This course examines the distribution of income in the U.S., with emphasis on how it is affected by taxes, transfers, and other government programs. Questions to be addressed may include the following: How have wage inequality and the skill premium evolved over time? What factors explain a rising skill premium? How does income differ with race and gender? How is poverty measured, and what are the factors associated with living in poverty? How do government programs change the distribution of income? How much income mobility is there across generations? Students will become more critical readers of current economic literature, and will apply their skills in conducting empirical research.

Requirements/Evaluation: short writing assignments, computer lab exercises, oral presentations, and a 15- to 20-page research paper including original empirical analysis (written in stages)

Prerequisites: ECON 251 and 255 or equivalent

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Attributes: POEC U.S. Political Economy + Public Policy Course

Fall 2019

SEM Section: 01 MR 2:35 pm - 3:50 pm Sara LaLumia

ECON 457 (S) Public Economics Research Seminar

In this class, students will learn how to read, critically evaluate, and begin to produce empirical research on important and interesting public policy questions. Topics will be selected from across the spectrum of public economics issues and may vary from year to year. Examples of specific topics that may be covered include education, environmental policy, taxation, income inequality, anti-poverty policy, health care policy, the economics of crime and corruption, and the implications of behavioral economics and psychology for public policy (we will typically only cover a subset of these topics). Applications will be drawn mostly from the United States but we will also consider some issues and evidence from other industrialized and developing countries. The course will especially emphasize the critical analysis of empirical evidence on public policy questions.

Class Format: a mix of lecture, seminar discussion, and time in a computer lab learning to work with data and estimate econometric models

Requirements/Evaluation: a 15- to 20-page research paper (written in stages) that is a combination of a research proposal and an original empirical analysis of data, a series of short papers and empirical exercises, and regular constructive contributions to class discussion

Prerequisites: ECON 255, ECON 251, and ECON 120

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Unit Notes: ideal preparation for seniors (or juniors, if offered in the spring) interested in writing an ECON thesis, or for students who want a taste of the kind of original empirical research one would do for a thesis without actually having to commit to a thesis

Distributions: (D2)

Attributes: POEC U.S. Political Economy + Public Policy Course

ECON 459 (S) Economics of Institutions (QFR)

Why are some countries so rich and others so poor? Typical answers to this question have emphasized proximate causes like factor accumulation (i.e., growth in a nation's physical and human capital endowments), technological progress, and demographic change. The institutional approach to this question, however, emphasizes the role of sociopolitical and cultural factors, broadly defined, as a fundamental determinant of its economic prosperity. The central idea is that the added-value of economic activities to society at large is primarily conditioned by the social arrangements within which these activities occur. Specifically, these social arrangements invariably generate a structure of private incentives, which can either promote behavior that is conducive to economic development or lead to the pursuit of private gain at the expense of the common good. As such, the key to economic development in this view is the establishment of a suitable set of institutions and structures of governance in society. This course will survey the rapidly expanding literature on the topic of institutions and economic development, with an emphasis on the latest empirical evidence that has come to bear in the context of both historical and contemporary societies. The purpose of the course will be to expose students to the core ideas and empirical tools employed at the frontier of research in this area of inquiry. The readings will primarily comprise published journal articles and unpublished working papers, and students should expect to apply concepts from across all the core courses in economics.

Requirements/Evaluation: extensive class participation, two 5-page review papers, two class presentations, and one 15- to 20-page empirical research paper (written in stages)

Prerequisites: ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ECON 463 (F) Financial History

What can we learn from financial history to understand the successes and failures of finance today, and how finance and politics interact? This course opens with a brief survey of some of the major characteristics, issues, and challenges of financial systems today, and then examines earlier experience with these phenomena. Topics to be examined include: the role of finance in economic development historically, including in the financial revolutions from Northern Italy, the Netherlands, Britain and the US; the relationship between finance and government, and the extent to which it has changed over time; the lessons from early asset bubbles for modern financial systems; the effect of institutions (laws, norms, and culture) and political systems in shaping the impact of finance, as illustrated by comparisons between Mexico and the U.S., among other cases; and lessons from U.S. financial history for policies today. The course also examines the tools that were developed in earlier epochs to deal with different risks, evaluates their efficacy, and considers lessons for modern financial regulation.

Requirements/Evaluation: will consist either of 6 short papers or 3 short papers and one longer research paper (student choice), at least two oral presentations, and contributions to class discussions

Prerequisites: ECON 251, ECON 252, and (ECON 255 or STAT 346)

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

ECON 465 (S) Pollution and the Labor Market

If your home town has polluted air, does that reduce your wage? Do you work less? Are you less likely to finish high school? These are specific versions of an important general question: how does pollution affect labor market outcomes? The answer matters for individual decisions (where to live) and government policies (air pollution regulations). This seminar begins from theories of optimizing worker behavior in the presence of pollution. Building on this foundation, we will critically evaluate new empirical research into the impacts of pollution on human capital, labor supply, and productivity. We will also study the impact of pollution regulations on wages and employment. Included papers will cover both developed and developing countries.

Requirements/Evaluation: class discussion, presentation of reading, 15- to 20-page empirical paper (written in stages), paper replication, and accompanying short presentation

Prerequisites: ECON 251 and ECON 255; STAT 201/346 acceptable in place of ECON 255 prerequisite with instructor permission

Enrollment Limit: 12

Enrollment Preferences: Economics majors, seniority

ECON 468 (S) Your Money or Your Life: Health Disparities in the United States

A 25-year-old man living in a high-income household can expect to live 10 years longer than his low-income counterpart. There are also stark differences in mortality and health by education, employment status, race, immigrant status, region, and gender. This course will explore many of the potential explanations for health disparities, including access to insurance and health care, health behaviors, stress, environmental exposure, and intergenerational transmission of health. We will emphasize causal inference and focus on assessing the quality of evidence. We will also investigate how government policies contribute to or ameliorate health disparities in the U.S.

Class Format: including frequent small group meetings

Requirements/Evaluation: class discussion, oral presentations, 6 short response papers, two 5-page critiques of published articles, and one 15-page original empirical research paper

Prerequisites: ECON 251 and ECON 255 or equivalent, or permission of instructor

ECON 470 (S) The Indian Economy: Development and Social Justice

The Indian economy has grown rapidly in the last two decades, but poverty has declined relatively slowly. Is this the persistence of long-standing historical disadvantages such as those faced by Scheduled Castes and Tribes? Does this reflect failures in policy, in areas such as trade or labor law? Or is the quality of governance, especially the level of corruption, primarily to blame? We will use the traditional theoretical and quantitative methods of an economist to consider these questions.

Requirements/Evaluation: five short response papers (5 pages), and empirical research project

Prerequisites: ECON 251 and 255, or equivalent, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: junior and senior majors

ECON 471 (S) Topics in Advanced Econometrics (QFR)

The course uses both a practical and conceptual/theory based approach, with emphasis on methods of structural identification of dynamics in VARs and cointegration analysis, both in conventional time series and panel time series which contain spatial dimensions. The course will also investigate methods of computer simulation related to these techniques. The course is well suited for students considering empirically oriented honors theses in fields that employ these techniques, such as macro, finance, growth, trade and development, as well as fields outside of economics that use time series data. It is also well suited for students majoring in economics, statistics, computer sciences or mathematics who wish to expand their econometrics training and understanding to a more advanced level.

Requirements/Evaluation: periodic homework assignments, term paper

Prerequisites: ECON 371

Enrollment Limit: 10

Enrollment Preferences: students with strong quantitative backgrounds, and to students intending to write an honors thesis

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

ECON 472 (F) Macroeconomic Instability and Financial Markets (QFR)

This advanced course in macroeconomics and financial theory attempts to explain the role and the importance of the financial system in the global economy. The course will provide an understanding of why there is financial intermediation, how financial markets differ from other markets, and the equilibrium consequences of financial activities. Rather than separating off the financial world from the rest of the economy, we will study financial equilibrium as a critical element of economic equilibrium. An important topic in the course will be studying how financial market imperfections amplify and propagate shocks to the aggregate economy. The course may cover the following topics: the determination of asset prices in general equilibrium; consequences of limited asset markets for economic efficiency; theoretical foundations of financial contracts and justifications for the existence of financial intermediaries; the roles of financial frictions in magnifying aggregate fluctuations and creating persistence and instability; the role of leverage and financial innovation in fueling financial crises.

Requirements/Evaluation: problem sets, exams, and potentially student presentations

Prerequisites: ECON 251 and ECON 252

Enrollment Limit: 19

Enrollment Preferences: Economics majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

ECON 476 (F) Behavioral Economics: Theory and Methods

The field of behavioral economics emphasizes that models in economics should account for the psychological plausibility of their assumptions and consequences. This course will cover how the field has incorporated insights from psychology into standard microeconomics models of decision-making. In the process, we will review the different methods that are used to empirically test the psychological foundations of these models, including laboratory experiments, field experiments, and quasi-experimental analysis. Homework and class discussions will focus on academic papers that use behavioral models to study topics such as household finance, public policy, consumer marketing, and many others. Throughout the semester, students will also work towards formulating and completing their own original research project.

Requirements/Evaluation: one 15- to 25-page research paper, multiple shorter writing assignments and paper summaries, and class participation

Prerequisites: ECON 251; ECON 255 or STAT 346

Enrollment Limit: 17

Enrollment Preferences: Economics majors who have not taken ECON 233 or another ECON 400-level course; students considering an ECON thesis should email the professor during pre-registration

ECON 501 (F) Economic Growth and Development

This course introduces some of the major theories and ideas about economic growth and development. Motivated by a number of stylized facts from cross-country data, we will begin by posing a series of questions: Why are some countries rich and others poor? Why have some countries grown at high rates over extended periods of time, while others have experienced little or no growth? Do all economies face comparable challenges to achieving sustained economic growth? Will poor countries catch up to rich countries or are they doomed to stagnate in a poverty trap? To answer these "big" questions, we will explore the underlying mechanisms of economic growth. What role is played by savings and investment (i.e., the

accumulation of physical capital)? What is the influence of population growth? How important are investments in human capital (i.e., education and population health)? How important are technological differences across countries? How much significance should we ascribe to differences across countries in geographical characteristics? How much should we ascribe to differences in the quality of institutions? For each question, we will explore different theoretical and empirical strategies developed by economists to answer the question, ranging from formal models to historical and anecdotal evidence to cross-country growth and development regressions. We will evaluate the usefulness of the different approaches to each question for informing development-promoting and poverty-alleviation policies, and we will also discuss the reasons why so many important questions about economic growth continue to remain difficult to answer.

Class Format: discussion

Requirements/Evaluation: problem sets, one midterm exam, and a final exam

ECON 504 (F) Public Economics in Developing Countries

This class is about microeconomic and empirical analysis of government expenditure programs in developing and transitional countries. It provides tools for understanding the effects of government policies, as well as a useful conceptual framework for analyzing normative questions such as "what role should government play in the economy" and "what is a good policy?" The course begins by considering the efficiency of market economies, and rationales for government intervention in the market, such as public goods, externalities, information-based market failures, imperfect competition, and equity. We also consider ways that human behavior might deviate from perfect rationality, and what that might imply for policy. Along the way, we apply these concepts to various examples of policy issues, including, among other things, the environment, education, health, infrastructure, security, social insurance, and aid to the poor. We then turn to the general question of how to make the government work better, addressing questions such as the following. When is it better to have the government own and produce things, and when is it better to privatize? What are the incentives of politicians and government employees, and how does the design of political and budgetary institutions affect the degree to which they serve the public interest? How should responsibilities be divided up between the central government and local governments, and what are the advantages and disadvantages of "decentralization?" What can be done to improve the delivery of basic services? For example, how might one address problems of corruption and absenteeism? Throughout the course, we consider examples of empirical research, and to facilitate this, we will occasionally introduce econometric tools that are particularly useful for microeconomic policy evaluation.

Class Format: discussion

Requirements/Evaluation: problem sets, one 10-page paper, a midterm, and a final exam

Prerequisites: ECON 110; in addition, an empirical methods course (POEC 253, ECON 255, 502 or 503, or STAT 346) must be taken before or concurrently with this class; undergraduate enrollment limited and requires instructor's permission

ECON 510 (S) Financial Development and Regulation

Cross-listings: ECON 352 ECON 510

Primary Cross-listing

This course focuses on the financial system and its role in economic development. The first part explores the functions of finance, how it contributes to growth and income inequality, examining what can be done to increase financial inclusion. It will examine experiences with financial sector repression and subsequent liberalization, and investigate the causes and impact of financial crises. Then it will study how to make finance effective and how to prevent or minimize crises, analyzing government's role as regulator, supervisor, standard setter, contract enforcer, and owner. In this final part, attention will be devoted to the role of institutions (laws, norms, culture) and incentives in financial sector development.

Class Format: discussion

Requirements/Evaluation: midterm, participation in class discussion and debates, and a final research paper

Prerequisites: for undergraduates, POEC 253 or ECON 255; undergraduate enrollment limited and requires instructor's permission

ECON 513 (S) Empirical Methods in Macroeconomics (QFR)

Cross-listings: ECON 513 ECON 356

Primary Cross-listing

Macroeconomics and related fields in international finance and macro development have evolved specialized empirical techniques, known generally as macroeconometrics, which are designed to meet the practical challenges that the data and the empirical questions pose in these fields. The course will introduce the theory and application of these techniques, and students will learn how to implement these techniques using real world data to address practical questions drawn from the field of macro development. The course is also available to undergraduates with permission of the instructor. However, in lieu of Econ 356, undergraduates with good quantitative skills are encouraged to take Econ 371, which will cover a broader range of topics in greater depth.

Requirements/Evaluation: weekly homework assignments, term paper

Prerequisites: ECON 252, ECON 255 or equivalent. Students may not earn credit for both Econ 356 and Econ 371

Enrollment Limit: 19

Enrollment Preferences: Economics majors and CDE fellows

ECON 514 (S) Tax Policy in Global Perspective (QFR)

Cross-listings: ECON 389 ECON 514

Primary Cross-listing

Taxes are half of what government does. So if you are interested in what government policy can do to promote efficiency, equity, and economic development, you should be interested in tax policy. Governments must raise tax revenue to finance critical public goods, address other market failures and distributional issues, and to avoid problems with debt and inflation. Taxes typically take up anywhere from ten to fifty percent of a country's income, they profoundly affect the incentives to undertake all varieties of economic activity, and the government expenditures that they finance have potentially large consequences for human welfare. So the stakes involved in improving tax policy are quite large. This class provides an in-depth exploration of tax policy, from a global and comparative perspective. Because most students in this class will be CDE fellows, we will emphasize tax policy issues, examples, and evidence that are most pertinent to developing countries, but we will also learn something about tax systems in the U.S. and other industrialized nations. Topics addressed in this class include: how basic economic principles can be applied to help one think about the efficiency and equity consequences of tax policies; how personal income taxes, corporate income taxes, and value-added taxes are designed and administered and how they influence the economy; ideas for fundamental reforms of these taxes; theory and evidence in the debate over progressive taxes versus "flat" taxes; how various elements of tax design affect incentives to save and invest; how market failures and administrative problems may influence the optimality of different tax policies; the implications of global capital flows and corporate tax avoidance for the design of tax policy; tax holidays and other special tax incentives for investment; empirical evidence on the influence of taxes on economic growth, foreign direct investment, labor supply, and tax evasion; tax policy towards natural resources such as minerals and oil; case studies of efforts to reform tax administration and reduce tax evasion and corruption; taxes on land and property; taxes on imports and exports; presumptive taxation; and the informal economy and its implications for tax policy.

Requirements/Evaluation: midterm exam, 4 problem sets, two 8-page essays

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503); students who have previously taken ECON 351 will not be enrolled

ECON 519 (S) Population Economics

Cross-listings: ECON 519 ECON 380

Secondary Cross-listing

This course is an introduction to the economic analysis of demographic behavior and the economic consequences of demographic change. An important aim is to familiarize students with historical and contemporary trends in fertility, mortality, migration, and family composition, and the implications of these trends for the economy. The course demonstrates the application of microeconomic theory to demographic behavior, including fertility, marriage, and migration. Students are introduced to basic techniques of demographic measurement and mathematical demography. Selected topics include the economic consequences of population growth in developing countries, the economics of fertility and female labor force participation, the effects of an older age structure on the social security system, and the relationship between population growth and natural resources.

Class Format: discussion

Requirements/Evaluation: at least one exam, a research paper and a class presentation

Prerequisites: ECON 251; POEC 253 or ECON 255 or permission of instructor

Enrollment Limit: 25

Enrollment Preferences: Economics majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 519 (D2) ECON 380 (D2)

Attributes: PHLH Social Determinants of Health POEC Comparative POEC/Public Policy Courses

Not offered current academic year

ECON 521 (S) Incentives and Development Policy

Cross-listings: ECON 372 ECON 521

Primary Cross-listing

Why isn't the whole world developed? This course (and instructor) is of the opinion that the difficulty of getting incentives right is the key source of inefficiency. The course therefore studies how limited enforcement and asymmetric information constrain development, and about innovative development designs that attempt to overcome these constraints. The course readings will be a mix of field studies, empirical evidence and theoretical tools from game theory. Incentive and corruption problems in health, education, the regulation of banks and natural monopolies, privatization, budgeting, debt forgiveness, foreign aid, microfinance, climate treaties and ethnic violence will be studied using a unified framework. Note: this course was developed to address issues that arise in the countries represented at the CDE.

Requirements/Evaluation: two hour-long tests and a final policy project

Prerequisites: undergraduate enrollment limited and requires instructor's permission

Enrollment Limit: 19

Enrollment Preferences: intended for CDE Fellows

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 372 (D2) ECON 521 (D2)

Spring 2020

SEM Section: 01 TF 1:10 pm - 2:25 pm Ashok S. Rai

ECON 522 (S) Economics of Climate Change (QFR)

Cross-listings: ECON 522 ENVI 387 ECON 387

Secondary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration in both poor and wealthy countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. What is the socially optimal amount of climate change? Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? We will consider the growing body of evidence from attempts to regulate GHGs, including China's pilot cap-and-trade programs, the EU ETS, and the US Clean Power Plan. We will pay particular attention to the political economy of regulation and ways in which policy results have departed from theoretical predictions. Throughout the course we will discuss the limits of the economic approach to climate change, pointing out questions on which economic theory provides little guidance.

Class Format: lecture

Requirements/Evaluation: seven problem sets, midterm, group presentation, final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 19

Enrollment Preferences: senior Economic majors and CDE fellows

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

Not offered current academic year

ECON 523 (S) Program Evaluation for International Development (QFR)

Cross-listings: ECON 379 ECON 523

Primary Cross-listing

Development organizations face strict competition for scarce resources. Both public and private organizations are under increasing pressure to use rigorous program evaluation in order to justify funding for their programs and to design more effective programs. This course is an introduction to evaluation methodology and the tools available to development practitioners, drawing on examples from developing countries. It will cover a wide range of evaluation techniques and discuss the advantages and disadvantages of each. The course is a mix of applied econometrics and practical applications covering implementation, analysis, and interpretation. You will learn to be a critical reader of evaluations, and to develop your own plan to evaluate an existing program of your choice.

Requirements/Evaluation: problem sets, midterm exam and one 7- to 10-page essay

Prerequisites: one public economics course or microeconomics course (ECON 504 or ECON 110), and one empirical methods course (POEC 253 or ECON 255, 502, or 503)

Enrollment Limit: 20

Enrollment Preferences: CDE Students, but undergraduates with the prerequisites are welcome

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

SEM Section: 01 MR 2:35 pm - 3:50 pm Susan Godlonton

ECON 532 (S) Inclusive Growth: The Role of Social Safety Nets

Designing and implementing effective national strategies to promote inclusive economic growth can require difficult policy reforms, sometimes with adverse short-term impacts for vulnerable groups within society. Social safety nets provide a pro-poor policy instrument that can balance trade and labor market reform, fiscal adjustments (such as reduced general subsidies) and other economic policies aimed at enabling better market performance. In addition, social safety nets help the poor to cope with shocks to their livelihoods, promoting resilience, human capital development and sometimes high-return risk-taking. This tutorial will offer students the opportunity to explore the role of social safety nets in promoting inclusive economic growth, drawing on case studies from Africa, Asia, Latin America and Eastern Europe. The first part of the tutorial will define social safety nets within the broader context of social protection, examining the diversity of instruments and their linkages to economic growth. The second part will delve more deeply into the design and implementation of effective interventions, assessing program choice, affordability, targeting, incentives and other issues. The third part will analyze the role of social safety nets in supporting economic growth strategies, drawing on international lessons of experience.

Requirements/Evaluation: students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

Prerequisites: none

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: POEC Comparative POEC/Public Policy Courses

Spring 2020

TUT Section: T1 TBA Michael Samson

ECON 534 (S) Long Term Fiscal Challenges

This tutorial will address the conceptual and theoretical issues that confront policy makers when they face policy challenges that are likely to emerge only over the medium- to long-term and that have important budgetary implications. It will explore the strategies and approaches that a number of countries have attempted to develop to bring the long-term into their current policy and budgetary planning processes. Students will be exposed to different long-term challenges that have important budgetary implications, including aging populations, health care, climate change, energy and infrastructure, artificial intelligence, and water. The course will consider the specific policy challenges that arise for each and the ways in which different countries are addressing them.

Requirements/Evaluation: students will write five papers during the term, and will prepare and deliver formal comments on five papers written by other students

Prerequisites: permission of instructor for undergraduates

Enrollment Limit: 10

Enrollment Preferences: CDE students and undergraduates with permission of the instructor

Spring 2020

TUT Section: T1 TBA Peter S. Heller

ECON 535 (S) International Financial Institutions

This tutorial will explore the role of official international financial institutions in the global economic and financial system, their relations with members, proposals for how they might be reformed, and issues that they face. The focus will be principally on the International Monetary Fund, and to a lesser extent the World Bank, the Bank for International Settlements and Financial Stability Board. Topics and readings will focus on such issues as: the roles and governance reform of the IMF and World Bank; lessons from their performance in international crises; initiatives of the Fund and Bank; the global adjustment process; financial system stability; governance reform; lending programs; the management of international reserves; and provision of advice to members. Participants will meet in pairs with the faculty member. Each week, one student will prepare a policy paper and submit the paper to the professor and to the other student in advance of the meeting. During the meeting, the student who has written the paper will present an argument, evidence, and conclusions. The other student will provide a critique of the paper based on concepts and evidence from the readings and his own research and experience. The professor will participate in the discussion after each participant has presented and ask questions that highlight or illustrate critical points.

Requirements/Evaluation: each participant will write and present 5 or 6 policy papers and a like number of critiques

Prerequisites: intended for CDE Fellows; undergraduate enrollment limited, and only with permission of instructor

Enrollment Limit: 10

ECON 536 (S) Financial Crises: Causes and Cures

Cross-listings: ECON 390 ECON 536

Secondary Cross-listing

Financial crises have been with us for as long as banking has existed. Why are crises such a regular fixture of societies, and what can be done to prevent them, or at least reduce their cost? Topics examined include bubbles and swindles, especially when these spillover to the broader macroeconomy; the role of information in banking in normal times and in bank runs; boom-bust cycles in asset markets; international contagion; crisis resolution techniques; and the extensive history of attempts to improve regulation so as to reduce the frequency and cost of crises. Crises in developing and developed economies from the South Sea Bubble to the Euro Crisis will be examined, and the role of political economy factors in their run-up and resolution will be featured.

Requirements/Evaluation: students will write 5-6 papers during the term, and will prepare and deliver formal comments on 5-6 papers written by other students

Prerequisites: ECON 252 and 255

Enrollment Limit: 10

Enrollment Preferences: Economics majors

Expected Class Size: 10

ECON 538 (S) Resilience and Macroeconomic Policy

Despite tremendous improvements in combating global hunger and child mortality, an increasing number of the world's population continue to live in fragile conditions, buffeted by conflict, forced migration, weak governance, and state inability to deliver basic services to its citizens. Setting macroeconomic policy is difficult in such countries. Not only are decisions affected by policymakers' distorted incentives and governments' internal conflicts, fragility also deteriorates policy transmission mechanisms and constrains policy spaces. This course aims at identifying the causes and

consequences of fragility and at discussing how policies should be changed to enhance resilience in such countries. The course will, first, look into the definition and characteristics of fragility, its numerical representation, and its causes and main consequences. The course will also highlight how policy is made in states of fragility, in particular, fiscal policy, monetary policy, exchange rate policy, export promotion policy, etc.), as well as consider policy interactions. Finally, the course will focus on efforts to mitigate fragility and enhance resilience in such countries, including the role of structural policies and that of international financial institutions.

Requirements/Evaluation: students will write 5-6 papers during the term, and will prepare and deliver formal comments on 5-6 papers written by other students

Prerequisites: ECON 252 and ECON 255

Enrollment Limit: 10

Enrollment Preferences: Economics majors

ECON 545 (S) Growth Diagnostics (QFR)

Cross-listings: ECON 545 ECON 345

Secondary Cross-listing

Evidence from across the developing world suggests that the "binding constraints" to economic growth can be remarkably heterogeneous--i.e., the growth potential of stagnating or underperforming economies may be unlocked in a large variety of ways. For instance, pre-reform China had been constrained by poor supply incentives in agriculture, whereas Brazil has been held back by an inadequate supply of credit, South Africa by poor employment incentives in manufacturing, El Salvador by insufficient production incentives in tradables, Zimbabwe by bad governance, and so forth. How can developing-country policymakers determine country-specific constraints like these, thus enabling them to pragmatically pursue a selected set of growth-promoting policies rather than attempting to implement a "laundry list" of reforms that are naively based on "best practice" rules-of-thumb? This course will serve as a primer on "growth diagnostics," an empirically-driven analytical framework for identifying the most binding constraints to economic growth in a given country at a point in time, thereby allowing policymakers to develop well-targeted reforms for relaxing these constraints while being cognizant of the nation's prevailing economic, political, and social context. The course will first build on the basic theories and empirics of economic growth to elucidate the diagnostic framework and will then employ a wide range of country-specific case studies to demonstrate how the framework can be operationalized for policy making. Throughout the semester, students will be required to work in groups, each representing a given developing or emerging-market economy, in order to build a growth diagnostic for their group's assigned country by the end of the course.

Requirements/Evaluation: extensive class participation, two short (5-page) papers, two 15-page team papers comprising a country growth

diagnostic, and a team presentation on the diagnostic

Prerequisites: for undergraduates ECON 251, ECON 252, and either ECON 255 or STAT 346

Enrollment Limit: 19

Enrollment Preferences: CDE fellows and senior Economics majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 545 (D2) ECON 345 (D2)

Quantative/Formal Reasoning Notes: The course material will be draw heavily on mathematical and statistical models of economic growth and macroeconomic development, and students will be required to routinely develop mathematical models and/or conduct econometric analysis in their assignments.

Winter Study -----

ECON 10 (W) Securities Markets and Investment Banking

An overview of the Financial Markets and the role of Investment Banks. Topics will include: Financial Asset Valuation, Mergers and Acquisitions, Securities Sales and Trading, Bonds and Bond Math, Public Equities, Private Equity/Leveraged Buy-outs, and Risk Management. The class emphasizes real-life practices and will include visiting expert guest speakers and case studies. The class begins with the basics of financial instruments, time value of money, and asset valuation. We then move on to fundamentals of corporate finance and conclude with financial markets. Course Goals: (1) to provide an understanding of how modern capital markets operate from a practical, real-life perspective (2) to help the student think critically about issues affecting the stock and bond markets, and (3) to have fun and instill a passion for future study and/or work in the financial industry. Required Readings: (1) *Understanding Wall Street* (Fifth Edition) by Jeffrey Little and Lucien Rhodes (2) Packet of Case Studies and Industry Notes (3) *Wall Street Journal* (Business & Finance section) and the "Money Stuff" blog on each day that class meets. Group Assignment (Case study): At the end of the first class, students will be divided into several groups. Each group will be assigned a case study to be presented orally to the class for further discussion (slides or other visual aids will be used to help organize the discussion). Adjunct Instructor Bio: Tim Bock '88 worked at Credit Suisse for 28 years where he ran Global Capital Markets, leading a unit of 250 Investment Bankers responsible for Credit Suisse's global financing businesses, including equity capital markets, debt capital markets, leveraged finance origination and corporate derivatives. Tim held several other leadership roles at CS, including Co-head of Global Products in the Private Bank and Head of Derivatives Origination in the Equity and Fixed Income Departments.

Requirements/Evaluation: short paper, case study presentation, and class participation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: statement of interest

Grading: pass/fail only

Materials/Lab Fee: approximately \$55 for books

Winter 2020

ECON 13 (W) Tools for Moving from Good Ideas to Successful Businesses and Organizations

This course is based on a proven methodology for turning business ideas into successful businesses and organizations. Student working in teams generate business ideas and then work to develop a business model to take the ideas to start and beyond. The course provides basic training in design thinking, business financials, and business analysis. The course uses the Lean Launchpad methodology used at major business and

engineering schools throughout the world and endorsed by the National Institutes for Health and the National Science Foundation for commercializing research results. The class is appropriate to all students regardless of major who want to learn how to build a startup that succeeds. The class meets for two and a half hours three days a week for short lectures, discussions, group work, and presentations, There will also be outside guests who have created successful businesses. Outside of class, students will be required to watch online lectures and videos, read handouts, and do short papers. The primary work is to work in teams to research their business idea using the Lean Launchpad approach. Teams will develop a research plan, interview potential customers, analyze the results, and revise their business models. The teams will meet with the instructor regularly. Each team will develop weekly progress presentations as well as a final presentation. They will also develop a team video showing lessons the team learned during the course. Students will also be required to provide a three-page final paper of their experiences in the course. Adjunct Instructor Bio: Steve Fogel has worked with startup businesses for over 35 years. He has trained over 2,000 people who have started over 1,200 businesses and provided continuous support to a number of these businesses over the course of years. He has taught Winter Study nine times and is available to work with students throughout the year after the course ends.

Requirements/Evaluation: final project or presentation; contributions in class and as part of their teams based on presentations, papers and class participation

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors first if the course is over-enrolled

Grading: pass/fail only

Materials/Lab Fee: approximately \$40 for books

Attributes: EXPE Experiential Education Courses

Winter 2020

LEC Section: 01 MTWR 10:00 am - 12:50 pm Steven P. Fogel

ECON 14 (W) Housing Markets and Community Impacts Represented in Film

A house provides not only shelter and protection for its occupants, but also signals to others the characteristics of those occupants and determines the context within which we live, work and recreate. The private home and its neighborhood are clearly linked, and economic studies suggest that between 25% and 50% of the market value of residential property depends on such factors as school quality, crime and environmental quality that characterize the neighborhood. In this short course we will explore--through film, discussion and economics--the importance of and linkages between houses and communities. We will view and discuss 7-8 films that tell stories, imagined or real, about houses, living conditions, communities, and the housing market. In addition to developing an appreciation of the economic, social and psychological importance of these ideas we will discuss associated significance for the economy.

Class Format: 10-page paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: students who have completed ECON 110 or equivalent will be preferred

Grading: pass/fail only

Winter 2020

LEC Section: 01 TWR 1:00 pm - 3:50 pm Stephen C. Sheppard

ECON 15 (W) Management Consulting: A Primer for Williams Students

This course provides a broad overview of the management consulting industry from the perspective of an experienced practitioner. The objectives of the class are to provide a real world view as to what consultants do and to help prepare students who are considering joining a management consulting firm post-Williams. The class will begin with a broad discussion of the differences in the types of business consulting and how management consulting firms are utilized by corporations and private equity firms. The next section will review how management consultants structure frameworks to address strategic issues facing their clients. Students will be provided instruction on (and practice with) the tools utilized by strategy consultants to evaluate business units, analyze markets, evaluate competitive environments, and synthesize customer information in order to develop insights for strategic recommendations. Additionally, one class session will be devoted to tips for getting a job in management consulting including how to ace

case interviews. The final small group project will be the development and delivery of a consulting presentation for a business with a strategic need. Adjunct Instructor Bio: Peter McKelvey '86 was with L.E.K. Consulting for 29 years including leading the Boston office and Private Equity practice and serving 6 years as President of the Americas Region. He has extensive experience in corporate and business unit strategy development and mergers and acquisitions advisory services. In addition to a BA in economics from Williams, Peter holds an MBA from The Wharton School of the University of Pennsylvania.

Requirements/Evaluation: final project or performance; class participation and homework assignments

Prerequisites: ECON 110

Enrollment Limit: 20

Enrollment Preferences: priority will be based on written statement of interest

Grading: pass/fail only

Materials/Lab Fee: \$40

Winter 2020

LEC Section: 01 TWR 10:00 am - 11:50 am Peter McKelvey

ECON 16 (W) Venture Capital

The course will examine the venture capital industry from both a theoretical and practical perspective and will focus on the interplay of the legal, business, economic and financial issues that need to be dealt with in the formation, organization, governance and financing of new enterprises. The course is designed to provide students with a fundamental knowledge of the corporate and other laws applicable to venture capital, as well as with an appreciation of the concerns of entrepreneurs, venture capitalists and early employees. Class sessions will be devoted primarily to a discussion of business cases taken from the entrepreneurial curriculum of the Harvard Business School. In addition, students will be required to participate in small groups prior to class to prepare advice for entrepreneurs or key employees in three scenarios--an early stage company negotiating with a key executive the company is seeking to hire, a company considering two competing term sheets for venture financing and a company faced with the need for additional financing in a distressed situation. An alternative to one of these scenarios would involve splitting the class into small groups designated as either founders or investors and requiring the groups to negotiate investment terms. As a capstone to the class, students will participate in an in-class business simulation game developed at Wharton that will require students to interact in assigned roles as founders, investors or key employees. In addition to reading and analyzing the assigned business cases prior to class, students will be asked to review various background materials. Classes will meet for at least six hours per week, with additional sessions scheduled for meetings with outside industry experts that accept invitations to address the class. Adjunct Instructor Bio: Mr. Schwed retired from the law firm of WilmerHale in December 2015 after a 40-year career focused on private equity and venture capital. For nine years, he was an adjunct professor at George Washington University Law School teaching a course on venture capital law. He taught this course during Winter Study the last three years. Mr. Schwed graduated from Williams with a degree in Economics in 1971 and from Harvard Law School in 1974.

Requirements/Evaluation: participation in class, preparation of discussion outlines (each equivalent to a 3- to 4-page paper) in connection with the small group assignments, and participation in the business simulation game

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: by lot with preference for seniors

Grading: pass/fail only

Materials/Lab Fee: \$100

Winter 2020

LEC Section: 01 MWF 10:00 am - 11:50 am Robert A. Schwed

ECON 17 (W) The Fun of Fundraising

According to the National Center for Charitable Statistics, there are 1.5 million non-profit organizations registered in the U.S., and each of those organizations needs to actively fundraise in order to sustain their operations. Each year, hundreds of billions of dollars are contributed to charities from donors across the U.S. What is it that makes people want to give? What do donors consider when choosing what organizations to support? What type of an impact do individuals want to make through their philanthropy? This class will examine these questions and more through case studies,

conversations with non-profit leaders and board members, and philanthropists. Students will gain a basic understanding of a non-profit financial model, as well as the different ways in which fundraising can actually be fun and can inform a potential career in the non-profit sector. Much of the course reading will involve actual fundraising materials and collateral, including appeals, brochures, grant applications, and stewardship reports. Final projects will give students the opportunity to try their own hand at creation of stewardship or solicitation pieces, potentially in partnership with/for the benefit of a local non-profit. In addition to regular course meetings, occasional meetings with non-profit leaders or donors may be required; whenever possible (based on the schedule of the guest speaker), these will be scheduled during the day, and any evening events would be optional. Adjunct Instructor Bio: Laura Day '04 first became involved in fundraising for non-profits in elementary school, when she would help her mother produce mailings for her employer (a community-based social service organization). After eight years working in the NYC non-profit arts scene, Laura is now director of annual giving for Williams, and co-chair of the board of Berkshire Nursing Families (BNF).

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: priority given to seniors

Grading: pass/fail only

Winter 2020

LEC Section: 01 WR 10:00 am - 12:50 pm Laura E. Day

ECON 18 (W) Crossing Borders: Migration in Social Sciences, Literature, and Film

Migration has played a central role in shaping world history and impacted the social, political, economic, and cultural development of human societies. Movement of people across vast geographical terrains intensified in the 20th century and has become a defining feature of the 21st-century life. Today, debates about immigrant integration and exclusion, arguments for and against an impact of immigration on receiving and sending societies, and speculations over meanings of cultural difference are more intense than ever. This class will engage with cultural and political representations, definitions, and experiences of a particular experience of migration, a process of crossing borders. We will examine the notion of borders as they are constructed and deconstructed in social sciences, media, literature, and films. Through this concept, we will address the following questions: Why do people cross borders (and why do they stay?) Who defines the rules and conditions of belonging and has the power to enforce them? What are long- and short-term implications of border management? Is the rise of anti-immigrant sentiments an unavoidable feature of our lives and can it be contained or counteracted? To address these questions, we will bring together critical theoretical texts of this and past century with seminal literary works and documentary and feature films. Remarque and Agamben, Hosseini and Said, Naipaul and Deleuze & Guattari will lead us as we examine border crossings in Southern US, refugee crisis in Europe, cross-continental migrations in Africa among other topics. Documentary and feature films will further our engagement with the topic and will allow us to explore different modes of representing and analyzing relevant concepts and ideas. The class is open to anyone and everyone interested in current affairs, politics, culture, literature, film, humanitarian work, the environment, their fellow citizens, the world. No previous experience in anything necessary. Just an appetite for reading & discussion. We will meet twice a week for three-hour sessions.

Requirements/Evaluation: evaluation will be based on class participation in discussions, 2 short film reviews and a 5-7 page paper on a topic developed in consultation with the instructor

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: open to anyone and everyone interested in current affairs, politics, culture, literature, film, humanitarian work, the environment, their fellow citizens, the world

Grading: pass/fail only

Materials/Lab Fee: (books): approximately \$50

ECON 19 (W) From Rockefeller to Tesla, 150 Years of US Energy Disruption

In just the last two decades, the United States has gone from being the world's largest energy importer to being close to a net energy exporter. What

accounts for this remarkable and globally disruptive transformation, and what are its long-term implications? To be sure, oil shale production technology, aka "fracking," has been a critical driver. However, alternative energy (wind, solar) and conservation have also played important parts. This course starts with a historical perspective, examining the roots of the modern energy industry via John D Rockefeller's autobiography. We then study the evolution of global supply and demand for oil, natural gas, and alternatives, including the important role of market price signals and volatility. Which technologies, including fracking in the 2000s, have been historically the most important? More broadly, we also review how geo-politics has often been a function of geology (energy's location). Course includes: 1) team debate where students pair-up, select a topic from current energy issues, and then be randomly assigned to defend one side of the issue; 2) 10-page paper. Adjunct Instructor Bio: James F. Clark '84 is a Partner and Investment Committee member at Sound Shore Management, Inc., a value investment manager. Previously, Jim was at Credit Suisse First Boston where he was Managing Director, Director of Research, and the firm's International and Domestic Oil equity research analyst. During his equity research tenure, he was selected to 14 Institutional Investor All-America research team positions, and also was a Wall Street Journal All-Star and Hall of Fame member.

Requirements/Evaluation: final project and a 10-page paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: seniors; Economics majors; History majors

Grading: pass/fail only

Materials/Lab Fee: \$30 and cost of books

Winter 2020

ECON 21 (W) Fieldwork in International Development

This course involves an internship, volunteer work, or a research project in a developing economy and an academic analysis of the relevant development issues. The instructors will work with interested students to help arrange a placement and to help secure funding through Williams Financial Aid or other sources. Such arrangements must be made well in advance of Winter Study. Spanish speakers are especially encouraged to apply as there will likely be a few fieldwork possibilities in coffee-growing areas of Latin America. Students will read relevant background articles distributed at the end of fall term and must agree to keep a journal, maintain contact with the instructors, and write a final paper on development issues raised by their specific internship. A group meeting of all students will occur after Winter Study to reflect on individual experiences. Students are also encouraged to attend development talks at the Center for Development Economics throughout the academic year. Requirements: 90 hours of fieldwork; satisfactory evaluation from the institutional sponsor; 10-page final paper or equivalent; participation in final meeting. Interested students should send a resume and letter of interest to Paula Consolini by November 1. Each student's internship provider should send a confirmation letter by December 1 verifying the placement and describing the nature of the work to be performed by the intern. Paula Consolini is Director of the Center for Learning in Action.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: Resume and Letter of Interest will be used to select students if over-enrolled

Grading: pass/fail only

Materials/Lab Fee: variable--depends on project

ECON 22 (W) Volunteer Income Tax Assistance

Cross-listings: POEC 22 ECON 22

Primary Cross-listing

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers.

Students have the option of writing a 10 page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax, and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS "Link and Learn" online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and follow up Q&A session featuring guests from local social service organizations will help orient students to the issues facing low-income families in the northern Berkshires.

Class Format: afternoons

Requirements/Evaluation: 10-page paper; complete IRS certification to assist in tax preparation; volunteer work

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: written statement of interest

Grading: pass/fail only

Materials/Lab Fee: \$10

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 23 (W) Investing

ECON 23 is designed to provide students with a window into the world of endowment and investment management and is taught by members of the Williams College Investment Office. Students will learn about portfolio theory as well as specific asset classes such as global equities, hedge funds, venture capital, buyouts, fixed income, and impact investing. Students will gain practical skills in excel and will have the opportunity to learn from experienced investment professionals through guest lectures. Through presentations, discussions, readings, and project work, students will gain a better understanding of the various components of an institutional investment portfolio, how it is managed, and how investment managers are selected and monitored, from the perspective of an endowment. Students are expected to attend all on-campus classes (approx. 6 hours/week) and complete a set of relevant readings, a case study exercise, journal entries, and a final project (approx. 20 hours/week). Students will also be required to complete an introductory excel course. The course is open to freshmen, sophomores, and juniors. *To apply, please send an email with your resume and a short personal statement discussing why you are interested in this course and what you hope to gain from it to: InvestmentOffice@williams.edu by 11:59 PM ET on Sunday, October 20, 2019.* Adjunct Instructor Bio: Abigail Wattlely serves as a Managing Director in the Williams College Investment Office where she oversees investments in hedge funds and credit. Ms. Wattlely holds a B.A. from Williams College and an MBA from Harvard Business School.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: mail your resume and a short personal statement discussing your interest in this course and what you hope to gain from it to: InvestmentOffice@williams.edu by 11:59 PM ET on Sunday, October 20, 2019; if overenrolled: phone interviews

Grading: pass/fail only

Materials/Lab Fee: approximately \$40 for books

Attributes: EXPE Experiential Education Courses

LEC Section: 01 TWR 10:00 am - 11:50 am Abigail G. Wattlely

ECON 24 (W) Economics, Geography and Appreciation of Wine

This course provides an introduction to the economics, geography and appreciation of wine. We will be studying the economics and geography of wine

production, and will also learn to identify, understand and appreciate the major wine types of the world. The course will involve lectures, outside readings, discussions, and in-class wine tastings. We will focus primarily on the Old World wine styles and regions of France, Italy, Germany, Austria, Spain and Portugal, but will also cover some New World wine regions including California, Oregon, Chile, Argentina, South Africa, New Zealand and Australia among others. Students are invited to email the instructor with a brief description of background and interests, but are not required to do so.

Requirements/Evaluation: final project or presentation and a blind tasting exam

Prerequisites: none, but students must be 21 years old on or before the first day of class

Enrollment Limit: 10

Enrollment Preferences: mix of academic record and diversity of backgrounds and interests; students are invited to email the instructor with a brief description of background and interests, but are not required to do so

Grading: pass/fail only

Materials/Lab Fee: \$300

LEC Section: 01 TR 7:00 pm - 10:00 pm Peter L. Pedroni

ECON 28 (W) Solution Design and Product Management

Cross-listings: CSCI 28 ECON 28

Primary Cross-listing

Google Glass, Blackberry Storm, and the initial Obamacare Website represent just a few of the many failures that litter the IT project graveyard: 40 to 60 percent of large technology projects fail. All too often, the cause has little to do with the quality of technical engineering. More often, companies choose the wrong problem to solve or the wrong way to solve it. Google failed to account for the Google Glass price tag and privacy concerns. Blackberry failed to fully appreciate the touchscreen revolution. The Obamacare website failed to address management issues. The underlying conflict is that engineers and IT teams like to be told what to build, but customers often do not know what they want or how to express it. Identifying the right problem, designing the right solution, communicating the correct specifications to engineers, and delivering the right product to primary stakeholders are all difficult challenges crucial for successful product development. This course will explore various frameworks that product managers use to address these challenges. In doing so, we will model interactions between market forces, corporate directives, engineering challenges, and user experiences to interrogate the resilience of our ideas. We will also analyze and critique methodologies presented in readings by technology management prophets Marty Cagan, Steve Blank, Don Norman, Steve Krug and Eric Ries. Throughout the course, students will work in small teams to develop their own product management toolkit and deploy it towards solving a technology problem of each team's own choosing. Adjunct Instructor Bio: Allan Wellenstein is a senior vice-president at DataArt, a global technology consulting firm and the head of their Solution Design consulting practice. Allan has over 15 years of experience helping some of the world largest companies design and implement massive technology transformations. Though technically headquartered in New York City, he lives with his wife and three children in Pittsfield, MA.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: students will be asked to submit a brief paragraph describing their interest in the course and what they hope to get out of it

Grading: pass/fail only

Materials/Lab Fee: \$10 and approximately \$30 for books

This course is cross-listed and the prefixes carry the following divisional credit:

ECON 30 (W) Honors Project: Economics

The "Specialization Route" to the degree with Honors in Economics requires that each candidate take an Honors Winter Study Project in January of

their senior year. Students who wish to begin their honors work in January should submit a detailed proposal. Decisions on admission to the Honors WSP will be made in the fall. Information on the procedures will be mailed to senior majors in economics early in the fall semester. Seniors who wish to apply for admission to the Honors WSP and thereby to the Honors Program should register for this WSP as their first choice. Some seniors will have begun honors work in the fall and wish to complete it in the WSP. They will be admitted to the WSP if they have made satisfactory progress. They should register for this WSP as their first choice.

Class Format: honors project

ECON 52 (W) Micro-Simulation Modeling for Ex Ante Policy Analysis

Micro-simulation modeling provides one of the most powerful tools for ex ante evidence-based analysis of economic and social policy interventions. Rooted in representative household surveys of a country's population, the models provide a picture of poverty, employment, consumption and income levels throughout the country. A micro-simulation model enables researchers to investigate the impact of existing economic and social policy interventions (such as tax and public benefit interventions) on income levels, poverty, inequality and other outcomes. In addition, researchers are able to simulate the impact and estimate the cost of new policy interventions. During this course, students will learn to apply these methods to analyze public policies and interpret the findings. The course examines measurement issues, analytical tools and their application to household survey data for a range of developing countries. The course also links the outcomes of the analysis with the challenges of policy implementation, exploring how the political environment and/or institutional setting may result in the implementation of second-best options. This is a hands-on modeling course, and students will build a micro-simulation model for a country of their choice and use this model in completing the course requirements. The course will employ Excel, Stata and advanced micro-simulation packages. The final requirement for the course is a policy paper that provides students with an opportunity to write accessible prose that communicates the methodology adopted and the key lessons of the analysis.

Enrollment Limit: 10

Enrollment Preferences: CDE Students only, not open to undergraduate students

Grading: no pass/fail option, no fifth course option

LEC Section: 01 TBA Michael Samson

ECON 55 (W) Monetary Policy in Emerging and Developing Economies

This is an introduction to the empirical analysis of macro and monetary policy issues, building on the material covered in Econ 505/506 and 502/503. The goals are threefold: (1) to become familiar with some of the econometric tools used in macroeconomics, (2) to be able to understand and critique empirical macro research, and (3) to practice the writing and presentation skills used in economic research. The emphasis will be on practical issues, such as working with macro data, rather than on formal econometric methods.

Prerequisites: CDE Students only, not open to undergraduate students

Grading: no pass/fail option, no fifth course option

Winter 2020

ECON 56 (W) Macroeconomics and Reality: Interpreting the Data

This winter study course complements the macroeconomic theory courses students took in the fall. It is designed to provide hands-on experience using macroeconomic data to assess the state of the economy. The course will augment students' skills relating to finding, downloading, displaying, graphing, and analyzing economic data. The course will focus on three aspects of the economy: the real sector, the government sector, and the external sector. Students will learn to measure and compute output gaps, expenditure contributions to growth, Taylor and inflation-targeting rules, cyclically-adjusted fiscal balances, and reserve adequacy. They will also learn how to assess the sustainability of public and external debt and identify the key economic risks. The main format of the course will be hands-on workshops, interspersed with some lectures and readings. A short research project, including a presentation to the class.

Requirements/Evaluation: a short research project, including a presentation to the class

Prerequisites: CDE Students only, not open to undergraduate students

Grading: no pass/fail option, no fifth course option

Winter 2020

LEC Section: 01 TBA Hali J. Edison

ECON 99 (W) Independent Study: Economics

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

- Bernard J. Rhie, Associate Professor of English
- Shawn J. Rosenheim, Professor of English, Chair of Campus Environmental Committee
- James R. Shepard, J. Leland Miller Professor of American History, Literature, and Eloquence; on leave Fall 2019
- Karen L. Shepard, Senior Lecturer in English; on leave Fall 2019
- David L. Smith, John W Chandler Professor of English
- Anita R. Sokolsky, Professor of English
- Christian Thorne, Professor of English and Williams-Mystic Faculty Fellow; affiliated with: Williams-Mystic Program
- Stephen J. Tifft, Professor of English
- Emily Vasiliauskas, Assistant Professor of English
- Ricardo A Wilson II, Assistant Professor of English

The study of English allows students to explore the critical role language and literature play in the shaping of human culture and social experience. Department courses cover a variety of national, regional, and diasporic literary traditions; acquaint students with a range of genres and cultural practices, including poetry, prose, drama, film, and mixed or emerging media; and employ a range of critical and methodological approaches. All foster skills of critical analysis, interpretation, and written argument and expression. By cultivating a sophisticated awareness of linguistic and literary representation, and by encouraging the ability to read critically and write persuasively, the English major provides students with intellectual and analytical skills that they can draw upon to follow a wide range of paths.

COURSES AND COURSE-NUMBERING

100-level Courses

At the introductory level, the department offers a range of writing-intensive 100-level courses which focus on interpretive skills as well as skills in writing and argumentation. All 100-level courses are designed primarily for first-year students, although they are open to interested sophomores, juniors, and seniors. A 100-level course is required for admission to most upper-level English courses, except in the case of students who have placed out of the introductory courses by receiving a score of 5 on the Advanced Placement examination in English Literature or of 6 or 7 on the Higher Level International Baccalaureate English exam.

200-level Courses

Most 200-level courses are designed primarily for qualified first-year students, sophomores, and junior and senior non-majors, but they are open to junior and senior majors and count as major courses. Several 200-level courses have no prerequisites; see individual descriptions for details. 200-level Gateway courses are designed for first- and second-year students who are considering becoming English majors, or who are interested in pursuing upper-level course work in the department. All Gateway courses are writing-intensive. First-year students who have placed out of the 100-level courses are encouraged to take a Gateway course as their introduction to the department.

300-level Courses

The majority of English Department courses are designed primarily for students who have some experience with textual analysis, and are open to sophomores, juniors, and seniors. First-year students who wish to enroll in a 300-level course are advised to consult the instructor.

400-level Courses

400-level courses are intensive, discussion-oriented classes. Limited to 15 students, 400-level courses should be attractive to any student interested in a course that emphasizes student initiated independent work. Majors considering Honors work and who wish to prepare for it are urged to take a 400-level course before senior year.

ADVISING

All students who wish to discuss English Department offerings are invited to see any faculty member or the department chair.

Prospective majors are particularly encouraged to discuss their interest with faculty as early as possible. In the spring of the sophomore year, newly declared majors must meet with a faculty member to discuss the Major Plan. Declared majors will be assigned a permanent advisor shortly after they declare the major.

MAJOR

Major Plan. Shortly after declaring the major, all English majors must complete a short written plan for how they intend to complete the major. In this plan, students should consider how they can most fruitfully explore the broad range of genres, historical periods, and national and cultural traditions that literature in English encompasses, and how they wish to focus upon a particular intellectual interest within English. Students are encouraged to begin discussing the Major Plan with a faculty member as soon as they become interested in the major; junior majors must meet with faculty advisors to revisit Major Plans as they register for courses. There will also be informational meetings and web resources available to assist new majors in developing the Major Plan.

Students majoring in English must take at least nine courses, including the following:

Any 100-level English class. Students exempted by the department from 100-level courses will substitute an elective course.

At least one 200-level Gateway course (grouped at the end of the 200-level course descriptions). Gateway courses are designed for first- and second-year students contemplating the major or intending to pursue more advanced work in the department; these courses focus on analytical writing skills while introducing students to critical methods and historical approaches that will prove fruitful as they pursue the major. (Note: a Gateway course can fulfill a Literary Histories or Criticism requirement as well as the Gateway requirement.)

At least one Criticism course (identified in parentheses at the end of the course description). A course fulfilling the criticism requirement entails a sustained and explicit reflection on problems of critical method, whether by engaging a range of critical approaches and their implications or by exploring a particular method, theorist, or critic in depth. (Please note that when a Criticism course is also listed as satisfying the Literary Histories requirement, the course may be used to satisfy either requirement, but not both.)

At least three courses at the 300-level or above.

At least three courses designated as Literary Histories. Literary Histories courses concern the emergence or development of a specific literary tradition or problem and/or its transformation across multiple historical periods. Literary Histories are identified by LH-A, LH-B, or LH-C in parentheses at the end of the course description.

LH-A: courses dealing primarily with literature written before 1800.

LH-B: courses dealing primarily with literature written before 1900 but not included in LH-A (courses on literature from 1800-1900 and some surveys).

LH-C: courses dealing primarily with literature written after 1900.

Of the three Literary Histories courses required for the major, at least two must focus on literature before 1900 (LH-A or LH-B), with at least one of these focusing primarily on literature before 1800 (LH-A).

For further clarification, please see the English Department website at english.williams.edu.

Courses Outside the Department

The department will give one elective course credit toward the major for a course taken in literature of a foreign language, whether the course is taught in the original language or in translation. Such a course may not be used to satisfy the department's Literary Histories, Criticism, or Gateway requirements.

STUDY AWAY

Majors who plan to study abroad should be proactive in understanding how this will affect their plans for completing major requirements. Such plans should be discussed in advance with the student's advisor as well as the department's academic assistant. Approval of departmental credit for courses taken off-campus must be obtained in advance from the department chair.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. In most cases we require syllabus, readings, and assignments. The one exception is the Oxford Program. We need only the title and description for that particular program.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, for most programs we allow only two electives towards the major. Again, the exception is the Oxford Program where we allow four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes, students cannot receive credit for the Gateway requirement. It is difficult to receive credit for our criticism requirement as well.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Students must be aware that if they do not take a Gateway before their study away they will have to do it when they come back. Likewise for our criticism requirement.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

This happens most often when the student does not come to see the Chair before they leave or if they change their plans once they are away at their program.

THE DEGREE WITH HONORS IN ENGLISH

The English Department offers three routes toward honors: a creative writing thesis, a critical thesis, and a critical specialization. Candidates for the program should have at least a 3.5 average in courses taken in English, but admission will not depend solely on course grades. Formal application to pursue honors must be made to the director of honors (Christopher Pye) by April of the junior year.

All routes require students to take a minimum of ten regular-semester courses (rather than the nine otherwise required for the major). Students doing a creative writing thesis must, by graduation, take at least nine regular semester courses, and, in addition, take English 497 (Honors Thesis) and English W31 (Senior Thesis, winter study) during senior year. Students writing a critical thesis must, by graduation, take at least eight regular-semester courses, and, in addition, take English 493 and English 494 (fall Honors Colloquium and spring Honors Thesis) and English W31 (Senior Thesis, winter study) during senior year. Students pursuing a critical specialization must, by graduation, take at least eight regular-semester courses, and in addition, take English 493 and English 494 (fall Honors Colloquium and spring Honors Thesis) and English W30 (Senior Thesis: Specialization Route, winter study) during senior year.

Creative Writing Thesis

The creative writing thesis is a significant body of (usually) fiction or poetry completed during the fall semester and winter study of the senior year, and usually including revised writing done in earlier semesters. (With permission of the honors committee, the thesis may be undertaken during the winter study period and the spring semester of the senior year.) Requirements for admission include outstanding work in an introductory and an advanced workshop (or, in exceptional cases, not including poetry or fiction, a substantial body of work in place of an advanced workshop), a recommendation from one of the creative writing teachers (who will then act as thesis advisor), and the approval of the departmental honors committee. A creative thesis begun in the fall is due on the last day of winter study; one begun in winter study is due the third Monday after spring break. The methods of evaluation are identical to those for critical projects (but their page limits do not apply).

Critical Thesis

The critical thesis is a substantial critical essay written during both semesters as well as the winter study period of the senior year. It must consider critical and/or theoretical as well as literary texts. The thesis is normally about 15,000 words (45 pages); in no case should it be longer than 25,000 words (75 pages). The proposal, a 3-page description of the thesis project, should indicate the subject to be investigated and the arguments to be considered, along with a bibliography. The finished thesis is due on the third Monday following spring break. After the critical thesis has been completed, students publicly presents their work.

Critical Specialization

The critical specialization route is a series of forays into a broad area of interest related to work undertaken in at least two courses. At least one of these courses must be in the English Department, and both need to have been taken by the end of fall term in senior year. The specialization route entails: (1) a set of three 10-page essays which together advance a flexibly related set of arguments; (2) an annotated bibliography (5 pages) of secondary sources, explaining their importance to the area of specialization; (3) a meeting with the three faculty evaluators (one of whom is the advisor) during the last two weeks in February to discuss the trio of essays and the annotated bibliography; (4) a fourth essay of 12 pages, considering matters that arose during the faculty-student meeting and reflecting on the outcome of the specialization. The 3-page proposal for the specialization should specify the area and range of the study, the issues likely to be explored, and the methods to be used for their investigation. It should also describe the relation between previous course work and the specialization, and include a brief bibliography of secondary works. The first two papers are due by the end of fall semester; the third paper is due at the end of winter study; the bibliography is due mid-February; and the final paper is due the third Monday after spring break.

Applying to the Honors Program

All students who wish to apply to the honors program are required to consult with a prospective faculty advisor and the director of honors before April of the junior year. Prior to pre-registration in April, candidates for critical theses and specializations submit a 3-page proposal that includes an account of the proposed project and a bibliography. Students applying to creative writing honors submit a brief proposal describing the project they wish to pursue. Decisions regarding admission to the honors program will be made by the end of May. Admission to the honors program depends on the department's assessment of the qualifications of the student, the feasibility of the project, and the availability of an appropriate advisor.

When pre-registering for Fall classes of their senior year, students who are applying to critical honors should register for the Honors Colloquium as one of their four courses.

Progress and Evaluation of Honors

While grades for the fall and winter study terms are deferred until both the honors project and review process are completed, students must do satisfactory work to continue in the program. Should the student's work in the fall semester not meet this standard, the course will convert to a standard independent study (English 397), and the student will register for a regular winter study project. A student engaged in a year-long project must likewise perform satisfactorily in winter study (English W30 or W31) to enroll in English 494 in the spring semester. When such is not the case, the winter study course will be converted to an independent study "99."

Students are required to submit one electronic copy to the department academic assistant at pmalanga@williams.edu. Students should also give a final hard copy to their thesis advisor. Both the electronic copy and the hard copy are due on the dates applicable to the type of project pursued (see the above descriptions of each type of project for the due dates). All honors projects are evaluated by the advisor and two other faculty members. The advisor determines the student's semester grades in honors, while the two external readers recommend to the department that the project receive

Highest Honors, Honors, or no Honors. Honors of any kind are contingent upon satisfactory completion of courses in the major during the senior year. Highest Honors are normally awarded only to students whose performance in both the honors program and regular courses in the major has been exceptional.

ENGL 102 (W) Intensive Expository Writing Workshop (WS)

This course allows students who need to make up a deficiency to do so over January term. The course totals the same number of class hours as a full semester plus a winter study, which is a lot--three hours a day, five days a week over four weeks. I also will require six or so writing assignments, with mandatory revisions. This is an English class, which means we will also be reading a lot of short stories. Some, but not all, of the assignments will consist of literary interpretations or analysis. The stories we read will be science-fiction stories, which tend to involve the same technical problems as expository essays: they include an unusual burden of exposition, and an explicit or implied thesis, often one of each. Because of this, they will also provide structural models for us, under the guiding principle that your essays can benefit from learning basic storytelling techniques: how to hook the reader, how to build suspense, how to handle exposition, how to provide a satisfying conclusion--in short, how to make your writing interesting.

Prerequisites: permission of a dean

Enrollment Preferences: students who need to make up a deficiency

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both ENGL 102 and ENGL 41.

Distributions: (D1) (WS)

Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Winter 2020

SEM Section: 01 M-F 10:00 am - 1:00 pm Paul C. Park

ENGL 103 (W) Designer Genes Intensive (WS)

In his book *High Noon: 20 Global Problems, 20 Years to Solve Them*, J.F. Rischard notes that the biotechnology issues raised by the Human Genome Project are some of the most pressing global issues we face today. The sequencing of the human genome has opened up a "remarkable landscape of opportunity," Francis Collins and colleagues wrote in 2001: "Like Shakespeare, we are inclined to say, 'what's past is prologue.'" Collins and his associates couldn't have picked a more resonant text from which to quote than Shakespeare's play, *The Tempest*, a play that reverberates with the making of new worlds. With the mapping of the human genome, Collins suggests, we are at the beginning of some "brave new world." But with opportunity also comes a host of ethical concerns. Will this information be used to enhance the individual (or society)? If so, how will it improve the individual (or society)? Who should make those decisions? Will we be able to design our own genes, creating designer babies and societies? Questions about how we define race, gender, disease, and disability become even more pressing when it becomes possible for us to select what traits society deems more "desirable." Because literary and film analysis focuses primarily on language and representation, it is a discipline well-suited to getting at the social, ethical, and scientific complexities of this issue. In this writing skills course we will explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics. These texts--many of which also provide a model of exceptional writing--will come from a number of different genres, including the memoir, film, artwork, and non-fiction writing on contemporary science and medicine.

Prerequisites: permission of a dean

Enrollment Preferences: students who need to make up a deficiency

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both ENGL 103 and ENGL 42.

Distributions: (D1) (WS)

Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Winter 2020

LEC Section: 01 M-F 10:00 am - 12:50 pm Bethany Hicok

ENGL 104 (F) Creative Non-fiction (WS)

In this course we will read some of the most prominent practitioners of creative non-fiction--writers like John McPhee, Joan Didion, Malcolm Gladwell, Susan Orlean, Ta-Nehisi Coates, Michael Pollan, Zadie Smith and Oliver Sacks. Students will also write in a variety of non-fiction modes--explainers, profiles, essays, memoirs. We will probe the border between invention and fact and consider the ways that narratives are constructed.

Class Format: workshop

Requirements/Evaluation: four short exercises of three pages or less; three longer assignments of five pages; and a final assignment, which is a revision and expansion of an earlier essay

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Four short exercises of three pages or less; three longer assignments of five pages; and a final assignment, which is a revision and expansion of an earlier essay. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2019

SEM Section: 01 MWF 8:30 am - 9:45 am John E. Kleiner

ENGL 105 (F)(S) American Girlhoods (DPE) (WS)

Cross-listings: WGSS 105 ENGL 105 AMST 105

Primary Cross-listing

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 105 (D2) ENGL 105 (D1) AMST 105 (D2)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equity and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

ENGL 106 (S) "Make it New": The Modernist Experiment (WS)

Cross-listings: COMP 105 ENGL 106

Primary Cross-listing

In her essay "Mr. Bennett and Mrs. Brown" (1924), Virginia Woolf proposed that around 1910 "human character" itself had suddenly changed, rendering existing conventions "in religion, conduct, politics, and literature" no longer adequate to express the new age. "And so the smashing and the crashing began. Thus it is that we hear all around us, in poems and novels . . . the sound of breaking and falling, crashing and destruction." This course will explore the effort of artists in the decade or so before and after World War I to "make it new." We will read work by Conrad, Yeats, Frost, Pound, Joyce, T.S.Eliot, Mansfield, Woolf, Faulkner, Wallace Stevens, William Carlos Williams and others, and chart the range of innovative narrative and formal strategies Modernist writers adopted in their efforts to represent consciousness, experience, memory and the objective world more fully and accurately in an era of massive social, political and technological change. We will also consider some non-print media, including developments in the visual arts from the post-impressionists through to the surrealists, the work of the Bahaus, and early experiments in film.

Requirements/Evaluation: active class participation; three papers rising from 3-7 pages; three two-page reading responses

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students who have not taken or placed out of a 100-level ENGL course

ENGL 107 (F) Temptation

Cross-listings: ENGL 107 COMP 106

Primary Cross-listing

We want most those things we can't--or shouldn't--have. Or, to put it another way, it is when limitations are placed on our actions by law, religion, or the facts of our own biology that we experience desire most acutely. In this course, we will examine fictional narratives, lyric poems, and philosophical meditations in which people are tempted to act against their better judgement. Free will, ambition, temperance, suspense, despair, and repression will be our conceptual preoccupations. We will get to know such writers and artists as Homer, Euripides, Ovid, Augustine, Shakespeare, Donne, Milton, Laclos, Mozart, Freud, Frost, and Scorsese.

Requirements/Evaluation: four five-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Not offered current academic year

ENGL 108 (F) Everyday Stories

We--human beings--consume stories every day, and we currently have a dazzling, even astonishing wealth of choices, every day. Most of these stories are Action Packed: this Thing blows up, this Heart throbs with passion, that Organization carries out some evil plot, this Person figures it out. We will examine the world of everyday storytelling across many mediums, from poetry to comic books to television, and across time, from the mid-19th century to the present.

Requirements/Evaluation: class participation, and 5-6 writing assignments amounting to 20 pages all told

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

ENGL 111 (F) Poetry and Politics

"Poets are the unacknowledged legislators of the world" wrote Shelley in his 1821 "Defence of Poetry," countering the widely held view of poetry's airy irrelevance to the material progress of humanity. His claims are echoed a century and a half later in Audre Lorde's "Poetry is Not a Luxury,"; in which she argues that poetry is a vital and essential part of her own political struggle as a Black lesbian feminist. But when W.B. Yeats--himself a very politically involved poet--writes in 1917 that "from the quarrel with others comes rhetoric; from the quarrel with ourselves comes poetry," he implies that poetry would suffer from too much involvement with the "quarrel with others" that is politics, becoming, perhaps, something more like advertising jingles for political dogma. And when W. H. Auden writes in 1939 that "poetry makes nothing happen" he appears to locate poetry's value precisely in its irrelevance to politics as such. This course will focus on the vexed relationship between poetry and political struggle, reading predominantly poetry and poetics (writings about poetry) of the last two centuries in an effort to answer the questions: what can poetry do for politics? what does politics do for (or to) poetry? Is poetry essential to political struggle, or do poetry and politics mix only to the detriment of both, producing, on the one hand, bad poetry, and on the other, mere distractions from the "real" work of politics? The primary goal of the course is to make students better readers of poetry, and better readers and writers of argumentative prose.

Class Format: discussion

Requirements/Evaluation: graded essays, final in-class team project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 112 (F) Introduction to Literary Criticism

What determines meaning? How we interpret is inevitably inflected by our own priorities and preoccupations, by the contexts in which we read, by the literary and other conventions influencing a work, and by the historical and personal circumstances of its composition, as well as deriving from the particular words of a text and from the mutable life of language itself. So how to go about the task of reading literature well, and reading critically? This course will focus on key introductory methods and critical approaches, and is intended to develop your skills in reading, writing about, discussing and interpreting literary texts. Our readings--mainly short fiction and poetry, along with selected introductory work in critical theory--will invite increased self-consciousness about literary form, the functions of criticism, and the process of reading and interpretation. In the last weeks of the course, we will

read longer texts, including at least one play and one novel.

Requirements/Evaluation: four papers rising from 2-6 pages, regular short reading response papers, and contributions to class discussions

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: ENGL 113 AMST 113 WGSS 113

Primary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

SEM Section: 01 MWF 8:30 am - 9:45 am Bethany Hicok

ENGL 114 (F) Literary Speakers (WS)

The general purpose of this course is to develop students' skills as interpreters of poetry and short fiction. Its particular focus is on how--and with what effects--poets create the voices of their poems, and fiction writers create their narrators. We'll consider the ways in which literary speakers inform and entice, persuade and sometimes deceive, their audiences. Readings will include texts from various historical periods, with particular emphasis on the twentieth century (including works by James Joyce, Henry James, Vladimir Nabokov, Robert Frost, Toni Cade Bambara, Raymond Carver, and Seamus Heaney).

Requirements/Evaluation: 5-6 papers, of varying length, spaced throughout the term (about 20 pages total); detailed feedback will be provided on each paper, along with opportunities for revision

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores who have not yet taken a 100-level course in English

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: There will be 5-6 papers assigned, spaced evenly throughout the term, ranging in length from 1-2 pages to 5-6 pages. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences before and after each paper. At least two classes during the term will be specifically devoted to issues related to paper writing.

Fall 2019

SEM Section: 01 MWF 10:00 am - 10:50 am Stephen Fix

ENGL 117 (F) Introduction to Cultural Theory

Cross-listings: ENGL 117 COMP 117

Primary Cross-listing

This course has a clear purpose. If you had signed up for a course in biology, you would know that you were about to embark on the systematic study of living organisms. If you were registered for a course on the American Civil War, you would know that there had been an armed conflict between the northern and southern states in the 1860s. But if you decide you want to study "culture," what exactly is it that you are studying? The aim of this course is not to come up with handy and reassuring definitions for this word, but to show you why it is so hard to come up with such definitions. People fight about what the word "culture" means, and our main business will be to get an overview of that conceptual brawl. We will pay special attention to the conflict between those thinkers who see culture as a realm of freedom or equality or independence or critical thought and those thinkers who see culture as a special form of bondage, a prison without walls. The course will be organized around short theoretical readings by authors ranging from Matthew Arnold to Constance Penley, but we will also, in order to put our new ideas to the test, watch several films (*Ferris Bueller's Day Off*, *Silence of the Lambs*, *The Lord of the Rings*) and listen to a lot of rock & roll. Why do you think culture matters? Once you stop to pose that question, there's no turning back.

Class Format: discussion

Requirements/Evaluation: five short papers totaling about 20 pages, class attendance and participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: AMST Critical and Cultural Theory Electives

Not offered current academic year

ENGL 119 (S) Missed Encounters (DPE)

Although we all entertain the dream of reaching directly across boundaries of personal and cultural difference, such exchanges remain inseparable from fantasies of otherness. Those fantasies can be as reductive as a stereotype, but they can also be enormously nuanced and self-revealing--as rich as literature itself. We will study the missed encounter--the encounter in which the element of presupposition and fantasy is vividly apparent--in cultural contexts from the first English accounts of the inhabitants of Virginia to race relations in contemporary African fiction; we will consider such encounters in other contexts as well, including sexual relations, the relations between young and old, even the relation between past and present. But in every case, we will keep our gaze trained on what such events tell us about the nature of fantasy and the place of fiction. The course will consider novels, drama, film, opera, and non-fiction, works such as: Coetzee, *Waiting for the Barbarians*; Harriot, "Report of the New Found Land of Virginia"; Conrad, *Heart of Darkness*; Stephen Crane, "The Blue Hotel"; Nadine Gordimer, *The Pick Up*; Herzog, "Aguirre"; Shakespeare, *Merchant of Venice*; Puccini, *Madame Butterfly*; Huang, *M. Butterfly*; Austen, *Pride and Prejudice*; Gyasi, *Homegoing*; and theoretical writing, including texts by the psychoanalytic critic, Jacques Lacan.

Requirements/Evaluation: 20 pages of writing in the form of frequent short papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students who have not taken or placed out of an English 100-level class

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: The course fulfills the spirit of the DPE requirement by engaging diverse cultural contexts in order to explore the ways in which political, racial, and sexual identities are staked on forcible assertions of difference which at once constitute power and erode it from within. Through discussion and critical writing, students will develop analytical tools and skills to interrogate these effects of social power.

Not offered current academic year

ENGL 120 (F) The Nature of Narrative (WS)

Cross-listings: COMP 111 ENGL 120

Secondary Cross-listing

This course focuses on the nature and function of narrative using a wide range of texts from different periods, traditions and genres. We will analyze the ways in which works of fiction communicate their concerns; in other words: how do they say what they say? And why does "how" matter as much as, if not more than, "what?" We will also look at film, articles, and other relevant texts, accompanying the readings with a few pertinent theoretical texts. The authors we will study may include Homer, Cervantes, Kleist, Kafka, Zweig, García Márquez, Rankine, and Farhadi. All readings in English, although those with foreign language competency are invited to make comparisons with the original where possible.

Requirements/Evaluation: active and meaningful class participation; two shorter papers, longer final paper including a draft workshopped in tutorial format

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students considering a major in Comparative Literature and/or who have studied a foreign language

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 111 (D1) ENGL 120 (D1)

Writing Skills Notes: The two shorter papers will receive extensive comments from the instructor; the instructor will meet individually with students to discuss their writing after the second paper. A partial draft of the final longer paper will be workshopped with the instructor plus a peer partner in tutorials; the tutorials will provide feedback for expanding and deepening the final paper.

Attributes: FMST Related Courses

Fall 2019

SEM Section: 01 MR 2:35 pm - 3:50 pm Gail M. Newman

ENGL 123 (S) The Short Story

The reading for this course will consist entirely of short stories by such writers as Poe, Hawthorne, James, Doyle, Hemingway, Faulkner, Gilman, Chopin, Cather, Toomer, McCullers, O'Connor, Borges, Nabokov, Kincaid, Saunders, Diaz, and Shepard. We will read one or two per class meeting; at the end of the course, we'll be reading one collection, probably by Raymond Carver. Reading short stories will allow us to pay close attention to the form of our texts, and to paragraphs, sentences, and words. The premise of the essays you will write is that short stories and short essays are both arts based on controlling the release of information and meaning, and that studying the two genres together will have reciprocal benefits for reading and writing.

Class Format: class meetings will be devoted almost entirely to discussion

Requirements/Evaluation: grades will be based on the five formal writing assignments, with rewards for improvement, plus class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken a 100-level English course; then sophomores who have not taken a 100-level English course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2020

SEM Section: 01 TR 8:30 am - 9:45 am John K. Limon

ENGL 125 (F) Theater and Politics (WS)

Cross-listings: THEA 125 ENGL 125

Primary Cross-listing

When Plato designed his ideal republic, he excluded theater from it, arguing that indulging in the charms of theatrical representation would make men poor governors of themselves and thus threaten the integrity of fledgling Greek democracies. In the twentieth-century, however, the work of younger artists and playwrights as diverse as Bertolt Brecht and Antonin Artaud provocatively suggested that theater itself could remedy the ills that Plato thought it aggravated by restoring to the people the productive power that the passively on-looking masses had ceded to the charisma of dictators. Today, as rapid changes in media daily transform the way in which we experience the world and understand our place within it, artists, critics, and philosophers continue to draw on the terms of historical debates about theater in attempts to understand the political significance of technologically enhanced forms of global spectatorship, asking what becomes of the traditional roles of viewers and directors on the new world-stage, in an age when revolutions are triggered by cell phone images, but advertising campaigns are also customized to consumers based on automated scans of private information like email. In this seminar, students take a historical approach to these urgent contemporary questions, analyzing the politics of theater in literature, criticism, film, and philosophy from antiquity to the present.

Requirements/Evaluation: three papers of increasing length and complexity, one of which you will revise, totaling 20 pages of finished writing, and a portfolio of interpretive questions

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 125 (D1) ENGL 125 (D1)

Writing Skills Notes: The seminar includes extensive discussion of writing strategies throughout, frequent writing assignments, substantive feedback

on writing assignments, and revision in response to that feedback.

Fall 2019

SEM Section: 01 MWF 11:00 am - 12:15 pm Walter Johnston

ENGL 126 (F) Black Literature Matters (DPE) (WS)

Cross-listings: ENGL 126 AFR 126 AMST 126

Primary Cross-listing

Black literature remains central to struggles for freedom and equality across the African diaspora. In this course, we will examine why black literature matters: What are its aesthetic and political imperatives? How have black writers used certain literary forms in their constructions of identity, freedom, and citizenship? Through our exploration of these questions, we will discover the significant matters of African American literature from the Harlem Renaissance moment to the Black Lives Matter movement. By reading a broad range of texts---essays, novels, drama, music, and poetry---by such authors as Alain Locke, Claude McKay, Langston Hughes, Zora Neale Hurston, Richard Wright, James Baldwin, Lorraine Hansberry, Audre Lorde, Amiri Baraka, Nikki Giovanni, Jesmyn Ward, and Kendrick Lamar, we will develop a critical vocabulary for evaluating and engaging with this body of literature. This course contributes to the Difference, Power, and Equity requirement by centering on the relationship between black literature and black political movements from the 1920s to the present.

Requirements/Evaluation: four papers totaling at least 20 pages, active class participation, class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course; Africana Studies concentrators; American Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 126 (D1) AFR 126 (D2) AMST 126 (D1)

Writing Skills Notes: Students will write and receive feedback on four papers. Papers will range from 3 to 7 pages, and feedback will focus on argument/claim development, critical inquiry, and structure.

Difference, Power, and Equity Notes: Through discussions and short essays, students will develop skills for analyzing the role of literature in defining, responding to, and re-shaping issues of race, class, and gender during the Harlem Renaissance, Black Arts and Black Power, and Black Lives Matter movements. Taking its title from the current movement for black lives, a primary objective of this course is for students to develop skills for articulating the value of black aesthetics to social justice movements in the present.

Fall 2019

SEM Section: 01 TR 8:30 am - 9:45 am Gretchen Long

ENGL 128 (S) Reading Asian American Literature

Cross-listings: COMP 128 ENGL 128 AMST 128

Secondary Cross-listing

Though the category and term "Asian American" came about as a result of political struggle in the 1960s, what we now call Asian American writing in English began in the nineteenth century and has played a significant role in every American literary "movement" from Modernism, realism, protest literature to various avant-gardes, the graphic novel, and digital poetics. This course closely reads a sampling of texts in a variety of genres and styles-produced by writers from various Asian American ethnic groups-from the late nineteenth century to the present and contextualizes them historically, both domestically and globally. We will examine the material, cultural, political, and psychic intersections of larger structural forces with individual writers and texts. Along the way, we will interrogate the notion of "Asian American"--its contradictions, heterogeneous nature, and our assumptions--and its relation to the idea of "American." Some questions we will ask: "Why have Asian Americans and Asian American writers and writing so often been viewed as 'foreign' or 'alien' to the American body politic and the English-language literary tradition?" "How might Asian American

writing be linked to other English-language texts in the Asian diaspora?"

Requirements/Evaluation: six 2-3 pp. papers, participation (attendance, discussion, GLOW posts), and a final project (the final project is 7-9 pages: either a creative project or an analytical paper)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: prospective AMST or ENGL majors

Expected Class Size: 15

ENGL 131 (F) All About Sonnets (WS)

Fourteen lines in a fixed pattern. When Sir Thomas Wyatt introduced the sonnet to England in the 1500s with his translations of Petrarch, the form quickly became entrenched in English, and has been in regular use ever since. Originally penned as expressions of idealized love, sonnets soon expanded to address other kinds of emotionally intense relationships--to God, Nature, art, a particular place, the State, oppressors--while still, obsessively, returning to love in all its myriad forms. This makes the sonnet, deeply personal though it is, also a kind of pocket-sized literary tradition, as each new generation of poets extends, disrupts, and comments upon the whole history of sonnets. "A sonnet is a moment's monument," wrote D.G. Rossetti (in, of course, a sonnet)--speaking of the sonnet's tendency to offer just a snapshot of the poet's mental and emotional state--but the tradition of producing numbered sequences of sonnets can also string those moments into a kind of narrative. Similarly, while the sonnet is founded in strong

feeling, it is also obsessed with logic, delighting in logical argumentation, contradictions and paradoxes. This course will focus on a broad range of sonnets, historically, geographically and thematically, as well as criticism and theory relating to sonnets. Studying sonnets that are variously inspiring, devastating, and lol funny, we will become Sonnet Experts, while developing broadly useful skills in careful reading, concise writing and sound argumentation. Poets will include Shakespeare, Wordsworth, Keats, Elizabeth Barret Browning, DG and Christina Rossetti, Claude McKay, Edna St. Vincent Millay, John Berryman, Seamus Heaney, Vikram Seth, and many, many more. No prior experience with poetry is presumed.

Class Format: first week in regular class meetings, followed by weekly tutorial meetings in pairs

Requirements/Evaluation: five tutorial essays 3-5 pages; five responses to partners tutorial essays; 10 sonnet paraphrases and/or "prose sonnets;" thoughtful participation in tutorial meetings

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Bi-weekly short analytic papers (1000 words) which will be critiqued in tutorial meetings and revised as needed. Bi-weekly critique of partner's paper. Regular sonnet paraphrases and or "prose sonnets" that will be critiqued for linguistic precision and succinctness.

Fall 2019

TUT Section: T1 Cancelled

ENGL 132 (F) Black Writing To/From/About Prison (DPE) (WS)

Cross-listings: WGSS 132 ENGL 132

Primary Cross-listing

This introductory course considers the disproportionate incarceration of African Americans as it is represented on the page. Keywords for meditation and analysis include blackness, gender, prison, justice, freedom, and abolition. Each reading and class discussion will aid students in developing rigorous and nuanced understandings of these terms. The primary project in this course is the development of open letter writing skills. This epistolary form allows both for the intimate engagement of individual, familiar contact and the deft inclusion of targeted eavesdroppers in order to raise the consciousness of listeners and affirm the value of personal relationships. Course texts will include letters to and from prison; documentaries; selections from anthologies like *If They Come in the Morning* and *Captive Genders: Trans Embodiment and the Prison Industrial Complex*; autobiographies like that by Malcolm X, Walidah Imarisha, and Assata Shakur; poetry by Ericka Huggins, Huey Newton, and Terrance Hayes; and critical interventions by scholars like Nikki Jones, Victor Rios, Michelle Alexander, and Angela Davis. We will also look at contemporary groups organizing around abolition and prisoner support including Critical Resistance, Photos From Solitary, and TGIJP (Transgender Gender Variant Intersex Justice Project).

Class Format: discussion, engagement with guest speakers, engagement with Special Collections

Requirements/Evaluation: four open letters developed with critical feedback (4-5 pages), a twice weekly question diary, an organization report and presentation, a collectively decided project

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 132 (D1) ENGL 132 (D1)

Writing Skills Notes: Open letters are a mainstay of black literature allowing for intimate engagement of the individual and the deft inclusion of targeted eavesdroppers to raise the consciousness of listeners and affirm the value of personal relationships. Students will learn to write letters with purpose to facilitate a felt relationship to the topic; enhance writing skills including achieving clarity and aesthetic value; practice curation of references. Four 5-page letters with rigorous feedback to sharpen form.

Difference, Power, and Equity Notes: This class studies the historical development of mass incarceration of black folk from its roots in American

slavery and white supremacist policy. This class also studies the impact of the prison industrial complex on transgender and queer folk in reproducing gender binaries and sexual abuse in and outside prison walls. The politics of prison abolition and gender self-determination present critical interventions into the hegemonic structures of normalized racial dominance and gender oppression.

ENGL 133 (F) Shakespeare's Uncertain Ends

We've come to expect that the heroes of Shakespeare's tragedies learn something. *Othello*, *Lear*, *Hamlet*, *Macbeth*, and all the others, are supposed to achieve some kind of clarifying self-knowledge as a reward for their terrible suffering. After all, the heroes' flaws are revealed and their delusions are exposed so that they can eventually understand what has happened to them and why. They are meant to learn from their suffering. Or so we'd like to think. But the plays don't always cooperate with our desire for some compensating enlightenment. We don't always come away with a clear sense that Shakespeare's tragic heroes have arrived at a true self-recognition; in other words, they don't always fully grasp how their fate is implicated in their character. Nor are we granted an obvious, edifying moral to compensate for the misery we witness. What, then, do we discover at the end of a Shakespeare tragedy?

Requirements/Evaluation: three essays (two 5-page essays and one 10-page essay), short writing assignments, class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 134 (F) Contemporary US Literature, Postcolonial Studies, & The Politics of Culture in the Age of Trump (DPE) (WS)

In this course we will read a handful of contemporary US novels and explore whether postcolonial theory can provide a critical vocabulary that helps situate the "others" of contemporary nationalism in an intersectional framework. From the enduring legacies and ongoing violence of settler colonial genocide and transatlantic slavery to the xenophobic disregard for human life during the war in Iraq and the current war on immigrants, we will consider how these novels expose the deeply engrained forms of racism, fear, privilege, and paranoia that subtend dominant discourses of US nationalism in the age of Trump. Over the course of the semester, we will explore the power and allure of this exclusionary nationalism as well as how it is constructed and reproduced through cultural fantasies such as American innocence and exceptionalism, the American dream, and the American frontier. We will pay equally close attention to the ways that the works we read radically unsettle the conceptual borders of geographical space and historical time that regulate who is included and who is excluded from -- to use Benedict Anderson's influential formulation -- the "imagined political community" of the United States. Readings will include *There There* by Tommy Orange, *Signs Preceding the End of the World* by Yuri Herrera, *Homegoing* by Yaa Gyasi, and *The Book of Collateral Damage* by Sinan Antoon.

Requirements/Evaluation: at least 20 pages of writing; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will do at least 20 pages of writing including three papers, a revision of one paper with editorial changes explained in endnotes, as well as two editorial responses to the work of another student. In addition to two in-class workshops, significant class time will be spent covering strategies for effective and persuasive academic writing. Throughout the semester, students will receive written feedback from the instructor with specific suggestions for revision and improvement.

Difference, Power, and Equity Notes: In course readings, written assignments, and seminar discussions, students will address contemporary debates related to US nationalism and its "others." During the semester students will consider the disturbing normalization of white nationalism as well as the imperatives of thinking about collectivity and self/other relations beyond assimilative understandings of diversity and multiculturalism.

Fall 2019

SEM Section: 01 MW 8:30 am - 9:45 am Anuj Kapoor

ENGL 135 (F) Vengeance

For almost three thousand years revenge has been a central preoccupation of European literature. Revenge is inviting to literary and dramatic treatment partly because of its impulse towards structure: it traces a simple arc of injury and retaliation. A injures B, and B retaliates against A. But retaliation is never easy or equivalent, and there is always a volatile emotive mixture of loss and grievance that stirs up ethical ambiguities that are seldom resolved. Vengeance also fascinates because it is so paradoxical. The avenger, though isolated and vulnerable, can nevertheless achieve heroic grandeur by coming to personify nemesis. And yet the hero is always contaminated by trying to make a right out of two wrongs--and he usually has to die for it. Driven by past events, cut off from the present, and wrapped up in stratagems for future reprisals, the avenger's actions are almost always compromised by impotence or excess. At best, revenge is "a kind of Wilde Justice"--a justice that kills its heroes as well as its villains. We will look at as many stories of vengeance, across as wide a range of cultures and media, as possible. Readings will include Sophocles' *Electra*, Dante's *Inferno*, Shakespeare's *Hamlet* and *The Tempest*, Chaldeon de Laclos' *Dangerous Liaisons*, and Vonnegut's *Slaughterhouse Five*, as well as several short stories and films.

Requirements/Evaluation: two 5-page essays; one 10-page essay; several short response essays; 10% of grade is on participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

ENGL 136 (S) Slavery and the Making of a Literary Tradition

Cross-listings: AFR 136 ENGL 136

Primary Cross-listing

How has the subject and iconography of slavery continued to preoccupy the American literary and cultural imagination? In this course, we will examine the transatlantic circulation of ideas regarding race, nation, citizenship, self-mastery, agency, and freedom in colonial and antebellum America and consider how these debates have continued to the present. We will read such authors as Phyllis Wheatley, Harriet Jacobs, Harriet Wilson, William Faulkner, Mark Twain, and Toni Morrison. Forms will include poetry, slave narratives, novels, advertisements, broadsides, pamphlets, and other ephemera. We will also view cinematic representations of slavery, such as WGN's *Underground*, the adaptation of Solomon Northrop's *12 Years a Slave*, and Issa Rae's parody "Due North" in *Insecure*.

Requirements/Evaluation: active class participation, four short papers totaling about 20 pages

Prerequisites: first-year students who have not taken or placed out of a 100-level ENGL course

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ENGL 138 (S) What is a Self? Investigations in Literature, Philosophy, and Psychology (WS)

The experience of having a self (or a subjective point of view) informs and colors literally everything we think, see, and feel. And yet what, exactly, is a self? Is it the unchanging essence of who we are as individuals (like what Christians call the soul)? Or is it the historically contingent product of ever-changing cultural and political forces (like the media, gender norms, and ideologies about race, to name just a few)? Or, perhaps, is the belief that we have a self just one big illusion, as the Buddha suggested millennia ago and as modern philosophers and neuroscientists have argued in their own different idioms more recently? In this class, we'll explore the deep mystery of human existence that we call "the self" or "subjectivity," looking at various attempts to capture, represent, and explain it. Our investigations will be wide-ranging, looking at examples from literature, philosophy, religion, and psychology. Works we will study include: Tim O'Brien's *The Things They Carried*, Toni Morrison's *Beloved*, Ta-Nehisi Coates' *Between the World and Me*, Paul Kalanithi's *When Breath Becomes Air*, and theoretical writings on the self by Plato, Descartes, Thoreau, Sartre, and Bruner, among others. Students who genuinely find the experience of the self puzzling and fascinating will get the most out of this class. Bring an open mind about what it is to have a mind in the first place.

Requirements/Evaluation: four analytical papers totaling 20 pages; active class participation; participation in other short writing assignments

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Four 5-page essays in multiple drafts. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 139 (S) Living a Feminist Life (DPE) (WS)

Cross-listings: WGSS 139 ENGL 139 COMP 139

Primary Cross-listing

The course invites students to consider the range of ways in which "knowledge" about women's, femme's and non-binary lives has been constructed in text, and how this knowledge determines and impacts the we have and make. The first half of the course is organized around a deep reading of Sara Ahmed's recent theoretical book, *Living a Feminist Life*, while the second half of the course will examine a spectrum of women's life writing-poetry, music, journalism, theory, and memoir-to discover how text continues to shape feminist lives, and how femmes' lived experience in turn shapes feminist discourse. Course materials for the second half of the semester will be generated in part through discussion and students' suggestions. Key texts will include Jamaica Kincaid's *A Small Place*, Audre Lorde's *Sister Outsider*, Djamila Boupacha's memoir, Ana Lily Amirpour's film *A Girl Walks Home Alone at Night*, Sara Ahmed's *Living a Feminist Life*, Valerie Solanas's *SCUM Manifesto*, and bell hooks's *Teaching to Transgress*. In their writing for this course, students will consider how their own intimate relationships-with parents, partners, children, neighbors, or friends-can become sites of feminist activism, and sources of strength and knowledge to be carried into the broader world of public engagement and intervention. In the final weeks of the course, we will collectively interrogate the (false) boundary between writing and living as modes of feminist praxis.

Requirements/Evaluation: five short written assignments and one final research project

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 139 (D1) ENGL 139 (D1) COMP 139 (D1)

Writing Skills Notes: This course will center writing and research skills with at least one session per week devoted to ladder development and

revision. Five short papers (3-4 pages) with one revision (5-6 pages) as well as a bibliography and final research paper (12-15 pages).

Difference, Power, and Equity Notes: This course will examine the generative intersectional site of feminism, antiracism, and anticapitalism to provide an alternative introduction to feminist thought, writing, and practice. The syllabus centers women and femme writers of color.

ENGL 140 (F)(S) Introduction to Creative Writing

The controlling conceit of this class is that the different genres of creative writing are cross-fertilizing, even if you imagine yourself to have a strong proclivity toward one. Though much of our energy will go into producing new work--poetry, fiction, and creative nonfiction--we will also look at published work through a combination of approaches: seminar style discussions, as well as mini-lectures and craft essays that will guide your writing in each genre. The instructor will be the primary respondent to your work, although you will also become comfortable reading and critiquing one another. There will be at least one workshop-format class per genre. This course does not fulfill the writing skills requirement, because of its emphasis on creative rather than analytical writing, and because I don't require revisions. Nevertheless, you will be writing a lot, ten to fifteen pages in each genre, as well as peer responses.

Requirements/Evaluation: though students will be required to produce at least 30 mixed-genre pages, this is not a WS class, because of its emphasis on creative rather than critical writing

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students who have not taken a creative writing course; students who received an AP 5 in Literature are eligible

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

ENGL 142 (S) Idleness

What happens when nothing is happening? Is inactivity the mark of sinful sloth, the mind's freedom to reflect in tranquility, or an act of political resistance? In this course, we will survey the long history of idleness as represented in literary texts, philosophical writing, and other cultural documents like Reconstruction-era vagrancy laws and op-eds about automation and the future of work. We will be interested in the many things that not working has been made to mean, especially as the bearer of human identity and privileges of class, race, and/or gender. Who gets to draw the line between leisure and laziness, and why? We will pursue these questions by reading authors such as Homer, Hesiod, Horace, Augustine, Petrarch, Langland, Marvell, Eliot, Melville, Dickinson, Wilde, Weber, Woolf, McKay, Adorno, Foucault, and Kincaid.

Requirements/Evaluation: four five-page papers, one in-class presentation, thoughtful participation in class discussions

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

ENGL 146 (S) Campus Life: The University and the Novel

What is college for? To a significant number of writers from roughly 1945 onward, one answer seemed to be: college is the perfect setting for a novel! The Campus Novel, as it is known, mines the rich, frequently zany dramatic terrain that emerges when large groups of young people try to live and learn together in a closed environment. Filled with the absurdities of academic and collegiate life, the scholarly and sexual intrigues of the college campus, Campus Novels also are microsociologies of college: not just reflections *of*, but reflections *upon*, the institutional contexts of the American university. This course will introduce students to the Campus Novel (and its cousin, the Campus Movie), as a way to explore the history and meaning of liberal arts education in the American University from roughly the post-World War II emergence of mass higher education through co-education, multiculturalism, and the rise of the corporate university. Fictional lab reports upon experiments in living, works dedicated to figuring out what and whom a liberal arts education is for, these novels will be our own guides to an exploration of these questions. Likely texts: Amis, *Lucky Jim*, McCarthy, *The Groves of Academe*, Delillo, *White Noise*, Donna Tartt, *The Secret History*, Zadie Smith, *On Beauty*, Dave Eggers, *The Circle*, and films such as *Breaking Away*, *School Daze*, and *The Social Network*.

Requirements/Evaluation: four to five essays, totaling approximately 20 pages, regular and substantial contributions to our collective inquiry in the seminar room

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

ENGL 149 (F) First-Hand America

Cross-listings: AMST 149 ENGL 149

Secondary Cross-listing

Gonzo journalism, the nonfiction novel, literary journalism, the "new new journalism": the study of American culture has thrived in the able hands of writers, reformers and amateur anthropologists. This course is an introduction to American writing and culture through the eyes of extraordinary witnesses who work as public intellectuals, addressing a readership that reaches beyond the university. Through essays, films and music we will track the documentary impulse from coast to coast: from Ferguson, Baltimore, Miami, Watts, Denver, Harlem, Chicago, Compton and Sing-Sing prison to the wilds of Alaska and rural Georgia; from mass demonstrations to the most intimate, bedside revelations. How have writers and artists given their audiences tools for understanding power, privilege, and difference in America?

Class Format: seminar

Requirements/Evaluation: multiple short essays and revisions, peer-editing and class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course

ENGL 150 (F) Expository Writing

Writing clearly is the most important skill you can learn in college. Do you suffer from writer's block? Do you receive consistent criticism of your writing without also learning strategies for how to improve? This course is for students who want to learn how to write a well-argued, intelligible essay based on close, critical analysis of texts. We will derive our method for mastering the complex art of writing from Atul Gawande's bestselling book, *The*

Checklist Manifesto. In addition to sharpening your skills in reading, note-taking and literary analysis, this class will give you tools for generating drafts, peer editing, revising, and polishing your writing. The majority of the readings for this course will be literary essays, mostly contemporary, mostly American. (This course and English 152 focus more directly on basic expository writing skills than the other 100-level classes in the English department.)

Requirements/Evaluation: five papers totaling at least 20 pages; evaluation partly based on improvement and effort

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-year students, especially students with demonstrated need for help with analytical writing

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Fall 2019

SEM Section: 01 Cancelled

ENGL 150 (S) Expository Writing

This course is designed to improve your essay-writing skills. We will try to figure out how to write effective college essays in an assortment of disciplines, and get away from the one-size-fits-all template you remember from high school. We will learn how to write introductions that grab you, exposition that thrills you, climaxes that fill you with suspense, and conclusions that feel both surprising and inevitable. We will also read short stories in this class, both as source material for analysis and interpretation, and for story-telling techniques that we can steal. There will be weekly writing assignments, leading up to a twelve- to twenty-page final project.

Requirements/Evaluation: four of five papers totaling at least 20 pages; evaluation partly based on improvement and effort

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-year students, especially students with demonstrated need for help with analytical writing

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 151 (S) Reading and Writing Science Fiction (WS)

This course will explore some of the themes and techniques of modern science fiction by examining a range of published stories, while at the same time making some new stories of our own. Writers of fiction and non-fiction often watch each other with suspicion, as if from opposing sides of an obvious frontier. Though the goals of both forms of writing--the disciplined articulation of brainy thoughts and mighty feelings--are similar, there is a tendency in both camps to think their methods different and exclusive. The conceit of this class is to imagine that constructing a plot and constructing an argument, say, are complementary skills, and that the tricks and techniques of one type of writing can profitably be applied to the other. With this in mind, the class is made of two strands twisted together--a creative writing workshop and a course in critical analysis. There will be short weekly assignments in both types of writing, as well as two larger projects: an original science fiction short story and an interpretive/analytical essay. Assigned readings will include stories and essays by Terry Bisson, Octavia Butler, Samuel R. Delany, Karen Joy Fowler, Carol Emshwiller, and John Crowley, among many others.

Class Format: discussion

Requirements/Evaluation: active participation in class and about thirty pages of writing, both critical and creative; two 12- to 20-page writing assignments (short story and analytical/interpretive essay), with revisions; half-dozen shorter writing assignments, plus written responses

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course will require two long writing assignments, twelve to twenty pages, one critical and one creative, each of which will go through an extensive revision process. In addition, I will assign a half-dozen shorter assignments of both types (critical and creative) and single-page critical responses to all workshopped assignments, for a total of thirty or so pages of required writing. A crucial component of the course will be its attention to writing style, strategy, and organization.

Spring 2020

SEM Section: 01 TF 2:35 pm - 3:50 pm Paul C. Park

ENGL 152 (S) Direct Action & Other Political Acts in Black Cultural Texts (DPE) (WS)

This is an expository writing course meant to aid students in developing stronger college essay writing skills. This will be accomplished through engagement with the central theme of black direct action described in political, cultural, and artistic texts of the last two centuries. The course will train students to write strong thesis statements, develop close reading skills, sharpen keyword usage, and create empathetic writing relationships. This course also takes black direct action as its organizing principle by asking students to consider how we become agents in both our writing and our lives. Forms of cultural production to be examined in this course include slave narratives, memoir, speeches and open letters, zines, poetry, op-eds, short stories, novels, film and television, visual art, and criticism.

Requirements/Evaluation: daily writing (Monday-Friday), three original essays (4-5 pages) and two extensively revised essays (4-5 pages), final portfolio, consistent engagement during class sessions

Prerequisites: permission of English department Administrative Assistant Pat Malanga

Enrollment Limit: 12

Enrollment Preferences: first-years and sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: while this class is organized around a theme (black direct action), it is strictly meant for students who are trying to improve their essay writing skills; those who do not need assistance with writing should not enroll in this course

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Daily writing every Mon/Tu/Wed/Th for 15 min per day; Fri written reflections on the daily writing including a self-assessment of patterns, strengths, and weaknesses that week; 3 original essays (4-5 pages); 2 extensively revised essays (4-5 pages) including a letter describing revision choices; submission of a final portfolio of 2 of the 5 essays including a letter describing student's growth. Timely feedback on writing skills from instructor with suggestions for improvement.

Difference, Power, and Equity Notes: This class explores the self-determined actions of black individuals, communities, and movements in the United States confronting and dismantling white supremacist power relations. Histories of racial violence, trauma, and subjugation are examined from the point of view of black intervention with special attention to the intersections of strategy, tactic, and literary genre in imagining, achieving, or re-committing to the work of freedom, from slavery to the present.

Not offered current academic year

ENGL 153 (S) Androids, Cyborgs, Selves (WS)

Cross-listings: STS 153 ENGL 153

Primary Cross-listing

In this expository writing course, we will analyze and argue about how near-human and partly human bodies appear in fiction and film. When do these bodies improve the spaces in which they appear? When do they threaten them? How are they gendered, how are they raced, and why? What do they desire? Authors in different cultural and technological contexts have imagined not-quite-human selves for different ends and in different ways.

Together we will develop our ideas on these topics in clear, strong prose. We will also ask how artists have cast human identities into foreign materials and media, and study the distortions and revelations that result. During museum visits at WCMA, students will use examples of self-portraiture, electrified bodies, and aspirational bodies to explore the representation, imitation, and abstraction of selves. Because this is an expository writing seminar, we will spend half or more of our class time discussing and practicing writing skills.

Requirements/Evaluation: five response papers (500 words); four essays (1200-1500 words, each in two drafts); class participation

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 153 (D1) ENGL 153 (D1)

Writing Skills Notes: This expository writing course is dedicated to facilitating real improvement in students' written work. Students write five response papers and four five-page essays (in two drafts) over the course of the semester, receiving substantial instructor feedback on all. Students will practice: drafting, revising, and responding to critique; writing appropriately for given occasions and audiences; grounding their writing in close, analytical reading; and acknowledging sources.

Spring 2020

SEM Section: 01 TR 8:30 am - 9:45 am Ezra D. Feldman

ENGL 154 (F) Imagination and Authority

A course on the subject of who gets to write about what when it comes to fiction. Among the questions we'll be taking up: What are the outer boundaries of those imaginative acts that should be attempted? The central goal of this course is to teach you how to write a well-argued and interesting analytical paper. We will spend most of our class time actively engaged in a variety of techniques to improve your critical reasoning and analytical skills, both written and oral. Though the skills you learn will be applicable to other disciplines, this is also a literature class, designed as well to prepare you for upper level courses in the English Department.

Requirements/Evaluation: four to five papers totaling at least 20 pages; revisions, student teaching, written and oral comments, final portfolio

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first year students, especially students with demonstrated need for help with analytical writing

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ENGL 155 Reading the *Inferno* (WS)

This is an expository writing course, but also a journey through hell—more precisely, through Dante's *Inferno*. Over the course of the semester, as we wind our way through the underworld, we will consider the circumstances of the damned, their guilt, their punishments, and the overall aims of Dante's extraordinary vision. How and why are the condemned sentenced to an eternal afterlife in this underground kingdom of cruelty? What are we to make of the poem's humor and malevolence, and how are we to understand its vast architecture? In writing about the fate of these sins and sinners we will focus on techniques to improve your critical reasoning and analytical skills with the goal of writing interesting and well-argued essays.

Requirements/Evaluation: four to five papers totaling at least 20 pages, revisions and other short writing assignments, class participation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-year students, especially students with demonstrated need for help with analytical writing

Expected Class Size: 12

Grading:

Distributions: (D1) (WS)

Writing Skills Notes: Four 5-page essays in multiple drafts; other short writing assignments. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Not offered current academic year

ENGL 157 (F) Reading the 'Inferno' (WS)

This is an expository writing course, but also a journey through hell---more precisely, through Dante's Inferno. Over the course of the semester, as we wind our way through the underworld, we will consider the circumstances of the damned, their guilt, their punishments, and the overall aims of Dante's extraordinary vision. How and why are the condemned sentenced to an eternal afterlife in this underground kingdom of cruelty? What are we to make of the poem's humor and malevolence, and how are we to understand its vast architecture? In writing about the fate of these sins and sinners we will focus on techniques to improve your critical reasoning and analytical skills with the goal of writing interesting and well-argued essays. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Requirements/Evaluation: four short 3-page essays and one 6- to 8-page essay

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The class is primarily design as a writing course. I plan on assigning series of three-page essays, one every other week, as we work our way through Dante's Inferno at the rate of three or four cantos per week. These shorter essays will be graded with comments, and either be peer reviewed, or short passages will be selected for class discussion and revision. This should provide sustained and structured feedback to the students. A final extended essay of six to eight pages will required.

ENGL 161 (F) Metafiction

Cross-listings: COMP 161 ENGL 161 COMP 139 ENGL 139

Primary Cross-listing

This course will examine ways in which literary works reflect on their status as texts. We'll look at the formal pleasures and puzzles generated by techniques including frame narratives, recursion, and self-reference, in novels, films, and stories by Vladimir Nabokov, Franz Kafka, Kelly Link, Michel Gondry, Paul Park, and others. Ultimately, we will use the study of metafiction to focus a larger inquiry into the socializing force of language and self-consciousness in human development. Note that students will be required to use, as well as interpret, metafictional techniques in much of their assigned writing.

Class Format: discussion

Requirements/Evaluation: several short exercises; four or five papers of increasingly complexity, totaling 24 pages; consistent attendance and participation; a genuine love of reading, and a willingness to reread

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 161 (D1) ENGL 161 (D1) COMP 139 (D1) ENGL 139 (D1)

Not offered current academic year

ENGL 162 (F) Robots, Puppets, and Dolls (WS)

Is Pinocchio alive? How about the Terminator, or the operating system in *Her*? This course explores our persistent interest in human simulacra (robots, puppets, dolls; but also automata and cyborgs) and what they suggest about human identity, independence, and free will. We'll look at a wide range of simulacra as they appear in literature, film, and, increasingly, in the actual world ("reborn" dolls, therapy robots). We will frame our explorations with readings in artificial intelligence, neurology, and psychoanalysis (Freud on the uncanny; Winnicott on transitional objects).

Throughout, we will wonder: why this fascination with the almost living? How is it that we often care more for Wall-E or the Velveteen Rabbit than we do for many real people?

Requirements/Evaluation: students write five essays over the course of the term, in addition to a number of ungraded but required exercises

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The course requires frequent and serious written work: six exercises, and five essays of between 750 and 1500 words, over the course of the semester. All the essays receive letter grades. All of the essays receive written comments addressed to their design and execution.

ENGL 201 (F) Shakespeare

We've come to expect that the heroes of Shakespeare's plays learn something. Misguided lovers are meant to be enlightened, and tragic heroes are supposed to achieve some kind of clarifying self-knowledge as a reward for their suffering. Supposedly, once the heroes' flaws are revealed and their delusions are exposed, they come to understand what has happened to them and why. Or so we'd like to think. But the plays don't always cooperate with our desire for a compensating enlightenment. We don't always come away with a clear sense that Shakespeare's heroes have arrived at true self-recognition; nor are we granted an obvious, edifying moral to compensate for the drama we've witnessed. What, then, should we look for at the end of a Shakespeare play? The plays we will read include *As You Like It*, *Henry IV, Part 1*, *Hamlet*, *Measure for Measure*, *King Lear*, *Antony and Cleopatra*, and *The Tempest*.

Requirements/Evaluation: two 5-page papers, one 10-page paper, occasional short analytical exercises, class participation

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: English majors and prospective English majors

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

ENGL 204 (S) Hollywood Film

Cross-listings: COMP 221 ENGL 204

Primary Cross-listing

For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres--including action films, horror films, thrillers and romantic comedies--and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including *Psycho*, *Casablanca*, *The Godfather*, *Schindler's List*, *Bridesmaids*, *Groundhog Day*, *12 Years a Slave* and *Get out*. In addition to the assigned reading, students will be required to attend free screenings of course films on Sunday evenings at Images Cinema.

Requirements/Evaluation: attendance at Sunday evening screenings; two 2-page essays, two editing exercises, a midterm, and a final exam

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 60

Enrollment Preferences: English majors

Expected Class Size: 60

ENGL 205 (F) The Art of Poetry: The History and Theory of Lyric (WS)

"If I read a book and it makes my whole body so cold no fire can ever warm me I know that is poetry. If I feel physically as if the top of my head were taken off, I know that is poetry. These are the only way I know it. Is there any other way?" This excerpt from a letter by Emily Dickinson indicates both the particular pleasures of reading poetry, and also the persistent difficulty of defining poetry as a genre. In this course, we will train our focus on lyric poetry in particular, tracing its long history as well as trends in the theory of lyric. We'll begin by uncovering the roots of lyric in antiquity before shifting our focus to the development of lyric in English. We'll read closely the work of such poets as Wyatt, Donne, Wordsworth, Keats, Hopkins, and Dickinson before turning to questions of lyric in the 20th and 21st centuries. Along the way, we'll examine the trends in criticism responsible for the conflation of lyric and poetry in our time, and will get a strong sense of the current state of lyric theory.

Requirements/Evaluation: frequent short writing assignments totaling 20+ pages, thoughtful participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Frequent informal writing assignments and two formal papers: one (5-7 pages) due at the midterm, and one final paper (10-12 pages), in preparation for which students will submit a proposal and meet with the professor as their research develops. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 206 (F) We Aren't The World: "Global" Anglophone Literature and the Politics of Literary Language (DPE) (WS)

An eighteenth-century diplomat once referred to the British colonies as a "vast empire on which the sun never set," and at the time, he was right: the British controlled an enormous portion of the globe for nearly three centuries, from the Caribbean to South Asia, from Oceania to Africa. One outcome of this vast empire was the creation of a rich and diverse literary tradition in the English language--now called Anglophone literature--from far-flung places around the globe. This course will introduce students to select works of global Anglophone literature in the twentieth century, and consider the ways in which writers from around the world have used a variety of literary forms, such as the bildungsroman, national allegory, and testimony, to participate in and reshape conversations about culture, globalization, aesthetics, and politics. Readings will include novels, poetry, short stories, and film by writers including Kipling, Kincaid, Achebe, Rushdie, Conrad, Coetzee, and Roy, among others. The course will expose students to a variety of global English idioms, as well as literary traditions from, or in conversation with, non-Western countries.

Requirements/Evaluation: four short papers (5 pages), a presentation, and a final research project

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: potential English majors and those who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will write daily in class, submit four short (5-page) and one longer paper (10-page), as well as reading questions before each class. At least one class session per week will center writing skills and revision.

Difference, Power, and Equity Notes: This course will introduce students to the colonial legacies of literary language politics. Authors represent a range of literary traditions from West Africa to the Caribbean to South and South East Asia and beyond. Class discussion will also focus on issues of gender, race, and class in imperial history and neoimperialism.

ENGL 210 (S) American Modernism

Cross-listings: AMST 210 ENGL 210

Primary Cross-listing

"Modernism" in literature refers to texts from the second half of the nineteenth through the first half of the twentieth century. These works are typically at once self-referential and extra-referential; books acutely aware of their own status as language nevertheless aspire to describe, or even save, the world beyond words. Insofar as modernism posits an aestheticism that can seem redemptive, a concern of the course will be the relation of modernism to modernity: the new world that needs saving. The American version of modernism will have the additional challenge of producing out of the difficulties of self-conscious fiction a redemption that suits a democracy--and a multiply divided democracy at that. Writers of the course will include DuBois, Larsen, Hemingway, Faulkner, Stein, Toomer, Hurston, Williams and Agee.

Requirements/Evaluation: two short papers, one longer (10 pp.) final paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: sophomores

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

ENGL 211 (S) English Literature from 1000 to1600

One of the oldest surviving works in English, *Beowulf* tells the story of a monster and his mom. In this class we will read key texts from the medieval and early modern periods, starting with *Beowulf* and ending with Shakespeare's equally bloody *Titus Andronicus*. Other readings will include selections from *The Canterbury Tales*, *Sir Gawain and the Green Knight*, sonnets by Sidney and Donne, and Marlowe's *The Jew of Malta*. We will discuss the conflicting, often self-contradictory claims that writers in these periods made for the importance of literature and the anxieties that these new types of fiction generate--about sex, about God, about money. We will ask what it meant to read--and misread--before books were commonplace.

Requirements/Evaluation: two papers (5-7 pages), midterm, final

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors

Expected Class Size: 15

ENGL 212 (S) Milton Through the Romantics

Taking advantage of a relatively quick movement through many representative texts, this survey course will follow the development of English literature and culture from around 1660 to 1830. We'll focus on Making Connections and Telling the Story; we'll look at poetry, prose, magazines, paintings, buildings and some other objects. We will watch things happen like the invention of the individual, and gender, and democracy, and other important features of our world. Authors to be studied may include Donne, Milton, Pope, Defoe, Wordsworth, Byron, Shelley and Keats.

Requirements/Evaluation: class attendance and participation, weekly short writing assignments, two 6-7 page papers, and a final 24-hour exam

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ENGL Literary Histories A

Not offered current academic year

ENGL 213 (S) Making Radio

This course has two aims. The first is to teach the necessary skills (including interview technique, field recording, editing, and scoring) to make broadcast-worthy audio nonfiction. The second is to use this process to investigate fundamental aspects of narrative. How does a story build a contract with listeners? What's the role of the narrator? How can one appropriately speak for (and sometimes against) another person? This is not a course in journalism, but rather an experiment in documentary cinema for the ear. We'll do some reading in radio history and technique, and will listen to exemplary works (including episodes of *This American Life*, *RadioLab*, *Love & Radio*, and *Serial*), but most of our time--and this is a time-consuming course--will be spent making and critiquing each other's pieces. Students will produce five or six pieces total, at least two of which must develop out of interviews with strangers.

Requirements/Evaluation: five short audio pieces; attendance and active participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores; English majors; students with radio or studio art training

Not offered current academic year

ENGL 214 (S) Writing for Stage and Screen

Cross-listings: ENGL 214 THEA 214

Secondary Cross-listing

This studio/workshop course is designed for students interested in a semester-long immersion in the practice of dramatic writing for theater, film, television and audio. Students should expect to write most days. Our focus will be on the fundamentals of story, and the cultivation of each writer's individual voice. In addition to reading existing dramatic texts of various genres and forms, and completing weekly prompts and exercises exploring

character, dialogue, structure, theme, conflict and world building, students will work toward a longer final project. Students will present their own work regularly, and respond to each other's work. The course will culminate in a staged reading of excerpts for the campus community.

Requirements/Evaluation: a daily journal; weekly writing exercises; peer responses; a ten-minute piece; a final 20-30 minute piece; attendance and class participation

Prerequisites: students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors; Comparative Literature majors

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

ENGL 216 (S) Introduction to the Novel

There was a time when novels as we understand them didn't exist; then there was a time--centuries--when novels were overwhelmingly the dominant storytelling and literary mode in English. This lecture course will follow the cultural arc of the novel from its beginnings through the later 20th century, when novels competed for cultural space with new storytelling modes. Along the way we will think about what stories are for, generally; why this kind of long-form storytelling was invented; and what cultural work novels do and have done. Possible writers to be studied include Defoe, Austen, Bronte, Dickens, James, Joyce, Nabokov, and Morrison.

Requirements/Evaluation: midterm and final exams, one critical essay, and some short writing assignments

Prerequisites: none

Enrollment Limit: 80

Enrollment Preferences: students who have pre-registered for the course; thereafter, seniors, then juniors, sophomores, and first-years

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

ENGL 218 (S) Gender and Sexuality in the Neo-slave Narrative (DPE) (WS)

Cross-listings: WGSS 218 AFR 218 ENGL 218 AMST 218

Primary Cross-listing

Hortense Spillers has noted that ex-slave Harriet Jacobs, "between the lines of her narrative, demarcates a sexuality that is neuterbound" and we live with the aftermath of her observation. "Ungendering," one of the transformations undergone by bodies subjected to the Middle Passage, is one of the keywords that forms the foundation for a conversation about slavery, blackness, gender, sexuality, and archive. Throughout this course we will wrestle with the questions: How does the designation "slave" rupture, reify, or expand our understandings of sexuality and gender? What conditions have necessitated the neo-slave narrative form? Texts include: slave narratives and neo-slave narratives in the forms of novels, visual art, and film. Course texts include: Octavia E. Butler's *Kindred*, Jewelle Gomez's *Gilda Stories*, Glenn Ligon's "Runaways", and Jordan Peele's *Get Out*. Critical theories of blackness, gender, and sexuality are also central texts in this course including that by Darieck Scott, Saidiya Hartman, Hortense Spillers, Matt

Richardson, and others. Given that neo-slave narratives intervene in the sexual and gendered silences of slave narratives and the power relations that produced them, students who are hesitant to study sexual violence might consider taking another course.

Requirements/Evaluation: mandatory participation in discussion, four papers including one critical revision (total 20 pages), keyword glossary

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores

Expected Class Size: 19

ENGL 221 (F) A Science Fiction and Fantasy-Writing Seminar

As you might have guessed, this is a creative-writing workshop, specializing in Fantasy and Science Fiction. We are going to write a lot, and not really read so much, though from time to time we might look at the odd piece of professional work, by way of example or inspiration, or as a source for stolen goods. Mostly, though, we will be discussing (anonymously, except for the final projects) our own stuff---- original stories or sketches for stories, or

various plot, character, or setting exercises. We'll write maybe five or six stories, which is a fair amount of work, although to save time I'm hoping we can keep any analysis or interpretation to a strict minimum.

Requirements/Evaluation: passing the course will require finishing and revising at least one 12- to 20-page story, as well as numerous shorter assignments and sketches

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: discretion of the instructor

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Attributes: ENGL Creative Writing Courses

Not offered current academic year

ENGL 222 (S) Lyric Poetry (WS)

The goal of this writing-skills gateway course is to advance our abilities as rigorous, subtle, and imaginative interpreters of poetry. Our focus will be on lyrics--relatively short poems in which a single speaker describes (often in intense language) his or her emotions, attitudes, or state of mind. Our readings will be drawn from a range of historical periods from the seventeenth century forward, with particular emphasis on poems written since the mid-nineteenth century. Among the poets likely to be studied are: Jonson, Gray, Wordsworth, Coleridge, Keats, Dickinson, Hardy, Owen, Yeats, Auden, Frost, and Heaney. We will also discuss works by two poets at Williams: Lawrence Raab and Jessica Fisher.

Requirements/Evaluation: active participation in seminar discussions, and four or five papers (about 20 pages total)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores and first-year students who have not yet taken an ENGL Gateway course

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: There will be 4-5 papers assigned, ranging in length from 4-6 pages, spaced evenly throughout the term. Total writing will be 20 pages or more. Detailed feedback will be provided on each paper. There will be opportunities for revisions, and for conferences before and after each paper.

ENGL 224 (F) American Drama: Hidden Knowledge

Cross-listings: AMST 275 COMP 275 ENGL 224 THEA 275

Secondary Cross-listing

The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (*The Adventures of Pinocchio*, Machiavelli's *The Prince*, Thomas Carlson's *Lying and Deception: Theory and Practice*, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from *American* drama about a national relationship to honesty and its opposites.

Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutorial partner

ENGL 225 Introduction to Asian American Literature: Fiction and Memoir (WS)

This Gateway is for students who want an opportunity to explore some of the wonderful fiction and creative nonfiction written by Asian American writers over the past hundred years. Likely readings include: Carlos Bulosan's *America is in the Heart* (1946); John Okada's *No-No Boy* (1957); Maxine Hong Kingston's *Woman Warrior* (1976); Chang-rae Lee's *Native Speaker* (1995); Jhumpa Lahiri's *Interpreter of Maladies* (1999); Lê thi diêm thúy's *The Gangster We are All Looking For* (2003); Ruth Ozeki's *A Tale for the Time Being* (2013); and Celeste Ng's *Everything I Never Told You* (2014). As we read, we will attend to the various ways in which the often difficult, and sometimes traumatic, historical experiences of Asian Americans have informed their acts of literary invention. And in order to better understand the broader, ever shifting, social contexts in and against which these literary works were created, we will supplement our primary readings with texts that discuss the experiences of Asian Americans from a historical and sociological perspective.

Requirements/Evaluation: four papers totaling about 20 pages; engaged participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

ENGL 226 (S) The Irish Literary Revival

This course will focus on the Irish Literary Revival of c.1885-1920, during which Irish literature in the English language became firmly established as a canon clearly separate from the English tradition, and writers such as W.B. Yeats and James Joyce achieved international renown. Readings will include drama, poetry, fiction and non-fiction prose by Yeats, J.M. Synge, Joyce, George Moore, George Bernard Shaw, Lady Gregory, Douglas Hyde, Sean O'Casey and others. We will foreground key fault-lines of the period: competing visions of what constituted "authentic" Irish identity; debate over the propriety of writing in English, drawing on British literary traditions, or seeking a non-Irish audience; the work of "self-exiles" such as Shaw and Joyce, versus that of writers who stayed in Ireland; and the long-entrenched political tensions between Catholics and Protestants, and Unionists and Nationalists. Throughout, we will consider the functions and efficacy of literature in promoting cultural or political change. The course will conclude by considering the extraordinary vitality of post-independence and contemporary Irish literary culture, with readings of work by Seamus Heaney, Colm Toibín, Anne Enright and Martin McDonagh, and discussion of recent Irish film. Key considerations here will be the ways traditional notions of Irish Nationalism and national identity have been revised or abandoned under the impact of independence, economic prosperity and globalization, contemporary sexual politics and other forms of change.

Requirements/Evaluation: four 4+ page papers, and several shorter writings assignments; class participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: English majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ENGL 227 (F) Elegies

This tutorial--intended primarily for sophomores--explores elegies as a literary genre. In their most familiar form, elegies honor and memorialize the dead. More broadly conceived, the genre includes works lamenting other kinds of loss as well: the loss of a lover, place, country, or cherished version of one's past. We'll consider the special challenges and opportunities of the elegiac voice: how it manages to give public expression to private grief; negotiates problems of tone and perspective; worries about and celebrates the capacity of language to generate hope and consolation; and seeks a kind of solace in the literary effort to evoke, preserve, or rewrite a lost life or an absent past. This course focuses primarily on poetry, English and American, across a broad historical range. We'll first read poems from 1600-1900--including works by Jonson, Milton, Donne, Dryden, Gray, Shelley, Tennyson, and Whitman, and then turn to some of the twentieth-century's great poetic elegists--Owen, Yeats, Auden, Lowell, and Heaney. Finally, we'll consider how the elegiac voice works in fiction, especially in stories by Joyce ("The Dead") and Nabokov ("Spring in Fialta").

Class Format: weekly meetings with instructor, 60-75 minutes

Requirements/Evaluation: active participation in tutorial meetings, students will write a 5- to 6-page paper every other week (five in all), and comment on their partners' papers in alternate weeks

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10

Enrollment Preferences: sophomores; not open to first-year students

ENGL 228 (S) The Renaissance in England and the European Continent: Self and World (DPE) (WS)

Cross-listings: COMP 230 ENGL 228

Primary Cross-listing

At the same time as the individual human being in possession of a distinctive personality was taking on enormous importance in politics, philosophy, literature, and the visual arts, early modern Europeans were encountering unprecedented levels of cultural diversity. In this interdisciplinary course, we will consider these two developments both separately and together. As Renaissance humanists were acquiring a sophisticated understanding of the distance between the present and various European pasts (the recent medieval past and the remote history of antiquity), they were also coming into contact with non-European cultures in Africa, the Americas, and Asia via trade and economic development, imperial expansion, and religious conversion. Always at stake in these encounters was the question of who counted as an individual; the self was not considered to be intrinsic to human nature but rather the product of historical and cultural developments. Themes will include religious pluralism, the sacred and the secular, vernacularity, exploration and empire, the relationship between mind and body, slavery, trade, wealth, gender, self-fashioning, and style. We will consider such English writers as the Pearl poet, More, Marlowe, Spenser, Shakespeare, Browne, and Milton; such continental intellectuals as Descartes, Erasmus, Las Casas, and Castiglione; and such continental artists as Michelangelo, Velázquez, Bruegel, and Rembrandt.

Requirements/Evaluation: five 4-page papers, in-class presentation, thoughtful participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 230 (D1) ENGL 228 (D1)

Writing Skills Notes: The course asks students to write five four-page papers and offers exposure to a range of humanistic modes, from close reading to visual analysis to the exposition of philosophical claims. One paper will involve independent research. The instructor will provide frequent and extensive written feedback on student work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course examines the role of historical and cultural difference within and beyond Europe at the very beginning of globalization. Students will become acquainted with the origins of colonialism and the global traffic in slaves, as well as with the complex role of writers and intellectuals in questioning, defending, and imagining these practices. We will consider the epistemological challenges of accessing the testimony of subordinated persons.

ENGL 229 (S) Contemporary American Fiction

Cross-listings: ENGL 229 AMST 230

Primary Cross-listing

In this course we will read and analyze a selection of fiction written between 1945 and the present, with an emphasis on proving (in the sense of testing) the three terms in the course title. Could John Cheever's "The Enormous Radio" really be contemporary? Is James Baldwin's *Giovanni's Room* American in the same way as Alice Munro's *Dear Life*? And is Michelle Tea's *Black Wave* fiction or something else? Along the way, we'll also ask: What forms and themes define contemporary American fiction? And why should we invest in defining the "contemporary" period at all? Other authors we will study may include: Raymond Carver, Thomas Pynchon, Toni Morrison, Renata Adler, Margaret Atwood, Lydia Davis, Chang Rae Lee, Jennifer Egan, and Colson Whitehead.

Requirements/Evaluation: four papers totaling about 20 pages; participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

ENGL 230 (F) Introduction to Literary Theory (WS)

Cross-listings: ENGL 230 COMP 240

Primary Cross-listing

This course introduces students to some of the most significant and compelling trends in modern criticism—such as gender and postcolonial theory, deconstruction, sociological analysis, and psychoanalytic criticism—in an applied, hands-on way. The course will engage a range of primary texts from Shakespeare to Hitchcock by way of varied theoretical approaches. Can *Othello*, for instance, be read as a feminist text? A site of class struggle? A staging of the relationship between language and the unconscious? The course aims both to make familiar some of the critical methods students are likely to encounter in the field of literary studies these days, and to show how such methods can transform our understanding of a text, opening

surprising possibilities even in familiar works. In the process, the course will also raise broader questions about the imperatives and usefulness of literary theory in relation to texts and worlds.

Class Format: discussion

Requirements/Evaluation: frequent short papers totaling 20 pages

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students, and English majors who have yet to take a Gateway course

Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example--depending on fall or spring semester--Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville's masterpiece *Moby-Dick* aboard Mystic Seaport's historic whaleship, the *Charles W. Morgan*, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students' emerging knowledge of maritime history and marine science.

Class Format: weekly lectures, including coastal and near-shore field trips and ten days at sea

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final paper

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Cross-listings: ENGL 232 LATS 232

Secondary Cross-listing

"Archives have never been neutral they are the creation of human beings, who have politics in their nature. Centering the goals of liberation is at the heart of the issue." --Jarrett Drake, former digital archivist at Mudd Manuscript Library, Princeton University This literature and writing course will examine the concept of archives through the lens of democratic ideals. A primary focus will be on how works of literature engage archives--their creation and deletions, their contents and omissions, their revelations and concealments. We will also look at the lives of archivists like Arturo Alfonso Schomburg. Readings include: "The Library of Babel" by Jorge Luis Borges; Important Artifacts and Personal Property From the Collection of Lenore Doolan and Harold Morris, Including Books, Street Fashion and Jewelry by Leanne Shapton; and All the Names by José Saramago. Drawing from the values explored in class, students will have opportunities to contribute to existing archives and to curate their own.

Requirements/Evaluation: attendance and class participation, short writing exercises, midterm project, final creative project

ENGL 233 (S) Great Big Books (WS)

Cross-listings: COMP 293 ENGL 233

Primary Cross-listing

Some of the greatest novels are really, really long--so long that they are too seldom read and taught. This course takes time to enjoy the special pleasures of novels of epic scope: the opportunity to immerse oneself in a wide and teeming fictional world; to focus sustained attention on the changeable fortunes of characters and societies over a long span of time; to appreciate the detailed grounding of lives in their social environment and historical moment; to experience the leisurely and urgent rhythms, with their elaborate patterning of build-ups and climaxes, that are possible in such works. We will read but two novels, both preoccupied with the disruption and evolution of lives and loves at moments of historic upheaval: *War and Peace* (1869), Leo Tolstoy's epic of the Napoleonic Wars, and *Parade's End* (1924-28), Ford Madox Ford's modernist masterpiece about World War I and its traumatic impact on English social life. Set a century apart, the novels are distinguished by vivid and scrupulous representation of their respective wars, by their shrewd accounts of political and social pressures informing the crises, and by their insight into the struggles of those whose lives are engulfed in global crisis. Tolstoy's and Ford's approaches to fictional representation, however, provide intriguing contrasts: one favors the lucidity of classic realism, the other the challenges of modernist innovation; one deploys a single multiplot novel, the other a tetralogy of shorter novels developing a single plot. We will discuss the differing strategies and effects of these two approaches, as well as the more general difficulties of reading and interpreting long fiction.

Requirements/Evaluation: regular class participation and four 5-page papers, two of them submitted in both a draft and a revision

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

ENGL 234 (S) The Video Essay

While students today are subject to an unprecedented flood of moving images, few have had the chance to think critically about film and video. Fewer still have had the opportunity to think *with* the medium, exploiting the resources of film and video in their efforts to understand how they work on viewers. The Video Essay offers the chance to do that. After being introduced to the fundamentals of film analysis and trained in the use of Adobe Premiere Pro, students will spend the semester alternately making short video essays and commenting on the essays produced by their partners. Please note that this is primarily a course in film analysis: students will not shoot original material. No prior experience is required.

Class Format: we will meet as a group for three weeks, then break into groups of two with whom I will meet weekly; students will alternate between creating video essays on film topics, and writing commentaries on the essays of their partner

Requirements/Evaluation: four written exercises (1-2 pages); four video essays, increasing from two to six minutes; and four written commentaries on one's partner's video essays

Prerequisites: permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores; first-year students; English majors

ENGL 236 (S) Fields of Barley, Streets of Gold: Utopia in Fiction

Each of the gates was a single pearl: And the street of the city was pure gold, As it were transparent glass.

Revelations 21:21

It makes us happy to imagine the future in apocalyptic terms, partly because we love to say I told you so. You didn't listen, and now look. Fort Lee is on fire, and zombies are smashing down your parents' door. Catastrophe satisfies us on many levels; by contrast, the utopian vision provides a more delicate thrill. For a writer, the task is to provide a fiction that will not feel like a moral lesson or the illustration of some theory about how we should behave. This course will consider different utopian stories in turn, moving from Plato's *Republic* through the invented worlds of Thomas More, Margaret Cavendish, Edward Bellamy, and H.G. Wells, and then into the more contemporary science fiction of Kim Stanley Robinson, Ursula LeGuin, John Crowley, and others. Implicit in any kind of alternate reality is its creators' rejection of the place they live, and their corresponding longing for something new, which in all cases is as interesting as the way a story might work as a model for social improvement. In addition to the occasional critical essay, students will invent a personal utopian fiction of about twenty to twenty-five pages, to be read and discussed by the class.

Class Format: seminar

Requirements/Evaluation: various short assignments and one 20-page project

ENGL 237 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237 ARTH 237 SOC 236 AMST 236

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

ENGL 238 (S) Key Topics in Literary Theory: The "Critique of the Subject" (WS)

This course will introduce students to one of the core topics in the field of literary theory: the "critique of the subject." Is the "subject" (i.e. the "self", what we refer to when we use the word "I") coherent, bounded, and autonomous, like what Christians mean when they speak of the soul? Or is the subject, rather, the contingent product of historical and political forces (like the media, gender norms, and beliefs about race, property, and the law)? Is language best thought of as something humans use to express their thoughts to communicate with one another? Or is language, rather, something which shapes and determines the very forms that human subjectivity can take in the first place? Is "the subject" *really* real? Or is our sense of self ultimately just an illusion: an effect of language, power, or history? We will consider all these possibilities, and more. We will begin the course by reading classical accounts of subjectivity by Descartes, Kant, and Husserl, before studying a dizzying array of theoretical "critiques" of this philosophical tradition. Not only will the sheer variety of theories be somewhat dizzying, many of the theories themselves are truly mind-blowing (in the best sense), many of them totally upending our sense of what it means to have a self or to think of ourselves as human in the first place. By the end of the semester, students will be familiar with versions of the "critique of the subject" that are associated with a number of influential theoretical approaches, including: phenomenology, psychoanalysis, Marxism, feminism, deconstruction, New Historicism, postcolonial theory, and queer theory. We will read a few literary texts in tandem with various theories, but students should know that the emphasis throughout will fall squarely on the theoretical texts themselves: in particular, how to understand them, how to write about them, and how to put radically different theories in meaningful conversation with one another.

Requirements/Evaluation: four papers totaling about 20 pages; engaged participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 239 (F) Zen and the Art of American Literature

Cross-listings: AMST 238 COMP 238 REL 228 ENGL 239

Primary Cross-listing

In 1844, the Transcendentalist magazine, *The Dial*, published an excerpt from the *Lotus Sutra*, translated into English by Elizabeth Palmer Peabody. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like *Middle Passage*, *A Tale for the Time Being*, and *Lincoln in the Bardo*. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Requirements/Evaluation: regular attendance, a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 7- to 10-page essay

Prerequisites: any literature course at Williams or permission of the instructor

Enrollment Limit: 45

Enrollment Preferences: students will be asked to submit emails explaining why they want to take this course, which will be used to determine final enrollment; no first-years

ENGL 240 (F) What is a Novel?

Cross-listings: COMP 239 ENGL 240

Primary Cross-listing

What is a novel? Where did it come from? Why would anyone invent such a thing in the first place? This course is an introduction to the ways literary critics have attempted to give a genre as hard-to-pin down as the novel a theoretical framework. For a long time, nobody thought the novel needed a theory--too popular, too loose and baggy to be thought of as one thing. Today, novel theory is legion. To only name a few, one can find theories of the novel that identify themselves as formalist, psychoanalytic, post-structuralist, Marxist, historical, and post-colonial, as well as accounts that emphasize sexuality and gender, for example, or the novel's trans-national development. We will move back and forth from the theory of the novel to its practice in order to see how the novel and its understanding have changed over the past 200 or so years. Novelists will come from the 19th and 20th centuries, likely Austen, Dickens, and Mieville. Theorists are likely to include Henry James, Benjamin, Lukacs, Barthes, Watt, McKeon, Jameson, Eve Sedgwick,

Edward Said, Leo Bersani, and Franco Moretti.

Requirements/Evaluation: four to five papers totaling about 20 pages; regular, substantial, and intensive participation in class

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 241 (S) Introduction to Comparative Literature

Cross-listings: COMP 110 ENGL 241

Secondary Cross-listing

Comparative literature involves reading and analyzing literature drawn from different times, movements, cultures, and media. In this class, we will study English translations of texts from eras spanning the ancient to the contemporary; literary movements including romanticism, realism, and postmodernism; national traditions arising in Western and Eastern Europe, Asia, and Latin America; and media including prose fiction, graphic memoir, and film. Throughout the course, we will consider what it means to think about all these different works as literary texts. To help with this, we will also read selections of literary theory that define literature and its goal in abstract or philosophical terms. Assignments will focus on close, creative reading of relatively short texts by authors like Homer, Sei Shōnagon, Kleist, Lermontov, Zola, Borges, Wilde, Mamet, Bechdel, and others. *All readings will be in English.*

Requirements/Evaluation: attendance, participation, two 5-page papers, a few short responses, midterm exam

ENGL 243 (F) Chemical Intimacies (DPE)

Cross-listings: SCST 233 WGSS 233 STS 233 ARTH 243 ENGL 243

Secondary Cross-listing

This is a research seminar that understands human-chemical entanglement in relationship to environment, sexuality, geography, ecology, and capacity. It doubles as a research class in which students choose a project of chemical intimacy to investigate as their own through the course of the semester. In the first half, we will together read and discuss forms of human-chemical entanglement, whether a matter of industrial pollution, pharmaceutical use, habitual intoxication, gendered self-care or enhancement, or built environment; the goal is to achieve a broad sensibility for the concept as well as a familiarity with thinking biochemically and biopolitically about living bodies, while consistently registering questions of race, gender, class, sexuality, disability, and more. In the second half, each participant will choose and research a historically and geopolitically specific scenario of chemical entanglement, while 1) considering the political, legal, cultural, and labor contexts of the case; 2) exploring relationships between

"actual" and "represented" (protest slogans or visual productions in the case of environmental justice activism, for example); 3) examining other research questions germane to their site of interest and their chosen discipline of study. We will take one field trip to a local site.

Requirements/Evaluation: individual research project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, Art History majors, English majors, Environmental Studies majors

ENGL 244 (F) Interpreting Film (WS)

From the earliest days of narrative film, it was clear that the new medium enjoyed an unparalleled capacity to absorb spectators in the sheer passive enjoyment of the cinematic spectacle, so for many viewers cinema has seemed naturally to be a form of entertainment rather than an art form or a medium for exploring ideas. But not only have entertaining "movies" and artistic "films" always co-existed amicably, but in many cases have coincided: some of the greatest works of cinematic art first billed themselves unassumingly as enjoyable diversions. In order to appreciate the aesthetic and intellectual richness of such films, one must learn to "read" their crucial scenes closely, analyzing their visual and auditory language as well as their dramatic content, and must learn to interpret their surprisingly complex larger patterns of thought. This tutorial offers concrete training in both of these skills. During the first four weeks, students will write and discuss short weekly papers analyzing key sequences of a film, learning to identify diverse cinematic effects in order to illuminate dramatic patterns. During the last six weeks of the semester each student in a tutorial pairing will write a longer interpretive paper in alternate weeks, learning to construct fuller arguments addressing the whole of a film. Most films will be drawn from classical Hollywood cinema of the 1930s and 1940s, but we will also study European, Indian, and Japanese films. Readings during the first part of the semester will concern technical features of cinema; later readings will address larger interpretive issues (e.g., patterns in film genres, such as the nature of the gangster as a tragic hero; or social issues reflected in films, such as the newly empowered roles of women during the early 1940s and their influence in shaping the dangerous heroines of film noir).

Requirements/Evaluation: six short (2- to 6-page) papers and three short responses to one's partner's paper, totalling 25 pages of writing; active, sustained participation in tutorial discussions

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

Enrollment Limit: 10

Enrollment Preferences: sophomores and first-year students who have satisfied or placed out of the English Department's 100-level prerequisite

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Tutorial--constant writing and critique. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENGL 245 (F) Blackness and Visual Expression

This course will examine how blackness has been represented in visual media. Beginning with 19th century examples, we will examine representations associated with slavery and minstrelsy. In particular, we will consider paintings by artists such as Winslow Homer, Thomas Eakins, and Henry O. Tanner, alongside racial representations in popular media, such as newspaper editorial cartoons and book illustrations. Moving across the range of the 20th century, we will examine various visual media, including painting, photography, theater, costume design, fashion, advertising, and film. Films such as *Cabin in the Sky*, *Stormy Weather*, *Bingo Long's All Stars*, *Shaft*, and *Harlem Nights*, as well as recent movies, including *The Black Panther* and *Get Out* exemplify various imaginative revisions of racial conventions. Students will be expected to participate actively in the classroom and in group projects. Some of this material will be covered by student presentations, and all students will be expected to contribute to our discussions of the various examples we bring before us. Texts for the course will represent several disciplines and approaches to writing about race and culture. The writing for the course will be a journal and a 10-page final paper.

Requirements/Evaluation: participation in group projects, journal, and final 10-page paper

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

Enrollment Limit: 19

Enrollment Preferences: majors and prospective majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

ENGL 246 (S) The Love of Literature (DPE) (WS)

If love "makes the world go 'round," then literature, love's chronicler, may contain the key for understanding this world-formative passion. In this seminar, we will explore representations of love in works of poetry, drama, prose fiction, and philosophy from antiquity to the present. From the philosophical love extolled in Plato's dramatic dialogue *The Symposium* to the Christian love of Paul's epistles; the Romantic love of Goethe's *Elective Affinities* to the modern love of Woolf's *To the Lighthouse* and beyond, we will see how love, like literature, at once reflects and produces historically significant changes in the ways that human beings relate to one another, to themselves, and to the world in which they live. In addition to the authors already mentioned, readings may include literary works by Virgil, Mary Shelley, Wordsworth, Baldwin, and theoretical works by Freud, Foucault, and Luhmann.

Requirements/Evaluation: three papers of increasing length and complexity, totaling 20 pages of finished writing

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: those interested in majoring in English

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: The seminar includes extensive discussion of writing strategies throughout, frequent writing assignments, and substantive, writing-strategies focused feedback on writing assignments.

Difference, Power, and Equity Notes: The course materials and discussion emphasizes questions of gender, sexuality, and race.

ENGL 247 Art of the Essay

The "essay" is one way of writing about the intersection of self and world. Writers from 16th century French Michel Montaigne to contemporary

American physician Siddhartha Mukherjee and Canadian lyric essayist Anne Carson have experimented in this form, varying the proportion of self-scrutiny to outward focus. We will study the meandering history of this rich literary form, learning both how to analyze and interpret representative examples from multiple traditions, and how to try our hand at our own creative nonfiction. That is, you will do both critical writing and creative writing for this course. Throughout, we will track how this genre serves those writers and readers who gravitate toward its special arts. Works read include those by the writers named above, as well as a selection from the following list: Henry David Thoreau, William James, Gertrude Stein, James Baldwin, James Agee, John McPhee, Alice Walker, Gloria Anzaldua, Claudia Rankine, Theresa Hak Kyung Cha, and Maggie Nelson.

Requirements/Evaluation: four papers (two critical and two creative), of varying lengths (from 2-10 pages), for a total of 20 pages

Prerequisites: none

ENGL 248 (F) Black Women in African American Literature and Culture

Cross-listings: AMST 248 WGSS 258 ENGL 248

Primary Cross-listing

This course surveys constructions of black womanhood from the nineteenth century to the present through readings of texts by and about black women. In this course, students will trace how black womanhood became central to uplift ideology and the making and sustaining of black communities in the post-Reconstruction, Harlem Renaissance, and Black Power eras. We will read works across a broad historical spectrum to identify the ways different writers wrestle with race and gender using literary tropes, such as the "tragic mulatto," in different social contexts. We will also engage a range of forms, including an essay (Patricia Hill Collins's "Mammies, Matriarchs, and Other Controlling Images"), a choreopoem (Ntozake Shange's *For Colored Girls Who Have Considered Suicide when the Rainbow is Enuf*), and socio-political propaganda (the "Black is Beautiful" movement). This course will end with a consideration of the way writer and producer Issa Rae engages with contemporary ideologies of black womanhood in the HBO series *Insecure*.

Requirements/Evaluation: active class participation, four short papers totaling about 20 pages; final project on the hashtag #blackgirlmagic

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

ENGL 249 (F) Staging Race and Gender (DPE)

Cross-listings: ENGL 249 THEA 249 WGSS 269

Primary Cross-listing

This course will examine the role of theatre in staging understandings of race in the United States, particularly where ideologies of race converge with ideologies of gender. We will begin with the minstrel show, the most popular form of live entertainment in the 19th century, and end with Marcus Gardley's *Black Odyssey*, a 21st century production of a black man's coming into consciousness amid violence and war as well as divine protection. We will consider the role of live visual media in producing, reifying, and challenging discourses of race and gender across various historical periods. Through our pairing of drama in text and film, we will interrogate how meaning around racialized bodies has been made through performance practices on the stage that inform everyday life. Dramatists will include Eugene O'Neill, Tennessee Williams, August Wilson, Langston Hughes, Ntozake

Shange, Amiri Baraka, and Suzan-Lori Parks. In our attempt to locate and extend our notions of theatre in the contemporary era, we will explore episodes from such popular television series as Queen Sugar, This Is Us, Atlanta, and The Chi.

Requirements/Evaluation: four papers totaling at least 20 pages and in-class group performances

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

ENGL 250 (S) Americans Abroad (DPE)

Cross-listings: AMST 242 COMP 242 ENGL 250

Secondary Cross-listing

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of "home" into something that reflected their individual identity, and not one imposed by any national culture--American or foreign.

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences

Prerequisites: any literature course at Williams or permission of instructor

Enrollment Limit: 18

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 242 (D2) COMP 242 (D1) ENGL 250 (D1)

Difference, Power, and Equity Notes: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

ENGL 252 (F)(S) Ficciones: A Writing Workshop (DPE)

Cross-listings: ENGL 252 LATS 222

Secondary Cross-listing

This course is focused on the art and practice of writing fiction. Sessions are divided into workshop and seminar. Workshop: Students will present short fiction or novel excerpts for peer critique and the editorial advice of the instructor. Seminar: We will study published fiction by Latina/o, Latin American, Afro-Diasporic, and other writers, paying close attention to how each author employs narrative elements--characterization, plotting, structure, dialogue mechanics, setting, tone, theme--as well as the values and visions expressed. Regular assignments and in-class exercises will help students further strengthen their narrative skills.

Class Format: workshop

Requirements/Evaluation: attendance and class participation, writing exercises, 4- to 5-page midterm paper (close-reading a text), 10- to 15-page final writing portfolio

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators

ENGL 253 (F) Gender, Sexuality and Modern Performance

Cross-listings: THEA 250 ENGL 253 WGSS 250 COMP 247

Secondary Cross-listing

This interdisciplinary tutorial explores aspects of gender, sexuality, performativity, race, class, and representations of the body in modern theatre and performance in America. While attention will be given to the *still* understudied role of women in the arts, we will focus primarily on the transeccionalities of social identities under interrelated systems of oppression. Close analysis of works by dramatists--such as Adrienne Kennedy, Caryl Churchill, Wendy Wasserstein, Ntozake Shange, Tony Kushner, Naomi Iizuka, Paula Vogel, Suzan-Lori Parks, David Henry Hwang, Tarell McCraney, Gina Gionfriddo, and Taylor Mac--will occur alongside consideration of works by artists such as Karen Finley, Ron Athey, Tim Miller, E. Patrick Johnson, and Young Jean Lee. Our approach to this varied material will be comparative and will be enriched by readings of critical works by writers such as: Judith Butler, bell hooks, Cherríe Moraga, Gloria Anzaldúa, Eve K. Sedgwick, Jill Dolan, José Esteban Muñoz, David Román, and Donna Haraway.

Class Format: tutorial

Requirements/Evaluation: students will meet with instructor in pairs for an hour each week; they will write a 5- to 7-page paper every other week (five in all), and comment on their partner's papers in alternate weeks; emphasis will be placed on developing skills in reading, interpretation, critical argumentation, and critical written and oral response

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores and above; majors in Theatre, English or Women's, Gender and Sexuality Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENGL 254 (F) 'As If Her Mouth Were a Weapon': Jamaica Kincaid (DPE)

Cross-listings: ENGL 254 WGSS 274

Primary Cross-listing

This course explores the work of the internationally renowned author Jamaica Kincaid. We will wrestle with her commentary on concepts and conditions such as death; the afterlife of slavery and colonialism; family relations; love, romance, their absence and their entanglement with hatred; and illness. We will pay particular attention to character and author navigation of negative affects and the blurred boundaries between fiction and autobiography. Course texts include *Annie John* (1985), *Lucy* (1990), *The Autobiography of My Mother* (1996), *My Brother* (1997), *Mr. Potter* (2002), and *See Now Then* (2013). They will be examined through the lenses of race, gender, sexuality, class and citizenship and aided by supplemental readings. This course will explore the power that structures and determines or constrains labor and citizenship status; abortion, reproduction and mothering; memory, literacy and archival production; and more.

Class Format: meeting as a full group two to three times; meeting in tutorial pairs for most of the semester

Requirements/Evaluation: five 4- to 5-page essays and five 2-page critical responses, completed in tutorial pairs, keyword assignment, final roundtable

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENGL 257 (S) Personal Essay: Writing Workshop (WS)

The personal essay as a literary form encompasses a wide range of genres including literary journalism, creative nonfiction and the lyric essay. Note the exclusion of "memoir" or "autobiography" in this list. This course is NOT a course in memoir or autobiography. As we become more mindful of our particular points of view (and of ways to exploit this subjectivity), we will turn the focus outside of ourselves. We will experiment with writing that is extro- rather than introspective. While this is primarily a course in creative writing, we will give much of our time to literary analysis and imitation of exemplary essayists (primarily from the 20th and 21st centuries, and primarily from the U.S.) including Baldwin, Agee, Dillard, McPhee, Eggers, Carson, Delaney, Nelson, Chee, Yuknavitch and Karen Green.

Requirements/Evaluation: quality of writing and on quality of participation in weekly tutorial meetings

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10

Enrollment Preferences: students who have not yet taken Creative Writing courses will be given priority

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: This course will demand weekly writing and critical responses, as well as regular opportunities for revision. Total number of pages written will amount to approximately 35.

Attributes: ENGL Creative Writing Courses

ENGL 258 (S) Poetry and the City (WS)

In this course we will consider poems generated out of the experiences of urban life. The city provides for poets a vivid mental and imaginative landscape in which to consider the relation of vice and squalor to glamour; the nature of anonymity and distinction; and the pressure of myriad bodies on individual and mass consciousness. We will explore ways in which the poet's role in the body politic emerges in representations of the city as a site both of civilized values and/or struggles for power marked by guile and betrayal. Taking into account the ways in which cities have been transformed over time by changing social and economic conditions, we will consider such issues as what the New York of the 1950s has to do with the London of the late eighteenth and early nineteenth centuries, and why poetry as a genre might be particularly suited to representing the shifting aspects and populations of urban life. Poets will include Dante, Pope, Swift, Blake, Wordsworth, Whitman, Baudelaire, Yeats, Crane, Moore, Hughes, Brooks, Lorca, Bishop, Ginsberg, Baraka, Ashbery, Yau, Bitsui, Rankine, and Diaz. We will also draw on essays by Simmel, Benjamin, Williams, and Canetti, photographs by Hines, Weegee, Abbott, and Nishino; the blues, as sung by Holliday and Vaughan; and films such as *Man with a Movie Camera*, *Rear Window*, and *Breathless*.

Class Format: discussion-based

Requirements/Evaluation: class participation; the course will require four 5-page essays in multiple drafts

Prerequisites: 100-level English course or a 5 on the literature component of the AP exam, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: first-year and sophomore students who are thinking of majoring in English

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

ENGL 259 (S) Ethics of Jewish American Fiction

Cross-listings: REL 259 ENGL 259 JWST 259

Secondary Cross-listing

After the Second World War, Jewish American writers who wrote about Jewish characters and Jewish themes were increasingly celebrated as central figures in American fiction. Isaac Bashevis Singer, Bernard Malamud, Saul Bellow, Cynthia Ozick and Philip Roth are among those who gained prominence in this period. These writers were literary innovators and often addressed broad humanistic themes. But they also struggled with profound questions that arose in the postwar period about Jewishness, the legacy of the Holocaust, and what it means to be an American. In this course we will read the above authors and others. We will focus, in particular, on the distinctive ethical and political ideas, emotions, and aspirations that animate their work. The course will begin with a study of theoretical approaches that will provide the basis for our ethical criticism: we will read, for instance, Lionel Trilling, Wayne Booth, Martha Nussbaum, and Noël Carroll. Then we will delve into the fiction, following a trail that begins in the postwar period and continues in fictions by Erica Jong, Rebecca Goldstein, Michael Chabon, Gary Shteyngart, and others. Can we find a distinctive Jewish American ethics in Jewish American fiction?

Requirements/Evaluation: class participation, one take-home exam on theoretical approaches to ethical criticism; four short essays

Prerequisites: none

ENGL 260 The Material Text (WS)

The conventions, compromises, collaborations and errors of the printing process can end up reinflecting or changing a writer's words in unexpected ways. And the contexts in which we then encounter those printed words--in a purpose-designed edition; excerpted in an anthology; or far outside of discernibly 'literary' settings--can make more difference yet. As David Scott Kastan has observed, it is "self-evident... that the material form and location in which we encounter the written word are active contributors to the meaning of what is read." In this course we will study what is now termed "the history of the book," and theories of textual materialism. We will begin with the iconic Shakespeare First Folio of 1623, published as English conventions of orthography, spelling and printing were fast becoming regularized. We will investigate how the book was printed, and attend to the notoriously awkward problem of how to determine the "best" text of *Hamlet*. We will also trace the history of a series of Elizabethan and Jacobean poems from their origins to the present day, to chart changing conceptions of the very ideas of "publication" and of audience. The rotary press made printing much cheaper after 1850. We will read Dickens's *Great Expectations*, attending to the effects of it being written for serialization in weekly magazines. Emily Dickinson's poetry--almost all unpublished during her lifetime--will present a core challenge. Is it indeed possible to represent her work adequately in print? We will consider the presses set up by Yeats (Cuala) and Virginia Woolf (Hogarth) to more fully control the pragmatics and aesthetics of their publications; Scott Fitzgerald's responses to editorial censorship; and the vexed history of Joyce's *Ulysses*. We will close by weighing the gains and losses we face today as the material texts of the print era have ceded ground to digitization and hypertext.

Requirements/Evaluation: three papers rising from 4-7 pages; three reading responses of two pages each

ENGL 262 (F) European Cinema and Film Theory

This seminar explores the foundations of contemporary European cinema by studying a range of films from 1920-1985, and offers a grounding in film theory and aesthetics by pairing such films with theoretical essays by philosophers and aestheticians from the silent era through the 1970s. We will establish a kind of map of cinematic styles and movements, ranging from German expressionism and Soviet montage in silent films of the 1920s, through French realism of the prewar and Italian neorealism of the early postwar era, to the insurrectionary films of the French New Wave and the stylistic innovations of the German New Wave and of Swedish cinema in the 1960s and 1970s. We will study films by such directors as Wiene, Murnau, Lang, Eisenstein, Vertov, Dreyer, Renoir, Riefenstahl, Rossellini, Fellini, Truffaut, Godard, Varda, Herzog, Bergman, Tarkovsky, and Almodóvar.

Requirements/Evaluation: regular class participation and four 5-page papers, two of them submitted in both a draft and a revision

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 263 (S) Novel Worlds

Cross-listings: COMP 268 ENGL 263

Primary Cross-listing

Reading a novel can feel like falling into another world, an immersion in an encompassing fictional reality saturated with detail--each novel its own trip down the rabbit hole. From Jane Austen's "3 or 4 families in a country village" to Roberto Bolano's teeming modern day Mexico City of millions, the novel's distinctive power is in making both the few and the many feel like a complete world. But what are worlds, anyway? Are they spaces, like a container? Or are they not a thing at all, but social systems--ways of belonging that are constantly being made and remade? This course is about the specific world--imagining powers of the novel, tracing out various techniques and strategies by which literary texts create worlds. Our hunch: the modern notion of "world" finds its origin in the novel, and the novel constitutes one of the most sophisticated sites of reflection upon the notion of world. We'll read a number of novels, ranging from 19th century authors like Austen and Dickens, to contemporary genre writing--science fiction and the detective novel--as well as from a range of national traditions to see how novels, and ideas of world, shift over time and space. To get at our central questions, we'll read some philosophical and critical texts that are preoccupied by world-ness, with attention to current debates about the idea of World Literature. Novel texts likely to include: Jane Austen's *Emma*, Charles Dickens's *Bleak House*, Carroll's *Alice in Wonderland*, Italo Calvino's *Invisible Cities*, and Roberto Bolano's *Savage Detectives*.

Requirements/Evaluation: papers (approximately 20 pages), other forms of writing in-class and otherwise, participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 264 (S) Introduction to Global Literature & Film: Narrative, Aesthetics, & The Politics of Visual Culture (DPE) (WS)

One defining feature of Global Literature is that it addresses some aspect of globalization, whether it is the transnational flow of cultures, commodities, and capital, or an increased awareness of an interdependent world. But what do we "see" when we watch films or read books about places we've never been, events we've never lived through, or people we've never met? As Edward Said has noted, another defining feature of Global Literature is that it constructs "imaginative geographies," fantasies of space that, in and through their circulation and consumption, come to define and limit what that space is and could potentially be. In this course, we will explore how such "imaginative geographies" unsettle the critical distinctions often drawn between the "aesthetics" of global literary texts that are non-mimetic and unrealistic and the "politics" of global literary texts that are more realistic in their representation of globalization. We will also pay close attention to what WJT Mitchell has called "watching seeing," or the ways that global narratives draw attention to the pre-existing visual and perceptual frameworks that encourage us to read them one way or another. Whether we are reading texts about momentous global events like the Arab Spring or a 19th century slave insurrection off the coast of Chile, or texts that explore more quotidian experiences such as sadomasochism in a hotel on the coast of Japan or the burlesque banality of Palestinian life in Nazareth, our goal in this course will be to examine how textual incitements to "watching seeing" contest dominant fantasies about what a given place is and can be beyond the cartographic abstractions and violently policed borders of the globalizing world. Readings will include novels by Ahmed Naji and Yoko Ogawa, films by Elia Suleiman and Hou Hsiao-Hsien, poetry by Solmaz Sharif, as well as the architectures of occupation and resistance in contemporary Palestine and at the US/Mexico partition wall.

Requirements/Evaluation: three papers and a series of writing assignments (including GLOW/Blog Posts) totaling 20 pages

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first- and second-year students

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be required to complete a series of short writing assignments that will culminate in three formal papers: a close reading, a close reading that incorporates a peer-reviewed, secondary source, and a research paper developed through stages that will include a proposal, workshops, and editorial revision. Students will receive extensive feedback, written and oral, on their work, and there will be class time reserved for reviewing basic strategies for effective academic writing.

Difference, Power, and Equity Notes: This course examines the visual politics of global literature. That is, students will consider how conceptions of difference -of class, race, gender, ethnicity, and more - are produced, reproduced, and contested through narrative and aesthetics. This class will also examine the forms of dispossession, violence, and inequality generated by processes of globalization.

ENGL 266 (F) Postmodernism (WS)

Cross-listings: COMP 231 ENGL 266

Secondary Cross-listing

In one definition, postmodernism in art and literature is what you get when you combine modernism's radical experimentation with pop culture's easy appeal. This term has been used to describe works from Andy Warhol's paintings of Campbell's soup cans and Jean Baudrillard's critical essays on Disneyland to Murakami Haruki's euphoric conspiracy novels. Theorists of the postmodern have argued that it represents not only a radical change in aesthetic sensibilities, but a fundamentally new relationship between art, language, and society. In this tutorial, we will read some of the most important theoretical essays defining the postmodern (essays which themselves often embrace this playful and sometimes ironic style), and we will pair them with artistic texts that are said to illustrate the features of postmodernism. The latter will be mainly novels and short stories from around the world, but one feature of this theory is a flattening of the distinction between high and low culture as well as between the written and the visual, so we will also examine examples from architecture, visual art, and/or broader pop culture. Texts will include essays by Jean Baudrillard, Fredric Jameson, Jean-François Lyotard, and others; novels and short stories by writers like Don DeLillo, Italo Calvino, and Murakami Haruki; painting and sculpture associated with Pop Art and Superflat; the architecture of Williamstown-area museums; etc. Writing assignments will focus on reading the theoretical texts closely and applying their ideas to the artistic texts in creative and interesting ways. Open to sophomores as well as advanced students.

Class Format: after an introductory lecture meeting, students will meet with the instructor in pairs for approximately an hour each week

Requirements/Evaluation: participation plus 4 papers (4-5 pages), 2 short papers (1-2 pages), and 4 peer critiques (1 page)

Prerequisites: a previous literature or critical theory course at Williams plus sophomore standing or higher, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Comparative Literature majors, students with a demonstrated interest

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 231 (D1) ENGL 266 (D1)

Writing Skills Notes: Students will write several regularly spaced papers that build on one another by revisiting, extending, and/or rewriting earlier material. Students will receive detailed written feedback from the instructor on each paper, addressing argument, organization, and style, as well as written peer feedback on the longer papers. (See requirements for details about the number and type of assignments.)

ENGL 268 (S) Being American, Being Muslim: American Muslim Literature in the 21st century (DPE)

Cross-listings: ENGL 268 AMST 266 COMP 228 REL 266

Secondary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves. We will address questions such as: How have American Muslims understood their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? What are the competing claims and contestations about authentic expressions of Islam? How are Muslims approaching the tensions between communal belonging and individuality? We will be engaging such questions primarily through an analysis of popular memoirs, autobiographies, novels, and short stories, but will also explore some plays, films, poetry, and comedy.

Requirements/Evaluation: regular reading responses, two short essays (3-4 pages), final presentation, and final paper (7-8 pages)

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 268 (D2) AMST 266 (D2) COMP 228 (D2) REL 266 (D2)

Difference, Power, and Equity Notes: This course will explore the intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences in Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations in the texts, and how to analyze their workings in nuanced multidimensional ways.

ENGL 269 (F) Writing Looking: Ekphrasis & Poetics

"As is painting, so is poetry," wrote the Roman poet Horace. This comparison would be clarifying, if it weren't so maddeningly opaque. Why, and how, should we compare the verbal to the visual? When poets write about looking, they address not only formal contrasts between the arts but also the fundamental concerns of representation that these contrasts make visible: the eternizing aspirations of art; the relationship between body and soul; the interplay of politics and aesthetics; the power dynamics of gazing at gendered and raced bodies; and the processes of identification and objectification. In this course, we will survey a range of texts that respond to works of visual art and to the act of looking itself. The long history of comparisons between the verbal and the visual constitutes a major strand of literary theory and criticism from antiquity to modernity. Our goal will be to study how such questions of representational rivalry are continuous with questions about how we live with things, and with each other. We will read authors from the historical canon, like Homer, Virgil, Ovid, Spenser, Shakespeare, Keats, Browning, and Melville; and poets from the recent past and present, like W. H. Auden, Frank O'Hara, Thom Gunn, John Ashbery, Adrienne Rich, Jorie Graham, Fred Moten, and Claudia Rankine.

Requirements/Evaluation: five 4-page papers; participation in class discussions; one in-class presentation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 270 (F) Shakespeare on Page, Stage and Screen: Text to Performance (WS)

Cross-listings: COMP 290 ENGL 270 THEA 260

Secondary Cross-listing

Four centuries on, Shakespeare still challenges us. How should we weigh the respective claims of our own era's concerns--with matters of gender, sexuality, race, class, or materiality, for instance--against historicist attention to the cultural, political and theatrical circumstances in which his plays were actually written? And when it comes to realizing the text in dramatic performance, such challenges--and opportunities--multiply further. Critical fidelity to Shakespeare's times, language and theatrical milieu prioritizes a historical authenticity that can be constraining or even sterilizing, while, at the other extreme, staging the plays with the primary aim of making them "speak to our times" risks revisionary absorption in our own interests. We will focus on six Shakespeare plays, from different genres and periods of his career: *Romeo and Juliet*, *Henry V*, *Twelfth Night*, *Hamlet*, *Antony and Cleopatra*, and *A Midsummer Night's Dream*. Proceeding with each from close reading of the text, we will attend to the demands and opportunities of performance, and assess a range of recent film and stage productions.

Class Format: seminar

Requirements/Evaluation: class participation, regular reading responses, three longer papers

ENGL 272 (S) American Postmodern Fiction

Cross-listings: ENGL 272 AMST 272

Primary Cross-listing

American fiction took a turn at World War II; the simplest way to name the turn is from modernism to postmodernism. The most obvious mark of postmodern narration is its self-consciousness: postmodern books tend to be about themselves, even when they are most historical or realistic. Already a paradox emerges: why would World War II make narratives more self-reflexive? The first book in the course, and the best for approaching this paradox, is Heller's *Catch-22*. It also serves as a good introduction to the unlikely merging in American fiction of high European post-structuralist postmodernism and low American punk postmodernism. Subsequent books in the course will probably include Pynchon's *The Crying of Lot 49*, Morrison's *Beloved*, DeLillo's *White Noise*, Carver's *What We Talk About When We Talk About Love*, Diaz's *The Brief Wondrous Life of Oscar Wao*, and Whitehead's *The Underground Railroad*.

Requirements/Evaluation: three papers of increasing length and weight, contributions to class discussion

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: first-year students who have placed out of 100-level English and sophomores considering the major; then Junior and Senior English majors

Expected Class Size: 25

ENGL 273 (S) Detectives Without Borders (DPE) (WS)

Cross-listings: ENGL 273 COMP 273

Secondary Cross-listing

Why is detective fiction so popular? What explains the continuing multiplication of mystery novels despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to more distant detective stories from around the world. The international scope of our readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to the international influence of the Anglo-American model. At the same time the readings will trace the evolution of the genre from the classical Sherlock Holmes model through later iterations, including golden age, hard-boiled, police procedural, female detective types, and more. Alongside fictional narratives, essays on the genre will provide the theoretical ground for our investigation. Our international journey will begin in England and the United States (G.K. Chesterton, Robert Knox and Edgar Allan Poe) and continue through Japan (Edogawa Rampo), France (Georges Simenon), Italy (Andrea Camilleri), Argentina (Jorge Luis Borges), and beyond. As we journey around the world, we will look at the possibility of reading detective fiction through the categories of gender, postcolonial, and race studies. Film adaptations of the novels we read, TV shows and films noir will also be included in the course material. All readings will be in English.

Requirements/Evaluation: short papers, one research paper, oral presentations, midterm, class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature and English majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: COMP core course

Distributions: (D1) (DPE) (WS)

SEM Section: 01 MR 2:35 pm - 3:50 pm Michele Monserrati

ENGL 274 (F) Film and Media Studies: An Introduction

Cross-listings: COMP 258 ENGL 274

Primary Cross-listing

This team-taught interdisciplinary course introduces students to concepts and skills central to the study of moving images. After familiarizing ourselves with the basic elements--visual, narrative and auditory--necessary for formal analysis, we will develop critical tools for understanding film and media in their historical and social contexts. We will discuss influential ideas, theories, and methods in the discipline of film and media studies. Students will learn to respond to works drawn from a wide range of forms: fiction and nonfiction film, animation, television, video games, and emerging forms of virtual reality. Throughout, our emphasis will be on the diverse ways in which moving pictures create meaning. How can we best think about the reciprocal relations between film, new media, and contemporary life? This course will be presented through a mixture of lectures, discussions, and exercises.

Class Format: lecture/discussion/studio

Requirements/Evaluation: class attendance and participation; frequent (probably weekly) writing assignments that will include several short responses, three essays (1000-2000 words), three production exercises; and a final long paper or project

Prerequisites: no prior production experience is required

Enrollment Limit: 30

Enrollment Preferences: open to first-year students; approximately 2/3 of places will be reserved for first- and second-year students

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

ENGL 275 (S) Southern Literary Aesthetics (DPE) (WS)

Cross-listings: AFR 275 AMST 276 ENGL 275

Primary Cross-listing

Hip-Hop artists signify as "the dirty South" the distinct sounds, rhythms, landscapes, gestures, desires as well as frustrations of Black residents living in the southernmost regions of the U.S. American continent. In this course, students will examine what the South means to American concepts and how the South is used to make meaning in literature, music, art, digital archives, and film. We will give particular attention to how representations of the South are informed by region, gender, sexuality, and class. At the end of the course, students will be able to identify Black southern aesthetics across various genres and mediums with attention to historical and regional specificity despite the opacity of these categories. Potential artists include Jean Toomer, Alice Walker, Ernest Gaines, William Faulkner, Jesmyn Ward, Zora Neale Hurston, Natasha Trethewey, E. Patrick Johnson, Trudier Harris, Kiese Laymon, Julie Dash, Spike Lee, Askia Muhammad Touré, Alexis Pauline Gumbs, Alison Janae Hamilton, Outkast, DJ Khalid, Beyoncé Knowles, and Solange Knowles.

Requirements/Evaluation: four or five writing assignments that total about 20 pages; discussion facilitation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 275 (D2) AMST 276 (D1) ENGL 275 (D1)

Writing Skills Notes: Students will develop a writing practice through short in-class assignments that culminate in four or five formal submissions. Students will receive group as well as one-on-one feedback on useful writing principles. Feedback will focus on structure, style, argumentation, and audience.

Difference, Power, and Equity Notes: Students will analyze the "shaping of social differences, dynamics of unequal power, and processes of change" in the South. Students will discover how region impacts race, gender, sexuality, and class.

ENGL 277 (F) Meditation and Modern American Life

Cross-listings: ENGL 277 REL 277

Primary Cross-listing

The first English translation of a Buddhist text was published in the United States in 1844. At the time, few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices (meditation, in particular) can be found everywhere. In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the increasingly mainstream role of meditation in modern American life. We'll study how traditional Buddhist meditation practices were transmitted to the West, and then track the way those practices changed over time, as they were adapted to the radically new context of American culture. And we'll study the way meditation is impacting a wide array of cultural domains, including: literature, psychology, education, environmentalism, Western attitudes towards death and dying, and the fight against racism. A key part of the course will be an introduction to the theory and practice of meditation: we'll learn a variety of meditation techniques, and we'll spend a significant amount of time each class practicing and reflecting upon those practices. This course is a part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail, in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Classes will be held at the jail, with transportation provided by the college. *Please note the atypical class hours, Thursdays, 4:45-8:30 pm.*

Requirements/Evaluation: full attendance and participation; meditation 2-3 times a week outside of class; a meditation journal; and a final 10-page essay

Enrollment Limit: 18

Enrollment Preferences: final selection will be made on the basis of (a) statements of interest sent via email to brhie@williams.edu by June 26 and (b) brief interviews with the instructor.

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

ENGL 280 (S) Writing for Performance

Cross-listings: THEA 282 ENGL 280

Secondary Cross-listing

This studio/seminar course is designed for students with some experience in creative writing and/or performance interested in a deep dive into the art of playwriting. What is a play? What distinguishes writing for performance from writing that is meant to be read? How do we craft a blueprint for a live event? In our rapidly evolving digital world, what sorts of stories and phenomena still ask to be experienced live? How are contemporary theater and performance makers pushing the boundaries of what "writing" means and what constitutes "liveness"? We will read works by Sharon Bridgforth, Sarah Ruhl, Tarrell Alvin McCraney, Tony Kushner, Branden Jacobs-Jenkins, Sarah DeLappe, Suzan-Lori Parks, Edward Albee, August Wilson, Chuck Mee, María Irene Fornés, Young Jean Lee, Stew, and Lightning Rod Special, who have deepened and widened the possibilities of the form. We will also write, beginning with exercises in character, dialogue, action, and world-building, and working toward a longer final project. Students will be expected to present their own work and respond to each other's work regularly. At the end of the term, we will present excerpts of our one-act length works as part of an open studio experience.

Requirements/Evaluation: in-class participation, critical/creative responses to readings, various writing exercises, final one-act performance piece, participation in final presentation

Prerequisites: students with some experience in creative writing and/or performance

Enrollment Limit: 14

Enrollment Preferences: students who have taken THEA 214/ENGL 214 or another creative writing course

ENGL 286 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: ENGL 286 WGSS 283 AFR 283 AMST 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as *Looking for Langston* (Isaac Julien, 1989), *The Watermelon Woman* (Cheryl Dunye, 1996), *U People* (Olive Demetrius and Hanifah Walidah, 2009), *Tongues Untied* (Marlon Riggs, 1989) and *Litany for Survival* (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

ENGL 287 (S) Bloody Vampires: From Fiction to Film and Fashion

Cross-listings: ENGL 287 COMP 246

Secondary Cross-listing

This course explores the figure of the vampire and seeks to explain the popular appeal such a fictive creature has been enjoying for over two centuries. What kind of fears and fantasies does it crystallize? And what kind of discourse about sexuality, death, and disease does it validate? What does its mere existence reveal about gender and ethnicity? We will examine the emergence of the vampire in gothic literature of the late 18th and 19th centuries, its omnipresence in cinema in the 20th century and investigate its resurgence in 21st-century pop culture. In order to gain a deeper understanding of the figure of the vampire, we will read poems by August Bürger and Goethe, the first vampire story by John Polidori, novels by Sheridan LeFanu and Bram Stoker, and contemporary vampire fiction by Anne Rice and Stephenie Meyer. We will watch the films *Nosferatu* by Murnau and Herzog, *Dracula* by Browning and Coppola, the *Dance of Vampires* by Polanski, *The Hunger* by Scott, *Blade* by Norrington, *Twilight* by Hardwicke, and *Daybreakers* by Spierig, as well as episodes of the TV series *Buffy the Vampire Slayer*, *True Blood*, and *The Vampire Diaries*. We will also discuss music video clips by Lady Gaga and Marilyn Manson, and fashion shows by Alexander McQueen, John Galliano and Vivienne Westwood.

Class Format: seminar

Requirements/Evaluation: three 5-page papers and a 10- to 12-page final rewrite

Prerequisites: none

ENGL 288 (S) Writing as Experiment: An Introductory Poetry Lab

Some writing gets categorized as "experimental" or "avant-garde." But a spirit of experimentation---of rigorous, playful curiosity---is crucial for writers of all levels and styles to cultivate. In this introductory poetry course, we will engage in games and exercises designed to help us explore the wide set of tools available to poets, as well as to consider the idiosyncrasies of our own voices. We will read poets like Douglas Kearney, Fatimah Asghar, and Bhanu Kapil and discuss the ways race, gender, and power affect interpretations of the risks such poets take in their work. We'll ask: What are the boundaries of what is considered to be poetry, and what possibilities for writing might we discover by pushing against those boundaries? How might a poem live, not just on the page, but also on a sidewalk, on a screen, in performance? This is a course that approaches writing as a laboratory to test out ideas and asks students to think critically about their own creative processes. Students will be expected to create new writing, submit reflection papers, give feedback on each others' poems, and revise work as part of a final portfolio.

Requirements/Evaluation: class participation, completion of writing exercises, feedback/reflection papers, and a final portfolio with revisions

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: if course becomes over-enrolled, enrollment will be determined by application

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

ENGL 289 (F) Graphic Storytelling

In the 1890s an author/artist put words and pictures together in boxes, ordered the boxes along a (short) narrative arc featuring a continuing character, published it in a newspaper, and graphic storytelling as we know it was born. 15 years later (in the form of comic strips) it had already become one of the most important storytelling modes in American culture. In this course we will follow the development of this quirky and important American contribution to world culture from comic strips through comic books to the "graphic novel." Along the way we will consider all kinds of interesting general subjects: for instance, the relationship between commerce and creativity, the difference between good and bad culture, and the pervasive human need to tell and experience stories.

Requirements/Evaluation: active class participation and five or six short essays, totaling about 20-25 pages

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores and first-year students who have not yet taken an ENGL Gateway course

ENGL 300 (F) Tell Even Us: Writing Memory, Trauma, Self (DPE)

Cross-listings: ENGL 300 AMST 300 COMP 357

Secondary Cross-listing

In this course, we will read a diverse selection of personal memoirs dealing with the traumas, transgressions, and transformations of what we understand to be "modern life." We will meditate on how categories of identity and experience, memory and history are being constructed and deconstructed, reimagined and remade anew. We will pay special attention to how these writers/artists narrate the overlapping cycles of loss, pain, grief, survival, resilience, and resistance in the face of (structural, institutional, interpersonal, and intimate) violence, and consider the possibilities for (individual and collective) healing that can exist in and beyond the world as we know it. What, after all, does it even mean to have or to not have, to find, to lose, to have stolen, to dissolve, and/or to recover a self in a besieged America? Books we will cover may include: *Borderlands/La Frontera: The New Mestiza* (Gloria Anzaldúa), *Dictee* (Theresa Hak Kyung Cha), *How to Write an Autobiographical Novel* (Alexander Chee), *When They Call You A Terrorist: A Black Lives Matter Memoir* (Patrisse Khan-Cullors and asha bandele), *Bad Indians: A Tribal Memoir* (Deborah Miranda), *This is for the mostless* (Jason Magabo Perez), *Redefining Realness* (Janet Mock), *Like a solid to a shadow* (Janice Lobo Sapigao), *Men We Reaped* (Jesmyn Ward), *7 Miles A Second* (David Wojnarowicz).

Requirements/Evaluation: weekly reading responses, a midterm paper (7-8 pages), and a manuscript for a memoir in a medium of their own choosing

Prerequisites: previous coursework in race, ethnicity, and diaspora, junior or senior standing, or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

ENGL 301 (S) Sublime Confusion: A Survey of Literary and Critical Theory

Cross-listings: COMP 301 ENGL 301

Secondary Cross-listing

Which is more appealing, a roller coaster or a rose? For much of its history, art and literary theory has conceived itself as a science devoted to explaining and defining "beauty." But running alongside this is an edgier countercurrent that worships something else: an experience of excitement, fear, suspense, or thrilling confusion often described as "the sublime." The sublime interested early critics, from classical rhetoricians to the German Idealists, as a way to make aesthetics more scientific paradoxically by identifying the doorway through which art and literature escaped the realm of reason. More recently the notion of literature's exciting confusion has played a key role in modern critical theory from Russian formalism to new criticism, deconstruction, postmodernism, and posthumanism. (In fact, poststructuralist criticism itself has a thrillingly confusing quality that we will not ignore.) We will take up a cross section of critical theory from classical times to the present, focusing on careful reading of relatively short texts by Plato, Aristotle, Addison, Burke, Schiller, Nietzsche, Shklovsky, I.A. Richards, Barthes, Derrida, Lyotard, Fredric Jameson, Haraway, and others. Case studies ranging from opera to Xbox will enlighten, thrill, and confound you. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you: prose, poetry, or drama from any time and place; film, visual art, or architecture; music, new media, or digital media, and beyond.

Requirements/Evaluation: attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper

Prerequisites: 200- or 300-level course in literature, theory, or philosophy, or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: students majoring or considering a major in a related field

ENGL 302 (S) Landscape and Language

Cross-listings: ARTS 302 ENGL 302

Primary Cross-listing

Colloquially, the word "landscape" refers to pictures or scenes of the land, from farms to forest to wilderness. But more broadly, landscape evokes the complex, dynamic, and ever-shifting relationship between "nature" and our experience of it. Landscape and Language is a seminar that considers the tools we use to represent and narrate our relationship to the natural world. Together, we will investigate how such cultural conventions as travel, perspective, nature, and ecology influence the ways we see and understand place. Drawing from discourses of literature, architecture, art history, contemporary art, and ecocriticism, our goal is to develop a deeper critical understanding of and engagement with landscape (as a collective of readers and as individual investigators). Texts for this course will include an art historical exploration of the relationship between landscape, power, and imperialism by W.J.T. Mitchell, an ethnographic investigation of nearly obsolete place names by Robert MacFarlane, poems by historical and contemporary poets like Jean Toomer, Terrance Hayes, and Lucille Clifton, and contemporary visual art by Helen Mirra and Xaviera Simmons, among others.

Class Format: seminar

Requirements/Evaluation: weekly discussion in an online forum; two short response papers, and a final research paper or creative project (10-12 pages or equivalent) investigating a specific landscape

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors

ENGL 304 (S) Dante

Cross-listings: COMP 317 ENGL 304

Primary Cross-listing

In the spring of 1300, Dante Alighieri entered Hell. The *Divine Comedy* is the record of the journey that followed. It is organized around a series of encounters with figures from the poet's past--for example, a former teacher damned for violating nature--as well as historical and literary characters: Ulysses, Thomas Aquinas, Plato, Virgil, Adam. Though the *Comedy* is probably now best known for its savagery--the bodies split open, the Popes turned upside down and lit on fire--it is also, as Dante claims, a love story and a work of high imaginative daring. Among its final images is a vision of paradise rendered through the precise if also mind-bending language of non-Euclidean geometry. In this course we will read the three books of the *Comedy* (*Inferno*, *Purgatorio*, *Paradiso*), the *Vita Nuova*, and a few brief selections from Dante's other works. All readings will be in translation.

Requirements/Evaluation: four written exercises, three exams, and a 10-page final paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors

Expected Class Size: 20

ENGL 306 (F) Beckett, Pinter and Stoppard

Cross-listings: ENGL 365 ENGL 306 COMP 365 THEA 365

Secondary Cross-listing

Samuel Beckett, Harold Pinter and Tom Stoppard have been amongst the most influential playwrights of the anglophone theatre over much of the last six decades. This course will explore their mutual concern with the capacities and dysfunctions of language, their questioning of Art's value and the scope for originality in the post-nuclear and postmodern era, and, above all, their collective focus on the extent to which selfhood may be realized in and through performance. Besides reading major plays, we will also give some consideration to the dramatic work crafted by these writers for radio, television and film, and to the political and social commitments animating and counterpointing their literary careers. Readings may include: *Endgame*, *The Caretaker*, *Rosencrantz and Guildenstern are Dead*, *Krapp's Last Tape*, *The Homecoming*, *No Man's Land*, *Betrayal*, *Waiting for Godot*, *Dogg's Hamlet*, *The Invention of Love*, *Arcadia*, *Rock 'n' Roll*, *Not I*, *Rockaby*, *A Kind of Alaska*, *Catastrophe*, *The Real Thing*, *Indian Ink*, *Artist Descending a Staircase* and *One for the Road*. Throughout, we will give consideration to these works as both literary and theatrical texts.

Requirements/Evaluation: two long papers, four 1- to 2-page shorter responses, class participation

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors

ENGL 307 (S) The Global City (DPE)

From Beijing to Bombay, Belfast to Gaza, and the favelas of São Paulo to the high rises of Dubai, some of the most dramatic urban transformations of the 21st century have occurred in former and current colonies. In this course, we will read a body of fiction and film from around the world in order to consider how the Global City, in the North and South alike, has been largely forged in the crucible of a colonial modernity that continues to shape and constrain the potentials for contemporary urban experience. We will read the city not just as a statically built architectural space, but {through} its dynamic, phantasmatic, and psycho-social infrastructures. We will explore the city from a variety of angles: as a highly volatile field of inclusion and exclusion, mobility and confinement, acceleration and continuity; an aspirational space that nurtures dreams, promises pleasure, and invites creativity as well as an indifferent space of disposability, rote habit, and percolating violence; a global nodal point of space-time compression that produces vacuous fields of space-time expansion at its margins; and, finally, as a topography networked into the abstracted and anonymous world of the capitalist market but also localized through informal circuits of economic and social exchange. While we will familiarize ourselves with key theorists of urban space such as Saskia Sassen and Abdou Malik Simone, our primary focus will be on how various narrative forms -- fictional, visual, and digital -- can illuminate aesthetic itineraries, deviant mobilities, and urban imaginaries whose claims to the Global City resist capture in economies of neoliberal development and necropolitical practices of securitization and counterinsurgency. Readings will include, among others, Aravind Adiga's *Last Man in Tower* (Bombay), Onjadki's *Transparent City* (Luanda), Xiaolu Guo's *Twenty Fragments of a Ravenous Youth* (Beijing), and Robert Omar Hamilton's *The City Always Wins* (Cairo).

Requirements/Evaluation: active class participation, blog/GLOW posts, three papers, and a final project/exam

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course examines how late colonial systems of power, inequality, and exclusion come to be organized in the space of the contemporary Global City. It also considers the forms of resistance, solidarity, and vernacular cosmopolitanism that emerge when the city is considered from the ground up, that is from the point of view of its economic, gendered, and racialized "others."

Spring 2020

SEM Section: 01 MW 7:00 pm - 8:15 pm Thursday Org Mtg 7:00 pm - 7:25 pm Anuj Kapoor

ENGL 308 (F) Disposable Subjects (DPE)

According to the critical theorist Achille Mbembe, a defining characteristic of political power in the globalizing world of the 21st century is "the capacity to define who matters and who does not, who is *disposable* and who is not." For Mbembe, globalization is not only defined by a heightened awareness of an integrated and interdependent world, but also by the production of "death-worlds...in which vast populations are subjected to conditions of life conferring upon them the status of *living dead*." This course turns to a body of fiction and film from across the world that addresses these "death-worlds" and the disposable subjects who inhabit them. During the semester we will approach human disposability through a variety of critical lenses: neoliberal capitalism, late colonial occupation and counterinsurgency, as well as the policing of global difference in its many forms, including ethnicity, gender, and caste. We will also consider the ways that necropolitics reproduce and globalize forms of sovereignty that have been historically exercised with impunity and without limits over indigenous peoples, the enslaved, and the colonized. All in all, our primary focus in this course will be on the ways that the texts we read unsettle and frustrate normative responses -- ethical, political, humanitarian -- to scenes of global suffering, protracted dispossession, and incessant violence. Readings will explore, among other topics, forced migrant labor in Saudi Arabia (Benjamin's *goat days*), the blurred lines between being and non-being in contemporary Palestinian life (Ibtisam Azem's *The Book of Disappearance*), and the global refugee "crisis" (Mohsin Hamid's *Exit West*).

Requirements/Evaluation: weekly reading responses on GLOW, active class participation, a close reading (2-3 pages) to be revised into a formal essay (5-6 pages), a final research project (8-10 pages)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: In readings, seminar discussions, and written assignments students will examine the ethical and political implications that attend the representation of political violence in a body of 21st century fiction and film from across the world. Students will consider human disposability in the era of globalization through a variety of critical lenses: colonialism, capitalism, war and terror, as well as the policing of difference in its many forms including ethnicity, gender, and caste.

ENGL 309 (F) Thinking Diaspora: The Black Atlantic and Beyond

Cross-listings: ENGL 309 AMST 308 WGSS 308 COMP 300

Primary Cross-listing

Water imagery has been central to black diasporic culture since its beginnings in the Middle Passage---suggesting imprisonment, isolation, escape, ancestral communion, and death, for example. This course wrestles with the significance of water in diasporic literature--how it endures, how it has diminished, how it slips away from us. Black diaspora theory was revolutionized by Paul Gilroy's *The Black Atlantic*, which urged us to consider more deeply the role of the ship, the routes, and the roots entailed in the formation of diasporic consciousness. This course aims to expand students' theoretical skills as we discuss cornerstone and cutting edge texts of diaspora theory, with an emphasis on theories that work with the relationship to water, such as those by Jacqueline Nassy Brown, Omise'eke Tinsley, and Vanessa Agard-Jones. Primary texts will include *The Big Sea* by Langston Hughes, *Sugar and Slate* by Charlotte Williams, Barry Jenkins' *Moonlight*, and more.

Requirements/Evaluation: weekly reading responses, presentations, one 10-page paper, engaged feedback process, and thoughtful class participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 310 (F) Rebels, Revelers, and Reactionaries: The Poets of the Seventeenth Century

The decades following the death of Elizabeth I were period of scandal, schism, dissent and decadence, culminating in a bloody civil war and the beheading of a king. It was, in other words, a 'world turned upside down' by every kind of upheaval: in civics, philosophy, politics, religion, and science. It also produced writers of some of England's finest lyric and satiric poetry, and its greatest epic poet. How the century's poets successfully dramatized the critical events and feelings in this time of turmoil will be the focus of the course. While primarily a course in close reading, we will nevertheless try to reconstruct the lives and contexts of the writers, and examine some of the critical and theoretical issues involved in contextualizing the poems. Authors will include Donne, Jonson, Lanyer, Herbert, Herrick, the Cavalier Poets, Milton, Marvell, Cavendish, Dryden, and Rochester.

Requirements/Evaluation: two 8- to 10-page essays and several short writing assignments

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 313 (F) George Eliot and Henry James

George Eliot (aka Mary Ann Evans) and Henry James trace dramas of consciousness that ramify in the context of 19th century social transformations. Eliot records the frictions of provincial and cosmopolitan lives; James writes about what it meant for American and European societies around the turn of the 20th century to be mutually exposed to and by one another. Their work explores gender and class fluidity, and the relations of ethical, economic, and aesthetic value. Both evoke fraught political contexts--for Eliot, the failed mid-century European revolutions and pressures of British imperialism, and for James, post-Civil War American consciousness and the struggle between American and European imperialisms. By placing texts in relation to one another--for instance, James' *Portrait of a Lady* with Eliot's *Daniel Deronda*, *What Maisie Knew* with *The Mill on the Floss*, *The Turn of the Screw* and *The Beast in the Jungle* with *The Lifted Veil*--we'll consider how and to what ends these writers link such issues as law, sacrifice, gambling, gender, and the supernatural. In tracing the relation of their work to one another, we will mark the shift from crucial preoccupations of the 19th century to the modern novel, and the innovations of prose style that accompany them.

Requirements/Evaluation: class participation and two papers, approximately 20 pages altogether

ENGL 314 (F) Groovin' the Written Word: The Role of Music in African American Literature

Cross-listings: ENGL 314 COMP 321 AFR 314 AMST 314

Secondary Cross-listing

In an interview with Paul Gilroy, Toni Morrison once said, "Music provides a key to the whole medley of Afro-American artistic practices." Morrison is not the only one who believes that music speaks to numerous aspects of the African American experience. From Sterling Brown and Zora Neale Hurston to John Edgar Wideman and Suzan Lori-Parks, many African American authors have drawn on music to take political stands, shape creative aesthetics, and articulate black identity. In this course, students will explore the work of these authors and more, investigating music's ability to represent and critique African American culture in their literature. Texts will cover a range of literary forms including poetry, plays, short stories and novels alongside theoretical and critical essays. Students will discuss such key issues as assimilation into mainstream culture, authenticity claims on black music, and music used as a tool for protest. Additionally, class assignments will include musical examples in spirituals/gospel, blues, jazz, and rock/rhythm and blues. While this class requires students to practice in-depth literary and performance analysis skills, students are not required to have technical musical knowledge.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based upon class participation, short weekly reading responses and/or listening assignments, one 3-page paper, one 6- to 8-page paper comparing two works, one in-class spoken word performance with 2-page report, final presentation

Prerequisites: none; open to all

Enrollment Limit: 20

ENGL 315 (S) Milton

Cross-listings: ENGL 315 REL 319

Primary Cross-listing

If you know anything about John Milton, you probably think of him as some blind guy who wrote a really long poem about the Bible. It's hard to shake the feeling that Milton is the fustiest of English poets--dull, pious, brilliant and all, and not someone you would read if you didn't have to. But then what are we to make of the following? The first piece that Milton wrote that was read widely throughout Europe was a boisterous defense of the English Revolution. Milton was most famous in his lifetime as the poet who went to bat for the Puritan insurgents--the poet who came right out and said that the king looked better without his head. Of all the major English poets, Milton is the revolutionary. So a course on Milton is by necessity a course on literature and revolution. We will read Paradise Lost, widely regarded as the greatest non-dramatic poem in English, and a few other books to help us prepare for that big one. Some questions: How did the mid-seventeenth century, probably the most tumultuous decades in the history of modern Britain, transform the culture of the English-speaking world? What is the relationship between literature and the state or between literature and radical politics? Is there a poetics of revolution? How can a poet who seems to be writing for Sunday school--about God and Adam and Eve and the serpent--really have been writing about rebellion all along?

Requirements/Evaluation: one 6- to 8-page paper, one 10- to 12-page paper, regular informal writing, and active seminar participation

ENGL 316 (S) Blackness, Theater, Theatricality

Cross-listings: ENGL 316 AFR 336

Primary Cross-listing

Representations of African American life have pervaded the various genres and tiers of American culture, embodying a carnival of competing attitudes and perspectives. Many oddities and ironies result from this curious history. For example, African Americans as theatrical figures enter American consciousness via the minstrel stage, where white entertainers wearing burnt cork lampooned Negroes to amuse white audiences. Eventually, black performers created their own versions of minstrelsy, black playwrights created dramas more sympathetic to black life, and representations of black life proliferated in every noteworthy medium. This course will consider how attitudes about blackness have informed or deformed theatrical representations of African American life. It will examine major texts by African American writers, considering both their social importance and their aesthetic experiments and innovations. It will range from politically oriented works of social realism such as Theodore Ward's *Big White Fog* and Lorraine Hansberry's *A Raisin in the Sun* to expressionistic protest works like Amiri Baraka's *Dutchman and Slave Ship* and Ntozake Shange's *For Colored Girls* to August Wilson's earnest histories and the post-modern satires of Adrienne Kennedy and Suzan-Lori Parks. Alongside these, we will also consider a variety of comic traditions, ranging from minstrelsy to Spike Lee's film *Bamboozled* and characters created by comedians such as Jackie "Moms" Mabley and Richard Pryor. And how should we assess *Porgy*, a play by the white writer Dubose Heyward, which evolved into America's greatest opera, *Porgy and Bess*? This course will be an ongoing inquiry into the riotous theatricality of American blackness.

Class Format: seminar

Requirements/Evaluation: journal, a 15-page final paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

Enrollment Preferences: English majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 317 (F) Black Migrations: African American Performance at Home and Abroad

Cross-listings: COMP 319 ENGL 317 THEA 317 AFR 317 DANC 317 AMST 317

Secondary Cross-listing

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration

of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: discussion

Requirements/Evaluation: class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

Prerequisites: none; open to all

ENGL 318 (F) Literary Taste and After Taste

Why are some literary works acclaimed or neglected when they first appear, and why do their critical assessments change--sometimes drastically--over time? What does it mean to think of a work as 'before its time'? What is the relation between critical trends and their affinity for particular literary styles? In thinking about these issues, we will consider a few crucial instances: modernist poets and New Critics' celebration of Donne and Marvell over Milton in the early 20th century; 18th and 19th century writers' fascination with medievalism and the Gothic; deconstructionist critics' absorption with Romantic poetry; Marxist and neo-Marxist critics' qualified embrace of realism and critique of postmodernism; and recent and contemporary debates about the relation of aesthetic forms to representations of race, ethnicity, and gender.

Requirements/Evaluation: class participation and two essays, approximately 20 pages of writing

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 319 (F) The Literary Afterlife

Cross-listings: COMP 354 ENGL 319

Primary Cross-listing

What do writers mean when they say that they will live on after death through their books? In this course, we will explore the long history of thinking about literature as a way to compensate for mortality, and we will compare the literary afterlife to religious and philosophical versions of eternity. Many of the writers on our syllabus were anxious about the compatibility of the pursuit of worldly fame with the desire for Christian salvation. We will study how their sense of a conflict between the two afterlives changed over time: from the recovery of pagan antiquity during the Renaissance, across the theological transformations of the Reformation, to the consequences of print. The course deals with some of literature's greatest ambitions--to cheat death, to make a lasting contribution to human culture--but we will often find ourselves caught in an undertow of skepticism. Is writing any less susceptible to decay than human bodies are? If so, is literary accomplishment worth the risk of one's soul? Authors and texts will include Sappho, Ovid, Lucretius, Ecclesiastes, Augustine, Petrarch, Julian of Norwich, Montaigne, Shakespeare's Hamlet and Richard II, Jonson, Donne, and Milton.

Requirements/Evaluation: one 7-page paper, one 12-page paper, in-class presentation, thoughtful participation in discussions

ENGL 320 (S) Marlowe and Shakespeare (WS)

Cross-listings: ENGL 320 THEA 320

Primary Cross-listing

In 1586, at the age of twenty-three, Christopher Marlowe wrote *Tamburlaine the Great*. Over the next six years-probably while moonlighting as a government spy-he went on to produce some of the strangest and also most influential works of English drama. Then in 1593, Marlowe was murdered, stabbed through the eye in a tavern brawl. It is often said that Marlowe's early death, no less than his early success, made the work of Shakespeare possible. In this class we will read Marlowe's *Edward II*, the first popular history play in English, and Shakespeare's *Richard II*; *The Jew of Malta* and *The Merchant of Venice*; *Doctor Faustus* and *Macbeth*. We will look at ways in which Marlovian preoccupations-with lurid violence, with debasement, with self-invention-resurface in Shakespeare, in new forms. In the process we will also take up more general questions of literary influence: What do writers borrow from each other? And how does the knowledge of indebtedness-shared to varying degrees with an audience-affect the meaning and impact of their work? Critical readings will include essays by Harry Levin, Julia Lupton and Stephen Greenblatt.

Requirements/Evaluation: two 5- to 7-page papers; a ten page final paper

Prerequisites: 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 321 (S) Samuel Johnson and the Literary Tradition

Samuel Johnson (1709-1784) has been exceptionally influential not only because he was a distinguished writer of poems, essays, criticism, and biographies, but also because he was the first true historian of English literature, the first who sought to define its "tradition." We will read Johnson's own works and Boswell's *Life of Johnson* to discover Johnson's talents, tastes, and standards as an artist, as a moral and literary critic, and as a man. We next will use Johnson's *Preface to Shakespeare* and *Lives of the Poets* to examine how this great intelligence assessed writers from the Renaissance through the eighteenth century. While reading his commentary on Shakespeare and his critical biographies of Milton, Dryden, Pope, Swift, and Gray, we will analyze selected works by these writers so as to evaluate Johnson's views and sharpen our understanding of the relationship between his standards and values, and the ones we hold today--both individually and collectively.

Requirements/Evaluation: midterm and final papers (15-20 pages total), and a take-home final exam

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 322 (S) Political Romanticism

Cross-listings: ENGL 322 PSCI 234 COMP 329

Primary Cross-listing

What is Romanticism, and how does it relate to the world-changing political upheavals that emerge along with it? Romantic literature emerged around the time of the French and Haitian Revolutions, and many Romantic authors were deeply sympathetic to the democratic principles of freedom and equality that inspired such political uprisings. Yet many also questioned revolutionaries' attempts to realize such ideas by forcibly seizing control of governments. These authors became interested in art and literature as alternative means of bringing about social and political change. In so doing, they invented ideas about the political power of art that are still very much with us today. This seminar examines these ideas through readings of works of Romantic literature, philosophy, and art that brought them into the world, while also considering how arguments subsequently developed for and against political Romanticism inform today's heated debates about the relationship between art and politics. May include works by Kant, Wordsworth & Coleridge, C. Smith, P.B. Shelley, Géricault, Delacroix, Turner, Hazlitt, Hegel, Marx, C.L.R James, Carl Schmitt, Walter Benjamin, and Jacques Rancière.

Requirements/Evaluation: two papers, 6 and 8-10 pages in length, and general participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 323 (S) Romantic Moods

Cross-listings: COMP 373 ENGL 323

Primary Cross-listing

Romanticism is often associated with the celebration of emotion over reason, passion over cold calculation. In fact, for the Romantics, the opposition between reason and emotion made little sense, since they were interested in how moods conditioned all human capabilities, including reasoning, from the ground up. In today's age of mood-altering medications and technologies, like the smartphone and social media, we still have much to learn from Romanticism's appreciation of the importance of mood. This seminar will examine the social, political, historical, and ecological implications of mood through readings of key works of literature, art, and philosophy from the Romantic period together with some 20th and 21st century works that extend the Romantic preoccupation with mood to the present day. Authors may include Burton, Kant, Coleridge, Wordsworth, Blake, Keats, de Quincey,

Schopenhauer, Freud, Arendt, Benjamin, Heidegger, Derrida, and Ngai.

Requirements/Evaluation: two papers, one 6 pages and one 10-12 pages in length, and general participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 325 (F) Joyce, Woolf, and Proust

Cross-listings: COMP 366 ENGL 325

Primary Cross-listing

This seminar focuses on novels by three of the most important writers of modernist fiction: Marcel Proust (*Swann's Way*, the first novel of his sequence *In Search of Lost Time*); Virginia Woolf (*To the Lighthouse*); and James Joyce (*Ulysses*, read in slightly abridged form). By juxtaposing these path breaking texts, we will examine the distinctive yet related ways in which they explore crucial preoccupations of modernism: the threat and the exhilaration of cultural loss in face of social and political transformations in the early twentieth century; the turn to memory, to art, and to objects as stays against de-stabilized subjectivity and as means of re-thinking value; the emergence of new forms of political and sexual identity; the heightening of consciousness to the verge of transport or disintegration; and the roots and perversities of desire. Students who have studied *Ulysses* in a previous course are welcome.

Requirements/Evaluation: regular class participation, two 8- to 10-page papers

Prerequisites: a 100-level ENGL course, a score of 5 on the AP English Lit exam, or a score of 6 or 7 on the Higher Level IB English exam; students who have taken ENGL 360 are welcome

ENGL 327 (F) Experimental African American Poetry

Cross-listings: AFR 301 AMST 307 ENGL 327

Secondary Cross-listing

Contemporary African American poets in various cities and towns across the nation--from New York City to Los Angeles, from Berkeley to Durham, N.C.--are currently producing a vibrant and thriving body of formally experimental work, yet this poetry is largely unknown to readers both within and outside the academy. This formally innovative poetry defamiliarizes what we normally expect of "black writing" and pushes us to question our assumptions and presumptions about black identity, "identity politics," the avant-garde (for example, is it implicitly raced?), formalism, socially "relevant" writing, the (false) dichotomy of form versus content, the black "community," digital poetics, and other issues of race and aesthetics. We will

examine the writings of living poets, who range widely in age, and those of their avant-garde predecessors in the twentieth century. We will also be making links between this poetry and African American music and visual art.

ENGL 328 (F) Austen and Eliot

Cross-listings: WGSS 328 ENGL 328

Primary Cross-listing

Austen and Eliot profoundly influenced the course of the novel by making internal consciousness crucial to narrative form. In this course we will explore Austen's innovative aesthetic strategies and the ways in which Eliot assimilated and transformed them. By placing each writer's work in its political and philosophical context—in Austen's case, reactions to the aftermath of the French Revolution, in Eliot's, to the failed mid-century European revolutions and the pressures of British imperialism—we will consider how each writer conceives social and historical exigencies to shape comedies and dramas of consciousness. Readings will include Austen's *Pride and Prejudice*, *Emma*, *Mansfield Park*, and *Persuasion*; Eliot's *The Mill on the Floss*, *The Lifted Veil*; and *Daniel Deronda*; selected letters and prose; and critical essays.

ENGL 329 (S) Sexuality and US Literatures of the 19th Century

Cross-listings: WGSS 329 AMST 349 ENGL 329

Primary Cross-listing

If homosexuality and heterosexuality, as it is commonly argued, only came into being as legible identities at the end of the nineteenth century, what

constituted "sexualities" before that? This course will explore how sexualities were expressed, regulated, denied and embraced "before identity" through reading closely some of the most central literary and cultural works of the period alongside a set of methodologically and theoretically diverse critical works that engage this query. Some questions we may explore include: What counts as sex and why would that be important to understanding a work of literature? What effect does race, ethnicity, gender, class and other differences make on sexual expression and regulation? How does literature itself represent, theorize, and respond to discourses of desire? Authors whose works we may explore include Emily Dickinson, Frederick Douglass, Harriet Jacobs, Henry James, Herman Melville, and Ralph Waldo Emerson.

Class Format: seminar

ENGL 330 (S) Renaissance Literature in Global Perspective

The Renaissance is usually seen as a decidedly Western "rebirth": the moment in which the emerging nations of modern Europe define themselves by both their connection to and their distance from the classical heritage of Greece and Rome. What might it mean, then, to understand the Renaissance also as shaped by a global network of interactions among Western and non-Western societies, economies, and cultures? In this course our focus will be on literature in the broadest sense, including lyric poetry, epic, and drama, but also travel reports, royal memoirs, and philosophical histories as means of imagining the shape of the world, familiar and unfamiliar. We'll begin by considering Europe's eccentric place within the larger Afro-Eurasian cultural system of the late Middle Ages, and how what we call the Renaissance emerges from a sense of linkage to as well as separation from the traditions of the Islamic world and beyond. We'll then examine the intense and troubling interrelation between Renaissance writing's intellectual dynamism and the often catastrophic effects of Europeans' encounter with what was for them a New World in the Americas. Finally, we'll think about whether or not it makes sense to see the European Renaissance as one facet of a broader global process, similar to concurrent movements of cultural expansion and hybridization such as in Mughal India. Authors to be studied may include Petrarch, Boccaccio, Chaucer, Ibn Khaldun, Thomas More, Babur, Mira Bai, Marguerite de Navarre, the Inca Garcilaso, Marlowe, and Camoes. (All readings in English.)

Requirements/Evaluation: two papers (15-20 pages total); regular short responses

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

ENGL 331 (F) Romantic Culture

The Romantic period--1780 to 1830, roughly--is one of the great watershed moments in western culture. Romantic writers obsessed over the same things we do: the profit and power resident in human interactions with the natural world, for instance, or the spiritual significance of our inner lives, or the terrors and exhilaration of political and social activism. Romantic writing is durably relevant and, frequently, durably and interestingly weird. We will read a lot of poetry, and paintings and other examples of Romantic expressive culture will comprise a significant part of the course materials.

Requirements/Evaluation: class participation and three papers, the last being longer than the first two

ENGL 332 (F) Writing in the Margins: Race, Performance, Playgiarism (DPE)

Cross-listings: COMP 358 THEA 332 ENGL 332

Secondary Cross-listing

There is no such thing as an original play. So says playwright Chuck Mee. Someone else, certainly, said it before him. What does it mean to own a story? This seminar/studio course proceeds from a historical understanding that writing and performance are, and have always been, practices of plagiarism. We begin by looking at how bodies, thoughts, and words come to be understood as ownable property in the modern era, and how that process of commodification is inextricably tied to colonialism and the production of race. How do performance and bodily practices trouble our ideas about individual ownership? We look to writers and other artists of color who have plundered "classic" texts and radically reclaimed the colonial canon. We will read intertextual works by Suzan-Lori Parks, Young Jean Lee, Salman Rushdie, Cherrie Moraga, and others. Taking these artists as inspiration, students will choose a text as source material and write in the margins of that text to create new, re-visioned work.

Requirements/Evaluation: a 5-page paper, a performance analysis, a short creative work, and a longer final creative work

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: if the class is overenrolled, students will submit a letter of interest in the class

ENGL 333 (F) The Nineteenth-Century British Novel

Cross-listings: WGSS 333 ENGL 333

Primary Cross-listing

In nineteenth-century Britain, the novel took on the world. Shaking off its early disrepute, and taking advantage of growing literacy and innovations in production and distribution, it achieved in this period an unrivalled synthesis of mass appeal and aesthetic ambition. Its representational aspirations were breathtaking: attempting to comprehend in its pages the dizzying complexity of new social, political, and economic structures, as well as to delineate in finest detail the texture of individual lives and minds. In an age obsessed with the social, it engaged directly with the most compelling social issues of the day, including industrialization and the gap between rich and poor, the role of women, nationalism and imperialism, and more broadly, the very nature of historical change itself. But it did so, for the most part, by telling fine-grained stories of ordinary men and women, people trying to make a living, worrying about their families and their neighbors, facing illness and death, and falling in--and sometimes out of--love. Since so many of these stories of everyday life are familiar as, we will work hard to focus on what is strange and specific about the fiction of the nineteenth century, while also recognizing the roots of much that is modern in our own culture. We will also take seriously their social ambitions, looking especially at the ways they formulate, promote, and contest their readers' understanding of themselves as subjects and agents of an ongoing social history.

Requirements/Evaluation: flexible writing requirement includes options for short essays, journal, research paper and exam

ENGL 334 (S) The Orientalist Sublime and the Politics of Horror

Cross-listings: COMP 324 ENGL 334

Primary Cross-listing

Islamophobia is on the rise once again, but its history is long and storied. This course will look at how we got here by asking simple questions: how do we name those things that are beyond the grasp of reason, outside the realm of intelligibility? How do we attempt to domesticate that which is foreign or other? What, to Western Europeans, was the deep mysterious Orient but a new instance of the sublime? What is the Arab world to Americans now? In this seminar, we will take up the inheritance of the eighteenth-century fad in Europe for all things Oriental that followed the translation of *The Arabian Nights* into French in 1707. We will read the *Nights* alongside Edmund Burke's and Immanuel Kant's theories of the sublime and writings on the French Revolution in order to investigate the relationship between the real politics of Empire and the politics of imperial representation. Raced and gendered imaginaries will play a crucial role in our study. In aiming to understand how literature and art deal with the magisterial, the infinite, the unmapped, the horror, and the mystery of the sublime East, we will touch on important writers and artists in the long history and aftermath of European Orientalism from the eighteenth century to the present. Authors and artist include Daniel Defoe, Mary Wortley Montague, Eliza Fay, J.A.D. Ingres, Eugene Delacroix, Mary Shelley, William Beckford, Comte de Lautréamont, Edgar Allan Poe, Wilkie Collins, Richard Marsh, E.M. Forster, Jorge Luis Borges, and Salman Rushdie.

Requirements/Evaluation: one 2- to 3-page provocation paper to be revised into a formal essay of 5-6 pages following consultation; one final research paper of 10-12 pages on a topic developed out of the course materials

ENGL 335 (F) The Great Debates: African American Literary Criticism

This course foregrounds the central debates, key questions, and methods that have been vital to the field of African American literature. We will ground our readings of fiction within African American literary theory and criticism from the 1920s through the present. This course is organized around four moments: (1) articulations of an emergent black critical aesthetic in the 1920s, (2) assertions of black nationalism and black feminisms as critical

imperatives in the 1970s and beyond, (3) considerations of the value of structuralism to black narratives in the 1980s, and (4) investments in queer theory, Afro-pessimism, and the turn to affect in our current moment. We will engage such questions as: What is the role of the critic and of criticism and theory? How do we account for multiple interpretations of texts? Texts will be paired with criticism from various moments, which will allow us to interrogate the questions of language, signification, politics, embodiment, and nationalism that maintain this robust field of inquiry.

Requirements/Evaluation: three short papers, one research paper totaling at least 10 pages, and one class facilitation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 336 (F) Escape, Escapism, Escapology, and the Contemporary American Novel

One prestigious set of contemporary American novels seems to confuse escape (evasion of real danger, such as Nazism or slavery), escapology (evasion of invented dangers, e.g. Houdini's art), and escapism (failure to confront real dangers). Some of these books have hyperbolic titles (*The Amazing Adventures of Cavalier and Clay*, *The Brief Wondrous Life of Oscar Wao*, *A Heartbreaking Work of Staggering Genius*), as if to suggest escapist or escapological fantasies about political or existential dangers that require real escaping. What's going on? We'll discuss the conceptual difficulties of escaping in a globalized world; and in particular, we'll discuss the resistance of contemporary American novelists to contemporary forms of messianism (or a place of return) and utopianism (or a place of departure). Besides the hyperbolically named texts, we will probably read Emma Donoghue's *Room* and Colson Whitehead's *The Underground Railroad*. Film paradigms will probably include *The Sound of Music* and *Life is Beautiful*.

Requirements/Evaluation: three formal papers and contribution to class discussions

ENGL 337 (S) The Social Life of Renaissance Poetry

What is the relationship between interior life and the public sphere? Many of the accomplishments of Renaissance poetry are inward-facing: psychological intensity, religious devotion, eroticism, the discovery of nature as a space of retreat. This writing was not produced by solitary geniuses, however, but rather by men and women whose texts were embedded in social networks. We will consider social spaces of poetic production, including court, country house, city, and coterie, as well as transnational spaces created by literary influence, cultural exchange, and travel. Authorship, style, commerce, patronage, privacy, sexuality, marriage, censorship, and the history of the book will be our conceptual preoccupations. Poets will include Petrarch, Wyatt, Elizabeth I, Sidney, Spenser, Donne, Shakespeare, Jonson, Marvell, and Milton.

Class Format: seminar

Requirements/Evaluation: one 7-page paper, one 12-page paper, in-class presentation, thoughtful participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

ENGL 338 (S) Literature of the American Renaissance

Cross-listings: COMP 337 ENGL 338 AMST 338

Primary Cross-listing

The 1840s and '50s have often been described as "the American Renaissance" because of the breathtaking explosion of literary achievements in that period, which included *Walden*; *Moby-Dick*; *The Scarlet Letter*; *The Narrative of the Life of Frederick Douglass*; and *Uncle Tom's Cabin*, to say nothing of the short stories of Poe and the groundbreaking poetry of Walt Whitman and Emily Dickinson. For the first time, American writers were broadly the equal or more of their European counterparts. We will explore the distinctive character of this achievement, paying close attention to the widespread belief in the transformational power of language, and the opportunities it offered to refigure both personal and political identity in a time when the American experiment often seemed on the brink of collapse.

Class Format: discussion

Requirements/Evaluation: in addition to active class participation, students will be required to submit two comparative essays (of 8 and 12 pages), and to complete a 24-hour take home final

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors; American Studies majors; Comparative Literature majors

ENGL 339 (S) Black Counterpublic Sphere in Early America (DPE)

Cross-listings: ENGL 339 AFR 339

Primary Cross-listing

This course examines the emergence of black writing and chronicles the major movements of African American print culture from the early American republic to the antebellum era. We will investigate what Joanna Brooks identifies as a distinct tradition of black publication, or a black print "counterpublic" sphere, and determine how this counterpublic emerges around questions of agency, humanity, and the law. We also will consider its role in setting and sustaining communal and intellectual agendas for black people through our engagement with such questions as: how did print culture become central to liberation efforts in early America? And how did black people participate through print in the making of the early republic and the transatlantic exchange of ideas? We will discuss such authors as Briton Hammon, Phillis Wheatley, and Olaudah Equiano. Collaborating with Williams College Special Collections, we will analyze a broad range of literary forms and documents (e.g. pamphlets, orations, epistles, and sermons) and study the institutions that made early black print publication possible.

Requirements/Evaluation: three critical response papers of two pages each and a culminating research project with Special Collections

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

ENGL 340 (S) Elizabeth Bishop in the Americas (DPE)

Cross-listings: WGSS 340 AMST 340 COMP 342 ENGL 340

Primary Cross-listing

Elizabeth Bishop has emerged as one of the most important poets of the 20th century. She is admired not only for her dazzling mastery of the craft but also her adventurous life as a world traveler. Her more than two decades living in Brazil and translating the culture and literature of that country for a North American audience, for instance, make her life and work a rich focal point for cross-cultural study. At the center of the course will be Bishop's stunning meditations on childhood, memory, travel, lesbian sexuality, gender identity, ecology, and race and class in the U.S. and Brazil. We will look at how Bishop intertwines personal and global historical encounters in order to raise serious ethical questions about our shared history of conquest and sense of place in the Americas from the 16th century to the Cold War period of the twentieth. What is ultimately at stake in our claiming of a "home"? We also read a number of the writers in North and South America who were closely connected to Bishop, from Robert Lowell and Ernest Hemingway in North America, to Pablo Neruda and Clarice Lispector in South America. Ultimately, we study how craft, poetic process, and an ethical eye on the world can open up the study of poetry and poetics in the 21st century.

Class Format: three hours per week, in addition to small group discussion and archival research

Requirements/Evaluation: two short papers of 4-5 pages, one longer critical research paper of 10-12 pages, three to four discussion posts (300-500 words)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English, Comparative Literature, Women's, Gender, and Sexuality Studies, American Studies majors

SEM Section: 01 TF 1:10 pm - 2:25 pm Bethany Hicok

ENGL 341 (S) American Genders, American Sexualities

Cross-listings: AMST 341 WGSS 342 ENGL 341

Primary Cross-listing

This course investigates how sexual identities, desires, and acts are represented and reproduced in American literary and popular culture. Focusing on two culturally rich periods--roughly 1880-1940 (when the terms "homosexual" and "heterosexual" came to connote discrete sexual identities), and the contemporary context of the "postmodern" 21-century--we will explore what it means to read and theorize "queerly." Among the questions we will ask: What counts as "sex" or "sexual identity" in a text? Are there definably lesbian, gay, bisexual, queer or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has "queerness" proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular historical events, such as the rise of sexology, the Harlem Renaissance, and the emergence of a transgender movement have had on queer cultural production. Readings may include works by the following authors: Butler, Cather, Diaz, Ferguson, Fitzgerald, Foucault, Freud, Hammonds, Hughes, James, Larsen, Lorde, Muñoz, Rich, Rodriguez, Sedgwick, and Stein, and as well as screenings of contemporary videos and films.

Class Format: discussion/seminar

Requirements/Evaluation: active class participation, several short writing assignments, two 5-page papers, and one 8- to 10-page paper

ENGL 342 (S) Race and Feeling in Twentieth Century Literature

Cross-listings: AFR 345 ENGL 342

Primary Cross-listing

Although we now take for granted that race is socially constructed, the terrain of racial feeling is less certain. In this course, we recognize that states of feeling are also socially constructed; they are marked and shaped by race and other categories. Questions concerning the circulation of feeling between individuals and their generative possibilities have preoccupied sociologists, psychologists, and literary theorists since the mid-1990s, and we will take up where they left off. In this course, we will study the ways in which literary representations of shame in African American literature offer insight into the interior lives of individuals who have been stigmatized by histories of disempowerment, trauma, and the real or imagined racialized gaze. We will analyze the influence of shame in works by such authors as James Weldon Johnson, Nella Larsen, Alice Walker, James Baldwin, Sherley Anne Williams, Phyllis J. Perry, Toni Morrison, and E. Lynn Harris, and we will engage the ways in which shame, and its correlative feelings --- guilt, pride, humiliation, and love --- emerge in texts through various formal and aesthetic choices. We will also engage such theorists as Eve Kosofsky Sedgwick, Sara Ahmed, Sianne Ngai, Heather Love, Darieck Scott, Erving Goffman, and Melissa Harris-Perry to assist us in our inquiry into the intersections of race, feeling, and literature.

Requirements/Evaluation: active class participation, two short essays of scholarly commentary on critical theory, midterm exam, 8- to 10-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 343 (S) Whitman and Dickinson in Context

In this tutorial, we will read closely the works of two of the most influential and fascinating poets in the U.S., Walt Whitman and Emily Dickinson. In addition to studying in depth their poems and other writings--in Whitman's case, his essays, in Dickinson's, her letters--we will delve into some of the major critical debates surrounding their work, both individually and when compared to one another. For example, Whitman is often viewed as perhaps the most public nineteenth-century American poet, whereas Dickinson is regarded as perhaps the most "private." We will interrogate this assumption, exploring how each poet represents publicity and privacy in their work, as well as their efforts to "perform" and/or reform the American self. We will also examine how each poet engages questions of gender and sexuality, as well as contemporary debates surrounding such issues as abolition/slavery, women's suffrage, temperance, and territorial expansion. Finally, we will explore Whitman and Dickinson's relation to significant literary and philosophical movements of the period, including transcendentalism and the culture of sentiment. Throughout the course, emphasis will be on analyzing and generating interpretations of Whitman and Dickinson's works, constructing critical arguments in dialogue with other critics, formulating cogent written critiques, and carrying on an oral debate about a variety of interpretations. Students will meet with the instructor in pairs for an hour each week. They will alternate between writing 5- to 7-page papers and commentaries on their partner's papers.

Requirements/Evaluation: five 5- to 7-page papers, final paper, oral presentation and critique

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 344 (S) Aestheticism & Decadence

Cross-listings: COMP 364 ENGL 344

Primary Cross-listing

"Fin de Siècle": Despair over a seemingly perilous decline in moral standards, scandalous forms of art and writing, anxieties brought on by Britain's uneasy relation to its colonies, and the emergence of new dissident sexual and social identities, led some to fear (and others to celebrate) that the ways of Victorian Britain were not long for this world at end of the 19th century. This course will consider two loosely affiliated artistic movements, aestheticism and decadence, as responses both scandalized and scandalizing to this exhilarating period. The terms themselves are elusive; so, much of our work will entail tracing out the multiple and often contradictory uses of them. Do they designate a distinct cultural and historical moment, a loose set of writers and artists, a set of thematic preoccupations? Or, might we better understand aestheticism and decadence as a style of writing, or even of the self--one we are as likely to find in 21st-century New York as 19th-century London? We'll read writers such as Oscar Wilde, who reveled in amoral manifestos like "art for art's sake" by elevating artifice and shallowness to first principles of life; as well as Sherlock Holmes, who pursued something like "detection for detection's sake". Our reading will range across novels, plays, poetry, essays, and works that seem to exceed or fall short of those genres, all in the period that gave us both science fiction and the detective story. We'll be especially interested in attempts to rethink traditional social bonds in works that value solitude over sociality, the transient encounter over the enduring relationship, new forms of affective communities, and to think about how literary form might relate to those efforts. Along with fiction, essays, and drama, we'll explore their interrelation with the broad and compelling range of visual art produced in this period. Likely authors include: Huysmans, Wilde, H.G. Wells, Darwin, Conan Doyle, RL Stevenson, Kipling, Edith Wharton.

Requirements/Evaluation: two papers (one shorter, one longer), a series of shorter response papers, regular and substantial contributions to class discussions

ENGL 345 (S) Shakespeare's Women

Cross-listings: WGSS 345 ENGL 345

Primary Cross-listing

Shakespeare's plays portray a remarkably wide range of female characters from serving women to queens, from innocent, subservient young women to powerful authoritative adults. His plays explore female friendships, parents and children, love affairs and marriages, male actors playing female roles and female characters playing male roles. Looking closely at five plays--*Twelfth Night*, *Much Ado Nothing*, *Hamlet*, *Macbeth*, *Antony and Cleopatra*--we will examine the ways in which attitudes toward female stereotypes, sexuality, gender, subjectivity, social norms and performance evolve as Shakespeare's poetic style and dramatic technique mature, and the genre shifts from comedy to tragedy.

Class Format: tutorial

Requirements/Evaluation: active engagement in tutorial sessions, five 4- to 5-page papers, and five 1- to 2-page responses

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 346 (S) Negative Affects in African American Literature

Cross-listings: AFR 347 ENGL 346

Primary Cross-listing

"My pessimism was stronger than my longing," wrote Saidiya Hartman in her genre-breaking *Lose Your Mother* in her search for the afterlife of kinship in the remains of a Ghanaian slave fort. In this course we will discuss a mixture of contradictory "bad" feelings burdening the individual and the collective; for example, how hope and desire compete in Hartman's statement with habituated disappointment and exhaustion. How do black subjects creatively overcome the racial foreclosure to write and recite violence, rage, refusal, anxiety, depression, idleness, grief, silence, etc.? And, further, how do we make sense of the sorts of affects that become negative when practiced by black subjects, such as love, empathy, and desire? Together, we will explore interventions by critical theorists of blackness, gender, and sexuality including Saidiya Hartman, Darieck Scott, Abdul JanMohamed, Christina Sharpe, Frantz Fanon, Ann Cvetkovich, Heather Love, and Lauren Berlant to assist us in confronting the sometimes perilous terrain of negative expression for black subjects. Primary texts will include work by Toni Morrison, James Baldwin, Kara Walker, Jamaica Kincaid, and Richard Wright. This course will be driven by student discussion and collaboration.

Requirements/Evaluation: one 10 page paper, one four page paper, engaged feedback process, presentations, thoughtful class participation

ENGL 347 (S) Big Game: Adventure, Empire, Ecology (DPE)

Cross-listings: COMP 387 ENVI 347 ENGL 347

Primary Cross-listing

Big Game: Adventure, Empire, Ecology asks how the era of imperial expansion and the study of "natural history" leads into our contemporary ecological crisis. We will begin with readings of influential colonial travel and adventure narratives like Robinson Crusoe, the captivity narrative of Mary Rowlandson, sections of Darwin and Captain Cook's travel journals, and in-class work with archival materials like the Indian Botanical Survey Flora and the photographs of Subhankar Banerjee. In the first weeks, we will consider how the aesthetics of adventure circulated throughout the British empire in both the East Indies and India, and ramifies elsewhere in the Dutch, French, Spanish, Portuguese and Belgian holdings. We will conclude with a suite of readings through which we will attempt to locate a productive intersection between ecocriticism and postcolonial studies, drawing together sensationalist disaster journalism with environmental activism emerging from the Global South. This course will be especially of interest to students in English, Comparative Literature, and Environmental Studies.

Requirements/Evaluation: presentation, short paper and revision, final research project

Prerequisites: one lower-division literature or related course

Enrollment Limit: 25

Enrollment Preferences: students with related course experience

Expected Class Size: 25

ENGL 348 (S) Women, Men and Other Animals (DPE)

Cross-listings: ARTH 348 ENGL 348 WGSS 348 SCST 348 STS 348

Secondary Cross-listing

In this seminar, we will together learn to be "animal critics." We will explore ways in which human groups and interests, particularly in the United States, have both attached and divorced themselves from other animals, considering such axes as gender, race, ability, and sexuality as key definitional foils for human engagements with animality. What are the "uses" of "animals" for "us," and precisely who is this "us"? How and when are some willing to see themselves as animal--indeed, under what political conditions do they embrace it? What is the history of unique, often asymmetric, interdependencies between human animals and nonhuman animals? How do actual lives of humans and non-human animals merge and clash with the rhetorics and visualities of human animality? We will examine both "everyday" animality and the forms of animality that stand out only today in retrospect, in their exceptionality, or upon reflecting on structures of privilege. We will build a critical animal studies vocabulary from a range of readings in science, philosophy, art, feminism, indigenous studies, critical race, geography, fiction, film, rhetoric, history, activist movements, disability studies, postcolonial studies, and examine both visual and narrative cultural production.

ENGL 352 (F) Anticolonial Avant Gardes: Literature, Film, Theory

Cross-listings: COMP 353 ENGL 352

Primary Cross-listing

Chic, sophisticated, experimental, bohemian, radical: the words we think of when we think of the "avant garde" call to mind the great cities of Europe and America in the early decades of the twentieth century. The usual suspects hail from Paris, London, Moscow, Rome, and New York, but many of them claimed to be mining the "naïve arts" and primitive energies of the "uncivilized societies" in Africa, Asia, and beyond. Can we recover these Others, these understudied but essential artists, as more than unconscious transmitters of unfamiliar cultures, and locate in their work a distinct set of aesthetic and political practices? Can we trace the global vectors of a representational strategy that is not Euro-American but is nevertheless politically and formally radical? Writers, artists, and filmmakers like Jean Toomer, G.V. Desani, Amos Tutuola, Émile Habiby, Jean Genet, Aimé Césaire, Haroun Farocki, Patrick Chamoiseau, Claire Denis, and Antjie Krog will help us locate and consider the explosive diversity of a broader avant garde's experiments with image, sound, and language, as well as how these texts have contributed to and put pressure on more traditionally Western modernisms. In posing a question about the geographical and cultural purview of the Avant Garde around the time of the world wars, this class encourages students to interrogate the transmissibility of aesthetic practice in an age of global upheaval. We will look to writers and artists working in a variety of traditions and, equally importantly, against those traditions, in order to examine how power and resistance inflected the avant grade strains of modernist expression.

Requirements/Evaluation: class participation; one short 2- to 3-page provocation paper to be revised into a formal 5- to 6-page essay; presentation; final 10- to 12-page research paper

ENGL 353 (S) The Brontës

Cross-listings: ENGL 353 WGSS 353

Primary Cross-listing

Around 1845, three sisters in a remote town in Yorkshire effectively converted their father's humble parsonage into a family writers' colony. In 1846, each published her first novel--two of which would go on to become major classics. Within 8 years, all three sisters were dead, but by then they had produced seven of the most formally innovative, socially challenging, original and powerful works in English fiction. We will read them all, from Charlotte's best-selling love story, *Jane Eyre*, to the underrated Anne's brilliant and disturbing anatomy of an abusive marriage, *The Tenant of Wildfell Hall*, to Emily's singular masterpiece *Wuthering Heights*, as well as their poetry and selections from the voluminous fantasy fiction they created together as children. We will also read Elizabeth Gaskell's acclaimed 1857 *Life of Charlotte Bronte*, the first full-length biography of a woman novelist by a woman novelist, which began the process of making the Brontës the cult figures they remain today. Reading these works together in the bicentennial year of Anne's birth, we will consider how their shared efforts helped all three sisters to push through boundaries few other women writers had dared to challenge. In a similar spirit of collaboration, we will mix critical and creative writing in our responses to these works.

Requirements/Evaluation: discussion, two critical essays and two short creative pieces

ENGL 354 (F) Contemporary American Fiction

A study of recent American fiction since World War II. The main topic will be the shift from modern to postmodern narration, and the uses of experiments in narration for discriminating private and public craziness. We shall be reading Joseph Heller's *Catch-22*, Vladimir Nabokov's *Pale Fire*, Thomas Pynchon's *The Crying of Lot 49*, Denis Johnson's *Jesus's Son*, Toni Morrison's *Beloved*, Don DeLillo's *White Noise*, and Raymond Carver's *What We Talk About When We Talk About Love*. Though the class is not a seminar, all class meetings will be centered on discussions of the books.

Requirements/Evaluation: class participation, a 4- to 6-page paper, a 6- to 8-page paper, and a final exam

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: senior, then junior English majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ENGL post-1900 Courses

Not offered current academic year

ENGL 355 (S) Asexuality and Other Absences

Cross-listings: WGSS 355 ENGL 355

Primary Cross-listing

What is asexuality? The asexual individual is commonly defined as "one who does not experience sexual attraction" but, under examination, this keyword quickly gives way a growing body of meanings, feelings, affiliations, and associations. How might asexuality transform or expand our understandings of sexuality, desire, romance, legibility, health, and violence? This seminar will explore the emergent field of asexuality studies while examining various kinds of sexual and romantic absences in contemporary fiction, film, and new media with particular attention to race and disability. How might asexuality disrupt or reify our conceptions of these terms of embodiment?

Requirements/Evaluation: kindness and generosity; engaged classroom presence; online discussion; annotated bibliography; roundtable discussion; visual object analysis; comic memoir; final presentation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: ENGL and WGSS majors

ENGL 356 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: AMST 323 COMP 322 ENGL 356 ARTH 223 AFR 323

Secondary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love's *Bayou* and Ho Che Anderson's *King: A Comic Biography*, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and ipads to create their own graphic short stories based on historical and/or autobiographical narratives.

Requirements/Evaluation: class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life)

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ENGL 357 (S) Spirits of Rebellion: The L.A. Rebellion Filmmakers

Cross-listings: AFR 351 AMST 359 ENGL 357

Secondary Cross-listing

When Beyoncé unveiled the *Lemonade* visual album in 2016, her production captured the artistic spirit and gave new life to an earlier work: Julie Dash's *Daughters of the Dust* (1991), a luminous film about three generations of the Gullah people and the first motion picture by a Black woman to obtain wide theatrical release in the United States. Many, however, are unaware of the decades-long cinematic movement to which Dash belongs. In this course, we will devote our critical inquiry to the creative output of the L.A. Rebellion, a group of Black cinematic artists trained at the UCLA Film and Television School between the 1960s and 1990s. Our visual journey will take us through a diverse set of filmmakers like Charles Burnett, Ben Caldwell, Barbara McCullough, Julie Dash, Zeinabu irene Davis, Haile Gerima, Aliile Sharon Larkin, Billy Woodberry, among many, many others, and how they sought to not only redefine the Black image on-screen but also reimagine the infinite possibilities of Blackness. We will pay close attention to the heterogeneity of genres, styles, and techniques that they put into practice from narrative to neorealism to documentary to avant-garde/experimental to African and African American musical and storytelling traditions. We will explore the various social and political issues that were represented by their films including: racial and class oppression, woman of color feminisms, Black Power, Afrocentrism, anti-colonialism and decolonization, police brutality and mass incarceration, radical social movements and coalition building, and the importance of community-based art and film practices. Finally, we will touch upon some of the recent works that have been inspired by the L.A. Rebellion, including the aforementioned *Lemonade* and Barry Jenkins' *Moonlight* (2016). Our viewership will be supplemented with readings in Black social and cultural criticism.

Requirements/Evaluation: attendance and participation; weekly online journal responses (1-2 pages); midterm essay (5-7 pages); final project

Prerequisites: previous courses in American Studies, critical studies in race and ethnicity or cultural studies, or permission of the instructor

ENGL 358 (S) The Myth of Venice and its Modern Aftermath

Cross-listings: ENGL 358 GBST 356 COMP 356

Secondary Cross-listing

The Republic of Venice existed for over a millennium, during which time its historical image came to be enmeshed with mythical representations, such as the image of the city rising out of the waters of the lagoon, or the personification of the city itself as a Queen of the Adriatic. This course begins in the year 1797, at the end of the Republic, and the emergence of an extensive body of literature centered on Venice and its mythical facets. Readings will include Romantic views of Venice and the 20th century reshaping of the literary myth surrounding the city. A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than the focus on a nostalgic evocation of the death of the Republic, became a premise of exploration for literary modernity. Toward the end of the course we will leave the lagoon to explore the postmodern recreations of Venice around the world (from Los Angeles and Las Vegas, to Macao, Yongin, and beyond) Readings will include excerpts from Byron's *Childe Harold's Pilgrimage*, John Ruskin's *Stones of Venice*, as well as full readings of Thomas Mann's *Death in Venice*, Marinetti's Futurist manifestos, Italo Calvino's *Invisible Cities*, and more. We will also examine movies, such as Luchino Visconti's *Senso* and *Death in Venice* and Nicholas Roeg's *Don't Look Now*. This course is offered in English; all texts are provided in translation.

Requirements/Evaluation: mini-papers, one individual presentation, mini-presentations, midterm, participation, final project

ENGL 359 (S) Unrequited Love

In unrequited love, one confronts, in a deprivation as primal, almost, as hunger, the limits of one's power to shape the world, discovers the radically alien nature of others' desires and minds. This course will explore the many complexities of that painful mismatch, and the ways its unresolved contradictions--one is at once singular and replaceable, for instance, trapped in a place simultaneously fated and contingent--leads one to large, intractable literary and aesthetic questions (character, psychology, social embeddedness, ethics). Readings will include texts from many historical periods, fields, and genres: philosophy, psychoanalysis, novels, poems, opera, film, for example.

Requirements/Evaluation: about 20 pages of writing, distributed as students wish, between midterm and finals; there may also be a few short (less than a page) informal writing responses

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

ENGL 360 (S) James Joyce's "Ulysses"

This course will explore in depth the demanding and exhilarating work widely regarded as the most important novel of the twentieth century, James Joyce's *Ulysses*, which both dismantled the traditional novel and revitalized the genre by opening up new possibilities for fiction. We will discuss the ways in which compelling issues of character and theme (e.g., questions of heroism and betrayal, sexuality and the politics of gender, civic engagement and artistic isolation, British imperialism and Irish nationalism) are placed in counterpoint with patterns drawn from myth, theology, philosophy, and other literature, and will consider the convergence of such themes in an unorthodox form of comedy. In assessing *Ulysses* as the outstanding paradigm of modernist fiction, we will be equally attentive to its radical and often funny innovations of structure, style, and narrative perspective. In addition to Joyce's novel, readings will include its epic precursor, Homer's *Odyssey*, as well as critical essays. Students unfamiliar with Joyce's short novel *A Portrait of the Artist as a Young Man*, which introduces characters later followed in *Ulysses*, are urged to read it in advance of the course.

Requirements/Evaluation: active participation in class discussions, several group reports, a midterm exam, a 5-page paper, and an 8- to 10-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 20

Enrollment Preferences: English majors

ENGL 362 (S) Approaches to W. B. Yeats

We will read the poetry and selected prose and plays of William Butler Yeats. Widely regarded as one of the most influential English-language poets of the twentieth century, Yeats was also a novelist, playwright, critic, autobiographer, and a founder of the Irish national theater. We will consider how his writings were shaped by, and responded to, the literary and political contexts of his time; how he conceived of authorial selfhood, its construction in language, and the functions of literature; and his transactions with his contemporaries (from Wilde to Pound to Auden). Applying a range of critical and theoretical approaches to his writings, and giving particular attention to textual materialism, we will study closely Yeats's compositional process and his habits of repeated revision of published works, as well as his formal techniques.

Class Format: tutorial

Requirements/Evaluation: 5-7 page papers every other week, assessment of partner's essays, tutorial performance, and one substantial revision

ENGL 363 (S) Literature and Psychoanalysis

Cross-listings: ENGL 363 COMP 340

Secondary Cross-listing

The British psychoanalyst D. W. Winnicott once wrote: "It is a joy to be hidden, and a disaster not to be found." This course will explore the many ways in which writing enacts this paradox, examining in the process several main strands of psychoanalytic thought in relation to literature that precedes, accompanies, and follows it in history. Approximately the first three-fourths of the course will involve close readings of theoretical and literary texts, which will be shared in a seminar format. In the latter portion of the course, students will work with each other and with the instructor on analyzing the processes of reading and writing as they produce original psychoanalytic readings of texts of their choice. *All readings in English.*

Class Format: discussion

Requirements/Evaluation: active engagement with the material and with each other, plus two 5-7-page papers, one 8-10-page paper, and a symposium presentation

ENGL 365 (S) Wonderland(s): *Alice* in Translation

Cross-listings: COMP 345 ENGL 365 GBST 345

Secondary Cross-listing

"What do you mean by that?" said the Caterpillar, sternly. "Explain yourself!" "I can't explain myself, I'm afraid, Sir," said Alice, "because I'm not myself, you see?"

The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond the developmental and socio-cultural transitions of a child, what happens to *Alice*, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Arihi in Maori, Ai-chan in Japanese, and Paapachchi in Kannada. Then there is the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866: "Friends here seem to think the book is untranslatable." And yet. Over 200 translations later, including Kazakh, Shona, Papiamento, Braille, and Emoji, *Alice* continues to delight children and adults all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll's *Alice* as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, rewriting, faithfulness, and ethics, and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

Class Format: some Friday workshops

ENGL 367 (F) Documentary Fictions

Cross-listings: ARTH 367 ENGL 367

Primary Cross-listing

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's *The Act of Killing* (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

ENGL 368 (S) Ireland in Film

In 1909, James Joyce was briefly the manager of one of Dublin's first cinemas. The medium of film has long attracted Irish writers: as a means to explore and represent the country's political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, to assess the country's newly ascendant film movement. We will consider the impact of commercial considerations, and the powerful influence of British and American films (and especially those offering competing representations of Ireland), on Irish filmmakers. We will also read the literary texts on which some films were based, so as to weigh the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major developments in modern Irish history and culture. Films to be viewed will likely include: *Man of Aran*, *The Informer*, *The Quiet Man*, *Eat the Peach*, *In the Name of the Father*, *Butcher Boy*, *Intermission*, *Into the West*, *The Field*, *The Crying Game*, *December Bride*, *The Commitments*, *Michael Collins*, *Ondine*, *Six Shooter*, *In Bruges* and *The Guard*; and we will also assess one or more short independent films such as *Budawanny* and *Adam and Paul*. Special attention will be given to the work of Neil Jordan, Jim Sheridan, Terry George, and Martin McDonagh.

Requirements/Evaluation: two long papers, four 1- to 2-page shorter responses, class participation

ENGL 369 (S) American Poetry

This course is devoted to studying the work of key figures in American poetry, from Whitman and Dickinson to writers of our own moment, attentive to the social, historical, and aesthetic pressures that shape their work. We will read widely in the major poetic traditions, from Modernism, Objectivism, and the Harlem Renaissance through the mid-century work of the New York School, Beats, Black Arts, Confessional, and Language poets. We'll also keep a close eye on the contemporary scene, in part through interactions with visiting poets. We'll read a few writers deeply, tracing both their inheritances and also the ways they "make it new," in Pound's phrase, and asking what these innovations disclose about the formal, political, and experiential possibilities of poetry as a cultural form in the long "American century."

Requirements/Evaluation: engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor

ENGL 370 (F) Literary and Critical Theory in the Twentieth Century

Cross-listings: COMP 380 ENGL 370

Secondary Cross-listing

From the rise of modern literary criticism around 1900 to the explosion of high theory in the 1980s and 1990s, the twentieth century witnessed an international flowering of new ideas about how to interpret art and literature: Russian Formalism, American New Criticism, French Structuralism and Deconstruction, new varieties of hermeneutic criticism, and a welter of post- prefixed concepts that claim to transcend national boundaries: the poststructural, the postmodern, the postcolonial, the posthuman. What are the ideas associated with these different movements, and how are they connected? Does each represent a radical break with previous ways of reading, or do they actually build on one another and evolve in a systematic way? The course will focus on a very careful reading of essays representing major 20th-century critical schools (and a couple of their earlier precursors), by critics like Plato, Schiller, Shklovsky, Richards, Barthes, Derrida, de Man, Beauvoir, Butler, and Said. Written assignments will encourage you to parse these theories carefully and apply them to the literary texts that most interest you: prose or poetry from any time and place; film, visual art, or architecture; music, new media, or digital media, etc.

Requirements/Evaluation: attendance and active participation, several short response assignments, final project consisting of a scripted oral presentation and a 15-page final paper

ENGL 371 (S) The Brothers Karamazov

Cross-listings: ENGL 371 COMP 331 RUSS 331

Secondary Cross-listing

Widely hailed as one of the greatest novels ever written, Dostoevsky's *The Brothers Karamazov* contains a series of enigmas, not the least of which is precisely who murdered the Karamazov father. In addition to exploring the shared guilt of all four of the brothers Karamazov in the crime of patricide, Dostoevsky poses the most probing questions of his day: Are families tied together merely by blood or by deeper spiritual bonds? Is religious faith possible in an age of reason, science, and technology? Can man's earthly laws ever carry out divine justice? Is humanity prepared to bear the burden of responsibility that comes with freedom? This tutorial will spend an entire semester exploring Dostoevsky's masterwork, and we will read a variety of secondary sources alongside *The Brothers Karamazov*, including history, philosophy, and literary theory. Our goal will be to understand Dostoevsky's answers to these so-called "accursed questions" through the unique artistic form of *The Brothers Karamazov*.

Requirements/Evaluation: completion of weekly reading and writing assignments, as well as active engagement during tutorial sessions

Prerequisites: at least one 200-level literature class

ENGL 372 (F) Taste in the Renaissance

How can we account for taste, and what does taste account for? In the Christian tradition, our knowledge of good and evil comes (as John Milton put

it) "from out of the rind of one apple tasted." What other forms of knowledge does our talk about taste lay claim to, and what (and whom) does taste exclude? In this course, we will sample plays, poetry, and prose texts primarily from early modern England that are caught up in the aesthetic and social dramas of taste. Our primary assumption will be that metaphors of taste and consumption naturalize a set of discriminations pertaining to categories like class, gender, and race; and that by unpacking the cultural dynamics of taste and disgust, we can understand literary style's vital connections to its social contexts. We will consider Renaissance authors' appeals to the language of taste to define themselves through and against the authority of classical antiquity, the competition of the cosmopolitan early modern city, the otherness of the New World, and the transcendence of the divine. Our readings will include authors such as Seneca, Petronius, Martial, Montaigne, Jonson, Shakespeare, Nashe, Donne, Herbert, Marvell, Cavendish, and Milton.

Requirements/Evaluation: one 7-page paper; one 12-page paper; short, informal writing assignments; participation in class discussions; one in-class presentation

ENGL 373 (S) Troubled Spirits

"Trouble" and "spirit" are both words with various and contrasting meanings and surprising overlaps. To be troubled is one thing, to be in trouble can mean several quite different things. Spirit began as breath, yet it transcended breathing. Hoping to soothe and grasp the troubled spirits of their own moment, writers and shamans often seek to conjure up spirits from the past. Some wish to exorcise those spirits, others to be haunted by them. This course will examine the manifestations of troubled spirits in works by American writers, especially African and Native Americans and white Southerners. The authors will include Edgar Allan Poe, William Faulkner, Toni Morrison, Leslie Marmon Silko, N. Scott Momaday, H. P. Lovecraft, Joy Harjo, Alice Walker, Toni Cade Bambara, and Randall Keenan.

Requirements/Evaluation: two or three short papers and a longer final paper of about fifteen pages

ENGL 374 (S) Mysticism: Vision, Writing, History (WS)

Cross-listings: ENGL 374 REL 374 COMP 352

Primary Cross-listing

The promise of God's real presence in the world lies at the heart of Christianity as a messianic and scriptural faith. But mystics, who seek out and bear witness to their own experiences of the divine, have often been viewed with suspicion by church and state authorities. At stake in these confrontations between orthodoxy and the individual witness are questions of knowledge and power. To whom does God speak, who speaks for God, and how can anyone, whether mystic or priest, be certain? We will learn how these questions have inflected certain passages in the history of Christian belief and practice: the flourishing culture of mystical writing by medieval women, the efforts of some Protestant sects to distribute authority more horizontally, and early modern philosophers' criticisms of prophecy and fanaticism. But our deepest concerns will be literary and aesthetic. What modes of writing did mystics use to express what was, in fact, inexpressible? What role did visual art play in visionary experience? And how has mysticism influenced the work two of the twentieth century's most significant theorists of language, Ludwig Wittgenstein and Jacques Derrida?

Requirements/Evaluation: biweekly 5-page papers, biweekly 2-page response papers, thoughtful participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 10

Enrollment Preferences: English majors and those intending to major in English

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 375 (S) Black Masculinities (DPE)

Cross-listings: AMST 350 ENGL 375 WGSS 318 AFR 331

Secondary Cross-listing

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men's sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Requirements/Evaluation: students will be responsible for 2 short papers and a final project

Prerequisites: none

ENGL 376 (F) Landscapes in American Literature

Cross-listings: AMST 376 ENGL 376 STS 377

Primary Cross-listing

This course examines representations of American landscapes in selected texts from the British colonial era to the present. Critical approaches will include narrative theory, formalism, eco-criticism, and science and technology studies. The central questions are: (1) How do authors adapt narrative and poetic forms to the representation of particular landscapes? (2) How do literary landscape representations change when new technologies arise for traversing and transforming them? (3) What effects can literary landscapes have on the landscapes we live in? Landscapes include settlements, cities, wildernesses, "frontiers," suburbia, and infrastructural scenes. Relevant technologies include the postal service, the railroad, the telegraph and telephone, the automobile, commercial aviation, and Skype. Texts may include: letters of Columbus, American Indian creation stories, early American religious texts, captivity narratives, slave narratives, and poems, short stories, and novels from the 17th to the 21st centuries, as different from one another as Dickinson's "Nature-sometimes sears a Sapling-" and Annie Proulx's *Brokeback Mountain*.

Requirements/Evaluation: discussion participation; five brief response papers (~2 pages); a mid-semester essay (~5 pages); a final essay (12- to 15-pages)

Prerequisites: none

ENGL 377 (F) Legacies of the Gothic Novel: Feminism and Horror in the Transatlantic World (DPE)

Cross-listings: ENGL 377 WGSS 377 COMP 377

Primary Cross-listing

Much maligned as a popular or "low" genre at its inception in the late eighteenth century, the gothic form has persisted in its popularity as well as crossed into "higher" forms of modernism, postmodernism, and postcolonialism. In this course, we will read key texts in the gothic mode-Frankenstein, Jane Eyre, and Wuthering Heights among others-and follow the ways in which they are revisited and rewritten by contemporary American and Caribbean writers, filmmakers, and artists. Particularly, we will examine how these texts subvert the realist leanings of Anglo-American narrative fiction and its assumptions of enlightenment rationalism by way of two main processes: narrative hypertrophy and feminist revisions of horror. The class will take up select contemporary criticism on the gothic and horror in literature, film, and art. This course will be of interest to students curious about feminism, postcolonialism, cultural criticism, horror, and comparative literature.

Requirements/Evaluation: presentation, paper plus revision, final research project

Prerequisites: one literature or related course

Enrollment Limit: 25

Enrollment Preferences: any student with relevant coursework in ENGL, COMP, or WGSS

ENGL 379 (F) Mobility and Confinement in Black Women's Personal Narratives

Black women have used personal narratives to negotiate mobility and confinement in different ways from Harriet Jacobs's "escape" into her grandmother's garret in *Incidents in the Life of a Slave Girl* to Maya Angelou's refusal to speak in *I Know Why the Caged Bird Sings*. This course will introduce students to personal narratives by black women in the form of slave narratives, autobiographies, and prison narratives. Prison narratives are an understudied genre of literature by authors such as the activist and former Black Panther Assata Shakur. Focusing on mobility and confinement, we will discover how black women challenge notions of freedom, power, and empowerment through their interrogations of space, voice, and social position. We will examine not only the similarities among the concerns of these writers as women, activists, and artists, but also the differences that separate them due to time, culture, and geography. To assist us in our inquiry, we will engage key works of the anti-slavery, black feminist, and prison abolition movements.

Requirements/Evaluation: active participation in class discussions, weekly journal entries, a midterm exam, a 5-page paper, and an 8- to 10-page paper

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 380 (S) The Art of Modern Crisis

The first half of the twentieth century was marked by extraordinary social and political upheaval. The same era witnessed a feverishly creative revolution in the nature and the strategies of artistic representation. In this course we will examine what these two kinds of crisis have to do with one another: how a wide range of startling innovations in literary and cinematic art may be seen as responses to the particular pressures of the historical crises they represent. Focusing on instances from Britain, Europe, America, India, and/or Africa, we will study such diverse historical crises as the wave of anarchist terrorism around the turn of the century; the Bolshevik revolution; the woman's suffrage movement; World Wars I and II; the Indian independence movement led by Gandhi; and the Cold War. Novels and films will be studied for their distinctive, often dazzling aesthetic strategies for representing such crises, and will be chosen from works by such authors as Joseph Conrad, Andrei Bely, Sergei Eisenstein, Ford Madox Ford, Virginia Woolf, Jaroslav Hasek, Mulk Raj Anand, Elizabeth Bowen, Joseph Heller, and Stanley Kubrick.

Requirements/Evaluation: active participation in class discussions, two 7-page papers, and a final exam

Prerequisites: a 100-level English course, or a score of 5 on the Advanced Placement examination in English Literature or a 6 or 7 on the International Baccalaureate

ENGL 386 (S) Fiction of Beckett and Sebald

Cross-listings: COMP 386 ENGL 386

Primary Cross-listing

This seminar explores the work of two of the most original and influential fiction-writers of the last half of the 20th century, Samuel Beckett and W. G. Sebald. The work of both writers was profoundly influenced by World War II and the Holocaust, and their fiction centers on issues of loss and memory, of decay (of bodies, things, cultures, traditions), of reason and imagination as fragile means of enduring privation. Yet material so sobering and often bleak has rarely been rendered so absorbingly, or with such unorthodox forms of beauty. Their methods for reinventing fiction differ. Beckett increasingly strips his fiction of details of time, place, and even event, and ultimately struggles to free his speaking voice from the burdens of narration itself, the better to focus attention on the simple but logically rigorous, brilliant, often comic effects of his spare language. Sebald, who sometimes called his novels "documentary fiction," fashions a blend of recollection, fiction, geo-cultural history, and dream-like meditation, focused on the decline of European civilizations; his more chromatic prose, marked by obliquity, melancholy, and dry wit, is filled with curious facts and haunting anecdotes. We will read some of Beckett's short fiction and his great trilogy, *Molloy*, *Malone Dies*, and *The Unnamable*; Sebald's major works of fiction, *Vertigo*, *The Emigrants*, *The Rings of Saturn*, and *Austerlitz*; and a few short stories and novellas by precursors or successors such as Kafka, Borges, and Thomas Bernhard.

Requirements/Evaluation: regular class participation, two 8- to 10-page papers

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 387 (F) Catastrophe/Apocalypse: The Movie

The film industry has always appreciated the visual and dramatic possibilities of catastrophe, and over the last few decades the apocalyptic and

post-apocalyptic sensibility appears everywhere in our mass culture, such that being plugged into the zeitgeist might necessarily entail a familiarity with the emerging tropes and assumptions of this subgenre. This course will consider the ways in which such films model for us those moments when our expectations and/or actions collide with the devastating and unforeseeable realities of our physical world and political situation. How do we measure loss when loss occurs at the upper end of the human scale? How do we consider collectively, in either secular or metaphysical terms, the issue of our own complicity in--if not responsibility for--disaster? Films to be studied will likely include W.S. Van Dyke's *San Francisco*, Steven Spielberg's *Schindler's List*, Roman Polanski's *The Pianist*, George Romero's *Night of the Living Dead*, Ridley Scott's *Blade Runner*, Edgar Wright's *Shaun of the Dead*, Michael Heneke's *Time of the Wolf*, Danny Boyle's *28 Days Later*, Alfonso Cuarón's *Children of Men*, Bruce McDonald's *Pontypool*, Yoshiro Nakamura's *Fish Story*, Jordan Peele's *Get Out*, and Joshua Oppenheimer's *The Act of Killing*.

Requirements/Evaluation: four short papers and in-class presentations

Prerequisites: ENGL 203, or 204, or permission of the instructor

Enrollment Limit: 20

ENGL 389 (F) Fiction of Virginia Woolf

Cross-listings: ENGL 389 WGSS 389

Primary Cross-listing

"Let us record the atoms as they fall upon the mind in the order in which they fall, let us trace the pattern, however disconnected and incoherent in appearance, which each sight or incident scores upon the consciousness. Let us not take it for granted that life exists more fully in what is commonly thought big than in what is commonly thought small" ("Modern Fiction"). Virginia Woolf's fiction represents a self-conscious and highly experimental challenge to the conventions of Victorian and Edwardian fiction, in an effort to re-center the novel on lived experience. This course will explore the evolution of the innovative fictional forms by which she tried to bridge the gap between the experience of consciousness and its representation in language. We will also consider the links between Woolf's concern with in the fluidity of consciousness and her interest in gender fluidity and androgyny. We will read most of the major novels, probably including *The Voyage Out*, *Jacob's Room*, *Mrs. Dalloway*, *To the Lighthouse*, *Orlando*, *The Waves*, and *Between the Acts*, together with selected short fiction and critical essays.

Requirements/Evaluation: discussion, weekly journal, three 4- to 6-page essays

ENGL 390 (F) Robert Frost and Seamus Heaney

This seminar closely examines the achievement of two of the most influential poets of the last hundred years: America's Robert Frost (1874-1963), and Seamus Heaney (1939-2013)--the Nobel laureate widely acknowledged as the greatest Irish poet since Yeats. They have garnered high praise from elite literary critics, and also captured the imaginations of a broad reading public. They write in an idiom that is deeply rooted in the ordinary vernacular speech of their respective countries, but rises above it into a universal language that transcends place and time. Their images first focus our gaze on the natural world we can see all around us, but then subtly shift our attention to what can't be readily observed or reliably known. Their poems can

initially appear simple or self-evident in their meanings, but then quietly double-back on us with unexpected forms of mystery and complexity. To get a comprehensive sense of the arc of their careers, we will read most all of their poems, with each class discussion focusing on a few particularly important texts. We will also read some of their essays and lectures on the art and purpose of poetry. Where appropriate, we will attend to the biographical, cultural, and (especially with Heaney) political circumstances that shaped their opportunities as artists.

Requirements/Evaluation: midterm and final papers (roughly 15-18 pages total) and a take-home final exam

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 15

ENGL 391 (S) Democratic Vistas

Cross-listings: ENGL 391 AFR 386

Secondary Cross-listing

This seminar will focus on the ways in which texts create nuanced representations of democratic ideals and practices as well as, of course, representations of the failures of democratic ideals and practices. Our goal will be to explore how literature encourages readers to think about democracy, and what impact that can have on our lives as readers and citizens. To this end, we will study work across five genres--poetry, fiction, non-fiction, photography, and film--to arrange and enhance our sense of how plot, structure, figuration, and allusion occupy themselves with the challenge of the Democratic Vista: which is to say with visions of what democracy is, has been, and has the potential be. Among the texts and authors likely to be studied are Robert Hayden, Ralph Ellison, Toni Morrison, Don DeLillo, Jamaica Kincaid, Ishion Hutchinson, Natalie Diaz, Octavia Butler, Colson Whitehead, Morgan Parker, Nana Kwame Adjei-Brenyahm Teju Cole, and contemporary films such as Ryan Coogler's BLACK PANTHER and Boots Riley's SORRY TO BOTHER YOU.

Requirements/Evaluation: attendance and participation, two short essays, and a 12- to 15-page final paper; additional requirements will include film screenings outside of class, interactive (e.g., Skype, etc.) author visits inside of class, and campus talks germane to the seminar

Prerequisites: none, open to all students

ENGL 392 (F) Wonder

Cross-listings: COMP 392 ENGL 392

Primary Cross-listing

We tend to imagine "wonder" as a naïve, wide-eyed response, something quite distinct from the cold and sophisticated act of critical analysis. In this discussion class, we will consider wonder as an eminently analyzable concept, but one that raises provocative questions about the nature and limits of

our own, distinctly modern forms of critical engagement. The course examines three historical incarnations of "wonder," each involving complex relations among the aesthetic, philosophical, and social domains: the Renaissance tradition on wonder and the marvelous; the eighteenth-century analysis of the sublime; and twentieth-century accounts of the culture of spectacle. We will consider writers such as Shakespeare, Sir Thomas Browne, Wordsworth, Borges, and W.G. Sebald (all wonderful); painters such as Leonardo and Vermeer, the photography of Andreas Gursky and Thomas Struth; films including Lang's *Metropolis* and Scott's *Blade Runner*; and critical or philosophical writers, including Aristotle, Descartes, Kant, and Walter Benjamin.

Requirements/Evaluation: three papers totaling 20 pages

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

ENGL 395 (F) Signs of History

Cross-listings: HIST 395 COMP 395 ENGL 395

Primary Cross-listing

What is an historical event, and how do such events differ from other occurrences? How are historical changes reflected in or produced by literature, art and other cultural forms? Who or what makes history and what is the nature of historical agency? Is history always "written by the victors," as one says, or are there ways of challenging dominant accounts of the past? This seminar will attempt to answer these questions through readings of works of philosophy, poetry, history, prose fiction, film, photography, and cultural criticism that reflect upon the nature of history. Though answers will be multiple, course reading and discussion will in general strive to determine the consequences of understanding history as a site in which reading and writing, experience and narration, and action and interpretation interpenetrate. May include works by Kant, Burke, Hegel, Charlotte Smith, Marx & Engels, Woolf, Kafka, Arendt, Benjamin, Mahmood Darwish, Thomas Demand, and Eyal Sivan.

Requirements/Evaluation: two papers, one 6 and one 10-12 pages in length, and general participation

ENGL 402 (S) The Historical Novel

Cross-listings: COMP 406 ENGL 402

Primary Cross-listing

Setting a novel in a prior time period risks estranging a reader, yet the genre has roused deep-rooted interest, intense critical debate, and aesthetic daring. In this course, we will explore the complex and layered uses of a historical past in literary works of the seventeenth through twenty-first centuries, by way of novels by Madame de Lafayette, Scott, M. Shelley, Dickens, Eliot, Ford, Woolf, Morrison, Sebald, and Roy. Exploring the uses of gothic and sensational effects, dystopian and utopian possibilities, and fractured time, we will consider the aesthetic and political experiments historical novels have spawned. We will do so in context of the sustained critical engagement with the genre by such thinkers as Lukacs, Benjamin, Adorno, Jameson, McKeon and Moretti.

Requirements/Evaluation: class discussion and a 20-page final paper

Prerequisites: a 100-level English course and a 300-level English course or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: English majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: ENGL Criticism Courses ENGL Literary Histories B ENGL Literary Histories C

Not offered current academic year

ENGL 407 (F) Literature, Justice and Community (DPE)

Cross-listings: COMP 407 ENGL 407

Primary Cross-listing

Can we imagine possibilities of justice not dictated by already determined norms? What would a community founded on such a conception of justice look like? Can we imagine a version of community not founded on exclusion? What would the members of such a community look like-what version of subjectivity would that community imply? And might literature in particular have something to say about the possibilities for such versions of community, selfhood, and justice? This course will look at recent, theoretically-oriented writing on justice and community, with an emphasis on the work of Hannah Arendt, Jacques Derrida, Jean-Luc Nancy and Giorgio Agamben. We will place this challenging and exciting philosophical work in relation to fiction from Euripides to Kafka, Farah and Kushner, films (Almodovar, Farhadi), photography (Silva, *Badlands* and worldly examples of competing claims to justice. The course pursues the aims of the DPE initiative by engaging works in which cultural difference and power differentials reveal the limits of universalizing accounts of law and justice, works such as Euripides' *Bacchae*, Nuruddin Farah's *Maps*, Louise Erdrich's poetry, and Farhadi's *A Separation*. But the course will equally suggest that such contingency is inherent in the concept of justice as such, insofar as the problem of justice is bound up with forms of constituting indebtedness that define humans as communal beings. In that sense, contingency, and differentials of power mark justice even in its most familiar instances-intimately and close to home, as it were.

Class Format: discussion

Requirements/Evaluation: one 5-page paper, and a final 15-page paper

Prerequisites: a 300-level ENGL course or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: English Majors; Comparative Literature Majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: course packet

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 407 (D1) ENGL 407 (D1)

Difference, Power, and Equity Notes: The course engages works in which differences of culture and power reveal the limits of universalizing accounts of law and justice, even as it suggests that such contingency is inherent in the concept of justice as such insofar as the problem of justice is inextricable from forms of indebtedness that define humans as communal beings. Differentials of power mark justice even in its most familiar instances -- intimately and close to home.

ENGL 410 (F) Black Literary and Cultural Theories

Cross-listings: ENGL 410 AFR 410 AFR 354 COMP 410 AMST 410

Secondary Cross-listing

This course will examine the writings of black twentieth- and twenty-first-century Anglophone and Francophone literary and cultural theorists in the African diaspora. We will begin with Sojourner Truth and W.E.B. Du Bois and end with current debates between the "Afro-Pessimists" and "Afro-Optimists." We will be reading writers from the United States, Britain, Africa, the Caribbean, and Europe, moving through the writings of the Harlem Renaissance, Négritude, Pan-Africanism, the Black Arts movement and Black Panthers, the Black Atlantic, and black feminism and queer studies. We will come to see that there is no easy separation between questions of politics (e.g., anti-colonialist, anti-racist, anti-capitalist) and those of aesthetics and poetics.

Class Format: seminar

Requirements/Evaluation: midterm, participation (attendance, discussions, GLOW posts), short paper (4-5 pp.), two response papers (2-3 pp. papers), final project (10-12 pp.: analytical paper)

ENGL 415 (S) Theorizing Aesthetic Outrage

Outrage has become an increasingly charged and prominent feature of public life in our current political climate. Yet it is surprisingly difficult to analyze and understand, particularly when we confront public forms of outrage, in which collective behavior may shape, complicate, and change its nature. Why are accounts of the reasons for one's outrage so often inadequate to its vehemence? How are we to understand the strange, unconscious mimicry into which the antagonists in public outrage are so often drawn? What are the sources of the pleasure that shadows outrage? In this seminar we will attempt to theorize public outrage, drawing on a range of theoretical models from several disciplines: aesthetics, cultural and political theory, psychoanalysis, gender and sexuality studies, anthropology and sociology. We will be particularly concerned with aesthetic outrage--riots, censorship, and trials in response to literary and cinematic works, particularly where such outrage has been well documented--and will explore the possibility that such outrage is discernibly different from more straightforward instances of political outrage, such as bread riots or Black Lives Matter activism. We will also analyze the basic nature of outrage in the context of affect studies. Theoretical work by such writers as Sedgwick, Berlant, Foucault, Freud, Weber, Lévi-Strauss, Girard, Arendt, Bakhtin, Butler, Douglas, and Žižek; literary and cinematic works by such authors as Sade, Synge, O'Casey, Jarry, and Eisenstein.

Class Format: tutorial format once or twice during the semester to discuss writing

Requirements/Evaluation: active, regular class participation, a final paper of about 20 pages, written in stages (some discussed in tutorial format)

Prerequisites: a 300-level ENGL course or permission of the instructor

ENGL 416 (S) Postcolonial Theory and the World Literature Debates (DPE)

Cross-listings: COMP 416 ENGL 416

Primary Cross-listing

When publishers, scholars, reviewers, and critics talk about the massive, beautiful, prismatic literary and cultural traditions outside of Western culture, they sometimes refer to them by their geographical provenance--African literature, say, or Sumerian art--or perhaps by their historical moment--Ottoman architecture, or postcolonial Indonesian poetry--but more and more, the catch-all category of World Literature has begun to hold sway in influential places, and is changing the shape of how we think, learn, and write about non-Western aesthetics, as well as how we participate in our "own" cultures in all their complexity. If we can imagine a kind of literature that truly goes under the headings of "World Literature," or "Global Literature," what can we possibly exclude? Doesn't all literature belong to the world? What might we gain by using this term, and what might we lose? What histories are attached to the various names and classifications we assign to culture and how does cultural "othering" uphold or resist forms of

economic, political, and military dominance? In this advanced seminar, we will work carefully through the history and influential writings of postcolonialism as a particular challenge to hegemonic forms of representation, cultural production, and naming, starting with a close consideration of the writings of the movement's founders and key commentators, including Aimé Césaire, Frantz Fanon, Edward Said, Gayatri Spivak, Robert J.C. Young, Gauri Viswanathan, Partha Chatterjee, and Homi Bhabha, and consider their influence on later postcolonial writers and critics around the world. In the second half of the semester, we will turn our attention to the historical underpinnings and current firestorm of debates about World Literature, beginning with Goethe, Marx, Adorno, Frederic Jameson, Franco Moretti, and Pascale Casanova and shifting finally to critics of the ideas of World and Global Literature.

Requirements/Evaluation: two to three papers

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: students who have done relevant coursework in Division I or II

Difference, Power, and Equity Notes: This course will consider literary canonicity and postcolonial theory's challenges through an examination of genre, criticism, institutional power, material conditions of publication, and postcolonial culture's relationship to the legacies of colonialism. We will interrogate power and the writing of history, material and cultural resource extraction, and narrative theory against developmental discourse.

Not offered current academic year

ENGL 421 (F) Fanaticism

Cross-listings: ENGL 421 COMP 421

Primary Cross-listing

Eighteenth and nineteenth-century writers of literature and political philosophy repudiate fanaticism, whether as a religious, political or amorous posture. But what is fanaticism, and why should it be considered such a threat, particularly during a period that embraced an enlightened secular rationalism? In this course, we will examine these questions by considering literary texts that dramatize fanaticism in light of accounts by philosophers and historians. Readings will include novels by M. Shelley, Hogg, Dickens, Eliot, Conrad, among others, and political philosophy and historical writings by Voltaire, Kant, Diderot, Burke, Hume, Carlyle, Adorno, and a range of recent critics. We will also watch films by Riefenstahl, Hitchcock and Pontecorvo, and look at paintings, drawings and sculpture by Fragonard, Goya, and Shibonare. Since fanaticism has recently had considerable political currency, we will also examine contemporary accounts that reanimate the debates and concerns of the course.

ENGL 445 (F) World's End: Literary Ecologies of the Limit

Cross-listings: ENVI 445 ENGL 445

Primary Cross-listing

Consciousness of the world's finitude in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's *Animal's People*. Primary works will include: Shakespeare, *As You Like It*; Marvell, "Upon Appleton House"; Ovid, *Metamorphosis*; Browne, *Urn Burial*; Titian, Wordsworth, McCarthy, *The Road*; Alice Oswald; photography (Struth, Hutte), video installations (Pipilotti Rist). Theoretical texts include: Nixon, *Slow Violence*; Agamben, *The Time that Remains*; Heidegger, "Question Concerning Technology"; Latour, "An Inquiry into Modes of Existence"; Nancy, *After Fukushima*; Derrida, *The animal that therefore I am* and *Beast and the Sovereign*.

ENGL 450 (S) Melville, Mark Twain, & Ellison

As an epigraph to his novel, *Invisible Man*, Ralph Ellison selects a quotation from Herman Melville's story, "Benito Cereno." In the prologue to *Invisible Man*, Ellison invokes a sermon that appears briefly in the opening chapter of *Moby-Dick*. In his essays on comedy and American culture, Ellison comments trenchantly on *Adventures of Huckleberry Finn*. Melville and Mark Twain were, in many obvious ways, as different as two writers can be. Nonetheless, they also have many surprising similarities, and it is not difficult to understand why both are so important to Ellison. This course will examine the novels, stories, and essays of these three writers, with particular attention to the themes that they have in common and to the traits that make each of them distinctive. Race, slavery, epistemology, and the nature of American democracy are among those themes.

ENGL 456 (F) Topics in Critical Theory: Hegel and the Dialectic

Cross-listings: COMP 456 ENGL 456

Primary Cross-listing

This course is for students of any major who wish to continue studying critical, cultural, or literary theory. Students will give close attention to a single

theorist or philosophical school or perhaps to a single question as taken up by several theorists. Prior coursework in critical theory or continental philosophy, no matter the department, is strongly recommended. The subject of this semester's seminar is the dialectic. "Dialectical" is one of those collegiate words, the kind of word that some people use a lot without knowing for sure what it means. That said, there are a couple of different ways of making sense of dialectics. The word's nearest synonym is "dialogue." Broadly, then, "dialectics" is a name for any philosophy that incorporates into itself the back-and-forth of conversation. Modern dialectics, meanwhile, sets out from two ideas: first, that it is impossible to think about anything in isolation, that we understand all things via relation and contradistinction, that we couldn't call any person "female" if we weren't also compelled to call some people "male"; and second, that all such conceptual pairs (male/female, black/white, east/west) are less settled than they look. You can't not divide the world into oppositions, and all such oppositions will collapse. This is an idea that, systematically pursued, can change the way we think about language, ethics, politics, literature, and art. We will read key texts from major dialectical thinkers: Hegel, Marx, Adorno, but mostly Hegel.

Requirements/Evaluation: seminar paper of 25 pages; informal weekly writing; class participation

Prerequisites: prior coursework in critical theory or continental philosophy is recommended but not necessary, no prior coursework in English is required

Enrollment Limit: 15

Enrollment Preferences: seniors with background in critical theory

ENGL 483 (S) Representing History

Cross-listings: ENGL 483 COMP 483

Primary Cross-listing

Moments of political turmoil expose the highly charged ways in which a culture structures itself around a narrative past. In this course, we will read literary and cinematic works that invoke such moments of upheaval—the French and Russian Revolutions as well as those of 1848, the rise of fascism and the Great Depression of the 1930s, the battle for Algerian independence, the AIDS crisis, among others—in order to explore those fraught narratives of the past. We will consider such issues as the rise of the historical novel, the aesthetics of fascism and of democracy under pressure, fantasies of decolonization, representational clashes of culture, forms of affective and sexual disorientation, and the uses of melancholy in representing historical loss. Readings will be drawn from literary works by Gay, Edgeworth, Scott, Shelley, Balzac, Eliot, Conrad, Kafka, Babel, Mann, Borges, Stoppard, Kushner, Morrison, Pamuk, Bolano, and Philip, and theoretical essays by Kant, Burke, Carlyle, Marx, Benjamin, Adorno, Foucault, de Certeau, Jameson, Lefort and Ahmed. Films will include such works as Eisenstein's *October*, Reifentahl's *The Blue Light*, Wellman's *Nothing Sacred* and Pontecorvo's *The Battle of Algiers*.

ENGL 11 (W) Black Arts Multiculturalism

The Black Arts "neo-hoodoo" wordsmith Ishmael Reed is credited (especially by himself) as having coined the term "multiculturalism." This WSP course will examine how writers of the Black Arts Movement explicitly used and explored "multiculturalism" in their work, not just as a concept of ethnicity but also as a deliberate incorporation of various aesthetic traditions and forms into their own work. A poem may contain or enact jazz. A theatrical scene may morph into a cartoon or a blues performance. We will examine how writers used this process and what they said about it. The class will read works by writers such as Reed, Amiri Baraka, and Ntozake Shange. We will also consider works and artists in other media who inspired these writers. Students will write 12-page final papers that compare two or more notable examples of "multiculturalism" in works by different artists or in contrasting works by the same writers.

Requirements/Evaluation: 10-page paper

Prerequisites: a 100-level English course

Enrollment Limit: 12

Enrollment Preferences: English majors and Africana Studies concentrators will receive first priority

Grading: pass/fail only

Materials/Lab Fee: cost of books

Winter 2020

LEC Section: 01 Cancelled

ENGL 12 (W) Spenser's "The Faerie Queene"

In this course, we will read the first book of Edmund Spenser's *The Faerie Queene*, a poem that seeks to tell the story of England as a Protestant nation, that seeks to instill virtue in the elite young men to whom it is addressed, and that is all the more compelling for the ways it fails to accomplish its stated goals. For example, Spenser hopes that his readers will grow in holiness by reading stories about this subject in Book I, but he writes in the mode of allegory, a kind of representation that excludes the possibility of moral transformation. We will spend a lot of time thinking about Spenser's aspirations--especially his hope that reading might make human beings better--and about how and why those aspirations falter, from almost the very beginning. If the only good this poem can do is to demonstrate its incapacity to accomplish a moral project, then does that mean that literature is itself implicated in the problems Spenser diagnoses in ourselves and in our world? We will discuss these issues in their historical context, but we will also think about how they resonate beyond sixteenth-century England, including in a contemporary moment. The course will be conducted as a reading group rather than as a formal seminar. We will spend a lot of time reading together aloud. Conversation will be relaxed, open-ended, surprising, and profound. Bring your old friends, and come to make new ones.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: based on brief interviews with the instructor

Grading: pass/fail only

Materials/Lab Fee: approximately \$25 for books

Winter 2020

ENGL 13 (W) Talking With Strangers

This is a workshop in making short audio documentaries. Students will learn basic interview, audio recording, and editing techniques. Our focus will be in learning how to identify and capture some of the manifold stories circulating invisibly around us, through the process of interviewing strangers about their lives. Course requirements include five hours of class meetings, two or three technical workshops, and five hours of outside listening and reading per week. Investigating stories, interviewing subjects, and editing stories will also require ten to twelve hours weekly. Students will be required to participate in a final listening session in which we will share finished projects.

Requirements/Evaluation: students will create three short audio pieces

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: on the basis of short written expressions of interest and experience in related fields (creative writing, video production, music)

Grading: pass/fail only

Materials/Lab Fee: approximately \$40 for books

LEC Section: 01 Cancelled

ENGL 15 (W) Tolkien: "The Hobbit, The Lord of the Rings," and Oxford

In this class we'll read and discuss in depth the literary and imaginative richness of J. R. R. Tolkien's beloved fantasy novels *The Hobbit* and *The Lord of the Rings*, as well as the aspects of his biography and the scholarly works he wrote while an Oxford professor that most illuminate his fantastical writings: "On Fairy-Stories," "Beowulf: The Monsters and the Critics," and "Chaucer as a Philologist." By combining the fantastical and the academic in Tolkien, we'll get a better view of his imagined fortresses, castles, strongholds, of his elves, dragons and shires, as well as a better view of "the city of dreaming spires," his beloved Oxford nestled in the green hills of its own Oxfordshire. Students are asked to participate in all class discussions, and, at the end of the class, students will be asked to submit a ten-page paper. Class will meet four times a week (Monday, Tuesday, Wednesday, and Thursday) for one hour and fifteen minutes each session, and to prepare for each class you will be asked to read about fifty pages. Adjunct Instructor Bio: Ryan Riley earned a master's degrees in literature from both Oxford and Yale, and a bachelor's in literature from Harvard, where he started a literary discussion and writing group inspired by Tolkien's Inklings.

Requirements/Evaluation: 10-page paper

Prerequisites: none; if student has already read some or all of Tolkien's writings or seen the films, no need to worry, as there will still be much to learn about his imaginative world

Enrollment Limit: 30

Enrollment Preferences: preference will be given to students who write the instructor a short email explaining their interest in the class

Grading: pass/fail only

Materials/Lab Fee: approximately \$36 for books

Winter 2020

ENGL 18 (W) Can I Ask You Something?

Cross-listings: ARTS 18 ENGL 18

Primary Cross-listing

"Can I Ask You Something?" takes students on an exploration of the ways personal narrative can become fuel for making art. For their project, each student will begin by interviewing a meaningful person in their lives (this can be a family member, a mentor, a friend, or even someone you have never met and have been dying to talk to!) and recording the interview in video or audio form. The interviews will revolve around questions which are personally meaningful and urgent to each student, for example, but not limited to: identity and its relationship to the body; the politics of everyday life, family dynamics and the way they affect one's identity and worldview. These recorded interviews will then become the fuel for artworks ranging in media from video, performance and dance to sculpture, photography, drawing, and audio collage. Each student's trajectory will be completely unique and informed by their own curiosity, the art-making techniques they wish to learn, and the topics explored in their interviews. In addition, we will learn about contemporary artists who have used interviews and personal narratives as the inspiration and jumping-off point for their work. Adjunct Instructor Bio: Gabriela Vainsencher is a Brooklyn-based visual artist who makes videos, site-specific installations, drawings, and sculptures. Vainsencher was Williams College's Levitt fellow in 2009, and since then she has taught a winter study class in 2012-2018. She is also a curator and an art critic. Vainsencher's recent exhibitions include a solo exhibition at A.I.R. Gallery in New York and a two-person show at the MuMA museum in Le Havre, France. She is also a Bronx Museum AIM Fellow for 2019-20.

Requirements/Evaluation: final project or presentation

Prerequisites: none

ENGL 19 (W) The Personal is Political: A Nonfiction Writing Workshop

Since St. Augustine's Confessions, great political thinkers have crafted personal stories as evidence of and witness to their own political times. Frederick Douglass and Harriet Jacobs told their stories to further the abolitionist movement. W.E.B. DuBois, James Baldwin, and Simone de Beauvoir ushered us through the turbulent 20th century showing how the personal is political, and the political, personal. Today, Ta-Nehisi Coates, Suki Kim, Maggie Nelson, and Claudia Rankine, among others, show us how well-crafted personal stories can bring important political ideas to the forefront of our collective imagination. Anticipating criticism of the form, Beauvoir wrote in the preface to her 1961 autobiography that "if any individual...reveals himself honestly, everyone, more or less, becomes involved. It is impossible for him to shed light on his own life without at some point illuminating the lives of others." In this workshop, you will do just that, crafting a nonfiction project-memoir, personal essay, or a hybrid form--the final draft of which will determine half of your grade. We'll meet for six hours each week, splitting our time between discussions of the published work we're reading and a workshop-setting discussion of the work you're producing. Your engagement with this class will occupy significantly more time outside of the classroom--roughly twenty hours a week--during which you'll be engaged in the writing process and reading for class. Adjunct Instructor Bio: Julia McKenzie Munemo earned a master's degree in education from Harvard and an MFA in creative nonfiction from the Stonecoast Program, and worked in educational publishing for the decades in between. She is thrilled to point out that [The Book Keeper: A Memoir of Race, Love, and Legacy]--her own political memoir--will come out on January 14, 2020, right in the middle of winter study.

Requirements/Evaluation: 10-page paper

ENGL 20 (W) Humor Writing

Cross-listings: ENGL 20 MATH 20

Secondary Cross-listing

What is humor? The dichotomy inherent in the pursuit of comedic intent while confronting the transient nature of adversity can ratchet up the devolving psyche's penchant for explication to a catastrophic threshold, thwarting the existential impulse and pushing the natural proclivity for causative norms beyond the possibility of pre-situational adaptation. Do you know what that means? If so, this is not the course for you. No, we will write funny stuff, day in and day out. Or at the very least, we will think it's funny. Stories, essays, plays, fiction, nonfiction, we'll try a little of each. And we'll read some humor, too. Is laughter the body's attempt to eject excess phlegm? Why did Plato write dialogues instead of monologues? Who backed into my car in the Sawyer parking lot on the afternoon of March 2, 2019? These are just a few of the questions we will not explore in this course. No, we won't have time because we will be busy writing. (But if you know the answer to the third question, there's a \$10 reward.) Plan to meet 6 hours a week, and to spend at least 20 hours a week on the course. No slackers need apply. Produce or become produce. We will put on a reading/performance at the end of winter study.

Requirements/Evaluation: at least 10 pages of writing and a final performance

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: based on writing samples

Grading: pass/fail only

Materials/Lab Fee: approximately \$50 for books

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 20 MATH 20

Winter 2020

LEC Section: 01 M-F 10:00 am - 11:50 am Colin C. Adams

ENGL 25 (W) Journalism Today

This course will give students an in-depth view of the inner workings of journalism today. It will feature the perspectives of several Williams alumni who work in a broad spectrum of today's media universe, including print, broadcast, and new media. Our guests will help students workshop their ideas for a feature-length piece of journalism they're expected to create during the month. They will discuss the reporting skills to use, as well as their own experiences. In addition to reading the work of guests, there may be required texts about issues and methods related to journalism. Students will be expected to complete several small reporting and writing exercises, as well as one feature-length news story on a topic chosen at the beginning of the course. There will be a week-long trip to New York for field work and to visit various newsrooms. In previous years, organizations visited have included CNN, the New York Times, the Columbia School of Journalism, ABC News, Bloomberg News, BuzzFeed News, ProPublica, the Wall Street Journal and APM Marketplace. Adjunct Instructor Bio: Christopher Marcisz is a freelance writer and editor based in Williamstown. He was a reporter (and later editor) at the Berkshire Eagle. Previously he worked in Washington covering national energy policy, wrote about sports in Moscow, and worked on the international desk at Newsweek. He graduated from the University of Pennsylvania and the Columbia University Graduate School of Journalism.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: priority will be given to seniors and juniors, with a preference for students with a demonstrated interest in journalism (as expressed in a statement of interest, if needed)

Grading: pass/fail only

Materials/Lab Fee: \$1,086

Attributes: EXPE Experiential Education Courses TRVL Winter Study Travel Course

Winter 2020

TVL Section: 01 TWR 12:30 pm - 1:20 pm Christopher Marcisz

ENGL 26 (W) Reading Moby-Dick on a Whaler

If you've never read *Moby-Dick*, you might still think that's a heroic adventure story about humanity's struggle against the sea--the sort of book, in other words, that we give young readers, a cracking yarn, like *Treasure Island* only much longer. You might wonder, then, why so many people think it's the greatest novel ever written. You might be all the more puzzled to learn that no-one liked *Moby-Dick* when it was first published. Almost nobody read it. Herman Melville died thinking the book had been a total failure. *Moby-Dick* is peculiar, to be sure: an adventure story without much adventure nor even much story, a novel that doesn't read like a novel--a funny, joking, frightened, philosophical, and extravagant kind of book, a book that pushes readers to figure out their most fundamental attitudes towards the planet. In this class, we will read *Moby-Dick* and only *Moby-Dick*, and we will do so while living in a nineteenth-century whaling port, at Williams-Mystic, the College's coastal and ocean studies campus in Mystic, CT. Students will discuss *Moby-Dick* in the morning and learn nineteenth-century maritime skills in the afternoon: blacksmithing, carving, chantey singing, boat building, letterpress printing, sailmaking, etc. They will have extensive access to nineteenth-century tall ships throughout.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: first-years and sophomores

Grading: pass/fail only

ENGL 41 (W) Intensive Expository Writing Workshop

This course allows students who need to make up a deficiency to do so over January term. The course totals the same number of class hours as a full semester plus a winter study, which is a lot--three hours a day, five days a week over four weeks. I also will require six or so writing assignments, with mandatory revisions. This is an English class, which means we will also be reading a lot of short stories. Some, but not all, of the assignments will consist of literary interpretations or analysis. The stories we read will be science-fiction stories, which tend to involve the same technical problems as expository essays: they include an unusual burden of exposition, and an explicit or implied thesis, often one of each. Because of this, they will also provide structural models for us, under the guiding principle that your essays can benefit from learning basic storytelling techniques: how to hook the reader, how to build suspense, how to handle exposition, how to provide a satisfying conclusion--in short, how to make your writing interesting.

Prerequisites: permission of a dean

Enrollment Preferences: students who need to make up a deficiency

Grading: pass/fail only

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both ENGL 102 and ENGL 41.

Winter 2020

LEC Section: 01 M-F 10:00 am - 1:00 pm Paul C. Park

ENGL 42 (W) Designer Genes Intensive

In his book *High Noon: 20 Global Problems, 20 Years to Solve Them*, J.F. Rischard notes that the biotechnology issues raised by the Human Genome Project are some of the most pressing global issues we face today. The sequencing of the human genome has opened up a "remarkable landscape of opportunity," Francis Collins and colleagues wrote in 2001: "Like Shakespeare, we are inclined to say, 'what's past is prologue.'" Collins and his associates couldn't have picked a more resonant text from which to quote than Shakespeare's play, *The Tempest*, a play that reverberates with the making of new worlds. With the mapping of the human genome, Collins suggests, we are at the beginning of some "brave new world." But with opportunity also comes a host of ethical concerns. Will this information be used to enhance the individual (or society)? If so, how will it improve the individual (or society)? Who should make those decisions? Will we be able to design our own genes, creating designer babies and societies? Questions about how we define race, gender, disease, and disability become even more pressing when it becomes possible for us to select what traits society deems more "desirable." Because literary and film analysis focuses primarily on language and representation, it is a discipline well-suited to getting at the social, ethical, and scientific complexities of this issue. In this writing skills course we will explore cultural texts that attempt to come to terms with--or exploit--the revolution in contemporary genetics. These texts--many of which also provide a model of exceptional writing--will come from a number of different genres, including the memoir, film, artwork, and non-fiction writing on contemporary science and medicine.

Prerequisites: permission of a dean

Enrollment Preferences: students who need to make up a deficiency

Grading: pass/fail only

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both ENGL 103 and ENGL 42.

Winter 2020

LEC Section: 01 M-F 10:00 am - 12:50 pm Bethany Hicok

ENGL 99 (W) Independent Study: English

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Claire Ting, Professor of Biology

Tom Van Winkle, Executive Director of The Williams-Mystic Maritime Studies Program

ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise.

The major in Environmental Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;

- Understand ecological principles and the nature of living systems;
- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Environmental Center, a Living Building and the Program's home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center.

ADVISING

Majors (or first-years and sophomores interested in the major offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES for advice. All incoming majors will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

STUDY AWAY

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program.

Students considering either a semester or year away who intend to major in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study abroad as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their major, but must have advance approval in writing from the Chair of Environmental Studies.

THE MAJOR IN ENVIRONMENTAL STUDIES

The Environmental Studies major is an eleven course major. The major has a core of seven courses, with varying amounts of choice for the various core course requirements. All majors are required to take four of the seven courses: ENVI 101, ENVI 102, ENVI 302, and the ENVI senior seminar, ENVI 412. ENVI 101, Nature and Society: An Introduction to Environmental Studies, is a broad introduction to the field, emphasizing the humanities and social sciences. ENVI 102, Introduction to Environmental Science, introduces students to the interdisciplinary study of the Earth's systems through the synthesis of physical, chemical, geological, and biological perspectives. All majors are also required to take, in the junior year (or senior year under special circumstances), ENVI 302, Environmental Planning Workshop: Community-Based Experience (offered every fall), and ENVI 412, Environmental Studies Senior Seminar (offered every spring). The remaining component of the core is comprised of three foundational 200-level courses, one from each of three lists of courses (see below), with each list representing the three main branches of the environmental curriculum (environmental humanities, environmental social science/policy, and environmental science). Students choose, in consultation with their major advisor, the course they will take from each of the three lists.

Building on this seven course foundation, each Environmental Studies major devises an individualized four-course cluster of electives that together comprise a disciplinary or thematic specialization sequence—for example, climate change policy, environmental justice, the built environment, environmental chemistry, sustainable food and agriculture, environmental ethics, etc. Students are responsible for designing their own major cluster in consultation with a faculty advisor in the spring semester of their sophomore year. One of these four electives in the cluster must be among those listed by the Program as a research methods course, although students may petition to count another course toward this requirement under special circumstances.

The study of living systems is an integral component of environmental studies, and therefore all students majoring in environmental studies will need to complete at least one course designated by the Program as a "living systems" course (this may be within their specialization cluster or as one of their 200-level foundational courses).

Submitting your Proposed Course Cluster and Plan of Study to the Major

Students intending to major in environmental studies must meet with a prospective advisor chosen in consultation with the Environmental Studies Chair to develop their proposed four-course cluster and plan of study through the major. We encourage all students interested in the major to meet

with a faculty member in Environmental Studies at least one week prior to spring pre-registration to discuss their proposed cluster and plan of study. The proposals must be submitted to the program Chair on or before the final day of pre-registration in the spring of the sophomore year. Application materials and instructions are available from Environmental Studies faculty and on the CES website (ces.williams.edu). The individual proposals will be reviewed by the CES Advisory Committee.

Planning for Prerequisites on your Path through the Major

While ENVI 101 or ENVI 102 are recommended starting points for the major, and are prerequisites for many other ENVI course offerings, please note that some of the course options for the major may have other courses as prerequisites that may not count toward the programs. For example, ENVI/ECON 213 (Intro to Environmental and Natural Resource Economics) has a prerequisite of ECON 110 (Principles of Microeconomics). We strongly suggest that you do advance planning to avoid being blocked from taking a relevant course. For example, should you want to design a cluster that emphasizes environmental economics, ENVI/ECON 387 (Economics of Climate Change) has a prerequisite of ECON 251 (Price and Allocation Theory), which in turn has a prerequisite of ECON 110. Similarly, should you design a cluster that emphasizes resource conservation, you should be aware that ENVI 312 (Communities and Ecosystems) has a prerequisite of ENVI/BIOL 203 (Ecology) or ENVI/BIOL 220 (Field Botany and Plant Natural History). Students interested in the program are encouraged to consult with members of the Environmental Studies Program and to contact Henry Art, Director or Sarah Gardner, Associate Director.

Credit for AP, IB, A-levels and other pre-Williams Courses

Students are not allowed to place out of ENVI 101 or ENVI 102.

Introductory Required Courses (2 courses)

ENVI 101 Nature and Society: An Introduction to Environmental Studies

ENVI 102 Introduction to Environmental Science

Specialization Cluster (4 courses, including a Living Systems course and a Methods course)

In the spring of the sophomore year, at the same time that the major declaration is due, each student planning to major in Environmental Studies is required to submit a detailed proposal for a specialization cluster comprised of four elective courses built around a disciplinary or thematic focus. The proposed specialization must include one course identified as a "methods" course, that is, a course providing substantial training in a relevant method of inquiry (see list below for indicative list of courses that might fulfill that designation).

To help students get a better idea of what the "cluster" entails, we have provided examples of specialization clusters on the CES website, including on the following themes (not intended to be an exhaustive list): climate change policy, environmental justice, environmental planning and design, environmental literature, environmental chemistry, environmental biology, environmental geosciences, sustainable design, water and energy, sustainable food and agriculture, urban studies, and environmental economics.

The student's specialization sequence will be developed under guidance of an adviser from the CES faculty, and formally approved by the CES Advisory Committee, and will be examined in the broader context of the student's proposed route through the major (including their choice of 200-level foundational courses). One of the courses in the student's proposed route through the major must be from a designated list of "living systems" courses (below).

Courses taken abroad may be included in the specialization with the approval of the Chair or Associate Director. Additional courses from the 200-level group requirements (culture/humanities; social science/policy; and environmental science) or from among the research practicum courses may also be included in the specialization.

Living Systems (1 course)

The Environmental Studies program will consider requests from students to substitute another course that focuses on living systems for one of the courses listed above. These requests should be submitted to the Chair or to Sarah Gardner, Associate Director.

Experiential Required Course (1 course)

In the junior year, or under special circumstances in the senior year, students will take ENVI 302 Environmental Planning Workshop: Community-Based Experience. Offered every fall semester, the practicum Environmental Planning Workshop engages students in team-based work on community projects in the Berkshire region involving urban and rural land use planning and environmental design.

Senior Seminar Required Course (1 course)

In the senior year students will take ENVI 412, the senior seminar capstone course. Offered in the spring semester, the Senior Seminar engages students in research on a policy-related environmental problem.

INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Environmental Studies major requirements, the following courses are offered:

ENVI 397, 398 Independent Study of Environmental Problems

ENVI 493-W31-494 Honors Thesis and Senior Research

Winter Study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year's Winter Study offerings.

HONORS IN ENVIRONMENTAL STUDIES MAJOR

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus Winter Study project, or a full-year project (two semesters plus Winter Study). Students who are majoring in environmental studies, and who opt to complete a year-long thesis project, have the option of substituting the second semester of their thesis work for the spring semester senior seminar. Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Some other departments also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the end of the week following spring break. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program. Students applying to conduct an honors thesis in Environmental Studies will be notified by the end of the spring semester whether or not their proposal has been approved.

Students doing a full-year thesis should plan on a presentation in early November to their thesis advisor, second reader, and, if applicable, co-advisor, at which the thesis writer will offer a discussion of the work completed on the thesis to date, and provide an outline of the full thesis and a timetable for completion of the remaining parts of the thesis.

ENVI 100 (S) Introduction to Weather and Climate

Cross-listings: GEOS 100 ENVI 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-years and sophomores

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

LAB Section: 03 T 1:00 pm - 3:00 pm Alice C. Bradley

ENVI 101 (F) Nature and Society: An Introduction to Environmental Studies

Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the historical development of environmental problems -- including pollution, land grabbing, and species extinction -- and their possible solutions. We will survey policy-making and activism in a variety of contexts and will examine art, literature, film, music, maps, advertisements, and other cultural objects. Throughout the course, we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding how natural systems influence and are influenced by human activities.

Class Format: discussion

Requirements/Evaluation: participation, in-class exercises, several shorter writing assignments, and a final exam

Prerequisites: none

Enrollment Limit: 25/section

Expected Class Size: 25/section

Grading: yes pass/fail option, yes fifth course option

ENVI 102 (S) Introduction to Environmental Science

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week

Requirements/Evaluation: weekly short quizzes, three exams, weekly homework, two lab reports, participation

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: required course for Environmental Studies major and concentration

ENVI 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103 ENVI 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends on where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

Class Format: discussion, three hours per week and laboratory, two hours per week in alternate weeks/occasional field trips

Requirements/Evaluation: written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

ENVI 104 (F) Oceanography

Cross-listings: GEOS 104 ENVI 104 MAST 104

Secondary Cross-listing

The oceans cover about 72% of Earth's surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: discussion, three hours per week and laboratory, two hours per week in alternate weeks/one all-day field trip

Requirements/Evaluation: two hour exams, lab work, participation in the field trip, and a final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students, MAST concentrators

Expected Class Size: 48

Grading: yes pass/fail option, no fifth course option

ENVI 105 (F) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101 ENVI 105

Secondary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first-years and sophomores

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

ENVI 108 (F) Energy Science and Technology (QFR)

Cross-listings: ENVI 108 PHYS 108

Secondary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

Requirements/Evaluation: weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 20

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

ENVI 110 (S) The Anthropocene: Nature and Culture in the Human Age

In 2016, a group of scientists appointed by the International Commission on Stratigraphy, the body that keeps the official timetable of earth's history, argued that the planet has entered a new age known as the Anthropocene. Their questions were epochal: Has humanity become a geological force as powerful as those that have shaped the planet's deep past, such as ice sheets and asteroids? Have we truly entered "the human age," and if so, when did it begin and what does it all mean? This course will ask how researchers from different fields have sought to answer these questions. Just as important, it will ask how they became questions in the first place. Where did the idea of the Anthropocene come from? What are its social, political,

and ethical implications? How we have arrived at this new understanding of our planet and ourselves? And what can this major intellectual shift—a shift that has already begun to send waves far beyond the academy into the worlds of art, literature, politics, and religion—tell us about the construction of environmental knowledge in the twenty-first century? Readings will come primarily from the environmental social sciences and humanities, including works by nineteenth and early twentieth-century environmental thinkers, but will be supplemented with material from the natural and environmental sciences. Topics will include climate change, mass extinction, urbanization, and deforestation. Our focus throughout will remain on ways of knowing, imagining, and representing global environmental change in an era of ever-expanding human influence.

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first years and sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: AMST Space and Place Electives ENVI Humanities, Arts + Social Science Electives

ENVI 134 (F) The Tropics: Biology and Social Issues (DPE)

Cross-listings: BIOL 134 ENVI 134

Secondary Cross-listing

Intended for the non-scientist, this course explores the biological dimensions of social issues in tropical societies, and focuses specifically on the peoples of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology, evolution, and physiology. The course highlights differences between the tropics and areas at higher latitudes. It begins with a survey of the tropical environment of humans, including major climatic and habitat features. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria and AIDS. The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the importance of organic diversity, and the interaction of humans with their supporting ecological environment. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: debate

Requirements/Evaluation: two hour exams, a short paper, panel preparation, and a final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: seniors, juniors, sophomores, and first-year students, in that order

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: does not count for major credit in Biology; does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134 (D3) ENVI 134 (D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and areas at higher latitudes. For each section we focus on difference—different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and impacts of climate change. For each section we focus on differences in power and the inequities of resource distribution. We then debate potential policies to ameliorate these inequities.

ENVI 205 (F) Geomorphology

Cross-listings: GEOS 305 ENVI 205 GEOS 201

Secondary Cross-listing

Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: discussion, three hours per week and laboratory, three hours per week/student projects; weekend field trip to the White Mountains

Requirements/Evaluation: two hour exams, a project, lab work and class participation

Prerequisites: any 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

ENVI 207 (F) Economic Geology and Earth Resources

Cross-listings: ENVI 207 GEOS 205

Secondary Cross-listing

"If it can't be grown, it must be mined." We depend on the solid Earth for a huge array of resources. The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging—all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses. This course is in the SOLID EARTH GROUP for the Geosciences major.

Class Format: 2.5 hours lecture per week and one 3 hour lab per week, including some field labs

Requirements/Evaluation: one hour exam, a final exam, lab exercises, and a group project

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: sophomores and Geosciences majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

ENVI 208 (S) Saharan Imaginations (DPE)

Cross-listings: ENVI 208 ARAB 209 COMP 234

Secondary Cross-listing

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Literature furnishes a unique opportunity to gain more awareness of the organization of life in the desert and the ways in which its inhabitants have found harmony between their humanity and the Sahara's biodiversity. This course offers students the opportunity to engage in close readings of novels through the theme of the Sahara and Saharan space. Reading through the ethics of human mobility and actions in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Sahara sub-genre of Maghrebi and Middle Eastern literature. Whether grappling with transcontinental issues of climate change, biodiversity cannibalization or overexploitation of natural resources, the Saharan novel invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Students will be initiated to the ecocritical dimension of Maghrebi and Arabic literature and the discourses underlying it through the prism of the Sahara.

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 208 (D1) ARAB 209 (D1) COMP 234 (D1)

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

Not offered current academic year

ENVI 209 (F) Modern Climate

Cross-listings: GEOS 309 ENVI 209

Secondary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: a series of lab projects, a midterm, and a final exam

Prerequisites: GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

Enrollment Limit: 24

ENVI 211 (F) Race and the Environment

Cross-listings: ENVI 211 SOC 211 AMST 211 AFR 211

Secondary Cross-listing

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's *Dumping in Dixie* and David Pellow's *Garbage Wars*. We will examine how and to what extent polluting facilities like landfills, oil refineries,

and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Prerequisites: none

Enrollment Limit: 20

ENVI 212 (S) The Economics and Ethics of CO2 Offsets (WS)

Cross-listings: POEC 214 ECON 214 ENVI 212

Secondary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: meetings with the instructor in pairs for one hour each week

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 214 (F) Mastering GIS

Cross-listings: GEOS 214 ENVI 214

Secondary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam

Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS

ENVI 215 (F) Climate Changes

Cross-listings: ENVI 215 GEOS 215

Secondary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

Class Format: lecture three hours per week and one three-hour lab per week

Requirements/Evaluation: lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Geosciences majors

ENVI 216 (S) Philosophy of Animals

Cross-listings: ENVI 216 PHIL 216

Secondary Cross-listing

Animals are and always have been part of human life. To name just a few: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, *what are animals such that they can be all these things?* In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Requirements/Evaluation: four 4- to 5-page papers and one 10- to 12-page final paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students with at least one previous philosophy course; there is no need to email the professor in advance to indicate interest in the course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ENVI 217 (F) Landscape, Place and Power

Cross-listings: ENVI 217 AMST 216

Primary Cross-listing

How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental philosophy, and anthropology, and it will survey the major methodological and theoretical commitments that unite these fields.

Requirements/Evaluation: three 5- to 7-page essays; several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

ENVI 218 (S) "Ecologismo": Literature, Culture and the Environment in Latin America (DPE)

Cross-listings: RLSP 214 ENVI 218

Secondary Cross-listing

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon in the early 20th century to contemporary global warming? How do the realities of Latin American societies--including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism--inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

Requirements/Evaluation: brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts

Prerequisites: RLSP 105, placement exam results, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Spanish and Environmental Studies majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

RLSP 214 (D1) ENVI 218 (D1)

Difference, Power, and Equity Notes: This course is inspired by and organized around Arturo Escobar's notion of "the political ecology of difference:" our work throughout the semester aims to understand the myriad ways in which "difference"--economic, ecological, and cultural--informs Latin American responses to environmental degradation.

Not offered current academic year

ENVI 219 (S) Evolution of and on Volcanic Islands

Cross-listings: GEOS 220 ENVI 219

Secondary Cross-listing

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics.

Requirements/Evaluation: five written papers

Prerequisites: 100-level GEOS course or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors and students with a demonstrated interest in geosciences

ENVI 221 (F) Introduction to Urban Studies: Shaping and Living the City

Cross-listings: AMST 221 ENVI 221 LATS 220

Secondary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: discussion

Requirements/Evaluation: attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students as well as American Studies majors and Latina/o Studies concentrators

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics

Cross-listings: GEOS 221 ENVI 222

Secondary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system,

leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Requirements/Evaluation: weekly papers and a final oral presentation

Prerequisites: none

ENVI 224 (F) The Rise and Fall of Civilizations

Cross-listings: ANTH 214 ENVI 224

Secondary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: class discussion

Requirements/Evaluation: midterm, final exam, paper, two quizzes

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

ENVI 228 (F) Water as a Scarce Resource

Cross-listings: ENVI 228 ECON 228

Secondary Cross-listing

For a variety of reasons including environmental pollution, urbanization, changing agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: Is access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?

Class Format: meeting with the instructor in pairs for an hour each week

Requirements/Evaluation: a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write one of their five papers; evaluation will be based on the quality of the papers and on the quality of the student's oral presentations and commentary on the work of their colleagues

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies, and to students who are already major or concentrators in those subjects

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 229 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Primary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the

sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

ENVI 231 (F) The African Anthropocene (DPE)

Cross-listings: AFR 231 ENVI 231 STS 231

Primary Cross-listing

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, poetry, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Class Format: non-traditional technologies, web-streams, social media (Tumblr/Twitter)

Requirements/Evaluation: assignments include: short written commentaries, current event analysis, presentations, and a final analytical essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; juniors and seniors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 231 (D2) ENVI 231 (D2) STS 231 (D2)

Difference, Power, and Equity Notes: The African Anthropocene" considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

Fall 2019

SEM Section: 01 TR 8:30 am - 9:45 am Brittany Meché

ENVI 232 (S) The Garden in the Ancient World

Cross-listings: CLAS 235 REL 235 ENVI 232 COMP 235

Secondary Cross-listing

Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Requirements/Evaluation: class participation, short written assignments, and a final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Classics majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

ENVI 234 (S) Economics of Developing Countries (DPE)

Cross-listings: ENVI 234 ECON 204

Secondary Cross-listing

The leaders of developing countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to pro-actively invest in health and education? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in developing countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is major obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? The class will introduce these and other issues, as analyzed by economists.

Class Format: discussion

Requirements/Evaluation: short essays/assignments; two individual take-home exams; final group project

Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 234 (D2) ECON 204 (D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

Attributes: GBST African Studies Electives GBST Economic Development Studies Electives POEC Comparative POEC/Public Policy Courses

ENVI 235 (S) Survival and Resistance: Environmental Political Theory

Cross-listings: ENVI 235 PSCI 235

Secondary Cross-listing

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work inside and outside the classroom.

Requirements/Evaluation: formal and informal writing assignments and class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

ENVI 236 (S) Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern

Cross-listings: ARTH 236 ENVI 236 CLAS 236

Secondary Cross-listing

Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallarmé, "L'Après midi d'une faun," Aby Warburg, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Requirements/Evaluation: attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: first year graduate students, then second year graduate students, then advanced undergraduates

ENVI 238 (F) Sustainable Economic Growth

Cross-listings: ECON 238 ENVI 238

Secondary Cross-listing

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, land, water and food, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change, but we will also discuss other forms of environmental degradation. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce core economic concepts taught in introductory microeconomics and introductory macroeconomics.

Requirements/Evaluation: midterms exams, final exam, problem sets, short writing assignments, class participation

Prerequisites: ECON 110 and ECON 120

ENVI 240 (F) Conservation and Climate Change (WS)

What does climate change mean for the future of Earth's 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners responding to climate change? To what extent can local environmental management alter global trends?

Requirements/Evaluation: one 5- to 7-page essay every other week and carefully prepared oral responses to partners' essays in alternate weeks

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

ENVI 241 (S) The Politics of Waste

Cross-listings: ENVI 241 PSCI 242

Secondary Cross-listing

Waste is not just a fact of life, it is a political practice. To create and maintain political order requires devising collective means to pile up, bury, burn, or otherwise dispose of stuff deemed dirty or disorderly: waste management is regime management. In turn, our feelings of disgust for anything deemed waste shape political deliberation and action on environmental policy, immigration, food production, economic distribution, and much more. The very effort to define "waste" raises thorny political questions: What (or who) is disposable? Why do we find the visible presence of certain kinds of things or persons to be unbearably noxious? How should we respond to the fact that these unbearable beings persist in existing, despite our best efforts to eliminate them? What is our individual and collective responsibility for creating and disposing of waste? Serious inquiry into waste is rare in political theory and political science--perhaps understandably, given that the study of politics is shaped by the same taboos that shape politics. In this seminar we will openly discuss unmentionable topics and get our hands dirty (sometimes literally) examining the politics of waste. We will take notice of the erasure of waste in traditional political theory and work together to fill these gaps. To do so, we will draw on work in anthropology, critical theory, history, urban studies, and waste management science; representations of waste in popular culture; and experiences with waste in our lives. This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, Wed 4:45-8:30 pm*

Requirements/Evaluation: class attendance and participation, short essays, and a final paper

Prerequisites: not open to first-year students

ENVI 242 (S) The Country and the City in the Classical World

Cross-listings: CLAS 242 ENVI 242 ANTH 242

Secondary Cross-listing

A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes?

What are the values, stereotypes, and ideals--as well as artistic, literary, and architectural forms--associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside - not just as places, but also as states of mind. All readings are in translation.

Requirements/Evaluation: informed participation, two short papers (2-5 pages), final paper (8-10 pages)

Prerequisites: none, although prior knowledge of the ancient world will be useful

Enrollment Limit: 19

Enrollment Preferences: declared and intending majors in Classics and Environmental Studies

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 243 (F) Reimagining Rivers

Cross-listings: ANTH 243 ENVI 243

Primary Cross-listing

Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including climate change, pollution, unsustainable agriculture, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and cultural identities far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Combining approaches from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, legal texts, and more.

Requirements/Evaluation: three 5- to 7-page papers and several short response papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ENVI 244 (S) Environmental Ethics (WS)

Cross-listings: ENVI 244 PHIL 244

Primary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor,

Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation: six essays (5-7 pages each) and six carefully prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion

Prerequisites: ENVI 101 or one course in PHIL

Enrollment Limit: 10

Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 244 (D2) PHIL 244 (D2)

Writing Skills Notes: Students will write six tutorial papers of 5-7 pages in length, one of which they will revise and submit at the end of the term. In each of the tutorial papers students will describe and evaluate arguments that appear in the assigned readings, and will develop arguments in support of their own ethical positions. Students will receive written and oral feedback, concentrated particularly in the first half of the semester, to improve their ability to present clear and effective written arguments.

ENVI 246 (F) Race, Power, & Food History (DPE)

Cross-listings: HIST 265 AMST 245 ENVI 246

Primary Cross-listing

Have you ever wondered why Spam is so popular in Hawaii and why ramen noodles are a cheap, ubiquitous food? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of critical food studies. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, and gender.

Requirements/Evaluation: two to three short writing assignments (4-5 pages); one longer final paper (8-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ENVI 247 (S) Race and Religion in the American West

Cross-listings: LATS 247 REL 247 AMST 247 ENVI 247

Secondary Cross-listing

From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacrosapes" of the American West. Historian Patricia Limerick regards this region as an extraordinary site of convergence and one of "the greatest meeting places on the planet." The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged legal/protected definitions of "religion," and Asian immigrants built the first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new "sights," "cites," and "sites" in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment.

Class Format: seminar/discussion

Requirements/Evaluation: student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: none

ENVI 248 (F) "Our Response Will Define Our Future": Climate Change Policy Analysis (WS)

In 2014, UN Secretary General Ban Ki-moon declared: climate change is "the defining issue of our age. It is defining our present. Our response will define our future." In this tutorial, we will examine a broad range of proposed, and currently implemented, policy responses to this grand challenge. We will employ policy analysis to evaluate these strategies' effectiveness and viability. This tutorial will consider approaches at varied scales (ranging from university campuses to coordinated global action) and addressing different sectors (including transportation, energy generation, and food production).

Requirements/Evaluation: students alternate in preparing 5- to 7-page papers and 2-page responses (five papers and five responses in total), final paper building on one of the 5- to 7-page papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: 1. second-year students 2. Environmental studies concentrators and majors 3. first-year students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Bi-weekly 5-7 pages long papers. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ENVI 249 (S) Food, Agriculture, and Globalization

This course examines the history and current politics of the international political economy of food with a focus on how agriculture and food provisioning have been transformed through imperialism and globalization. We examine the interactions of corporations, nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of a globalized food system. Topics include the historical antecedents of our present system, plantation agriculture, the influences of war and settler colonialism on global food production, Cold War transformations in the international food system, the origins of sustainable development discourse, international anti-hunger programs, fair trade and other labeling schemes, labor migration, the antiglobalization and local food movements, and neoliberalism. We will pay particular attention to theories about how producers and consumers are connected to one another through the political economy of food. The reading assignments are drawn from the fields of environmental, food, and policy history, and we will also read works from political scientists, international relations scholars, geographers, anthropologists, and advocacy organizations.

Requirements/Evaluation: oral presentations with handouts; 2 short concept papers (3-4 pages); 2 research papers (5-7 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

ENVI 250 (S) Environmental Justice (DPE)

Cross-listings: ENVI 250 STS 250

Primary Cross-listing

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Requirements/Evaluation: several short essays, final essay

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Environmental Studies concentrators

ENVI 255 (F) Environmental Observation

Cross-listings: GEOS 255 ENVI 255

Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, radar, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest.

Requirements/Evaluation: labs, quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

ENVI 273 (F) Politics without Humans?

Cross-listings: ENVI 273 STS 273 PSCI 273

Secondary Cross-listing

Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants: shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

Requirements/Evaluation: three 5- to 7-page papers, regular Glow posts, class participation

Prerequisites: please note that this is an introductory-level course with no prerequisites; first-year students and those with no background in political theory are welcome, as are more experienced students

Enrollment Limit: 25

ENVI 283 (F) Dirty Politics: Regulating Hazardous Chemicals and Wastes

Cross-listings: ENVI 283 PSCI 283

Primary Cross-listing

Since consumers were first introduced to the promise of "better living through chemistry," society has had to wrestle with the impacts, often far removed in place and time, resulting from a rapid proliferation of hazardous chemicals and wastes. Policy responses, be they at the local, national or global scale, are often limited to reactionary efforts to counter releases into the environment, are constrained by the prevalent use of the technologies in question, and further bring to the fore key challenges of environmental justice and risk management. How then are we to regulate DDT without adversely affecting our fight against mosquito-borne malaria? How might we preserve the ozone layer while still maintaining the benefits of food preservation through refrigeration? How can we reap the benefits of the electronic age without condoning the steady flow of electronic waste affecting workers' health and environments in developing countries? Emphasis will be placed on understanding the politics that bring about, and allow us to address, these problems. We will be examining in particular novel policy responses, including the US' revised legislation on chemicals passed in 2016 and citizen science initiatives such as those that brought attention to the crisis of lead-contaminated water in Flint, MI.

Requirements/Evaluation: participation, several smaller assignments, and a final research project

ENVI 291 (S) Religion and the American Environmental Imagination

Cross-listings: REL 291 SOC 291 ENVI 291

Primary Cross-listing

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of "eco-spirituality" and popular "nature religion." Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

ENVI 301 (F) Climate Changes (Latin America): Aesthetics, Politics, Science

Cross-listings: RLSP 401 ENVI 301

Secondary Cross-listing

In her 2007 book, *In Catastrophic Times: Resisting the Coming Barbarism*, philosopher Isabelle Stengers offers a chilling observation: "we are more badly equipped than ever for putting to work the solutions defined as necessary" to avoid the most devastating effects of global warming--the extinction of 25 to 75% of existing species; an increase in sea levels that will drown island nations and coastal cities; the breakdown of agricultural systems, leading to widespread famine; and the recurrence of powerful hurricanes and other so-called "natural" disasters. All of this, as Stengers and others point out, will create human upheaval, conflict and suffering on an unprecedented scale. This senior seminar examines works of literature, art and film that Latin Americans have produced in response to the catastrophic times in which we live. We will discuss the political, economic, and cultural histories that have led to our present moment, including neoliberalism, dictatorship, and the rise and fall of the leftwing Pink Tide. Through works of new and experimental fiction, poetry, film, performance and visual art, we will consider the lives and work of environmental activists, including Berta Cáceres and others who were murdered because of their outspoken opposition to extractive capitalism, examine the struggle for the decolonization of environmental knowledge, an epistemological battle increasingly waged on behalf of all living things, and experience the politics of mourning for the hundreds of thousands of life-forms disappearing from the planet. Cultural texts to be explored throughout the semester may include: *La vorágine* (José Eustasio Rivera, Colombia, 1924); *Distancia de rescate* (Samanta Schweblin, Argentina, 2014); *Lo que sueño Sebastián* (Rodrigo Rey Rosa, Guatemala, 1995); *Serras da desordem* (Andrea Tonacci, Brazil, 2006); *Boi Neón* (Gabriel Mascaro, Brazil, 2015); *American Fork* (George Handley, USA, 2018).

Requirements/Evaluation: rigorous preparation and participation in class discussions, oral presentations and discussion-leading, response papers, one 5- to 7-page paper and one 15- to 20-page paper

Prerequisites: one 300-level course in the department, evidence of a successful direct-enroll experience at a local university in Latin America or Spain, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: senior Spanish majors; after that, priority will be given to ENVI majors with a strong command of Spanish

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ENVI 302 (F) Environmental Planning Workshop: Community-Based Experience

Cross-listings: ENVI 302 AMST 302

Primary Cross-listing

This interdisciplinary, experiential workshop introduces students to the field of planning through community-based projects. Environmental Planning encompasses many disciplines pertaining to the natural and built landscape such as city planning, ecological design, climate resiliency, natural resource planning, landscape architecture, agricultural and food systems, walkable neighborhood design, energy planning, and community development, to name a few. In this workshop, students regularly get out of the classroom and gain direct experience working in the greater Berkshire region. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework, site visits, and concludes with a design project. Part 2 focuses on hands-on field work tackling an actual planning project under the guidance of a community partner. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including interviews, survey research, site visits, primary research, mapping, and site design and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related skill sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, report-writing, design, and teamwork. The class culminates in an on-site public presentation of each team's planning study.

Class Format: discussion/group workshop/project lab

Requirements/Evaluation: short writing assignments, class discussion, team projects, class presentations, final group public presentation and report

ENVI 303 (S) Cultures of Climate Change

Cross-listings: ENVI 303 SOC 303

Primary Cross-listing

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

ENVI 307 (F) Environmental Law

Cross-listings: PSCI 317 ENVI 307

Primary Cross-listing

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth. Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

Requirements/Evaluation: several short writing assignments, a term research project, and active participation in class

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 25

Expected Class Size: 25

ENVI 308 (S) Science and Politics in Environmental Decision Making

This course explores the relationship between science and politics in environmental decision-making. How do legislators know when a species is endangered and warrants protection? What precautions should be applied in allowing genetically modified foods onto our plates? Can we, and should we, weigh the risks of malaria against the impacts of pesticides used to control those mosquitoes that transmit the disease? How has the global community come together to understand the risks from global climate change, and how has this understanding shaped our policy responses? What are some of the limits of science in shaping policy outcomes? In addressing these and other questions, we will pay particular attention to how power relations and existing institutions shape what knowledge, and whose knowledge, is taken on board in decision-making, be it at the local, national or global level. We will delve into how these dynamics shape policy outcomes and we will also examine novel approaches for incorporating the knowledge of traditionally disempowered groups, including indigenous and local communities.

Requirements/Evaluation: participation, several smaller assignments, and a final project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators, Public Health concentrators, and Political Science majors

ENVI 312 (F) Communities and Ecosystems (QFR)

Cross-listings: ENVI 312 BIOL 302

Secondary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week

Requirements/Evaluation: lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

ENVI 313 (S) Chicago

Cross-listings: AMST 312 ENVI 313 LATS 312

Secondary Cross-listing

"The city of big shoulders has plenty of room for diversity," reads the official visitor's website for the City of Chicago. Focusing on this claim, this course asks students to think critically about what kind of room has been made for diversity--social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays, and popular culture, we will explore the material and discursive constructions of Chi-Town and urban life among its residents. Appreciating these constructions we also consider how Chicago has served as a key site for understandings of urbanity within a broader national and global context.

Class Format: discussion

Requirements/Evaluation: attendance and class participation, group presentations and discussions, 5 critical briefs (2-pages) and a book review

essay (15 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: American Studies majors, Latina/o Studies concentrators and students who have taken LATS 220/AMST 221/ENVI 221

ENVI 315 (S) Ecocriticism

Cross-listings: ENVI 315 ENGL 312

Secondary Cross-listing

How does the human imagination encounter its environment? This overarching question is of particular importance now, as the humanities struggle to address the ecological crises of our time. We'll read selections from the long tradition of environmentally-minded literary works in order to historicize concepts of nature and wilderness, as well as from more recent theoretical and creative writing that reflects an increasing awareness of climate change, toxic waste and pollution, habitat loss and species extinction, population expansion, and other forms of environmental catastrophe. Finally, we will explore via our own writing the ethical and aesthetic imperative to find ways of imagining this ever-changing relation between the imagination and the environment.

Requirements/Evaluation: engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper; frequent GLOW posts; and a creative journal

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor

Enrollment Limit: 25

Enrollment Preferences: majors in English or Environmental Studies

ENVI 318 (F) California: Myths, Peoples, Places

Cross-listings: COMP 328 AMST 318 ENVI 318 LATS 318 REL 318

Secondary Cross-listing

Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific

places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as "sprawling multicultural dystopia," and California as "west of the west."

Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 15

ENVI 322 (F) Trash

Cross-listings: GBST 322 ANTH 322 ENVI 322

Secondary Cross-listing

What is waste? What is filth? Why do titles or categories of sanitation workers--"garbage man," for instance--bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental consequences of systems of waste management historically and in the present, with a focus on South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional focus - work on Dhaka and Delhi, Chicago and New York. There is also a fieldwork component to this class. In groups, students will conduct ethnographic micro-studies of elements of the systems of waste production and management in Berkshire County (e.g., cafeterias, retail outlets, homes, dorms, recycling facilities, sewage treatment plants). Students will post field notes to a class blog, and each group will present its findings in the form of a short film, multimedia presentation, or paper.

Class Format: discussion

Requirements/Evaluation: regular posting of critical response papers and an ethnographic final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors and juniors

ENVI 324 (S) Corals and Sea Level

Cross-listings: MAST 324 ENVI 324 GEOS 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from

natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

ENVI 329 (S) Our Planet's Plastic Plight

#stopsucking, #gotopless, #foodinthenude: these rallying calls to #rethinkplastic and ban plastic straws, coffee cups, and excessive food packaging are just the latest consumer-driven campaigns to combat the scourge of plastic proliferation. Indeed, over the past century, plastic has become ubiquitous in our societies. Durability, affordability and versatility, the very characteristics that explain this success, have heightened the pollution challenge we face today. Yet, we also rely on plastic for a variety of life-saving devices and implements. In this course, we will examine the chemistry and history of plastic and understand how its uses have impacted diverse systems including our oceans. As we undertake this semester-long lifecycle analysis of plastic in our daily lives, we will explore how additives, often toxic, complicate efforts to recycle plastic goods. We will also study

international flows of this material, notably following China's decision in 2017 to constrain its imports of plastics for recycling. Finally, we will evaluate novel efforts to regulate plastic from the local to the global scale.

Requirements/Evaluation: participation, several small assignments, multi-part project setting out action plan to address a particular aspect of plastic pollution

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Environmental Studies majors, Public Health concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

ENVI 339 (F) Conservation Biology (QFR)

Cross-listings: BIOL 329 ENVI 339

Secondary Cross-listing

Conservation biology is an interdisciplinary field that develops scientific and technical means for the protection, maintenance, and restoration of diversity at all levels of biological organization. This course provides an overview of the discipline including the causes and consequences of biodiversity loss as well as approaches and strategies used to combat biodiversity threats such as climate change, habitat fragmentation, and invasive species. Particular emphasis is placed on the ecological dimension of conservation and the application of biological principles (derived from physiological and behavioral ecology, population genetics, population ecology, community ecology, and systematics) to the conservation of biodiversity. The course combines lectures, readings, in-class discussion, and a laboratory that includes both field and lab projects.

Class Format: lecture and discussion three hours per week and lab three hours per week

Requirements/Evaluation: lab assignments, two exams, and discussion participation

Prerequisites: BIOL 203, or BIOL 202, or permission of instructor

Enrollment Limit: 24

Enrollment Preferences: Biology majors, seniors, and juniors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 329 (D3) ENVI 339 (D3)

Quantitative/Formal Reasoning Notes: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

Not offered current academic year

ENVI 340 (F) Posthuman Ecologies: Bodies, Environments, Art (DPE) (WS)

Cross-listings: ENVI 340 GERM 339 COMP 339

Secondary Cross-listing

What is it that makes us human? Or, to paraphrase the philosopher Donna Haraway, what if we have never been human at all? One of the central arguments of posthumanist theory is that the human being is not, as traditionally assumed, an individual, fixed subject in full control over its actions. Rather, we emerge only through our connections and interdependencies with others. The networks that shape us are both organic and inorganic; they include "nature," the microbial ecologies of our bodies, affective landscapes, and social and cultural constructs. Over the course of the semester, we

will analyze how such networks fashion our humanity with the help of literature, film, and theory. Among other things, we will consider the queer ecologies of android bodies, probe the subversive potential of the cyborg in relation to questions of disability, and think about what it means to be human in the Anthropocene. Texts will include Sasa Stanisic, Yoko Tawada, Olga Tokarczuk, Franz Kafka, Octavia Butler, Donna Haraway, Jacques Derrida, and Theodor W. Adorno; films will include *Mad Max: Fury Road*, *Metropolis*, *Ex-Machina*, and episodes of *West World* and *Black Mirror*.

Requirements/Evaluation: four 1-page critical response papers over the course of the semester, oral presentation, creative final project with 4-page self-analysis

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 340 (D1) GERM 339 (D1) COMP 339 (D1)

Writing Skills Notes: The 1-page papers will help students refine their argumentative skills; they will essentially contain all elements of a longer paper in miniature and provide a focused space on which to practice crafting convincing arguments. I will give students detailed feedback on these short papers. The final self-analysis will apply these skills to the student's own work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: The questions of ecology discussed in this course are inherently questions of power: power over the natural environment, power over our own bodies and those of others, both human and nonhuman, power over resources. We will consider how the very concept of "the human" facilitates such power structures, and acquire theoretical tools to help us rethink human being beyond such coercive relations.

Fall 2019

ENVI 341 (S) Toxicology and Cancer

Cross-listings: ENVI 341 CHEM 341

Secondary Cross-listing

What is a poison and what makes it poisonous? Paracelsus commented in 1537: "What is not a poison? All things are poisons (and nothing is without poison). The dose alone keeps a thing from being a poison." Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons?

This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.

Class Format: three times per week

Requirements/Evaluation: two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam

Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry

Enrollment Limit: 30

ENVI 342 (F) The Nature of Gardens: From Eden to the High Line

The garden, since time immemorial, has been the touchstone for humans' interactions with the environment. The relationships between humans and their environments have been so intimate that the creation and origins mythologies of many cultures are set in the context of a garden or paradise. The garden is the environment in which humans have been created, and reciprocally gardens, by definition are the product of human design and environmental manipulation. This seminar examines the interactions between humans and gardens from the perspectives of creation mythologies, the origins of domestication of plants, the cultural expression and design of gardens, the historical exchange of cultivated plants, and evolution of garden design, and the interface of gardens and human biology. Each student will present a seminar based either on their own major interest, an historical, or garden design perspective. One all-day field trip will be scheduled for sometime during the semester.

Class Format: discussion classes, student-led seminars, and one all-day field trip

Requirements/Evaluation: weekly reaction papers (500 words) to reading assignments, seminar presentation, final paper in lieu of final exam

Prerequisites: an application (e.g., online form, statement of interest)

Enrollment Limit: 16

Enrollment Preferences: senior and junior ENVI majors and concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

ENVI 346 (S) Environmental Psychology

Cross-listings: ENVI 346 PSYC 346

Secondary Cross-listing

This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans' disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research

Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Environmental Studies concentrators

ENVI 347 (S) Big Game: Adventure, Empire, Ecology (DPE)

Cross-listings: COMP 387 ENVI 347 ENGL 347

Secondary Cross-listing

Big Game: Adventure, Empire, Ecology asks how the era of imperial expansion and the study of "natural history" leads into our contemporary ecological crisis. We will begin with readings of influential colonial travel and adventure narratives like Robinson Crusoe, the captivity narrative of Mary Rowlandson, sections of Darwin and Captain Cook's travel journals, and in-class work with archival materials like the Indian Botanical Survey Flora and the photographs of Subhankar Banerjee. In the first weeks, we will consider how the aesthetics of adventure circulated throughout the British empire in both the East Indies and India, and ramifies elsewhere in the Dutch, French, Spanish, Portuguese and Belgian holdings. We will conclude with a suite of readings through which we will attempt to locate a productive intersection between ecocriticism and postcolonial studies, drawing together sensationalist disaster journalism with environmental activism emerging from the Global South. This course will be especially of interest to students in English, Comparative Literature, and Environmental Studies.

Requirements/Evaluation: presentation, short paper and revision, final research project

Prerequisites: one lower-division literature or related course

Enrollment Limit: 25

Enrollment Preferences: students with related course experience

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 387 (D1) ENVI 347 (D1) ENGL 347 (D1)

Difference, Power, and Equity Notes: This course will consider the relationship between the practice of the natural sciences (including the human sciences) and imperial power. We will read texts both from and against the aesthetics of empire. The DPE contribution will carry the course from philosophy and nature writing to literature and visual art.

SEM Section: 01 Cancelled

ENVI 348 (S) Beyond Cli-Fi: Climate Change Histories & the Arts of Resilience (DPE)

Cross-listings: AMST 347 ENVI 348

Primary Cross-listing

This interdisciplinary environmental humanities seminar begins with the premise that our present climate crisis is a political project of globalization propelled by capitalism and its cultural logic. Causes and consequences of climate change can only be understood by examining the historical trajectories of carbon-based economic, political, and cultural systems since the 19th century. We trace the intellectual genealogy of modern climate science, consider the politics of indigenous knowledge as related to extractivism, and examine literary and artistic engagements with the natural world. We pay particular attention to the narrative strategies that scientists and policymakers use to talk about climate, and we develop creative critiques of the dominant discourses. We use historical and cultural analysis to study social movement strategy and tactics among advocates for climate mitigation, adaptation, and resilience. We begin and end with creative responses to climate crisis, always asking: How can we move beyond dystopia and defeatism? How might history inform social movements for climate resilience? How can the arts, theater, and literary production articulate a new politics of survival? What narrative forms enable and inspire climate action?

Requirements/Evaluation: one short creative writing assignment; several short critical papers (3-4 pages); final essay (10-15 pages)

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: none

Enrollment Preferences: ENVI or AMST majors or concentrators; people with demonstrated interest in the course topics

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 347 (D2) ENVI 348 (D2)

Difference, Power, and Equity Notes: This course considers the historical differences in economic, political, and cultural power which have shaped our present climate crisis. We consider both who drives environmental change and who experiences it first hand. We consider in particular how differences of class, race, and gender shape capacities for resilience and resistance and we examine social movement strategy, with particular attention to Indigenous and POC social movement thinkers and leaders.

ENVI 368 (F) Technology and Modern Society

Cross-listings: SOC 368 ENVI 368

Secondary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 376 (S) Economics of Environmental Behavior (QFR)

Cross-listings: ENVI 376 ECON 477

Secondary Cross-listing

A community maintains a fishery; a firm decides whether to get a green certification; you choose to fly home or stay here for spring break: behaviors of people and firms determine our impact on the environment. We'll use economics to model environmental behavior and to consider how policies can help or hurt the environment. Topics we'll study include: voluntary conservation, social norms and nudges, firm responses to mandatory and voluntary rules, and boycotts and divestment.

Requirements/Evaluation: short essays and empirical exercises, class participation, oral presentation(s), and a final original research paper using an experiment, existing data, or theory

Prerequisites: ECON 251 and (ECON 255 or STAT 346)

Enrollment Limit: 19

Enrollment Preferences: senior Economics majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (QFR)

ENVI 378 (F) Nature/Writing

Cross-listings: ENGL 378 ENVI 378

Secondary Cross-listing

What do we mean by "nature"? How do we understand the relationships between "nature" and "culture"? In this course we will examine how various American writers have attempted to render conceptions of "nature" in literary form. We will compare treatments of various kinds of natural environments and trace the philosophical and stylistic traditions within the nature writing genre. The authors to be considered include Ralph Waldo Emerson, Henry David Thoreau, William Faulkner, Annie Dillard, Barry Lopez, Ursula LeGuin, and Wendell Berry.

Class Format: discussion

Requirements/Evaluation: two 10-page papers, regular class attendance, and participation in discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors and Environmental Studies concentrators

Expected Class Size: 20

ENVI 387 (S) Economics of Climate Change (QFR)

Cross-listings: ECON 522 ENVI 387 ECON 387

Secondary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration in both poor and wealthy countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. What is the socially optimal amount of climate change? Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? We will consider the growing body of evidence from attempts to regulate GHGs, including China's pilot cap-and-trade programs, the EU ETS, and the US Clean Power Plan. We will pay particular attention to the political economy of regulation and ways in which policy results have departed from theoretical predictions. Throughout the course we will discuss the limits of the economic approach to climate change, pointing out questions on which economic theory provides little guidance.

Class Format: lecture

Requirements/Evaluation: seven problem sets, midterm, group presentation, final exam

Prerequisites: ECON 251, familiarity with statistics

Enrollment Limit: 19

Enrollment Preferences: senior Economic majors and CDE fellows

ENVI 397 (F) Independent Study of Environmental Problems

Individuals or groups of students may undertake a study of a particular environmental problem. The project may involve either pure or applied research, policy analysis, laboratory or field studies, or may be a creative writing or photography project dealing with the environment. A variety of nearby sites are available for the study of natural systems. Ongoing projects in the College-owned Hopkins Forest include ecological studies, animal behavior, and acid rain effects on soils, plants, and animals. Students may also choose to work on local, national, or international policy or planning issues, and opportunities to work with town and regional planning officials are available. Projects are unrestricted as to disciplinary focus. Students should consult with faculty well before the start of the semester in which they plan to carry out their project.

Prerequisites: approval by the Chair of Environmental Studies

Grading: yes pass/fail option, yes fifth course option

Distributions: No divisional credit

ENVI 404 (S) Coastal Processes and Geomorphology (QFR)

Cross-listings: MAST 404 ENVI 404 GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

Requirements/Evaluation: lab reports, tests, and an independent research project

ENVI 405 (F) Geochemistry: Understanding Earth's Environment

Cross-listings: GEOS 405 ENVI 405

Secondary Cross-listing

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act

together to produce a planet that is habitable. As Earth's landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Requirements/Evaluation: seminar discussions, papers, labs and final project

Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors

Cross-listings: MAST 402 ENVI 412

Primary Cross-listing

The Environmental Studies and Maritime Studies programs provide students with an opportunity to explore the myriad ways that humans interact with diverse environments at scales ranging from local to global. The capstone course for Environmental Studies and Maritime Studies, this seminar brings together students who have specialized in the humanities, social studies and/or the sciences to exchange ideas across these disciplines. Over the course of the seminar, students will develop a sustained independent research project on a topic of their choice.

Requirements/Evaluation: active participation, discussion leading, several smaller assignments and multi-step capstone project

Prerequisites: declared major/concentration in Environmental Studies or Maritime Studies, ideally to be taken in final semester at Williams

Enrollment Limit: 14

Enrollment Preferences: Environmental Studies majors and concentrators, Maritime Studies concentrators

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Unit Notes: required course for students wishing to complete the Maritime Studies concentration

Distributions: No divisional credit (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 420 (S) Architecture and Sustainability in a Global World

Cross-listings: GBST 420 ARTH 420 ENVI 420 EXPR 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: with travel component

Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final project/paper (15-20 pages) and presentation

Prerequisites: none, although a course in art/architectural history would be advantageous; registered students will also be required to submit an online application provided by the instructor before enrollment in the course is confirmed

Enrollment Limit: 6

Enrollment Preferences: Art History majors, Environmental Studies majors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: travel funds will be provided by a Class of 1963 Sustainability development grant

ENVI 421 (S) Latinx Ecologies

Cross-listings: ENVI 421 LATS 420

Secondary Cross-listing

An August 2015 Latino Decisions poll found that Latinxs, more than other ethnic groups in the U.S.A., are deeply concerned about climate change and the "environment". How and why might some Latinxs be disproportionately impacted by climate change? How have a few distinct Latinx theorists and activists imagined and constructed ecology? How are struggles for environmental justice related to broader Latinx concerns with and constructions of place? This seminar will examine a few moments in distinct Latinx histories and geographies such as California migrant farmworkers and the struggle over pesticides, urban movements over waste management such as the Young Lords' garbage offensive, food justice movements and urban gardening, as well as literary and theological representations of affective and sacred ecologies such as Helena María Viramontes' *Their Dogs Came With Them* and Ecuadoran-U.S. ecofeminist Jeanette Rodríguez's theological texts. Evaluation will be based on class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper.

Requirements/Evaluation: class participation, presentations, annotated bibliography, short writing assignments, writing workshop participation, and a final 20-page research paper

ENVI 422 (F) Ecology of Sustainable Agriculture

A seminar/field course investigating patterns, processes, and concepts of stability in human-dominated, food production ecosystems. As a capstone course, the course will draw upon the experiences that students have had in biology and environmental studies courses. Topics will include: the relationships among diversity, ecosystem function, sustainability, resilience, and stability of food production, distribution systems, nutrient pools and processing in human dominated ecosystems. Two extensive field trips will be taken to agricultural operations in the region. Each student will present a seminar on a topic requiring extensive reading of primary resources and is responsible for leading the discussion that ensues. Reading question paper assignments will be due prior to the seminar. Criticism paper assignments will be made at approximately bi-weekly intervals and due two days after the seminar to which they relate.

Class Format: two 75 minute sessions per week

Requirements/Evaluation: writing assignments, seminar presentation, and course participation

Prerequisites: BIOL/ENVI 203 or BIOL 302 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: senior Biology and Environmental Studies Majors and Environmental Studies Concentrators; then Junior majors/concentrators, then seniors, then juniors

ENVI 423 (F) Global Change Ecology

Cross-listings: BIOL 413 ENVI 423

Secondary Cross-listing

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioural mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

Class Format: two 75-minute discussion sessions each week

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL 203 or BIOL 305, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not yet taken a 400-level course

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

ENVI 445 (F) World's End: Literary Ecologies of the Limit

Cross-listings: ENVI 445 ENGL 445

Secondary Cross-listing

Consciousness of the world's finitude in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's *Animal's People*. Primary works will include: Shakespeare, *As You Like It*; Marvell, "Upon Appleton House"; Ovid, *Metamorphosis*; Browne, *Urn Burial*; Titian, Wordsworth, McCarthy, *The Road*; Alice Oswald; photography (Struth, Hutte), video installations (Pipilotti Rist). Theoretical texts include: Nixon, *Slow Violence*; Agamben, *The Time that Remains*; Heidegger, "Question Concerning Technology"; Latour, "An Inquiry into Modes of Existence"; Nancy, *After Fukushima*; Derrida, *The animal that therefore I am* and *Beast and the Sovereign*.

Class Format: combination discussion seminar and tutorial conferences

Requirements/Evaluation: one 5-page paper and one final 15-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: English majors using the course to fulfill a requirement; Environmental Studies majors; Comparative Studies majors

ENVI 478 (S) Cold War Landscapes

Cross-listings: HIST 478 AMST 478 ENVI 478

Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research papers on any geographical area of the world.

Requirements/Evaluation: class participation, weekly critical writing, and a final 20- to 25-page research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: History, Environmental Studies majors if over-enrolled

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

ENVI 491 (S) The Suburbs

Cross-listings: AMST 490 ENVI 491 HIST 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with previous coursework in History

ENVI 12 (W) Geology of the National Parks

Cross-listings: ENVI 12 GEOS 12

Secondary Cross-listing

A vicarious trip through a variety of the national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Parks will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by out-of-class study of rock samples. Reading will be from a paperbound text *PARKS AND PLATES* and from short publications of the U.S. Geological Survey and natural history associations linked to the parks. The second part of the month will involve independent study and meetings with the instructor to prepare an oral report about the geology of a park of the student's choice. These reports during the last week will be comprehensive and well illustrated, using PowerPoint and pertinent maps and samples. A detailed outline and list of references will be provided to the group at the time of the presentation.

Requirements/Evaluation: final project or presentation; participation in class meetings

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference to first-year students who have had no previous college study of geology

Grading: pass/fail only

Materials/Lab Fee: approximately \$150 for books

ENVI 13 (W) United States Environmental Law: Its Historic Roots, Its Uncertain Future

Cross-listings: ENVI 13 JLST 13

Secondary Cross-listing

Taught from the perspective of an experienced trial attorney, this course will examine the role environmental law plays in the United States today in light of how that role has developed during the nearly fifty years since the modern era of environmental law began. As a preface, we will consider the significantly more limited influence of environmental law in our national affairs before 1970 and some of the historical and political reasons for that situation. We will examine the reasons why the law's early application in the first half of the 20th century almost exclusively to the conservation and preservation of natural resources took on in the second half a markedly different approach, one emphasizing pollution control and all but ignoring resource conservation. The course will begin by tracing the development of an American consciousness towards the environment through an examination of our law and our literature. The term "law" includes state and federal judicial decisions and legislation, particularly during the presidency of Theodore Roosevelt and during the decades which followed the year 1970 when much of the legal basis for the American environmental protection movement was established. The term "literature" includes not just the written word (the first book we look at is "The Lorax" by your favorite childhood author, Dr. Seuss, but also painting, sculpture, and music. Nothing too heavy! We will examine the historical and legal choices we as Americans have

made which have put our environment on trial. What has occurred in our development as a people that explains this quintessentially American phenomenon? Our journey begins with the Puritans of New England and the planters of Virginia and their predecessors in the New World and then moves swiftly to the beginning of the modern era in environmental law and to its now uncertain future. In light of this historical situation students will examine state and federal legislative and judicial attempts to address environmental problems and then try to reach informed, rational conclusions as to whether those attempts were successful. What were the political, social and economic issues involved and, ultimately, how did their context affect the legal solutions imposed. Cases decided at the appellate level will be introduced and examined through their trial court memoranda opinions in order to observe how the legal system actually works and how frequently the reasoning and conclusions behind the trial judge's decision changes as the case works its way through the appellate process. This course will be presented from a litigator's point of view, that is to say, both the practical and the theoretical, emphasizing what is possible to achieve in the litigator's real world as informed by what the academician would present from the security of the classroom. Evaluation will be based on attendance and classroom participation. Students will prepare several short papers, single-page "clerk's notes," which will present one or more sides of an issue and form the basis for classroom discussion. They will be asked to defend or reject the conclusions reached or approaches taken by our courts and legislatures and by our literature, as broadly defined, on environmental issues. Adjunct Instructor Bio: Philip R. McKnight '65 is a trial and appellate attorney. At Williams he completed the honors program for both American History and Literature and European History and then he earned his law degree from The University of Chicago Law School and practiced in the state and federal courts of New York and Connecticut, as well as in Europe.

Requirements/Evaluation: five single-spaced, 1-page papers called "clerk's notes," class performance, including a team approach to the Pebble Mine, Alaska, permitting controversy

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: seniors first, then juniors, etc

Grading: pass/fail only

Materials/Lab Fee: approximately \$100 for books

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 13 JLST 13

Winter 2020

LEC Section: 01 MWF 10:00 am - 11:50 am Philip R. McKnight

ENVI 15 (W) Bridges over Troubled Waters: Environmental and Public Health Advocacy for Safe Drinking Water

Go behind the headlines to learn about the issues and advocates involved in recent drinking water crises, including lead in Flint, Michigan, Pittsburgh, Pennsylvania, and Newark, New Jersey; chemicals in Hoosick Falls, New York; and crumbling infrastructure in Puerto Rico. This course will introduce students to basic drinking water science, public health data, laws and regulations, types of lawsuits, and advocacy tools involved in today's most pressing drinking water threats. We will discuss issues such as environmental justice, citizen science, corporate responsibility, grassroots organizing, and the role of government and law in addressing public health crises. The course is geared towards interested water consumers and students interested in pursuing careers in environmental or public health advocacy alike. Students will be assigned brief readings drawn from journal and popular news articles and excerpts from nonfiction books, and to view a couple films (either during evening group screenings or independently). In conjunction with this course, and in addition to attending hour-long Friday seminar discussions, students will be expected to attend Friday Log Lunches during Winter Study, which will feature drinking water advocates. Evaluation will be based on class participation and a short (3-5 page) paper and (5-10 minute) presentation on a topic of students' choice involving a drinking water threat or community that is experiencing or has confronted a drinking water threat. Adjunct Instructor Bio: Joya Sonnenfeldt '10 was Williams' first Environmental Policy major. She also holds a law degree and a masters in environmental management from Yale University. She has spent the majority of her career on the litigation team of the Natural Resources Defense Council, largely working to secure safe drinking water. Most recently, she clerked for the Honorable Patty Shwartz on the United States Court of Appeals for the Third Circuit.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Preferences: brief statement of interest

Grading: pass/fail only

Materials/Lab Fee: approximately \$50 for books

Winter 2020

LEC Section: 01 WRF 1:00 pm - 2:50 pm Joya C. Sonnenfeldt

ENVI 16 (W) Sensing Place

Cross-listings: ENVI 16 ARTH 16

Secondary Cross-listing

Bridging art history and environmental humanities, this course will explore how the experience of landscape, a term that privileges the visual, is impacted not only by sight but by sound, touch, smell, and even taste. We will look at the way artists have translated embodied experiences of landscape into paint and other media as we ask what is lost or gained, just as we will consider what the taste of tea or oysters might tell us about the history and present environment of the places they come from. By looking at how artists and writers have theorized and experienced landscapes in the past, we will explore how those histories inform how and what we sense today. We will ask: how is the environment experienced (and narrated) through our bodies? How do human interactions with nature produce a "sense" of ownership and domination? Is something more symbiotic possible? To answer these questions, we will look at works of art in the collections of WCMA and The Clark, read work by historical and contemporary writers, and engage in experiential learning that activates all senses, including hiking, tasting, and making. Evaluation will be based on participation, including weekly journal reflections, and the completion of a 10-page written assignment that will combine creative reflection and research. Attendance and active participation in class discussions will also be required. We will typically meet three times a week for three-hour sessions, with some additional required field trips. Adjunct Instructor Bio: Elliot Krasnopoler is a Doctoral Candidate in the History of Art at Bryn Mawr College, where he is completing a dissertation about the intersections of contemporary art, landscape, and time. He holds an M.A. in Art History from Williams College, and a B.F.A. in Photography from the Rochester Institute of Technology. He lives in North Adams, MA, and is an avid hiker, tea enthusiast, and mineral collector.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: more senior students will be given priority

Grading: pass/fail only

Materials/Lab Fee: \$50

This course is cross-listed and the prefixes carry the following divisional credit:

Winter 2020

LEC Section: 01 MWF 1:00 pm - 3:50 pm Elliot M. Krasnopoler

ENVI 17 (W) Unsettling Environments: Conservation, Care, and Indigeneity in the Anthropocene

Cross-listings: ANTH 16 ENVI 17

Secondary Cross-listing

How might we think of killing animals as a form of care? How do narratives of ecological decline associated with the Anthropocene and climate change potentially exclude Indigenous perspectives? In this course, we will think critically about themes related to resource use and extraction, human-animal relations, and settler colonialism. We will unsettle dominant conceptions of conservation, call into question management models that marginalize Indigenous peoples and ways of being in the world, and explore how ways of relating to the more-than-human shape Indigenous and non-Indigenous responses to climate change and environmental degradation. Drawing upon theoretical works and ethnographic investigations within anthropology and American Indian and Indigenous Studies, as well as poetry and fiction, including the works of Indigenous and settler scholars and writers, we will examine how theorizations of and relations with animals, plants, and landscapes shape conservationist logics, resource management models, and understandings of what it means to "care" for land and the multiple beings that animate it. This course involves six hours of in-class work and an average of 20 hours of outside-of-class work weekly. The course will rely heavily on student preparation for class and student participation in small- and large-group discussions in class. This is an introductory course, and assessments will be weighted more towards students' understandings of broader themes and questions rather than proficiency in any one school of theory or ethnographic locale. Students will earn their grades as follows: with one-sentence summaries and prepared questions for twelve of the assigned readings (once for each class meeting); as co-discussants for one class meeting; with one short take-home essay exam (750-1000 words); and with a final paper (roughly 3000 words) drawing upon ideas and

comparative examples encountered in the course to analyze a current episode or event. Adjunct Bio: William Voinot-Baron is a PhD candidate in cultural anthropology at the University of Wisconsin-Madison. His dissertation is an ethnographic examination of the ways in which salmon are central to both understandings and practices of care in an Alaska Native (Yupiaq) village in southwest Alaska, and the consequences of State of Alaska and federal fishing regulations for tribal sovereignty and well-being. He holds an M.A. in Anthropology from Columbia University and an A.B. in Anthropology and Environmental Studies from Bowdoin College

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: seniority; students may be asked to send the instructor and email explaining why they are interested in the course

Grading: pass/fail only

Materials/Lab Fee: approximately \$80 for books

This course is cross-listed and the prefixes carry the following divisional credit:

Winter 2020

LEC Section: 01 Cancelled

ENVI 25 (W) Tropical Marine Conservation

Cross-listings: BIOL 25 ENVI 25

Secondary Cross-listing

Tropical marine ecosystems such as coral reefs and mangrove forests are biodiversity 'hotspots'; they are home to an astounding variety of marine organisms, provide critical support for the livelihoods and food sources of millions of people, but are also highly vulnerable to human impacts such as climate change and overfishing. This winter study travel course will offer a unique combination of classroom, laboratory, and hands-on experiences in the scientific study, management, and restoration of tropical marine ecosystems using the Bahamian island of Eleuthera as a case study. Eleuthera is rich in marine diversity but still in the process of implementing management policies and practices for its many fisheries. As such, it presents a unique opportunity for students to experience conservation-in-action. Students will gain an understanding of the structure, function, and major threats facing tropical marine ecosystems. They will develop practical skills in conducting field surveys of tropical marine species and in implementing management and restoration strategies on the Island. They will also engage with the local community to understand the social and economic impacts of marine conservation policy and to explore alternative sustainable development strategies for subsistence fisheries that rely on these marine ecosystems. Students are expected to participate in 2 days travel and 13 days of research on the Island. The daily schedule will include field research and independent study. Students are expected to devote time each day to researching and writing a final paper that integrates their field studies, interviews, and policy research. Students will also use this time to prepare and deliver an oral slide presentation on their research the last two days of the trip. After return to Williamstown, students will be given 5 days to finish writing their final papers.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: BIOL 203 or ENVI 101 or MAST 311 or BIOL 413/ENVI 423 or permission of instructor

Enrollment Limit: 8

Enrollment Preferences: preference will be given to juniors and seniors

Grading: pass/fail only

Materials/Lab Fee: cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

Henry W. Art, Professor of Biology and Environmental Studies

Sonya Auer, Visiting Assistant Professor of Biology

Lois M. Banta, Professor of Biology

Ron D. Bassar, Assistant Professor of Biology

Ben Benedict, Lecturer in Art

Mary K. Bercaw-Edwards, Associate Professor for Literature of The Sea, Williams-Mystic Maritime Studies Program

Julie C. Blackwood, Assistant Professor of Mathematics

Roger E. Bolton, Professor of Economics, Emeritus

Alice C. Bradley, Assistant Professor of Geosciences

Nicole G. Brown, Assistant Professor of Classics

Cory E. Campbell, instructional Technology Specialist

Gregory Casey, Assistant Professor of Economics

David Cassuto, Class of 1946 Visiting Distinguished Professor of Environmental Studies

Phoebe A. Cohen, Associate Professor of Geosciences

Jose E.A. Constantine, Assistant Professor of Geosciences

Mea S. Cook, Associate Professor of Geosciences

David P. Dethier, Professor of Geosciences, Emeritus

Joan Edwards, Professor of Biology

Laura Ephraim, Associate Professor of Political Science

Michael Evans, Assistant Director of The Zilkha Center for Environmental initiatives

Jessica M. Fisher, Assistant Professor of English

Antonia Foias, Professor of Anthropology and Sociology

Jennifer L. French, Professor of Spanish

Sarah S. Gardner, Lecturer in Environmental Studies

Matthew Gibson, Assistant Professor of Economics

Lisa Gilbert, Associate Professor of Geosciences and Marine Sciences

Catherine Hall, Lecturer, Williams-Mystic Maritime Studies Program

Nicolas Howe, Associate Professor of Environmental Studies

Sarah Jacobson, Associate Professor of Economics

Amy Johns, Director of The Zilkha Center for Environmental initiatives

Andrew Jones, Manager, Hopkins Memorial Forest

Paul Karabinos, Professor of Geosciences

Pia Kohler, Assistant Professor of Environmental Studies

Elizabeth Kolbert, Class of 1946 Visiting Distinguished Professor of Environmental Studies

Joel Lee, Assistant Professor of Anthropology

Scott Lewis, Assistant Professor of Physical Education and Director of Outing Club

Dr. Alicia Maggard, Post-Doc, Williams-Mystic Maritime Studies Program

James Manigault-Bryant, Associate Professor of Africana Studies

Luana Maroja, Associate Professor of Biology

Laura Martin, Assistant Professor of Environmental Studies

Brittany Meché, Bolin Fellow

April Merleaux, Visiting Assistant Professor of Environmental Studies

Karen R. Merrill, Professor of History

Manuel Morales, Professor of Biology and Director of Research Hopkins Forest

James Nolan, Professor of Sociology

Julie Pedroni, Lecturer in Philosophy

Timothy Pusack, Assistant Professor of Marine Ecology, Williams-Mystic Maritime Studies Program

Jay Racela, , Lecturer, CES and Morley Sciences Laboratories

David P. Richardson, Professor of Chemistry

Kenneth Savitsky, Professor of Psychology

David C. Smith, Senior Lecturer in Biology

David L. Smith, Professor of English

Greta F. Snyder, Visiting Assistant Professor of Women's, Gender, and Sexuality Studies

John W. Thoman, Jr., Professor of Chemistry

Claire Ting, Professor of Biology

Tom Van Winkle, Executive Director of The Williams-Mystic Maritime Studies Program

ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise. The concentration in Environmental Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;
- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Environmental Center, a Living Building and the Program's home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center.

ADVISING

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

STUDY AWAY

Many study away options are available to students in Environmental Studies, including the Williams-Mystic Maritime Studies Program.

Students considering either a semester or year away who intend to concentrate in Environmental Studies should consult the Chair or Associate Director of Environmental Studies and the Dean in charge of study away as early as possible to discuss their options. Students may take up to two courses outside of Williams toward their concentration, but must have advance approval in writing from the Chair of Environmental Studies.

CONCENTRATION IN ENVIRONMENTAL STUDIES

The Environmental Studies concentration provides students with an opportunity to explore how humans interact with the environment, including physical, biological, philosophical, and social elements. The concentration is designed so that students will understand the complexity of issues and perspectives that inhere in environmental problems and will appreciate that most environmental issues lack distinct disciplinary boundaries. The goal of the concentration is to educate students to be well-informed, environmentally literate citizens who have the capacity to become active participants in the local and global community. To this end, the concentration is designed to develop the capability to think in interdisciplinary ways and to use synthetic approaches to solve problems while incorporating the knowledge and experiences gained from majoring in other departments at the College.

The Environmental Studies concentration is a seven course concentration in which students gain broad exposure to environmental studies while pursuing another major. In addition to the core of ENVI 101, ENVI 102, ENVI 302 and ENVI 412, students pursuing the concentration will take one elective from each group that represents a broad category of inquiry: Environmental Policy; Humanities, Arts, and Social Sciences; and Natural World.

Credit for AP, IB, A-levels and other pre-Williams Courses

Students are not allowed to place out of ENVI 101 or ENVI 102.

Core Courses (4 courses)

[ENVI 101\(F\)Nature and Society: An Introduction to Environmental Studies](#)

Taught by: [Pia Kohler](#), [Laura Martin](#), [April Merleaux](#)
[Catalog details](#)

[ENVI 102\(S\)Introduction to Environmental Science](#)

Taught by: [Mea Cook](#), [Sonya Auer](#)
[Catalog details](#)

[ENVI 302 / AMST 302\(F\)Environmental Planning Workshop: Community-Based Experience](#)

Taught by: [Sarah Gardner](#), [Henry Art](#)
[Catalog details](#)

[ENVI 412 / MAST 402\(S\)Senior Seminar: Perspectives on Environmental Studies](#)

Taught by: [Pia Kohler](#)
[Catalog details](#)

Distribution Courses (3 courses, 1 from each group)

In order to earn the concentration a student must take one course from each of the following three groups. Courses may be counted both toward the concentration in Environmental Studies and toward a disciplinary major (it is not possible to major in Environmental Studies while also concentrating in Environmental Studies).

Students may check with the Chair or Sarah Gardner, Associate Director of Environmental Studies to see if other courses not listed here might count as electives, such arrangements must be approved in writing.

INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Environmental Studies concentration requirements, the following courses are offered:

ENVI 397, 398 Independent Study of Environmental Problems

ENVI 493-W31-494 Honors Thesis and Senior Research

Winter Study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year's Winter Study offerings.

HONORS IN ENVIRONMENTAL STUDIES CONCENTRATION

Candidates for honors in Environmental Studies will complete a thesis in their senior year. A student earns honors by successfully completing a rigorous independent project under the supervision of a member of the CES faculty. The thesis may either be a one-semester plus Winter Study project, or a full-year project (two semesters plus Winter Study). Honors will be awarded on the basis of the academic merit and originality demonstrated by the student in the completed thesis. Because many theses will require sustained field, laboratory or archival work that is difficult to combine with conventional coursework, students are strongly encouraged to spend the summer before senior year and/or their senior year Winter Study doing advance research.

Funds to support student research are available from endowment funds of the CES, and an open competition is held each spring to allocate summer funding resources. Some other departments also provide limited support for summer thesis research. Students and their faculty sponsors should plan the thesis with the expectation of such research in mind.

Juniors who wish to apply to pursue honors should submit a 5-page proposal to their intended advisor and the Chair of Environmental Studies by the end of the week following spring break. If a student wishes to pursue thesis research advised by a faculty member not affiliated with CES, the student must also identify a co-advisor from within the program.

Environmental Studies concentrators may undertake an honors thesis and submit it to both their major department and Environmental Studies; petitions for a joint honors project should be approved by the department chair and the Chair of Environmental Studies by the end of the junior year. Students applying to conduct an honors thesis in Environmental Studies will be notified by the end of the spring semester whether or not their proposal has been approved.

Students doing a full-year thesis should plan on a presentation in early November to their thesis advisor, second reader, and, if applicable, co-advisor, at which the thesis writer will offer a discussion of the work completed on the thesis to date, and provide an outline of the full thesis and a timetable for completion of the remaining parts of the thesis.

ENVI 100 (S) Introduction to Weather and Climate

Cross-listings: GEOS 100 ENVI 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-years and sophomores

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 101 (F) Nature and Society: An Introduction to Environmental Studies

Environment and society interact on scales from the local to the global. This course explores these interactions and introduces students to the interdisciplinary methods of environmental studies. We will investigate the historical development of environmental problems -- including pollution, land grabbing, and species extinction -- and their possible solutions. We will survey policy-making and activism in a variety of contexts and will examine art, literature, film, music, maps, advertisements, and other cultural objects. Throughout the course, we will ask how unequal distributions of power affect people and environments. Case studies, readings, discussions, and field exercises will help students develop their understanding how natural systems influence and are influenced by human activities.

Class Format: discussion

Requirements/Evaluation: participation, in-class exercises, several shorter writing assignments, and a final exam

Prerequisites: none

Enrollment Limit: 25/section

Expected Class Size: 25/section

Grading: yes pass/fail option, yes fifth course option

ENVI 102 (S) Introduction to Environmental Science

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week

Requirements/Evaluation: weekly short quizzes, three exams, weekly homework, two lab reports, participation

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: required course for Environmental Studies major and concentration

Distributions: (D3)

ENVI 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103 ENVI 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends on where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

Class Format: discussion, three hours per week and laboratory, two hours per week in alternate weeks/occasional field trips

Requirements/Evaluation: written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

ENVI 104 (F) Oceanography

Cross-listings: GEOS 104 ENVI 104 MAST 104

Secondary Cross-listing

The oceans cover about 72% of Earth's surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves;

ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: discussion, three hours per week and laboratory, two hours per week in alternate weeks/one all-day field trip

Requirements/Evaluation: two hour exams, lab work, participation in the field trip, and a final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students, MAST concentrators

Expected Class Size: 48

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

ENVI 105 (F) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101 ENVI 105

Secondary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first-years and sophomores

Expected Class Size: 30

ENVI 108 (F) Energy Science and Technology (QFR)

Cross-listings: ENVI 108 PHYS 108

Secondary Cross-listing

Energy use has skyrocketed in the United States and elsewhere in the world, causing significant economic and political shifts, as well as concerns for the environment. This course will address the physics and technology of energy generation, consumption, and conservation. It will cover a wide range of energy sources, including fossil fuels, hydropower, solar energy, wind energy, and nuclear energy. We will discuss energy use in transportation, manufacturing, building heating, and building lighting. Students will learn to compare the efficiencies and environmental impacts of various energy sources and uses.

Class Format: twice a week, occasional lab exercises, and a field trip to the college heating plant, all during class hours

Requirements/Evaluation: weekly assignments, two hour tests, and a final project culminating in an oral presentation to the class and a 10-page paper; all of these will be substantially quantitative

Prerequisites: high school physics, high school chemistry, and mathematics at the level of MATH 130

Enrollment Limit: 20

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 110 (S) The Anthropocene: Nature and Culture in the Human Age

In 2016, a group of scientists appointed by the International Commission on Stratigraphy, the body that keeps the official timetable of earth's history, argued that the planet has entered a new age known as the Anthropocene. Their questions were epochal: Has humanity become a geological force as powerful as those that have shaped the planet's deep past, such as ice sheets and asteroids? Have we truly entered "the human age," and if so, when did it begin and what does it all mean? This course will ask how researchers from different fields have sought to answer these questions. Just as important, it will ask how they became questions in the first place. Where did the idea of the Anthropocene come from? What are its social, political, and ethical implications? How we have arrived at this new understanding of our planet and ourselves? And what can this major intellectual shift—a shift that has already begun to send waves far beyond the academy into the worlds of art, literature, politics, and religion—tell us about the construction of environmental knowledge in the twenty-first century? Readings will come primarily from the environmental social sciences and humanities, including works by nineteenth and early twentieth-century environmental thinkers, but will be supplemented with material from the natural and environmental sciences. Topics will include climate change, mass extinction, urbanization, and deforestation. Our focus throughout will remain on ways of knowing, imagining, and representing global environmental change in an era of ever-expanding human influence.

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first years and sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ENVI 134 (F) The Tropics: Biology and Social Issues (DPE)

Cross-listings: BIOL 134 ENVI 134

Secondary Cross-listing

Intended for the non-scientist, this course explores the biological dimensions of social issues in tropical societies, and focuses specifically on the peoples of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology, evolution, and physiology. The course highlights differences between the tropics and areas at higher latitudes. It begins with a survey of the tropical environment of humans, including major climatic and habitat features. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria and AIDS. The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the importance of organic diversity, and the interaction of humans with their supporting ecological environment. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: debate

Requirements/Evaluation: two hour exams, a short paper, panel preparation, and a final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: seniors, juniors, sophomores, and first-year students, in that order

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: does not count for major credit in Biology; does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134 (D3) ENVI 134 (D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and areas at higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and impacts of climate change. For each section we focus on differences in power and the inequities of resource distribution. We then debate potential policies to ameliorate these inequities.

LEC Section: 01 MWF 9:00 am - 9:50 am Joan Edwards

ENVI 203 (F) Ecology (QFR)

Cross-listings: BIOL 203 ENVI 203

Secondary Cross-listing

This course combines lectures with field and indoor laboratory exercises to explore factors that determine the distribution and abundance of plants and animals in natural systems. The course begins with an overall view of global patterns and then builds from the population to the ecosystem level. An emphasis is given to basic ecological principles and relates them to current environmental issues. Selected topics include population dynamics (competition, predation, mutualism); community interactions (succession, food chains and diversity) and ecosystem function (biogeochemical cycles, energy flow).

Class Format: six hours per week

Requirements/Evaluation: problem sets, lab reports, hour exams, and a final exam

Prerequisites: BIOL 101 and 102, or ENVI 101 or 102, or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 35

Grading: no pass/fail option, no fifth course option

ENVI 205 (F) Geomorphology

Cross-listings: GEOS 305 ENVI 205 GEOS 201

Secondary Cross-listing

Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: discussion, three hours per week and laboratory, three hours per week/student projects; weekend field trip to the White Mountains

Requirements/Evaluation: two hour exams, a project, lab work and class participation

Prerequisites: any 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

ENVI 207 (F) Economic Geology and Earth Resources

Cross-listings: ENVI 207 GEOS 205

Secondary Cross-listing

"If it can't be grown, it must be mined." We depend on the solid Earth for a huge array of resources. The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging--all with geologic materials. As demand soars in both

established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the importance of understanding Earth's resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses. This course is in the SOLID EARTH GROUP for the Geosciences major.

Class Format: 2.5 hours lecture per week and one 3 hour lab per week, including some field labs

Requirements/Evaluation: one hour exam, a final exam, lab exercises, and a group project

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: sophomores and Geosciences majors

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

ENVI 208 (S) Saharan Imaginations (DPE)

Cross-listings: ENVI 208 ARAB 209 COMP 234

Secondary Cross-listing

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Literature furnishes a unique opportunity to gain more awareness of the organization of life in the desert and the ways in which its inhabitants have found harmony between their humanity and the Sahara's biodiversity. This course offers students the opportunity to engage in close readings of novels through the theme of the Sahara and Saharan space. Reading through the ethics of human mobility and actions in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Sahara sub-genre of Maghrebi and Middle Eastern literature. Whether grappling with transcontinental issues of climate change, biodiversity cannibalization or overexploitation of natural resources, the Saharan novel invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Students will be initiated to the ecocritical dimension of Maghrebi and Arabic literature and the discourses underlying it through the prism of the Sahara.

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 208 (D1) ARAB 209 (D1) COMP 234 (D1)

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

Not offered current academic year

ENVI 209 (F) Modern Climate

Cross-listings: GEOS 309 ENVI 209

Secondary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: a series of lab projects, a midterm, and a final exam

Prerequisites: GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

ENVI 211 (F) Race and the Environment

Cross-listings: ENVI 211 SOC 211 AMST 211 AFR 211

Secondary Cross-listing

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's *Dumping in Dixie* and David Pellow's *Garbage Wars*. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

Prerequisites: none

Enrollment Limit: 20

Not offered current academic year

ENVI 212 (S) The Economics and Ethics of CO2 Offsets (WS)

Cross-listings: POEC 214 ECON 214 ENVI 212

Secondary Cross-listing

Some electric utilities and other CO2 emission polluters are allowed to purchase carbon offsets to achieve a portion of their mandated emissions cuts, in effect, to pay others to reduce carbon emissions in their stead. Some individuals, college and universities, and for-profit and non-profit institutions have chosen voluntarily to purchase carbon offsets as a way of reducing their carbon footprint. But do offsets actually succeed in reducing carbon emissions? What separates a legitimate offset from one that is not? How should we measure the true impact of an offset? How do carbon offsets compare to other policies for reducing carbon emissions in terms of efficiency, equity, and justice? Is there something inherently wrong about "commodifying" the atmosphere? Is there something inherently wrong about selling or buying the right to pollute? Should colleges and universities be using the purchase of offsets to achieve "carbon neutrality?"

Class Format: meetings with the instructor in pairs for one hour each week

Requirements/Evaluation: a 5- to 7-page paper every other week; a 3-page written critique every other week; one re-write paper

Prerequisites: ECON 110 or the equivalent, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

POEC 214 (D2) ECON 214 (D2) ENVI 212 (D2)

Writing Skills Notes: Each student will write five 5-7 page papers on which I will provide written feedback regarding grammar, style, and argument. Each student will write five 3-page critiques of their partner's papers. As the final assignment, each student will revise one of their five papers.

ENVI 213 (S) Introduction to Environmental and Natural Resource Economics (QFR)

Cross-listings: ECON 213 ENVI 213

Secondary Cross-listing

We'll use economics to learn why we harm the environment and overuse natural resources, and what we can do about it. We'll talk about whether and how we can put a dollar value on nature and ecosystem services. We'll study cost benefit analysis, pollution in general, climate change, natural resources (like fisheries, forests, and fossil fuels), and energy. We will take an economic approach to global sustainability, and study the relationship between the environment and economic growth and trade.

Requirements/Evaluation: problem sets, short essays, paper(s); exam(s) are possible

Prerequisites: ECON 110

Enrollment Limit: 30

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course will count toward both the Environmental Studies major and concentration

ENVI 214 (F) Mastering GIS

Cross-listings: GEOS 214 ENVI 214

Secondary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam

Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS

Enrollment Limit: 20

Enrollment Preferences: Geosciences and Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ENVI 215 (F) Climate Changes

Cross-listings: ENVI 215 GEOS 215

Secondary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

Class Format: lecture three hours per week and one three-hour lab per week

Requirements/Evaluation: lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Geosciences majors

Expected Class Size: 14

ENVI 216 (S) Philosophy of Animals

Cross-listings: ENVI 216 PHIL 216

Secondary Cross-listing

Animals are and always have been part of human life. To name just a few: We treat animals as companions, as food, as objects of wonder in the wild, as resources to be harvested, as testing grounds for science, and as religious sacrifice. The abstract philosophical question before us is, *what are animals such that they can be all these things?* In this course we aim to engage that abstract question through two more focused projects. Firstly, we will try to understand the mental lives of non-human animals. Secondly, we will try to make sense of the moral dimensions of our relationship to animals. Throughout we will fuse a rigorous scientific perspective with more humanistic themes and philosophical inquiry. Topics include sentience, animal cognition, language in non-human animals, empathy and evolution, the history of domestication, animal rights, cross-cultural views on animals, arguments against and for vegetarianism and veganism, the morality of zoos, hunting and fishing, and pets and happiness.

Requirements/Evaluation: four 4- to 5-page papers and one 10- to 12-page final paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students with at least one previous philosophy course; there is no need to email the professor in advance to indicate interest in the course

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ENVI 217 (F) Landscape, Place and Power

Cross-listings: ENVI 217 AMST 216

Primary Cross-listing

How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European

colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental philosophy, and anthropology, and it will survey the major methodological and theoretical commitments that unite these fields.

Requirements/Evaluation: three 5- to 7-page essays; several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

ENVI 218 (S) "Ecologismo": Literature, Culture and the Environment in Latin America (DPE)

Cross-listings: RLSP 214 ENVI 218

Secondary Cross-listing

How have Latin American authors and artists responded to environmental concerns, from the logging and rubber booms that threatened the Amazon in the early 20th century to contemporary global warming? How do the realities of Latin American societies--including massive disparities of wealth and poverty; the cultural and political impacts of the region's indigenous populations; and the complex histories of colonialism, dependency and neoliberalism--inform Latin American responses to environmental issues? How does Latin America's environmental imaginary differ from those of the U.S. and Europe? In this course we will explore these issues and more through literature and other cultural texts from Latin America. We will consider short stories and novellas by authors including Horacio Quiroga (Uruguay), Luis Sepúlveda (Chile), Mempo Giardinelli (Argentina), and Ana Cristina Rossi (Costa Rica); poetry by Esthela Calderón (Nicaragua), Juan Carlos Galeano (Colombia), Homero Aridjis (Mexico); the paintings of Tomás Sánchez (Cuba); and feature films as well as shorter documentaries. In Spanish.

Requirements/Evaluation: brief response papers, as well as three 5- to 7-page essays based on close-readings of literary and cultural texts

Prerequisites: RLSP 105, placement exam results, or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Spanish and Environmental Studies majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Difference, Power, and Equity Notes: This course is inspired by and organized around Arturo Escobar's notion of "the political ecology of difference:" our work throughout the semester aims to understand the myriad ways in which "difference"--economic, ecological, and cultural--informs Latin American responses to environmental degradation.

Not offered current academic year

ENVI 219 (S) Evolution of and on Volcanic Islands

Cross-listings: GEOS 220 ENVI 219

Secondary Cross-listing

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous

chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics.

Requirements/Evaluation: five written papers

Prerequisites: 100-level GEOS course or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors and students with a demonstrated interest in geosciences

ENVI 221 (F) Introduction to Urban Studies: Shaping and Living the City

Cross-listings: AMST 221 ENVI 221 LATS 220

Secondary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: discussion

Requirements/Evaluation: attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students as well as American Studies majors and Latina/o Studies concentrators

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics

Cross-listings: GEOS 221 ENVI 222

Secondary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Requirements/Evaluation: weekly papers and a final oral presentation

Prerequisites: none

ENVI 224 (F) The Rise and Fall of Civilizations

Cross-listings: ANTH 214 ENVI 224

Secondary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: class discussion

Requirements/Evaluation: midterm, final exam, paper, two quizzes

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

ENVI 228 (F) Water as a Scarce Resource

Cross-listings: ENVI 228 ECON 228

Secondary Cross-listing

For a variety of reasons including environmental pollution, urbanization, changing agricultural techniques, resource mismanagement, and the consequences of climate change, water is becoming a scarce resource even in places where it was relatively plentiful in the past, and it is likely to become an increasingly scarce resource over the coming decades. In this course we will use basic economic models to consider policy issues relating to water: Is access to water a basic human right, and if so, what market and non-market mechanisms should play a role in water allocation? Does public ownership of water improve the way it is provided and used? Why do societies differ in their approaches to allocating water and are some systems better than others? What does it mean to have a property right to water? Could private property rights to water help address the water pollution problem? How can societies change their water-related property rights, regulations and social institutions when individuals have implicit or explicit rights to the institutional status quo? Who has the right to water that crosses international boundaries? How should societies allocate water across generations?

Class Format: meeting with the instructor in pairs for an hour each week

Requirements/Evaluation: a 5- to 7-page paper every other week (5 in all), prepare and present a written critique of their partners' papers in alternate weeks, and revise and re-write one of their five papers; evaluation will be based on the quality of the papers and on the quality of the student's oral presentations and commentary on the work of their colleagues

Prerequisites: ECON 110 or equivalent

Enrollment Limit: 10

Enrollment Preferences: first-year students and sophomores intending to major in Economics and/or to major or concentrate in Environmental Studies, and to students who are already major or concentrators in those subjects

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ENVI 229 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Primary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

Expected Class Size: 15

ENVI 231 (F) The African Anthropocene (DPE)

Cross-listings: AFR 231 ENVI 231 STS 231

Primary Cross-listing

Despite its low contributions to global carbon emissions, the continent of Africa is predicted to experience some of the worst effects of climate change. This interdisciplinary course investigates the causes and consequences of this troubling contradiction. It positions the African continent as an important site for understanding how legacies of empire, racial and gendered inequality, resource extraction, and capital accumulation impact contemporary global environmental politics. Students will engage theoretical texts, reports from international organizations, films, poetry, novels, and web-based content. Topics include: humanism/post-humanism; migration and displacement; representations of conflict; and sustainable development.

Class Format: non-traditional technologies, web-streams, social media (Tumblr/Twitter)

Requirements/Evaluation: assignments include: short written commentaries, current event analysis, presentations, and a final analytical essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators; juniors and seniors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 231 (D2) ENVI 231 (D2) STS 231 (D2)

Difference, Power, and Equity Notes: The African Anthropocene" considers inequity in environmental politics from the vantage of the African continent. Through selected readings and classroom discussions students will tackle questions of power, racial and gendered difference, empire, and economic stratification. The course contributes to the DPE requirement by helping students to develop skills to better analyze abiding challenges in global society.

Fall 2019

SEM Section: 01 TR 8:30 am - 9:45 am Brittany Meché

ENVI 232 (S) The Garden in the Ancient World

Cross-listings: CLAS 235 REL 235 ENVI 232 COMP 235

Secondary Cross-listing

Drawing on the literature, art, and archaeology of ancient gardens and on real gardens of the present day, this course examines the very nature and experience of the garden and the act of gardening. Using a multi-disciplinary approach, we will explore the garden as a paradise; as a locus for philosophical discussion and religious encounter; as a site of labor, conquest, and resistance; and as a place for solace, inspiration, and desire. This course will be grounded in crucial readings from antiquity, such as the Hebrew Bible, Homer, Sappho, Cicero, Lucretius, Vergil, Horace, Columella, and Augustine, and in the perspectives of more modern writers, from Jane Austen and Tom Stoppard to contemporary cultural historian George McKay. Ultimately, our goal is to analyze conceptions and expressions of beauty, power, and love-in the garden. All readings are in translation.

Requirements/Evaluation: class participation, short written assignments, and a final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Classics majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

ENVI 234 (S) Economics of Developing Countries (DPE)

Cross-listings: ENVI 234 ECON 204

Secondary Cross-listing

The leaders of developing countries almost universally proclaim "economic development" to be their eventual destination, but it is not easy to visualize the journey. Is rapid economic growth sufficient to generate development, or do governments need to pro-actively invest in health and education? Can agriculture support incomes and provide jobs, or is urban industrial development a prerequisite? How do households in developing countries insure themselves against adverse outcomes? Can policies enable entrepreneurship and innovation in such economies? Is it true that corruption is major obstacle? Has the climate crisis upended our traditional models to the point where we need to rethink the notion of development? The class will introduce these and other issues, as analyzed by economists.

Class Format: discussion

Requirements/Evaluation: short essays/assignments; two individual take-home exams; final group project

Prerequisites: one ECON class at Williams or prior course deemed equivalent by the Economics Department

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 234 (D2) ECON 204 (D2)

Difference, Power, and Equity Notes: This course provides a setting for students to learn about the causes and consequences of poverty in developing countries. It requires students to engage with questions of political and economic power, stressing attentiveness to how market relationships may not generate welfare-maximizing opportunities for poor and marginalized populations. Through exercises and a group project, the course builds analytical and empirical skills for diagnosing and addressing constraints on economic development.

ENVI 235 (S) Survival and Resistance: Environmental Political Theory

Cross-listings: ENVI 235 PSCI 235

Secondary Cross-listing

Contemporary struggles to reverse environmental destruction and establish sustainable communities have prompted some political theorists to rethink longstanding assumptions about politics and its relationship to nature. Does the environment have "rights"? What, if anything, is the difference between an ecosystem and a political community? Is democracy dangerous to the planet's health? Are environmental protections compatible with political freedom? How is the domination or conquest of nature connected with domination and conquest within human societies? What does justice demand in an age of climate change? In this class, we will consider the promise and limits of political theory to illuminate present day environmental crises and foster movements to overcome them. We will engage classic texts that helped to establish political theory's traditional view of nature as a resource, as well as contemporary texts that offer alternative, ecological understandings of nature and its entwinements with politics. Class will be driven primarily by discussion. Students will have significant responsibility for setting the agenda for discussions through informal writing submitted prior to class. As a writing intensive course, attention to the writing process and developing an authorial voice will be a recurrent focus of our work

inside and outside the classroom.

Requirements/Evaluation: formal and informal writing assignments and class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

ENVI 236 (S) Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern

Cross-listings: ARTH 236 ENVI 236 CLAS 236

Secondary Cross-listing

Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallarmé, "L'Après midi d'une faun," Aby Warburg, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Requirements/Evaluation: attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: first year graduate students, then second year graduate students, then advanced undergraduates

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ENVI 238 (F) Sustainable Economic Growth

Cross-listings: ECON 238 ENVI 238

Secondary Cross-listing

Is it possible to have infinite economic growth on a finite planet? This question has sparked a great deal of inquiry across the social sciences. Some

argue that we need to slow or even end economic growth to prevent environmental catastrophe. Others argue that market forces, especially changing prices and improved technology, will ensure that growth can continue unabated without significant negative consequences. Still others argue that government intervention is necessary to limit negative consequences of economic progress, but that effective interventions are still compatible with sustained economic growth. In this class, we will explore the insights that economics has to offer on this important question. We will start by considering the importance of finite inputs used in production, including fossil fuels, minerals, land, water and food, among others. Then, we will consider whether undesirable byproducts of economic growth will prevent sustained growth. This second part of class will place a lot of emphasis on climate change, but we will also discuss other forms of environmental degradation. Throughout the class, we will pay special attention to the role that government intervention can or cannot play in promoting sustainable economic growth. This class will reinforce core economic concepts taught in introductory microeconomics and introductory macroeconomics.

Requirements/Evaluation: midterms exams, final exam, problem sets, short writing assignments, class participation

Prerequisites: ECON 110 and ECON 120

Enrollment Limit: 30

ENVI 240 (F) Conservation and Climate Change (WS)

What does climate change mean for the future of Earth's 8.7 million-or-so species? This tutorial introduces students to an emerging literature on how climate change alters the distributions, behaviors, and interactions of plant and animal species. In it we will pay close attention to how to read a scientific paper and how to write about science from the discipline of environmental studies. Some of the questions we will consider include: How is scientific knowledge produced? What might the biotic world look like in 10, 100, and 1000 years? How are conservation and restoration practitioners responding to climate change? To what extent can local environmental management alter global trends?

Requirements/Evaluation: one 5- to 7-page essay every other week and carefully prepared oral responses to partners' essays in alternate weeks

Prerequisites: ENVI101 or permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: No divisional credit (WS)

ENVI 241 (S) The Politics of Waste

Cross-listings: ENVI 241 PSCI 242

Secondary Cross-listing

Waste is not just a fact of life, it is a political practice. To create and maintain political order requires devising collective means to pile up, bury, burn, or otherwise dispose of stuff deemed dirty or disorderly: waste management is regime management. In turn, our feelings of disgust for anything deemed waste shape political deliberation and action on environmental policy, immigration, food production, economic distribution, and much more. The very effort to define "waste" raises thorny political questions: What (or who) is disposable? Why do we find the visible presence of certain kinds of things or persons to be unbearably noxious? How should we respond to the fact that these unbearable beings persist in existing, despite our best efforts to eliminate them? What is our individual and collective responsibility for creating and disposing of waste? Serious inquiry into waste is rare in political theory and political science--perhaps understandably, given that the study of politics is shaped by the same taboos that shape politics. In this seminar we will openly discuss unmentionable topics and get our hands dirty (sometimes literally) examining the politics of waste. We will take notice of the erasure of waste in traditional political theory and work together to fill these gaps. To do so, we will draw on work in anthropology, critical theory, history, urban studies, and waste management science; representations of waste in popular culture; and experiences with waste in our lives. This course is part of a joint program between Williams' Center for Learning in Action and the Berkshire County Jail in Pittsfield, MA. The class will be composed equally of nine Williams students and nine inmates and will be held at the jail. An important goal of the course is to encourage students from different backgrounds to think together about issues of common human concern. Transportation will be provided by the college. *Please note the atypical class hours, Wed 4:45-8:30 pm*

Requirements/Evaluation: class attendance and participation, short essays, and a final paper

Prerequisites: not open to first-year students

Enrollment Limit: 9

Enrollment Preferences: final selection will be made on the basis of statements of interest solicited after pre-registration and interviews with the instructor

ENVI 242 (S) The Country and the City in the Classical World

Cross-listings: CLAS 242 ENVI 242 ANTH 242

Secondary Cross-listing

A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes? What are the values, stereotypes, and ideals--as well as artistic, literary, and architectural forms--associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside - not just as places, but also as states of mind. All readings are in translation.

Requirements/Evaluation: informed participation, two short papers (2-5 pages), final paper (8-10 pages)

Prerequisites: none, although prior knowledge of the ancient world will be useful

Enrollment Limit: 19

Enrollment Preferences: declared and intending majors in Classics and Environmental Studies

ENVI 243 (F) Reimagining Rivers

Cross-listings: ANTH 243 ENVI 243

Primary Cross-listing

Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including climate change, pollution, unsustainable agriculture, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and cultural identities far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Combining approaches from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, legal texts, and more.

Requirements/Evaluation: three 5- to 7-page papers and several short response papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ENVI 244 (S) Environmental Ethics (WS)

Cross-listings: ENVI 244 PHIL 244

Primary Cross-listing

What ethical standards should guide our individual and societal choices when those choices affect current and future environmental conditions? This course will introduce students to fundamental concepts, methods, and issues in environmental ethics. Initial tutorial meetings will focus on theoretical materials that will background later discussions and will include classic readings from the environmental ethics literature (e.g., Leopold, Taylor, Rolston). Subsequent sessions will pair readings about key concepts with specific cases that raise complex ethical issues, including the concept of moral standing and, e.g., people who do not yet exist, non-human individuals, species, and complex living systems; the concept of moral responsibility and complicity in environmentally damaging practices; the legitimacy of cost-benefit analysis as an environmental policy tool; and the valuation of human lives.

Requirements/Evaluation: six essays (5-7 pages each) and six carefully prepared oral responses to partners' essays; evaluation will be based on essays, oral responses, and quality of discussion

Prerequisites: ENVI 101 or one course in PHIL

Enrollment Limit: 10

Enrollment Preferences: declared and prospective Environmental Studies majors and concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: meets Value Theory requirement only if registration is under PHIL

Distributions: (D2) (WS)

ENVI 246 (F) Race, Power, & Food History (DPE)

Cross-listings: HIST 265 AMST 245 ENVI 246

Primary Cross-listing

Have you ever wondered why Spam is so popular in Hawaii and why ramen noodles are a cheap, ubiquitous food? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of critical food studies. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, and gender.

Requirements/Evaluation: two to three short writing assignments (4-5 pages); one longer final paper (8-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

ENVI 247 (S) Race and Religion in the American West

Cross-listings: LATS 247 REL 247 AMST 247 ENVI 247

Secondary Cross-listing

From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacrosapes" of the American West. Historian Patricia Limerick regards this region as an extraordinary site of convergence and one of "the greatest meeting places on the planet." The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged legal/protected definitions of "religion," and Asian immigrants built the

first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new "sights," "cites," and "sites" in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment.

Class Format: seminar/discussion

Requirements/Evaluation: student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)

ENVI 248 (F) "Our Response Will Define Our Future": Climate Change Policy Analysis (WS)

In 2014, UN Secretary General Ban Ki-moon declared: climate change is "the defining issue of our age. It is defining our present. Our response will define our future." In this tutorial, we will examine a broad range of proposed, and currently implemented, policy responses to this grand challenge. We will employ policy analysis to evaluate these strategies' effectiveness and viability. This tutorial will consider approaches at varied scales (ranging from university campuses to coordinated global action) and addressing different sectors (including transportation, energy generation, and food production).

Requirements/Evaluation: students alternate in preparing 5- to 7-page papers and 2-page responses (five papers and five responses in total), final paper building on one of the 5- to 7-page papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: 1. second-year students 2. Environmental studies concentrators and majors 3. first-year students

ENVI 249 (S) Food, Agriculture, and Globalization

This course examines the history and current politics of the international political economy of food with a focus on how agriculture and food provisioning have been transformed through imperialism and globalization. We examine the interactions of corporations, nation-states, multilateral international organizations, non-governmental organizations, and social movements in the formation of a globalized food system. Topics include the

historical antecedents of our present system, plantation agriculture, the influences of war and settler colonialism on global food production, Cold War transformations in the international food system, the origins of sustainable development discourse, international anti-hunger programs, fair trade and other labeling schemes, labor migration, the antiglobalization and local food movements, and neoliberalism. We will pay particular attention to theories about how producers and consumers are connected to one other through the political economy of food. The reading assignments are drawn from the fields of environmental, food, and policy history, and we will also read works from political scientists, international relations scholars, geographers, anthropologists, and advocacy organizations.

Requirements/Evaluation: oral presentations with handouts; 2 short concept papers (3-4 pages); 2 research papers (5-7 pages)

Prerequisites: none

ENVI 250 (S) Environmental Justice (DPE)

Cross-listings: ENVI 250 STS 250

Primary Cross-listing

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Requirements/Evaluation: several short essays, final essay

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 12

ENVI 255 (F) Environmental Observation

Cross-listings: GEOS 255 ENVI 255

Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, radar, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest.

Requirements/Evaluation: labs, quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

ENVI 273 (F) Politics without Humans?

Cross-listings: ENVI 273 STS 273 PSCI 273

Secondary Cross-listing

Are human beings the only beings who belong in politics? And is political involvement a unique or defining aspect of what it means to be human? Such questions are increasingly complex as the boundaries of "the human" become blurred by the rise of artificial intelligence, robotics, and brain implants: shifting attitudes towards both animal and human bodies; and the automation of economic and military decisions (buy! sell! attack! retreat!) that used to be the prerogative of human actors. How do visions of politics without humans and humans without politics impact our thinking about longstanding questions of freedom, power, and right? Can and should the link between humans and politics survive in an age in which "posthuman" or "transhuman" entities become central characters in the drama of politics? This class will consider these questions through readings, films and artifacts that bring political theory into conversation with science fiction, popular literature on the so-called "singularity" (the merger of humans with computers), science and technology studies, evolutionary anthropology, "new materialist" philosophy, and feminist theory.

Requirements/Evaluation: three 5- to 7-page papers, regular Glow posts, class participation

Prerequisites: please note that this is an introductory-level course with no prerequisites; first-year students and those with no background in political theory are welcome, as are more experienced students

ENVI 283 (F) Dirty Politics: Regulating Hazardous Chemicals and Wastes

Cross-listings: ENVI 283 PSCI 283

Primary Cross-listing

Since consumers were first introduced to the promise of "better living through chemistry," society has had to wrestle with the impacts, often far removed in place and time, resulting from a rapid proliferation of hazardous chemicals and wastes. Policy responses, be they at the local, national or global scale, are often limited to reactionary efforts to counter releases into the environment, are constrained by the prevalent use of the technologies in question, and further bring to the fore key challenges of environmental justice and risk management. How then are we to regulate DDT without adversely affecting our fight against mosquito-borne malaria? How might we preserve the ozone layer while still maintaining the benefits of food preservation through refrigeration? How can we reap the benefits of the electronic age without condoning the steady flow of electronic waste affecting workers' health and environments in developing countries? Emphasis will be placed on understanding the politics that bring about, and allow us to address, these problems. We will be examining in particular novel policy responses, including the US' revised legislation on chemicals passed in 2016 and citizen science initiatives such as those that brought attention to the crisis of lead-contaminated water in Flint, MI.

Requirements/Evaluation: participation, several smaller assignments, and a final research project

ENVI 291 (S) Religion and the American Environmental Imagination

Cross-listings: REL 291 SOC 291 ENVI 291

Primary Cross-listing

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of "eco-spirituality" and popular "nature religion." Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

ENVI 301 (F) Climate Changes (Latin America): Aesthetics, Politics, Science

Cross-listings: RLSP 401 ENVI 301

Secondary Cross-listing

In her 2007 book, *In Catastrophic Times: Resisting the Coming Barbarism*, philosopher Isabelle Stengers offers a chilling observation: "we are more badly equipped than ever for putting to work the solutions defined as necessary" to avoid the most devastating effects of global warming--the extinction of 25 to 75% of existing species; an increase in sea levels that will drown island nations and coastal cities; the breakdown of agricultural systems, leading to widespread famine; and the recurrence of powerful hurricanes and other so-called "natural" disasters. All of this, as Stengers and others point out, will create human upheaval, conflict and suffering on an unprecedented scale. This senior seminar examines works of literature, art and film that Latin Americans have produced in response to the catastrophic times in which we live. We will discuss the political, economic, and cultural histories that have led to our present moment, including neoliberalism, dictatorship, and the rise and fall of the leftwing Pink Tide. Through works of new and experimental fiction, poetry, film, performance and visual art, we will consider the lives and work of environmental activists, including Berta Cáceres and others who were murdered because of their outspoken opposition to extractive capitalism, examine the struggle for the decolonization of environmental knowledge, an epistemological battle increasingly waged on behalf of all living things, and experience the politics of mourning for the hundreds of thousands of life-forms disappearing from the planet. Cultural texts to be explored throughout the semester may include: *La vorágine* (José Eustasio Rivera, Colombia, 1924); *Distancia de rescate* (Samanta Schweblin, Argentina, 2014); *Lo que sueño Sebastián* (Rodrigo Rey Rosa, Guatemala, 1995); *Serras da desordem* (Andrea Tonacci, Brazil, 2006); *Boi Neón* (Gabriel Mascaro, Brazil, 2015); *American Fork* (George Handley, USA, 2018).

Requirements/Evaluation: rigorous preparation and participation in class discussions, oral presentations and discussion-leading, response papers, one 5- to 7-page paper and one 15- to 20-page paper

Prerequisites: one 300-level course in the department, evidence of a successful direct-enroll experience at a local university in Latin America or Spain, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: senior Spanish majors; after that, priority will be given to ENVI majors with a strong command of Spanish

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: this is the senior seminar required for all Spanish majors

Distributions: (D1)

SEM Section: 01 TF 2:35 pm - 3:50 pm Jennifer L. French

ENVI 302 (F) Environmental Planning Workshop: Community-Based Experience

Cross-listings: ENVI 302 AMST 302

Primary Cross-listing

This interdisciplinary, experiential workshop introduces students to the field of planning through community-based projects. Environmental Planning encompasses many disciplines pertaining to the natural and built landscape such as city planning, ecological design, climate resiliency, natural resource planning, landscape architecture, agricultural and food systems, walkable neighborhood design, energy planning, and community development, to name a few. In this workshop, students regularly get out of the classroom and gain direct experience working in the greater Berkshire region. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework, site visits, and concludes with a design project. Part 2 focuses on hands-on field work tackling an actual planning project under the guidance of a community partner. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including interviews, survey research, site visits, primary research, mapping, and site design and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related skill sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, report-writing, design, and teamwork. The class culminates in an on-site public presentation of each team's planning study.

Class Format: discussion/group workshop/project lab

Requirements/Evaluation: short writing assignments, class discussion, team projects, class presentations, final group public presentation and report

Prerequisites: ENVI 101 or permission of instructor; open to juniors and seniors only

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Unit Notes: required course for Environmental Studies major and concentration

ENVI 303 (S) Cultures of Climate Change

Cross-listings: ENVI 303 SOC 303

Primary Cross-listing

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators first; Anthropology and Sociology majors second

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

ENVI 307 (F) Environmental Law

Cross-listings: PSCI 317 ENVI 307

Primary Cross-listing

We rely on environmental laws to make human communities healthier and protect the natural world, while allowing for sustainable economic growth.

Yet, despite 40 years of increasingly varied and complex legislation, balancing human needs and environmental quality has never been harder than it is today. Environmental Studies 307 analyzes the transformation of environmental law from fringe enterprise to fundamental feature of modern political, economic and social life. ENVI 307 also addresses the role of community activism in environmental law, from local battles over proposed industrial facilities to national campaigns for improved corporate citizenship. By the completion of the semester, students will understand both the successes and failures of modern environmental law and how these laws are being reinvented, through innovations like pollution credit trading and "green product" certification, to confront globalization, climate change and other emerging threats.

Requirements/Evaluation: several short writing assignments, a term research project, and active participation in class

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 25

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

ENVI 308 (S) Science and Politics in Environmental Decision Making

This course explores the relationship between science and politics in environmental decision-making. How do legislators know when a species is endangered and warrants protection? What precautions should be applied in allowing genetically modified foods onto our plates? Can we, and should we, weigh the risks of malaria against the impacts of pesticides used to control those mosquitoes that transmit the disease? How has the global community come together to understand the risks from global climate change, and how has this understanding shaped our policy responses? What are some of the limits of science in shaping policy outcomes? In addressing these and other questions, we will pay particular attention to how power relations and existing institutions shape what knowledge, and whose knowledge, is taken on board in decision-making, be it at the local, national or global level. We will delve into how these dynamics shape policy outcomes and we will also examine novel approaches for incorporating the knowledge of traditionally disempowered groups, including indigenous and local communities.

Requirements/Evaluation: participation, several smaller assignments, and a final project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators, Public Health concentrators, and Political Science majors

ENVI 312 (F) Communities and Ecosystems (QFR)

Cross-listings: ENVI 312 BIOL 302

Secondary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function.

The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week

Requirements/Evaluation: lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

ENVI 313 (S) Chicago

Cross-listings: AMST 312 ENVI 313 LATS 312

Secondary Cross-listing

"The city of big shoulders has plenty of room for diversity," reads the official visitor's website for the City of Chicago. Focusing on this claim, this course asks students to think critically about what kind of room has been made for diversity--social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays, and popular culture, we will explore the material and discursive constructions of Chi-Town and urban life among its residents. Appreciating these constructions we also consider how Chicago has served as a key site for understandings of urbanity within a broader national and global context.

Class Format: discussion

Requirements/Evaluation: attendance and class participation, group presentations and discussions, 5 critical briefs (2-pages) and a book review essay (15 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: American Studies majors, Latina/o Studies concentrators and students who have taken LATS 220/AMST 221/ENVI 221

ENVI 315 (S) Ecocriticism

Cross-listings: ENVI 315 ENGL 312

Secondary Cross-listing

How does the human imagination encounter its environment? This overarching question is of particular importance now, as the humanities struggle to address the ecological crises of our time. We'll read selections from the long tradition of environmentally-minded literary works in order to historicize concepts of nature and wilderness, as well as from more recent theoretical and creative writing that reflects an increasing awareness of climate change, toxic waste and pollution, habitat loss and species extinction, population expansion, and other forms of environmental catastrophe. Finally, we will explore via our own writing the ethical and aesthetic imperative to find ways of imagining this ever-changing relation between the imagination and the environment.

Requirements/Evaluation: engaged participation; one 5- to 7-page paper and one final 12- to 15-page paper; frequent GLOW posts; and a creative journal

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or consent of the instructor

Enrollment Limit: 25

Enrollment Preferences: majors in English or Environmental Studies

ENVI 318 (F) California: Myths, Peoples, Places

Cross-listings: COMP 328 AMST 318 ENVI 318 LATS 318 REL 318

Secondary Cross-listing

Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as "sprawling multicultural dystopia," and California as "west of the west."

Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

ENVI 322 (F) Trash

Cross-listings: GBST 322 ANTH 322 ENVI 322

Secondary Cross-listing

What is waste? What is filth? Why do titles or categories of sanitation workers--"garbage man," for instance--bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental consequences of systems of waste management historically and in the present, with a focus on South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional focus - work on Dhaka and Delhi, Chicago and New York. There is also a fieldwork component to this class. In groups, students will conduct ethnographic micro-studies of elements of the systems of waste production and management in Berkshire County (e.g., cafeterias, retail outlets, homes, dorms, recycling facilities, sewage treatment plants). Students will post field notes to a class blog, and each group will present its findings in the form of a short film, multimedia presentation, or paper.

Class Format: discussion

Requirements/Evaluation: regular posting of critical response papers and an ethnographic final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors and juniors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ENVI 324 (S) Corals and Sea Level

Cross-listings: MAST 324 ENVI 324 GEOS 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

ENVI 329 (S) Our Planet's Plastic Plight

#stopsucking, #gotopless, #foodinthenude: these rallying calls to #rethinkplastic and ban plastic straws, coffee cups, and excessive food packaging are just the latest consumer-driven campaigns to combat the scourge of plastic proliferation. Indeed, over the past century, plastic has become ubiquitous in our societies. Durability, affordability and versatility, the very characteristics that explain this success, have heightened the pollution challenge we face today. Yet, we also rely on plastic for a variety of life-saving devices and implements. In this course, we will examine the chemistry and history of plastic and understand how its uses have impacted diverse systems including our oceans. As we undertake this semester-long lifecycle analysis of plastic in our daily lives, we will explore how additives, often toxic, complicate efforts to recycle plastic goods. We will also study international flows of this material, notably following China's decision in 2017 to constrain its imports of plastics for recycling. Finally, we will evaluate novel efforts to regulate plastic from the local to the global scale.

Requirements/Evaluation: participation, several small assignments, multi-part project setting out action plan to address a particular aspect of plastic pollution

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Environmental Studies majors, Public Health concentrators

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: No divisional credit

Attributes: ENVI Environmental Policy

Not offered current academic year

ENVI 339 (F) Conservation Biology (QFR)

Cross-listings: BIOL 329 ENVI 339

Secondary Cross-listing

Conservation biology is an interdisciplinary field that develops scientific and technical means for the protection, maintenance, and restoration of diversity at all levels of biological organization. This course provides an overview of the discipline including the causes and consequences of biodiversity loss as well as approaches and strategies used to combat biodiversity threats such as climate change, habitat fragmentation, and invasive species. Particular emphasis is placed on the ecological dimension of conservation and the application of biological principles (derived from physiological and behavioral ecology, population genetics, population ecology, community ecology, and systematics) to the conservation of biodiversity. The course combines lectures, readings, in-class discussion, and a laboratory that includes both field and lab projects.

Class Format: lecture and discussion three hours per week and lab three hours per week

Requirements/Evaluation: lab assignments, two exams, and discussion participation

Prerequisites: BIOL 203, or BIOL 202, or permission of instructor

Enrollment Limit: 24

Enrollment Preferences: Biology majors, seniors, and juniors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 329 (D3) ENVI 339 (D3)

Quantative/Formal Reasoning Notes: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

Attributes: ENVI Natural World Electives

Not offered current academic year

ENVI 340 (F) Posthuman Ecologies: Bodies, Environments, Art (DPE) (WS)

Cross-listings: ENVI 340 GERM 339 COMP 339

Secondary Cross-listing

What is it that makes us human? Or, to paraphrase the philosopher Donna Haraway, what if we have never been human at all? One of the central arguments of posthumanist theory is that the human being is not, as traditionally assumed, an individual, fixed subject in full control over its actions. Rather, we emerge only through our connections and interdependencies with others. The networks that shape us are both organic and inorganic; they include "nature," the microbial ecologies of our bodies, affective landscapes, and social and cultural constructs. Over the course of the semester, we will analyze how such networks fashion our humanity with the help of literature, film, and theory. Among other things, we will consider the queer ecologies of android bodies, probe the subversive potential of the cyborg in relation to questions of disability, and think about what it means to be human in the Anthropocene. Texts will include Sasa Stanisic, Yoko Tawada, Olga Tokarczuk, Franz Kafka, Octavia Butler, Donna Haraway, Jacques Derrida, and Theodor W. Adorno; films will include *Mad Max: Fury Road*, *Metropolis*, *Ex-Machina*, and episodes of *West World* and *Black Mirror*.

Requirements/Evaluation: four 1-page critical response papers over the course of the semester, oral presentation, creative final project with 4-page self-analysis

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 340 (D1) GERM 339 (D1) COMP 339 (D1)

Writing Skills Notes: The 1-page papers will help students refine their argumentative skills; they will essentially contain all elements of a longer paper

in miniature and provide a focused space on which to practice crafting convincing arguments. I will give students detailed feedback on these short papers. The final self-analysis will apply these skills to the student's own work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: The questions of ecology discussed in this course are inherently questions of power: power over the natural environment, power over our own bodies and those of others, both human and nonhuman, power over resources. We will consider how the very concept of "the human" facilitates such power structures, and acquire theoretical tools to help us rethink human being beyond such coercive relations.

Fall 2019

SEM Section: 01 Cancelled

ENVI 341 (S) Toxicology and Cancer

Cross-listings: ENVI 341 CHEM 341

Secondary Cross-listing

What is a poison and what makes it poisonous? Paracelsus commented in 1537: "What is not a poison? All things are poisons (and nothing is without poison). The dose alone keeps a thing from being a poison." Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons?

This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.

Class Format: three times per week

Requirements/Evaluation: two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam

Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry

Enrollment Limit: 30

ENVI 342 (F) The Nature of Gardens: From Eden to the High Line

The garden, since time immemorial, has been the touchstone for humans' interactions with the environment. The relationships between humans and their environments have been so intimate that the creation and origins mythologies of many cultures are set in the context of a garden or paradise. The garden is the environment in which humans have been created, and reciprocally gardens, by definition are the product of human design and environmental manipulation. This seminar examines the interactions between humans and gardens from the perspectives of creation mythologies, the origins of domestication of plants, the cultural expression and design of gardens, the historical exchange of cultivated plants, and evolution of garden design, and the interface of gardens and human biology. Each student will present a seminar based either on their own major interest, an historical, or garden design perspective. One all-day field trip will be scheduled for sometime during the semester.

Class Format: discussion classes, student-led seminars, and one all-day field trip

Requirements/Evaluation: weekly reaction papers (500 words) to reading assignments, seminar presentation, final paper in lieu of final exam

Prerequisites: an application (e.g., online form, statement of interest)

Enrollment Limit: 16

Enrollment Preferences: senior and junior ENVI majors and concentrators

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: No divisional credit

SEM Section: 01 TR 8:30 am - 9:45 am Henry W. Art

ENVI 346 (S) Environmental Psychology

Cross-listings: ENVI 346 PSYC 346

Secondary Cross-listing

This is a course in social psychology as it pertains to the natural environment. We will consider how the environment influences aspects of human psychology (e.g., the psychological implications of humans' disconnect with nature), as well as how human psychology influences the environment (e.g., why some people engage in environmentally destructive behaviors despite holding proenvironmental attitudes). At the core of this course is an attempt to examine various ways in which research and theory in social psychology can contribute insights to understanding (and encouraging) environmentally responsible behavior and sustainable practices, both here at Williams and globally. Because human choice and behavior play such an important role in environmental problems, a consideration of human psychology may therefore be an important part of the solution.

Requirements/Evaluation: a series of papers, two essay exams, written and oral reports of research

Prerequisites: PSYC 242 recommended, PSYC 201, or a comparable course in statistics and research methodology, is also recommended.

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and Environmental Studies concentrators

Expected Class Size: 16

Grading: yes pass/fail option, yes fifth course option

SEM Section: 01 Cancelled

ENVI 347 (S) Big Game: Adventure, Empire, Ecology (DPE)

Cross-listings: COMP 387 ENVI 347 ENGL 347

Secondary Cross-listing

Big Game: Adventure, Empire, Ecology asks how the era of imperial expansion and the study of "natural history" leads into our contemporary ecological crisis. We will begin with readings of influential colonial travel and adventure narratives like Robinson Crusoe, the captivity narrative of Mary Rowlandson, sections of Darwin and Captain Cook's travel journals, and in-class work with archival materials like the Indian Botanical Survey Flora and the photographs of Subhankar Banerjee. In the first weeks, we will consider how the aesthetics of adventure circulated throughout the British empire in both the East Indies and India, and ramifies elsewhere in the Dutch, French, Spanish, Portuguese and Belgian holdings. We will conclude with a suite of readings through which we will attempt to locate a productive intersection between ecocriticism and postcolonial studies, drawing together sensationalist disaster journalism with environmental activism emerging from the Global South. This course will be especially of interest to students in English, Comparative Literature, and Environmental Studies.

Requirements/Evaluation: presentation, short paper and revision, final research project

Prerequisites: one lower-division literature or related course

Enrollment Limit: 25

Enrollment Preferences: students with related course experience

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

ENVI 348 (S) Beyond Cli-Fi: Climate Change Histories & the Arts of Resilience (DPE)

Cross-listings: AMST 347 ENVI 348

Primary Cross-listing

This interdisciplinary environmental humanities seminar begins with the premise that our present climate crisis is a political project of globalization propelled by capitalism and its cultural logic. Causes and consequences of climate change can only be understood by examining the historical trajectories of carbon-based economic, political, and cultural systems since the 19th century. We trace the intellectual genealogy of modern climate science, consider the politics of indigenous knowledge as related to extractivism, and examine literary and artistic engagements with the natural world. We pay particular attention to the narrative strategies that scientists and policymakers use to talk about climate, and we develop creative critiques of the dominant discourses. We use historical and cultural analysis to study social movement strategy and tactics among advocates for climate mitigation, adaptation, and resilience. We begin and end with creative responses to climate crisis, always asking: How can we move beyond dystopia and defeatism? How might history inform social movements for climate resilience? How can the arts, theater, and literary production articulate a new politics of survival? What narrative forms enable and inspire climate action?

Requirements/Evaluation: one short creative writing assignment; several short critical papers (3-4 pages); final essay (10-15 pages)

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: none

Enrollment Preferences: ENVI or AMST majors or concentrators; people with demonstrated interest in the course topics

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 347 (D2) ENVI 348 (D2)

Difference, Power, and Equity Notes: This course considers the historical differences in economic, political, and cultural power which have shaped our present climate crisis. We consider both who drives environmental change and who experiences it first hand. We consider in particular how differences of class, race, and gender shape capacities for resilience and resistance and we examine social movement strategy, with particular attention to Indigenous and POC social movement thinkers and leaders.

This course provides the student an understanding of the applicability of current laboratory instrumentation both to the elucidation of fundamental chemical phenomena and to the measurement of certain atomic and molecular parameters. Student will gain knowledge and understanding of the theory and practical use of a variety of instrumental techniques; including, but not limited to, chromatography, mass spectrometry, thermal methods, electroanalytical techniques, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies, with examples drawn from the current literature. Analytical chemical and instrumental techniques will be developed in the lecture and extensively applied within the laboratory. These skills are useful in a wide variety of scientific areas. Through exploration of primary literature and review articles we will discuss recent developments in instrumental methods and advances in the approaches used to address modern analytical questions.

Class Format: lecture three hours per week and laboratory four hours per week

Requirements/Evaluation: class participation, 2 exams, problem sets, oral presentations and discussions of selected topics, and an independent

project

Prerequisites: CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

ENVI 368 (F) Technology and Modern Society

Cross-listings: SOC 368 ENVI 368

Secondary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

ENVI 387 (S) Economics of Climate Change (QFR)

Cross-listings: ECON 522 ENVI 387 ECON 387

Secondary Cross-listing

This course introduces the economic view of climate change, including both theory and empirical evidence. Given the substantial changes implied by the current stock of greenhouse gases (GHGs) in the atmosphere, we will begin by looking at impacts on agriculture, health, income, and migration in both poor and wealthy countries. Next we will study adaptation, including capital investments and behavioral changes. We will examine the sources of climate change, especially electricity generation and transportation, and think about optimal policies. What is the socially optimal amount of climate change? Why have countries had such a hard time agreeing on GHG emissions reductions, and how might we overcome such difficulties? We will consider the growing body of evidence from attempts to regulate GHGs, including China's pilot cap-and-trade programs, the EU ETS, and the US Clean Power Plan. We will pay particular attention to the political economy of regulation and ways in which policy results have departed from theoretical predictions. Throughout the course we will discuss the limits of the economic approach to climate change, pointing out questions on which

economic theory provides little guidance.

Class Format: lecture

ENVI 404 (S) Coastal Processes and Geomorphology (QFR)

Cross-listings: MAST 404 ENVI 404 GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up

suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

ENVI 405 (F) Geochemistry: Understanding Earth's Environment

Cross-listings: GEOS 405 ENVI 405

Secondary Cross-listing

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth's landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Requirements/Evaluation: seminar discussions, papers, labs and final project

Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303

ENVI 420 (S) Architecture and Sustainability in a Global World

Cross-listings: GBST 420 ARTH 420 ENVI 420 EXPR 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: with travel component

Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final

project/paper (15-20 pages) and presentation

Prerequisites: none, although a course in art/architectural history would be advantageous; registered students will also be required to submit an online application provided by the instructor before enrollment in the course is confirmed

Enrollment Limit: 6

Enrollment Preferences: Art History majors, Environmental Studies majors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

ENVI 423 (F) Global Change Ecology

Cross-listings: BIOL 413 ENVI 423

Secondary Cross-listing

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioural mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

Class Format: two 75-minute discussion sessions each week

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL 203 or BIOL 305, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: senior Biology majors who have not yet taken a 400-level course

ENVI 445 (F) World's End: Literary Ecologies of the Limit

Cross-listings: ENVI 445 ENGL 445

Secondary Cross-listing

Consciousness of the world's finitude in a time of environmental degradation and headlong global capitalism prompts restraint, a harboring of resources. But beyond the economic logic of conservation and expenditure, might imagining the world from the vantage point of its limit provoke a more profound rethinking of ourselves and the things of the world? Does it change what it means to possess, or even what an experience of the world is? Does it change human relationship? This course explores these questions in part by reaching back to the early modern period, when the

boundedness of nations and worlds first comes to view in a meaningful way. But the course will have a long arc, from Shakespeare to Sinha's *Animal's People*. Primary works will include: Shakespeare, *As You Like It*; Marvell, "Upon Appleton House"; Ovid, *Metamorphosis*; Browne, *Urn Burial*; Titian, Wordsworth, McCarthy, *The Road*; Alice Oswald; photography (Struth, Hutte), video installations (Pipilotti Rist). Theoretical texts include: Nixon, *Slow Violence*; Agamben, *The Time that Remains*; Heidegger, "Question Concerning Technology"; Latour, "An Inquiry into Modes of Existence"; Nancy, *After Fukushima*; Derrida, *The animal that therefore I am* and *Beast and the Sovereign*.

Class Format: combination discussion seminar and tutorial conferences

Requirements/Evaluation: one 5-page paper and one final 15-page paper

Prerequisites: none

ENVI 478 (S) Cold War Landscapes

Cross-listings: HIST 478 AMST 478 ENVI 478

Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research papers on any geographical area of the world.

Requirements/Evaluation: class participation, weekly critical writing, and a final 20- to 25-page research paper

Prerequisites: none

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with previous coursework in History

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 490 (D2) ENVI 491 (D2) HIST 491 (D2)

Attributes: AMST Space and Place Electives HIST Group F Electives - U.S. + Canada

Not offered current academic year

ENVI 493 (F) Senior Research and Thesis: Environmental Studies

Environmental Studies senior research and thesis; this is part of a full-year thesis (493-494).

Prerequisites: approval by the Chair of Environmental Studies

Grading: yes pass/fail option, yes fifth course option

Distributions: No divisional credit

Fall 2019

HON Section: 01 TBA Pia M. Kohler

ENVI 494 (S) Senior Research and Thesis: Environmental Studies

Environmental Studies senior research and thesis; this is part of a full-year thesis (493-494).

Prerequisites: approval by the Chair of Environmental Studies

Grading: yes pass/fail option, yes fifth course option

Distributions: No divisional credit

Winter Study -----

ENVI 12 (W) Geology of the National Parks

Cross-listings: ENVI 12 GEOS 12

Secondary Cross-listing

A vicarious trip through a variety of the national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Parks will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by out-of-class study of rock samples. Reading will be from a paperbound text *PARKS AND PLATES* and from short publications of the U.S. Geological Survey and natural history associations linked to the parks. The second part of the month will involve independent study and meetings with the instructor to prepare an oral report about the geology of a park of the student's choice. These reports during the last week will be comprehensive and well illustrated, using PowerPoint and pertinent maps and samples. A detailed outline and list of references will be provided to the group at the time of the presentation.

Requirements/Evaluation: final project or presentation; participation in class meetings

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference to first-year students who have had no previous college study of geology

Grading: pass/fail only

Materials/Lab Fee: approximately \$150 for books

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 12 GEOS 12

Winter 2020

LEC Section: 01 TBA Cancelled

ENVI 13 (W) United States Environmental Law: Its Historic Roots, Its Uncertain Future

Cross-listings: ENVI 13 JLST 13

Secondary Cross-listing

Taught from the perspective of an experienced trial attorney, this course will examine the role environmental law plays in the United States today in light of how that role has developed during the nearly fifty years since the modern era of environmental law began. As a preface, we will consider the significantly more limited influence of environmental law in our national affairs before 1970 and some of the historical and political reasons for that situation. We will examine the reasons why the law's early application in the first half of the 20th century almost exclusively to the conservation and preservation of natural resources took on in the second half a markedly different approach, one emphasizing pollution control and all but ignoring resource conservation. The course will begin by tracing the development of an American consciousness towards the environment through an examination of our law and our literature. The term "law" includes state and federal judicial decisions and legislation, particularly during the presidency of Theodore Roosevelt and during the decades which followed the year 1970 when much of the legal basis for the American environmental protection movement was established. The term "literature" includes not just the written word (the first book we look at is "The Lorax" by your favorite childhood author, Dr. Seuss, but also painting, sculpture, and music. Nothing too heavy! We will examine the historical and legal choices we as Americans have made which have put our environment on trial. What has occurred in our development as a people that explains this quintessentially American phenomenon? Our journey begins with the Puritans of New England and the planters of Virginia and their predecessors in the New World and then moves swiftly to the beginning of the modern era in environmental law and to its now uncertain future. In light of this historical situation students will examine state and federal legislative and judicial attempts to address environmental problems and then try to reach informed, rational conclusions as to whether those attempts were successful. What were the political, social and economic issues involved and, ultimately, how did their context affect the legal solutions imposed. Cases decided at the appellate level will be introduced and examined through their trial court memoranda opinions in order to observe how the legal system actually works and how frequently the reasoning and conclusions behind the trial judge's decision changes as the case works its way through the appellate process. This course will be presented from a litigator's point of view, that is to say, both the practical and the theoretical, emphasizing what is possible to achieve in the litigator's real world as informed by what the academician would present from the security of the classroom. Evaluation will be based on attendance and classroom participation. Students will prepare several short papers, single-page "clerk's notes," which will present one or more sides of an issue and form the basis for classroom discussion. They will be asked to defend or reject the conclusions reached or approaches taken by our courts and legislatures and by our literature, as broadly defined, on environmental issues. Adjunct Instructor Bio: Philip R. McKnight '65 is a trial and appellate attorney. At Williams he completed the honors program for both American History and Literature and European History and then he earned his law degree from The University of Chicago Law School and practiced in the state and federal courts of New York and Connecticut, as well as in Europe.

Requirements/Evaluation: five single-spaced, 1-page papers called "clerk's notes," class performance, including a team approach to the Pebble Mine, Alaska, permitting controversy

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: seniors first, then juniors, etc

Grading: pass/fail only

Materials/Lab Fee: approximately \$100 for books

Winter 2020

LEC Section: 01 MWF 10:00 am - 11:50 am Philip R. McKnight

ENVI 15 (W) Bridges over Troubled Waters: Environmental and Public Health Advocacy for Safe Drinking Water

Go behind the headlines to learn about the issues and advocates involved in recent drinking water crises, including lead in Flint, Michigan, Pittsburgh, Pennsylvania, and Newark, New Jersey; chemicals in Hoosick Falls, New York; and crumbling infrastructure in Puerto Rico. This course will introduce students to basic drinking water science, public health data, laws and regulations, types of lawsuits, and advocacy tools involved in today's most pressing drinking water threats. We will discuss issues such as environmental justice, citizen science, corporate responsibility, grassroots organizing, and the role of government and law in addressing public health crises. The course is geared towards interested water consumers and students interested in pursuing careers in environmental or public health advocacy alike. Students will be assigned brief readings drawn from journal and popular news articles and excerpts from nonfiction books, and to view a couple films (either during evening group screenings or independently). In conjunction with this course, and in addition to attending hour-long Friday seminar discussions, students will be expected to attend Friday Log Lunches during Winter Study, which will feature drinking water advocates. Evaluation will be based on class participation and a short (3-5 page) paper and (5-10 minute) presentation on a topic of students' choice involving a drinking water threat or community that is experiencing or has confronted a drinking water threat. Adjunct Instructor Bio: Joya Sonnenfeldt '10 was Williams' first Environmental Policy major. She also holds a law degree and a masters in environmental management from Yale University. She has spent the majority of her career on the litigation team of the Natural Resources Defense Council, largely working to secure safe drinking water. Most recently, she clerked for the Honorable Patty Shwartz on the United States Court of Appeals for the Third Circuit.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Preferences: brief statement of interest

Grading: pass/fail only

Materials/Lab Fee: approximately \$50 for books

Winter 2020

LEC Section: 01 WRF 1:00 pm - 2:50 pm Joya C. Sonnenfeldt

ENVI 16 (W) Sensing Place

Cross-listings: ENVI 16 ARTH 16

Secondary Cross-listing

Bridging art history and environmental humanities, this course will explore how the experience of landscape, a term that privileges the visual, is impacted not only by sight but by sound, touch, smell, and even taste. We will look at the way artists have translated embodied experiences of landscape into paint and other media as we ask what is lost or gained, just as we will consider what the taste of tea or oysters might tell us about the history and present environment of the places they come from. By looking at how artists and writers have theorized and experienced landscapes in the past, we will explore how those histories inform how and what we sense today. We will ask: how is the environment experienced (and narrated) through our bodies? How do human interactions with nature produce a "sense" of ownership and domination? Is something more symbiotic possible? To answer these questions, we will look at works of art in the collections of WCMA and The Clark, read work by historical and contemporary writers,

and engage in experiential learning that activates all senses, including hiking, tasting, and making. Evaluation will be based on participation, including weekly journal reflections, and the completion of a 10-page written assignment that will combine creative reflection and research. Attendance and active participation in class discussions will also be required. We will typically meet three times a week for three-hour sessions, with some additional required field trips. Adjunct Instructor Bio: Elliot Krasnopoler is a Doctoral Candidate in the History of Art at Bryn Mawr College, where he is completing a dissertation about the intersections of contemporary art, landscape, and time. He holds an M.A. in Art History from Williams College, and a B.F.A. in Photography from the Rochester Institute of Technology. He lives in North Adams, MA, and is an avid hiker, tea enthusiast, and mineral collector.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: more senior students will be given priority

Grading: pass/fail only

Materials/Lab Fee: \$50

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 17 (W) Unsettling Environments: Conservation, Care, and Indigeneity in the Anthropocene

Cross-listings: ANTH 16 ENVI 17

Secondary Cross-listing

How might we think of killing animals as a form of care? How do narratives of ecological decline associated with the Anthropocene and climate change potentially exclude Indigenous perspectives? In this course, we will think critically about themes related to resource use and extraction, human-animal relations, and settler colonialism. We will unsettle dominant conceptions of conservation, call into question management models that marginalize Indigenous peoples and ways of being in the world, and explore how ways of relating to the more-than-human shape Indigenous and non-Indigenous responses to climate change and environmental degradation. Drawing upon theoretical works and ethnographic investigations within anthropology and American Indian and Indigenous Studies, as well as poetry and fiction, including the works of Indigenous and settler scholars and writers, we will examine how theorizations of and relations with animals, plants, and landscapes shape conservationist logics, resource management models, and understandings of what it means to "care" for land and the multiple beings that animate it. This course involves six hours of in-class work and an average of 20 hours of outside-of-class work weekly. The course will rely heavily on student preparation for class and student participation in small- and large-group discussions in class. This is an introductory course, and assessments will be weighted more towards students' understandings of broader themes and questions rather than proficiency in any one school of theory or ethnographic locale. Students will earn their grades as follows: with one-sentence summaries and prepared questions for twelve of the assigned readings (once for each class meeting); as co-discussants for one class meeting; with one short take-home essay exam (750-1000 words); and with a final paper (roughly 3000 words) drawing upon ideas and comparative examples encountered in the course to analyze a current episode or event. Adjunct Bio: William Voinot-Baron is a PhD candidate in cultural anthropology at the University of Wisconsin-Madison. His dissertation is an ethnographic examination of the ways in which salmon are central to both understandings and practices of care in an Alaska Native (Yupiaq) village in southwest Alaska, and the consequences of State of Alaska and federal fishing regulations for tribal sovereignty and well-being. He holds an M.A. in Anthropology from Columbia University and an A.B. in Anthropology and Environmental Studies from Bowdoin College

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: seniority; students may be asked to send the instructor and email explaining why they are interested in the course

Grading: pass/fail only

ENVI 25 (W) Tropical Marine Conservation

Cross-listings: BIOL 25 ENVI 25

Secondary Cross-listing

Tropical marine ecosystems such as coral reefs and mangrove forests are biodiversity 'hotspots'; they are home to an astounding variety of marine organisms, provide critical support for the livelihoods and food sources of millions of people, but are also highly vulnerable to human impacts such as climate change and overfishing. This winter study travel course will offer a unique combination of classroom, laboratory, and hands-on experiences in the scientific study, management, and restoration of tropical marine ecosystems using the Bahamian island of Eleuthera as a case study. Eleuthera is rich in marine diversity but still in the process of implementing management policies and practices for its many fisheries. As such, it presents a unique opportunity for students to experience conservation-in-action. Students will gain an understanding of the structure, function, and major threats facing tropical marine ecosystems. They will develop practical skills in conducting field surveys of tropical marine species and in implementing management and restoration strategies on the Island. They will also engage with the local community to understand the social and economic impacts of marine conservation policy and to explore alternative sustainable development strategies for subsistence fisheries that rely on these marine ecosystems. Students are expected to participate in 2 days travel and 13 days of research on the Island. The daily schedule will include field research and independent study. Students are expected to devote time each day to researching and writing a final paper that integrates their field studies, interviews, and policy research. Students will also use this time to prepare and deliver an oral slide presentation on their research the last two days of the trip. After return to Williamstown, students will be given 5 days to finish writing their final papers.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: BIOL 203 or ENVI 101 or MAST 311 or BIOL 413/ENVI 423 or permission of instructor

Enrollment Limit: 8

Enrollment Preferences: preference will be given to juniors and seniors

Grading: pass/fail only

Materials/Lab Fee: cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

Claire Ting, Professor of Biology

Tom Van Winkle, Executive Director of The Williams-Mystic Maritime Studies Program

ENVIRONMENTAL STUDIES

Environmental issues call upon citizens, organizations, and governments to grasp complex scientific concepts, address conflicting human values, and make difficult economic, political and ethical choices. A proper understanding of environmental issues is therefore an interdisciplinary exercise.

The concentration in Maritime Studies is designed to help students to:

- Effectively address complex environmental issues by integrating perspectives from the natural sciences, the social sciences, and the arts and humanities;
- Understand ecological principles and the nature of living systems;

- Apply scientific methods to collect environmental data and evaluate environmental quality;
- Understand the political and economic factors that inform, enable, and constrain environmental policy;
- Understand the social, cultural, and historical factors that shape environmental thought, history, and behavior;
- Develop significant understanding of one or more of the essential methodological approaches required in addressing environmental challenges;
- Apply their learning in a practical setting.

The program is administered by the Center for Environmental Studies (CES), located in the Class of 1966 Environmental Center. Founded in 1967, CES was one of the first environmental studies programs at a liberal arts college. In addition to the academic program described below, CES is the focus of a varied set of activities in which students lead and participate, often with other members of the Williams community. CES offers extensive resources including databases, funding for student-organizations, and student initiated activities, and generous support for summer research and internships. The Class of 1966 Center, a Living Building and the Program's home, includes a classroom, living room, study rooms, kitchen, as well as student gardens. The CES manages the Hopkins Memorial Forest, a 2600-acre natural area northwest of campus, in which there are field-study sites and a laboratory, and where passive-recreation opportunities may be found in all seasons. CES also operates the Environmental Analysis Laboratory in Morley Science Center. The Maritime Studies concentration builds on the course offerings of the Williams-Mystic Maritime Studies Program at Mystic Seaport.

ADVISING

Concentrators (or first-years and sophomores interested in the concentration offered by CES) are encouraged to talk at any time with the Chair or Associate Director of Environmental Studies, or any other members of CES or Maritime Studies for advice. All incoming concentrators will choose a faculty advisor in the spring of their sophomore year.

Advisors for 2019-20: Henry Art, Sarah Gardner, Pia Kohler, Laura Martin, Mea Cook, James Manigault-Bryant.

CONCENTRATION IN MARITIME STUDIES

The Maritime Studies concentration provides students with an opportunity to explore how humans interact with the environment, including the maritime environment. Understanding the oceans and our interactions with them is of increasing importance in this era of climate change, sea-level rise, fisheries crises, and the internationalization of the high seas. We encourage students to investigate our WaterWorld from the perspectives of the humanities, social sciences, and physical sciences. Maritime Studies is an interdisciplinary, cross-divisional program that includes the literature, history, policy issues, and science of the ocean. Candidates for the concentration in Maritime Studies must complete a minimum of seven courses: the interdisciplinary introductory course (GEOS 104 Oceanography), four intermediate core courses (at Williams-Mystic), an elective, and the senior seminar.

Students who have completed other study-away programs that emphasize maritime studies should consult with the CES chair about the possibility of completing the Maritime Studies concentration.

Required Courses (7 courses)

Introductory Course

MAST/ENVI/GEOS 104 Oceanography

Students who take MAST 211/GEOS 210 Oceanographic Processes at Williams-Mystic can substitute an extra elective in lieu of GEOS 104.

Capstone Course

ENVI/MAST 412 Senior Seminar: Perspectives on Environmental Studies

Core Courses (taken as part of Williams-Mystic program at Mystic Seaport):

MAST/ENGL 231 Literature of the Sea

MAST 311/BIO 231 Marine Ecology OR MAST 211/GEOS 210 Oceanographic Processes

MAST/ENVI 351/ PSCI 319 Marine Policy

MAST/HIST 352 America and the Sea, 1600-Present

Elective Courses

Elective courses are listed based on either a clear maritime statement in the course description or broad practical/theoretical applicability to maritime studies. Concentrators will take a minimum of one course from the list below. If concentrators find other courses in the catalog that they believe meet the requirements for a MAST elective, they may bring them to the attention of the Chair or Associate Director.

INDEPENDENT STUDY AND WINTER STUDY

In addition to courses fulfilling the Maritime Studies concentration requirements, the following courses are offered:

MAST 397, 398 Independent Study: Maritime Studies

MAST 493-W31-494 Senior Thesis: Maritime Studies

Winter study courses play an important role in the program, offering opportunities to learn about aspects of environmental studies with which students would like to become more familiar. We encourage students to bear in mind their interests in the environment and maritime studies when reviewing each year's Winter Study offerings.

HONORS IN MARITIME STUDIES

Candidates for honors in Maritime Studies will complete a thesis in their senior year. The project will involve original research (archive, museum, field, or laboratory) followed by on-campus analysis and write-up of results. The thesis may either be a one-semester plus winter study project, or a full year (two semesters plus winter study). In either case, data collection during the summer before the senior year may be necessary. In some cases, the

thesis project may be a continuation and expansion of the student's Williams-Mystic research project. Honors will be awarded if the thesis shows a high degree of scholarship, originality, and intellectual insight.

MAST 104 (F) Oceanography

Cross-listings: GEOS 104 ENVI 104 MAST 104

Secondary Cross-listing

The oceans cover about 72% of Earth's surface, yet we know the surface of Venus better than our own ocean floors. Why is that? This integrated introduction to the oceans covers formation and history of the ocean basins; the composition and origin of seawater; currents, tides, and waves; ocean-atmosphere interactions; oceans and climate; deep-marine environments; coastal processes; productivity in the oceans; and human impacts. Coastal oceanography will be investigated on an all-day field trip, hosted by the Williams-Mystic program in Connecticut. This course is in the Oceans and Climates group for the Geosciences major.

Class Format: discussion, three hours per week and laboratory, two hours per week in alternate weeks/one all-day field trip

Requirements/Evaluation: two hour exams, lab work, participation in the field trip, and a final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students, MAST concentrators

Expected Class Size: 48

Grading: yes pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 231 (F)(S) Literature of the Sea

Cross-listings: MAST 231 ENGL 231

Primary Cross-listing

Taking advantage of our maritime museum, coastal setting, and three field seminars, we study canonical and lesser-known novelists, short-story writers, dramatists, and poets who set their works in the watery world, often in the exact places where we travel as a class. We read, for example--depending on fall or spring semester--Ernest Hemingway when sailing on the Straits of Florida, John Steinbeck when exploring Cannery Row on Monterey Bay, and Mark Twain on a steamboat on the Mississippi. We read Kate Chopin on the sands of the Gulf of Mexico, Rudyard Kipling out on Georges Bank, and Herman Melville's masterpiece *Moby-Dick* aboard Mystic Seaport's historic whaleship, the *Charles W. Morgan*, a vessel nearly identical to the vessel he climbed aboard at age twenty-one. In the classroom we examine these works through a mixture of lecture, small-group discussion, and writing. To further appreciation and analysis, this interdisciplinary course uses students' emerging knowledge of maritime history and marine science.

Class Format: weekly lectures, including coastal and near-shore field trips and ten days at sea

Requirements/Evaluation: regular papers, class participation, journal-writing, and a final paper

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D1)

MAST 324 (S) Corals and Sea Level

Cross-listings: MAST 324 ENVI 324 GEOS 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

MAST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Primary Cross-listing

This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America's maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America's maritime heritage.

Class Format: classroom discussion as well as field seminars

Requirements/Evaluation: class participation, weekly response papers, three longer papers

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete weekly 1-page papers, two 5-page papers, and a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques that cover argument and style. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while burdening others with tremendous costs. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

MAST 404 (S) Coastal Processes and Geomorphology (QFR)

Cross-listings: MAST 404 ENVI 404 GEOS 404

Secondary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal

development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

Class Format: lecture two times a week with a lab one time per week

EXPERIENTIAL EDUCATION

Coordinator: Paula Consolini

Experiential education, involving “learning by doing” outside the classroom, is a robust part of the Williams curriculum. In addition to the use of traditional laboratory work in the natural sciences and studio work in art, faculty have been challenging students to become engaged more personally in the Williams curriculum through field work, whether in the form of research, sustained work on special projects, or through placement with community organizations. Courses which include experiential learning provide students with opportunities to encounter firsthand the issues that they read and study about, requiring them to apply academic learning to nonacademic settings and challenging them to use their experiences in those settings to think more critically and deeply about what they are studying. Experiential courses, as defined above, range from fully integrated off-campus programs such as the Williams-Mystic Maritime Studies Program to courses involving a small field research exercise or project. The amount and nature of the experiential component(s) varies according to the instructor’s judgment. [More information can be found on the Center for Learning in Action website.](#)

EXPE Experiential Education Courses

AFR 212 (S) Jazz Theory and Improvisation I

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments—competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano). Pianists and guitarists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: weekly assignments, (e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student’s individual instruction strongly encouraged

Enrollment Limit: 15

Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly

Distributions: (D2)

AMST 101 (F)(S) America: The Nation and Its Discontents (DPE) (WS)

America has always named something more than a geographical place; being "American" has always been about something more than political citizenship. This course is an introduction to the interdisciplinary study of American culture and the nation of the United States. We will focus on the workings of that culture and nation as they both shape and have been shaped by factors such as race, ethnicity, class, gender, sexuality, place, and religion. Over the semester, we will ask critical questions of a wide variety of materials: essays, novels, autobiographies, poems, photographs, films, music, visual art, architecture, urban plans, historical documents and legal texts. We critique notions of American exceptionalism, empire, power, citizenship, labor, borders, inequality, assimilation, aesthetic form, and the role of the U.S. and its products in the world.

Requirements/Evaluation: total of 20 pages of writing: several short papers (2-3 pages), as well as several 5- to 7-page essays; drafts and revisions are built into the assignment schedule

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first- and second-year students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Difference, Power, and Equity Notes: This course satisfies the DPE requirement in its constant interrogation of historical patterns of unequal access to power, wealth, citizenship, and education in the U.S., and in its recognition and analysis of forms of resistance to and corrections of such inequities.

AMST 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: ENGL 113 AMST 113 WGSS 113

Secondary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

AMST 221 (F) Introduction to Urban Studies: Shaping and Living the City

Cross-listings: AMST 221 ENVI 221 LATS 220

Secondary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: discussion

Requirements/Evaluation: attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

AMST 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237 ARTH 237 SOC 236 AMST 236

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

AMST 238 (F) Zen and the Art of American Literature

Cross-listings: AMST 238 COMP 238 REL 228 ENGL 239

Secondary Cross-listing

In 1844, the Transcendentalist magazine, *The Dial*, published an excerpt from the *Lotus Sutra*, translated into English by Elizabeth Palmer Peabody. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like *Middle Passage*, *A Tale for the Time Being*, and *Lincoln in the Bardo*. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Requirements/Evaluation: regular attendance, a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 7- to 10-page essay

Prerequisites: any literature course at Williams or permission of the instructor

Enrollment Limit: 45

Enrollment Preferences: students will be asked to submit emails explaining why they want to take this course, which will be used to determine final enrollment; no first-years

Expected Class Size: 35

AMST 241 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer,

and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Secondary Cross-listing

On September 20, 2018, Maria---a category four hurricane made landfall on Puerto Rico. The most powerful storm to hit the island since 1932, Maria caused widespread catastrophic damage on a land already suffering from the devastating effects of a decades-long economic recession. Three months after the hurricane, half the island remained without power, water service yet to be reestablished in many areas, and aid distribution inadequate and inconsistent. The hurricane and its aftermath brought mainstream U.S. attention to Puerto Rico and its diaspora, while simultaneously calling attention to the island's status and relationship to the United States. This hybrid onsite-Skype-travel course is for students interested in learning about the historical, social, and political relationship between Puerto Rico and the United States. We will examine, for example, the political status of Puerto Rico, migration, race, social movements, and expressive cultural forms that have emerged as a result of this asymmetrical relationship. Through the study of the impact and legacy of U.S. policies on the island, we will also consider how the fiscal and humanitarian crisis and proposed solutions affect the daily collective lives of the people in the U.S. territory and the diaspora. This course is a unique collaboration between Vassar, Williams, and the UPR. To enroll in this course, students must commit to participating in an alternative spring break/community engagement project in Puerto Rico and flexible with possible changes in class time when Skyping with students from the University of Puerto Rico. We will gather in Puerto Rico to meet with peers from UPR and for an alternative spring break collaboration, interfacing with various community organizations that have taken up vital social, medical, and economic roles vacated by the United States. Taller Salud, PECES, and Casa Pueblo are among the organizations in Puerto Rico that students may work with as a part of the course's community engagement component.

Class Format: to enroll in this course, students must commit to participating in an alternative spring break/community engagement learning project in Puerto Rico

Requirements/Evaluation: class participation, short writing exercises, group work/project, a midterm essay (5-7 pages), and a final essay (10-12 pages)

Prerequisites: students should have some fluency with the Spanish language

Enrollment Limit: 8

Enrollment Preferences: should be first- and second-years, students considering an American Studies major or Latina/o Studies concentration; AMST majors and LATS concentrators.

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 259 (S) New England Environmental History (WS)

Cross-listings: ENVI 259 AMST 259 HIST 259

Secondary Cross-listing

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

Requirements/Evaluation: several short essays, final project

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

AMST 302 (F) Environmental Planning Workshop: Community-Based Experience

Cross-listings: ENVI 302 AMST 302

Secondary Cross-listing

This interdisciplinary, experiential workshop introduces students to the field of planning through community-based projects. Environmental Planning encompasses many disciplines pertaining to the natural and built landscape such as city planning, ecological design, climate resiliency, natural resource planning, landscape architecture, agricultural and food systems, walkable neighborhood design, energy planning, and community development, to name a few. In this workshop, students regularly get out of the classroom and gain direct experience working in the greater Berkshire region. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework, site visits, and concludes with a design project. Part 2 focuses on hands-on field work tackling an actual planning project under the guidance of a community partner. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including interviews, survey research, site visits, primary research, mapping, and site design and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related skill sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, report-writing, design, and teamwork. The class culminates in an on-site public presentation of each team's planning study.

Class Format: discussion/group workshop/project lab

Requirements/Evaluation: short writing assignments, class discussion, team projects, class presentations, final group public presentation and report

Prerequisites: ENVI 101 or permission of instructor; open to juniors and seniors only

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Unit Notes: required course for Environmental Studies major and concentration

AMST 331 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: COMP 330 AMST 331 THEA 330

Secondary Cross-listing

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

ANSO 205 (S) Ways of Knowing

An applied exploration of how one makes sense of the social world through fieldwork. Some of the key questions of the course are: What are the philosophical and epistemological underpinnings of social inquiry? How does one frame intellectual problems and go about collecting, sifting, and assessing field materials? What are the uses and limits of statistical data? What is the importance of history to sociological and anthropological research? How can one use archival and other documentary materials to enrich ethnographic research? What are the empirical limits to interpretation?

What is the relationship between empirical data and the generation of social theory? How does the social organization of social research affect one's inquiry? What are the typical ethical dilemmas of fieldwork and of other kinds of social research? How do researchers' personal biographies and values shape their work? In the first half of the course, we will approach these problems concretely rather than abstractly through a series of case studies, drawing upon the field experiences of departmental faculty and guest speakers from different professional backgrounds. The second half of the course will be dedicated to a hands-on training in field methods, in which the students will design and undertake their own pilot field projects.

Requirements/Evaluation: full-participation in the seminar, several short papers, an independent ethnographic project and a final research proposal

Prerequisites: ANTH 101 or SOC 101 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

ANSO 402 (S) Senior Seminar

This capstone seminar combines intensive discussion and individual research. Half of the course will be dedicated to the discussion of current debates central to the concerns of both anthropology and sociology, such as the ethics of conducting fieldwork, humanitarianism and relief, global public health, poverty and the city, and environmental conservation. Among the topics discussed, the ethical dilemmas of conducting ethnography will be a common theme. The second half of the course will be devoted to independent individual original projects which should have a major ethnographic component. At the end of the course, students will present their projects to the seminar.

Requirements/Evaluation: full participation, major research project and paper (30 pages), class presentation; weekly short responses

Prerequisites: only senior majors in Anthropology and Sociology, or permission of instructor

Enrollment Limit: none

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Attributes: EXPE Experiential Education Courses

ANTH 371 (F) Medicine, Pathology, and Power: An Ethnographic View (DPE)

Cross-listings: WGSS 371 ANTH 371 STS 370

Primary Cross-listing

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation--also known as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that

health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Requirements/Evaluation: four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 371 (D2) ANTH 371 (D2) STS 370 (D2)

Difference, Power, and Equity Notes: This class examines the intersection of race, gender, class, and sexuality in structuring health outcomes and access to health resources. It theorizes the dynamics of race, gender, and class in shaping patient/provider encounters and efforts to 'improve' health outcomes within contexts of structural violence (poverty, racism, and sexism) and social suffering.

ARTH 237 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237 ARTH 237 SOC 236 AMST 236

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

ARTH 274 (S) Chinese Calligraphy: Theory and Practice

Cross-listings: ARTH 274 ARTS 274 ASST 274

Primary Cross-listing

Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and those whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos "beauty" + graphe "writing"). This course can be taken as an Art History, a Studio Art, or Asian Studies course.

Class Format: studio instruction

Requirements/Evaluation: weekly assignments, a midterm, one short paper, oral presentations, participation in class discussion, a final project (artistic or scholarly), class attendance, film screening

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course can count toward the Art History or Studio major

ARTH 508 (S) Art and Conservation: An Inquiry into History, Methods, and Materials

This course is designed to acquaint students with observation and examination techniques for works of art, artifacts, and decorative arts objects; give them an understanding of the history of artist materials and methods; and familiarize them with the ethics and procedures of conservation. This is not a conservation training course but is structured to provide a broader awareness for those who are planning careers involving work with cultural objects. Sessions will be held at the Williamstown Art Conservation Center, Williams College, the Clark Art Institute, and the Governor Nelson A. Rockefeller Empire State Plaza Art Collection in Albany. Examination questions may be formulated from exhibitions at these locations. Six exams will be given. Exam scores will be weighed in proportion to the number of sessions covered by the exam (e.g., the paintings exam, derived from six sessions of the course, will count as 25% of the final grade).

Class Format: slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

Requirements/Evaluation: attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Graduate Program students, then students in art history or studio art

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: EXPE Experiential Education Courses

Spring 2020

ARTS 13 (W) Creative Portraiture in the Darkroom

Cross-listings: ARTS 13 RLFR 13

Secondary Cross-listing

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use the view camera (a large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Be aware that this class requires an average of 15 weekly lab or studio hours outside of regular classes and sometimes during the weekend. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des Rencontres Photographiques de Guyane.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: knowledge of black and white analog photography is preferred, but not required

Enrollment Limit: 10

Enrollment Preferences: Art major and minors then random

Grading: pass/fail only

Materials/Lab Fee: \$120

ARTS 385 (S) The Sculptural Costume and It's Performance Potential

Cross-listings: ARTS 385 THEA 385

Primary Cross-listing

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica's Parangole, and Nick Cave's sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Requirements/Evaluation: the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

Prerequisites: successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

Enrollment Limit: 14

Enrollment Preferences: Art and Theater majors

BIOL 11 (W) Teaching 3rd Grade about Zebrafish--BioEYES

BioEYES brings tropical fish to 3rd-grade classrooms in Williamstown, North Adams, and Lanesborough Elementary schools, in a science teaching workshop. Elementary school students will breed fish at the school, then study their development and pigmentation during one week. Williams students will adapt BioEYES lesson plans to the science curriculum for the schools we visit, work with classroom teachers to introduce concepts in genetics and development, help the 3rd-grade students in the classroom, and assess elementary student learning. No zebrafish experience is necessary; during the first week, students will learn to set up fish matings and learn about embryonic development and the genetics of fish pigmentation as well as practice teaching the 3rd-grade BioEYES lesson plans with hands-on experiments using living animals. In the subsequent three weeks, students will present lessons at the schools and review assessment data. Adjunct Instructor Bio: Jennifer Swoap, Associate Director at The Center for Learning in Action, is a former third-grade teacher. She currently coordinates Williams Elementary Outreach, where Williams students teach and mentor K-6 students at area elementary schools. Adjunct Instructor Bio: Renee Schiek currently serves as the liaison between Lanesborough Elementary School and the Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools. She is a frequent substitute at Lanesborough ES and holds a degree in mechanical engineering.

Requirements/Evaluation: final project or presentation; review of pre- and post-survey assessments

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: preference to seniors

Grading: pass/fail only

Attributes: EXPE Experiential Education Courses

BIOL 13 (W) Introduction to Animal Tracking

This course is an introduction to the ancient art and science of animal tracking, and its use for ecological inventory. Participants will deepen their skills as naturalists, their awareness of the natural world, and discover that even the greens at Williams College are abundant with wildlife. Students will have field time in class at Hopkins Forest as well as through independent study at a convenient outdoor location of each student's choosing. Basic concepts of animal tracking, its history and use by indigenous people throughout the world will be discussed through video and slide show. Students are required to create journals and site maps of Hopkins and their personal study areas, including all major features of the landscape, flora and fauna activity. Students will be expected to visit their study spots everyday for a minimum of 1 hour of tracking journaling and data collection. The course will meet twice a week for 4-5 hour sessions, primarily in the field. One field trip to a nearby state forest is scheduled for the fourth or fifth class meeting day. This day may extend to 4:00. Students are expected to have appropriate outdoor gear for winter. Adjunct Bio: Dan Yacobellis is a local naturalist and wildlife tracker who has explored forest and field for more than 20 years. He teaches courses on wilderness skills and tracking at nature education centers in Massachusetts and New York as well as his own independent programs.

Requirements/Evaluation: attendance, participation, a final presentation of their study sites, maps and journals, a field test and a 3-page research paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: preference given to seniors

Grading: pass/fail only

Materials/Lab Fee: approximately \$75 for books

Attributes: EXPE Experiential Education Courses

Winter 2020

BIOL 211 (S) Paleobiology

Cross-listings: BIOL 211 GEOS 212

Secondary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climatic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: field trip to the the Paleozoic of New York State

Requirements/Evaluation: lab assignments, short quizzes and writing assignments, and a final exam

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 15

Enrollment Preferences: sophomore and junior GEOS majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 220 (S) Field Botany and Plant Natural History

Cross-listings: ENVI 220 BIOL 220

Primary Cross-listing

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, characteristics of plant families, the cultural and economic uses of plants and how plants have shaped our world. The labs cover field identification, natural history and the ecology of local species.

Class Format: both field and indoor laboratories

Requirements/Evaluation: based on two hour exams, field quizzes, a final project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Biology majors, and Environmental Studies majors & concentrators

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Materials/Lab Fee: there is a charge for the lab manual; the sketchbook and hand lens can be self-provided or purchased from the department

BIOL 231 (F)(S) Marine Ecology

Cross-listings: BIOL 231 MAST 311

Secondary Cross-listing

Using the principles of evolutionary biology and experimental ecology, this course examines the processes that control the diversity, abundance and distribution of marine organisms. Major marine communities, including estuaries, the rocky shore, sandy beaches, salt marshes, coral reefs, and the deep sea are discussed in detail.

Class Format: including coastal and near-shore field trips, 10 days offshore, and a laboratory or field research project

Requirements/Evaluation: two tests, a research project, and a presentation

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Grading: yes pass/fail option, yes fifth course option

Unit Notes: offered only at Mystic Seaport

BIOL 302 (F) Communities and Ecosystems (QFR)

Cross-listings: ENVI 312 BIOL 302

Primary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week

Requirements/Evaluation: lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CHEM 13 (W) Ultimate Wellness: Concepts for a Happy Healthy Life

This course provides an opportunity to drastically improve your life by introducing concepts that can start making a difference in the way you feel today! We will approach nutrition, lifestyle, and happiness from a holistic perspective. Students will learn how to tune out mixed media messages and look within to find ultimate health and wellness. Topics include: Ayurveda, preventative medicine, mindfulness and meditation, food intolerance awareness, healthy eating and meal planning, deconstructing cravings and overcoming sugar addiction, and finding your happiness. Evaluation will be based on completion of assignments, class participation, reflective 5-page paper, creative project, and final presentation that demonstrates a level of personal growth. After signing up for this course please email Nicole at nicole@zentreewellness.com with a brief statement describing your interest in the course and what you hope to achieve in it. In the event of over-subscription, these statements will be used in the selection process. We will meet twice a week for three-hour sessions as a group. The course will include two individual sessions--an initial health assessment plus an additional session designed to personalize the course and assist the student in applying the learned techniques. Books required for this class may include: *Integrative Nutrition: Feed Your Hunger For Health and Happiness* by Joshua Rosenthal, *Food Rules: An Eaters Manual* by Michael Pollan, *Mind Over Medicine: Scientific Proof That You Can Heal Yourself* by Lissa Rankin, and *The Mindful Twenty-Something* by Holly Rogers. Adjunct Instructor Bio: Nicole Anagnos is health coach and director at Zen Tree Wellness in Williamstown. She is co-founder of the organic skin care company, KIZ Organic Beauty. She also holds a master's degree in education.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: email statement of interest to nicole@zentreewellness.com

Grading: pass/fail only

Materials/Lab Fee: approximately \$75 for books

CHEM 16 (W) Glass and Glassblowing

Cross-listings: ARTS 16 CHEM 16

Primary Cross-listing

This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students. Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time.

Requirements/Evaluation: class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference is given to juniors, sophomores, and those who express the most and earliest interest and enthusiasm by email to Professor Thoman

Grading: pass/fail only

Materials/Lab Fee: \$75

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 252 (F) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language

This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one's native language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to explore ways in which SLA theories can be applied to facilitate acquisition of Chinese in terms of learning strategies and curriculum design. This course will be useful to both students who want to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese. *All readings in English with some examples in Chinese.*

Class Format: discussion

Requirements/Evaluation: class participation, several oral presentations and short papers, and a final research project

Prerequisites: CHIN 101 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Not offered current academic year

COMP 238 (F) Zen and the Art of American Literature

Cross-listings: AMST 238 COMP 238 REL 228 ENGL 239

Secondary Cross-listing

In 1844, the Transcendentalist magazine, *The Dial*, published an excerpt from the *Lotus Sutra*, translated into English by Elizabeth Palmer Peabody. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like *Middle Passage*, *A Tale for the Time Being*, and *Lincoln in the Bardo*. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Requirements/Evaluation: regular attendance, a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 7- to 10-page essay

Prerequisites: any literature course at Williams or permission of the instructor

Enrollment Limit: 45

Enrollment Preferences: students will be asked to submit emails explaining why they want to take this course, which will be used to determine final enrollment; no first-years

Expected Class Size: 35

Grading: yes pass/fail option, yes fifth course option

COMP 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: COMP 330 AMST 331 THEA 330

Secondary Cross-listing

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's Weekly* (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

Prerequisites: none

Enrollment Limit: 12

COMP 338 (F) The Culture of Carnival

Cross-listings: THEA 335 COMP 338

Secondary Cross-listing

Carnival is a regenerative festival as well as a transgressive one. It is a time for upheavals and recreating for one day, a new world order. Men dress as women, women dress as men, the poor become kings; drink and sex and outrageous behavior is sanctioned. We will look at festivals in such places as New Orleans, Venice, and Rio. Central to this course are the cultural and religious lives of these societies, and how these festivals exist politically in a modern world as theatre and adult play. A variety of sources will be used, such as newspaper accounts, films, photography, personal memoirs and essays on the subject.

Requirements/Evaluation: regular active class participation, one oral presentation including a 5-page essay, one 15-page research final paper and participation in a group project/public parade

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: sophomores and first-year students

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

CSCI 12 (W) Geometry in Stained Glass

Geometry allows us to observe mathematical objects from different viewpoints. It may be approached both visually and algebraically. Building geometric structures in the real world allows us to view them from different angles and sometimes, gain new insights. In this class students will work together to design and build a pentagonal tiling in stained glass. There are only fifteen types of convex pentagons that can tile a two-dimensional surface, and the secret behind their assembly lies in the relationship between edges and angles. We will use Euclidian geometry, drafting by hand using only straightedge and compass, to figure out angles and dimensions. Students will then learn how to cut precise shapes in colored glass, wrap them in copper and solder together into a stained glass window. Students will also work individually or in small groups on projects of their own choosing. These may be two- or three-dimensional geometric figures, including those on non-Euclidian surfaces. In past years a student of organic chemistry modeled cyclohexane and a physics major, the spectral emissions of a star. In 2018 the class built a mirrored glass quasicrystal. Students interested in mathematical tiling patterns, networks, cellular or molecular assembly, crystallography, or simply curious about geometry would be welcome in this class. Exhibition of work on the last day of Winter Study is mandatory. All students must participate in setting up the exhibition and tidying the lab at the end of Winter Study. *Please note: we will not be painting images on glass.* Adjunct Instructor Bio: Debora Coombs has an MFA from the Royal College of Art in London, England. Her stained glass work is commissioned and exhibited internationally. Debora's interest in tiling patterns and mathematical projection led to a collaboration with Williams Professor of Computer Science Duane Bailey. Their sculptures are currently on exhibit in the SCHOW science library.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none, however, self-motivated students with good hand skills, patience and an interest in mathematics will find the course most rewarding

Enrollment Limit: 10

Enrollment Preferences: preference to seniors

Grading: pass/fail only

Materials/Lab Fee: \$285

CSCI 28 (W) Solution Design and Product Management

Cross-listings: CSCI 28 ECON 28

Secondary Cross-listing

Google Glass, Blackberry Storm, and the initial Obamacare Website represent just a few of the many failures that litter the IT project graveyard: 40 to 60 percent of large technology projects fail. All too often, the cause has little to do with the quality of technical engineering. More often, companies choose the wrong problem to solve or the wrong way to solve it. Google failed to account for the Google Glass price tag and privacy concerns. Blackberry failed to fully appreciate the touchscreen revolution. The Obamacare website failed to address management issues. The underlying conflict is that engineers and IT teams like to be told what to build, but customers often do not know what they want or how to express it. Identifying the right problem, designing the right solution, communicating the correct specifications to engineers, and delivering the right product to primary stakeholders are all difficult challenges crucial for successful product development. This course will explore various frameworks that product managers use to address these challenges. In doing so, we will model interactions between market forces, corporate directives, engineering challenges, and user experiences to interrogate the resilience of our ideas. We will also analyze and critique methodologies presented in readings by technology management prophets Marty Cagan, Steve Blank, Don Norman, Steve Krug and Eric Ries. Throughout the course, students will work in small teams to develop their own product management toolkit and deploy it towards solving a technology problem of each team's own choosing. Adjunct Instructor Bio: Allan Wellenstein is a senior vice-president at DataArt, a global technology consulting firm and the head of their Solution Design consulting practice. Allan has over 15 years of experience helping some of the world largest companies design and implement massive technology transformations. Though technically headquartered in New York City, he lives with his wife and three children in Pittsfield, MA.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: students will be asked to submit a brief paragraph describing their interest in the course and what they hope to get out of it

Grading: pass/fail only

ECON 13 (W) Tools for Moving from Good Ideas to Successful Businesses and Organizations

This course is based on a proven methodology for turning business ideas into successful businesses and organizations. Student working in teams generate business ideas and then work to develop a business model to take the ideas to start and beyond. The course provides basic training in design thinking, business financials, and business analysis. The course uses the Lean Launchpad methodology used at major business and engineering schools throughout the world and endorsed by the National Institutes for Health and the National Science Foundation for commercializing research results. The class is appropriate to all students regardless of major who want to learn how to build a startup that succeeds. The class meets for two and a half hours three days a week for short lectures, discussions, group work, and presentations, There will also be outside guests who have created successful businesses. Outside of class, students will be required to watch online lectures and videos, read handouts, and do short papers. The primary work is to work in teams to research their business idea using the Lean Launchpad approach. Teams will develop a research plan, interview potential customers, analyze the results, and revise their business models. The teams will meet with the instructor regularly. Each team will develop weekly progress presentations as well as a final presentation. They will also develop a team video showing lessons the team learned during the course. Students will also be required to provide a three-page final paper of their experiences in the course. Adjunct Instructor Bio: Steve Fogel has worked with startup businesses for over 35 years. He has trained over 2,000 people who have started over 1,200 businesses and provided continuous support to a number of these businesses over the course of years. He has taught Winter Study nine times and is available to work with students throughout the year after the course ends.

Requirements/Evaluation: final project or presentation; contributions in class and as part of their teams based on presentations, papers and class participation

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors first if the course is over-enrolled

ECON 22 (W) Volunteer Income Tax Assistance

Cross-listings: POEC 22 ECON 22

Primary Cross-listing

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10 page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax, and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS "Link and Learn"

online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and follow up Q&A session featuring guests from local social service organizations will help orient students to the issues facing low-income families in the northern Berkshires.

Class Format: afternoons

Requirements/Evaluation: 10-page paper; complete IRS certification to assist in tax preparation; volunteer work

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: written statement of interest

Grading: pass/fail only

Materials/Lab Fee: \$10

ECON 23 (W) Investing

ECON 23 is designed to provide students with a window into the world of endowment and investment management and is taught by members of the Williams College Investment Office. Students will learn about portfolio theory as well as specific asset classes such as global equities, hedge funds, venture capital, buyouts, fixed income, and impact investing. Students will gain practical skills in excel and will have the opportunity to learn from experienced investment professionals through guest lectures. Through presentations, discussions, readings, and project work, students will gain a better understanding of the various components of an institutional investment portfolio, how it is managed, and how investment managers are selected and monitored, from the perspective of an endowment. Students are expected to attend all on-campus classes (approx. 6 hours/week) and complete a set of relevant readings, a case study exercise, journal entries, and a final project (approx. 20 hours/week). Students will also be required to complete an introductory excel course. The course is open to freshmen, sophomores, and juniors. *To apply, please send an email with your resume and a short personal statement discussing why you are interested in this course and what you hope to gain from it to: InvestmentOffice@williams.edu by 11:59 PM ET on Sunday, October 20, 2019.* Adjunct Instructor Bio: Abigail Wattlely serves as a Managing Director in the Williams College Investment Office where she oversees investments in hedge funds and credit. Ms. Wattlely holds a B.A. from Williams College and an MBA from Harvard Business School.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 8

ENGL 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: ENGL 113 AMST 113 WGSS 113

Primary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

ENGL 237 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237 ARTH 237 SOC 236 AMST 236

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ENGL 239 (F) Zen and the Art of American Literature

Cross-listings: AMST 238 COMP 238 REL 228 ENGL 239

Primary Cross-listing

In 1844, the Transcendentalist magazine, *The Dial*, published an excerpt from the *Lotus Sutra*, translated into English by Elizabeth Palmer Peabody. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is

today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like *Middle Passage*, *A Tale for the Time Being*, and *Lincoln in the Bardo*. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Requirements/Evaluation: regular attendance, a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 7- to 10-page essay

Prerequisites: any literature course at Williams or permission of the instructor

Enrollment Limit: 45

Enrollment Preferences: students will be asked to submit emails explaining why they want to take this course, which will be used to determine final enrollment; no first-years

Expected Class Size: 35

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

ENGL 25 (W) Journalism Today

This course will give students an in-depth view of the inner workings of journalism today. It will feature the perspectives of several Williams alumni who work in a broad spectrum of today's media universe, including print, broadcast, and new media. Our guests will help students workshop their ideas for a feature-length piece of journalism they're expected to create during the month. They will discuss the reporting skills to use, as well as their own experiences. In addition to reading the work of guests, there may be required texts about issues and methods related to journalism. Students will be expected to complete several small reporting and writing exercises, as well as one feature-length news story on a topic chosen at the beginning of the course. There will be a week-long trip to New York for field work and to visit various newsrooms. In previous years, organizations visited have included CNN, the New York Times, the Columbia School of Journalism, ABC News, Bloomberg News, BuzzFeed News, ProPublica, the Wall Street Journal and APM Marketplace. Adjunct Instructor Bio: Christopher Marcisz is a freelance writer and editor based in Williamstown. He was a reporter (and later editor) at the Berkshire Eagle. Previously he worked in Washington covering national energy policy, wrote about sports in Moscow, and worked on the international desk at Newsweek. He graduated from the University of Pennsylvania and the Columbia University Graduate School of Journalism.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: priority will be given to seniors and juniors, with a preference for students with a demonstrated interest in journalism (as expressed in a statement of interest, if needed)

Grading: pass/fail only

ENVI 100 (S) Introduction to Weather and Climate

Cross-listings: GEOS 100 ENVI 100

Secondary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-years and sophomores

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

ENVI 102 (S) Introduction to Environmental Science

Environmental Science is an interdisciplinary field that develops scientific and technical means for assessing and mitigating human impacts on the environment. This course provides an overview of the discipline in the context of the interconnected global earth system: the geosphere, atmosphere, hydrosphere, and biosphere. Students are introduced to scientific methods from physics, chemistry, geology, and biology that are used to examine real-world case studies at global and local scales. Topics may include: climate change, air and water pollution, resource extraction and management, land use change, and their effects on environmental quality, biodiversity, and human health. During weekly fieldwork and laboratory sessions, students gain hands-on experience in collecting, analyzing, and interpreting data that can be used to make recommendations for addressing local environmental issues.

Class Format: two 75-minute lecture/discussion sessions and one 3-hour field/laboratory session each week

Requirements/Evaluation: weekly short quizzes, three exams, weekly homework, two lab reports, participation

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first- and second-year students, Environmental Studies majors and concentrators

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

ENVI 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103 ENVI 103

Secondary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends on where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

Class Format: discussion, three hours per week and laboratory, two hours per week in alternate weeks/occasional field trips

Requirements/Evaluation: written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

ENVI 105 (F) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101 ENVI 105

Secondary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first-years and sophomores

Expected Class Size: 30

Grading: yes pass/fail option, no fifth course option

ENVI 205 (F) Geomorphology

Cross-listings: GEOS 305 ENVI 205 GEOS 201

Secondary Cross-listing

Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over

relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: discussion, three hours per week and laboratory, three hours per week/student projects; weekend field trip to the White Mountains

Requirements/Evaluation: two hour exams, a project, lab work and class participation

Prerequisites: any 100-level GEOS course or permission of instructor

Enrollment Limit: 18

ENVI 214 (F) Mastering GIS

Cross-listings: GEOS 214 ENVI 214

Secondary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam

Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS

Enrollment Limit: 20

Enrollment Preferences: Geosciences and Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ENVI 215 (F) Climate Changes

Cross-listings: ENVI 215 GEOS 215

Secondary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

Class Format: lecture three hours per week and one three-hour lab per week

Requirements/Evaluation: lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Geosciences majors

ENVI 221 (F) Introduction to Urban Studies: Shaping and Living the City

Cross-listings: AMST 221 ENVI 221 LATS 220

Secondary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: discussion

Requirements/Evaluation: attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students as well as American Studies majors and Latina/o Studies concentrators

Expected Class Size: 20

ENVI 222 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics

Cross-listings: GEOS 221 ENVI 222

Secondary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Requirements/Evaluation: weekly papers and a final oral presentation

ENVI 229 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Primary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

ENVI 255 (F) Environmental Observation

Cross-listings: GEOS 255 ENVI 255

Secondary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, radar, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest.

Requirements/Evaluation: labs, quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

ENVI 302 (F) Environmental Planning Workshop: Community-Based Experience

Cross-listings: ENVI 302 AMST 302

Primary Cross-listing

This interdisciplinary, experiential workshop introduces students to the field of planning through community-based projects. Environmental Planning encompasses many disciplines pertaining to the natural and built landscape such as city planning, ecological design, climate resiliency, natural resource planning, landscape architecture, agricultural and food systems, walkable neighborhood design, energy planning, and community development, to name a few. In this workshop, students regularly get out of the classroom and gain direct experience working in the greater Berkshire region. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework, site visits, and concludes with a design project. Part 2 focuses on hands-on field work tackling an actual planning project under the guidance of a community partner. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including interviews, survey research, site visits, primary research, mapping, and site design and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related skill sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, report-writing, design, and teamwork. The class culminates in an on-site public presentation of each team's planning study.

Class Format: discussion/group workshop/project lab

Requirements/Evaluation: short writing assignments, class discussion, team projects, class presentations, final group public presentation and report

Prerequisites: ENVI 101 or permission of instructor; open to juniors and seniors only

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

Unit Notes: required course for Environmental Studies major and concentration

Distributions: (D2)

ENVI 312 (F) Communities and Ecosystems (QFR)

Cross-listings: ENVI 312 BIOL 302

Secondary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week

Requirements/Evaluation: lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

ENVI 324 (S) Corals and Sea Level

Cross-listings: MAST 324 ENVI 324 GEOS 324

Secondary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will

examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

GEOS 100 (S) Introduction to Weather and Climate

Cross-listings: GEOS 100 ENVI 100

Primary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions.

Labs will include local field trips, bench top experiments, and running a climate model on a computer.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-years and sophomores

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

GEOS 101 (F) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101 ENVI 105

Primary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first-years and sophomores

GEOS 102 (S) An Unfinished Planet

The Earth is a work-in-progress, an evolving planet whose vital signs--as expressed by earthquakes, volcanic eruptions, and shifting plates--are still strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses accrete and separate. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model--one of the fundamental scientific accomplishments of the past century--to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth's interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast.

Class Format: lecture three hours per week and lab (several involving field work) two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

Requirements/Evaluation: two hour-tests, weekly lab work, and a scheduled final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 40

GEOS 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103 ENVI 103

Primary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends on where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

Class Format: discussion, three hours per week and laboratory, two hours per week in alternate weeks/occasional field trips

Requirements/Evaluation: written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

GEOS 201 (F) Geomorphology

Cross-listings: GEOS 305 ENVI 205 GEOS 201

Primary Cross-listing

Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: discussion, three hours per week and laboratory, three hours per week/student projects; weekend field trip to the White Mountains

Requirements/Evaluation: two hour exams, a project, lab work and class participation

Prerequisites: any 100-level GEOS course or permission of instructor

Enrollment Limit: 18

GEOS 202 (S) Mineralogy

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section.

Class Format: lecture three hours per week and laboratory three hours per week; independent study of minerals in hand specimen; one afternoon field trip

Requirements/Evaluation: one hour test, lab work, and a final exam

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

GEOS 212 (S) Paleobiology

Cross-listings: BIOL 211 GEOS 212

Primary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: field trip to the the Paleozoic of New York State

Requirements/Evaluation: lab assignments, short quizzes and writing assignments, and a final exam

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

GEOS 214 (F) Mastering GIS

Cross-listings: GEOS 214 ENVI 214

Primary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of

professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam

Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS

GEOS 215 (F) Climate Changes

Cross-listings: ENVI 215 GEOS 215

Primary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

Class Format: lecture three hours per week and one three-hour lab per week

Requirements/Evaluation: lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Geosciences majors

Expected Class Size: 14

GEOS 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics

Cross-listings: GEOS 221 ENVI 222

Primary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S. politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Requirements/Evaluation: weekly papers and a final oral presentation

GEOS 255 (F) Environmental Observation

Cross-listings: GEOS 255 ENVI 255

Primary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, radar, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest.

Requirements/Evaluation: labs, quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

Enrollment Preferences: sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

GEOS 302 (S) Sedimentology (WS)

Sediments and sedimentary rocks preserve information about the rocks that were eroded to form them, the fluids and forces that transported them, the mechanisms by which they were deposited, and the processes by which they were lithified. This course introduces the principles of sedimentology, including sediment composition, fluid mechanics, bedform analysis, and depositional environments. This course is in the Sediments and Life group for the Geosciences major.

Class Format: discussion three hours per week and laboratory three hours per week; field trips: two half-day and one all-day

Requirements/Evaluation: lab work, writing assignments, participation in discussions, and a final exam

Prerequisites: at least one course in GEOS Group B (Solid Earth) AND one course in GEOS Group C (Sediments and Life); or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Geosciences majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Writing assignments will be thoroughly edited for style, grammar, and syntax; each student will compile their papers as a growing body of work, and each new assignment will be read and edited in the context of previous submissions.

GEOS 324 (S) Corals and Sea Level

Cross-listings: MAST 324 ENVI 324 GEOS 324

Primary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

GEOS 401 (F) Global Tectonics and the Rise of Mountains (WS)

Fifty years after the sea-floor spreading hypothesis was first verified using magnetic anomalies, we have spectacular data sets from paleomagnetism, seismology, volcanism, the Global Positioning System, and digital elevation models that provide rich details into the kinematics and mechanisms of present and past plate motions. After an introduction to the theory of plate tectonics, local field trips, supplemented by reading assignments, will illustrate how field observations can be used to reconstruct tectonic environments in ancient mountain belts. We will also use journal articles to explore ways in which plate tectonics help explain the evolution of mountain belts with special emphasis on the Appalachians.

Class Format: weekly one-hour meetings, in addition, there will be five field trips early in the semester on Thursday from 11:20 to 3:50 pm

Requirements/Evaluation: six papers, three based on field trips and three based on journal articles, and critiques of partner's papers

Prerequisites: GEOS 301 or 303 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: \$15 for field supplies

Distributions: (D3) (WS)

Writing Skills Notes: Six 5- to 10-page papers throughout the semester based on data collected during field trips (3) and journal articles (3). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 411 (F) Geobiology

Geobiology--the study of interactions between earth and life over geologic timescales--is a new and interdisciplinary field that has grown out of exciting advances in earth and life sciences. During this course we will examine the many ways in which organisms -- from bacteria to trees -- have left their mark on our planet. Topics include the origin of life, the rise of oxygen in the earth's atmosphere, the evolution of biomineralization, the environmental context for animal evolution, the role of microbial communities in the earth system, the emergence of land plants, and the potential for planet-life interactions elsewhere in our solar system. Geobiology incorporates tools and ideas from geochemistry, paleontology, microbiology, and sedimentology. Class time will be divided between lectures and student-led discussions of primary literature. Labs will be varied and involve everything from growing our own microbial ecosystems to querying online databases and analyzing geological, geochemical, genetic, and paleontological data. Our field trip will take us to Upstate New York where we will sample water from a stratified lake and visit ancient microbial fossil reefs. The final project will involve writing a proposal in small groups on a geobiological topic based on the style and format of a National Science Foundation grant, and presenting the idea to the class.

Requirements/Evaluation: labs, short papers, final grant proposal and presentation

Prerequisites: GEOS 212 or GEOS 312T; or GEOS 101 + any 200-level GEOS course; or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Senior Geoscience majors

HIST 19 (W) Special Collections: Curating Rare Books and Manuscripts for Our Times

What makes a library's books and manuscripts worth saving? What should we collect, and how are those decisions made? Whose voices are missing? This course will examine the role of Special Collections in the 21st century, going behind the scenes of the Chapin Library and College Archives. We will first consider the library's existing collections, focusing on what makes these books and manuscripts valuable -- and not just in terms of their cost. We'll consider how historical events are documented in primary sources, and how those documents can support teaching and research. We'll also learn about the market for rare books and manuscripts and make a day trip to visit a bookseller and curators at a peer institution. For the final project, students will propose the acquisition of a new collection of books or manuscripts for the Chapin Library or the College Archives. We'll spend the final week of class presenting to a curatorial panel, who will assess the proposals to purchase material for our collections. Adjunct Instructor Bio: Anne Peale, Special Collections Librarian at Williams, graduated from Dartmouth College and studied Material Cultures and Book History at the University of Edinburgh; she recently completed her PhD in Historical Geography. Ajunct Instructor Bio: Lisa Conathan is Head of Special Collections at Williams College, overseeing the Chapin Library of Rare Books and the College Archives. She holds a BA in Linguistics from Dartmouth College, a PhD in Linguistics from the University of California, Berkeley, and a Master of Library Science from the University of Maryland.

HIST 259 (S) New England Environmental History (WS)

Cross-listings: ENVI 259 AMST 259 HIST 259

Secondary Cross-listing

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

Requirements/Evaluation: several short essays, final project

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

HIST 264 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Secondary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: Environmental Studies majors and concentrators; History majors

Expected Class Size: 15

HIST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Secondary Cross-listing

This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America's maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America's maritime heritage.

Class Format: classroom discussion as well as field seminars

Requirements/Evaluation: class participation, weekly response papers, three longer papers

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete weekly 1-page papers, two 5-page papers, and a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques that cover argument and style. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while burdening others with tremendous costs. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

LATS 220 (F) Introduction to Urban Studies: Shaping and Living the City

Cross-listings: AMST 221 ENVI 221 LATS 220

Primary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: discussion

Requirements/Evaluation: attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students as well as American Studies majors and Latina/o Studies concentrators

LATS 241 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 20

LATS 252 (S) Puerto Rico and its Diaspora

Cross-listings: AMST 252 LATS 252

Primary Cross-listing

On September 20, 2018, Maria---a category four hurricane made landfall on Puerto Rico. The most powerful storm to hit the island since 1932, Maria caused widespread catastrophic damage on a land already suffering from the devastating effects of a decades-long economic recession. Three months after the hurricane, half the island remained without power, water service yet to be reestablished in many areas, and aid distribution inadequate and inconsistent. The hurricane and its aftermath brought mainstream U.S. attention to Puerto Rico and its diaspora, while simultaneously calling attention to the island's status and relationship to the United States. This hybrid onsite-Skype-travel course is for students interested in learning about the historical, social, and political relationship between Puerto Rico and the United States. We will examine, for example, the political status of Puerto Rico, migration, race, social movements, and expressive cultural forms that have emerged as a result of this asymmetrical relationship. Through the study of the impact and legacy of U.S. policies on the island, we will also consider how the fiscal and humanitarian crisis and proposed solutions affect the daily collective lives of the people in the U.S. territory and the diaspora. This course is a unique collaboration between Vassar, Williams, and the UPR. To enroll in this course, students must commit to participating in an alternative spring break/community engagement project in

Puerto Rico and flexible with possible changes in class time when Skyping with students from the University of Puerto Rico. We will gather in Puerto Rico to meet with peers from UPR and for an alternative spring break collaboration, interfacing with various community organizations that have taken up vital social, medical, and economic roles vacated by the United States. Taller Salud, PECES, and Casa Pueblo are among the organizations in Puerto Rico that students may work with as a part of the course's community engagement component.

Class Format: to enroll in this course, students must commit to participating in an alternative spring break/community engagement learning project in Puerto Rico

Requirements/Evaluation: class participation, short writing exercises, group work/project, a midterm essay (5-7 pages), and a final essay (10-12 pages)

Prerequisites: students should have some fluency with the Spanish language

Enrollment Limit: 8

Enrollment Preferences: should be first- and second-years, students considering an American Studies major or Latina/o Studies concentration; AMST majors and LATS concentrators.

LEAD 18 (W) Wilderness Leadership in Emergency Care

This Winter Study course is for students who would like to participate in a 9 day, 72 hour comprehensive hands on in-depth look at the standards and skills of dealing with wilderness based medical emergencies. Topics that will be covered include, Response and Assessment, Musculoskeletal Injuries, Soft Tissue Injuries, Environmental Injuries, and Survival Skills. Additional topics, such as CPR, are also included. Students will be required to successfully complete the written and practical exams, and not miss any of the 9 classes to receive credit and WFR/CPR certification. The course runs 9 consecutive days straight from 9AM - 5PM. The instructor will be provided by SOLO (Stonehearth Open Learning Opportunities).

Requirements/Evaluation: written and practical exam

Prerequisites: none

Enrollment Limit: 22

Enrollment Preferences: submit a statement of purpose to the course sponsor, WOC Director, explaining why they want to take the course and hope to gain from the experience

Grading: pass/fail only

Materials/Lab Fee: \$450

LEAD 22 (W) Outdoor Emergency Care

Cross-listings: SPEC 22 LEAD 22

Primary Cross-listing

The course will develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in outdoor and wilderness environments. Successful completion of all 3 sections of the course, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon: 1. National Ski Patrol's Outdoor Emergency Care (5th Edition), a curriculum containing textbook/web-based learning and hands-on, practical skill development 2. CPR for the Professional Rescuer 3. Approximately 18 hours of outdoor training in Ski Patrol rescue techniques Specifically, the course teaches how to recognize and provide emergency medical care

for: - Wounds and Burns - Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion) - Musculoskeletal Trauma (e.g., breaks, sprains, etc.) - Shock, Respiratory, Poisoning, Substance abuse emergencies - Medical emergencies (e.g., heart attack, stroke, seizures, etc.) The course will teach the use of various splints, bandages, and other rescue equipment as well as methods of extrication, use of oxygen, and how to deal with unusual emergency situations such as mass casualty incidents. On-line and textbook learning will be supplemented by classroom work that includes lectures, videos, and hands-on skill development and practice. There will be a written and practical final exam. The outdoor portion of the course includes rescue toboggan handling, organization and prioritization of rescue tasks, and practical administration of emergency care in the outdoor environment. Each week there will be ~15 hours of classroom work plus ~8 hours of practical outdoor work at Jiminy Peak ski area. Homework (online and textbook based) will be required. *Attendance at all classes is mandatory.* The course is limited to 12 students, chosen based on ski/snowboard interest and ability as well as prior first aid experience. Adjunct Instructor Bio: Tom Feist is an alumnus of Williams College ('85) and PhD in Materials Science and Engineering. Following a 20+ year career at General Electric, Tom taught Chemistry at Williams in 2017-18. He has been a ski patroller for over 35 years, having started patrolling at Williams. Tom is a certified Instructor and Instructor Trainer for Outdoor Emergency care and currently patrols at Sugarbush Resort in Vermont.

Requirements/Evaluation: completion of daily homework; written and practical final exam

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: ski/snowboard proficiency; prior first aid experience

Grading: pass/fail only

Primary Cross-listing

This seminar utilizes the interdisciplinary background of the other Williams-Mystic courses to examine national and international contemporary issues in our relationship with our ocean and marine environment. This seminar takes a topical approach to the study of ocean and coastal law and policy, examining climate change, fisheries, coastal zone management, admiralty law, marine biodiversity, ocean and coastal pollution, and ocean governance.

Class Format: discussions, guest lectures by active professionals, and includes coastal and near-shore field trips, and 10 days offshore

Requirements/Evaluation: an independent research paper, a presentation, and a final exam

Grading: yes pass/fail option, yes fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

MAST 352 (F)(S) American Maritime History (DPE) (WS)

Cross-listings: HIST 352 MAST 352

Primary Cross-listing

This course surveys American maritime history from the colonial era to the 21st century. We will consider the dynamic relationship between the sea and American life, and the broad influence that each has had on the other. Special emphasis will be placed on how diverse peoples shaped and experienced America's maritime past. We will sample from different fields of historical inquiry including labor, environmental, cultural, political, technological, and energy history in order to gain a deeper understanding of America's maritime heritage.

Class Format: classroom discussion as well as field seminars

Requirements/Evaluation: class participation, weekly response papers, three longer papers

Prerequisites: BIOL 101 or GEOS/MAST 104, or permission of instructor

Grading: no pass/fail option, no fifth course option

Unit Notes: offered only at Mystic Seaport

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 352 (D2) MAST 352 (D2)

Writing Skills Notes: Students must complete weekly 1-page papers, two 5-page papers, and a final 10- to 15-page paper. Additionally, students will participate in several in-class writing workshops and peer critiques that cover argument and style. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Maritime activity has long provided opportunities for some while burdening others with tremendous costs. From the slave trade and the encounters between native and European mariners to the power wielded by multi-national shipping conglomerates, this course investigates contests over power, empire, and capitalism as they played out on the maritime stage.

MATH 12 (W) The Mathematics of Lego Bricks

This course is a modification of six previous winter studies I have done on the Mathematics of LEGO bricks. Similar to those, we will use LEGO bricks as a motivator to talk about some good mathematics (combinatorics, algorithms, efficiency). We will partner with Williamstown Elementary and teach an Adventures in Learning course (where once a week for four weeks we visit the elementary school after the day ends to work with the kids). We will also submit a Lego Ideas Challenge, to try and create a set that Lego will then market and sell. Almost surely there will be a speed build challenge (college teams vs elementary school teams).

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: discretion of the instructor

Grading: pass/fail only

Materials/Lab Fee: \$45

Attributes: EXPE Experiential Education Courses

MUS 104 (S) Jazz Theory and Improvisation I

The theory and application of basic techniques in jazz improvisation and performance styles, including blues forms, swing, bebop, modally based composition, Afro-Cuban, etc. Appropriate for students with skill on their instrument and some basic theoretical knowledge. Knowledge of all key signatures, major/minor keys and modes, intervals, triads and basic seventh chords and their functions within keys. Students should be able to play and demonstrate these concepts on their instruments-competence on an instrument is essential (vocalists and drummers will be encouraged to study the piano). Pianists and guitarists should be able to sight read chords on a jazz lead sheet.

Class Format: alternates between lecture style exposition of theoretical topics and a master class where students will perform and be evaluated on assigned repertoire

Requirements/Evaluation: weekly assignments,(e.g., harmonic analysis and exercises in transposition and transcription), a midterm, a transcription project and the end of semester concert, as well as improvement as measured in weekly class performance

Prerequisites: MUS 103 and/or permission of instructor; musical literacy required as per above description; private study on student's individual instruction strongly encouraged

Enrollment Limit: 15

Enrollment Preferences: prospective Music majors, then Jazz Ensemble members, then Music majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Unit Notes: this course will share aural skills labs with MUS 104a; students considering taking this course should consult the lab times and plan their schedules accordingly

MUS 16 (W) Zimbabwean Music Collaboration

This course focuses on teaching Zimbabwean music performance. Besides introducing a selection of basic songs on mbira, marimba and voice, the course explores orchestration of such music on other instruments such as brass, woodwinds, strings and additional percussion. The course content will trace both continuity and change in music from traditional song styles into African popular music. Beside the instrumental practice of the class, we will watch on YouTube and other videos the collaborative nature of this music. The class will end with an end-of-Winter Study performance by the participants.

Requirements/Evaluation: final performance

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: quick audition

Grading: pass/fail only

Attributes: EXPE Experiential Education Courses

Winter 2020

LEC Section: 01 MW 10:00 am - 12:50 pm Tendai Muparutsa

MUS 174 (F) The Singing Voice: Structure, Styles and Meaning

What makes an opera singer sound different than a rock singer? Why can't one convincingly sing in the style of the other? And why is the former granted a higher status and the latter a wider audience? This course examines the world of singing styles and engages these styles from multiple

angles: through listening, readings, film viewing and, above all, through singing. The class will learn the basics of yodeling, Tuvan throat singing, and belting, among other styles, and will explore the cultural and historical contexts of each.

Class Format: studio/discussion

Requirements/Evaluation: one quiz, two papers, and a final project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

Attributes: EXPE Experiential Education Courses

Not offered current academic year

MUS 204 (S) Jazz Theory and Improvisation II

Cross-listings: MUS 204 AFR 214

Primary Cross-listing

A continuation of MUS 104b, this course builds upon theoretical knowledge, performance and aural skills developed previously. Students will deal with more complex theoretical and performance issues, including the use of symmetric scales, strategies for chord reharmonization, pentatonic and hexatonic scale shapes, and Coltrane's "Three Tonic" harmonic system.

Class Format: two weekly seminar meetings, alternating between theory and performance sessions

Requirements/Evaluation: weekly compositional, analysis, transcription or performance exercises and final transcription project

Prerequisites: MUS 104b or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Music majors and Jazz Ensemble members

Expected Class Size: 5-8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

MUS 205 (F)(S) Composition I

Beginning courses in musical composition. Size and number of required projects will vary from 4 to 5. Each assignment will represent 25% of the student's final grade. A group meeting per week will deal with the presentation of the student's work in progress, analysis of models for composition, performance of work in class, and critiquing of work. There will be a weekly individual meeting with the instructor to discuss each student's progress. Students must also be available for performances and reading of work outside normal class time and the instructor and students will work together to ensure that all work written during the semester is actually performed.

Requirements/Evaluation: quality and timeliness of composition projects, attendance, and class participation

Prerequisites: MUS 202 (may be taken concurrently) or permission of instructor

Enrollment Limit: 6

Enrollment Preferences: Music majors; consideration of non-majors based on qualifications and experience

Expected Class Size: 4

MUS 309 (S) Jazz Arranging and Composition

This is a course designed to acquaint the student with the basic principles of composing and arranging for Jazz Ensemble, beginning with lead sheet format and progressing through the big band. Intensive score study and some transcription from selected recordings required. Evaluation will be based on the successful completion and performance of original arrangements and/or compositions during the semester, to include several lead sheet compositions, one quintet and one sextet arrangement, and one arrangement for big band. Students must attend extra small ensemble and large ensemble rehearsals when work is being rehearsed and/or performed. A solid background in jazz chord/scale theory is required.

Class Format: weekly lecture and targeted ensemble rehearsals generally last 2 hours total; additional individual tutorial style meetings are generally an hour a week, more frequently and for longer amounts of time as needed

Requirements/Evaluation: project based 4-5 compositions/arrangements

Prerequisites: MUS 104B and permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: MUS 104B or recommendation of instructor

Expected Class Size: 3-5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: EXPE Experiential Education Courses

Not offered current academic year

NSCI 10 (W) The Neuroscience of Learning

An interactive and collaborative exploration of what neuroscience research reveals about how the brain learns and what factors can be influenced to facilitate successful learning. Topics include the neuroscience of attention, emotion, understanding, memory, and executive functions. Emphasis will be on the neuroscience itself with opportunities for students to make connections to their own learning processes and strategies. Students will engage in evaluating primary neuroscience research articles using the medical model to evaluate validity. They will develop their own evaluation systems for identifying valid research related to learning and the brain. Small groups of 2-3 students will be assigned different articles on the same topic and engage in class discussions based on their reading. These will include their interpretations of the research and potential applications to learning strategies and interventions. A final project will be a paper and class presentation about topics they select based on their interests and goals for taking the course. Adjunct Instructor Bio: Judy Willis, M.D. combined her 15 years as a board-certified practicing neurologist with ten subsequent years as a classroom teacher to become a leading authority in the neuroscience of learning. Dr. Willis has written nine books and more than 100 articles for professional journals applying neuroscience research to successful teaching strategies. She is an expert consulting staff for NBC News Education Nation, Edutopia, and media liaison for American Academy of Neurology.

Requirements/Evaluation: short paper and final project or presentation

PHIL 25 (W) Eye Care and Culture in Nicaragua

We will spend around ten days in Nicaragua, chiefly in the Atlantic Coast Autonomous Regions. Almost all of the days in those regions will be spent in clinics, where student--in conjunction with optometrists who volunteer their time for the trip--will administer eye exams, write prescriptions, and distribute glasses. While in Nicaragua, the students will keep detailed journals that they will complete following their return to Williamstown. They will interact with Nicaraguans during the eye clinics, and will have opportunities for speaking with them during evenings. Students will also be required to attend organizational and training meetings and to complete a number of relevant readings prior to the trip. We will spend nine days in Nicaragua, chiefly in the Atlantic Coast Autonomous Regions. Almost all of the days in those regions will be spent in clinics, where students--in conjunction with the optometrists (usually three) who volunteer their time for the trip--will administer eye exams, write prescriptions, and distribute glasses. While in Nicaragua, the students will keep detailed journals that they will complete following their return to Williamstown. They will interact with Nicaraguans during the eye clinics, and will have opportunities for speaking with them during evenings.

Requirements/Evaluation: class participation and journals as described above, along with on-site observation of the students' participation in the eye clinics

Prerequisites: none, though it is helpful to include three to six students who are fluent in Spanish

Enrollment Limit: 12

Enrollment Preferences: students will submit applications indicating why they want to take the course

PHLH 25 (W) Public Health, Community Action, and Education in Rural India

This course will explore access to and reliance on public health services, NGOs, and education in a rural Indian social context. As one of the fastest growing and most populated countries in the world, India has the potential to have an enormous global impact. However, the country's future is entirely dependent upon the health of its population, specifically its most vulnerable--and most vital--members: women and children. To understand how public

health and education policy can be formed and changed to address inequity and sociocultural biases, students will learn about the context of India and how local, national, and global actors currently interact with social systems. The course will begin with an orientation and introductory lectures in New Delhi. Then students will travel to rural Uttar Pradesh (UP) for 10 days for seminars with local experts and field trips to community health centers, schools, and villages. Following their trip to UP, students will travel to Rajasthan to meet NGO workers in Jaipur. The course will include an introduction to fieldwork methods and an interview project on a topic chosen by the student addressing development in India. This course will be run in partnership with the Foundation for Public Health, Education, and Development (<http://fpهد.org/>). A UP-based organization with its own campus, FPHEd's board collectively has decades of experience hosting study abroad programs, including biannual semester-long programs with the School for International Training. FPHEd will assist in making all accommodations and travel arrangements, as well as making local connections with experts and translators for students. Adjunct Instructor Bio: Ms. Curtis graduated from Williams College in 2017 with a degree in Women's, Gender, and Sexuality Studies and a Concentration in Public Health. She conducted community-based participatory research on government reproductive health programs in rural India through a Fulbright-Nehru Fellowship. She has spent a cumulative 17 months to-date studying and researching reproductive health in rural India. She is currently a Health Care Assistant at Planned Parenthood in Boston.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Public Health students, then by seniority

PHLH 402 (S) Senior Seminar in Public Health

The capstone seminar provides concentrators with the opportunity to reflect upon and synthesize their experiential learning in the context of understanding gained from a cohesive set of elective courses, and through the lens of a variety of intellectual and disciplinary frameworks. A second goal is to give concentrators experience working in a multi-disciplinary team to address a real-world, and in many cases very daunting, public health problem. Students will read, discuss, and compose written reflections on primary source empirical papers addressing a range of issues and disciplines in the field of public health. For example, topics may include the social determinants of health, environmental health risks, and access to health care. Students will also be divided into three or four research teams to investigate a contemporary real-life issue in public health by designing a study; collecting and analyzing data; and disseminating findings by written report and formal oral presentation to the public health advisory committee faculty. The capstone course is required of all concentrators, but may be opened to other students with relevant experience at the discretion of the instructor and the advisory committee, if space permits.

Requirements/Evaluation: active seminar participation, written reflections, contribution to the team research project, and a 12- to 15-page final paper

Prerequisites: completion of at least four courses counting towards the PHLH concentration

Enrollment Limit: 14

Enrollment Preferences: senior Public Health concentrators; students who are not senior Public Health concentrators should contact the instructor

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: No divisional credit

PHYS 15 (W) Cooking for the Real World

Students will learn the basic cooking techniques needed to survive for their lives after graduation. They will learn how to make cookies, pasta, pies, protein cookery, and knife skills to better prepare themselves after their time at Williams's. Please when applying for the class include year of graduation and why food matters so much to you. Normally students will email me why and how food means to them. Emails will help determine who gets into the class of 10. Adjunct Instructor Bio: CJ Hazell is currently working in Williams' dining services, preparing meals for over 2000 students. Prior to coming to the college, he ran a small cafe and before that was the kitchen manager and saucier at a French Fine Dining establishment.

Requirements/Evaluation: students will write a reflection comparing their initial email application and what they have learned throughout class

Prerequisites: Junior or Senior

Enrollment Limit: 10

Enrollment Preferences: email application explaining how much food means to them

Grading: pass/fail only

Materials/Lab Fee: cost of books

PHYS 16 (W) The Way Things Work

How does a motor run? What do chocolate and steel have in common? How does Williams heat and power the campus? Can paper be washed? What's inside everyday appliances? How do you build a speaker? From simple machines to complex processes, in this course we'll explore the way things work! Class will meet four afternoons a week for a mixture of lecture, discussion, build time, local field trips, and lots of hands--on exploration. Homework will primarily consist of readings and exercises relevant to the current class topics and extra tinker-time. Early in the course we'll team-engineer and build a large project as a class. In the last part of the course, students will have a chance to explore the functioning of some process, object, or technology of their choice. These will culminate in either building a final project with a short writeup or writing a 6-page paper, and a presentation to the class.

Requirements/Evaluation: class participation; midterm group project; final project with short writeup or a 6-page paper; presentation of final project/paper to the class

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: by seniority, and by requesting an interest statement

Grading: pass/fail only

POEC 22 (W) Volunteer Income Tax Assistance

Cross-listings: POEC 22 ECON 22

Secondary Cross-listing

This experiential course provides students the opportunity to explore public policy through training and work as volunteer income tax preparers for low income working people in North Adams, Massachusetts. By the end of the term, students will be IRS-certified volunteer income tax preparers. Students have the option of writing a 10 page analytic essay or serving as tax preparers for local clients of the Berkshire Community Action Council. The course will also offer an overview of the U.S. income tax, and the role of the tax system in overall U.S. social policy, especially policy towards lower-income households. Coursework will consist of a series of classes and open lab sessions coordinated with the self-paced IRS "Link and Learn" online tax preparer training program. Class time will be spent discussing policy and program context as well as working through the online training program. A poverty simulation and follow up Q&A session featuring guests from local social service organizations will help orient students to the issues facing low-income families in the northern Berkshires.

Class Format: afternoons

Requirements/Evaluation: 10-page paper; complete IRS certification to assist in tax preparation; volunteer work

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: written statement of interest

Grading: pass/fail only

Materials/Lab Fee: \$10

PSCI 118 (F) Power to the People?

Popular unrest. The resurgence of authoritarian styles and practices in politics. Democratic collapse. Political tumult around the globe in recent decades has put elites, and others, on edge as young democracies have collapsed and longer standing ones appear to be stumbling. In the United States, basic stability and democratic expansion have been accompanied by increasing citizen distrust of institutions, growing social divisions, and contestation over basic citizenship rights. Acute observers have long seen the U.S. as a harbinger of the promise and peril of modern democracies. What is the fate of democracy in the U.S.? What does that portend, if anything, for other democracies, or for the general principle of popular sovereignty--the idea that the people govern themselves? We investigate these and related questions by actively consulting political theory and empirical research in the social sciences. Our investigation will include class-time collaboration with a similarly structured undergraduate course being taught by a sociologist at the University of North Carolina and may include an optional weekend study trip.

Requirements/Evaluation: active class participation, three 5-page essays, several short additional writing assignments, and class presentation

Prerequisites: first-year students

Enrollment Limit: 19

Enrollment Preferences: first-year students

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

PSCI 21 (W) Fieldwork in Public Affairs and Private Non-Profits

This course is a participant-observation experience in which students work full-time for a governmental or nongovernmental (including voluntary, activist, and grassroots) organization or for a political campaign. Students may find placements in government and nonprofit organizations in which their work involves significant involvement with public issues. Examples include: town government offices; state or federal administrative offices (e.g., environmental agencies, housing authorities); interest groups that lobby government (e.g., ACLU, NRA); nonprofit organizations such as service providers or think tanks (e.g., Habitat for Humanity, Cato Institute); and grassroots, activist or community development organizations (e.g., Greenpeace or neighborhood associations). The instructors will work with each student to arrange a placement; such arrangements must be made in advance of the Winter Term. Students should first make their own contracts with an institution or agency. The instructors and members of the Political Science Department are available to help students find placements, if necessary. Each student's fieldwork mentor shall send a confirmation letter to the instructor verifying the placement and describing the nature of the work to be performed. During the session, students are responsible for keeping a journal of their experiences and observations. Additionally, students write final papers summarizing and reflecting upon the experience in light of assigned readings. A group meeting of all students will occur before winter study to prepare and after to discuss the experience.

Grading: pass/fail only

Materials/Lab Fee: cost of books

Attributes: EXPE Experiential Education Courses

INT Section: 01 TBA Paula M. Consolini, Cathy M. Johnson

PSCI 22 (W) Learning Intervention for Teens

This course pairs Williams students with adolescents involved in the juvenile court system of Berkshire County. Judges assign teenagers (ages 13-17) to this program, an official Commonwealth of Massachusetts probation program. Our goal is to empower the teenagers through positive peer mentorship and allow them to take ownership of an independent project of the teen's choosing. The project and other program activities aim to cultivate initiative, creativity, focus, and skills in areas such as goal-setting and communication, which the teenagers can transfer to their school, work, and home lives. The course ends with a presentation in which each adolescent/Williams student pair formally presents its work to an audience that includes the employees of the juvenile court system, elected officials, chiefs of police, district attorneys, the teens' peers and families, and Williams faculty and community members. Williams students learn to mentor teenagers and gain insight into the juvenile justice system. Williams students are expected to attend trainings, meet with their teens three times a week, co-give a final presentation, and keep a weekly journal detailing their meetings. This is a student-led course, sponsored by Police Chief Mike Wynn and Professor Cheryl Shanks but entirely run by trained Williams students who have served as mentors in the past. Because Learning Intervention for Teens is an after-school program for the teens, this course meets Tuesday through Thursday from 306pm. In order to enroll in the course, when preregistering, all students must write a paragraph explaining why they believe they'd be a successful mentor in this program. Students should email their paragraphs to student coordinators Rebecca Tauber at ret5@williams.edu and Jamie Nichols jrn2@williams.edu and cc: cshanks@williams.edu.

Class Format: afternoons

Requirements/Evaluation: journal and final reflection totaling 10-15 pages, final project with teenager

Prerequisites: none

PSYC 14 (W) JA SelCom: A Case Study in Selection Processes

The majority of the time will be dedicated toward selecting the next class of Junior Advisors, an undertaking that will allow students to examine selection processes in general. This course will explore the nature of selection processes. What does an optimal selection process look like? How do our implicit biases materialize in the selection? These are just a few of the questions that we will seek to understand through guest speakers from the Davis Center, Psychology Department, Admissions, and the Career Center. Readings will cover topics such as organizational behavior and human decision processes, social networks and organizational dynamics, and gendered wording and inequality. To enroll in this course, you must apply via this form (<https://forms.gle/BjWA1tTfQweAvqc8>) by 11:59 pm on October 25. Those who are not selected will be notified in time so that they can still register for another Winter Study course during the first round of registration.

Requirements/Evaluation: short writing assignments totaling 10 pages

Prerequisites: none

Enrollment Limit: 21-30

PSYC 15 (W) Ephquilts! An Introduction to Traditional Quilting

This studio course will lead the student through various piecing, appliqué and quilting styles and techniques, with some non-traditional methods included. Samples will be made of techniques learned, culminating in the completion of a sizeable project of the student's choosing (wall quilt or lap-size quilt). There will be an exhibit of all work (ephquilts), at the end of winter study. "Woven" into the classes will be discussions of the history of quilting, the controversy of "art" quilts vs. "traditional" quilts, machine vs. hand-quilting and the growing quilting market. Reading list: *Pieces of the Past* by Nancy J. Martin; *Stitching Memories: African-American Story Quilts* by Eva Ungar Grudin; *Sunshine and Shadow: The Amish and Their Quilts* by

Phyllis Haders; *A People and Their Quilts* by John Rice Irwin; *Treasury of American Quilts* by Cyril Nelson and Carter Houck; *The Quilt: New Directions for an American Tradition*, Nancy Roe, Editor. Requirements: attendance of all classes (including field trip), a love of fabric, design and color, an enthusiasm for handwork, participation in exhibit. *Extensive time will be spent outside of class working on assigned projects.* Adjunct Instructor Bio: Debra Rogers-Gillig, one of the top quilters in New England, has been quilting for over 35 years, and teaching classes and coordinating shows and exhibits for 30 years. She has received numerous prizes and awards from quilt shows in New York and New England and been published in quilt magazines.

Requirements/Evaluation: final project or presentation

PSYC 21 (W) Psychology Internships

Would you like to explore applications of psychology in the "real world?" This course gives students an opportunity to work full-time during Winter Study in a mental health, business, education, law or another setting in which psychological theories and methods are applied to solve problems. Students are responsible for locating their own potential internships whether in the local area, their hometowns, or elsewhere, and are welcome to contact the course instructor for suggestions on how to do this. In any case, all students considering this course must consult with the instructor about the suitability of the internship being considered before the Winter Study registration period. Please prepare a brief description of the proposed placement, noting its relevance to psychology, and the name and contact information of the agency supervisor. Before Thanksgiving break, the student will provide a letter from the agency supervisor which describes the agency, and the student's role and responsibilities during Winter Study. Enrolled students will meet the instructor before Winter Study to discuss matters relating to ethics and their goals for the course, and after Winter Study to discuss their experiences and reflections.

Requirements/Evaluation: 10-page minimum final paper summarizing the student's experiences and reflections, a journal kept throughout the experience, and the supervisor's evaluation

Prerequisites: approval by Ken Savitsky is required

Enrollment Limit: 20

Enrollment Preferences: random selection

Grading: pass/fail only

Attributes: EXPE Experiential Education Courses

Winter 2020

INT Section: 01 TBA Kenneth K. Savitsky

PSYC 352 (F) Clinical and Community Psychology

This course provides an overview of theory, methods, and professional issues in the fields of clinical and community psychology (and related fields). In addition to academic work (primary source readings and class discussions), students are encouraged to apply their experiences in academic psychology to field settings, and to use their fieldwork experience to critically evaluate theory and research. The course includes a supervised field-work placement arranged by the instructor in a local mental health or social service agency. **Students must complete a brief survey about their interests and schedule in order to place them in an agency. Students should email the instructor to obtain the survey as well as receive permission to register for this course.**

Requirements/Evaluation: field work (six hours per week), two 5-page position papers, and a 12- to 15-page final paper

Prerequisites: PSYC 252

Enrollment Limit: 15

Enrollment Preferences: senior, then junior, Psychology majors; you **MUST** have permission of instructor to register for this course

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Not offered current academic year

PSYC 372 (F) Advanced Seminar in Teaching and Learning

This advanced seminar will give students an opportunity to connect theory to practice. Each student will have a teaching placement in a local school, and participate in both peer and individual supervision. In addition, we will read a range of texts that examine different approaches to teaching, as well as theory and research on the process of education. What is the best way to teach? How do various theories of child development and teaching translate into everyday practices with students? Students will be encouraged to reflect on and modify their own teaching practices as a result of what we read as well as their supervision. Questions we will discuss include: What is the relationship between educational goals and curriculum development? What is the relation between substance (knowledge, skills, content) and the interpersonal dynamic inherent in a classroom setting? How do we assess teaching practices and the students' learning? What does it take to be an educated person?

Requirements/Evaluation: this course involves a field placement, weekly readings, as well as seminar discussion, supervision, and a graded journal

Prerequisites: PSYC 232 or PSYC 272 or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Psychology majors and those who plan to become teachers

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

REL 110 (F) Living Religion: The Study of Religion in Everyday Life

When studying religions, people generally turn to studying scriptures, the life and teachings of the religion's founder, and the fundamental doctrines of the religion. What this approach does not allow us to understand, however, is the way that such religious traditions actually manifest themselves in the world. This course introduces students to an alternative approach to studying religion, by exploring the way these religions are lived and experienced by individuals and communities in a variety of contexts. We will see how religion intersects with people's lived experiences of gender, race, class, sexuality, and broader socio-cultural and political contexts. We will explore this approach to religion through an engagement with ethnography (the qualitative research method in the social-sciences generally described as "participant-observation"). Students will not only learn about the theory and practice of this methodology, but will also conduct their own ethnographic research project over the course of the semester. This will involve: designing a feasible project and research question, selecting local research sites and subjects, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

Requirements/Evaluation: regular reading responses, semester-long research project with frequent small assignments building up to the final product (class presentation and approximately 10-page paper)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: first-year students and sophomores

Expected Class Size: 12-12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

REL 228 (F) Zen and the Art of American Literature

Cross-listings: AMST 238 COMP 238 REL 228 ENGL 239

Secondary Cross-listing

In 1844, the Transcendentalist magazine, *The Dial*, published an excerpt from the *Lotus Sutra*, translated into English by Elizabeth Palmer Peabody. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like *Middle Passage*, *A Tale for the Time Being*, and *Lincoln in the Bardo*. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Requirements/Evaluation: regular attendance, a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 7- to 10-page essay

Prerequisites: any literature course at Williams or permission of the instructor

Enrollment Limit: 45

Enrollment Preferences: students will be asked to submit emails explaining why they want to take this course, which will be used to determine final enrollment; no first-years

Expected Class Size: 35

Grading: yes pass/fail option, yes fifth course option

RLFR 13 (W) Creative Portraiture in the Darkroom

Cross-listings: ARTS 13 RLFR 13

Primary Cross-listing

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph *Self-Portrait as a Drowned Man*, one of the first self-portraits in the history of photography, students will learn how to use the view camera (a large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Be aware that this class requires an average of 15 weekly lab or studio hours outside of regular classes and sometimes during the weekend. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des Rencontres Photographiques de Guyane.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: knowledge of black and white analog photography is preferred, but not required

Enrollment Limit: 10

Enrollment Preferences: Art major and minors then random

Grading: pass/fail only

RUSS 25 (W) Williams in Georgia

Cross-listings: SPEC 25 RUSS 25

Primary Cross-listing

Williams has a unique program in the Republic of Georgia, which offers students the opportunity to engage in three-week-long internships in a wide variety of fields. Our students have helped in humanitarian relief organizations like Save the Children, interned in journalism at *The Georgian Times*, taught unemployed women computer skills at The Rustavi Project, documented wildlife, studied with a Georgian photographer, done rounds at the Institute of Cardiology, and learned about transitional economies at the Georgian National Bank. In addition to working in their chosen fields, students experience Georgian culture through museum visits, concerts, lectures, meetings with Georgian students, and excursions. Visit the sacred eleventh-century Cathedral of Svetitskhoveli and the twentieth-century Stalin Museum, see the birthplace of the wine grape in Kakheti, and explore the region where Jason sought the Golden Fleece. Participants are housed in pairs with English-speaking families in Tbilisi, Georgia's capital city. At the end of the course, students will write a 10-page paper assessing their overall trip experience. Adjunct Instructor Bio: Vladimir Ivantsov holds a PhD in Russian Studies from McGill University (Canada). Prior to coming to Williams, he taught at McGill University and St. Petersburg State University (Russia). His research interests cover a broad spectrum of topics, including Dostoevsky, existentialism, and rock and pop culture. He published a book on the contemporary Russian writer Vladimir Makanin.

Requirements/Evaluation: 10-page paper

Prerequisites: none; knowledge of Russian or Georgian is not required

Enrollment Limit: 8

Enrollment Preferences: interested students must attend an informational meeting and submit a short essay about their interest in the course

Grading: pass/fail only

SOC 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237 ARTH 237 SOC 236 AMST 236

Primary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective

representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

SOC 240 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

SPEC 19 (W) Healthcare Internships

Experience of a clinical environment is essential to making the decision to enter the health professions. Through this internship, students clarify their understanding of the rewards and challenges that accompany the practice of medicine (human and animal) and dentistry. Generally, a shadowing experience focuses on provider-patient interactions within out-patient and in-patient settings. These experiences provide students with the opportunity to observe clinical interactions, as well as to learn about the systems within which health care is delivered. Students will be introduced to fundamental concepts related to patient interviewing and history taking, diagnosis and medical decision making. Students will also be introduced to core concepts of population health, providing a broad perspective on health outcomes within a geographic region and expanding their perspective on the individual

clinical interactions which they observe. This course will encourage participants to reflect on their clinical experiences with a dual focus- from the perspective of the individual provider-patient relationship and within a systems-level context. Didactic sessions for (on-campus students) will focus on the challenges and experiences of healthcare professionals in the Berkshires or nationally. Students will be introduced to concepts of health and wellness, epigenetics, and environmental influences that have a demonstrable, sustained impact on individuals before and after clinical symptoms of illness emerge. By the end of the course, students will demonstrate greater understanding of the fundamentals of patient-provider interactions, clinical diagnosis, patient interviewing, and factors affecting the health of individuals and communities.

Requirements/Evaluation: 10-page paper

Prerequisites: not open to first-years

Enrollment Preferences: grade level and potential as applicant to professional programs

Grading: pass/fail only

INT Section: 01 T 6:00 pm - 8:00 pm Rebecca Counter

SPEC 21 (W) Experience in the Workplace; an Internship with Williams Alumni/Parents

Field experience is a critical component of the decision to enter a profession. Through these field placements, students can clarify their understanding of the rewards and challenges that accompany the practice of many different aspects within a profession, and understand the psychology of the workplace. In order to participate in this course, students must apply to the winter study internships listed in this syllabus. The expectation is that each student will observe and participate in some aspect of the profession for at least 30 hours per week, 6 hours per day for 5 days each week. It is also expected that the instructor will assign a specific project to be completed within the 3-4 week duration of the course depending upon appropriateness. Participation in this winter study will require the student to quickly assess the work environment, make inferences about corporate culture, performance norms and expectations, and to take initiative not only to learn from this experience, but also to contribute where and when appropriate. Understanding the dynamics within a work environment is critical to success in any organization, and this hands-on experience will illuminate lessons learned in the classroom. Upon completion of the winter study, it is expected that the student write a thorough report evaluating and interpreting the experience. Teaching Associates: Williams College Alumni/Parents will be recruited to become teaching associates for this course. A broad range of professions will be represented as the course develops. Alumni and parents will receive individual orientations with the course instructor in person or via telephone conference. Students will be required to read one of two books selected for this course. Bibliography: a bibliography of readings would be selected from such works as: *What Should I do with My Life?* by Po Bronson, 2003; *Working* by Studs Terkel, 2004.

Requirements/Evaluation: it is expected that students will complete assigned readings (read one of two books assigned to this course), write a daily journal, and write a 5- to 7-page expository review; evaluation will become public record as a resource for other students

Prerequisites: interested students must attend an information meeting in late September or early October and follow up with Dawn Dellea if students have questions about specific WS internships listed in the SPEC 21 syllabus; application are submitted via Handshake

Enrollment Preferences: 1st priority--students applying for winter study internships listed in the SPEC 21 syllabus; 2nd priority--students developing independent Internships with Williams alumni/parents; first-years limited to applying for local internships

Grading: pass/fail only

SPEC 22 (W) Outdoor Emergency Care

Cross-listings: SPEC 22 LEAD 22

Secondary Cross-listing

The course will develop the technical proficiency and leadership skills required to effectively and efficiently administer emergency medical care in outdoor and wilderness environments. Successful completion of all 3 sections of the course, along with demonstrating ski/snowboard proficiency, can lead to certification as a member of the National Ski Patrol. The course is based upon: 1. National Ski Patrol's Outdoor Emergency Care (5th Edition),

a curriculum containing textbook/web-based learning and hands-on, practical skill development 2. CPR for the Professional Rescuer 3. Approximately 18 hours of outdoor training in Ski Patrol rescue techniques Specifically, the course teaches how to recognize and provide emergency medical care for: - Wounds and Burns - Environmental Emergencies (e.g., frostbite, hypothermia, heat exhaustion) - Musculoskeletal Trauma (e.g., breaks, sprains, etc.) - Shock, Respiratory, Poisoning, Substance abuse emergencies - Medical emergencies (e.g., heart attack, stroke, seizures, etc.) The course will teach the use of various splints, bandages, and other rescue equipment as well as methods of extrication, use of oxygen, and how to deal with unusual emergency situations such as mass casualty incidents. On-line and textbook learning will be supplemented by classroom work that includes lectures, videos, and hands-on skill development and practice. There will be a written and practical final exam. The outdoor portion of the course includes rescue toboggan handling, organization and prioritization of rescue tasks, and practical administration of emergency care in the outdoor environment. Each week there will be ~15 hours of classroom work plus ~8 hours of practical outdoor work at Jiminy Peak ski area. Homework (online and textbook based) will be required. *Attendance at all classes is mandatory.* The course is limited to 12 students, chosen based on ski/snowboard interest and ability as well as prior first aid experience. Adjunct Instructor Bio: Tom Feist is an alumnus of Williams College ('85) and PhD in Materials Science and Engineering. Following a 20+ year career at General Electric, Tom taught Chemistry at Williams in 2017-18. He has been a ski patroller for over 35 years, having started patrolling at Williams. Tom is a certified Instructor and Instructor Trainer for Outdoor Emergency care and currently patrols at Sugarbush Resort in Vermont.

Requirements/Evaluation: completion of daily homework; written and practical final exam

SPEC 24 (W) Class of 1959 Teach NYC Urban Education Program

Students in this course learn about the front-line challenges of urban public education by working in one of New York City's public schools. Participants will be expected to pursue a full day's program of observing, teaching, tutoring and mentoring in their choice of more than 20 different school situations from elementary through high school. Each of the participating schools will have a resident supervisor who will meet with the January interns to arrange individual schedules and provide mentoring during the month. There will be weekly seminar meetings of all the interns who are expected to participate in group discussions, keep a journal and write a 5 page paper reflecting upon their experience. The course will conduct orientation meetings with students prior to January, matching each student's interest with appropriate teaching subject areas and a host school. Dormitory-style housing will be provided along with some assistance with transportation and food costs-estimated at \$400 for the term. Further assistance is available for financial aid students. Adjunct Instructor Bio: Tracy Finnegan is a master's level teacher with training and teaching experience in a variety of approaches and settings.

Class Format: wsp internship

Requirements/Evaluation: Evaluation will be based on a journal and a 5-page paper

Prerequisites: prerequisites: Sophomore, Junior or Senior standing; not open to first-year students

Enrollment Limit: 12

Enrollment Preferences: statement of interest

SPEC 26 (W) Essentials for Entrepreneurship: An Immersion In the San Francisco Start-Up Culture

Interested in Entrepreneurship and seeing first-hand what it takes to launch a venture? Visit over ten startups in the Bay area to find out! This course is designed to give students interested in Entrepreneurship in-depth insight into the Customer Discovery process, i.e. how startups figure out if their ideas are worth pursuing. We will meet with the founders of 10-15 start-ups in the Bay Area and track their professional and personal journeys. We will look at the impact of company culture, the Bay Area ecosystem and values, financing, and how a Liberal Arts background prepares students for the challenges of entrepreneurship. Student teams will have the opportunity to work on an actual project for one or more of the companies to be visited and present their findings to senior management. We will also visit the Google campus and Stanford School. While many of the companies will be technology driven, no technical background is needed and we will strive to have a diverse background in the class. The course will start in Williamstown with a review of idea development tools used in today's startup environment, particularly those pioneered by Stanford d.School called the Business Model Canvas. Workshops on Design Thinking and maximizing the Williams network will round out the pre-trip coursework. Reading will include "The Lean Startup" by Eric Ries, "Zero to One" by Peter Thiel and Edward deBono's "Thinking Course" as well as articles and podcasts. Then we will go see what is actually happening in the market! Meeting times: 1/6/20 - 1/14/20 Williamstown. 10am-1pm 1/15/20 travel to San Francisco 1/16/20-1/28/20 San Francisco 10am-5pm or as needed based upon project 1/29/20 Travel back to Williamstown Adjunct Instructor Bio: Tonio Palmer is the Entrepreneur in Residence at Williams. Tonio has had a long career in international business and founded a number of companies. He holds an MBA from Wharton and MA from Upenn as a graduate of the Lauder Institute.

STS 250 (S) Environmental Justice (DPE)

Cross-listings: ENVI 250 STS 250

Secondary Cross-listing

How are local and global environmental problems distributed unevenly according to race, gender, and class? What are the historical, social and economic structures that create unequal exposures to environmental risks and benefits? And how does inequity shape the construction and distribution of environmental knowledge? These are some of the questions we will take up in this course, which will be reading and discussion intensive. Through readings, discussions, and case studies, we will explore EJ in both senses. Potential topics include: toxics exposure, food justice, urban planning, e-waste, unnatural hazards, nuclearism in the U.S. West, natural resources and war, and climate refugees. Occasionally, community leaders, organizers, academics, and government officials will join the class to discuss current issues.

Requirements/Evaluation: several short essays, final essay

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Environmental Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 265 (F) Digital Performance Lab

Cross-listings: THEA 265 SCST 265 STS 265

Secondary Cross-listing

A collaborative laboratory investigating the intersection of live art and new media, this studio course explores the opportunities for (and problems of) performing through various media. Using audio, video, web-based, interactive, algorithmic, and analog platforms, students will perform research and create performances that examine liveness, broadcasting, digital stages, networking, and what it means to be both a spectator and a maker in the digital age. Students will develop technical and collaborative skills in artistic and new media production, gain fluency in contemporary theories of liveness, performance, and visual culture, and will research historical and current trends in mediated performance practices.

Platforms/technologies/media forms that may be considered include Twitter, live radio, in-ear monitors, algorithmic composition, bots, video games, live streaming, VJ software, interactive audio, sensors, soundwalks, Snapchat, VR, and surveillance.

Requirements/Evaluation: bi-weekly projects and presentations, bi-weekly 2-page critical writing assignments, class participation, work ethic, and collaborative skills

Prerequisites: none

Enrollment Limit: 20

Expected Class Size: 6

Grading: no pass/fail option, yes fifth course option

Cross-listings: WGSS 371 ANTH 371 STS 370

Secondary Cross-listing

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation--also known as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Requirements/Evaluation: four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

THEA 241 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to

cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: a short statement of interest will be solicited

THEA 330 (S) New Orleans as Muse: Literature, Music, Art, Film and Theatre in the City

Cross-listings: COMP 330 AMST 331 THEA 330

Primary Cross-listing

This course will look at the representation of a city and how it has influenced artists. Students will read, listen to, and view a selection of the literature, music, film and art that represent the city from both pre-flooding and current re-building. Reading selections will include examples such as *Harper's*

Weekly (Lafcadio Hearn), *The Awakening* (Kate Chopin), *A Streetcar Named Desire* (Tennessee Williams), *The Moviegoer* (Walker Percy), *Why New Orleans Matters* (Tom Piazza), *A Confederacy of Dunces* (John Kennedy O'Toole), *New Orleans Sketches* (William Faulkner), *One Dead in the Attic* (Chris Rose). Film examples such as *A Streetcar Named Desire*, *An Interview with a Vampire*, *The Curious Case of Benjamin Button*, *When the Levees Broke*, *Treme*, *Waiting for Godot* (in the 9th Ward). Music selections from examples such as Louis Moreau Gottschalk, Jelly Roll Morton, Louis Armstrong, Fats Domino, The Meters, Kermit Ruffins and the Rebirth Brass Band. Art selections will come from a variety of sources such as THE OGDEN Museum of Southern Art and Prospect 1, 2, & 3.

Requirements/Evaluation: will be on active participation, weekly response essays on film viewings, 2 short essays on class topics, a final paper and a contemporary creative project/performance

THEA 335 (F) The Culture of Carnival

Cross-listings: THEA 335 COMP 338

Primary Cross-listing

Carnival is a regenerative festival as well as a transgressive one. It is a time for upheavals and recreating for one day, a new world order. Men dress as women, women dress as men, the poor become kings; drink and sex and outrageous behavior is sanctioned. We will look at festivals in such places as New Orleans, Venice, and Rio. Central to this course are the cultural and religious lives of these societies, and how these festivals exist politically in a modern world as theatre and adult play. A variety of sources will be used, such as newspaper accounts, films, photography, personal memoirs and essays on the subject.

Requirements/Evaluation: regular active class participation, one oral presentation including a 5-page essay, one 15-page research final paper and participation in a group project/public parade

Prerequisites: none

THEA 385 (S) The Sculptural Costume and It's Performance Potential

Cross-listings: ARTS 385 THEA 385

Secondary Cross-listing

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance.

From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica's Parangole, and Nick Cave's sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Requirements/Evaluation: the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

Prerequisites: successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

Enrollment Limit: 14

Enrollment Preferences: Art and Theater majors

WGSS 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: ENGL 113 AMST 113 WGSS 113

Secondary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the

movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

FILM AND MEDIA STUDIES

Advisors: Professors: B. Mladenovic, S. Rosenheim.

Film and Media Studies is a vibrant interdisciplinary field. It studies traditional visual and audio-only forms, such as film, television and radio, as well as new media such as podcasts, video installations, interactive video projects, video games, augmented reality, animation, streaming video and other forms that will undoubtedly emerge in the future. Given the explosive growth in the variety of moving-image media, and their penetration into entertainment, art, science and public discourse, the study of film and related media must encompass a variety of theoretical approaches and must cultivate a number of specific skills in production and analysis. Production and analysis feed into each other, together providing the necessary tools for understanding why and how the moving image generates meaning in the world. The field of film and media studies thus unites numerous aspects of production, theoretical lenses of analysis and interpretation, and critical understanding of the complex relations between media and larger social and cultural forces.

Students interested in Film and Media Studies will naturally take different paths through the numerous relevant courses offered at Williams. It is however strongly recommended that they seek a balance between production courses (most of which are offered by Art Studio, Computer Science, and Theatre) and theoretical courses (offered by numerous departments in Divisions I and II). This will help students to think critically both *about* and *with* moving images, in the same way that they think with and about words.

Currently, students interested in film and media can major in the field only through the Contract Major. Guidance on course selection (with or without the aim of completing the contract major in film and media studies) can be sought from the faculty with whom students take the first couple of film and media courses. In addition, professors Morgan McGuire (Computer Science), Bojana Mladenovic (Philosophy), and Shawn Rosenheim (English) have volunteered to serve as advisors to students interested in this field.

FMST Core Courses

AFR 207 (F) "Out of Africa": Cinematic Por(Be)trayals of a Continent (DPE) (WS)

Cross-listings: AFR 207 ARTH 207

Secondary Cross-listing

This tutorial provides a focused study of the politics / poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa's 'fighting men' to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film / cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

Requirements/Evaluation: targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 207 (D2) ARTH 207 (D1)

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

AFR 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: ENGL 286 WGSS 283 AFR 283 AMST 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

AFR 321 (F) Trending Black: Race & Social Media in the 21st Century

The 21st Century ushered in new and exciting ways for people to communicate digitally. With the creation of social media outlets like Facebook, Twitter, Instagram, and more recently Vine, connecting with the world is literally one click, or selfie away. Though much of the attention around social media is focused on people with race and educational privilege, people of color have created their own spaces to curate, articulate, and produce culture. Through the methods of rhetorical criticism, critical discourse analysis, cultural criticism and ethnography, we will investigate the ways Africana cultures, specifically in the United States, utilize social media to shape community and influence popular culture. This course will give students hands-on experience analyzing various texts, and a deeper understanding of rhetorical methodologies.

Requirements/Evaluation: class participation, response papers, and a final research project

AFR 325 (F) Television, Social Media, and Black Women 'Unscripted'

Cross-listings: WGSS 325 AFR 325

Primary Cross-listing

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Requirements/Evaluation: class participation, response papers, one 10 page paper, and a formal class presentation

Cross-listings: AFR 337 WGSS 346 AMST 337

Secondary Cross-listing

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: facilitated class discussion; weekly critical response papers; creative projects

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: WGSS majors; students may be asked to write a short statement of interest in the event of over-enrollment

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

AMST 205 (F) Chicana/o Film and Video

Cross-listings: ARTH 203 WGSS 203 LATS 203 AMST 205

Secondary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: film screenings will be scheduled as a lab

Requirements/Evaluation: one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 30

AMST 229 (S) Reel Jesus: Reading the Christian Bible and Film in the U.S.A.

Cross-listings: AMST 229 REL 229

Secondary Cross-listing

In this course we examine some of the ways that Christian biblical narratives have appeared in late twentieth-century and early twenty-first century Hollywood movies, looking in particular at films such as *The Matrix* (1999), *The Passion of the Christ* (2004), *Jesus Christ Superstar* (1973), *The Shawshank Redemption* (1994), *The Omen* (1976), *Children of Men* (2006), and *The Book of Eli* (2010). What are the overt and subtle ways that these films seek to interpret and employ biblical texts? Why do they draw upon the texts they do and read them as they read them? What can cinematic interpretations of biblical texts reveal to us about how these texts are used in broader U.S. culture, especially to crystallize and reflect certain political, economic, ethnic, racial, sexual, and social parameters of U.S. cultures? How does an awareness of this scriptural dimension in a work of "popular culture" affect our interpretation of both the film and the scriptural text's meanings? How do varying interpretations of biblical texts help us to understand cinematic meaning? By assuming that we can read both biblical texts and films in multiple and contradictory ways, this class can use film as the occasion for interpreting, analyzing, and debating the meanings, cultural functions, and affective responses generated by biblical narratives in film. Finally, this course asks us to analyze the implications of ways in which we read texts and films. For this interdisciplinary course we will read selected biblical and extra-canonical texts, including selections from canonical and non-canonical gospels, the letters of Paul, and the book of Revelation, but our focus will be on the way that movies (and the people who make them and watch them) make meaning out of these biblical texts.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation based on participation, short writing exercises (1-pg response papers), one 3-pg analytical essay that will also be revised, a 6-pg synthetic midterm essay, and a final 10-pg review essay

AMST 231 (S) Approaches to Media Studies: Analyzing Mediated Difference

Cross-listings: LATS 231 AMST 231 WGSS 232

Secondary Cross-listing

Media's influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hands-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities.

Class Format: seminar

Requirements/Evaluation: participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies and Women's Gender & Sexuality Studies majors by seniority

AMST 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: ENGL 286 WGSS 283 AFR 283 AMST 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

ANTH 225 (S) Fact/Fiction/Film

This course examines the potential of moving images to reveal aspects of culture normally obscured by the written word. We will consider both the theory and practice of documentary film from its inception around 1900 to the present, paying particular attention to the way documentary filmmakers have approached the representation of social reality in Western and non-Western cultural settings. Questions that we will consider include: What is the relationship between written text and image, or between image and story? What is the role of film in anthropology? What counts as a document?

Class Format: team-taught, through a mixture of lectures and discussions

Requirements/Evaluation: regular attendance at film screenings and active class participation, a 5-page paper on an assigned topic, a 12- to 15-page final paper, and a self-scheduled take-home final

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Anthropology/Sociology majors, then to sophomores, and finally to first-year students

ANTH 330 (F) The Documentary Project: Ethnography and the Visual Narrative

The goals of ethnography and documentary work overlap. Both strive to communicate a compelling sense of people's lives, and to connect them to broader struggles and issues faced by others. Further, ethnography as a method emphasizes a close and sustained interaction, or "engagement" between the practitioner and her subjects. In this class, students will have the opportunity to practice both engagement and compelling presentation, by working throughout the semester on planning and executing a documentary project. The course will emphasize the use of visual narratives accompanied by text and audio drawn from interviews. Students will practice different types of documentation, and consider techniques for approaching, imaging and interviewing subjects. The practical aspects of developing a project, gaining access, working in unfamiliar environments and editing both visual and audio material will be reviewed. Conceptual topics will include myths about "truth" and "objectivity" in visual media, tensions between the goals of the documentarian and her responsibilities to her subjects, and differences between the documentary and ethnographic point of view. Acceptance into the class requires technical competence in photography or videography (as evidenced by prior coursework or portfolio), and a demonstrated ability to work independently and to commit to a long-term project. Participants should expect to spend significant time working off campus.

Requirements/Evaluation: develop and execute a semester length documentary project under instructor guidance; produce and edit weekly visual

and audio content; participate in class critiques

Prerequisites: SOC 236 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

ARAB 401 (S) Topics in Advanced Arabic I: Contemporary Arab Cinema

The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

Requirements/Evaluation: essays, presentations, final paper, exam

ARAB 415 (S) Beyond Headlines: Surveying the Arab Landscape through Arabic Media

How does Arabic media represent the Arab landscape? This course will explore Arabic media as a window to the understanding of modern Arab thought and culture. It will discuss Arabic media as a vehicle through which issues of political, historical, social, and economic significance in the Arab world are discussed, debated, and analyzed. Some issues include political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization. The course will explore these issues as represented in the language of print, internet, television, movies, and social media, and we will employ linguistic and paralinguistic analysis of these resources.

ARTH 207 (F) "Out of Africa": Cinematic Por(Be)trayals of a Continent (DPE) (WS)

Cross-listings: AFR 207 ARTH 207

Primary Cross-listing

This tutorial provides a focused study of the politics / poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa's 'fighting men' to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film / cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

Requirements/Evaluation: targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

ARTH 367 (F) Documentary Fictions

Cross-listings: ARTH 367 ENGL 367

Secondary Cross-listing

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's *The Act of Killing* (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

ARTS 107 (S) Creating Games (QFR)

Cross-listings: ARTS 107 CSCI 107

Secondary Cross-listing

The game is unique as the only broadly-successful interactive art form. Games communicate the experience of embodying a role by manipulating the

player's own decisions, abstraction, and discrete planning. Those three elements are the essence of computation, which makes computer science theory integral to game design. Video games also co-opt programming and computer graphics as new tools for the modern artist. As a result, games are collaborative interdisciplinary constructs that use computation as a medium for creative expression. Students analyze and extend contemporary video and board games using the methodology of science and the language of the arts. They explore how computational concepts like recursion, state, and complexity apply to interactive experiences. They then synthesize new game elements using mathematics, programming and both digital and traditional art tools. Emphasis is on the theory of design in modern European board games. Topics covered include experiment design, gameplay balance, minimax, color theory, pathfinding, game theory, composition, and computability.

Class Format: lecture and studio

Requirements/Evaluation: participation, studio work, and quizzes

Prerequisites: none; no programming or game experience is assumed

Enrollment Limit: 24

Enrollment Preferences: first-year students

ARTS 260 (S) Objects in Video, Video as Object

In a world where the screen is often taken for granted, how might we begin to dissect the ways video has transformed visual perception? This course will focus on video installation and how video is transformed by its physical context. We will examine how videos shift our relationship to objects in space. Students will experiment with lighting and set building, paying particular attention to how surfaces are transformed by the lens. We will also explore projection mapping, built installation, and the peculiarities of the screen. We will look at works by artists who have emphasized the physicality or immateriality of video through installation and web-based art. We will read a variety of texts, charting the shifting role video has played in contemporary society. Through weekly assignments and regular critiques, we will begin to unpack how the videos we make contact with daily can shift our relationship with our own bodies and our surrounding environment.

Class Format: studio

Requirements/Evaluation: discussion, participation, and the technical and conceptual strength of the projects, with consideration given to individual development

Prerequisites: 100 level video course

CHIN 226 (S) Chinese Film and Its Significant Others

Cross-listings: COMP 296 CHIN 226

Primary Cross-listing

From the "wows" that the first short films invoked at a Shanghai teahouse in 1896 to the \$527 million (or 3.4 billion RMB) grossed at the box-office by a 3D fantasy in 2016, Chinese films have struck a responsive chord among domestic and foreign audiences. In this survey course, we will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Requirements/Evaluation: attendance and participation, short response papers (1- 2-pages each), one final project

Prerequisites: none

CHIN 237 (F) Present Past: The Politics of Memory in Contemporary Chinese Literatures and Films

Cross-listings: CHIN 237 COMP 297

Primary Cross-listing

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "past" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, amnesia and nostalgia, and home and diaspora in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies.

Requirements/Evaluation: attendance and participation, five short papers, five short critiques of a partner's paper, one final project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: current or prospective Chinese, Asian Studies, and Comparative Literature majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

COMP 221 (S) Hollywood Film

Cross-listings: COMP 221 ENGL 204

Secondary Cross-listing

For almost a century, Hollywood films have been the world's most influential art form, shaping how we dress and talk, how we think about sex, race, and power, and what it means to be American. We'll examine both the characteristic pleasures provided by Hollywood's dominant genres--including action films, horror films, thrillers and romantic comedies--and the complex, sometimes unsavory fantasies they mobilize. We will do this by looking carefully at a dozen or so iconic films, probably including *Psycho*, *Casablanca*, *The Godfather*, *Schindler's List*, *Bridesmaids*, *Groundhog Day*, *12 Years a Slave* and *Get out* In addition to the assigned reading, students will be required to attend free screenings of course films on Sunday evenings at Images Cinema.

Requirements/Evaluation: attendance at Sunday evening screenings; two 2-page essays, two editing exercises, a midterm, and a final exam

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 60

Enrollment Preferences: English majors

Expected Class Size: 60

Grading: yes pass/fail option, yes fifth course option

COMP 246 (S) Bloody Vampires: From Fiction to Film and Fashion

Cross-listings: ENGL 287 COMP 246

Primary Cross-listing

This course explores the figure of the vampire and seeks to explain the popular appeal such a fictive creature has been enjoying for over two centuries. What kind of fears and fantasies does it crystallize? And what kind of discourse about sexuality, death, and disease does it validate? What does its mere existence reveal about gender and ethnicity? We will examine the emergence of the vampire in gothic literature of the late 18th and 19th centuries, its omnipresence in cinema in the 20th century and investigate its resurgence in 21st-century pop culture. In order to gain a deeper understanding of the figure of the vampire, we will read poems by August Bürger and Goethe, the first vampire story by John Polidori, novels by Sheridan LeFanu and Bram Stoker, and contemporary vampire fiction by Anne Rice and Stephenie Meyer. We will watch the films *Nosferatu* by Murnau and Herzog, *Dracula* by Browning and Coppola, the *Dance of Vampires* by Polanski, *The Hunger* by Scott, *Blade* by Norrington, *Twilight* by Hardwicke, and *Daybreakers* by Spierig, as well as episodes of the TV series *Buffy the Vampire Slayer*, *True Blood*, and *The Vampire Diaries*. We will also discuss music video clips by Lady Gaga and Marilyn Manson, and fashion shows by Alexander McQueen, John Galliano and Vivienne Westwood.

Class Format: seminar

Requirements/Evaluation: three 5-page papers and a 10- to 12-page final rewrite

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students majoring or considering a major in language or literature

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

COMP 258 (F) Film and Media Studies: An Introduction

Cross-listings: COMP 258 ENGL 274

Secondary Cross-listing

This team-taught interdisciplinary course introduces students to concepts and skills central to the study of moving images. After familiarizing ourselves with the basic elements--visual, narrative and auditory--necessary for formal analysis, we will develop critical tools for understanding film and media in their historical and social contexts. We will discuss influential ideas, theories, and methods in the discipline of film and media studies. Students will learn to respond to works drawn from a wide range of forms: fiction and nonfiction film, animation, television, video games, and emerging forms of virtual reality. Throughout, our emphasis will be on the diverse ways in which moving pictures create meaning. How can we best think about the reciprocal relations between film, new media, and contemporary life? This course will be presented through a mixture of lectures, discussions, and exercises.

Class Format: lecture/discussion/studio

Requirements/Evaluation: class attendance and participation; frequent (probably weekly) writing assignments that will include several short responses, three essays (1000-2000 words), three production exercises; and a final long paper or project

Prerequisites: no prior production experience is required

Enrollment Limit: 30

Enrollment Preferences: open to first-year students; approximately 2/3 of places will be reserved for first- and second-year students

Expected Class Size: 30

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

COMP 283 (F) Haitian and French Caribbean Literatures and Films

Cross-listings: COMP 283 AFR 261 RLFR 261

Secondary Cross-listing

Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and of Martinique and Guadeloupe as the "French" Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling "intimist" stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

Class Format: seminar

Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation

Prerequisites: French majors, French certificate, Africana and Comparative Literature students

Enrollment Limit: 15

Enrollment Preferences: 105 and above, French majors, French certificate, Africana and Comparative Literature students

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

COMP 294 (S) Philosophy and Narrative Fiction

Cross-listings: PHIL 294 COMP 294

Secondary Cross-listing

What is it for a novel, a story, a play or a film to be a *philosophical* narrative? It is not enough for it merely to be about a character who happens to be a philosopher; nor is it just that philosophical positions are reviewed in the narrative, as in Gaarder's *Sophie's World*. Milan Kundera tried to answer this question by saying that a good philosophical novel does not serve philosophy but, on the contrary, tries to "get hold of a domain that (...) philosophy had kept for itself. There are metaphysical problems, problems of human existence, that philosophy has never known how to grasp in all their concreteness and that only the novel can seize." If Kundera is right, fictional narratives (such as novels) sometimes do the philosophical work that philosophy cannot do for itself. What kind of work is that, and how is it accomplished? Why can't argumentative prose--philosophers' preferred form of expression--clearly say, and moreover prove, what literature, theatre and film illustrate, show and display? One possible answer which we will examine is that, while many philosophers recognize that there are intimate connections between what we believe, feel and do, philosophical argumentation by its very nature appeals to belief alone; narrative art, by contrast, can simultaneously engage our reason, emotions, imagination and will, thus resulting not only in deepening our understanding, but also in transformation of the self. To properly address a number of interrelated questions concerning philosophy in literature and film, and philosophical problems of meaning, interpretation and evaluation of narrative fiction, we will discuss both narrative works of art and theoretical approaches to their analysis. We will consider the ways in which narrative fiction presents and engages its audience in philosophical reflections on personal identity, nature of the self, interpersonal relationships, memory, time, human existence, freedom, and the meaning in life. The choice of literary works and films to be discussed will to some extent depend on students' interest. Most of the authors will come from this list, however: Sartre, de Beauvoir, Kafka, Dostoyevsky, Thomas Mann, Camus, Ecco, Kundera, Borges, Charlie Kaufman, Bergman, Tarkovsky, Resnais, Kurosawa, Bunuel, Kubrick, Godard, Visconti and Guillermo del Toro. The theoretical aspect of the course will involve close readings of selected articles in contemporary aesthetics, philosophy of literature and philosophy of film.

Class Format: tutorial

Requirements/Evaluation: weekly film screenings on Monday nights (7-10 pm); tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who can demonstrate informed interest in the course and who can commit the time that the course will require

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

COMP 296 (S) Chinese Film and Its Significant Others

Cross-listings: COMP 296 CHIN 226

Secondary Cross-listing

From the "wows" that the first short films invoked at a Shanghai teahouse in 1896 to the \$527 million (or 3.4 billion RMB) grossed at the box-office by a 3D fantasy in 2016, Chinese films have struck a responsive chord among domestic and foreign audiences. In this survey course, we will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Requirements/Evaluation: attendance and participation, short response papers (1- 2-pages each), one final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: current or prospective Chinese, Japanese, Asian Studies, and Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

COMP 297 (F) Present Past: The Politics of Memory in Contemporary Chinese Literatures and Films

Cross-listings: CHIN 237 COMP 297

Secondary Cross-listing

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "past" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, amnesia and nostalgia, and home and diaspora in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies.

Requirements/Evaluation: attendance and participation, five short papers, five short critiques of a partner's paper, one final project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: current or prospective Chinese, Asian Studies, and Comparative Literature majors

Expected Class Size: 10

COMP 298 (S) Introduction to French and Francophone Film

Cross-listings: COMP 298 RLFR 228

Secondary Cross-listing

In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Paczy, Peck, and Sissako. Conducted in French.

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 15

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

COMP 341 (F) Cinematic Representations of Work and Migration after the Wall

Cross-listings: WGSS 341 COMP 341

Primary Cross-listing

The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Águstin, Angela Melitopoulos, Lauren Berlant and Mieke Bal. Films will likely include: *Illegal*, *Working Man's Death*, *NordSud.com*, *Lichter* (Lights), *Code Unknown*, *The Flower Bridge*, *Occident*, *Since Otar Left*, *Losers and Winners*, *Whore's Glory*, *Le Havre* and *Time Out*.

Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper

Prerequisites: a 200-level ENGL or COMP course, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature and Women's Gender & Sexuality majors

CSCI 107 (S) Creating Games (QFR)

Cross-listings: ARTS 107 CSCI 107

Primary Cross-listing

The game is unique as the only broadly-successful interactive art form. Games communicate the experience of embodying a role by manipulating the player's own decisions, abstraction, and discrete planning. Those three elements are the essence of computation, which makes computer science theory integral to game design. Video games also co-opt programming and computer graphics as new tools for the modern artist. As a result, games are collaborative interdisciplinary constructs that use computation as a medium for creative expression. Students analyze and extend contemporary video and board games using the methodology of science and the language of the arts. They explore how computational concepts like recursion, state, and complexity apply to interactive experiences. They then synthesize new game elements using mathematics, programming and both digital and traditional art tools. Emphasis is on the theory of design in modern European board games. Topics covered include experiment design, gameplay balance, minimax, color theory, pathfinding, game theory, composition, and computability.

Class Format: lecture and studio

Requirements/Evaluation: participation, studio work, and quizzes

Prerequisites: none; no programming or game experience is assumed

Enrollment Limit: 24

Enrollment Preferences: first-year students

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: not open to students who completed a Computer Science course numbered 136 or above; does not count toward the Art Major

Materials/Lab Fee: \$25 lab fee charged to term bill

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: FMST Core Courses

Not offered current academic year

CSCI 371 (F) Computational Graphics (QFR)

PhotoShop, medical MRIs, video games, and movie special effects all programmatically create and manipulate digital images. This course teaches the fundamental techniques behind these applications. We begin by building a mathematical model of the interaction of light with surfaces, lenses, and an imager. We then study the data structures and processor architectures that allow us to efficiently evaluate that physical model.

Students will complete a series of programming assignments for both photorealistic image creation and real-time 3D rendering using C++, OpenGL, and GLSL. These assignments cumulate in a multi-week final project. Topics covered in the course include: projective geometry, ray tracing, bidirectional surface scattering functions, binary space partition trees, matting and compositing, shadow maps, cache management, and parallel processing on GPUs.

Class Format: lecture, with optics laboratory exercises

Requirements/Evaluation: evaluation based on assignments, projects, and exams

Prerequisites: CSCI 136 and CSCI 237 or permission of instructor

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

ENGL 213 (S) Making Radio

This course has two aims. The first is to teach the necessary skills (including interview technique, field recording, editing, and scoring) to make broadcast-worthy audio nonfiction. The second is to use this process to investigate fundamental aspects of narrative. How does a story build a contract with listeners? What's the role of the narrator? How can one appropriately speak for (and sometimes against) another person? This is not a course in journalism, but rather an experiment in documentary cinema for the ear. We'll do some reading in radio history and technique, and will listen to exemplary works (including episodes of *This American Life*, *RadioLab*, *Love & Radio*, and *Serial*), but most of our time--and this is a time-consuming course--will be spent making and critiquing each other's pieces. Students will produce five or six pieces total, at least two of which must develop out of interviews with strangers.

Requirements/Evaluation: five short audio pieces; attendance and active participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores; English majors; students with radio or studio art training

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

ENGL 234 (S) The Video Essay

While students today are subject to an unprecedented flood of moving images, few have had the chance to think critically about film and video. Fewer still have had the opportunity to think *with* the medium, exploiting the resources of film and video in their efforts to understand how they work on viewers. The Video Essay offers the chance to do that. After being introduced to the fundamentals of film analysis and trained in the use of Adobe Premiere Pro, students will spend the semester alternately making short video essays and commenting on the essays produced by their partners. Please note that this is primarily a course in film analysis: students will not shoot original material. No prior experience is required.

Class Format: we will meet as a group for three weeks, then break into groups of two with whom I will meet weekly; students will alternate between creating video essays on film topics, and writing commentaries on the essays of their partner

Requirements/Evaluation: four written exercises (1-2 pages); four video essays, increasing from two to six minutes; and four written commentaries on one's partner's video essays

Prerequisites: permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores; first-year students; English majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: course books

ENGL 286 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: ENGL 286 WGSS 283 AFR 283 AMST 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as *Looking for Langston* (Isaac Julien, 1989), *The Watermelon Woman* (Cheryl Dunye, 1996), *U People* (Olive Demetrius and Hanifah Walidah, 2009), *Tongues Untied* (Marlon Riggs, 1989) and *Litany for Survival* (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

Prerequisites: none

ENGL 287 (S) Bloody Vampires: From Fiction to Film and Fashion

Cross-listings: ENGL 287 COMP 246

Secondary Cross-listing

This course explores the figure of the vampire and seeks to explain the popular appeal such a fictive creature has been enjoying for over two centuries. What kind of fears and fantasies does it crystallize? And what kind of discourse about sexuality, death, and disease does it validate? What does its mere existence reveal about gender and ethnicity? We will examine the emergence of the vampire in gothic literature of the late 18th and 19th centuries, its omnipresence in cinema in the 20th century and investigate its resurgence in 21st-century pop culture. In order to gain a deeper understanding of the figure of the vampire, we will read poems by August Bürger and Goethe, the first vampire story by John Polidori, novels by Sheridan LeFanu and Bram Stoker, and contemporary vampire fiction by Anne Rice and Stephenie Meyer. We will watch the films *Nosferatu* by Murnau and Herzog, *Dracula* by Browning and Coppola, the *Dance of Vampires* by Polanski, *The Hunger* by Scott, *Blade* by Norrington, *Twilight* by Hardwicke, and *Daybreakers* by Spierig, as well as episodes of the TV series *Buffy the Vampire Slayer*, *True Blood*, and *The Vampire Diaries*. We will also discuss music video clips by Lady Gaga and Marilyn Manson, and fashion shows by Alexander McQueen, John Galliano and Vivienne Westwood.

Class Format: seminar

Requirements/Evaluation: three 5-page papers and a 10- to 12-page final rewrite

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students majoring or considering a major in language or literature

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

ENGL 367 (F) Documentary Fictions

Cross-listings: ARTH 367 ENGL 367

Primary Cross-listing

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's *The Act of Killing* (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors; Art and Comparative Literature majors; students with experience making video

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

LATS 203 (F) Chicana/o Film and Video

Cross-listings: ARTH 203 WGSS 203 LATS 203 AMST 205

Primary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: film screenings will be scheduled as a lab

Requirements/Evaluation: one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

LATS 231 (S) Approaches to Media Studies: Analyzing Mediated Difference

Cross-listings: LATS 231 AMST 231 WGSS 232

Primary Cross-listing

Media's influence in 21st century life is pervasive, and encompasses visual, sonic, and discursive formats. This course introduces students to a variety of qualitative approaches to the study of contemporary media. Simultaneously, we will explore questions of ethno-racial identity, gender, and sexuality. Structured around a series of hands-on exercises designed to provide experience in the areas of textual analysis, in-depth interviews, virtual ethnography and participant observation, this class will provide students with interdisciplinary training that enhances their understanding of everyday media and its interaction with multiple categories of identity. This course is a comparative Ethnic Media Studies class that encourages students to employ media as a lens for theorizing the intersections between ethno-racial identity, gender, and sexuality. We review materials focusing on a wide range of minoritarian communities.

Class Format: seminar

Requirements/Evaluation: participation; four 3- to 5-page papers; student papers will be based on hands-on exercises using various current Media Studies methods

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies and Women's Gender & Sexuality Studies majors by seniority

LATS 346 (F) Latinas/os and the Media: From Production to Consumption

Cross-listings: AMST 346 LATS 346

Primary Cross-listing

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Requirements/Evaluation: student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted

in stages

Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators or American Studies majors by seniority

MUS 149 (S) The Language of Film Music

Filmmakers have relied on music from the earliest days of silent movies (often accompanied by live musical performance) to our present age of slickly-produced YouTube videos. Along the way, trends have arisen (and have been artfully thwarted) in countless film scores, whether constructed from preexisting works or specially crafted by composers like Max Steiner, Duke Ellington, Bernard Herrmann, John Williams, James Horner, Micachu, or Björk. In this class, we will look at and listen to films from different periods and cultures, observing which techniques evolved, which have changed very little, and considering when an idea is borrowed and when it might actually be new. We will also discuss the impact this language has on the experience of the viewer, and how film music functions in the wider culture. Assignments will consist of listening/viewing, responding in writing, and re-interpreting film clips with music you will compose or borrow.

Class Format: discussion

Requirements/Evaluation: assignments, quizzes, midterm essay, final creative project; midterm and final will also involve viewing/listening

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: given to juniors and seniors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

MUS 276 (F) Music and the Internet

Since the release of Napster in 1999, the Internet's relationship with music has been sometimes elevating and sometimes adversarial. While it has granted listeners access to broad music libraries and musicians access to large audiences, the Internet has also exposed listeners to legal action, taxed artists with dwindling royalties, and disrupted and reshaped the recording and publishing industries. This course examines how the Internet has affected music at every level, from its creation to its distribution and consumption. Topics will include music written for online spaces, musical performances that take place online, music and online gaming, live music that refers to the Internet, the financial and philosophical background of music file formats, changing notions of musical ownership, censorship of music online, music's place in memes, and the user experience in (and attitudes toward music projected by) services like iTunes, YouTube, Spotify, and musically.

Class Format: discussion

Requirements/Evaluation: 4-page midterm paper, 8-page final paper, one presentation, two mid-semester creative projects

PHIL 294 (S) Philosophy and Narrative Fiction

Cross-listings: PHIL 294 COMP 294

Primary Cross-listing

What is it for a novel, a story, a play or a film to be a *philosophical* narrative? It is not enough for it merely to be about a character who happens to be a philosopher; nor is it just that philosophical positions are reviewed in the narrative, as in Gaarder's *Sophie's World*. Milan Kundera tried to answer this question by saying that a good philosophical novel does not serve philosophy but, on the contrary, tries to "get hold of a domain that (...) philosophy had kept for itself. There are metaphysical problems, problems of human existence, that philosophy has never known how to grasp in all their concreteness and that only the novel can seize." If Kundera is right, fictional narratives (such as novels) sometimes do the philosophical work that philosophy cannot do for itself. What kind of work is that, and how is it accomplished? Why can't argumentative prose--philosophers' preferred form of expression--clearly say, and moreover prove, what literature, theatre and film illustrate, show and display? One possible answer which we will examine is that, while many philosophers recognize that there are intimate connections between what we believe, feel and do, philosophical argumentation by its very nature appeals to belief alone; narrative art, by contrast, can simultaneously engage our reason, emotions, imagination and will, thus resulting not only in deepening our understanding, but also in transformation of the self. To properly address a number of interrelated questions concerning philosophy in literature and film, and philosophical problems of meaning, interpretation and evaluation of narrative fiction, we will discuss both narrative works of art and theoretical approaches to their analysis. We will consider the ways in which narrative fiction presents and engages its audience in philosophical reflections on personal identity, nature of the self, interpersonal relationships, memory, time, human existence, freedom, and the meaning in life. The choice of literary works and films to be discussed will to some extent depend on students' interest. Most of the authors will come from this list, however: Sartre, de Beauvoir, Kafka, Dostoyevsky, Thomas Mann, Camus, Ecco, Kundera, Borges, Charlie Kaufman, Bergman, Tarkovsky, Resnais, Kurosawa, Bunuel, Kubrick, Godard, Visconti and Guillermo del Toro. The theoretical aspect of the course will involve close readings of selected articles in contemporary aesthetics, philosophy of literature and philosophy of film.

Class Format: tutorial

Requirements/Evaluation: weekly film screenings on Monday nights (7-10 pm); tutorial attendance and participation; bi-weekly tutorial papers, each about 5 pages long (totaling 6 per student); bi-weekly oral responses to the paper of the tutorial partner

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who can demonstrate informed interest in the course and who can commit the time that the course will require

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

REL 229 (S) Reel Jesus: Reading the Christian Bible and Film in the U.S.A.

Cross-listings: AMST 229 REL 229

Primary Cross-listing

In this course we examine some of the ways that Christian biblical narratives have appeared in late twentieth-century and early twenty-first century Hollywood movies, looking in particular at films such as *The Matrix* (1999), *The Passion of the Christ* (2004), *Jesus Christ Superstar* (1973), *The Shawshank Redemption* (1994), *The Omen* (1976), *Children of Men* (2006), and *The Book of Eli* (2010). What are the overt and subtle ways that these films seek to interpret and employ biblical texts? Why do they draw upon the texts they do and read them as they read them? What can cinematic interpretations of biblical texts reveal to us about how these texts are used in broader U.S. culture, especially to crystallize and reflect certain political,

economic, ethnic, racial, sexual, and social parameters of U.S. cultures? How does an awareness of this scriptural dimension in a work of "popular culture" affect our interpretation of both the film and the scriptural text's meanings? How do varying interpretations of biblical texts help us to understand cinematic meaning? By assuming that we can read both biblical texts and films in multiple and contradictory ways, this class can use film as the occasion for interpreting, analyzing, and debating the meanings, cultural functions, and affective responses generated by biblical narratives in film. Finally, this course asks us to analyze the implications of ways in which we read texts and films. For this interdisciplinary course we will read selected biblical and extra-canonical texts, including selections from canonical and non-canonical gospels, the letters of Paul, and the book of Revelation, but our focus will be on the way that movies (and the people who make them and watch them) make meaning out of these biblical texts.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation based on participation, short writing exercises (1-pg response papers), one 3-pg analytical essay that will also be revised, a 6-pg synthetic midterm essay, and a final 10-pg review essay

Prerequisites: none

Enrollment Limit: 19

RLFR 206 (F) The Outsider in French & Francophone Film Adaptations of Literary Texts (DPE)

In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

Requirements/Evaluation: three response papers, one short essay on film adaptation, one video essay with a student partner

Prerequisites: students should have taken RLFR 105 or above, or placement test, or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Comparative Literature majors, Africana Studies concentrators, French majors and certificates

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on sexual identity race, class, gender) between cultural producers, in literary texts and their film adaptations.

Attributes: FMST Core Courses

RLFR 228 (S) Introduction to French and Francophone Film

Cross-listings: COMP 298 RLFR 228

Primary Cross-listing

In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière

brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Palcy, Peck, and Sissako. Conducted in French.

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 15

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

RLFR 261 (F) Haitian and French Caribbean Literatures and Films

Cross-listings: COMP 283 AFR 261 RLFR 261

Primary Cross-listing

Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and of Martinique and Guadeloupe as the "French" Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling "intimist" stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

Class Format: seminar

Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation

Prerequisites: French majors, French certificate, Africana and Comparative Literature students

SOC 212 (F) Understanding Social Media

Over just the last twenty years--beginning with Napster and MySpace and continuing through Facebook and Twitter, Snapchat and Instagram--the rise of social media has had a profound influence on the way we live. It has given a new rhythm to our daily routines, shaped the way we inform ourselves and converse with others, and transformed media and entertainment, politics and public discourse, and many other aspects of culture. This seminar course will undertake a broad and critical examination of social media, looking at it from historical, economic, legal, social, and phenomenological perspectives. The topics addressed will include social media's effects on self-image and self-formation, its influence on protest movements and political campaigns, its use as a conduit for news and propaganda, and the way commercial interests and technical characteristics have shaped its design and use. Through pertinent readings and lively discussions, and drawing on students' own experiences with social media, the course will illuminate social media's benefits and drawbacks while providing a foundation for thinking about possible legal, regulatory, and personal responses to this far-reaching and still unfolding social phenomenon.

Requirements/Evaluation: attendance and participation, two 5-page writing assignments, final exam

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

WGSS 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: ENGL 286 WGSS 283 AFR 283 AMST 283

Primary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

WGSS 325 (F) Television, Social Media, and Black Women 'Unscripted'

Cross-listings: WGSS 325 AFR 325

Secondary Cross-listing

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Requirements/Evaluation: class participation, response papers, one 10 page paper, and a formal class presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: juniors and seniors

Expected Class Size: 13

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

WGSS 341 (F) Cinematic Representations of Work and Migration after the Wall

Cross-listings: WGSS 341 COMP 341

Secondary Cross-listing

The increased flow of migrants from East to West and from South to North into the center of Europe and the simultaneous tightening of restrictions against illegal migration have brought to the forefront issues of labour, gender, and precarity, citizenship and cultural belonging. We will analyze feature films and documentaries that trace the changing face of work and migration, with an emphasis on flows from countries the former east bloc and Africa to Europe. We will discuss negative effects of globalized capitalism, such as the monetization of feeling and personal relations (Harvey), the concept of intensification and the disembodied state (Nealon and Foucault), but also ask what new opportunities might arise, and for which groups. We will study the depiction of manual labour, illegal migration, women as caregivers, Internet marriage, sex work, and the migrant as a raced and othered body. Theory by Dina Iordanova and William Brown, Ewa Mazierska, Sandro Mezzadra and Brett Neilson, Jeffrey Nealon, Lara Águstin, Angela Melitopoulos, Lauren Berlant and Mieke Bal. Films will likely include: *Illegal*, *Working Man's Death*, *NordSud.com*, *Lichter (Lights)*, *Code Unknown*, *The Flower Bridge*, *Occident*, *Since Otar Left*, *Losers and Winners*, *Whore's Glory*, *Le Havre* and *Time Out*.

Requirements/Evaluation: active class participation, two short papers, an oral presentation, and a final paper

Prerequisites: a 200-level ENGL or COMP course, or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature and Women's Gender & Sexuality majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

WGSS 346 (S) Queer in the City (DPE)

Cross-listings: AFR 337 WGSS 346 AMST 337

Primary Cross-listing

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: facilitated class discussion; weekly critical response papers; creative projects

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: WGSS majors; students may be asked to write a short statement of interest in the event of over-enrollment

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

AMST 241 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: a short statement of interest will be solicited

ARTH 221 (F) History of Photography

This lecture course will examine the history of photography from its beginnings in the 1830s to the present, from the first grainy black and white images to the work of contemporary artists using cutting-edge photographic technologies. We will examine photographs used for documentary, scientific, and aesthetic purposes, and we will trace the medium's emergence and acceptance as a fine art. We will also explore photography's physical and conceptual characteristics as a medium, paying particular attention to its uniquely intimate and frequently contested relationship to "the real." By the end of the course, students will have a broad understanding of photography as a unique medium within the history of art and knowledge of the theoretical frameworks that developed alongside that history.

Requirements/Evaluation: two short papers, mid-term, and final exam

ASST 271 (F) Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture

Cross-listings: COMP 279 REL 271 WGSS 279 ASST 271

Secondary Cross-listing

"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yogie) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviancies from "the normal" as it is constructed in a given culture and time period--they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation--including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

Class Format: seminar

Requirements/Evaluation: attendance and participation, weekly responses, final 15- to 18-page research paper

Prerequisites: none

COMP 111 (F) The Nature of Narrative (WS)

Cross-listings: COMP 111 ENGL 120

Primary Cross-listing

This course focuses on the nature and function of narrative using a wide range of texts from different periods, traditions and genres. We will analyze the ways in which works of fiction communicate their concerns; in other words: how do they say what they say? And why does "how" matter as much as, if not more than, "what?" We will also look at film, articles, and other relevant texts, accompanying the readings with a few pertinent theoretical texts. The authors we will study may include Homer, Cervantes, Kleist, Kafka, Zweig, García Márquez, Rankine, and Farhadi. All readings in English, although those with foreign language competency are invited to make comparisons with the original where possible.

Requirements/Evaluation: active and meaningful class participation; two shorter papers, longer final paper including a draft workshopped in tutorial format

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students considering a major in Comparative Literature and/or who have studied a foreign language

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 271 (S) Phantasmagoria, Madness, and the Absurd in Russian Literature and Film

Cross-listings: RUSS 232 COMP 271

Secondary Cross-listing

In one of Nikolai Gogol's most famous stories, a man wakes up one day to find that his own nose has left his face and taken on a life of its own. This situation, which we might label bizarre or absurd, just as easily shows how reality often fails to meet our expectations and even suggests that the story's leading character might have gone mad. But what then is insanity? Likewise, one of Dostoevsky's socially marginal characters contemplates the fact that only sick people see ghosts, which, in his opinion, "only proves that ghosts cannot appear to anyone but sick people, not that they themselves do not exist." This course aims to analyze the rich tradition, typified by Gogol and Dostoevsky, of the absurd, the fantastic, and madness in Russian literature and film of the 19th-21st centuries. Addressing the aesthetic, historical, and political circumstances that nurtured this tradition in

Russian literature and cinema, our course material will explore new dimensions of reality, point out the many paradoxes and absurdities of human existence, and question our perceptions, as well as the assumption that we are sane. Close analysis of literary and cinematic texts will lead us to a broader discussion of the relationship between reality and representation, as well as the notions of the absurd and madness. Authors/directors will include Alexander Pushkin, Nikolai Gogol, Fyodor Dostoevsky, Anton Chekhov, Mikhail Bulgakov, Lyudmila Petrushevskaya, Andrey Tarkovsky, and Kira Muratova, among others. All readings will be in English, and all films will have English subtitles.

Requirements/Evaluation: class attendance and participation; two analytical papers (3-5 pages); leading class discussion; a creative assignment; an oral presentation; a final paper (6 pages)

CSCI 109 (F) The Art and Science of Computer Graphics (QFR)

This course provides an opportunity to develop an understanding of the theoretical and practical concepts underlying 2- and 3-dimensional computer graphics. The course will emphasize hands-on studio/laboratory experience, with student work focused around completing a series of projects. Students will experiment with modeling, color, lighting, perspective, and simple animation. As the course progresses, computer programming will be used to control the complexity of the models and their interactions. Lectures, augmented by guided viewings of state-of-the-art computer generated and enhanced images and animations, will be used to deepen understanding of the studio experience.

Class Format: lecture/laboratory

Requirements/Evaluation: evaluation will be based on progress in project work and two examinations

Prerequisites: this course is not open to students who have successfully completed a CSCI course numbered 136 or above

Enrollment Limit: 36

Enrollment Preferences: first-year students and sophomores who have not previously taken a computer science course

ENGL 214 (S) Writing for Stage and Screen

Cross-listings: ENGL 214 THEA 214

Secondary Cross-listing

This studio/workshop course is designed for students interested in a semester-long immersion in the practice of dramatic writing for theater, film, television and audio. Students should expect to write most days. Our focus will be on the fundamentals of story, and the cultivation of each writer's individual voice. In addition to reading existing dramatic texts of various genres and forms, and completing weekly prompts and exercises exploring character, dialogue, structure, theme, conflict and world building, students will work toward a longer final project. Students will present their own work regularly, and respond to each other's work. The course will culminate in a staged reading of excerpts for the campus community.

Requirements/Evaluation: a daily journal; weekly writing exercises; peer responses; a ten-minute piece; a final 20-30 minute piece; attendance and class participation

Prerequisites: students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

Enrollment Limit: 18

Enrollment Preferences: Theatre and English majors; Comparative Literature majors

Expected Class Size: 14

Grading: yes pass/fail option, no fifth course option

ENGL 368 (S) Ireland in Film

In 1909, James Joyce was briefly the manager of one of Dublin's first cinemas. The medium of film has long attracted Irish writers: as a means to explore and represent the country's political and cultural history, to interrogate the very notion of "Irishness", and to promote their work to a wider audience. In turn, Ireland has long provided a rich subject for Hollywood fantasy, often being portrayed by non-Irish directors as either a mythic space for emerald-green romanticism, or, more darkly, as a place of political terror and enduring ideological rivalries. In this course we will view and discuss major films from the canon of Irish cinema, to assess the country's newly ascendant film movement. We will consider the impact of commercial considerations, and the powerful influence of British and American films (and especially those offering competing representations of Ireland), on Irish filmmakers. We will also read the literary texts on which some films were based, so as to weigh the strengths and limitations of the medium as a resource for writers who initially worked only in print. This course will introduce participants to the technical vocabulary of film art, as well as to major developments in modern Irish history and culture. Films to be viewed will likely include: *Man of Aran*, *The Informer*, *The Quiet Man*, *Eat the Peach*, *In the Name of the Father*, *Butcher Boy*, *Intermission*, *Into the West*, *The Field*, *The Crying Game*, *December Bride*, *The Commitments*, *Michael Collins*, *Ondine*, *Six Shooter*, *In Bruges* and *The Guard*; and we will also assess one or more short independent films such as *Budawanny* and *Adam and Paul*. Special attention will be given to the work of Neil Jordan, Jim Sheridan, Terry George, and Martin McDonagh.

Requirements/Evaluation: two long papers, four 1- to 2-page shorter responses, class participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam; not open to first-year students

Enrollment Limit: 19

Enrollment Preferences: English majors

ENVI 368 (F) Technology and Modern Society

Cross-listings: SOC 368 ENVI 368

Secondary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

LATS 241 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

LATS 346 (F) Latinas/os and the Media: From Production to Consumption

Cross-listings: AMST 346 LATS 346

Primary Cross-listing

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Requirements/Evaluation: student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators or American Studies majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

REL 271 (F) Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture

Cross-listings: COMP 279 REL 271 WGSS 279 ASST 271

Primary Cross-listing

"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yogyoe) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviancies from "the normal" as it is constructed in a given culture and time period--they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation--including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

Class Format: seminar

Requirements/Evaluation: attendance and participation, weekly responses, final 15- to 18-page research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: REL, ASST, WGSS, and COMP majors will be given preference

RLFR 108 (S) Voyages Francophones: Alienation and Self-Discovery in Contemporary Literature and Film

This is an advanced course in French language designed to help you improve your speaking, listening comprehension, reading, and writing, through the dynamic study of literary texts and films focusing on the themes of alienation and self-discovery in the late twentieth- and early twenty-first-century Francophone world. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French-language fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French language and cinema. As a focus for improving your French, we will examine a broad range of texts and films on the themes of alienation and self-discovery-especially in the context of immigration and coming of age-as they are represented in texts from France, Québec, and the Caribbean.

Requirements/Evaluation: class participation, grammar exercises, group discussion leading, two short papers, and final project

Prerequisites: exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: French Majors and certificate students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

RLSP 280 (S) From Roma to Yalhalhj: Race and Identity Politics Through Contemporary Mexican Cultural Production (WS)

In 2017, the National Institute of Statistics in Mexico (INEGI) used for the first time a color palette to measure individuals' skin tone. The study showed that "Mexicans who were classified by the interviewers as having darker skin tones tend to have lower levels of education and are worse off economically than their lighter-skinned counterparts" (Zizumbo and Flores, 2017). Raising controversy among those who would like to think of Mexico as a post-racial nation and those who recognize social inequality and discrimination on the basis of skin tone, the debate resonates in the way Mexican citizenship and cultural identity are both represented in mainstream media, even with the intention of showing diversity. The prevalent whitewashing dominating mass media in Mexico extends from advertisements to films, promoting an image of wealth and education intrinsically related to not only skin tone but also with race/ethnic positionality and gender. This course will explore the representation of these variables and their intersections through the analysis of photography, films, novels, paintings, reality shows, telenovelas, advertising campaigns, and music videos. In addition, we will take into account questions of representation, agency, and visibility addressed by cultural producers from pueblos originarios who do not consider themselves Mexican citizens. This class will be conducted in Spanish.

Requirements/Evaluation: essays, oral presentation, participation

Prerequisites: RLSP 105, placement exam results, permission from the instructor or the Department Chair

Enrollment Limit: 19

Enrollment Preferences: Spanish major

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Weekly short (less than 1000 words) papers, alternatively letter-graded and graded P/F; at least three letter-graded papers will be revisions of a P/F paper; and final 5 pages long paper, which is a revision and expansion of the last weekly paper.

RUSS 232 (S) Phantasmagoria, Madness, and the Absurd in Russian Literature and Film

Cross-listings: RUSS 232 COMP 271

Primary Cross-listing

In one of Nikolai Gogol's most famous stories, a man wakes up one day to find that his own nose has left his face and taken on a life of its own. This situation, which we might label bizarre or absurd, just as easily shows how reality often fails to meet our expectations and even suggests that the story's leading character might have gone mad. But what then is insanity? Likewise, one of Dostoevsky's socially marginal characters contemplates the fact that only sick people see ghosts, which, in his opinion, "only proves that ghosts cannot appear to anyone but sick people, not that they themselves do not exist." This course aims to analyze the rich tradition, typified by Gogol and Dostoevsky, of the absurd, the fantastic, and madness in Russian literature and film of the 19th-21st centuries. Addressing the aesthetic, historical, and political circumstances that nurtured this tradition in Russian literature and cinema, our course material will explore new dimensions of reality, point out the many paradoxes and absurdities of human existence, and question our perceptions, as well as the assumption that we are sane. Close analysis of literary and cinematic texts will lead us to a broader discussion of the relationship between reality and representation, as well as the notions of the absurd and madness. Authors/directors will include Alexander Pushkin, Nikolai Gogol, Fyodor Dostoevsky, Anton Chekhov, Mikhail Bulgakov, Lyudmila Petrushevskaya, Andrey Tarkovsky, and Kira Muratova, among others. All readings will be in English, and all films will have English subtitles.

Requirements/Evaluation: class attendance and participation; two analytical papers (3-5 pages); leading class discussion; a creative assignment; an oral presentation; a final paper (6 pages)

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

SOC 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237 ARTH 237 SOC 236 AMST 236

Primary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective

representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

SOC 368 (F) Technology and Modern Society

Cross-listings: SOC 368 ENVI 368

Primary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to

improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

THEA 214 (S) Writing for Stage and Screen

Cross-listings: ENGL 214 THEA 214

Primary Cross-listing

This studio/workshop course is designed for students interested in a semester-long immersion in the practice of dramatic writing for theater, film, television and audio. Students should expect to write most days. Our focus will be on the fundamentals of story, and the cultivation of each writer's individual voice. In addition to reading existing dramatic texts of various genres and forms, and completing weekly prompts and exercises exploring character, dialogue, structure, theme, conflict and world building, students will work toward a longer final project. Students will present their own work regularly, and respond to each other's work. The course will culminate in a staged reading of excerpts for the campus community.

Requirements/Evaluation: a daily journal; weekly writing exercises; peer responses; a ten-minute piece; a final 20-30 minute piece; attendance and class participation

Prerequisites: students are asked to submit a brief statement describing their interest and any past experience (if applicable) in writing for the stage and/or screen

MAJOR—French Language and Literature

The French major seeks to provide training in literary and cultural analysis and linguistic expression through the study of selected texts from the French-speaking world. Emphasis is placed on the changes in form and subject matter from the early modern period to the contemporary era.

The major consists of nine courses. One of these courses must be the 400-level senior seminar during the student's final year at the College.

Students entering the major program at the 200-level may, with the permission of the Department, choose as part of their major program, one course in Art History, History, Philosophy, Comparative Literature or other subjects that relate to and broaden their study of French. Students entering the major program at a very advanced level may, in some cases and with the permission of the Department, include two such courses in their major program.

Working with the major advisor, the student will formulate a curricular plan that will ensure balance and coherence in courses taken. Such balance and coherence will be based on the above areas of literary and cultural investigation. Prospective majors should discuss their program with the major advisor by the end of their sophomore year. This is especially imperative for students who are planning to spend a part or all of their junior year in France.

Inasmuch as all courses in French assume the active participation of each student in discussions conducted in the foreign language, regular attendance at class meetings is expected.

MAJOR—French Studies

The major in French Studies is an interdisciplinary program that provides students with the opportunity to acquire skills and knowledge embracing the cultural, historical, social, and political heritage of France and the Francophone world. The program allows for an individualized course of study involving work in several departments and the opportunity to study abroad.

Students electing the French Studies major should register with the French Studies faculty advisor during their sophomore year. At that time, they should submit a feasibility plan that articulates their projected program.

The French Studies major consists of ten courses satisfying the following requirements:

- at least five RLFR courses in French language, literature, film, or culture;
- the RLFR senior seminar during the student's final year at the College;

Electives: The remaining courses needed to complete the major must be drawn from at least three different departments and relate primarily to an aspect of the cultures, histories, societies, and politics of France and the Francophone world. These courses will be selected in consultation with members of the Department of Romance Languages. Appropriate electives might include:

AFR 360 Political Thought Frantz Fanon

ARTH 254 Manet to Matisse

HIST 390 Haitian and French Revolutions

RLFR 101-450 All courses in French and Francophone language, literature, film, and culture

THE DEGREE WITH HONORS IN FRENCH

Students majoring in French may apply to be admitted to the Honors Program in French upon demonstrating the following: (1) fluency of spoken and written language; (2) potential for successful independent research, as demonstrated by strong performance in advanced-level coursework; (3) interest and motivation; and (4) overall quality and feasibility of the proposal.

By May 15th of their junior year, candidates will have found a thesis advisor, and given the Department a three- to five-page proposal and a preliminary bibliography. (In some cases, and upon consultation with the Department, candidates will have the option to choose a second reader in addition to their primary advisor; for example, when the thesis is interdisciplinary enough in nature that it requires the expertise of an additional reader). This proposal will be discussed by the Department; by June 1st, the candidate will be informed whether they can proceed with the thesis, and if so, what changes need to be made to the focus and scope of the project. The summer before the senior year will be spent reading, researching (in relevant archives or with field work), and compiling a more detailed bibliography.

Upon their return to Williams, candidates will devote to their theses two semesters of independent study (beyond the nine courses required for the major) and the winter study period of their senior year (493-W31-494). The thesis will be written in French and will usually not be shorter than fifty pages. By the end of the Fall semester, students will normally have a clear outline of the project, have done substantial research, and produced the draft of at least the first half of the project. During January this draft will be suitably rewritten and edited with a view to a final version, while the candidates will also begin work on remaining chapters.

Candidates will submit what they have written to the department on the last day of Winter Study.

On the Tuesday of the first week of the spring semester candidates will make a presentation of the project at a departmental colloquium in French. The thesis will be promptly discussed and evaluated to determine whether or not the student should continue in the honors program. The second semester of independent thesis work will be spent writing more chapters, as well as revising, rewriting, and polishing the project where necessary. The completed thesis in its final form will be due on April 25th. At the end of the Spring term, the student will present and defend the final project before members of the Department and others by invitation. The grade will be awarded once members of the Department have consulted after the defense.

THE CERTIFICATE IN FRENCH

The Certificate in French Language and Cultures consists of a sequence of seven courses for which the student must earn a cumulative grade average of B or higher.

For students with no prior study of French, the course sequence will consist of RLFR 101-102, RLFR 103, RLFR 104, and three additional courses, with at least one of these at the 200-level or higher taken at Williams. For students starting the sequence at RLFR 103 or higher, six additional courses must be taken, including at least three French courses at the 200-level or higher. For these students starting at French 103 or higher, two electives may be taken in other departments: one elective should be in French or Francophone culture (art, literature, theatre, music) and the other in French or Francophone civilization (history, political science, philosophy).

PLACEMENT

A placement test in French is administered at Williams at the opening of the fall semester. Incoming first-year students who register for any French course above the 101 level must take this test, regardless of their previous preparation.

STUDY ABROAD

We encourage all students of French to complement their courses at Williams with the life-changing experience of studying abroad in a Francophone country. In particular, French majors and certificate students are strongly advised to complete part of the requirements for the major or certificate by studying abroad, for either a semester or a year. Most study abroad programs require applicants to have completed a fifth-semester French course in college (French 105) or higher before they go abroad. Credit for up to a total of 4 courses towards the major or certificate can be granted for either a semester or a full year abroad, at the discretion of the Romance Languages Department. Students who are planning to get credit for their study abroad courses should meet with a French faculty member in advance, to review the courses they intend to take abroad. Normally, only courses that focus on French language or Francophone literature, history, politics, art, and culture may be counted towards the major or certificate. The final assignment of course credit will be authorized in consultation with the student's French advisor, once the student has returned to Williams.

Such credits can only be determined by review of course format, course materials, and evidence of satisfactory academic performance; students should thus provide not only their study abroad transcript, but retain course materials (including syllabi, papers, exams, and other projects) for potential review back at Williams. While students can gain credit for 100-, 200-, and 300-level courses during their time abroad, the 400-level senior seminar must be taken during the senior year at Williams. Early planning is essential: Students interested in studying abroad are strongly urged to attend the yearly Francophone Study Away Information Session (held each October) during their first year or sophomore year. Students will receive credit for only those study abroad programs recommended and approved by the Dean of Study Away and the Romance Languages Department. Williams has long-term affiliations with the following programs: Hamilton College (Paris), Sweet Briar College (Paris), CUPA (Paris), Middlebury College (Paris), Wellesley College (Aix-en-Provence), Boston University (Grenoble), and both SIT and CIEE (in Morocco, Senegal, and Madagascar). For more on all approved study-abroad programs, see the webpages for the French program (french.williams.edu) and Study Away (study-away.williams.edu/programs). Finally, the Department does not administer proficiency exams (for study abroad, fellowships, or job applications) to students who have not completed a French course at Williams; and most study abroad programs will not accept students who have not taken any college courses in French (at Williams) prior to their application. Students should thus plan well ahead (as early as their first year and sophomore year) to take appropriate courses at Williams, before applying for and taking part in study abroad programs in the Francophone world.

RLFR 101 (F) Introduction to French Language and Francophone Cultures

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, and active engagement with music, video, and film, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. *Conducted in French.*

Class Format: class meets five hours a week

Requirements/Evaluation: active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams

Prerequisites: none; for students who have never formally studied French; students who have previously studied French must take the French Placement Test during First Days

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to first-year and second-year students and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: students registered for RLFR 101-102 are required to attend and pass the sustaining program during the Winter Study period; credit granted only if both semesters (RLFR 101 and 102) are taken

Distributions: (D1)

Fall 2019

LEC Section: 01 M-F 9:00 am - 9:50 am Brian Martin

RLFR 102 (S) Introduction to French Language and Francophone Cultures

This year-long course offers a complete introduction to the French language and is designed to help you become fully conversant in French by focusing on four fundamental language skills: listening, speaking, reading, and writing. Through daily practice, class activities, interactive discussion, listening exercises, written work, reading assignments, video-observations, and film-viewing, you will quickly gain confidence and increasing facility with your abilities to speak and understand both spoken and written French. In addition, our study of grammar, vocabulary, and communication skills will be organized around an engaging and dynamic introduction to a variety of French-speaking cultures around the world, from France and Belgium, to Québec and Martinique, to Sénégal and Morocco. *Conducted in French.*

Class Format: the class meets five hours a week

Requirements/Evaluation: evaluation in both semester-long courses will be based on active class participation, workbook exercises and compositions, chapter tests, midterms, and final exams

Prerequisites: none; for students who have taken less than two years of high school French

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students registered for RLFR 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (RLFR 101 and 102) are taken

Distributions: (D1)

RLFR 103 (F) Intermediate Studies in French Language and Francophone Cultures

As a continuation of French 101-102, this dynamic first-semester intermediate course is designed to help you improve your French, while at the same time learning more about French and Francophone cultures, politics, literature, and film. Through the active study and daily practice of listening, speaking, reading, and writing in French, you will: continue developing your communication skills and learn to express your opinions and ideas; improve your command of spoken and written French through a revision of important grammatical structures; strengthen your reading and writing skills in order to prepare you for further study of literary texts; and develop an increased vocabulary and cultural appreciation of French-speaking cultures around the world.

Class Format: class meets five days per week

Requirements/Evaluation: active participation, workbook homework, chapter tests, short papers, midterm exam, and final exam

Prerequisites: RLFR 101-102, or by Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and French certificate students, and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: students should seriously consider taking RLFR 103 AND 105 if they intend to enroll in more advanced French literature courses at the 200-level and above, or if they anticipate studying in France or a Francophone country during their junior year

Distributions: (D1)

RLFR 104 (S) Intermediate French II: Advanced Intermediate Studies in French

As a continuation of French 103, this course will help students gain greater fluency in French, through an exploration of French and Francophone literature, film, media, politics, and culture. With a focus on listening, speaking, reading, and writing, students will review advanced grammar expand their vocabulary, gain greater confidence, and both discuss and debate central questions in the social, political, and cultural landscape of French-speaking communities in Europe, Africa, and the Caribbean.

Class Format: class meets twice a week with the professor (for 75 minutes each), plus a required 30-minute conversation session with the French TA, at a time to be mutually determined by the students and TA

Requirements/Evaluation: active participation, workbook homework, chapter tests, short papers, midterm exam, and final exam

Prerequisites: RLFR 103, or by placement test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and French certificate students, and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: after successfully completing RLFR 104, students may register for RLFR 201

RLFR 105 (F) Advanced French: Advanced Studies in French Language and Francophone Culture

In this course, we will concentrate on polishing your oral and written expression and on expanding your vocabulary, while focusing on the analysis and discussion of French and Francophone cultures and the concepts that define them. In addition to helping you improve your speaking, listening comprehension, reading, and writing, as well as reviewing advanced grammar, we will explore key myths and practices linked to municipal, regional, and national identities in France and the Francophone world, and seek to understand the history of contemporary debates surrounding these identities. Topics of discussion will include: Which cultural practices represent what it means to be French? How do certain regions and cities derive a sense of identity distinct from that of the nation? How do overseas departments and territories inflect Frenchness by means of their own histories and geographies? Short literary, theoretical, and historical texts, along with films, music, photography, press articles, and websites, will inform our discussions. Class meets three times a week with the professor (for 50 minutes each), plus a required 30-minute conversation session with the French TA each week, at a time to be mutually determined by the students and TA.

Class Format: weekly conference with TA

Requirements/Evaluation: class participation, grammar exercises, short response papers, essays, presentations, final project

Prerequisites: RLFR 104, placement exam, or by permission of instructor

Enrollment Limit: 20-25

Enrollment Preferences: French majors and certificate students

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

RLFR 106 (S) Advanced French: Danger and Desire in French Film and Fiction

This is an advanced course in French language designed to help you improve your speaking, comprehension, reading, and writing, through the dynamic study of short literary texts and films focusing on danger and desire in nineteenth-, twentieth-, and twenty-first-century France. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French literature and cinema. As a focus for improving your French, we will examine a broad range of texts and films on danger and desire in France from 1830 to 2010, with an emphasis on passion and ambition, infatuation and seduction, betrayal and vengeance, courage and cruelty, warfare and resistance. Works to include nineteenth-century texts by Chateaubriand, Duras, Balzac, Mérimée, Flaubert, Maupassant, Zola; twentieth-century texts by Colette, Camus, Sartre, Beauvoir, Duras, Ernaux, Guibert, Quint, Lindon, Vilrouge; and twenty-first-century films by Caron, Ozon, Ducastel, Martineau, Dercourt, and Becker. Conducted in French.

Requirements/Evaluation: active class participation, grammar exercises, two short papers, midterm, and final paper

Prerequisites: exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

RLFR 108 (S) Voyages Francophones: Alienation and Self-Discovery in Contemporary Literature and Film

This is an advanced course in French language designed to help you improve your speaking, listening comprehension, reading, and writing, through the dynamic study of literary texts and films focusing on the themes of alienation and self-discovery in the late twentieth- and early twenty-first-century Francophone world. Through active discussion and debate, textual and cinematic analysis, grammatical review, and careful writing and revision, you will improve your command of spoken and written French, strengthen your ability to express complex ideas, expand your vocabulary, and deepen your understanding of French-language fiction, film, and culture. This is an ideal course to prepare for study abroad or for more advanced coursework in French language and cinema. As a focus for improving your French, we will examine a broad range of texts and films on the themes of alienation and self-discovery-especially in the context of immigration and coming of age-as they are represented in texts from France, Québec, and the Caribbean.

Requirements/Evaluation: class participation, grammar exercises, group discussion leading, two short papers, and final project

Prerequisites: exceptional performance in RLFR 104; successful performance in RLFR 105; or by placement test; or permission of the instructor

Enrollment Limit: 20

RLFR 202 (F) War and Resistance: Two Centuries of War Literature in France (1804-2016)

Cross-listings: WGSS 201 RLFR 202

Primary Cross-listing

In 1883, Maupassant called on his fellow war veterans and writers to join him in speaking out against warfare and violence, crying "Let us dishonor war!" From the Gallic Wars against Caesar (during the first century BC) to the recent terrorist attacks in France (at the opening of the twenty-first century), the French literary tradition is rich in texts that bear witness to war and speak out against its monstrous inhumanity. While war literature in France can be traced back to ancient and medieval texts on Vercingétorix, Charlemagne, William the Conqueror, and Joan of Arc, this course will focus specifically on literary representations of war during the nineteenth- and twentieth-centuries, from the Napoleonic Wars, to the First and Second World Wars, to the Algerian and Cold Wars, and the "War on Terror." Discussions will examine the impact of war on soldiers and civilians, patriotism and pacifism, history and memory; the implications of war as invasion and conquest, occupation and resistance, victory and defeat; the relationship of war to gender, sexuality, and ethnicity; and the role of war in colonialism and genocide. Readings to include novels, short stories, and poems by Balzac, Stendhal, Hugo, Rimbaud, Daudet, Maupassant, Zola, Cocteau, Wiesel, Duras, Camus, and Fanon. Films to include works by Resnais, Renoir, Carion, Jeunet, Malle, Angelo, Pontecorvo, and Duras. *Conducted in French.*

Requirements/Evaluation: active class participation, midterm exam, and two to three papers

Prerequisites: exceptional performance in RLFR 105; successful performance in RLFR 106 or 107; or by French placement exam; or by permission of instructor

Enrollment Limit: 20

Cross-listings: AFR 204 RLFR 203 COMP 282

Primary Cross-listing

What is the Francophone world comprised of? Who speaks French today and why? What does the idea of *Francophonie* really mean? Is this term really relevant? Why, how, and by whom is this idea being criticized? How does the *littérature-monde* manifesto fit within these interrogations? Is the French-speaking world merely a linguistic community or is it also a political, cultural, and economic project? Last but not least, why is the idea of *Francophonie* so important for France? We will answer these questions through the lens of literary and cinematic texts from Québec, Sénégal, Vietnam, France (*l'hexagone*), and Haiti among others.

RLFR 205 (S) On Strike: Workers and Revolutions in the French Republic

The recent "yellow vests" (*gilets jaunes*) protests in France have attracted international attention to the experiences of French workers. Yet these protests are only the latest example in a series of workers' movements that have shaped French identity. From the revolutions of 1830 and 1848, to the Popular Front of the 1930s, to the general strike that fueled the events of May 1968, workers have played a significant role in determining France's sociocultural values and political orientation. In this course, we will study representations of workers in literary and filmic texts dating from the late nineteenth century to the present. We will consider how depictions of the worker have evolved amid changing sociocultural conditions in France: for instance, the arrival of immigrants from such countries as Spain, Italy, and Portugal, and later from the Maghreb; the entry of women into the workforce; the disappearance of the rural farm worker, or *paysan*; the creation of a nuclear power grid; and deindustrialization. Finally, we will examine how the memory of workers is preserved in twenty-first-century France. *Conducted in French.*

Requirements/Evaluation: class participation, reaction papers, group discussion leading, and a final project

RLFR 206 (F) The Outsider in French & Francophone Film Adaptations of Literary Texts (DPE)

In this course students will examine the figure of the outsider (queer, black, woman, intruder, loner) in several French and Francophone literary texts and their film adaptations and will explore questions such as: how are such outsiders translated onto the screen? To what extent does outsider status help maintain, challenge, or reveal hegemonic discourse? In what ways do non-Western and Western filmmakers (re)cast power and privilege through the figure of the outsider in their film adaptations (of Western canonical texts)? Students will read original French and Francophone literary texts and apply theories of film adaptation to their analyses.

Requirements/Evaluation: three response papers, one short essay on film adaptation, one video essay with a student partner

Prerequisites: students should have taken RLFR 105 or above, or placement test, or by permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Comparative Literature majors, Africana Studies concentrators, French majors and certificates

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it focuses via the figure of the outsider on power dynamics (based on sexual identity race, class, gender) between cultural producers, in literary texts and their film adaptations.

RLFR 208 (F) Queens, Crusaders and Cannibals: Gender, Race and Religion in Medieval and Renaissance France

The intersection of gender, race, and religion is at the heart of contemporary political and social debates. How to build a nation and how to live together were also key questions for Medieval and Renaissance writers. In this introductory course in Early Modern Literature, we will study how literary works from the 11th to the 16th centuries represented conflicting debates on gender, race, and religion, from the Crusades opposing Christians and Muslims, to the Wars of Religion opposing Catholics and Protestants. We will explore how these concepts were intertwined in courtly love poems and chivalric novels in Europe, and how they were redefined in humanist writings and travel narratives to the Americas. Through an investigation of epic poems, allegories, tales, sonnets, novels, travel narratives, and essays by Marie de France, Christine de Pisan, Pierre de Ronsard, Louise Labé, François Rabelais, Michel de Montaigne and Marguerite de Valois, students will compare cultural, political, and ideological debates in Early Modern France with 21st-century questions on racism, sexism and discrimination.

Requirements/Evaluation: active participation, weekly written responses, midterm exam, and final project

Prerequisites: exceptional performance in RLFR 105, strong performance in RLFR 106, or by Placement Test, or permission of instructor

RLFR 210 (F) Scientific Selves: Medicine, Technology, and Identity in Early Modern France

Cross-listings: RLFR 210 STS 211

Primary Cross-listing

The early modern period has long been associated with scientific discovery and shifting ideology in France. From Copernicus on, thinkers such as René Descartes, Blaise Pascal, and Antoine Lavoisier helped advance the Scientific Revolution, which led to medical and technological breakthroughs, as well as important advances in our understanding of the world and our solar system. This course examines the role that France played in pursuing such discoveries, as well as the ways newfound knowledge impacted notions of belonging and alterity. How did the Scientific Revolution and French colonization lead to the creation of social, cultural, and medical "others"? How did scientific discourse permeate verbal and visual expression and depict those who did not fit into normative paradigms of gender, sexuality, ability, ethnicity, belief, and culture? What avenues for self-expression and definition were available to those whom society excluded? What parallels can we see with twenty-first-century questions of

political activism, social justice, sciences, and technology? To explore these questions, we will analyze literary texts, visual representations, and historical documents, such as medical treatises, scientific diagrams, and texts on new technologies. *Conducted in French.*

Requirements/Evaluation: active class participation, written reflections, quizzes, mid-semester presentation, and final paper

RLFR 212 (S) Scandalous News: Media and Transgression in Pre-Revolutionary France

Today's twenty-four-hour news cycle bombards us with scandalous stories. On our smartphones, tablets, and screens, personal transgressions and their political consequences loom large. In this constant state of media immersion, scandal and its communication have come to define our time. Yet centuries ago in Pre-Revolutionary France, scandalous news played an even more crucial role, in a society centered on obedience to monarchy and monolithic institutions. In this course, we will consider how institutionalized codes of gender, social class, and religion shaped individual identity, how those who broke from these codes created individual autonomy, and how the scandals they caused were communicated to others. To pursue these questions, we will analyze literature, journalism, and legal texts that document scandalous figures and compare these early modern scandals with those of the twenty-first century.

Requirements/Evaluation: active class participation, written reflections, quizzes, mid-semester presentation, and final paper

RLFR 215 (F) The French Adventure: Word, Sound, and Image in the Digital Age

The French Adventure examines celebrated French literary texts (from the Middle Ages to Modernity) that draw on the theme of adventure, putting them into dialogue with their graphic novel and filmic adaptations (from the twentieth and twenty-first centuries). This course seeks to explore the phenomena of word (written or spoken), image (still or moving), and sound, as well as their interactions in today's environment of multimedia and digital immersion. Why have we seen an explosion of graphic novels and films depicting French literary classics in recent decades? How can these visual and audiovisual renderings enhance our appreciation for and understanding of written texts, and what aspects of the written word remain untranslatable to the world of the image? To address these questions, we will study a series of literary texts that depict historical moments from the late Middle Ages, to Absolute Monarchy, to the Belle Époque. From our visual vantage point of the twenty-first century, we will gain familiarity with the defining figures and events that these texts represent, from the fifteenth to the twentieth centuries. At the same time, we will interrogate the French-language graphic novel adaptations of each text, as well as portions of American-made filmic representations to consider questions of *patrimoine*, visual culture, and (trans)national identity. *Conducted in French.*

Requirements/Evaluation: active class participation, reading journal (with written reflections), quizzes, discussion leading, and final paper

Prerequisites: successful performance in RLFR 105, RLFR 106, or another RLFR 200-level course; or by placement test; or permission of the

instructor

Enrollment Limit: 20

RLFR 220 (S) Fairy Tales: Love and Politics at the Sun King's Court

This course explores the literary and historical development of love and politics in 17th-century France. These two motifs dominated courtly life at Versailles during the reign of Louis XIV, the Sun King. Since cultural and artistic creations tend to dialogue with social circumstances, the literature of this time period--which critics have sometimes called the "Grand Siècle"--develops different schools of thought on the interactions between politics and love. Some authors approached these interactions from an idealistic or innocent perspective, while others had a more pessimistic or realistic outlook. Together, we will examine why and how each trajectory formed while also investigating the roles of literary genre and authorial gender. As part of our explorations, students will compose their own, original fairy tales and will also adapt a written tale into an in-class theatrical performance. Conducted in French.

Requirements/Evaluation: active class participation, quizzes, a midterm paper, an original fairy tale, an in-class performance of the fairy tale in groups

Prerequisites: successful performance in RLFR 105, RLFR 106, or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

RLFR 224 (S) Sexuality and Seduction in Nineteenth and Twentieth-Century France (DPE)

Cross-listings: WGSS 224 RLFR 224

Primary Cross-listing

In 1857, both Flaubert's *Madame Bovary* and Baudelaire's *Les Fleurs du mal* were put on trial for sexual indecency and "crimes against public morality." In 1868, *Le Figaro* attacked Zola's novel *Thérèse Raquin* as "putrid literature" for its depiction of adultery, murder, and scandalous sexuality in nineteenth-century Paris. A century later, Gide, Proust, Colette, and Duras continued to shock French readers with their extraordinary novels on male and female homosexuality, intergenerational lovers, and biracial relationships. In this course, we will examine a broad range of issues on sexuality and seduction in nineteenth- and twentieth-century French literature, including eroticism and desire, love and betrayal, marriage and adultery, prostitution and fetishism, gay and lesbian identities, cross-dressing and gender representation, exoticism and colonial (s)exploitation. Readings to include novels, shorts stories, and poems by Chateaubriand, Constant, Duras, Balzac, Flaubert, Baudelaire, Zola, Maupassant, Barbey d'Aureville, Gide, Proust, Colette, Duras, and Guibert.

Requirements/Evaluation: active class participation, two shorter papers, a midterm, and a longer final paper

Prerequisites: exceptional performance in RLFR 105, successful performance in RLFR 106 or 107, or by French placement exam, or by permission of instructor

Enrollment Limit: 18

Enrollment Preferences: French majors and certificate students, Women's, Gender, and Sexuality Studies majors, and those with compelling justification for admission; if the course is overenrolled, students will submit an online form

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 224 (D1) RLFR 224 (D1)

Writing Skills Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity in a broad range of debates on sexuality in France, from 1800-2000. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequality; and the course employs critical tools to teach students how to articulate and interrogate the complexities of gender and sexuality, from reading and discussion, to critical analysis and writing.

Difference, Power, and Equity Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity in a broad range of debates on sexuality in France, from 1800-2000. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequality; and the course employs critical tools to teach students how to articulate and interrogate the complexities of gender and sexuality, from reading and discussion, to critical analysis and writing.

RLFR 225 (F) Remembering the Great War: The First World War in Literature and Film (DPE)

Cross-listings: COMP 224 RLFR 225

Secondary Cross-listing

From 1914 to 1918, the First World War ravaged Europe and slaughtered millions of soldiers and civilians from across the globe. Known as the "war to end (all) war(s)," World War I set the stage for an entire century of military conflict and carnage. New technologies led to unprecedented violence in the trenches, killing and wounding as many as 41 million soldiers and civilians. Beyond the slaughter at the front, the Great War also led to the global influenza pandemic that claimed up to 50 million lives, and the Armenian genocide that presaged the later atrocities of the Holocaust. The war also led to massive political transformation, from the Irish Rebellion and Russian Revolution, to the collapse of the German, Russian, Austro-Hungarian, and Ottoman Empires, and the redrawing of national borders across Europe and the Middle East. Even the end of the war with Treaty of Versailles lay the groundwork for new animosities that would lead to the Second World War just two decades later. However, the First World War also inspired great social change, from the emergence of the United States as a global leader and the founding of the League of Nations, to growing discontent with colonial rule in Asia and Africa, and greater power for women whose wartime labor influenced the post-war passage of their right to vote in countries across Europe and North America. To honor the centenary of the Great War in 2018, we will examine texts and films that bear witness to the suffering and courage of soldiers and civilians, and consider the legacy of the war in the twentieth- and twenty-first centuries. Readings to include memoirs and novels by Barbusse, Barker, Brittain, Cocteau, Graves, Hemingway, Jünger, Remarque, Wharton, Woolf; poetry by Apollinaire, Brooke, Mackintosh, McCrae, Owen, Sassoon; films by Attenborough, Boyd, Carion, Chaplin, Jeunet, Ozon, Renoir, Trumbo, Walsh, Weir; and archival materials on the roles of Williams students and faculty during the First World War. *Readings and Discussions in English.*

Requirements/Evaluation: active class participation, two shorter papers (4-5 pages), a midterm, and a longer final paper (6-8 pages)

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: all are welcome, but if the course is overenrolled, preference will be given to Comparative Literature majors and French majors and certificate students; if the course is over-enrolled, students will submit a form online

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 224 (D1) RLFR 225 (D1)

Difference, Power, and Equity Notes: As the course description explains, this course centers on a critical examination of difference, power, and equity during WWI. The content examines the effects of class, race, ethnicity, gender, and sexuality on social inequalities among soldiers & civilians, nations & colonies, men & women. The course also employs critical tools to teach students how to articulate and interrogate the social injustices of the Great War, from reading & discussion, to analytical essays & archival investigation.

RLFR 226 (S) Black France/France Noire (DPE)

Cross-listings: AFR 226 RLFR 226

Primary Cross-listing

On the eve of the new millennium, the year 1998 saw the emergence in France of "Black studies à la française" (Ndiaye). Inspired, in part, by the 150th anniversary of the 1848 abolition of slavery, the French black minority "made itself more visible" (Faes and Smith). This course examines a wide range of discursive practices through which athletes, artists, authors, politicians, activists, and scholars amplified their voices in the French hexagone. It retraces the rise of these discourses and how they assert, reframe, and establish blackness as a legitimate field of knowledge and a space of affirmation and contestation. Following a study of the interwar period (1918-1939), when the work of "negritude women" (Sharpley-Whiting) such as "afro-latinité" spurred the negritude movement, we will discuss publications, documentaries, and seminal moments of protest in the early twenty-first century. Course material may include works by Suzanne Césaire, Jane and Paulette Nardal, Aimé Césaire, Frantz Fanon, Achille Mbembé, Françoise Vergès, Pascal Blanchard, Nicolas Bancel and Sandrine Lemaire, Pap Ndiaye, Gaston Kelman, Rokhaya Diallo, Alice Diop, Léonora Miano, and Fabienne and Véronique Kanor. *Conducted in French.*

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French and Africana Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 226 (D2) RLFR 226 (D1)

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it focuses on "the shaping of social differences, dynamics of unequal power, and processes of change" through the lenses of historical colonial legacies, race, gender, citizenship among other questions.

RLFR 228 (S) Introduction to French and Francophone Film

Cross-listings: COMP 298 RLFR 228

Primary Cross-listing

In this course, we watch and examine seminal French and Francophone films. Starting with early French cinema and silent movies of the end of the nineteenth century, we continue with landmark films from the 1920s, '30s and '40s. World War II serves as a point of rupture to explore how the advent of Francophone film parallels postcolonial theory. Throughout the semester, we discuss film as spectacle, the emergence of narrative forms, innovative technical practice and their connection to aesthetics. We also look at the role of film in addressing larger questions that include acts of rebellion, decolonization, the radical rejection of societal values, colonialism, dislocation, alienation, French collaboration during the German occupation, and the intersection of history and biography, as well as migration, in between-ness, and transnationalism. Films from the Lumière brothers, Méliès, Guy-Blaché, Vigo, Truffaut, Sembene, Mambety, Malle, Varda, Paczy, Peck, and Sissako. *Conducted in French.*

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

RLFR 261 (F) Haitian and French Caribbean Literatures and Films

Cross-listings: COMP 283 AFR 261 RLFR 261

Primary Cross-listing

Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and of Martinique and Guadeloupe as the "French" Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling "intimist" stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

Class Format: seminar

Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation

Prerequisites: French majors, French certificate, Africana and Comparative Literature students

Enrollment Limit: 15

Enrollment Preferences: 105 and above, French majors, French certificate, Africana and Comparative Literature students

RLFR 302 (S) Monsters of the Renaissance

Where did monsters appear before comics and blockbusters? Before cinematic ghosts, vampires, and zombies, the French Renaissance popularized the Scythian Lamb, the Monk Fish, the Monopod, the Wind-Eaters from the Island of Ruach, and the mythic giants Gargantua and Pantagruel. The Latin word *monstrum* referred to a prodigy that did not fit the laws of nature. Thus, the monster not only generated wonder, curiosity, and fear, but both challenged and disrupted normative social values. In this course, students will analyze novels, travel narratives, medical treatises, essays, and epic poems from 16th-century France, when writers, doctors, and travelers developed a critical reflection on monstrosity in order to deal with otherness. This encompassed fantastic creatures, non-human beings, and natural phenomena, as well as people whose gender, race, religion, and bodies deviated from established norms. In this course, students will think critically about race, gender, and disability, and study the complexities of fear, disgust, wonder, and fascination. Readings to include classical texts by Homer and Ovid, medieval texts like the Legend of Saint George and the Dragon, and Renaissance texts by Francois Rabelais, Jean de Léry, Marguerite de Navarre, Ambroise Paré, Michel de Montaigne, and Agrippa d'Aubigné.

Requirements/Evaluation: active participation, weekly written responses, midterm exam and final project

Prerequisites: exceptional performance in RLFR 106, or an RLFR 200-level course, or by Placement Test, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors and French certificate students, and those with compelling justification for admission

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

RLFR 305 (F) Where We Are & Where We Go: Spaces & Places of Contemporary France

How do people in France give meaning to the spaces they inhabit or move through? What does it mean to be from "here" or "there"? Through contemporary French literature and cultural analysis, we will explore these questions in the urban landscapes of major French cities, including Lyon, Marseilles, Nantes, and Angoulême. We will focus on literary representations of the home, the street, the park, the grocery store, and the train, and discuss the ways videos, press articles, photographs, and websites depict neighborhoods, festivals, and street theater. We will also examine a variety of theories that will help us conceptualize urban space and interpret these literary and cultural texts on city life in contemporary France. Readings to include texts by Annie Ernaux, Patrick Modiano, Leïla Sebbar, Didier van Cauwelaert, Yasmina Reza, Jean Rolin, Marie Darrieussecq, and Xavier Houssin. *Conducted in French.*

Requirements/Evaluation: class participation, several short essays (1-2 pages), midterm essay (5 pages), digital mapping project, and final oral presentation (based on midterm)

Prerequisites: strong performance in RLFR 106 or 107; a RLFR 200-level course; another RLFR 300-level course; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French majors & certificate students; those with compelling justification for admission; seniors returning from study abroad

RLFR 309 (F) Contemporary Short Stories from North Africa

Cross-listings: AFR 307 RLFR 309

Primary Cross-listing

Short stories are the vibrant center of the literary landscape in North Africa today. Written in French, Arabic and sometimes Amazigh languages, short stories provide timely interventions in political and social discourse. In this course, we will read short stories that use humor and satire to address the effects of globalization on local communities, that experiment with language to portray war and revolution, and that seek to create a new space for the discussion of gender. We will also analyze films, sociological texts and Moroccan, Algerian and Tunisian online newspapers in order to explore contemporary transformations of life in North Africa. Readings by Maissa Bey, Abdelfattah Kilito, Zeina Tabi, Mohamed Zafzaf, Ahmed Bouzfour, Soumaya Zahy and Fouad Laroui among others. *Conducted in French.*

Class Format: discussion

Requirements/Evaluation: active class participation, weekly response papers, two short papers, an oral presentation and a final paper

Prerequisites: RLFR 201, 202 or 203 or permission of instructor

RLFR 310 (S) *Le Moyen Âge en images: Decoding the Middle Ages*

This seminar investigates questions of visual culture and textual analysis in the Middle Ages. Although different from today's multimedia and digital environment, the Middle Ages boasted its own form of visual culture that will enable us to draw meaningful connections between medieval literature and history and modern-day debates on gender and sexuality. To explore these connections, we will study literary texts from the 12th-16th centuries in modern French translation, making comparisons to *bandes dessinées* that seek to visualize each text from a twenty-first-century perspective. We will investigate the points of overlap and divergence between the original texts and accompanying comics to ask why and how today's artists are returning to the literature and culture of the Middle Ages, especially in a time of globalization and technological immersion. For example: How might our findings inform our outlook on international politics, as well as gender-based forms of activism, such as the #MeToo movement, among other forms of social and political engagement? *Conducted in French*

Requirements/Evaluation: active class participation, reading journal (with written reflections), quizzes, mid-semester project: une bande dessinée, and final paper

Prerequisites: successful performance in RLFR 106 or another RLFR 200-level course; or by placement test; or permission of the instructor

Enrollment Limit: 20

Enrollment Preferences: all are welcome, but if over-enrolled, preference will be given to French majors and certificate students; and those with compelling justification for admission

RLFR 316 (S) Paris on Fire: Incendiary Voices from the City of Light (1830-2015)

Cross-listings: WGSS 315 RLFR 316

Primary Cross-listing

During the 1830s, Balzac described Paris as a "surprising assemblage of movements, machines, and ideas, a city of one hundred thousand novels, the head of the world," but also characterized the French capital as a "land of contrasts," a "monstrous wonder," a "moral sewer." Similarly, writers from Hugo to Zola have simultaneously celebrated Parisian elegance and condemned the appalling misery of Paris's urban poor. Since 1889, Paris has been fêted as the "City of Light" for its Enlightenment legacy, its Eiffel Tower modernity, and its luminous urban energy, captured in countless paintings, photographs, and film. However, Paris is also the historical site of revolution, resistance, and riots. From revolutionary revolt (1830, 1848, 1871), to wartime resistance (1870, 1914-18, 1940-44), to reformist and race riots (1968 and 2005), Paris has repetitively sparked with incendiary passion and political protest. As fires raged during the riots in 2005, many heard the echo of Hitler's ominous 1944 question, "Is Paris burning?" and asked: why was Paris burning again at the dawn of the twenty-first century? And following the recent terrorist attacks in Paris in 2015, many wonder what lies ahead for the City of Light. To answer these questions, we will examine the social, political, and literary landscape of Paris during the nineteenth and twentieth centuries, from urbanization and modernization, to occupation and liberation, to immigration and globalization. Readings to include poetry, short stories, and novels by Hugo, Balzac, Baudelaire, Maupassant, Verne, Zola, Apollinaire, Colette, Duras, Perec, Rochefort, and Charef. Films to include works by Clair, Truffaut, Godard, Minnelli, Clément, Lelouch, Luhrmann, Kassovitz, Besson, and Jeunet. *Conducted in French.*

Requirements/Evaluation: active class participation, midterm exam, and two to three papers

RLFR 318 (F) Twentieth-Century French Novel: From Adversity to Modernity

Cross-listings: COMP 318 RLFR 318

Primary Cross-listing

In his futurist novel *Paris in the Twentieth Century* (1863), Jules Verne envisions an era of technological superiority, complete with hydrogen cars and high-speed trains, televisions and skyscrapers, computers and the internet. But in Verne's vision of modernity, technological sophistication gives way to intellectual stagnation and social indifference, in a world where poetry and literature have been abandoned in favor bureaucratic efficiency, mechanized surveillance, and the merciless pursuit of profit. To contest or confirm this dystopic vision, we will examine a broad range of twentieth-century novels and their focus on adversity and modernity. In a century dominated by the devastation of two World Wars, the atrocities of colonial empire, and massive social and political transformation, the novel both documented and interrogated France's engagement with race and ethnicity, gender and sexuality, colonialism and immigration. Within this historical context, we will discuss the role of the novel in confronting war and disease, challenging poverty and greed, and exposing urban isolation and cultural alienation in twentieth-century France. Readings to include novels by Colette, Genet, Camus, Duras, Ernaux, Guibert, Begag. Lectures to include discussions of Gide, Proust, Sartre, Beauvoir, Cixous, Foucault, Jelloun, Djébar. Films to include works by Fassbinder, Annaud, Lioret, Ducastel, Martineau, Téchiné, Charef. *Conducted in French.*

RLFR 412 (F) Senior Seminar: Nineteenth-Century French Novel: Desperate Housewives and Extreme Makeovers

Cross-listings: WGSS 408 RLFR 412

Primary Cross-listing

In 1834, Balzac wrote that "Paris is a veritable ocean. Sound it: you will never know its depth." The same can be said of the French nineteenth-century novel and its boundless ability to echo the past and illuminate the present. From the Romanticism of Stendhal and Hugo, and the Realism of Balzac and Flaubert, to the Naturalism of Zola and Maupassant, the novel became a forum for examining illicit sexuality, institutional misogyny, social injustice, criminal passions, revolutionary struggles, and Parisian pleasures in nineteenth-century France. Characters such as the imprisoned housewife Emma Bovary, the reluctant revolutionary Jean Valjean, the social-climbing lover Julien Sorel, the ambitious undergraduate Rastignac, and the domestically-abused Gervaise became synonymous with France's turbulent social and political landscape from the 1830s to the 1880s. And as recent film adaptations make clear, these desperate housewives and extreme makeovers continue to haunt our twenty-first century present. Reinterpreted by such actors as Gérard Depardieu, Isabelle Huppert, Uma Thurman, Claire Danes, and Jennifer Aniston, the nineteenth-century novel continues to sound out the scandalous and sensational depths of our own century. Readings to include novels by Balzac, Stendhal, Hugo, Flaubert, Maupassant, Zola. Films to include adaptations by Clément, Berri, August, Arteta, Lelouch, Chabrol. Conducted in French.

RLFR 511 (F) Intensive French Grammar and Translation

This course is designed to offer students a thorough and systematic review of sentence structures and grammar to develop a reading knowledge of French. Through this intensive study, students will learn to decipher the subtleties of the written language, and as they become more confident they will start translating a variety of short excerpts. Students are also expected to learn and develop a wide lexical range centered on art history and criticism, but not limited to it.

Class Format: classes meet twice weekly and are conducted in English

Requirements/Evaluation: class participation, papers, a midterm, and a final examination

Prerequisites: a strong interest and need to learn French

Enrollment Preferences: although this course is to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll by permission of the instructor

Grading: pass/fail option only

Distributions: (D1)

Fall 2019

Winter Study -----

RLFR 13 (W) Creative Portraiture in the Darkroom

Cross-listings: ARTS 13 RLFR 13

Primary Cross-listing

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use the view camera (a large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Be aware that this class requires an average of 15 weekly lab or studio hours outside of regular classes and sometimes during the weekend. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Phtaumnales in Beauvais, France and at the Biennale Internationale des Rencontres Photographiques de Guyane.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: knowledge of black and white analog photography is preferred, but not required

Enrollment Limit: 10

Enrollment Preferences: Art major and minors then random

Grading: pass/fail only

Materials/Lab Fee: \$120

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 13 RLFR 13

Attributes: EXPE Experiential Education Courses

Winter 2020

LEC Section: 01 MTW 10:00 am - 12:50 pm Daniel Goudrouffe

RLFR 30 (W) Honors Essay: French

To be taken by candidates for honors other than by thesis route.

Class Format: honors essay

Grading: pass/fail only

Winter 2020

HON Section: 01 TBA Jennifer L. French

RLFR 31 (W) Senior Thesis: French

To be taken by students registered for French 493-494.

Class Format: thesis

Grading: pass/fail only

Winter 2020

HON Section: 01 TBA Jennifer L. French

RLFR 88 (W) French Sustaining Program

Students registered for RLFR 101-102 are required to attend and pass the French Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program. Check your class schedule to confirm enrollment.

Grading: pass/fail option only

Winter 2020

LAB Section: 01 M-F 9:00 am - 9:50 am Lisa Schohn

RLFR 99 (W) Independent Study: French

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Winter 2020

IND Section: 01 TBA Jennifer L. French

GEOSCIENCES (Div III)

Chair: Associate Professor Mea Cook

- Alex A. Apotsos, Lecturer in Geosciences
- Alice C. Bradley, Assistant Professor of Geosciences
- Phoebe A. Cohen, Associate Professor of Geosciences
- José A. Constantine, Assistant Professor of Geosciences; on leave 2019-2020
- Mea S. Cook, Chair and Associate Professor of Geosciences
- Rónadh Cox, Edward Brust Professor of Geology and Mineralogy
- Lisa A. Gilbert, Associate Professor of Geosciences and Marine Sciences at Williams-Mystic; affiliated with: Geosciences Department
- Paul M. Karabinos, Charles L. MacMillan Professor in Natural Sciences
- Bud Wobus, Edna McConnell Clark Professor of Geology

MAJOR

The Geosciences major offers an understanding of the evolution of our planet and its interacting global systems. In this era of global change, geoscience provides the tools that can help us learn to live sustainably with our environment, and appreciate our place within the vastness of Earth history. Forces within the Earth create mountain ranges and ocean basins and drive the movements of continents. Wind, water and ice shape the surface of the Earth, making and changing the landscapes around us. Sedimentary rocks and the fossils within them teach us how life and climate have evolved over the vastness of time.

Geosciences graduates have a wide range of career options, both with and without graduate training. The many choices include environmental consulting, hazard assessment, hydrology, gemology, the energy and mining industries, outdoor education, and research and teaching in universities, colleges, and secondary schools. Many students choose to double-major in fields as diverse as Art, Economics, History, Physics, Mathematics, English, and Philosophy, and often find jobs where they can apply the synergies of their Geosciences double major. No matter what field they enter, all our Geosciences graduates pursue their lives and careers with a deeper appreciation for the natural world around them.

The major is designed to provide a solid grounding in the geosciences while being adaptable enough to accommodate diverse paths driven by student interests. There are no required courses, but students work through the menu below, which allows a lot of scheduling flexibility.

The requirements for the Geosciences major were revised. The new requirements are immediately below, and the old requirements follow. Students who entered Williams in fall 2019 or after are under the new requirements. Students who entered Williams before fall 2019 are under the old requirements but may opt into the new requirements. Please talk to the Geosciences chair if you have questions about the major requirements.

Geosciences major requirements for students who entered Williams in fall 2019 or after:

At least one and at most two 100-level courses:

GEOS 100 Introduction to Weather and Climate

GEOS 101 Co-Evolution of Earth and Life

GEOS 102 An Unfinished Planet

GEOS 103 Global Warming and Environmental Change

GEOS 104 Oceanography

At least two 200-level courses selected from this group:

GEOS 201 Geomorphology

GEOS 202 Mineralogy

GEOS 203 Field Methods and Structural Geology

GEOS 205 Earth Resources

GEOS 210 Oceanographic Processes

GEOS 212 Paleobiology

GEOS 214 Mastering GIS
GEOS 215 Climate Changes
GEOS 217 Planets and Moons
GEOS 255 Environmental Observation

At least two 300-level courses selected from this group:

GEOS 301 Structural Geology
GEOS 302 Sedimentology
GEOS 303 Igneous and Metamorphic Petrology
GEOS 309 Modern Climate
GEOS 314 Analytical Historical Geology
GEOS 324 Corals and Sea Level

At least one of the following 400-level courses:

GEOS 401 Global Tectonics and the Rise of Mountains
GEOS 404 Coastal Processes and Geomorphology
GEOS 405 Geochemistry: Understanding Earth's Environment
GEOS 411 Geobiology

Finally, students must take enough electives to bring the total to a minimum of nine courses.

In addition, courses taken for the major must include at least two courses from each of the following three groups:

Climate and Oceans:

GEOS 100 Introduction to Weather and Climate
GEOS 104 Oceanography
GEOS 210 Oceanographic Processes
GEOS 215 Climate Changes
GEOS 255 Environmental Observation
GEOS 309 Modern Climate
GEOS 324 Corals and Sea Level

Sediments and Life:

GEOS 101 Co-Evolution of Earth and Life
GEOS 103 Global Warming and Environmental Change
GEOS 201 Geomorphology
GEOS 212 Paleobiology
GEOS 302 Sedimentology
GEOS 312T Mass Extinctions
GEOS 314 Analytical Historical Geology

Solid Earth:

GEOS 102 Unfinished Planet
GEOS 202 Mineralogy
GEOS 203 Field Methods and Structural Geology
GEOS 205 Earth Resources
GEOS 217 Planets and Moons
GEOS 220T Evolution of and on Volcanic Islands
GEOS 250T Tectonic Geomorphology and Landscape Evolution
GEOS 301 Structural Geology
GEOS 303 Igneous and Metamorphic Petrology

Geosciences major requirements for students who entered Williams before fall 2019:

At least one and at most two 100-level courses:

GEOS 100 Introduction to Weather and Climate

GEOS 101 The Co-Evolution of Earth and Life

GEOS 102 An Unfinished Planet

GEOS 103 Global Warming and Environmental Change the Reshaping of Landscapes

GEOS 104 Oceanography

At least two 200-level courses selected from this group:

GEOS 201 Geomorphology

GEOS 202 Mineralogy

GEOS 203 Field Methods and Structural Geology

GEOS 205 Earth Resources

GEOS 210 Oceanographic Processes

GEOS 212 Paleobiology

GEOS 214 Mastering GIS

GEOS 215 Climate Changes

GEOS 217 Planets and Moons

GEOS 255 Environmental Observation

At least two 300-level courses selected from this group:

GEOS 301 Structural Geology

GEOS 302 Sedimentology

GEOS 303 Igneous and Metamorphic Petrology

GEOS 309 Modern Climate

GEOS 314 Analytical Historical Geology

GEOS 324 Corals and Sea Level

At least one of the following 400-level courses:

GEOS 401 Global Tectonics and the Rise of Mountains

GEOS 404 Coastal Processes and Geomorphology

GEOS 405 Geochemistry: Understanding Earth's Environment

GEOS 411 Geobiology

Finally, students must take enough electives to bring the total to a minimum of nine courses.

PREPARATION FOR GRADUATE SCHOOL

Although many of our majors take geoscience jobs after graduation, many choose to go to graduate school, and most graduate programs will expect students to have a background in mathematics as well as a year or so of study in related sciences, in addition to the requirements of the Geosciences major. Students considering graduate work in geosciences should therefore consult with faculty to ensure that they plan wisely. The selection of outside courses will depend on the field in which a student wants to specialize. Graduate programs in solid-earth geosciences commonly expect entering students to have taken courses in chemistry. For those going into environmental geosciences, courses in chemistry, computer science and/or statistics are recommended. For those considering geobiology programs, biology courses are important. For students entering planetary geology, physics is recommended.

THE DEGREE WITH HONORS IN GEOSCIENCES

The degree with honors in Geosciences provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, culminating in a thesis that demonstrates outstanding achievement of an original and innovative nature. In addition to the major requirements listed above, those who are candidates for the degree with honors take the following sequence in the Fall, Winter Study, and Spring of their senior year:

GEOS 493-031-494 Senior Research and Thesis

The principal considerations in admitting a student to a program of independent research are interest and motivation, mastery of fundamental

material and skills, and ability to pursue independent study successfully. Interested students should talk to members of the department about project options at any time, but generally no later than January of the Junior year.

STUDY AWAY

Students planning to study off-campus should meet as early as possible with the Department Chair to plan and to discuss how potential courses might be used in the major. Although most study-away programs do not offer geoscience courses, there are some that dovetail well with Geosciences. Examples include the Williams-Mystic program, the Frontiers Abroad program at Canterbury University in New Zealand, and the program at the University of Otago in New Zealand. Courses offered at Norwegian Technical Universities and at several universities in the United Kingdom have also been accepted. Up to two geoscience courses taken away from Williams can be counted toward the nine-course major. Be sure to meet with a Geosciences faculty advisor or Department Chair to discuss your plans and ideas for off-campus work.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Generally not until after a student returns and can provide course material for review (e.g. Syllabus and/or completed work such as exams, portfolios, lab reports and the like).

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings, assignments, evaluation criteria.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. A maximum of two courses can be credited toward major requirements.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Students should consult with the chair or other department faculty members to plan ahead and make sure that requirements can be met.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

GEOS 100 (S) Introduction to Weather and Climate

Cross-listings: GEOS 100 ENVI 100

Primary Cross-listing

How is it that we have such a hard time predicting if it's going to rain next week, but we can be confident in projections of future climate change decades from now? This course will explore the atmosphere and how air moves and changes, understanding the wind, clouds, precipitation, and extreme events (including thunderstorms, hurricanes, and tornados) that form our weather. Building off of our understanding of the atmosphere, we'll look at longer time scales to develop a basic understanding of earth's climate, global heat and moisture transport, climate change, and the ways that

humans can change our planet. We will look at weather and climate models to learn how to scientists and meteorologists predict future conditions. Labs will include local field trips, bench top experiments, and running a climate model on a computer.

Requirements/Evaluation: lab assignments, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-years and sophomores

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 101 (F) The Co-Evolution of Earth and Life

Cross-listings: GEOS 101 ENVI 105

Primary Cross-listing

Our planet is about 4.6 billion years old and has supported life for at least the last 3.5 billion of those years. This course will consider the inter-related nature of Earth and the life that inhabits it, starting with the first living organisms and progressing to the interaction of our own species with the Earth today. Students will investigate the dynamic nature of the Earth-life system, examine many of its feedbacks, and learn about the dramatic changes that have occurred throughout the history of the Earth. We will ask questions such as: How did the Earth facilitate biologic evolution, and what effects did those biologic events have on the physical Earth? When did photosynthesis evolve, how can we detect that in the rock record, and how did this biological event lead to profound changes in the environment? How and why did animals evolve and what role did environmental change play in the radiation of animal life? How did the rise and radiation of land plants affect world climate? How do plate tectonics, glaciation, and volcanism influence biodiversity and evolutionary innovation? What caused mass extinctions in the past and what can that teach us about our current extinction crisis? Labs will involve hands-on analysis of rocks, fossils, and real-world data as well as conceptual and analytical exercises; field trips will contextualize major events in Earth history and will help students learn to read the rock record. Through these investigations, the class will provide a comprehensive overview of Earth history, with special attention paid to the geological and paleontological history of the northeastern United States. This course is in the Sediments and Life group for the Geosciences major.

Class Format: one laboratory per week plus one all-day field trip

Requirements/Evaluation: lab work, short quizzes, midterms, an independent project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first-years and sophomores

Expected Class Size: 30

GEOS 102 (S) An Unfinished Planet

The Earth is a work-in-progress, an evolving planet whose vital signs--as expressed by earthquakes, volcanic eruptions, and shifting plates--are still strong. In a geological time frame, nothing on Earth is permanent: ocean basins open and close, mountains rise and fall, continental masses accrete and separate. There is a message here for all of us who live, for an infinitesimally brief time, on the moving surface of the globe. This course uses the plate tectonics model--one of the fundamental scientific accomplishments of the past century--to interpret the processes and products of a changing Earth. The emphasis will be on mountain systems (on land and beneath the oceans) as expressions of plate interactions. Specific topics include the rocks and structures of modern and ancient mountain belts, the patterns of global seismicity and volcanism, the nature of the Earth's interior, the changing configurations of continents and ocean basins through time, and, in some detail, the formation of the Appalachian Mountain system and the geological assembly of New England. Readings will be from a physical geology textbook, a primary source supplement, selected writings of John McPhee, and references about the geology of the Northeast.

Class Format: lecture three hours per week and lab (several involving field work) two hours per week; one required all-day field trip on the last Monday of the semester to the Connecticut Valley and the highlands of western Massachusetts

Requirements/Evaluation: two hour-tests, weekly lab work, and a scheduled final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

GEOS 103 (F) Global Warming and Environmental Change

Cross-listings: GEOS 103 ENVI 103

Primary Cross-listing

Earth is the warmest it has been for at least five centuries, and the surface of our planet is responding. From extreme floods and drought to landslides and soil erosion, the natural processes that shape the Earth's surface are tied to temperature and precipitation, and as those change, the landscape reacts. People are beginning to feel the impacts, but in different ways depending on where we call home. Our ability to cope with the changes also depends on where we are, with low-income nations the least able to implement costly adaptive strategies. In this course, we will take a tour of the planet, investigating how climate change is altering landscapes and the natural processes that support them. Ultimately, we will develop an understanding of the consequences of climate change that connects physical processes with the geography of place. Specific topics include foundations of the Earth system, plate tectonics and the construction of landscapes, Earth materials, rivers and flooding, hillslope processes, coastal processes, and climate impacts on natural resources such as freshwater and soil. Labs will use local field sites and analytical exercises to evaluate recent cases that reflect an interaction of the landscape and climate.

Class Format: discussion, three hours per week and laboratory, two hours per week in alternate weeks/occasional field trips

Requirements/Evaluation: written reports from laboratories, class participation, weekly quizzes, a midterm and final exam

Prerequisites: none

Enrollment Limit: 48

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 48

Grading: yes pass/fail option, yes fifth course option

GEOS 106 (F) Being Human in STEM (DPE)

Cross-listings: GEOS 106 PHYS 106 STS 106

Secondary Cross-listing

This course combines academic inquiry and community engagement to investigate the themes of diversity and social climate within STEM (science, technology, engineering and mathematics) disciplines. Students will examine how diverse identities including but not limited to gender, race, disability, sexuality, national origin, socioeconomic status, religion, and ethnicity shape the STEM experience both at Williams and nationally. We will ground our understanding through critical reading of primary scholarly research on topics such as implicit bias, identity threat, and effects of team diversity on excellence. From there, we will execute small group projects. Students will design, execute, and evaluate interventions that relate to the course goals and that have direct relevance to Williams students, faculty, and staff. For example, a student group could implement a survey of minoritized STEM students, or create a qualitative interview-based assessment of how socioeconomic status impacts students' abilities to participate in STEM fields. Course work includes weekly readings, reflective/opinion writing, in class discussion, and the development and presentation of a group project.

Class Format: class discussions, group project work (out of class time required)

Requirements/Evaluation: short response papers, class discussion participation, leading class discussions, group work, and final project

Enrollment Limit: 15

Enrollment Preferences: DIV III majors; statement of interest may be requested

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Unit Notes: does not count towards GEOS or PHYS major credit

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 106 (D3) PHYS 106 (D3) STS 106 (D2)

Difference, Power, and Equity Notes: This course explicitly addresses the intersection of marginalized identities and the STEM experience. Students will learn how to critically address how issues such as gender, race, ethnicity, and disability impact participation in and the experience of STEM fields. For example, students will read and critique literature documenting bias in STEM fields, and will also learn about and create interventions that can address these biases.

Fall 2019

GEOS 201 (F) Geomorphology

Cross-listings: GEOS 305 ENVI 205 GEOS 201

Primary Cross-listing

Geomorphology is the study of landforms, the processes that shape them and the rates at which surface processes change the landscape in which we live. The course is designed for Geosciences majors and for environmental studies students interested in surficial geologic processes and their importance in shaping the physical environment. We emphasize the influence of climatic, tectonic, and volcanic forces on landform evolution over relatively short periods of geologic time, generally thousands to a few millions of years. At this time scale, the influence of human activity and climate change on geomorphic processes is strong, perhaps dominant, in many geologic environments. Many of our examples analyze human interaction - planned or unplanned-- with geomorphic processes. Labs focus on field measurements of channels and landscapes in the Williamstown area as well as on the analysis of topographic maps and imagery.

Class Format: discussion, three hours per week and laboratory, three hours per week/student projects; weekend field trip to the White Mountains

Requirements/Evaluation: two hour exams, a project, lab work and class participation

Prerequisites: any 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

GEOS 202 (S) Mineralogy

This course could be subtitled "An Introduction to Earth Materials and Analytical Techniques." As the basis for all subsequent solid-earth courses in the major, it provides a systematic framework for the study of minerals--Earth's building blocks: their physical and chemical properties at all scales and the common analytical methods used to identify and interpret them. The course progresses from hand-specimen morphology and crystallography through element distribution and crystal chemistry to the phase relations, compositional variation, and mineral associations within major rock-forming mineral systems. Laboratory work includes the determination of crystal symmetry; mineral separation; the principles and applications of optical emission spectroscopy; wavelength- and energy-dispersive x-ray spectrochemical analysis; x-ray diffraction; the use of the petrographic microscope; and the identification of important minerals in hand specimen and thin section.

Class Format: lecture three hours per week and laboratory three hours per week; independent study of minerals in hand specimen; one afternoon

field trip

Requirements/Evaluation: one hour test, lab work, and a final exam

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: sophomores and juniors planning to take GEOS 301, 302 and/or 303 in the subsequent year

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

LAB Section: 02 T 1:00 pm - 4:00 pm Bud Wobus

GEOS 203 (F) Field Methods and Structural Geology (WS)

The structure of the Earth's crust is constantly changing and the rocks making up the crust must deform to accommodate these changes. Rock deformation occurs over many scales ranging from individual mineral grains to mountain belts. This course deals with the geometric description of structures and the large scale forces responsible for crustal deformation. The laboratories introduce students to best practices for geologic field work, the field identification of common minerals and rocks, geologic contacts, geologic maps and cross sections, folds, and faults. Students will develop skill for presenting field data in papers, figures, and oral presentations.

Class Format: discussion, three hours per week and laboratory, three hours per week

Requirements/Evaluation: short weekly writing assignments, two 10-page papers based on field trips, and a one-hour exam

Prerequisites: any 100-level Geosciences course or permission of instructor

Enrollment Limit: 16

Enrollment Preferences: Geosciences majors or students with a strong interest in geosciences

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: \$15 for field supplies

Distributions: (D3) (WS)

Writing Skills Notes: There will be two 10-page papers, each based on four field trips. Students will submit short field descriptions and figures with captions after each field trip for evaluation by the instructor and peers. The shorter assignments will be incorporated in the field reports. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 205 (F) Economic Geology and Earth Resources

Cross-listings: ENVI 207 GEOS 205

Primary Cross-listing

"If it can't be grown, it must be mined." We depend on the solid Earth for a huge array of resources. The metal in your soda can, the plastic in your Nalgene, the components of your computer, the glass in your window, the hydrocarbons being burned to keep you warm in the winter or to transport you in cars or aircraft, the cars and aircraft themselves: all are made of materials mined from the Earth. Right now there are more people building more houses, paving more roads, making more vehicles, more electronics, and more plastic packaging—all with geologic materials. As demand soars in both established and growing economies, and as we realize the environmental damage that can result from resource extraction and processing, the

importance of understanding Earth's resources increases. Finding new deposits and managing those we have requires insight into the geology that underlies the location and origin of strategic Earth materials. This class introduces the geologic processes that control formation, distribution, and extent of materials reserves: dimension stone and gravel, base and precious metal ores, gemstones, petroleum, nuclear energy sources, and specialty materials for medical, technological, and military uses. This course is in the SOLID EARTH GROUP for the Geosciences major.

Class Format: 2.5 hours lecture per week and one 3 hour lab per week, including some field labs

Requirements/Evaluation: one hour exam, a final exam, lab exercises, and a group project

Prerequisites: one 100-level GEOS course or permission of instructor

Enrollment Limit: 18

Enrollment Preferences: sophomores and Geosciences majors

Expected Class Size: 18

GEOS 212 (S) Paleobiology

Cross-listings: BIOL 211 GEOS 212

Primary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: field trip to the the Paleozoic of New York State

Requirements/Evaluation: lab assignments, short quizzes and writing assignments, and a final exam

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 15

Enrollment Preferences: sophomore and junior GEOS majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

GEOS 214 (F) Mastering GIS

Cross-listings: GEOS 214 ENVI 214

Primary Cross-listing

The development of Geographic Information Systems (GIS) has allowed us to investigate incredibly large and spatially complex data sets like never before. From assessing the effects of climate change on alpine glaciers, to identifying ideal habitat ranges for critically endangered species, to determining the vulnerability of coastal communities to storms, GIS tools have opened the door for important, large-scale environmental analyses. And as these technologies improve, our ability to understand the world grows ever greater. This course will teach you how to use GIS tools to investigate environmental problems. We will review fundamental principles in geography, the construction and visualization of geospatial datasets, and tools for analyzing geospatial data. Special attention will also be given to analysis of remotely sensed (satellite) imagery and to collection of field data. By the end of the course, you will be able to conduct independent GIS-based research and produce maps and other geospatial imagery of professional quality.

Class Format: lecture, three hours per week and laboratory, three hours per week

Requirements/Evaluation: weekly lab exercises, weekly quizzes, a research project, and a midterm and final exam

Prerequisites: at least one introductory course in BIOL, ENVI, or GEOS

Enrollment Limit: 20

Enrollment Preferences: Geosciences and Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

GEOS 215 (F) Climate Changes

Cross-listings: ENVI 215 GEOS 215

Primary Cross-listing

In recent years, there has been a growing public and scientific interest in the Earth's climate and its variability. This interest reflects both concern over future climate changes resulting from anthropogenic increases in atmospheric greenhouse gases and growing recognition of the economic impact of "natural" climate variability (for example, El Niño events), especially in the developing world. Efforts to understand the Earth's climate system and predict future climate changes require both study of parameters controlling present day climate and detailed studies of climate changes in the past. In this course, we will review the processes that control the Earth's climate, like solar radiation, the greenhouse effect, ocean circulation, configuration of continents, and positive and negative feedbacks. At the same time, we will review the geological record of climate changes in the past, examining their causes. Laboratories and problem sets will emphasize developing problem solving skills as well as sampling and interpreting geological archives of climate change.

Class Format: lecture three hours per week and one three-hour lab per week

Requirements/Evaluation: lab exercises and problem sets (25%), three hour exams (50%), and a final project (25%) where students will collect, analyze, and interpret data

Prerequisites: 100-level course in GEOS, CHEM, or PHYS or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Geosciences majors

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

GEOS 217 (S) Planets and Moons

Cross-listings: ASTR 217 GEOS 217

Primary Cross-listing

This course will examine the history and geology of the solar system. No two planets are exactly alike, and as we acquire more data and higher-resolution images, our sense of wonder grows. However, we can't hike around and hammer rocks on Venus or Titan, so we have to infer composition, form, texture and process from remotely-captured images and sparse chemical and spectral data. We will consider the origin of the solar system, the formation and evolution of planetary bodies, and the role of impacts, volcanism, tectonics and geomorphology in shaping them. We will summarize basic geological concepts of stratigraphy, structure and chronology and show how they can be applied off-world. We will review solar system exploration, and will include planetary data in lab exercises.

Requirements/Evaluation: one mid-term and one final exam, lab exercises, class participation

Prerequisites: any 100-level GEOS or any 100-level ASTR course, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Geosciences majors, Astronomy/Astrophysics majors, and sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

GEOS 220 (S) Evolution of and on Volcanic Islands

Cross-listings: GEOS 220 ENVI 219

Primary Cross-listing

Plate tectonic theory accounts for the vast majority of volcanic islands in ocean basins. They form above mantle plume hot spots (Hawaiian and Galapagos Islands), subduction zones (Aleutian and Indonesian arcs), and mid-ocean ridges (Azores and Ascension Island). Iceland is unusual because it is located above a hot spot and the mid-Atlantic ridge. Each plate tectonic setting produces chemically distinctive magmas, and the lifespan of volcanic islands varies widely. Islands above hot spots may be geographically remote and emergent for only several million years, but be part of a long-lived sequence of islands that persists for over a hundred million years. In contrast, island arc volcanoes belong to long geographically continuous chains of volcanoes, commonly in close proximity to continents. This tutorial explores the geologic evolution and lifespan of volcanic islands from formation to submergence, and searches for correlations between these characteristics and plate tectonic setting. We will also consider how geographic isolation, areal extent, lifespan, and climate affect biological evolution on volcanic islands. There will be weekly tutorial meetings with pairs of students, and students will alternate writing papers on assigned topics.

Requirements/Evaluation: five written papers

Prerequisites: 100-level GEOS course or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors and students with a demonstrated interest in geosciences

GEOS 221 (F) Examining Inconvenient Truths: Climate Science meets U.S. Senate Politics

Cross-listings: GEOS 221 ENVI 222

Primary Cross-listing

Former President Barack Obama once said: "There's one issue that will define the contours of this century more dramatically than any other, and that is the urgent threat of a changing climate." While consensus regarding the causes and impacts of climate change has been growing steadily among scientists and researchers (and to some extent, the general public) over the past two decades, the U.S. has yet to confront this issue in a manner consistent with its urgency. This lack of action in the U.S. is at least partly due to the fact that science provides necessary but insufficient information towards crafting effective climate change legislation and the unfortunate fact that climate change has become a highly partisan issue. The primary objective of this tutorial will be to help students develop a greater understanding of the difficulties associated with crafting climate change legislation, with an emphasis on the role of science and politics within the legislative process. To this end, the tutorial will address how the underlying scientific complexities embedded in most climate policies (e.g., offsets, carbon capture and sequestration, uncertainty and complexity of the climate system, leakage) must be balanced by and blended with the different operational value systems (e.g., economic, social, cultural, religious) that underlie U.S.

politics. Over the course of this tutorial, students will develop a nuanced sense of how and when science can support the development of comprehensive national climate change legislation within the current partisan climate. This course will take a practical approach, where students will craft weekly policy oriented documents (e.g., policy memos, action memos, research briefs) targeted to selected members of the current U.S. Senate Environment and Public Works Committee, the committee that has historically held jurisdiction over a majority of the major climate change bills that have moved through the legislative process.

Requirements/Evaluation: weekly papers and a final oral presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores, Geosciences and Environmental Studies juniors and seniors

GEOS 234 (S) Introduction to Materials Science (QFR)

Cross-listings: PHYS 234 GEOS 234

Secondary Cross-listing

Materials Science is the study of how the microscopic structure of materials--whether steel, carbon fiber, glass, wood, plastic, or mayonnaise--determines their macroscopic mechanical, thermal, electric, and other properties. Topics of this course include classifying materials; material structure; thermodynamics and phase transformations; material properties and testing; how solids bend, flow, and ultimately break; and how to choose the right material for design applications. Materials Science is a highly interdisciplinary field and as a result the course prerequisites are broad but also flexible. Interested students who are unsure about their preparation are strongly encouraged to contact the instructor.

Class Format: lecture (3 hours per week) plus three to four small-group laboratory sessions throughout the semester (to be scheduled with instructor)

Requirements/Evaluation: weekly problem sets, class participation, and midterm and final exams, all of which have a substantial quantitative component

Prerequisites: high school physics and chemistry, preferably at the AP level, and MATH 140 or AP Calculus (BC), and one 200-level PHYS, CHEM, or GEOS course; or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: based on students' scientific background and seniority

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: This course does not count toward the Geosciences major.

GEOS 250 (S) Tectonic Geomorphology and Landscape Development (WS)

Traditionally tectonics investigated processes operating deep in the crust and mantle, whereas geomorphology focused on surficial processes that shape the landscape. Tectonic geomorphology explores the complex interactions between tectonic and surficial processes. It has long been

recognized that crustal uplift during mountain building creates new landscapes, but we now suspect that variations in erosion rate can fundamentally influence the development of mountains. Climate plays a central role in this feedback loop; the rise of mountains can change climate, and such changes can alter regional erosion rates. This course will examine how geologists use characteristic markers to estimate the amount of surface uplift, methods for determining uplift rate, surface response to faulting and folding, measuring displacement of the crust with GPS and interferometry methods, how mountain building affects erosion and exhumation rates, the limits to relief in mountains, and the interaction between mountains and climate.

Class Format: after an initial group meeting, students will meet in pairs for one hour each week with the instructor; each student will orally present a written paper every other week for criticism during the tutorial session

Requirements/Evaluation: five 4- to 5-page papers based on journal articles

Prerequisites: at least one of the following courses: GEOS 101, 102, 201, 202, 301, 302, 303 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: Five 4- to 5-page papers distributed throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 255 (F) Environmental Observation

Cross-listings: GEOS 255 ENVI 255

Primary Cross-listing

To study the environment, we need to observe and measure it. We collect data--numbers that represent system states--and analyze them to create understanding of the world we live in. Advances in technology create more opportunities to discover how the planet works. Through a survey of observational approaches (including weather stations, direct sampling, radar, community-based monitoring, and other techniques), this course will investigate the process of turning a physical property in the environment into a number on a computer and then into meaningful information. We will explore both direct field measurements and remote sensing techniques, diving into how to choose the appropriate sensor for a scientific question, how sensors work, analysis approaches and statistical methods, and how to interpret the resulting data. We will also learn how to mitigate measurement bias through a combination of lab experiments and field work and how to make interpretations of measurements that accurately reflect what is being measured. The course will focus on the near-surface environment, including the atmosphere, water, and biosphere. Students will carry out a research project using observation techniques covered in class to explore a scientific question of interest.

Requirements/Evaluation: labs, quizzes, and a final project

Prerequisites: at least one prior course in GEOS or ENVI

Enrollment Limit: 20

Enrollment Preferences: sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

GEOS 309 (F) Modern Climate

Cross-listings: GEOS 309 ENVI 209

Primary Cross-listing

What will happen to the Earth's climate in the next century? What is contributing to sea level rise? Is Arctic sea ice doomed? In this course we will study the components of the climate system (atmosphere, ocean, cryosphere, biosphere and land surface) and the processes through which they interact. Greenhouse gas emission scenarios will form the basis for investigating how these systems might respond to human activity. This course will explore how heat and mass are moved around the atmosphere and ocean to demonstrate how the geographic patterns of climate change arise. We will also focus on climate feedback effects--like the albedo feedback associated with sea ice and glacier loss--and how these processes can accelerate climate change. In labs we will learn MATLAB to use process and full-scale climate models to investigate the behavior of these systems in response to increasing greenhouse gasses in the atmosphere. This course is in the Oceans and Climate group for the Geosciences major.

Requirements/Evaluation: a series of lab projects, a midterm, and a final exam

Prerequisites: GEOS 100, GEOS 103, ENVI 102, GEOS 215, or permission of instructor

Enrollment Limit: 24

GEOS 312 (S) Mass Extinctions: Patterns and Processes

Over the last 542 million years of Earth history, five major mass extinctions have occurred, each dramatically changing the makeup and course of life on our planet. During some of these events, over 75% of all marine animal species went extinct and groups like the dinosaurs vanished from the planet after over 100 million years of ecological dominance. This tutorial course will explore the idea of extinction from the evolution of the concept in human thought to current research on the mechanisms and patterns of extinctions through time. We will examine what makes an extinction "mass", delve into the causes and consequences of the major mass extinction events of the phanerozoic, and discuss the potential human-induced "6th extinction" event occurring in the present day.

Requirements/Evaluation: four 4-5-page papers, one revision, tutorial presentations, the student's effectiveness as a critic, and 1 problem set

Prerequisites: GEOS 101 or GEOS 212; or permission of instructor + any 200 level GEOS course

Enrollment Limit: 10

Enrollment Preferences: Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Not offered current academic year

GEOS 314 (S) Analytical Historical Geology (QFR)

In this course you will learn to collect, interpret, and analyze deep time paleontological, stratigraphic, and sedimentological records through readings, labs, and projects all coordinated around a week long spring break trip to explore the House Range of Utah. The Cambrian and Ordovician successions of Utah's West Desert offers an outstanding record of one of the most important periods in Earth history, tracking the rise of animal ecosystems and major increases in diversity. The first 6 weeks of class will be spent learning the fundamentals of quantitative methods in paleontology and stratigraphy. Labs will focus on skill building including learning basic coding in R, and learning how to interpret paleontological, sedimentological, and stratigraphic data. We will also read widely on the field locality and on the Cambrian and Ordovician Periods. During the field trip, we will explore the House Range. Students will learn skills including geological mapping, measuring stratigraphic section, finding and identifying fossils, and

correlating rock units across basins. We will collect samples and data on the field trip and bring them back to Williams. The second 6 weeks of the course will be spent processing and analyzing the samples and data collected during the field trip, culminating in final projects to be done in small groups. Students will determine what data we will collect in the field. Examples might be trilobite taxonomy and phylogenetic analyses, quantitative biostratigraphic correlation using conodont fossils, reconstructing paleoenvironment based on sedimentological analyses of thin sections, or building a sequence stratigraphic framework for a subset of the field locality.

Class Format: weekly lectures, paper discussions, and hands-on labs

Requirements/Evaluation: short papers and lab assignments, spring break field course participation (REQUIRED), and a final group project

Prerequisites: GEOS majors who have taken at least one of the following courses: GEOS 212, GEOS 203, GEOS 324, GEOS 401, GEOS 302, or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: junior and senior Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This course will rely on the programming language R. Students will learn how to code in R, and will use R to analyze large data sets of geological data. The majority of labs, as well as the final project, will rely on R, statistical analyses, and wrangling data.

GEOS 324 (S) Corals and Sea Level

Cross-listings: MAST 324 ENVI 324 GEOS 324

Primary Cross-listing

In coastal communities, increasing flood damage from storm surges and chronic inundation by seawater are already happening as a result of sea level rise. How do we know what contributes to the observed change in sea level in the last century? What does the geological record teach us about what controls the natural variation in sea level on short and long timescales? How can we use this information to separate anthropogenic effects from natural change in modern systems? And how does this inform us on what to expect through the 21st century and beyond? In this course, we will examine how sea level is reconstructed using geological archives and how coral-based sea level data led to breakthroughs in our understanding of the long-term evolution of the ocean and climate, the controls in the timing of ice age cycles, the singularity of modern climate change, and how high the future seas will rise. During Spring Break, the class will travel to Barbados, a renowned locality for Quaternary sea level reconstruction, to observe modern and ancient reefs, and collect samples that will be the basis of individual or group projects in the second half of the semester. Participation in the Spring Break trip is not required for successful completion of the course, but course enrollment is necessary to attend the trip.

Requirements/Evaluation: short papers, labs, participation in discussion, and a research project

Prerequisites: GEOS 104 or GEOS 210 or GEOS 215 or MAST 311 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Geoscience majors, students who commit to the Spring Break trip

GEOS 401 (F) Global Tectonics and the Rise of Mountains (WS)

Fifty years after the sea-floor spreading hypothesis was first verified using magnetic anomalies, we have spectacular data sets from paleomagnetism, seismology, volcanism, the Global Positioning System, and digital elevation models that provide rich details into the kinematics and mechanisms of present and past plate motions. After an introduction to the theory of plate tectonics, local field trips, supplemented by reading assignments, will illustrate how field observations can be used to reconstruct tectonic environments in ancient mountain belts. We will also use journal articles to explore ways in which plate tectonics help explain the evolution of mountain belts with special emphasis on the Appalachians.

Class Format: weekly one-hour meetings, in addition, there will be five field trips early in the semester on Thursday from 11:20 to 3:50 pm

Requirements/Evaluation: six papers, three based on field trips and three based on journal articles, and critiques of partner's papers

Prerequisites: GEOS 301 or 303 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: \$15 for field supplies

Distributions: (D3) (WS)

Writing Skills Notes: Six 5- to 10-page papers throughout the semester based on data collected during field trips (3) and journal articles (3). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

GEOS 404 (S) Coastal Processes and Geomorphology (QFR)

Cross-listings: MAST 404 ENVI 404 GEOS 404

Primary Cross-listing

Can people live safely along the coast? Recent events like SuperStorm Sandy and the Tohoku Tsunami have shown us how the ocean can rise up suddenly and wreak havoc on our lives and coastal infrastructure. Only educated geoscientists can evaluate the risks and define informed strategies to prevent future coastal catastrophes. Currently almost half the global population lives within 100 km of the coast, with a large percent of those living in densely populated cities (e.g., New York, New Orleans, Los Angeles, Shanghai, Hong Kong, Cape Town, Sydney, Mumbai). Despite the growing risks and challenges associated with climate change and rising sea levels, the coastal population continues to grow rapidly. To help ensure these growing populations can live safely along the coast requires a detailed understanding of the processes that shape the coastal zone. These processes act across a variety of scales, from deep-time geologic processes that dictate coastal shape and structure, to decadal-scale processes that determine shoreline position and evolution, to weekly and daily processes such as storms and tides. This course will provide an in-depth look at the forces--wind, waves, storms, and people--that shape the coastal zone, as well as the geologic formations--sandy beaches, rocky cliffs, barrier islands, deltas, and coral reefs--that are acted upon and resist these forces. Coastal dynamics are strongly affected by human interventions, such as seawalls, dredged channels, and sand dune removal, as well as by sea level rise and changes in storm frequency and magnitude associated with climate change. Finally, the course will provide students with a perspective on how the U.S. seeks to manage its coastal zone, focusing on sea level rise and coastal development. This class will include a quantitative lab that will use MATLAB software to model and evaluate various coastal processes. Students will gain a basic understanding of MATLAB functionality, and will be asked to independently apply what they have learned to various data sets provided by the instructor.

GEOS 405 (F) Geochemistry: Understanding Earth's Environment

Cross-listings: GEOS 405 ENVI 405

Primary Cross-listing

Rocks, water, air, life: what comprises these interconnected components of the Earth system? How do they interact today, and how did these interactions differ in the past? In this course we will study how chemical elements are distributed in the Earth, cycle through the Earth system, and act together to produce a planet that is habitable. As Earth's landscapes and oceans, and the life they harbor, have evolved through time, they have left an imprint in the geological record that we can read using geochemical tools such as molecular fossils, elemental ratios, and stable and radioactive isotopes. Topics include the synthesis of elements in stars, the formation and differentiation of planet Earth; radiometric dating; the major constituents of the atmosphere, rain, rocks, rivers and the ocean; how they're linked by chemical weathering and biological activity; and reconstruction of past environments. Students will explore these topics through lecture; reading and discussing articles from the scientific literature; and collecting, analyzing and interpreting data from environmental samples.

Requirements/Evaluation: seminar discussions, papers, labs and final project

Prerequisites: two 200-level GEOS courses and at least one of GEOS 302 or 303

Enrollment Limit: 10

Enrollment Preferences: senior Geosciences majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

GEOS 405 (D3) ENVI 405 (D3)

Attributes: ENVI Natural World Electives

Not offered current academic year

GEOS 411 (F) Geobiology

Geobiology--the study of interactions between earth and life over geologic timescales--is a new and interdisciplinary field that has grown out of exciting advances in earth and life sciences. During this course we will examine the many ways in which organisms -- from bacteria to trees -- have left their mark on our planet. Topics include the origin of life, the rise of oxygen in the earth's atmosphere, the evolution of biomineralization, the environmental context for animal evolution, the role of microbial communities in the earth system, the emergence of land plants, and the potential for planet-life interactions elsewhere in our solar system. Geobiology incorporates tools and ideas from geochemistry, paleontology, microbiology, and sedimentology. Class time will be divided between lectures and student-led discussions of primary literature. Labs will be varied and involve everything from growing our own microbial ecosystems to querying online databases and analyzing geological, geochemical, genetic, and paleontological data. Our field trip will take us to Upstate New York where we will sample water from a stratified lake and visit ancient microbial fossil reefs. The final project will involve writing a proposal in small groups on a geobiological topic based on the style and format of a National Science Foundation grant, and presenting the idea to the class.

Requirements/Evaluation: labs, short papers, final grant proposal and presentation

Prerequisites: GEOS 212 or GEOS 312T; or GEOS 101 + any 200-level GEOS course; or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: Senior Geoscience majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Winter Study -----

GEOS 12 (W) Geology of the National Parks

Cross-listings: ENVI 12 GEOS 12

Primary Cross-listing

A vicarious trip through a variety of the national parks of the U.S. and Canada to appreciate the geological basis of their spectacular scenery. Parks

will be selected to portray a wide range of geological processes (volcanism, desert and coastal erosion, mountain building, glaciation, etc.). We will meet most mornings during the first two weeks for highly illustrated classes supplemented by the interpretation of topographic and geologic maps and by out-of-class study of rock samples. Reading will be from a paperbound text *PARKS AND PLATES* and from short publications of the U.S. Geological Survey and natural history associations linked to the parks. The second part of the month will involve independent study and meetings with the instructor to prepare an oral report about the geology of a park of the student's choice. These reports during the last week will be comprehensive and well illustrated, using PowerPoint and pertinent maps and samples. A detailed outline and list of references will be provided to the group at the time of the presentation.

Requirements/Evaluation: final project or presentation; participation in class meetings

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference to first-year students who have had no previous college study of geology

Grading: pass/fail only

Materials/Lab Fee: approximately \$150 for books

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 12 GEOS 12

Winter 2020

LEC Section: 01 TBA Cancelled

GEOS 22 (W) Geosciences Research

Students will spend part of Winter Study doing fieldwork collecting data. Back at Williams, they will analyze the data. Each student will have responsibility for a subset of the data, and the individual sub-projects will contribute to the overall research.

Class Format: to be arranged with instructor

Requirements/Evaluation: final project

Prerequisites: two Geosciences courses; permission of the instructor required before registering for the course

Enrollment Limit: 3

Expected Class Size: 3

Grading: pass/fail only

Winter 2020

LEC Section: 01 TBA Mea S. Cook

GEOS 31 (W) Senior Thesis: Geosciences

To be taken by students registered for Geosciences 493-494.

Class Format: thesis

Grading: pass/fail only

Winter 2020

HON Section: 01 TBA Mea S. Cook

GEOS 99 (W) Independent Study: Geosciences

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

- Janneke van de Stadt, Chair of German and Russian and Professor of Russian
- Amanda Turner, TA
- Michael Chapman, TA

STUDY OF GERMAN LANGUAGE AND GERMAN-LANGUAGE CULTURE

The department provides language instruction to enable the student to acquire all four linguistic skills: understanding, speaking, reading, and writing. German 101-W-102 stresses communicative competence and covers German grammar in full. German 103 combines a review of grammar with extensive practice in reading and conversation. German 104 aims to develop facility in speaking, writing, and reading. German 120 is a compact/intensive communicative German course that strives to cover two semesters of the language in one. German 201 emphasizes accuracy and idiomatic expression in speaking and writing. German 202-209 combines advanced language study with the examination of topics in German-speaking cultures. The 202 and up course level may be taken twice with different content for major credit. Each year the department offers upper-level courses treating various topics from the German-language intellectual, cultural, and social world in which reading, discussion and writing are in German. Students who have studied German in secondary school should take the placement test given during First Days in September to determine which course to take.

STUDY ABROAD

The department strongly encourages students who wish to attain fluency in German to spend a semester or year studying in Germany or Austria, either independently or in one of several approved foreign study programs. German 104 or the equivalent is the minimum requirement for junior-year abroad programs sponsored by American institutions. Students who wish to enroll directly in a German-speaking university should complete at least 201 or the equivalent. In any case, all students considering study-abroad should discuss their language preparation with a member of the department.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

The department can tentatively pre-approve courses for major or certificate credit, based on information from the study away program or the course catalog, if direct enrollment, but final credit is only granted after review of the courses and the grades once taken.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, plus conversations with the student if necessary.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Students may not count language courses in other languages (e.g., Italian) for major credit, nor natural science or math courses.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

One of our majors who is pre-med thought he could take Chemistry of Biology in Germany and have it count toward the German major, but that is not the case.

THE CERTIFICATE IN GERMAN

To enhance a student's educational and professional profiles, the department offers the Certificate in German. It requires seven courses—three fewer than the major—and is especially appropriate for students who begin study of the language at Williams.

Students who enter Williams with previous training in German may substitute more advanced courses for the 100-level courses; they can also be exempted from up to two of the required courses.

The student must achieve proficiency at the level of a B in German 104 or the equivalent.

Appropriate elective courses can usually be found among the offerings of German, Art History, History, Music, Philosophy, Political Science, and Theatre.

Required Courses

German 101

German 102

German 103

German 104

German 201

Elective Courses

at least one course (in German or English) on German cultural history (literature, art, drama, music)

at least one course (in German or English) on German intellectual, political, or social history

THE MAJOR

The German major offers students an interdisciplinary approach to German intellectual and cultural history by combining courses in German language and literature with courses in History, Philosophy, Music, and other appropriate fields.

For students who start German at Williams, the major requires a minimum of ten courses: German 101-102, 103, 104, 201 and 202; two 300-level German courses; and two electives from either German courses numbered above 202 or appropriate offerings in other departments.

For students who have acquired intermediate or greater proficiency in the language before coming to Williams, the minimum requirement is nine courses: German 202; two 300-level German courses; and six other courses selected from German courses numbered above 102 and appropriate offerings in other departments.

Examples of appropriate courses in other departments are:

Art History 267 Art in Germany: 1960 to the Present

History 239 Modern German History

History 338 The History of the Holocaust

Music 108 The Symphony

Music 117 Mozart

Music 118 Bach

Music 120 Beethoven

Philosophy 309 Kant

Students may receive major credit for as many as four courses taken during study abroad in Germany or Austria in the junior year.

THE DEGREE WITH HONORS IN GERMAN

Students earn honors by completing a senior thesis (German 493-W31-494) of honors quality.

Students interested in honors should consult with the department chair no later than April 15 of their junior year. The usual qualifications for pursuing honors are: (1) an overall GPA of 3.33 or better, (2) a departmental GPA of 3.67 or better, (3) a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

GERM 101 (F) Elementary German

German 101-102 is for students with no previous study of German. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. We focus initially on practice in understanding the spoken language and then move rapidly to basic forms of dialogue and self-expression. In the second semester, reading and especially writing come increasingly into play.

Class Format: discussion, meets five days a week

Requirements/Evaluation: active class participation, written homework, short compositions, oral exercises and tests

Prerequisites: none

Enrollment Limit: 18

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Unit Notes: students registered for GERM 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (GERM 101 and 102) are taken

Distributions: (D1)

Fall 2019

LEC Section: 01 M-F 10:00 am - 10:50 am Gail M. Newman

GERM 102 (S) Elementary German

German 102 is a continuation of German 101, and will provide you with a further introduction to the language and cultures of German-speaking countries. You will have the opportunity to practice listening, reading, writing, and speaking in German both through in-class activities and homework assignments. During the semester, you will learn about various cultural perspectives, products, and practices of German-speaking countries. Some of the topics that will be addressed this semester include the following: housing; housework; geography and landscape; transportation; travel plans and experiences; food and drink; cooking and ordering food at restaurants; childhood and youth; fairy tales; health and personal hygiene; family, marriage, and partnership; community issues in a multicultural society; literature, music, and film. *This language course is conducted in German.*

Requirements/Evaluation: active class participation, midterm & final exams, essays, quizzes, homework

Prerequisites: GERM 101 or equivalent

Enrollment Limit: 18

Enrollment Preferences: first-year students

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Unit Notes: students registered for GERM 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (GERM 101 and 102) are taken

Distributions: (D1)

Spring 2020

SEM Section: 01 M-F 10:00 am - 10:50 am Susanne Fuchs

GERM 103 (F) Intermediate German I

In this course students will further develop their German language skills, by discussing a variety of cultural topics and themes in the German-speaking world. Through extensive work on expanding vocabulary, reviewing major grammar topics, conversation and composition exercises, the students will strengthen their language skills and develop cultural competency. The course focuses on real communication in meaningful contexts, to develop and consolidate students' speaking, listening, reading and writing abilities at the intermediate level. Using a variety of media, such as texts, video and audio, students will explore various themes and cultural topics in the German-speaking world. Students will have the opportunity to practice and improve their spoken and written German skills through in-class activities and homework assignments. The course is taught in German. Active and dedicated participation including homework is expected.

Requirements/Evaluation: active class participation, midterm and final exams, quizzes, essays, homework

Prerequisites: GERM 102 or equivalent

Enrollment Limit: 18

Enrollment Preferences: first-year students

GERM 118 (F) Animal Subjects (DPE)

Cross-listings: COMP 118 GERM 118

Secondary Cross-listing

Nonhuman animals constitute the limit against which humans define themselves; at the same time, they challenge such boundaries. Thinking about animals, then, always also means exploring our own humanity. In this tutorial, we will draw on the vast archive of literature, philosophy, and art that engages animals in order to reconsider what and how these representations mean. Bringing philosophers and poets into conversation with one another, we will critically examine common assumptions about other beings as we probe the categories that structure our perceptions. Considering our complex relationships with other animals, we will address questions of ontology, aesthetics, and ethics: What makes an animal? Can animals be represented? How should animal suffering affect us? In order to approach such questions, we will focus on the intricate entanglements that constitute human and nonhuman lives, emphasizing moments of contact and conflict.

Requirements/Evaluation: regular attendance and participation, alternating 4- to 6-page tutorial papers, and 2-page critiques

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students

Expected Class Size: 8

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 118 (D1) GERM 118 (D1)

Difference, Power, and Equity Notes: The course considers the connections between different systems of oppression by examining the ways in which tropes of animality are transferred onto marginalized human groups, including, but not limited to, women and people of color. Students will also acquire the critical tools to recognize and investigate instances of interlocking violence that frequently hide in plain sight.

Not offered current academic year

GERM 120 (S) Turbodeutsch: Accelerated Elementary German

An accelerated version of Elementary German, covering nearly all the material of GERM 101-102 in one semester. The course employs a communicative approach involving all four language skills: listening comprehension, speaking, reading, and writing. Best suited to very committed students who have had no previous German, or to students who have had some previous German but who did not place into GERM 103. The course will meet every day, including three 50-minute periods on MWF and 2 75-minute periods on TR, plus a required TA session at a time to be arranged.

Requirements/Evaluation: active participation, tests, quizzes, final exam

Prerequisites: students with demonstrated need to take the language in only one semester; students also need to show a great deal of commitment to learning German

Enrollment Limit: 12

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

GERM 201 (F) Reisefieber: Germans On the Road for Adventure, Wealth, Escape

We will investigate potent myths of North America and Africa that fuelled German emigration and adventurism, and we will also look at inner-German travel stories. Our subjects are from diverse backgrounds and eras: Glikl, a Jewish businesswoman and mother of fourteen deals in pearls and gold in the seventeenth century, Johann Jacob Astor makes a fortune in the fur trade and real estate, in 1882, Hermann, a young worker exchanges his cramped life in an industrial slum for the Midwest, in 1909, a German worker travels to Cameroon to build a railway line through the jungle, in 1923, Martha, a young single woman, ships out from Bremerhaven to work in the United States, in the 1990s, Louise, a descendant of the famous Jacobs coffee company seeks out the cowboy lifestyle in the American West, in 1988, Freya, a GDR peace activist is deported to the West, the 2016 documentary *Heymatloz* chronicles the escape of 1,000 German-Jewish academics from Nazi Germany to Atatürk's Turkey. We may also analyze films and tales about the potent myth of the "Wild West" and noble Indians, promoted by nineteenth-century bestselling author Karl May, and their afterlife in contemporary movies.

Requirements/Evaluation: three short oral presentations, midterm, and 10-page final project

Prerequisites: GERM 104 or see instructor

Enrollment Limit: 15

Enrollment Preferences: German majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: reader packet

Distributions: (D1)

Fall 2019

GERM 202 (S) German Comics

The goal of this advanced course is to study language and culture through the exploration of German-language comics. Despite the boom in the production of comics since the reunification and the appearance of numerous talented artists in the German speaking world, German comics remain largely unknown and unrecognized abroad. This course seeks to introduce students to this rich, active genre and to deepen their understanding of it by allowing them to engage with its broad spectrum of subjects and styles. The course will address a variety of recent comics ranging from graphic novels by Tim Dinter, Line Hoven, Kati Rickenbach, and Olivia Vieweg to literary comics by Flix, Isabel Kreitz, as well as historical comics by Simon Schwartz, and Elke Steiner, not to forget German mangas *Bloody Circus* by Jürgen Seebeck! The course will also address a variety of genres such as humor with *Der bewegte Mann* by Ralf König, biography with *Schiller* by Horus, and autobiography with *Smalltown Boy* by Andreas Michalke, and *Held* by Flix. What are the recurrent themes in German comics? What kind of current political issues do these comics raise and what type of contemporary anxieties do they express? These are some of the questions the course seeks to answer. *This course is conducted entirely in German.*

Requirements/Evaluation: three 3- to 5-page paper and one final project

Prerequisites: GERM 104 and GERM 201

Enrollment Limit: 19

Enrollment Preferences: German majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

GERM 203 (S) Hansestadt Hamburg

"Wenn Du in Hamburger Hopn platt snacken kannst, dann geht immer eine Dör mer auf". Hamburg, the second largest city in Germany (with 1.8 million inhabitants), always had a particular significance within German cultural consciousness. Part of the Hanseatic League since the Middle Ages, the Free City of Hamburg quickly became an important commercial center in Northern Europe and a prosperous city of traders and merchants. Located on the river Elbe and in close proximity to the North Sea, the city-state Hamburg is still a major port city which has long benefited trading activities and fostered an exposure to other cultures. Called the gateway to the world (because the port was for a long time the gateway to the Americas) and the Venice of the North (the city is surrounded by water and features more canals, streams, and bridges than Amsterdam), later on completely destroyed by the World War II bombing raids, Hamburg is a city of contrasts: infamous for its dialect (Plattdeutsch) as well as its red light district (St Pauli), renowned for its journalism (*Der Spiegel*, *Die Zeit*) and culture scene, famous for its culinary specialties, (the burger might have been invented there) and its sports culture (soccer, handball, basketball), Hamburg has a rich past and a multicultural present that this course will examine. In order to gain a deeper insight into the geography, history, and culture of this fascinating city, we will read the autobiography by Hans-Jürgen Massaquoi, novels by Uwe Timm, short stories by Yoko Tawada and Siegfried Lenz, listen to songs by Hans Albers, Wolf Biermann, Udo Lindenberg, the Hip Hop band Fettes Brot, and watch movies by Fatih Akin, Sandra Nettelbeck, Christian Alvar, Özgür Yildirim, and Leander Haußmann. Taught in German.

Requirements/Evaluation: oral presentations, four 3- to 5-page papers in German, midterm and final exams

Prerequisites: GERM 201 or equivalent

GERM 204 (S) Stranger Things: The German Novella

Goethe's famous description of the novella as an "unheard of event" holds true to this day: scandals, murder, and the supernatural abound in this seminal German genre. Both meticulously structured and notoriously difficult to define, the novella as a form mirrors the paradoxes of its narratives. In this course, we will ask how form and content come together in the novella to engender strange occurrences that vacillate between everyday experiences and fever dreams. As we trace the development of the novella over the course of two hundred years of German literary history, we will explore how the eerie phenomena at the genre's core reflect specific historic moments only to transcend them. What is it about the German novella that creates such a particular sense of unease, and how does this genre mediate modern experience? *Taught in German*.

Requirements/Evaluation: three 2-page critical responses, oral presentation, 6-page final paper

Prerequisites: GERM 201 or equivalent

Enrollment Limit: 20

Enrollment Preferences: German majors

Expected Class Size: 8

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

GERM 209 (S) Green Germany: Literature, Film, and the Environment

Today, Germany is known as a world-wide leader in environmental policies, sustainable energy, and conservation efforts. This "green" culture, however, is not a new phenomenon, but has long constituted an essential part of German identity. In this course, we will trace Germany's relationship with the environment over the course of 200 years of cultural production. Among other things, we will consider the Romantic fascination with the sublime powers of an uncontrollable wild nature, discuss the ecological underpinnings of Nazi ideology, analyze the effects of the nuclear disaster in Chernobyl on German society, and read about the role recycling currently plays as a practice of integration for refugees. Including texts and films by Alina Bronsky, Ilija Trojanow, Ludwig Tieck, Christa Wolf, Rainer Maria Rilke, Baran bo Odar and Jantje Friese, and Doris Dörrie. *Taught in German*.

Requirements/Evaluation: oral presentation, bi-weekly 1-page response papers, final project

Prerequisites: GERM 201 or equivalent

Enrollment Limit: none

Enrollment Preferences: German majors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Spring 2020

GERM 210 (S) The Holocaust in the German Imagination

How do we think about an event that unsettles the very notion of representation? An indelible part of German history and culture, the Holocaust continues to challenge the artistic imagination by simultaneously calling for and resisting interpretation. This course examines the various ways in which German-speaking writers, artists, and directors have responded to this call since the 1930s. We will explore questions of memory and postmemory, the entanglements of trauma, guilt, and testimony, as well as the tensions and continuities between Germany's rich cultural heritage and portrayals of the Holocaust. Taking into consideration different forms of artistic expression, such as literature, film, and visual art, including sites of commemoration, this class will trace the relationship between past and present. What might it mean to write and think in the language of the perpetrators? How do texts by Holocaust survivors and first-hand witnesses relate to those created by later generations? What are the differences between West and East German representations of the Shoah, and how do they differ from how immigrants in Germany or Austrian artists engage with the event? Among others, we will read texts by Paul Celan, Nelly Sachs, Anna Seghers, Ruth Klüger, Ingeborg Bachmann, Elfriede Jelinek, Peter Weiss, W. G. Sebald, and Zafer Senocak, as well as watch films by Michael Haneke, Max Färberböck, Frank Beyer, Volker Schlöndorff, Stefan Ruzowitzky, and Caroline Link. *Conducted in German*.

Requirements/Evaluation: short critical papers, oral presentation

Prerequisites: GERM 202 or the equivalent

Enrollment Limit: none

Enrollment Preferences: prospective German majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

GERM 276 (S) Black Europeans

Cross-listings: AFR 276 COMP 276 GERM 276

Secondary Cross-listing

This course explores the in/visibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher, philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants--such as Hyacinthe Rigaud's Portrait of Marquise de Louville (1708), Nicolas Lancret's The Escaped Bird (1730), and Manet's Olympia (1863) to name a few--and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-years, sophomores, and juniors

Expected Class Size: 8

Cross-listings: COMP 280 JWST 280 GERM 280

Primary Cross-listing

The Holocaust poses unique challenges to art: it is an event that unsettles the very notion of representation while, at the same time, also demanding it. Art, after all, is a mode of witnessing as well as a form of commemoration; it allows survivors to record their testimony and later generations to remember. Yet the representation of suffering can all too easily become exploitative or aestheticizing, it can turn pain into entertainment and history into fiction. How, then, do writers, artists, and filmmakers navigate the representation of the Shoah if it resists comprehension and undermines traditional forms of narrative? In this course, we will ask if and how art can do justice to a catastrophe of such magnitude as the Holocaust by analyzing different forms of media from a variety of cultural backgrounds. What can poetry offer that remains foreclosed to prose? Was Art

Spiegelman's graphic novel *Maus* really in bad taste? How should documentaries approach the Shoah, and is there a place for Hollywood films in the archives of commemoration? Texts among others by Tadeusz Borowski, Tadeusz Rózewicz, Art Spiegelman, Paul Celan, Primo Levi, Sylvia Plath, Hannah Arendt, Theodor W. Adorno, Jacques Derrida, and Maurice Blanchot; films by Quentin Tarantino, Claude Lanzmann, Paweł Pawlikowski, and Steven Spielberg.

Requirements/Evaluation: three 2-page critical responses, oral presentation, final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: German and Comparative Literature majors

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 280 (D1) JWST 280 (D2) GERM 280 (D1)

Writing Skills Notes: Three 2-page papers spaced over the course of the semester on which students will receive detailed feedback and which they will be able to revise; the final project will either be a 10-page paper or a creative project accompanied by a 4-page reflection that will consider the creative component in relation to the themes of the course. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course will examine how art can help us think about the catastrophic abuses of power in the Third Reich. While many of the texts we will examine focus on the stories of Jewish people, the class will also consider how the narratives of other persecuted groups, including the Sinti and Roma, people with disabilities, and LGBTQ victims and survivors, relate to and differ from these experiences.

Fall 2019

SEM Section: 01 Cancelled

GERM 300 (F) Mannweiber: Masculine Women in German Culture

The German word "Mannweib" is a literal translation of the Greek "androgynous" and is a derogatory term for a woman who acts in a masculine way. This survey course examines the recurrence of "masculine femininity" in German culture with a particular focus on literary texts, operas, paintings, and films, all crafted at turning points in German history. Why does the Mannweib emerge at times of major political and historical upheavals? How does this atypical masculine woman contribute to the construction of a German national identity? These are some of the key questions this course seeks to address. We will read the Nibelungenlied epic, poems by Freiligrath, plays by Lessing, Schiller, Goethe, Kleist, and Dürrenmatt, as well as short stories by Stifter, watch operas by Wagner, and films by Sternberg and Tykwer. In all these materials featuring a Mannweib as main protagonist, we will look at the way masculine femininity is construed as unnatural and literally constructed to serve either a patriarchal or a patriotic purpose. We will also examine the misogyny underlying the artistic creation of these masculine women, either enshrined as allegories of virtue or perceived as dangerous agents of socio-political change, and ultimately doomed to rejection from the moment these misfits step out of their assigned role. *Conducted in German.*

Requirements/Evaluation: oral presentations and three 3- to 5-page papers written in German

Prerequisites: GERM 200-level courses

Enrollment Limit: 19

Enrollment Preferences: German majors and concentrators

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

GERM 304 (S) Rebels and Conformists: Postwar Germany from The 'Economic Miracle' to the Fall of the Wall

Cross-listings: GERM 304 WGSS 304

Primary Cross-listing

In postwar West Germany, a thorough examination of the Nazi past took a backseat to economic recovery and repairing the country's international standing, whereas to some extent the reverse was true for the East. An authoritarian democracy, an emphasis on consumerism and the qualitatively different experiences of younger generations led them to question whether the Federal Republic was a restoration or a new beginning? In the East, the cold war led to an increasingly Stalinist interpretation of communist principles, while communist ideals were upheld as an antidote to Nazism and the new materialism. This tutorial will cover a wide range of social protest as reflected in literature and film of the two Germanies: critical responses to the Holocaust in the two countries, the 1968 student revolution, anti-capitalist terrorism by the Baader-Meinhof gang, the feminist and gay rights movements, reformers and repression under Ulbricht and Honecker in the GDR, minority rights and environmental activists. Authors will include: Peter Weiss, *Die Ermittlung*, Heinrich Böll, *Und sagte kein einziges Wort*, Gisela Elsner, *Riesenzwerge*, Emine Sevgi Özdamar, *Das Leben ist eine Karawanserei*, Volker Braun, *Unvollendete Geschichte*, Alice Schwarzer, *Der kleine Unterschied und seine großen Folgen*, Christian Kracht, *Faserland*, Thomas Brussig, *Wasserfarben*. Films may include: Gerhard Klein, "Berlin-Ecke Schönhauser," Ulrich Plenzdorf, "Die Legende von Paul und Paula," Rainer Werner Fassbinder, "Angst essen Seele auf," Reinhard Hauff, "Messer im Kopf," Uli Edel, "Der Baader- Meinhof Komplex," Margarethe v. Trotta, "Das zweite Erwachen der Christa Klages," Heiner Carow, "Coming Out," Hans Weingartner, "Die fetten Jahre sind vorbei."

Class Format: tutorial

Requirements/Evaluation: alternating 4-page tutorial papers, and 2-page critiques

Prerequisites: GERM 202 and permission of the instructor

Enrollment Limit: 10

Enrollment Preferences: German majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: \$80 books

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

GERM 316 (S) "Wer ist wir?": Recent Debates over Multiculture in Germany

German chancellor Angela Merkel controversially claimed in 2010: "Multikulti ist gescheitert." (Multiculturalism has failed in Germany). We will investigate different perspectives on Germany's integration of minorities. In the 1960s, government labor contracts brought large numbers of foreign workers into the country and facilitated the "economic miracle." How did the newcomers adapt to life in Germany and what did they hold on to from their home cultures? How did subsequent generations experience life in Germany? What were the major political shifts that took place regarding citizenship and participation in the public sphere? How do popular media portray minorities? How do members of minority groups portray themselves? We will read texts by: Zafer Senocak, Hatice Akyün, Yoko Tawada, Marica Bodrozic, Navid Kermani, Wladimir Kaminer, view feature films and documentaries, and discuss a wide range of social commentary and analyses across the political spectrum from right wing populists to left liberals: Thilo Sarrazin, Kirsten Heisig, Astrid Geisler and Christoph Schultheis, Wilhelm Heitmeyer, Alexander Häusler, Freya Klier, Mark Terkessidids, Rita Süssmuth and others.

Requirements/Evaluation: four 5-page papers in German

Prerequisites: GERM 202 or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: German majors, but open to all with appropriate language skills

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: GBST Borders, Exiles + Diaspora Studies Electives

Not offered current academic year

GERM 317 (F) The New Woman in Weimar Culture (WS)

Cross-listings: GERM 317 WGSS 317

Primary Cross-listing

This course explores the figure of the New Woman, a professional, political, independent, and modern woman, that rises in Germany right at the end of World War I and thrives during the Weimar Republic. Acclaimed as the epitome of Weimar Modernity, the New Woman is nevertheless greeted with great ambivalence: whether a liberated and emancipated woman for some, or a dangerous and promiscuous woman loathed by others, she is perceived as threatening to the patriarchal order. A closer look at artworks by Otto Dix, Christian Schad, and Hannah Höch, films by Fritz Lang and Georg Wilhelm Pabst, poems by Gottfried Benn, Else Lasker-Schüler, and Kurt Tucholsky, novels by Erich Kästner, Vicky Baum, and Irmgard Keun, as well as plays by Frank Wedekind and Bertolt Brecht, will provide a more precise picture of the New Woman's various incarnations, ranging from actresses (Marlene Dietrich), singers (Margo Lion and Claire Waldorf), and dancers (Anita Berber) to prostitutes, and suggest that the New Woman serves as the vessel of male anxieties and represents the contradictions of modernity. *Taught in German.*

Class Format: taught seminar style in German for the German students and as a tutorial in English for non German speaking students

Requirements/Evaluation: papers and oral presentations

Prerequisites: for students taking it in German: GERM 201 or the equivalent; for students taking the course in English: one college-level literature course

Enrollment Limit: 19

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GERM 317 (D1) WGSS 317 (D1)

Writing Skills Notes: Students will submit multiple drafts of their papers. Focus is on argument and thesis statement, introduction and conclusion as well as literary analysis and interpretation of primary and secondary literature. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2019

SEM Section: 01 MR 1:10 pm - 2:25 pm Christophe A. Kone

GERM 320 (S) German Romanticism (WS)

German Romanticism is a multifaceted, even contradictory phenomenon. Its earliest practitioners Novalis (Friedrich von Hardenberg) and Friedrich Schlegel could be seen as enacting a culmination of Enlightenment optimism about the emancipatory potential of the human mind, with their advocacy of an "aesthetic revolution," equality for women and Jews, and a holistic relationship to nature. Later, some of the first feminists (Caroline Schlegel-Schelling, Bettina Brentano von Arnim) worked side-by-side with authors who essentialized women into primal lures and primal threats (Ludwig Tieck, Joseph von Eichendorff). One of the most famous Romantics of all, E. T. A. Hoffmann, combined high irony and a penchant for the irrational in his fascinating works. This course will explore the paradoxes of German Romanticism through close readings of aphorisms, stories, fairy tales, poetry, essays, and music.

Requirements/Evaluation: intensive participation, frequent written responses, two shorter papers to be written in stages, and a longer final project

Prerequisites: GERM 202 or the equivalent

Enrollment Limit: none

Enrollment Preferences: German students

Expected Class Size: 8

Grading: yes pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: The course will involve intensive work with writing analytical papers, including short responses to most texts, two papers that will be written in stages, and a longer final project that will include work shopping drafts in tutorial format

Spring 2020

SEM Section: 01 MR 1:10 pm - 2:25 pm Gail M. Newman

GERM 321 (F) Lust, Liebe und Gewalt

In this course, we will reflect on the intimate relationship between love, lust, and violence, examining how love and lust do not exclude violence, but rather include---if not provoke---it. In order to gain a better understanding of the dynamics formed by this fascinating triangle, we will read novels by Goethe and Schnitzler, short stories by Kleist, Hoffmann, Mann, plays by Büchner, Hauptmann and Wedekind, and watch films by Faßbinder, Haneke and Muskala. *Conducted in German.*

Class Format: seminar

Requirements/Evaluation: papers and oral presentations

Prerequisites: GERM 201 or the equivalent

Enrollment Limit: 10

Enrollment Preferences: German majors

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

GERM 331 (F) Silence, Loss, and (Non)Memory in Austria 1900-the Present (DPE)

Cross-listings: COMP 347 GERM 331

Primary Cross-listing

One hundred years after the fall of the Austro-Hungarian Empire at the end of World War I, Austria is, on the one hand, a tiny fragment of its former self. Since that signal loss, Austria's identity has been closely tied to its ghostly past, for better or for worse. Think of Austria and glittering Klimt paintings come to mind, or the majestic Alps of *The Sound of Music*, or perhaps a melody from Mozart or Strauss plays in the ear. And no wonder: tourism is one of the largest industries in Austria; the nation lives on being seen and heard. But a great deal is invisible and inaudible to the tourist in Austria. In this course we will explore the hidden core of Austrian culture from 1900 to the present. We'll begin with the tremendous intellectual ferment surrounding Sigmund Freud's elaboration of the unconscious at the turn of the century, from Hofmannsthal's paralysis of language through Schnitzler's streams of consciousness to Kafka's carefully crafted renderings of inner worlds. Then we will turn to an examination of the phenomenon of loss at the end of World War I: loss of empire, loss of relevance, loss of hierarchical certainty. Stefan Zweig documents this phenomenon timelessly. The second half of the course will focus on the driver of Austrian identity from 1938 on, the so-called Anschluss (annexation) by the Nazis, and the (non)memory of the horrors that ensued. We will probe the idiosyncratic mixture of trauma and guilt that characterizes Austria today through the work of contemporary authors and filmmakers, focusing on three: Elisabeth Reichart, whose fiction sensitively but relentlessly uncovers secrets that have become part of the fabric of forgetting in the Austrian psyche; Marcus Carney, born to an Austrian mother and an American father, who unblinkingly documents his mother's and grandmother's attempts (or non-attempts) to come to terms with their family's Nazi past, not looking away from his own complex relationship to all involved; and finally, Gerhard Roth, the author of the seven-text series *The Archives of Silence*, a monumental collection of photos, essays and novels demonstrating the fact, as Roth conveyed to me in an interview, that "we all are just as blind and deaf to the whole picture as the blind and deaf are to the usual communications of our society." Psychoanalytic theory from Freud to recent discussions of the transgenerational transmission of trauma and perpetrator guilt will provide a conceptual framework for the literary works. The tutorial may be taken in German or English. For those who do it in German, all literary readings and at least three of the papers will be in German.

Requirements/Evaluation: five 5-page papers, one revision, discussion

Prerequisites: for students taking the course in German, GERM 202 or the equivalent; for those taking it in English, one college-level literature course

Enrollment Limit: 10

Enrollment Preferences: German or Comparative Literature majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 347 (D1) GERM 331 (D1)

Difference, Power, and Equity Notes: The course includes a close and critical examination of the exercise and denial of power, namely complicity in the Holocaust and resistance to acknowledging that complicity. The investigation of Austria's curious combination of guilt and trauma can be extended

to our own context; we will discuss the consequences of not acknowledging the wrongdoings of oneself and one's own group for the moral and political health of the society.

Not offered current academic year

GERM 334 (S) Playing with Language in Austrian Literature: Interpretation, Translation, Writing (WS)

In his *Chandos-Brief*, Hugo von Hofmannsthal famously details a writer's crisis of language, in the process creating, ironically, a stunningly beautiful piece of linguistic art. Since 1902, when Hofmannsthal presented his paradoxical fictional manifesto, language has preoccupied many Austrian writers. This course will provide the opportunity to explore the intricacies of the German language via three routes: the study and interpretation of Austrian short stories from the twentieth and twenty-first centuries, experiments with translating poetry and prose from German to English, and creative writing in German. The latter will take place in the context of workshops with the contemporary Austrian writer Gabriele Petricek, who will spend two weeks in Williamstown as a Writer-in Residence. In addition to Hofmannsthal, authors read might include Arthur Schnitzler, Joseph Roth, Franz Kafka, Ingeborg Bachmann, Ilse Aichinger, Ernst Jandl, Elisabeth Reichart, and Gerhard Roth.

Requirements/Evaluation: active class participation, two 3- to 5- page analytical papers, one short translation plus a discussion of translation process, one short creative piece

Prerequisites: GERM 202 or the equivalent

Enrollment Limit: none

Enrollment Preferences: German majors and other serious students of German

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Two analytical papers, both revised; one translation, including a written reflection on process, and a workshopped creative piece. All writing in German.

Spring 2020

SEM Section: 01 Cancelled

GERM 339 (F) Posthuman Ecologies: Bodies, Environments, Art (DPE) (WS)

Cross-listings: ENVI 340 GERM 339 COMP 339

Primary Cross-listing

What is it that makes us human? Or, to paraphrase the philosopher Donna Haraway, what if we have never been human at all? One of the central arguments of posthumanist theory is that the human being is not, as traditionally assumed, an individual, fixed subject in full control over its actions. Rather, we emerge only through our connections and interdependencies with others. The networks that shape us are both organic and inorganic; they include "nature," the microbial ecologies of our bodies, affective landscapes, and social and cultural constructs. Over the course of the semester, we will analyze how such networks fashion our humanity with the help of literature, film, and theory. Among other things, we will consider the queer ecologies of android bodies, probe the subversive potential of the cyborg in relation to questions of disability, and think about what it means to be human in the Anthropocene. Texts will include Sasa Stanisic, Yoko Tawada, Olga Tokarczuk, Franz Kafka, Octavia Butler, Donna Haraway, Jacques Derrida, and Theodor W. Adorno; films will include *Mad Max: Fury Road*, *Metropolis*, *Ex-Machina*, and episodes of *West World* and *Black Mirror*.

Requirements/Evaluation: four 1-page critical response papers over the course of the semester, oral presentation, creative final project with 4-page self-analysis

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 340 (D1) GERM 339 (D1) COMP 339 (D1)

Writing Skills Notes: The 1-page papers will help students refine their argumentative skills; they will essentially contain all elements of a longer paper in miniature and provide a focused space on which to practice crafting convincing arguments. I will give students detailed feedback on these short papers. The final self-analysis will apply these skills to the student's own work. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: The questions of ecology discussed in this course are inherently questions of power: power over the natural environment, power over our own bodies and those of others, both human and nonhuman, power over resources. We will consider how the very concept of "the human" facilitates such power structures, and acquire theoretical tools to help us rethink human being beyond such coercive relations.

Fall 2019

SEM Section: 01 Cancelled

GERM 401 (F) Senior Seminar: Rethinking the Public: the Arts Take on Neoliberalism (DPE)

Cross-listings: COMP 401 WGSS 401 GERM 401

Secondary Cross-listing

Western neoliberalism is a predatory excrescence of late capitalism that overvalues competition, transferring the laws of the market to human relationships. It deliberately creates instability not only in the economic sphere but, more generally, in the social collective by encouraging dangerous risk-taking, fomenting crises and cementing systemic inequity, while suggesting to those under its sway that they are corporate 'entrepreneurs of self.' This model of self-management also extends into the sphere of intimate relationships. Of course, because predatory neoliberalism heavily favors a white investor model and is premised on white norms, the racialized body is considered a priori subaltern and subservient. Humanistic and artistic approaches (while not per se immune or outside of neoliberal constraints) effectively polemicize against neoliberalism, and suggest practices that resist its technocratic mindset. Looking at literature, cinema, and critical theory from a range of regions and disciplines, we will focus on Europe and the United States. Moreover, we will ask how forms of neoliberalism affect different regions of the world: Southeast Asia, Russia? Where and how can solidarity be reimagined beyond identity politics? Where is the boundary between animal and human in the neoliberal collective?

Class Format: three hours per week

Requirements/Evaluation: three 3-page papers, a short oral presentation, a 15-page final paper

Prerequisites: 300-level course

Enrollment Limit: 25

Enrollment Preferences: Comparative Literature majors and advanced students in other fields with permission of instructor

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Materials/Lab Fee: course books and reader packet

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 401 (D1) WGSS 401 (D2) GERM 401 (D1)

Difference, Power, and Equity Notes: This course addresses the costs to exploited groups within the neoliberal marketplace. We will discuss theoretical sources from a variety of fields (sociology, economics, philosophy, gender studies) every week that render these forms of expulsion or dispossession explicit. Far from benefiting all, the privileging of self-interest and market relations leads to increased inequality and in turn provokes violent reactions: the birth of new forms of fascism, racism and religious fundamentalism.

GERM 515 (F) Reading German for Beginners

German 515 is a beginning course for students whose principal reason for acquiring German is to work with written materials. It is particularly appropriate for students for whom the ability to read primary and secondary texts in German can be crucial. The focus of the course is on German for Art History and Criticism. In the first semester students learn the elements of grammar and acquire a core vocabulary. They begin reading and translating a variety of short texts.

Requirements/Evaluation: active class participation, homework, quizzes, tests, and a final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: although this course is designed to serve the needs of students enrolled in the Graduate Program in the History of Art, undergraduates may enroll with permission of the instructor

Expected Class Size: 12

GERM 516 (S) Readings in German Art History and Criticism

In this continuation of German 515 students develop the skills and vocabulary necessary for reading German accurately. The course introduces advanced grammatical topics and students practice reading in a variety of textual genres. They also learn how to work with dictionaries, encyclopedias, and other reference works. Texts are selected from fundamental works of art history and criticism and from the writings related to concurrent seminars in the Graduate Program. By the end of the course they will have a solid foundation for building proficiency in German, whether through self-study or further course work.

Requirements/Evaluation: active class participation, homework, quizzes, tests, and a final project

Prerequisites: GERM 515 or equivalent preparation (placement test)

Enrollment Limit: 20

Winter Study -----

GERM 11 (W) Looking at Contemporary Documentary Photography

Cross-listings: ARTH 11 GERM 11 COMP 11

Primary Cross-listing

This course explores the evolution of modern documentary photography. We will start with a look back to the work of Lewis Hine, August Sander, Dorothea Lange, Walker Evan and the Magnum Agency photographers. We will then jump to mid 20th century work of Robert Frank's *The Americans*, and how Frank's singular vision deeply shaped the next generation of photographers working the American streets and landscape. Diane Arbus, Vivian Maier, Bruce Davidson, Lee Freidlander, William Klein, Danny Lyon, Gary Winogrand are some of the photographers whose work we will get to know well. Discussions will include the new wave of independent and Magnum photojournalists (Phillip Jones Griffiths, Josef Koudleka, Susan Meiselas, Gilles Peress, James Nachtwey, Alex Webb, Ron Haviv and Tyler Hicks) and the wars from Vietnam to Bosnia to Iraq and Syria they cover as well as the personal visions they explore. Insight into the diverse currents of documentary photography will be covered through the work of Bill Burke, Larry Clark, Larry Fink, Nan Goldin, Emmet Gowin, Sally Mann, Mary Ellen Mark, Nicholas Nixon, Richard Misrach, Joel Sternfeld, Birney Imes, Regan Louie, Edward Burtynsky, Laura Letinsky and Simon Norfolk. Our last classes will be an exploration of social media and the proliferation of diverse voices emerging in documentary photography. The class will meet three mornings a week for two hours. Slide presentations will occupy half of the first meetings and give way to discussion of issues in documentary photography. Each student will be required to make a brief presentation to the class on a documentary topic of their choice. A final paper expanding on this documentary topic will be due at the end of the course. Students will be evaluated on their classroom presentation, general participation and their written work. A field trip to New York will let us see first hand works from the collections at MoMA, etc. Adjunct Instructor Bio: Kevin Bubriski's fine art photographs are in the permanent collections of the Museum of Modern Art, Metropolitan Museum of Art, San Francisco Museum of Modern Art, and Bibliotheque Nationale, Paris. Kevin has received Guggenheim, Fulbright and NEA fellowships. Bubriski has published eleven books of photography including *Nepal 1975-2011* published by Peabody Museum Press of Harvard University in 2014 and *Legacy in Stone: Syria Before War* in 2019 with powerhouse Books in New York.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: at the discretion of the instructor

Grading: pass/fail only

GLOBAL STUDIES (Div II)

Chair: Professor James Mahon

Advisory Committee

- Farid Hafez, Class of 1955 Visiting Professor of International Studies
- Ngonidzashe Munemo, Associate Dean for Institutional Diversity, Equity and Inclusion, Professor of Political Science; affiliated with: Political Science Department, Global Studies; on leave Fall 2019
- Bruce Rutherford, Class of 1955 Visiting Professor of International Studies

An informed engagement with the world is an indispensable part of the liberal education that is the goal of the Williams experience. The Global Studies Program enables students to achieve this goal through a cross-disciplinary and comparative curriculum. The program offers multiple tracks, on a region of the world or theme, around which students construct their global studies concentration.

Requirements

To complete the concentration, students must take a section of Global Studies 101; take a comparative course; fulfill the requirements of a track; and complete a senior exercise in the track.

Global Studies 101

All students wishing to pursue the concentration should take a section of Global Studies 101 early in their careers. The topics and regions covered will vary and be selective, but all will be designed to place cultural, political, economic and technological issues in conversation with one another to illustrate the necessity of cross-disciplinary and comparative perspectives. On occasion, students may petition to substitute a course equivalent in scope to Global Studies 101 to meet this requirement.

TRACKS

After taking Global Studies 101, students are asked to select a track that will structure their global studies curriculum. There are two types of track. The first focuses on a particular region of the world or a contact zone where multiple communities encounter one another. The second type is organized thematically and permits students to explore a cultural, political, economic or technological issue globally and comparatively. Each track is administered by faculty teaching in that track in consultation with the advisory committee. At present the program consists of the following tracks:

Area Tracks

African Studies

East Asian Studies

Latin American Studies

Middle Eastern Studies

Russian and Eurasian Studies

South and Southeast Asian Studies

Thematic Tracks

Borders, Exile and Diaspora Studies

Economic Development Studies

Urbanizing World

To fulfill the requirements of a track, students must complete three approved courses from at least two disciplines and address their track in their senior exercise. Faculty in each track may set an additional requirement of a level of language competency for its concentrators. Students may petition to use courses completed on approved study away programs to fulfill elective requirements. Students may not count a course toward more than one requirement in the track.

Senior Exercise

All concentrators must complete a senior exercise. The senior exercise will be a substantial piece of writing (20-25 pages) that draws together concentrators' disciplinary skills and their expertise in their track. It might be work done in the context of a senior capstone course in a relevant

department or in the context of a shared seminar sponsored by the Global Studies program. Concentrators present their final senior exercise in class or in a Global Studies colloquium, or in both.

Concentrators must also take a comparative course—that is, a course that might not cover material directly dealing with the track, but would enrich a student's engagement through comparative inquiry.

Honors

A candidate for honors in Global Studies must maintain at least a B+ average in the concentration and be admitted to candidacy by the program faculty. An honors candidate must complete their project in a semester (and Winter Study). An honors candidate will prepare a forty-page thesis or its equivalent while enrolled in the senior thesis course, 491 or 492 (and Winter Study). This course will be in addition to the courses required to fulfill the concentration.

A student wishing to become a candidate for honors in Global Studies should secure a faculty sponsor and inform the program chair in writing before spring registration of her/his junior year.

Study Away, Research, and Internships

Although not a requirement, study away, research, and/or relevant internships are an essential component of Global Studies. Where relevant to the curriculum plan of concentrators, the program Chair, in coordination with the Study Away Advisor and the Career Center, will advise students on opportunities in these areas.

FAQ

Students MUST contact department/program BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No, but students should not expect to get more than 3 study abroad courses counted towards the concentration.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Typically the Introduction to Global Studies and the senior exercise cannot be fulfilled abroad.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

Note: as course offerings change every year, students should feel free to check with the Program Chair to see if courses not listed below might count as electives.

GBST 101 (S) America and the World

Cross-listings: PSCI 120 GBST 101 LEAD 120

Secondary Cross-listing

This course will help students understand the US role in the world. US wealth and military power force its leaders to make choices that no other leaders in the world confront. Students will learn to evaluate the decisions that US leaders have made on a wide range of difficult foreign policy issues, including: rising Chinese power; Russian moves in Ukraine; nuclear proliferation to Iran; terrorist threats; humanitarian disasters in Syria and Libya; and long-term challenges like climate change. We will not only describe American involvement in various international issues but also seek to understand the reasons why the US perhaps should or should not be involved, and we will see why such careful reasoning only sometimes gains traction in actual US foreign policy debates. Finally, we will assess whether US foreign policy decisions are coherent - that is, whether the US can be said to follow a "grand strategy." By the end of the course, students will develop their ability to think about foreign policy issues, improving their ability to participate in public life as engaged citizens.

Class Format: lecture/discussion

Requirements/Evaluation: short papers, class participation, and final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: first-years and sophomores

Expected Class Size: 30

Secondary Cross-listing

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

Requirements/Evaluation: participation, two short papers, quizzes, midterm, and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled

Expected Class Size: 30-40

GBST 117 (S) Bombay/Mumbai: Making of a Modern Metropolis (WS)

Cross-listings: GBST 117 HIST 117 ASST 117

Secondary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 210 (S) The Challenge of ISIS

Cross-listings: HIST 210 ANTH 210 GBST 210 ARAB 210 REL 240

Secondary Cross-listing

What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahidin and Taliban, and al-Qaeda, the course will go on to investigate how ISIS derives important aspects of its ideology and organization from these earlier movements and how it deviates from them. We will look at unique aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.

Class Format: lecture

Requirements/Evaluation: blogs (4 main blog posts, responses to at least 3-4 other blogs each week) (30%); analytic paper or class history paper (35%); 2 midterms (35%)

Cross-listings: ANTH 212 REL 218 HIST 214 GBST 212 CHIN 214

Secondary Cross-listing

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation: short writing assignments (approximately 750 words each), quizzes, a mid-term, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

GBST 213 (F) Why do Pussies Riot and What is "Homosexual" Propaganda? Gender and Sexuality in Putin's Russia (DPE)

Cross-listings: GBST 213 RUSS 213 WGSS 214 COMP 257

Secondary Cross-listing

Since Vladimir Putin's rise to power, the media has highlighted events in Russia that at first glance resemble oddly sexualized jokes. At the same time that the Kremlin has reinstated authoritarian policy reminiscent of the Soviet Union, the Western press has chronicled Putin's topless vacations in Siberia, protests by the feminist collectives Pussy Riot and Femen, a 2011 ban on women's lacy underwear, federal legislation from 2013 prohibiting "homosexual" propaganda, and a 2017 court decision that outlawed a meme of Putin as a "gay clown." This course examines the Putin regime's ongoing attempts to police gender expression and private sexual behavior, as well as how Russian citizens' performance of gender and sexuality has changed in the past twenty years. We will consider gender and sexuality as distinctive features of Putinism, which have contributed to a biopolitical turn in official policy and inspired resistance and protest among Russian feminists and queers. *All readings will be in English, and all films with have English subtitles.*

Requirements/Evaluation: active participation in class discussions, several response papers, two short papers (3-5 pages each), and a final project

GBST 214 (S) Asian-American Identities in Motion (DPE)

Cross-listings: THEA 216 DANC 216 GBST 214 AMST 213

Secondary Cross-listing

The course aims to explore dance and movement-based performances as mediums through which identities in Asian-American (including South Asian) diasporas are cultivated, expressed, and contested. We will examine theories related to nationalism, post-colonialism and diasporic identity-formation, and learn about the socio-historical contexts in which performances are used to maintain cultural continuity. We will explore how diasporic artists use performances to enforce or resist traditional practices and ideologies. Throughout the course, we will investigate issues of race, gender, sexuality, ethnicity, nationality, tradition/innovation, agency/resistance, and borrowing/appropriation among other topics. This is primarily a discussion-based seminar course but will also include attendance at live performances in the area, film screenings, and discussion and workshops with guest artists. No previous dance experience required.

Requirements/Evaluation: reading responses and essays, class participation, and presentations

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

GBST 215 (F) Performance Ethnography (DPE)

Cross-listings: DANC 214 GBST 215 THEA 215 AMST 214 ANTH 215

Secondary Cross-listing

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement, and performance. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) readings in ethnographic studies of dance and performance practices from

different parts of the world, and (iii) field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and may include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance or performance experience is assumed or required.

Class Format: community-based field work

Requirements/Evaluation: class participation, reading responses, fieldwork and field notes, short papers, and final essay

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

GBST 216 (S) Urbanism in the Ancient World

Cross-listings: GBST 216 ANTH 216

Secondary Cross-listing

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

Requirements/Evaluation: 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required

GBST 221 (F) The Making of Modern South Asia: 1750-1950 CE

Cross-listings: GBST 221 ASST 221 HIST 221

Secondary Cross-listing

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: discussion

GBST 222 (S) Great Powers in the Middle East: The Continuing Battle over Oil, Trade Routes, and God

Cross-listings: PSCI 222 GBST 222 HIST 396 LEAD 222

Primary Cross-listing

Perhaps more than any other region, the Middle East has been shaped by the involvement of external great powers. This course explores the motives, strategies, and impacts of this involvement. We begin by studying the Christian Crusades from the 11th through the 13th centuries. We then focus on the modern period, starting with French/British competition in the early- and mid-19th century; French/British/Russian competition from the late 19th century through the end of WWII; US/USSR competition during the cold war; the current competition among the US, Russia, and China; and the great power transition that is likely to unfold over the next 20 years, as the US role in the region declines and China's role expands. Through our readings and discussions, we will examine several themes: What motivates great powers to venture into the Middle East? How do they view the local populations and interact with them? What impacts do they have on the politics, economies, societies, and cultures of the region? What can contemporary leaders of great powers learn from this history, and how can their policies be adjusted to bring greater prosperity and peace to the region? In addition to gaining greater knowledge of the long and varied involvement of great powers in the Middle East, students will also gain experience applying the disciplinary insights of history, sociology, and political science to this complex region.

Requirements/Evaluation: Class participation, a mid-term exam, and two 6- to 8-page papers

Prerequisites: none

GBST 228 (S) Performance Practices of Global Youth Cultures

Cross-listings: GBST 228 THEA 228

Secondary Cross-listing

This course investigates how young people engage in a variety of performance practices to define social identities and reflect on critical issues. We begin by examining how scholars and media have defined "youth" by way of questioning assumptions about the inherent universality of this social category. We will then explore how young people have thought about and represented themselves. Taking seriously music, dance, fashion, and ritualized uses of public space (including in the virtual realm), we will explore examples of how youth have used performance practices to engage in political activism, subvert hegemonic norms, reconfigure urban geographies, and engage in critical identity politics. Our inquiry will include attention to how youth practices travel globally and adopt new localized political meanings, as well as the ways in which the subversive potential of performances can be subsumed by the normalizing mandates of global capital. Our work in class will be based upon readings, discussions, and audiovisual materials from various parts of the world. Throughout the semester students will turn an analytical eye towards their own practices and modes of consumption. For final projects students will engage in ethnographic research about specific youth cultures in the region and on the Williams campus.

Class Format: reading and discussion

Requirements/Evaluation: includes class discussions, self-reflexive presentations and papers, journal reflections, one 10-page paper based on original research with in-class presentation

GBST 230 (F) Who was Muhammad?

Cross-listings: REL 230 GBST 230 ARAB 230

Secondary Cross-listing

Considered the Messenger of God, Muhammad is a central character of the Islamic tradition and has been the object of love and devotion for centuries. Recent outbursts sparked by controversial cartoons depicting Muhammad have made clear that he remains a revered and controversial figure even today. This course takes a critical historical perspective to the biographies of Muhammad, the founder of Islam. Rather than focus on the "facts" of his life, we will think about the ways in which historical context, political interests, and shifting conceptions of religion have influenced the way in which Muhammad has been imagined and remembered. We will also consider the ways in which Muslim and non-Muslim biographies of Muhammad are intertwined and interdependent, often developing in tandem with one another. By exploring Muslim and non-Muslim, pre-modern and modern accounts of Muhammad's life, we will think about the many ways in which Muhammad's life has been told and re-told over the centuries. In this course we will consider some of the following depictions of Muhammad: Muhammad as the object of ritual devotion; Muhammad as statesman and military leader; Muhammad's polygynous marriages and his young wife, Aisha; Muhammad as social reformer and revolutionary. Course readings will include pre-modern biographies (in translation) as well as contemporary Muslim and non-Muslim biographies.

Class Format: seminar

Requirements/Evaluation: reading responses, 3 short essays (3-4 pages double-spaced), and final exam

GBST 234 (F) What is Islam? (DPE)

Cross-listings: ARAB 234 GBST 234 REL 234 HIST 208

Secondary Cross-listing

This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

Requirements/Evaluation: reading responses, two essays, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

GBST 236 (S) Reading the Qur'an

Cross-listings: ARAB 236 COMP 213 GBST 236 REL 236

Secondary Cross-listing

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur'anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

Requirements/Evaluation: class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay

GBST 241 (S) History of Sexuality

Cross-listings: GBST 241 REL 241 HIST 292 WGSS 239

Secondary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

GBST 244 (S) Mediterranean Journeys (DPE)

Cross-listings: GBST 244 COMP 244

Secondary Cross-listing

Though European border management today seeks to limit and control movement, the Mediterranean region is a historical site of mediation between cultural differences and religious views. This course centers primarily on the works of the so-called "migrant intellectuals and artists" who have emerged from the Mediterranean region to become a significant part of the new voice of Europe. Borrowing from Deleuze and Guattari's definition of "minor literature" as a literature that a "minority constructs within a major language" and in which "language is affected with a high coefficient of deterritorialization," we explore the political, cultural and anthropological effects of such literature in today's European public discourse. Behind the medium of a national language, new cultures and identities are claiming inclusion into the core of the social fabric by speaking out from a marginal position. We read both literary works (Ali Farah, Guene, Lakhous, Scego) and critical theory (Cassano, Chambers, Fanon, Hall, Theo Goldberg); we also analyze films and documentaries (Carpignano, Criales, Godard).

Requirements/Evaluation: weekly writing assignments, midterm and final exams, final paper, oral presentation

Prerequisites: none

Enrollment Limit: 19

GBST 247 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE)

Cross-listings: RUSS 248 GBST 247 SOC 248

Secondary Cross-listing

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference

emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Requirements/Evaluation: 5-page paper every other week, comments on the partner's paper in alternate weeks

Prerequisites: none

Difference, Power, and Equity Notes: Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

Not offered current academic year

GBST 312 (F) The Mughal Empire: Power, Art, and Religion in India

Cross-listings: HIST 312 ASST 312 REL 312 GBST 312

Secondary Cross-listing

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith--much larger than any European empire in the early modern world--the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

What is waste? What is filth? Why do titles or categories of sanitation workers--"garbage man," for instance--bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental consequences of systems of waste management historically and in the present, with a focus on South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional focus - work on Dhaka and Delhi, Chicago and New York. There is also a fieldwork component to this class. In groups, students will conduct ethnographic micro-studies of elements of the systems of waste production and management in Berkshire County (e.g., cafeterias, retail outlets, homes, dorms, recycling facilities, sewage treatment plants). Students will post field notes to a class blog, and each group will present its findings in the form of a short film, multimedia presentation, or paper.

Class Format: discussion

Requirements/Evaluation: regular posting of critical response papers and an ethnographic final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors and juniors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

GBST 326 (S) Security in Africa

Cross-listings: GBST 326 PSCI 326

Secondary Cross-listing

Africa is the world's second largest and second most-populous continent. This course will explore this diverse region through the lens of human security which takes a broader understanding of security challenges and how they affect different individuals. We will begin by placing security challenges in Africa in the context of a colonial legacy and the changing nature of warfare. We will then examine specific security challenges including governance issues, gender relationships, and resource challenges, through the use of case studies. We will conclude by examining responses by the U.S. and UN to perceived security challenges in Africa.

Requirements/Evaluation: short blog posts; research paper sections throughout semester; final research paper (15-20 pages); class participation

Prerequisites: PSCI 202 or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Political Science majors

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

GBST 341 (S) Caste, Race, Hierarchy

Cross-listings: ANTH 341 AFR 341 ASST 341 GBST 341

Secondary Cross-listing

Caste in India looms large in global social thought as a kind of benchmark against which hierarchical social systems across the world are measured. This prominence has much to do with British colonial ideologies of rule, but it also has a deeper and different history: the Buddha compared caste to Greek slavery, early modern Jesuits related it to the system of European estates, and since the nineteenth century, anti-caste radicals from Dalit, or "untouchable," backgrounds have drawn a sustained comparison between the forms of oppression they face and those with which African Americans contend in the United States. Reciprocally, thinkers from W.E.B. DuBois to Toni Morrison have deployed the category of caste in their writings on race. What can the study of caste in postcolonial South Asia contribute to global debates over the persistence of "traditional" forms of social hierarchy? What are the stakes of bringing caste and race into the same conversation, and what are the implications of refusing to do so? In this seminar we will acquire a thorough grounding in the anthropological literature on caste and then investigate the politics of the caste-race comparison over the last hundred years. Assignments include weekly postings of 1-page critical response papers and either a research paper or an interview-based, ethnographic final project examining "caste" in one's own community.

Class Format: seminar

Requirements/Evaluation: weekly postings of 1-page critical response papers and research paper or ethnographic final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors, juniors, majors in ANSO, AFR, or ASST

GBST 345 (S) Wonderland(s): *Alice* in Translation

Cross-listings: COMP 345 ENGL 365 GBST 345

Secondary Cross-listing

"What do you mean by that?" said the Caterpillar, sternly. "Explain yourself!" "I can't explain myself, I'm afraid, Sir," said Alice, "because I'm not myself, you see?"

The confusion around personal identity, which Alice is seen to experience as she makes her way through Wonderland, can be examined productively as an allegory of translation. Beyond the developmental and socio-cultural transitions of a child, what happens to *Alice*, a seminal text in children's literature, when it travels down the rabbit hole to a new linguistic wonderland? For starters, the seven-year-old girl becomes Marie in Danish, Arihi in Maori, Ai-chan in Japanese, and Paapachchi in Kannada. Then there is the highly idiosyncratic humor, word play, embedded English nursery rhymes, and iconic illustrations by Tenniel. How do they fare in new linguistic, cultural, and even genre contexts? Lewis Carroll told his publisher in 1866:

"Friends here seem to think the book is untranslatable." And yet. Over 200 translations later, including Kazakh, Shona, Papiamentu, Braille, and Emoji, *Alice* continues to delight children and adults all over the world and to pose myriad challenges as well as opportunities for translators. This course will serve as an introduction to the theory and practice of translation using Carroll's *Alice* as an anchoring primary text. We will examine key disciplinary issues and concepts, such as equivalence, rewriting, faithfulness, and ethics, and challenge the old canard that translation leads ineluctably, and exclusively, to loss.

Class Format: some Friday workshops

Requirements/Evaluation: active and substantive class participation; leading discussion; frequent short writing assignments; final project

Prerequisites: students must have at least three years of college-level second-language instruction, or the equivalent (advanced proficiency), or permission of the instructor

Enrollment Limit: 15

GBST 351 (S) The New Left and Neoliberalism in Latin America (DPE)

Cross-listings: GBST 351 PSCI 351

Secondary Cross-listing

Recent years have seen a resurgence of the political left in Latin America. This course seeks to understand the origins of this new left, the ideas and character of its protagonists, the neoliberal philosophy it opposes, and the arena of democratic politics it inhabits today. We first read polemics from both sides, before stepping back to consider Latin American political economy, including the twentieth-century left, from a more historical and analytical perspective. With this preparation, we then look more closely at major contemporary figures and movements in Venezuela, Bolivia, Ecuador, Brazil, and other countries. After considering explanations of the rise of the left and assessments of its performance in power, we end our common readings by asking what it might mean today to be on the left in Latin America--or anywhere--both in policy and political terms.

Class Format: discussion then seminar

Requirements/Evaluation: three short essays, a 1-page reflection paper, and a 12-page research proposal

Prerequisites: a course on Latin America and a course in Economics or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Political Science majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 351 (D2) PSCI 351 (D2)

Difference, Power, and Equity Notes: The New Left in Latin America originated in efforts to remedy inequalities born of the Conquest, uneven capitalist development, and racial prejudice. Its neoliberal foes generally do not doubt the existence of these inequalities, but they question the proposition that the state could adequately address them. This course engages, contextualizes, and deepens the debate.

GBST 352 (F) Politics in Mexico (DPE)

Cross-listings: GBST 352 PSCI 352

Secondary Cross-listing

Geographical fate has decreed that the futures of Mexico and the United States will be tightly bound. Yet Mexico enters this future with a very different past, a distinctive political system, and mixed feelings about the U.S. This course has four parts differing in content and format. The first is historical and mostly lecture. It considers several themes, including the slow emergence of a stable national state and the interplay between politics and economic change. In the second section, we consider politics and cultural policies around Mexican national identity in the twentieth century; rapid urbanization, especially in the valley of Mexico; the impact of migration and the rapid development of the northern border region; and the conflict between an emerging civil society and political corruption. After a brief review of recent elections and other political events, we turn to a seminar-style discussion of student research projects.

Class Format: discussion then seminar

Requirements/Evaluation: map quiz, two short papers, and a 12- to 15-page research proposal

Prerequisites: some knowledge of Mexican history

Enrollment Limit: 15

Enrollment Preferences: Political Science majors and seniors

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

GBST 356 (S) The Myth of Venice and its Modern Aftermath

Cross-listings: ENGL 358 GBST 356 COMP 356

Secondary Cross-listing

The Republic of Venice existed for over a millennium, during which time its historical image came to be enmeshed with mythical representations, such as the image of the city rising out of the waters of the lagoon, or the personification of the city itself as a Queen of the Adriatic. This course begins in the year 1797, at the end of the Republic, and the emergence of an extensive body of literature centered on Venice and its mythical facets. Readings will include Romantic views of Venice and the 20th century reshaping of the literary myth surrounding the city. A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than the focus on a nostalgic evocation of the death of the Republic, became a premise of exploration for literary modernity. Toward the end of the course we will leave the lagoon to explore the postmodern recreations of Venice around the world (from Los Angeles and Las Vegas, to Macao, Yonjin, and beyond) Readings will include excerpts from Byron's *Childe Harold's Pilgrimage*, John Ruskin's *Stones of Venice*, as well as full readings of Thomas Mann's *Death in Venice*, Marinetti's Futurist manifestos, Italo

Calvino's *Invisible Cities*, and more. We will also examine movies, such as Luchino Visconti's *Senso* and *Death in Venice* and Nicholas Roeg's *Don't Look Now*. This course is offered in English; all texts are provided in translation.

Requirements/Evaluation: mini-papers, one individual presentation, mini-presentations, midterm, participation, final project

Prerequisites: familiarity with modern aesthetics such as romanticism, modernism and postmodernism is desirable

Enrollment Limit: 20

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

GBST 358 (S) Religion and Law (DPE)

Cross-listings: GBST 358 REL 358

Secondary Cross-listing

This course explores the concept of "law" through an investigation of the complex relationship between law, ethics, and religion. In doing so, we will look at legal theoretical texts as well as legal anthropological studies to pose critical questions about the nature of law, the functioning logic of law, the relationship between law and lived experience, and the legal construction of categories and facts. In the course, we will consider two intersections of religion and law: the particularities of religious legal traditions and the relationship between religion and secular law. Topics will include the secular legal construction of religion, the relationship between law and ethics, the nature of legal hermeneutics, and the racial, gender, and sexual politics of legal interpretation.

Requirements/Evaluation: reading response, two essays, final research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion majors

Difference, Power, and Equity Notes: Law is seen as both a repressive and liberatory force. In taking a critical approach to the nature of law and legal interpretation, this course prepares students to think about the language of "rule of law," "order," and "justice" as a complex relationship between law and power.

Not offered current academic year

GBST 369 (S) Indigenous Narratives: From the Fourth World to the Global South

Cross-listings: GBST 369 COMP 369 HIST 306 ARAB 369

Secondary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will

consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Tashelhiyt Berber tales in Morocco, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Requirements/Evaluation: active class participation, several short response assignments (2-3 pages each), final performance project, and final paper (5- to 7-pages)

GBST 391 (S) When India was the World: Trade, Travel and History in the Indian Ocean

Cross-listings: GBST 391 ASST 391 HIST 391

Secondary Cross-listing

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

Requirements/Evaluation: class participation and weekly responses to readings, 2-3 short papers, an oral presentation and final paper

GBST 420 (S) Architecture and Sustainability in a Global World

Cross-listings: GBST 420 ARTH 420 ENVI 420 EXPR 420

Secondary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to

participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: with travel component

Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final project/paper (15-20 pages) and presentation

Prerequisites: none, although a course in art/architectural history would be advantageous; registered students will also be required to submit an online application provided by the instructor before enrollment in the course is confirmed

Enrollment Limit: 6

Enrollment Preferences: Art History majors, Environmental Studies majors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

GBST 488 (S) Gandhi: Nationalism, Philosophy, and Legacy

Cross-listings: GBST 488 HIST 488 REL 388 ASST 488

Secondary Cross-listing

This course studies the work and ideas of M.K. Gandhi (1869-1948, one of the most influential thinkers of the non-western world. Gandhi is well known

today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. The tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the nature of Gandhian nationalism? Did it help to integrate the Indian nation? How, if at all, was shaped by Gandhi's engagements with moral philosophy and human behavior? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: students will meet with the instructor each week for one hour sessions in pairs

Requirements/Evaluation: five to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

CLASSICS (Div I)

GREEK

Chair: Professor Edan Dekel

- Nicole G. Brown, Assistant Professor of Classics
- Kerry A. Christensen, Garfield Professor of Ancient Languages
- Edan Dekel, Chair and Professor of Classics, Chair of Jewish Studies Program; affiliated with: Religion Department
- Morgan V. King, Visiting Assistant Professor of Classics
- Sarah E. Olsen, Assistant Professor of Classics
- Amanda R. Wilcox, Professor of Classics

The course offerings in Classics enable students to explore the ancient Greek, Roman, and Greco-Roman worlds from various perspectives, including literature, history, archaeology, art, philosophy, and religion. Courses are of two types: language (Greek and Latin) and translation (Classical Civilization). The 100-level language courses are intensive introductions to Greek and Latin grammar; the 200-level language courses combine comprehensive grammar review with readings from Greek or Latin texts of pivotal historical periods; Latin 302 and the 400-level language courses are seminars that explore in depth selected authors or topics and the methods of analysis appropriate to each of them. Courses in which texts are read in translation provide both surveys and more specialized study of the classical world from earliest historical times through late antiquity.

MAJOR

Majors and prospective majors are encouraged to consult with the department's faculty to ensure a well-balanced and comprehensive selection of Classics courses appropriate to their individual interests. A course or courses in ancient history are strongly recommended. Majors may also benefit from advice on courses offered in other departments that would complement their particular interests in Classics. A reading knowledge of French, German, and Italian is useful for any study in Classics and is required in at least two of these modern languages by graduate programs in classics, ancient history, classical art and archaeology, and medieval studies.

The department offers two routes to the major: Classics and Classical Civilization

Classics: (1) Six courses in Greek and/or Latin, with at least two 400-level courses in one language; (2) Three additional courses, elected from the offerings in Greek, Latin, or Classical Civilization or from approved courses in other departments; 3) Participation in the Senior Colloquium.

Classical Civilization: (1) Either Classics 101 or 102 and one of Classics 222, 223, or 224; (2) Three additional courses from the offerings in Classical Civilization or from approved courses in other departments (3) Three courses in Greek or Latin with at least one at the 400 level, or four courses in Latin at any level; (4) A senior independent study is normally required to complete the Classical Civilization major. Several of the courses elected, including the independent study, should relate to each other in such a way as to reflect a concentration on a particular genre, period, or problem of Greek and Roman civilization, including topics in ancient art and archaeology, religion in the Greco-Roman world, and ancient philosophy; 4) Participation in the Senior Colloquium.

A number of courses from other departments are cross-listed with Classics and may be elected for the major, for instance, Art History 213 Greek Art and Myth, Philosophy 201 Greek Philosophy, and Religion 210 Reading Jesus, Writing Gospels. Appropriate courses that are not cross-listed may also count toward the major with the approval of the chair of Classics. Examples of such courses, which vary from year to year, are Art History 105 Picturing God in the Middle Ages, Religion/Jewish Studies 201 The Hebrew Bible, Religion 212 The Development of Christianity, and Political Science 231 Ancient Political Thought.

Senior Colloquium: Senior majors are required to enroll in CLAS 499 in both semesters. The topics and activities of this colloquium, which normally meets every other week for an hour, vary according to the interests of the participants. Junior majors are also encouraged to participate.

THE DEGREE WITH HONORS IN CLASSICS

Students who wish to be considered for the degree with honors will normally prepare a thesis or pursue appropriate independent study in one semester and winter study of their senior year. The thesis or independent study offers students the opportunity to work in depth on a topic of their choosing and to apply and develop the techniques and critical methods with which they have become acquainted during their regular course work. It may also include relevant work with members of other departments. In order to write a thesis, students normally must have a minimum GPA of 3.3 in their major courses and must submit a thesis proposal that earns departmental approval before the end of the spring semester of their junior year. To be awarded the degree with honors in Classics, the student is required to have taken a minimum of ten semester courses in the department (not

including the thesis or independent study) and to have demonstrated original or superior ability in studies in the field both through course work and through the thesis or equivalent independent study.

COURSE NUMBERING SYSTEM

Language Courses: The numbering of courses through the 300 level reflects the prerequisites involved. The only prerequisite for any 400-level course is Greek 201 or Latin 302, or equivalent language preparation. The rotation of 400-level courses is arranged to permit exposure, in a three- to four-year period, to most of the important periods and genres of classical studies. Students may enter the rotation at any point.

Classical Civilization Courses: The numbering of these courses often suggests a recommended but rarely necessary sequence of study within a given area of classical studies. Most of these courses do not assume prior experience in Classics or a cross-listed field.

STUDY ABROAD

We strongly encourage Classics majors to study abroad in their junior year, at programs in Italy (especially the semester-length program at the Intercollegiate Center for Classical Studies in Rome), at programs in Greece (especially the College Year in Athens, which students need only attend for one semester), and in the Williams at Oxford Program. Our majors have also had excellent Classics experiences in other study-abroad programs in Italy and Greece and at various universities in Europe and the United Kingdom. In addition, we encourage students to take advantage of opportunities available in the summer: study abroad programs in Italy and Greece, archaeological digs, or even carefully planned individual travel to sites in Greece, Italy or other areas of the ancient Greco-Roman world. When the college cannot do so, the department may be able to provide some financial support for summer study abroad. The department's faculty are always available to advise students, the chair has materials to share, and students can visit the department's website for information and links to helpful sites.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Complete syllabus and course description, including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. Senior Colloquium.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

CLGR 101 (F) Introduction to Greek

This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second semester, to works of the classical period (usually Xenophon and Euripides).

Class Format: recitation/discussion

Requirements/Evaluation: frequent quizzes, tests, and a final exam

Prerequisites: none; designed for students who are beginning Greek or have studied less than two years of Greek in secondary school; students with

some previous experience in Greek may want to enroll in CLGR 102 only (consult the department)

Enrollment Limit: 15

Expected Class Size: 8-10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLGR 101 and 102) are taken

Distributions: (D1)

Fall 2019

LEC Section: 01 MWF 11:00 am - 12:15 pm Sarah E. Olsen

CLGR 102 (S) Introduction to Greek

This full-year, intensive course presents the fundamentals of Greek grammar, syntax, and vocabulary and introduces students, in the second semester, to works of the classical period (usually Xenophon and Euripides).

Class Format: recitation/discussion

Requirements/Evaluation: frequent quizzes, tests, and a final exam

Prerequisites: CLGR 101 or permission of department

Enrollment Limit: 15

Expected Class Size: 8-10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: credit granted only if both semesters (CLGR 101 and 102) are taken

Distributions: (D1)

Spring 2020

LEC Section: 01 MWF 11:00 am - 12:15 pm Kerry A. Christensen

CLGR 201 (F) Intermediate Greek

Reading of selections from Hesiod and from Plato, combined with grammar review. The primary goal of this course is to develop fluency in reading Greek. We will also read the texts closely to explore important continuities and changes in Greek culture between the archaic and classical periods. The emphasis will vary from year to year, but possible subjects to be explored include: the education and socialization of the community's children and young adults; religion and cult practices; the performative aspects of epic (and choral) poetry and of prose genres like oratory and the philosophical dialogue; traditional oral poetry and storytelling and the growth of literacy; the construction of woman, of man; the development of the classical polis.

Class Format: recitation/discussion

Requirements/Evaluation: classroom participation, quizzes, tests, and a final exam

Prerequisites: CLGR 101-102 or two years of Greek in secondary school

Enrollment Limit: 12

Expected Class Size: 5-10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2019

LEC Section: 01 MWF 8:30 am - 9:45 am Kerry A. Christensen

CLGR 401 (S) Homer: The Iliad

From the early archaic era through the classical and beyond, Homer's *Iliad* and *Odyssey* remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and

prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the *Iliad* in Greek and the entire epic in translation.

Requirements/Evaluation: class participation, short written exercises and/or oral reports, midterm and final exams, and a final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: majors in Classics, Comparative Literature, English and other literatures

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Spring 2020

SEM Section: 01 MR 1:10 pm - 2:25 pm Sarah E. Olsen

CLGR 402 (S) Homer: The Odyssey

From the early archaic era through the classical and beyond, Homer's *Iliad* and *Odyssey* remained foundational in Greek discourse about community, leadership, war, heroism, family, friendship, loyalty, the gods, justice, and much more. Nearly all of subsequent Greek literature, both poetry and prose, developed out of a dialogue with these epics. In this course, we will read extensive selections from the *Odyssey* in Greek and the entire epic in translation.

Requirements/Evaluation: class participation, short written assignments and/or oral reports, a midterm and final exams, and a final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: majors in Classics, Comparative Literature, English and other literatures

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 404 (S) Tragedy

Tragedy was a hybrid genre invented in sixth-fifth century Athens, where tragic performances in the city's festival of the Greater Dionysia played a vital role in the democratic polis. This course will focus on reading in Greek a complete tragedy of Sophokles or Euripides; we will also read in translation several other tragedies, a satyr-play, and a comedy of Aristophanes. While focusing on questions of particular importance for the play we are reading in Greek, we will also situate that play in a larger context by exploring, for instance: aspects of the social and political situations in and for which fifth-century tragedies were first produced; the several performance genres out of which tragedy was created; developments in the physical characteristics of the theater and in elements of staging and performance; problems of representation particularly relevant to theatrical production and performance.

Class Format: recitation and discussion

Requirements/Evaluation: contributions to class, several 1- to 2-page papers involving close textual analysis, perhaps a midterm exam, a final exam, and a final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 4-5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 405 (F) Greek Lyric Poetry

This course will explore the development of Greek lyric poetry from the eighth to the fifth centuries BCE. Beginning with Archilochus, Sappho, and Alcaeus, and proceeding through such poets as Solon, Anacreon, Ibycus, and Theognis, we will examine the formal, social, and performative contexts of lyric, the influence of epic and choral poetry on the evolution of the genre, and the difficulties of evaluating a fragmentary corpus. Finally, we will explore the influence of political and economic changes in the early fifth century on the work of Simonides. The goal throughout is to investigate the structures, innovations, and problems of poetic self-expression in early Greek poetry.

Requirements/Evaluation: class participation, a midterm exam, a final paper, and a final exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 5

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 409 (F) Plato

Plato's writing has exercised an incalculable influence on the development of subsequent philosophy and literature, but his dialogues are equally compelling when they are read independently of the works they have inspired. In this course we will read substantial selections from one or more of the so-called middle dialogues (*Symposium*, *Phaedo*, *Republic*, *Phaedrus*), in which a variety of speakers, including Socrates, ask and provisionally answer questions such as what are love, beauty, and justice, and how does the human soul in possession of these goods participate in the divine?

Class Format: seminar

Requirements/Evaluation: evaluation will be based on class participation, several short written assignments, a midterm and final exam, and a longer final paper

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: if oversubscribed, preference given to majors in Classics, Philosophy, Comparative Literature, English or another literature

Expected Class Size: 5-6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 412 (F) Herodotus

This course will focus on the reading in Greek of Herodotus' Histories, his multivalent and deeply human account of how and why several hundred years of contact and conflict between the Greek city-states and non-Greek peoples to the east culminated in the Persian invasion of Greece. We will explore the ways in which his rich narrative style and intellectual landscape reflect the influence of Greek and near-eastern oral traditions, Ionian philosophical thought, Greek tragedy, and contemporary Athenian rhetoric and philosophy. We will also study his use of anthropological methods, ethnography, and geography in explaining human events. Among the many themes that permeate his work, we will pay special attention to the working of divine versus human justice, the mutability of human affairs, the nature of authority, the role of family, and the quest for wisdom.

Requirements/Evaluation: class participation, two short written assignments, a midterm exam, a final paper, and a final exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

CLGR 414 (F) Thucydides

This course will focus on Thucydides' powerful history of the Peloponnesian War. It is a rich text with much to say about human nature, human motivation, power, morality, the fragility of civilized life, the nature of democracy, leadership, causality in human affairs, and the impact on the Greek city-states of thirty years of nearly continuous war.

Requirements/Evaluation: class preparation and participation, a midterm exam, a final paper, and a final translation exam

Prerequisites: CLGR 201 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Classics majors

Expected Class Size: 6

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2019

SEM Section: 01 MR 1:10 pm - 2:25 pm Kerry A. Christensen

Winter Study -----

CLGR 99 (W) Independent Study: Greek

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

- Maud Mandel, President, Professor of History; affiliated with: History Department
- Laura J. Martin, Assistant Professor of Environmental Studies and Faculty Affiliate in History; affiliated with: History Department
- Karen R. Merrill, Frederick Rudolph '42 - Class of 1965 Professor of American Culture
- Anne Reinhardt, Chair and Professor of History
- Eiko Maruko Siniawer, Professor of History; affiliated with: Asian Studies Department; on leave Spring 2020
- Yana Skorobogatov, Assistant Professor of History
- Tyran K. Steward, Assistant Professor
- Matthew Swagler, Visiting Assistant Professor of History
- Benjamin Twagira, Assistant Professor
- Chris Waters, Hans W. Gatzke '38 Professor of Modern European History
- Carmen T. Whalen, Interim Director of the Davis Center, Carl W. Vogt '58 Professor of History; affiliated with: History Department, Latina/o Studies Program
- Scott Wong, Charles R. Keller Professor of History

GENERAL STATEMENT OF GOALS

The History department seeks to cultivate a critical understanding and awareness of the past and the development of our students' intellectual, analytical, and rhetorical abilities. In pursuit of the first objective, through its curricular offerings the department seeks both to expose students to the richness, diversity, and complexities of human history over long periods of time and in different geographic regions and to provide students with the opportunity to explore aspects of the past in depth. At the same time, the department endeavors to develop students' ability to think historically and to foster in them an appreciation of the contested nature and the value of historical knowledge by confronting them with the variety of ways in which historians have approached and interpreted the past, engaging them in issues that provoke historical debate, and familiarizing them with the nature and uses of historical evidence. By engaging students in the critical study of the past, finally, the department seeks to develop their ability to formulate historically informed analyses and their analytical and rhetorical skills.

COURSE NUMBERS

The course numbering system used by the History Department reflects the different types and objectives of courses offered at each level. The

different course levels are distinguished less by degree of difficulty than by the purposes that the courses at each level are intended to serve and the background knowledge they presume.

First-Year Seminars and Tutorials (102-199): These writing-intensive courses give students an opportunity to explore an exciting historical topic in-depth, learn about the discipline of history, and improve their research and writing skills. Because these courses emphasize the acquisition of skills required for the advanced study of History, they are ideal for students contemplating a major in History.

Each 100-level seminar is normally limited to nineteen students and focuses both on training in research skills (such as using the library, navigating on-line resources, formulating a research question and developing a research agenda, and learning how to use different types of evidence) and on the acquisition of reading skills (such as how to interpret different kinds of historical writing and the arguments historians make). These seminars especially emphasize the importance of writing and include varied assignments that stress the mechanics of writing and revision and focus on issues of argumentation, documentation, and style. Enrollment preference in 100-level seminars is normally given to first-year students and then to sophomores.

Each 100-level tutorial stresses the importance of interpreting historical evidence and evaluating the arguments made by historians and likewise fulfills the writing-intensive requirement. Enrollment in these courses is limited to ten students, each of whom is expected to write five or six interpretive essays and present five or six oral critiques of another student's work. First-year students and sophomores will normally be given equal enrollment preference in 100-level tutorials.

Because first-year seminars and tutorials serve as an introduction to the study of history, only one course of each type may count toward the History major; these courses can also be used to meet the department's group and concentration requirements.

Introductory Survey Courses (202-299): These courses are open to all students and are intended to provide a basic understanding of the history of peoples, countries, and geographic regions over relatively long time-spans. Most of all, they will provide students with the background necessary for more advanced study in history at the 300 and 400 level. They are offered in either small or large formats, depending on the individual course.

Major Seminars (301): Major seminars explore the nature and practice of history, are required for the degree in History, and are normally restricted to junior History majors. Although these seminars vary in topic and approach, each focuses on the discipline of history itself—on the debates over how to approach the past, on questions of the status of different kinds of evidence and how to use it, on the purpose of the study of history. Focusing on questions of methodology, epistemology, and historiography, these courses ask: What kind of knowledge do historians claim to produce? What does it mean to study the past? How do historians approach the project of studying the past? Each year several major seminars will be offered. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year (space permitting), and those planning to be away for the whole of their junior year are encouraged to do so.

Advanced Electives (302-396): These advanced, topical courses are more specialized in focus than are the introductory survey courses (202-299) and are intended to follow such courses. Enrollment is often limited. Because these courses may presume some background knowledge, the instructor may recommend that students enroll in an appropriate introductory course before registering for an advanced elective.

Advanced Seminars (402-479): These are advanced courses normally limited in enrollment to fifteen students. Each seminar will investigate a topic in depth and will require students to engage in research that leads to a substantial piece of historical writing. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the seminar. Preference is given to senior History majors, followed by junior History majors.

Advanced Tutorials (480-492, 495): These are advanced reading and writing courses that offer an in-depth analysis of a topic in tutorial format. Tutorials are limited in enrollment to ten students and preference is given to senior History majors. All History majors are required to complete either an advanced seminar (402-479) or a tutorial (480-492). Instructors may recommend prior coursework in the area of the tutorial. The writing of five or six essays and the oral presentation of five or six critiques of another student's essays are central to tutorials.

Within each of these levels, courses are further divided by geographical area:

Africa and the Middle East: 102-111, 202-211, 302-311, 402-411

Asia: 112-121, 212-221, 312-321, 412-421

Europe and Russia: 122-141, 222-241, 322-341, 422-441

Latin America and the Caribbean: 142-151, 242-251, 342-351, 442-451

United States: 152-191, 252-291, 352-387, 452-471

Transnational/Comparative: 192-199, 292-299, 388-396, 472-479

ADVISING

Both majors and non-majors are encouraged to talk at any time with the department chair, the department administrative assistant, or any other member of the department about the History major.

All incoming majors will choose a faculty advisor in the spring of their sophomore year. All majors must meet with their advisor in the beginning of the fall semester, to develop their Concentration (see below), and at the time of the spring semester registration period in order to have their courses and plans for the History major approved. Students who are interested in the senior thesis program or graduate school should contact the faculty director of the Thesis Program. Prospective study abroad students should contact the department's administrative assistant.

THE MAJOR

The major consists of at least nine semester courses as follows:

Required Courses in the Major

One Major Seminar (History 301)

At least one Advanced Seminar (History 402-479) or Tutorial (History 480-492)

Elective Courses

Seven (or more) additional semester courses in History, at least one to be chosen from among three of the following groups:

Group A: The History of Africa

Group B: The History of Asia

Group C: The History of Europe and Russia

Group D: The History of Latin America and the Caribbean

Group E: The History of the Middle East

Group F: The History of the United States and Canada

Group G: Global History

In addition, students must take at least one course dealing with the premodern period (designated Group P in the catalog); this may be one of the courses used to fulfill the group requirement (Groups A-G).

A single course can meet the requirement for no more than one of Groups A through G.

Concentration In The Major

Students are encouraged, in consultation with their advisors, to design a concentration within the History major. A concentration should consist of at least three courses that are linked by common themes, geography, or time period. Only one of those courses can be a 100-level seminar while at least one must be a 300- or 400-level course. Courses in the concentration may be used to fulfill the group requirements. Courses taken abroad may be included in the concentration with the approval of the department chair.

THE DEGREE WITH HONORS IN HISTORY

The History Department offers a thesis route to the degree with honors in History. This involves a ten-course major as well as an independent WSP. Students wishing to undertake independent research or considering graduate study are encouraged to participate in the thesis program and seminar.

Application to enter the thesis program is made by spring registration in the junior year and is based on a solid record of work of honors caliber, normally defined as maintaining at least a B+ average in courses taken for the major. Students who intend to write a thesis submit a proposal to the History Department at this time. Students who will be away during the spring semester of their junior year make arrangements to apply before leaving. Normally, it is the responsibility of the student to secure the agreement of a member of the department to act as their thesis advisor, normally a faculty member with whom the student has worked in the past. The student therefore consults with a member of the department about a thesis topic and secures the faculty member's agreement to serve as their thesis advisor prior to submitting a proposal to the department. The thesis proposal must be signed by a member of the History Department. Normally, the thesis topic is related to course work that the student has completed. Students should be aware that, while the department tries to accommodate all students who qualify to write a thesis, particular topics may be deemed unfeasible. Final admission to the thesis program depends on the department's assessment of the qualifications of the student and the feasibility of the project.

Once the student has been notified of admission to the thesis program, they register for History 493, Senior Thesis Seminar, in the fall semester, for History 031 during winter study, and for History 494, Senior Thesis Seminar, in the spring. In addition to researching and writing a thesis of approximately 75-100 pages, students attend special presentations under the History Department's Class of 1960 Scholars Program.

During the fall, students work regularly on their research and consult frequently with their advisors. Throughout the semester, thesis writers also present progress reports for group discussion to the seminar (History 493). Performance in the seminar is taken into consideration in determining students' continued participation in the thesis program and is taken into account in determining their final thesis grades calculated at the end of the

year. Students are required to submit one draft thesis chapter to their advisor and the director of the thesis seminar by the end of the fall semester. During the first week of winter study students present their draft chapter to the thesis seminar and members of the history department thesis committee. Students deemed to be making satisfactory progress on their research and writing at this point are allowed to continue with the thesis. They devote the entire winter study period to thesis work. They normally conclude their research during winter study and must complete a second draft chapter of their thesis for submission to their advisor and the director of the thesis seminar before the end of winter study. By the beginning of spring semester, the thesis committee formally consults with advisors and makes a recommendation to the department on which students are allowed to proceed with the thesis. Those students continuing with the thesis present a draft chapter of their thesis to the thesis seminar and members of the department's thesis committee during the early weeks of the second semester.

Completed theses are due in mid-April, after which each student prepares and makes a short oral presentation of their thesis at the departmental Thesis Colloquium. Another student who has read the thesis then offers a critique of the thesis, after which the two faculty readers of the thesis offer their own comments and questions, followed by a general discussion of the thesis by students and other members of the department.

LANGUAGE

Study of a foreign language is basic to the understanding of other cultures. Particularly those students who might wish to do graduate work in History are encouraged to enroll in language courses at Williams.

STUDY ABROAD

The History Department considers immersion in and familiarity with a foreign culture not only to be valuable in themselves, but also to provide an important way of understanding the past. Students who major in History therefore are encouraged to study a foreign language and to consider studying abroad during their junior year. History courses taken as part of a study abroad program that is recognized by the college normally can be used to satisfy departmental distribution and general requirements, up to a maximum of three courses (this limit does not apply to tutorials taken as part of the Williams-Exeter Program). Courses taken abroad, even at Oxford, cannot be used to satisfy the major seminar and advanced seminar/tutorial requirements, with only one exception: the tutorial on "Historiography: Tacitus to Weber" that is offered through the Williams-Exeter Program can count for major seminar credit. Students who plan to study abroad during their junior year may take their major seminar in the spring semester of their sophomore year, and those planning to be away the whole of their junior year are strongly encouraged to do so.

Students interested in studying abroad during their junior year should discuss their plans with a member of the department as well as with the department's administrative assistant. Approval of departmental credit for courses taken abroad normally must be obtained from the chair or from the administrative assistant prior to the commencement of the study abroad program.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. The student needs to provide as much information as possible to the department chair, and approval is provisional upon the student actually taking the course as detailed in the syllabus and/or course description.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. The maximum number of credits is three.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. I'm not quite sure that I understand what "type" means here—the courses need to be historical in approach and content for credit. This means that courses not listed under History in the study abroad program might be considered for history major credit.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. HIST 301 (with the exception of one particular tutorial offered through the Williams-Oxford Programme) and a 400-level seminar or tutorial.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

No. Students who will be studying abroad for the entire year are encouraged to take HIST 301 before their junior year.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None recently.

HIST 102 (F) West Africa through Women's Voices (DPE) (WS)

Cross-listings: WGSS 102 HIST 102

Primary Cross-listing

This writing-intensive course explores West African history through texts composed and performed by women of the region from the thirteenth century to the present. By examining a variety of sources--oral tradition, legal records, women's popular songs, Islamic pedagogical verse, personal correspondence and novels--we will consider how women's experiences challenge dominant narratives of history that have often excluded them. The course will explore the extremely varied lives of individual women in West Africa: those who have served as powerful political leaders, but also those who paid dearly for contesting political authority; those who have played central roles in the daily life of their communities as well as those who have been excluded; those women who have transgressed expected gender roles alongside women who have embraced them.

Requirements/Evaluation: discussion participation, map quiz, weekly response papers and a 10-page final academic paper or creative writing project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10-15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 102 (D2) HIST 102 (D2)

Writing Skills Notes: Students will write short papers (2 pages) each week in response to a prompt about the assigned reading. Instructor will provide feedback on argument and content for each paper, with suggestions for improvement. Students will also write a 10-page review of a recent novel that integrates historical research. The review project will be broken down into multiple drafts throughout the semester, with feedback provided by the instructor and peers.

Difference, Power, and Equity Notes: Texts in this class lay the groundwork for discussions about how different groups of women in West Africa have experienced power and inequality along differences of gender, race, slave/free status, marital and motherhood statuses, religion, and class. Close readings of primary texts equip students to understand how women in West Africa have understood and responded to structures of power and inequality. Students analyze how historical narratives change when marginalized actors are prioritized.

Attributes: HIST Group A Electives - Africa

Not offered current academic year

HIST 103 (F) Growing up in Africa/Growing up African (DPE) (WS)

Most African nations today are youthful: while the median age in the United States is 38 years, the median age on the African continent is just 19. Young Africans are portrayed both outside and inside the continent in strikingly contradictory ways: as victims of oppression, dangerous threats to social order, or the saviors of their society. But beyond these stereotypes, what is it like to be young in Africa? This tutorial introduces students to the extremely diverse experiences of childhood and adolescence across the continent, from the 1800s to the present. We will draw on scholarly research as well as novels and biographies. In particular, the course focuses on how young Africans have boldly responded to dominant expectations about their gender formation, sexuality, and their relationship to authority--responses which have often provoked broader social conflicts. The first half of the class examines examples of the lives of children and adolescents born during the eras of slavery, colonial rule and apartheid, and how those institutions changed previous relationships between African youth and their elders. The second half of the course considers attempts by post-colonial African state leaders to mobilize "the youth" as nation builders and manage their behaviors since the 1950s--and how young Africans have reacted. In the class, we will also consider how migration and emigration have impacted Africans' experiences of growing up outside their home communities. Throughout the semester, students will track how the definition of childhood, adulthood, and intermediary statuses (e.g. youth), has differed across time and place, while also reflecting on how they perceive their own process of "growing up."

Requirements/Evaluation: five tutorial papers (5 pages each) and five short response papers (2 pages each), alternating each week; one paper will

be revised and resubmitted

Prerequisites: first-years and sophomores

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students who have not yet taken a 100-level course in History; juniors and seniors only with permission of instructor

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Writing Skills Notes: Every week one student will produce an argument-driven essay (~5 pages) on the assigned reading, while the other student will write a 2- to 3-page response. These roles will swap weekly. Instructor will provide regular feedback on argument, content, and structure of the essays and students will choose one essay to revise for resubmission at the end of the semester.

Difference, Power, and Equity Notes: The course looks at how people in Africa have been subject to various forms of social control because of their status as children or youth. At the same time, the examples studied emphasize the creative and powerful ways that young Africans have defined their lives in opposition to various structures of power. The struggles we will examine take place because of differences in age, but also of marital status, social background, class, gender, and race.

HIST 110 (S) The Veil: History and Interpretations (DPE) (WS)

Cross-listings: ARAB 215 WGSS 110 HIST 110

Primary Cross-listing

This tutorial will consider the history and the changing meanings of the veil (hijab) and its many manifestations (e.g. burqa, chador, niqab), starting with the earliest religious traditions and the status of women in Islamic law. We will then proceed to examine imperialist and orientalist representations of gender in the Middle East, the rise of Islamic feminism and finally consider the emergence and return of the veil in recent years in the Middle East, North America, Asia and Europe.

Requirements/Evaluation: each week each student will either write a 5- to 7-page essay on assigned readings or offer a 2-page critique of their partner's paper; by semester's end each student will have written a minimum of 40 pages

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar and those with demonstrated interest in the Middle East

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 117 (S) Bombay/Mumbai: Making of a Modern Metropolis (WS)

Cross-listings: GBST 117 HIST 117 ASST 117

Primary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

HIST 121 (F) The Two Koreas (WS)

Cross-listings: ASST 121 HIST 121

Primary Cross-listing

The two Koreas--North and South--were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called "the Cold War's last divide." This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

Requirements/Evaluation: students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 134 (S) The Great War (WS)

In November 2018, world leaders gathered in France to commemorate the centennial of the end of the First World War. Yet the armistice that brought hostilities on the Western front to a close on the eleventh hour of the eleventh day of the eleventh month of 1918, did not have the same significance for the East and Middle East, where revolutions and civil wars continued to be fought well into 1923. Ultimately, the Great War toppled four empires (German, Habsburg, Russian, and Ottoman) and forcibly displaced and killed millions of civilians (including Armenians and Jews), creating new countries and colonies throughout Europe, the Middle East, and Africa. This tutorial will explore the global history of the First World War, a history that is indispensable for understanding the world of today. We will consider a broad range of topics and sources in our examination of the political, social, cultural, economic, and military histories of the Great War and its aftermath.

Requirements/Evaluation: bi-weekly 5- to 7-page papers; bi-weekly written critiques; final research paper

HIST 135 (F) The Coffeehouse from Arabia to the Enlightenment

Invented in sixteenth-century Arabia, the coffeehouse soon made its way to Egypt and Istanbul and then to Western Europe. This institution offered a social space where men (and women) could congregate to discuss politics and ideas. Everywhere, it was an object of suspicion, yet its onward march proved unstoppable, and it even became one of the central spaces of the Enlightenment, the eighteenth-century movement that laid the foundations of modern Western secular thought. In this course, we will reconstruct the progress of the coffeehouse in order to understand what made it so special. Through its prism we will explore a crucial period in the history of Europe and the Middle East, and investigate how intercultural interactions and intellectual exchange shaped the modern world at a time of religious and political polarization.

Requirements/Evaluation: attendance and participation; three short analytical papers; a final research paper

HIST 137 (F) Victorian Britain and the Anglo-Afghan Wars (WS)

Long before the US and its allies fought the recent war in Afghanistan (2001-14), Britain fought three Afghan Wars. Now almost forgotten, dusty reminders of Britain's imperial past, they were crucial moments in the "Great Game", the rivalry between the British and Russian empires for supremacy in Central Asia and control of land routes to British India. Largely disastrous for the British, the First Afghan War (1839-1842) resulted in the tragic deaths of some 16,000 individuals, the second (1878-1881) generated considerable domestic discord, and the third (1919) basically ended British influence in Afghan affairs. Nevertheless, they exercised the Victorian imagination and led to numerous cultural productions that will be dissected in our class: illustrated tales of British military exploits proliferated in the press; the children's writer G.A. Henty turned the conflicts into the stuff of imperial adventure; Rudyard Kipling made the Great Game the backdrop for several works of fiction; military officers, government officials, "lady travelers", and amateur scholars all mapped the landscape and people of Afghanistan, an endless source of fascination for the Victorians. By interpreting these various forms of documentary evidence, we will not only reconstruct the history of Britain's Afghan wars but dissect the stories Britons told themselves about their Empire and about Afghanistan and its people.

Requirements/Evaluation: participation in class discussion, two document analyses (750 words each), two guided research essays (5 pages each), and a final research paper (10-12 pages)

Prerequisites: first-year or sophomore standing

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not taken a 100-level seminar

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write two document analyses (750 words) and two guided research essays (5 pages), all of which will be letter-graded and returned with comments. Also, students will write a final research paper (10-12 pages) in consultation with the instructor; a working bibliography and prospectus and a rough draft will be required in advance of submission of the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 140 (S) Crime and Punishment in Russian History (WS)

Cross-listings: HIST 140 RUSS 140

Primary Cross-listing

For centuries, people have used crime in Russia and the Russian state's response to crime as lenses through which to examine Russian history and the Russian experience. This tutorial will follow in this tradition, but will adopt a more critical approach to question how or if crime and deviance can speak to the nature of the Russian state and its relationship to Russian society writ large. To answer this question, we will read a combination of original historical sources and recent scholarship that cover the entirety of Russian history: from the creation of the first legal code in Medieval Muscovy to the publication of Alexander Solzhenitsyn's Gulag Archipelago in 1962 and beyond. By semester's end, students will have developed an understanding of both the major historical actors and events in Russian criminal and legal history, and the intellectual debates that they sparked among contemporaries and present day scholars alike.

Requirements/Evaluation: a student either will write and present orally a 3- to 5-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

HIST 143 (F) Soccer and History in Latin America: Making the Beautiful Game (WS)

This course examines the rise of soccer (*fútbol/futebol*) in modern Latin America, from a fringe game to the most popular sport in the region. Focusing especially on Brazil, Argentina, Peru, and Mexico, we will analyze the central role that soccer played as these countries faced profound questions about race, masculinity, and regional and national identities. Using autobiographies, videos, and scholarly works from several disciplines, we will consider topics including: the role of race and gender constructions in the initial adoption of soccer; the transformation of this foreign game into a key marker of national identity; the relationship between soccer and political and economic "modernization"; the production of strong, at times violent identities at club, national, and regional levels; and the changes that mass consumerism and globalization have effected on the game and its meanings for Latin Americans.

Requirements/Evaluation: class participation, a series of short papers, and an 8- to 10-page research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first year students and then sophomores who have not previously taken a 100-level seminar. If oversubscribed an application process may be developed to determine admission to the course

Expected Class Size: 19

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write three 3-page papers on set topics. They will revise the first of these. Topics involve interpreting different kinds of sources as well as conflicting arguments. They will also write an 8- to 10-page research paper, with required submission of a proposed topic, an annotated bibliography, an outline, and a draft before the final paper itself. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 152 (S) The Fourteenth Amendment and the Meanings of Equality (DPE) (WS)

Cross-listings: HIST 152 WGSS 152

Primary Cross-listing

For more than 150 years, the 14th Amendment of the U.S. Constitution has served as the principal touchstone for legal debates over the meaning of equality and freedom in the United States. This course explores the origins of the 14th Amendment in the years immediately following the Civil War, and examines the evolution of that amendment's meaning in the century that followed. Central themes in this course include the contested interpretations of "birthright citizenship," "due process," "privileges and immunities," "equal protection," and "life, liberty or property"; the rise, fall, and rebirth of substantive due process; battles over incorporating the Bill of Rights into the 14th Amendment; and the changing promise and experience of citizenship. We will pay particular attention to how arguments about the 14th Amendment have shaped and been shaped by the changing meanings of

racial and gender equality.

Requirements/Evaluation: a series of short (2-page) response papers; a midterm exam; and a final 12-15 page research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: given first to those who have been dropped from this class previously, then to first-years, then to sophomores

Expected Class Size: 15-19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 152 (D2) WGSS 152 (D2)

Writing Skills Notes: Students will write three short (3-page) response papers to the readings in the first part of the semester, and will also write a substantial (10- to 12-page) research paper. In preparation for the research paper, students will write proposals, develop bibliographies, write outlines and drafts, and do peer critiques. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course satisfies the DPE requirement because it examines the legal, social, and political constructions and theorizations of difference, power, and equity. It examines the ways that individuals and groups have organized across various axes of difference to fight for legal equality, and explores how those individuals and groups have experienced legal equality and legal inequality in varied ways.

HIST 153 (S) Establishment & Exercise: Religion and the Constitution in the United States

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof." This 100-level tutorial examines the constitutional history of conflicts over religion in the United States, and asks how the law has weighed religious freedom against other cultural values, legal rights, and social needs. This course will consider the following questions: How has the interpretation of the First Amendment's religious clauses changed over time? What happens when the establishment clause and free exercise clause come into conflict with each other? Is the American state secular? What is the difference between religious beliefs and moral beliefs? How have constitutional arguments about religion intersected with social movements and political culture? Topics will include: the origins and early interpretations of the religion clauses; the changing scope of constitutional protections for the beliefs and practices of religious minorities; controversies over religion in schools, workplaces, and public spaces; debates about tax exemptions for religious organizations; the rights of conscientious objectors; and the emerging conflicts between claims for religious liberty and anti-discrimination laws. This course examines the ways these conflicts illuminate tensions between the competing values of equality and liberty, and interrogates the ways that the very act of legal decision-making defines the boundaries of what counts as religion.

Class Format: tutorial

HIST 154 (S) History of American Feminisms (DPE) (WS)

Cross-listings: HIST 154 WGSS 154

Primary Cross-listing

This class studies the historical development of feminist movements and ideas in the United States from the women's rights movement in the 19th century to the present. The class will examine how diverse groups of activists organized for and understood the goal of women's and/or gender equality, focusing especially on the ways that race, class, and sexual identity intersected with political demands over time. This is a writing intensive class in which students will have the chance to analyze historical documents, assess scholarly studies of feminism, and conduct original research.

Requirements/Evaluation: participation; three 5-page essays; one longer research paper due at the end of the semester with a research precis, annotated bibliography, and draft due earlier

Prerequisites: first-year students

Enrollment Limit: 19

Enrollment Preferences: first-year students

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 154 (D2) WGSS 154 (D2)

Writing Skills Notes: Three 5-page essays evenly spaced throughout the semester; one longer research paper (10 pages) due at the end of the semester with a research precis, annotated bibliography, and draft due earlier. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Looking historically at the ways that activists have mobilized to address sex-based inequalities and for social justice, this class examines ways that gender identities intersect with race, class, and sexual identity. The course encourages thoughtful discussion about how difference works historically, how identities and power relationships have been grounded in lived experience, and how one might both critically and productively approach questions of difference, power, and equity.

HIST 155 (F) School Wars (WS)

Throughout the 20th century, parents, students, teachers, and policymakers have fought bitterly about the purpose of and practices in public schools. Public schools have been the site of a series of intense conflicts over the meanings of democracy and equality; the relationship between the individual, the family, and the state; and about completing claims to recognize the rights of teachers, children, and parents. Organized both chronologically and thematically, this course examines a series of "school wars" in the 20th century, focusing especially on battles over religion, race, and sex. Topics will include evolution/creationism, segregation and desegregation, bilingual education, sex education, free speech, and school prayer. This course asks how, why, and with what consequences schools have been an arena of cultural conflict in the United States? How do these debates help us understand the contested relationship between the rights of children and students, the rights of parents and families, the rights of communities and states, and the obligations of the federal government? How can historical analysis shed light on our present-day "school wars"? Many of these conflicts wind up in court, and we will be looking at some key Supreme Court decisions, but we will also draw upon memoirs, social histories, oral histories, popular culture, and other archival and documentary sources that focus on the experience of teachers and students. Tutorials meet in pairs. Every week, each student will either write an essay (1000-1250 words) that responds to and analyzes the readings OR a short essay (no more than 500 words) that responds to their partner's paper and raises further questions for discussion.

Requirements/Evaluation: four to five tutorial papers (approximately 5 pages) and four to five short response papers (approximately 2 pages)

Prerequisites: first-years or sophomores

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write bi-weekly 5-page papers about the readings, and bi-weekly 2-page responses to their tutorial partner's paper. For the final paper, each student will revise and expand one of the papers they wrote in the semester. Students will receive regular written and oral feedback on their work from the professor and their tutorial partner. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 156 (F) The Manifesto in U.S. Politics (WS)

Is there a style or tradition of writing political manifestos in the United States? Given the nation's origins in revolution, the answer would seem on the surface to be a definitive "yes." But some observers are skeptical; one writer has gone so far as to say the term "manifesto" connotes "a radicalism that American writers generally lack." This course will investigate that claim. How would we choose to define the very term, "manifesto?" Why have so many American writings been embraced as having the characteristics of a manifesto? We'll look at these questions through close readings and analyses of manifestos across different historical junctures in the U.S., frequent short essay assignments, and an original research project of students' own choosing.

Requirements/Evaluation: three graded essays (3-5 pages each), handed in as drafts, given comments, with time for revision; 3-5 ungraded assignments; one graded, final research paper (6-8 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will alternate doing short graded and ungraded assignments in the first eight weeks of the class: the three graded assignments (3-5 pages in length) each will involve first a draft, and then a revision based on comments; the 3-5 ungraded assignments are either informal responses to the reading or discussion questions. Students also will write their own manifestos. The last month will focus on gaining the library skills to do a small research project (6-8 pages).

HIST 157 (S) 1960s and U.S. History (WS)

Cross-listings: HIST 157 AMST 157

Primary Cross-listing

This 100--level seminar will introduce students to the craft of history through the study of the 1960s, an important decade in American history (indeed, the world). In the U.S., this decade was marked by the on-going war in Vietnam, the struggle against racial inequality and racist oppression, changes in attitudes toward sex and sexuality, music, the role of youth culture, advances in technology, the rise of new expressions of American conservatism, and other tumultuous transformations in politics, culture, and the economy.

Requirements/Evaluation: two 3-- to 5--page papers based on readings; a 5-- to 7-page oral history project; research precis, annotated bibliography; final 10--page research paper; class participation

Prerequisites: first-years

Enrollment Limit: 19

Enrollment Preferences: first-years

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 157 (D2) AMST 157 (D2)

Writing Skills Notes: Precise and annotated bibliography will receive critical feedback from professor and peers, and dedicated time in class to discuss assignments and traits of effective history writing. On all papers students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Spring 2020

SEM Section: 01 Cancelled

HIST 162 (S) Unfamous Women, USA (DPE)

How do historians write and discover the lives of American women who never ran for office, led social movements, or married famous men? What sorts of lives did they lead? In what ways did they respond to the social and political upheavals of their age? How do historians unearth everyday experiences? Are the stakes different when we attempt to tell the stories of people whose lives make little mark on official letters. We will read social and cultural U.S. women's history, looking at urban working class women, enslaved women, rural farmers and wives, immigrant women from Europe and the Caribbean. Tutorial pairs will spend at least one week investigating sources in the Chapin Library and perhaps looking at visual art at Williams College Museum of Art.

Requirements/Evaluation: students will write papers (4-6 pages) roughly every other week, students will also write one page critiques, students will make a formal oral presentation one week

Prerequisites: first-years and sophomores

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course investigates women whose lack of political, economic and cultural power has persisted into the historical record. We will consciously think and write about the role of historians in recovering lives and stories. How much of someone's story can we really tell? How far should historians go in deploying peoples scanty records to make an intellectual argument?

HIST 163 (S) From Wampum to Phillis Wheatley: Communications in Early America (DPE) (WS)

Cross-listings: AMST 163 HIST 163

Primary Cross-listing

How did the diverse peoples who inhabited early North America communicate with each other, across profound linguistic, cultural, social, and religious differences? This course examines histories of communication in early America and the technologies that communities developed across landscapes of coexistence and also contestation. We will study Indigenous oral traditions, traditional ecological knowledge, and wampum belts as signifiers of identity, meaning, and diplomacy for Native American nations and peoples; artistic and scientific paintings, engravings, and visual culture that moved around the Atlantic World; political orations, newspapers, and pamphlets that galvanized public opinion in the "Age of Revolutions"; stone memorials and monuments that connected communities to ancestral pasts; and the powerful poetry of African American writer Phillis Wheatley along with the orations of Pequot intellectual William Apess. Together we will raise new questions about the meanings and ongoing legacies of early American histories, and grapple with diverse approaches to understanding the past. Additionally, this course provides an opportunity to engage with original materials pertaining to early American histories in the Williams College Archives/Special Collections and Art Museum.

Class Format: discussion

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: limited to first- and second-year students who have not yet taken a 100-level course in History; juniors and seniors only with the permission of the instructor

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 163 (D2) HIST 163 (D2)

Writing Skills Notes: Short essays (3-5 pages) spaced throughout the semester with instructor feedback on writing skills as well as historical content; written reflection and analysis related to museum/archives visit with original materials; final essay (8-10 pages) due at end of semester that synthesizes findings from across the whole semester and allows students to closely examine primary/secondary sources; regular opportunities to conference with instructor about writing ideas and drafts.

Difference, Power, and Equity Notes: This course delves into histories and experiences of diverse early Americans, including substantial focus on Native American/Indigenous and African/African American peoples. It introduces students to foundational methods for historical study, including decolonizing methodologies from Native American and Indigenous Studies (NAIS) and African American histories, along with critical vantages on Euro-American settler colonialism and the complex entanglements that arose in multiracial communities.

HIST 164 (S) Slavery in the American South (WS)

Cross-listings: HIST 164 AFR 164 AMST 165

Primary Cross-listing

This writing intensive seminar will focus on slavery in the southern United States--one of the most difficult and challenging subjects in this country's history. After looking at several different approaches to North American slavery and examining in depth two of the key primary sources for the study of this institution, students will select an aspect of slavery for intensive research. The rich sources of the Chapin and Sawyer Libraries will be examined to show students the extensive body of materials available on campus for their research projects. Separate class sessions on approaches to research and available research materials held with Lori DuBois, Sawyer reference librarian, and Wayne Hammond, Chapin librarian. Instructor holds individual meetings with each student to help them with the selection of a viable research topic.

Requirements/Evaluation: class discussion, weekly reading summaries, and final 8- to 10-page research paper; in addition to reading key books in the field, students will engage in primary source research using the College library's extensive holdings of microfilm and local records dealing with slavery

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 164 (D2) AFR 164 (D2) AMST 165 (D2)

Writing Skills Notes: 2- to 3-page summary of class reading assignment for that day; students invited to come in to discuss weekly reading summaries before or after submission, or both. An 8- to 10-page research paper due at end of term. Rough draft of research paper required, individual conferences held with each student on their rough draft prior to submission of final version of their research paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 165 (F) The Age of McCarthy: American Life in the Shadow of the Cold War (WS)

The Cold War cast a long shadow over American life in the years following World War II. The relationship between domestic and foreign affairs was particularly acute during the Age of McCarthy, an era marked by a intensifying Soviet-American rivalry abroad coupled with dramatic Red baiting and witch hunts at home. This course explores related aspects of American life from the late-1940s to the late-1950s, ranging from the phenomenon of McCarthyism itself to fallout shelters, spy cases, the lavender scare, nuclear families, the Hollywood blacklist, the religious revival and its implications for foreign policy, Sputnik and the space race, and links between the Cold War and Civil Rights. Using scholarly books and articles, primary sources, novels, music, and films, we will explore interactions between politics, diplomacy, society, and culture in the Age of McCarthy. In this writing-intensive course, we will focus on analyzing sources, writing clearly and effectively, and making persuasive arguments. Students will not only learn about history, but they will learn to think and write as historians.

Requirements/Evaluation: class participation, several short essays, in-class presentations, and a final 10- to 12-page research paper

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

Writing Skills Notes: Students will write several short essays (2-4 pages each) as well as a final research paper (10-12 pages). Over the course of the semester, students will submit a research proposal as well as several working drafts of the final research paper. These drafts will be discussed in small group workshops, including the professor. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

HIST 167 (F) Let Freedom Ring? African Americans and Emancipation (WS)

Cross-listings: AMST 167 AFR 167 HIST 167

Primary Cross-listing

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Requirements/Evaluation: research paper, short writing assignments, class participation

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 167 (D2) AFR 167 (D2) HIST 167 (D2)

Writing Skills Notes: Students will work throughout the semester on research paper that concerns Emancipation in the US. Students will turn in segments of this paper in separate assignments. During the final weeks of the course students will stitch these components together. Students will

receive from the instructor timely comments on their writing skills, with suggestions for improvement."

HIST 203 (F) Introduction to African History, 1800-Present (DPE)

This survey explores some of the major themes in the history of continental Africa since 1800. While prominent figures and major events will be covered, the course emphasizes the experience of African women and other groups of people who often faced marginalization at various points over the past two centuries. To paint a richer picture of this expansive history, historical scholarship will be studied alongside autobiographical testimonies, films, songs, music videos, and podcasts. The beginning of the course looks at the extremely diverse political, social, and cultural conditions that shaped the lives of people in Africa in the nineteenth century. Particular attention will be paid to the changes brought about during this time by the slave trades, the spread of Islam, and new forms of African political organization. The second section shifts to look at the impact of European imperialism and African responses to the imposition of colonial rule. We will examine how colonialism produced major changes in African societies, even as colonial authorities often insisted that Africans remain locked within a mythical, unchanging past. The third section of the course turns to the rise of anti-colonial struggles and the fall of formal colonialism and apartheid in Africa from the 1950s to 1990s. Lastly, we will assess the trajectories of postcolonial African societies, examining contemporary issues such as new expressions of religious faith, conflicts over wealth inequality and political power, cultural decolonization, and changing health and environmental realities in the twenty-first century.

Class Format: discussion

Requirements/Evaluation: three essays of 5-7 pages spaced evenly throughout the semester, a map quiz, discussion participation

Prerequisites: none; no prior knowledge of African history required; open to all students

Enrollment Limit: 40

Enrollment Preferences: students interested in History or Africana Studies

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course focuses on the inequalities produced in Africa (and globally) by the international trade in African captives and later, the new structures of power and exploitation established under colonial rule. The class explores how race, gender, class, ethnicity, and religion were pivotal to these forms of inequality in Africa, many of which persist today.

HIST 204 (S) Anti-Colonialism & Social Movements in Africa Since World War II (DPE)

This discussion-based survey introduces African-led social and political struggles that have aimed to create more just and equitable societies on the continent over the past eighty years. We begin with the anti-colonial and nationalist movements that flourished during and after Second World War and eventually brought about an end to formal colonial rule across the continent. This decolonization took place over many decades, and intertwined with this history, we look at popular and artistic struggles that sought to change the practices of independent governments in Africa, as well as confront intervening forces—from the International Monetary Fund to regional militias. The last section of the course examines movements since the 1990s for democratic rights, access to health and environmental resources, and freedom from gender and sexual oppression. We will focus on how movements were organized, including those led by trade unions, women's groups, and student associations, but also those that have not been led by formal organizations. As part of the course, students will work in groups to plan and carry out a solidarity event/campaign in consultation with a present-day African-led social movement/organization.

Class Format: discussion

Requirements/Evaluation: discussion participation, short weekly papers (2 pages), map quiz, and a small-group solidarity project

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History Majors, as well as Africana Studies, Global Studies, and Leadership Studies Concentrators

Expected Class Size: 15-20

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: We will focus on how people in sub-Saharan Africa have sought to address issues of power, difference, and equity in their societies through their own activity and organizing. Our discussions will focus on how inequality was structured by colonialism and how it has impacted present-day African societies (and even African social movements). This class will also prepare students to understand their own relationship to injustices in Africa and the differences between intervention and solidarity.

HIST 208 (F) What is Islam? (DPE)

Cross-listings: ARAB 234 GBST 234 REL 234 HIST 208

Secondary Cross-listing

This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments

through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern historical and religious texts (in translation).

Requirements/Evaluation: reading responses, two essays, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

HIST 210 (S) The Challenge of ISIS

Cross-listings: HIST 210 ANTH 210 GBST 210 ARAB 210 REL 240

Secondary Cross-listing

What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahidin and Taliban, and al-Qaeda, the course will go on to investigate how ISIS derives important aspects of its ideology and organization from these earlier movements and how it deviates from them. We will look at unique aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.

Class Format: lecture

Requirements/Evaluation: blogs (4 main blog posts, responses to at least 3-4 other blogs each week) (30%); analytic paper or class history paper (35%); 2 midterms (35%)

HIST 211 (S) Understanding 9/11 and the War in Iraq (DPE)

Cross-listings: HIST 211 ARAB 211

Primary Cross-listing

What were some of the causes of 9/11/2001 and what were some of the consequences? Why and how did the United States invade Iraq in 2003 and what impact did the subsequent occupation of that country have on the rest of the Middle East? In this course on recent political and cultural international history, that will also consider this history in film and popular culture, the monumental ramifications of the "War on Terror" will be considered and how this framework has shaped the 21st century. In the first part of the course, US-Middle Eastern relations will be explored and the eventual emergence of al-Qaeda in the late 1990s. Then the terrorist attacks on American soil on 9/11 will be studied and the ensuing wars on Afghanistan and Iraq. Particular attention will be on the prelude to the Iraq War, especially how that war was justified and rationalized, and the eventual occupation of Iraq. The myriad Iraqi responses will be studied along with American military experience. Finally, the course will evaluate the significance of the first decade of the 21st century and how these events continue to reverberate today.

Requirements/Evaluation: short online writings and papers and a final project

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

HIST 213 (S) Modern China, 1600-Present

Cross-listings: HIST 213 ASST 213

Primary Cross-listing

China's presence continues to grow in our world today, but contemporary China also evinces complex contradictions: a market economy promoted by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course examines China's historical engagement with the modern world to offer perspective on its current conditions. We will begin with the Qing (1644-1911) conquest of China and consolidation of a multi-ethnic empire, and investigate China's encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, and the often turbulent history of the People's Republic. Throughout, we will examine themes of social, economic, intellectual, and cultural change through predominantly primary source reading and analysis.

HIST 214 (F) Foundations of China

Cross-listings: ANTH 212 REL 218 HIST 214 GBST 212 CHIN 214

Secondary Cross-listing

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation: short writing assignments (approximately 750 words each), quizzes, a mid-term, and a final exam

Prerequisites: none

HIST 219 (S) Japanese Culture and History from Courtiers to Samurai and Beyond

Cross-listings: HIST 219 JAPN 219 ASST 219 COMP 229

Primary Cross-listing

This course will introduce students to the history, literature, and artistic culture of premodern Japan, from the time of the first recorded histories in the 800s through the abolition of the samurai class in the late 1800s. We will focus on the politics and aesthetic culture of the ruling elites in each period, from the heyday of the imperial court through the rise and eventual decline of the samurai warrior and the growth of Edo (Tokyo), with its new mode of early modern government and new forms of literature, theater, and art. Team taught by faculty from History and Comparative Literature, the course will examine historical texts alongside works drawn from literature, visual culture, and performing arts, and will ask students to consider how these different kinds of texts can shed light on one another. What is the difference between reading history and reading literature, or is it even meaningful to distinguish the two?

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, response assignments, two short papers (approximately five pages each), and a final exam

Prerequisites: none; open to all

Enrollment Limit: 40

Enrollment Preferences: students majoring or considering a major in a related field

Expected Class Size: 30

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

HIST 220 (S) History and Society in India and South Asia: c. 2000 to 1700s CE

Cross-listings: ASST 222 HIST 220

Primary Cross-listing

This course is an introduction to the history of India and South Asia from prehistoric times to the emergence of early modernity. During these centuries, the subcontinent emerged as one of the most diverse and complex regions of the world, as it continues to be even today. The course will cover the period between the rise of the Indus Valley civilization to the end of the Mughal Empire and will address topics such as the "discovery of India", the coming of the "Aryans", society and culture in the great epics like the *Ramayana*, the beginnings of Jain and Buddhist thought, politics and patronage under Islamic polities, the formation of Mughal imperial authority through art, architecture and literature, among others. Through the study of social processes, the course will focus on the diversity and connectedness that have defined the subcontinent throughout its history. It will also consider the role of history in the region and how a number of events from the past continue to inform its present.

Class Format: discussion

Requirements/Evaluation: class participation, response papers and presentation, 2 essays, a mid-term and a final exam

Prerequisites: none; open to all

HIST 221 (F) The Making of Modern South Asia: 1750-1950 CE

Cross-listings: GBST 221 ASST 221 HIST 221

Primary Cross-listing

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

Class Format: discussion

Requirements/Evaluation: class participation, response papers (2-3 pages), two short essays (4-5 pages), midterm and final exams

HIST 222 (S) Greek History

Cross-listings: CLAS 222 HIST 222

Secondary Cross-listing

Ancient Greece has been thought to embody the origins of Western civilization in its institutions, values, and thought; it has been seen as the infancy of modern society, with the attributes of innocence, purity, and the infant's staggering capacity for exploration and learning; it has been interpreted as an essentially primitive, violent culture with a thin veneer of rationality; and it has been celebrated as the rational culture par excellence. The study of ancient Greece indeed requires an interpretive framework, yet Greek culture and history have defied most attempts to articulate one. We will make our attempt in this course by investigating ancient Greece as a set of cultures surprisingly foreign to us, as it so often was to its own intellectual elite. But we will also come to appreciate the rich and very real connections between ancient Greek and modern Western civilization. The course will begin with Bronze Age-Greece and the earliest developments in Greek culture, and will conclude with the spread of Greek influence into Asia through the conquests of Alexander the Great. We will explore topics such as the aristocratic heritage of the city-state, the effects of pervasive war on Greek society, the competitive spirit in political and religious life, the confrontations with the East, the relationship of intellectual culture to Greek culture as a whole, Greek dependence on slavery, and the diversity of political and social forms in the Greek world.

HIST 223 (S) Roman History

Cross-listings: HIST 223 CLAS 223

Secondary Cross-listing

The study of Roman history involves questions central to the development of Western institutions, religion, and modes of thought. Scholars have looked to Rome both for actual antecedents of European cultural development and for paradigmatic scenes illustrating what they felt were cultural universals. Yet Roman history also encompasses the most far-reaching experience of diverse cultures, beliefs, and practices known in the Western tradition until perhaps contemporary times. A close analysis of Roman history on its own terms shows the complex and fascinating results of an ambitious, self-confident nation's encounter both with unexpected events and crises at home, and with other peoples. As this course addresses the history of Rome from its mythologized beginnings through the reign of the emperor Constantine, it will place special emphasis on the impressive Roman ability to turn the unexpected into a rich source of cultural development, as well as the complex tendency later to interpret such *ad hoc* responses as predestined and inevitable. The Romans also provide a vivid portrait of the relationship between power and self-confidence on the one hand, and violence and ultimate disregard for dissent and difference on the other. Readings for this course will concentrate on a wide variety of original sources, and there will be a strong emphasis on the problems of historical interpretation.

HIST 226 (F) Early Modern Europe

The three hundred years from the late Middle Ages to the French Revolution were Europe's formative centuries: they saw the emergence of the Renaissance and the Reformation, the outbreak of the Wars of Religion, the colonization of the Americas and intensification of trade in Asia, the Scientific Revolution and the Enlightenment. Through these historical experiences, European culture developed an identity distinct from its Christian one, as well as peculiar political and economic forms that ended up shaping the modern world. This course will examine such topics as the revival of classical letters, the formation of the modern state, urban and courtly culture, and religion and unbelief. Although the "early modern" era is profoundly different from our own, it remains crucial to any interpretation of the world in which we live today. Readings will emphasize primary sources and include such authors as Machiavelli, Montaigne, Hobbes, Aphra Behn, Voltaire, and Mary Wollstonecraft.

HIST 228 (S) Europe in the Twentieth Century

This course will offer a survey of some of the important themes of twentieth-century European history, from the eve of World War One to the beginning of the twenty-first century. Organized topically and thematically, the course will consider European society in the fin-de-siècle period; imperialism, racism, and mass politics; the impact of the Great War on European thought, culture and society; the Russian Revolution and Stalinist Russia; economic and political stabilization in the 1920s; the Depression; the rise of Fascism and National Socialism; World War II and the Holocaust; the establishment of postwar social democratic welfare states; decolonization; the "economic miracle" of the 1950s; the uprisings of 1968; the development of the European Union; the 1989 revolutions in Eastern Europe; and the recent debates about Islam in Europe. Through a combination of lecture and discussion, the course seeks to introduce students to the major ideologies and institutions that shaped the lives of Europeans in the twentieth century, and to reflect on the role of ordinary people who devised, adapted, embraced, and sometimes resisted the dominant ideas and practices of their time.

HIST 230 (F) Modern European Jewish History, 1789-1948

Cross-listings: HIST 230 JWST 230

Primary Cross-listing

What does it mean to be a Jew? The vexed question of Jewish identity emerged anew at the end of the eighteenth century in Europe and has dominated Jewish history throughout the modern period. Although Jewish emancipation and citizenship followed different paths in different parts of Europe, in general Jews were confronted by unprecedented opportunities for integration into non-Jewish society and unprecedented challenges to Jewish communal life. Focusing primarily on France and Germany, and to a lesser extent on the Polish lands, this course will introduce students to the major social, cultural, religious, and political transformations that shaped the lives of European Jews from the outbreak of the French Revolution to the aftermath of World War II. We will explore such topics as emancipation, Jewish diversity, the reform of Judaism, competing political ideologies, Jewish-gentile relations, the rise of modern anti-Semitism, the role of Jewish women, interwar Jewish life and culture, Jewish responses to Nazism and the Holocaust, and the situation of Jews in the immediate postwar period. In addition to broad historical treatments, course materials will include memoirs, diaries, and a novel.

HIST 240 (S) The Soviet Experiment

Cross-listings: HIST 240 RUSS 240

Primary Cross-listing

In 1917, the former Russian Empire became the site of the world's first socialist revolutionary government and the twentieth century's largest multiethnic state. Over the next quarter century, the Soviet Union witnessed the rise of one of history's most violent dictatorships, an apocalyptic war that claimed upwards of 26 million lives, and communist expansion into Eastern Europe and the decolonizing world. It also became the site of vibrant and optimistic utopian cultural projects, flights into space, bitter and hilarious political satire, and a society that was, for the most part, economically equal. Then in 1991, everything fell apart. This course will survey the origins, life, and collapse of the Soviet Union, paying particular attention to the ideas that shaped its development, the mark its architects' and leaders' policies left both at home and abroad, and the impact it had on the people who lived and didn't live to tell the tale.

HIST 241 (F) Tsarist Russia: State and Society between Europe and Asia

Cross-listings: HIST 241 RUSS 241

Primary Cross-listing

Russia. The name alone evokes wonder, fear, romance, and history itself. Over the past ten centuries, the land that we now call the Russian Federation has witnessed dramatic transformations that underwrote its transition from feudal backwater to global superpower. Its journey from tribalism to imperialism, feudalism to autocracy, agrarianism to industrialization, monarchism to parliamentarianism, Orthodoxy to revolutionary atheism left a mark not just on the collective Russian conscious, but on a world that has grown accustomed to viewing Russia as a test case for ideas, projects, and processes both fortuitous and tragic. How did Russia become the site of such a diverse array of political, social, economic, and cultural experiments? In what ways did they contribute to the formation and exercise of Russian political power? How did they contribute to the creation of a "Russian" identity, and to what effect for Russian citizens? This course will seek to answer these questions through a survey of Russian history from its founding in Kievan Rus' in the 9th century to the October Revolution of 1917.

HIST 242 (F) Latin America From Conquest to Independence

This course will examine the processes commonly referred to as the creation of "Latin America" and will do so from numerous perspectives. Starting with the construction of indigenous societies, from small and decentralized groupings to huge imperial polities-, before 1492, to the invasion of Europeans from that date forward, we will take up the question of the Iberian "conquest," looking at the often violent encounters that made up that event and analyzing its success, limits, and results. We will then study the imposition of Iberian rule from the point of view of would-be colonizers and the peoples they treated as objects of colonization, stressing the multiple and conflicting character of European, indigenous, and African perspectives. Thus looking at the Americas from both the outside-in and inside-out, we will focus on the unequal relations of power that came to define cultural, political, and economic life in the colonies, always with an eye on the gendered and racialized nature of those relations. We will also not only compare very different regions of the Iberian Americas but also see how the grand shifts of history intervened in--and perhaps consisted of--the most normal elements of daily life in northern Mexico, the central Andes, coastal Brazil, and other parts of colonial Latin America. Visual as well as more traditional written primary materials, along with secondary texts and films, will serve as the basis for our discussions throughout the semester.

HIST 243 (F) Modern Latin America, 1822 to the Present

This course will examine salient issues in the history of the independent nations of Latin America. The first two sections of the course will focus on the turbulent formation of nation-states over the course of the "long nineteenth century," from the crises of the Spanish and Portuguese colonial empires in the late eighteenth century to the heyday of liberal political economies at the turn of the twentieth century. In this regard the course will analyze the social and economic changes of the period up to World War I and the possibilities they offered for both political order and disorder. Key topics addressed will include caudillismo, the role of the Church in politics, economic dependency and development, and the place of indigenous and African Latin-American peoples in new nations, and industrialization and urbanization. The latter two sections will examine the trend toward state-led national development in the twentieth century, considering the diverse forms it took and conflicts it generated in different nations and periods. Here we will take up questions the emergence of workers' and women's movements and the rise of mass politics; militarism, democracy, and authoritarian governments; the influence of the U.S. in the region; and the life and possibly death of revolutionary options. Within this chronological framework of national and regional political economy, we will consider the ways that various Latin American social actors shaped their own lives and collective histories, sometimes challenging and sometimes accommodating the ideals of national elites. General regional trends will be illustrated by selected national cases, including Mexico, Brazil, Argentina, Cuba, Chile, Venezuela, Nicaragua, and Guatemala.

HIST 248 (S) The Caribbean: From Slavery to Independence

Cross-listings: AFR 248 HIST 248

Secondary Cross-listing

This class will begin with and foreground the current crisis in Puerto Rico, an island emblematic of the history of colonialism, racism, environmental destruction, and economic exploitation of the region. But as the Caribbean has suffered, so has it resisted. From the Haitian Revolution to the Manley 'Revolt' in Jamaica, the Puerto Rican Independence Movement, the Cuban Revolution, and the Grenadian Revolution, the Caribbean has been at the forefront of radical change in the New World. Pioneering slave emancipation, independence from European empires, and unique experiments in socialism, communism, and Black Power, these small islands have been world leaders. But their innovative social and political experimentation--expressed in vivid artistic and musical forms--have all too often met with disdain and repression by their more powerful neighbors or former colonial rulers. This course will examine the audacious experiments of the Caribbean people from the eighteenth to the twentieth centuries as well as the repression they have faced from abroad. We will pay attention to the rich cultural diversity of the region, using film, music, literature and art to examine diverse phenomenon, including voodoo, Santería, and Rastafarianism. We will also explore the prospects for continuing change in the contemporary Caribbean, paying special attention to the environmental challenges they face amidst rising sea levels, drought, heat waves, and the

effect of two hundred years of environmental destruction at the hands of rapacious foreigners, from slaveowners to cruise ship lines to bauxite and oil producers.

HIST 252 (S) From Contact to Civil War: A History of North America to 1865

This course will provide a survey of North American history from Europe's first expansion into the New World to the American Civil War. Cast as a contest between competing empires and their peoples, the course begins in Europe and Native North America before contact and studies the expansion of European nations into the New World. The course will emphasize the history of British North America and the interactions between and among the many peoples of colonial America. The course will then examine the coming, course, and consequence of the American Revolution (or what many at the time considered America's first civil war). The new nation unleashed massive and far-reaching economic, social and political changes. The last third of the course will explore these changes in the antebellum era and trace how they affected the coming of America's second civil war.

HIST 254 (F) Sovereignty, Resistance, and Resilience: Native American Histories to 1865 (DPE)

Cross-listings: HIST 254 AMST 254

Primary Cross-listing

This course surveys Native American/Indigenous North American histories from creation through the U.S. Civil War, tracing the complex ways that tribal nations and communities have shaped North America. It also introduces foundational methodologies in Native American and Indigenous Studies and strategies for pursuing decolonizing scholarship and action. Beginning with the diverse Indigenous societies that inhabited the Americas millennia before Columbus's arrival, it discusses the cultural complexity of Native peoples, nations, and worldviews rooted in particular ecosystems and homelands, as well as accounts of beginnings and migrations. It addresses how Native peoples confronted grievous epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial projects of "discovery" and colonization. Indigenous nations' multifaceted efforts to maintain sovereignty and lands through eras of pervasive violence and removal are discussed, as well as the important yet under-recognized ways that Native communities negotiated the tumultuous era and conflicting allegiances of the Civil War. The course centers on Indigenous actors-intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and others-and consistently connects historical events with present-day debates over land, historical memory, education, and activism. Additionally, it provides an opportunity to engage with original materials pertaining to Native histories in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the particular Indigenous homelands in which Williams College is located.

Class Format: discussion

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay

HIST 256 (F) Social Justice Traditions: 1960s to #Black Lives Matter (DPE)

Cross-listings: AMST 256 HIST 256 AFR 257

Secondary Cross-listing

We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today's activists draw on the "freedom dreams," tactics, and styles of rhetoric crafted by their predecessors, while making use of new technologies, such as Twitter, and evolving understandings of "justice." Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study

the development of LGBTQ, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

Requirements/Evaluation: attendance and class participation; four 2 page reading response papers; discussion of films via GLOW forums; and a final 7-8 page analytical essay

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: first-years, sophomores, and American Studies majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

HIST 257 (F) Religion and American Politics

Cross-listings: HIST 257 REL 217

Secondary Cross-listing

This course examines the intersection of religion and American politics, from the colonial era to the present. It focuses especially on electoral politics and social movements, exploring the role of religion in conflicts over racial equality, capitalism, gender and sexuality, and church-state relations. Students will tackle questions with both historical and present-day relevance, such as: Was America founded as a Christian nation? Has religion been a source of revolutionary change, or a mere 'opiate of the masses?' How have religious ethics shaped the politics of race, gender, and class? How has growing religious diversity affected civic unity? What role *should* religion play in American political life? The course will cover such topics as the religious views of the 'Founders;' debates over slavery; spiritualism & women's rights; state treatment of religious minorities; the Scopes Trial and scientific modernity; the Social Gospel and modern capitalism; the New Left and the Moral Majority; and late 20th-century religious battles over war, civil rights, feminism, and democracy itself.

Requirements/Evaluation: class participation; six informal response papers (300-400 words); two unit papers (4-6 pages); final paper (8-10 pages)

HIST 258 (S) The World Oil Made: A Modern History

We live in a world transformed by petroleum. All around us today--in global carbon emissions, transportation, the clothes we wear, everyday objects we touch, microplastics in our water--oil is there, even if we can't always see it. At the same time, the industry fuels massive flows of global capital, and

provokes critical political shifts, conflicts, and resistance movements around the world. How did oil's ubiquity happen in just over 150 years? This course will chart a global modern history by keeping this energy source always in our sight, paying particular attention to its role in the political economy, its ecological impacts, the cultural changes it has set in motion, and its place in people's material lives. In addition to having regular short assignments, students will work in groups through the semester, researching and learning how to make a 5-minute video documentary.

Class Format: discussion

Requirements/Evaluation: two short graded essays (3-5 pages); two short ungraded essays (2-3 pages); 2-3 short research assignments (1 page each); one storyboard (graded); one group video project (graded)

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: sophomores and first-years

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

HIST 259 (S) New England Environmental History (WS)

Cross-listings: ENVI 259 AMST 259 HIST 259

Secondary Cross-listing

Have you ever wondered why there are few old-growth forests in New England? What Williamstown looked like before Williams was founded? How ideas about environmental preservation have changed over time? These are some of the questions we will explore in this course, which introduces students to the discipline of Environmental History through New England examples. During the semester we will: (1) read and discuss scholarship on the environmental history of New England and the world; (2) use case studies and field trips to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes; (3) Develop a research paper based on original archival research

Requirements/Evaluation: several short essays, final project

Prerequisites: ENVI 101 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies concentrators

HIST 260 (S) U.S. History Since the 1940s

This course surveys the history of the United States since the 1940s. It will acquaint students with the key developments that defined the postwar order, focusing especially on the history of inequality, politics and public policy, social movements, and intellectual life. As students make their way through the course, they will learn to think historically in the broadest sense--situating texts within their social context, engaging with diverse and unfamiliar perspectives, and gaining an appreciation for the complexity of human experience. In the process, students will tackle historical questions

with contemporary relevance. What forces have made American society more or less equal, and how should equality be measured in the first place? How have race, class, and gender affected opportunities and outcomes for different Americans over time? To what extent have everyday people shaped the broader history of American capitalism, democracy, and social thought? To what extent have these broader developments shaped the lives of everyday people? Are we now living in an age of fracture or an age of liberation? The course will cover such topics as Cold War culture; the mass consumer economy; racial inequality, both Southern and Northern; the changing role of women at home and in the workplace; the global dimensions of the 1960s; the origins of the New Right; and the roots of modern polarization in conflicts over such issues as--busing, abortion, and privatization.

Requirements/Evaluation: attendance and participation; six informal response papers (300-400 words); two unit papers (4-6 pages); final paper (10 pages max)

Prerequisites: none, open to all students

HIST 261 (F) America and the Cold War

Cross-listings: PSCI 262 HIST 261 LEAD 262

Secondary Cross-listing

This course examines the rise and fall of the Cold War, focusing on four central issues. First, why did America and the Soviet Union become bitter rivals shortly after the defeat of Nazi Germany? Second, was one side primarily responsible for the length and intensity of the Cold War in Europe? Third, how did the Cold War in Europe lead to events in other areas of the world, such as Cuba and Vietnam? Finally, could the Cold War have been ended long before the collapse of the Soviet Union in 1989? Political scientists and historians continue to argue vigorously about the answers to all these questions. We examine both traditional and revisionist explanations of the Cold War, as well as the new findings that have emerged from the partial opening of Soviet and Eastern European archives. The final section of the course examines how scholarly interpretations of the Cold War continue to influence how policymakers approach contemporary issues in American foreign policy.

Class Format: lecture/discussion

Requirements/Evaluation: one medium length paper, an in-class midterm and final exam, and a series of short assignments

Prerequisites: none; PSCI 202 is recommended but not required

HIST 263 (F) The United States and the World, 1898 to the Present

Cross-listings: LEAD 261 HIST 263

Primary Cross-listing

This survey course examines the United States and the World since 1898. Students will be introduced to key diplomatic developments since the Spanish-American War, when the country began its ascendance to hegemonic power from which it is now in retreat. American power reached its apex during the Cold War, but that conflict and its offshoots like the Vietnam War brought about crises over national identity and values that remain unresolved. Readings and discussions will focus on issues of ideology, empire and neo-imperialism, domestic politics and foreign policy, and the relationship between culture and foreign relations.

Class Format: discussion

Requirements/Evaluation: class participation, pop quizzes, short papers, a midterm exam, and a final exam

Prerequisites: none

Enrollment Limit: 40

HIST 264 (S) Environmental History

Cross-listings: ENVI 229 HIST 264

Secondary Cross-listing

This course is an introduction to Environmental History: the study of how people have shaped environments, how environments have shaped human histories, and how cultural change and material change are intertwined. As such, it challenges traditional divides between the humanities and the sciences. Taking U.S. environmental history as our focus, we will strive to understand the historical roots of contemporary environmental problems, such as species extinction, pollution, and climate change. We will take field trips to learn to read landscapes for their histories and to examine how past environments are represented in museum exhibits, digital projects, and physical landscapes. And we will develop original arguments and essays based on archival research. It is imperative that we understand this history if we are to make informed and ethical environmental decisions at the local, national, and global scale.

Class Format: with field trips

Requirements/Evaluation: several short essays; final research project

HIST 265 (F) Race, Power, & Food History (DPE)

Cross-listings: HIST 265 AMST 245 ENVI 246

Secondary Cross-listing

Have you ever wondered why Spam is so popular in Hawaii and why ramen noodles are a cheap, ubiquitous food? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of critical food studies. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, and gender.

Requirements/Evaluation: two to three short writing assignments (4-5 pages); one longer final paper (8-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

HIST 281 (S) African American History, 1619-1865

Cross-listings: HIST 281 AFR 246

Primary Cross-listing

This course provides an introduction to the history of African Americans in United States during the colonial, early republic, and antebellum eras. The experience of enslavement necessarily dominates this history, and it is the contours and nuances of slavery-and the development of racial classifications-that give this course its focus. We will also explore African cultural influences, the significance of gender, the lives of free blacks, and the cultural and intellectual significance of the abolitionist movement. The course closes on the themes that emerge from the Civil War, and on the meaning of freedom and emancipation. Our readings will include primary sources and secondary literature. Class meetings will combine lecture and discussion. Informed participation in class discussion is essential. This Power etc course explores the experiences and expressions of the culturally diverse peoples of African descent in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

Requirements/Evaluation: class discussion, short informal writing assignments, three formal papers from 3-7 pages, and a final exam

Prerequisites: none

Enrollment Limit: 30

HIST 286 (F) Latina/o History, 1848 to the Present

Cross-listings: HIST 286 LATS 286

Secondary Cross-listing

From 1848 to the present, Latina/o communities have taken shape in the United States through conquest and migration. Why and when have distinct Latina/o groups come to have sizeable communities in different regions of the United States? U.S. imperialism and foreign policies, as well military, political and economic ties between the United States and the various countries of origin define the political and economic contexts in which people leave their homes to come to the United States. In their search for low-wage labor, U.S. employers have recruited workers from Latin America and the Hispanic Caribbean. Mexicans, Puerto Ricans, Cubans, Dominicans, Guatemalans, and Salvadorans, as well as others, have responded to labor recruitment and have also relied on networks of family and friends to seek a better life in the United States. What do the histories of these distinct Latina/o groups share and where do their experiences diverge?

HIST 292 (S) History of Sexuality

Cross-listings: GBST 241 REL 241 HIST 292 WGSS 239

Secondary Cross-listing

Is sexuality an immutable aspect of who we are or is it socially constructed? How have people understood sex and sexuality throughout history? Why does religion have any say in the sexual lives of individuals and society? What are sexual transgressions and why are they punished? Is sex a commodity that can be exchanged for money? Is sex political? This course will explore these questions through a historical approach, focusing in particular on the shifting understanding of sex and sexuality across historical time and different geographical regions. In investigating the category of sexuality, this course will push us to consider three key questions: 1) Is sexuality a useful category for historical analysis, 2) how have our assumptions regarding sexuality and sexual ethics taken shape and changed over time and 3) how do social, cultural, political, and economic conditions affect changing meanings of sexuality. Historical studies will be read in conjunction with different theoretical frameworks about sexuality. Reading historical accounts of sexuality alongside theoretical pieces will allow us to consider how historians construct an argument and the influence of theoretical frameworks in shaping scholarship. Some of the theorists we will read in the course include: Michel Foucault, David Halperin, Afsaneh Najmabadi, Valerie Traub, and Carla Freccero.

Requirements/Evaluation: reading responses, two essays, and final research paper

HIST 301 (S) Approaching the Past: Remembering American History

Much of what we know and understand about American history is rooted in the received narrative of our national history, a history that is constructed of individual, collective, and a national memory of the past and its meanings. This course will examine some forms through which American historical memory is presented and (re)presented, such as monuments, museums, novels, film, photographs, and scholarly historical writing, by considering a number of pivotal events, institutions, or eras in American history. Potential topics are slavery, race, and the Civil War; westward expansion; the Great Depression; World War II; the Sixties; the war in Viet Nam; and the events and aftermath of September 11, 2001.

Class Format: discussion

Requirements/Evaluation: weekly response papers, a book review, an exercise with the Williams College Museum of Art, and a final project to be completed in consultation with the professor; students will be required to lead a class discussion

Prerequisites: restricted to History majors and sophomores planning to major in History

HIST 301 (F) Approaching the Past: History, Theory, Practice

This course will explore how the discipline of "History" has come to assume its present form and how a number of historians since the 1830s have understood their craft. We will begin by discussing the work of three great nineteenth-century historians (Macaulay, Marx, and Ranke) who believed that historical "truth" existed and could, with skill, be deciphered. Next we will explore the philosophy and practice of the cultural and social historians of the 1960s-1980s, comparing and contrasting their work with that of their nineteenth-century predecessors. We will then consider the writing of those recent theorists who have tried to refute historians' claims to be able to capture the "truth" of the past, focusing on the state of the field in the wake of challenges posed to its epistemological foundations by postmodernism. Finally, we will conclude with an assessment of the state of the discipline today. In general, we will be less concerned with "the past" than with what historians do with "the past." Consequently, we will focus primarily on those abstract, philosophical assumptions that have informed the various practices of history from the 1830s to the present.

Class Format: discussion

Requirements/Evaluation: class participation, a 250-word position statement ("What is History?"), two 9- to 11-page interpretive essays, and a take-home final exam

Prerequisites: restricted to HIST majors and sophomores planning to major in HIST

HIST 301 (F) Approaching the Past: Practices of Modern History

What is history? What is it that historians do? In this course, students will explore how and why we historians practice our craft. The first section of the course will examine how historians think about and come to know the past. Issues of the nature of historical truth, objectivity and bias, and the uses of different types of evidence will be discussed. Next, we will explore how historians attempt to make sense of the past. We will consider the perspectives, scale, and categories of analysis that historians can bring to bear on the past, and how history can be told. Finally, the third section of the course will pose questions about the purposes, uses, and misuses of history. And we will ask what the moral, political, and historical responsibilities of historians may be. The class will meet once a week, and each session will focus on some theoretical material as well as readings on a broad range of topics that concretely illustrate the methodological issues at stake.

HIST 301 (F) Approaching the Past: Writing the Past

"History" refers to the aggregate of past events as well as to the branch of knowledge that seeks to understand those past events. Whereas history courses often take as their content the first of these two meanings of history, focusing on the politics, society, and culture of a particular place in a particular historical era, this course will examine history's often concealed "other" meaning: the practices of historians, their methods and assumptions. In so doing, this course aims to unsettle history majors' own assumptions about what history "is" and what historians "do". How do historians

reconstruct the past, and how and why have their approaches to sources, theories, and narrative strategies changed over time? And on a deeper level, how have historians' suppositions changed--if they have changed--about the nature of historical truth, knowledge, and the value of history to the societies in which they wrote? Taking history-writing itself as our object of study, over the course of the semester we will read the work of twelve, quite different historians from the classical to the modern era. Each week in our seminar meetings, we will subject these texts to a careful reading in order to understand and assess these historians' theories and practices.

Class Format: discussion

Requirements/Evaluation: evaluation will be based on class participation, weekly critical response papers to the assigned reading, and a final paper

Prerequisites: restricted to History majors and sophomores planning to major in History

Enrollment Limit: 19

Enrollment Preferences: senior, then junior, History majors

Expected Class Size: 15-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

HIST 301 (S) Approaching the Past: Varieties of Historical Thinking

This course is designed to acquaint students with some of the ways historians have thought about the past. Beginning with Thucydides' *The Peloponnesian War*, the work of twelve historians will be studied closely and critically over the course of the semester. In the process, students not only will become familiar with various important historical approaches but will also be encouraged to examine their own assumptions about the past and about how and why--or even if--we know it. We will meet weekly to define, understand, and assess the different ways historians considered in the course have thought about the past.

Requirements/Evaluation: in preparation for class discussion, students are required to produce a one-page critical response to the assigned reading each week, which will form the basis for class discussion; in addition to writing ten critical responses, students are also required to make an oral presentation of approximately twenty minutes on a professor they have had in a history course at Williams College

Prerequisites: restricted to History majors and sophomores planning to major in History

Enrollment Limit: 19

Enrollment Preferences: senior, then junior, History majors

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

HIST 301 (F) Approaching the Past: Modern National, Transnational, and Postcolonial Histories

This course examines the practice of history from the nineteenth century to the present. We will examine the sources, methods, and theoretical assumptions that have shaped the historical craft in this period, as well as the deeper questions that all historians must confront, implicitly or explicitly: What is "history"? Who makes it and how? To address these issues, we will discuss the work of canonical and non-canonical historians from across the world, and from outside as well as inside the academy. The particular focus will be on the production of history from the rise of the nation-state through the spread of new imperialisms in the late nineteenth century and on to the emergence of the "Third World," decolonization, and the "new globalization" over the course of the twentieth century. In weekly seminar meetings we will analyze texts and how their authors define historical subjects/actors and processes, as well as the meanings of history for different audiences and eras.

Requirements/Evaluation: class participation, response papers, short essays, and a final paper

Prerequisites: restricted to History majors and sophomores planning to major in History

HIST 301 (S) Approaching the Past: Other People's History

From antiquity to the present, most historians have chosen to write about their own community, whether they have defined it by ethnicity, nationhood, language, or creed. Only a minority have chosen instead to record the history of a group of which they are not a member. This seminar asks: what does it mean to write other people's history? We will consider, first, the motivations that might lead someone to dedicate their lives to studying a foreign culture. What practical challenges are involved? What languages, archives, and forms of knowledge does the historian have to master, and how is this achieved (or not achieved)? Further, we will inquire: what unique problems and opportunities emerge? What mental categories mediate the inevitable comparisons that arise in the study of other people's history? What kind of histories can be written this way, and what kind cannot? Throughout, we will take seriously the ethical challenges and opportunities of this peculiar historiographic position. Finally, we will determine the lessons that can be drawn for our own practice as historians. Authors to be read will range from antiquity to the present and include Herodotus, al-Biruni, José de Acosta, and Edward Gibbon among others.

Requirements/Evaluation: participation, short papers, presentations, and a longer final paper

HIST 301 (S) Approaching the Past: The American Civil War

How have historians told the story of the Civil War? Even before Lee's surrender at Appomattox Court house in the spring of 1865, historians and local communities strove to craft a coherent story of a war that left 620,000 soldiers dead and set formally enslaved people on a long road towards freedom. Civil War historiography began in the 19th century and has been reinvented numerous times in the last century. Biographies of Lincoln, of Generals--Union and Confederate still appear regularly. Historians of gender have tried to capture women's experiences on the homefront and on the front lines. Histories of battles, of legislation, of the era's music, literature, and art all fill rows of shelves in Sawyer. We will not attempt to "understand" the Civil War. Rather we will examine a few very different histories of the event. We will read authors who center African Americans and authors who ignore them. We will read a biography and cultural history. We'll look at new attempts to tell local histories of the war through interactive web sites and film. We'll also study historical re-enactors, North and South. We will end with an examination of the recent struggles over Confederate Memorials.

Requirements/Evaluation: one presentation, one formal paper and/or a book review, a final paper

HIST 302 (F) Islamic Law: Past and Present

Cross-listings: WGSS 243 ARAB 243 HIST 302 REL 243

Secondary Cross-listing

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give

students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

Requirements/Evaluation: weekly responses, four 2- to 3-page essays

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

HIST 303 (S) Against the Grain: The Counternarratives of Historical Fiction in the Arab World (DPE) (WS)

Cross-listings: HIST 303 ARAB 329

Secondary Cross-listing

In 2011, a few months after the large scale protests in Egypt that led to Mubarak's forced abdication of power, a story circulated in social media that was then picked up by traditional media about the fabrication of a key image that goes back to the 1973 war. Every October on the annual anniversary of the war, pictures reappeared in the media, commemorating the event. A widespread one was one of Mubarak, then a major general in the army and commander of the air force, standing right next to al-Sadat looking lost in thought, while everyone else is focused on al-Sadat as he explains routes and war plans on the maps in front of them. The image had been photoshopped. Sa'd al-Shathl' who was chief of staff during the 1973 war was "airbrushed out of history" to be replaced by Mubarak in the photo, allowing for an altered historical narrative about each man's respective role and importance. Because of such incidents, the difficulty or impossibility of accessing "official" archives and the control of historical narratives by the state, historical fiction as a genre is of added significance in the Arab world. In this course, we will be examining eight works of Arabic historical fiction in translation, transregionally from the late nineteenth century to the present, with a focus more on the last few decades. Historical fiction will be examined both as *epistémê* and as *technê* to explore its associated aesthetics and incorporation of different archives, documents and forms. We will be exploring the possibility of considering historical fiction as an alternative archive that opens up new definitions and forms of experiences, community and subjectivity instead of the traditional narrative of the nation-state. Alongside the novels that will vary from a whodunnit in contemporary Lebanon (*The Mehlis Report* by Rabee Jaber) to a work that is about the fall of Granada in 15th century Spain (*Granada* by Radwa Ashour), we will be reading theoretical texts alongside the novels.

Requirements/Evaluation: participation and engagement with material in class: 30%; four 5 page papers: 20%; presentations/debates: 15%; midterm term project: 15%; end of term paper: 20%

Prerequisites: statement of interest

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 303 (D2) ARAB 329 (D1)

Writing Skills Notes: Four 5-page papers long papers evenly spaced through the semester, a mid-term project and a research paper 10 pages long.

Difference, Power, and Equity Notes: The course aims to engage with how historical narratives have traditionally privileged those who have power,

and thus see literary texts as an alternative archive that allows for counter narratives that show an array of experiences and redefinition of subjectivity and community outside of the traditional paradigm of the nation state and which allows the dismantling of the monolithic presentation of historical narratives in and of the Arab world.

HIST 304 (S) Africa and the United States: From the Atlantic Slave Trade to Black Panther (DPE)

This course examines the history of Africa since the eighteenth century by exploring the connections between the African continent and United States. By taking a Pan-African and international approach, the class will highlight how the histories of both places have been deeply intertwined. The course is organized around four themes. The first is the impact of African enslavement on both continents and the way African social practices were carried across the ocean and transformed by slavery and abolition. We will then turn to the "back to Africa" movements of the nineteenth and twentieth centuries and explore why different groups of African-Americans sought to return to the continent of their origin, and what impact this had on those living in Africa. The third theme is the deepening involvement of American missionaries, the US government and non-governmental organizations in Africa, which accelerated in the twentieth century. The final section explores the important links between Black freedom movements in the United States and anti-colonial and anti-apartheid movements in Africa. The course will conclude with a consideration of the current state of Africa-US connections in light of the recent blockbuster film, Black Panther. Against this backdrop, students will engage in new research over the course of the semester on the history of Williams' historical links with Africa.

Class Format: lecture

Requirements/Evaluation: discussion participation, map quiz, two short papers (~4 pages), and a final research paper (6-8 pages)

Prerequisites: none, open to all students; some background in African history will be useful

Enrollment Limit: 25

Enrollment Preferences: History majors, Africana Studies concentrators, American Studies majors; seniors, juniors, sophomores; or first-year students with some background in African history

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course focuses on the effects of racism and colonialism on different peoples of African descent and key episodes when Black solidarity was forged across great physical distance between the United States and Africa, as well as episodes where it was compromised (by forms of difference based on place of birth, language, religion, and class.) Through class readings, discussion, and the final group project, the course will help students assess what foundations have allowed for trans-Atlantic col

HIST 306 (S) Indigenous Narratives: From the Fourth World to the Global South

Cross-listings: GBST 369 COMP 369 HIST 306 ARAB 369

Secondary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Tashelhiyt Berber tales in Morocco, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the

aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Requirements/Evaluation: active class participation, several short response assignments (2-3 pages each), final performance project, and final paper (5- to 7-pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Comparative Literature majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

HIST 307 (S) Is Africa Poor? (DPE)

Poverty is widespread across Africa, yet exists alongside the continent's fantastic wealth in natural resources. Despite a decade of excitement about "Africa rising" as a new economic powerhouse, African countries still occupy 36 of the bottom 40 positions in the most recent UN Human Development Report. How can we make sense of this contradiction? In this debate-focused seminar, we will delve deeply into the work of historians, international organizations, and African activists who have argued over the causes of poverty and inequality in Africa-and arrived at different conclusions about the appropriate solutions. Taking a historical approach, we will explore how the current challenges faced by African societies are rooted in the slave trade, colonial rule, the Cold War, and more recently, the imposition of neoliberal economic policies in Africa. Key issues of contemporary debate will include the role of state-centered development, privatization, resource extraction, foreign development aid, and climate change.

Class Format: discussion with organized debates

Requirements/Evaluation: discussion participation, map quiz, and multiple papers

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: History Majors, Political Economy Majors, Africana Studies Concentrators, Global Studies Concentrators

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The class is grounded in extensive reading and debate about how economic inequality became structured on a global scale. This will entail studying how interconnected economic, political, and social differences developed-both between Africa and the rest of the world *and* within the African continent. Building on the wide-range of texts that we will analyze, the discussions and assignments will equip students to better understand and respond to current issues of global economic justice.

HIST 308 (S) The Nile (DPE)

Cross-listings: ARAB 308 HIST 308

Primary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It is the only reason that Egyptians have been able to live in the Sahara Desert. It was at the banks of this river that some of the most significant human structures were built and some of the most beautiful artworks

conceived. The Nile provided the silt and hence the alluvial soils on which all the great Egyptian empires were founded. Yet now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This course will consider the history of the Nile and the peoples and cultures it has sustained. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. Who lives along this river and what kind of cultures have developed in the Nile valley? We will evaluate the numerous attempts to manage and control the Nile and the continuous efforts to utilize the river for human development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the mega city Cairo with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 308 (D2) HIST 308 (D2)

Difference, Power, and Equity Notes: The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

HIST 309 (S) Fire and Ice: The History of Modern Iceland

How have a few wretched souls been able to survive on a frozen tundra in the middle of the north Atlantic for over 1100 years? This course will explore the curious history of Iceland, a small and unimportant country, that despite, or because of its geographic isolation and lack of any valuable natural resources, has been able to develop a distinct national and cultural identity. What lessons can be drawn from the historical experiences of Icelanders? The course will start with the paradigmatic sagas (Egil's and Njal's Saga) that have played an out-sized role in the development of Icelandic culture. Then we will assess the nation's independence, the impact of the world wars, the building of the modern welfare state, and how the country has fared through economic peaks and valleys. At the end of the semester, students will be able to understand the significance of the following phrases: "Fögur er hlíðin," "Deyr fé, deyr frændr," "Þetta reddast," "dugleg/ur," and "Áfram Ísland." This comprehension is, of course, very practical since 320,000 people understand the Icelandic language.

HIST 311 (S) Where are all the Jews? (DPE) (WS)

Cross-listings: JWST 268 ARAB 363 COMP 363 REL 268 HIST 311

Secondary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle's schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews' departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their sudden disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, historiographical works, ethnographies, and anthropological texts alongside films and documentaries, the students will understand how literature and film have become a locus in which historiographical amnesia about Arab/Berber Jews is actively contested by recreating a bygone world, which, until fairly recently, both Jews and Muslims occupied and negotiated successfully for millennia. Reading against both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 312 (F) The Mughal Empire: Power, Art, and Religion in India

Cross-listings: HIST 312 ASST 312 REL 312 GBST 312

Primary Cross-listing

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith--much larger than any European empire in the early modern world--the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

Requirements/Evaluation: participation, response papers/short essays, one final paper

HIST 314 (F) Emperors of Heaven and Earth: Mughal Power and Art in India, 1525-1707

Cross-listings: ARTH 314 HIST 314 ASST 314

Primary Cross-listing

The Mughal dynasty ruled over most of northern India from the 16th to the 19th centuries. The Mughal Empire was the grandest and longest to rule the Indian subcontinent--much larger than any European empire in the early modern world--and it continued to have a lasting impact on South Asia. Mughals established a centralized administration with a vast complex of personnel, money and information networks. Styling themselves as 'Emperors of Heaven and Earth', the Mughal kings were also globally viewed as political innovators and unprecedented patrons of art. Their visual practices were as much a part of their imperial ideologies as their administrative and military measures. This co-taught course combines the disciplines of Art History and History to explore the intricate workings of Mughal politics and ideologies. The first of its kind to bring an interdisciplinary approach to teaching South Asia at Williams, the course asks: How did the Mughals sustain their empire for three centuries? How did they use art and politics to rule over diverse and largely non-Muslim populations? How did these Muslim imperial patrons merge Persian and Central Asian cultural values with preexisting Indian forms of administrative and artistic expression? How does Mughal culture continue to shape the South Asian imagination today? Readings will include a variety of visual and literary texts. We will delve deep into the world of biographies, travel accounts, poetry, architecture and a plethora of artworks. Students will take a hands-on approach to Mughal painting through several visits to the WCMA and a dedicated Object Lab. The primary aim of this co-taught course is to introduce students to a multifaceted picture of one of the greatest empires in pre-colonial world history. Another goal is to familiarize them with a wide range of visual and written primary sources and develop a vocabulary for 'reading' these.

Requirements/Evaluation: class participation and weekly responses to readings, 4-5 short papers and a final paper

HIST 319 (F) Gender and the Family in Chinese History

Cross-listings: ASST 319 WGSS 319 HIST 319

Primary Cross-listing

Although sometimes claimed as part of a set of immutable "Asian values," the Chinese family has not remained fixed or stable over time. In this course, we will use the framework of "family" to gain insight into gender, generational, and sexual roles in different historical periods. Beginning in the late imperial period (16th-18th Centuries), we will examine the religious, marital, sexual, and childrearing practices associated with the "orthodox" Confucian family. We will then explore the wide variety of "heterodox" practices in imperial China, debates over and critiques of the family system in the twentieth century, and configurations of gender and family in contemporary China.

HIST 323 (F) From Achilles to Alexander: Leadership and Community in Ancient Greece

Cross-listings: CLAS 323 LEAD 323 HIST 323

Secondary Cross-listing

Visionary, opportunist, reformer, tyrant, demagogue, popular champion: concise characterization of influential leaders is often irresistible. But placing leaders in their much less easily encapsulated political, social, and religious contexts reveals them to be far more complicated and challenging subjects. Among the questions that will guide our study of Greek leadership: Was the transformative leader in a Greek city always an unexpected one, arising outside of the prevailing political and/or social systems? To what extent did the prevailing systems determine the nature of transformative as well as of normative leadership? How did various political and social norms contribute to legitimating particular kinds of leader? After studying such leaders as the "tyrants" who prevailed in many Greek cities of both the archaic and classical eras, then Athenian leaders like Solon, Cleisthenes, Cimon, Pericles, Cleon, and Demosthenes, and Spartans like Cleomenes, Leonidas, Brasidas, and Lysander, we will focus on Alexander the Great, whose unique accomplishments transformed every aspect of Greek belief about leadership, national boundaries, effective government, the role of the governed, and the legitimacy of power. Readings will include accounts of leadership and government by ancient Greek authors (e.g. Homer, Solon, Herodotus, Thucydides, Plato, Aristotle, Demosthenes, all in translation) and contemporary historians and political theorists.

Class Format: discussion

Requirements/Evaluation: contributions to class discussions, three short papers (4-6 pages each), a midterm exam, and an oral presentation leading to a significant final paper (10-12 pages)

Prerequisites: none, but a background and/or interest in the ancient world, political systems, and/or Leadership Studies is preferred

HIST 330 (S) Reformations: Faith, Politics, and the World

Cross-listings: HIST 330

Primary Cross-listing

The Protestant Reformation of the sixteenth century was one of the major transformations in the history of Christianity, a faith whose 2.2 billion adherents make it the largest religion in the world today. Martin Luther and his followers sparked a schism that changed what it meant to be a Christian, and, by various reckonings, helped to create the state as we know it, the modern self, capitalism and even, as an unintended consequence, secularism. As inhabitants of a post-Protestant society, we have much to learn about the world in which we live from studying the Reformation and its legacies. While considering classic interpretations, this seminar will also probe recent research on the plural Reformations: not just Protestant but also Catholic, and not solely the elite movement of Luther and John Calvin but also the Reformation of women and peasants. What was at stake in these sweeping transformations of what it meant to be a Christian? We will consider theological debates about human agency, the changing relationship of religion and the state, female mysticism, religious warfare, iconoclasm, the arrival of Protestantism in New England, and toleration. We will work intensively in Chapin Library, examining books of hours, Bibles, missals, psalters, and primers. The seminar will also visit WCMA and the Hancock Shaker Village. Authors to be read include Luther, Calvin, Teresa of Ávila, Jean Bodin, Ignatius of Loyola, and John Winthrop. Note: due to the constraints of rare-book research, enrollment is capped at 12.

Requirements/Evaluation: two short papers (5-7 pages) and a longer final paper (10-12 pages)

HIST 331 (F) European Intellectual History from Aquinas to Kant

The scholars and philosophers of early modern Europe set the agenda for much of modern thought concerning epistemology, morality, religion, and politics. Many of their debates still inform our intellectual world: How do we know what we know? Is human nature intrinsically selfish? What is the nature of God, and of His revelation? Should we prefer individual freedom or political stability? Our seminar will retrace the long and winding path from the intellectual culture of late medieval Europe to that of the Enlightenment. We will try to understand how a Christian culture of manuscript books, whose inquiries were conducted in Latin, transformed into a secular culture of public debate in new printed publications such as journals and newspapers in vernacular languages (English, French, German, etc.). In the process, we will encounter the foundational movements that structured European thought and the making of knowledge in these centuries: scholasticism, humanism, the new philosophy and the Enlightenment. Ultimately, we will recover the arguments of major thinkers and consider what they can teach us today. Authors to be read include Petrarch, Christine de Pizan, Thomas More, Descartes, Leibniz, Montesquieu and Rousseau.

Requirements/Evaluation: attendance and participation; two short papers; a longer final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: juniors and senior History majors

HIST 332 (S) Queer Europe: Sexualities and Politics since 1850 (DPE)

Cross-listings: WGSS 331 HIST 332

Primary Cross-listing

This course explores the construction, articulation, and politics of queer sexual desire in Europe from the mid-nineteenth century to the present. By placing queer sexualities in their broader social and political context the course examines the ways in which sexuality has become central to questions of identity, personal and national, in modern European society. Topics include: women's "friendships" in Victorian Britain; the role of the new science of sexology in specifying various "sexual perversions"; the rise of sexual undergrounds in the context of European urbanization; the birth of campaigns for "homosexual emancipation"; attempts to regulate and suppress "deviant" sexualities, especially under the fascist regimes in the 1930s; the effects of the postwar consumer revolution on the practices of sexual selfhood; the postwar "sex change" debates; the politics of 1950s homophile organizing and the 1970s Gay Liberation Movement; and recent debates about migrant queer identities in an increasingly multicultural Europe. The course will focus primarily on experiences in Britain, France, and Germany, but Italy and Russia will also be the focus of some meetings. Readings will be drawn from sexological texts, political tracts, memoirs, and the writings of recent historians. Several films will be screened and will also be central to our

discussions of the changing meanings of sexual selfhood in modern European societies.

Requirements/Evaluation: class discussion, the posting of four 500 word response papers, two 7- to 8-page interpretive essays, and a final research paper of 12- to 15-pages

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: junior and senior History and Women's, Gender and Sexuality Studies majors

Expected Class Size: 12-20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 331 (D2) HIST 332 (D2)

Difference, Power, and Equity Notes: Queer Europe is a DPE course insofar as it explores the mechanisms by which sexual difference has been constituted, contested, and experienced and addresses how what we assume to be the "sexual norm" has a profoundly political history. It focuses on the means by which norms are created and enforced through the operations of power and on how those norms have been challenged and resisted by individuals who have come to understand themselves outside the normative categories of sexual selfhood.

HIST 334 (F) Victorian Psychology from the Phrenologists to Freud

Although the Victorian era has traditionally been considered a psycho-social model of emotional inhibition and sexual prudery, recent studies, by scholars in various disciplines, have demonstrated that this characterization grossly oversimplifies the attitudes toward emotional and sexual life held by Europeans and Americans in the second half of the nineteenth century. This course will investigate professional and popular ideas about human psychology during the Victorian era. We will attempt to define and understand what people thought and felt about insanity, the unconscious, dreams, sexuality, the relationship between natural impulses and civilized society, child psychology and development, the psychological differences between men and women, the relationship between the physical and the psychical. The course will concentrate on the close reading and analysis of primary documents, including: professional literature in psychiatry, from the phrenologists to Freud; manuals on child rearing, education, sexual practice, and living the wholesome life; and cultural documents.

Requirements/Evaluation: participation in class discussion, two essays, each of approximately 5 pages, and one 8-page paper due at the end of the semester

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: junior and senior History majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Unit Notes: fulfills the department's seminar requirement for graduation with a degree in History

Distributions: (D2)

HIST 335 (F) Weimar Germany

The Weimar Republic has been examined and re-examined, not only in an effort to account for the failure of democracy and the rise of Hitler in Germany but also for its remarkable artistic achievements. Using a variety of primary documents, including movies, works of art and literature, as well as more traditional historical sources and the writings of historians, this course will consider the social, political, and cultural history of the Weimar Republic. At issue in the course will be the relationship between the political and social instability and the cultural blossoming that characterized Germany during the 1920s. We will also consider whether the Weimar Republic in general, and Weimar culture, in particular are better understood as the product of Germany's past or as harbingers of its future.

Class Format: discussion

Requirements/Evaluation: participation in class discussion, two essays, each of approximately 5 pages, and one 8-page paper due at the end of the semester

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: students with background in European history, or History majors

HIST 336 (S) National-Socialist Germany

This course is a history of National-Socialist Germany based to a considerable extent on primary documents. Students will use the documents to reconstruct the history of the Third Reich and to articulate and assess some of the principal historiographical debates relating to National-Socialist Germany. The course will consider the following topics: the failure of the Weimar Republic and the rise of National Socialism; the consolidation of Nazi rule; the experiential reality of the *Volksgemeinschaft*; the popularity of National Socialism; youth and women in the Third Reich; Nazi culture; Nazi racism and image of the Jew; Gestapo terror; the pre-war persecution of Jews; popular German anti-Semitism; the regime's euthanasia program; the Nazi Empire; the experience of war in Russia; the implementation of the "Final Solution to the Jewish Problem"; German knowledge of and complicity in the "Final Solution"; the experience of "total war" on the home front; resistance to National Socialism; and the collapse of the Third Reich. The course will focus especially on how ordinary Germans experienced and participated in the history through which they lived. We will take an empathic approach to National-Socialist Germany and to the Germans who lived through this period, attempting to understand why they felt, thought, and acted as they did. We will also consider the epistemological and ethical problems involved in attempting to empathize with Nazis.

Class Format: discussion

Requirements/Evaluation: active and effective participation in class discussion, two 5-page analytic essays on two of the topics considered in the course, and a final 7-page interpretative essay: the two analytic essays on an assigned course topic (50%); the final interpretative essay (30%); class participation (20%)

Prerequisites: none; open to all

HIST 337 (F) After Stalin: Soviet History from "Thaw" to Collapse

Cross-listings: RUSS 337 HIST 337

Primary Cross-listing

When Joseph Stalin died in 1953, the crowd of people that gathered to view his embalmed body on Moscow's Red Square grew so large, it provoked a stampede that killed nearly 500 people. This moment embodies the uncertainty and challenges that ordinary citizens and state officials faced when they imagined what a post-Stalin future might bring to the Soviet Union. For all the suffering that his rule inflicted on the Soviet people, Stalin remained for many a reliable constant in a life dominated by revolution and war. Stalin's successors faced a classic dilemma: how to reform and breathe new life into a system without disturbing the foundation it needs to stand intact? Despite superpower status and some stunning achievements at home and abroad, the fault lines in Soviet society ran deep. This course will consider the experiences that grew out of the uncertainty that emerged after Stalin's death. We will examine how the "Soviet experiment" evolved - politically, legally, socially, culturally - once the last of the original Bolshevik revolutionaries left the Kremlin. What opportunities did the post-Stalin moment open up for political elites, members of the professional class, the

intelligentsia, and citizens from Soviet republics and satellite states? What obstacles did they face, and how successful were they at overcoming them? In what ways did the spirit of the October and Stalinist Revolutions persist or erode from 1953 until 1991? Most importantly, how did the "children of the revolution" participate in, check out of, or contest the socialist system whose birth their parents witnessed first hand? After all, more generations experienced the Soviet Union without Stalin as their leader than generations who only knew a life with the "Vozhd" in power. Through secondary and primary source readings, we will attempt to recover the voices of those whose lives both shaped and were shaped by the nearly four decades after Joseph Stalin's death.

Requirements/Evaluation: active class participation, three short essays (2-3 pages), and one long essay (8-10 pages)

HIST 338 (F) The History of the Holocaust

Cross-listings: HIST 338 JWST 338 REL 296

Primary Cross-listing

In twenty-first century United States, the murder of approximately six million European Jews by Nazi Germany remains a central event in our political, moral, and cultural universe. Nevertheless, the Holocaust still confounds historians' efforts to understand both the motivations of the perpetrators and the suffering of the victims. In this course, we will study the origins and unfolding of Nazi Germany's genocidal policies, taking into consideration the perspectives of those who carried out mass murder as well as the experiences and responses of Jews and other victim groups to persecution. We will also examine the Holocaust within the larger context of the history of World War II in Europe and historians' debates about Germany's exterminatory war aims. Course materials will include diaries, speeches, bureaucratic documents, memoirs, films, and historical scholarship.

Class Format: mostly discussion

HIST 341 (S) Collapse: The Fall and Afterlife of the Soviet Union

Cross-listings: RUSS 341 HIST 341

Primary Cross-listing

On Christmas Day 1991, Mikhail Gorbachev ended two things: his tenure as President of the Soviet Union, and the Soviet Union itself. The following day, Boris Yeltsin entered office as the first president of the Russian Federation, and without delay, began to institute radical economic and social reforms. Under his watch, the country privatized national industry, cut the state budget, and courted foreign multinational businesses. The world most commonly used to describe Russia in the early 1990s is "disappear": money, jobs, food, and people. The very things that Soviet-style socialism had committed itself to providing for started to vanish as a result of invisible and market forces. This course will explore what emerged in the spaces left empty after Soviet-style socialism's demise in three parts. The first part of the semester will examine the origins of the Soviet Union's collapse and its breakup into fifteen successor states. The second part of the semester will survey the political, economic, and social processes that followed the collapse. Finally, the third part of the course will focus on Putin's ascendancy to the presidency and its consequences for Russian citizens at home and Russia's image abroad. By semester's end, students will have acquired the content and analytical literacy to place present-day Russia in its specific historical context and identify multiple sources of causation that may help explain Russia's transition from socialism to capitalism to Putinism during the past quarter century.

HIST 342 (S) Sounds and Pressures: Music in the 1970s Caribbean

Cross-listings: MUS 327 HIST 342 AFR 327

Secondary Cross-listing

For the Caribbean the 1970s was a decade of cultural excitement and political tragedy. 1960s radical consciousness contributed to rapidly changing music styles that formed by the early seventies and blossomed on the world stage as the decade progressed. This was the period when Jamaican Reggae, Haitian Konpa, and Spanish Caribbean Salsa, asserted their presence in the mainstream. But the countries that birthed these popular music forms were locked in political crisis. In Jamaica, political violence escalated, Haiti faced a brutal dictatorship and Cuba was caught in the midst of Cold War strain. A common response to these challenges was massive emigration from the Caribbean to the United States. This course will examine the music produced in the 1970s Caribbean and its relationship to the forces of migration, national politics, and inter-regional contact. After a background on Cuban and Haitian music, the course will give greatest focus to Jamaican politics its relationship with Reggae, which reached further than any other Caribbean music form in the 1970s. It will explore the journeys of the music as it accompanied and oftentimes preceded the arrival of large numbers of Caribbean immigrants. In the process, the US imaginary of the Caribbean was reshaped by the popularization of Caribbean commercial music.

HIST 346 (S) Modern Brazil (DPE)

Cross-listings: AFR 346 HIST 346

Primary Cross-listing

Brazil has been the "country of the future" longer than it has been an independent nation. Soon after Europeans descended on its shores, Brazil was hailed as a land of resources so rich and diverse that they would inevitably produce great wealth and global power for its inhabitants. Although this has often contributed to an exaggerated patriotism, it has also fostered ambiguity--for if the label suggests Brazil's potential, it also underlines the country's failure to live up to that promise. This course will examine Brazil's modern history by taking up major themes from Independence to the present. Beginning with a "bloodless" independence that sparked massive civil wars, we will analyze the hierarchies that have characterized Brazilian society. The course will give particular attention to themes of race, gender, sexuality, and citizenship; national culture and modernity; and democracy and authoritarianism in social and political relations.

Class Format: discussion

Requirements/Evaluation: class participation will count for 20% of final grade; each of two 5-page papers will count for 25%; and a final 8- to 10-page paper will count for 30%

HIST 347 (S) Democracy and Dictatorship in Latin America

The inability--or failure--of Latin American countries to establish stable and democratic governments has frustrated observers across the region and beyond for almost 200 years. This course will examine the historical creation of both democratic and anti-democratic regimes in different national cases, seeking to identify the conditions that have fostered the apparent persistence of dictatorial tendencies in Brazil, Argentina, Mexico, Peru, and the countries of Central America. In this regard we will look at the social and economic forces as well as the political actors and ideologies that have contributed to distinct, if often parallel, outcomes. At the same time, we will also question the criteria we use to label regimes "democratic" or "dictatorial"--and the implications of our choice of criteria.
