing the Museum.**

This course examines the mutual influences between the fields of dance and the visual arts since 1960. It surveys a series of artworks spanning early minimal art, happenings, and Judson Dance Theatre to contemporary global experiments in choreographing museal spaces. How can we map the "close correspondence" between choreographic and visual art practices across the performance of pedestrian bodies, dancing sculptures, and relational encounters? Students are invited to experiment collectively with dance archiving methodologies, to write about a performance event in the museum context, as well as to research the critical intersections between dance and art history; performance and curatorial studies.

**TAPS 1350. Dance Performance and Repertory.**

Half course credit each semester. A study of dance repertory through commissioned new works, reconstruction, coaching, rehearsal, and performance. Guest artists and consultants from the American Dance Legacy Institute. Enrollment is by audition. Limited to skilled dancers. Instructor permission required. S/NC.

**TAPS 1355. Indian Classical Performance: Natyasastra Theory and Practice.**

Natya Prayoga is a theory-practice course of movement and contemplation based on Indian Classical Performing Arts and the principles of yoga. This course will explore the study of Natyasastra as a text for application, as well as, the intersection between theory and practice, with special reference to the contemplative aspects of performance. Students will review and analyze the text with explicit and implicit inferences. Thus, drawing parallels between the basic principles of performance in the Indian traditions and yoga. Analysis of the basic tenets of Natyasastra exploring the physical training routines, for stylized representation of movement and mimesis.

**TAPS 1360. Dance Performance and Repertory.**

A study of dance repertory offered through commissioned new works, reconstruction, coaching, rehearsal, and performance. The course will explore the phenomenology of dance, audience-performer connection, theatre production and dance criticism, among other topics. Enrollment is by audition. Limited to skilled dancers. S/NC.

**TAPS 1370. New Works/World Traditions.**

As an Engaged Scholarship course, New Works develops new dance theater pieces that are rooted in research in Mindfulness, Somatic Studies, Mande Dance, Contact Improvisation, Butoh and Contemporary Vernacular dance forms. Guest artists from Japan, China, West Africa, the USA, and local community partners co-create new theatrical pieces for the concert stage. May be repeated for credit. S/NC.

**TAPS 1380. Mise en Scene.**

A reconstruction of the idea of a stage and a frame on the evidence of theory, novels, plays, and especially films—the seen and the unseen—using the organizing strategies of mystery. Art's "impossible" brokering of the real and the representational in a dialectic of space is considered from a multiplicity of perspectives in diverse works. Enrollment limited to 20. Instructor permission required.

**TAPS 1390. Contemporary Mande Performance.**

This course examines the celebratory, life-cycle, club, and street party performance forms from the Bambara, Malinke, Bobo, Khassonke and Wasalu peoples of Mali, West, Africa. These embodied performance traditions are studied alongside their specific musical and social traditions and oral histories. Meditation, films, readings, guest artists and collaborative research projects will be introduced to help facilitate a deeper investigation of contemporary Mande society and its artistic production. Students MUST register for one of the Movement Labs, and all primary meeting times. Students must attend the first class and fill out an application.

**TAPS 1400. Advanced Performance.**

An investigation into abstract and nonlinear modes of performance, working from fragmentary and recombined narrative, dramatic, and found sources. Seeks to evolve a conceptual approach to performance of the individual actor-director-writer through supervised and independent exercises and projects. Prerequisite: TAPS 0230. For juniors and especially seniors. Enrollment limited to 20.

**TAPS 1410M. Shakespeare and Philosophy (COLT 1410M).**

Interested students must register for COLT 1410M.

**TAPS 1415. 13 Positions.**

A lab exploring the physical, aesthetic and performative relationship of the body to a student's cultural cosmology. We will also look at certain (so-called) traditional aspects to successful forms (a performance, a dance, a film-video, a piece of writing, a painting, sculpture...) and then attempt to break it down and reframe this tradition with a discipline (rigor) that evokes accidents and the inexplicable. A lab that examines how the creative process is thought about, considered and looked upon, watched, inside and out. A fresh outlook, (shared) labor and or proposition on how to construct/deconstruct the right/wrong/right art work.

**TAPS 1425. Queer Performance.**

This seminar will examine the many meanings of queer performance. We will consider queerness as it is performed in a range of aesthetic genres— theater, music, dance, performance art, digital media—as well as in everyday vernacular contexts. We will explore how the interdisciplinary academic field of queer studies has turned to performance and performativity as key modes through which gender and sexuality are expressed. The class will place a particular emphasis on queer of color, trans\*, and crip/queer approaches and cultural practices, addressing how queerness intersects with other axes of social difference, including race, class, and ability.

**TAPS 1430. Russian Theatre and Drama.**

An overview of Russian theatre and drama from the 18th century to the late 20th century. Emphasis on plays as texts and historical documents, and on theatrical conditions, productions, and innovations. All readings are in English. Russian area studies concentrators are encouraged to enroll. Instructor permission required.

**TAPS 1450M. The Archival of Gestures (MES 1450).**

Interested students must register for MES 1450.

**TAPS 1480. Sweating Infrastructure: Cultures of Support in Dance and Live Performance.**

As the income gap in the US has grown, the possibility of a career in the performing arts has become increasingly less viable for a significant percentage of the population. Issues of arts funding, labor, and professionalization have been debated across academic disciplines and by arts organizers who experience these instabilities firsthand. Researching infrastructure through a dance studies lens, this course reframes the role of embodied action, interaction and assembly in sustaining enabling environments for the arts. By reviewing literature and interviewing arts professionals, this project evidences how people "sweat" the problem of sustaining art work differently on sociocultural grounds.

**TAPS 1485. The Activist Body.**

The current explosion of activist activity on and beyond college campuses has been called a "movement moment" (McCarthy, 2017), signaling an urgent need to address what it means to be a politically responsive body in the world today. This course examines activism as a topic and performance practice rooted in the body's capacity to disrupt the political status quo. Building from the growing literature on protest and social movement in dance and performance studies, students will theorize activism and agentic embodiment, analyze cultural events that claim activist intentions, and body forth activist strategies and manifestos in weekly movement sessions.

**TAPS 1500A. Advanced Playwriting: Invitation to the Devout Life..**

A practice-based class designed to promote prompt, connected and original writing for the live environment. We move through the regular practice of assorted exercises to the development of a completed script by the end of the term. Inquiry is guided by selected readings in esthetic theory, philosophy and theology (Anne Carson, St. Vincent de Paul, Simone Weil, others). Previous playwriting experience preferred. Instructor permission required.

**TAPS 1500H. Advanced Playwriting.**

This unique course combines Brown undergraduate/graduate students with Brown/Trinity M.F.A. Acting and Directing students to explore bodies on stage, in specific time and space. Students create original short, theatrical works as they examine and experiment with multiple narrative techniques. Classes include craft exercises and close readings of a diverse range of texts—all to look deeper at how works are built. Through energetic workshop-style classes, this rare and significant collaboration allows students of different backgrounds to experience the full process of drafting, hearing the words aloud, and revising original works. Open to graduate/undergraduate students. Prerequisite: TAPS 0100 and 0200. Enrollment limited.

**TAPS 1500I. Screenwriting.**

Screenwriting is a course designed to familiarize the neophyte screenwriter with the basic principles of writing for the silver-screen. By closely examining produced films, in-depth readings of both good and bad scripts, and through the writing of our own, we will gain an understanding of how screenplays are written, and written well. The course will provide a foundation in the basics of the three-act structure, dramatic action, character arc, the revision process, and an introduction to the business of screenwriting. By the end of the semester we will have produced and polished a 10 page/minute manuscript. Enrollment limited to 17.

**TAPS 1500J. Script Adaptation.**

This class aims to develop skills and techniques for the creation of new dramatic works based upon previously published or performed material. The unit explores the process of creating a script from previously published source material. To achieve this goal, we will explore the problems inherent in creating dramatic material from source material of various forms. The module will enhance core skills in scriptwriting, dramaturgy and script analysis. Weekly classes will include lecture and discussion, readings, film screenings and writing exercises. Enrollment limited to 17.

**TAPS 1500L. Acting Together on the World Stage: Writing and Political Performance.**

Practical research in art for social change, with an emphasis on writing and composition, resulting in a series of solo and group devised performances (or well articulated proposals). Each week, in-session writing and devising exercises, coupled with a discussion of critical readings and case histories, build to projects that may be constructed solo or in small groups. Final projects may take the form of carefully constructed, achievable plans for long-range implementation. Students will be required to attend special workshops, field trips, and performances as scheduled through this semester; this schedule will be available at the first class. Enrollment limited to 12.

**TAPS 1500M. Advanced Playwriting: Guhahamuka.**

Guhahamuka is a Kinyarwanda word meaning "breathlessness," sometimes applied to the wordlessness that befalls the survivors of trauma. We will progress through a series of graduated exercises design to work-out the fundamentals of writing for the live encounter, with an emphasis on the uses of testimony, and language that pushes into spaces where language doesn't fit, doesn't belong, fails, converts itself to different energies. How a writer's technique images spiritual practice, and avails of the useful impossibilities of incarnation and transcendence. Taking on a practical language from contemplative traditions as means of ordering the writer's craft.

**TAPS 1510. Inventing Directing.**

"Inventing Directing" is a course that deals with how a director gets thought into stage space via: different emphases communicated to actors; attention to the life of objects; exploration of the languages of stage space; accessing personal experience to deepen point of view; drawing upon film, the practical application of theory, and literature; vertical thinking; and spatializing time. The course will involve practical exercises and work on both scenes from plays and on material drawn from other sources.

**TAPS 1520. Seminar in Theatre Arts.**

Seminar designed for senior theatre arts concentrators, required during Semester VII. Topics focus on career planning and theatre arts subjects not dealt with in other courses. Enrollment limited to seniors.

**TAPS 1600. Dramaturgy.**

This course is an introduction to dramaturgy and script analysis for advanced undergraduates. It will introduce a variety of plays and critical approaches to dramatic texts and performances with emphasis on culturally divergent dramaturgies, adaptation and textual analysis for performance.

**TAPS 1610. Political Theatre of the Americas.**

This course explores political theatre and performance in Latin America, the US and Canada. The primary concern will be the use of performance in indigenous rights, queer rights, and gender equity campaigns as well as general critiques of socioeconomic inequity. The course examines the strategies used by actors in theatrical performances, performance art, and political protests that use the tools of performance. Exploration is of the rich relationship between politics and performance. There are no prerequisites, but one course in either Latin American Studies or Theatre and Performance Studies is recommended.

**TAPS 1630. Performativity and the Body: Staging Gender, Staging Race.**

This course examines how we develop and interrogate different meanings around our bodies through performance practices in everyday life and on stage. Specifically, we analyze how race and gender are regulated, reinforced, reworked, and subverted through embodied modes of performance. We explore how raced and gendered bodies are constructed, reconstructed, and deconstructed through everyday performances of self from fashion to food to surgery. We will also examine works by playwrights, visual artists, and theatre artists who deploy performance practices to make, unmake, and remake historical, social, and political understandings of our bodies as raced and gendered.

**TAPS 1640. Theatre and Conquest in Greater Mexico: From Cortes to NAFTA.**

Explores the intimate relationship between theatre and conquest in the Americas as contained in missionary accounts, plays, performances and visual art from Cortés arrival to the present. Students will analyze plays and performances that stage the Spanish Conquest, consider the theatrical procedures of the conquest and examine theatrical representation as a methodology of conquest in the Americas.

**TAPS 1650. 21st Century American Drama.**

Course is designed to familiarize students with contemporary American playwriting from 2000-2005. We will explore how these plays reflect our current moment with attention to conceptions of gender, sexuality, national identity, trauma and memory. Playwrights may include Jorge Cortinas, Sarah Ruhl, Tony Kushner, Juilana Francis, Sabina Berman, and Carl Hancock Rux.

**TAPS 1670. Latino/a Theatre and Performance.**

This course will be an introduction to Latino/a theatre concentrating on the following themes: borders, diaspora and exile, political and personal identities, sexuality, gender and violence, and latino re-imagining of U.S. and Latin history. We will read Chicano/a, Cuban American and Nuyorican drama and performance art. No prerequisites.

**TAPS 1680. Performance, Politics, and Engagement.**

A survey course in engaged and political performance; this seminar investigates social practice, political theatre, and dance as points of entry into contemporary questions in ecology, ethics, gender, racialization, sexuality, perception, labor, and value. Course materials include artists' and scholars' writings as well as scores, scripts, theoretical writings, photographs, films, reenactments, and performance procedures. Assignments include research projects on art and social movements, performance tasks, and scholarly writing projects. An existing performance or arts practice is not required. The course may be especially relevant to TAPS students, the Engaged Scholars Program, and Visual Art. There are no prerequisites.

**TAPS 1690. Performance, Art, and Everyday Life.**

Provides an introduction to performance-based art. Some knowledge of the historical avant-garde is required. The class will explore site-specific work, time-based work, life art, body art, instruction art and a variety of intermedial artwork. Theories of "theatricality" and "performativity" will be explored as will expressive properties of repetition, excess, mimesis, banality, mobility, framing, failure and shock. Enrollment limited to 16.

**TAPS 1700A. Voices Beneath the Veil (AFRI 1110).**

Interested students must register for AFRI 1110.

**TAPS 1700B. African American Folk Traditions and Cultural Expression (AFRI 1120).**

Interested students must register for AFRI 1120.

**TAPS 1700C. Advanced RPM Playwriting (AFRI 1050A).**

Interested students must register for AFRI 1050A.

**TAPS 1700D. Intermediate RPM Playwriting (AFRI 1050D).**

Interested students must register for AFRI 1050D.

**TAPS 1700E. Introduction to Post-Colonial African and African Diasporic Theatre (AFRI 1050H).**

Interested students must register for AFRI 1050H.

**TAPS 1700G. Roots of African American Fiction: Oral Narrative through Richard Wright (AFRI 1050M).**

Interested students must register for AFRI 1050M.

**TAPS 1700H. Art and Civic Engagement: Creativity/Reality (AFRI 1050P).**

Interested students must register for AFRI 1050P.

**TAPS 1700I. RPM Playwriting (AFRI 1050E).**

Interested students must register for AFRI 1050E.

**TAPS 1700J. Musical Performance and Theatricality (MUSC 1680).**

Interested students must register for MUSC 1680.

**TAPS 1700K. Site- Specific Writing in Brown's Historical Spaces (AMST 1570).**

Interested students must register for AMST 1570.

**TAPS 1700L. African American Musical Theatre (MUSC 1905D).**

Interested students must register for MUSC 1905D.

**TAPS 1700V. Voices Beneath the Veil (AFRI 1110).**

Interested students must register for AFRI 1110.

**TAPS 1710A. Open Source Culture (MCM 1700N).**

Interested students must register for MCM 1700N.

**TAPS 1710B. Radical Media (MCM 1700P).**

Interested students must register for MCM 1700P.

**TAPS 1720. Queer Relations: Aesthetics and Sexuality (ENGL 1900R).**

Interested students must register for ENGL 1900R.

**TAPS 1740. Artful Teaching: Intersecting the Arts with Foreign and Second Language Acquisition (POBS 1740).**

Interested students must register for POBS 1740.

**TAPS 1900K. Reading Sex (ENGL 1900K).**

Interested students must register for ENGL 1900K.

**TAPS 1900R. Queer Relations: Aesthetics and Sexuality (ENGL 1900R).**

Interested students must register for ENGL 1900R.

**TAPS 1970. Independent Reading and Research.**

Intensive reading and research on selected topics arranged in terms of special needs and interests of the student. A written proposal must be submitted to the instructor and the chair of the theatre arts department before the project can be approved. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**TAPS 1971. Digital Media and Virtual Performance (MUSC 1971).**

Interested students must register for MUSC 1971.

**TAPS 1971M. Digital Media and Virtual Performance (MUSC 1971).**

Interested students must register for MUSC 1971.

**TAPS 1990. Senior Honors Thesis Preparation.**

To be taken by all students accepted into the theatre arts honors program. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**TAPS 2010M. Digital Performance (MUSC 2210).**

Interested students must register for MUSC 2210.

**TAPS 2050. Dramaturgy.**

This course will be an introduction to dramaturgy for MFA Actors, Directors and Playwrights and advanced undergraduates. The course will introduce a wide variety of play and critical approaches to dramatic texts and performances with emphasis on culturally divergent dramaturgies, embodied dramaturgy, adaptation and textual analysis for performance.

**TAPS 2100. Seminar in Performance Studies and Theatrical Theory.**

Key texts in Performance Studies and Theatre Theory selected from works by ancient, modern, and contemporary philosophers, dramatists, performers, and theorists. Covers basic methodological trends crucial to thinking about mimesis and alterity, acting and actants, identity formation and disidentification, decolonial theory and feminist theory in relationship to the study of performance, performativity, drama and theatricality. Enrollment limited to 20.

**TAPS 2120. Revolution as a Work of Art.**

A study of Russian revolutionary culture and new personhood, ca. 1905-1930, with readings from Russian fiction, philosophy, art criticism, dramatic and political theory, and cultural and theatre history. Topics include the revolution of the spirit, the culture of the future, iconography and spectacle, charismatic authority, and revolutionary terror. For graduate students and qualified juniors and seniors. All readings are in English. Those who can may read some materials in Russian. Enrollment limited to 20.

**TAPS 2200A. Abstraction and Resistance.**

A study of the uses of abstraction in modernist and postmodern theatre and drama, film, painting, and narrative fiction and of the engagement of resistance as a performative strategy for conceptualizing such nominally unframed and alogical texts. The works of selected theatre directors and playwrights, philosophers and theorists, novelists, filmmakers, and artists are examined and discussed.

**TAPS 2200B. Neoliberalism and Performance.**

This course will explore the relationship between performance (dance, theatre, performance art, public art) and Neoliberal economic and governmental policies and practices. We will place special emphasis on how the arts participate in modes of labor flexibility, globalization, entrepreneurship, governmentality and surveillance as well as how these forms critique these phenomenon. Critical readings will include political theory, play and performance texts and videos and economic theory.

**TAPS 2200E. Historiography.**

This graduate seminar is dedicated to a thorough examination of theater and performance historiography. The course will consider methodologies of writing about the past, concentrating on analyzing the writing of history and examining how historical information is obtained, imagined and disseminated in our field, where embodied practice is crucial to thinking. This course will necessarily consider how historiography is understood with the discipline of history as well as performance and theatre studies.

**TAPS 2200G. Performance, Photography, and the Live Border.**

What are the limits of approaching live performance as essentially ephemeral? What is at stake in the lines drawn between media histories and theatre histories that account for the "still"? Questions such as these will be posed across media as we explore histories of photography and tableaux vivant, as well as critical theories in performance studies, visual studies, art history, media studies, and theatre studies. We will look at images documenting violence, images re-presenting documented violence, and violence to documentary images in the course of a broader conversation about the "life" or "liveness" of the still. Enrollment limited to 20.

**TAPS 2200I. Wittgenstein, Writing and Performance.**

Performance is the ideal forum in which to discuss Wittgenstein's philosophy, especially as the latter involves rigorous close reading of the physical and metaphysical identities of words, thought and action in the construction of discernible and livable roles and courses of action and understanding within the given circumstances of the mysterious world into which we are born. Wittgenstein's aphoristic writing, which creates a poetic structure, along with the necessary incompleteness of Wittgenstein's thought expression and the wide range of philosophical interpretations of his work by numerous artists and theorists underscore the liveliness of Wittgenstein's writing as creative texts in themselves. Enrollment limited to 17 juniors, seniors, and graduate students. Instructor permission required.

**TAPS 2200K. Digital Performance (MUSC 2210).**

Interested students must register for MUSC 2210.

**TAPS 2200N. Liveness: Performance and Neoanimism in Late Capitalism.**

Has the "affect economy's" 24/7 live shifted medial maps distinguishing live from object arts? As animacy and inanimacy warp, do orientations to duration, participation, and relation shift? Can liveness extend to the Paleolithic in today's "new materialist" imaginary? If "Cinema is Dead," does it join theatre as a zombie form? Modernist "animism," "totemism," and "primitivism" provide a backdrop to recent returns to animism in Chen, Bennet, Latour and others. Does theatre's separation from ritual and possession demand rethinking via "relationscapes" and the critical turn to affect theory? Art/performance, theatre, cinema will be under discussion, from Euripides Bacchae to Gucci Bacchae.

**TAPS 2270B. Performance in a Virtual World (MUSC 2270B).**

Interested students must register for MUSC 2270B.

**TAPS 2300. Pedagogy: Prep and Practice.**

In the second year of the three-year MFA Playwriting Program, students are required to teach undergraduates Introductory and Intermediate Playwriting. This course readies MFAs for their teaching in advance of their time at the head of the classroom, provides them with mentorship during the conduct of their teaching, and assesses their experience at the end of their assignments. It is an intensive seminar, where the head of the Playwriting Program meets with students individually and as a team, sharing in the evolutions of curricular design and practice, offering close comment and tailored assignments (suggested readings; writing tasks).

**TAPS 2310. Graduate Playwriting.**

With Word as the bodying forth into social reality of original experience, the structures, purposes and ethical risks of writing for performance are examined; experienced through the reading of each other's works-in-progress, through the reading of essays and in session exercises. Must be taken by playwriting grad students every semester in residence. May be taken multiple times for credit. Undergraduates will be admitted with permission of the instructor. S/NC

**TAPS 2400A. Concepts of Space and Time in Media Discourses (HMAN 2970C).**

Interested students must register for HMAN 2970C.

**TAPS 2450. Exchange Scholar Program.****TAPS 2500. Acting, Brown/Trinity Rep Consortium.**

This course is open only to students of the Consortium. It will include fundamental exercises, textual analysis, rehearsal techniques, character and scene work designed to provide the student actor with a working method based upon the general principles of the Stanislavski system. A major part of this course will include rehearsal and performance responsibilities.

**TAPS 2505. Fundamentals of Acting: Modern and Contemporary Realism.**

This course will cover three modalities. Acting/Scene Study: Realism will provide a fundamental understanding of Stanislavski-based acting within the realistic style, developing: a working understanding of a five-week rehearsal process; a system of text analysis based upon events and cause-and-effect; beginning the work of integrating vocal and physical technique into each individual student's acting method. Voice and Speech I will provide the basis of the actor's three years of vocal training, gaining an understanding of the actor's personal vocal blocks as they relate to how the breath resides in the body. Contact Improvisation will investigate improvisation movement through physical contact.

**TAPS 2510. Voice: Power and Range for the Actor.**

This course is open only to students of the Consortium. It will provide a progression of exercises to free, develop and strengthen the voice as the actor's instrument. The classes focus on relaxation, physical awareness, breath, freeing the channel for sound developing the resonators, releasing the voice from the body, articulation, self-expression, and the link to text and acting.

**TAPS 2515. Acting Technique: Fundamentals of Physical Awareness.**

All Voice and Speech work has two underlying goals: for the actor to be heard; for the actor to be understood. A daily warmup, rigorous drilling, the learning of IPA, and its application in Standard American dialect will build muscle to strengthen your instrument for clarity of speech and train your ear to the nuances of speech sounds, invaluable for dialect and character work. The Alexander Technique uses gentle guidance to enable movement to take place unencumbered by habitual effort. Voice, Speech and Alexander work together to enable the actor to produce clear, tension-free sound.

**TAPS 2520. Movement: Form, Center and Balance.**

This course is open only to students of the Brown University/Trinity Rep MFA Consortium program. It will develop a physical vocabulary through floor work, choreographed combinations and movement improvisation, helping the actor develop an understanding of space, strength of movement, and physical life onstage.

**TAPS 2530. Directing: Composition and Staging.**

This course is open only to the MFA Consortium program. It will include information and exercises addressing how to stage a play, balance the space, and transition from scene to scene. It will also focus on the director's responsibility to the actors, and ways in which to help them create their roles.

**TAPS 2535. Directing 1: Fundamentals in Analysis and Action for Brown/Trinity MFA Actors and Directors.**

This course is designed to activate the mind of the director. It is a detailed investigation of the creative process and the beginning of the foundation for communication with actors, designers and audiences in the making of live performance with text. MFA students will participate in Directing Lab, rehearsing as assigned.

**TAPS 2545. Dramaturgy.**

This course will be an introduction to dramaturgy advanced undergraduates and MFA students. The course will introduce a wide variety of play and critical approaches to dramatic texts and performances with emphasis on culturally divergent dramaturgies, embodied dramaturgy, adaptation and textual analysis for performance. This course meets for 2 of the 3 hours with TAPS 1600 Dramaturgy for MFA students; Graduate Students will take Deb Salem Smith's Playwriting course for the final hour of their course credit.

**TAPS 2550. Acting: Realism and Modernism.**

This is a two-credit course and is open only to students of the MFA Consortium program. This is a scene study class with an emphasis 20th century playwrights. In addition to the works of Anton Chekhov, students may perform scenes from plays by Tennessee Williams, Arthur Miller, Clifford Odets, Wendy Wasserstein, Peter Parnell, Paula Vogel, Edward Albee and Harold Pinter.

**TAPS 2555. Advanced Acting: Modern and Contemporary Realism.**

Purpose: To provide a deepened understanding of the principles of Stanislavski-based acting within the realistic style; to reinforce and practice a working understanding of a five-week rehearsal process; to develop a system of text analysis based upon events and cause-and-effect; to understand and deepen the process of individual personalization; to continue the work of integrating vocal and physical technique into each individual student's acting method.

**TAPS 2560. Voice: Phonetics.**

This course is open only to students of the Brown University/Trinity Rep MFA Consortium program. The course will teach articulation, self expression, and link to text and acting. Additional work is devoted to speech and diction, with an introduction to the International Phonetic Alphabet (IPA) and a progression through Standard American Speech to rudimentary dialect work.

**TAPS 2565. Acting Technique II: Strength, Expansion and Articulation.**

This course is open only to students of the Brown University/Trinity Rep MFA Consortium program. Continued studio exploration of various dance and movement techniques and vocal articulation and practice, designed to promote effective, healthy usage of the actor's instrument, as well as an introduction to dialect work and stage combat. This course includes separate classes in Speech, Alexander Technique and Movement Technique. Mandatory S/NC.

**TAPS 2570. Movement: Physical Life and Language.**

This course is open only to students of the Brown University/Trinity Rep MFA Consortium program. It will help the student incorporate text and physicality in order to create the inner and outer life of a character. Special attention will be given to the student's repetitive physical patterns, and new ways will be explored in examining the internal and external life of a character.

**TAPS 2575. Theatre History in a Changing Present.**

This course will be an introduction to the offerings in theatre history, theory and practice offered at Brown University and environs in relation to a changing American Theatre. Each week will feature an original guest speaker from TAPS or other affiliate departments/institutions to expand your understanding. First Look Production is included in this course. This production process is a companion production experience to course work done in the fall semester. Students will experience the full process of revising and staging original works, with opportunities to work as actor and/or director, playwright, producer—actively applying conceptual knowledge gained from first semester courses.

**TAPS 2580. Directing: Collaboration with the Playwright.**

This course is open only to students of the MFA Consortium program. It will focus on issues of collaboration between the playwright and the director. Each director will be assigned to work on a new script in cooperation with a playwright. A workshop production will be staged and open to the public.

**TAPS 2585. Directing II: Collaborative Communication.**

Building on Directing I: Fundamentals in Analysis and Action this course focuses on communication between actors and directors. Methodologies are tested and explored through practice in studio scene work. Rehearsal preparation, diagnostic processes are developed and practiced, and a detailed exploration of the directors preparation is the final project.

**TAPS 2600. Acting: Shakespeare and Moliere.**

This is a two-credit course and is open only to students of the MFA Consortium program. This is a scene study class with an emphasis on the problems of style and language in the plays of Moliere and Shakespeare.

**TAPS 2605. Fundamentals of Acting: Shakespeare and Classical Verse.**

An introduction to the conventions of classical English verse performance, including elements of meter, heightened language, metaphor and rhetoric, with the goal of expanding the actor's understanding of the principles of realistic acting to the rigorous demands of Shakespearean and other classical texts. This course includes separate classes in Scene Study, Voice and Movement, all designed to support and promote heightened poetic expressivity in performance. S/NC

**TAPS 2610. Voice: Verse Text.**

This course is open only to students of the MFA Consortium program. It will include advanced vocal work and an introduction to singing in performance. Rhythm and rhyme will be explored in relation to lyrics and verse.

**TAPS 2620. Movement: The Alexander Technique.**

This course is open only to students of the MFA Consortium program. This class will provide a step-by-step understanding and application of The Alexander Technique, which helps to develop body alignment, range of motion, and inner stillness.

**TAPS 2625. Playwriting Dramaturgy Practicum.**

This course is advanced playwriting and script analysis for second year students. We will look deeper at the tools and craft of playwriting. We will begin by exploring adaptation—what are the bones and tissues of a given story? How can that body be transformed into a theatrical story? What is required? What changes? What is the relationship between form and content? We will transition from adaptation to writing original full-length works.

**TAPS 2630. Directing: The Director's Vision.**

This course is open only to students of the MFA Consortium program. Under close supervision, students will direct projects at the Consortium. Each student will be responsible for the creation of either a new or an established script. Students will meet regularly with the faculty to discuss process and progress.

**TAPS 2650. Acting: Problems of Style.**

This is a two-credit course and is open only to students of the MFA Consortium program. This is a scene study class with an emphasis on the problems of style and language in non-realistic plays. In addition to advanced work on Shakespeare's texts, the course will explore other playwrights, possibly including Ibsen, Strindberg, Shaw and Beckett.

**TAPS 2655. Advanced Acting: Shakespeare and Classical Verse.**

In-depth study of the methods and practice of classical acting, with the goal of developing professional-level skill and mastery of the form. Actors work toward total integration of the physical and vocal instrument into a unified whole to achieve complete expressivity of thought, emotion, character and imagination through poetic language and vigorous, purposeful and creative physicality. This course includes separate classes in Scene Study, Voice and Movement Composition.

**TAPS 2660. Voice: Singing with Joy.**

This course is open only to students of the MFA Consortium program. Students will work on music, both as soloists and in small groups. The course will address issues of sight reading, breath support, phrasing, and how to stage a song for performance.

**TAPS 2670. Movement: Stage Combat, Clowning, and Other Physical Form.**

This course is open only to students of the MFA Consortium program. It will offer basic instruction in many physical areas including, but not limited to stage combat, juggling, mime, tumbling and clowning.

**TAPS 2675. Advanced Playwriting.**

We will do craft exercises and close readings of texts to look deeper at how works are built. We will explore, discover, and map the mechanics of a diverse range of texts. You will have the opportunity to experiment with those same mechanics to create your own pieces. Through energetic workshop-style classes, you will experience the full process of drafting, hearing aloud, and then revising original works. In charting and defining others' voices, you will discover your own particular voice and what makes it valuable and necessary.

**TAPS 2680. Directing: Critical Analysis.**

This course is open only to students of the MFA Consortium program. It will include issues of directing, as well as the concerns of an Artistic Director and Associate Artistic Director. Each student will be expected to assistant direct a professional production at Trinity Rep Company.

**TAPS 2700. Acting: Monologue Performance.**

This is a two-credit course and is open only to students of the Brown University/Trinity Rep MFA Consortium program. Acting assignments will include solo work presented in a variety of ways. These might include a selection of monologues and songs presented by the students to show the full range of his or her abilities. A performance might also include a solo piece written by the student and presented as a single-actor production.

**TAPS 2705. Third Year Practicum: The Actor as Creator.**

Based upon a foundation of mastery in realistic and classical acting styles, actors engage in an exploration of historical, modern and contemporary dramatic literature and theatre practice with a goal of developing a personal aesthetic voice that pushes the boundaries of convention and tradition in their mature theatre practice. This course includes separate classes in Scene Study, Voice, Movement and Alexander Technique, as well as participation in Director's Lab. S/NC

**TAPS 2710. Voice: Dialects and Accents.**

This course is open only to students of the Brown University/Trinity Rep MFA Consortium program. This course will teach actors various American regional dialects and international accents including British, Irish, Italian and Russian. Students will examine the language with the use of the International Phonetic Alphabet, and will be expected to perform using the regionalisms and dialect and then teach it to the rest of the class.

**TAPS 2720. Physical Theatre.**

This course is open only to students of the Brown University/Trinity Rep MFA Consortium program. This course will explore various kinds of physical theatre, and ways in which the actor can be free, spontaneous and open in rehearsal and performance. Areas of exploration will include Commedia, mask and yoga.

**TAPS 2730. Directing: Design in the Collaborative Process.**

This is a two-credit course and is open only to students of the Brown/Trinity Rep MFA Consortium program. Directing students will study theatrical design including stage settings, costumes, lights and sound. Particular focus will be given to ways in which a director works with a designer to establish his or her vision of the play. Areas of study will include blueprints, floor plans, renderings and focus.

**TAPS 2750. Acting and Directing: Practical Application.**

This is a two-credit course and is open only to students of the Brown University/Trinity Rep MFA Consortium program. The course will prepare acting students for a graduate showcase which will be performed in New York City and Los Angeles for agents, casting directors, and other professionals in the industry. Directing students will stage a New York showcase of their work for agents, artistic directors, and other theatre professionals. The course will also cover audition and interview techniques. Video work will be explored in detail, examining the difference between stage and on-camera direction and performance.

**TAPS 2755. Third Year Practicum: The Actor as Total Theatre Artist.**

Actor's produce, direct, write and perform an original solo piece as a culmination of their ongoing study of acting, directing and playwriting, with the goal of developing confident expression of their singular voice, point of view and artistic aesthetic as they enter the professional world. Writing, devising, presentation and critique of ongoing work all take place throughout the semester, culminating in a final public performance that serves as an acting thesis and manifesto of the actor's identity as an individual artist. This course includes private work with members of the Acting, Directing, Voice, Movement, and Playwriting faculty.

**TAPS 2760. Professional Performance.**

This is a two-credit course and is open only to students of the Brown University/Trinity Rep MFA Consortium program. It will include performance work in a variety of venues including, but not limited to, Trinity Rep's mainstage. Work might include major and/or minor roles at Trinity, as well as understudy responsibilities for the professional company. Based on their participation in this course, students will be awarded their union cards so that they are able to enter the professional area upon graduating.

**TAPS 2770. Directing: Practical Application.**

This is a two-credit course and is open only to students of the Brown University/Trinity Rep MFA Consortium program. Each student will direct a professional full-scale production in one of Trinity Rep's theatres. In addition to directorial duties, students will assist in casting and designing the play, and will be fully involved in areas of budget, publicity, press relations, marketing and development.

**TAPS 2890A. Theatricality: Labor, Time, Affect.**

No description available.

**TAPS 2970. Comprehensive Examination Preparation.**

For graduate students who have met the tuition requirement and are paying the registration fee to continue active enrollment while preparing for a preliminary examination.

**TAPS 2975. Thesis Workshop.**

For graduate playwrights, in their second and third years, rehearsing and revising their thesis projects. May be taken multiple times for credit. Must be taken both semesters in the third year.

**TAPS 2980. Graduate Level Independent Reading and Research.**

A program of intensive reading and research on selected topics arranged in terms of special needs and interests of the student. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**TAPS 2981. Master's Thesis Research.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**TAPS 2990. Thesis Preparation.**

For graduate students who have met the residency requirement and are continuing research on a full time basis.

## Urban Studies

### Director

Dietrich Neumann

The Urban Studies Program teaches students to analyze the city, urban life, and urbanization through a variety of disciplinary lenses. Students learn where cities come from, how they grow, thrive, and decline, how they are organized, and how to construct meaningful, inclusive, secure, and sustainable places. The curriculum examines how urban problems arise, how they have been previously addressed, and how to plan cities of the future. Concentrators enjoy the breadth of courses in American Studies, economics, history, literature, history of art and architecture, political science, sociology, and planning as well as provide in-depth courses integrating those perspectives. We introduce the fundamentals of Urban Studies scholarship as well as intense examination of an urban problem in focused seminars. These advanced seminars offer opportunities to write extensive and synthetic interdisciplinary analyses that serve as capstones to the concentration. The program's 10-course curriculum provides sufficient flexibility to allow students to pursue specific urban interests or to take courses in urban focus areas of Built Environment; Humanities; Social Sciences; and Sustainable Urbanism. The Program insures that students master at least one basic research methodology and perform research or fieldwork projects, which may result in an honors thesis. Fieldwork training includes working with local agencies and nonprofit organizations on practical urban problems. Capstone projects entail original research papers in Urban Studies seminars; academically supervised video, artistic, or community service projects; and Honors Theses for eligible concentrators.

For additional information, please visit the department's website: <http://www.brown.edu/academics/urban-studies/>

## Urban Studies Concentration Requirements

The Urban Studies program teaches students to analyze the city, urban life, and urbanization through a variety of disciplinary lenses. Students learn where cities come from, how they grow, thrive, and decline, how they are organized, and how to construct meaningful, inclusive, secure, and

sustainable places. The curriculum examines how urban problems arise, how they have been previously addressed, and how to plan cities of the future. Concentrators enjoy the breadth of courses in American Studies, economics, history, literature, history of art and architecture, political science, sociology, and planning as well as provide in-depth courses integrating those perspectives. We introduce the fundamentals of Urban Studies scholarship as well as intense examination of an urban problem in focused seminars. These advanced seminars offer opportunities to write extensive and synthetic interdisciplinary analyses that serve as capstones to the concentration. The program's 10-course curriculum provides sufficient flexibility to allow students to pursue specific urban interests or to take courses in urban focus areas of Built Environment; Humanities; Social Sciences; and Sustainable Urbanism. The Program insures that students master at least one basic research methodology and perform research or fieldwork projects, which may result in an honors thesis. Fieldwork training includes working with local agencies and nonprofit organizations on practical urban problems. Capstone projects entail original research papers in Urban Studies seminars; academically supervised video, artistic, or community service projects; and Honors Theses for eligible concentrators.

Concentrators who are especially interested in making deeper connections between their curriculum and long-term engaged activities such as internships, public service, humanitarian and development work, and many other possible forms of community involvement might consider the Engaged Scholar Program (<https://www.brown.edu/academics/urban-studies/curriculum/engaged-scholars-program>) in US. The program combines preparation, experience, and reflection to offer students opportunities to enhance the integration of academic learning and social engagement.

For a concentration, the program requires ten courses selected from four course groups:

<b>Introduction (choose one):</b>	<b>1</b>
POLS 0220	City Politics
URBN 0210	The City: An Introduction to Urban Studies
URBN 0230	Urban Life in Providence: An Introduction
<b>Research Methods (choose one):</b>	<b>1</b>
APMA 0650	Essential Statistics
APMA 1650	Statistical Inference I
APMA 1660	Statistical Inference II
CLPS 0900	Statistical Methods
ECON 1620	Introduction to Econometrics
EDUC 1110	Introductory Statistics for Education Research and Policy Analysis
PHP 1501	Essentials of Data Analysis
POLS 1600	Political Research Methods
SOC 1020	Methods of Social Research
SOC 1100	Introductory Statistics for Social Research
<b>Core Courses (3 courses required, in at least 3 disciplines, such as American studies, anthropology, economics, education, English, history, history of art and architecture, political science, and sociology, as well as urban planning when staffing allows)</b>	<b>3</b>
AMST 1612D	Cities of Sound: Place and History in American Pop Music
ANTH 1201	Introduction to Geographic Information Systems and Spatial Analysis
ANTH 1236	Urban Life: Anthropology in and of the City
ANTH 1255	Anthropology of Disasters
ECON 1410	Urban Economics
EEPS 1320	Introduction to Geographic Information Systems for Environmental Applications
ENGL 0100N	City Novels
ENGL 0700R	Modernist Cities
ENGL 1711D	Reading New York

ENVS 1400	Sustainable Design in the Built Environment
ENVS 1580	Environmental Stewardship and Resilience in Urban Systems
HIAA 0100	Introduction to Architectural Design Studio
HIAA 0710	The Other History of Modern Architecture
HIAA 0770	Architecture and Urbanism of Africa
HIAA 0850	Modern Architecture
HIAA 0860	Contemporary Architecture
HIAA 0861	City and Cinema
HIST 1550	American Urban History, 1600-1870
HIST 1551	American Urban History, 1870-1965 (HIST 1550::American Urban History to 1870)
POLS 0220	City Politics
POLS 1310	African American Politics
SOC 1330	Remaking the City
SOC 1340	Principles and Methods of Geographic Information Systems
SOC 1640	Social Exclusion
URBN 0074	Nineteenth-Century Architecture
URBN 1000	Fieldwork in the Urban Community
URBN 1200	The United States Metropolis, 1945-2000
URBN 1250	The Political Foundations of the City
URBN 1260	Housing in America
URBN 1270	Urban Politics and Urban Public Policy
<b>Seminar courses (choose three)</b> <sup>2</sup>	<b>3</b>
AMST 1903E	City of the American Century: The Culture and Politics of Urbanism in Postwar New York City
EDUC 1650	Policy Implementation in Education
HIAA 1850H	Berlin: Architecture, Politics and Memory
HIAA 1910A	Providence Architecture
SOC 0310	Theory and Practice of Engaged Scholarship (ESP Seminar)
URBN 1870A	American Culture and the City
URBN 1870D	Downtown Development
URBN 1870G	Ancient Cities: From the Origins Through Late Antiquity
URBN 1870I	The Changing American City
URBN 1870J	The Politics of Community Organizing
URBN 1870K	Jerusalem Since 1850: Religion, Politics, Cultural Heritage
URBN 1870M	Urban Regimes in the American Republic
URBN 1870N	The Cultural and Social Life of the Built Environment
URBN 1870Q	Cities in Mind: Modern Urban Thought and Theory
URBN 1870S	The City, the River, and the Sea: Social and Environmental Change at the Water's Edge
URBN 1870T	Transportation: An Urban Planning Perspective
URBN 1870V	City Senses: Urbanism Beyond Visual Spectacle
URBN 1870Z	Housing Justice
URBN 1871B	Berlin: Global Metropolis (1945-2020)
URBN 1941	How to Shape a City: An Introduction to Real Estate Development
<b>Complementary Curriculum (Total of 2 courses required):</b>	<b>2</b>

1. Any course from the Introductory or Core Curriculum options above not used to fulfill another requirement

2. OR Any of the following:

AFRI 0600	Race, Gender, and Urban Politics
AFRI 0620	African-American Life in the City
AMST 1611A	Making America: Twentieth-Century U.S. Immigrant/Ethnic Literature
AMST 1903G	Oral History and Community Memory
AMST 1904M	Charles Chapin and the Urban Public Health Movement
ANTH 0450	Inequality, Sustainability, and Mobility in a Car-Clogged World
ANTH 1301	Anthropology of Homelessness
ARCH 0317	Heritage in the Metropolis: Remembering and Preserving the Urban Past
ARCH 0400	City and Sanctuary in the Ancient World
ARCH 1150	Cities and Urban Space in the Ancient World
ARCH 1155	Cities, Colonies and Global Networks in the Western Mediterranean
ARCH 1200F	City and the Festival: Cult Practices and Architectural Production in the Ancient Near East
ARCH 1600	Archaeologies of the Near East
ARCH 1720	How Houses Build People
ARCH 1900	The Archaeology of College Hill
ECON 1370	Race and Inequality in the United States
EDUC 1100	Introduction to Qualitative Research Methods
EDUC 1150	Education, the Economy and School Reform
EDUC 1430	Social Psychology of Race, Class, and Gender
EDUC 1720	Urban Schools in Historical Perspective
ENGL 1710I	Harlem Renaissance: The Politics of Culture
ENGN 1930S	Land Use and Built Environment: An Entrepreneurial View
ENVS 0520	Wild Literature in the Urban Landscape
ENVS 1410	Environmental Law and Policy
ENVS 1555	Urban Agriculture: The Importance of Localized Food Systems
HIAA 0550	Gold, Wool and Stone: Painters and Bankers in Renaissance Tuscany
HIAA 0560	Constructing the Eternal City: Popes and Pilgrims in Early Modern Rome
HIAA 1560C	Renaissance Venice and the Veneto
HIAA 1850G	Contemporary American Urbanism: City Design and Planning, 1945-2000
HIST 1140	Samurai and Merchants, Prostitutes and Priests: Japanese Urban Culture in the Early Modern Period
HIST 1741	Capitalism, Land and Water: A World History: 1848 to the present
HIST 1961B	Cities and Urban Culture in China
HIST 1965A	City as Modernity: Popular Culture, Mass Consumption, Urban Entertainment in Nineteenth-Century Paris
HIST 1967R	History of Rio de Janeiro
HIST 1979J	London: 1750 to the Present
HIST 1979L	Urban History of Latin America
HIST 1980T	Modernity, Jews, and Urban Identities in Central Europe (JUDS 1718)
IAPA 1700A	Program Evaluation
IAPA 1803E	Social Entrepreneurship

ITAL 1580	Word, Image and Power in Early Modern Italy
JAPN 0910B	Japanese Cities: Tokyo and Kyoto
JUDS 1718	Modernity, Jews, and Urban Identities in Central Europe
POLS 1760	Infrastructure Policy
POLS 1824D	Power and Prosperity in Urban America
RUSS 1440	Imagining Moscow: Utopia and Urban Spaces in 20th-Century Russian Culture
STS 1701Q	The Fate of the Coast
SOC 0130	American Heritage: Democracy, Inequality, and Public Policy
SOC 1270	Race, Class, and Ethnicity in the Modern World
SOC 1540	Human Needs and Social Services
3. RISD courses approved by the Urban Studies Program each semester, <sup>3</sup> as applicable to the Urban Studies concentration.	
4. Any course taken at another university in the US or abroad and approved by the Urban Studies Program each semester (2 maximum)	

Total Credits 10

<sup>1</sup> There are also other statistics courses offered by other departments (e.g., Applied Mathematics, Cognitive Sciences, and Psychology). On occasion, an alternative research skills course may be approved for a specific concentration.

<sup>2</sup> The courses provide opportunities to undertake research or fieldwork projects and all qualify as "capstone" experiences.

<sup>3</sup> No more than **two** may be used to satisfy the requirements of this concentration. The RISD course is identified in the student's record at Brown by a RISD course code.

**Off-Campus Courses:** Some courses taken outside Brown (e.g., in study abroad programs) may be used for credit towards the concentration *if the material covered directly corresponds to that taught in Brown courses, or is relevant to the complementary curriculum*. Such courses will be approved each semester by the concentration advisor.

## Honors

Candidates for Honors must have above average grades and shall apply for this distinction in writing to the Director of the Program by the middle of the second semester of their junior year. They shall include a cover letter with a brief statement of the intended research proposal as well as the name of the member of the Urban Studies faculty who would serve as their advisor and with whom they must work closely. Twelve courses are required for Honors concentrator, two in addition to the ten courses required for a standard program. During the Fall and Spring of the senior year, honors candidates must complete two additional courses beyond the ten courses required by the regular concentration: URBN 1971 Senior Honors Thesis I in Urban Studies(S/NC) and URBN 1972 Senior Honors Thesis II in Urban Studies (grade). The candidate's final thesis must be of outstanding quality, in order to qualify for honors.

## Courses

### URBN 0074. Nineteenth-Century Architecture.

Surveys stylistic developments, new building types, and the changing conditions of architectural production through the 19th century. Special emphasis placed on the social context in which buildings were designed and used. Weekly one-hour conference required.

**URBN 0210. The City: An Introduction to Urban Studies.**

This introductory course to Urban Studies is taught in an entirely new format. Led by Professor Zipp, it will include lectures by Urban Studies faculty who will present their views of the field. It offers an interdisciplinary approach to the history, physical design, spatial form, economy, government, cultures, and social life of cities worldwide. Which are the most urgent issues facing cities today? How will continued urban growth affect the environment? How can we learn from historic approaches to urban planning? Which are the most promising solutions to relieve urban inequality? What can be learned from 'informal housing' developments?

**URBN 0230. Urban Life in Providence: An Introduction.**

An introduction to Urban Studies and to the city of Providence, this first year seminar explores from an interdisciplinary perspective how cities are broadly conceptualized and studied. Students then focus on urban dwelling, using Providence as a first-hand case study. We comprehensively examine urban life and change, attending to urban history, the diverse configurations of people and place, social and environmental issues, and urban sustainability. In a lively and varied approach to local learning, course activities include lectures, discussion, reading and writing assignments, films and other media, guest speakers, and excursions to local sites. Enrollment limited to 19 first year students.

**URBN 1000. Fieldwork in the Urban Community.**

Each student undertakes a fieldwork project in close collaboration with a government agency, a nonprofit association, or a planning firm, thereby simultaneously engaging with community and learning qualitative research methods skills. In weekly seminar meetings, the class examines a series of urban issues and discusses fieldwork methodology. Students also schedule regular appointments with the instructor.

**URBN 1010. Fieldwork in Urban Archaeology and Historical Preservation.**

Study of the surface and subsurface features of the urban built environment. An introduction to research methods and fieldwork procedures used by archaeologists and historical preservationists who work on urban sites. Students undertake fieldwork projects that involve archival research, close examination of historic structures, and theoretical analysis of the changing urban landscape. Priority given to Urban Studies concentrators and American Civilization grad students. Other students selected on first day of class.

**URBN 1200. The United States Metropolis, 1945-2000.**

This lecture and discussion course will provide students with an introduction to the history, politics, and culture of United States cities and suburbs from the end of World War II to the close of the twentieth century. Readings are drawn from recent work in the political, social, and cultural history of U.S. cities as well as primary sources rooted in the period under study.

**URBN 1210. Regional Planning.**

Urban sprawl, uncoordinated land use policy, environmental decline, shrinking cities, regional inequities in housing, education, and tax capacity are all challenges that transcend city boundaries. Does it take regional planning to address these challenges? What can regional planning provide that urban planning cannot? In this course, students will develop a critical understanding of regional planning approaches to economic, social, environmental, and land use issues in the United States and abroad. Students will learn urban and regional planning methods which will be integrated throughout the course. A weekly studio and practical group projects are planned.

**URBN 1220. Planning Sustainable Cities.**

What does sustainability mean in the context of urban areas? Can sustainability be achieved in cities? If so, in what contexts and how? In this course, we will explore theoretical elements of sustainable development and their applications to urban planning. We will also explore various practices in important subfields of planning -- land use, transportation, brownfields redevelopment, affordable housing, renewable energy, food systems, economic development, and governance. This is a project-based course and includes lectures, discussions, workshops, case studies, selected guest speakers, a final project and a mandatory field trip. The approach is interdisciplinary and open to non-concentrators.

**URBN 1230. Crime and the City.**

This course focuses on crime and the making of urban space, as well as how the making of urban space helps to create and categorize criminal subjects and the concept of cultural criminality. In addition to looking at the geography of race, class, and power in a contemporary US setting, this semester we will focus in on gang identity and performance, police tactics and territoriality, graffiti as an act of spatial transgression, homelessness, and notions of socio-spatial justice. As I will show with the course texts and through classroom lectures, studying crime is about studying space, and visa versa.

**URBN 1250. The Political Foundations of the City.**

This course examines the history of urban and social welfare policy in the United States and abroad. It reviews major theories accounting for the origins and subsequent development of welfare states, explains the "exceptional" nature of American public policy, and employs a combination of historical texts and case studies to analyze the connections between politics and the urban environment.

**URBN 1260. Housing in America.**

An examination of why housing matters to individuals, communities, and the nation. This course examines the unique qualities of housing and associated American cultural ideals and norms. The changing role of the government in housing is considered, along with other factors shaping the provision of housing, and the success and failure of housing programs. While housing is a necessity, for many in America housing choices are constrained as costs are unaffordable, discriminatory practices remain, and physical features do not align with needs. This course deliberates how well America meets the challenge of providing decent shelter for all residents.

**URBN 1270. Urban Politics and Urban Public Policy.**

A central theme of the course is that urban politics in the United arises from the interplay of governmental power and private resources. The course describes the emergence of urban America; the modern city and the theories that have evolved to explain urban politics; and the nature of the urban condition with particular emphasis on the challenges faced by residents and government in the post-industrial city.

**URBN 1500. Understanding the City through Data.**

Cities are complex systems, but luckily there are lots of data and analysis techniques to make sense of them. In this project-based course, you will learn to conduct a variety of data analysis techniques that are commonly used and essential in urban studies. The case studies will be selected from humanities, social sciences, and real-life urban problems.

**URBN 1870A. American Culture and the City.**

This course explores American culture and the way it shapes our cities. Topics include the American dream, race, immigration, urban dilemmas, white supremacy, and the seduction of suburbia. We read a book (readings include Alexis de Tocqueville, Richard Wright, Toni Morrison, Tom Wolfe, W.E.B Du Bois, and others). Films include *Wall Street* and *Gangs of New York*. Prerequisite: POLS 0220. Priority given to Urban Studies concentrators.

**URBN 1870C. The Environment Built: Urban Environmental History and Urban Environmentalism for the 21st Century.**

The term "built environment" suggests an intimate relationship between natural and human-made landscapes. For the last twenty years, environmental historians such as William Cronon have contributed to the project of transcending the false dichotomy between a "pristine" natural environment and the (supposedly artificial) social, cultural, and political terrain of humans. Building upon this important scholarly trajectory, this seminar will re-examine these and other important contributions in light of recent environmental and urban disasters, aiming to bring theoretical readings in environmental history down to earth in order to inspire new ways of thinking about the "environment" for the 21st century. Enrollment limited to 20 juniors and seniors. Instructor permission required.

**URBN 1870D. Downtown Development.**

This seminar examines the development and revitalization of the urban core in the United States with a focus on urban planning. Providence is used as a laboratory to explore development from the perspective of the planner, the developer, and city residents. Important concepts are illustrated through field trips, public meetings, and guest speakers.

**URBN 1870F. Housing and Homelessness.**

What is homelessness and where does it come from? Can affordable housing solve the problem? This seminar examines homelessness, low-income housing policies, segregation, gentrification, privatization of public space, and related processes that make it difficult to house the poor. Open to Urban Studies concentrators and by permission based on demonstration of research skills. Enrollment limited to 20.

**URBN 1870G. Ancient Cities: From the Origins Through Late Antiquity.**

This seminar explores major cities of the ancient Near East (Mesopotamia, Asia Minor, and the Levant), Egypt, Greece, and Italy from the origins through late antiquity. The primary focus will be on the physical appearance and overall plans of the cities, their natural and man-made components, their domestic and private as well as their religious and secular spaces. Objects and artifacts of daily life, including pottery, sculpture, wall paintings, mosaics, and various small finds will be evaluated to establish a more nuanced understanding of the different architectural and urban contexts.

**URBN 1870H. Rivers and Cities.**

Rivers promote urban development and serve as important resources and cultural amenities for communities. This interdisciplinary seminar looks at the use and abuse of selected rivers which have run by or through American cities from the colonial period to the present.

**URBN 1870I. The Changing American City.**

This course examines the recent evolution of the American city. We will consider various external forces that act upon the city, principally (a) migration patterns, (b) economic and technological change, and (c) public policy. We will also consider how various groups and political leaders respond to these forces and on what resources they draw. Priority given to Urban Studies and Political Science concentrators.

**URBN 1870J. The Politics of Community Organizing.**

Introduces key issues concerning community organizing. Focuses on the life, skills, and tactics of Saul Alinsky and the national organization he founded, the Industrial Areas Foundation (IAF). Analyzes the work of the IAF in a number of urban settings. Seeks to develop theories and models for studying community mobilization in urban America. Priority given to Political Science and Urban Studies concentrators.

**URBN 1870K. Jerusalem Since 1850: Religion, Politics, Cultural Heritage.**

This seminar surveys the history of archaeological exploration, discovery, and interpretation in the contexts of social, political and religious debates from the mid-nineteenth century to the present, with an emphasis on the post-1967 period. It examines the legal settings and ethical precepts of archaeological activity and the developing discourse of cultural heritage. It analyzes the ongoing struggle to discover and define the city's past, to expose its physical legacy, and to advance claims of scientific validity and objectivity against the challenges of religious zeal and political partisanship, the latter both intimately related though not necessarily limited to the ongoing Israeli-Palestinian conflict.

**URBN 1870M. Urban Regimes in the American Republic.**

A probing of topical issues in both their theoretical antecedents and their contemporary manifestations. Examines the intellectual debates and the scholarly treatments surrounding issues of power in the city, urban redevelopment policy, urban poverty, urban educational policy, and race in the city. Enrollment limited to 20.

**URBN 1870N. The Cultural and Social Life of the Built Environment.**

This seminar investigates the relationship between people and place. It considers the ways that people create and experience the human-made landscape, how they understand place through various aesthetic forms, and political conflict over space and place. We look mostly at the history and contemporary development of cities and suburbs in the United States. Students will prepare a final project on a specific aspect of the built environment; they will be encouraged to focus their research on Providence or another local community. Enrollment limited to 20. Priority given to Urban Studies concentrators and seniors; instructor permission required otherwise.

**URBN 1870P. Representing the Twentieth-Century City.**

Will explore the impact of a variety of techniques of representation on the formulation and conceptualization of a variety of "urban problems" in twentieth-century Europe and America. Will employ an active, "hands-on" approach, and therefore centers on a series of projects: in addition to reading classic works in urban planning history and the history of science, participants will choose their own "urban problem" to explore throughout the semester. They will conduct an in-depth interview with a key figure involved in contemporary debates about this problem, write an "ideas piece" or editorial about it, and, finally, submit a research paper. Enrollment limited to 20 juniors and seniors.

**URBN 1870Q. Cities in Mind: Modern Urban Thought and Theory.**

This seminar investigates the place of the city in the history of modern thought and cultural theory, drawing on selected currents in urban thought and theory from Europe and the United States over the last two centuries. Topics include questions of public and private space, citizenship, selfhood, difference and inequality, media and technology, planning, modernism and postmodernism. Enrollment limited to 20 juniors and seniors, preference for those concentrating in Urban Studies.

**URBN 1870R. Bottom-up Urbanism.**

Cities are produced by those who possess political authority, technical expertise, and dominant forms of economic, social, and cultural capital. In this course, however, we will focus on the production of urban space and fight for spatial justice from the bottom up. We will examine everyday creative, illicit, autonomous, anarchic, and agent-based urbanism as practiced by members of subgroups, from graffiti writers and Occupy protestors to place-based communities of color, who re-envision, re-aestheticize, and physically transform their surroundings, develop new forms of symbolic capital, and produce alternative socio-spatial realities in a quest for inclusive urban futures.

**URBN 1870S. The City, the River, and the Sea: Social and Environmental Change at the Water's Edge.**

This course examines urban social and environmental change at the water's edge, focusing in particular on urban rivers, coastal areas, and deltas. Beginning with key frameworks for understanding the relationship between people and place, students explore the history and current concerns of urbanization, within the larger and increasingly urgent inquiry on human dwelling and water/waterways. The course is then organized around key topics and case studies from around the world, framed by historical and scientific data but also explored through ethnography, narrative non-fiction, and documentary work to understand how water, urban dwelling, and change are variously experienced, enacted, and presented.

**URBN 1870T. Transportation: An Urban Planning Perspective.**

This seminar explores how urban planners in the U.S. plan for and around various transportation networks. We will examine how these networks are designed and funded, which modes get priority over others, and ultimately how transportation shapes the built environment. Realworld examples of plans and projects from Providence and Rhode Island are used throughout the course. Important concepts are illustrated through field trips and guest speakers.

**URBN 1870U. Critical Urban Theory.**

In this seminar students will closely read and apply critical theory to thinking about urban formations and inherent socio-spatial inequalities and forms of everyday representation in a contemporary US context. More broadly, students will become familiar with geographical thought coming out of the social sciences and humanities that advances the decidedly spatial perspective that the majority of social, economic, political, and environmental problems and their potential solutions are urban-based.

**URBN 1870V. City Senses: Urbanism Beyond Visual Spectacle.**

Architecture and urbanism provide synesthetic experiences of space that don't necessarily privilege visual perception. This project seminar explores alternative approaches to design and an understanding of the city through explorations of all the senses. We will read philosophical ideologies and the physical experiences of the sounds of bells, traffic, and water; the smells of foods, plants, and sewers; and the feelings of light and shade. Through the identification of unconventional sensory markers, sound recordings, scent distillations, or films of different corporeal means of navigating the city, we will create a digital exhibition that consists of interactive maps of Providence.

**URBN 1870W. World Cities.**

Populations the world over are urbanizing, creating mega-cities with mega-prospects and mega-problems. This course considers urbanization and urban life in the world's largest and most prominent cities. Examines the economic, political, social, cultural, and other forces that push and pull migrants to global cities and the ways those cities respond to growth--and sometimes decline. Students confront urban challenges--inadequate infrastructure, transportation, and housing environmental degradation, architectural and heritage preservation, social diversity and conflict, crime and informal employment. Students also learn what makes places distinctive by comparing global cities from regions around the world.

**URBN 1870Z. Housing Justice.**

Housing is fundamental to overall well-being, yet in RI many cannot find affordable, decent housing aligned with their needs. This community-based research course engages with local housing justice organizations working for change. Course participants, organizational staff, and community members will gather and analyze data to inform interventions and/or modify policies. After some foundational studies, the semester will be spent immersed in a team research project. Topics may include evictions, studentification and gentrification, rental inspections, property ownership, and healthy housing. The course will advance skills in research, communication, and collaboration, and expand understanding of the housing system.

**URBN 1871B. Berlin: Global Metropolis (1945-2020).**

This seminar explores the physical and human landscapes of post-war Berlin: its steadily expanding urban fabric and how it engages with the rapidly changing population make-up. The focus will be on the tension between past and present histories, new German identities, the recent massive migrations, anti-Semitism and Islamophobia, and how these social and geopolitical phenomena interact with the city's urban spaces and monuments. As case studies, we will explore the relationship among Germans and three other significant communities: Turks, Israelis, and Palestinians.

**URBN 1900. Land Use Planning: The Future of the I-195 Parcels.**

This studio examines how one represents, analyzes, constructs and projects the future design of an urban site. One approach examines the city as a series of distinct physical spaces and operates by establishing typological standards and constructs significant and iconic public spaces. The second approach is concerned with the city as a technical object that organizes time -- the operational aspects of the city -- as well as space. In this studio, we ask you to consider how intervening in a specific location in downtown Providence can initiate a larger plan and longer-term vision through urban and an architectural scale propositions. Enrollment limited to 10 seniors concentrating in Urban Studies and History of Art and Architecture.

**URBN 1910. Drawing and Creating in 2D, 3D and CAD for Architecture and Urban Design.**

This class equips students with an array of techniques for developing and recording ideas in architecture and urban design. Geometric techniques, such as orthogonal plans, section cuts, elevations, axonometric projections and simple perspective systems, are introduced along with procedures for exploring qualitative and time-based factors. Practical assignments cover the use of sketch and formal (projection) techniques in both analog and digital media (including CAD applications). Brief readings and class discussions provide a critical understanding of the various techniques, their history, their particular strengths and their appropriate contexts of use.

**URBN 1920. Introduction to Urban Design and Planning: The City as System.**

Urban design and planning are the tools that shape the physical and social fabrics of the city: Urbs and Civitas. The distinction between urban and civic --the built city and the city of human relationships-- has shifted in light of the current process of global urbanization. This seminar will examine the role of urban design and planning in shaping the systemic city of the 21st century. Our conversations about current theories and practices of urban design, planning and urban systems will be accompanied by a hands-on design exercise to experience how the future of cities is planned in the present.

**URBN 1921. Theory of Architecture and Urbanism.**

The course introduces the theory of architecture and urbanism. It focuses on the notion that theory is closely related to the crisis of architecture and urbanism as experienced with the rise of the modern metropolis in the mid-19th century. The formation of mass society, the deployment of new materials such as steel, glass and concrete, and the replacement of manual labour by machine production scrutinized the classical concepts of space, architecture and city. The course will follow the changing concept of theory from the advent of the modern metropolis through high modernism, postmodernity, deconstruction and the age of digital production.

**URBN 1930. Brown in Providence.**

This course will explore the long interrelationship between Brown University and the city it calls home. Through guided readings, independent research and spirited conversation, we will trace the many ways in which Brown's urban setting has defined the university over its 250 years. We will consider Rhode Island's unique history as a refuge for the persecuted, the transformations of the Industrial Revolution and the ways in which immense political and demographic changes of the 19th and 20th centuries left their mark on Brown.

**URBN 1932. The Just City: Installment I, Comparative Perspectives on Juvenile Justice Reform.**

The first installment in a series on "the just city," this course focuses on juvenile justice reform. Beginning with a broad view of the just city, the course then examines: 1) urban childhoods and constructions of race, inequality, and delinquency and 2) juvenile justice reform from a comparative perspective that includes local, U.S., and international contexts. An engaged scholars course, students participate in reflexive practices to draw connections between course content, their own experiences, and specific community-based contexts. At the end of the semester, students write and share reports in a public forum conceptualized and organized by the class.

**URBN 1940. Planning, Designing, Building in West Africa: Informality from Urban Scale to Material Choices.**

This project seminar introduces students to the urban character and architecture of economic informality in developing countries. The focus will be on West Africa and more specifically on Niger to explore what the phenomenon is, how it expresses itself and how it impacts the urban fabric. Students will be exposed to images and writings that explore urban infrastructure in West Africa, its networks and actors. The course will explore and encourage students to think of ways in which the informal economy and its architecture can become a part of the urban design logic of cities in many parts of Africa.

**URBN 1941. How to Shape a City: An Introduction to Real Estate Development.**

Have you ever wondered why cities take the form they do, with tall offices in some districts and low-density housing in others? Or how run-down parts of an older city evolve overnight into "hot," happening places? This course will introduce the fundamentals of real estate development, examining a variety of development forms from multiple perspectives -- including those of the city, the developer and the local citizen. Using examples from Providence and elsewhere, it will provide students with both insight into the forces determining the shape of modern American cities and hands-on tools to begin shaping the urban environment themselves.

**URBN 1942. Designing the 21st Century City in West Africa: Informality and New Urban Planning Languages.**

Nowhere in the world is urbanization happening at the rate it is in developing countries, which are experiencing unprecedented pressures on their urban economies. This seminar-studio introduces students to the urban character and architecture of economic informality in those countries. The focus will be on West Africa and more specifically on Niger to explore the phenomenon and how it inserts itself in the urban fabric. The studio phase of the course will encourage students to propose ways in which the informal economy and its architecture can become a part of the urban design logic of many African cities.

**URBN 1943. The Real Estate Development Process: An Entrepreneurial Lens.**

Real estate development is the ongoing configuration of the built environment for society's needs. The improved spaces in which we live, work, and play all started as ideas initiated and brought to fruition. Every real estate project, whether it's making use of unused land or redeveloping existing properties, is in essence a separate business undertaking employing the three factors of production - land, labor, and capital - to create a new or changed product. These factors are coordinated by entrepreneurial management and delivered by teams.

**URBN 1970. Independent Reading and Research.**

A specific program of intensive reading and research arranged in terms of the special needs and interests of the student. Open primarily to concentrators, but others may be admitted by written permission. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**URBN 1971. Senior Honors Thesis I in Urban Studies.**

A program of intensive reading, research, and writing under the direction of a faculty member. Permission should be obtained from the Thesis Advisor in Urban Studies. Mandatory attendance at periodic meetings during the semester is required. Open to Senior Urban Studies concentrators pursuing Honors in Urban Studies. Instructor permission required.

**URBN 1972. Senior Honors Thesis II in Urban Studies.**

A program of intensive reading, research, and writing under the direction of a faculty member. Permission should be obtained from the Thesis Advisor in Urban Studies. Mandatory attendance at periodic meetings during the semester is required. Open to Senior Urban Studies concentrators pursuing Honors in Urban Studies. Instructor permission required.

**URBN 1981. Honors Thesis Workshop.**

This seminar introduces students to independent research and writing skills necessary for successful and timely completion of the honors thesis. Course work includes presentation of one's own thesis drafts and peer review of classmates' work. All students who submit an approved honors thesis proposal shall enroll in URBN 1981 for the spring semester of their thesis research and writing. Concentrators may also enroll in the course during semesters 6 or 7 in preparation for the honors thesis, but must present a written proposal in place of chapters. Enrollment limited to 20 juniors and seniors in Urban Studies. S/NC

**URBN XLIST. Courses of Interest to Concentrators in Urban Studies.**

## Visual Art

### Chair

Leslie A. Bostrom

A Visual Art education at Brown is a rich experience of conceptual challenge, skill-building, and self-discovery. Our students acquire the intellectual and practical tools to make art, as well as to interpret and critique the world of images. We offer a range of courses: digital media, drawing, painting, photography, printmaking, sculpture, and video. Our students also have opportunities to take classes at the neighboring Rhode Island School of Design.

For additional information, please visit the department's website: <https://www.brown.edu/art>

## Visual Art Concentration Requirements

The Visual Art concentration engages in artistic practice across a wide range of media: painting, sculpture, printmaking, drawing, photography, and digital imaging. Courses in art history combine with these to frame the direction of the concentrator's work and to develop his or her critical thinking skills. Students are encouraged to cultivate an informed and thoughtful individual perspective. Students in the Visual Arts department enjoy cutting-edge facilities and a knowledgeable faculty. These two resources inspire creativity and pleasure in our concentrators while they explore the discipline. Students acquire the intellectual and practical tools to make art as well as to interpret and critique the world of images. Students also have the opportunity to take courses at the neighboring Rhode Island School of Design. All Visual Art (VISA) courses are graded S/NC (<https://www.brown.edu/academics/college/degree/policies/grade-options>).

### Concentration Program Requirements

**Concentration Requirements:**

VISA 0100	Studio Foundation (Prerequisite for all upper-level studio courses)	1
2 of the following 5 discipline-based foundation courses are required.		2

VISA 0120	Foundation Media (This course is a prerequisite for upper-level Media courses such as New Genre and Video Art)	
VISA 0130	Sculpture Foundation	
VISA 0140	Photography Foundation	
VISA 0150	Digital 2D Foundation	
VISA 0160	Painting Foundation	

5 additional upper level studio courses are required. A minimum of three elective studio courses must be taken in the Brown Visual Art Department

**3 HIAA courses are required:**

HIAA 0010	A Global History of Art and Architecture	1
1 course covering Modern or Contemporary Art History such as those listed below		1
HIAA 0801	Art After '68	
or HIAA 0810	20th Century Sculpture	
or HIAA 0870	20th Century British Art: Edwardian to Contemporary	

One additional History of Art and Architecture course.

Senior Thesis Exhibition: which does not carry academic credit, is required for graduation (usually presented during the seventh or eighth semester).

Total Credits 11

### Honors

The project is a two-semester enterprise and counts as two courses taken for graduation credit VISA 1800C (Sem I) and VISA 1990 (Sem II) but will not count as two of the eleven courses needed for the visual art concentration. Students that are planning to complete their degree requirements in December must apply for honors by December 5 of the previous year.

### Courses

**VISA 0061. Drawing I and II: Introduction and Advanced Tutorial in Comillas.**

Drawing on-site and in the studio from nature, still life and the imagination in a variety of media. Great emphasis is placed on creative work and classroom participation. Weekend field trips are required. Course taught in Comillas, Spain.

**VISA 0062. Printmaking Workshop.**

No description available.

**VISA 0063. Painting I and II: Color and Pattern, Nature and Culture in Comillas.**

This high immersion studio class will investigate painting based on information collected from the surrounding environment and within the town of Comillas, Spain. Assignments will relate to the ocean, mountains, animals and Northern Spanish culture with an emphasis on color. Assignments will stem from direct observation and selected visual findings within the landscape, field trips and local architecture. The class will accommodate both beginning and advanced level students through individual and group critiques.

**VISA 0064. Sculpture/Installation/Site Work.**

No description available.

**VISA 0070. From Beginning to End: Process and Creation.**

This course, collaboratively offered by the Visual Art Department and Brown Arts Initiative, will be based in Los Angeles and focus on the intersection of visual art, film and the music industry while addressing artistic practice throughout the creation process. Each week will follow a three-part analytical framework based on the notions of idea, creation, and public presentation. Discussions with artists, musicians, curators, filmmakers, writers and actors will provide professional perspectives to students who have an interest in one or more areas within the arts. Meetings with artists will be supported by studio and museum visits, screenings and concerts.

**VISA 0100. Studio Foundation.**

Required for all VA and RISD courses (with the exception of VISA0120, VISA0130, VISA0140, VISA0150 and VISA0160). Covers the basics of drawing and 2D design while cultivating the capacity for visual thinking. The Registrar's Office manages an online lottery for registration for this popular course. Students not enrolled through the lottery should attend the first class meeting.

**VISA 0110. Advanced Studio Foundation.**

Some students arrive at Brown with a greater understanding of visual art principles than most, yet need an introduction to other aspects before taking more advanced courses. Figure drawing is practiced throughout the semester, utilizing a variety of media. Weekly outside assignments explore diverse themes and become the subject of comprehensive class discussions. Portfolio review required for admission submitted one week prior to the start of classes. See morning mail & department website for details. Students will be notified by the end of the first week of classes.

**VISA 0120. Foundation Media.**

Foundation media focuses on the production and theory of time-based digital media and introduces the computer as a medium and a tool for art. Students will experiment with the production of video, sound, and interactive media. Students will examine and produce work that is multidisciplinary in nature, combining aspects of critical discourse, art, and technology.

**VISA 0130. Sculpture Foundation.**

This is an extensive study in form and structure. It is designed to develop spatial understanding and the fundamentals of 3-dimensional design and construction. Students will explore the structural, compositional and conceptual implications of common materials, such as wood, metal, plaster and found objects. Projects are designed as a means for investigating a variety of sculptural processes. Students will learn safe usage of power and hand tools, casting techniques, wood and metal work. In addition, special emphasis will be placed on creativity, critical thinking and the ability to successfully articulate ideas visually.

**VISA 0140. Photography Foundation.**

This class is a wide ranging technical and conceptual introduction to photography. Through weekly projects, students will be exposed to 19th-21st century photo processes. Topics covered include cameras, lenses, software, darkroom overview, scanning, natural and artificial lighting, alternative processes as well as concepts such as selective focus, color temperature, composition. Short readings and in-class slide presentations on a diverse range of photographers will introduce students to the history of photography. This course will prepare students for upper level Photography classes at Brown and RISD.

**VISA 0150. Digital 2D Foundation.**

This foundation studio course introduces the basic practices and concepts of two-dimensional digital media production including image acquisition, editing and manipulation, vector illustration, and preparation for online and offline viewing. Through studio exercises, readings, and assignments we will experiment with the production of electronic images. We will be looking at and producing work that is conscious and critical in nature, and which combines aspects of contemporary art, media, and technology. Collaboration and group work will be encouraged to share learning techniques and skill resources.

**VISA 0710. Introduction to Filmmaking: Time and Form (MCM 0710).**

Interested students must register for MCM 0710.

**VISA 0730. Introduction to Video Production: Critical Strategies and Histories (MCM 0730).**

Interested students must register for MCM 0730.

**VISA 0750. Digital Art (MCM 0750).**

Interested students must register for MCM 0750.

**VISA 0800H. TV/Not TV: Theory and Production (MCM 0800H).**

Interested students must register for MCM 0800H.

**VISA 1000. The Arts Workshop for Practice and Practice-Oriented Research (LITR 1000).**

Interested students must register for LITR 1000.

**VISA 1080. The School of Arte Útil.**

Arte Útil was conceived by artist Tania Bruguera in 2013 to address art's use as a tool for social & political change. Whether through self-organized groups, individual initiatives, or rise of user-generated content, people are developing new methods and social formations to deal with issues that were once the domain of the state. These initiatives are not isolated incidents, but also part of an art history that has been neglected, yet shapes our contemporary world. Interested students must complete this form (<https://tinyurl.com/ybtt12r4>), and must attend all scheduled classes during shopping period for consideration. Questions? Contact: TA, [zohar\\_frank@brown.edu](mailto:zohar_frank@brown.edu)

**VISA 1110. Drawing.**

This course focuses on drawing from models, observation, and imagination in a variety of media with an emphasis on creative work and classroom participation. A continuing series of outside assignments is emphasized. Visits to galleries, museums and pertinent exhibitions may be undertaken. The later part of this course will introduce ideas of conceptual and political art into the drawing process. Enrollment restricted to 18 students.

**VISA 1120. Drawing II.**

Drawing from the imagination, the model, and landscapes in a variety of media. Great emphasis is placed on creative work and on classroom participation. Prerequisite: VISA 0100 or 0110. This course restricted to 20 students. 18 seats will be available during pre-registration. This class will satisfy VA concentration requirement for drawing. Students who are not admitted during pre-registration or were unable to pre-register should attend the first meeting.

**VISA 1130. Drawing for Projection.**

A studio course which will address the issues and techniques of drawing for motion, animation and/or projection. We will undertake one semester-long project undertaken with several short parallel works.

**VISA 1140. Monumental Drawing.**

Monumental Drawing is an immersive studio art course exploring expansive, experimental approaches to drawing. Large-scale, ambitious projects will engage risk-taking and developing meaning through intensive studio work. Contemporary drawing has become a powerful medium in its own right. From process and experiential beginnings to site-specific and conceptual directions, artists have pushed the medium with ideas and projects that challenge any restrictive definition of the medium. Through innovations in concept, materials, form and location, there are limitless ways of approaching the making of and defining what a drawing can be. Studio projects assigned will explore and expand upon these ideas.

**VISA 1160. Drawing with Watercolor.**

This course will be a rigorous examination of the possibilities of drawing with watercolor, with an emphasis on unorthodox use of the watercolor medium. Because the basis of watercolor is sound drawing, there will be considerable instruction and practice in drawing fundamentals such as perspective, value, composition, scale, rendering, etc. Required prerequisite: VISA 0100 or by permission.

**VISA 1170. Nature of Interpretation: Information and Abstraction.**

Nature of Interpretation is a studio art course with a seminar component. We will consider science and scientific images as conceptual frameworks for making and looking at art images. Students will learn the basics of digital image acquisition and production, and develop a series of digital and/or digital-photographic artworks that respond to the themes and methodologies of the course. Art, History of Art, and Science background desired— Not required.

**VISA 1210A. Big Woodcut.**

This class will work both in black and white, as well as in color, using a reduction process. The emphasis will be on printing on a large scale, using various types of paper. Much independent work will be required, along with participation in classroom discussions and critiques. Lottery for spaces reserved for nonconcentrators. Prerequisite: VISA 0100.

**VISA 1210B. Etching.**

Covers all aspects of black and white etching, using zinc plates. Combines an emphasis on traditional skills and craft with a critical and theoretical approach to images. Extensive outside work required. Prerequisite: VISA 0100 or VISA 0110.

**VISA 1210C. Investigating Collage.**

This course will be an artistic and intellectual investigation of 2 dimensional collage, which is the juxtaposition or arrangement of multiple images or parts of images to create fresh meanings and narratives. We will be working mostly with scissors, paper, printing, painting, and glue, supplemented with slides and reading. Use of the computer to complete some assignments will be optional. Prerequisite: VISA 0100 or VISA 0110.

**VISA 1210D. Lithography I & II.**

Lithography is the most versatile printmaking process. Working on limestone and aluminum plates, students will learn to produce, process and print their work. Class participation is vital, as students will be aiding each other in this complicated process. This course requires considerable time outside of class. Lithography can be repeated, with experienced students learning multi-plate color processes.

**VISA 1210E. Printmaking.**

This course covers a range of traditional and digital printmaking processes. The course will explore how traditional and digital techniques can be used together and how they may interact with and influence one another. Work will be in both black and white and color. Prerequisite: VISA 0100 or VISA 0110.

**VISA 1210F. Relief Printing.**

No description available. Prerequisite: VISA 0100 or VISA 0110.

**VISA 1210G. Silkscreen.**

This course will provide students with a thorough knowledge of both water-based screen printing techniques and digital imaging. The intersection of digital printing processes and screen printing within the context of contemporary works on paper will be explored through a series of experimental mixed-media projects. Work will be in both black and white and color. Prerequisite: VISA 0100 or VISA 0110. This course restricted to 17 students. Students who are not admitted during pre-registration or were unable to pre-register should attend the first class.

**VISA 1210I. Woodcut.**

Woodcut, the simplest printmaking method, has been used as a communication device for more than a thousand years. Students will work in both black and white and color to address contemporary issues. The history and aesthetics of the political poster will provide the foundational knowledge for the class. Prerequisite: VISA 0100 or VISA 0110. Enrollment limited to 17. Students who are not admitted during pre-registration or who were unable to pre-register should attend the first class.

**VISA 1210J. Making Monotypes: Ideas Through Printed Variation.**

The aim of the course is to understand the variability, sequencing potential and the inherent luminosity of the monotype medium and to use these attributes to discover and advance one's own visual ideas. Monotype refers to the making of a single unique print through press and non-press means. Several rapid projects with themes will precede a longer series culminating in a final epic portfolio of independent content. Individual, peer, and small and large group critiques will occur weekly for feedback. Students who are not admitted during pre-registration or were unable to pre-register should attend the first meeting.

**VISA 1210K. Digital Printmaking.**

This studio art course investigates possibilities for using the computer along w/traditional painting and printmaking processes to produce image-based intermedial work. We will explore how computers and computer networks have changed the creation, content, form, distribution, and exhibition of artwork through a series of assignments, readings, discussions, and slide lectures, and how computers and digital media can intersect with a traditional studio practice. Students will produce a portfolio of mixed-media work. Photoshop, Illustrator, the internet, and digital printers, along with traditional painting, drawing, and printing mediums will be used as tools for art-making.

**VISA 1240. Art of the Book.**

Will examine the book, structurally and conceptually, as artist's medium. Students will learn the materials, tools and techniques of making books, as they explore the expressive and narrative possibilities of the book form. Topics and projects may include digital imaging, combining text and image, traditional binding or digital publishing. Students who are not admitted during pre-registration or were unable to pre-register should attend the first meeting.

**VISA 1250. Art of the Book.**

We will examine the artist's book from the printer/publisher perspective. Students will learn the basics of book design, traditional typography & letterpress printing. Students will consider the book and its related printed matter in service of its content. The course will be run as a fine press publishing house. Students will produce individual and group projects, including bookplates, broadsides, and books. Studio work will be augmented with field trips, artist visits, and guided exploration of the special collections at the John Hay Library. Students who are not admitted during pre-registration or were unable to pre-register should attend the first meeting.

**VISA 1300. Words in Painting.**

Words in painting introduce sound into what is usually a silent experience; they force the viewer to both look and read. Writing is a form of drawing. Words can be poetry, advertising, or labeling. Words can be admired abstractly for their form. For much of history, words and pictures have been used to tell important stories, deliver political content, or sell consumer goods. This course will examine the use of words in contemporary painting through readings, slides, and discussion. A series of painting assignments will address the artistic problems of using words.

**VISA 1310. Beginning Painting.**

This painting course explores ideas and concepts in contemporary painting and emphasizes individual projects based on prompts. Students will experiment with materials, color and scale strengthening ideas through individual investigations into content and context. Critiques, readings, writing assignments and final projects will be supplemented by research into artists and movements that have developed within the last several decades. Enrollment limited to 14. Prerequisites: VISA 0100.

**VISA 1320. Advanced Painting.**

This course is an in-depth investigation of contemporary painting practices and concepts, with a strong emphasis placed on critique. Experimentation and exploration of individual themes is emphasized. Affords an opportunity for in-depth investigations of painting techniques and ideas and the development of a series of works reflecting an individual creative vision.

**VISA 1320A. Advanced Painting: The Mediated Image.**

In this advanced course we will explore how painting might serve as a lens through which to view and respond to the digital world. An emphasis will be placed on exploration of individual interests; students will choose a subject to research (i.e. digital aesthetics, computer graphics, photography, video, gaming, automation, social media, digital culture, privacy, identity, online shopping, etc) and will work on painting projects related to their chosen topics. The course introduces photo-silkscreen, digital painting and printing, and image transfer techniques into experimental painting-based studio practices. Course is restricted to Visual Art concentrators or by permission of the instructor.

**VISA 1330. Drawing with Watercolor.**

This course will be a rigorous examination of the possibilities of drawing with watercolor. We will do a lot of work outside and there will be an emphasis on unorthodox use of the watercolor medium. Because the basis of watercolor is sound drawing, there will be considerable instruction and practice in drawing fundamentals such as perspective, value, composition, scale, rendering, etc. Recommended prerequisite: VISA 0100, 0110, or comparable foundation level course is expected, or by permission.

**VISA 1340. Accessorizing Painting: The Exalted Surface.**

This studio course will examine the crossover between decorative arts and painting. Drawing upon sources such as fashion, textiles, adornments, jewelry, furniture, hair and architecture we will study how design aesthetics demonstrate class, position, lineage or a particular period in the history of painting and embellishment. Students will be encouraged to experiment with a wide variety of media and work on projects based on their selected researched subject areas. Enrollment limited to 14.

**VISA 1410. Sculpture: Material Investigations.**

This studio course addresses basic sculptural methods, i.e., additive + subtractive modeling, casting, and assemblage, and common sculptural materials, i.e., wood, metal, plaster, and found objects. Demos + workshops on a number of sculptural tools and materials form the foundation for this studio. Students develop sculptural solutions to a given set of problems. Contemporary issues raised in critiques and readings. Extensive outside work is expected. Students who are not admitted during pre-registration or were unable to pre-register should attend the first meeting of the class.

**VISA 1420. Sculpture II: Conceptual Propositions.**

This studio course explores a number of contemporary sculptural theories and practices. Contemporary issues raised in critiques and readings. Completion of VISA 1410 is suggested, but not required. Demos and workshops on a number of tools and materials will be given as needed. Students may take this course more than once, as the problems can be customized for those with more experience. Extensive outside work expected. Please attend first day of class.

**VISA 1430. Elm Tree Project.**

This is an intensive studio course requiring a considerable out of class time commitment.

**VISA 1510. Black and White Photography.**

This course offers introduction to traditional black and white 35mm darkroom techniques, including processing film, silver gelatin printing and related techniques. While the class is primarily a studio course, it will be supplemented by weekly slide presentations and discussions of assigned readings. Slide presentations will focus on individual photographers in the history of the medium. Topics of discussion will include photographic genres, the photo essay, editing and sequencing a body of work, personal visions, social and political context, documentary versus art photography. Students may check out 35 mm film camera from the Dept.

**VISA 1520. Digital Photography.**

Over 1.8 billion photographs are uploaded to the Internet each day. Since everyone's a "photographer", what type are you? While we constantly produce images for ourselves and others in private and public, this course will ask students to critically rethink this tool. Image-making, from "capture" to "color-correction" and beyond will be consciously addressed, as we approach photography from the perspective of contemporary art practice and produce a final portfolio of prints. Class will be discussion, slideshow, studio and critique. Prior experience in photography preferred not required. A digital SLR type camera may be checked out from the Department.

**VISA 1600. Social Practice: Art in Everyday Life.**

This interdisciplinary course explores theoretical and practical ways that art can engage community. We will explore methods for social interventions, collaboration, and the notion of art as activism. Part studio and part seminar, this course examines our role in society as cultural producers. Students will engage in a series of readings and assignments that will help them prepare for a self-directed, socially engaged project of their choosing. They may work in any artistic medium and in communities of their choice. Students will work outside of class on their projects and present documentation of its development for class critique.

**VISA 1700D. Reframing Documentary Production: Concepts and Questions (MCM 1700D).**

Interested students must register for MCM 1700D.

**VISA 1700N. Open Source Culture (MCM 1700N).**

Interested students must register for MCM 1700N.

**VISA 1700P. Radical Media (MCM 1700P).**

Interested students must register for MCM 1700P.

**VISA 1700R. The Art of Curating (MCM 1700R).**

Interested students must register for MCM 1700R.

**VISA 1700S. Narrative and Immersion (MCM 1700S).**

Interested students must register for MCM 1700S.

**VISA 1710. Site and Sound.**

This studio course provides an overview of contemporary sound art, facilitates the development of site-based sonic artwork, and encourages a critical approach to sound and audio practice. Work will be developed for and from specific sites with special emphasis placed on modes of listening and the physical characteristics of sound itself. Examples of site-specific sound work in a variety of formats including performance, installation, sculpture, literature, and radio are presented and analyzed.

**VISA 1720. Physical Computing.**

This studio course is an intensive introduction to electronic devices for use in artmaking and includes hands-on experience working with sensors, motors, switches, gears, lights, simple circuits, microprocessors and hardware-store devices to create kinetic and interactive works of art. Demonstrations, lectures and critical discussion of work will be given to develop concepts and technical skills. Demonstrations, lectures and critical discussion of work will be given to develop concepts and technical skills.

**VISA 1730. Exploration in Video Art.**

This studio course provides an overview of contemporary video art and video installation practices, facilitates the development of video work in expanded space, and encourages a critical approach to interactive moving image practice. Students will develop a set of video installation pieces for particular spaces and situations beyond the standard single-screen video format. Basic video production and post-production techniques will be covered and complimented by readings and screenings.

**VISA 1740. Time Deformation.**

This studio course explores modes of electronic media by focusing on time as a primary material. Students will develop projects for specific sites and situations in response to assigned topics individually and in groups. Selected works in video, sound, performance, and online media that make innovative use of temporal strategies will be examined. Production work will be complimented by technical lectures, readings and discussions, and screenings.

**VISA 1800B. Elm Tree Project: Site and Material.**

No description available.

**VISA 1800C. Honors Seminar.**

Required for students who have been accepted as candidates for honors. The seminar meets weekly to discuss readings and for group critiques. Includes group trips to New York and Boston, to visit galleries, museums, and artists' studios. Instructor permission required. Must be accepted into Honors Program.

**VISA 1800D. Inside Out: Queering Art Theory and Practice.**

An exploration of "queer" work explored through readings, slides, videos, and studio projects. Discussion of foundational texts of queer theory and how they have influenced art of the last decade. Requires serious commitment to both intellectual work and studio practice.

**VISA 1800E. Installation of Mixed Media.**

No description available.

**VISA 1800F. Interactivity and the Intersections of Virtual and Physical Space.**

A multidisciplinary study of interactivity and production and installation of interactive sculpture. Students revisit methods in drawing, painting, sculpture; consult research studies in the psychology of interactive tasks; and survey theoretical discussion in New Media. These principles are directly applied to produce artwork that merges, or hybridizes, virtual and physical space. Applications required.

**VISA 1800G. Junior Seminar in Visual Art.**

Contemporary artists are makers, researchers, writers, curators. This is a hybrid seminar/ studio course on the global practice of contemporary art and how we can apply those lessons to our own artmaking. We will focus on questions such as "How do artists run their studios", "What is the place of history and identity?" and "How does art function as a commodity?" Class projects will include short writings and making objects. We will visit artists studios and have artists come to talk to us. Department trips to New York will be a part of the curriculum.

**VISA 1800H. Negotiating the Everyday.**

This seminar contains three chapters; maps, public art and the art of everyday. Through these three lenses we will investigate the ways in which art has tried to negotiate and respond to the everyday world. Each section will involve both reading/discussion production and critiques.

**VISA 1800I. Painting III.**

No description available.

**VISA 1800K. Microscopy in the Visual Arts.****VISA 1800L. Hybrid Art: Bricolage.**

The theme of the course is bricolage; a process which develops novel solutions to problems by making use of previously unrelated knowledge, ideas and objects.

We will utilize low tech materials on mid to large-scale three-dimensional work and will foster multidisciplinary studio practice. Students will be encouraged to take risks, cultivate new ideas and expand their creative process. Students must be highly motivated and committed to extensive work outside of class. Preference will be given to students with prior experience in sculpture.

First class List Art, Rm. 323 All other classes at the Tockwotton Studio  
Monday Wednesday 1:00 -4:50 PM

**VISA 1800M. Sound and Art.**

This course will explore sound art as a multidimensional medium situated between physical, psychological and cultural spaces. Students will gain an introduction to the practical, technical and historical aspects of sound art through studio work and will learn about and apply concept development and installation strategies.

**VISA 1800N. Video Production.****VISA 1800P. Art/Work: Professional Practice for Visual Artists.**

Visual artists don't have agents or managers--you have to do it all yourself. This class covers business basics including tracking inventory and preparing invoices; taking legal precautions like registering a copyright and drafting consignment forms; using promotional tools; and making decisions such as choosing the right venue for your work. Grants, residencies, and relationships with galleries & nonprofit institutions will be discussed in depth. Work will emphasize community the practical, skills to thrive as a visual artist. Enrollment limited to 20 juniors and seniors in Visual Art.

**VISA 1800Q. Experimental Musical Instrument Design.**

Will explore experimental musical instrument design, and by extension, experimental musical composition and performance. Students will develop an understanding of the science and art of instrument design through readings, listening exercises, and workshops. Concurrently, students will learn how to conceptualize, design, and fabricate their own experimental instruments using a variety of hand and machine tools. Percussive, stringed, and wind instruments will all be considered. Additionally, a select number of electronic devices and digital processing techniques will also be introduced. Individual and group musical compositions will be developed over the course of the semester, and performed in midterm and final concerts. Enrollment limited to 20. Instructor permission required.

**VISA 1800R. Sonic Psychogeography (MUSC 1240A).**

Interested students must register for MUSC 1240A.

**VISA 1800U. The Art and Science of Visual Perception.**

This course will explore the connections between the science of visual perception and art and design. A variety of visual systems will be studied, including those beyond human perception. Pivotal visual issues in nature and design such as coloration, contrast, patterning, and the role of edges in nature and design will be central to our work. Through a combination of lectures, visiting artists and scientists, hands-on design assignments and scientific experiments, the class will explore connections between camouflage and signaling communication in the animal world and their adaptive use as shared principles in art, advertising, logos and symbols. The class will pay particular attention to the physics of light, and its effect on visual perception and visual illusion. Enrollment limited to 12.

**VISA 1900. Other Lives of Time.**

Other Lives of Time takes a decidedly poetic approach to moving image and cinema. Part studio, screening, discussion and critique, we will watch, discuss and dissect works by artists and filmmakers from across the globe that use personal form and distinct techniques to communicate idiosyncratically. Readings will explore contemporary notions of time and cinema while screenings prioritize nonfiction and fiction works that have mainstream audience potential. Assignments will expand student's filmic language as they work over the semester toward the completion of a short film that employs a singular structure. Pre Requisites: Any of the following: VISA 0120, VISA 1520, VISA 1740, MCM 1500's, MCM 1700's. All interested students must attend classes during shopping to express interest in the course.

**VISA 1910. Individual Study Project in the Practice of Art.**

Work on an approved project leading to the presentation of a portfolio, under supervision of an individual member of the staff. Project proposals must be filed with the department no later than the first week of the semester. Section numbers vary by instructor.

**VISA 1990. Honors.**

Section numbers vary by instructor.

**VISA 2450. Exchange Scholar Program.****VISA XLIST. Courses of Interest to Visual Arts Concentrators.**

## Watson Institute for International and Public Affairs

### Director - Watson Institute

Edward S. Steinfeld

### Director - Master of Public Affairs Program

Eric M. Patashnik

The Watson Institute is a community of scholars whose work aims to help us understand and address the world's most pressing issues, including globalization, economic uncertainty, security threats, environmental degradation, and poverty. Focusing on three main areas – development, security, and governance – the Institute leverages Brown's signature interdisciplinary approach to foster innovative, policy-relevant scholarly activities.

The Institute's core faculty of anthropologists, economists, historians, political scientists, sociologists, and other specialists work across

academic disciplines with Brown faculty colleagues, as well as with an ever-changing cohort of visiting scholars and practitioners from around the world. The Institute collaborates with key organizations, such as the United Nations, national governments, and non-governmental organizations to seek practicable solutions to today's global problems.

Watson administers three undergraduate concentrations, Development Studies, Public Policy and International Relations, and houses several others: Latin American Studies, Middle East Studies, and South Asian Studies. It also administers the Master of Public Affairs (MPA) degree program, which prepares students for careers spanning public service, government, NGOs, foundations, and the private sector, and the Graduate Program in Development, which supports interdisciplinary learning and contextual expertise for doctoral students of the social sciences. The Institute is also home to a thriving postdoctoral fellows program.

The Brown International Advanced Research Institutes (BIARI), an early-career professional development initiative that builds transnational knowledge networks among young leaders from the Global South, is located at Watson, where a two-week residency occurs each year. The Choices Program, which develops secondary level curriculum resources and offers professional development to classroom teachers, is also affiliated with the Institute.

Watson is home to several centers focused on area studies: the Africa Initiative, Brazil Initiative, Center for Contemporary South Asia, Caribbean and Latin American Studies, China Initiative, Humanitarian Innovation Initiative, Middle East Studies and the Taubman Center for American Politics and Policy. The co-location of these centers, combined with the Institute's thematically driven research, enables Watson to take an interdisciplinary, comparative approach to research and education. In keeping with Watson's mission, such collaboration leads to a deep understanding of the greatest challenges of our time.

The Institute houses and supports three major academic journals: *Studies in Comparative International Development*, *Journal of Health Politics, Policy and Law (JHPPL)* and the *Brown Journal of World Affairs (BJWA)*. Founded in 1993, BJWA is a highly regarded scholarly publication in the field of international studies, edited and managed entirely by Brown undergraduates.

Finally, a full agenda of seminar series, conferences, lectures, and workshops each year brings leading scholars and public figures to the Institute to put current events into context, explore emerging global issues, develop policy, and publish research. A new podcast, *Trending Globally: Politics and Policy*, further connects faculty research and visiting scholars with broader news and world events.

More information about the Institute is available at <http://watson.brown.edu/>.

## International and Public Affairs Concentration Requirements

The concentration in International and Public Affairs equips students with the knowledge and skills necessary to be engaged global citizens. This concentration offers three tracks: Development, Policy & Governance, and Security. All students take a common core of five classes, beginning with a choice of thematic gateway lecture courses (ideally taken during freshman or sophomore year), and then building through a required junior seminar and a required senior seminar (eligible students may choose to write an honor's thesis to satisfy the senior seminar requirement). All students choose one of three tracks of substantive specialization: Development, in which students explore issues of human development in local and global contexts, and across both the developing world and advanced industrial settings; Security, which allows students to explore issues of security in both local and global contexts; and Policy and Governance, in which students explore the design, implementation, and evaluation of public policies to resolve societal challenges, as well as the governing structures that yield those policies. The concentration is committed to engaging students in the classroom, enabling research opportunities with faculty and in the field, and supporting experiential learning opportunities. Advisors' office hours and an online appointment scheduler are available here (<https://watson.brown.edu/iapa/advising>).

## Development Track Concentration Requirements

Gateway course (choose 1)		1
IAPA 0100	Global Health, Humanitarianism, and Inequality	
POLS 1020	Politics of the Illicit Global Economy	
Junior Seminar (choose 1)		1
IAPA 1401	Economic Development in Latin America	
IAPA 1802C	Infrastructure!	
IAPA 1813A	Revolutions that Changed the World	
IAPA 1700F	Engaged Research Engaged Publics	
Senior Seminar (choose 1 from either a Senior Thesis Seminar or a Senior Capstone Seminar)		1
<b>Thesis Seminars:</b>		
IAPA 1816A	Senior Honors Seminar	
IAPA 1808C	Thesis Writing in Development Studies	
IAPA 1850	Senior Honors Seminar	
<b>Capstone Seminars:</b>		
IAPA 1802A	Bilateral and Multilateral Policy and Diplomacy	
IAPA 1806A	Diplomacy, Economics & Influence	
MPA 2772	Disaster, Displacement and Response: A Practitioner, People-Focused Lens on Urban Policy & Practice	
IAPA 1814A	Roots of Crisis in Central America	
Methods courses: Choose 2 (one must be qualitative and one quantitative)		2
<b>Qualitative:</b>		
IAPA 1500	Methods in Development Research	
<b>Quantitative:</b>		
ECON 1620	Introduction to Econometrics	
or SOC 1100	Introductory Statistics for Social Research	
or EDUC 1110	Introductory Statistics for Education Research and Policy Analysis	
Language Study Option: One of the two methods requirements, either the qualitative or quantitative course, can be substituted by four semesters of the study of a language other than English		
IAPA 0200	Foundations of Development	1
5 Electives (for example):		5
<b>Development and the Global Economy</b>		
ECON 0510	Development and the International Economy	
ECON 1540	International Trade	
ECON 1550	International Finance	
HIST 0202	African Experiences of Empire

POLS 1822U	War and Human Rights

Total Credits 11

## Policy and Governance Concentration Requirements

Gateway course (choose 1)	1
IAPA 0100	Global Health, Humanitarianism, and Inequality
POLS 1020	Politics of the Illicit Global Economy
Junior Seminar (choose 1)	1
IAPA 1401	Economic Development in Latin America
IAPA 1802C	Infrastructure!
IAPA 1813A	Revolutions that Changed the World
IAPA 1700F	Engaged Research Engaged Publics
Senior Seminar (choose 1 from either a Senior Thesis Seminar or a Senior Capstone Seminar)	1
<b>Thesis Seminars:</b>	
IAPA 1816A	Senior Honors Seminar
IAPA 1808C	Thesis Writing in Development Studies
IAPA 1850	Senior Honors Seminar
<b>Capstone Seminars:</b>	
IAPA 1802A	Bilateral and Multilateral Policy and Diplomacy
IAPA 1806A	Diplomacy, Economics & Influence
IAPA 1814A	Roots of Crisis in Central America

Methods courses: choose 2 (one must be qualitative and one must be quantitative) 2

### Qualitative:

IAPA 1500 Methods in Development Research

### Quantitative:

ECON 1620 Introduction to Econometrics

or SOC 1100 Introductory Statistics for Social Research

or EDUC 1110 Introductory Statistics for Education Research and Policy Analysis

Language Study Option: One of the two methods requirements - either the qualitative or quantitative course, can be substituted by four semesters of the study of a language other than English

IAPA 0110 Introduction to Public Policy 1

Five electives, for example: 5

### Health Policy

AFRI 1920 Health Inequality in Historical Perspective

ANTH 1020 AIDS in Global Perspective

PHP 1100 Comparative Health Care Systems

PHP 1680U Intersectionality and Health Inequities

IAPA 1804E Health Policy Challenges

SOC 1550 Sociology of Medicine

### Public Policy and Gender

HIST 1977I Gender, Race, and Medicine in the Americas

POLS 1821S Women and Politics

POLS 1823Z Gender and Public Policy

### Education and Policy

ECON 1301 Economics of Education I

EDUC 0410B Controversies in American Education Policy: A Multidisciplinary Approach

EDUC 1060 Politics and Public Education

EDUC 1650 Policy Implementation in Education

### Policy and Inequality

ECON 1370 Race and Inequality in the United States

ECON 1375 Inequality of Opportunity in the US

SOC 1871S Legacies of Inequality: The U.S. and Beyond

### Policy, Social Movements, and Social Action

AFRI 1260 The Organizing Tradition of the Southern Civil Rights Movement

AMST 1906R Law and Transformative Social Change

ETHN 1750A Immigrant Social Movements: Bridging Theory and Practice

IAPA 1700B Investigating Modes of Social Change

IAPA 1700F Engaged Research Engaged Publics

IAPA 1803E Social Entrepreneurship

### Public Policy and Social Welfare

ECON 1170 Welfare Economics and Social Choice Theory

HIST 0654A Welfare States and a History of Modern Life

POLS 1824K The American Welfare State in Comparative Perspective

### Urban Policy

ENVS 1580 Environmental Stewardship and Resilience in Urban Systems

POLS 1824D Power and Prosperity in Urban America

SOC 1330 Remaking the City

URBN 1250 The Political Foundations of the City

### Policy Evaluation and Measurement

EDUC 2360	Policy Analysis and Program Evaluation for Education	
IAPA 1700A	Program Evaluation	
IAPA 1700	Economics for Public Policy	
Total Credits		11

## Development Studies Concentration Requirements

Development Studies is an interdisciplinary concentration whose mission is to provide students with the knowledge, critical perspectives and skills they need to engage with the issues of economic and social development, especially as they relate to the Global South. The concentration is grounded in the social sciences – anthropology, sociology, political science, and economics – but it also heavily draws from history, art, and other disciplines in the humanities. The requirements are designed with three goals in mind: first, provide concentrators a solid foundation in the question of development; second, allow concentrators to develop expertise in a specific region that is of interest to them; third, give concentrators access to a wide range of courses in a large number of disciplines of interest to them. Concentrators are encouraged to do their own original field research. During the senior year, concentrators complete a capstone experience tailored to their interests (<http://brown.edu/academics/development-studies/about/what-ds-capstone>) in some aspect of international development. Towards this end, they benefit from extensive faculty and peer support. **The Development Studies concentration will only accept new declarations through the class of 2023. Students in any class year can learn more about the new concentration (<https://watson.brown.edu/iapa/about/faqs>) in International and Public Affairs: Development Track.**

### Requirements

**The Development Studies concentration will be available to students graduating through the class of 2023.**

10 Courses + Language + Capstone

#### CORE

All core courses must be taken prior to senior year		
Choose TWO from the following:		2
SOC 1620	Globalization and Social Conflict	
POLS 1240	Politics, Markets and States in Developing Countries	
ANTH 0110	Anthropology and Global Social Problems: Environment, Development, and Governance	
Seminar in Sociology of Development		1
IAPA 0010/ SOC 1871D	Sophomore Seminar in Development Studies (Pre-requisites: sophomore or junior standing, and completion of SOC 1620, POLS 1240, or ANTH 0110)	
Development Economics - Choose ONE of the following: (ECON 0510 for students with little to no Econ background, ECON 1510 for students with strong Econ backgrounds or double-concentrating in Econ)		1
ECON 0510	Development and the International Economy (Prerequisite: ECON 0110, or AP Microeconomics 4 and AP Macroeconomics 4, or IB HL Economics 6)	
ECON 1510	Economic Development (Prerequisite: ECON 1110 or ECON 1130; and APMA 1650 or ECON 1620 or ECON 1630)	
Research Methods and Design		1
IAPA 1500	Methods in Development Research (junior year)	
<b>Regional Courses</b>		2

Two courses that focus on the same region of the developing world. Should complement the student's foreign language.

#### Elective Courses 3

Three courses chosen from a list of pre-approved electives or by special approval.

#### Foreign Language

Equivalent of three full years of university study or above.

#### Senior Capstone

- Thesis option: DEVL 1980 (fall senior year) and DEVL 1990 (spring senior year), or
- Capstone seminar option: approved senior seminar in Development Studies, with seminar-length paper requirement.

See the Development Studies website (<http://brown.edu/academics/development-studies>) for the list of pre-approved elective courses.

## International Relations Concentration Requirements

The objective of the International Relations concentration is to foster creative thinking about pressing global problems and to equip students with the analytic tools, language expertise, and cross-cultural understanding to guide them in that process. To this end, the concentration draws on numerous departments including political science, history, economics, anthropology, sociology, psychology, religious studies, and area studies. The IR concentration is organized around a multidisciplinary core and two sub-themes: security and society, and political economy and society. It has a three-year language requirement that must be linked to the student's selected region of the world. All concentrators are required to undertake a capstone project using research in a second language. **The International Relations concentration will only accept new declarations through the class of 2023. Students in any class year can learn more about the new concentration (<https://watson.brown.edu/iapa/about/faqs>) in International and Public Affairs.**

### Requirements

**The IR concentration will be available to students graduating through the class of 2023.**

The IR concentration requires 14 courses and the equivalent of 3 years study of a second language. Regardless of track, all IR concentrators must take all five core courses, research methods, regional focus, and capstone courses.

### Security and Society track

#### Core Courses 5

Students must take 5 core courses, preferably during freshman or sophomore year. AP credit does not count toward the concentration.

ANTH 0110	Anthropology and Global Social Problems: Environment, Development, and Governance
ECON 0110	Principles of Economics
POLS 0400	Introduction to International Politics
or POLS 0200	Introduction to Comparative Politics
SOC 1620	Globalization and Social Conflict
Plus 1 History course from the following:	
HIST 0150A	History of Capitalism
HIST 0203	Modern Africa: From Empire to Nation-State
HIST 0218	The Making of Modern East Asia
HIST 0244	Understanding the Middle East: 1800s to the Present
HIST 0270B	From the Columbian Exchange to Climate Change: Modern Global Environmental History

HIST 1121 The Modern Chinese Nation: An Idea and Its Limits

**Track Requirements (five courses distributed between the sub-themes):** 5

Governance and Diplomacy (two or three courses):

COLT 1812V	War, Anti-War, Postwar: Culture and Contestation in the Americas
CSCI 1800	Cybersecurity and International Relations
ENVS 0160	Migration and Borders in a Time of Climate Crisis
ENVS 1575	Engaged Climate Policy at the UN Climate Change Talks
FREN 1900H	La France en guerre
GNSS 1960M	Sense and Scientific Sensibility: Beyond Vision, From the Scientific Revolution to Now
HIST 0150C	Locked Up: A Global History of Prison and Captivity
HIST 0276	A Global History of the Atomic Age
HIST 0523B	State Surveillance in History
HIST 0559A	Culture and U.S. Empire
HIST 1972H	U.S. Human Rights in a Global Age
HMAN 1971T	Law, Nationalism, and Colonialism
IAPA 1203	History of American Intervention
IAPA 1205	International Law
IAPA 1807A	International Journalism: Foreign Reporting in Practice
IAPA 1801A	History of American Intervention
IAPA 1802A	Bilateral and Multilateral Policy and Diplomacy
IAPA 1804A	Iran and the Islamic Revolution
IAPA 1814A	Roots of Crisis in Central America
IAPA 1815A	Computers, Freedom and Privacy: Current Topics in Law and Policy
ITAL 0751	When Leaders Lie: Machiavelli in International Context
POBS 1601C	From Dictatorship to Democracy in the Iberian Peninsula: Transformations and Current Challenges
POLS 1020	Politics of the Illicit Global Economy

POLS 1824B	Post Conflict Politics
POLS 1824J	Culture, Identity and Development

Total Credits 14

The program has a director/concentration advisor and two faculty track advisors to assist students in planning their academic programs.

## Public Policy Concentration Requirements

Housed in the Watson Institute for International and Public Affairs, the concentration in public policy is organized around the interdisciplinary and comparative study of human societies, but with a particular focus on the rules and norms by which we govern ourselves. The concentration is grounded in the analysis of pressing social problems and the design, implementation, and evaluation of better policies and practices. This commitment to using knowledge to improve the life chances of people who occupy different positions of wealth and power, and who have competing and contentious ideas of about the common good, makes public policy a value-laden and political enterprise that is as much an art as it is a science. It is also a team sport that requires players with different skills and talents to work together across a wide variety of settings.

Students will learn how social, economic, and political issues become the object of public policy, how policy decisions are crafted, made and implemented, as well as different strategies for evaluating their impact. The concentration draws its instructors from a wide variety of disciplines and offers students opportunities for engaged scholarship at the local, national, and global levels. With the support of the advisory team, students develop their own curriculum of study, integrating core courses with electives, internships, independent research, and a capstone experience. **The Public Policy concentration will only accept new declarations through the class of 2023. Students in any class year can learn more about the new concentration (<https://watson.brown.edu/iapa/about/faqs>) in International and Public Affairs: Policy and Governance Track.**

## Required Courses: 10 courses + capstone

The Public Policy concentration will be available to students graduating through the class of 2023.

### Core Courses:

IAPA 0110	Introduction to Public Policy	1
-----------	-------------------------------	---

Ethics and Public Policy		1
POLS 1050	Ethics and Public Policy	
Economics for Public Policy		1
ECON 1110	Intermediate Microeconomics	
ECON 1130	Intermediate Microeconomics (Mathematical)	
EDUC 1130	Economics of Education I	
Statistics for Public Policy		1
POLS 1600	Political Research Methods	
EDUC 1100	Introduction to Qualitative Research Methods	
ECON 1620	Introduction to Econometrics	
ECON 1630	Mathematical Econometrics I	
SOC 1100	Introductory Statistics for Social Research	
Policy Analysis and Program Evaluation		1
IAPA 1700A	Program Evaluation	
<b>Elective Courses:</b> <sup>1, 2</sup>		
Three Broad Elective Courses: May be taken in any policy area		3
Two more electives in one of the areas you have already studied		2
Sample electives may include the following:		
<b>Health Policy</b>		
PHP 1100	Comparative Health Care Systems	
PHP 1520	Emergency Medical Systems: An Anatomy of Critical Performance	
PHP 1530	Case Studies in Public Health: The Role of Governments, Communities and Professions	
IAPA 1804E	Health Policy Challenges	
<b>Technology Policy</b>		
CSCI 1800	Cybersecurity and International Relations	
POLS 1822X	Technology and International Politics	
STS 1700C	Science and Technology Policy in the Global South	
<b>Environmental Policy</b>		
ENVS 1350	Environmental Economics and Policy	
ENVS 1410	Environmental Law and Policy	
ENVS 1530	From Locke to Deep Ecology: Property Rights and Environmental Policy	
ENVS 1555	Urban Agriculture: The Importance of Localized Food Systems	
PHP 1700	Current Topics in Environmental Health	
<b>Governance, Law, and Ethics</b>		
POLS 0220	City Politics	
POLS 1010	Topics in American Constitutional Law	
<b>Social Policy</b>		
ECON 1170	Welfare Economics and Social Choice Theory	
SOC 1540	Human Needs and Social Services	
<b>Urban Policy</b>		
SOC 1600	Comparative Development	
URBN 1870F	Housing and Homelessness	
<b>Modes of Social Change</b>		
IAPA 1700E	Nonprofit Organizations	
IAPA 1700B	Investigating Modes of Social Change	
IAPA 1803E	Social Entrepreneurship	
SOC 1870A	Investing in Social Change	

Senior Capstone: The capstone may take the form of an Honors Thesis, Independent Study, a Public Policy internship, research Assistantship, UTRA Assistantship, or designated Senior Seminar

Total Credits 10

<sup>1</sup> Two of the five elective courses must have a primary listing in Public Policy. One of the five must be designated as a writing course.

<sup>2</sup> One elective must be focused on global issues

## Honors

Candidates for honors should apply in the Spring term of their third year. Successful candidates will enroll in the Public Policy Colloquium and prepare a senior honors paper.

## Master of Public Affairs Graduate Program

### The Brown MPA - Change the World

The Brown Master of Public Affairs (MPA) at the Watson Institute is a one-year (summer – fall – spring) full-time program that provides students with the analytical foundation and management tools they need to tackle the policy problems of today. The program prepares students for careers spanning public service, all levels of government, NGOs, foundations, and the private sector.

Our unique, accelerated program offers:

- Small class size and engaged faculty composed of world-renowned researchers and experienced practitioners
- An interdisciplinary curriculum - take advantage of course offerings across the University
- A two-week international policy immersion experience
- A 12-week consultancy that ensures students are career-ready

For more information on admission and program requirements, please visit the following website:

<http://www.brown.edu/academics/gradschool/programs/public-affairs-and-public-policy>

#### Required Courses

##### Summer Sequence I ( 4 Weeks)

MPA 2455 Statistics for Public Policy

MPA 2460 Economics for Public Policy

##### Summer Sequence 2 (4 Weeks)

MPA 2040 Statistics for Program Evaluation

MPA 2450 Macroeconomics for Public Policy

##### Global Policy Experience (2 Weeks)

##### Fall Semester (Regular Semester)

MPA 2445 Policy Analysis and Problem Solving

MPA 2055 The Politics of Policymaking in Comparative Perspective

Specialization Elective 1

Specialization Elective 2

##### Spring Sequence 1 (12 Weeks)

MPA 2800 Policy in Action Consultancy

##### Spring Sequence 2 (7 Weeks)

MPA 2160 Management and Implementation in Public and Non-Profit Organizations

MPA 2475 Policy Problems of the 21st Century: Social Justice and Advocacy, Strategies for Change

MPA 2765 System Dynamics: Policy Analysis for a Complex World

Specialization Elective 3

## Dual Degree Program: Master of Public Health (MPH) and Master of Public Affairs (MPA)

The School of Public Health and the Watson Institute for International and Public Affairs also offer a dual-degree Master of Public Health (MPH) and Master of Public Affairs (MPA) program. Emphasizing a learning by doing approach, this rigorous, program will offer highly qualified applicants the opportunity to gain training in public health and public policy to prepare them to address the critical health policy issues in the United States and throughout the world. The dual-degree degree program includes 19 courses as well as a Masters level thesis. Students will benefit from the rich academic resources at the Watson Institute and the School of Public Health, as well as their extensive applied learning programs in Rhode Island, as well as throughout the United States and the world.

Interested students should apply separately to the MPH and MPA program. Applicants will indicate interest in the joint degree program on the application form.

For more information on admission to the MPH program and it's requirements, please visit the following website:

<https://www.brown.edu/academics/gradschool/programs/public-health>

## Courses

### International and Public Affairs

#### IAPA 0010. Sophomore Seminar in Development Studies.

This seminar provides an introduction to the critical study of development. The goal is less to provide an exhaustive overview of the field than it is to help you develop critical thinking skills through group discussion and analytical writing. More specifically, the goal is to develop your understanding of the diversity of understandings of the concept of development, as well as its practical importance in the world. Students will read texts that present pressing questions and issues concerning development practices, policies, and theories. Though classroom discussion and writing, the course encourages you to connect broad theoretical debates to contemporary problems.

#### IAPA 0100. Global Health, Humanitarianism, and Inequality.

The term "global health" refers to an aspiration and a set of problems. An aspiration to global health has potential to unite biosecurity, humanitarian, and philanthropic efforts to rid the world of infectious disease, improve sanitation, and address malnutrition. As a set of problems, global health is less unifying than unruly. Deciding when a local epidemic becomes a global emergency or calculating the economic value of healthy childbirth are not straightforward processes. This course takes a multidisciplinary, critical approach to global health. Focus will be on "bottom-up" perspectives—how projects and policies play out in the lives individuals and communities.

#### IAPA 0110. Introduction to Public Policy.

An overview of policymaking and policy analysis in the contemporary United States. The course begins with an examination of traditional justifications for government action. We will then examine the discipline of policy analysis that has arisen to design and evaluate public policies. We will also consider critiques of the rational method and ask questions about how policy expertise fits into the political system. The course ends with classic works on organizations and implementation. Not open to graduate students.

#### IAPA 1010. Borders and Bodies.

Whose maps, whose stories? This seminar begins by asking: what is a border? And where is it? How do particularly gendered, sexualized, raced, and classed bodies experience borders and mobility across them? Why are borders important sites of political, socio-cultural, economic, and religious contestation? How do borders and border-crossers matter to nation-states and global flows of capital and commodities? How do people living in border zones relate to the geopolitical reality of the border and the sociocultural and historical connections that often run across them? How do ideas about belonging and identity structure competing visions of justice, community, and citizenship?

**IAPA 1020. Pathologies of the Rich (Countries): Liberal Capitalism and its Discontents.**

Advanced capitalist economies face challenges from a number of different sources. Economic inequality is increasing, austerity and welfare reforms have undermined social protections. Globalization and decades of permissive merger policies have resulted in private companies of unprecedented size and in possession of extraordinary market power and political influence. Climate change has called into question economic foundations and social compromises of post-war capitalism, while threatening to unleash destabilizing catastrophes. Populist parties are on the rise across Europe and North America, posing a direct challenge to the liberal order and creating new uncertainty about the future of liberal democracy and global capitalism.

**IAPA 1040. Nationalism and the Nation-State.**

From Brexiters in the United Kingdom and independence activists in Catalonia to members of the Hindu right-wing in India, nationalism seems to be everywhere today. We live in a world of nation-states whose boundaries are legitimized by the shared identities of their populations. But what is nationalism, and how does it relate to the nations whose borders structure both the affairs of states and the details of our everyday lives?

**IAPA 1203. History of American Intervention.****IAPA 1204. The Political Economy of Strategy: From the Financial Revolution to the Revolution in Military Affa.**

This is a course about how major powers make, maintain and potentially undermine themselves using several recent examples -- Great Britain, the United States, Germany, the Soviet Union, and Japan. We make no claims that this course will reveal clues about the end of the American Empire, or the Pax Americana, but we do argue that only through an honest accounting of the history of the political economy of strategy can students understand both the costs and benefits of hegemony.

**IAPA 1205. International Law.**

This introduction to public international law covers the nature of legal reasoning in international relations, the interplay of international law and international politics, and the international legal process. Examines selected substantive fields such as state responsibility, the use of force, international human rights, and the U.S. and international law.

**IAPA 1206. War.**

This course introduces students to modern and contemporary war—its nature, its technology, its philosophers, its variations, and its evolution—across five domains: on land, at sea, in the air, and across cyber space. The course is divided into three parts: unpacking the nomenclature of violence; “old war”; and “new war. Students who complete the course will gain sufficient military literacy to critically engage in important questions and ongoing debates about the use of armed force to pursue national political interests.

**IAPA 1401. Economic Development in Latin America.**

This course covers some of the unique events and characteristics that have shaped the economic development landscape of Latin America since colonial times until the present. Topics include: the historical legacy, why Latin America fell behind, import substitution industrialization, the debt crisis, poverty and income inequality, inflation, trade and financial liberalization and competitiveness. The class exposes students to a number of concepts and tools that can be broadly applied to the understanding of development in other geographic areas.

**IAPA 1402. Beyond Sun, Sea and Sand: Exploring the Contemporary Caribbean.**

For many people, their image of the Caribbean is the tourist brochure and television advertisement representation of sun, sea and sand. This course challenges that through a broad introduction to the real society, economy and politics of the Caribbean region. Using literature, film and traditional texts, it captures the cultural and linguistic complexity of the region through the exploration of a range of central themes such as ethnicity, color, class, politics, as well as more specific, targeted areas including economic inequality, migration, and tourism.

**IAPA 1403. Development's Visual Imaginaries: Still and Moving Images That Shaped the Field.**

Using primarily paintings and films, this seminar explores the visual imaginaries created and circulated between 17th and early 20th centuries especially in the Americas but also in Europe, which came to underpin prominent mid- to late-19th century and early 20th-century development theories and resultant legislation and public policies in the United States, and which were deployed both internally and abroad. The course will argue that development policies domestically and abroad often drew from the same set of ideas and imaginaries about categories of humans, land, nature, work, gender, race, capacity for self-definition and political self-representation, and who should wield power.

**IAPA 1500. Methods in Development Research.**

An introduction to the various techniques of research in Development Studies, with a focus on qualitative and field methods.

**IAPA 1700. Economics for Public Policy.**

This course examines the role of the public sector in the economy. We begin by exploring when and how the government intervenes in the economy. We also consider the impact of government intervention. We then use this theoretical foundation to examine current issues in expenditure, education, health, retirement, business competition, environment, cybersecurity, crime, financial, and tax policy. The student will acquire analytical skills to better evaluate existing and alternative public policy alternatives. Qualitative and quantitative methods will be used throughout the course. Class sessions require a significant degree of student participation.

**IAPA 1700A. Program Evaluation.**

Students in this course will become familiar with the concepts, methods, and applications of evaluation. We will build intuition around the experimental and quasi-experimental method commonly used in practice so that students learn how to interpret evaluation results, read evaluation research critically, and understand the pros/cons of each method. We will draw on illustrations and case studies from a variety of substantive policy areas. Students must have completed IAPA 0110. In addition, you must have completed one of the following: POLS 1600, EDUC 1110, SOC 1100, or ECON 1620. If you have not completed these prerequisites, you must receive written permission to enroll in the course.

**IAPA 1700B. Investigating Modes of Social Change.**

This course examines the range of approaches to making social change through democratic institutions and processes in the U.S. These approaches-- direct service, community organizing, policy/politics, philanthropy, social entrepreneurship and research/scholarship-- have different value systems, methodologies, strengths and limitations. There's no one "right" approach, and the modes often intersect in ways that can be mutually reinforcing or counterproductive. The course will be valuable to students interested in being involved in social change during their time at Brown and in their future careers.

**IAPA 1700C. Political Communication.**

This course will focus on the importance of written and oral communication in public decision-making, particularly in the congressional context. The course will examine the impact on political interactions, and the influencing of public policy decisions and outcomes. The course will emphasize some of the practical tools for producing relevant, useful material in the professional policy and the political communications arenas. The course requires several writing assignments focusing on different public policy analyses and political communications tools as well as active class participation including oral presentation.

**IAPA 1700D. Law and Public Policy.**

This course will give students an introduction to business organizations – the law that governs corporations and partnerships, how they raise money in the financial markets, and to explore the public policy issues that inform the regulation of business and finance. We will look at business organizations, law that governs how companies raise money, operation of the stock markets, insider trading, and the regulation of institutional investors including mutual funds, hedge funds and private equity funds. We will finish by taking up corporations as persons, their social obligations and the recent Supreme Court cases on corporations and the First Amendment.

**IAPA 1700E. Nonprofit Organizations.**

Contemporary nonprofits and their role in community building and shaping public policy are central to this course. Topics include how strong coalitions impact housing, welfare and children's policy, organizing empowered communities, the influential and engaged donor and building the value of nonprofits. Case studies will be featured and new nonprofit models will be conceptualized to strategically address critical human need. Enrollment limited to 20 juniors, seniors, and graduate students concentrating in Public Policy. This course satisfies the American Institutions requirement.

**IAPA 1700F. Engaged Research Engaged Publics.**

Policy problems are complex. Policy analysis and design is both a science and a craft. Increasingly, policymakers have begun to acknowledge that effective policy research requires not only multiple methods of inquiry, but also interdisciplinary teams of social science researchers, citizens, designers, scientists, artists, consultants, and engineers, among other experts. Generating innovative policy solutions, from this approach, is not a straightforward, linear process, but instead a creative, collaborative, and engaged activity that requires not only iterative and dynamic research methods, but also storytelling, design, and other creative methods.

**IAPA 1801A. History of American Intervention.**

This course reviews modern history through the study of invasions, coups, and other interventions carried out by the United States. From the Marine assault on Tripoli in 1805 to the bombing of Tripoli in 2011, there have been scores of these episodes. They have shaped American history and the history of the wider world. Enrollment limited to 20 seniors.

**IAPA 1802A. Bilateral and Multilateral Policy and Diplomacy.**

This course examines the practice and profession of diplomacy and its relationship to the policy process. Focus is on bilateral and multilateral diplomacy; practice focuses on U.S. context, lessons learned apply to other nation states. We review history of inter-state relations, including the international legal basis for diplomatic relations. The practice has evolved over the years and been greatly influenced by modern technology; however, it continues to incorporate such common functions as policy formulation, representation, reporting, negotiation, intercultural contacts and interaction with the media, parliamentary bodies and other external actors. Limited to Jrs, Srs. Priority given to IR Seniors.

**IAPA 1802C. Infrastructure!**

Infrastructure! It's the hardware and software that undergirds transportation, energy, water, and health systems. This course asks what we can learn about infrastructure when we approach it not as a neutral set of technologies but as a context-dependent social and political force. Taking a critical approach to (among others) natural resources, global health, and development, the course will trace how infrastructures have both served and obstructed colonial and contemporary projects for social change. The course will also take up the question of the future of infrastructure, including "green," modular, and "off the grid" technologies.

**IAPA 1803A. Rwanda Past and Present.**

In the mid-1990s, few countries on earth were as devastated as Rwanda. As many as one million people or more had been killed in a 100-day genocide, and the fleeing regime had left the country in ruins. Today, however, Rwanda is not only at peace but full of ambition. Some believe it is poised to rise from poverty and become an example for developing countries everywhere. Others worry that trouble is brewing, and that another apocalypse could lie ahead.

**IAPA 1803C. The History and Politics of Development in the Middle East.**

This course examines from a critical perspective the impact and legacies of development projects in the Middle East. After considering the historical emergence of development as a concept and some general critiques, we will explore its more specific deployment in the context of the Middle East. Readings will address its discursive frameworks as well as the economic, political, environmental, and social dynamics it has shaped through its definition of instrumental categories, objects, and spaces. We will also consider how these dynamics have contributed to the recent uprisings in the region. Priority given to DS seniors.

**IAPA 1803E. Social Entrepreneurship.**

Social Entrepreneurship, engages students in the process of exploring significant global problems and developing innovative solutions that drive transformative social change. The course helps students understand the strategies that social entrepreneurs employ to tackle complex and entrenched social problems with transformative approaches that work and impact systems. Students will learn about real organizations and interact with entrepreneurs leading this work. Case studies, complemented by articles and guest speakers, will show different approaches to social entrepreneurship and illustrate the strengths and weaknesses of various models and strategies. Enrollment in the class is determined by application: <http://goo.gl/forms/tjUK5twXc4>

**IAPA 1804A. Iran and the Islamic Revolution.**

Shattering events of 1978-80 in Iran unfolded against the backdrop of the previous decades of Iranian history, knowing that history is essential to understanding the revolution. The revolution cannot be appreciated without studying the enormous effects it's had over the last 35 years. This course places the anti-Shah movement and the rise of religious power in the context of Iran's century of modern history. We conclude by focusing on today's Iran, the upheaval following the 2009 election, reformist president election in 2013, and prospects for reconciliation with the US. Enrollment limited to 20 juniors & seniors. Priority given to IR seniors.

**IAPA 1804C. Migration and Development in Theory and Practice.**

The primary theme of this course rests on a query standing at the center of a growing debate: in what ways are migrants linked to development? This course examines several theoretical debates and policies and programs focused on the migration-development nexus. Students examine scholarly interpretations of how migration is linked to development. They also employ a transnational lens to further explore what development means and how it is carried out in an increasingly mobile and connected world. The class examines how grassroots organizations have engaged in community development, and the roles states and non-governmental agencies are playing in on-the-ground interventions.

**IAPA 1804E. Health Policy Challenges.**

This course examines the topic of health reform through a variety of lenses – politics, policy, community organizing, and bureaucratic implementation. Specific issues include recent reform efforts at the national and state levels, including the Affordable Care Act and several Rhode Island state legislative campaigns over the past twenty years. During each of these legislative victories (or defeats), the interplay between politics and policy, community organizing and implementation have defined how successful the laws have been in improving people's access to quality, affordable healthcare.

**IAPA 1805A. Politics of International Finance.**

The purpose of this course is to present the fundamental variables that shape modern international finance. We will introduce and examine the technical forces that determine international transactions and capital flows, as well as the problems caused by unsustainable imbalances and the subsequent domestic and international political responses. Given the important role that finance plays in international relations, the material will allow the student to establish a conceptual framework to understand the political dynamics and constraints of the global economy. Enrollment limited to 20 juniors & seniors. Priority given to IR seniors.

**IAPA 1805C. Caribbean and Pacific Small States: On the Margins of Development.**

Small states enter the imagination as sites of exoticism. Pristine beaches, flanked by swaying coconut trees are marketed as ideal for honeymooners and others seeking a refuge from stress-filled lives. This course centers small states, in particular, small island states, as a group of countries, with unique and interesting features, meriting academic scrutiny. We explore a wide range of issues introducing students to these diverse and complex states, including historical origins, globalization and effects on development, theoretical approaches to studying small states, issues in governance, migration, climate change, food security, sports and culture, gender and sexuality, among others.

**IAPA 1806A. Diplomacy, Economics & Influence.**

This course examines a dozen diplomatic situations and identifies the players, their interests, and their tools -- and how those produced outcomes. Particular attention is paid to economic factors – pressures, incentives, and influences – that contribute to the outcome. By examining these elements students will understand the economic tools of diplomacy and power, and how to wield them. The course concludes with a close look at China's growing role in the world economy and considers how that will change China's role in world affairs. Enrollment limited to 20 Juniors & Seniors. Priority given to IR seniors.

**IAPA 1806C. Information Technology and Governance.**

The use of information and technology in governance is a vexed subject. Civil society clamors for release of information about the state (openness) while the State wants more information about its citizens (surveillance). Technology plays a role in amplifying these respective intentions resulting in an unprecedented gathering and release of information, thereby bringing the issue of information, technology and its role in governance to sharp focus. This course provides an intensive introduction to the field of information technology and global development. Enrollment limited to 20. Preference given to DS juniors and Seniors.

**IAPA 1807A. International Journalism: Foreign Reporting in Practice.**

This seminar gives students direct experience with the job of being a foreign correspondent. Classes focus on two themes: the practice of international journalism and the history and contemporary reality of Costa Rica. Our semester culminates with a reporting trip to Costa Rica during spring break. The seminar is valuable to students interested in the possibility of a career in international journalism and those who are not pursuing a career in journalism but want to learn journalistic skills. Limited to Jrs and Srs. Priority given to IR seniors.

**IAPA 1807C. Individual Research Project.**

Section numbers vary by instructor.  
Required: A completed proposal form and syllabus and faculty sponsor's and concentration advisor's approval prior to registering.

**IAPA 1808A. Risk, Regulation and the Comparative Politics of Finance.**

The course introduces students to the comparative history of finance as well as to alternative theories of regulation. It thereby develops students' ability to compare the role played by financial institutions in different historical periods and national contexts. This comparative perspective puts the recent financial crisis into a broader perspective, allowing students to see the structural as well as more proximate causes of recent financial instability in the industrialized democracies. Enrollment limited to 20 juniors and seniors. Priority given to IR, DS, and Public Policy seniors.

**IAPA 1808C. Thesis Writing in Development Studies.**

An integrative seminar designed for concentrators working on senior theses. Others with comparable backgrounds may enroll with written permission. Begins with a review of theoretical and methodological literature on development studies. Written and oral presentations of thesis research will be the central focus of the latter part of the course. Reserved for Development Studies seniors.

**IAPA 1809A. The International Politics of Organized Crime.**

Organized crime and extra-legal actors have established themselves as political actors in every region of the world. Violence has exploded in countries as criminal organizations compete with each other, the state, as well as a variety of other non-state armed groups for control of illicit markets, local dominance, and political influence. This course offers a broad understanding of these organizations, their origins, and the various illegal and violent activities in which they are engaged. This course is comparative and interdisciplinary in nature, drawing from research in criminology, sociology, anthropology, economics, and political science. Limited to Jrs, Srs. Priority to IR seniors.

**IAPA 1809C. Senior Thesis Preparation.**

Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course. Reserved for Development Studies seniors.

**IAPA 1810. Democratization as Metaphor.**

Oilfields and greenhouses. Pendulums and waves. Pacts, fault lines, and backsliding. These are some of the metaphors used to describe and explain the democratic transitions as well as enlighten our understanding of new and emerging threats to democracies across the globe. Since the 1970s studies of democratization have shifted from a "global resurgence of democracy" to an "authoritarian resurgence." This course covers the conceptual tools and theories for understanding these developments. We pay particular attention to the assumptions, biases, knowledge structures, and inferences produced by language and imagery in our understanding of democratization and consider their implications for policy.

**IAPA 1810A. Perspectives in Human Capital: Investing in Women as a Strategy for Global Growth.**

In this course, we ask and answer the questions: What are women's issues around the world? What policies and programs are designed to engage the issues and improve outcomes? What role does and can the private sector play in harnessing the untapped potential of 50% of the globe's population? Is there evidence to support the need for investment —of resources, focus, and political capital—and to quantify the results of its impact? Enrollment limited to juniors and seniors. Priority given to IR seniors.

**IAPA 1811A. Humanitarianism in Uniform.**

The goal of this senior seminar is to explore the relationship between militarism and humanitarianism. When the US Army and Marine Corps released the Counterinsurgency Field Manual in 2006, military officials referred to NGOs as 'force multipliers' and soldiers as 'armed social workers.' In this course, we will develop a framework to understand military humanitarianism. We will also examine how military humanitarianism exceeds the contemporary geography of terrorism, investigating cases in Europe, Asia, Africa, Latin America and the Caribbean. Enrollment limited to 20. Preference given to IR juniors, seniors.

**IAPA 1812A. Bilateral and Multilateral Policy and Diplomacy.**

This course examines the practice and profession of diplomacy and its relationship to the policy process. Focus will be on bilateral and multilateral diplomacy; while the practice will focus on a U.S. context, the lessons learned apply to other nation states. We review history of inter-state relations, including international legal basis for diplomatic relations. The practice has evolved over the years; however, it continues to incorporate such common functions as policy formulation, representation, reporting, negotiation, intercultural contacts and interaction with the media, parliamentary bodies and other external actors. Limited to 20 juniors, seniors. Priority given to IR seniors.

**IAPA 1813A. Revolutions that Changed the World.**

The Bolshevik and Chinese Communist Party revolutions significantly changed the world. Studying the two revolutions helps us understand Russia's and China's contemporary roles. Alongside the framework of sociology of revolution, this course compares the two historical processes over their ideology, leadership, repression, international opening, mobilization, strategy, and outcome. Students will not only learn detailed historical knowledge of the two movements, but also master general perspective to understand how revolution occurs, succeeds, and changes society. Limited to Jrs and Srs. Priority to IR Srs.

**IAPA 1814A. Roots of Crisis in Central America.**

The five countries of Central America comprise a comparatively little-studied region. From time to time they burst into the world's consciousness, usually because of political upheaval, foreign intervention, or refugee flows. The forces that set off these crises are rarely explored. This seminar surveys and analyzes Central America from social, cultural, political, and historical perspectives. Restricted to seniors and juniors only. Priority given to IR seniors.

**IAPA 1815A. Computers, Freedom and Privacy: Current Topics in Law and Policy.**

This course puts into context arcane debates about surveillance, privacy and cyber conflict, explaining and critiquing arguments put forward by and intelligence officials, civil liberties and privacy advocates, and companies. Double-listed with CSCI 1951F. Enrollment limited to 10 IR seniors and juniors.

**IAPA 1816A. Senior Honors Seminar.**

Open only to Senior students accepted into the honors program in international relations. Instructor permission required.

**IAPA 1817A. Senior Honors Thesis.**

Open only to Senior students accepted into the honors program in international relations. Instructor permission required.

**IAPA 1818A. Individual Research Project.**

Limited to juniors and seniors. Section numbers vary by instructor.

**Required:** A completed proposal form and syllabus, sponsor's and concentration advisor's approval, and written permission from Dr. Elliott (following review of the proposal) prior to registering for any section of this course. Banner overrides will be given by the IR Program manager **only**, and no overrides will be issued after the Registrar's course add deadline.

**IAPA 1820. Brown in Washington, D.C. Practicum.**

This course is a required 2-credit course for students participating in the Brown in Washington, D.C. program. The course is centered around a challenging 20-25 hour/week internship in a public-sector or not-for-profit organization in Washington, D.C., which provides an immersive experiential learning opportunity at an organization or agency involved in the public policy process. Seminar sessions, workshops, field trips, and reading and writing assignments enable students to reflect on their internship experiences, contextualize their work and organization within the broader DC policy environment, and develop academic and professional skills.

**IAPA 1821. The New National Security: Transnational and Cross-Border Issues.**

The objective of the class is to encourage a new understanding of the complexities of national security. The traditional paradigm of players, approaches, influences, and desired outcomes, no longer accommodates the corpus of transnational and cross-border issues that crosscut every policy decision in today's world. Gender, climate, health, technology, food security, and other "non-traditional" security issues must shape the way we look at security, stability and just governance both as a sovereign nation and as a global actor. This course is part of the Brown in DC program.

**IAPA 1822. Social Policy and Social Justice: Contestation and Compromise.**

This seminar is for students in the Brown in Washington, DC program. This seminar is designed to allow interdisciplinary examination of domestic politics and policy, and of the relationship of scholarship to public engagement and governance, by focusing on enduring questions of social justice and their expression in contemporary social policy. Issues to explore include poverty, inequality, freedom, rights, race, gender, community, class, citizenship, paternalism, and the roles of government (federal, state and local), markets, capital, labor, philanthropy, and voluntary organizations. Enrollment is limited to Undergraduate level students participating in the Brown in Washington Program.

**IAPA 1850. Senior Honors Seminar.**

An advanced two-semester research seminar for senior honors candidates in the public policy and American institutions concentration. Participants jointly consider strategies appropriate to researching and writing a senior paper before proceeding to individual research on topics they choose. Each participant is required to present a summary of his or her work to the colloquium.

**IAPA 1851. Senior Honors Thesis.**

See Senior Honors Seminar (IAPA 1850) for course description.

**IAPA 1852. Individual Research Project.**

Supervised reading or research. Specific program arranged in terms of the student's individual needs and interests. Section numbers vary by instructor. Please check Banner for the correct section number and CRN to use when registering for this course.

**IAPA 2000. Theory and Research in Development I.**

Explores a range of substantive debates in development by drawing on empirical and theoretical work from the disciplines of economics, political science, sociology and anthropology. The course aims to provide students with a broad understanding of current debates and research on development, evaluate both the differences and complementarities in disciplinary perspectives and develop a toolkit of interdisciplinary analytic skills that can be applied to concrete research questions.

**IAPA 2010. Theory and Research in Development II.**

Explores a range of substantive debates in development by drawing on empirical and theoretical work from the disciplines of economics, political science, sociology and anthropology. The course aims to provide students with a broad understanding of current debates and research on development, evaluate both the differences and complementarities in disciplinary perspectives and develop a toolkit of interdisciplinary analytic skills that can be applied to concrete research questions.

**Public Affairs****MPA 2015. Communications and Public Policy.**

This course provides hands on experience for sharpening a variety of communication skills: writing, presentation, audio and visual. The goal of this course is to equip students with a diverse set of communication skills that can be used in a wide variety of settings. We begin by focusing on writing. The second part of the course covers presentation skills – from creating an effective visual representation of your policy to communicating this to a specific audience. For the last part of the course, emphasis will be on audio skills (e.g., podcasts, radio interviews) and constructing short 3 -5 minute videos.

**MPA 2020. Public Budgeting and Management.**

This course is designed to teach the political, theoretical and administrative aspects of contemporary public budgeting and management in the United States. You will examine the central role of budgeting in policy formulation and implementation and come to an understanding of the budget as a statement of competing for political priorities. In addition, the various roles of key institutions in the budgeting process will be studied.

**MPA 2035. Statistics II for Public Policy Analysis.**

The course introduces students to the use of multiple regression analysis and causal inference for analyzing data in the social sciences. We will study a variety of designs for empirical public policy analysis, from random assignment to quasi-experimental evaluation methods, and students will have the opportunity to analyze actual datasets. We will also study the strengths and weaknesses of various causal inference strategies.

Please note that students must be present at the first class meeting in order to be have the option to enroll in this course. They must have downloaded Stata 14 (available free of charge through software.brown.edu) and picked up and registered their iClicker on Canvas (see syllabus for details). Because the class meets once per week and the first assignment will be distributed during the first class, we will be launching directly into substantive material for the course. Week one/ meeting one is not only an introduction. It is therefore essential that all students attend beginning from the first class meeting.

**MPA 2040. Statistics for Program Evaluation.**

Broad overview of public policy analysis and program evaluation with emphasis on methodological issues involved in the analysis and assessment of government programs. Illustrations are drawn from a variety of substantive policy areas.

**MPA 2055. The Politics of Policymaking in Comparative Perspective.**

This course provides a broad introduction to political forces which policymakers operate. Policymaking and politics are often held as separate spheres. There is a tendency to view politics as something to be recognized and controlled. In reality, policymakers are often faced with unavoidable political issues. Issue areas that relate to the political context of policymaking include: Why do some countries have stable institutions while others are subject to frequent regime change? Why do some institutional arrangements facilitate compromise and negotiation, while others impose obstacles to effective governance? Why do some policies privilege certain groups and marginalize others?

**MPA 2065. Introduction to Data Science and Programming.**

We live in the era of data-driven decision making in all aspects of our lives. The features on your iPhone, the images in an ad campaign, even the background colors on many websites are all carefully tested and chosen against their measurable impact on customer satisfaction, purchasing, clicks, or some other goal. In this course, we will be learning to use and apply those same principles to public policy and government programs. Our goal is to equip MPA students with the tools required to set up experiments, gather data, and begin to evaluate and design public policy and government programs.

**MPA 2066. Introduction to Statistical Machine Learning.**

This course is a highly applied introduction to statistical machine learning. In particular, the key aim of this course is to give students the knowledge and tools to incorporate statistical machine learning methods to answer policy-related research questions. This course will also explore the philosophical differences that exist between traditional methods of statistical inference and the more recent statistical machine learning methods. Finally, throughout this course, we will emphasize the importance of reproducibility in science.

**MPA 2140. Politics, Public Policy, and Economic Development in Asia.**

It is widely accepted that development is not simply an economic phenomenon. Political processes are intimately tied up with economic development. We will compare and contrast the various Asian countries and models of development around themes identified above. The heaviest emphasis will be on China, India and South Korea. Economic policy will be the center of our discussion.

**MPA 2160. Management and Implementation in Public and Non-Profit Organizations.**

How and when can organizational leaders and staff become engines of policy and social change? How do the policies that elected officials, courts, and bureaucrats promulgate get put into practice? What affects whether those policies get put into practice? What affects whether those policies produce expected changes? This course is designed to help students identify and manage core challenges facing policy development, implementation, and sustainment in public organizations.

**MPA 2230. Skills for Future Diplomats.**

Future diplomats, whether they work for governments, corporations or nonprofit entities, will find new opportunities and face new challenges in promoting their international goals. They will work in a world where power is more dispersed, where players other than governments have a major role, where issues and organizations are social, cultural, regional and global rather than the sole responsibility of nation states, and where scientific and technological innovations are constantly changing the agenda and paths to influence. This course will introduce students to some of the issues and practices that will prevail as they seek to influence governments and societies.

**MPA 2445. Policy Analysis and Problem Solving.**

This course introduces students to concepts and tools relevant to making public decisions informed by social values. It equips students to define problems and to systematically develop and compare policy options available to public actors. In short, the course teaches students to "think like a policy analyst" and reason in the public interest. In addition, the course is attentive to the political and institutional context in which policy decisions are made.

**MPA 2450. Macroeconomics for Public Policy.**

This course provides an overview of macroeconomics for public policy. It builds on skills and concepts introduced in the statistics, microeconomics and program evaluation summer courses. We will introduce concepts around international trade, monetary and fiscal policies, business cycles as well as economic growth. Within the course, the segment on international trade will highlight the importance of the global economy. At the completion of this course students will be able to analyze and discuss how public policy interacts with the broader economy and how changes in the global economic conditions impact the economy as a whole.

**MPA 2455. Statistics for Public Policy.**

Covers social and economic statistics and their role in public policy research. Among the topics explored are descriptive and inferential statistics, measurement, sampling, and multivariate analysis.

**MPA 2460. Economics for Public Policy.**

Examines issues in government spending and tax policy. Conceptual topics include the normative assignment of responsibility with federal systems and the equitable distribution of income. Specific policy applications are covered.

**MPA 2465. Financial Management For Public, Health, and Not-for-Profit Organizations.**

This course focuses on financial aspects of not-for-profit organizations. The objectives of this course include helping students (1) learn the basics of not-for-profit accounting and the construction of their financial reports, (2) become more intelligent users of the financial statements of nonprofit organizations such as private colleges, hospitals, charities, and cultural institutions and (3) better understand the factors that affect the financial condition and financial performance of such entities.

**MPA 2475. Policy Problems of the 21st Century: Social Justice and Advocacy, Strategies for Change.**

This course examines efforts that work toward social justice in contemporary political and social life. The class begins by evaluating different perspectives on how to define social justice. We consider the special challenges involved in defining social justice across borders or in diverse communities. We then examine strategies and channels used to promote social change.

**MPA 2545. An Introduction to Public Finance in Multilevel Democracies.**

This course will introduce students to the fundamental political, institutional, and technical issues associated with sub-national governance and public finance reform multilevel democracies. The course requires no prior experience with either intergovernmental finance or fiscal issues. Its central purpose is to explore how politics and policy shape the way responsibility for regulating, financing, and managing public services get defined and divvied up between levels of government in both federal and unitary states.

**MPA 2555. Environmental Policy, From the Ground Up.**

The seminar will examine selected environmental issues at local, national and international (especially Global South) levels which are at the center of widespread public concern. We will give critical consideration to some of the key ideas, concepts, discourses and approaches underlying public solutions to those concerns. The seminar will draw on literature and concepts from the fields of public policy and administration, science and technology studies, feminist theory, Africana Studies, and indigenous knowledge systems, as well as on practitioners' knowledge.

**MPA 2601. Envisioning and Building Prosperous, Inclusive Communities.**

Great communities do not happen by accident. Great communities take vision, thoughtful planning, participation and an inclusive civic engagement plan. The top communities in our country engage diverse leaders, acknowledge the complex and inextricable tie between community and economic development, are accountable – measuring their progress, and are fiercely competitive. This course will focus on the planning, creation, and implementation of successful community development plans from across the country. Specific topics that will be covered include: Collective Impact, the utilization of data, the role of sustainability, health, education, art, transportation, and parks, evaluation methodology, communication, and working with local governments.

**MPA 2602. Poverty, Redistribution, and the Future of Work.**

A changing economy is providing fewer paths to a middleclass existence. Worldwide, absolute poverty has declined, , yet most people around the globe still subsist on living standards most Americans would consider to be near-poverty levels. What can be done? Is it true that the poor we shall have with us always? Are governmental actions, economic evolution, or technological changes the cause – or the cure? We will be particularly interested in the future: Will jobs still exist, what will they look like, and what will that mean for the structure and distribution of wealth and income?

**MPA 2603. Leadership and Social Change.**

Our societies, organization, communities often face pressures and challenges that require acts of leadership. If you have ever felt or are currently feeling "called" to fix a specific problem on behalf of a specific community or social group, this course will help answer some of your questions. Based on Dr. Ron Heifetz and Dr. Marty Linsky's theory of leadership called Adaptive Leadership, this seminar will not only allow you to get acquainted with its main theoretical concepts but also give you the opportunity to apply them, in a large class and small group settings.

**MPA 2604. The Corporation and Public Policy.**

This course examines corporations as instruments of government policy and as significant policy setters in their own right. Rather than taking a fixed viewpoint about the proper location of executive authority, the course will examine the changing boundaries of private and public decision-making. Through selected readings paired with case studies, the course investigates a range of critical policy problems: the underlying purpose of corporate organization; climate change and environmental sustainability; consumer safety in the gig economy; labor standards in transnational supply chains; corporate responsibility and health in developing regions.

**MPA 2605. How do you conduct research that changes Public Policy?**

This course is a hands-on exploration of how evidence is used—and not used—in the real-world trenches of day-to-day government, with the aim of teaching you how to conduct and use research in ways more likely to have a meaningful impact on public affairs. We'll explore by way of applied exercises and contributing work on real projects. Projects span from the world's largest field experiment of a police body-worn camera program, to algorithms that predict the location of city rats, to a Form-a-Palooza that seeks to systematically redesign all government forms based on insights from the behavioral sciences.

**MPA 2606. Public Policy and Politics in Partisan Times.**

This course explores the causes and consequences of partisan polarization, focusing on the impact of polarization on the development and implementation of American national policy. The course examines both historical and contemporary examples of successful and unsuccessful policy-making in such a climate, as well as the role of effective leadership and political entrepreneurship in the promotion of policy that can build wide support and overcome the barriers to adoption.

**MPA 2675. Science and Technology Policy in the Global South.**

Using both theoretical ideas and empirical examples, this seminar will explore the relationships among science, technology, society, and public policymaking in the Global South, in places where local science and global science often collaborate and sometimes clash. The class will investigate, from a variety of perspectives, how the governance of science and technology in various parts of the Global South is influenced by their past experiences, forms of public science organization, systems of knowledge, civic epistemologies and regulatory frameworks and strategic agendas for development, as well as the knowledge claims and concerns of social movements, and tensions in power and social relations.

**MPA 2710. GIS and Public Policy.**

This seminar presents an introduction to the theory and practice of social science Geographic Information Systems (GIS) as applied to public policy analysis. We will cover a variety of topics, such as the geographical basis of policy issues, spatial mapping, and use of ArcGIS software to study a wide range of policy issues. The course will involve discussions, hands-on computer laboratory exercises, take-home problem sets and a Practical Exam.

The goals of the class are: 1) learning how to use GIS software and techniques, 2) database development and editing 3) spatial modeling techniques, and 4) using GIS to study policy issues.

**MPA 2715. Education Governance in Comparative Perspective.**

This course will examine some of the governance issues associated with these trends by pairing critical readings with case studies. We will begin by surveying the historical relationship between how education gets defined as a public good, and systems of finance and governance. We will then examine the very particular trajectory of school governance and finance in America.

Course Goals: Robust understanding of how the competing, and hard-to-measure objectives (e.g. civic virtue, economic competitiveness, equal opportunity, personal growth) that people invest in schooling shape how education is defined as public good, and how it is governed and finance.

**MPA 2725. Smart Policy.**

The purpose of this course is two-fold. Students will read, analyze and understand the current research literature in the behavioral economics of policy reform. Second, they will continue themes and projects started in the RIPL Smart Policy Consultancies, and use data collected as well as the RIPL database to design a Smart Policy Innovation and a test of that innovation. Smart Policy Innovations will be considered for the RIPL Smart Policy Fellowship for 2016-2017.

**MPA 2730. The Political Economy of Hard Policy Problems.**

This class tackles the "hard problems" of public policy. While governments are cajoled and enjoined to produce economic growth, do something about economic inequality and social mobility, and improve the life chances of millions through purposive action, actually delivering in these areas of policy is incredibly hard. These areas constitute "hard problems" for policy for two main reasons. Economically, we don't have much of a clue about how to do many of these things. Politically, there are powerful interests and entrenched ideas that like these areas of policy just as they are and work hard to keep them "hard problems."

**MPA 2735. Women and Nations.**

See the linkage between the security and situation of women and the security and situation of the nations in which they live. Understand the roles women play in world society as producers, reproducers, agents of cultural continuity and change, and to render women "visible" in international and national affairs. Explore in greater depth women's choices about education, family, and work in the developing world, and how these affect and are affected by national and international forces and influences.

**MPA 2765. System Dynamics: Policy Analysis for a Complex World.**

The course studies why so many public policy problems are challenging and often lead to disappointing results or outright failure. Students learn to conceptualize a social problem as a set of structures and policies that create dynamics and govern performance. The course introduces the tools of system dynamics for modeling and analyzing public policy. Using role playing games, simulation models, and management flight simulators, we develop insights essential to managing in a world characterized by dynamic complexity. Case studies include applications of system dynamics in healthcare, environmental policy, project management, and implementation of improvement programs.

**MPA 2772. Disaster, Displacement and Response: A Practitioner, People-Focused Lens on Urban Policy & Practice.**

Applying a practitioner's view and working from scenarios will allow students to examine practical elements of delivery as well as the complexities of coordination in an emergent arena. This class will create both empathy and urgency - fueled by stories the class can explore together. The aim is to examine commonalities in the experiences of displaced people with respect to how cities respond across the world and to create a people-centered lens for examining effective responses.

Assignments will focus on creating convincing presentations – making a case for what works and what cities may learn from one another.

**MPA 2775. U.S. Foreign Policy: The Institutional Basis.**

This course will examine the institutions that influence American foreign and development policy. Institutions provide the organizational framework, rules and social structures that in turn impact on the policy positions of those who are part of them. The agencies and bureaus that make up the national security cluster have both professional expertise and bureaucratic qualities. We will delve deeply into these entities to understand better their jurisdictional authorities and professional perspectives. We will use case studies and roll playing exercises to enhance understanding of these orientations and their impact on the policy process.

**MPA 2800. Policy in Action Consultancy.**

The Policy in Action experience is designed to provide a rigorous and practical immersion with a client in a domestic or global community-based or institutional setting. The consultancy focuses on experiential learning and creative problem solving. Real world, complex contemporary problems are addressed, policy and practice-based solutions explored, strategies identified and future approaches recommended. Students conduct research to understand contemporary problems and issues and develop policy and practice-related solutions to address these issues and/or enhance an organization's capacity.

**MPA 2981. Independent Graduate Study.**

This is an independent study course for the MPA program.

# University Courses

---

## University Courses

In an intellectually creative atmosphere, ideas for new academic approaches and new kinds of courses may and should arise. Among these courses are offerings that address governs departmental offerings. They provide students with the opportunity to integrate their understanding of major areas of learning and explore relationships among diverse forms of human experience; or to relate one or more disciplines to a broader context; or to focus on large and fundamental problems that need to be approached through several disciplines or by ways not found in existing disciplines. University courses originate with individual instructors and are retained in the curriculum only so long as these instructors wish to teach them.

## Courses

### UNIV 0067. Learning to See: An Introduction to Contemplative Photography.

The process of selecting what to record in the photographic image depends upon the state of awareness, the connection with the present moment. The main objective of this course is the union between art and contemplative practice. In particular, this course will introduce the experience of mindfulness to photography. We will explore the relationship between the contemplative states of mind and the creative experience through photography. The following topics will be covered during this course: creativity and the empty mind, introduction to reality and selection, space and time, illusion and ambiguity. Enrollment limited to 20.

### UNIV 0090. Meditation and the Brain: Applications in Basic and Clinical Science.

This course draws upon the multi-disciplinary expertise of four instructors to provide a detailed exploration of recent neuroscientific research on meditation combined with guided first-person experiential learning in various meditation practices. The course focuses on the cognitive, affective, and neurophysiological effects of meditation practices and their clinical applications in health, psychiatry and medicine.

We will identify persistent methodological challenges as well as the potential solutions for cutting-edge research that can emerge from an informed interdisciplinary perspective.

### UNIV 0100. Living the Open Curriculum.

Like many institutions dedicated to the liberal arts, Brown encourages undergraduates to study broadly and deeply, to become self-reflective, and to develop a moral core. However, at Brown, students are empowered to attain these goals by becoming "the architects of their own education." But what does that mean and how do you do it? This class will address these questions by considering Brown's open curriculum in the context of American collegiate education and by providing students with the tools to clarify and articulate their educational goals and direction as an outgrowth of their values, interests, and life plans.

### UNIV 0140. Insights into Chemistry: A Historical Perspective.

We begin with the chronicle of a great scientific quest: the 19th-century search for the structure of molecules. A consensus was reached only after many decades of experiments, interpretations and misinterpretations, polemics, and controversies both scientific and personal. Our purpose is to show how theories are shaped and to give insight into the human dimensions of science. We next detail the transfer of the new chemistry to the marketplace, from its beginnings in the synthetic dye industry. Finally, we conclude with the role of chemistry in World War I.

### UNIV 0300. The Hispanic Experience in the United States.

This seminar will consider how Hispanics are transforming the United States even as they evolve as a people. We will discuss Hispanicity as an ethnic and racial identity, debate the ethical dilemmas posed by undocumented immigration, the significance of the unprecedented geographic dispersal, and what the burgeoning second generation portends for the future contours of economic inequality.

### UNIV 0333. Contemplative Approaches to Living and Dying.

One of the central components of a religious tradition are beliefs about the meaning of human existence—a meaning that is constructed in relation to the significance of one's inevitable death, the nature of the afterlife, and conceptions of salvation. These core beliefs also deeply inform the ethics, rituals, and contemplative practices of religious communities. Through an investigation of four case studies, this course will explore how different religious traditions orient human life in relationship to a meaningful death. Particular emphasis will be placed on contemplative practices for skillful living and dying and on relating to death through rituals.

### UNIV 0400. Beyond Narnia: The Literature of C.S. Lewis.

C.S. Lewis was one of the most widely read authors of the 20th Century, yet much of his philosophical, theological and political theories are unfamiliar. His fiction and philosophical writings will be explored to better understand his perspective on modern humanity, the relationship of man to family, the community and the state. C.S. Lewis had a very clear philosophy on the importance of the individual and how he relates to the larger social structures. Morality and the role of individuals as they interface with others around them and their responsibility for working with society both at community level and at the macro-state level will be explored.

### UNIV 0456. Stages of the Contemplative Path.

One common metaphor for human life and self-transformation is the journey or the path. Contemplative traditions have also employed this image, offering both concise and expansive maps of the stages of practice and anticipated end goals of the contemplative life. The study of path structures allow us to carefully compare the relationship between specific cognitive, affective, and somatic practices, their resultant states and traits of human experience, and the meaning and value ascribed to them in different historical and cultural contexts.

### UNIV 0500. A Comparative Phenomenology of Mystical Experience.

Mystical experience – personal engagement with an ultimate reality– is found in virtually all cultures, in explicitly religious and deliberately secular guises. It has received extraordinarily diverse appraisals: some have acclaimed it "the only truth there is," while others have been executed for asserting it. This course examines the nature of mystical experience and the variety of its manifestations in and out of the world's major religious traditions. Students will read broadly in primary sources and engage two contemporary theoretical questions: Is mystical experience conditioned by exclusively socio-cultural factors? Is it possible to derive an ethic from mystical experience? Enrollment limited to 16.

### UNIV 0701. Fascism: 1933-Present.

The resurgence of ethno-nationalist and populist movements has upended the liberal democratic consensus of the past half century and elicited comparisons to Weimar Germany. With the rise of a distinctly authoritarian politics in Europe and America, many have questioned whether we are witnessing a return of Fascism. As a political worldview believed to have been defeated at the end of WWII, Fascism nevertheless continues to represent the anxiety looming over the liberal political order. This class will examine the intellectual history of Fascism as a politics of identity, from interwar Europe to the present day and interrogate its meaning today.

### UNIV 1001. The Israeli-Palestinian Conflict: Contested Narratives.

We will compare the radically different narratives that Palestinians and Israelis tell themselves and others about their struggle over Palestine/Israel. Sources will include historical documents, memoirs, and accounts of the conflict by Israeli and Palestinian historians. We will read works of fiction and view films that present the story of the conflict from both perspectives. Attention will also be paid to efforts by Israelis and Palestinians to transcend their conflicting narratives and attain mutual understanding. All sources in English translation.

**UNIV 1005. Narratives of Racism: Lynchings, Miscarriages of Justice, and Internment Camps in America.**

In this course, we will study narrative accounts of 20th-century American incidents in which racism led to the persecution of members of minority groups by means of lynchings, miscarriages of justice, or the placement of people in internment camps: the unjustly conducted trial and lynching of the Jewish factory manager Leo Frank accused of murdering a young girl in Georgia; the kidnapping and murder of African American adolescent Emmett Till in Mississippi; and the internment of Japanese descendants during World War II out of fear that they would aid America's enemy.

**UNIV 1089. Global Dynamics and Critical Perspectives on Immigrant Entrepreneurship in the United States.**

Immigrants own over a quarter of newly established businesses, despite accounting for less than 15 percent of the total U.S. population. 45 percent of immigrant business owners are women. These entrepreneurs have developed businesses in various industries including healthcare and medicine, biotech, hospitality, food services, garment and technology. Course traces U.S. history of 18th century immigrant entrepreneurs (Italians, Germans, ethnic and religious affiliated Jews) to more recent entrepreneurs from countries such as China, South Korea, Japan, Iran, Cuba. We examine today's emerging immigrant entrepreneurs including Mexicans and Filipinos, and among the more recent immigrant groups, including Vietnamese, Cambodians, Ethiopians, Eritreans.

**UNIV 1100. Imagining an Equitable University.**

The course studies moments over the past half century in which the University was faced with a need to be more inclusive, with an emphasis on issues of race and gender. Our goal is to create an alternative history of Brown that enables new voices to evaluate how the process of governance has worked. Participation by President Simmons depends on her availability. Interested students should apply using the application found at [http://www.brown.edu/administration/presidential\\_seminar/](http://www.brown.edu/administration/presidential_seminar/) Applications are due by April 30th.

**UNIV 1110. The Theory and Teaching of Problem Solving.**

What is a problem and how do you solve one? What relationship exists between problem-solving and teaching? This course is designed for STEM students who are teaching/will teach and are interested in improving their problem-solving and teaching. You will gain the skills that will aid you in your own learning, promote learning in others, improve communication and problem-solving capabilities, and prepare you to engage more deeply in diverse learning spaces. In the final weeks of the course you will apply course concepts to a Scholarship of Teaching and Learning project that focuses on improving/examining problem-solving and/or teaching in your field. S/NC

**UNIV 1200. Making Choices: Ethics at the Frontier of Global Science.**

Considers the ethical tradition in the sciences, and the ways in which ethical issues are engaged in science. Readings and case study examples are drawn from a range of fields, including engineering, chemistry, physics, astronomy and the biological sciences. The seminar has been designated with NSF funding, and is being co-taught at Brown University, Zhejiang University in China and the Indian Institute of Technology in Bombay. The three sections of this seminar will meet together to share international perspectives several times during the semester. Enrollment limited to 25. Not open to freshmen.

**UNIV 1400. The Cultural History of Disability Minorities in the United States.**

Due to the efforts of people with disabilities to secure their civil rights, "disability" has begun to be perceived as a social identity and role rather than solely a medical condition. This course analyzes the cultural history of disability, giving attention to cross-cultural comparisons. Broad topics include: concepts of disability; disability and bioethics; images of disability in film, the media, art, and literature; and political movements of people with disabilities.

**UNIV 1520. The Shaping of World Views.**

To many students, an exclusive emphasis on specialized studies fragments the "world" in which they live. A widespread feeling of loss pervades the minds of students who often come to universities to learn right from wrong, to distinguish what is true from what is false, but who realize at the end of four years that they have deconstructed their freshman beliefs, values, and ideologies, but have created nothing to replace them. This course examines the diversity of worldviews both synchronically and diachronically and surveys various explanations for such diversity. Enrollment limited to 30. Conducted in English.

**UNIV 1700. Transformation of the Research University.**

This seminar will focus on recent transformations of the academic, instructional and administrative character of the elite American research universities. Emphasis will be on selected pressure points (such as research funding, diversity, technology, market influence) that drive change and shape the future.

# Independent Study Plans

---

## Independent Study Projects

Most academic departments offer students opportunities to work independently with one of its faculty members. Students may approach a professor, and request to do a departmental independent study which, if successfully arranged, takes place under the rubric of the sponsoring department's course code (i.e. ECON 1970 or SOC 1970.) When such an option is not available the student may choose to propose an Independent Study Project (ISP) through the College Curriculum Council. Each course proposal must have the approval of a faculty sponsor who shall be responsible for the scrutiny of the proposal, the evaluation of the work done, and the assignment of a grade. The faculty sponsor is not expected to give regular tutorial instruction.

Proposals for non-departmental Independent Study Projects (ISP) must be submitted in accordance with guidelines established by the College Curriculum Council on a form provided by the Office of the Dean of the College. The proposals will be reviewed by the College Curriculum Council to assure the academic quality of the proposed course and to avoid undue duplication. Independent study proposals have deadlines associated with them for each semester. For more information, please visit the Curricular Resource Center (<http://brown.edu/academics/college/advising/curricular-resource-center/independent-studies/independent-studies>) website.

## Group Independent Study Project

*Group Independent Studies* (GISP) are cooperative inquiries in which participating students bear major responsibility for both planning and conduct of the work. They provide an opportunity for academic pursuits which might not be available in regular courses. They carry course credit.

Each Group Independent Study is sponsored by an instructor who holds a teaching appointment in Brown University and whose central functions are to assess the proposed study, to provide advice during the work, and to be responsible for the evaluation of each student's work. Group Independent Studies permit instructors to interact with more students than independent studies can realistically permit. A Teaching Assistant or Teaching Associate may sponsor a Group Independent Study if the department chair recommends that he or she be permitted to do so.

Proposals for Group Independent Studies should be made on a form provided by the Office of the Dean of the College. They will be reviewed by the College Curriculum Council to assure the academic quality of the proposed study and to avoid undue duplication. Group Independent study proposals have deadlines associated with them for each semester. For more information, please visit the Curricular Resource Center (<http://brown.edu/academics/college/advising/curricular-resource-center/independent-studies/independent-studies>) website.

Each group should be sponsored by an instructor holding a teaching appointment at Brown University who is prepared to assess the proposed study, to provide advice during the project, and to be responsible for the evaluation of each student's work. Normally this person will be a faculty member. Under exceptional circumstances a graduate student with appropriate expertise and teaching experience would be eligible to be a sponsor. In this case, the proposal must be accompanied by a curriculum vitae for the graduate student and a statement of qualification and recommendation from the chair of the graduate student's department. The chair will assume ultimate responsibility for the academic quality of the GISP. The College will not offer remuneration for sponsors of GISPs.

At the end of each Group Independent Study, a joint student-faculty evaluation report of the accomplishments of the project must be submitted by the faculty sponsor to the College Curriculum Council.

## Global Independent Study Project

Brown students studying abroad have the option of crafting a *Global Independent Study Project* (GLSP) with a Brown faculty member. Students accepted to this program work with faculty who have teaching or research experience in their proposed overseas study destination. Together, the student and the faculty member develop a project proposal that is an

integral part of the student's study abroad curriculum and that, where possible, is connected to the student's concentration. Project proposals are submitted to the College Curriculum Council for review. Upon successfully completing the global independent study project, students receive one Brown credit. The remainder of the student's course load abroad is taken through the study abroad sponsor institution.

Group Independent study proposals have deadlines associated with them for each semester. For more information, please visit the Office of International Programs (<http://www.brown.edu/academics/college/special-programs/international-study/programs/global-independent-study-glisp>) website.

# Financial Information

## The College — Tuition Regulations

Undergraduate students at Brown are required to accumulate eighth semester, or 32 units of enrollment credit (in order to earn a baccalaureate degree). The eight-semester enrollment requirement is separate from and in addition to any other degree requirements.

1. Tuition rates are set by the Corporation of the University for each semester. Normally, the tuition rates for the two semesters of a given academic year will be the same.
2. Tuition payments for the baccalaureate degree are based on the norm of thirty-two courses, four courses in each of eight semesters. The minimum enrollment requirement is eight semesters, or the equivalent. The minimum tuition requirement for the program leading to the combined degrees of A.B.–Sc.B. is ten semesters of tuition credit. (Note: The Brown Corporation has enacted a provision allowing students in the five-year A.B.–Sc.B. program who complete all academic requirements in nine semesters to terminate their studies at that point, provided the Committee on Academic Standing (CAS) approves the breadth and quality of the student's program. In that case, the tuition requirement is reduced to nine semesters.)
3. Payment of full-time tuition for a semester entitles the student to enroll in three, four, or five courses for that semester. For full-time degree candidates, tuition charges are set for the semester, not per course.
4. Enrollment Credit for Transfer Credits

- a. Students who are granted credit for Advanced Placement scores and/or transfer credit for courses completed at another college or university prior to enrollment at Brown may apply for up to four semesters of enrollment credit according to the following schedule:

Brown Semester Course Credits	Advanced Standing and Enrollment Credit
3-6	1 semester
7-10	2 semesters
11-14	3 semesters
15 or more	4 semesters

- b. Students who are granted Brown course credits by the Committee on Academic Standing for equivalent work completed at and transferred from another college or university after enrollment at Brown may apply for and may be granted advanced standing and enrollment credit according to the same schedule as in 4(a) above. All transfer credits earned after enrollment at Brown are cumulative. Advanced standing and enrollment credit for this cumulative total of transfer credits will be awarded *only* in semester-equivalent blocks. In exceptional cases the Committee on Academic Standing may allow a student to transfer the equivalent of one or two Brown semester course credits for work completed during the regular academic year. Tuition credit will be granted for each such course at the rate of one quarter of a full-semester credit subject to the following conditions:

- i. Such courses completed while the student is not currently enrolled at Brown will become part of the cumulative total of any subsequent transfer credit earned by the student and the Table in (a) above will apply.
- ii. If the courses are completed as part of a dual registration arrangement (e.g., a student who is permitted to carry a less-than-normal load of courses at Brown and to pay an appropriate reduced amount of tuition in order to pursue concurrently certain specialized courses at another institution), enrollment credit for such courses will be independent of any other cumulative total of transfer credits earned by the student.
- iii. Once advanced standing has been granted, a student wishing to extend his or her total period of enrollment beyond eight full-time semesters, or the equivalent, must make a special petition to the Committee on Academic Standing. If approval is granted, tuition for each course (for the extended period) will

be charged at the rate of one quarter of the full-time semester rate.

- iv. Transfer credit for summer school courses is allowed in accordance with provisions established by the Faculty Rules and the Committee on Academic Standing. When such credit is awarded, no enrollment credit is associated with the transfer credit granted. The academic credit awarded may not be combined in any cumulative total of transfer credits for the purpose of determining advanced standing or enrollment credit.
5. Undergraduate degree candidates who successfully complete four Brown Summer Session courses may apply for a waiver of one semester's enrollment. See regulations for Brown Summer Session below.
6. An eighth-semester student who owes less than a full-semester tuition credit at the beginning of the eighth semester will be charged the fraction of the full-time tuition charge for that semester which will complete the eight-semester obligation and may take an equivalent number of courses. Additional courses will be charged at the rate of one quarter of the semester's full tuition charge.
7. Regular degree candidate students who must or choose to take courses in semesters beyond the eighth semester in order to complete requirements for the baccalaureate degree will be charged tuition at the rate of one quarter of the semester's full tuition charge for each course enrollment.
8. Degree candidate students who are given permission by the dean to register for a reduced workload (one or two courses) will be charged one quarter of the semester's full- tuition charge for each course enrollment.
9. Students in the eight-year program leading to a baccalaureate degree and the M.D. degree (Program in Liberal Medical Education) shall make four annual tuition payments at the rate fixed for the College (for years one through four) and four annual tuition payments at the rate fixed for the Medical School (for years five through eight).
10. Students in the Concurrent Bachelor's -Master's program are required to fulfill the minimum eight semester, 32 enrollment unit requirement, but can extend study up to nine semesters, 36 enrollment units.
11. The minimum enrollment requirement for the integrated five-year baccalaureate–master 's degree program is eight semesters, 32 enrollment units while an undergraduate, and a minimum of six enrollment units while in the fifth year in the graduate school.
12. The above regulations cover students who are candidates for a baccalaureate degree. For special students who are not candidates for a degree, a tuition charge of one quarter of the semester tuition rate will be made for each course/credit registered. (*Exception* - RISD cross-registration students during the fall and spring semesters).

## Enrollment Credit Regulations Relating to Brown Summer Session Courses

For undergraduates, Brown Summer Session courses carry a course fee charge; they do not carry enrollment credit. Brown Summer Session courses may not be offered in fulfillment of enrollment requirements on a course-by-course basis for undergraduates. Graduate students, however, do receive enrollment credit for summer courses when they pay the full tuition charge.

A special provision of the enrollment regulations enables undergraduates to offer Brown Summer Session courses, in partial fulfillment of the enrollment requirement, under certain specified conditions: undergraduates who have otherwise fulfilled the graduation requirements at Brown and have been enrolled in seven semesters of full-time study or an acceptable equivalent, plus have taken and passed four Brown Summer Session courses, will be granted, on request, a waiver of the final semester of their enrollment requirement.

The enrollment requirements dictate that courses taken prior to matriculation may not be combined with courses taken after matriculation in order to achieve advanced standing and enrollment credit; hence, Summer Session courses cannot be so combined. In a similar manner, summer courses taken elsewhere and transferred after matriculation may not be combined with Brown Summer Session courses to achieve

advanced standing. The maximum number of summer courses from all sources for which a student may receive credit is four, with no more than two in the same summer.

## Estimated Date of Completion (EDOC)

One goal of the enrollment requirement is to enable the University to manage enrollment in the College more effectively. It is essential that this be done to the maximum extent possible. Accordingly, all currently enrolled students are assigned an expected date of completion (EDOC). This information is sent annually to all students with instructions to confirm the assignments or to work out any necessary adjustment with the Registrar. Any extension of enrollment beyond the student's official EDOC will have to be applied for by December 1 for the spring semester and June 1 for the fall semester.

## The College — Student Charges

The University reserves the right to change the rates that apply to all students whenever it is deemed advisable. Published notice of any change will normally be provided in advance.

Charges for 2020-2021 are as follows:

**Tuition:** The annual tuition charge for the year is \$59,254 or eight tuition units. The tuition charge for part-time and special students is \$7,406.75 or one tuition unit, per course.

**Room:** The dormitory charge for the academic year in the undergraduate residence halls is \$9,774 for regular accommodations and for dormitory apartments/suites.

**Board:** All undergraduate, graduate and medical students may elect either a twenty, fourteen, ten, or seven meal contract. An annual charge of \$6,134 applies to the twenty meal contract and other plan pricing can be found on the Bursar Office website at <https://www.brown.edu/bursar>. They may also elect a twenty- or fourteen-meal Kosher/Halal meal plan. Consistent with Brown's commitment to the residential college, all resident undergraduates (except RUE students) are required to participate in a meal plan throughout their first full year of enrollment. Any board plan may be changed once during the first three weeks of each semester with a refund credited to the student's University account on a prorated basis. A student may increase his or her contract participation at any time during the academic year. A fifty dollar (\$50) administrative fee is charged to a student's University account for any meal plan contract cancellation that occurs after the start of the semester. A ten dollar (\$10) fee is applied for any meal plan contract change made after the start of the fall semester. Because services offered are often modified to reflect changes in student life, a current brochure is available from the food services office.

**Academic Records Fee:** An Academic Records Fee of \$100 will be charged to all first-time attendees in degree programs with a program start date on or after July 1, 2018. This includes students in undergraduate, graduate, medical, executive master degree, and stand alone certificate programs. Non-degree students who are charged tuition will be charged a \$10 fee per semester of enrollment.

The Academic Records Fee will cover transcripts for life (students will have to pay the FedEx fee) and electronic diplomas (for students who completed degrees on or after May 2015). The Academic Records Fee does not cover replacement diplomas.

**Nonresident Fee/Commuter Fee:** Nonresident undergraduate students in co-ops or off-campus housing and those commuting from home are charged a \$920 fee for services provided by the University such as Faunce House, security services, and off-campus information and listing services.

**Health Services Fee:** A \$978 fee is charged all degree candidates in residence, both full and part time. This fee is designed to cover costs of providing care at Health Services from late August through Commencement. This fee does not include Health Insurance coverage.

**Student Health Insurance:** Mandatory participation is required in the university group health and accident insurance program for students unless a waiver of participation is granted upon submission of proof of comparable coverage. Waiver deadline is June 1. Health insurance for the 2020-2021 academic year is \$4,077.

**Student Activity Fee:** A \$286 fee is charged to all students for the support of registered student organizations, the activities of the Undergraduate Council of Students, and the Student Union.

**Recreation Fee:** A \$66 recreation fee is charged to all Brown students to provide access to the University's recreational athletics facilities.

**Readmission Fee:** A \$70 fee is charged to all students who re-enroll at the University after having been officially separated for any reason, including leave of absence.

**Late Registration Fee:** A \$15 fee is charged to students who register after their normal early registration period in November for upcoming spring semester and in April for upcoming fall semester. There is an additional charge of \$15 per course for all registrations after the second week of classes.

**Transcripts:** Information about ordering transcripts and the associated fees can be found at: <http://brown.edu/about/administration/registrar/academic-records/academic-transcript-requests/transcript-ordering-options>

## The College — Payment of Charges

The University utilizes an electronic billing system (E-Bill). Payment of tuition and fees are due by August 1 for Semester I obligations and by January 1 for Semester II obligations. Charges applied to the student account during the semester will be due upon receipt of the monthly electronic statement.

Students who fail to make payment in full by the prescribed deadlines are assessed a late payment charge of 1.5% per month (an annual rate of 18%) on any unpaid balance. Outstanding balances greater than \$100 will prevent a student from receiving an official transcript from the University. Outstanding balances greater than \$1,000 will prevent a student from pre-registering for any subsequent semester. Students who fail to meet their financial obligation in accordance with established University regulations will have the status of their account reported to the University Student Account Committee for appropriate action, which may include cancellation of eligibility for enrollment and/or dismissal. Students expecting to receive a degree in May are required to settle their accounts by May 1 to retain eligibility for receipt of a diploma. The University reserves the right to refuse to furnish grades, transcripts, certificates, diplomas, letters of honorable dismissal or recommendations, for students who fail to pay their student account balances. The University utilizes the service of a commercial collection agency to assist in the collection of unpaid student accounts.

For GI Bill students, our tuition policy complies with 38 USC 3679(e) which means a GI Bill student will not be charged or otherwise penalized due to a delay in VA tuition and fee payments. Students who wish to use VA education benefits should submit their Certificate of Eligibility to the School Certifying Official in order to be certified with the VA.

Upon application, a monthly installment payment plan is available through the Bursar's Office. Additional information is available in the Bursar's Office or on the web at <http://www.brown.edu/bursar>.

Checks in payment of student accounts should be made payable to Brown University in U.S. dollars and mailed to the Cashier's Office, Campus Box 1911, Providence, RI 02912. Instructions for sending payment via wire transfer are available by contacting the Cashier's Office at 401-863-2151. Payment may be made online via U.S. personal checking/savings accounts at <https://payment.brown.edu>.

## The College —Refund of Annual Charges

### 1. Tuition

- A student who leaves the University during or at the end of the first semester shall not be charged tuition for the second semester.
- A student who leaves the University (except under conditions noted in (c) below) or changes his/her enrollment status during a semester shall be eligible for tuition payment refund during the first five weeks according to the following schedule:

i.

Week of Withdrawal	Percentage Amount of Refund
1 and 2	80 percent
3	60 percent
4	40 percent
5	20 percent

ii. If a partial refund is made, no portion of the tuition paid and not refunded will be credited to the total tuition required for the degree. When no refund is made, the four tuition units paid will be credited toward the total tuition requirement for the degree, and the number of semesters to which a student is entitled for full-time enrollment will be reduced by one.

c. A student who is suspended, dismissed, or withdraws when under investigation for misconduct shall not have tuition refunded for the semester in which the action is taken.

## 2. Room

While residence hall rooms are rented on an academic year basis, students who leave the University or change their status to married students during or at the end of the first semester are not charged room rental for the second semester. Students who leave the residence halls during the semester are charged room rental for the balance of that semester unless the residential life office can provide a satisfactory replacement for the vacant space. A satisfactory replacement is deemed to be a student who is not currently living on campus or a student who is living in a "roomsharing" room if the total occupancy of the residence halls is in excess of normal capacity. Prorated room refunds when applicable will be made from a schedule prepared by the Director of Residential Life and will be on file in the Office of Residential Life. A student suspended or dismissed from the University or withdrawing when under investigation for misconduct is not entitled to any refund of room rental charges for the balance of the current semester. Students seeking any further information regarding room charges and/or refunds should contact the Office of Residential Life.

## 3. Board

Brown Dining Services offers flexible meal plans and varied menu and service offerings. The following meal plan contract options, based on meals available per week, are available to all undergraduate, graduate, and medical students; twenty; fourteen; ten; seven; twenty Kosher/Halal; and fourteen Kosher/Halal. Consistent with Brown's commitment to the residential college, all resident undergraduates (except RUE students) are required to participate in a meal plan throughout their first full year of enrollment.

Any students who wish to change, or upperclass students who wish to cancel their meal contract, can prior to the start of, or during the first three weeks of the fall semester. One change is permitted per semester. Meal plan contracts are in effect for the full academic year. Therefore, contracts may be changed but not cancelled during the spring semester. A credit or debit will be applied to the student's university account based on a weekly proration of the annual contract price. Additionally, the following fee structure applies:

- A fifty dollar (\$50) administrative fee is charged to a student's University account for any meal contract cancellation that occurs after the start of classes in the fall.
- A ten dollar (\$10) fee is applied for any meal plan contract change made after the start of the fall semester.

## 4. Health Services Fee

A student who leaves the University at any time after the start of the semester is not eligible for a health fee refund.

A student who leaves the University during or at the end of the first semester shall not be charged a health fee for the second semester.

## 5. Health Insurance Fee

Enrollment in the student health insurance plan is for a twelve-month period (August 15th to August 14th). Students who start their enrollment at Brown in the second semester are enrolled from January 15th to August 14th.

Prorated refunds are available only to students who separate from the University. Students who wish to request a prorated refund must notify the Office of Risk Management in writing within 30 days of their separation date. Details are available from the Office of Risk Management, Box 1914, (401) 863-1703.

Student account records are maintained in the bursar's office. Questions concerning the exact amount of debit or credit balance on a student account should be directed to the bursar.

Additional information regarding student charges and payment options, please visit the Bursar's Office website at: <http://www.brown.edu/about/administration/bursar>

## The College — Financial Aid

The Office of Financial Aid is committed to partnering with students and families to explore options to finance the cost of an education at Brown. We assist undergraduate and graduate students, in understanding all aspects of the financial aid application processes for federal, state and institutional need-based grants and loans. Our office also provides information about student employment opportunities both on and off-campus.

At Brown, financial aid is one of our highest priorities. Brown is committed to meeting a family's full demonstrated financial need with a combination of federal and institutional need-based grants, student employment, and loans. Our financial aid program includes initiatives that in some cases offer awards with no expected parent contribution, and/or no loans.

The instructions and links on this website (<http://www.brown.edu/about/administration/financial-aid/>) will provide you and your family details regarding required application forms and documentation, as well as deadlines and other helpful information. All inquiries concerning need based financial aid should be addressed to the Office of Financial Aid, Box 1827, Brown University, Providence, Rhode Island 02912 or (401) 863-2721.

## The College — Financing Alternatives

The Loan Office is the centralized department for all loan programs. This office administers student loans for undergraduate, graduate and medical students. The University participates in the Federal Direct Lending program for subsidized and unsubsidized Stafford Loans and Plus Loans. In addition, the University offers alternative Parent Loans and the Tuition Prepayment Program, along with various employee loan programs. Financial counseling is available to the families of Brown students.

If you have any questions regarding these programs or require more information you may contact the Loan Office at Box 1950, Providence, Rhode Island 02912 or call (401) 863-3296; or please visit the Loan Office website at: <http://www.brown.edu/about/administration/loans>.

## The Graduate School — Tuition Regulations, Student Charges, etc.

For the current information regarding Graduate School tuition regulations, student charges, payment of charges and financial aid, refunds, and financial support, please visit the Graduate School website at: <http://www.brown.edu/academics/gradschool/financing-support>.

## Warren Alpert Medical School — Tuition and Financial Aid, Student Charges, etc.

### PLME

The tuition for the first four years of the Program in Liberal Medical Education is the same as that of the College listed above. Tuition for the last four years of the PLME is somewhat higher than the College tuition, but consistent with other private medical schools. Tuition is determined each year by vote of the Brown Corporation.

For the current information regarding tuition regulations, student charges, payment of charges and financial aid, refunds, and financial support

for the Warren Alpert Medical School, please visit the website at: <http://brown.edu/academics/medical/financial-aid>.

# Academic Facilities and Educational Resources

## Libraries

### University Library

The Brown University Library supports the educational and research mission of the University by serving as the local repository for and principal gateway to current information and the scholarly record. The library contains more than 3.8 million volumes and 6 million items, including printed and electronic books, periodicals and e-journals, maps, microforms, videos, sound recordings, sheet music, manuscripts, electronic media, government documents, and resources in other formats. Currently the Brown University Library is one of the largest and most notable academic libraries in New England and holds several world-renowned special collections. The University library system includes five libraries on campus and the Library Collections Annex, a high-density storage facility located about four miles from campus. The John Carter Brown Library is an independent research library also located on the Brown campus.

The library web site <http://library.brown.edu/> is the principal gateway to the collections and services available for library users at Brown. Josiah, <http://josiah.brown.edu/>, the Brown University Library online catalog, provides access to information about holdings in all the libraries at Brown. Expenditures for acquisitions in 2008-9 totaled over \$8.5 million. The library has received over 65,000 journal titles and has licenses for more than 300 research databases. The library complements its local collection by providing Brown users with access to over 50 million additional volumes via direct borrowing agreements with consortial partners (a supplement to traditional interlibrary loan services). A growing portion of the library's resources today are digital, providing users with more immediately accessible information in a format that suits their research preferences.

### John D. Rockefeller Jr. Library

The Rockefeller Library <http://library.brown.edu/about/rock/>, otherwise known as "the Rock," houses the collections in the social sciences and humanities. On the first floor near the entrance, users will find the circulation desk where they can check out books for borrowing, seek reference assistance, or inquire about library services and policies. The entire building allows for wireless connections to the Brown network and the Internet. Computer clusters are available on Levels 1 and 2; a separate graduate student cluster is available on Level 2. The Rock provides a variety of spaces to suit different work styles, including open, comfortable seating as well as group study rooms in the Laura & David Finn Reading Room on Level 1, an "absolute quiet" study room on Level A, and individual study carrels located throughout the building. The Alfred and Laura Hecker Center for Library Technology, a state-of-the-art classroom for library instruction, is located on Level 1. Josiah, the library's online catalog, and other search tools and online resources can be searched from workstations located throughout all the libraries as well as from any device with access to the Internet. Books and bound periodicals are shelved together in open stacks arranged by Library of Congress call numbers. The library's main collection of newspapers is housed in the Periodicals Reading Room on the first floor. East Asian material, located on level 3, includes the Gardner Collection which consists of mostly historical Chinese material from the Ch'ing Dynasty (1644–1912). A small café in the lobby of the Rock provides a convenient place for a study break or to meet informally with friends or colleagues.

### Sciences Library

The Sciences Library <http://library.brown.edu/about/scili/>, a 14-story high-rise building, contains the library's resources in the physical, biological, and medical sciences. Library Richard A. Friedman Study Center <http://library.brown.edu/about/friedman.php>, a modern, comfortable, and technologically equipped 24-hour study environment for Brown students in the heart of campus. The Friedman Study Center is open 24/5 and

features individual and group study areas, computer clusters, and common areas designed to meet students' needs for academic and gathering spaces. A café is located in the lobby of the Sciences Library. Additional computer clusters and study spaces are available on the Mezzanine level. Books and bound periodicals are shelved together by Library of Congress call numbers on the upper floors of the Sciences Library. There is an extensive map collection including U.S. Geological Survey depository maps on Level 8. The Science Center is located on Level 3 and offers work, study, and lecture spaces as well as tutoring and advising resources for math and science students. The Media Services department (part of Computing and Information Services) is located on Level 14, and provides assistance to the Brown community in the use of instructional technology equipment for classrooms and events.

### John Hay Library

The John Hay Library <http://library.brown.edu/about/hay/> is the location for most of the University's rare books, manuscripts, special collections and archives. Among the notable materials in "the Hay" are the renowned Harris Collection of American Poetry and Plays, the Sheet Music Collection, the McLellan Lincoln Collection, the Anne S. K. Brown Military Collection, the Lownes History of Science Collection, the papers and works of H. P. Lovecraft, the Smith Collection of books on Magic, and the Annmary Brown Collection of incunabula. Other notable collections include the Hall-Hoag Collection of Extremist and Dissenting Literature, the Katzoff Collection of Gay and Lesbian Literature, the Poulin and Ciaraldi Collections of Comic Books and Illustrated Novels, the Miller Collection of Wit Collection of Modern American Poetry, and the Leab Collection on George Orwell. A detailed listing of special collections in the John Hay Library is available at <http://library.brown.edu/collatoz/>. Exhibitions of materials from the collections are mounted year-round. The University archives <http://library.brown.edu/collections/archives/>, dating from 1763, contain copies of the official records and publications of the University and the papers of many of its departments, officers, and affiliated groups. All materials are paged at the reader services desk for use in the reading room, which is also available for general study. Materials in the library do not circulate outside the building. The Walter L.S. Bopp Seminar Room, a state-of-the-art instruction and meeting space, is located on the third floor of the John Hay Library.

### Virginia Baldwin Orwig Music Library

The Orwig Music Library <http://library.brown.edu/about/orwig/> houses the general collections of music materials, including books, periodicals, scores, and sound recordings. The study space is particularly convenient for students living in the East campus area. A listening facility for sound recordings, audio cassettes, and compact discs is also available; the recordings do not circulate. Digital audio files may be placed on reserve using O CRA (Online Course Reserves Access), a system that streams required listening assignments to students registered in Brown University classes; see <http://library.brown.edu/reserves/> for more information.

### Art Slide Library

Located on the fourth floor of the List Art Center for the convenience of its most frequent users, the Art Slide Library <http://library.brown.edu/about/asl/> acquires digital images, slides, photographs, printed reproductions, microfiche, reference books, and electronic resources to support the general needs of the Brown University community for visual materials pertaining to art and art-related subjects, including architecture and archaeology. The resources include a growing collection of digital images as well as approximately 300,000 slides, 39,000 photographs, and 10,000 microfiche. In collaboration with the Center for Digital Scholarship, the ASL provides scanning services for faculty who need digital images of visual culture for teaching. A local image database is available via Luna Insight software. Anyone affiliated with the University is welcome to use items from the collections for teaching on campus, student presentations, research, or related educational activities. The staff of the Art Slide Library is available to answer humanities reference questions and to provide training in the use of the digital image collections.

### John Carter Brown Library

The John Carter Brown Library [http://www.brown.edu/Facilities/John\\_Carter\\_Brown\\_Library/](http://www.brown.edu/Facilities/John_Carter_Brown_Library/) is a separately administered and

independently funded library, operating under its own policies and procedures. In the field of Americana, it is one of the outstanding libraries of the world. Among the some 50,000 volumes printed before 1825 are numerous books and pamphlets describing the growth of the European colonies in the New World and the impact of the discovery and exploration of the New World upon Europe. The library also has an extensive collection of maps dating from 1477 to the mid-19th century. While the resources of the John Carter Brown Library are available to anyone who needs to use them, the library is designed to serve those engaged in advanced scholarly research. Use of the reading room is restricted to those making use of the collections. The John Carter Brown is a closed stack library, and all materials must be paged by the staff. The library regularly mounts exhibitions open to the general public.

## Library Services

### Access to Library Buildings

The primary goal of the libraries at Brown University is to support the instructional and research needs of the Brown academic community. Currently, the libraries are open and provide services over 110 hours per week during the academic year with additional hours available during reading and exam periods. In addition, the Friedman Study Center in the Sciences Library is open overnight (5 nights per week) for studying. A Brown University identification card or other proof of Brown affiliation is necessary to gain access to the Rockefeller and Sciences libraries. Following is a brief listing and description of some of the library services. More complete information and assistance are available at <http://library.brown.edu/> or from staff at any of the service points throughout the libraries.

### Locating and Using Library Materials

Josiah, the Brown University Library online catalog <http://josiah.brown.edu/>, and the library's other search tools and online resources, can be searched from workstations located throughout all library buildings or from any device with access to the Internet. The book stacks in Rockefeller, Sciences, and Orwig libraries are open and allow users direct access to the collections for browsing purposes. Materials shelved off-campus at the Library Collections Annex can be requested for delivery to campus (usually within 24 hours). Details about loan periods are available on the library's web page. Materials at the John Hay Library must be retrieved by staff from the closed stacks and used within the library; please inquire at the Hay Reader Services Desk for more information.

Library staff provide a variety of general and specialized services to assist students, faculty, and staff members of the Brown community. Library staff promote academic success by advising students and faculty on how to use a wide range of information resources available through the library. Subject specialists are available to consult on research topics, instruct in the use of library resources and tools, evaluate sources of information, and help users navigate the research process.

An increasing portion of the library's collections is available digitally through licensed or networked resources. The library currently has licenses to over 300 research databases and approximately 52,000 full-text online journals. Detailed lists of electronic titles are available through Josiah and on the library web site. Instructions for accessing licensed content from off-campus are available at <http://library.brown.edu/offcampus/>.

### Access to Other Libraries

Beyond the immediate collections available on campus, Brown students and faculty have direct access to more than 50 million volumes through special borrowing agreements with partner libraries. Titles from these libraries — including Columbia, Cornell, Dartmouth, University of Pennsylvania, Princeton, Yale, and the academic libraries in Rhode Island — can be searched and requested using easyBorrow, the library's web service for expedited borrowing and delivery of books to the Brown campus. In addition, Brown has reciprocal agreements for on-site access to a number of libraries in the region and throughout the nation. More information about these and other options for obtaining materials from

other libraries is available from the library's web site or from staff at any of the service points throughout the libraries.

## Center for Digital Scholarship

The Center for Digital Scholarship (CDS) coordinates the library's efforts in building its digital collections. CDS focuses on producing digital materials for use in scholarship and teaching efforts at Brown; digitizing "signature collections" from Brown's world renowned special collections; developing databases, programs, and applications to enhance access to and use of these materials; and providing consultative services for library and academic units undertaking digital projects. A growing collection of digitized materials, faculty projects, databases, search tools, and finding guides is available at the library's web site: <http://library.brown.edu/cds>.

## Services for Users with Disabilities

The library works closely with the University's Disability Support Services to accommodate Brown students, staff, and faculty with special needs. The main entrances to the Rockefeller and Sciences libraries are wheelchair accessible. The John Hay Library is also accessible via the entrance at the rear of the building, where a phone is available to gain admittance by calling the staff at the Reader Services Desk. The service desks in the Rockefeller, Sciences, and Hay libraries can arrange to have materials retrieved from the stacks and provide other special services as required for users with physical disabilities. The Rockefeller Library currently has a computer workstation with magnification and reading software for the vision impaired.

## Museums

### Gardner House

Gardner House, located at 106 George Street, is the University guest house and a historic house museum. It was built in 1806 for Joseph Hale, a mason, and for many years was a single family residence. Later it was partitioned into a multifamily dwelling, and, during the early 1930s, the owner offered room and board to Brown students.

In 1932 the house was acquired by Brown University. Shortly thereafter, George Warren Gardner, M.D., a member of the Brown Class of 1894, and his wife Jessie Barker Gardner, offered to donate to the University their home on Orchard Avenue and all their antiques. In return, arrangements were made to restore Gardner House and for the Gardners to occupy it for as long as they lived. In accordance with their agreement with the University, upon their deaths, the house became available to Brown as a historic house museum and a guest house. It has been maintained for these purposes since 1948.

In 1979, renovated, Gardner House was reopened as the President's guest house for distinguished guests of Brown University.

### Haffenreffer Museum of Anthropology

The Haffenreffer Museum of Anthropology curates over 100,000 archaeological and ethnographic objects from around the world. The Museum is also the federally designated repository for significant arctic collections from Alaska. The Museum's Collections and Research Center and offices are located at the museum's original site on the 375-acre Mount Hope Grant in Bristol, Rhode Island, eighteen miles from Providence—Museum and land having been a gift in 1955 from the heirs of Rudolf Haffenreffer. In 2005, the Museum opened a 2,000 SF gallery on campus, in Manning Hall on the main green. Museum education outreach programs are run from Manning Hall and Giddings House on campus. Since 1955, the Museum has close intellectual and historical ties with the Department of Anthropology, being led by a director with a faculty appointment in the department, offering courses and a master's degree in anthropology-museum studies, guiding undergraduate and graduate students in co-curation of exhibitions. The gallery in Manning Hall is open Tuesday-Sunday, 10-4. For more information see <http://brown.edu/Facilities/Haffenreffer/index.html>.

## Laboratories

The University provides extensive, modern laboratory facilities designed for undergraduate instruction, graduate instruction, and research. The major laboratory facilities include the following.

### Physical Sciences Laboratories

*Barus and Holley Building:* a seven story building housing both the School of Engineering and the Department of Physics. In addition to classrooms and faculty offices, the building contains over fifty laboratory rooms. These rooms are equipped with the latest scientific apparatus permitting research in fields such as: bio- and nano-mechanics, picosecond ultrasonics, low-temperature physics and superconductivity, surface physics, colloidal physics, liquid crystal physics, solid-state physics, magnetic properties of solids, nonlinear optics, high-energy and elementary particle physics, laser systems, microwaves, servo-mechanisms, instrumentation, solid state electronics, microelectronics, creep and fatigue of materials, materials preparation, transmission and scanning electron microscopy and electron microprobe analysis, scanning tunneling and atomic force microscopy, x-ray diffraction, soil mechanics, dislocation dynamics, dynamic inelasticity, binocular vision, coal gasification, speech recognition; robotics, image processing and computer systems, and the CVD (Chemical Vapor Deposition).

*Chemical Laboratories:* The instructional laboratories and classrooms are housed in MacMillan Hall. The research programs in inorganic, organic, physical, and biochemistry as well as the offices of the Department of Chemistry are housed in the adjacent Geology-Chemistry building. Facilities include a machine shop, and an electronics shop. The laboratories are equipped with modern instruments for research in chemistry, including NMR, ESR, IR, Raman, UV and mass-spectrometers, X-ray and electron diffraction systems, several state-of-the-art laser facilities, and equipment for ESCA, Auger and photoacoustic spectroscopy. The laboratories contain an extensive array of computational and graphics workstations, linked via networks to departmental minicomputers, to the university's mainframe, and to remote databases and supercomputing facilities.

*Geo-Chem Building, MacMillan Hall, and Lincoln Field Building:* These buildings house the Department of Geological Sciences. In addition to classrooms and faculty and graduate student offices, the buildings contain laboratory space and research equipment and facilities including an extensive computing network of workstations and minicomputers which are linked via Ethernet to a campus parallel computing facility and to national networks and The MacMillan Undergraduate Science Center houses undergraduate geoscience and environmental science laboratories, office and laboratory space for concentrators, as well as a computer center, well-equipped lecture halls, and a lounge. *Planetary Geoscience* facilities include a sophisticated image processing and analysis facility, the Brown/NASA Reflectance Experiment Laboratory (RELAB), and an extensive collection of photographs, images, and maps from all planetary exploration missions. Brown/NASA Regional Planetary Data Center makes available to researchers data from the U.S. Space Program. *Experimental and analytical labs* include: pollen, micropaleontological, and alkenone paleotemperature laboratories, Elzone particle counter, elemental analyzer and the Environmental Stable Isotopes Laboratory for analysis of d15N, d18O, dD and d13C in carbonates and organic samples, several multicollector gas and solid-source mass spectrometers, hydrothermal, gas, and piston cylinder apparatus, electron microprobe/scanning microscope, X-ray fluorescence analysis facility (XRF), an X-ray diffraction unit, a computer controlled rotary shear gas apparatus for frictional sliding experiments, modified Griggs-type solid medium deformation apparatus (3) for high and low temperature and pressures as well as various strain rates. A jointly owned ion microprobe and a campus Electron Microscope Facility for SEM and TEM studies are available, as well as Raman spectroscopes in other departments. We currently have a radiogenic isotope laboratory and a Thermal Ionization Mass Spectrometer for the analysis of (Rb-Sr, Sm-Nd, U-Pb) in whole rocks and minerals. We are building a new state-of-the-art clean lab for isotopes analysis. *Field equipment* includes estuarine water sampling equipment (with boats, moorings, CDTs and fluorometers), Leica laser surveying equipment, two ground penetrating radar systems

(GPR), portable field spectrometers, gravimeter, field seismic equipment, and equipment for geomagnetic and magnetotelluric measurements.

### Life Sciences Laboratories

*Genomics Core Facility:* The facility provides state-of-the-art genomics and proteomics equipment to researchers at Brown University and to the entire Rhode Island research community, as well as assistance with experimental design, trouble shooting, and data analysis. For more information regarding the services and equipment that will be found at the facility, please go to: <https://www.brown.edu/research/facilities/genomics/>.

*Leduc Bioimaging Facility:* The facility, open to all investigators, provides equipment and training dedicated to high-resolution imaging in the life sciences. It includes a Transmission Electron Microscope, a Scanning Electron Microscope, two Fluorescence Microscopes, a Fluorescence Stereomicroscope, three Confocal Laser Scanning Microscopes, and software for image analysis. The facility also maintains equipment for sample preparation, including a critical point dryer, sputter coater, and microtomes for ultrathin sectioning. The facility currently offers training and equipment at two locations: in Sidney Frank Hall for Life Sciences and the Laboratories for Molecular Medicine. The facility maintains nine main imaging systems and serves more than 200 users.

*Molecular Pathology Core Research Laboratory:* The laboratory provides instrumentation and supports personnel in research efforts for both the COBRE mentors and their junior associates, as well as specialty immunohistochemical services for the Department of Pathology. The 1250 square foot facility is equipped with an Arcturus AutoPix automated laser capture microdissection instrument, Olympus BX41 with CoolSnap Camera from Media Cybernetics and Image Pro-Plus Software, Stratagene MX4000 quantitative Real Time PCR system, BioRad iCycler, Agilent BioAnalyser, Ventana Discovery automated immunohistochemistry processor, microtome and cryostat, Beecher tissue arrayer and 40 cubic feet of 80 degrees Celsius freezer space for the tumor bank.

*MRI Research Facility (MRF):* The facility occupies a 3000 sq. ft. research suite located in the Sidney Frank Hall for Life Sciences on Brown's main campus. The centerpiece of the Facility is a state-of-the-art research dedicated Siemens 3 Tesla TIM Trio. The scanner is equipped with 32 receiver channels for significant gains in signal-to-noise ratio and acquisition speed. The MRI Research Facility provides infrastructure and support to facilitate research and educational activities using magnetic resonance imaging technology. The MRF is affiliated with the University's Institute for Brain Science and is a resource available both to Brown researchers and those at Brown affiliated hospitals. Ongoing research includes studies of brain structure and function in normal and clinical populations as well as studies of other body systems, non-invasive animal imaging and materials science.

*NSF/EPSCoR Proteomics Facility:* The facility shall have a broadly-inclusive philosophy to ensure rapid and equal access to the facility's services for the entire Rhode Island research community. In addition to the acquisition of instrumentation, the NSF/EPSCoR Proteomics Core Facility will undertake the training of research in emerging proteomic techniques, a component that is essential to maintaining a productive and professional level of service. The NSF/EPSCoR Proteomics Core Facility shall have a strong commitment to be at the leading edge of current and developing technologies and provides consultation on their application.

*Outcomes and Biostatistics Core:* The core participates in a wide variety of activities, including consultation on design and analysis for small pilot projects, development of study design for major projects (e.g. R01 proposals), assistance and advice on database construction and management, collaboration on large projects where outcomes measurement and statistical analysis considerations are nontrivial, development of new statistical methodology, and mentorship for junior investigators and fellows. To request services from the biostatistics core, please contact one of the core co-directors. you should describe your project in detail, explain your statistical needs, and provide pertinent deadlines. A member of the core will respond to set up an intake meeting.

*Plant Environment Center:* The Center, consisting of research greenhouses, a classroom laboratory and Conservatory, is located at 85 Waterman Street (formerly Hunter Lab). We provide an educational research facility which is primarily available to those in the Department

of Ecology and Evolutionary Biology, a part of the Division of Biology and Medicine. The facility is comprised of 3 research greenhouses approximately 5,000 sq.ft. used for research experiments and a teaching plant collection for biological science classes. There is also a Conservatory of approximately 2000 sq.ft. The collection includes many plant families, including a diverse collection of Cycads, Orchids, Aroids, and many plants from the Amazon region. Many of these plants have medicinal and ceremonial uses and are part of our Ethnobotanical collection.

In addition to the greenhouse facilities, we have five E7/2 Conviron Plant Growth Chamber units, as well as one eighty square foot walk-in chamber. These units are used by graduate students and professors with very specific cultural requirements for optimal plant growth.

For additional information about the Center please visit: <https://www.brown.edu/academics/ecology-and-evolutionary-biology/about-us/facilities/plant-environmental-center>

For information about 85 Waterman Street (formerly Hunter Lab) please visit: <https://www.brown.edu/academics/institute-environment-society/about-institute/facilities>

## Creative Arts

### Perry and Marty Granoff Center for the Creative Arts

The Granoff Center serves as a catalyst for collaboration between and among the arts, sciences, and humanities. Within the Center, creative thinkers from across disciplines can come together to work collaboratively, exchange ideas, and create new art forms.

The center serves as the home for the Brown Arts Initiative, which supports the goals of individual creative arts departments and programs, while facilitating a common vision for the arts that transcends discipline and creates unity. The Initiative serves as a catalyst for innovative collaboration across disciplines and provides a regular forum for communication among all members of the arts community. The Brown Arts Initiative is for the benefit of students, faculty, staff, alumni, and friends. Through its public activities, it seeks to maximize the visibility of the arts on campus, throughout the local community, and on a national and international level.

For more information on the Granoff Center and/or the Brown Arts Initiative, please visit: <http://brown.edu/academics/creative-arts-council/>.

## Leeds Theatre

The flexible theatre space in **Leeds Theatre** allows seating on three sides or in the round. Each year the department of Theatre Arts and Performance Studies produces several productions in Leeds Theatre including various productions as part of the Sock and Buskin mainstage season, the annual Writing is Live Festival, Brown/Trinity Playwrights Repertory Theatre, and the annual student-directed Senior Slot production. It has a seating capacity of 140.

## Ashamu Dance Studio

**Ashamu Dance Studio** serves as the home for the Dance Program at Brown. Measuring approximately 30x80 feet and equipped with mirrors and a sprung floor, it is well-equipped for performances with seats, lights, sound system, and curtains. It has a seating capacity of 100.

## Stuart Theatre

**Stuart Theatre** has a seating capacity of 250. The department of Theatre Arts and Performance Studies produces several productions in Stuart each year including the annual dance concert, and various productions as part of the Sock and Buskin mainstage season.

# Summary of Enrollment & Degrees

---

---

The total IPEDS enrollment of Brown University degree candidates for Fall 2019 (October 15, 2019) was 9,848 FTE. The breakdown by school was as follows:

## **The College**

6,822 FTE

## **The Graduate School**

2,430 FTE

## **Warren Alpert Medical School**

596 FTE

## **Summary of Degrees**

As of May 2019, there were enrolled the names of 139,992 graduates. Of this number 103,874 had received the bachelor's degree; 30,258 had received advanced degrees; 3,785 had received the degree of doctor of medicine; 2,072 had received honorary degrees.

For historical information regarding student enrollment figures and/or degrees for Brown University, please visit the website of the Office of Institutional Research: [http://www.brown.edu/Administration/Institutional\\_Research/](http://www.brown.edu/Administration/Institutional_Research/).

# Prizes, Premiums, and Honors

---

Complete details concerning endowed funds from which prizes and premiums are paid and special conditions which must be taken into consideration in making awards may be obtained from the Office of the Dean of the College.

The University reserves the right to withhold any award for any reason it deems valid.

## Prizes for Excellence in Preparatory Studies

Prizes for excellence in certain preparatory studies are awarded each year during the first semester to members of the entering class on the basis of special examinations as described below. Examinations separately judged with separate awards but covering the same material are conducted simultaneously for both men and women.

The competitions in Greek, Latin, and Mathematics are open to all freshmen. However, those in the French, German and Spanish languages, respectively, are open only to those freshmen whose knowledge of the language concerned has been gained through secondary school studies rather than from family or community contacts.

THE PRESIDENT FRANCIS WAYLAND PRIZES, derived from the income of a fund presented in 1843 by President Wayland, and later increased, are awarded each year to those members of the freshman class who upon examination are found to excel in preparatory Greek and Latin.

THE HARTSHORN PRIZES IN MATHEMATICS, derived from the income of a fund presented to the University in 1872 by Joseph Charles Hartshorn of the class of 1841, are awarded each year to the two members of the freshman class who are found to excel in an examination on elementary algebra (through quadratic equations and the binomial theorem) and plane geometry.

THE HYPATIA PRIZES IN MATHEMATICS, derived from the income of a fund named for Hypatia of Alexandria, and presented anonymously in 1951, parallel for women freshmen the Hartshorn prizes for men.

THE ALBERT BUSHNELL JOHNSON PRIZES IN FRENCH are derived from part of the income of the Albert Bushnell Johnson Fund bequeathed to the University in 1949 by Edward K. Aldrich, Jr. and are awarded each year to the two members of the freshman class who are found to excel in preparatory French.

THE CAESAR MISCH PRIZES IN GERMAN, established in 1913 by a gift of Mrs. Marion L. Misch, are awarded to the two members of the freshman class who are found to excel in preparatory German.

THE ASA CLINTON CROWELL PRIZES IN GERMAN, derived from the income of a fund established in 1928 by alumnae of the University, are awarded to the two women members of the freshman class who are found to excel in preparatory German.

THE LOPE DE VEGA PRIZES IN SPANISH, established in 1962 by anonymous gift, are awarded to two men of the freshman class who are found to excel in preparatory work in Spanish.

THE GABRIELA MISTRAL PRIZES IN SPANISH, established in 1962 by anonymous gift, are awarded to two women of the freshman class who are found to excel in preparatory work in Spanish.

## Prizes and Premiums for Excellence in Undergraduate Studies

THE KIM ANN ARSTARK MEMORIAL AWARD IN POETRY is derived from a fund established in 1971 by Mr. and Mrs. Lester D. Arstark in memory of their daughter. It is awarded annually for a poem or poems "in celebration of life."

THE DEREK CANFIELD BARKER PRIZE was established in 1994 through a gift from Richard C. Barker '57 and Abbie D. Paterson '57 in memory of their son, Derek. The purpose of this prize is to recognize students who have shown qualities of leadership, who have triumphed over adversity, and who have worked to bring the Brown community together through community service.

THE ALBERT ARNOLD BENNETT, CLASS OF 1872, AWARD FUND was established by an anonymous donor through several gifts made between 1941 and 1949. The fund is in memory of the Reverend Albert A. Bennett, D.D., pioneer missionary to Japan, and is available annually for award purposes, but not continuously for any one object.

THE PHILO SHERMAN BENNETT PRIZE was established in 1904 by Philo Sherman Bennett for the "best essay discussing the principles of free government."

THE HONORABLE THOMAS WILLIAMS BICKNELL MEMORIAL AWARD was established in 1963 by the National Society of Sons and Daughters of the Pilgrims as a memorial to Thomas Williams Bicknell. The prize is awarded for an essay in American history.

THE BRAND MUSICAL PREMIUM is derived from a fund established in 1960 by William C. H. Brand as a memorial to William and Mina R. Brand and is divided equally between two seniors of Brown University, one man and one woman, on the basis of merit.

THE TRISTAM BURGESS PREMIUM IN ENGLISH, instituted in 1953, is given at the end of the junior year to the woman student "with the highest standing in rhetoric, English composition, and public speaking."

THE BUXTEHUDE PREMIUM FOR MUSICAL EXCELLENCE was established by a gift from an anonymous donor to provide annual premiums for one or more undergraduates in the junior year.

THE THOMAS CARPENTER PRIZES FOR ELOCUTION, derived from the income of a fund established in 1867 by Thomas Carpenter, are awarded each year to the three students to whom are assigned the first, the second, and the third rank of excellence in elocution.

THE THOMAS CARPENTER AND LYDIA CARPENTER PREMIUMS were established in 1869 by Lydia Carpenter, on behalf of her late brother. They are assigned at the end of the academic year to the two members of the senior class who, "already on scholarships, shall, in the judgment of the faculty, unite in the highest degree the three most important elements of success in life—ability, character, and attainment."

THE HOPE CHATTERTON PRIZE IN MUSIC, to memorialize Hope Chatterton, was instituted in 1946, by anonymous donation. A prize is given in the spring to a woman student who in public audition is deemed to excel in piano performance.

LEALLYN B. CLAPP PRIZE for an outstanding undergraduate thesis in chemistry. The prize honors Professor Clapp, who retired in 1983 after a long and distinguished career in the Brown chemistry department.

THE CLASS OF 1873 PRIZES are derived from the income of a fund presented in 1877 by the class of 1873 and are awarded each year to seniors for essays on such topic(s) as the "faculty may, from time to time, deem most expedient."

THE CLASS OF 1906 MEMORIAL PREMIUM was established in 1956 by the will of Harry Knowles, Brown 1906. Currently the premium is awarded to a student who has completed with highest distinction the honors program in Russian studies.

THE CLASS OF 1952 PREMIUM is derived from the income of a fund established in 1952 by the Class of 1952, at the College. It is awarded annually to an outstanding student at the end of his or her junior year, on the basis of excellence in scholastic achievement and extracurricular activity.

THE CLARKSON A. COLLINS, JR., PRIZE IN AMERICAN HISTORY is derived from the income of a fund given to Brown University in 1941 by Letta I. Collins in memory of her son. An annual prize is offered for the best paper on any approved topic dealing with the American Merchant Marine or Navy. Competition is restricted to men in the junior or senior class.

THE RUTH ELECTA COLLINS PREMIUM IN FRENCH is derived from the income of a fund established in 1936 by Mrs. Clarkson Abel Collins in

memory of her daughter Ruth Electa Collins. It is awarded annually to a male senior, distinguished for outstanding work in French.

THE CURT JOHN DUCASSE PREMIUM IN METAPHYSICS is paid from income of a fund established anonymously in 1958. The premium is awarded to a freshman, sophomore, or junior who excels in metaphysics and related subjects.

THE ROBINSON POTTER DUNN PREMIUM. The income of a premium scholarship fund presented to the University in 1872 by pupils and friends of Professor Robinson Potter Dunn is given, at the end of the junior year, to the student "with the highest standing in rhetoric, English composition, and public speaking."

THE ADOLPH CONRAD ELY PREMIUM IN GERMAN is derived from a fund bequeathed in 1941 to Brown University by Adolph Conrad Ely, teacher, of the class of 1894. A premium is awarded annually to the senior with highest standing in Germanic languages and literature.

THE BETH LISA FELDMAN PRIZE IN ENGLISH COMPOSITION is derived from a fund established in 1966 by Mr. and Mrs. Robert Feldman. This competition is open to all students of the University. Preference is given to the writing of stories for children.

THE WILLIAM LEOPOLD FICHTER PREMIUM IN SPANISH was established in 1962 by anonymous gift. The premium is awarded to a member of the junior class who has the highest standing in courses in Spanish language and literature.

THE IRVING LYSANDER FOSTER PREMIUM IN FRENCH is awarded from the income of a fund established in 1940 by Warren Woden Foster and Hatie Foster Moore in memory of their father, Irving Lysander Foster, of the class of 1893. The premium is awarded at the end of the academic year to that freshman who excels in French.

THE LAFAYETTE SABINE FOSTER PRIZE IN GREEK is derived from the income of a fund bequeathed in 1880 by the Hon. Lafayette Sabine Foster, of the class of 1828. This income is to be paid annually "to that scholar of the institution who passes the best examination in the Greek language, the examination to be made in the first, third, sixth, and twenty-fourth books of Homer's *Iliad*, or in the *Oration on the Crown* by Demosthenes."

THE GASPEE CHAPTER DAUGHTERS OF THE AMERICAN REVOLUTION PRIZE. This prize, instituted in 1895, is now paid from the income of a fund presented to Brown University in 1899. The prize is awarded annually to that woman student who presents the best paper written as a class assignment in an American history course.

THE WILLIAM GASTON PREMIUM SCHOLARSHIP is provided by the income of a fund established in 1899 by the widow and the children of the Hon. William Gaston, LL.D., of the class of 1840. The scholarship is awarded to a member of the senior class solely upon scholarly merit.

THE WILLIAM GASTON PRIZE FOR EXCELLENCE IN ORATORY. From the income of a fund established in 1894 as a memorial to the Hon. William Gaston, LL.D., of the class of 1840, a prize is awarded annually to the member of the graduating class who presents the best original address.

THE PRESTON GURNEY LITERARY PRIZES are derived from the income of a fund bequeathed in 1928 to Brown University by Preston Gurney, of the class of 1866. From the income of the endowment two prizes are awarded annually to members of the senior class for the best essays on approved literary topics.

THE FRANCES MASON HARRIS '26 PRIZE established in 1983, is awarded annually to a woman undergraduate or graduate student for a book-length manuscript of poetry or prose-fiction.

THE MARION HASSENFELD PREMIUM IN MUSIC is paid from a fund bequeathed in 1960 by Marion Hassenfeld. It is an annual award to a woman student who "excels in music or music appreciation."

THE MINNIE HELEN HICKS PREMIUM IN ENGLISH is awarded at the end of the senior year to the woman student who has "the highest standing in the courses in English literature and language."

THE MINNIE HELEN HICKS PRIZES IN ART are awarded from income of the Minnie Helen Hicks Fund, for creative work in art by women students.

THE MINNIE HELEN HICKS PRIZES IN CLASSICAL APPRECIATION, instituted in 1953 from income of the Minnie Helen Hicks Prize Fund, is

currently awarded to the woman undergraduate who presents the best paper in the course in Greek art and archaeology or in Greek and Roman history, these being offered in alternate years.

THE MINNIE HELEN HICKS PRIZES FOR ELOCUTION parallel, for women students, the Thomas Carpenter Prizes for Elocution established in 1867 for men students.

THE RATCLIFFE HICKS PREMIUM IN ENGLISH, established in 1915, from income from the Ratcliffe Hicks Fund of 1907, is awarded at the end of the senior year to the male student who has "the highest standing in the courses in English literature and language."

THE RATCLIFFE HICKS PRIZES AND PREMIUMS FOR EXCELLENCE IN DEBATE, established in 1891 by the Hon. Ratcliffe Hicks, of the class of 1864, and by bequest in 1907, are awarded annually for intercollegiate debates and interclass debates.

THE DAVID HOWELL PREMIUM is awarded from income of a premium scholarship fund presented to the University in 1866 by Gamaliel Lyman Dwight in honor of his grandfather, David Howell. The premium is given at the close of the first semester of the senior year to the student who, "having a good record of deportment, has the highest rank in Mathematics and Natural Philosophy."

THE DOMENICO A. IONATA FUND, established by gifts of the family of Domenico A. Ionata, Class of 1926, provides for a premium to be awarded annually to that senior concentrating in engineering who demonstrates an unusual degree of creativity and imagination in an independent study project.

THE JIN PRIZE FUND was established in 1997 in honor of the late Professor Young-Son Jin and his wife, Mrs. Kyunghye Jin. This prize will be awarded to the most outstanding graduating senior on the basis of academic achievement and service.

THE PROFESSOR I. J. KAPSTEIN FUND, established by friends, students, and colleagues of Professor Kapstein, provides a premium for that undergraduate who has done the best work in the areas of literature, creative writing, or theater arts.

THE JAMES F. KIDWELL PRIZE IN GENETICS OR POPULATION BIOLOGY is awarded each year to a graduating biology concentrator for excellence in course work and research in these areas. The prize is in honor of Professor Kidwell.

THE NOAH KRIEGER MEMORIAL FUND was established in 1995 by family and friends of Noah Krieger, Class of 1993. Awards from this fund are given annually to one or more seniors studying in the A. Alfred Taubman Center for Public Policy and American Institutions who have demonstrated outstanding accomplishment and intellectual ability.

THE SAMUEL C. LAMPORT PRIZES IN INTERNATIONAL UNDERSTANDING, first offered in 1943 by annual gift of the Trustees of the Samuel C. and Miriam D. Lamport Foundation, are now awarded from the income of a fund donated to Brown University in 1952 by these trustees. The prizes are offered to undergraduate students for papers on international understanding, with emphasis on cooperation and tolerance.

THE BROWN LINK AWARD PROGRAM is funded by Brown alums and parents, the Office of Financial Aid, as well as other Brown departments, and is administered by BrownConnect in the Center for Careers and Life After Brown. These awards allow students to explore career options and engage in experiential learning activities outside of the classroom.

THE LUCIUS LYON PRIZES IN LATIN are derived from the income of a fund presented in 1893 by Mrs. Caroline L. Lyon, in memory of her husband, Lucius Lyon, of the class of 1844. The prizes are awarded on the basis of a special examination relating to any or all of the following subjects: the Latin language, Latin literature, Roman history.

THE GEORGE H. MAIN '45 FUND, established by gifts of the family and friends of George H. Main, class of 1945, provides for a premium to be awarded annually to that senior in engineering who is distinguished by his diligence and devotion to studies rather than for high grades and who holds promise of success in his field.

THE MURIEL HASSENFELD MANN PREMIUM IN MUSIC is paid from a fund bequeathed to the University in 1960. An annual award is made to a woman student who excels in music, music appreciation, or both.

THE HENRY PARKER MANNING MATHEMATICAL PRIZES, instituted in 1936 by annual gift, as the "Calculus Prizes," are now paid out of the annual income of a fund established anonymously in 1949, on the ninetieth birthday of Henry Parker Manning, Brown 1883, mathematician and scholar of ancient languages. Competition is restricted to juniors.

THE BISHOP MCVICKAR PRIZES were instituted in 1909 by the Rt. Rev. William Neilson McVickar, Bishop of the Protestant Episcopal Diocese of Rhode Island, 1898–1910, and are now awarded from the income of a fund established in 1923 in his memory by his sister, Miss E. C. McVickar. The prizes are awarded for the best papers submitted under conditions designated by the Department of Religious Studies.

THE ALEXANDER MEIKLEJOHN PREMIUM IN LOGIC is paid from income of a fund established anonymously in 1951. The premium is awarded to a freshman, sophomore, or junior who excels in logic and related subjects.

THE EVA A. MOOAR PREMIUM is derived from a fund established in 1967 by the gift of Mrs. Edward M. Kanzler (Lydia W. Mason '31) honoring Eva A. Moorar, Pembroke Dean of Admissions 1926–54. It is awarded annually to that woman student of the senior class "whose achievement over her college years gives evidence of the greatest mental growth and who has contributed to the college and to the community."

THE WALTER JOSEPH NELSON MEMORIAL PREMIUM FOR EXCELLENCE IN MUSIC, instituted in 1957, is paid from an expendable fund given to the University by friends of the late Dr. Walter J. Nelson, Brown 1934.

THE JAMES ALDRICH PIRCE PRIZE is awarded from the income of a fund established in 1927 by Miss Florence Pirce in memory of her brother, a member of the class of 1892. The prize is currently awarded to the male undergraduate who presents the best paper in the course in Greek art and archaeology or in Greek and Roman history, these being offered in alternate years.

THE MORRIS L. POVAR PRIZE IN PHYSIOLOGY OR ZOOLOGY is awarded annually to a senior biology concentrator for outstanding academic performance and research. The prize was established in honor of Professor Povar.

THE ROSE LOW ROME MEMORIAL PRIZE IN POETRY, paid by gift by Mrs. Peter H. Ten Ecyk (Arlene B. Rome, Pembroke '43), is awarded annually for the best poem or poems submitted to the English department by an undergraduate or graduate student.

KAREN T. ROMER UNDERGRADUATE TEACHING AND RESEARCH AWARDS (UTRAs) support Brown students collaborating with Brown faculty on research and teaching projects during the summer or the academic year.

THE SUSAN COLVER ROSENBERGER PRIZES were established in 1919 by Jesse L. Rosenberger, as a memorial to his wife, who was the daughter of Charles K. Colver, of the class of 1842. The awards are to be made under conditions to be laid down by the University.

THE ROSTROPOVICH PRIZE IN MUSIC is awarded to the outstanding graduating string musician in the Brown Orchestra.

THE ROYCE FELLOWSHIP, established by a generous gift from Charles M. Royce, '61, recognizes undergraduates who have gained distinction for their outstanding scholarship, leadership, creativity, and service.

THE HAROLD SCHLOSBERG MEMORIAL PREMIUM IN PSYCHOLOGY is derived from income of a fund established in 1964 by the colleagues, former students, and friends of Harold Schlosberg, professor of psychology and chair of the department, 1954–1964. It is awarded annually to an outstanding senior concentrating in psychology.

THE MURIEL FAIN SHER MEMORIAL PREMIUM IN PSYCHOLOGY is derived from the income of a fund established in 1952 by the friends of Muriel Fain Sher. It is awarded annually to the most outstanding woman student in the senior class "showing the greatest promise in the field of Psychology."

THE SUSAN ROSS STEINFIELD MEMORIAL FUND was established in 1984 by the family and friends of Susan Ross Steinfield, class of 1961. Awards from this fund are made to seniors who have contributed significantly to the performing arts during their undergraduate years.

MARGARET B. STILLWELL PRIZE awarded each year by the John Russell Bartlett Society for the best collections of books developed by undergraduates attending colleges in the state of Rhode Island. Entry forms available at the John Carter Brown Library.

THE GILBERT STUART PRIZES IN ART have been awarded since 1965, from income of the Gilbert Stuart Prize Fund, established in 1955–56 by friends of Brown University and of for creative work in art.

THE TECHNICAL ANALYSIS CORPORATION AWARDS given annually by Dr. David M. Rosenbaum '56, President of TAC, to an undergraduate member of Sigma Xi and Tau Beta Pi who best exemplifies the ideal of "whole person" by demonstrating excellence and initiative outside science and engineering.

THE YAT K. TOW PRIZE was established in 1991 by the family of Yat K. Tow '41, in his memory and is funded by his family and friends. The prize is awarded to a junior undergraduate, graduating senior or graduate student in May of each year.

THE ROHN TRUPELL PREMIUM IN APPLIED MATHEMATICS is derived from income of a fund established in 1968 by friends of Rohn Truell, former professor and chair of the Division of Applied Mathematics. It is awarded annually to a member or members of the senior class concentrating in applied mathematics, who during their studies at Brown have achieved high distinction.

THE MARJORIE HARRIS WEISS MEMORIAL PREMIUM IN HISTORY is awarded annually to the outstanding undergraduate woman student majoring in history.

THE ROSAMOND WINSLOW WOODWIND PRIZE established by Mr. and Mrs. Marcellus D. Lemaire and friends of Miss Rosamond W. Lemaire, Pembroke 1961, is given on the basis of a public audition.

## Advanced Awards

THE SAMUEL T. ARNOLD FELLOWSHIPS were established in 1964 by Thomas J. Watson, to 1949 and later provost of the University. The fellowships provide unusually promising seniors with a year of foreign travel and independent study following graduation.

THE HARVEY A. BAKER FELLOWSHIPS were established in memory of Harvey A. Baker, class of 1903, by his wife. These fellowships support the first year of graduate or professional study for students who "have high scholastic standings, have participated in college activities, and have shown qualities of leadership" at Brown.

THE ANNE CROSBY EMERY ALUMNAE FELLOWSHIP provides financial assistance to women in the graduating class who continue their education in professional or graduate school. The fellowship was established in 1914 by the Alumnae Association to honor Anne Crosby Emery, the second dean of the Women's College of Brown University.

THE JOUKOWSKY FAMILY FOUNDATION OUTSTANDING DISSERTATION AWARD is an annual prize awarded by the Graduate School for superior achievements in research by students who are completing their Ph.Ds. Supported through the generosity of the Joukowsky Family Foundation, the awards are usually given to up to four students per year, one from each of the four main disciplines: the humanities, the life sciences, the physical sciences, and the social sciences.

THE MASTER'S AWARD FOR ENGAGED CITIZENSHIP AND COMMUNITY SERVICE recognizes outstanding engaged citizenship and service to the community within or outside of the University by a Master's student in any program.

THE MASTER'S AWARD FOR PROFESSIONAL EXCELLENCE recognizes outstanding contributions by a Brown University Master's student which influence or contribute to the field or profession. Such professional development may be accomplished during fieldwork, internship, or capstone experiences, for example.

THE AWARD FOR OUTSTANDING ACADEMIC ACCOMPLISHMENT BY A MASTER'S STUDENT recognizes a Brown University Master's student in any department or program while enrolled at the University.

THE BERNARD ROY POLLOCK MEMORIAL PRIZE established in 1984 to honor the memory of Bernard Roy Pollock of the class of 1948, is

awarded to a graduating senior, accepted at an accredited law school, who "best exemplifies the personal and professional characteristics which made Bernie Pollock an outstanding member of the communities in which he lived and worked."

THE WILLIAM ROBERT POTTER, 1887, PREMIUM IN CHEMISTRY, was established in 1942 from income of a fund bequeathed by William R. Potter. The premium is awarded "on the basis of a thesis of highest merit submitted by a postgraduate student specializing in chemistry."

PRESIDENTIAL AWARDS FOR EXCELLENCE IN TEACHING recognizes outstanding pedagogical achievements by up to four Brown University graduate students.

PRESIDENTIAL FELLOWSHIPS are awarded to some of the most outstanding applicants to doctoral programs across the disciplines. Awarded on a competitive basis, the honor recognizes academic promise and carries enhanced stipend support for three years.

THE BARRY JAY ROSEN PREMIUM IN MOLECULAR BIOLOGY was established in 1966 by friends and associates of Barry Jay Rosen, a graduate student at Brown from 1962–1965, who was awarded the Ph.D. degree posthumously in 1966. The premium is awarded to a graduate student for high achievement in the field of molecular biology.

THE BROWN CHAPTER OF SIGMA XI AWARD FUND was given to Brown University in 1954 by the Brown Chapter of Sigma Xi for an award toward the encouragement of science, whether for research, teaching, or otherwise.

## Honorary Societies

### Phi Beta Kappa

The Rhode Island Alpha of the Phi Beta Kappa Society was established at Brown University in 1830. Phi Beta Kappa seeks to reward "acquisition of liberal culture; command of cultivated expression in speech and writing; intellectual honesty and tolerance; breadth of intellectual interest; understanding not merely knowledge." In terms of present day concerns and curricular structures, this is interpreted to mean that Phi Beta Kappa seeks to recognize, and thus to encourage, intellectual distinction among undergraduates, as attested by substantial formal evidence of outstanding academic accomplishment in the course of a broad educational experience. Excessively narrow preoccupation with any discipline or field of study may constitute grounds for disqualification even in cases of unquestionably superior academic performance. At least 40% of a candidate's course work must be in mathematics, humanities, or the social sciences.

Election to Phi Beta Kappa is very competitive. Although not more than one-sixth of the candidates for the bachelor's degrees (A.B. and Sc.B.) may receive invitations to become members, in recent years no more than one-tenth of a class has generally been invited into membership.

Additional information is available at: [http://www.brown.edu/Administration/Dean\\_of\\_the\\_College/degree/pbk.php](http://www.brown.edu/Administration/Dean_of_the_College/degree/pbk.php)

### Sigma Xi

The Society of the Sigma Xi was founded in 1886 for the encouragement of original investigation in science, pure and applied. The Brown University Chapter, established in 1900, sponsors lectures in a variety of scientific disciplines during the academic year.

Nominations for membership are made by representatives of the various science departments. From the list of nominees the Board of Electors, meeting in February each year, elects those deemed eligible. This Board consists of the Chapter President, the Chapter Secretary, who acts *ex-officio* as Chair, and a representative from each of the following departments: Applied Mathematics, Biology and Medicine, Chemistry, Cognitive and Linguistic Sciences, Computer Sciences, Engineering, Environmental Studies, Geological Sciences, Mathematics, Neuroscience, Physics, Psychology.

### Tau Beta Pi

The Tau Beta Pi Association, national engineering honor society, was founded at Lehigh University in 1885 to mark, in a fitting manner, those who have conferred honor upon their alma mater by distinguished

scholarship and exemplary character as undergraduates in engineering, or by their attainments as alumni in the field of engineering, and to foster a spirit of liberal culture in the engineering colleges of America. Each chapter has full control of its individual affairs, the control being vested primarily in the undergraduate members. An alumni advisory board may act in an advisory and judiciary capacity.

To be eligible for election to membership as an undergraduate, the student must be in either the junior or senior year. To be eligible as a junior, scholastic records must fall within the top eighth of the class and as a senior the top fifth. Distinguished scholarship, while the primary requisite for admission, is not considered the sole criterion. After the scholarship requirements have been fulfilled, the selection is based on integrity, breadth of interest both inside and outside of engineering, adaptability, and unselfish activity. An alumnus, either of Brown University or other accredited engineering schools, may be elected to membership if he or she has a proven record of character, ability, and integrity, the election still being made by the undergraduate chapter.

The Rhode Island Alpha Chapter was installed at Brown University on February 12, 1954. At the time of the installation of the chapter, in addition to the charter members, 128 alumni members were initiated, mostly alumni who would have been eligible for membership in the society had the chapter existed prior to their graduation.

## Horace Mann Medal

The Horace Mann Medal (<https://www.brown.edu/academics/gradschool/about/awards/horace-mann-medal>) is given annually to a Brown Graduate School alumnus or alumna who has made significant contributions in his or her field, inside or outside of academia. Any graduate of a Brown advanced-degree program is eligible. This award was created in 2003 and replaced the Distinguished Graduate School Alumni Award. Recipients include:

- Sharona Gordon '90, '94 Ph.D., 2019
- Silvia Elena Giorguli Saucedo '04 Ph.D., 2018
- Guido W. Imbens '91 Ph.D., 2017
- Sridhar Ramaswamy '95 Ph.D., 2016
- Lynn Rothschild '85 Ph.D., 2015
- John H. Ewing '71 Ph.D., 2014
- Karen L. King '84 Ph.D., 2013
- Chao-Han Liu, '65 Ph.D., 2012
- Albrecht Hofmann '69 Ph.D., 2011
- Lynn Pasquerella '85 Ph.D., 2010
- Joanne Leedom-Ackerman '74 A.M., 2009
- Mary Lou Jepsen '87, '97 Ph.D., 2008
- Tracy Denean Sharpley-Whiting '94 Ph.D., 2007
- Maria T. Zuber '83 Sc.M., '86 Ph.D., 2006
- Wen-Hsiung Li '72 Ph.D., 2005
- Joel D. Scheraga '79 A.M., '81 Ph.D., 2004

## Rosenberger Medal

The Susan Colver Rosenberger Medal of Honor is awarded by designation of the Faculty. Provision for the medal was made in 1919 by Jesse L. Rosenberger as a memorial to his wife, with the stipulation that it be used to recognize "specially notable or beneficial achievement in scholarship, in authorship, in public life of any kind, or relating to the advancement of the public welfare, or for whatever it may be thought best thus to honor and commemorate. . . ." The recipients and years of past awards are the following:

- William Williams Keen, 1925
- Charles Evans Hughes, 1928
- John Davison Rockefeller, Jr., 1931
- Charles Value Chapin, 1935
- Mary Emma Woolley, 1937
- Fred Tarbell Field, 1940
- Henry Dexter Sharpe, 1944
- Zechariah Chafee, Jr., 1947
- Warren Randolph Burgess, 1953

- Rowland Roberts Hughes, 1955
- Theodore Francis Green, 1956
- Alexander Meiklejohn, 1959
- Waldo Gifford Leland, 1965
- Thomas John Watson, Jr., 1968
- Henry Merritt Wriston, 1976
- Richard Salomon, 1982
- Charles Carpenter Tillinghast, Jr., 1982
- Howard Robert Swearer, 1983
- Otto Eduard Neugebauer, 1987
- Roderick Milton Chisholm, 1992
- Vartan Gregorian, 1997
- Sheila E. Blumstein, 2001
- Artemis A.W. Joukowsky, 2005
- Martha Sharp Joukowsky, 2005
- Claiborne deBorda Pell, 2006
- Stephen Robert, 2007
- Charles C. J. Carpenter, 2009
- Ruth J. Simmons, 2011
- Leon N. Cooper, 2013
- Barrett Hazeltine, 2015
- Thomas J. Tisch, 2019

## Honorary Degrees Conferred by the University

Prior records of honorary degree recipients are listed in archived *University Bulletins* as well as on the following site <https://www.brown.edu/about/administration/corporation/honoraries>

### Commencement May 29, 2011

- Arianna Huffington, *Doctor of Humane Letters*
- Katie King Crowley '97, *Doctor of Humane Letters*
- Nicholas D. Kristof, *Doctor of Letters*
- David B. Mumford, *Doctor of Science*
- John J. Nicholson, *Doctor of Fine Arts*
- Lynn Ida Nottage '86, *Doctor of Fine Arts*
- Lisa Randall, *Doctor of Science*
- Kenneth Roth '77, *Doctor of Humane Letters*
- David R. Scott, *Doctor of Science*
- Zhao Zhenkai (Bei Dao), *Doctor of Letters*

### October 21, 2011

- Herbert M. Kaplan, *Doctor of Humane Letters*

### Commencement May 27, 2012

- Carolyn Bertozzi, *Doctor of Science*
- Viola Davis, *Doctor of Fine Arts*
- John Robert Lewis, *Doctor of Laws*
- Marilynne Summers Robinson, *Doctor of Letters*
- Sebastian A. Ruth, *Doctor of Music*
- Diane Sawyer, *Doctor of Letters*
- Gene Sharp, *Doctor of Humane Letters*
- Ruth J. Simmons, *Doctor of Humane Letters*
- Wei Yang, *Doctor of Science*

### Commencement May 26, 2013

- Benjamin Affleck, *Doctor of Fine Arts*
- Junot Díaz, *Doctor of Letters*
- Stanley Falkow '61, *Doctor of Science*
- Beverly Wade Hogan, *Doctor of Humane Letters*
- Risa J. Lavizzo-Mourey, *Doctor of Medical Science*
- Eduardo J. Padrón, *Doctor of Humane Letters*

### Commencement May 25, 2014

- Lee Berk, *Doctor of Humane Letters*
- Beatrice E. Coleman, *Doctor of Humane Letters (Awarded Posthumously)*
- Jeffrey Eugenides, *Doctor of Letters*
- Arthur L. Horwich, *Doctor of Medical Science*
- Mary Lou Jepsen, *Doctor of Science*
- Debra L. Lee, *Doctor of Humane Letters*
- Lois Lowry, *Doctor of Letters*
- Nalini Moreshwar Nadkarni, *Doctor of Science*
- Thomas E. Perez, *Doctor of Laws*

### Commencement May 24, 2015

- Robert A. Corrigan, *Doctor of Humane Letters*
- Louise Lamphere, *Doctor of Humane Letters*
- David E. McKinney, *Doctor of Humane Letters*
- Tracee Ellis Ross, *Doctor of Fine Arts*
- Susan Solomon, *Doctor of Science*
- Kathryn D. Sullivan, *Doctor of Science*

### Commencement May 29, 2016

- Cornelia Isabelle Bargmann, *Doctor of Science*
- Thomas G. Catena, *Doctor of Medical Science*
- Umberto Crenca, *Doctor of Fine Arts*
- Angus Deaton, *Doctor of Humane Letters*
- Kevin Gover, *Doctor of Humane Letters*
- Antonia Hernández, *Doctor of Humane Letters*
- Jean Elizabeth Howard, *Doctor of Humane Letters*
- Charles M. Rosenthal, *Doctor of Humane Letters*

### Commencement May 28, 2017

- Robert De Niro, *Doctor of Fine Arts*
- Daveed Diggs, *Doctor of Fine Arts*
- Donald C. Hood, *Doctor of Humane Letters*
- Indra K. Nooyi, *Doctor of Humane Letters*
- Richard D. Parsons, *Doctor of Humane Letters*
- Rosmarie Waldrop, *Doctor of Letters*

### April 18, 2018

- Robert J. Carney, *Doctor of Humane Letters*
- Nancy D. Carney, *Doctor of Humane Letters*

### Commencement May 27, 2018

- Lonnie G. Bunch III, *Doctor of Humane Letters*
- John Michael Kosterlitz, *Doctor of Science*
- Beverly E. Ledbetter, *Doctor of Humane Letters*
- Nancy Northup, *Doctor of Humane Letters*
- Giuseppe Penone, *Doctor of Fine Arts*
- Sting, *Doctor of Humane Letters*
- Trudie Styler, *Doctor of Humane Letters*

### Commencement May 26, 2019

- Sheryl Brissett Chapman, *Doctor of Humane Letters*
- Ken Burns, *Doctor of Humane Letters*
- John Krasinski, *Doctor of Fine Arts*
- Jennifer Anne Richeson, *Doctor of Humane Letters*
- David M. Rubenstein, *Doctor of Humane Letters*
- E. Paul Sorensen, *Doctor of Humane Letters*
- Joan Wernig Sorensen, *Doctor of Humane Letters*

# The Brown Alumni Association

---

---

Brown provided a transformative and unforgettable experience for its students, including their most important intellectual journeys and lasting bonds with other members of this unique community. The **Brown Alumni Association** (BAA), of which all former matriculated students are automatically members, fosters lifelong connections with Brown and within the alumni community.

Key services to alumni (<https://brunonia.brown.edu/alumni/services>), including career help (<https://brunonia.brown.edu/alumni/careers/info/resources>)

Alumni expand their career networks through BrownConnect and the BAA LinkedIn group; look up Brown friends and contacts through the online Alumni Directory; and enjoy savings on and benefits through valuable products and services.

A worldwide alumni community (<https://brunonia.brown.edu/alumni/community>)

Brown's alumni community takes many shapes, including Brown clubs, classes, reunions, student-alumni groups, affinity groups like the Inman Page Black Alumni Council, and more. Hundreds of alumni events (<https://brunonia.brown.edu/search/event?eventCity=%2525&eventEnd=%2525&eventStart=%2525&eventTitle=%2525>) around the globe provide opportunities to discover new alumni connections, interact with Brown faculty, network, and explore local highlights. Online communities help alumni to connect with each other and to keep current with the University.

Volunteering for Brown (<https://brunonia.brown.edu/alumni/volunteer>)

Alumni volunteers support the continued vitality of the University. They interview applicants, serve as career resources for students and fellow alumni, organize Brown's alumni communities, help to raise funds for the University, and much more.
