Enrollment & Graduation

Williams College is accredited by the New England Commission of Higher Education (NECHE).

The catalog contains information that is complete and accurate. Williams College reserves the right, however, to make changes in its operations, programs, and activities as the trustees, faculty, and officers consider appropriate.

Correspondence

catalog.williams.edu/correspondence

Post office address:

Williams College
PO Box 687
Williamstown, MA 01267
413-597-3131

Correspondence concerning matters of general interest should be addressed to the President.

Other inquiries should be addressed to the following:

- Academic and Student Affairs: Dean of the College
- Admission of Students: Director of Admission
- Alumni: Director of Alumni Relations
- Business: Controller
- Development: Senior Development Officer
- Faculty Affairs: Dean of the Faculty
- Financial Aid: Director of Financial Aid
- Publications and Websites: Chief Communications Officer
- Sexual Misconduct: Title IX Coordinator
- Transcripts, Records, Catalog: Registrar

The corporate name is The President and Trustees of Williams College.

Non-Discrimination

catalog.williams.edu/non-discrimination

Williams College is dedicated to building a diverse and inclusive community in which members of all backgrounds can live, learn and thrive. In compliance with state and federal law, Williams does not discriminate in admission, employment, or administration of its programs and activities on the basis of race, color, sex, national origin, religion, age, disability, marital status, sexual orientation, gender identity or expression, ancestry, or military service.

Inquiries should be addressed to:

Assistant Vice President & Title IX Coordinator
Office of Institutional Diversity and Equity
Williams College
PO Box 607
Williamstown, MA 01267

Office of the President

president.williams.edu/college-governance/college-mission

In the gentle light of the Berkshire hills, Williams pursues a bold ambition: To provide the finest possible liberal arts education. If the goal is immodest, it is also bracing: Elevating the sights and standards of every member of the community, encouraging them to keep faith with the challenge inscribed on the College's gates: "climb high, climb far."

Williams is fortunate to have extraordinary resources, but its strength derives above all else from the quality of its people.

Williams students rank with the best in the country; the rigor and competitiveness of the College's admission standards place Williams in the company of only a handful of other institutions. Over the past thirty years especially, Williams has both strengthened its academic profile and actively recruited a student body that is markedly more diverse in many dimensions, including race, national origin, and the educational and socio-economic background of its families.

The strength of the student body today is the product of the College's resolve to search as widely as possible for students of high academic ability and great personal promise. Diversity is not an end in itself, but a principle flowing from the conviction that encountering differences is at the heart of the educational enterprise—differences, certainly, of ideas and beliefs, but also differences of perspectives rooted in the varied histories students bring with them.

As both an educational and social imperative, we are committed to welcoming talented students irrespective of their financial resources, and it is therefore a central institutional priority—unwaveringly supported by all parts of the College community—to maintain our policies of need-blind admission for domestic students and of fully meeting a student's demonstrated need. And, recognizing that of those to whom much has been given much may properly be required, we ask all our students to understand that an education at Williams should not be regarded as a privilege destined to create further privilege, but rather as a privilege that creates the opportunity and responsibility to serve society at large.

We seek to capitalize on our character as a residential college by placing great emphasis on the learning that takes place not only inside the classroom, but outside as well, where students can strengthen mind, body, and spirit by participating in athletic teams, artistic performances, political debates, religious and volunteer groups, and nearly one-hundred-and-seventy extra-curricular organizations. We also urge students to see their college as a laboratory in citizenship. To an unusual degree, Williams gives students primary

responsibility for creating and governing their own community, whether as Junior Advisors (chosen by fellow students to live with and mentor first-year students), or as guardians of academic integrity through the student-led Honor Code.

Recruiting top talent from a wide variety of institutions, Williams asks its faculty to accept a distinctive—and unusually demanding—combination of challenges: to be exemplary teachers, productive scholars or artists, and active partners in running the institution. Well supported by the College through research funding and a generous sabbatical program, Williams faculty are leaders in their fields—recognized nationally, and often internationally, for the high quality and significance of their scholarly and creative work. They also embrace the chance to shape their college, serving in a civic spirit on an array of committees, and as senior officers of an institution that has long prized shared governance and collaborative decision-making.

But it is the teaching gene that especially defines Williams professors. They devote sustained attention every year to assessing the quality and freshness of the curriculum, and to crafting pedagogical approaches that help nurture in their students a passionate pleasure in the life of the mind. Faculty members invite students to become partners in the process of intellectual discovery. That partnership becomes visible in every classroom, where students are expected to contribute rather than consume; in the challenging setting of Williams tutorials, where students take the lead in explaining what is interesting and consequential about that week's assignment; and in the College's ambitious programs to engage students directly in faculty research.

But the classroom and curriculum are only the entry points. Professors at Williams want to know not only *what* their students think, but *how* they think and *who* they are. They want to know students in all their dimensions—to learn their histories and hopes, to advise them on matters personal as well as academic, to see them as complex individuals who deserve attention and respect.

Faculty and students together, learning with and from each other in a community whose intimacy of scale fosters close personal and intellectual relationships; where concern for the needs and ideas of other people is not only an educational, but an ethical, imperative; where the values of engagement and decency fundamentally shape the educational process: These are the ideals to which Williams faculty and students aspire.

They have strong partners. Williams is blessed with an enormously talented administrative and support staff; they keenly understand the College's mission and devote their energies to advancing it. Williams alumni are fiercely and intelligently loyal, contributing generously of their time, experience, and resources. Far from insisting that the College remain as it was in their time, alumni encourage Williams to reinvent itself for each new generation. Williams

trustees (all of whom are currently alumni) provide discerning strategic direction and careful stewardship of the College's assets. While the board is fully engaged, it keeps its focus on large policy issues and long-term decisions.

We are fortunate, too, in our location. Surrounded by communities that enthusiastically support and participate in its educational project, Williams is at home in a town rich with cultural resources. The College strives to be a responsible citizen and employer, and contributes both expertise and resources to numerous local initiatives. The natural beauty of the Berkshires makes us especially conscious of the urgent need to address—through our teaching and research, and through the daily operations of the College—the environmental problems that threaten an increasingly fragile planet.

That is who we are, and this is what we aim to do: To develop in students both the wisdom and skills they will need to become responsible contributors to whatever communities they join, and the richly textured inner lives that will make them rigorously self-reflective, ethically alert, and imaginatively alive. Public and private purposes, as it were, harmoniously nurturing each other. Toward these ends, certain principles and values shape our sense of mission:

- Our purpose is not to offer specialized or professional training, but to develop in our students strong writing, speaking, and quantitative abilities, as well as analytical and interpretive talents, tested in relation to a wide range of issues and disciplines. We embrace the liberal arts claim that a broadly educated person will be more capable of adapting to the particular needs of the professions and of public life than a person narrowly trained in singular subjects.
- Our curricular requirements aim to negotiate the crucial balance between breadth and depth. We combine an appropriately liberal distribution of each student's course choices across the curriculum with some measure of control over the methods and subject matter of at least one field. While fully recognizing the important value of disciplinary approaches and the departmental structures that support them, we have welcomed and participated in the academy's growing emphasis on inter-disciplinary learning as a way of understanding the inter-connectedness of ideas, and as a bulwark against the fragmentation of knowledge.
- Through the increasingly global reach of our curriculum, as well as the diversity of our campus community, we seek to develop in students the capacity to see beyond the limits of their own experience. So many of the world's problems—from racism, to sectarian and nationalistic violence, to everyday forms of disrespect—stem from a failure to imagine our way into the lives of other people, a failure to understand the beliefs and contingencies that shape their lives, a failure to hear the stories that other people are trying to tell us. A liberal education alone cannot solve the world's problems, but it can help to open minds and deepen human empathy.

- Our curriculum is as varied, up-to-date, and forward-thinking as the contemporary world requires, but we also want to strengthen our students' curiosity about, and respect for, the past: for the story of how people before us have responded to challenges different from—but analogous to—our own, for the story of where human beings have been, what we have achieved, and how we have failed. We want to resist the tendency to see our historical moment as so much more complex and dangerous than those experienced by earlier generations that we fail to think of the past as something that calls to us with an urgent, or admonitory, or even sympathetic voice.
- We want, too, to lean against the growing culture of simplification, where intricate issues are boiled down into fiercely held “positions,” where counter-arguments are seen as irritating distractions from clarity, where “points” have more power and visibility than the thinking that produced them. We want instead to inspire in our students the confidence to be undaunted by complexity, and to embrace it in ways that will prove valuable to them and to society at large.
- We aim to encourage students to develop a personal stance toward learning and knowledge, and to make judgments that put their beliefs and values on the line. We want them to have the courage of their convictions, but at the same time, to seek out criticism of their own ideas, and to appreciate the virtues of personal and intellectual humility.

These values and ambitions will serve as beacons into a future when the college will continue to encounter, and continue to welcome, changes in our demographics, our curriculum, our approaches to what and how we learn. To remain a vibrant institution that both reflects and leads the society of which it is a part, Williams must always adapt and grow, and be prepared—as we tell our students they too must be prepared—to respond in an agile, nuanced way to needs and challenges we cannot yet anticipate.

In summarizing this college's mission, we can turn to the eloquent words spoken by Williams President John Sawyer '39 in his induction address in 1961:

The most versatile, the most durable, in an ultimate sense the most practical knowledge and intellectual resources which [students] can now be offered are those impractical arts and sciences around which a liberal education has long centered: the capacity to see and feel, to grasp, respond, and act over a widening arc of experience; the disposition and ability to think, to question, to use knowledge to order an ever-extending range of reality; the elasticity to grow, to perceive more widely and more deeply, and perhaps to create; the understanding to decide where to stand and the will and tenacity to do so; the wit and wisdom, the humanity and humor to try to see oneself, one's society, and one's world with open eyes, to live a life usefully, to help things in which one believes on their way. This is not the whole of a liberal arts education, but as I understand it, this range of goals is close to its core.

So it was more than a half-century ago, and so it remains today.

The statement above is the product of discussions during the 2016-17 academic year in the Accreditation Self-Study Steering Committee, whose twenty-eight members include faculty, students, and administrators, and in the Williams College Board of Trustees. The Board approved this statement in June 2017.

Admission

catalog.williams.edu/admission

Williams uses a holistic admission process that focuses on gaining a deeper understanding of an applicant's academic achievements and personal character. Applicants to Williams should pursue the strongest program of study offered by their schools. While there are no absolute requirements for admission, competitive first-year candidates typically study English, math, natural science, foreign language and social studies in four-year sequences and present a distinguished record throughout their secondary school career.

While the academic record is the most important factor in the admission process, we seek students who will serve as leaders not only in the classroom but also in the community at large. To that end, we also consider all candidates' non-academic involvements and achievements at school and in their communities. A strong co-curricular record might reflect a wide range of talents and achievements or distinguished accomplishment in just one or a few areas.

First-Year Applicants

First-year applicants for whom Williams is their first-choice college may apply under the binding Early Decision program. The deadline for submission is November 15, and applicants will receive notice of a decision by December 15. Early Decision applicants may submit an Early Decision application to only one institution and, if admitted under Early Decision, are expected to withdraw all other college applications and to initiate no new applications.

First-year applicants who wish to apply to more than one college should apply under the non-binding Regular Decision plan. The deadline for submission is January 1, and applicants will receive notice of a decision by April 1. The majority of applicants apply under Regular Decision and, if admitted, have until May 1 to accept their place in the class. Acceptances are always contingent upon the applicant finishing the school year in good standing.

Here is additional information about the admission process and required materials.

Transfer Applicants

Williams welcomes transfer applications from students with strong intellectual promise and community engagement. Transfer students may apply for fall enrollment only; we do not accept mid-year transfers. Students will be informed of their class standing at the point of admission. Those who enroll as first-semester juniors will select a major upon matriculation. Students are not eligible for admission if they have already received a bachelor's degree.

30 semester hours are considered equivalent to a full year at Williams. Students with one year or more of college credit completed or in process should apply as transfers. Students with less than one year of college credit are encouraged to apply as first-years. Regardless of how you apply, college credit may be considered for course placement.

Williams students must fulfill a two-year residency requirement, so transfer students will be granted a maximum of two years' worth of credit. Students who have earned more than two years of transferable credit must relinquish credit in order to meet the residency requirement, but they may still use that credit for course placement.

The deadline for transfer application submission is March 1. Applicants will receive notice of a decision by April 15 and have until June 1 to accept their place in the class.

Here is additional information about the transfer admission process and required materials.

Veteran Applicants

Williams encourages applications from individuals who have actively served in the U.S. military. Veterans may apply either as first-year or transfer students, depending on the amount of college coursework completed. Please consult the Transfer Applicants page for more information. The Registrar will determine how much credit will be awarded for work completed at other institutions.

We require transcripts of all secondary and post-secondary academic work, including any coursework completed during service. We take a holistic approach to the admission process, and will evaluate each application—including these transcripts—in context, taking into account any time that may have elapsed since enrollment. If service has caused gaps in academic work for more than two years, we recommend enrolling in challenging college-level courses prior to submitting a formal application. Successful completion of post-secondary coursework will provide us with the most recent picture of academic abilities and the best evidence of potential for academic success.

Our standard applications for admission may not accurately capture all of a veteran's individual interests and experiences, so we encourage applicants to detail any unique circumstances and achievements in the additional information section or by submitting supplementary materials.

An application fee waiver is available for all veterans and can be requested on the Coalition Application and the Common Application. A fee waiver for the CSS PROFILE is also available by emailing the Admission Office.

We meet 100 percent of each admitted veteran's demonstrated financial need for four years. In many cases, this may well exceed the aid provided by veterans' benefit programs.

More detailed information on available financial aid, Post-9/11 GI Bill benefits, and our participation in the Yellow Ribbon Program, is available on the Financial Aid Office site.

International Applicants

Williams is committed to building a community that includes the brightest minds from around the world. Each year, we receive nearly 2,300 international applications—that is, from students who, regardless of country of residence, do not hold U.S. citizenship, permanent residency or a green card—from more than 100 countries. Today, international students make up nine percent of the Williams student body.

Given the number of international applicants to Williams annually, the Admission Committee is familiar with the nuances of school systems and curricula from around the world. Therefore, international applicants follow the same application procedures as U.S. citizens and are not required to submit any additional forms or testing. Those students whose first language or language of academic instruction is not English must document their English proficiency, but there is no one required examination. While we are happy to review TOEFL or IELTS results, such examinations are not requirements for admission to Williams.

Financial Aid

catalog.williams.edu/financial-aid

Williams has one of the most generous financial aid programs in the country, thanks to generations of gifts from alumni, parents, and friends. It allows us to award more than \$60 million a year in financial aid to more than half of all Williams' students. Our financial aid program is based entirely on need, and we meet 100 percent of every student's demonstrated need. We are committed to working with students and their families to make a Williams' education affordable.

Here are details for all applicants and current students about the financial aid process and required application materials based on your citizenship status.

First-Year Applicants

First-year applicants for whom Williams is their first-choice college may apply under the binding Early Decision program. The deadline for financial aid is November 20, and applicants will receive notice of a decision by December 15.

First-year applicants who wish to apply to more than one college should apply under the non-binding Regular Decision plan. The deadline for financial aid is January 15, and applicants will receive notice of a decision by April 1.

Transfer Applicants

Transfer applicants who wish to apply for financial aid as part of the admissions process should do so by March 15 and applicants will receive notice of a decision by May 1.

Current Students

Current students who have received financial aid in past or would like to be considered for the first time should apply for financial aid annually. Preferred submission date for all current students is November 15 for the following academic year. Student who meet this submission date will expect to receive their award for the following academic year before the end of spring term. **Please note that international students who did not apply for financial aid during the admission process will not receive financial aid during their time at Williams.**

Contact Us

Here is detailed information about our policies and procedures as well as our most frequent questions. All applicants are assigned a financial aid officer to walk them through each step and their officer is listed on the award notice.

Tuition & Fees

catalog.williams.edu/tuition-fees

Williams College, within the limits of available funds, offers educational opportunities to all who qualify for admission. Endowment income and annual contributions from alumni and friends allow Williams to keep tuition at about half the actual cost per student.

The Student Accounts Office oversees billing and expenses—detailed information can be found on their site.

Comprehensive Fee

Charges for 2019-20 tuition, room, board, and fees are as follows:

Tuition	\$56,970
Room	\$7,600
Board	\$7,390
Activities & Residential House Fees	\$310
Study Away Fee (if applicable)	\$1,500

Health Insurance

The Commonwealth of Massachusetts requires health insurance for all full and three-quarter time students.

Williams offers a qualifying student health insurance plan through Blue Cross Blue Shield of Massachusetts (BCBS). Information about the plan is emailed to every student in May. Students enrolled in the Williams plan for 2019-20 will be charged \$2,134 for this coverage.

Participation in this plan may be waived if a student certifies prior to August 1 that the coverage offered by an alternative program is comparable to the plan offered by Williams. Questions about the plan or online waiver/enrollment process should be directed to Gallagher Student Health.

Term Bill Payments

Term bills for one-half of the annual comprehensive fee are issued electronically to students twice a year:

- mid-July due by August 15
- mid-December due by January 15

Additional billing statements are sent on a monthly basis with any miscellaneous charges or credits that are posted to a student's account during the course of the term.

Students are encouraged to grant access to parents and other parties to the Student Account Center to pay and view bills online. Payments may be made by echeck, ACH or by credit card (2.99% convenience fee). International payments may be made by wire transfer through Flywire. Payments may also be made by check, mailed directly to:

Williams College
Student Accounts Office
PO Box 406
Williamstown, MA 01267

Payment Plans

Williams offers two installment payment plans, administered by Tuition Management Systems' Student Account Center (SAC), where charges for each term are paid in equal installments, with no interest charges:

- 5-month plan (July-November for fall and December-April for spring), or
- 4-month plan (August-November for fall and January-April for spring)

Information on payment plan options and SAC can be found at the [Student Account Center](#).

Returned Checks

A \$30 charge will be assessed for each returned check paid directly to Williams or any payment through the Student Account Center. A cashier check or money order may be required as payment for a returned check.

Outside Scholarships/Employer Tuition Benefit Plans

Students who receive a scholarship that was not awarded through the Financial Aid Office, or an employer tuition benefit plan, must complete a Scholarship Information Sheet and submit it to the Financial Aid Office by May 30. Provisional credit will be posted to the term bill. If actual payment for the provisional credit is not received by the date anticipated, the provisional credit will expire and be removed from a student's account creating a balance due.

Loans

The Financial Aid Office has information about loan options available to parents.

Outstanding Balances

Accounts that are not paid in full by the due date may be assessed a \$250.00 late fee. This includes accounts which have a balance due to a late loan application or the failure of the student or parent to sign promissory notes on a timely basis.

A student with an outstanding balance may be held from the following activities:

- Returning to campus for new semester
- Pre-registration for following semester
- Drop/add for current semester
- Housing lottery for next semester
- Parking lottery for next semester

Upon graduation, all outstanding balances must be paid, and all books and materials must be returned to the Library, before a student is entitled to a degree or a transcript.

Refund Policy

Federal regulations require that all educational institutions disclose their refund policy to all prospective students. Below is the Williams College Refund Policy for the 2019-20 academic year:

Fall Semester 2019		Spring Semester 2020
Withdrawal Date	% Refunded	Withdrawal Date
Prior to the start of classes 9/5	100% tuition, room, board	Prior to the start of classes 2/5
9/5-9/11	90% tuition, board only*	2/5-2/1
9/12-/18	80% tuition, board only	2/12-2/18
9/19-9/25	70% tuition, board only	2/19-2/25
9/26-10/2	60% Tuition, board only	2/26-3/3
10/3-10/9	50% Tuition, board only	3/4-3/10
10/10-10/16	40% Tuition, board only	3/11-3/17
10/17-10/23	30% Tuition, board only	3/18-3/24
10/24-10/30	20% Tuition, board only	3/25-3/31

After 10/30

No refund

After 3/31

*Housing and miscellaneous fees are not pro-rated after the start of classes. Coverage under the Williams' student health insurance plan will continue for the duration of the plan (August 15-August 14).

Federal Funds Repayment

For students receiving Title IV federal funds, repayment of federal funds on a pro-rata basis will be determined up to the 60% point of the semester per federal regulation. Please note that withdrawal late in the semester could result in a balance owed to Williams for federal aid that must be returned to the program.

Tuition Insurance

Williams offers a GradGuard™ Tuition Protection Plan which supplements the Williams College Refund Policy in the case of a medical withdrawal.

Tax Forms

Williams will issue a 1098-T form at the end of each calendar year for the American Opportunity and Lifetime Learning tax credits. The 1098-T should not be used to calculate the amount of scholarship and grant aid that is taxable. These forms will be mailed by January 31 to the student at the permanent address on file.

Veterans Affairs' (VA) Title 38 United States Code Section 3679(e) School Compliance Statement

Williams College's billing policy is compliant with the requirements of 38 USC 3679(e). Any individual who is entitled to educational assistance under chapter 31, Vocational Rehabilitation and Employment, or chapter 33, Post-9/11 GI Bill benefits will be permitted to attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility for entitlement to educational assistance under chapter 31 or 33, and ending on the earlier of the following dates:

1. The date on which payment from VA is made to the institution.
2. 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility.

For students under chapter 33, a certificate of eligibility can also include a “Statement of Benefits” obtained from the Department of Veterans Affairs’ (VA) website – eBenefits. For students under chapter 31, a VAF 28-1905 form serves as authorization of benefits.

Williams College will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, because of the individual’s inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from VA under chapter 31 or 33.

Academic Calendar

catalog.williams.edu/academic-calendar

2019

August-September	26-4	Monday-Wednesday	First Days
September	2	Monday	Williams Reads
September	3-13	Tuesday-Friday	Drop/add period
September	4	Wednesday	First-year student advising
September	4	Wednesday	Tutorial drop deadline, 4:00 pm
September	5	Thursday	Fall semester classes begin
September	7	Saturday	Convocation
September	13	Friday	Independent Study forms due, 4:30 pm
September	26	Thursday	Last day to register for Winter Study travel courses Last day to submit Winter Study 99s to faculty sponsors
October	TBA	One of first three Fridays	Mountain Day
October	14-15	Monday-Tuesday	Reading period, no classes
October	17	Thursday	Last day to drop an extra-graded fourth or fifth course, 4:30 pm
October	25-27	Friday-Sunday	Family Days
October-November	28-4	Monday-Monday	Spring 2020 preregistration period
November	6-10	Wednesday-Sunday	Winter Study registration period

November	9	Saturday	Homecoming
November	14	Thursday	Last day to change grading option of a course to pass/fail, 4:30 pm
November	15	Friday	Last day to withdraw from a course
November	20-24	Wednesday-Sunday	Last Chance Winter Study registration period
November	22	Friday	Last day to claim exam hardship
November-December	27-1	Wednesday-Sunday	Thanksgiving Break
December	6	Friday	Fall semester classes end
December	7-10	Saturday-Tuesday	Reading period
December	7-15	Saturday-Sunday	Self-Scheduled and Take-Home final exam period
December	10	Tuesday	Last day written work due in courses with final exams, 5:00 pm
December	11-16	Wednesday-Monday	Scheduled final exam period
December	14	Saturday	Last day written work due in courses without final exams, 5:00 pm
December	20	Friday	Fall semester grades due
2020			
January	6	Monday	Winter Study begins
January	20	Monday	Martin Luther King Jr. Day, no classes
January	30	Thursday	Winter Study ends
February	3	Monday	Winter Study grades due
February	3-14	Monday-Friday	Drop/add period
February	4	Tuesday	Tutorial drop deadline, 4:00 pm

February	5	Wednesday	Spring semester classes begin (classes follow a Thursday schedule, attend any class on your schedule that has a Thursday meeting time)
February	6	Thursday	Claiming Williams Day, no classes
February	7	Friday	Classes resume assigned schedule
February	14	Friday	Independent Study forms due, 4:30 pm
February	14-15	Friday-Saturday	Winter Carnival, no classes
March	19	Thursday	Last day to drop an extra-graded fourth or fifth course, 4:30 pm
March-April	21-5	Saturday-Sunday	Spring Break
April	6	Monday	Spring semester classes resume
April	16	Thursday	Last day to change grading option of a course to pass/fail, 4:30 pm
April	17	Friday	Last day to withdraw from a course

Fall Semester	36	25	25	12	24	12
Spring Semester	36	25	25	12	24	12

The Winter Study Period covers 24 calendar days.

2021

August-September	30-8	Monday-Wednesday	First Days
September	6	Monday	Williams Reads
September	7	Tuesday	Rosh Hashanah
September	8	Wednesday	First-year student advising
September	9	Thursday	Fall semester classes begin
September	11	Saturday	Convocation
October	TBA	One of first three Fridays	Mountain Day
October	11-12	Monday-Tuesday	Reading period, no classes
October	22-24	Friday-Sunday	Fall Family Days

November	13	Saturday	Homecoming
November	24-28	Wednesday-Sunday	Thanksgiving Break
December	10	Friday	Fall semester classes end
December	11-14	Saturday-Tuesday	Reading period
December	11-19	Saturday-Sunday	Self-Scheduled and Take-Home final exam period
December	15-20	Wednesday-Monday	Scheduled final exam period
2022			
January	3	Monday	Winter Study begins
January	17	Monday	Martin Luther King Jr. Day, no classes
January	27	Thursday	Winter Study ends
February	2	Wednesday	Spring semester classes begin (classes follow a Thursday schedule, attend any class on your schedule that has a Thursday meeting time)
February	3	Thursday	Claiming Williams Day, no classes
February	4	Friday	Classes resume assigned schedule
February	18-19	Friday-Saturday	Winter Carnival, no classes
March-April	19-3	Saturday-Sunday	Spring Break
April	4	Monday	Spring semester classes resume
April	TBA	Saturday-Sunday	Spring Family Days
May	13	Friday	Spring semester classes end
May	14-17	Saturday-Tuesday	Reading period

May	14-22	Saturday-Sunday	Self-Scheduled and Take-Home final exam period
May	18-23	Wednesday-Monday	Scheduled final exam period
June	4	Saturday	Baccalaureate Service Class Day
June	5	Sunday	Commencement
June	9-12	Thursday-Sunday	Alumni Reunions

Spring Semester	36	25	25	12	24	12

The Winter Study Period covers 25 calendar days.

Curricular Opportunities

catalog.williams.edu/curricular-opportunities

Concentrations

In addition to majoring in a field, students may choose to concentrate elective courses in a single topic or area. A concentration is normally declared spring of sophomore year. Concentrations are offered in the following programs:

Coordinate Programs

A number of programs do not offer concentrations formally, but do provide students with the opportunity to study interdisciplinary topics:

These programs provide guidance only and do not appear on transcripts.

Honors Program

The Honors Program requires two or three courses (one of which may be a Winter Study course) constituting a clearly interrelated pattern of study in the form of specialization within the major or interdisciplinary study with courses from other programs, and culminates in a thesis or project. At least one of the courses is in addition to the minimum number required for the major or concentration. Students must do the equivalent of two theses or projects to be eligible for honors in two majors or a major and concentration.

Prior to enrolling in the final required course for their program and before senior year, students should contact individual departments or programs for information about special criteria, procedures, and patterns of study for honors.

The degree is awarded with honors or highest honors at the end of senior year if, in the judgment of the department or program, its criteria of excellence have been met.

As the final step, honors theses or projects must be submitted to Special Collections, according to their specific guidelines.

Foreign Language Certificates

Certificates are awarded in Arabic, French, German, Russian, and Spanish. The certificate confirms a particular degree of proficiency, cultural literacy, and experience with the language. The number of courses required for a certificate varies, depending on the language. Please see individual programs for details.

Combined Program in Liberal Arts and Engineering

Williams offers opportunities for students to combine their liberal arts education at Williams with undergraduate professional training in engineering via two 5-year dual-degree programs: a 3-2 program with the Fu Foundation School of Engineering and Applied Science at Columbia University, and a 2-1-1-1 program with the Thayer School of Engineering at Dartmouth. Upon successful completion of either of these programs, a student receives a Bachelor of Arts degree from Williams as well as either a Bachelor of Science (Columbia) or Bachelor of Engineering (Dartmouth) degree in an engineering discipline.

Students interested in pursuing either dual-degree program must complete the requirements for a Williams degree, including the major and distribution requirements, as well as the prerequisite courses for their engineering program of choice, so it is necessary to plan course selections at Williams carefully. The Physics Department's Pre-Engineering site includes a list of Williams courses recommended to prospective engineers, as well as links to further resources.

A popular alternative to the dual-degree programs is to complete the Williams B.A. in the usual four years, majoring in one of the sciences, and then go directly to a graduate program in engineering.

The pre-engineering advisor, Katharine Jensen, will be happy to assist students interested in any of the options leading to engineering careers.

Tutorial Program

The Tutorial Program offers Williams students a distinctive opportunity to take a heightened form of responsibility for their own intellectual development. No student is required to take a tutorial course, but any student with the appropriate qualifications and interests is invited to do so.

Tutorials place much greater weight on student participation—more so than regular courses or small seminars. They aim to teach students how to develop and present arguments; listen carefully, and then refine their positions in the context of a challenging discussion; and respond quickly and cogently to critiques of their work. Tutorials place particular emphasis on developing analytical skills, writing abilities, and the talents of engaging in rigorous conversation and oral debate.

The ways in which particular tutorials are conducted vary across the disciplines, but this is how most tutorials at Williams are organized:

Tutorials are usually limited to ten students. At the start of term, the instructor divides students into pairs. Each pair meets weekly with the instructor for roughly one hour—this is the main focus of tutorial courses. Many tutorial courses begin and end the term with a group seminar, and in a few departments, instructors hold weekly group meetings of all tutorial members to provide background information designed to facilitate students' independent work.

At these weekly meetings, one student delivers a prepared essay or presentation (e.g., an analysis of a text or work of art, a discussion of a problem set, a report on laboratory exercises, etc.) pertaining to the assignment for that week, while the other student—and then the instructor—offer a critique. In the following week, students switch roles. Typically, students write five or six essays (usually in the range of 4-7 pages) during the term, and offer five or six critiques of their partners' work.

Since the program's inception in 1988, students have ranked tutorials among the most demanding—and rewarding—courses they have taken at Williams. While not designed to be more difficult than other courses, tutorials are nonetheless challenging, with frequent writing assignments and the expectation that students will be well prepared to participate actively and effectively in weekly discussions. At the same time, students have consistently placed tutorials among the most enriching and consequential courses they have taken. They appreciate the close attention to their writing and argumentation skills; the opportunity to be held accountable, in a detailed way, for the extended implications of their ideas; the chance to develop their oral abilities as they engage in debate; and the close intellectual bonds tutorials build between teachers and students, and students with each other. Many students have formed important advising and mentoring relationships with their tutorial teachers.

Registration Information

Students pre-register for tutorials as they would any other course. Because of limited enrollments and the special logistical arrangements involved in organizing tutorials, students may not drop a tutorial after 4:00 pm on the day before the first scheduled organizational meeting of the semester. It is important that students determine, before the start of the term, their interest in and commitment to the course, and consult with the instructor if necessary.

Tutorials may not be taken on a pass/fail basis.

This is a current list of tutorials offered.

Independent Study

When students wish to study a subject not covered by regular course offerings, arrangements can be made to take independent study courses under faculty supervision. Once plans for an independent study have been discussed with a faculty sponsor, the Independent Study Request form should be submitted before the beginning of the semester in which the independent study will be taken, but no later than the last day of drop/add period.

Cross-Enrollment Program

Students may register at Bennington College or Massachusetts College of Liberal Arts for courses not offered at Williams.

Please note, one and two credit courses at Bennington College are not transferable.

Contact the Registrar's Office to make arrangements.

Study Away

Students are encouraged to think about the option of study away as they begin the process of considering major fields and course requirements sophomore year. All students in good standing with no deficiencies, including financial aid recipients, are encouraged to study away during all or part of their junior year. The Office of International Education and Study Away offers up to 200 approved programs, both domestically and internationally, for students to choose from. Nearly 50% of the junior class chooses to study away for a full semester or academic year.

Credit earned in the Williams-Mystic Maritime Studies Program and the Williams-Exeter Programme at Oxford University are considered Williams credits and the grades will be applied toward the GPA. Students participating in all other approved programs will receive general credit and their GPA will not be impacted, however, the experience will appear on their Williams transcript. Coursework will transfer toward the Williams degree assuming students earn a C- or above. Approval is required from the chair of a student's major department for major credit; the Director of International Education and Study Away and the Committee on Academic Standing (CAS) for general credit.

The one-time petition deadline is March 1st the year before a student chooses to study away. To learn more about the process please contact the Office of International Education and Study Away.

Experiential Education

Experiential education, involving “learning by doing” outside the classroom, is a robust part of the Williams curriculum. In addition to the use of traditional laboratory work in the natural sciences and studio work in art, faculty have been challenging students to become engaged more personally in the Williams curriculum through field work, whether in the form of research, sustained work on special projects, or through placement with community organizations. Courses which include experiential learning provide students with opportunities to encounter firsthand the issues that they read and study about, requiring them to apply academic learning to nonacademic settings and challenging them to use their experiences in those settings to think more critically and deeply about what they are studying. Experiential courses, as defined above, range from fully integrated off-campus programs such as the Williams-Mystic Maritime Studies Program to courses involving a small field research exercise or project. The amount and nature of the experiential component(s) varies according to the instructor’s judgment. More information can be found on the Center for Learning in Action site.

Special Academic Programs

The Office of Special Academic Programs (OSAP), part of the Office of Institutional Diversity and Equity, develops and administers programs that address diversity and inclusion in higher education. Beginning with the pre-enrollment programs—Summer Humanities and Social Sciences (SHSS) and Summer Science Program (SSP)—OSAP provides opportunities for students to thrive academically. The Mellon Mays Undergraduate Fellowship (MMUF) and the Allison Davis Research Fellowship (ADRF) give selected students the opportunity to learn advanced research skills and practice them on research projects of their own design with the guidance of a faculty mentor and a cohort of peers. The fellowships offer stipends so students can use their time to pursue research instead of campus and summer jobs. The ultimate goal of these fellowships is to increase the number of students from underrepresented groups in PhD programs and academic careers. OSAP also helps connect eligible students to a variety of other opportunities, from the Creating Connections Consortium (C3) summer fellowships to the Institute for Recruitment of Teachers (IRT) to a wide variety of summer research programs. More information can be found on the OSAP site.

Degree Requirements

catalog.williams.edu/degree-requirements

Summary

Williams College offers a course of study leading to the Bachelor of Arts degree. The course requirements prescribe both the number of courses to be completed and the minimum grade level to be achieved; the curriculum also requires that each student explore several fields of knowledge and major in one.

To be eligible for the Bachelor of Arts degree students must complete the following requirements within eight semesters, including any semesters for which a student receives credit while not in residence at Williams (semesters spent away on exchange or other approved programs at other colleges are included in the eight semesters):

- Pass 32 semester courses (4 per semester):
 - at least 29 of which must be regularly graded A-E, including 19 with grades of C- or better;
 - a maximum of 3 P/F courses, with a limit of 1 P/F per semester;
 - students may not repeat a course for which degree credit has been awarded.
- Fulfill the four-part distribution requirement with graded courses taken at Williams or at programs under the direction of Williams College faculty:
 1. Divisional requirement: three graded semester courses (with two different prefixes) in each division, two of which must be completed by the end of sophomore year.
 2. Writing Skills (WS) requirement: two writing skills courses, one by the end of sophomore year, and one by the end of junior year.
 3. Difference, Power, and Equity (DPE) requirement: one before graduation, however, students are urged to complete the course by the end of sophomore year. (Class of 2020, 2021: students who have successfully completed an EDI course do not need to complete a DPE course; students who have not taken an EDI course can satisfy the requirement by completing a DPE course. Class of 2022, 2023: students must satisfy the DPE requirement).
 4. Quantitative/Formal Reasoning (QFR) requirement: one by the end of junior year.
- Complete all requirements for the major with an average of C- or higher.
- Pass four Winter Study courses.
- Complete four quarters of physical education by the end of sophomore year in at least two different activities.
- Take the swim test at the start of the first semester at Williams—students who fail to complete the test must pass a basic swim course.

- Be in residence at Williams eight semesters, two of which can be an approved Study Away program. Students must be in residence for both semesters of their final year.

Academic Requirement

To be eligible for the Bachelor of Arts degree students must pass 32 semester courses (at least 29 of which must be regularly graded A-E, including 19 with grades of C- or better), fulfill the four-part distribution requirement, complete all requirements for the major with an average of C- or higher, and pass four Winter Study courses. Students may not repeat a course for which degree credit has been awarded.

Distribution Requirement

The distribution requirement falls into four parts. **Courses used to fulfill these requirements must be regularly graded.**

1) Divisional requirement: Designed to ensure students take an appropriately diverse distribution of courses across the full range of the curriculum.

Courses are grouped into three divisions:

- Division I: Languages and the Arts
- Division II: Social Studies
- Division III: Science and Mathematics

Students must complete at least three graded semester courses in each division. Two in each division must be completed by the end of sophomore year. No more than two of the courses used to satisfy the requirement may have the same course prefix. The courses must be taken at Williams or at programs under the direction of Williams College faculty.

There may be exceptions to divisional credit, and those exceptions are noted in individual course descriptions.

Division I courses are designed to help students become better able to respond to the arts sensitively and intelligently by learning the language, whether verbal, visual, or musical, of a significant field of artistic expression. Students learn how to develop the capacity for critical discussion, to increase awareness of the esthetic and moral issues raised by works of art, and to grow in self-awareness and creativity.

- Arabic (exceptions, see individual course descriptions)
- Art History
- Art Studio
- Asian Studies (any Asian Studies course that is also cross-listed with another subject carries divisional credit of that subject; for other exceptions see individual course

- descriptions)
- Chinese (exceptions, see individual course descriptions)
- Classics
- Comparative Literature
- Critical Languages
- Dance
- English
- Environmental Studies (any Environmental Studies course that is also cross-listed with another subject carries divisional credit of that subject; for other exceptions see individual course descriptions)
- French
- German
- Greek
- History of Science (exceptions, see individual course descriptions)
- Interdisciplinary Studies (exceptions, see individual course descriptions)
- Italian
- Japanese (exceptions, see individual course descriptions)
- Latin
- Literary Studies
- Maritime Studies (exceptions, see individual course descriptions)
- Music
- Russian
- Spanish
- Theatre

Division II courses consider the institutions and social structures that human beings have created, whether knowingly or unknowingly, and which in turn markedly affect their lives. These courses are intended to help students recognize, analyze, and evaluate these human structures in order that they may better understand themselves and the social world in which they live.

- Africana Studies
- American Studies
- Anthropology
- Arabic (exceptions, see individual course descriptions)
- Asian Studies (any Asian Studies course that is also cross-listed with another subject carries divisional credit of that subject; for other exceptions see individual course descriptions)
- Chinese (exceptions, see individual course descriptions)
- Cognitive Science
- Economics
- Environmental Studies (any Environmental Studies course that is also cross-listed with

another subject carries divisional credit of that subject; for other exceptions see individual course descriptions)

- Global Studies
- History
- History of Science (exceptions, see individual course descriptions)
- Interdisciplinary Studies (exceptions, see individual course descriptions)
- Japanese (exceptions, see individual course descriptions)
- Jewish Studies
- Justice and Law
- Latina/o Studies
- Leadership Studies
- Maritime Studies (exceptions, see individual course descriptions)
- Philosophy
- Political Economy
- Political Science
- Psychology (some exceptions, see individual course descriptions)
- Public Health (exceptions, see individual course descriptions)
- Religion
- Science and Technology Studies
- Sociology
- Women's, Gender and Sexuality Studies

Division III courses are intended to provide some of the factual and methodological knowledge needed to be an informed citizen in a world deeply influenced by scientific thought and technological accomplishment, and to cultivate skill in exact and quantitative reasoning.

- Astronomy
- Astrophysics
- Biochemistry and Molecular Biology
- Biology
- Chemistry
- Computer Science
- Environmental Studies (any Environmental Studies course that is also cross-listed with another subject carries divisional credit of that subject; for other exceptions see individual course descriptions)
- Geosciences
- History of Science (exceptions, see individual course descriptions)
- Interdisciplinary Studies (exceptions, see individual course descriptions)
- Maritime Studies (exceptions, see individual course descriptions)
- Mathematics
- Neuroscience

- Physics
- Psychology (exceptions, see individual course descriptions)
- Statistics

Writing Skills (WS) requirement: The goal of this requirement is to improve student writing proficiency across disciplines. Students in these courses will receive guidance on structure, style, argumentation, and other significant aspects of writing throughout the semester. This may be achieved through brief assignments spaced over the semester, sequenced assignments leading to a longer final paper, etc. WS courses may also include multiple drafts, peer review, conferences or class discussions designed to improve writing skills. (A course with a single long paper due at the end of the semester, but with no required or structured means of addressing writing issues, would not be considered a writing skills course.)

The primary function of the WS designation is to indicate that the course will provide consistent and ongoing feedback on students' writing. Thus, the amount of writing should be substantial and well spaced, followed by timely evaluation and suggestions for improvement. Specifically, a WS course should require multiple assignments, each returned with comments which address writing problems and strategies, as appropriate. Because WS course instructors must pay attention to students' writing skills as well as to their mastery of the content of the course, WS courses have a maximum enrollment of 19.

All students are required to take TWO WS courses: one by the end of sophomore year and one by the end of junior year. Students will benefit most from WS courses by taking them early in their college careers and are strongly encouraged to complete the requirement by the end of sophomore year.

Here is a current list of courses offered that meet the WS requirement.

More information for faculty.

3) Difference, Power, and Equity (DPE) requirement: Williams College recognizes that in a diverse and globalized world, the critical examination of difference, power, and equity is an essential part of a liberal arts education. The DPE requirement provides students with the opportunity to analyze the shaping of social differences, dynamics of unequal power, and processes of change. Courses satisfying the DPE requirement include content that encourages students to confront and reflect on the operations of difference, power and equity. They also provide students with critical tools they will need to be responsible agents of change. Employing a variety of pedagogical approaches and theoretical perspectives, DPE courses examine themes including but not limited to race, class, ethnicity, gender, sexuality, and religion.

All students are required to complete at least ONE DPE course. Although this course, which may be counted toward the divisional distribution requirement, can be completed any semester before graduation, students are urged to complete the course by the end of sophomore year. The requirement may be fulfilled with a course taken away from campus, but students wishing to use this option must petition the Committee on Educational Affairs (CEA) upon their return by providing a clear and detailed explanation of how the course taken away from Williams fulfills the DPE requirement.

Class of 2020, 2021

Students who have successfully completed an EDI course do not need to complete a DPE course.

Students who have not taken an EDI course can satisfy the requirement by completing a DPE course.

Class of 2022, 2023

Students must satisfy the DPE requirement.

Here is a current list of courses offered that meet the DPE requirement.

More information for faculty.

4) Quantitative/Formal Reasoning (QFR) requirement: This requirement is intended to help students become adept at reasoning mathematically and abstractly. The ability to apply a formal method to reach conclusions, use numbers comfortably, and employ the research tools necessary to analyze data lessens barriers to carrying out professional and economic roles. The hallmarks of a QFR course are the representation of facts in a language of mathematical symbols and the use of formal rules to obtain a determinate answer. Primary evaluation in these courses is based on multistep mathematical, statistical, or logical inference (as opposed to descriptive answers).

Prior to senior year, all students must satisfactorily complete ONE QFR course. Students requiring extra assistance (as assessed during First Days) are normally placed into MATH 100/101/102, which is to be taken before fulfilling the QFR requirement.

Here is a current list of courses offered that meet the QFR requirement.

More information for faculty.

Major Requirement

The major requirement is designed to assure that all Williams students have the experience of disciplined and cumulative study, carried on over an extended period of time, in an important field of intellectual inquiry. Students are required to declare a major spring of sophomore year.

Majors

- American Studies
- Anthropology
- Arabic
- Art (History, Studio)
- Asian Studies
- Astronomy
- Astrophysics
- Biology
- Chemistry
- Chinese
- Classics
- Comparative Literature
- Computer Science
- Economics
- English
- Environmental Studies
- French
- Geosciences
- German
- History
- Japanese
- Mathematics
- Music
- Philosophy
- Physics
- Political Economy
- Political Science
- Psychology
- Religion
- Russian
- Sociology
- Spanish
- Statistics
- Theatre
- Women's, Gender and Sexuality Studies

General Structure of Majors

1) Students must elect at least nine courses in their major field. A major may also require an additional course and/or one Winter Study course during junior or senior year.

Students may also fulfill the minimum requirements for a major by taking eight courses in the major field and two courses, approved by a major advisor, in associated fields. In interdepartmental majors, such as Political Economy, a larger number of courses may be required.

2) A prescribed sequence of courses, supplemented by parallel courses, and including a major seminar, is required in some major fields. Other majors ask students to plan a sequence of elective courses, including advanced work building on elementary courses in the field, and ending in a one- or two- semester faculty-organized course or project senior year. All majors provide a system of counseling to help students plan programs reflecting individual interests as well as disciplined and cumulative patterns of inquiry.

Courses in many major programs require prerequisite courses in related areas. A full description of the detailed structure of each major is found under the heading of that major.

Major and Concentration

A student can count a course twice for a major and a concentration.

Two Majors

Although students may be granted permission to use a course from one major to fulfill a particular requirement in another, a student must take the minimum number of courses in each field without counting any course twice. Students may be a candidate for honors in either or both of the majors, but a course for honors in one major may not be used for an honors course in another.

Three Majors

Students may complete three majors with the permission of all majors and the Committee on Academic Standing (CAS). Although students may be granted permission to use a course from one major to fulfill a particular requirement in another, a student must take the minimum number of courses in all fields without counting any course twice. Students may be a candidate for honors in either or all of the majors, but a course for honors in one major may not be used for an honors course in another.

Contract Major

Students who wish to undertake the coherent study of an interdisciplinary subject not

covered by a regularly offered major may propose a Contract Major. Those interested in this option should thoroughly review the Contract Major site, and begin consulting with the Contract Major Advisor and potential faculty advisors fall semester of sophomore year. Students completing a Contract Major may not do so in conjunction with a second major.

Winter Study

Winter Study, which began in 1967, is intended to provide students and faculty with a dramatically different educational experience. The differences are in the nature of the courses, the nature of the learning experience, and the change of educational pace and format from fall and spring semesters. These differences apply to the faculty and students in several ways: faculty can try out courses with new subjects and techniques that might, if successful, be used later in the regular terms; they can explore subjects not amenable to inclusion in regular courses; and they can investigate fields outside their usual areas of expertise. In their academic work (which is graded Pass, Perfunctory Pass, or Fail) students can explore new fields at low risk, concentrate on one subject that requires a great deal of time, develop individual research projects, or work in a different milieu (as interns, for example, or on trips outside Williamstown). In addition, Winter Study offers students an opportunity for more independence and initiative in a less formal setting, more opportunity to participate in cultural events, and an occasion to get to know one another better.

Students who fail their Winter Study course will be required to make up the deficiency. Students who fail through gross neglect of work may be put on academic probation or required to resign. A student who receives a second Perfunctory Pass grade in Winter Study will be required to pass a fifth course the following spring or fall semester.

Swim Test

Williams believes it is vitally important that students possess the ability to swim.

A swim test is required of all first-year students at the start of the academic year. Students are required to swim 25 yards front crawl and 25 yards backstroke.

While all first-year students are required to report to the pool for the swim test, non-swimmers are not required to take the test but must register for a beginning swim class through the Physical Education Department during the first quarter of the year.

The swim test is designed to be a safe and comfortable experience for everyone. If a student would prefer to take the swim test in a private setting, for reasons of religious observance or gender identity/expression, accommodations can be made.

Physical Education Requirement

The Physical Education (PE) requirement provides students the opportunity of establishing and maintaining a general level of fitness and well-being; of developing abilities in carry-over activities; of discovering and extending their own physical capabilities; and of developing skills in activities with survival implications, such as swimming.

Students must complete four PE credits as a requirement for graduation.

Students must complete at least two PE credits during the first year.

All four PE credits must be completed by the end of a student's sophomore year. Students will not be permitted to study abroad if the Physical Education requirement has not been met.

The requirement may be met through successful participation in the following:

- Successful completion of a physical education or dance department activity course.
- Participation on a varsity, junior varsity, or club team.
- Participation in a regularly scheduled Williams Outing Club activity (requires WOC membership).
- Independent class (must be approved by the Physical Education Coordinator only after three PE credits have been earned).

Additionally, students must enroll in at least two different activities to fulfill the requirement.

- Completion of a physical education activity class earns one PE credit.
- Participation on a varsity, junior varsity or club sport team earns two PE credits per season.
- Students involved in dance ensembles earn two PE credits.
- Students may earn a maximum of three PE credits in one discipline.

Satisfactory attendance is required except for students excused by a Dean and the Director of Medical Services or the Director of Counseling Services.

PE credits are posted only twice per year, at the end of fall semester and at the end of spring semester. As a result, Academic Progress Reports may not accurately reflect PE credits.

- At the beginning of fall semester, PE credits listed should be accurate through the end of the previous spring semester.
- During late October/early November, any physical education activities completed during the first half of fall semester will not yet be posted.
- At the beginning of spring semester, any physical education activities completed during Winter Study will not be posted; they will be posted once Winter Study grading is completed.

- During April preregistration any physical education activities completed during the first half of spring semester will not be posted; they will be posted at the end of spring semester.

If your PE credits still seem incorrect, please check with the Physical Education Department.

Residence Requirement

Students who begin college at Williams must spend eight semesters in residence, two of which can be an approved Study Away program.

Students transferring to Williams from other institutions as sophomores are expected to spend six semesters in residence and juniors must spend four semesters in residence.

Students must be in residence for both semesters of their final year.

Graduate Programs

catalog.williams.edu/graduate-programs

Master of Arts in the History of Art

In cooperation with the Sterling and Francine Clark Art Institute, Williams College offers a two-year course of study leading to the degree of Master of Arts in the History of Art. The objective of the program is to offer to a small number of students a thorough professional preparation for careers in the visual arts, including schools and museums, and to enable them to pursue further research whether independently or at institutions offering higher graduate degrees. The curriculum consists of seminars in a wide range of art historical subjects. Opportunities are provided for practical experience in museum work at The Clark, the Williams College Museum of Art, the Massachusetts Museum of Contemporary Art, and other local collections. The study of primary materials is further extended by field trips to other collections. The degree is normally awarded after two years of resident graduate study. To earn the degree, students must take ten courses, of which at least six must be graduate seminars (including ARTH 504 and ARTH 506). In connection with the preparation of a paper for the Graduate Symposium, students will register for an eleventh course (ARTH 509), to be graded pass/fail, in their fourth semester. A demonstration of proficiency in reading two foreign languages is required. Of these two, German is required, and French is recommended. In January of the first year, students participate in a European study trip with selected faculty; in January of the second year, students must complete a draft of their Qualifying Paper. In addition to all course work, students must, at the end of the second year, present a shortened version of the Qualifying Paper in a graduate symposium to be held on Commencement weekend. To enter the program a successful applicant must have been awarded the degree of Bachelor of Arts or its equivalent from an accredited institution. An undergraduate major in art history is not required for acceptance to the program. More information is available on the Grad Art site.

Master of Arts in Policy Economics

The Center for Development Economics (CDE), which opened at Williams College in 1960, offers an intensive one-year program in economic analysis leading to the degree of Master of Arts in Policy Economics. The program is specifically designed for economists from developing countries who have already embarked on professional careers in the public sector. The curriculum requires courses in development economics, macroeconomics, public finance, and econometrics. CDE fellows choose among other courses in lecture, seminar, and tutorial formats. Recent course electives have included: developing country macroeconomics II; financial development and regulation; tax policy; international trade and development; program evaluation for international development; environmental and

natural resource policy; international financial institutions; long-term fiscal challenges; the role of social safety nets; and micro-simulation for policy analysis. Williams undergraduates who satisfy course prerequisites, with the consent of the individual instructor, are encouraged to take courses at the CDE. Admission to the master's degree program is highly selective, with several hundred applicants each year for approximately 30 places. Candidates normally have a B.A. or B.Sc. degree with honors in economics or a related field, two or more years of relevant work experience, and an effective command of spoken and written English. CDE fellows are often nominated for the program by public agencies from which they will be on leave. More information is available on the CDE site.

Honor Code

catalog.williams.edu/honor-code

All students are expected to be familiar with the Williams College Honor Code and to reaffirm their commitment to the Statement of Academic Honesty annually.

The Honor Code covers all aspects of academic honesty including, but not limited to:

- written examinations
- tests and quizzes
- problem sets
- lab reports
- papers
- homework assignments

The Eph Survival Guide tutorial is a great resource to ensure a thorough understanding of the Honor Code.

The Honor Code

As an institution fundamentally concerned with the free exchange of ideas, Williams College has always depended on the academic integrity of each of its members. In the spirit of this free exchange, the students and faculty of Williams recognize the necessity and accept the responsibility for academic honesty.

A student who enrolls at the College thereby agrees to respect and acknowledge the research and ideas of others in their work and to abide by those regulations governing work stipulated by the instructor. Any student who breaks these regulations, misrepresents their own work, or collaborates in the misrepresentation of another's work has committed a serious violation of this agreement.

Students and faculty report alleged violations of this agreement to the Honor and Discipline Committee. The Honor and Discipline Committee is made up of eight students, eight faculty, and the Dean of the College. The Dean designates one student as chair. The Faculty Steering Committee designates a Faculty Chair.

A case begins when a member of the community comes forward with evidence that a violation of the Honor Code might have occurred. This person normally brings the suspected violation to the attention of the Student Chair (SC) or the Faculty Chair (FC). If the Chairs decide that there is sufficient evidence to proceed, the SC meets with the concerned student(s) as soon as possible, informs them of the allegation, and presents them with copies of the supporting evidence. The SC listens to what the student(s) has to say and

provides instruction/guidance concerning their rights and the Honor Committee's standard procedures. The conversation between the student and the SC may become part of the evidence at a hearing at the discretion of the SC. The SC should make clear during the conversation with the student whether the discussion is confidential or not. The SC encourages all students to meet with a dean who can offer them advice and support as they prepare for the hearing.

Students who are brought before the Honor Committee have the right to be accompanied by an advisor. The advisor must be a member of the College community (i.e., student, faculty, or staff); students may not be accompanied by or represented by an attorney. During the hearing the advisor and the accused student may speak to one another, but the advisor may not address the committee or question witnesses.

Academic Policies

catalog.williams.edu/academic-policies

Students are required to be thoroughly familiar with the policies stated below.

Any exceptions to academic policies are by petition to the Committee on Academic Standing with the understanding that not all exceptions are approved.

Attendance

Williams College does not administer a general system of required classroom attendance. Students are expected to make full use of their educational opportunities by regular class attendance and assume the academic risks incurred by absences.

Instructors may set such standards of attendance as they deem necessary for the satisfactory conduct of their courses.

Students who fail to meet these standards may be warned by the instructor and notice sent to the Dean that continued absence could result in their being dropped from the course. A failing grade will be assigned to any regularly graded course dropped after the designated course change period. Students who do not attend the first-class meeting in a regular semester or Winter Study course may be required to withdraw by the instructor. Attendance is required at announced tests and final examinations unless the student is specifically excused by the instructor or a Dean.

Williams College Policy on Observance of Religious Holidays

Because no Williams student should ever have to choose between important religious observances and academic or athletic commitments, College policy provides for students who wish to participate in religious observances that conflict with other obligations to make arrangements with their instructors and coaches to do so.

The policy, approved in 1984 by the faculty and trustees in compliance with the laws of the Commonwealth of Massachusetts, states that “Any student who is unable, because of his or her religious beliefs, to attend classes or to participate in any examination, study, or work requirement on a particular day shall be excused from any such requirement, and shall be provided an opportunity to make up such requirement which they may have missed because of such absence now—provided, however, that such makeup examination or work shall not create an unreasonable burden upon the College.” No adverse or prejudicial effects shall result to any student who makes use of this provision of College policy.

Course Change Period

Course changes may be made during the Drop/Add period at the beginning of each semester. No changes may be made after that period except with the approval of the Committee on Academic Standing, after consultation with the Dean's Office. During Winter Study, a second Winter Study course may be added if the instructor approves but the original course may not be dropped. A late fee of \$5 per day may be assessed for each course change accepted after the announced deadline.

Year-Long Courses

Year-long courses are designated by an odd number and an even number joined by a hyphen; the work of the two semesters constitutes an integral, indivisible course. Therefore, if a student does not pass the second half of a year-long course, they forfeit credit for the first half and incur a deficiency as a result of the forfeiture. Students who register for a year course are required to do both semesters of that course within the same academic year.

Grading System

Williams uses the following system of grades: A = excellent; B = good; C = fair; D = passing; E = failing. These letters, with plus and minus value, have the following numerical equivalents in calculating grade averages:

A+ = 4.33

A = 4.00

A- = 3.67

B+ = 3.33

B = 3.00

B- = 2.67

C+ = 2.33

C = 2.00

C- = 1.67

D+ = 1.33

D = 1.00

D- = 0.67

E = 0 results in a course deficiency

A student receives credit for a course by obtaining a grade of at least D-.

First-Year Student Advisories

In the middle of each semester, instructors report to the Registrar those first-year students whose grades at that time are unsatisfactory. The students and their academic advisors receive these notices as a matter of routine.

Eligibility for and Completion of Majors

To be eligible for any major, students must have received grades of C- or better in each course in the major taken in the first two years of college and Pass on any Winter Study Project taken in the major department or program. A senior may enter a major only upon the approval of the department chair and the Committee on Academic Standing.

All semester courses in the major must be taken on an A-E graded basis, unless a course is the first in the major; in that case, it can be taken pass-fail. In rare instances, and only with the permission of the relevant chair, students may be allowed to count a second pass-fail course for the major. In addition to passing each major course and, where required, a major Winter Study Project, the student must maintain an average in the major of 1.67 or higher. Seniors who have an average below 1.67 in the major field normally will not be allowed to continue. A senior who receives a grade of E in the first semester of a required major course may be dropped from the College at mid-year. A student who falls below these standards may continue in the major only with the approval of the Committee on Academic Standing.

A senior major exercise is not required by every department but is by some. All departments requiring such an exercise specify it as such in the description of their major programs, and all students in those departments must complete the exercise satisfactorily.

Early Concentration Rule

During the first two years of study, students are limited in the number of courses they may take in one department or subject each semester as follows:

- First-year students may take no more than one course with the same course prefix, nor more than two in one department, in a semester.
- Sophomores may take no more than two courses with the same course prefix, nor more than three in one department, in a semester.
- Sophomores may take no more than three courses with the same course prefix, nor more than four in one department, during the full year.
- A student may take no more than a total of five courses with the same course prefix, nor more than eight in one department, during the first two years.

Any exception to the above early concentration rule may be requested by a petition to the Committee on Academic Standing (CAS) filed at the time of registration.

Course Load

Students are required to complete four courses each semester.

Approved Reduced Course Load

If a student with a disability believes that they are unable to pursue a full course of study, the student may petition the Disabilities and Accommodations Advisory Committee for permission to pursue a reduced course load. Such a petition must be accompanied by a professional evaluation that addresses the student's inability to maintain a full course of study and discusses the rationale for a reduced course load. Upon consideration of a student's petition and supporting documentation, the Disabilities and Accommodations Advisory Committee makes a recommendation to the Committee on Academic Standing, which renders decisions. Such cases are considered on an individual basis and may be initiated at any time during the student's tenure at Williams.

A reduced course load permits students with documented need based on a disability to take three rather than four courses each semester. Students approved for a reduced course load must still complete all academic requirements of the college (including passing 32 courses, completing a major, and completing all of the distribution requirements) in order to graduate.

Academic rules of the college as they apply to students on approved reduced (three) course load:

- Minimum academic standards for an upperclass student on a reduced course load are three grades of C- or better, OR two grades of C- or better and a Pass each semester, and at least Perfunctory Pass on the Winter Study Project. The minimum academic standards for a first-year student on a reduced course load are two grades of C- or better and no failures each semester, and at least Perfunctory Pass on the Winter Study Project. The Committee on Academic Standing may require a student to withdraw from the college for a period of time for failure to meet these minimum standards.
- Students may take a fourth course as an extra course. This course may be taken pass/fail or for a grade, and will count toward the 32 course requirement.
- Students on a reduced course load should confer with the Associate Registrar and with Dr. Wallace, Director of Accessible Education, at least once each year to make plans for completing the degree. Since the student will complete fewer than 32 Williams courses in eight semesters, the student will need to either take summer courses elsewhere or take additional semesters at Williams in order to complete their graduation requirements. Note, however, that only Williams courses can be used for completing distribution requirements.
- If a student wishes to take summer courses elsewhere, they must be pre-approved by the Associate Registrar and must be taken at an accredited four-year institution and be in a field appropriate to the liberal arts.
- If a student wishes to take courses elsewhere that count towards the requirements of their major, those courses will need to be approved by the chair in their major department or program.

- If a student receives financial aid, that aid can be extended if the reduced course load requires additional semesters to complete 32 courses.
- The college requires all students to take a full course load. This means that students on a reduced course load must be enrolled in a minimum of three courses each semester. Students who come to the end of a semester having completed 30 or 31 courses, and choose to complete those remaining courses by petitioning to take an additional semester at Williams will be expected to be enrolled in three courses that final semester.
- As is the case for all students, students are permitted to withdraw from one course in the first year and one additional course during the remaining semesters at Williams, so long as the requirements for withdrawing from a course are met. If the student withdraws from a course, the deficiency must be made up in either the following summer or the next semester.
- Students on reduced course load who plan to study away should be sure to let both Dr. Wallace and the study away advisor know of their intention to take a reduced course load while away. Many study away programs permit students to take a three course load if they have been approved for that load by their home institution, but some programs are fully integrated such that taking only three courses is not possible without disrupting the academic integrity of the program.
- If a student is approved for a reduced course load without a specific ending date, Dr. Wallace will review the necessity of continuing on reduced load at the beginning of each term. He may contact the student to request updated academic or medical information if needed to determine the appropriateness of continuing the reduced course load accommodation.

Pass/Fail Option

Students may take up to 3 courses on a pass/fail basis (but no more than one in any given semester). Students may designate a course pass/fail at any point after drop/add up to the tenth week of the semester. Once a course has been designated pass/fail, however, this designation cannot be changed. Students must achieve a minimum grade of D- in a pass/fail course to receive a "P". An "F" in a pass/fail course will be recorded as an "E" on students' records and will count toward the GPA, but a "P" will not.

Courses taken pass/fail cannot subsequently be used to fulfill distributional requirements (divisional, WS, DPE, QFR). No course counting toward a major, certificate, or concentration can be taken pass/fail unless this course is the first one taken toward that credential. (In rare circumstances, chairs of programs or departments may grant exceptions to this rule.)

Students may designate a fifth course as one of their pass/fail options, similarly by the tenth week of the semester. Courses taken pass/fail as part of a four-course load or as a fifth course to make up a course deficiency will count toward graduation; courses taken pass/fail

as an extra course will not count toward graduation.

By default, any course is available for students to enroll on a graded or pass/fail basis. Instructors have the option of designating any of their courses not eligible for the pass/fail option.

Fifth Course Option

Except in the case of the unbalanced course program described above, a student may, by the end of drop/add, enroll in a fifth course that must be designated as an extra-graded course. An extra course may be dropped any time up to the sixth week of the semester. If a student chooses to continue in the course and the course is available for the pass/fail option, they must decide by the tenth week whether to complete the course on an A-E graded basis or change the course to pass/fail. An extra course graded "Pass" may not be used to fulfill distribution or major, concentration, or certificate requirements (under rare circumstances, the chair of the relevant program or department may grant an exception to this rule) or to accelerate graduation, but may be used to make up a deficiency from a prior semester as one of the 32 semester courses required to complete the degree. An extra course completed as a fifth A-E graded course may be used to fulfill distribution or major, concentration, or certificate requirements or to make up a deficiency incurred in a prior term, but not to accelerate graduation. The grade received will be included in the calculation of the student's cumulative grade-point average.

By default, any course (except a tutorial) is available for students to enroll as a Fifth Course. Instructors have the option of designating any of their courses not eligible for the fifth course option.

Withdrawing from a Course

First-year and first-semester transfer students may be permitted to withdraw from one course (incurring a deficiency but no grade penalty) as late as the tenth week of the semester. Upperclass students also may withdraw from a course under the same conditions once in subsequent years. A withdrawal, recorded on the transcript as a "W," is granted only with the approval of the instructor and a dean and only if there is complete agreement between the instructor and the dean that, despite conscientious effort to do the work, continuation in the course would be detrimental to the overall educational interest or health of the student. The deficiency thereby incurred must be removed in the normal manner.

Deadlines for Coursework

Deadlines for coursework are set by the instructor with the following limitations:

- for courses with final exams, the latest that written work may be due is 5:00 pm on the last day of reading period.
- for courses without final exams, the latest that written work may be due is 5:00 pm on the third-to-last day of the exam period.
- If work is due before these deadlines, the instructor may grant an extension up to these deadlines solely at their discretion. Short extensions beyond these deadlines may be granted by a dean but only with the concurrence of the instructor. No extensions will be granted beyond the examination period except in the case of serious illness.
- Instructors may require students who have missed announced quizzes or hour tests to present satisfactory explanations to a dean before they are permitted to make up the exercises.
- If a student is absent from a final examination, a make-up examination may be given only with the permission of a dean and at a time determined by the dean.

Failing a Course and Deficiencies

When a student falls behind in course credits because of a failure or course withdrawal, they have a deficiency. Deficiencies can be made up only by courses taken after the deficiencies have been incurred. Thus, for example, Advanced Placement credits may not be used to make up deficiencies.

A deficiency incurred in the fall term must be made up before the start of the following academic year. A deficiency incurred in the spring semester must be made up prior to the start of the following spring semester. A student may, in consultation with the Dean's Office, petition the Committee on Academic Standing with an alternate plan.

A student must make up a deficiency in one of these ways:

- obtain a grade of at least C- in a summer school course, approved in advance by the Registrar, at a regionally accredited four-year college or university; (the grade will not, however, be included in the calculation of the student's cumulative grade point average)
- pass an extra course, either on a pass/fail or on an A-E graded basis, at Williams in the semester following the withdrawal or failure.
- in the case of a first-semester failure of a year-long course, obtain a grade of at least a C- in the work of the second semester of that course. The failure for the first semester will, however, remain on the student's record and will be included in the cumulative grade point average. If a failure occurs in the second semester of a full-year course, credit for passing the first semester may be retained only upon the recommendation of the department concerned and with the approval of the Committee on Academic Standing.

A senior who incurs a failure in the first semester in a required major course may be dropped from the College at midyear.

Separation for Low Scholarship

It is the policy of Williams College not to permit a student to remain in residence after it has become evident that they are either unable or unwilling to maintain reasonable standards of academic achievement. At the end of each term, the Committee on Academic Standing reviews all academic records that fail to meet the following minimum academic requirements:

- For first-year students: Three grades of C- or better and no failures each semester, and at least Perfunctory Pass on the Winter Study Project
- For upper-class students: Four grades of C- or better, OR three grades of C- or better and a Pass each semester, and at least Perfunctory Pass on the Winter Study Project

Students whose records fail to meet these minimum academic requirements or whose records otherwise fail to show adequate progress may be required to resign.

Students who are required to resign from the College for academic reasons are normally not permitted to return for at least one year from the date of their resignation. A student who has been required to resign from the College may petition the Committee on Academic Standing through the Office of the Dean of the College for reinstatement. That petition must include (1) evidence that the student has made up all course deficiencies, (2) a letter to the Committee providing convincing evidence that the student is ready and able to complete work toward a degree at Williams.

Students who are required to resign due to failure to meet minimum academic requirements can appeal that decision by making a personal statement to the Committee on Academic Standing (in person, in writing, or via Skype/conference call). The CAS decision upon appeal is final.

When required to resign, students must vacate their rooms promptly. Financial aid students must also see the Director of Financial Aid before leaving to discuss loan repayment and renewal of aid in the event of readmission.

Students are expected to vacate their rooms, including belongings, upon withdrawal from the College and follow all housing deadlines for departure.

Withdrawal from the College in Good Standing

Students may request personal leaves of absence from a dean and, if granted, withdraw from the College. Such time away, often as a period of reassessment and self evaluation, can prove to be beneficial educationally. A withdrawal in good standing may be granted for not less than one semester and not more than three years. Students who withdraw in good standing are readmitted with the approval of the Dean's Office and are expected to complete the degree without further interruption.

Students may request permission from a dean to withdraw at any time. If a student is granted a personal leave of absence after the semester begins, but before the end of the drop/add period, the transcript will list the date of withdrawal as the day before the term began. If a personal leave is granted after the end of the drop/add period, but before the end of the eighth week of the semester, the transcript will list the date of withdrawal, but the semester will not count toward the maximum of eight allowed to complete the degree. If a personal withdrawal is allowed after the eighth week of the semester, the transcript will list the date of withdrawal and the courses in progress, each with a W; the semester will normally count toward the maximum of eight allowed to complete the degree and the student will incur deficiencies that must be made up before returning to the College.

Refunds

Payment refund or credit in the event of withdrawal is described in the Williams College Refund Policy.

Eligibility for Extracurricular Activities

A student is eligible to participate in any athletic, dramatic, literary, or musical event and be in the student government, or other organization as a member, substitute, or officer, unless they are declared ineligible:

- 1) by the Dean;
- 2) by vote of the Discipline Committee; or
- 3) by vote of the Committee on Academic Standing because of a dangerously low record.

The Student Honor Committee may recommend to the Dean loss of eligibility as a penalty for a violation of the Honor Code.

Dean's List

All students who attain a semester average of 3.50 or higher in a program of four or more courses taken on an A-E graded basis are placed on the Dean's List for that semester. Students with three courses taken on an A-E graded basis and one pass/fail course are not eligible for the Dean's List.

Phi Beta Kappa Society (amended fall 2019)

1. The requirements for election to membership shall include the completion of all required Winter Study Projects. There shall be two elections of new members for each class, at the end of the junior and senior years.
2. At the end of the junior year, all students in the highest five percent of the class, ranked by cumulative grade point average, shall be eligible for election provided they have met the requirements and have completed enough courses to be considered candidates for the B.A. degree in the following year. A student who leaves Williams at the end of the junior year to attend graduate school may be elected under the above procedures.
3. At the end of the senior year, all students not yet elected and in the highest 12.5 percent of the class, ranked by cumulative grade point average, shall be eligible for election provided they have met the requirements. Seniors who have met the requirements can also become eligible for election by nomination from a faculty member at Williams College. Nominations shall be approved by an election committee of at least three faculty members of Phi Beta Kappa, with one from each division; the members of the committee will be chosen by the faculty officers of the Williams chapter, in consultation with the membership. The total number of students elected shall not exceed 15 percent of the class.
4. Students shall be eligible for election only if they have been students at Williams College for at least two years.
5. Honorary members may be elected from distinguished alumni, faculty, or staff of the college. Nominations shall be approved by the election committee. The number of honorary members elected shall ordinarily not exceed two each year.
6. Any student who shall have gained their rank by unfair means or who in the judgment of the Dean of the College is not of good moral character is ineligible to election.
7. The name of a member elect shall be entered on the roll only after they have accepted the election and has paid to the Treasurer the regular entrance fee.
8. Any undergraduate member who withdraws from the College before graduation or who falls short of the minimum Phi Beta Kappa scholastic standing may, upon a two-thirds vote of the members present at the annual meeting, be deprived of membership in the society.
9. Any undergraduate member who is expelled from the College shall be deprived of membership in the Society.
10. While connected with Williams College as an officer of instruction or administration, any graduate of Williams College who is a member of another chapter of Phi Beta Kappa shall be considered a regular member of the Williams chapter.
11. While connected with Williams College as professor, associate professor or assistant professor, or an officer of administration, any member of another chapter of Phi Beta Kappa shall have all the privileges of the Williams chapter, including holding office and voting. While connected with Williams College, any other officer of instruction or

administration who is a member of another chapter shall have all the privileges of the Williams chapter, except holding office and voting.

Awarding of Degrees

By vote of the Trustees, the degree of Bachelor of Arts is conferred at Commencement upon students who have completed the requirements as to courses and grades to the satisfaction of the Faculty. The right to a degree may, however, be forfeited by misconduct at any time prior to the conferring of the degree. Students receiving their degree in absentia must communicate that decision to the Dean of the College and the Registrar no later than two weeks prior to commencement. Diplomas will not be authorized for students who have not paid College charges or have not returned all books belonging to the library.

Graduation with Distinction (Latin Honors)

The Faculty will recommend to the Trustees that the degree of Bachelor of Arts with distinction (Latin Honors) be conferred upon those members of the graduating class who have passed all Winter Study Projects and obtained a four-year average in the top:

- 35% of the graduating class – Bachelor of Arts cum laude or higher
- 15% of the graduating class – Bachelor of Arts magna cum laude or higher
- 2% of the graduating class – Bachelor of Arts summa cum laude

Winter Study

Students must pass a Winter Study course in each of their four years. Winter Study courses are graded Pass, Perfunctory Pass, or Fail. All work must be submitted by the last day of the Winter Study term; work may be accepted after this date only with the permission of a Dean. Students who fail their Winter Study course or receive a second Perfunctory Pass will be placed on academic probation by the Committee on Academic Standing and will be required to make up the deficiency. Students who fail through gross neglect of work will normally be required to resign.

Student Records

Williams College has policies regarding the kinds of information that will be included in the permanent record of students as well as policies regarding the retention, safety and security, and disposal of records. Its information-release policies respect the rights of individual privacy, the confidentiality of records, and the best interests of students and the institution.

Williams values the privacy of its students and complies with the Family Educational Rights and Privacy Act (FERPA), which governs access and release of student education records.

The Student Records Disclosure Policy is emailed annually to ensure students are aware of their rights.

1. A student has the right to inspect and review their education records within 45 days of their request.

Even though the law allows 45 days, at Williams, requests are normally honored at the time they are submitted. Students should submit their requests to the persons maintaining the records to which they wish access, e.g. the registrar, dean, department chair, or other appropriate officials.

2. A student has the right to request that corrections be made to their education records if they believe the records are inaccurate or misleading or otherwise in violation their privacy rights under FERPA.

Students should address such requests to the official responsible for the record and must clearly identify the parts of the record which they wish amended and why they believe them to be inaccurate or misleading.

If the official responsible for the record does not agree to amend the record as requested, Williams will notify the student of the decision and advise them of the right to a hearing and the procedures for initiating one. If Williams decides after the hearing not to amend the education record, the student may place a written statement in the record commenting upon the information therein and the student's disagreement with the college's decision not to amend the record.

3. A student has the right to consent to disclosures of personally identifiable information contained in their education records, except to the extent that FERPA authorizes disclosure without consent.

Williams College generally will not disclose personally identifiable information from a student's education records without his/her consent; however, the College may make authorized disclosures without consent as specified under the law.

Under FERPA, Williams College may, at the College's discretion, release personally identifiable information from education records without the student's prior consent in certain specified circumstances, including but not limited to:

- Disclosure to school officials with legitimate educational interests. "School officials" are Williams College employees in administrative, supervisory, academic or support staff positions; Williams College trustees; individuals and companies with whom the College has contracted to perform institutional services and functions, such as attorneys, auditors, consultants, volunteers, and collection agencies. School officials have a "legitimate educational interest" if they need to review an education record in

- order to fulfill their professional responsibilities;
- Disclosure to organizations involved in awarding financial aid;
- Disclosure to parents of financially dependent (see Parental Notification Policy);
- Disclosure to parents or legal guardians of students under twenty-one years of age regarding information about violations of college drug and alcohol policies;
- Disclosure to comply with a judicial order or subpoena (after making a reasonable effort to notify the student in advance of compliance so that the student can take protective action). An exception to this notification requirement exists if the subpoena is issued by a federal grand jury or for other law enforcement purposes and the requesting agency specifically ordered that the existence of the subpoena is not to be disclosed;
- Disclosure to appropriate parties in a health or safety emergency, in order to protect the health or safety of the student or other individuals; and
- Disclosure of the results of final student disciplinary proceedings to victims of violent crimes or sexual offenses.

Note that, upon request, Williams will disclose a student's education records to officials of another school in which the student seeks or intends to enroll, as well as institutions where the student has already enrolled.

In addition, Williams may make public the following student "directory information" unless the student informs the registrar in writing by September 15 that their prior consent be required during that academic year:

- name
- permanent and College addresses
- campus electronic mail address
- permanent, mobile, and campus telephone numbers
- date of birth
- major field
- extra-curricular activities
- height and weight of members of athletic teams
- dates of attendance
- degrees, honors, and awards
- other schools attended

Williams is very conservative in its use of this directory information and releases it outside the college community only when its release is deemed of benefit to students. Generally this information is not publicly available outside the Williams network, with the exception of the directory. The directory lists name, class year, campus address and campus e-mails.

A student may opt to consider directory information confidential and it will be flagged as such in the student's record. To elect this option, the student must inform the registrar in writing by **September 15** that prior consent is required to release directory information, and should contact the Associate Registrar, Mary.L.Morrison@williams.edu, to discuss this request.

4. A student has the right to file a complaint with the U.S. Department of Education concerning alleged failures by Williams to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is:

Family Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-8520

Record Retention

- Records that document the academic progress of matriculated students: This series may include but is not limited to high school and other college transcripts, admission applications, major and concentration declaration forms, independent study petitions, summer school and study away petitions, petitions for exceptions to College academic policies, applications for withdrawal from the College, and transfer admissions to the College. These types of records are retained for **five years** from last enrollment.
- Records related to grades: Paper/email submissions of grades and grading changes, reports of unsatisfactory grades, pass/fail designations, fifth course options, withdrawal with W grade forms, and audit validation forms are retained for **seven years** beyond end of pertinent term.
- Official transcript at the time of graduation is a **permanent** record.

Parental Notification Policy

As noted above, FERPA regulations and state statutes assign students the right to release information contained in their educational records. Specifically, FERPA entrusts this right to students once they reach the age of eighteen or enroll in a postsecondary institution. Consistent with Williams' efforts to promote each student's personal growth and autonomy, and to preserve a climate of trust with them, the College will not release any information contained within a student's educational record to parents without the student's consent. However, when appropriate and as allowed by FERPA, the College does permit the release of certain information of financially dependent students to parents without the student's consent. The specific instances in which Williams will and will not notify parents warrant particular attention.

Note: The College reserves the right to notify a parent or guardian of their student's status in situations not specifically listed below if the circumstances warrant and if it is in the best interest of the student and the College community.

Notice of a Student's Academic Standing

The College believes that each student is responsible for his or her academic progress and performance. Therefore, Williams communicates with students regarding their academic performance. For instance, in an effort to foster students' sense of responsibility for their academic endeavors, grades and academic advisories are sent directly to students and are not released to parents or guardians unless a student specifically requests in writing to the Office of the Registrar that they be released. While students are encouraged to share information regarding their academic progress with their parents, Williams does not mandate it.

Academically, however, there are instances when the College will typically notify parents of a student's academic performance with or without the student's consent. Parents generally will be notified of a student's academic standing regardless of consent when there is a change of status, i.e., when a student is required to resign (either temporarily or permanently) due to failure to meet academic standards.

Notice of a Student's Disciplinary/Conduct Standing

As a member of the Williams community, the College expects each student to take responsibility for his or her actions. Our Code of Conduct serves as a standard and guide for students' behavior. Violations of our Code of Conduct warrant a College response. Generally, the College will communicate any disciplinary response to a Code violation directly with the student, and parents or guardians will not be notified, unless the student chooses to inform his or her parents. However, if the College response results in a change in the student's status (i.e., probation, suspension, or expulsion), the college typically will notify parents or guardians of the changed status.

Likewise, Williams reserves the right to inform the parents of any student if the student violates any Federal, State, or local law, or campus regulation governing the use or possession of alcohol or drugs.

Notice of a Student's Health/Welfare Standing

Information regarding a student's health and/or psychological welfare is protected by strict policies instituted to ensure the student's confidentiality. While students are encouraged to share information regarding their health and/or psychological welfare with their parents, without students' informed consent (typically in writing), the College cannot share this type of information with their parents or guardian except as set forth below.

Williams recognizes that situations arise in which a student may be unable to give informed consent. If a student is transported to the hospital in a critical situation, the parent or guardian of the student will be notified. Where possible, the College will allow the individual student time to make direct notification to parent or guardian or explicitly identify a third party to make contact with the parent or guardian. In such instances when a student is being treated by an external healthcare provider, the College expects the external provider to determine the appropriateness of parental notification and undertake such notification when deemed appropriate. Having the external provider directly notify the parents ensures that parents receive the most informed and precise information regarding their child's well-being.

If a student is facing a health- or safety-related emergency or is deemed a threat to a person on campus, the College may decide to notify parents without the consent of the student. The College may also contact a parent or guardian if it comes to the attention of school officials that a student has been inexplicably absent from campus for a prolonged period of time.

Health and Counseling Records

As noted above, FERPA pertains specifically to education records and it does not address records that may be generated in Health and Wellness Services. FERPA's protection of education records does not include those records: (1) relating to a student that are either created or maintained by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional; (2) generated solely to provide treatment to the student; and (3) not disclosed to anyone other than individuals providing such treatment.

Access to Williams Health and Wellness Services' records is limited by departmental confidentiality policies, professional ethics, and state law. In particular, information shared, generated, and/or obtained during visits to Health and Wellness Services is protected from disclosure by specific policies regulating the release of such information.

Academic Resources

catalog.williams.edu/academic-resources

Center for Academic Resources

The Center for Academic Resources houses a number of services and programs designed to support students' academic and intellectual engagement and to help them take full advantage of the curriculum. Our goal is to help students explore and take full advantage of Williams' educational/intellectual opportunities of living and learning.

'68 Center for Career Exploration

At the '68 Center for Career Exploration, we're dedicated to the future success of Williams' students, and that means helping them make the most of the time and opportunities right now. We're students' one-stop shop for career exploration, internship, job, and graduate school searching, resume critiques, interviewing advice, and networking. It's never too early to stop by for an appointment. Whether a student is an undeclared first-year or a senior ready for their first job in a chosen field, we're here to help students explore, define, and achieve their career potential.

Students can get started exploring with the professional Career Advisors in:

- Arts, Communications & Technology (ACT)
- Business
- Careers with Social Impact (CSI)
- Education
- Entrepreneurship and Start-ups
- Sciences & Health Professions

Or, explore directly with alumni through the first-ever alumni career mentoring network, EphLink. Students can walk in daily from 1:00-4:00 pm or make an appointment through Handshake.

Each year the office organizes one large career fair and hosts over 120 employer campus visits throughout the year. We offer an extensive database of curated internships and jobs, summer internship funding, and interview support. Internship funding is available through our Alumni Sponsored Internship Program (ASIP) for currently enrolled first-years, sophomores, and juniors participating in an unpaid or limited stipend full-time summer internship. This Program enables students to perform a public service to these organizations and work on special projects with an opportunity to gain experience, explore career fields, develop skills, and build a network.

For more information or to subscribe to our monthly newsletter visit the '68 Center for Career Exploration site.

Graduate Study and Professional Careers

Although Williams' principal function is to provide a broad and solid liberal education that will be of lasting value no matter what vocation a student may pursue, Williams recognizes that no fundamental conflict exists between a liberal education and preparation for a professional career, on the contrary, a foundation of liberal studies increases professional competence in any field. A student should plan their program of study to provide as much educational breadth and enrichment as circumstances permit. A student should also give serious consideration to post-college plans early in their college career.

Each major provides the foundation for graduate study in the corresponding field. Students should consult with individual programs for requirements and for special advice regarding preparation for graduate study. Students should also consult with the appropriate faculty advisors as early as possible to make certain they have taken all the necessary factors into consideration.

Religious Study

There is no particular path through the Williams curriculum designed or recommended for students intending to prepare for a career as a religious professional, enroll in a seminary, or pursue theological education. Undergraduate study in many fields within the liberal arts curriculum can be useful to the prospective minister, priest, rabbi, imam, or teacher of religion.

Students with vocational interests that may include ordination or certification as a religious professional in a field such as chaplaincy, religious education, service to a congregation, faith-based humanitarian work or some other form of ministry are urged to make themselves known to one of the chaplains (or, where appropriate, one of the local clergy) as soon as these interests begin to come into focus. Ordination requirements vary widely depending on the particular religious community or tradition; in some cases, it may be possible to make progress on certain credentials in academic study or field experience during the college years. Many divinity schools and theological seminaries expect and welcome students whose understanding of "ministry" or sense of call is very much still in formation. A basic foundation in the study of religion is certainly helpful—sacred texts, scriptural languages, history, philosophy, phenomenology and comparative studies, etc. But undergraduate study in other disciplines—music and the arts, political science and economics, anthropology, psychology and sociology—may also enhance preparations at the graduate level for future service to communities of faith.

Administration

catalog.williams.edu/administration

Senior Staff

Collette Chilton
Chief Investment Officer

Keli Gail
Assistant to the President and Secretary of the College

Leticia S. E. Haynes
Vice President for Institutional Diversity and Equity

Stephen Klass
Vice President for Campus Life

David Love
Provost, Professor of Economics

Maud S. Mandel
President and Professor of History, Program in Jewish Studies

Megan Morey
Vice President for College Relations

Denise Buell
Dean of the Faculty, Cluett Professor of Religion

Frederick W. Puddester
Vice President for Finance and Administration and Treasurer

Jim Reische
Chief Communications Officer

Marlene Sandstrom
Dean of the College, Hales Professor of Psychology

Faculty

catalog.williams.edu/faculty

The Williams Directory can provide additional information about faculty.

Leave information is noted.

Daniel P. Aalberts, Professor of Physics; 1989, B.S., Massachusetts Institute of Technology, 1994, Ph.D., Massachusetts Institute of Technology, 1996, Postdoctoral Research at, University of Leiden, 1997, Postdoctoral Fellow at, Rockefeller University

Tomas Adalsteinsson, Assistant Professor of Physical Education and Head Women's Golf Coach

Colin C. Adams, Thomas T. Read Professor of Mathematics; 1978, B.S., Massachusetts Institute of Technology, 1983, Ph.D., University of Wisconsin, Madison

Zaid Adhami, Assistant Professor of Religion and Faculty Affiliate in Anthropology & Sociology; 2010, M.A., Stanford University, 2010, B.A., Stanford University; affiliated with: Anthropology and Sociology; on leave 2019-2020

Jeannie R Albrecht, Chair and Professor of Computer Science; 2001, B.S., Gettysburg College, 2003, M.S., Duke University, 2007, Ph.D., University of California, San Diego

Laylah Ali, Francis Christopher Oakley Third Century Professor of Art; 1991, B.A., Williams College, 1994, M.F.A., Washington University in St. Louis

Kris Allen, Lyell B. Clay Artist in Residence in Jazz Activities/Lecturer in Music, Director of the Jazz Ensemble; 1998, B.M., Hartt School, University of Hartford, 2004, M.M., State University of NY, Purchase Conservatory; on leave Spring 2020

Sarah M. Allen, Associate Professor of Comparative Literature; 1992, A.B., Harvard University, 1996, M.A., University of Michigan, 2003, Ph.D., Harvard University; on leave 2019-2020

Alex A. Apotsos, Lecturer in Geosciences; 1999, B.S., Duke University, 2007, Ph.D., Massachusetts Institute of Technology

Michelle M. Apotsos, Assistant Professor of Art; 1999, B.A., University of North Carolina, Chapel Hill, 2005, M.F.A., University of Arkansas, Fayetteville, 2006, M.A., Tufts University, 2013, Ph.D., Stanford University

Kevin M. App, Assistant Professor of Physical Education and Head Men's Basketball Coach; 2007, B.S., Cornell University

Henry W. Art, Director of CES and the Environmental Studies Program, Rosenburg Professor of Environmental Studies and Biology, Emeritus; 1966, B.A., Dartmouth College, 1969, M.Phil., Yale University, 1971, Ph.D., Yale University

Quamrul H. Ashraf, Professor of Economics; 1999, B.A., Trinity College, 2004, M.A., Brown University, 2009, Ph.D., Brown University

Sonya K. Auer, Visiting Assistant Professor of Biology; 2001, B.A., Prescott College, 2011, Ph.D., University of California, Riverside; affiliated with: Ctr-Environmental Studies

Duane A. Bailey, Professor of Computer Science; 1982, B.A., Amherst College, 1984, M.S., University of Massachusetts, Amherst, 1988, Ph.D., University of Massachusetts, Amherst; on leave 2019-2020

Robert E. Baker-White, Professor of Theatre; 1980, B.A., Williams College, 1983, M.F.A., University of Washington, 1990, Ph.D., Stanford University

Jon M. Bakija, W. Van Alan Clark '41 Third Century Professor in the Social Sciences; 1990, B.A., Wesleyan University, 1995, M.A., University of Michigan, 2000, Ph.D., University of Michigan; on leave Spring 2020

Lois M. Banta, Chair and Professor of Biology; 1983, B.A., Johns Hopkins University, 1990, Ph.D., California Institute of Technology

Daniel W. Barowy, Assistant Professor of Computer Science; 2002, B.A., University of Massachusetts, Amherst, 2010, B.S., Boston University, 2013, M.S., Boston University, 2017, Ph.D., University of Massachusetts, Amherst

Alix H. Barrale, Assistant Professor of Physical Education and Head Field Hockey Coach; 1993, B.A., Williams College, 1996, M.S., Smith College

Bill Barrale, Assistant Professor of Physical Education, Head Baseball Coach; 1994, B.S., Northeastern University, 2004, M.A., Rowan University

Andrea Barrett, Senior Lecturer in English; 1974, B.S., Union College

Ethan M. Barron, Assistant Professor of Physical Education, Head Men's Track & Field Coach; 2001, B.A., Tufts University, 2005, M.Ed., Middlebury College

Melissa J. Barry, Professor of Philosophy; 1988, B.A., Wheaton College, 1998, Ph.D., University of Notre Dame

Ron D. Bassar, Assistant Professor of Biology; 2001, B.A., Prescott College, 2011, Ph.D., University of California, Riverside

Gene H. Bell-Villada, Harry C. Payne Professor of Romance Languages; 1963, B.A., University of Arizona, 1967, M.A., University of California, Berkeley, 1974, Ph.D., Harvard University; on leave Spring 2020

Ben Benedict, Senior Lecturer; 1973, B.A., Yale University, 1976, M.Arch., Yale University

Magnús T. Bernhardtsson, Chair of Arabic Studies, Brown Professor of History and Faculty Affiliate in Leadership Studies and Religion; 1990, B.A., University of Iceland, 1992, M.A., Yale University, 1999, Ph.D., Yale University; affiliated with: Leadership Studies Program, Arabic Studies Department, Religion Department

Alexander Bevilacqua, Assistant Professor of History; 2007, B.A., Harvard University, 2008, M.Phil., Cambridge University, 2010, M.A., Princeton University, 2014, Ph.D., Princeton University

Mari Rodriguez Binnie, Assistant Professor of Art; 2005, B.A., Northwestern University, 2011, M.A., University of Texas, Austin, 2017, Ph.D., University of Texas, Austin

Julie C. Blackwood, Associate Professor of Mathematics; 2006, B.S., Rochester Institute of Technology, 2010, Ph.D., University of California, Davis

Roxana A. Blancas Curiel, Mellon Postdoctoral Fellow in Mexican Literature and Cultural Production; 2016, Ph.D., University of California, Riverside

M. Jennifer Bloxam, Herbert H Lehman Professor of Music; 1979, B.M., University of Illinois, 1982, M.A., Yale University, 1987, Ph.D., Yale University; on leave Spring 2020

Thomas P. Blumenauer, Lecturer in Physical Education, Assistant Football Coach; 2007, B.S., Ithaca College, 2012, M.Ed., Saint Lawrence University

Casey D. Bohlen, Visiting Assistant Professor of History and Religion; 2008, B.A., Brown University, 2013, M.A., Harvard University, 2016, Ph.D., Harvard University; affiliated with: Religion Department

Christopher A. Bolton, Professor of Comparative and Japanese Literature; 1989, B.A., Harvard University, 1998, Ph.D., Stanford University

Ralph M. Bradburd, David A. Wells Professor of Political Economy; 1970, B.A., Columbia College, 1975, M.A., Columbia University, 1976, Ph.D., Columbia University

Alice C. Bradley, Assistant Professor of Geosciences; 2011, B.E., Dartmouth College, 2014, M.S., University of Colorado, Boulder, 2016, Ph.D., University of Colorado, Boulder

Rashida K. Braggs, Associate Professor of Africana Studies and Faculty Affiliate in Comparative Literature and American Studies; 1998, B.A., Yale University, 2000, M.S., Boston University, 2006, Ph.D., Northwestern University; affiliated with: American Studies Program

Janis Bravo, Instructor in Biology; 1980, B.S., Cornell University, 1990, Ph.D., Rutgers University

Johanna Breiding, Assistant Professor of Art; 2006, B.A., Scripps College, 2012, M.F.A., California Institute of the Arts

Theresa Brock, Visiting Assistant Professor of French Language and Francophone Cultures; 2011, B.A., University of Delaware, 2013, M.A., Pennsylvania State University, 2017, Ph.D., Pennsylvania State University

Nicholas Brooke, Visiting Assistant Professor of Music

Victoria Brooks, Visiting Lecturer in the Graduate Program in Art History; 2001, B.A., University of Bristol, 2006, M.A., Royal College of Art

Deborah Brothers, Costume Director and Lecturer in Theatre; 1976, B.F.A., University of New Orleans, 1979, M.F.A., California Institute of the Arts

Nicole G. Brown, Assistant Professor of Classics; 2001, B.A., Mount Holyoke College, 2003, M.A., Princeton University, 2017, Ph.D., Princeton University

Denise K. Buell, Dean of the Faculty, Cluett Professor of Religion; 1987, B.A., Princeton University, 1990, M.Div., Harvard University, 1995, Ph.D., Harvard University; affiliated with: Religion Department

Sandra L. Burton, Lipp Family Director of Dance and Senior Lecturer in Dance; 1983, B.A., City College of New York, 1987, M.F.A., Bennington College

Andrew Bydlon, Visiting Assistant Professor of Mathematics; 2012, B.S., Pennsylvania State University, 2017, Ph.D., University of Utah

Xizhen Cai, Assistant Professor of Statistics; 2014, Ph.D., Pennsylvania State University; affiliated with: Mathematics

Corinna S. Campbell, Assistant Professor of Music; 2003, B.M., Northwestern University, 2005, M.M., Bowling Green State University, 2012, Ph.D., Harvard University

Gerard Caprio, William Brough Professor of Economics; 1972, B.A., Williams College, 1974, M.A., University of Michigan, 1976, Ph.D., University of Michigan

Deborah L. Carlisle, Instructor in Biology; 2014, Ph.D., University of Massachusetts, Amherst

Josh Carlson, Visiting Assistant Professor of Mathematics; 2013, B.S., Iowa State University, 2019, Ph.D., Iowa State University

Nicholas Carr, Richmond Visiting Professor; 1981, B.A., Dartmouth College, 1984, M.A., Harvard University

Matt E. Carter, Associate Professor of Biology; 2000, B.A., Whitman College, 2010, Ph.D., Stanford University; affiliated with: Neuroscience Program

Gregory P. Casey, Assistant Professor of Economics; 2018, Ph.D., Brown University

Alison A. Case, Dennis Meenan '54 Third Century Professor of English; 1984, B.A., Oberlin College, 1988, M.A., Cornell University, 1991, Ph.D., Cornell University

Julie A. Cassiday, Willcox B. and Harriet M. Adsit Professor of Russian; 1986, B.A., Grinnell College, 1990, M.A., Stanford University, 1995, Ph.D., Stanford University

David N. Cassuto, Class of 1946 Visiting Distinguished Professor of Environmental Studies; 1985, B.A., Wesleyan University, 1994, Ph.D., Indiana University

Anik A. Cepeda, Assistant Professor of Physical Education and Head Coach of Women's Tennis; 2013, B.A., College of William and Mary

Maria Elena Cepeda, Chair and Professor of Latina/o Studies; 1995, B.A., Kenyon College, 1997, M.A., University of Michigan, 2003, Ph.D., University of Michigan; affiliated with: Women, Gender & Sexuality Study, American Studies Program

Cecilia Chang, Frederick Latimer Wells Professor of Chinese; 1981, B.A., Fu-Jen University, 1987, M.A., University of California, Los Angeles, 2004, Ph.D., University of Massachusetts, Amherst

Matthew Chao, Assistant Professor of Economics; 2006, B.A., Dartmouth College, 2015, Ph.D., California Institute of Technology

Jessica Chapman, Associate Professor of History; 1999, B.A., Valparaiso University, 2001, M.A., University of California, Santa Barbara, 2006, Ph.D., University of California, Santa Barbara; on leave Spring 2020

C. Ondine Chavoya, Professor of Art; 1992, B.A., University of California, Santa Cruz, 1996, M.A., University of Rochester, 2002, Ph.D., University of Rochester; affiliated with: Latina/o Studies Program

Pei-Wen Chen, Assistant Professor of Biology; 2001, B.S., National Yang-Ming University, 2003, M.S., Albert Einstein College of Medicine, 2008, Ph.D., Albert Einstein College of Medicine; on leave 2019-2020

Franny Choi, Gaius Charles Bolin Fellow in English; 2011, B.A., Brown University, 2018, M.F.A., University of Michigan

Kerry A. Christensen, Garfield Professor of Ancient Languages; 1981, B.A., Swarthmore College, 1983, M.A., Princeton University, 1993, Ph.D., Princeton University

Allana M. Clarke, Visiting Lecturer in Art; 2014, M.F.A., Maryland Institute College of Art

Matthew M. Clasen, Visiting Assistant Professor of Psychology; 2014, B.S., James Madison University, 2018, Ph.D., The American University; affiliated with: Neuroscience Program

Cassandra J. Cleghorn, Chair and Senior Lecturer in American Studies and English, Chair of American Studies Program; 1983, B.A., University of California, Santa Cruz, 1988, M.A., Yale University, 1995, Ph.D., Yale University; affiliated with: American Studies Program

Phoebe A. Cohen, Associate Professor of Geosciences; 2002, B.A., Cornell University, 2010, Ph.D., Harvard University

Jeremy D. Cone, Assistant Professor of Psychology; 2007, B.A., University of Waterloo, 2012, Ph.D., Cornell University

Michael Conforti, Lecturer in the Graduate Program in Art History; 1968, B.A., Trinity College, 1973, M.A., Harvard University, 1977, Ph.D., Harvard University

Eliza L Congdon, Assistant Professor of Psychology; 2008, B.S., Brown University, 2016, Ph.D., University of Chicago

José A. Constantine, Assistant Professor of Geosciences; 1999, B.S., College of William and Mary, 2002, M.S., University of California, Davis, 2008, Ph.D., University of California, Santa Barbara; on leave 2019-2020

Mea S. Cook, Chair and Associate Professor of Geosciences; 1999, B.A., Princeton University, 2006, Ph.D., Mass Institute of Technology - Woods Hole Oceanographic Institution Joint Program in Oceanography

Carl B. Cornell, Visiting Assistant Professor of French; 2011, B.A., St. Lawrence University, 2018, Ph.D., Pennsylvania State University

Ronadh Cox, Edward Brust Professor of Geology and Mineralogy; 1985, B.S., University College Dublin, 1993, Ph.D., Stanford University

George T. Crane, Chair of Asian Studies and the Edward S. Greenbaum 1910 Professor of Political Science; 1979, B.A., State University of New York, Purchase, 1981, M.A., University of Wisconsin, Madison, 1986, Ph.D., University of Wisconsin, Madison; affiliated with: Asian Studies Department

Marshall Creighton, Lecturer in Physical Education and Assistant Strength & Conditioning Coach; 2002, B.A., Williams College

Justin Crowe, Associate Professor of Political Science, Chair of Leadership Studies Program; 2003, B.A., Williams College, 2005, M.A., Princeton University, 2007, Ph.D., Princeton University; affiliated with: Leadership Studies Program; on leave 2019-2020

Joseph L. Cruz, Professor of Philosophy; 1991, B.A., Williams College, 1999, Ph.D., University of Arizona

Erica Dankmeyer, Artist-in-Residence in Dance; 1991, B.A., Williams College

Andrea Danyluk, Mary A and William Wirt Warren Professor of Computer Science; 1984, A.B., Vassar College, 1986, M.S., Columbia University, 1992, Ph.D., Columbia University; on leave Fall 2019

Derek Dean, Lecturer in Biology; 1994, B.A., Oberlin College/Conservatory, 2004, Ph.D., Cornell University

Alan De Gooyer, Lecturer in English; 1987, B.A., Colorado State University, 1991, M.A., University of Denver, 1994, Ph.D., University of Virginia

Edan Dekel, Chair and Professor of Classics, Chair of Jewish Studies Program; 1996, B.A., Brown University, 1998, M.A., University of California, Berkeley, 2005, Ph.D., University of California, Berkeley; affiliated with: Religion Department

Christine DeLucia, Assistant Professor of History; 2006, A.B., Harvard University, 2009, M.Phil., Yale University, 2012, Ph.D., Yale University

Raquel L. De Souza, Mellon Postdoctoral Fellow in Africana Studies; 2016, Ph.D., University of Texas, Austin

Richard D. De Veaux, Chair & C. Carlisle and Margaret Tippit Professor of Statistics; 1973, A.B., Princeton University, 1980, M.A., Stanford University, 1986, Ph.D., Stanford University

Charles B. Dew, Ephraim Williams Professor of American History; 1958, B.A., Williams College, 1964, Ph.D., Johns Hopkins University; on leave Spring 2020

Phoebe G. Donnelly, Stanley Kaplan Visiting Postdoctoral Fellow in the Department of Political Science and Leadership Studies Program; 2008, B.A., University of Wisconsin, Madison, 2013, M.A., The Fletcher School of Law and Diplomacy, Tufts University, 2018, Ph.D., The Fletcher School of Law and Diplomacy, Tufts University

Charlie Doret, Assistant Professor of Physics; 2002, B.A., Williams College, 2006, A.M., Harvard University, 2010, Ph.D., Harvard University

Georges B. Dreyfus, Jackson Professor of Religion; 1969, B.A., La Chaux-de-Fonds, 1987, M.A., University of Virginia, 1991, Ph.D., University of Virginia; on leave Spring 2020

Helga Druxes, Paul H. Hunn '55 Professor in Social Studies; 1982, B.A., Westfälische Wilhelms University, 1985, M.A., Brown University, 1987, Ph.D., Brown University; on leave Spring 2020

Sara Dubow, Professor of History; 1991, B.A., Williams College, 1996, M.A., University of Massachusetts at Amherst, 2003, Ph.D., Rutgers University

Susan Dunn, Massachusetts Professor of Humanities; , B.A., Smith College, , Ph.D., Harvard University; affiliated with: Leadership Studies Program

David B. Edwards, James N. Lambert '39 Professor of Anthropology; 1975, B.A., Princeton University, 1979, M.A., University of Michigan, 1986, Ph.D., University of Michigan

Holly Edwards, Senior Lecturer in Art; 1975, B.A., Princeton University, 1981, M.A., University of Michigan, 1990, Ph.D., New York University Institute of Fine Arts

Joan Edwards, Samuel Fessenden Clarke Professor of Biology; 1971, B.A., University of Michigan, 1972, M.S., University of Michigan, 1978, Ph.D., University of Michigan

Tomas Ekholm, STINT - Research Scholar; 2000, B.S., Stockholm University, 2005, Ph.D., Royal Institute of Technology, KTH

Radwa M. El Barouni, Visiting Lecturer in Arabic Studies; 1999, B.A., Alexandria University, 2001, M.A., Alexandria University, 2016, M.A., University of Texas, Austin

Brahim El Guabli, Assistant Professor of Arabic Studies; 2005, B.A., Bordeaux III University, 2016, Ph.D., Princeton University

Susan L. Engel, Senior Lecturer in Psychology, The Class of 1959 Director of Program in Teaching; 1980, B.A., Sarah Lawrence College, 1985, Ph.D., City University of New York

Laura D. Ephraim, Associate Professor of Political Science, Chair of Science and Technology Studies; 2000, B.A., Pomona College, 2010, Ph.D., Northwestern University

Amal Equeiq, Assistant Professor of Comparative Literature; 1997, B.A., Hebrew University, 2004, M.A., Tel Aviv University, 2006, M.A., University of Oregon, 2013, Ph.D., University of Washington; affiliated with: Comparative Literature Program; on leave 2019-2020

Pete Farwell, Assistant Professor of Physical Education, Head Cross Country Coach, and Assistant Coach Men's and Women's Track; 1973, B.A., Williams College, 1990, M.A., Central Michigan University

Steven Fein, Professor of Psychology; 1986, A.B., Princeton University, 1991, Ph.D., University of Michigan

Ezra D. Feldman, Visiting Assistant Professor of English; 2002, A.B., Harvard University, 2008, M.F.A., Cornell University, 2017, Ph.D., Cornell University

Ronald L. Feldman, Artist in Residence in Orchestral and Instrumental Activities/Lecturer in Music, Director of the Berkshire Symphony; 1971, B.M., Boston University School for the Arts

Jessica M. Fisher, Associate Professor of English; 1998, B.A., Swarthmore College, 2003, M.A., University of California, Berkeley, 2009, Ph.D., University of California, Berkeley

Stephen Fix, Robert G Scott '68 Professor of English; 1974, B.A., Boston College, 1977, M.A., Cornell University, 1980, Ph.D., Cornell University

Kevin Flaherty, Lecturer in Astronomy and Observatory Supervisor; 2005, B.S., University of Rochester, 2011, Ph.D., University of Arizona; affiliated with: Physics Department

Antonia E. Foias, Professor of Anthropology; 1987, B.A., Harvard University, 1996, Ph.D., Vanderbilt University; on leave 2019-2020

VaNatta S. Ford, Assistant Professor of Africana Studies; 2000, B.S., Illinois State University, 2005, M.Div., Howard University, 2011, Ph.D., Howard University; on leave Fall 2019

Michael Fortunato, Visiting Professor of Economics; 1976, A.B., Columbia University, 1982, M.A., Harvard University, 1984, Ph.D., Harvard University

Caroline O. Fowler, Lecturer in the Graduate Program in Art History; 2012, Ph.D., Princeton University

Soledad Fox, V-Nee Yeh '81 Professor of Spanish and Comparative Literature; 1990, B.A., Sarah Lawrence College, 1997, M.A., City University of New York, 2001, Ph.D., City University of New York; on leave 2019-2020

Jennifer L. French, Chair of Romance Languages and Professor of Spanish; 1995, B.A., College of William and Mary, 1997, M.A., Rutgers University, 2001, Ph.D., Rutgers University

Stephen N. Freund, Professor of Computer Science; 1995, B.S., Stanford University, 1998, M.S., Stanford University, 2000, Ph.D., Stanford University

Alexandra Garbarini, Professor of History; 1994, B.A., Williams College, 1997, M.A., University of California, Los Angeles, 2003, Ph.D., University of California, Los Angeles

Thomas A. Garrity, Webster Atwell Class of 1921 Professor of Mathematics; 1981, B.A., University of Texas, 1981, B.S., University of Texas, 1986, Ph.D., Brown University

Prisca Gayles, Gaius Charles Bolin Fellow in Africana Studies; 2010, B.A., University of Pennsylvania, 2013, M.A., University of South Florida

Amy Gehring, Professor of Chemistry; 1994, B.A., Williams College, 1998, Ph.D., Harvard University, 2002, Postdoctoral Fellow at, Harvard University

William M. Gentry, Professor of Economics; 1986, B.S., Massachusetts Institute of Technology, 1991, Ph.D., Princeton University, 1991, M.A., Princeton University; on leave Fall 2019

Steven B. Gerrard, Professor of Philosophy; 1978, B.A., Amherst College, 1982, M.A., University of Chicago, 1987, Ph.D., University of Chicago

Chris Gibson, Stanley Kaplan Distinguished Visiting Professor of American Foreign Policy; 1986, B.A., Siena College, 1995, M.P.A., Cornell University, 1998, Ph.D., Cornell University

Matthew Gibson, Assistant Professor of Economics; 2005, A.B., Harvard University, 2015, Ph.D., University of California, San Diego; on leave Fall 2019

Lisa A. Gilbert, Associate Professor of Geosciences and Marine Sciences at Williams-Mystic; 1997, A.B., Dartmouth College, 1999, M.S., University of Washington, 2004, Ph.D., University of Washington; affiliated with: Geosciences Department

Meghan K. Gillis, Assistant Professor of Physical Education and Head Coach of Women's Ice Hockey; 2007, B.A., Bowdoin College, 2009, M.S., University of Massachusetts, Amherst

Graham K. Giovanetti, Assistant Professor of Physics; 2006, B.S., College of William and Mary, 2015, Ph.D., University of North Carolina, Chapel Hill

Michael A. Glier, Alexander Falck Class of 1899 Professor of Art; 1976, B.A., Williams College, 1977, M.A., Hunter College City University of New York; on leave 2019-2020

Susan Godlonton, Assistant Professor of Economics; 2003, B.A., University of Cape Town, 2003, B.A., Stellenbosch University, 2007, M.A., University of Cape Town, 2013, Ph.D., University of Michigan

Eva G. Goedhart, Visiting Assistant Professor of Mathematics; 2003, B.S., James Madison University, 2005, Ph.D., Bryn Mawr College

Christopher Goh, Associate Professor of Chemistry, Faculty Fellow of the Davis Center and the Office of Institutional Diversity and Equity; 1989, B.S., University of Durham, 1996, Ph.D., Harvard University; affiliated with: The Davis Center, VP-InstDiversity&Equity Office

Sarah L. Goh, Chair and Professor of Chemistry; 1996, B.S., University of Michigan, 1998, M.S., University of Massachusetts, Amherst, 2004, Ph.D., University of California, Berkeley

Leo Goldmakher, Assistant Professor of Mathematics; 2004, B.A., Princeton University, 2009, Ph.D., University of Michigan; on leave Fall 2019

Barry Goldstein, Visiting Professor of Humanities; 1973, B.S., Union College, 1976, M.S., University of Rochester, 1981, M.D., University of Rochester, 1982, Ph.D., University of Rochester

Matthew A. Gold, Artist in Residence in Percussion and Contemporary Music Performance; 1994, B.M., Northwestern University, 2016, M.M., Shepherd School of Music, Rice University

Ed Gollin, Chair and Professor of Music; 1992, B.S., Massachusetts Institute of Technology, 1995, M.A., Queens College, CUNY, 2000, Ph.D., Harvard University

Marc Gotlieb, Director of the Graduate Program in Art History and Class of 1955 Memorial Professor of Art; 1980, B.A., University of Toronto, 1984, M.A., Johns Hopkins University, 1990, Ph.D., Johns Hopkins University; affiliated with: Art Department

David Gürçay-Morris, Chair and Associate Professor of Theatre; 1996, B.A., Williams College, 2001, M.F.A., University of Washington, Seattle

Daniel R. Greenberg, Assistant Professor of Physical Education and Head Coach of Men's Tennis; 2013, M.Ed., Massachusetts College of Liberal Arts

Kai M. Green, Assistant Professor of Women's, Gender and Sexuality Studies; 2007, B.A., Williams College, 2011, M.A., University of Southern California, 2014, Ph.D., University of Southern California

Wang Guowei, Artist in Residence in Chinese Music Performance and Director of the Williams College Chinese Ensemble

Kim Gutschow, Lecturer in Religion and Anthropology/Sociology; 1988, B.A., Harvard University, 1995, M.A., Harvard University, 1998, Ph.D., Harvard University; affiliated with: Anthropology and Sociology

Catherine Robinson Hall, Associate Professor at Williams-Mystic; 1985, B.A., University of Rhode Island, 1989, J.D., Vermont Law School; affiliated with: Maritime Studies Program

Amie A. Hane, Professor of Psychology, Chair of Public Health; 1996, B.A., University of Maryland, 1999, M.A., University of Maryland, 2002, Ph.D., University of Maryland

Ilana Y. Harris-Babou, Visiting Assistant Professor of Art; 2013, B.A., Yale University, 2016, M.F.A., Columbia University

Pamela E. Harris, Assistant Professor of Mathematics; 2005, B.S., Marquette University, 2008, M.S., University of Wisconsin, Milwaukee, 2012, Ph.D., University of Wisconsin, Milwaukee; on leave 2019-2020

Katie M. Hart, Assistant Professor of Chemistry; 2004, B.S., Haverford College, 2013, Ph.D., University of California, Berkeley; on leave Fall 2019

Laurie Heatherington, Edward Dorr Griffin Professor of Psychology; 1976, B.A., Miami University, 1981, Ph.D., University of Connecticut; on leave Fall 2019

Guy M. Hedreen, Amos Lawrence Professor of Art; 1981, B.A., Pomona College, 1983, M.A., Bryn Mawr College, 1988, Ph.D., Bryn Mawr College

Peter S. Heller, Visiting Professor of Economics; 1967, B.A., Trinity College, 1972, Ph.D., Harvard University

Kris Herman, Assistant Professor of Physical Education, Head Softball Coach; 1986, B.A., Tufts University, 1989, M.A., Tufts University

Man He, Assistant Professor of Chinese; 2000, B.A., Renmin University, 2004, M.A., Seton Hall University, 2009, M.A., Ohio State University, 2015, Ph.D., Ohio State University; on leave Fall 2019

Bethany Hicok, Lecturer in English; 1980, B.A., Russell Sage College, 1990, M.A.T., University of Rochester, 1992, M.A., University of Rochester, 1996, Ph.D., University of Rochester

Jacqueline Hidalgo, Chair of Religion and Associate Professor of Latina/o Studies and Religion; 2000, B.A., Columbia University, 2003, M.A., Union Theological Seminary, 2010, Ph.D., Claremont Graduate University; affiliated with: Latina/o Studies Program

Josh D. Hillman, Lecturer in Physical Education and Head Men's Golf Coach; 2000, B.A., University of Rhode Island

Alan Hirsch, Lecturer in Humanities, Chair of Justice and Law Studies; 1981, B.A., Amherst College, 1985, J.D., Yale University; affiliated with: Justice and Law

Marjorie W. Hirsch, Professor of Music; 1982, B.A., Yale University, 1985, M.Phil., Yale University, 1989, Ph.D., Yale University

Nate D. Hoey, Assistant Professor of Physical Education, Head Women's Track & Field Coach; 2000, B.S., Slippery Rock College

Amy S. Holzapfel, Professor of Theatre; 1996, B.A., Brown University, 2001, M.F.A., Yale School of Drama, 2006, D.F.A., Yale School of Drama; on leave 2019-2020

Kiaran Honderich, Chair and Lecturer in Women's, Gender and Sexuality Studies; 1983, B.A., Oxford University, 1984, M.A., Columbia University, 1991, Ph.D., University of Massachusetts, Amherst; affiliated with: Public Health Program

Scott D. Honecker, Assistant Professor of Physical Education and Head Coach of Wrestling; 2010, B.S., East Carolina University

Catherine N. Howe, Lecturer in Art; 1997, B.A., Barnard College, 2005, M.A., University of California, Santa Barbara, 2012, Ph.D., University of California, Santa Barbara

Nicolas C. Howe, Associate Professor of Environmental Studies and Faculty Affiliate in Anthropology and Sociology; 1998, B.A., Columbia University, 2003, M.A., University of California, Los Angeles, 2009, Ph.D., University of California, Los Angeles; affiliated with: Anthropology and Sociology, American Studies Program; on leave 2019-2020

Iris Howley, Assistant Professor of Computer Science; 2008, B.S., Drexel University, 2012, Ph.D., Carnegie Mellon University

Vivian L. Huang, Assistant Professor of Women's, Gender, and Sexuality Studies; 2008, B.A., University of California, Berkeley, 2008, B.A., University of California, Berkeley, 2009, M.A., New York University, 2016, Ph.D., New York University

Jeffrey I. Israel, Associate Professor of Religion; 1999, B.A., Oberlin College, 2001, M.A., University of Chicago, 2011, Ph.D., University of Chicago

Olesya Ivantsova, Visiting Lecturer in the Graduate Program in Art History; 2002, Ph.D., Ulyanovsk State University

Vladimir Ivantsov, Visiting Assistant Professor of Russian; 2018, Ph.D., McGill University

Galen E Jackson, Assistant Professor of Political Science; 2009, B.A., Williams College, 2010, M.A., University of Chicago, 2016, Ph.D., University of California, Los Angeles

Frank Jackson, Visiting Assistant Professor of Art; 1984, B.F.A., Virginia Commonwealth University, 1990, M.F.A., University of California, Davis

Sarah A. Jacobson, Associate Professor of Economics; 1998, B.S., Harvey Mudd College, 2005, M.A., Georgia State University, 2010, Ph.D., Georgia State University

Joy A. James, Ebenezer Fitch Professor of Humanities; 1980, B.A., St. Mary's University, San Antonio, 1982, M.A., Fordham University, 1987, Ph.D., Fordham University; affiliated with: Political Science Department; on leave Fall 2019

Ju-Yu Scarlett Jang, Professor of Art; 1969, B.A., National Cheng-Chih University, 1984, M.A., University of California, Berkeley, 1989, Ph.D., University of California, Berkeley; affiliated with: Asian Studies Department

Bill K. Jannen, Assistant Professor of Computer Science; 2009, B.A., Williams College, 2017, Ph.D., Stony Brook University

Anne Jaskot, Assistant Professor of Astronomy; 2008, B.A., Williams College, 2014, Ph.D., University of Michigan, Ann Arbor; affiliated with: Physics Department

Katharine E. Jensen, Assistant Professor of Physics; 2004, A.B., Princeton University, 2013, Ph.D., Harvard University

Cathy M. Johnson, James Phinney Baxter III Professor of Political Science; 1979, B.A., Dartmouth College, 1986, Ph.D., University of Michigan; on leave Spring 2020

Stewart D. Johnson, Professor of Mathematics; 1979, B.A., Fort Lewis College, 1985, Ph.D., Stanford University; on leave Fall 2019

Walter Johnston, Lecturer in English; 2002, B.A., Bard College, 2007, M.A., Princeton University, 2012, Ph.D., Princeton University

Kevin M. Jones, William Edward McElfresh Professor of Physics; 1977, B.A., Williams College, 1983, Ph.D., Stanford University

Peter Just, Professor of Anthropology; 1972, B.A., University of Chicago, 1979, M.A., University of Pennsylvania, 1986, Ph.D., University of Pennsylvania

Shinko Kagaya, Professor of Japanese; 1989, B.A., Aoyama Gakuin University, 1991, M.A., Ohio State University, 1999, Ph.D., Ohio State University; on leave Spring 2020

William Kangas, Assistant Professor of Physical Education and Head Men's Ice Hockey Coach; 1982, B.A., University of Vermont, 1994, M.Ed., Massachusetts College of Liberal Arts

Aparna Kapadia, Associate Professor of History; 1998, B.A., St. Xavier's College, Mumbai University, 2001, M.A., Jawaharlal Nehru University, 2005, M.Phil., Jawaharlal Nehru University, 2010, Ph.D., University of London; affiliated with: Asian Studies Department

Anuj Kapoor, Visiting Assistant Professor of English; 2007, B.A., Columbia University, 2019, Ph.D., University of Virginia

Paul M. Karabinos, Charles L. MacMillan Professor in Natural Sciences; 1975, B.S., University of Connecticut, 1981, Ph.D., Johns Hopkins University

Catherine Kealhofer, Assistant Professor of Physics; 2003, A.B., Princeton University, 2013, Ph.D., Stanford University; on leave 2019-2020

Christi L. Kelsey, Assistant Professor of Physical Education and Head Women's Volleyball Coach; 2000, B.S., Purdue University, 2012, M.S., Northeastern University

Kathryn R. Kent, Chair and Professor of English; 1988, B.A., Williams College, 1993, M.A., Duke University, 1996, Ph.D., Duke University

Susanne Ryuyin Kerekes, Gaius Charles Bolin Fellow in Religion and Asian Studies; 2007, B.A., DePauw University, 2012, M.A., Mahidol University, 2018, Ph.D., University of Pennsylvania; affiliated with: Asian Studies Department

Savan Kharel, Visiting Assistant Professor of Physics; 2008, B.S., Indiana University, 2014, Ph.D., University of Tennessee

Anthony Y. Kim, Visiting Assistant Professor of American Studies; 2006, B.A., University of California, San Diego, 2013, M.A., University of California, San Diego, 2016, Ph.D., University of California, San Diego

Kris N. Kirby, Professor of Psychology; 1985, B.A., Marshall University, 1991, Ph.D., Harvard University; on leave Fall 2019

Roger A. Kittleson, Professor of History; 1985, B.A., Northwestern University, 1989, M.A., Stanford University, 1990, M.A., University of Wisconsin, Madison, 1997, Ph.D., University of Wisconsin, Madison; affiliated with: Latina/o Studies Program

John E. Kleiner, Professor of English; 1983, B.A., Amherst College, 1985, M.S., Cornell University, 1988, M.A., Stanford University, 1991, Ph.D., Stanford University

Bernhard Klingenberg, Professor of Statistics; 1996, B.A., Technical University, Graz, Austria, 1998, M.S., Technical University, Graz, Austria, 2004, Ph.D., University of Florida; on leave 2019-2020

Pia M. Kohler, Assistant Professor of Environmental Studies; 1998, B.S., McGill University, 2001, M.E.S., Yale School of Forestry and Environmental Studies, 2006, Ph.D., Massachusetts Institute of Technology

Thomas A. Kohut, Sue and Edgar Wachenheim III Professor of History; 1972, B.A., Oberlin College, 1975, M.A., University of Minnesota, 1983, Ph.D., University of Minnesota, 1984, Graduate, Cincinnati Psychoanalytic Institute

Pramila Kolekar, Visiting Lecturer in the Graduate Program in Art History; 2018, Ph.D., Boston College

Christophe A. Kone, Assistant Professor of German; 2006, M.A., Universite Lumiere Lyon 2, 2013, Ph.D., Rutgers University

Nate Kornell, Associate Professor of Psychology; 1996, B.A., Reed College, 2001, M.A., Columbia University, 2005, Ph.D., Columbia University

Cornelius C. Kubler, Stanfield Professor of Asian Studies; 1972, B.A., Cornell University, 1975, M.A., Cornell University, 1978, M.A., National Taiwan University, 1981, Ph.D., Cornell University; on leave 2019-2020

Joanna Kurkowicz, Lyell B. Clay Artist in Residence, Violin and Concertmaster, Berkshire Symphony; 1992, M.M., J. Paderewski Conservatory of Music, Poland, 1994, M.M., University of Massachusetts, Amherst, 1998, A.D., New England Conservatory, Boston

Steven Kuster, Assistant Professor of Physical Education and Head Swim Coach; 1993, B.A., University of Pennsylvania, 1999, M.Ed., Harvard University

Kenneth N. Kuttner, Robert F. White Class of 1952 Professor of Economics; 1982, B.A., University of California, Berkeley, 1989, Ph.D., Harvard University

Sara LaLumia, Professor of Economics, Chair of Political Economy Program; 2000, B.A., Youngstown State University, 2006, Ph.D., University of Michigan

Edwin Lawrence, Artist Associate in Harpsichord, Piano and Organ and Lecturer in Music; 1969, B.M., State University of New York, Fredonia

Tim J. Lebestky, Associate Professor of Biology, Chair of Neuroscience Program; 1995, B.S., University of Kansas, 2002, Ph.D., University of California, Los Angeles

Alice Lee, Assistant Professor of Physical Education and Head Women's Lacrosse Coach; 2009, B.S., Central Connecticut State University, 2015, M.S., University of Massachusetts, Amherst

Joel Lee, Assistant Professor of Anthropology; 1998, B.A., Kenyon College, 2008, M.A., Columbia University, 2015, Ph.D., Columbia University; on leave Fall 2019

Jason Lemieux, Assistant Professor of Physical Education and Head Nordic Ski Coach; 2001, B.A., Williams College

William J. Lenhart, A. Barton Hepburn Professor of Computer Science; 1977, B.S., Saint Josephs College, 1979, M.A., Dartmouth College, 1983, Ph.D., Dartmouth College; on leave Spring 2020

Anne R. Leonard, Lecturer in the Graduate Program in Art History; 2003, Ph.D., Harvard University

Neil Leonard, Arthur Levitt, Jr. '52 Artist-in-Residence; 2001, M.M., New England Conservatory of Music

Kelsey Levine, Assistant Professor of Physical Education and Head Alpine Ski Coach; 2010, B.A., Williams College

Zafi Levy, Assistant Professor of Physical Education and Head Squash Coach; 2001, B.A., Williams College

Michael J. Lewis, Faison-Pierson-Stoddard Professor of Art History; 1980, B.A., Haverford College, 1989, Ph.D., University of Pennsylvania

Scott Lewis, Assistant Professor of Physical Education and Director of Outing Club; 1980, B.S., Springfield College, 1985, M.Ed., Springfield College

Tat-siong B. Liew, Croghan Bicentennial Professor in Biblical and Early Christian Studies

John K. Limon, John J Gibson Professor of English; 1974, B.A., Harvard University, 1981, Ph.D., University of California, Berkeley

Haydee M. A. Lindo, Assistant Professor of Mathematics; 2008, B.A., Williams College, 2012, M.S., University of Nebraska, 2016, Ph.D., University of Utah

Rob Livingstone, Lecturer in Physical Education, Head Strength and Conditioning Coach; 2000, B.S., Jacksonville State University

David W. Loehlin, Assistant Professor of Biology; 2003, A.B., University of Chicago, 2011, Ph.D., University of Rochester

Susan R. Loepp, Professor of Mathematics; 1989, B.S., Bethel College, 1989, B.A., Bethel College, 1994, Ph.D., University of Texas; on leave 2019-2020

Gretchen Long, Professor of History, Faculty Fellow of the Davis Center and the Office of Institutional Diversity and Equity; 1989, B.A., Wesleyan University, 1994, M.A., University of Chicago, 2003, Ph.D., University of Chicago; affiliated with: The Davis Center, VP-InstDiversity&Equity Office

David A. Love, Provost, Class of 1969 Professor of Economics; 1996, B.A., University of Michigan, 1998, M.A., Yale University, 2003, Ph.D., Yale University; affiliated with: Economics Department

Kimberly S. Love, Assistant Professor of English; 2010, B.A., Tuskegee University, 2017, Ph.D., University of Virginia

Peter D. Low, Professor of Art; 1994, B.A., University of Toronto, 1995, M.A., Johns Hopkins University, 2001, Ph.D., Johns Hopkins University

Daniel V. Lynch, Philip and Dorothy Schein Professor of Biology; 1979, B.S., University of Massachusetts, Lowell, 1983, Ph.D., University of Texas, Austin

Michael D. MacDonald, Frederick L. Schuman Professor of International Relations; 1972, B.A., University of California, Berkeley, 1974, M.A., University of California, Berkeley, 1983, Ph.D., University of California, Berkeley

Jenna MacIntire, Lecturer in Chemistry; 1992, B.A., University of Vermont

Alicia C. Maggard, Postdoctoral Fellow in Maritime History; 2010, B.A., Willamette University, 2014, M.A., Brown University, 2018, Ph.D., Brown University

James E. Mahon, Woodrow Wilson Professor of Political Science, Chair of Advisory Committee on Shareholder Responsibility; 1977, B.A., Dartmouth College, 1983, M.A., University of California, Berkeley, 1989, Ph.D., University of California, Berkeley

Protik K. Majumder, Barclay Jermain Professor of Natural Philosophy; 1982, B.S., Yale University, 1989, Ph.D., Harvard University

Marc Mandel, Assistant Professor of Physical Education and Head Men's Crew Coach; 1998, B.A., Northwestern University, 2012, M.B.A., Georgetown University

Maud Mandel, President, Professor of History; affiliated with: History Department

James A. Manigault-Bryant, Professor of Africana Studies and Faculty Affiliate in Anthropology and Sociology and Religion; 1995, B.A., Tulane University, 2002, Ph.D., Brown University; affiliated with: Religion Department, Anthropology and Sociology; on leave 2019-2020

Rhon S. Manigault-Bryant, Associate Professor of Africana Studies and Faculty Affiliate in Religion; 1999, A.B., Duke University, 2002, M.Div., Emory University, 2007, Ph.D., Emory University; on leave 2019-2020

Patricia Manning, Assistant Professor of Physical Education and Head Women's Basketball Coach; 1977, B.S., State University of New York, Cortland, 1981, M.S., State University of New York, Cortland, 1988, M.S., Smith College

Luana S. Maroja, Associate Professor of Biology, Chair of Biochemistry Program; 1999, B.S., Universidade Federal do Rio de Janeiro, 2001, M.S., Universidade Federal do Rio de Janeiro, 2008, Ph.D., Cornell University

Brian Martin, Professor of French & Comparative Literature; 1993, A.B., Harvard University, 1996, M.A., University of California, Los Angeles, 1999, A.M., Harvard University, 2003, Ph.D., Harvard University; on leave Spring 2020

Laura J. Martin, Assistant Professor of Environmental Studies and Faculty Affiliate in History; 2006, S.B., Brown University, 2010, M.S., Cornell University, 2015, Ph.D., Cornell University; affiliated with: History Department

Martha Marvin, Lecturer in Neuroscience; 1984, B.A., University of California, Berkeley, 1995, Ph.D., Massachusetts Institute of Technology

Aleksandar Matovski, Visiting Assistant Professor of Political Science; 2015, Ph.D., Cornell University

James McAllister, Chair of Leadership Studies & Fred Greene Third Century Professor of Political Science; 1986, B.A., State University of New York, Buffalo, 1989, M.A., Columbia University, 1999, Ph.D., Columbia University; affiliated with: Leadership Studies Program

Samuel McCauley, Assistant Professor of Computer Science; 2010, B.S., Tufts University, 2016, Ph.D., Stony Brook University

George McCormack, Assistant Professor of Physical Education, Head Men's Lacrosse Coach; 1987, B.S., Ithaca College, 2007, M.Ed., Boston University

Mark T. McDonough, Lecturer in Physical Education, Assistant Football Coach; 2002, B.S., Ithaca College

Elizabeth P. McGowan, Chair and Robert Sterling Clark Professor of Art; 1979, B.A., Princeton University, 1981, M.A., New York University Institute of Fine Arts, 1983, Ph.D., New York University Institute of Fine Arts

Keith E. McPartland, Associate Professor of Philosophy; 1994, B.A., Rutgers University, 1998, M.A., Cornell University, 2007, Ph.D., Cornell University

Gage C. McWeeny, Professor of English; 1993, B.A., Columbia University, 1998, M.A., Princeton University, 2003, Ph.D., Princeton University; affiliated with: Oakley Ctr for Human & Soc Sci

Brittany Meché, Gaius Charles Bolin Fellow in the Environmental Studies Program

Lisa Melendy, Chair, Director of Athletics and Assistant Professor in Physical Education; 1982, A.B., Smith College, 1985, M.S., University of Massachusetts, Amherst

Carolina Melgarejo-Torres, Visiting Assistant Professor of Spanish; 2008, B.A., Universidad Nacional Autónoma de México, 2012, M.A., El Colegio de México, , Ph.D.(c), (candidate) El Colegio de México, Linguistics

Nicole E. Mellow, Professor of Political Science; 1992, B.A., Vassar College, 2003, Ph.D., University of Texas at Austin; affiliated with: Leadership Studies Program

April Merleaux, Visiting Assistant Professor of Environmental Studies; 1995, B.A., Reed College, 2002, M.S., Tufts University, 2007, M.Phil., Yale University, 2010, Ph.D., Yale University

Karen R. Merrill, Frederick Rudolph '42 - Class of 1965 Professor of American Culture; 1986, B.A., Oberlin College, 1988, M.A., University of Denver, 1994, Ph.D., University of Michigan

Olivier Meslay, Lecturer in the Graduate Program in Art History; 1981, B.A., Sorbonne University, 1982, M.A., Sorbonne University

Brian E. Messier, Artist in Residence in Winds and Director of the Wind Ensemble; 2003, B.M., Ithaca College, 2011, M.M., University of Massachusetts, 2014, D.M., University of Minnesota

Carolyn D. Miles, Assistant Professor of Physical Education and Associate Director/Student Athlete Services; 1998, B.S., University of New Hampshire, 2008, M.S., Columbia University

Steven J. Miller, Professor of Mathematics; 1996, B.S., Yale University, 1998, M.A., Princeton University, 2002, Ph.D., Princeton University

Marion Min-Barron, Visiting Assistant Professor; 2002, B.A., Middlebury College, 2010, M.S., Tufts Friedman School of Nutrition Science & Policy, 2010, M.P.H., Tufts School of Medicine, 2016, Ph.D., Tufts Friedman School of Nutrition Science & Policy

Gregory C. Mitchell, Associate Professor of Women's, Gender and Sexuality Studies and Faculty Affiliate in Anthropology/Sociology, Chair of Women's, Gender, and Sexuality Studies; 2000, B.S., Illinois State University, 2001, M.S., Illinois State University, 2007, M.A., University of Chicago, 2012, Ph.D., Northwestern University; affiliated with: Anthropology and Sociology; on leave 2019-2020

Bojana Mladenovic, Professor of Philosophy; 1984, B.A., University of Belgrade, 1987, M.A., McGill University, 1996, Ph.D., University of California, Berkeley

Michele Monserrati, Visiting Assistant Professor of Comparative Literature and Romance Languages; 2009, M.A., Rutgers University, 2012, Ph.D., Rutgers University; affiliated with: Romance Languages Department

Peter J. Montiel, Fairleigh S. Dickinson, Jr. '41 Professor of Economics; 1973, Ph.D., Massachusetts Institute of Technology, 1973, B.A., Yale University; on leave Spring 2020

Manuel A. Morales, Professor of Biology; 1994, A.B., Kenyon College, 1999, Ph.D., University of Connecticut

Frank Morgan, Visiting Professor of Mathematics; 1974, B.S., Massachusetts Institute of Technology, 1976, M.A., Princeton University, 1977, Ph.D., Princeton University

Ralph E. Morrison, Assistant Professor of Mathematics; 2010, B.A., Williams College, 2015, Ph.D., University of California, Berkeley; on leave 2019-2020

Murad K. Mumtaz, Assistant Professor of Art; 2004, B.F.A., National College of Arts, 2010, M.F.A., Columbia University, 2018, Ph.D., University of Virginia

Ngonidzashe Munemo, Professor of Political Science; 2000, B.A., Bard College, 2001, M.A., Columbia University, 2008, Ph.D., Columbia University; affiliated with: Global Studies; on leave 2019-2020

Tendai Muparutsa, Artist in Residence in African Music Performance, Lecturer in Music, Director of Zambezi, Co-Director of Kusika; 2004, B.A., University of Zimbabwe, 2008, M.M., University of Idaho, 2012, Ph.D., University of Alberta

Peter T. Murphy, John Hawley Roberts Professor of English; 1981, B.A., Yale University, 1986, Ph.D., Johns Hopkins University

Thomas P. Murtagh, John B. McCoy and John T. McCoy Professor of Computer Science; 1974, A.B., Princeton University, 1976, M.S., Cornell University, 1983, Ph.D., Cornell University

Steven E. Nafziger, Professor of Economics; 2000, B.A., Northwestern University, 2002, M.A., Yale University, 2003, M.Phil., Yale University, 2006, Ph.D., Yale University

Lama Nassif, Assistant Professor of Comparative Literature; 1994, B.A., Damascus University, 2007, M.A., Middlebury Institute of International Studies at Monterey, 2014, Ph.D., University of Texas, Austin; affiliated with: Comparative Literature Program; on leave Fall 2019

Eli Nelson, Assistant Professor of American Studies; 2012, B.A., Shimer College, 2013, M.A., Harvard University, 2018, Ph.D., Harvard University

Gail M. Newman, Harold J. Henry Professor of German, Chair of Center for Foreign Languages, Literatures & Cultures; 1976, B.A., Northwestern University, 1981, M.A., University of Minnesota, 1984, Ph.D., University of Minnesota

Shaoyang Ning, Assistant Professor of Statistics; 2013, B.S., Peking University, 2018, Ph.D., Harvard University; affiliated with: Mathematics

Nimu Njoya, Assistant Professor of Political Science; 2002, B.A., Macalester College, 2004, M.A., University of Amsterdam, 2010, Ph.D., Rutgers University

James L. Nolan, Chair and Washington Gladden 1859 Professor of Sociology; 1984, B.A., University of California, Davis, 1992, M.A., University of Virginia, 1995, Ph.D., University of Virginia

Christopher M. B. Nugent, Professor of Chinese, Chair of Comparative Literature Program; 1991, B.A., Brown University, 2004, Ph.D., Harvard University

Will Olney, Associate Professor of Economics; 2002, B.A., Wesleyan University, 2010, Ph.D., University of Colorado; on leave 2019-2020

Sarah E. Olsen, Assistant Professor of Classics; 2008, B.A., Wellesley College, 2010, M.A., University of California, Berkeley, 2016, Ph.D., University of California, Berkeley

Ianna Hawkins Owen, Assistant Professor of English; 2008, B.A., City University of New York, Hunter College, 2010, M.A., University of California, Berkeley, 2016, Ph.D., University of California, Berkeley

Allison Pacelli, Professor of Mathematics; 1997, B.S., Union College, 2003, Ph.D., Brown University

Janine Parker, Artist-in-Residence in Dance

Lee Y. Park, William R. Kenan, Jr. Professor of Chemistry; 1986, B.A., Wellesley College, 1992, Ph.D., Massachusetts Institute of Technology

Paul C. Park, Senior Lecturer in English; 1975, B.A., Hampshire College; affiliated with: Graduate Program-Art History

Jay M. Pasachoff, Chair and Field Memorial Professor of Astronomy; 1963, A.B., Harvard University, 1965, A.M., Harvard University, 1969, Ph.D., Harvard University, 1970, Postdoctoral Research at, Harvard College Observatory, 1972, Postdoctoral Research at, Caltech/Hale Observatories

Darel E. Paul, Professor of Political Science; 1990, B.A., University of Minnesota, 1994, M.A., George Washington University, 2000, Ph.D., University of Minnesota; on leave 2019-2020

Enrique Peacock-López, Halford R Clark Professor of Natural Sciences; 1974, B.S., Universidad Nacional Autonoma de Mexico, 1976, M.S., University of California, Riverside, 1982, Ph.D., University of California, San Diego

Lori A. Pedersen, Lecturer in Mathematics; 1982, B.A., The College of Wooster, 1985, M.A., Brown University

Julie Pedroni, Lecturer in Philosophy; 1986, B.A., Wells College, 1999, Ph.D., Georgetown University; affiliated with: Ctr-Environmental Studies

Peter L. Pedroni, Professor of Economics; 1986, B.A., Miami University, 1993, M.A., Columbia University, 1993, Ph.D., Columbia University

Ileana Perez Velazquez, Professor of Music; 1989, B.M., Higher Institute of Arts, 1995, M.A., Dartmouth College, 1999, D.M.A., Indiana University

James L. Pethica, Senior Lecturer in English and Theatre; 1980, B.A., Oxford University, 1987, Ph.D., Oxford University; affiliated with: Theatre Department; on leave Fall 2019

Greg Phelan, Assistant Professor of Economics; 2007, B.A., Yale University, 2010, M.A., Yale University, 2012, M.Phil., Yale University, 2014, Ph.D., Yale University

Katarzyna M. Pieprzak, Associate Dean of the Faculty, Professor of Francophone Literature, French Language, and Comparative Literature; 1995, B.A., Rice University, 1998, M.A., University of Michigan, 2001, Ph.D., University of Michigan; affiliated with: Romance Languages Department

Shanti Pillai, Assistant Professor of Theatre; 1989, B.A., Stanford University, 1990, M.A., University of California, Berkeley, 2005, Ph.D., New York University

Michelyne Pinard, Assistant Professor of Physical Education and Head Women's Soccer Coach; 1998, B.A., Dartmouth College, 2002, M.S., University of Pennsylvania

Anna M. Plantinga, Assistant Professor of Statistics; 2013, B.S., Calvin College, 2018, Ph.D., University of Washington; affiliated with: Mathematics

Amy D. Podmore, J. Kirk T. Varnedoe '67 Professor of Art; 1982, B.S., State University of New York, Buffalo, 1987, M.F.A., University of California, Davis

Kailani Polzak, Assistant Professor of Art; 2007, B.A., University of California, Santa Cruz, 2017, Ph.D., University of California, Berkeley

Lindsay S. Pope, Visiting Director of Choral/Vocal Activities; 2007, B.A., Mount Holyoke College, 2011, M.M., Westminster Choir College of Rider University, 2019, D.M.A., University of North Texas

Daniel E. Prindle, Visiting Instructor in Music; 2003, B.M., Berklee College of Music, 2011, M.M., University of Massachusetts, Amherst

Tim J. Pusack, Assistant Professor at Williams-Mystic; 2005, B.A., Colgate University, 2013, Ph.D., Oregon State University

Christopher L. Pye, Class of 1924 Professor of English; 1975, B.A., Oberlin College, 1977, M.A., University College, 1984, Ph.D., Cornell University; on leave Spring 2020

Ashok S. Rai, Associate Professor of Economics; 1992, B.A., Stanford University, 1997, Ph.D., University of Chicago

Bob Rawle, Assistant Professor of Chemistry; 2008, B.A., Pomona College, 2014, Ph.D., Stanford University

Mark R. Raymond, Assistant Professor of Physical Education and Head Coach of Football

Anjuli F. Raza Kolb, Associate Professor of English; 2003, B.A., Columbia College, 2006, M.A., Columbia University, 2008, M.Phil., Columbia University, 2013, Ph.D., Columbia University; on leave 2019-2020

Anne Reinhardt, Chair and Professor of History; 1990, B.A., Harvard University, 1994, M.A., University of California, Berkeley, 2002, Ph.D., Princeton University

Mark T. Reinhardt, Chair and Class of 1956 Professor of American Civilization; 1983, B.A., Wesleyan University, 1991, Ph.D., University of California, Santa Cruz; affiliated with: American Studies Program

Bernard J. Rhie, Associate Professor of English; 1997, B.A., University of California, Berkeley, 2001, M.A., University of Pennsylvania, 2005, Ph.D., University of Pennsylvania

David P. Richardson, William R. Kenan, Jr. Professor of Chemistry; 1979, B.S., University of Michigan, 1984, Ph.D., University of California, Berkeley, 1986, Postdoctoral Research at, Cornell University; on leave Fall 2019

Neil Roberts, Chair and Associate Professor of Africana Studies and Faculty Affiliate in Political Science and Religion; 1998, B.A., Brown University, 2003, M.A., University of Chicago, 2007, Ph.D., University of Chicago; affiliated with: Religion Department, Political Science Department

Shivon A. Robinson, Assistant Professor of Psychology; 2011, B.A., Williams College, 2016, Ph.D., University of Pennsylvania

Shantee Rosado, U.S. Afro-Latinidades Fellow In Latina and Latino Studies; 2009, B.A., Macalester College, 2013, M.A., University of Pennsylvania

Nelly A. Rosario, Associate Professor of Latina/o Studies; 1994, S.B., Massachusetts Institute of Technology, 1998, M.F.A., Columbia University

Shawn J. Rosenheim, Professor of English, Chair of Campus Environmental Committee; 1985, B.A., Oberlin College, 1988, M.A., Yale University, 1993, Ph.D., Yale University

Jennifer K. Rosenthal, Instructor in Chemistry

Leyla Rouhi, Preston S. Parish '41 Third Century Professor of Romance Languages; 1987, B.A., Oxford University, 1988, M.A., Harvard University, 1995, Ph.D., Harvard University

Marketa Rulikova, Visiting Assistant Professor of Sociology; 1996, B.A., University of Pardubice, 1997, M.A., Central European University, 2001, Ph.D., Polish Academy of Science

Sophie F. Saint-Just, Assistant Professor of French and Francophone Studies; 1991, B.A., La Sorbonne Nouvelle (Paris III), 1994, M.A., La Sorbonne Nouvelle (Paris III), 2004, M.Phil., City University of New York, 2013, Ph.D., City University of New York; on leave 2019-2020

Michael Samson, Senior Lecturer in Economics; 1983, B.A., Yale University, 1994, Ph.D., Stanford University

Alberto Sandoval-Sanchez, Bennett Boskey Visiting Professor of Latina/o Studies

Marlene J. Sandstrom, Dean of the College, Hales Professor of Psychology; 1991, B.A., Yale University, 1993, M.A., Duke University, 1996, Ph.D., Duke University; affiliated with: Psychology Department

Noah J. Sandstrom, Chair and Professor of Psychology; 1994, B.A., Knox College, 1997, M.A., Duke University, 1999, Ph.D., Duke University

Omar A. Sangare, Professor of Theatre; 1993, M.F.A., The Theatre Academy, 2006, Ph.D., The Theatre Academy

Robert M. Savage, Professor of Biology; 1987, B.A., Bowdoin College, 1993, Ph.D., Wesleyan University

Kenneth K. Savitsky, Professor of Psychology; 1993, B.A., Indiana University, 1997, Ph.D., Cornell University

Jana Sawicki, Chair of Philosophy and Morris Professor of Rhetoric; 1974, B.A., Sweet Briar College, 1978, M.A., Columbia University, 1983, Ph.D., Columbia University

Kirsten L. Scheid, Clark Oakley Fellow

Lucie Schmidt, Professor of Economics and Director of the Williams-Exeter Programme at Oxford University; 1993, A.B., Smith College, 1997, M.A., University of Michigan, 2003, Ph.D., University of Michigan; affiliated with: Williams-Exeter Prg at Oxford

Pallavi Sen, Assistant Professor of Art; 2016, M.F.A., Virginia Commonwealth University

Eun Young Seong, Visiting Assistant Professor of Japanese; 2019, Ph.D., University of California, Irvine

Justin B. Shaddock, Assistant Professor of Philosophy; 2004, B.A., University of Notre Dame, 2011, Ph.D., University of Chicago; on leave 2019-2020

Cheryl Shanks, Professor of Political Science; 1983, B.A., University of California, Santa Cruz, 1988, M.A., University of Michigan, 1994, Ph.D., University of Michigan; on leave Fall 2019

Kelly A. Shaw, Associate Professor of Computer Science; 1997, B.S., Duke University, 2005, Ph.D., Stanford University

James R. Shepard, J. Leland Miller Professor of American History, Literature, and Eloquence; 1978, B.A., Trinity College, 1980, M.F.A., Brown University; on leave Fall 2019

Karen L. Shepard, Senior Lecturer in English; 1987, B.A., Williams College, 1992, M.F.A., University of Houston; on leave Fall 2019

Stephen C. Sheppard, Class of 2012 Professor of Economics; 1977, B.S., University of Utah, 1979, M.A., Washington University, 1984, Ph.D., Washington University

W. Anthony Sheppard, Marylin & Arthur Levitt Professor of Music; 1991, B.A., Amherst College, 1993, M.F.A., Princeton University, 1996, Ph.D., Princeton University; on leave Fall 2019

Olga Shevchenko, Professor of Sociology; 1996, B.A., Moscow State University, 1997, M.A., Central European University, 2002, Ph.D., University of Pennsylvania; on leave 2019-2020

Grant Shoffstall, Visiting Assistant Professor of Sociology; 2002, B.A., Illinois State University, 2006, M.A., Illinois State University, 2014, Ph.D., University of Illinois

Lara D. Shore-Sheppard, Chair and Kimberly A. '96 and Robert R. '62 Henry Professor of Economics; 1991, B.A., Amherst College, 1993, M.A., Princeton University, 1996, Ph.D., Princeton University

Cesar E. Silva, Hagey Family Professor of Mathematics; 1977, B.S., Catholic University of Peru, 1979, M.A., University of Rochester, 1984, Ph.D., University of Rochester; on leave 2019-2020

Christina E. Simko, Assistant Professor of Sociology; 2005, B.A., Bridgewater College, 2007, M.A., University of Virginia, 2013, Ph.D., University of Virginia

Jason Simms, Visiting Lecturer in Theatre; 2005, B.F.A., Cornish College of the Arts, 2009, M.F.A., New York University, Tisch School of the Arts

Shikha Singh, Assistant Professor of Computer Science; 2013, M.S., Indian Institute of Technology, 2018, Ph.D., Stony Brook University

Eiko Maruko Siniawer, Professor of History; 1997, B.A., Williams College, 1999, M.A., Harvard University, 2003, Ph.D., Harvard University; affiliated with: Asian Studies Department; on leave Spring 2020

Yana Skorobogatov, Assistant Professor of History; 2009, B.A., University of California, Berkeley, 2012, M.A., University of Texas, Austin, 2018, Ph.D., University of California, Berkeley

Laura Smalarz, Assistant Professor of Psychology; 2008, B.A., San Diego State University, 2011, M.S., Iowa State University, 2015, Ph.D., Iowa State University; on leave 2019-2020

David L. Smith, John W Chandler Professor of English; 1974, B.A., New College, 1975, M.A., University of Chicago, 1980, Ph.D., University of Chicago

Matthew J. Smith, Sterling Brown '22 Visiting Professor of Africana Studies; 2002, Ph.D., University of Florida

Thomas E. Smith, Professor of Chemistry; 1988, B.A., Williams College, 1996, Ph.D., Stanford University, 1998, Postdoctoral Fellow at, Harvard University

Ben Snyder, Assistant Professor of Sociology; 2003, B.A., Haverford College, 2007, M.A., University of Virginia, 2013, Ph.D., University of Virginia

Greta F. Snyder, Visiting Assistant Professor of Women's, Gender, and Sexuality Studies; 2003, B.A., Haverford College, 2007, M.A., University of Virginia, 2011, Ph.D., University of Virginia

Anita R. Sokolsky, Professor of English; 1974, B.A., Oberlin College, 1979, M.A., Cornell University, 1983, Ph.D., Cornell University

Stefanie Solum, Professor of Art; 1991, B.A., University of Wisconsin, Madison, 1995, M.A., University of California, Berkeley, 2001, Ph.D., University of California, Berkeley

Stephanie J. Steele, Visiting Assistant Professor of Psychology; 2007, B.A., Smith College, 2012, M.A., Suffolk University, 2017, Ph.D., Suffolk University

Doris J. Stevenson, Lyell B. Clay Artist in Residence, Piano; 1967, B.M., Arizona State University, 1969, M.M., University of Southern California

Mihai Stoiciu, Professor of Mathematics; 2005, Ph.D., California Institute of Technology

Jason Josephson Storm, Professor of Religion; 1999, B.A., Hampshire College, 2001, M.A., Harvard University, 2006, Ph.D., Stanford University; on leave 2019-2020

Frederick W. Strauch, Chair and Associate Professor of Physics; 1998, B.S., Loyola College, 2004, Ph.D., University of Maryland, 2007, Postdoctoral Associate, National Institute of Standards and Technology

Laura R. Strauch, Lecturer in Chemistry; 1999, B.S., Loyola College

Catherine B. Stroud, Associate Professor of Psychology; 2002, B.A., University of Wisconsin, Madison, 2006, M.A., State University of New York, Stony Brook, 2009, Ph.D., State University of New York, Stony Brook

Erin Sullivan, Assistant Professor of Physical Education, Head Men's Soccer Coach; 1996, B.A., Williams College, 2006, M.B.A., Western New England College

Matthew Swagler, Visiting Assistant Professor of History; 2002, B.A., Brown University, 2012, M.Phil., Columbia University, 2017, Ph.D., Columbia University

Anand V. Swamy, Chair of the Executive Committee for the Center for Development Economics and The Willmott Family Third Century Professor of Economics; 1983, B.A., University of Delhi, 1985, M.A., Delhi School of Economics, 1993, Ph.D., Northwestern University

Steven J. Swoap, Professor of Biology; 1990, B.A., Trinity University, 1994, Ph.D., University of California, Irvine

Nana Takeda, Visiting Lecturer in Japanese; 2018, M.A., Waseda University

Munjulika Tarah, Assistant Professor of Dance; 2006, B.A., Randolph College, 2007, M.A., Northwestern University, 2013, Ph.D., Northwestern University

John W. Thoman, J. Hodge Markgraf Professor of Chemistry; 1982, B.A., Williams College, 1987, Ph.D., Massachusetts Institute of Technology

Owen Thompson, Assistant Professor of Economics; 2005, B.A., Evergreen State College, 2013, Ph.D., University of Massachusetts, Amherst

Christian Thorne, Professor of English and Williams-Mystic Faculty Fellow; 1995, B.A., Wesleyan University, 2001, Ph.D., Duke University; affiliated with: Williams-Mystic Program

Ben W. Thuronyi, Assistant Professor of Chemistry; 2007, B.A., Swarthmore College, 2015, Ph.D., University of California, Berkeley

Stephen J. Tifft, Professor of English; 1975, B.A., Harvard University, 1976, M.A., Cornell University, 1984, Ph.D., Cornell University

Lynne Tillman, Robert Sterling Clark Visiting Professor of Art History

Claire S. Ting, Professor of Biology; 1986, B.A., Yale University, 1989, M.S., Cornell University, 1994, Ph.D., Cornell University

Matthew Tokeshi, Assistant Professor of Political Science; 2006, B.A., University of California, Berkeley, 2012, M.A., Princeton University, 2016, Ph.D., Princeton University; on leave 2019-2020

Chad M. Topaz, Professor of Mathematics; 1996, A.B., Harvard University, 1997, M.S., Northwestern University, 2002, Ph.D., Northwestern University; on leave Fall 2019

Cécile Tresfels, Assistant Professor of French; 2010, M.A., University of Paris III, 2019, Ph.D., Stanford University

David R. Tucker-Smith, Professor of Physics; 1995, B.A., Amherst College, 2001, Ph.D., University of California, Berkeley, 2003, Postdoctoral Associate, Massachusetts Institute of Technology

Laurie L. Tupper, Assistant Professor of Statistics; 2008, B.A., Swarthmore College, 2013, M.S., Cornell University, 2016, Ph.D., Cornell University; on leave 2019-2020

Amanda K. Turek, Assistant Professor of Chemistry; 2009, B.S., University of Wisconsin, Madison, 2015, Ph.D., Harvard University

Daniel B. Turek, Assistant Professor of Statistics; 2003, B.S., Massachusetts Institute of Technology, 2003, B.S., Massachusetts Institute of Technology, 2004, M.Eng., Massachusetts Institute of Technology, 2013, Ph.D., University of Otago; on leave 2019-2020

Damian Turner, Assistant Professor of Biology; 2004, B.S., Morgan State University, 2010, Ph.D., University of Connecticut Health Center

Elizabeth M. Upton, Assistant Professor of Statistics; 2007, B.S., University of New Hampshire, 2011, M.Ed., Harvard School of Education, 2019, Ph.D., Boston University; affiliated with: Mathematics

Janneke van de Stadt, Chair of German and Russian and Professor of Russian; 1988, B.A., Amherst College, 1994, M.A., University of Wisconsin, Madison, 2000, Ph.D., University of Wisconsin, Madison

Emily Vasiliauskas, Assistant Professor of English; 2007, A.B., Harvard University, 2008, M.Phil., University of Cambridge, Trinity College, 2009, M.A., Warburg Institute, 2015, Ph.D., Princeton University

Tommy Verdell, Assistant Professor of Physical Education, Associate Athletic Director for Inclusion and Compliance; 2018, M.A., Concordia University Irvine

Kate Wachala, Assistant Professor of Physical Education and Head Coach of Women's Crew; 2001, B.A., University of Washington

Zachary Wadsworth, Assistant Professor of Music; 2005, B.M., Eastman School of Music, University of Rochester, 2007, M.M., Yale University, 2012, D.M.A., Cornell University

Chen Wang, Visiting Assistant Professor of Chinese; 2004, B.A., East China Normal University, 2007, M.A., East China Normal University, 2015, M.A., University of Minnesota, Twin Cities, 2019, Ph.D., University of Minnesota, Twin Cities

Dorothy J. Wang, Professor of American Studies; 1985, B.A., Duke University, 1987, M.P.A., Princeton University, 1993, M.A., Johns Hopkins University, 1998, Ph.D., University of California, Berkeley

Chris Waters, Hans W. Gatzke '38 Professor of Modern European History; 1977, B.A., California State University, Long Beach, 1979, M.A., Harvard University, 1985, Ph.D., Harvard University

Tara E. Watson, Professor of Economics; 1996, B.A., Wesleyan University, 2003, Ph.D., Harvard University; on leave Fall 2019

Phillip J. Webster, Visiting Assistant Professor of Religion; 2016, Ph.D., University of Pennsylvania

Brad Wells, Lyell B. Clay Artist in Residence and Director of Choral/Vocal Activities, Lecturer in Music; 1984, B.A., Principia College, 1986, M.M., University of Texas, Austin, 1998, M.M.A., Yale University, 2005, D.M.A., Yale University; on leave 2019-2020

Carmen T. Whalen, Interim Associate Dean for Institutional Diversity and Equity, Carl W. Vogt '58 Professor of History; 1985, B.A., Hampshire College, 1989, M.A., Rutgers University, 1994, Ph.D., Rutgers University; affiliated with: History Department, Latina/o Studies Program

Alan White, Mark Hopkins Professor of Philosophy; 1972, B.A., Tulane University, 1976, M.A., Pennsylvania State University, 1980, Ph.D., Pennsylvania State University

Robert Wiesenberger, Lecturer in the Graduate Program in Art History; 2018, Ph.D., Columbia University

Amanda R. Wilcox, Professor of Classics; 1996, B.A., Reed College, 1999, M.A., University of Pennsylvania, 2002, Ph.D., University of Pennsylvania

Aaron M. Williams, Assistant Professor of Computer Science; 2009, Ph.D., University of Victoria

Heather Williams, William Dwight Whitney Professor of Biology; 1977, A.B., Bowdoin College, 1985, Ph.D., Rockefeller University

Mason B. Williams, Assistant Professor of Leadership Studies and Political Science; 2006, B.A., Princeton University, 2009, M.A., Columbia University, 2012, Ph.D., Columbia University; affiliated with: Political Science Department

Stephen F. Winter, Visiting Lecturer in Art; 1992, B.F.A., School of the Art Institute of Chicago, 1996, M.F.A., New York University Tisch School of the Arts

Bud Wobus, Edna McConnell Clark Professor of Geology; 1962, B.A., Washington University, 1963, M.A., Harvard University, 1966, Ph.D., Stanford University

Scott Wong, Charles R. Keller Professor of History; 1976, B.A., Rutgers University, 1979, M.A., University of Michigan, 1992, Ph.D., University of Michigan

James Wood, Visiting Professor of History; 1968, B.A., Eckerd College, 1973, Ph.D., Emory University, 1985, M.A., Antioch New England Graduate School

Saadia Yacoob, Assistant Professor of Religion; 2003, B.A., American University, 2007, M.A., McGill University, 2015, Ph.D., Duke University; on leave 2019-2020

Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese; 1980, B.A., Aoyama Gakuin University, 1985, M.A., Columbia University, 1994, M.A., Cornell University, 2000, Ph.D., Cornell University; on leave Fall 2019

Li Yu, Professor of Chinese; 1994, B.A., East China Normal University, 1997, M.A., Ohio State University, 2003, Ph.D., Ohio State University

Safa R. Zaki, Professor of Psychology, Chair of Cognitive Science Program; 1989, B.A., American University, 1993, M.A., Arizona State University, 1996, Ph.D., Arizona State University

Betty Zimmerberg, Howard B. Schow '50 and Nan W. Schow Professor of Neuroscience; 1971, B.A., Harvard University, 1976, Ph.D., City University of New York

David J. Zimmerman, Professor of Economics and Orrin Sage Professor of Political Economy; 1985, B.A., University of Toronto, 1987, M.A., Princeton University, 1992, Ph.D., Princeton University

Emeriti Faculty

Marsha Altschuler, Professor of Biology

Henry Art, Director of CES and the Environmental Studies Program, Rosenberg Professor of Environmental Studies and Biology

Donald Beaver, Professor of History of Science

Ilona Bell, Samuel Fessenden Clarke Professor of English

Robert Bell, Frederick Latimer Wells Professor of English

Roger Bolton, William Brough Professor of Economics

Michael Brown, James N. Lambert '39 Professor of Anthropology and Latin American Studies

Kim B. Bruce, Frederick Latimer Wells Professor of Computer Science

Jean-Bernard Bucky, William Dwight Whitney Professor of Arts and Theatre

Lynda Bundtzen, Herbert H. Lehman Professor of English

James Carlton, Professor of Marine Sciences

Phebe Cramer, Professor of Psychology

Stuart Crampton, Barclay Jermain Professor of Natural Philosophy

Andrew Crider, Mary A. & William Wirt Warren Professor Psychology

Robert Dalzell, Fred Rudolph Professor of American Culture

William Darrow, Cluett Professor of Religion

David Dethier, Edward Brust Professor of Geology and Mineralogy

Samuel Edgerton, Amos Lawrence Professor of Art

David Eppel, Professor of Theatre

Ed Epping, Alexander Falck Class of 1899 Professor of Art

Richard Farley, Assistant Professor of Physical Education

Zirka Filipczak, J. Kirk T. Varnedoe '67 Professor of Art

Robert Fisher, Assistant Professor of Physical Education

Peter K. Frost, Frederich L. Schuman Professor of International Relations

George Goethals, Dennis A. Meenan '54 Professor of Leadership Studies

Darra Goldstein, Willcox B. and Harriet M. Adsit Professor of Russian

Suzanne Graver, John Hawley Roberts Professor of English

Fred Greene, A. Barton Hepburn Professor of Government

Eva Grudin, Senior Lecturer in Art

Mark Haxthausen, Robert Sterling Clark Professor of Art History

Meredith Hoppin, Frank M Gagliardi Professor of Classics

John Hyde, Brown Professor of History

Robert Jackall, Willmott Family Third Century Professor Sociology & Public Affairs

Andrew Jaffe, Lyell B. Clay Artist in Residence in Jazz and Senior Lecturer in Music

Graduation

Of the 547 who entered in the fall of 2012, 90% graduated from Williams within 4 years and 95% within 6 years.

Of the 544 who entered in the fall of 2013, 88% graduated from Williams within 4 years and 95% within 6 years.

AFRICANA STUDIES (Div II)

Chair: Associate Professor Neil Roberts

- Rashida K. Braggs, Associate Professor of Africana Studies and Faculty Affiliate in Comparative Literature and American Studies; affiliated with: American Studies Program
- VaNatta S. Ford, Assistant Professor of Africana Studies; on leave 2019-2020
- Prisca Gayles, Gaius Charles Bolin Fellow in Africana Studies
- James A. Manigault-Bryant, Professor of Africana Studies and Faculty Affiliate in Anthropology and Sociology and Religion; affiliated with: Religion Department, Anthropology and Sociology; on leave 2019-2020
- Rhon S. Manigault-Bryant, Associate Professor of Africana Studies and Faculty Affiliate in Religion; on leave 2019-2020
- Rowan Ricardo Phillips, W. Ford Schumann Distinguished Visiting Professor in Democratic Studies
- Neil Roberts, Chair and Associate Professor of Africana Studies and Faculty Affiliate in Political Science and Religion; affiliated with: Religion Department, Political Science Department
- Matthew J. Smith, Sterling Brown '22 Visiting Professor of Africana Studies

GENERAL PROGRAM DESCRIPTION

The Africana Studies Program is an interdisciplinary concentration offering students an in-depth understanding of the history, politics, religion, and culture of peoples of African descent, especially in the Americas. We use music, dance, literature, the arts, and scholarly works to explore the origins of this field of study in the fulcrum of African American and Caribbean movements of resistance. A trans-national program, intellectually influenced by scholars from W. E. B. Du Bois to the present, Africana Studies encourages students to study abroad, and offers travel Winter Study courses designed to expose students to experiential learning settings outside of the classroom.

CONCENTRATION IN AFRICANA STUDIES

Candidates for a concentration in Africana Studies must complete at least five courses listed as Africana courses [note: many Africana courses are cross-listed with departmental offerings; all these are considered Africana Studies courses and can be used to count both for the concentration and for the departmental major of which they are a part]. Two of these five courses are required courses that every concentrator takes. They are the introductory course, AFR 200, normally taken in the sophomore and junior years, but open to all students; and an Africana capstone Senior seminar, normally taken in the senior year, but also open to others at the Professor's discretion. Additional courses may be taken either with our core Africana faculty or with faculty and visiting professors affiliated with the program. However, at least one of these three additional courses must be listed as "Core Electives" which are each designated in the descriptions below as a "Primary Crosslisting." We also encourage students to take at least one course in a program/department other than Africana Studies and consider an experiential learning winter study session. Concentrators are expected to meet with the Chair and/or an Africana core faculty member to plan their concentration.

AFRICANA STUDIES AND OTHER PROGRAMS

Students concentrating in Africana Studies are encouraged to pursue concentrations in American Studies, Environmental Studies, Latina/o Studies, Performance Studies, and Women's, Gender and Sexuality Studies. Many of the courses counted for these concentrations may also earn credit toward the Africana Studies concentration.

REQUIREMENTS

Africana Studies courses required for the concentration:

AFR 200 Introduction to Africana Studies

and one of the following two AFR 400-level Senior Seminar capstone courses (not all 400-level courses meet the requirement for the concentration):

AFR 440(S) CAPSTONE: Performing Blackness

AFR 476 (S) CAPSTONE: Black Radicalism

One core elective:

[AFR 132 / AMST 132 / PSCI 132 Contemporary Africana Social and Political Philosophy](#)

Taught by: [Neil Roberts](#)
[Catalog details](#)

[AFR 140 / COMP 141 Black Autobiography](#)

Taught by: TBA

[Catalog details](#)

[AFR 200\(F, S\)Introduction to Africana Studies](#)

[MUS 225 / AFR 225Musics of the Caribbean](#)

Taught by: [Corinna Campbell](#)
[Catalog details](#)

Two additional electives (a total of three required for the concentration):

Most electives are included below. However, students should check with the program chair to see if other courses not listed here might count as electives toward the concentration.

HONORS PROGRAM IN AFRICANA STUDIES

A student wishing to earn honors must complete an "Honors Dossier" during the Winter Study term and Spring semester of their Senior Year. This Dossier is comprised of three linked essays. Students may begin the project with two essays written for Africana Studies courses and, under their advisor's guidance complete additional research, incorporate instructor feedback, and substantially re-write and expand these two papers. The third essay must be a new work, written specifically for the Honors project. Students must also write a substantive introduction that explains the theme (theoretical, geographic, chronological etc.) that connects the three essays. The introduction should address the significance of the theme to the interdisciplinary study of the peoples and cultures of the African diaspora. It should also explain the logic of the three papers and how they work together. Dossiers will be due in mid-April (after Spring Break). Under some circumstances, a student may want to include a record of a performance or piece of visual art in the Dossier. In this case, a written analysis and explanation should accompany that piece. The total Honors Dossier should consist of no less than 45 pages of written work.

Students should submit a proposal for an Honors Dossier in the fall semester of their Senior year, no later than mid-October. They may draw on papers written in Africana courses during any semester including the fall semester of their Senior Year. Students may petition to include a paper written for a course outside of the Africana curriculum. Africana faculty will meet late in the fall semester to approve or decline Honors Dossier proposals. Students whose proposals are approved will be assigned an advisor and should register for W31-AFR 494 in the winter study/spring of the Senior Year.

At the Honors presentation night in the spring, each Honors student will prepare and give an oral defense of their dossier. During the defense, students will present the key points their overarching project and field questions from select faculty and student critics, all of whom will have read the dossier.

AFR 105 (F) Materials, Meanings, and Messages in the Arts of Africa (DPE)

Cross-listings: AFR 105 ARTH 104

Secondary Cross-listing

This course introduces students to the wealth, power, and diversity of expressive forms that have characterized the arts of Africa and its Diaspora from prehistory to the present. Pulling extensively from the collections at the Williams College Museum of Art and other campus resources, students will not only experience firsthand the wide array of objects that have been produced within this vast geography, but will also come to recognize how multiple senses including sight, sound, smell, and touch play a key role in understanding how these objects work within their respective contexts. As tools of political control, social protest, divine manifestation, and spiritual intervention, these objects and their associated performances also challenge what we might typically consider art in the Western tradition and as such students will be pushed to think beyond such terms in their examinations of these rich creative traditions.

Requirements/Evaluation: three 2-page response papers, class journal on WCMA objects lab, midterm exam and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Art History and African Studies majors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 105 (D2) ARTH 104 (D1)

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of the differences between concepts of art in African and Western traditions, and how this difference has formed the foundation for hierarchies of power within the art world that have long disenfranchised and disempowered artists from the continent. This course highlights this historical platform in order to renovate established biases and assumptions about these objects that position them as 'primitive' or 'exotic' constructs.

Fall 2019

LEC Section: 01 MW 11:00 am - 12:15 pm Michelle M. Apotsos

AFR 113 (S) Musics of Africa

Cross-listings: MUS 120 AFR 113

Secondary Cross-listing

This course introduces a selection of musical cultures from the geographical breadth of Africa. Following an introductory exploration of the fundamental aesthetic and social parameters governing African musical practice, we will engage in a series of case studies considering a diverse array of musical practices and related social and political issues in specific locales. Featured countries include Ghana, Zimbabwe, Ethiopia, Algeria and the Democratic Republic of Congo. This course samples a wide range of musical practices from the Ghanaian dance craze, azonto, to Ethiopian liturgical chants, to Shona mbira music in Zimbabwe. Performance analysis and critical reading and listing assignments are combined with a number of hands-on workshops and musical exercises.

Class Format: discussion

Requirements/Evaluation: grade based on a listening journal, bi-weekly short assignments, a final paper, and class participation

Prerequisites: no prerequisites: prior musical background is not essential for this class

Enrollment Limit: 20

Enrollment Preferences: current or prospective Music majors and Africana Studies concentrators

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

MUS 120 (D1) AFR 113 (D2)

Attributes: GBST African Studies Electives MUS World Music/Ethnomusicology

Not offered current academic year

AFR 126 (F) Black Literature Matters (DPE) (WS)

Cross-listings: ENGL 126 AFR 126 AMST 126

Secondary Cross-listing

Black literature remains central to struggles for freedom and equality across the African diaspora. In this course, we will examine why black literature matters: What are its aesthetic and political imperatives? How have black writers used certain literary forms in their constructions of identity, freedom, and citizenship? Through our exploration of these questions, we will discover the significant matters of African American literature from the Harlem Renaissance moment to the Black Lives Matter movement. By reading a broad range of texts---essays, novels, drama, music, and poetry---by such authors as Alain Locke, Claude McKay, Langston Hughes, Zora Neale Hurston, Richard Wright, James Baldwin, Lorraine Hansberry, Audre Lorde, Amiri Baraka, Nikki Giovanni, Jesmyn Ward, and Kendrick Lamar, we will develop a critical vocabulary for evaluating and engaging with this body of literature. This course contributes to the Difference, Power, and Equity requirement by centering on the relationship between black literature and black political movements from the 1920s to the present.

Requirements/Evaluation: four papers totaling at least 20 pages, active class participation, class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course; Africana Studies concentrators; American Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 126 (D1) AFR 126 (D2) AMST 126 (D1)

Writing Skills Notes: Students will write and receive feedback on four papers. Papers will range from 3 to 7 pages, and feedback will focus on argument/claim development, critical inquiry, and structure.

Difference, Power, and Equity Notes: Through discussions and short essays, students will develop skills for analyzing the role of literature in defining, responding to, and re-shaping issues of race, class, and gender during the Harlem Renaissance, Black Arts and Black Power, and Black Lives Matter movements. Taking its title from the current movement for black lives, a primary objective of this course is for students to develop skills for articulating the value of black aesthetics to social justice movements in the present.

Fall 2019

SEM Section: 01 TR 8:30 am - 9:45 am Gretchen Long

AFR 129 (S) Twentieth-Century Black Poets

Cross-listings: ENGL 129 AFR 129

Secondary Cross-listing

From Langston Hughes to contemporary poets such as Angela Jackson and Claudia Rankine, African American poets have been preoccupied with the relations of poetry to other traditions. Vernacular speech, English poetry, jazz and other musical forms, folk humor, and African mythology have all been seen as essential sources for black poetry. This course will survey major poets such as Hughes, James Weldon Johnson, Countee Cullen, Robert Hayden, Gwendolyn Brooks, Amiri Baraka, Jackson, and Yusef Komunyakaa, reading their poems and their essays and interviews about poetic craft. We will ask how black poetry has been defined and whether there is a single black poetic tradition or several.

Requirements/Evaluation: several short papers, a 15-page final paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level ENGL course

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Attributes: AMST Arts in Context Electives

Spring 2020

SEM Section: 01 MWF 8:30 am - 9:45 am David L. Smith

AFR 132 (F) Contemporary Africana Social and Political Philosophy

Cross-listings: PSCI 132 AFR 132 AMST 132

Primary Cross-listing

This introductory seminar investigates the relationship between three major schools of thought in contemporary Africana social and political philosophy, namely the African, Afro-American, and Afro-Caribbean intellectual traditions. We will discuss a range of thinkers including Aimé Césaire,

Angela Y. Davis, Édouard Glissant, Lewis R. Gordon, Kwame Gyekye, Paget Henry, bell hooks, Charles W. Mills, Nkiru Nzegwu, Lucius Outlaw, Oyèrónke Oyewùmi, Tommie Shelby, and Sylvia Wynter. A primary goal of the course is to provide students with the intellectual resources to decipher problems central to philosophical discourse and to allow students an opportunity to apply what they learn to critical issues in current geopolitics.

Requirements/Evaluation: attendance and participation, two 5- to 7-page essays, and one 10-page final paper

Prerequisites: none; open to all

Enrollment Limit: 15

Enrollment Preferences: first- and second-year students

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

AFR 136 (S) Slavery and the Making of a Literary Tradition

Cross-listings: AFR 136 ENGL 136

Secondary Cross-listing

How has the subject and iconography of slavery continued to preoccupy the American literary and cultural imagination? In this course, we will examine the transatlantic circulation of ideas regarding race, nation, citizenship, self-mastery, agency, and freedom in colonial and antebellum America and consider how these debates have continued to the present. We will read such authors as Phyllis Wheatley, Harriet Jacobs, Harriet Wilson, William Faulkner, Mark Twain, and Toni Morrison. Forms will include poetry, slave narratives, novels, advertisements, broadsides, pamphlets, and other ephemera. We will also view cinematic representations of slavery, such as WGN's *Underground*, the adaptation of Solomon Northrop's *12 Years a Slave*, and Issa Rae's parody "Due North" in *Insecure*.

Requirements/Evaluation: active class participation, four short papers totaling about 20 pages

Prerequisites: first-year students who have not taken or placed out of a 100-level ENGL course

Enrollment Limit: 19

Enrollment Preferences: none

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Cross-listings: COMP 141 AFR 140

Primary Cross-listing

Autobiography--whether slave narrative, memoir, or semi-fictional life account--has served as a primary form of writing for people of African descent. Although primarily understood as a textual means for articulating selfhood, Black autobiographies also ask other questions like: How do Black reflections on the self necessitate critiques of society and culture? How have Black autobiographies been utilized for political mobilization? And, what might a collective analysis of Black autobiographies reveal about changes in conceptions of Black selfhood over time? We will explore these concerns by reading autobiographies across time and space by authors like Ottobah Cugoano, W. E. B. Du Bois, and Alice Walker.

Requirements/Evaluation: class participation, two to three short papers (5- to 7-pages), and a 15- to 20-page paper or multimedia final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first- and second-year students

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 164 (S) Slavery in the American South (WS)

Cross-listings: HIST 164 AFR 164 AMST 165

Secondary Cross-listing

This writing intensive seminar will focus on slavery in the southern United States--one of the most difficult and challenging subjects in this country's history. After looking at several different approaches to North American slavery and examining in depth two of the key primary sources for the study of this institution, students will select an aspect of slavery for intensive research. The rich sources of the Chapin and Sawyer Libraries will be examined to show students the extensive body of materials available on campus for their research projects. Separate class sessions on approaches to research and available research materials held with Lori DuBois, Sawyer reference librarian, and Wayne Hammond, Chapin librarian. Instructor holds individual meetings with each student to help them with the selection of a viable research topic.

Requirements/Evaluation: class discussion, weekly reading summaries, and final 8- to 10-page research paper; in addition to reading key books in the field, students will engage in primary source research using the College library's extensive holdings of microfilm and local records dealing with slavery

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 167 (F) Let Freedom Ring? African Americans and Emancipation (WS)

Cross-listings: AMST 167 AFR 167 HIST 167

Secondary Cross-listing

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and

secondary sources and on the writing process.

Requirements/Evaluation: research paper, short writing assignments, class participation

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 200 (F)(S) Introduction to Africana Studies

This course introduces students to the content and contours of Africana Studies as a vibrant field of knowledge. Through exploration of the genealogy, disciplinary diversity, and evolution of the field, we will examine the depth and range of experiences of African-descended peoples throughout the Americas, the Caribbean, Europe, and Africa. We will also give some attention to how members of the Diaspora remember and encounter Africa, as well as their diverse responses to the history of enslavement, colonialism, apartheid, racism, and globalization. Through materials that embrace both historical and contemporary perspectives, we seek to help students develop critical frameworks for understanding African diasporic experience while simultaneously illuminating disjunctures and challenges for the field. This course features two pedagogical strategies: 1) a rotational, interdisciplinary approach that includes the expertise, methods, and specializations of Africana faculty; and 2) the incorporation of aesthetic materials--film, photography, music, dance, performance, and artwork--to enhance student ability to draw ongoing connections between visual and textual sources covered in the course. Close textual analysis, vibrant debate, and engaging discourse are expected.

Class Format: discussion

Requirements/Evaluation: class participation, weekly reading response papers, two short essays, and a final research project

Prerequisites: none

AFR 201 (S) African Dance and Percussion

Cross-listings: AFR 201 DANC 201 MUS 220

Secondary Cross-listing

We will examine two forms that embody continuity of tradition or the impact of cultural shifts in generations. Lamban was created by the Djeli, popularly called Griots who historically served many roles in traditional society from the Kingdom of Ghana and Old Mali spanning the 12th-current centuries. This dance and music form continues as folklore in modern day Guinea, Senegal, Mali and The Gambia where it was created and practiced by the Mandinka people. Bira is an ancient and contemporary spiritual practice of Zimbabwe's Shona people. Both of these forms are enduring cultural practices while Kpanlogo from the modern West African state of Ghana represents the post-colonial identity of this nation's youth at the end of the 1950s. This course can be taken for academic and/or PE credit

Class Format: class hours will be divided among research and discussion of the dance, percussion, and music of two forms, as well as physical learning and group projects; also includes field trips to view an area performance and the archives at Jacob Pillow

Requirements/Evaluation: discussion of assignments, group response performances, and short research paper. Students enrolled for PE credit are responsible only for the performance-based projects

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: students who have taken DANC 100 or DANC 201; have experience in a campus-based performance ensemble; or have permission of the instructors

AFR 205 (F) She Speaks in Color: Examining the 'Color Complex' in Toni Morrison's Writings

Cross-listings: COMP 236 AFR 205 WGSS 207

Primary Cross-listing

The practice of colorism, or skin color discrimination, is very familiar to people of color globally. Often described as intra-racial racism, colorism within the Black American context is part of the colonial legacy of institutionalized slavery where the vestiges of white supremacy have created color castes among Blacks that still, to this day, have serious consequences for those on the darkest end of the color spectrum. The impact of this practice is far-reaching, influencing everything from romantic partnering, economic and educational attainment, and perceptions of beauty, attractiveness, and criminality. Although the vast majority of colorism scholarship is empirically based, there is much that we can glean from a literary investigation of this practice by analyzing the works of renowned writer, theorist, and folklorist Toni Morrison. Her work is particularly useful in examining issues of skin color, as this topic has been persistent yet underexplored in Morrison's writings. Employing the methods of literary and rhetorical criticism, this tutorial will investigate five Morrison novels, *The Bluest Eye* (1970), *Sula* (1973), *Song of Solomon* (1977), *Love* (2003) and *God Help the Child* (2015). In our discussions of each text, we will examine the problem of the "color complex" at the intersections of race, gender, sexuality, class and sexual violence, and how the characters manage these overlapping issues. We will bring the novels into conversation with social science articles on the practices of colorism in daily life. Because the tutorial blends different kinds of investigations into colorism, it will equip first year students with tools to critically engage and interrogate fictional literature; help them identify the real and nuanced ways that color discrimination affects Black communities; and consider how Morrison, one of our foremost writers, bridges literary creativity with ethnographic observation.

Class Format: tutorial

Requirements/Evaluation: six 2-page papers, two 5- to 7-page papers, 10 minute vlog, annotated bibliography

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: this course is specifically for first-year students and they will receive preference in this class

AFR 206 (F) African Dance and Percussion

Cross-listings: AFR 206 MUS 221 DANC 202

Secondary Cross-listing

Before the 20th century, the African continent was the source of dance and music that influenced new forms rooted on and off the continent. These forms are shaped by the impact of religion, colonialism, national political movements, travel, immigration, and the continuing emergence of technology. In South Africa, the labor conditions of miners instigated the creation of Isicathulo, Gum boots, and in Brazil the history of colonialism is a factor that anchors Samba as a sustaining cultural and socioeconomic force. The birth of Hip Hop in the 20th century finds populations across the globe using its music, dance, lyrics, and swagger as a vehicle for individual and group voice. Hip Hop thrives as a cultural presence in most countries of the African continent and in the Americas. We will examine the factors that moved this form from the Bronx, New York, to Johannesburg, South Africa, and Rio, Brazil. We will examine at least two of these forms learning dance and music technique and composition material that will inform their practice. Each of these genres generated new physical practices, new and enduring communities while continuing to embody specific histories that have moved beyond their place of origin. What is their status in this century?

Class Format: class hours will be divided among discussion of media and readings; rehearsal of dance and music techniques; field trips to view performances; research at the Jacob Pillow's archives; and interaction with visiting artists

Requirements/Evaluation: a series of discussion, research, and individual and group projects; all of which will inform collaboration on mid-term and final projects

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: students who have taken DANC 100 or DANC 201; have experience in a campus based performance ensemble; or have permission of the instructors

Expected Class Size: 20

AFR 207 (F) "Out of Africa": Cinematic Por(Be)trayals of a Continent (DPE) (WS)

Cross-listings: AFR 207 ARTH 207

Secondary Cross-listing

This tutorial provides a focused study of the politics / poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa's 'fighting men' to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film / cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

Requirements/Evaluation: targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 207 (D2) ARTH 207 (D1)

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

AFR 208 (F) Time and Blackness

Cross-listings: REL 262 AMST 208 AFR 208

Primary Cross-listing

The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, "Time and Blackness," we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from--and create--paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American "timescape"?

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: concentrators in Africana Studies, majors in Religious Studies, and majors in American Studies

AFR 211 (F) Race and the Environment

Cross-listings: ENVI 211 SOC 211 AMST 211 AFR 211

Primary Cross-listing

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's *Dumping in Dixie* and David Pellow's *Garbage Wars*. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

AFR 213 (S) Race, Gender, and the Alien Body: Octavia Butler's Science Fiction

Cross-listings: STS 213 WGSS 213 AFR 213 SCST 213

Primary Cross-listing

Science fiction is a genre well known for its ability to envision new realities, and Octavia E. Butler (1947-2006) is among the most highly regarded science fiction writers. Butler's uncanny ability to imagine the future anew and to merge those ruminations with her experiences as an African American woman provide powerful commentary on--and often disrupt--modern understandings of race, gender, and human embodiment. We will explore questions such as: What role does 'gender' play in Butler's fiction? How does Butler's treatment of the 'alien' cause us to reconsider what it means to be human? How does Butler incorporate 'race' and the concept of 'other' into her fiction, and how do these techniques help us situate contemporary discussions of a post-race society? We will examine the relationship between Butler's visions for the future and what her narratives of future worlds invariably suggest about the present. We will read key texts including the best-selling text *Kindred* (1979), the haunting dystopian novel *Parable of the Sower* (1994), the popular vampire text *Fledgling* (2005), and the collection *Bloodchild and Other Stories* (1996). We will also explore contemporary engagement with Butler's work including the relationship between the main character from her book *Dawn* (1987), and Henrietta Lacks, the African American woman from whom the immortal cell line (HeLa) used for medical research derives. This tutorial will engage Octavia Butler's work broadly, and with particular attention to how the concepts 'race,' 'gender,' 'alien' and 'body' are interrogated in her writings.

Requirements/Evaluation: attendance, paired weekly reflection/response papers, a 5- to 7-page creative writing assignment, and a final essay of 10 pages

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students with interests and/or prior coursework in Africana Studies and Women's, Gender, and Sexuality Studies

AFR 215 (F) Ways of Knowing: Music, Movement, Memory

Cross-listings: THEA 202 AFR 215 WGSS 215 DANC 215

Secondary Cross-listing

This interdisciplinary seminar proceeds from the premise that the body knows. Ongoing colonial modernity is rooted in a racialized hierarchy: the "civilized" life of the mind vs. the "primitive" instincts of the flesh. According to this binary, the body is marked as irrational, sinful, outside of the archive. The body cannot know because the happenings of the body are ephemeral: unlike documents, they don't last. In this course, we will subject this logic to close scrutiny. As performance scholar Diana Taylor asks, "Whose memories, traditions, and claims to history disappear if performance practices lack the staying power to transmit vital knowledge?" In this course, we look to music, movement, and other repertoires as ways of knowing, remembering, and world-making. How does embodied knowledge travel across time and space? How have performance practices served as modes of what Ashinaabe cultural theorist Gerald Vizenor calls "survivance" (survival + resistance) for indigenous, nomadic, queer, and colored communities. Case studies include: the Middle Passage and the syncretic birth of the Blues in the Americas; nomadism, the nation-state, and the migration of Romani music; and the evolution of queer ball culture. Students will engage with a variety of texts (verbal, sonic, visual, kinesthetic) and respond to them critically not only through writing and discussion, but also through their own performance practices.

Requirements/Evaluation: in-class participation, creative/critical responses to texts, final paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Theater majors

AFR 216 (S) Moving While Black

Cross-listings: AFR 216 DANC 217

Primary Cross-listing

Opening your apartment door, driving down the highway, taking a knee, raising a fist, sitting at the lunch counter then or sitting in a café now, these movements have historically and presently prompted fear at a minimum and in the most grave cases death for black people. Whether in the U.S. or globally, moving in the world as a black person often means being perceived as different, foreign and threatening. Crawling, dancing, running and boxing, these movements have countered fear and articulated the beauty, pride, creativity and political resistance of black people. In both cases, black movement matters and means much. While many consider movement to be just organized dance moves, this course expands students' definitions of black movement and teaches them to analyze multiple perceptions, uses, and reactions to it. "Moving while Black" offers examples of physical movement in improvised and practiced performance, quotidian movement, geographical movement across national borders and symbolic, politicized gestures. Students will investigate black movement via interdisciplinary sources that reflect various time periods and locations. They will analyze such texts as Jacob Lawrence's visual art in *The Migration Series*, the movement of the rumba dance form between Cuba and the Democratic Republic of Congo, the Alvin Ailey American Dance Theater's "Revelations," William Pope.L's choreographed crawls, the 1995 World Rugby Cup in South Africa, and the 2018 case of a Kansas resident arrested while moving into his own home. Additionally, this course features an important practice element, in which students experiment with in-class dance exercises and workshops, engage with dance archives at Jacob's Pillow, interview participants of Kusika, and create and perform their own choreographies. While no previous experience in performance is required, curiosity and openness to learning through one's own body movement is expected.

Class Format: classes will rotate throughout the semester between seminar discussions in the classroom and performance exercises in the studio

Requirements/Evaluation: multiple reading/viewing responses; two short essays closely analyzing movement; two graded movement performances; final movement performance with a proposal

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Africana Studies concentrators and students involved in Dance, Theatre, other performance courses or campus performance groups

AFR 218 (S) Gender and Sexuality in the Neo-slave Narrative (DPE) (WS)

Cross-listings: WGSS 218 AFR 218 ENGL 218 AMST 218

Secondary Cross-listing

Hortense Spillers has noted that ex-slave Harriet Jacobs, "between the lines of her narrative, demarcates a sexuality that is neuterbound" and we live with the aftermath of her observation. "Ungendering," one of the transformations undergone by bodies subjected to the Middle Passage, is one of the keywords that forms the foundation for a conversation about slavery, blackness, gender, sexuality, and archive. Throughout this course we will wrestle with the questions: How does the designation "slave" rupture, reify, or expand our understandings of sexuality and gender? What conditions have necessitated the neo-slave narrative form? Texts include: slave narratives and neo-slave narratives in the forms of novels, visual art, and film. Course texts include: Octavia E. Butler's *Kindred*, Jewelle Gomez's *Gilda Stories*, Glenn Ligon's "Runaways", and Jordan Peele's *Get Out*. Critical theories of blackness, gender, and sexuality are also central texts in this course including that by Darieck Scott, Saidiya Hartman, Hortense Spillers, Matt Richardson, and others. Given that neo-slave narratives intervene in the sexual and gendered silences of slave narratives and the power relations that produced them, students who are hesitant to study sexual violence might consider taking another course.

Requirements/Evaluation: mandatory participation in discussion, four papers including one critical revision (total 20 pages), keyword glossary

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 218 (D2) AFR 218 (D1) ENGL 218 (D1) AMST 218 (D2)

Writing Skills Notes: Three thesis papers at 5 pages each (each receiving critical feedback from professor); one thesis paper revision with critical feedback from professor and peers including one letter of revision explaining the student's revision process; one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course examines the work of black writers and artists engaged with the archival silences imposed by the power dynamics of racial hierarchy which constrained the birth of African American literature (the slave narrative). In particular, we examine the meaningful/willful/and censorial omissions that shape the treatment of gender and sexuality in these texts including and especially the silences around sexual abuse and sexual assault practiced by beneficiaries of white supremacy.

Cross-listings: AFR 220 AMST 220 ENGL 220

Secondary Cross-listing

What does it mean, socially, culturally, historically, personally, and spiritually, to be African American? No single, simple answer suffices, but African American literature as a genre is defined by its ongoing engagement with this complex question. This course will examine a series of texts that in various ways epitomize the fraught literary grappling with the entailments of American blackness. Readings will include texts by Frederick Douglass, Booker T. Washington, Zora Neale Hurston, Langston Hughes, Richard Wright, Ralph Ellison, Amiri Baraka, Toni Morrison, and Ishmael Reed.

Requirements/Evaluation: writing assignments for the course will total 20 pages, distributed over three papers

AFR 221 (S) Giving God a Backbeat: Rap Music, Religion & Spirituality

Cross-listings: REL 263 AFR 221

Primary Cross-listing

On the surface, religion and rap music may seem as if they have little in common. Yet, like other Black musical traditions such as spirituals and the blues, rap is rooted in African American religious traditions. In this course, we will explore the ways in which rap music intersects with the sacred and secular worlds. Through an examination of black religious traditions, lyrics, music videos, and digital media, we will unearth what Anthony Pinn calls the "spiritual and religious sensibilities" of rap music. Grounded in culture-centered criticism, we will investigate the rhetoric of rap and religion through the theoretical ideas of Black Liberation Theology and hip-hop feminism.

Class Format: seminar

Requirements/Evaluation: students will be evaluated on their class participation, response papers, quizzes, and a final class group project

Cross-listings: AFR 223 MUS 222

Secondary Cross-listing

Using select examples from throughout Africa, this course highlights genres, artists, and works that engage with social and ideological change.

Students practice critical listening and performance analysis, while also considering the social contexts that render these performances meaningful and provocative. Topics include: challenges to mass mediated stereotypes of African populations, the social and economic impact of cultural tourism, music as a form of social critique, changing attitudes toward women and the LGBTQIA community, music and global aid organizations, issues of migration and displacement, and the changing roles of traditional musical occupations. Popular genres-among them Afrobeat, kwaito, soukous, raï, mbalax, Chimurenga music, and a variety of rap and hip-hop styles-are discussed alongside numerous traditional and ceremonial genres, national/political anthems, and concert pieces. Active participation in class discussion is an important component of this course.

Class Format: this class places a strong emphasis on discussion

Requirements/Evaluation: in-class preparation and participation, bi-weekly short writing assignments, a midterm paper and a final project

Prerequisites: some familiarity with music terminology encouraged

Enrollment Limit: 15

Enrollment Preferences: sophomores, juniors, or seniors who are current or prospective Music majors, as well as current and prospective Africana Studies and Latina/o Studies concentrators

AFR 225 (S) Musics of the Caribbean

Cross-listings: AFR 225 MUS 225

Secondary Cross-listing

From witty and politically charged calypsos to soulful bachatas, from folkloric displays that advertise a country's cultural diversity to ritual performances that facilitate communication with the spirit world, the music of the Caribbean is astonishingly diverse, both sonically and in its social application. This course serves as an introduction to a wide spectrum of Caribbean music in its broader social and historical context. Through engaging with audio and video sources, readings, performance exercises and workshops, students will learn to identify distinguishing features associated with particular countries and regions, while also exploring the sounds and musical structures that are shared between them. Featured genres include reggae, steel pan, calypso, zouk, Maroon music from Suriname and Jamaica, chutney, salsa, merengue and music from Haitian Vodou and Cuban Santería religions. Interlaced with discussion of musical genres and innovative musicians are a number of central questions about the social role of music within the region: How has slavery and colonial enterprise shaped the musical landscape of the Caribbean? How do the realms of sacred and secular performance relate to each other? What role does tourism and global circulation play in influencing musical tastes and practices? Finally, how do music and dance interconnect?

Class Format: lecture

Requirements/Evaluation: class participation, multimedia project, midterm paper, intermittent short assignments, final exam

AFR 226 (S) Black France/France Noire (DPE)

Cross-listings: AFR 226 RLFR 226

Secondary Cross-listing

On the eve of the new millennium, the year 1998 saw the emergence in France of "Black studies à la française" (Ndiaye). Inspired, in part, by the 150th anniversary of the 1848 abolition of slavery, the French black minority "made itself more visible" (Faes and Smith). This course examines a wide range of discursive practices through which athletes, artists, authors, politicians, activists, and scholars amplified their voices in the French hexagone. It retraces the rise of these discourses and how they assert, reframe, and establish blackness as a legitimate field of knowledge and a space of affirmation and contestation. Following a study of the interwar period (1918-1939), when the work of "negritude women" (Sharpely-Whiting) such as "afro-latinité" spurred the negritude movement, we will discuss publications, documentaries, and seminal moments of protest in the early twenty-first century. Course material may include works by Suzanne Césaire, Jane and Paulette Nardal, Aimé Césaire, Frantz Fanon, Achille Mbembé, Françoise Vergès, Pascal Blanchard, Nicolas Bancel and Sandrine Lemaire, Pap Ndiaye, Gaston Kelman, Rokhaya Diallo, Alice Diop, Léonora Miano, and Fabienne and Véronique Kanor. *Conducted in French.*

Requirements/Evaluation: response papers, midterm paper, TV show, colloquium

Prerequisites: RLFR 201, 202, or 203, or by permission of instructor

Enrollment Limit: 20

Enrollment Preferences: French and Africana Studies concentrators

AFR 228 (F) Revolt and Revelation in 20th-Century Americas

Cross-listings: AMST 228 AFR 228 LATS 228 REL 223

Secondary Cross-listing

Writing in 1971, Dominican priest and Peruvian theologian Gustavo Gutierrez asked "Is the Church fulfilling a purely religious role when by its silence or friendly relationships it lends legitimacy to dictatorial and oppressive government?" Such a question encapsulates the sometimes agonistic and other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course examines those forms of "God-talk" broadly termed "liberation theologies" that responded to and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings--such as those of Gutierrez--and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Perú, and the United States of America between 1960-2000.

Requirements/Evaluation: participation, short writing exercises, a 5- to 6-page take-home midterm essay, and an 8- to 12-page final review essay

Secondary Cross-listing

The global pandemic of HIV/AIDS is now entering into its fourth decade. Throughout this history sexuality, gender and race and inequality have played a central role in the spread of the virus, and its apparent entrenchment in certain communities. This class will use a gendered, interdisciplinary perspective to investigate the pandemic's social, economic and political causes, impact, and conundrums--the problems it poses for scholarship, activism, public policy, and public health. Issues discussed will include the role of transaction sex and economic structures in both susceptibility to HIV and vulnerability to its impact; stigma and its challenges for HIV prevention, testing and treatment uptake; the role of positive youth in the next stages of the pandemic; and the evolving expressions of biopower in the global AIDS response. The class will look at examples of successful policies and activism as well as the failures, corruption and complacency that have characterized the global pandemic. There will be a particular geographical focus on experiences in the U.S. and sub-Saharan Africa.

Requirements/Evaluation: two short papers and a research paper; class participation will form part of the grade

AFR 237 (F) Islam in the United States: From Black Muslims to the War on Terror

Cross-listings: AMST 237 AFR 237 REL 237

Secondary Cross-listing

Malcolm X is likely the most prominent and influential Muslim figure in the history of the United States. His story represents two fundamental themes in the history of Islam in America: conflict between Muslims over what is "authentic" or "orthodox" Islam; and the ways that American history, politics, and culture determine the contours of "American Islam". This course will explore these two themes through an array of topics in the history of American Islam. In so doing, we will examine the complex relation between religion, politics, and culture in the United States. Beginning with the story of Malcolm X, the Nation of Islam, and other African-American Muslim movements, we will try to understand: What made Islam so appealing to millions of African-Americans throughout the 20th century? And were these genuinely "religious" and "Islamic" movements, or just racial/political "black nationalist" movements in the guise of religion? What counts as legitimately "Islamic", and who gets to decide? We will then move into the latter half of the 20th century and the post-9/11 debates over authentic Islam. What happened to American Muslim communities and organizations after the waves of post-1965 immigration from Muslim countries? How have debates about Muslim identity shifted over time, from being configured in terms of black separatism, to transnational/diasporic identity, to the attempts at articulating an indigenous "American-Muslim" identity? How have national narratives around 9/11 and the "War on Terror" impacted these debates over identity and "true Islam"? And how have these debates intersected with gender, racial, and ethnic politics? Throughout the course, we will be studying historical and anthropological material, autobiographies, novels, documentaries, films, and social media. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to race, ethnicity, nationality, culture, gender, language, and age.

Cross-listings: HIST 281 AFR 246

Secondary Cross-listing

This course provides an introduction to the history of African Americans in United States during the colonial, early republic, and antebellum eras. The experience of enslavement necessarily dominates this history, and it is the contours and nuances of slavery-and the development of racial classifications-that give this course its focus. We will also explore African cultural influences, the significance of gender, the lives of free blacks, and the cultural and intellectual significance of the abolitionist movement. The course closes on the themes that emerge from the Civil War, and on the meaning of freedom and emancipation. Our readings will include primary sources and secondary literature. Class meetings will combine lecture and discussion. Informed participation in class discussion is essential. This Power etc course explores the experiences and expressions of the culturally diverse peoples of African descent in the New World (and the Old), as well as the myriad ways in which they confront, negotiate, and at times challenge dominant U.S. and/or European hierarchies of race, culture, gender and class.

AFR 248 (S) The Caribbean: From Slavery to Independence

Cross-listings: AFR 248 HIST 248

Primary Cross-listing

This class will begin with and foreground the current crisis in Puerto Rico, an island emblematic of the history of colonialism, racism, environmental destruction, and economic exploitation of the region. But as the Caribbean has suffered, so has it resisted. From the Haitian Revolution to the Manley 'Revolt' in Jamaica, the Puerto Rican Independence Movement, the Cuban Revolution, and the Grenadian Revolution, the Caribbean has been at the

forefront of radical change in the New World. Pioneering slave emancipation, independence from European empires, and unique experiments in socialism, communism, and Black Power, these small islands have been world leaders. But their innovative social and political experimentation--expressed in vivid artistic and musical forms--have all too often met with disdain and repression by their more powerful neighbors or former colonial rulers. This course will examine the audacious experiments of the Caribbean people from the eighteenth to the twentieth centuries as well as the repression they have faced from abroad. We will pay attention to the rich cultural diversity of the region, using film, music, literature and art to examine diverse phenomenon, including voodoo, Santeria, and Rastafarianism. We will also explore the prospects for continuing change in the contemporary Caribbean, paying special attention to the environmental challenges they face amidst rising sea levels, drought, heat waves, and the effect of two hundred years of environmental destruction at the hands of rapacious foreigners, from slaveowners to cruise ship lines to bauxite and oil producers.

Requirements/Evaluation: class participation, a mid-term and final paper, and a 10-12 page research paper

AFR 250 (S) Translating Black Resistance: Historical and Contemporary Challenges

"My ebony skin...is my naked soul; my skin is language, and the reading is all yours." The lyrics' excerpt authored by Afro-Brazilian artists Matumbi and Portugal eloquently convey/denounce how Black skin and the Black body may function as a canvas upon which multiple meanings are imposed or assigned/prescribed: as embattled territories constantly subjected to multiple (mis)interpretations. Conversely, Black skin/bodies become sites of resistance, expressing/becoming potent languages through which oppressive systems are challenged, and powerful anti-racist struggles/movements crafted/expressed or performed/reinvented. How have verbal and non-verbal communications functioned as core aspect of Afro-Diasporic confrontational praxis to intersecting racialized/gendered oppressions and annihilation? How may we challenge Eurocentric bodies of knowledge as a key component in political projects of Black erasures? The course will explore such issues by placing the politics of language, translation/interpretation, ideology, and identity at the center of historical and contemporary movements of resistance against deadly manifestations of anti-black racism and gendered/homophobic violence(s). We will engage with such collective Black resistance responses by analyzing music, film, poetry and other Black art forms in Latin America, and particularly Brazil, and we shall examine authors including Conceição Evaristo, Angela Y. Davis, Patricia Hill Collins, Joelzito Araújo, Paul Bandia, Brent Edwards, Lazzo Matumbi, and Randal Johnson.

Requirements/Evaluation: class participation; three two-page response papers; midterm exam; and a 10 to 12- page final paper.

AFR 251 (S) Afro-Diasporic Crossroads: Translating and (Re)Imagining Black Experiences

For many centuries Black subjects have forged multiple forms/processes/modes of resistance, yielded in particular by the brutal forced migration of

African men and women in the Transatlantic Slave Trade. Afro-Diasporic subjects utilized, evoked, and preserved their cultural and historical/intellectual legacies, healing practices/sacred traditions - and (re)crafted the African Diaspora. This course will examine the crucial roles played by the politics of language and translation in Afro-Diasporic dispersions, intersections, and (re)connections. We will explore the concept of translation as reparation and the ethics of translation, while interrogating how language may be utilized as an effective tool for political control and conversely, a powerful means for Black Liberation. Grounded on Black Feminist Theory, we will engage with the often-overlooked significance of embodied Black knowledge in translation theories within and beyond the boundaries of written texts across African Diasporic settings. Particular attention will be placed on a critical analysis of the ways through which Black popular cultures travels across African Diasporic settings. Authors we shall explore in the seminar include Angela Y. Davis, Patricia Hill Collins, Rachel Harding, Paul Bandia, Brent Edwards, Omise'eke Tinsley, Marsha J. Hamilton and Eleanor S. Block.

Class Format: seminar

Requirements/Evaluation: class participation; three two-page response papers; midterm exam; and a 10 to 12- page final paper.

AFR 254 (F) Bebop: The (R)evolution of Modern Jazz

Cross-listings: MUS 254 AFR 254

Secondary Cross-listing

In the 1940s, Jazz turned a corner, transitioning from the functional and popular music of the swing era to the increasingly complex art music known as bebop. The practitioners of this new sub-genre were seen not as showmen or entertainers, but (in the words of poet Ralph Ellison) as "frozen faced introverts, dedicated to chaos." This music was simultaneously old and new, a musical evolution interpreted through the lens of cultural revolution. This class will survey the lives, music and continuing impact of bebop's most pivotal figures: Charlie Parker, Thelonious Monk, Dizzy Gillespie, Bud Powell and Kenny Clarke among many others. Through score study and guided listening assignments, the class will examine the melodic, harmonic and rhythmic innovations associated with this pivotal era in jazz history. We will evaluate, compare and contrast examples of contemporary theoretical scholarship concerning this musical vocabulary and its evolution. Intersections between the music and parallel artistic, social and political movements will also be addressed.

Requirements/Evaluation: weekly reading, listening, short written responses to discussion prompts and participation in class discussion; quizzes on assigned readings and listening, and final exam

Prerequisites: none

Enrollment Limit: 12

AFR 256 (S) Politics of Africa

Cross-listings: AFR 256 PSCI 243

Secondary Cross-listing

This course provides an introduction to the politics of contemporary Africa, emphasizing the diversity of African politics. It seeks to challenge the widespread image of African politics as universally and inexplicably lawless, violent, and anarchic. We begin by examining the colonization of Africa, nationalist movements, and patterns of rule in the first 30 years of independence. From there, we analyze the causes, achievements and limitations of the recent wave of political liberalization across Africa. We then consider patterns of economic development in Africa. Finally, we examine China's growing expansion into Africa and ask whether this is a new colonialism.

Class Format: lecture/discussion

Requirements/Evaluation: class discussion, four short papers and final exam

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: sophomores, Political Science majors and Africana Studies concentrators

Expected Class Size: 30

AFR 257 (F) Social Justice Traditions: 1960s to #Black Lives Matter (DPE)

Cross-listings: AMST 256 HIST 256 AFR 257

Secondary Cross-listing

We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today's activists draw on the "freedom dreams," tactics, and styles of rhetoric crafted by their predecessors, while making use of new technologies, such as Twitter, and evolving understandings of "justice." Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study the development of LGBTQ, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

Requirements/Evaluation: attendance and class participation; four 2 page reading response papers; discussion of films via GLOW forums; and a final 7-8 page analytical essay

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: first-years, sophomores, and American Studies majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The class focuses on struggles for rights, recognition, and redistribution of resources of people of color, women, LGBTQ folks, the working poor, and immigrants. We focus on the tension between groups asserting they are the "same" as others in society, and hence deserving of equal rights, and the celebration of difference as a means of asserting pride and building solidarity. We discuss how movements borrow and adapt tactics, slogans, and ideas of justice from other movements.

AFR 259 (S) Bilad al-Sudan and Beyond: Arts of the Afro-Islamic World

Cross-listings: ARAB 259 ARTH 259 AFR 259

Secondary Cross-listing

From the Swahili stone houses of East Africa to the massive earth and timber mosques of the Sahel, the story of Islam in Africa is one of cultural and spiritual hybridity expressed through material form. In this course, students will explore how artistic forms and traditions in Africa have functioned as vehicles of access and integration for Islam, enabling it to assimilate itself with numerous African contexts towards becoming the dominant religious force on the continent. In addition, students will investigate how the forms, functions, and meanings of Afro-Islamic objects across the continent reflect not just one African Islam, but many different iterations, each shaped by the specific frameworks of its cultural context. The contemporary component of the course will examine how modernity in the form of globalization, technology, and Westernization has affected Afro-Islamic artistic traditions, and how these shifts reflect larger evolutions within understandings of Islam in Africa in the contemporary period.

Requirements/Evaluation: three reading response papers (2 pages each), class journal, a mid-term exam, and a final exam

Prerequisites: none, although an introductory course in art history or Islamic studies would be useful

Enrollment Limit: 25

Enrollment Preferences: students who have declared a major in Art History or Africana Studies

AFR 261 (F) Haitian and French Caribbean Literatures and Films

Cross-listings: COMP 283 AFR 261 RLFR 261

Secondary Cross-listing

Over the twentieth and twenty-first centuries, authors and filmmakers have questioned prevalent representations of the Creole and French-speaking Caribbean such as the idea of Haiti as the First Black republic and the poorest nation in the Western hemisphere and of Martinique and Guadeloupe as the "French" Caribbean. They have also interrogated their forebears by reclaiming modernity, reframing History, and telling "intimist" stories (Ferly). This course focuses on the diverging paths by Haitian and French Caribbean literatures (short stories, play, poem, novels) and film (short, feature and documentaries) as critical interventions that bring into focus gender, slavery, identity, exile, migration, imperialism, culture, and (non) sovereignty.

Class Format: seminar

Requirements/Evaluation: in-class discussions, journaling, steps towards final project, final project and presentation

Prerequisites: French majors, French certificate, Africana and Comparative Literature students

Enrollment Limit: 15

AFR 275 (S) Southern Literary Aesthetics (DPE) (WS)

Cross-listings: AFR 275 AMST 276 ENGL 275

Secondary Cross-listing

Hip-Hop artists signify as "the dirty South" the distinct sounds, rhythms, landscapes, gestures, desires as well as frustrations of Black residents living in the southernmost regions of the U.S. American continent. In this course, students will examine what the South means to American concepts and how the South is used to make meaning in literature, music, art, digital archives, and film. We will give particular attention to how representations of the South are informed by region, gender, sexuality, and class. At the end of the course, students will be able to identify Black southern aesthetics across various genres and mediums with attention to historical and regional specificity despite the opacity of these categories. Potential artists include Jean Toomer, Alice Walker, Ernest Gaines, William Faulkner, Jesmyn Ward, Zora Neale Hurston, Natasha Trethewey, E. Patrick Johnson, Trudier Harris, Kiese Laymon, Julie Dash, Spike Lee, Askia Muhammad Touré, Alexis Pauline Gumbs, Alison Janae Hamilton, Outkast, DJ Khalid, Beyoncé Knowles, and Solange Knowles.

Requirements/Evaluation: four or five writing assignments that total about 20 pages; discussion facilitation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 275 (D2) AMST 276 (D1) ENGL 275 (D1)

Writing Skills Notes: Students will develop a writing practice through short in-class assignments that culminate in four or five formal submissions. Students will receive group as well as one-on-one feedback on useful writing principles. Feedback will focus on structure, style, argumentation, and audience.

Difference, Power, and Equity Notes: Students will analyze the "shaping of social differences, dynamics of unequal power, and processes of change" in the South. Students will discover how region impacts race, gender, sexuality, and class.

AFR 276 (S) Black Europeans

Cross-listings: AFR 276 COMP 276 GERM 276

Secondary Cross-listing

This course explores the in/visibility of Black Europeans from the Enlightenment to the present with a particular focus on French, German, Austrian, Dutch, British, and Russian history. With the European Enlightenment as point of departure, the tutorial investigates the large presence of Blacks as objectified subjects in paintings and decorative artifacts of the 18th and 19th centuries while interrogating their century-long absence from European historiography until fairly recently. In this tutorial, we will start discussing the significance of the Code Noir (1685) as well as the major economic impact of the Atlantic Slave Trade on European countries such as Great Britain, France, and the Netherlands. We will read historical biographies about a handful of outstanding Black Europeans in France (composer Monsieur de Saint George), Germany (Prussian officer Gustav Sabac el Cher, philosopher Wilhelm Anton Amo), Austria (royal tutor Angelo Soliman), Holland (Prince Kwasi Boachi), and Russia (military leader Abram Petrovitch Gannibal) during the 18th and 19th centuries, study paintings and decorative artifacts of the 18th and 19th centuries depicting black servants--such as Hyacinthe Rigaud's Portrait of Marquise de Louville (1708), Nicolas Lancret's The Escaped Bird (1730), and Manet's Olympia (1863) to name a few--and watch the biopic Belle by Amma Asante (2013), narrating the life of black heiress Dido Elizabeth Belle in 18th-century England. We will also do a quick survey of 20th-century European cinema, that has until now cast very few black actors in supporting and leading roles, and we will ponder the representation of black people in recent films that were commercially successful at the box office (such as Les Intouchables by Nakache/Toledano, France 2011). Finally, we will reflect on the deep roots of European colonialism that takes the form of national debates surrounding the naming of

chocolate-coated treats and licorice sweets (Têtes de nègre, Mohrenkopf, and Negerkuss) or of a controversy around cultural identity resulting from the grotesque depiction of black men in folkloric tradition (like Zwarte Piet in the Netherlands).

Requirements/Evaluation: six 5- to 7-page argumentative papers; six 2- to 3-page response papers; final paper optional

AFR 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: ENGL 286 WGSS 283 AFR 283 AMST 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as *Looking for Langston* (Isaac Julien, 1989), *The Watermelon Woman* (Cheryl Dunye, 1996), *U People* (Olive Demetrius and Hanifah Walidah, 2009), *Tongues Untied* (Marlon Riggs, 1989) and *Litany for Survival* (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

AFR 299 (F) Rastafari: Dread, Politics, Agency

Cross-listings: REL 261 AFR 299 PSCI 233

Primary Cross-listing

The emergence of Rastafari in the twentieth century marked a distinct phase in the theory and practice of political agency. From its heretical roots in Jamaica, Garveyism, Ethiopianism, and Pan-Africanism, Rastafari has evolved from a Caribbean theological movement to an international political

actor. This course investigates the political theory of Rastafari in order to develop intellectual resources for theorizing the concept of agency in contemporary Africana thought and political theory. We will analyze texts and audio-visual works on the political economy of late colonial Jamaica, core Rastafari thinking, political theology, the role of reggae music, the notion of agency, and the influence of Rastafari on global politics.

Requirements/Evaluation: attendance and participation, weekly reading e-response papers, two short essays, and a 12- to 15- page final paper

Prerequisites: none; open to all

Enrollment Limit: 15

AFR 301 (F) Experimental African American Poetry

Cross-listings: AFR 301 AMST 307 ENGL 327

Secondary Cross-listing

Contemporary African American poets in various cities and towns across the nation--from New York City to Los Angeles, from Berkeley to Durham, N.C.--are currently producing a vibrant and thriving body of formally experimental work, yet this poetry is largely unknown to readers both within and outside the academy. This formally innovative poetry defamiliarizes what we normally expect of "black writing" and pushes us to question our assumptions and presumptions about black identity, "identity politics," the avant-garde (for example, is it implicitly raced?), formalism, socially "relevant" writing, the (false) dichotomy of form versus content, the black "community," digital poetics, and other issues of race and aesthetics. We will examine the writings of living poets, who range widely in age, and those of their avant-garde predecessors in the twentieth century. We will also be making links between this poetry and African American music and visual art.

Requirements/Evaluation: two papers (6-8 pages and 8-10 pages), short response papers, oral presentation, and class participation

AFR 302 (S) Complexion Complexities: Colorism in Literature, Lyrics & Everyday Life

Cross-listings: COMP 309 AFR 302

Primary Cross-listing

Often viewed as the "dirty laundry" of the Black American past, colorism, or skin color bias, is a pervasive force within modern global society. Although

it is not a new issue, its impact is far reaching and continues to have damaging effects on people of color-especially members within the African Diaspora. From skin bleaching creams like "Whitenicious" to rap music's fetishization of light-skinned women, colorism is a very real and present issue affecting Black life. From the literary works of Wallace Thurman and Toni Morrison, to the lyrics of blues crooner Big Bill Broonzy and rapper Lil Wayne, we will analyze the many ways that the politics of color influence standards of beauty and attractiveness, perceptions of behavior and criminality, and economic attainment and stability.

AFR 307 (F) Contemporary Short Stories from North Africa

Cross-listings: AFR 307 RLFR 309

Secondary Cross-listing

Short stories are the vibrant center of the literary landscape in North Africa today. Written in French, Arabic and sometimes Amazigh languages, short stories provide timely interventions in political and social discourse. In this course, we will read short stories that use humor and satire to address the effects of globalization on local communities, that experiment with language to portray war and revolution, and that seek to create a new space for the discussion of gender. We will also analyze films, sociological texts and Moroccan, Algerian and Tunisian online newspapers in order to explore contemporary transformations of life in North Africa. Readings by Maissa Bey, Abdelfattah Kilito, Zeina Tabi, Mohamed Zafzaf, Ahmed Bouzfour, Soumaya Zahy and Fouad Laroui among others. *Conducted in French.*

Class Format: discussion

Requirements/Evaluation: active class participation, weekly response papers, two short papers, an oral presentation and a final paper

Prerequisites: RLFR 201, 202 or 203 or permission of instructor

AFR 309 (S) Scriptures and Race

Cross-listings: LATS 309 REL 309 AFR 309

Secondary Cross-listing

This course focuses on the relationships between constructions of race in the post-1492 American world and "Christian scriptures." The big questions of the course examine the ways that contestations of power are intertwined with the making of, interpretation, and transformation of sacred texts. Both scriptures and race are conceptual constellations of human social imagination, and yet their conceptualization has often been embroiled in the hopes

and traumas of everyday life in the Americas. How and why did these two terms come to have any relationship to each other? How and why do peoples engage "scriptures"? In what ways have "scriptures" informed how people imagine themselves, their communities, and their relationship to religious and racial "others"? How did "scriptures" and "race" inform each other in modern colonialisms and imperialisms? In this course, we will examine the ways that scriptures have been employed in order to understand and develop notions of race, and we will examine how ideas about and lived experiences of race have informed the concept of scriptures as well as practices of scriptural interpretation.

Requirements/Evaluation: participation, short writing exercises, a 5- to 8-page take-home midterm essay, and a 10- to 15-page final essay

AFR 310 (F) Womanist/Black Feminist Thought

Cross-listings: REL 310 AFR 310 WGSS 310 AMST 309

Primary Cross-listing

This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color--particularly black women--are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies.

Class Format: discussion

Requirements/Evaluation: class participation, three short response papers, and the completion of an original research paper or project

Prerequisites: none

Enrollment Limit: 25

AFR 314 (F) Groovin' the Written Word: The Role of Music in African American Literature

Cross-listings: ENGL 314 COMP 321 AFR 314 AMST 314

Primary Cross-listing

In an interview with Paul Gilroy, Toni Morrison once said, "Music provides a key to the whole medley of Afro-American artistic practices." Morrison is not the only one who believes that music speaks to numerous aspects of the African American experience. From Sterling Brown and Zora Neale Hurston to John Edgar Wideman and Suzan Lori-Parks, many African American authors have drawn on music to take political stands, shape creative

aesthetics, and articulate black identity. In this course, students will explore the work of these authors and more, investigating music's ability to represent and critique African American culture in their literature. Texts will cover a range of literary forms including poetry, plays, short stories and novels alongside theoretical and critical essays. Students will discuss such key issues as assimilation into mainstream culture, authenticity claims on black music, and music used as a tool for protest. Additionally, class assignments will include musical examples in spirituals/gospel, blues, jazz, and rock/rhythm and blues. While this class requires students to practice in-depth literary and performance analysis skills, students are not required to have technical musical knowledge.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based upon class participation, short weekly reading responses and/or listening assignments, one 3-page paper, one 6- to 8-page paper comparing two works, one in-class spoken word performance with 2-page report, final presentation

Prerequisites: none; open to all

AFR 317 (F) Black Migrations: African American Performance at Home and Abroad

Cross-listings: COMP 319 ENGL 317 THEA 317 AFR 317 DANC 317 AMST 317

Primary Cross-listing

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did

musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: discussion

Requirements/Evaluation: class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

AFR 321 (F) Trending Black: Race & Social Media in the 21st Century

The 21st Century ushered in new and exciting ways for people to communicate digitally. With the creation of social media outlets like Facebook, Twitter, Instagram, and more recently Vine, connecting with the world is literally one click, or selfie away. Though much of the attention around social media is focused on people with race and educational privilege, people of color have created their own spaces to curate, articulate, and produce culture. Through the methods of rhetorical criticism, critical discourse analysis, cultural criticism and ethnography, we will investigate the ways Africana cultures, specifically in the United States, utilize social media to shape community and influence popular culture. This course will give students hands-on experience analyzing various texts, and a deeper understanding of rhetorical methodologies.

AFR 323 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: AMST 323 COMP 322 ENGL 356 ARTH 223 AFR 323

Primary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love's *Bayou* and Ho Che Anderson's *King: A Comic Biography*, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and ipads to create their own graphic short stories based on historical and/or autobiographical narratives.

Requirements/Evaluation: class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life)

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

AFR 325 (F) Television, Social Media, and Black Women 'Unscripted'

Cross-listings: WGSS 325 AFR 325

Primary Cross-listing

Nene Leaks, Shonda Rhimes, Oprah Winfrey, Kerry Washington and now Lavern Cox and Melissa Harris-Perry have become common household names. Whether from the television shows they star in, the TV shows they have created, or the social media presence they have developed--these women continue to influence and shape popular culture. In this course we will situate Black women as creators and contributors to popular culture as a whole, but specifically through television (scripted and "unscripted") and social media. We will begin by covering the history of Black women in television. This historical approach will then lead us to examine selected TV episodes, and investigate social media pages of Black actresses, television producers, and the fans of these shows. The aim of this course is to analyze the ways in which Black women continually shift the popular culture paradigm and how they serve as key players determining what is indeed popular.

Requirements/Evaluation: class participation, response papers, one 10 page paper, and a formal class presentation

Prerequisites: none

Enrollment Limit: 15

AFR 326 (S) Gender, Race, and the Power of Personal Aesthetics

Cross-listings: LATS 313 AMST 313 AFR 326 WGSS 313

Secondary Cross-listing

This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final take-home exam

Prerequisites: LATS 105, AMST 201, WGSS 101 or permission of instructor; first year students are not permitted to take this course

AFR 327 (S) Sounds and Pressures: Music in the 1970s Caribbean

Cross-listings: MUS 327 HIST 342 AFR 327

Primary Cross-listing

For the Caribbean the 1970s was a decade of cultural excitement and political tragedy. 1960s radical consciousness contributed to rapidly changing music styles that formed by the early seventies and blossomed on the world stage as the decade progressed. This was the period when Jamaican Reggae, Haitian Konpa, and Spanish Caribbean Salsa, asserted their presence in the mainstream. But the countries that birthed these popular music forms were locked in political crisis. In Jamaica, political violence escalated, Haiti faced a brutal dictatorship and Cuba was caught in the midst of Cold War strain. A common response to these challenges was massive emigration from the Caribbean to the United States. This course will examine the music produced in the 1970s Caribbean and its relationship to the forces of migration, national politics, and inter-regional contact. After a background on Cuban and Haitian music, the course will give greatest focus to Jamaican politics its relationship with Reggae, which reached further than any other Caribbean music form in the 1970s. It will explore the journeys of the music as it accompanied and oftentimes preceded the arrival of large numbers of

Caribbean immigrants. In the process, the US imaginary of the Caribbean was reshaped by the popularization of Caribbean commercial music.

Requirements/Evaluation: class participation, 3-4 short papers (5-7 pages)

AFR 330 (S) Modern Folklore: Postcolonial Dance and Music in Africa

Cross-listings: DANC 330 AFR 330 MUS 330

Secondary Cross-listing

"Folklore is a mixture of traditions, poems, songs, dances and legends of the people, it can be no other than the reflection of the life of the country and if that country develops, there is no reason why the folklore which is the living expression, should not develop as well. Modern folklore in present Africa is as authentic as the Africa of old." --Keita Fodeba, founding Artistic Director of Les Ballet Africain, Guinea, West Africa. This course will involve intensive dance and musical practice that is rooted in traditional and contemporary/forms from the African continent and the Diaspora. We will examine the international impact of countries who achieved independence from Europe in the late 1950's-1990s such as Les Ballets Africain, National Dance Company of Senegal, Bembeya Jazz, Ghana Dance Ensemble, and the national dance and music companies of Zimbabwe, Jamaica, and Cuba. Our study will include the impact of artists such as James Brown, Miriam Makeba, Michael Jackson, and Youssou N'Dour, as well as Hip Hop culture and the emergence of new forms of music and dance or modern folklore.

Requirements/Evaluation: student progress with music and dance material taught, quality of assigned short papers, quality of research and performance midterm and final projects

Prerequisites: Any of the following courses offer students preparation or experience DANC 100, 201, 202; MUS 111, 117, 120, 211, 222, 233; AFR 193, 200, 223, experience in a campus-based dance or music ensemble or permission of the instructors

Enrollment Limit: 14

AFR 331 (S) Black Masculinities (DPE)

Cross-listings: AMST 350 ENGL 375 WGSS 318 AFR 331

Secondary Cross-listing

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such

as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men's sexuality inform representations of Black masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Requirements/Evaluation: students will be responsible for 2 short papers and a final project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: WGSS Majors will get preference, then Juniors and Seniors

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

AFR 333 (S) New Asian American, African American, Native American, and Latina/o Writing

Cross-listings: AMST 403 AFR 333 LATS 403

Secondary Cross-listing

The most exciting and forward-thinking writing in the English language today is being done by formally experimental writers of color. Their texts push the boundaries of aesthetic form while simultaneously engaging questions of culture, politics, and history. This course argues not only for the centrality of minority experimental work to English literature but a fundamental rethinking of English literary studies so as to confront the field's imbedded assumptions about race, a legacy of British colonialism, and to make the idea of the aesthetic more open to ideas generated in critical race studies, diaspora studies, American studies, and those fields that grapple more directly with history and politics. In the critical realms of English, work by minority writers is often relegated to its own segregated spaces, categorized by ethnic identity, or tokenized as "add-ons" to more "central" or "fundamental" categories of literature (such as Modernism, poetics, the avant-garde). Recent work by Asian American, African American, Native American and Latino/a writers challenges our assumptions and preconceptions about ethnic literature, American literature, English literature, formal experimentation, genre categorization, and so on. This writing forces us to examine our received notions about literature, literary methodologies, and race. Close reading need not be opposed to critical analyses of ideologies. Formal experimentation need not be opposed to racial identity nor should it be divorced from history and politics, even, or especially, a radical politics.

Requirements/Evaluation: one shorter paper (7-8 pp.), one final paper or creative project (10-12 pp.), two short response papers, a presentation, and participation

AFR 336 (S) Blackness, Theater, Theatricality

Cross-listings: ENGL 316 AFR 336

Secondary Cross-listing

Representations of African American life have pervaded the various genres and tiers of American culture, embodying a carnival of competing attitudes and perspectives. Many oddities and ironies result from this curious history. For example, African Americans as theatrical figures enter American consciousness via the minstrel stage, where white entertainers wearing burnt cork lampooned Negroes to amuse white audiences. Eventually, black performers created their own versions of minstrelsy, black playwrights created dramas more sympathetic to black life, and representations of black life proliferated in every noteworthy medium. This course will consider how attitudes about blackness have informed or deformed theatrical representations of African American life. It will examine major texts by African American writers, considering both their social importance and their aesthetic experiments and innovations. It will range from politically oriented works of social realism such as Theodore Ward's *Big White Fog* and Lorraine Hansberry's *A Raisin in the Sun* to expressionistic protest works like Amiri Baraka's *Dutchman and Slave Ship* and Ntozake Shange's *For Colored Girls* to August Wilson's earnest histories and the post-modern satires of Adrienne Kennedy and Suzan-Lori Parks. Alongside these, we will also consider a variety of comic traditions, ranging from minstrelsy to Spike Lee's film *Bamboozled* and characters created by comedians such as Jackie "Moms" Mabley and Richard Pryor. And how should we assess *Porgy*, a play by the white writer Dubose Heyward, which evolved into America's greatest opera, *Porgy and Bess*? This course will be an ongoing inquiry into the riotous theatricality of American blackness.

Class Format: seminar

Requirements/Evaluation: journal, a 15-page final paper

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: facilitated class discussion; weekly critical response papers; creative projects

AFR 339 (S) Black Counterpublic Sphere in Early America (DPE)

Cross-listings: ENGL 339 AFR 339

Secondary Cross-listing

This course examines the emergence of black writing and chronicles the major movements of African American print culture from the early American republic to the antebellum era. We will investigate what Joanna Brooks identifies as a distinct tradition of black publication, or a black print "counterpublic" sphere, and determine how this counterpublic emerges around questions of agency, humanity, and the law. We also will consider its role in setting and sustaining communal and intellectual agendas for black people through our engagement with such questions as: how did print culture become central to liberation efforts in early America? And how did black people participate through print in the making of the early republic and the transatlantic exchange of ideas? We will discuss such authors as Briton Hammon, Phillis Wheatley, and Olaudah Equiano. Collaborating with Williams College Special Collections, we will analyze a broad range of literary forms and documents (e.g. pamphlets, orations, epistles, and sermons) and study the institutions that made early black print publication possible.

Requirements/Evaluation: three critical response papers of two pages each and a culminating research project with Special Collections

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Expected Class Size: 25

AFR 341 (S) Caste, Race, Hierarchy

Cross-listings: ANTH 341 AFR 341 ASST 341 GBST 341

Secondary Cross-listing

Caste in India looms large in global social thought as a kind of benchmark against which hierarchical social systems across the world are measured. This prominence has much to do with British colonial ideologies of rule, but it also has a deeper and different history: the Buddha compared caste to Greek slavery, early modern Jesuits related it to the system of European estates, and since the nineteenth century, anti-caste radicals from Dalit, or "untouchable," backgrounds have drawn a sustained comparison between the forms of oppression they face and those with which African Americans contend in the United States. Reciprocally, thinkers from W.E.B. DuBois to Toni Morrison have deployed the category of caste in their writings on race. What can the study of caste in postcolonial South Asia contribute to global debates over the persistence of "traditional" forms of social hierarchy? What are the stakes of bringing caste and race into the same conversation, and what are the implications of refusing to do so? In this seminar we will acquire a thorough grounding in the anthropological literature on caste and then investigate the politics of the caste-race comparison over the last hundred years. Assignments include weekly postings of 1-page critical response papers and either a research paper or an interview-based, ethnographic final project examining "caste" in one's own community.

Class Format: seminar

Requirements/Evaluation: weekly postings of 1-page critical response papers and research paper or ethnographic final project

AFR 342 (S) Racial Capitalism (DPE)

Cross-listings: AMST 440 AFR 342

Secondary Cross-listing

This class will interrogate the ways in which capitalist economies have "always and everywhere" relied upon forms of racist domination and exclusion. Although the United States will be in the foreground, the subject requires an international perspective by its very nature. We will consider the ways in

which the violent expropriation of land from the indigenous peoples of the Americas, paired with chattel slavery and other coercive forms of labor, made possible the rise of a capitalist world economy centered in Europe during the early modern period. We will then explore ways racial divisions have undermined the potential for unified movements of poor and working people to challenge the prerogatives of wealthy citizens, and served to excuse imperial violence waged in the name of securing resources and "opening markets". Ideas about gender and sexuality always undergird racial imaginaries, so we will study, for instance, the ways rhetoric about "welfare queens" has impacted public assistance programs, and claims about the embodiment of Asian women play into the international division of labor. We will also be attentive to the means - from interracial unionism to national liberation struggles - by which subjects of racial capitalism have resisted its dehumanizing effects. This is a reading intensive course that will challenge students to synthesize historical knowledge with concepts drawn from scholars working in the traditions of Marxist, decolonial, and materialist feminist thought, including: Angela Davis, Cedric Robinson, Anibal Quijano, Chandra Mohanty, David Roediger, Stuart Hall, Ruth Wilson Gilmore, and Silvia Federici

Class Format: seminar

Requirements/Evaluation: attendance and participation; a written mid-term exam; one in-class presentation; research paper proposal; 12-16 page research paper

Prerequisites: previous course work in race and ethnicity, critical studies in neoliberalism or political economy, or permission of the instructor

AFR 345 (S) Race and Feeling in Twentieth Century Literature

Cross-listings: AFR 345 ENGL 342

Secondary Cross-listing

Although we now take for granted that race is socially constructed, the terrain of racial feeling is less certain. In this course, we recognize that states of feeling are also socially constructed; they are marked and shaped by race and other categories. Questions concerning the circulation of feeling between individuals and their generative possibilities have preoccupied sociologists, psychologists, and literary theorists since the mid-1990s, and we will take up where they left off. In this course, we will study the ways in which literary representations of shame in African American literature offer insight into the interior lives of individuals who have been stigmatized by histories of disempowerment, trauma, and the real or imagined racialized gaze. We will analyze the influence of shame in works by such authors as James Weldon Johnson, Nella Larsen, Alice Walker, James Baldwin, Sherley Anne Williams, Phyllis J. Perry, Toni Morrison, and E. Lynn Harris, and we will engage the ways in which shame, and its correlative feelings --- guilt, pride, humiliation, and love --- emerge in texts through various formal and aesthetic choices. We will also engage such theorists as Eve Kosofsky Sedgwick, Sara Ahmed, Sianne Ngai, Heather Love, Darieck Scott, Erving Goffman, and Melissa Harris-Perry to assist us in our inquiry into the intersections of race, feeling, and literature.

Requirements/Evaluation: active class participation, two short essays of scholarly commentary on critical theory, midterm exam, 8- to 10-page paper

AFR 346 (S) Modern Brazil (DPE)

Cross-listings: AFR 346 HIST 346

Secondary Cross-listing

Brazil has been the "country of the future" longer than it has been an independent nation. Soon after Europeans descended on its shores, Brazil was hailed as a land of resources so rich and diverse that they would inevitably produce great wealth and global power for its inhabitants. Although this has often contributed to an exaggerated patriotism, it has also fostered ambiguity-for if the label suggests Brazil's potential, it also underlines the country's failure to live up to that promise. This course will examine Brazil's modern history by taking up major themes from Independence to the present. Beginning with a "bloodless" independence that sparked massive civil wars, we will analyze the hierarchies that have characterized Brazilian society. The course will give particular attention to themes of race, gender, sexuality, and citizenship; national culture and modernity; and democracy and authoritarianism in social and political relations.

Class Format: discussion

Requirements/Evaluation: class participation will count for 20% of final grade; each of two 5-page papers will count for 25%; and a final 8- to 10-page paper will count for 30%

Prerequisites: none; open to first-year students with instructors permission

"My pessimism was stronger than my longing," wrote Saidiya Hartman in her genre-breaking *Lose Your Mother* in her search for the afterlife of kinship in the remains of a Ghanaian slave fort. In this course we will discuss a mixture of contradictory "bad" feelings burdening the individual and the collective; for example, how hope and desire compete in Hartman's statement with habituated disappointment and exhaustion. How do black subjects creatively overcome the racial foreclosure to write and recite violence, rage, refusal, anxiety, depression, idleness, grief, silence, etc.? And, further, how do we make sense of the sorts of affects that become negative when practiced by black subjects, such as love, empathy, and desire? Together, we will explore interventions by critical theorists of blackness, gender, and sexuality including Saidiya Hartman, Darieck Scott, Abdul JanMohamed, Christina Sharpe, Frantz Fanon, Ann Cvetkovich, Heather Love, and Lauren Berlant to assist us in confronting the sometimes perilous terrain of negative expression for black subjects. Primary texts will include work by Toni Morrison, James Baldwin, Kara Walker, Jamaica Kincaid, and Richard Wright. This course will be driven by student discussion and collaboration.

Requirements/Evaluation: one 10 page paper, one four page paper, engaged feedback process, presentations, thoughtful class participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: none

AFR 348 (S) The Black Radical Tradition

Cross-listings: AFR 348 PSCI 348 LEAD 348

Primary Cross-listing

The black radical tradition is a modern tradition of thought and action begun after transatlantic slavery's advent. Contemporary social science and the humanities overwhelmingly portray it as a critique of black politics in the latter's liberal, libertarian, and conservative forms. This tutorial unsettles that framing, first by situating the black radical tradition as a species of black politics, and second through expanding the boundaries of black politics beyond the United States. Central to the black radical tradition's architecture are inquiries into the concepts of freedom, race, equality, rights, and humanism; meaning of "radical"; the national-transnational relationship; notions of leadership; status of global capitalism; the nexus of theory and praxis; and revolutionary politics. We begin with examinations of these central notions and debates, and then move to investigations of the political thought of four key late modern Afro-Caribbean and African-American thinkers within the tradition: Walter Rodney, Sylvia Wynter, Cedric Robinson, and Angela Davis.

Requirements/Evaluation: attendance; five 5-page essays, five 2-page critiques, and one 1-page essay for the final class

Prerequisites: none; open to all

Enrollment Limit: 10

Enrollment Preferences: Africana Studies concentrators, Leadership Studies concentrators, and Political Science majors

AFR 351 (S) Spirits of Rebellion: The L.A. Rebellion Filmmakers

Cross-listings: AFR 351 AMST 359 ENGL 357

Secondary Cross-listing

When Beyoncé unveiled the *Lemonade* visual album in 2016, her production captured the artistic spirit and gave new life to an earlier work: Julie Dash's *Daughters of the Dust* (1991), a luminous film about three generations of the Gullah people and the first motion picture by a Black woman to obtain wide theatrical release in the United States. Many, however, are unaware of the decades-long cinematic movement to which Dash belongs. In this course, we will devote our critical inquiry to the creative output of the L.A. Rebellion, a group of Black cinematic artists trained at the UCLA Film and Television School between the 1960s and 1990s. Our visual journey will take us through a diverse set of filmmakers like Charles Burnett, Ben Caldwell, Barbara McCullough, Julie Dash, Zeinabu irene Davis, Haile Gerima, Aliile Sharon Larkin, Billy Woodberry, among many, many others, and how they sought to not only redefine the Black image on-screen but also reimagine the infinite possibilities of Blackness. We will pay close attention to the heterogeneity of genres, styles, and techniques that they put into practice from narrative to neorealism to documentary to avant-garde/experimental to African and African American musical and storytelling traditions. We will explore the various social and political issues that were represented by their films including: racial and class oppression, woman of color feminisms, Black Power, Afrocentrism, anti-colonialism and decolonization, police brutality and mass incarceration, radical social movements and coalition building, and the importance of community-based art and film practices. Finally, we will touch upon some of the recent works that have been inspired by the L.A. Rebellion, including the aforementioned *Lemonade* and Barry Jenkins' *Moonlight* (2016). Our viewership will be supplemented with readings in Black social and cultural criticism.

Requirements/Evaluation: attendance and participation; weekly online journal responses (1-2 pages); midterm essay (5-7 pages); final project

AFR 352 (S) Mystic Spirituality in Black Women's Social Justice Activism: Brazil-USA

Cross-listings: REL 352 WGSS 352 AFR 352

Primary Cross-listing

This course examines the meanings and manifestations of mystic spirituality in the lives and work of selected Black women artists/activists in the USA and Brazil. The writings of Lucille Clifton (poet), Rosemarie Freeney Harding (activist and counselor) and Makota Valdina Pinto (activist and Candomblé ritual elder) are key texts for our exploration of the uses of mystic sensibilities and Afro-Atlantic ritual traditions--such as dreams and visions, prayer, divination, sacred dance, healing rites and other forms of unmediated intimate encounter with the sacred--as resources for creativity,

community organizing, self-care and as aspects of political and social critique in African American and Afro-Brazilian contexts. The methodology of the course blends historical, literary and womanist approaches in an investigation of the conjunctions of spiritual practice and activism in the experience of women in the Afro-Atlantic diaspora.

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages) and a final project

AFR 354 (F) Black Literary and Cultural Theories

Cross-listings: ENGL 410 AFR 410 AFR 354 COMP 410 AMST 410

Secondary Cross-listing

This course will examine the writings of black twentieth- and twenty-first-century Anglophone and Francophone literary and cultural theorists in the African diaspora. We will begin with Sojourner Truth and W.E.B. Du Bois and end with current debates between the "Afro-Pessimists" and "Afro-Optimists." We will be reading writers from the United States, Britain, Africa, the Caribbean, and Europe, moving through the writings of the Harlem Renaissance, Négritude, Pan-Africanism, the Black Arts movement and Black Panthers, the Black Atlantic, and black feminism and queer studies. We will come to see that there is no easy separation between questions of politics (e.g., anti-colonialist, anti-racist, anti-capitalist) and those of aesthetics and poetics.

Class Format: seminar

Requirements/Evaluation: midterm, participation (attendance, discussions, GLOW posts), short paper (4-5 pp.), two response papers (2-3 pp. papers), final project (10-12 pp.: analytical paper)

AFR 356 (F) The Plantation and Its Afterlife

This course is a meditation on the significance of the plantation in modern life. Rather than treating the plantation as solely a socio-economic formation that utilizes captive labor for the efficient production of goods, we will consider the plantation as a space that has defined, and continues to define, social, economic, and spatial relations. In so doing, we will explore numerous literatures and cultural productions about the plantation in Africa and its diaspora, including historical and sociological studies, fiction, visual art, and music. We will not only interrogate how the plantation form is reproduced over time, but also how it appears in collective memory, and how it enables political mobilization.

Requirements/Evaluation: class participation; two to three short papers (6- to 8-pages); and a 15- to 20-page paper or multimedia final project

Prerequisites: none

Not offered current academic year

AFR 357 (S) Racial and Religious Mixture (DPE)

Cross-listings: AMST 327 AFR 357 LATS 327 REL 314

Secondary Cross-listing

The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies.

Class Format: mostly discussion

Requirements/Evaluation: participation, short writing exercises, a 3-page first essay, a 5- to 8-page second essay, and a 10- to 14-page final paper

Prerequisites: none

AFR 360 (F) The Political Thought of Frantz Fanon (WS)

Cross-listings: LEAD 360 PHIL 360 PSCI 370 AFR 360

Primary Cross-listing

Martinican psychiatrist, philosopher, and revolutionary Frantz Fanon was among the leading critical theorists and Africana thinkers of the twentieth century. Fanon ushered in the decolonial turn in critical theory, a move calling on those both within and outside of Europe to challenge the coloniality of the age and to forge a new vision of politics in the postcolonial period. This course is an advanced seminar devoted to a comprehensive examination of Fanon's political thought. We will begin with an analysis of primary texts by Fanon and end by considering how Fanon has been interpreted by his contemporaries as well as activists and critical theorists writing today.

Requirements/Evaluation: attendance and participation, weekly online reading response papers, a class presentation, two 7-page essays, and one 20-page final research paper

AFR 368 (F) The Diasporic Impulse in African American Art

Cross-listings: COMP 367 AFR 368

Primary Cross-listing

Since the mid-20th century, growing numbers of African American artists have explored historical, symbolic, and ritual meanings shared by Blacks in the USA and people of African descent in other parts of the diaspora. Using specific visual, musical, literary, and kinetic themes, Black creatives--across genres--develop work that addresses explicit and implicit points of diasporic connection around issues of identity, indigenous/ancestral wisdom, cultural and political critique, and alternative religious orientations. Looking especially at the work of playwright August Wilson, painters John Biggers and Daniel Minter, dancer Katherine Dunham, and sculptor Elizabeth Catlett Mora, this course examines the symbolic and ritual vocabularies of African American art in diasporic perspective.

Requirements/Evaluation: class participation, two to three short papers (5-7 pages), and a final project

AFR 369 (S) African Art and the Western Museum (DPE) (WS)

Cross-listings: AFR 369 ARTH 308

Secondary Cross-listing

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

Requirements/Evaluation: field trips to area museums, targeted writing assignments 5-7 pages in length, and peer response papers (two of each type per month)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History and African Studies Majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

AFR 370 (F) The Caribbean and the World: 1945-1968

The ending of the Second World War in 1945 coincided with the dawn of a new nationalism in the modern Caribbean. The British territories were beginning their shift away from colonialism and charting a path toward independence that would arrive in the early 1960s. Their independent neighbors contended with US imperialism which greatly shaped questions of race, nationalism, and sovereignty. By the 1960s much of the region faced crises that grew out of the tensions of the postwar period. This course examines closely these transformations in the Caribbean. It is divided into three parts. The course begins with an examination of the ideas about race, state development and empire that dominated Caribbean intellectual discourse of the 1940s. Key texts for this period include the works of Caribbean intellectuals such as Roger Mais, Una Marson, CLR James, and Jacques Roumain who considered the possibilities of racial equality and democracy in the postcolonial Caribbean. The course then looks more closely at 1950s attempts to forge greater Caribbean unity during the early Cold War years. West Indian Federation and the circuits of travel within the Caribbean are given

special focus. Finally, the course will discuss challenges of the postcolonial Caribbean by looking at the circumstances and wider responses to regional radicalism in the 1960s. The key events that will be examined in this section include the Duvalier dictatorship, the Cuban Missile Crisis, and black power in Jamaica in 1968.

AFR 378 (S) Uncontrollable: Deconstructing Stereotypes of Black Womanhood in the Americas

Cross-listings: WGSS 378 AFR 378

Primary Cross-listing

In *Black Feminist Thought* Patricia Hill Collins powerfully illustrates how "portraying African-American women as stereotypical mammies, matriarchs, welfare recipients, and hot mommas has been essential to the political economy of domination fostering Black women's oppression." This course explores how similar social constructions of race and womanhood have evolved in Latin American countries affected by slavery and colonialism. We begin by revisiting Collins' seminal text, as well as the work of other feminist scholars, as a starting point from which to deconstruct controlling images of Black women in Latin American nations. We will then explore clips from films, television series, advertisements, and comic strips to analyze different iterations of stereotypes and their impact on Afro-Latin American women's life chances. The second component of this course will engage with Black women's resistance throughout Latin America. We will engage songs, poetry, and empirical data on Black women's resistance to examine they how have and continue to challenge stereotypes, educate the public, and construct their own narratives of black womanhood.

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a final paper (12-15 pages)

AFR 382 (S) Contemporary Afro-Latin American Social Movements

This seminar course will provide students with an introduction to diverse histories, political beliefs, and mobilization strategies of 20th and 21st century Afro-Latin American social movements, as well as their relationship with their respective governments. Primary documents, audiovisual texts and social science research will complement lectures and class discussions to prepare students to discuss the contributions and critiques of the movements within broader discussions of the politics of blackness in the African Diaspora. While the course focuses on contemporary experiences activism, each topic is introduced with a historical overview of African-descended peoples in Latin America. By the course's conclusion, students should be able to discuss a wide range of ideas, experiences, and strategies of black politics in the Latin America as well as the similarities in themes and characteristics that have shaped much of the experiences. Furthermore, students should be able to assess the ways in which black movements in Latin America have: challenged hegemonic narratives, approached politics of culture and multiculturalism, contested invisibility, utilized transnational

diasporic politics, and (re)defined conceptualizations of citizenship and belonging.

Cross-listings: ENGL 391 AFR 386

Primary Cross-listing

This seminar will focus on the ways in which texts create nuanced representations of democratic ideals and practices as well as, of course, representations of the failures of democratic ideals and practices. Our goal will be to explore how literature encourages readers to think about democracy, and what impact that can have on our lives as readers and citizens. To this end, we will study work across five genres--poetry, fiction, non-fiction, photography, and film--to arrange and enhance our sense of how plot, structure, figuration, and allusion occupy themselves with the challenge of the Democratic Vista: which is to say with visions of what democracy is, has been, and has the potential be. Among the texts and authors likely to be studied are Robert Hayden, Ralph Ellison, Toni Morrison, Don DeLillo, Jamaica Kincaid, Ishion Hutchinson, Natalie Diaz, Octavia Butler, Colson Whitehead, Morgan Parker, Nana Kwame Adjei-Brenyahm Teju Cole, and contemporary films such as Ryan Coogler's BLACK PANTHER and Boots Riley's SORRY TO BOTHER YOU.

Requirements/Evaluation: attendance and participation, two short essays, and a 12- to 15-page final paper; additional requirements will include film screenings outside of class, interactive (e.g., Skype, etc.) author visits inside of class, and campus talks germane to the seminar

Prerequisites: none, open to all students

Enrollment Limit: 15

Enrollment Preferences: Africana Studies concentrators and English majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 405 (S) CAPSTONE: Africana Studies and the Disciplines

Of the many things that distinguish Africana Studies from other fields of knowledge, most remarkable are its creative uses and critiques of disciplinary perspectives. In some instances, a scholar in the field might move between disciplines; in others, a scholar might integrate two or more disciplines into one point of view. Disciplinary creativity accommodates the array of information--written texts, music, visual art, film--that contributes to our understanding of the African Diaspora. This seminar will illuminate the disciplinary nuances and challenges of studying people of African descent. After outlining genealogies of Africana Studies and the field's complicated relationships to social science disciplines, students will closely read classic texts by some of the pioneers in the field and explore their uses of disciplinary perspectives. In the latter half of the course, students will have the opportunity to design and conduct their own research projects with the aforementioned disciplinary concerns in mind.

Requirements/Evaluation: class participation, a couple of short papers and the completion of a final research paper or project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

AFR 440 (F) CAPSTONE: Performing Blackness

In modern parlance and scholarship, blackness is understood not as a biological but rather a socially constructed phenomenon. This course extends common perceptions by working from the foundational concept that blackness is not only social construction but also performance and lived experience. Using the lens of performance on racial identity foregrounds the active and shifting nature of race in contrast to the potentially passive, static connotation of construction. But what is this term performance that is now so widely used as to be an anathema? In this course, we explore performance broadly as entertainment, representation, social function, and lived experience. By the end of the course, students will analyze multiple performance types from theatrical and dance performance to performance of race in everyday life. They will also study and practice at least four core black performance studies methodologies: oral interpretation of literature, ethnography, written performance analysis, and embodied performance (i.e. movement, music and/or theatre). In this way, students will begin to understand performance as both subject matter and method. The course will be structured around discussions, written responses, and performance exercises that help students analyze and practice each methodology. At the end of the semester, students will create final creative research projects that articulate key theories of black performance studies and draw on at least one of the featured performance methodologies. While preference is given to Africana Studies concentrators, students are not required to have prior performance experience.

Requirements/Evaluation: class participation, performance exercises, response papers, and a final creative research project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Africana Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

AFR 450 (S) CAPSTONE: Sylvia Wynter, Black Lives, and Struggle for the Human

Cross-listings: AFR 450 PSCI 372

Primary Cross-listing

How do we judge the value of life? What is the significance of death and arbitrary threats to our existence? Why probe modern notions of black and blackness? What defines optimism, pessimism, enslavement, freedom, creativity, and being human? Do black lives matter? This capstone seminar will explore these and related questions through an examination of the life and work of Jamaican novelist, playwright, cultural critic, and philosopher Sylvia Wynter. Methodologically interdisciplinary, the course shall examine written and audiovisual texts that explore Wynter's inquiries into the central seminar queries. We will study figures and movements for black lives whose geopolitics frame the milieu of Wynter's work. Our examination of intellectuals and activists, with their explicit and implicit engagements with Wynter, shall facilitate assessing the possibilities, challenges, and visions of black living. We will also explore the current implications of Wynter's thought for Africana political theory, Afro-futurism, social justice, human rights, and critiques of liberal humanism. In the latter half of the course, students will have the opportunity to design, conduct, and present their own final research projects.

Requirements/Evaluation: attendance and participation; a 7-page midterm essay; a literature review essay; and a final research project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Africana Studies concentrators and Political Science majors

AFR 476 (F) CAPSTONE: Black Radicalism

Cross-listings: AFR 476 HIST 476

Primary Cross-listing

Amandla! Black Power! Venceremos! A Luta Continua! Ever since the end of slavery--brought about by the Haitian Revolution, slave rebellions, maroons, Quilombos, Civil War and various other means of resistance--transatlantic people of African descent have demanded radical change in the organization of modern societies. Their struggles and ideas have changed the ways we think and study--through the formation of Africana/African-American/Black-Studies--and the ways in which we express ideas--through the creation of rich traditions of music, dance, theater, poetry, carnivals, sculpture, and art that have acted as global conduits of cultures of resistance. In this Senior Seminar, we will study the most tumultuous period of Black radicalism in the 1960's, focusing on the Black Panther Party, the League of Revolutionary Black Workers, the Third World Women's Alliance/Angela Davis, and Caribbean and African radical movements, with an eye to examining their relevance to Black radical movements today.

Requirements/Evaluation: student participation, a take-home mid-term paper, and the completion of an original research paper or project; all projects will have some written component, but may include a dance performance, spoken word, fieldwork, etc.

Prerequisites: none; open to all

Enrollment Limit: 15

AMERICAN STUDIES (Div II)

Chair: Senior Lecturer Cassandra Cleghorn

- Hossein Ayazi, Visiting Assistant Professor of American Studies
- Rashida K. Braggs, Associate Professor of Africana Studies and Faculty Affiliate in Comparative Literature and American Studies; affiliated with: American Studies Program
- Maria Elena Cepeda, Chair and Professor of Latina/o Studies; affiliated with: Women, Gender & Sexuality Study, American Studies Program
- Cassandra J. Cleghorn, Chair and Senior Lecturer in American Studies and English, Chair of American Studies Program; affiliated with: American Studies Program
- Nicolas C. Howe, Associate Professor of Environmental Studies and Faculty Affiliate in Anthropology and Sociology; affiliated with: Anthropology and Sociology, American Studies Program; on leave 2019-2020
- Anthony Y. Kim, Visiting Assistant Professor of American Studies
- Eli Nelson, Assistant Professor of American Studies
- Jan Padios, Associate Professor
- Ahmed Ragab, Richmond Visiting Professor; affiliated with: Religion Department, American Studies Program
- Mark T. Reinhardt, Chair and Class of 1956 Professor of American Civilization; affiliated with: American Studies Program
- Dorothy J. Wang, Professor of American Studies

GENERAL PROGRAM DESCRIPTION

The American Studies Program, ten-course major, uses interdisciplinary approaches to develop students' understanding of the complexity of the culture(s) usually labeled "American." Examining history, literature, visual media, performance, and other forms of expression, we explore the processes of cultural definition as contested by diverse individuals and groups. We ask new questions about aspects of American life long taken for granted; we also use American culture as a laboratory for testing classic and contemporary theories about how cultures work.

NON-MAJORS, FIRST-YEAR STUDENTS, AND SOPHOMORES

America: the Nation and Its Discontents, our introductory course, is open to non-majors including first-year students, who are especially encouraged to take the class. All elective courses are open to students who meet the requirements or prerequisites specified in the course description. American Studies 301, the junior seminar required of majors, is open to non-majors with permission of the instructor.

COURSES AND COURSE NUMBERING

American Studies offers courses at all levels. Our 100-level electives, which give preference to first-year students, explore a substantive topic in-depth without seeking to introduce the field as a whole. Our introductory course, AMST 101, explores broad patterns of power and imagination, struggle and social change in American culture but also introduces the interdisciplinary approach and diverse cultural artifacts, genres, and media that distinguish American Studies as a form of inquiry. Both this course and our occasional 200-level electives are appropriate for students at all levels, including first-years. The intermediate electives at the 300-level are offered primarily for juniors and seniors, although, when space and instructor policy permits, they are open to sophomores. All majors are required to take AMST 301, the junior seminar, which teaches students how to employ theories and methods central to the field. The 400-level courses designated as senior seminars are designed for senior majors, though other students (majors and non-majors) with appropriate preparation are typically welcome in these courses as well.

THE MAJOR

Required Courses

American Studies 101, America: the Nation and Its Discontents

American Studies 301, Junior Seminar

One 400-level course designated Senior Seminar

Elective Courses

Seven courses: four should be chosen from your primary specialization field; the remaining three electives must represent each of the remaining three fields, to ensure breadth of your study. At least one of your seven electives should cover pre-1900 American history or culture.

THE DEGREE WITH HONORS IN AMERICAN STUDIES

ELIGIBILITY AND APPLICATION FOR HONORS

Candidates for honors in American Studies will undertake a substantial, year-long, independent project during their senior year. Applicants should have a consistent record of high achievement in courses taken for the major, and normally will have done work in the field of study of their proposed thesis. Students who wish to write or produce an honors project should consult with both the chair and a prospective faculty adviser in the fall or winter of their junior year. Students who wish to pursue honors must submit a brief proposal describing their project to the Chair of the American Studies Program by the time of spring registration of their junior year. Final admission to the honors thesis program will depend on the AMST advisory committee's assessment of the qualifications of the student and the merits and feasibility of the project (including the availability of relevant faculty advisers). If your thesis is approved, you will enroll in AMST 491/Winter Study/AMST 492. These courses, taken together, count as one of your required electives.

TIMELINE FOR AMERICAN STUDIES HONORS THESIS STUDENTS

The fall and winter study deadlines vary widely, depending on your own rhythms, the timing of your meetings with your adviser, etc. The first part of the fall is typically devoted to refining the questions at the heart of your project, and the scope of your argument (including literature review, archival research, etc.) Most students begin this work over the summer. We encourage our students to start writing as soon as possible. Typically, we aim to have students write a draft of one substantive chapter and the introduction by the end of finals week in fall semester, though some have produced two substantive chapter drafts instead.

January is very important. Many pages of new writing and editing of previous work will can be done in this period. Occasionally, seniors will meet together in an informal thesis colloquium. The goal for Winter Study, generally speaking, is to know by the end of it what you will need to write in the last push as Spring semester begins. Your biggest push will come in February and March. All writing and revisions should be done by the end of spring break. Here are the approximate deadlines :

- Immediate after Spring Break: draft of entire thesis is due to your adviser and your two readers;
- Two – three weeks later: deadline for readers to respond to you with comments/suggestions;
- Wednesday of the last week of classes: final version of thesis due to readers.

Senior thesis writers will share their work with interested faculty and students in a public presentation in the last weeks of the spring semester. Designation of Honors or Highest Honors will be decided by the faculty at the end of the semester.

ADVISING

All majors will be assigned a faculty adviser. Majors must meet with their adviser during the first week of classes during the fall semester and at the time of the spring semester registration period in order to have their courses and plans for the American Studies major approved. Both majors and non- majors are encouraged to talk at any time with the program chair or other affiliated faculty about the major.

AMERICAN STUDIES AND OTHER PROGRAMS

Students majoring in American Studies are encouraged to consider pursuing concentrations in Africana Studies, Environmental Studies, Latina/o Studies, Performance Studies, and Women's, Gender and Sexuality Studies. Many of the courses counted for those concentrations may also earn credit toward the American Studies major.

STUDY AWAY FROM WILLIAMS

We encourage students to pursue cross-cultural comparative studies. A major in American Studies can be combined with study away from Williams for a semester or a year if plans are made carefully. Many courses that will be approved for College credit may also count toward the American Studies major. Many of the courses offered by Williams at Mystic Program also count toward the major. Please see the chair if you have questions about how your study abroad may enhance your American Studies experience.

Students planning to be away in the junior year should have taken American Studies 101 before they leave; those who can take the Junior Seminar before they go away are strongly encouraged to do so. Students should consult as early as possible with the chair or their adviser about their plans for fulfilling the requirements of the major.

SPECIALIZATION FIELDS

To provide focus for work in the major, each student will choose one of the specialization fields listed below and record this choice when registering for the major. (This commitment can be revised, in consultation with the chair.) At least four electives should be taken from this primary field.

ARTS IN CONTEXT

This specialization is for students interested in American arts, literature and media. Its approaches are interdisciplinary: it trains students to examine cultural artifacts with attention to aesthetic form and to the contexts—historical, social, political—that determine and situate those forms.

Broadly, it asks how history has shaped the arts and media and how the arts and media have shaped how we think and who we are. Students in this specialization take courses across a range of genres and media: poetry, fiction, music, film and video, pop culture, visual culture, performance, experimental and activist art.

Elective Courses

Students may check with the program chair to see if other courses not listed here might count as electives.

COMPARATIVE STUDIES IN RACE, ETHNICITY, AND DIASPORA

This interdisciplinary specialization examines the role of race, ethnicity, and diasporic movements in the construction of American identities. Students explore how experiences and concepts of race and ethnicity are transformed through the processes of diaspora and immigration. These courses may encompass a broad spectrum of fields such as history, literature, religion, politics, anthropology, gender studies, media and the performing arts, among others. NOTE: Concentrators in this area are required to take a combination of courses that will allow them to comparatively assess the experiences of at least two ethno-racial groups in the Americas.

CRITICAL AND CULTURAL THEORY

Critical and cultural theory is for students who want their American Studies work to combine philosophy, aesthetics, and social thought. Its approach is methodological, conceptual, and problem-driven. Students combine courses in feminist theory, anti-imperial and postcolonial theory,

literary theory, critical race theory, queer theory, psychoanalysis, Marxism, and other counter-traditions in political theory and philosophy.

AMST 101 (F)(S) America: The Nation and Its Discontents (DPE) (WS)

America has always named something more than a geographical place; being "American" has always been about something more than political citizenship. This course is an introduction to the interdisciplinary study of American culture and the nation of the United States. We will focus on the workings of that culture and nation as they both shape and have been shaped by factors such as race, ethnicity, class, gender, sexuality, place, and religion. Over the semester, we will ask critical questions of a wide variety of materials: essays, novels, autobiographies, poems, photographs, films, music, visual art, architecture, urban plans, historical documents and legal texts. We critique notions of American exceptionalism, empire, power, citizenship, labor, borders, inequality, assimilation, aesthetic form, and the role of the U.S. and its products in the world.

Requirements/Evaluation: total of 20 pages of writing: several short papers (2-3 pages), as well as several 5- to 7-page essays; drafts and revisions are built into the assignment schedule

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: first- and second-year students

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

Difference, Power, and Equity Notes: This course satisfies the DPE requirement in its constant interrogation of historical patterns of unequal access to power, wealth, citizenship, and education in the U.S., and in its recognition and analysis of forms of resistance to and corrections of such inequities.

Attributes: EXPE Experiential Education Courses

AMST 105 (F)(S) American Girlhoods (DPE) (WS)

Cross-listings: WGSS 105 ENGL 105 AMST 105

Secondary Cross-listing

The image of the girl has captivated North American writers, commentators, artists, and creators of popular culture for at least the last two centuries. What metaphors, styles of writing, ideas of "manners and morals" does literature about girls explore? What larger cultural and aesthetic concerns are girls made to represent? And how is girlhood articulated alongside and/or intertwined with other identities and identifications, such as race, ethnicity, class, and sexuality? These are some of the issues we will explore in this course.

Requirements/Evaluation: at least 20 pages of writing; short, more informal writing assignments; GLOW posts; class participation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who do not have a 5 on the AP and/or have not previously taken a 100-level English class

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 105 (D2) ENGL 105 (D1) AMST 105 (D2)

Writing Skills Notes: Students do at least 20 pages of writing (4-5 papers) and are required to revise several papers. We also devote significant class time to talking about successful academic writing. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course considers the construction of girlhood in the United States along the axes of race, gender, sexuality, class and more, and the literary history of who, in various moments in America, has even been allowed to claim the privileges of and/or be burdened with the idea of being a girl. It examines how girlhood is represented in relation to (in)equality and power and what kinds of literary and cultural forms writers utilize to illuminate these differences.

AMST 106 (S) Coming of Age in the City: Growing up and Growing Older in Communities of Color (DPE)

This tutorial examines urban life in communities of color through the lens of aging. We will focus on the political and economic dimensions of cities that have profoundly affected the daily collective lives of certain populations from childhood to elderhood. In so doing, we will also consider how age and age relations are highly differentiated by race, class, and gender, as well as how cities are organized and arranged to create and recreate categories and ideas associated with age.

Requirements/Evaluation: five to six 5-page papers, five to six 2-page responses, oral presentations of papers; discussion

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first- and second-years, students considering an American Studies major or Latina/o Studies concentration

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This DPE tutorial foregrounds the significance of age, as it crosscuts with race, class, and gender, in explorations of urban inequality in the United States.

Not offered current academic year

AMST 113 (F) The Feminist Poetry Movement (DPE) (WS)

Cross-listings: ENGL 113 AMST 113 WGSS 113

Secondary Cross-listing

Feminist poetry and feminist politics were so integrated in the 1960s and 1970s in America that critical essays on poets, such as Adrienne Rich and Audre Lorde, appeared in the same handbook that listed such resources for women as rape crisis centers and health clinics. This course will map the crucial alliance between feminist politics (and its major cultural and political gains) and the feminist poetry movement that became a major "tool" for building, organizing, and theorizing second-wave feminism. In order to track this political and poetic revolution, we will take an interdisciplinary approach that brings together historical, critical, and literary documents (including archival ones) and visual products (through the Object Lab of the Williams College Art Museum) that recreate the rich context of the period and help us consider the important social nature of aesthetic production. At the center of the course will be writings of major poets of the period, as well as anthologies and feminist periodicals that published their work and created a significant forum and shared space for women to articulate the politics and poetics of change. These periodicals and anthologies will also help us track the diversity of the feminist poetry movement and its intersection with issues of race, class, ethnicity, and sexuality. Ultimately, we will want to consider how poetry serves as an important tool for thinking through questions of power and injustice and what role it plays in creating necessary imaginative space in the world for expression, critique, and change.

Class Format: discussion, some lecture, project work in archives and art gallery

Requirements/Evaluation: three analysis papers (4-5 pages), creative (1-2 pages), discussion posts (5 pages), curated final project (archival exhibit with 7-page paper), presentations

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 113 (D1) AMST 113 (D2) WGSS 113 (D2)

Writing Skills Notes: Writing skills taught through a series of assignments evenly spaced throughout the semester: weekly p/f discussion posts, three four-to-five-page graded papers, one creative assignment, and a final digital research project (10-page equivalent; peer reviewed). Students receive critical feedback on written assignments a week prior to due date through conferences and Google Docs and on final graded assignments within one week with sufficient time between assignments to improve the next assignment.

Difference, Power, and Equity Notes: The course examines the effects of class, race, ethnicity, gender, and sexuality on both poetry and the movement and how women negotiated their differences within the movement, as well as in response to the dominant patriarchal culture. This course employs critical tools (feminist theory, archival research, poetics, close reading, comparative approaches) to help students question and articulate the social injustices that led to the poetry and poetics of the Women's Liberation Movement.

AMST 114 (S) Of Caravans and Narcos: U.S. Media Narratives about Central and South America (DPE)

Cross-listings: LATS 114 AMST 114

Secondary Cross-listing

What do contemporary U.S. media discourses about Central and South America reveal about relationships of power in the Americas? How does the systematic analysis of visual, textual, and sonic media discourse enhance our comprehension of broader social dynamics? How do South and Central Americans in the diaspora actively counter dominant media narratives about their communities? And what does it mean to center the unique histories, cultures, and political contexts of diasporic Central and South Americans within Latina/o/x Studies? Drawing from a wide range of scholarly materials and media platforms, this interdisciplinary course assumes a transnational approach to these issues, with an emphasis on how to conduct effective discourse analysis of everyday media texts. Above all, we will highlight the ways in which ethno-racial identity, gender, sexuality, class, and nation intersect to inform mainstream U.S. media narratives and our understandings of past and present modes of representation.

Class Format: discussion

Requirements/Evaluation: two short (5- to 7-page) essays; one class presentation; final take-home examination (5-7 pages)

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: LATS concentrators by seniority; AMST majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

LATS 114 (D2) AMST 114 (D2)

Difference, Power, and Equity Notes: This course encourages students to develop critical thinking skills regarding the intersection of categories of difference (including ethno-racial identity, gender, sexuality, class, and nation) employing a variety of scholarly materials and every day media texts. Students will be encouraged to consider past and current relationships of power across the Americas with an eye towards how attitudes towards Central and South Americans shape representations of these communities in the Global North.

AMST 125 (F) Introduction to Asian American Studies

This course will offer students an introduction to the field of Asian American Studies. First, we will examine how history is shaped not only by laws and institutions but more significantly by people and social movements responding to the challenges of war, capitalism, colonialism, imperialism, immigration, globalization, and white supremacy. Secondly, we will pay an immediate attention to the dynamic, narrative intersections of race, ethnicity, class, gender, sexuality, ability, and nationality/citizenship. We will question how the social, political, and economic differences produced by these categories help to make and remake the multiple dimensions of Asian America from within and without. Finally, our discussions will illuminate the contradictions of power and spaces for possibility that emerge in key moments -- namely, how human actors strive to imagine, if not build visions and practices of the world in difference to the master narratives of American history and American exceptionalism. Our study will be supplemented with documentary screenings, oral histories, and personal memoirs.

Requirements/Evaluation: attendance and participation; in-class group presentation; weekly online journal responses; midterm paper (5-7 pages); final creative project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

AMST 126 (F) Black Literature Matters (DPE) (WS)

Cross-listings: ENGL 126 AFR 126 AMST 126

Secondary Cross-listing

Black literature remains central to struggles for freedom and equality across the African diaspora. In this course, we will examine why black literature matters: What are its aesthetic and political imperatives? How have black writers used certain literary forms in their constructions of identity, freedom, and citizenship? Through our exploration of these questions, we will discover the significant matters of African American literature from the Harlem Renaissance moment to the Black Lives Matter movement. By reading a broad range of texts---essays, novels, drama, music, and poetry---by such authors as Alain Locke, Claude McKay, Langston Hughes, Zora Neale Hurston, Richard Wright, James Baldwin, Lorraine Hansberry, Audre Lorde, Amiri Baraka, Nikki Giovanni, Jesmyn Ward, and Kendrick Lamar, we will develop a critical vocabulary for evaluating and engaging with this body of literature. This course contributes to the Difference, Power, and Equity requirement by centering on the relationship between black literature and black political movements from the 1920s to the present.

Requirements/Evaluation: four papers totaling at least 20 pages, active class participation, class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: first-year students who have not taken or placed out of a 100-level English course; Africana Studies concentrators; American Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 126 (D1) AFR 126 (D2) AMST 126 (D1)

Writing Skills Notes: Students will write and receive feedback on four papers. Papers will range from 3 to 7 pages, and feedback will focus on argument/claim development, critical inquiry, and structure.

Difference, Power, and Equity Notes: Through discussions and short essays, students will develop skills for analyzing the role of literature in defining, responding to, and re-shaping issues of race, class, and gender during the Harlem Renaissance, Black Arts and Black Power, and Black Lives Matter movements. Taking its title from the current movement for black lives, a primary objective of this course is for students to develop skills for articulating the value of black aesthetics to social justice movements in the present.

AMST 128 (S) Reading Asian American Literature

Cross-listings: COMP 128 ENGL 128 AMST 128

Primary Cross-listing

Though the category and term "Asian American" came about as a result of political struggle in the 1960s, what we now call Asian American writing in English began in the nineteenth century and has played a significant role in every American literary "movement" from Modernism, realism, protest literature to various avant-gardes, the graphic novel, and digital poetics. This course closely reads a sampling of texts in a variety of genres and styles-produced by writers from various Asian American ethnic groups-from the late nineteenth century to the present and contextualizes them historically, both domestically and globally. We will examine the material, cultural, political, and psychic intersections of larger structural forces with individual writers and texts. Along the way, we will interrogate the notion of "Asian American"--its contradictions, heterogeneous nature, and our

assumptions--and its relation to the idea of "American." Some questions we will ask: "Why have Asian Americans and Asian American writers and writing so often been viewed as 'foreign' or 'alien' to the American body politic and the English-language literary tradition?" "How might Asian American writing be linked to other English-language texts in the Asian diaspora?"

Requirements/Evaluation: six 2-3 pp. papers, participation (attendance, discussion, GLOW posts), and a final project (the final project is 7-9 pages: either a creative project or an analytical paper)

Prerequisites: none

AMST 142 (F) AlterNatives: Indigenous Futurism and Science Fiction (DPE)

Cross-listings: AMST 142 STS 142

Primary Cross-listing

Indigenous people occupy a paradoxical position in time. On one hand, as survivors of genocide and occupation, they are already post-apocalyptic, occupying what many Indigenous thinkers argue is "our ancestor's dystopia." On the other hand, Indigenous people are relegated to the past in settler and colonial discourses, which, in relying heavily on notions of contact, authenticity, and vanishing, preclude Indigenous peoples from not only futurity, but from modernity and associated visions of science and technology too. This tutorial explores how Native science fiction imagines and enacts futurity

from this paradoxical Indigenous temporality. Looking across numerous national and transnational Indigenous contexts, in addition to different kinds of media, including short stories, novels, visual art, video games, films, and online platforms like second life, this tutorial foregrounds the ways in which science fiction functions as a mode of Indigenous theory, knowledge production, and claiming of not only the future but of the past and present, as well. Pairing media readings with works in science fiction and Indigenous studies, we will explore the role of indigeneity in the founding and tropes of European and settler science fiction, Native "slipstream" and eco SF, post-post-apocalyptic thinking, space travel and frontiers, Native pessimism, and Indigenous technologies and epistemologies cast into the future. We will pay careful attention to the political stakes of these narratives and expression for Indigenous sovereignty and self-determination.

Requirements/Evaluation: attendance and participation, weekly 2- to 4-page written responses to class readings, short fiction prompts, and your partner's writing

Prerequisites: permission of instructor

Enrollment Limit: 10

Enrollment Preferences: American Studies majors and Science and Technology Studies concentrators

AMST 146 (F) Introduction to Native American and Indigenous Studies (DPE)

What does it mean to be a citizen of an Indigenous nation? Why are there laws against selling inauthentic Native American art? Who is two spirit and what obligations and politics does that position and identity entail? Where do we locate tradition and Indigenous peoples in time? In this course, we will address these questions and more, surveying indigeneity as it is constructed and expressed in historical narratives, activism and education, governance and identity, art and literature, science and religion, and gender and sexuality. Knowledge of the Indigenous is a foundational element of the United States. From missionaries documenting Indigenous languages, to sports mascots, DNA testing, and even to New Age spirit quests and sweat lodges, the coherence and legitimacy of this settler colonial empire has demanded expertise in and the appropriation of Indigenous bodies, knowledges, and cultures as a means of continually displacing and erasing them. And yet, that is not the only way to produce knowledge of, by, and with Indigenous people. Indigenous Studies provides a variant way of thinking and learning about indigeneity. The imperative of Indigenous Studies is to understand Indigenous peoples on their own terms and the world on those same terms. In this course we will explore not only questions related to Native America today, but also the various reasons and implications for why we study it.

Requirements/Evaluation: attendance and class participation, three 3- to 5-page essays, and one in-class presentation

Prerequisites: none

Gonzo journalism, the nonfiction novel, literary journalism, the "new new journalism": the study of American culture has thrived in the able hands of writers, reformers and amateur anthropologists. This course is an introduction to American writing and culture through the eyes of extraordinary witnesses who work as public intellectuals, addressing a readership that reaches beyond the university. Through essays, films and music we will track the documentary impulse from coast to coast: from Ferguson, Baltimore, Miami, Watts, Denver, Harlem, Chicago, Compton and Sing-Sing prison to the wilds of Alaska and rural Georgia; from mass demonstrations to the most intimate, bedside revelations. How have writers and artists given their audiences tools for understanding power, privilege, and difference in America?

Class Format: seminar

AMST 163 (S) From Wampum to Phillis Wheatley: Communications in Early America (DPE) (WS)

Cross-listings: AMST 163 HIST 163

Secondary Cross-listing

How did the diverse peoples who inhabited early North America communicate with each other, across profound linguistic, cultural, social, and religious differences? This course examines histories of communication in early America and the technologies that communities developed across landscapes of coexistence and also contestation. We will study Indigenous oral traditions, traditional ecological knowledge, and wampum belts as signifiers of identity, meaning, and diplomacy for Native American nations and peoples; artistic and scientific paintings, engravings, and visual culture that moved around the Atlantic World; political orations, newspapers, and pamphlets that galvanized public opinion in the "Age of Revolutions"; stone memorials and monuments that connected communities to ancestral pasts; and the powerful poetry of African American writer Phillis Wheatley along with the orations of Pequot intellectual William Apess. Together we will raise new questions about the meanings and ongoing legacies of early American histories, and grapple with diverse approaches to understanding the past. Additionally, this course provides an opportunity to engage with original materials pertaining to early American histories in the Williams College Archives/Special Collections and Art Museum.

Class Format: discussion

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: limited to first- and second-year students who have not yet taken a 100-level course in History; juniors and seniors only with the permission of the instructor

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

AMST 167 (F) Let Freedom Ring? African Americans and Emancipation (WS)

Cross-listings: AMST 167 AFR 167 HIST 167

Secondary Cross-listing

This course will examine African Americans' transition from slavery to freedom. In the years that encompassed the Civil War and immediately after, most African Americans changed from being legal property, able to be bought, sold, mortgaged, rented out, and leveraged into U.S. citizens, with the Constitutional right to male suffrage. This course examines this transition. How did it come about? To what extent were African Americans able to exercise their rights that the constitution guaranteed? How did Emancipation shape African American family relations, culture and demography? This is a research seminar. We will examine work of historians and discuss the contradictions and nuances of emancipation. Readings will include monographs, scholarly articles and heavy dose of primary sources, as many as possible written by African Americans themselves. Assignments include an original research paper on an aspect of Emancipation. We will devote considerable time throughout the semester to finding primary and secondary sources and on the writing process.

Requirements/Evaluation: research paper, short writing assignments, class participation

Prerequisites: first-years and sophomores

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

AMST 208 (F) Time and Blackness

Cross-listings: REL 262 AMST 208 AFR 208

Secondary Cross-listing

The concept of time is one of the most examined, yet least theorized, concepts in Africana Studies. While the field is saturated with historical studies and literary analyses that take up issues of cultural memory, both of which involve thinking about time, time itself is rarely the subject of sustained inquiry. This may be due to its abstractness as an idea and the level of analysis its conceptualization demands, or because time in the African American experience cannot be understood outside of the meaning of race, which itself is far from tangible. In this tutorial, "Time and Blackness," we will explore how African American writers across a number of genres understand time. We will read select texts of fiction as well as spiritual autobiographies, historical narratives, and sociological studies to understand how writers draw from--and create--paradigms of time to organize their work. The following questions will structure our investigation: What are the constituent elements of time in African American writing? How does race shape the ways a writer conceives of the experience of time? In examining writings across genres, is there something that we can call an identifiable African-American "timescape"?

Requirements/Evaluation: assignments will include six 2-page response papers; two 5-page writing assignments; and a final, 10-page review essay on how time is understood in a genre of writing

Prerequisites: none

Enrollment Limit: 10

AMST 209 (F) Introduction to Black, Brown, and Queer Theory (DPE)

Have you ever tried to relate your experiences, rooted in your own complex identities, history, and social networks, to those of others you perceive as different and perhaps allied, but found you lacked some fundamental vocabulary? This is a common problem, even for critical theorists who take as their object of study political, affective, and epistemological structures of difference and power. Critical race, postcolonial, Indigenous, and queer theories have often centered the relationship between the normative and non-normative, between straight and queer, colonizer and colonized, and white and black. Connections between the differently non-normative can sometimes be pushed to the periphery. But what if we were to center that periphery? What views of complex power structures and new avenues of thought and solidarity would arise if we took as our starting point the social and theoretical interconnectedness and overlap of black, brown, and queer folks? This course will serve as an introduction to critical race, postcolonial, Indigenous, and queer theories as conceptually and phenomenologically interlocking and allied fields. By reading with theorists in all these traditions and at their intersections, we will explore how blackness, indigeneity, and brownness are constructed and function in the context of colonialism and settler colonialism, how differently racialized bodies are sexed and sexualized, and how queerness as method can speak across these issues. No background in critical theory is required for this course. We will focus on how to read and discuss theory, and how to think holistically about the structures that work to keep us divided.

Requirements/Evaluation: attendance and class participation, two 4-page reflection papers, and a final creative project (TBD with instructor) or take-home exam

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

AMST 211 (F) Race and the Environment

Cross-listings: ENVI 211 SOC 211 AMST 211 AFR 211

Secondary Cross-listing

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's *Dumping in Dixie* and David Pellow's *Garbage Wars*. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

Class Format: discussion

AMST 213 (S) Asian-American Identities in Motion (DPE)

Cross-listings: THEA 216 DANC 216 GBST 214 AMST 213

Secondary Cross-listing

The course aims to explore dance and movement-based performances as mediums through which identities in Asian-American (including South Asian) diasporas are cultivated, expressed, and contested. We will examine theories related to nationalism, post-colonialism and diasporic identity-formation, and learn about the socio-historical contexts in which performances are used to maintain cultural continuity. We will explore how diasporic artists use performances to enforce or resist traditional practices and ideologies. Throughout the course, we will investigate issues of race, gender, sexuality, ethnicity, nationality, tradition/innovation, agency/resistance, and borrowing/appropriation among other topics. This is primarily a discussion-based seminar course but will also include attendance at live performances in the area, film screenings, and discussion and workshops with guest artists. No previous dance experience required.

Requirements/Evaluation: reading responses and essays, class participation, and presentations

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

THEA 216 (D1) DANC 216 (D1) GBST 214 (D2) AMST 213 (D2)

Difference, Power, and Equity Notes: This course introduces students to the history of Asian-Americans through an analysis of performances by diasporic artists. Student will explore how race was central to the formation of the American nation, and how social and legal discriminatory practices against people of color influenced US popular culture. The assigned course material provide examples of how diasporic artists address these differences in power relations, hold systems of inequality accountable, and claim agency.

Spring 2020

AMST 214 (F) Performance Ethnography (DPE)

Cross-listings: DANC 214 GBST 215 THEA 215 AMST 214 ANTH 215

Secondary Cross-listing

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement, and performance. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) readings in ethnographic studies of dance and performance practices from different parts of the world, and (iii) field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and may include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance or performance experience is assumed or required.

Class Format: community-based field work

Requirements/Evaluation: class participation, reading responses, fieldwork and field notes, short papers, and final essay

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

DANC 214 (D1) GBST 215 (D2) THEA 215 (D1) AMST 214 (D2) ANTH 215 (D2)

Difference, Power, and Equity Notes: This course focuses on ethnographic research with an emphasis on the ethics of doing ethnography in field sites and making performances based on that research. In fieldwork and performance work, there is a difference in social, cultural, and political (broadly conceived) power between researcher and interlocutors. In the course, students' critical analytical skills are developed for them to be self-reflective about these power differentials and to address issues of social inequality.

AMST 216 (F) Landscape, Place and Power

Cross-listings: ENVI 217 AMST 216

Secondary Cross-listing

How does culture shape the way we imagine, use, and experience the physical environment, and how does the physical environment shape culture in turn? What can landscapes tell us about the values, beliefs, and ideas of the people who make them? What is the relationship between place and social power? This course will explore the various ways in which scholars from a broad range of disciplines have sought to answer these questions by incorporating insights from social theory and cultural criticism. Focusing on studies of place and landscape in the Americas from the time of European colonization to the present, it will examine key works from fields such as cultural geography, environmental history, ecocriticism, environmental philosophy, and anthropology, and it will survey the major methodological and theoretical commitments that unite these fields.

Requirements/Evaluation: three 5- to 7-page essays; several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

Enrollment Limit: 19

AMST 218 (S) Gender and Sexuality in the Neo-slave Narrative (DPE) (WS)

Cross-listings: WGSS 218 AFR 218 ENGL 218 AMST 218

Secondary Cross-listing

Hortense Spillers has noted that ex-slave Harriet Jacobs, "between the lines of her narrative, demarcates a sexuality that is neuterbound" and we live with the aftermath of her observation. "Ungendering," one of the transformations undergone by bodies subjected to the Middle Passage, is one of the keywords that forms the foundation for a conversation about slavery, blackness, gender, sexuality, and archive. Throughout this course we will wrestle with the questions: How does the designation "slave" rupture, reify, or expand our understandings of sexuality and gender? What conditions have necessitated the neo-slave narrative form? Texts include: slave narratives and neo-slave narratives in the forms of novels, visual art, and film. Course texts include: Octavia E. Butler's *Kindred*, Jewelle Gomez's *Gilda Stories*, Glenn Ligon's "Runaways", and Jordan Peele's *Get Out*. Critical theories of blackness, gender, and sexuality are also central texts in this course including that by Darieck Scott, Saidiya Hartman, Hortense Spillers, Matt Richardson, and others. Given that neo-slave narratives intervene in the sexual and gendered silences of slave narratives and the power relations that produced them, students who are hesitant to study sexual violence might consider taking another course.

Requirements/Evaluation: mandatory participation in discussion, four papers including one critical revision (total 20 pages), keyword glossary

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 218 (D2) AFR 218 (D1) ENGL 218 (D1) AMST 218 (D2)

Writing Skills Notes: Three thesis papers at 5 pages each (each receiving critical feedback from professor); one thesis paper revision with critical feedback from professor and peers including one letter of revision explaining the student's revision process; one keyword glossary where students develop rigorous definitions of course key terms; one roundtable discussion based on the final paper. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: This course examines the work of black writers and artists engaged with the archival silences imposed by the power dynamics of racial hierarchy which constrained the birth of African American literature (the slave narrative). In particular, we examine the meaningful/willful/and censorial omissions that shape the treatment of gender and sexuality in these texts including and especially the silences around sexual abuse and sexual assault practiced by beneficiaries of white supremacy.

AMST 221 (F) Introduction to Urban Studies: Shaping and Living the City

Cross-listings: AMST 221 ENVI 221 LATS 220

Secondary Cross-listing

Generally, cities have been described either as vibrant commercial and cultural centers or as violent and decaying urban slums. In an effort to begin to think more critically about cities, this course introduces important topics in the interdisciplinary field of Urban Studies. Specifically, we will discuss concepts and theories used to examine the peoples and structures that make up cities: In what ways do socio-cultural, economic, and political factors

affect urban life and development? How are cities planned and used by various stakeholders (politicians, developers, businesses, and residents)? How do people make meaning of the places they inhabit? We will pay particular attention to the roles of race, ethnicity, class, and gender in understanding and interpreting urban communities. Texts include works by anthropologists, historians, sociologists, cultural critics, cultural geographers, and literary writers.

Class Format: discussion

Requirements/Evaluation: attendance and class participation, several short writing assignments (1-2 pages), two creative group projects and presentations, a midterm essay (6-7 pages) and final essay (8-10 pages)

Prerequisites: none

AMST 223 (F) Eating Empire: Asian/Pacific Islander/American Foodways and Culture (DPE)

"War is probably the single most powerful instrument of dietary change in human experience." --Sidney Mintz. Cans of spam, bars of chocolate, and bubbling pots of military stew. A motley mix of sucrose, sodium, monosodium glutamate, and spices; often overprocessed, constantly repackaged, sometimes illicitly exchanged, and daily consumed. In this course, we will take an interdisciplinary approach to exploring the historical processes, social practices, and cultural politics of food in the age of U.S. empire, mapping out reverse pathways from our palates, plates, counters, and kitchens towards the lands and seas that connect the Americas, the Pacific Islands, and Asia in the 20th and 21st centuries. We will examine food through a range of contexts and case studies, including but not limited to scholarship, (auto)ethnography, literature, film, television, advertising, social media, and blogs. We will ask: how is food entangled within histories and patterns of war, imperialism, settler colonialism, capitalism, diaspora, and migration? What does food tell us about our attachments, investments, and (dis)taste for narratives around democracy and multiculturalism, authenticity and appropriation, gentrification and privilege, "tradition" and change? Finally, how can food help us reimagine the social and political dimensions of the places we live in and nourish pathways to decolonial futures and possibilities? This will be primarily a discussion-based seminar although a minimal amount of cooking may also be required.

Requirements/Evaluation: participation (attendance, discussion, posts), reading responses, short video, fieldwork, final analytical paper/project

Prerequisites: AMST 101

AMST 228 (F) Revolt and Revelation in 20th-Century Americas

Cross-listings: AMST 228 AFR 228 LATS 228 REL 223

Secondary Cross-listing

Writing in 1971, Dominican priest and Peruvian theologian Gustavo Gutierrez asked "Is the Church fulfilling a purely religious role when by its silence or friendly relationships it lends legitimacy to dictatorial and oppressive government?" Such a question encapsulates the sometimes agonistic and other times deeply intertwined relationships between religious institutions, religious thought, and movements for political transformation in the 20th century Americas. This course examines those forms of "God-talk" broadly termed "liberation theologies" that responded to and challenged social relationships of class, colonization, race, culture, gender, sexuality, (dis)ability, and ecology. These theologies were borne out of and in turn deeply shaped struggles against oppressive regimes and structures in the Americas, and as such we will focus on some specific theological writings--such as those of Gutierrez--and their relationship to distinct social movements and struggles over land, economy, and political power, especially in Brazil, El Salvador, Perú, and the United States of America between 1960-2000.

Requirements/Evaluation: participation, short writing exercises, a 5- to 6-page take-home midterm essay, and an 8- to 12-page final review essay

AMST 229 (S) Reel Jesus: Reading the Christian Bible and Film in the U.S.A.

Cross-listings: AMST 229 REL 229

Secondary Cross-listing

In this course we examine some of the ways that Christian biblical narratives have appeared in late twentieth-century and early twenty-first century Hollywood movies, looking in particular at films such as *The Matrix* (1999), *The Passion of the Christ* (2004), *Jesus Christ Superstar* (1973), *The Shawshank Redemption* (1994), *The Omen* (1976), *Children of Men* (2006), and *The Book of Eli* (2010). What are the overt and subtle ways that these films seek to interpret and employ biblical texts? Why do they draw upon the texts they do and read them as they read them? What can cinematic interpretations of biblical texts reveal to us about how these texts are used in broader U.S. culture, especially to crystallize and reflect certain political, economic, ethnic, racial, sexual, and social parameters of U.S. cultures? How does an awareness of this scriptural dimension in a work of "popular culture" affect our interpretation of both the film and the scriptural text's meanings? How do varying interpretations of biblical texts help us to understand cinematic meaning? By assuming that we can read both biblical texts and films in multiple and contradictory ways, this class can use film as the occasion for interpreting, analyzing, and debating the meanings, cultural functions, and affective responses generated by biblical narratives in film. Finally, this course asks us to analyze the implications of ways in which we read texts and films. For this interdisciplinary course we will read selected biblical and extra-canonical texts, including selections from canonical and non-canonical gospels, the letters of Paul, and the book of Revelation, but our focus will be on the way that movies (and the people who make them and watch them) make meaning out of these biblical texts.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation based on participation, short writing exercises (1-pg response papers), one 3-pg analytical essay that will also be revised, a 6-pg synthetic midterm essay, and a final 10-pg review essay

AMST 230 (S) Contemporary American Fiction

Cross-listings: ENGL 229 AMST 230

Secondary Cross-listing

In this course we will read and analyze a selection of fiction written between 1945 and the present, with an emphasis on proving (in the sense of testing) the three terms in the course title. Could John Cheever's "The Enormous Radio" really be contemporary? Is James Baldwin's *Giovanni's Room* American in the same way as Alice Munro's *Dear Life*? And is Michelle Tea's *Black Wave* fiction or something else? Along the way, we'll also ask: What forms and themes define contemporary American fiction? And why should we invest in defining the "contemporary" period at all? Other authors we will study may include: Raymond Carver, Thomas Pynchon, Toni Morrison, Renata Adler, Margaret Atwood, Lydia Davis, Chang Rae Lee, Jennifer Egan, and Colson Whitehead.

Requirements/Evaluation: four papers totaling about 20 pages; participation in class discussions

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

AMST 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237 ARTH 237 SOC 236 AMST 236

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

AMST 237 (F) Islam in the United States: From Black Muslims to the War on Terror

Cross-listings: AMST 237 AFR 237 REL 237

Secondary Cross-listing

Malcolm X is likely the most prominent and influential Muslim figure in the history of the United States. His story represents two fundamental themes in the history of Islam in America: conflict between Muslims over what is "authentic" or "orthodox" Islam; and the ways that American history, politics, and culture determine the contours of "American Islam". This course will explore these two themes through an array of topics in the history of American Islam. In so doing, we will examine the complex relation between religion, politics, and culture in the United States. Beginning with the story of Malcolm X, the Nation of Islam, and other African-American Muslim movements, we will try to understand: What made Islam so appealing to millions of African-Americans throughout the 20th century? And were these genuinely "religious" and "Islamic" movements, or just racial/political "black nationalist" movements in the guise of religion? What counts as legitimately "Islamic", and who gets to decide? We will then move into the latter half of the 20th century and the post-9/11 debates over authentic Islam. What happened to American Muslim communities and organizations after the waves of post-1965 immigration from Muslim countries? How have debates about Muslim identity shifted over time, from being configured in terms of black separatism, to transnational/diasporic identity, to the attempts at articulating an indigenous "American-Muslim" identity? How have national narratives around 9/11 and the "War on Terror" impacted these debates over identity and "true Islam"? And how have these debates intersected with gender, racial, and ethnic politics? Throughout the course, we will be studying historical and anthropological material, autobiographies, novels, documentaries, films, and social media. The course fosters critical thinking about diversity by challenging assumptions of who Muslims are, what being American means, and what Islam is. It also focuses on the complex interaction of different dimensions of diversity, from religion to race, ethnicity, nationality, culture, gender, language, and age.

AMST 238 (F) Zen and the Art of American Literature

Cross-listings: AMST 238 COMP 238 REL 228 ENGL 239

Secondary Cross-listing

In 1844, the Transcendentalist magazine, *The Dial*, published an excerpt from the *Lotus Sutra*, translated into English by Elizabeth Palmer Peabody. It was the first English-language version of any Buddhist text to be published in the United States. At the time, very few Americans knew the first thing about what Buddhism was, but now, a little over a century and a half later, Buddhist ideas and practices seem ubiquitous (available even in the form of apps like Headspace and Calm). In this class, we'll explore how Buddhism came to be the profoundly important cultural force in American life that it is today, looking particularly at the influence of Zen on American literature. We'll read an array of Buddhist-influenced literary texts, from the Beat poetry of the 1950s to novels like *Middle Passage*, *A Tale for the Time Being*, and *Lincoln in the Bardo*. But we'll also range far beyond the world of literature into a variety of other cultural domains in which Buddhism has had a deep impact, like environmentalism and deep ecology, Western psychotherapy, and Western attitudes towards death and dying. We'll also explore the role that Buddhism is playing in the fight against racism and racial injustice (from bell hooks to Black Lives Matter). And we'll engage in an experiential investigation of the benefits of incorporating contemplative practices like meditation into the classroom: students in the course will learn a variety of meditation techniques, and we'll spend some time each class practicing and reflecting upon those practices. Students will be expected to meditate outside of class as well (2-3 times per week) and keep a meditation journal. No prior experience with meditation is necessary. Just an open mind.

Requirements/Evaluation: regular attendance, a weekly meditation journal, various informal in-class and take-home writing assignments, and a final 7- to 10-page essay

Prerequisites: any literature course at Williams or permission of the instructor

AMST 239 (S) Asian/Pacific Islander/American Documentary Cinemas (DPE)

In *Asian America Through The Lens*, film scholar Jun Xing contends, "documentaries have been, and remain, the predominant genre of Asian American cinema" (1998). In this course, we will launch an investigation into this statement and examine a selection of A/P/A documentaries ranging from independent and experimental film, public access television, and digital and social media, 1960s--present. We will ask: (1) how did A/P/A documentary develop as a tradition and practice in relation to mainstream media industries?, (2) how has documentary been mobilized to critique, demystify, and/or disrupt dominant scripts like Orientalism, the Yellow Peril, and the Model Minority Myth?, and (3) how do documentary makers formally negotiate the generic impulse for the "real" and "authentic" against the burden of A/P/A representation? While neither chronological nor

all-encompassing in its capacity, we will do our best to situate the historical and material conditions that form and inform the works and contextualize their visual aesthetic practices and tactics of representation. We will also pay particular attention to untangling the intersectional and multidimensional categories of race/ethnicity, gender, sexuality, class, and ability that emerge from the sociohistorical processes of war, immigration, nationalism, colonialism and settler colonialism, state violence, and social movements. Finally, we will meet and engage with current artists, filmmakers, and organizers in order to gain insight into development, production, distribution, and reception.

Requirements/Evaluation: weekly reading responses, a midterm paper, final creative project and paper

Prerequisites: AMST 101/201 Intro to American Studies

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Analyzes the dynamics of power and privilege in the U.S. from a national and transnational context, examines the perspectives of socially marginalized groups, and fosters an understanding of the beliefs, experiences, and cultures of these groups.

Attributes: AMST Comp Studies in Race, Ethnicity, Diaspora

Not offered current academic year

AMST 240 (F) Latina/o Language Politics: Hybrid Voices

Cross-listings: COMP 210 AMST 240 LATS 240

Secondary Cross-listing

In this course we will focus on issues of language and identity in the contemporary cultural production and lived experience of various Latina/o/x communities. As such, how are cultural values and material conditions expressed through Latina/o/x language and literature? How does Latina/o/x identity challenge traditional notions of the relationship between language, culture, and nation? In what ways might Latina/o/x literary and linguistic practices serve as tools for social change? Departing from an overview of common linguistic ideologies, we will examine code-switching, bilingual education, recent linguistic legislation, and the English Only movement. Throughout the course we will survey texts culled from a variety of literary genres as well, including autobiography, novels, and poetry. Both directly and/or indirectly, these texts address Latina/o/x language politics, as well as the broader themes of power, community, ethno-racial identity, gender, sexuality, class, and hybridity.

Requirements/Evaluation: participation, two essays, final take-home examination

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, American Studies majors, Comparative Literature majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

AMST 241 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how

does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: a short statement of interest will be solicited

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

AMST 242 (S) Americans Abroad (DPE)

Cross-listings: AMST 242 COMP 242 ENGL 250

Secondary Cross-listing

This course will explore some of the many incarnations of American experiences abroad between the end of the 19th century and the present day. Materials will be drawn from novels, short stories, films, and nonfiction about Americans in Europe in times of war and peace. We will compare and contrast the experiences of novelists, soldiers, students, war correspondents, jazz musicians, and adventurers. What has drawn so many Americans to Europe? What is the difference between a tourist, an expat, and an émigré? What are the profound, and often comic, gaps between the traveler's expectations and the reality of living in, say, Paris or a rural village in Spain? What are the misadventures and unexpected rewards of living, working, writing, or even falling in love in translation? Authors may include: Edith Wharton, Henry James, Langston Hughes, Martha Gellhorn, Ernest Hemingway, Elaine Dundy, Richard Wright, and Ben Lerner. Additional reading will be drawn from historical and critical works. All readings will be in English. This comparative course is designed to highlight the challenges and benefits of cultural immersion abroad. It will focus on the linguistic, emotional, intellectual, and social adaptation skills that are required to understand others, and oneself, in new contexts. Many of the authors chose, or were forced to, leave oppressive situations in the United States where their futures were limited due to factors related to politics, gender, race or class (and combinations thereof). We will study their dislocation, and freedom, and struggles to reshape their concept of "home" into something that reflected their individual identity, and not one imposed by any national culture--American or foreign.

Requirements/Evaluation: each student will give an in-class presentation and complete 3 writing assignments totaling 20 pages; one of these writing assignments will be a personal travel narrative based on the student's own experiences

Prerequisites: any literature course at Williams or permission of instructor

Enrollment Limit: 18

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 242 (D2) COMP 242 (D1) ENGL 250 (D1)

Difference, Power, and Equity Notes: We will read and analyze primary materials and literature that reflect on Americans who chose, or were forced to, reinvent themselves abroad to escape oppressive situations in the United States related to gender, class, race, or political views. The socio-historical context of each writer will be crucial to understanding their situations. Students will write critical papers, and their own narrative in which they reflect on a situation of personal dislocation, either while traveling, or at home.

AMST 243 (S) Asian/American and Black Literary and Cultural Thought

Cross-listings: AFR 243 AMST 243

Primary Cross-listing

One durable legacy of white settler colonialism has been to its divide-and-conquer management of minority populations--an amazingly effective strategy still widely practiced in a variety of forms today. While Asian Americans have been deemed "model minorities" in contrast to "unmodel" minorities--namely, African Americans--and racial minorities have been pitted against one another in the oppression Olympics and on the issue of affirmative action, there has, in fact, been a long history of political, literary, and cultural thought that have joined blacks and Asian/Asian Americans, from W.E.B. Du Bois to current ideas about digital possibilities (and constraints). In this course we will examine the theory, political writings, art, music and literature that sprang from and attended the early Marxist-Communist fight for universal brotherhood; movements against colonialism, capitalism, and the Vietnam War; Yellow Power and Black Power; and topics such as black and Asian diasporas, Afro-futurism, multiculturalism, "Afro-pessimism", racial melancholia, and digital futurities.

Requirements/Evaluation: one shorter paper (4-6 pages), midterm; final paper/project (10-12 pages), response papers and/or posts on GLOW; participation (class discussion and attendance)

Prerequisites: none

AMST 244 (S) What They Saw in America

Cross-listings: AMST 244 SOC 244 HIST 366

Secondary Cross-listing

This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider's view of America--one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors' respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern. * Please note atypical class hour Monday, 4:45-8:30 pm.

Requirements/Evaluation: several short response pieces; a final paper of 10-15 pages

Prerequisites: none

Enrollment Limit: 9

Enrollment Preferences: juniors and seniors; final selection for the course will be made on the basis of an interview with the instructor

Expected Class Size: 9

Have you ever wondered why Spam is so popular in Hawaii and why ramen noodles are a cheap, ubiquitous food? Are you curious why black-eyed peas and collards are considered "soul food"? In this course, we will answer these questions by digging in to the histories of global environmental transformation through colonialism, slavery, and international migration. We will consider the production and consumption of food as a locus of power over the last 300 years. Beginning with the rise of the Atlantic slave trade and continuing through the 20th century, we trace the global movement of plants, foods, flavors, workers, businesses, and agricultural knowledge. Major units include rice production by enslaved people in the Americas; Asian American food histories during the Cold War; and fat studies critiques of critical food studies. We will discuss food justice, food sovereignty, and contemporary movements for food sustainability in the context of these histories and our contemporary world. Readings are interdisciplinary, but our emphasis will be on historical analyses of race, labor, environment, and gender.

Requirements/Evaluation: two to three short writing assignments (4-5 pages); one longer final paper (8-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

AMST 246 (S) Aesthetics and Place-making in Latina/o New York

Cross-listings: LATS 246 AMST 246

Secondary Cross-listing

New York City has long served as a nexus of Latina/o migration and settlement since the late nineteenth century. From the New York sound of Afro-Cuban and Puerto Rican salsa to the poetics of slam poetry forged in the Nuyorican Poets Cafe, New York's Latinas/os have defined and developed numerous forms of Latina/o popular expression. This course examines the aesthetic foundations of Latina/o New York, remaining attentive to the numerous diasporas that have migrated to and made the city their home. Student will engage with a multiplicity of popular cultural genres including memoirs, literature, poetry, sound, visual art, and photography in the context of the history of the city while focusing on key themes of racial formation, the politics of space and place, and the labor of culture.

Class Format: discussion

Requirements/Evaluation: attendance and class participation, short writing exercises, 4- to 5-page midterm paper close-reading a text, and a 10- to 15-page final paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: LATS concentrators and AMST majors

AMST 247 (S) Race and Religion in the American West

Cross-listings: LATS 247 REL 247 AMST 247 ENVI 247

Secondary Cross-listing

From the "Land of Enchantment" of New Mexico in the far reaches of the desert to the sacred temples on the West Coast that overlook Pacific Ocean, this course examines the peoples and the "sacrosapes" of the American West. Historian Patricia Limerick regards this region as an extraordinary site of convergence and one of "the greatest meeting places on the planet." The region is a site of cultural complexity where Penitentes maintained a sacred order, Pentecostals attracted a global audience, Native Americans forged legal/protected definitions of "religion," and Asian immigrants built the first Buddhist and Sikh temples. Until recently, standard surveys of religious history in North America have devoted minimal attention to the distinctive role of religion in the American West. They have focused on religious history in the flow of events westward from the Plymouth Rock landing and Puritan establishment while generally overlooking the Pueblo Revolt in modern-day New Mexico which occurred in that same century and marked the temporary suspension of Spanish encroachment. How do scholars of religion and history account for these renditions between the past and present? Most mainstream religious histories treat religious experience and identity in the U.S. West as additive rather than complementary to or constitutive of its mainstream narratives. Contemporary historians of religion note the need for new "sights," "cites," and "sites" in order to deconstruct and reconstruct this incomplete meta-narrative, taking into account such factors as migration, gender, region, and the environment.

Class Format: seminar/discussion

Requirements/Evaluation: student participation, weekly reflection papers (up to half page), midterm primary source paper (up to 5 pages), and a final research paper on Religion and the Environment (8-10 page paper with a media/visual component)

Prerequisites: none

AMST 248 (F) Black Women in African American Literature and Culture

Cross-listings: AMST 248 WGSS 258 ENGL 248

Secondary Cross-listing

This course surveys constructions of black womanhood from the nineteenth century to the present through readings of texts by and about black women. In this course, students will trace how black womanhood became central to uplift ideology and the making and sustaining of black communities in the post-Reconstruction, Harlem Renaissance, and Black Power eras. We will read works across a broad historical spectrum to identify the ways different writers wrestle with race and gender using literary tropes, such as the "tragic mulatto," in different social contexts. We will also

engage a range of forms, including an essay (Patricia Hill Collins's "Mammies, Matriarchs, and Other Controlling Images"), a choreopoem (Ntozake Shange's *For Colored Girls Who Have Considered Suicide when the Rainbow is Enuf*), and socio-political propaganda (the "Black is Beautiful" movement). This course will end with a consideration of the way writer and producer Issa Rae engages with contemporary ideologies of black womanhood in the HBO series *Insecure*.

Requirements/Evaluation: active class participation, four short papers totaling about 20 pages; final project on the hashtag #blackgirlmagic

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Cross-listings: AMST 249 GBST 246 THEA 246

Secondary Cross-listing

This seminar will explore contemporary Asian American plays, stand-up comedy, performance art, and spoken word with an eye to how artists do politics through their cultural labor. We will begin with a brief survey of images from popular media to identify legacies of Orientalism. From here we will move towards examining the ways in which Asian American artists from various eras subvert stereotypes and pursue projects of social justice. In watching performances and reading scripts, essays, and interviews, we will attend to narratives, acting methods, theatrical design, spectatorship, and the political economy of cultural production that shapes how Asian American artists make and show work. In addition, we will explore how artists stake political claims in the public sphere through teaching and community organizing.

Requirements/Evaluation: two 5-page critical essays, reading responses, class presentations, and active discussion participation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: sophomores and juniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 249 (D1) GBST 246 (D1) THEA 246 (D1)

Difference, Power, and Equity Notes: Course fosters critical engagement with artistic practices that seek to address the concerns of populations in the US who have historically had unequal access to resources and audiences for representing themselves and their political concerns. Students will ask questions about how Asian American artists address legacies of Orientalism, as well as how they facilitate community engagement and approach projects of social justice.

AMST 252 (S) Puerto Rico and its Diaspora

Cross-listings: AMST 252 LATS 252

Secondary Cross-listing

On September 20, 2018, Maria---a category four hurricane made landfall on Puerto Rico. The most powerful storm to hit the island since 1932, Maria

caused widespread catastrophic damage on a land already suffering from the devastating effects of a decades-long economic recession. Three months after the hurricane, half the island remained without power, water service yet to be reestablished in many areas, and aid distribution inadequate and inconsistent. The hurricane and its aftermath brought mainstream U.S. attention to Puerto Rico and its diaspora, while simultaneously calling attention to the island's status and relationship to the United States. This hybrid onsite-Skype-travel course is for students interested in learning about the historical, social, and political relationship between Puerto Rico and the United States. We will examine, for example, the political status of Puerto Rico, migration, race, social movements, and expressive cultural forms that have emerged as a result of this asymmetrical relationship. Through the study of the impact and legacy of U.S. policies on the island, we will also consider how the fiscal and humanitarian crisis and proposed solutions affect the daily collective lives of the people in the U.S. territory and the diaspora. This course is a unique collaboration between Vassar, Williams, and the UPR. To enroll in this course, students must commit to participating in an alternative spring break/community engagement project in Puerto Rico and flexible with possible changes in class time when Skyping with students from the University of Puerto Rico. We will gather in Puerto Rico to meet with peers from UPR and for an alternative spring break collaboration, interfacing with various community organizations that have taken up vital social, medical, and economic roles vacated by the United States. Taller Salud, PECES, and Casa Pueblo are among the organizations in Puerto Rico that students may work with as a part of the course's community engagement component.

Class Format: to enroll in this course, students must commit to participating in an alternative spring break/community engagement learning project in Puerto Rico

Requirements/Evaluation: class participation, short writing exercises, group work/project, a midterm essay (5-7 pages), and a final essay (10-12 pages)

Prerequisites: students should have some fluency with the Spanish language

Enrollment Limit: 8

Enrollment Preferences: should be first- and second-years, students considering an American Studies major or Latina/o Studies concentration; AMST majors and LATS concentrators.

AMST 254 (F) Sovereignty, Resistance, and Resilience: Native American Histories to 1865 (DPE)

Cross-listings: HIST 254 AMST 254

Secondary Cross-listing

This course surveys Native American/Indigenous North American histories from creation through the U.S. Civil War, tracing the complex ways that tribal nations and communities have shaped North America. It also introduces foundational methodologies in Native American and Indigenous Studies and strategies for pursuing decolonizing scholarship and action. Beginning with the diverse Indigenous societies that inhabited the Americas millennia before Columbus's arrival, it discusses the cultural complexity of Native peoples, nations, and worldviews rooted in particular ecosystems and homelands, as well as accounts of beginnings and migrations. It addresses how Native peoples confronted grievous epidemics resulting from the "Columbian Exchange," and contended with Euro-colonial projects of "discovery" and colonization. Indigenous nations' multifaceted efforts to maintain sovereignty and lands through eras of pervasive violence and removal are discussed, as well as the important yet under-recognized ways that Native communities negotiated the tumultuous era and conflicting allegiances of the Civil War. The course centers on Indigenous actors-intellectuals, diplomats, legal strategists, knowledge keepers, spiritual leaders, artists, and others-and consistently connects historical events with present-day debates over land, historical memory, education, and activism. Additionally, it provides an opportunity to engage with original materials pertaining to Native histories in the Williams College Archives/Special Collections and Art Museum. While the scope of the course is continental and transoceanic, it devotes significant attention to the Native Northeast and the particular Indigenous homelands in which Williams College is located.

Class Format: discussion

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: first- and second-year students

AMST 256 (F) Social Justice Traditions: 1960s to #Black Lives Matter (DPE)

Cross-listings: AMST 256 HIST 256 AFR 257

Primary Cross-listing

We live in a time of renewed social justice activism, as people from all walks of life confront economic inequality, police violence, discrimination against transgender individuals, and other forms of oppression. This course is designed to clarify where recent initiatives like Black Lives Matter and Occupy Wall Street came from, and to evaluate how they might shape American life in the near future. Movements have histories, as today's activists draw on the "freedom dreams," tactics, and styles of rhetoric crafted by their predecessors, while making use of new technologies, such as Twitter, and evolving understandings of "justice." Taking a historical approach, we will begin by studying the civil rights, Black Power, anti-war, counter-culture, and feminist initiatives of the 1960s. We will then explore how progressive and radical activists adjusted their theories and strategies as the country became more conservative in the 1970s and 1980s. Making use of movement documents, documentary films, and scholarly accounts, we will study the development of LGBTQ, ecological, and economic justice initiatives up to the present day. Throughout, we will seek to understand how movements in the United States are shaped by global events and how activists balance their political work with other desires and commitments.

Requirements/Evaluation: attendance and class participation; four 2 page reading response papers; discussion of films via GLOW forums; and a final 7-8 page analytical essay

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: first-years, sophomores, and American Studies majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Secondary Cross-listing

The use of commercial and mass media imagery in art became recognized as an international phenomenon in the early 1960s. Items such as comic

strips, advertising, movie stills, television programs, soup cans, "superstars," and a variety of other accessible and commonplace objects inspired the subject matter, form, and technique. This course will critically examine the history and legacy of Pop Art by focusing on its social and aesthetic contexts. An important component of the course involves developing skills in analyzing visual images, comparing them with other forms, and relating them to their historical context.

Requirements/Evaluation: one final research paper (15 pages) written in stages over the semester including revisions; bibliographic research, writing exercises, and oral presentations

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Art majors

Expected Class Size: 18

Grading: yes pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 265 (D1) ARTH 265 (D1)

Writing Skills Notes: There will be considerable focus on writing and peer-editing as a means of shaping critical thinking. We will treat writing as a process; revision is built into the syllabus. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

AMST 266 (S) Being American, Being Muslim: American Muslim Literature in the 21st century (DPE)

Cross-listings: ENGL 268 AMST 266 COMP 228 REL 266

Secondary Cross-listing

Islam and Muslims in the United States are the subject of extensive public scrutiny and media coverage in broader public discourses. It is less common, however, to hear Muslims' own voices speak about their lives, experiences, beliefs, and commitments. This course will take a literary approach to exploring American Muslims' own narratives about themselves. We will address questions such as: How have American Muslims understood their identity in the wake of 9/11? What are the pressures and demands of American national belonging and cultural citizenship that Muslims must navigate? How are race, gender, ethnic heritage, and immigration definitive of Muslim experiences and self-understandings? What are the competing claims and contestations about authentic expressions of Islam? How are Muslims approaching the tensions between communal belonging and individuality? We will be engaging such questions primarily through an analysis of popular memoirs, autobiographies, novels, and short stories, but will also explore some plays, films, poetry, and comedy.

Requirements/Evaluation: regular reading responses, two short essays (3-4 pages), final presentation, and final paper (7-8 pages)

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENGL 268 (D2) AMST 266 (D2) COMP 228 (D2) REL 266 (D2)

Difference, Power, and Equity Notes: This course will explore the intersections of power in American Muslim life, such as: Muslims as a religious minority in the context of the War on Terror; racial and ethnic differences in Muslim communities; immigration and national belonging; competing claims to religious authenticity and authority; and conflicting gendered norms. Students will learn to identify these multiple layers and configurations in the texts, and how to analyze their workings in nuanced multidimensional ways.

Not offered current academic year

AMST 272 (S) American Postmodern Fiction

Cross-listings: ENGL 272 AMST 272

Secondary Cross-listing

American fiction took a turn at World War II; the simplest way to name the turn is from modernism to postmodernism. The most obvious mark of postmodern narration is its self-consciousness: postmodern books tend to be about themselves, even when they are most historical or realistic. Already a paradox emerges: why would World War II make narratives more self-reflexive? The first book in the course, and the best for approaching this paradox, is Heller's *Catch-22*. It also serves as a good introduction to the unlikely merging in American fiction of high European post-structuralist postmodernism and low American punk postmodernism. Subsequent books in the course will probably include Pynchon's *The Crying of Lot 49*, Morrison's *Beloved*, DeLillo's *White Noise*, Carver's *What We Talk About When We Talk About Love*, Diaz's *The Brief Wondrous Life Of Oscar Wao*, and Whitehead's *The Underground Railroad*.

Requirements/Evaluation: three papers of increasing length and weight, contributions to class discussion

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: first-year students who have placed out of 100-level English and sophomores considering the major; then Junior and Senior English majors

Expected Class Size: 25

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

AMST 275 (F) American Drama: Hidden Knowledge

Cross-listings: AMST 275 COMP 275 ENGL 224 THEA 275

Secondary Cross-listing

The Buddha is said to have identified three things that cannot stay hidden: the sun, the moon, and the truth. What's the secret? Who is lying? Who is breaking the rules? American drama abounds with hidden knowledge and false representations. (This is not surprising: theatre is always on some level a deceptive practice, a place where one person pretends to be another, and where what is spoken is always open to skeptical scrutiny. We might say theatre is always lying as much as lying is always theatre.) This tutorial course will examine what lies hidden in American plays from the late nineteenth century to the early twenty-first. Beginning with excerpted critical and historical writings on secrecy and lying (*The Adventures of Pinocchio*, Machiavelli's *The Prince*, Thomas Carlson's *Lying and Deception: Theory and Practice*, among others), we will proceed to a set of American plays from across a wide spectrum of playwrights, including Eugene O'Neill, Edward Albee, Sarah Ruhl, Arthur Miller, Amy Herzog, Susan Glaspell, Sophie Treadwell, Annie Baker, and others. Student papers will explore how hidden knowledge structures dramatic action, how different characters create and respond to untruths, and what can we learn in particular from *American* drama about a national relationship to honesty and its opposites.

Requirements/Evaluation: weekly papers/response papers; weekly meeting with instructor and tutorial partner

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Theatre and English majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

AMST 276 (S) Southern Literary Aesthetics (DPE) (WS)

Cross-listings: AFR 275 AMST 276 ENGL 275

Secondary Cross-listing

Hip-Hop artists signify as "the dirty South" the distinct sounds, rhythms, landscapes, gestures, desires as well as frustrations of Black residents living in the southernmost regions of the U.S. American continent. In this course, students will examine what the South means to American concepts and how the South is used to make meaning in literature, music, art, digital archives, and film. We will give particular attention to how representations of the South are informed by region, gender, sexuality, and class. At the end of the course, students will be able to identify Black southern aesthetics across various genres and mediums with attention to historical and regional specificity despite the opacity of these categories. Potential artists include Jean Toomer, Alice Walker, Ernest Gaines, William Faulkner, Jesmyn Ward, Zora Neale Hurston, Natasha Trethewey, E. Patrick Johnson, Trudier Harris, Kiese Laymon, Julie Dash, Spike Lee, Askia Muhammad Touré, Alexis Pauline Gumbs, Alison Janae Hamilton, Outkast, DJ Khalid, Beyoncé Knowles, and Solange Knowles.

Requirements/Evaluation: four or five writing assignments that total about 20 pages; discussion facilitation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 19

Enrollment Preferences: first-years and sophomores

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 275 (D2) AMST 276 (D1) ENGL 275 (D1)

Writing Skills Notes: Students will develop a writing practice through short in-class assignments that culminate in four or five formal submissions. Students will receive group as well as one-on-one feedback on useful writing principles. Feedback will focus on structure, style, argumentation, and audience.

Difference, Power, and Equity Notes: Students will analyze the "shaping of social differences, dynamics of unequal power, and processes of change" in the South. Students will discover how region impacts race, gender, sexuality, and class.

AMST 283 (F) Black Queer Looks: Race, Gender and Sexuality in Contemporary African-American Film

Cross-listings: ENGL 286 WGSS 283 AFR 283 AMST 283

Secondary Cross-listing

In this course we will foreground questions around visibility and memory. We will explore representations of Black queer bodies in experimental, documentary and narrative film. This course will engage foundational texts from Black Queer Studies. We will pair texts with film in order to examine the various relationships between art and scholarship. You will also be asked to think about yourself as a filmmaker. We will screen films such as Looking for Langston (Isaac Julien, 1989), The Watermelon Woman (Cheryl Dunye, 1996), U People (Olive Demetrius and Hanifah Walidah, 2009), Tongues Untied (Marlon Riggs, 1989) and Litany for Survival (Ada Gay Griffin and Michelle Parkerson, 1995). Throughout the course we will evaluate the different ways filmmakers represent Black queerness on screen. The goal is to think about the possibilities and limitations of representation and visibility. Each of you will be asked to facilitate a class discussion. You also will be required to do weekly critical response papers. In lieu of a final paper you will create a detailed proposal for a short film that "represents" some segment of Black queer living.

Requirements/Evaluation: facilitate class discussion; weekly critical response papers; in lieu of a final paper you will create a detailed proposal for a short film

AMST 300 (F) Tell Even Us: Writing Memory, Trauma, Self (DPE)

Cross-listings: ENGL 300 AMST 300 COMP 357

Primary Cross-listing

In this course, we will read a diverse selection of personal memoirs dealing with the traumas, transgressions, and transformations of what we understand to be "modern life." We will meditate on how categories of identity and experience, memory and history are being constructed and deconstructed, reimagined and remade anew. We will pay special attention to how these writers/artists narrate the overlapping cycles of loss, pain, grief, survival, resilience, and resistance in the face of (structural, institutional, interpersonal, and intimate) violence, and consider the possibilities for (individual and collective) healing that can exist in and beyond the world as we know it. What, after all, does it even mean to have or to not have, to find, to lose, to have stolen, to dissolve, and/or to recover a self in a besieged America? Books we will cover may include: *Borderlands/La Frontera*:

The New Mestiza (Gloria Anzaldúa), *Dictee* (Theresa Hak Kyung Cha), *How to Write an Autobiographical Novel* (Alexander Chee), *When They Call You A Terrorist: A Black Lives Matter Memoir* (Patrisse Khan-Cullors and asha bandele), *Bad Indians: A Tribal Memoir* (Deborah Miranda), *This is for the mostless* (Jason Magabo Perez), *Redefining Realness* (Janet Mock), *like a solid to a shadow* (Janice Lobo Sapigao), *Men We Reaped*(Jesmyn Ward), *7 Miles A Second* (David Wojnarowicz).

Requirements/Evaluation: weekly reading responses, a midterm paper (7-8 pages), and a manuscript for a memoir in a medium of their own choosing

Prerequisites: previous coursework in race, ethnicity, and diaspora, junior or senior standing, or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Analyzes the dynamics of power and privilege in the U.S. from a national and transnational context, examines the perspectives of socially marginalized groups, and fosters an understanding of the beliefs, experiences, and cultural productions of these groups.

Attributes: AMST Arts in Context Electives

Not offered current academic year

AMST 301 (F) Theories and Methods in American Studies (Junior Seminar)

This course aims to provide a "how to" of American Studies from an integrative, multiracial, and socio-cultural perspective. Taking American culture as a site for testing classic and contemporary theories about how cultures work, the Junior Seminar in American Studies serves as an introduction to resources and techniques for interdisciplinary research. Students will be exposed to and experiment with a wide range of current theoretical and methodological approaches employed in American Studies and contributing disciplinary fields, and in the process gain a working competence in all four tracks of the major (Space and Place; Comparative Studies in Race, Ethnicity and Diaspora; Arts in Context; and Critical and Cultural Theory). The goal of the course is not only for students to develop knowledge of main currents in the field of American Studies but also to become practitioners through a series of assignments that will permit students to exercise their newfound skills. Students will thus, for instance, develop rhetorical analyses, gather ethnographic data, and "read" assorted spaces and buildings, as the class explores such problems or topics as national narratives, ethnoracial formations, the American prison system, and the circulation of commodities.

Class Format: discussion

Requirements/Evaluation: class participation and a wide variety of student assignments, ranging from postings to the class Glow site, to short, analytical essays (5 pp.), to field work exercises, to in class presentations

Prerequisites: AMST 101/201 Intro to American Studies, junior or senior standing, or permission of instructor

Enrollment Limit: 15

Enrollment Preferences: juniors majoring in American Studies

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

AMST 302 (F) Environmental Planning Workshop: Community-Based Experience

Cross-listings: ENVI 302 AMST 302

Secondary Cross-listing

This interdisciplinary, experiential workshop introduces students to the field of planning through community-based projects. Environmental Planning encompasses many disciplines pertaining to the natural and built landscape such as city planning, ecological design, climate resiliency, natural resource planning, landscape architecture, agricultural and food systems, walkable neighborhood design, energy planning, and community development, to name a few. In this workshop, students regularly get out of the classroom and gain direct experience working in the greater Berkshire region. The class is organized into two parts. Part 1 involves reading and discussion of the planning literature: history, theory, policy, ethics, and legal framework, site visits, and concludes with a design project. Part 2 focuses on hands-on field work tackling an actual planning project under the guidance of a community partner. Small teams of students, working in conjunction with a client in the region and under supervision of the instructor, conduct a planning project using all the tools of a planner, including interviews, survey research, site visits, primary research, mapping, and site design and other activities as demanded by the particular project. The project work draws on students' academic training and extracurricular activities, and applies creative, design thinking techniques to solve thorny problems. The midterm assignment is a creative landscape/site design project. The lab sections include field trips, GIS mapping labs, project-related skill sessions, public meetings, and team project work. The course includes several class presentations and students will gain skills in public speaking, preparing presentations, interviewing, survey research, report-writing, design, and teamwork. The class culminates in an on-site public presentation of each team's planning study.

Class Format: discussion/group workshop/project lab

Requirements/Evaluation: short writing assignments, class discussion, team projects, class presentations, final group public presentation and report

Prerequisites: ENVI 101 or permission of instructor; open to juniors and seniors only

Enrollment Limit: 16

Enrollment Preferences: Environmental Studies majors and concentrators

Expected Class Size: 16

Grading: no pass/fail option, yes fifth course option

AMST 307 (F) Experimental African American Poetry

Cross-listings: AFR 301 AMST 307 ENGL 327

Primary Cross-listing

Contemporary African American poets in various cities and towns across the nation--from New York City to Los Angeles, from Berkeley to Durham, N.C.--are currently producing a vibrant and thriving body of formally experimental work, yet this poetry is largely unknown to readers both within and outside the academy. This formally innovative poetry defamiliarizes what we normally expect of "black writing" and pushes us to question our assumptions and presumptions about black identity, "identity politics," the avant-garde (for example, is it implicitly raced?), formalism, socially "relevant" writing, the (false) dichotomy of form versus content, the black "community," digital poetics, and other issues of race and aesthetics. We will examine the writings of living poets, who range widely in age, and those of their avant-garde predecessors in the twentieth century. We will also be making links between this poetry and African American music and visual art.

Requirements/Evaluation: two papers (6-8 pages and 8-10 pages), short response papers, oral presentation, and class participation

Prerequisites: none, though at least one previous literature course preferred

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

AMST 308 (F) Thinking Diaspora: The Black Atlantic and Beyond

Cross-listings: ENGL 309 AMST 308 WGSS 308 COMP 300

Secondary Cross-listing

Water imagery has been central to black diasporic culture since its beginnings in the Middle Passage---suggesting imprisonment, isolation, escape, ancestral communion, and death, for example. This course wrestles with the significance of water in diasporic literature--how it endures, how it has diminished, how it slips away from us. Black diaspora theory was revolutionized by Paul Gilroy's *The Black Atlantic*, which urged us to consider more deeply the role of the ship, the routes, and the roots entailed in the formation of diasporic consciousness. This course aims to expand students' theoretical skills as we discuss cornerstone and cutting edge texts of diaspora theory, with an emphasis on theories that work with the relationship to water, such as those by Jacqueline Nassy Brown, Omise'eke Tinsley, and Vanessa Agard-Jones. Primary texts will include *The Big Sea* by Langston Hughes, *Sugar and Slate* by Charlotte Williams, Barry Jenkins' *Moonlight*, and more.

Requirements/Evaluation: weekly reading responses, presentations, one 10-page paper, engaged feedback process, and thoughtful class participation

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

AMST 309 (F) Womanist/Black Feminist Thought

Cross-listings: REL 310 AFR 310 WGSS 310 AMST 309

Secondary Cross-listing

This course explores the genealogy and development of black feminist and womanist thought. We will investigate the expansion of womanist thought from a theologically dominated discourse to a broader category of critical reflection associated more commonly with black feminism, analyze the relationship between womanism and black feminism, and review the historical interventions of black feminism. As critical reflections upon western norms of patriarchy, heterosexism, and racism, womanism and black feminism begin with the assumption that the experiences of women of color--particularly black women--are significant standpoints in modern western society. Through the examination of interdisciplinary and methodological diversity within these fields, students will be introduced to key figures including Alice Walker, Zora Neale Hurston, and Katie Cannon, and will engage materials that draw from multiple fields, including, but not limited to, literature, history, anthropology, and religious studies.

Class Format: discussion

Requirements/Evaluation: class participation, three short response papers, and the completion of an original research paper or project

AMST 312 (S) Chicago

Cross-listings: AMST 312 ENVI 313 LATS 312

Secondary Cross-listing

"The city of big shoulders has plenty of room for diversity," reads the official visitor's website for the City of Chicago. Focusing on this claim, this course asks students to think critically about what kind of room has been made for diversity--social, spatial, and ideological. Additionally we examine the ways in which diverse social actors have shouldered their way into the imagined and physical landscape of the city. Working with ethnography, history, literature, critical essays, and popular culture, we will explore the material and discursive constructions of Chi-Town and urban life among its residents. Appreciating these constructions we also consider how Chicago has served as a key site for understandings of urbanity within a broader national and global context.

Class Format: discussion

Requirements/Evaluation: attendance and class participation, group presentations and discussions, 5 critical briefs (2-pages) and a book review essay (15 pages)

AMST 313 (S) Gender, Race, and the Power of Personal Aesthetics

Cross-listings: LATS 313 AMST 313 AFR 326 WGSS 313

Secondary Cross-listing

This course focuses on the politics of personal style among women of color in an era of viral video clips, the 24-hour news cycle, and e-commerce sites dedicated to the dermatological concerns of "minority" females. With a comparative, transnational emphasis on the ways in which gender, sexuality, ethno-racial identity, and class inform standards of beauty, we will examine a variety of materials including commercial websites, histories, personal narratives, ethnographies, sociological case studies, and feminist theory. Departing from the assumption that personal aesthetics are intimately tied to issues of power and privilege, we will engage the following questions: What are the everyday functions of personal style among women of color? Is it feasible to assert that an easily identifiable "African American," "Latina," "Arab American" or "Asian American" female aesthetic exists? What role do transnational media play in the development and circulation of popular aesthetic forms? How might the belief in personal style as activist strategy challenge traditional understandings of feminist political activity?

Requirements/Evaluation: participation, one student-led discussion period, two written essays of 5-7 pages, final take-home exam

Prerequisites: LATS 105, AMST 201, WGSS 101 or permission of instructor; first year students are not permitted to take this course

AMST 314 (F) Groovin' the Written Word: The Role of Music in African American Literature

Cross-listings: ENGL 314 COMP 321 AFR 314 AMST 314

Secondary Cross-listing

In an interview with Paul Gilroy, Toni Morrison once said, "Music provides a key to the whole medley of Afro-American artistic practices." Morrison is not the only one who believes that music speaks to numerous aspects of the African American experience. From Sterling Brown and Zora Neale Hurston to John Edgar Wideman and Suzan Lori-Parks, many African American authors have drawn on music to take political stands, shape creative aesthetics, and articulate black identity. In this course, students will explore the work of these authors and more, investigating music's ability to represent and critique African American culture in their literature. Texts will cover a range of literary forms including poetry, plays, short stories and novels alongside theoretical and critical essays. Students will discuss such key issues as assimilation into mainstream culture, authenticity claims on black music, and music used as a tool for protest. Additionally, class assignments will include musical examples in spirituals/gospel, blues, jazz, and rock/rhythm and blues. While this class requires students to practice in-depth literary and performance analysis skills, students are not required to have technical musical knowledge.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based upon class participation, short weekly reading responses and/or listening assignments, one 3-page paper, one 6- to 8-page paper comparing two works, one in-class spoken word performance with 2-page report, final presentation

Prerequisites: none; open to all

Enrollment Limit: 20

AMST 317 (F) Black Migrations: African American Performance at Home and Abroad

Cross-listings: COMP 319 ENGL 317 THEA 317 AFR 317 DANC 317 AMST 317

Secondary Cross-listing

In this course, students will investigate, critique and define the concepts migration and diaspora with primary attention to the experiences of African Americans in the United States and Europe. Drawing on a broad definition of performance, students will explore everything from writing and painting to sports and dance to inquire how performance reflects, critiques and negotiates migratory experiences in the African diaspora. For example, how did musician Sidney Bechet's migration from New Orleans to Chicago to London influence the early jazz era? How did Katherine Dunham's dance performances in Germany help her shape a new black dance aesthetic? Why did writer James Baldwin go all the way to Switzerland to write his first novel on black, religious culture in Harlem? What drew actor/singer Paul Robeson to Russia, and why did the U.S. revoke his passport in response to his speeches abroad? These questions will lead students to investigate multiple migrations in the African diasporic experience and aid our exploration of the reasons for migration throughout history and geography. In addition to critical discussions and written analysis, students will explore these topics through their own individual and group performances in class. No prior performance experience is necessary.

Class Format: discussion

Requirements/Evaluation: class participation, in-class student performances, several 2-page performance response papers, one 10- to 12-page research paper, a final performance with a 3-page report

Prerequisites: none; open to all

Enrollment Limit: 15

AMST 318 (F) California: Myths, Peoples, Places

Cross-listings: COMP 328 AMST 318 ENVI 318 LATS 318 REL 318

Secondary Cross-listing

Crosslisting Between Paradise and Hell, between environmental disaster and agricultural wonderland, between Reagan and Berkeley, between a land of all nations and a land of multiracial enmity, a diversity of myths have been inscribed onto and pursued within the space we call California. How did certain narratives of California come to be, who has imagined California in certain ways, and why? What is the relationship between certain myths, the peoples who have imagined them, and the other peoples who have shared California dreams? In this course, we will examine some of the myths that surround California by looking at a few specific moments of interaction between the peoples who have come to make California home and the specific

places in which they have interacted with each other. Of special interest will be imaginations of the Spanish missions, the Gold Rush, agricultural California, wilderness California, California as "sprawling multicultural dystopia," and California as "west of the west."

Requirements/Evaluation: this course will be mostly discussion oriented, with grading based upon participation, short writing exercises, one 3-page review essay with mandatory revision, one 5- to 8-page midterm review essay, and a final 10- to 15-page comparative review essay

AMST 323 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: AMST 323 COMP 322 ENGL 356 ARTH 223 AFR 323

Secondary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love's *Bayou* and Ho Che Anderson's *King: A Comic Biography*, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and ipads to create their own graphic short stories based on historical and/or autobiographical narratives.

Requirements/Evaluation: class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life)

Prerequisites: none

Enrollment Limit: 19

AMST 324 (S) Indigenous Women's History (DPE) (WS)

Cross-listings: AMST 324 HIST 362 WGSS 324

Primary Cross-listing

What would it mean to locate indigenous women and their stories at the heart of American history? This advanced junior seminar course answers this question by centering the lives of indigenous women from the pre-colonial period through the present. We will discuss both the historical importance of these women's lives, as well as the methodological and ethical concerns that arise through the historiographic recovery of their stories. We analyze both canonical figures--such as La Malinche, Pocahontas, and Sakakawea--as well as lesser known historical actors, political leaders, writers, and artists.

Requirements/Evaluation: engaged class participation, weekly reading responses, extended research project (2-page proposal, 5-page annotated bibliography, 15-page final paper and presentation)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: American Studies, History, and Women's Studies, Gender and Sexuality majors

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 324 (D2) HIST 362 (D2) WGSS 324 (D2)

Writing Skills Notes: With substantial focus on students' development of independent research papers, this course satisfies the Writing Skills requirement.

Difference, Power, and Equity Notes: We examine the lives of indigenous women in the Americas across a span of more than 500 years, asking how and why we come to know these stories through archival records, oral histories, popular culture, and autobiographies. By analyzing the interwoven forces of gender, indigeneity, race, and colonization through both primary documents and secondary scholarship, we will work together to cultivate skills of critical inquiry and better understand the role of power in shaping historical narratives.

AMST 327 (S) Racial and Religious Mixture (DPE)

Cross-listings: AMST 327 AFR 357 LATS 327 REL 314

Secondary Cross-listing

The very term "mixture" implies that two or more distinct substances have been brought together. Distinctions of race and religion are social fictions; yet, the lived ramifications of these social fictions involve tense struggles over the boundaries of racial and religious communities. These boundaries are not just ideas but also practices. In the history of the Americas, mixed racial and religious identities and experiences have more often been the

result of violent clashes than romantic encounters. Still, the romanticization of the New World as a geography that makes such mixtures possible reaches back to the earliest days of Spanish conquest in the Americas. This course critically reconsiders varying ways that racial and religious mixtures have been imagined, defined, challenged, negotiated, and survived under imaginative and legal rubrics of mestizaje, creolization, transculturation, passing, syncretism, religious hybridity, and mixed race studies.

Class Format: mostly discussion

Requirements/Evaluation: participation, short writing exercises, a 3-page first essay, a 5- to 8-page second essay, and a 10- to 14-page final paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: seniors, concentrators, majors, those with prior relevant coursework

AMST 328 (F) American Social Dramas

Cross-listings: AMST 328 SOC 328 COMP 325 THEA 328

Secondary Cross-listing

As Shakespeare wrote memorably in *As You Like It*, "All the world's a stage, and all the men and women merely players." Sociologists have heeded Shakespeare's wisdom, arguing that social and political events are "performances" that take shape in accordance with familiar cultural scripts, and indeed that social actors implicitly interpret real-world events using plot structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention to the unfolding drama associated with the 2016 presidential election. How do social performances and struggles to "control the narrative" shape the meanings and outcomes of political events? Are they merely "spectacles," or wellsprings for genuine civic participation? What role do political comedy, satire, and social media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin, Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of their choosing.

Class Format: seminar

Requirements/Evaluation: active participation, five 2-page response papers, a 12-page paper that will go through draft and revision stage, and a presentation

AMST 334 (F) Sexual Economies (DPE)

Cross-listings: WGSS 301 AMST 334 ANTH 301

Secondary Cross-listing

This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We will have either guest speakers or a field trip to hear from people working in various commercial sex sectors.

Requirements/Evaluation: midterm essay exam, final research paper, research proposal/annotated bibliography

Prerequisites: none, though WGSS 101 and/or 202 may be helpful, but not required

Enrollment Limit: 20

Enrollment Preferences: based on statement of interest

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

AMST 335 (S) Uncovering Williams

Cross-listings: ARTH 335 AMST 335

Primary Cross-listing

Sparked by current controversies around visual representations at Williams, this course--a joint effort of the Williams College Museum of Art and the American Studies Program--interrogates the history of the college and its relationship to land, people, architecture, and artifacts. Students in this course will examine the visual and material culture of Williams and the land it occupies to uncover how the long and complex history of the college reverberates in the spaces and places students, faculty, and staff traverse daily. We take seriously that objects and environments are not neutral nor are the atmospheres that they reflect and produce. Our interdisciplinary approach draws from the methods and theories of American studies, art history, material culture studies, critical race theory, gender studies, and eco-criticism. Topics of discussion may include: the foundation of the college and displacement of native populations; buildings, objects, and monuments linked to Williams' evangelical history and the role of missionaries in American imperialism; the symbolic meaning of the varied architectural styles at the college; and the visibility/invisibility of the college's relationship to slavery and Abolitionism.

Requirements/Evaluation: participation (discussion, GLOW posts), 2-3 short papers, one 5- to 6-page midterm paper, and a 10- to 12-page final project (either a research paper or a substantial arts-type project) and bibliography

Prerequisites: sophomore standing or permission of the instructor

Cross-listings: AFR 337 WGSS 346 AMST 337

Secondary Cross-listing

In this course we will examine the various ways scholars and filmmakers have used ethnography as a critical tool for understanding the intersections of race, place, space, gender and sexuality. We will foreground studies that examine unfamiliar sites of Black struggle, resistance, and survival. We will examine Black gender variant and sexual minorities and how they produce, reproduce and struggle for spaces and places of desire, community, pleasure, love, and loss. We will explore these stories through primarily ethnographic modalities. We will discuss the political and ethical ramifications of these ethnographic narratives paying particular attention to the usefulness and limitations of both 'Thin' and 'Thick' descriptions. We will use ethnography to center debates regarding the politics of representation of racialized queer space, place, and people through both filmic and written accounts. All students will be asked to discover and develop their ethnographic voices through various critical, creative, experimental and performative assignments.

Requirements/Evaluation: facilitated class discussion; weekly critical response papers; creative projects

AMST 338 (S) Literature of the American Renaissance

Cross-listings: COMP 337 ENGL 338 AMST 338

Secondary Cross-listing

The 1840s and '50s have often been described as "the American Renaissance" because of the breathtaking explosion of literary achievements in that period, which included *Walden*; *Moby-Dick*; *The Scarlet Letter*; *The Narrative of the Life of Frederick Douglass*; and *Uncle Tom's Cabin*, to say nothing of the short stories of Poe and the groundbreaking poetry of Walt Whitman and Emily Dickinson. For the first time, American writers were broadly the equal or more of their European counterparts. We will explore the distinctive character of this achievement, paying close attention to the widespread belief in the transformational power of language, and the opportunities it offered to refigure both personal and political identity in a time when the American experiment often seemed on the brink of collapse.

Class Format: discussion

Requirements/Evaluation: in addition to active class participation, students will be required to submit two comparative essays (of 8 and 12 pages), and to complete a 24-hour take home final

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

AMST 339 (S) Latina/o/x Musical Cultures: Sounding Out Gender, Race, and Sexuality (WS)

Cross-listings: LATS 338 AMST 339 WGSS 338

Secondary Cross-listing

In this class we will investigate a wide variety of Latina/o/x popular musical forms, with particular attention to issues of gender, sexuality, and ethno-racial identity. Employing interdisciplinary materials and approaches, this course focuses on the sonic and visual analysis of contemporary Latina/o/x popular music and the identities of its producers, performers, and audiences. We will focus on the following questions, among others: How are hybrid Latina/o/x identities expressed through popular music and dance? In what ways do gender, sexuality, and ethno-racial identity inform the performance and interpretation of particular Latina/o musical forms? What unique role does sound play in our understanding of popular music and

identity?

Requirements/Evaluation: class participation, one semester-long original research project conducted in stages

Prerequisites: prior courses in AMST, LATS, or WGSS; not open to first-year students

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators, Women's, Gender, and Sexuality Studies majors, and American Studies majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

AMST 340 (S) Elizabeth Bishop in the Americas (DPE)

Cross-listings: WGSS 340 AMST 340 COMP 342 ENGL 340

Secondary Cross-listing

Elizabeth Bishop has emerged as one of the most important poets of the 20th century. She is admired not only for her dazzling mastery of the craft but also her adventurous life as a world traveler. Her more than two decades living in Brazil and translating the culture and literature of that country for a North American audience, for instance, make her life and work a rich focal point for cross-cultural study. At the center of the course will be Bishop's stunning meditations on childhood, memory, travel, lesbian sexuality, gender identity, ecology, and race and class in the U.S. and Brazil. We will look at how Bishop intertwines personal and global historical encounters in order to raise serious ethical questions about our shared history of conquest and sense of place in the Americas from the 16th century to the Cold War period of the twentieth. What is ultimately at stake in our claiming of a "home"? We also read a number of the writers in North and South America who were closely connected to Bishop, from Robert Lowell and Ernest Hemingway in North America, to Pablo Neruda and Clarice Lispector in South America. Ultimately, we study how craft, poetic process, and an ethical eye on the world can open up the study of poetry and poetics in the 21st century.

Class Format: three hours per week, in addition to small group discussion and archival research

Requirements/Evaluation: two short papers of 4-5 pages, one longer critical research paper of 10-12 pages, three to four discussion posts (300-500 words)

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English, Comparative Literature, Women's, Gender, and Sexuality Studies, American Studies majors

AMST 341 (S) American Genders, American Sexualities

Cross-listings: AMST 341 WGSS 342 ENGL 341

Secondary Cross-listing

This course investigates how sexual identities, desires, and acts are represented and reproduced in American literary and popular culture. Focusing on two culturally rich periods--roughly 1880-1940 (when the terms "homosexual" and "heterosexual" came to connote discrete sexual identities), and the contemporary context of the "postmodern" 21-century--we will explore what it means to read and theorize "queerly." Among the questions we will ask: What counts as "sex" or "sexual identity" in a text? Are there definably lesbian, gay, bisexual, queer or transgender writing styles or cultural practices? What does sexuality have to do with gender? How are sexual subjectivities intertwined with race, ethnicity, class, and other identities and identifications? Why has "queerness" proven to be such a powerful and sometimes powerfully contested concept? We will also explore what impact particular historical events, such as the rise of sexology, the Harlem Renaissance, and the emergence of a transgender movement have had on queer cultural production. Readings may include works by the following authors: Butler, Cather, Diaz, Ferguson, Fitzgerald, Foucault, Freud, Hammonds, Hughes, James, Larsen, Lorde, Muñoz, Rich, Rodriguez, Sedgwick, and Stein, and as well as screenings of contemporary videos and films.

Class Format: discussion/seminar

Requirements/Evaluation: active class participation, several short writing assignments, two 5-page papers, and one 8- to 10-page paper

AMST 344 (F) Pacific-New England Material Histories (DPE)

Cross-listings: AMST 344 ARTH 344

Secondary Cross-listing

This course looks at the indigenous, colonial, maritime, and missionary histories that connect New England to island nations in the Pacific in the eighteenth and nineteenth centuries. Rather than thinking of Hawai'i and Massachusetts merely as opposite ends of United States colonial expansion, we will focus on the heterogeneous cast of historical actors—from queens to whalers—who interacted in these places and generated new forms in architecture, painting, printmaking, the decorative arts, textiles, and publishing. Particular attention will be paid to the politics of Hawaiian visual culture and the histories of Williams alumni in Hawai'i, but the readings, discussions, and student papers will not be limited exclusively to those subjects. Our time together will be split between lecture and class discussion, with some meetings devoted to archival research and object-based case studies in collections on campus. As a group, we will establish a corpus of objects and conceptual frameworks for analyzing what "Pacific-New England" means and how that might challenge our existing assumptions about regional art histories. Finally, we will experiment as a class with the best ways to convey what we've learned through our collective inquiry—whether in different forms of writing or by workshopping more creative approaches.

Requirements/Evaluation: participation in discussion, two short papers, final research project, and presentation; note: one required field trip, scheduled in consultation with the students

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 344 (D2) ARTH 344 (D1)

Difference, Power, and Equity Notes: This course traces the ways that systemic biases regarding race, religion, gender, and class impacted and continue to affect relations of power, wealth, and ultimately sovereignty in the United States and in Hawai'i.

Fall 2019

SEM Section: 01 Cancelled

AMST 346 (F) Latinas/os and the Media: From Production to Consumption

Cross-listings: AMST 346 LATS 346

Secondary Cross-listing

This interdisciplinary course focuses on the areas of Latina/o media production, policy, content, and consumption in an attempt to answer the following questions, among others: How do Latinas/os construct identity (and have their identities constructed for them) through the media? How can we best understand the complex relationship between consumer, producer, and media text? How are Latina/o stereotypes constructed and circulated in mass media? Where do issues of Latina/o consumer agency come into play? In what ways does popular media impact our understanding of ethno-racial identities, gender, sexuality, class, language, and nation?

Requirements/Evaluation: student participation, one 2- to 3-page close reading exercise, and an original 10- to 12 page research paper conducted in stages

Prerequisites: LATS 105 or permission of the instructor; no first-year students are permitted to take this course

Enrollment Limit: 12

Enrollment Preferences: Latina/o Studies concentrators or American Studies majors by seniority

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

AMST 347 (S) Beyond Cli-Fi: Climate Change Histories & the Arts of Resilience (DPE)

Cross-listings: AMST 347 ENVI 348

Secondary Cross-listing

This interdisciplinary environmental humanities seminar begins with the premise that our present climate crisis is a political project of globalization propelled by capitalism and its cultural logic. Causes and consequences of climate change can only be understood by examining the historical trajectories of carbon-based economic, political, and cultural systems since the 19th century. We trace the intellectual genealogy of modern climate science, consider the politics of indigenous knowledge as related to extractivism, and examine literary and artistic engagements with the natural world. We pay particular attention to the narrative strategies that scientists and policymakers use to talk about climate, and we develop creative critiques of the dominant discourses. We use historical and cultural analysis to study social movement strategy and tactics among advocates for climate mitigation, adaptation, and resilience. We begin and end with creative responses to climate crisis, always asking: How can we move beyond dystopia and defeatism? How might history inform social movements for climate resilience? How can the arts, theater, and literary production articulate a new politics of survival? What narrative forms enable and inspire climate action?

Requirements/Evaluation: one short creative writing assignment; several short critical papers (3-4 pages); final essay (10-15 pages)

Prerequisites: ENVI 101 or instructor permission

Enrollment Limit: none

Enrollment Preferences: ENVI or AMST majors or concentrators; people with demonstrated interest in the course topics

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 347 (D2) ENVI 348 (D2)

Difference, Power, and Equity Notes: This course considers the historical differences in economic, political, and cultural power which have shaped our present climate crisis. We consider both who drives environmental change and who experiences it first hand. We consider in particular how differences of class, race, and gender shape capacities for resilience and resistance and we examine social movement strategy, with particular attention to Indigenous and POC social movement thinkers and leaders.

AMST 348 (F) Graphic Narratives as Democratic Ideals

Cross-listings: LATS 348 AMST 348 COMP 348

Secondary Cross-listing

This course examines the graphic narrative in terms of how each author/illustrator employs narrative elements (plotting, structure, characterization, text, and visuals) to express social realities within the context of democratic ideals. The primary focus will be on texts that explore themes of democracy and Latinidades. We will also discuss the "graphic activism" of artists like Sharon Lee De La Cruz of Digital Citizens Lab, a design collective with a focus on civic technology. Throughout the course, students will have the opportunity to create their own graphic narratives, either digitally or in print. Possible guest speaker: comic book artist Ivan Vález (Planet Bronx, 2015 Creative Capital Award in Visual Arts).

Class Format: workshop

Requirements/Evaluation: attendance and class participation, short writing exercises, 4-5 page midterm paper (close-reading a text), 10-15 page final creative paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: LATS concentrators

AMST 349 (S) Sexuality and US Literatures of the 19th Century

Cross-listings: WGSS 329 AMST 349 ENGL 329

Secondary Cross-listing

If homosexuality and heterosexuality, as it is commonly argued, only came into being as legible identities at the end of the nineteenth century, what constituted "sexualities" before that? This course will explore how sexualities were expressed, regulated, denied and embraced "before identity" through reading closely some of the most central literary and cultural works of the period alongside a set of methodologically and theoretically diverse critical works that engage this query. Some questions we may explore include: What counts as sex and why would that be important to understanding a work of literature? What effect does race, ethnicity, gender, class and other differences make on sexual expression and regulation? How does literature itself represent, theorize, and respond to discourses of desire? Authors whose works we may explore include Emily Dickinson, Frederick Douglass, Harriet Jacobs, Henry James, Herman Melville, and Ralph Waldo Emerson.

Class Format: seminar

Requirements/Evaluation: engaged and thoughtful discussion, in-class writings, oral presentation, one 5- to 7-page paper and one 8- to 10-page paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: ENGL, WGSS, and AMST majors

Expected Class Size: 19

AMST 350 (S) Black Masculinities (DPE)

Cross-listings: AMST 350 ENGL 375 WGSS 318 AFR 331

Secondary Cross-listing

In this seminar, we will study the evolution of Black masculinities through cultural, social, and political movements from 20th century to the present. This course engages Black feminist thought, Black masculinities studies, queer theory and performance studies. We will examine the relationship and constitutive nature of masculinity and femininity. By examining representations and presentations of Black masculinities, we will pursue questions such as: How is blackness always already gendered? How is gender always already racialized? What are the effects of these gendering and racializing practices on Black bodies, spaces, and places? How has dominant society attempted to define Black masculinity? In what ways have Black people undermined these narratives and redefined themselves? How do racial stereotypes about Black men's sexuality inform representations of Black

masculinities? What is the future of Black Gender? We will trouble the relationship between manhood and masculinity by examining the ways in which masculinity can move across various kinds of bodies. In addition to reading critical and creative texts, we will view films and engage other kinds of media. Students will be responsible for 2 short papers and a final project.

Requirements/Evaluation: students will be responsible for 2 short papers and a final project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: WGSS Majors will get preference, then Juniors and Seniors

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

AMST 353 (S) Is Science Native to Turtle Island? The History of Native Science in North America (DPE)

Cross-listings: STS 353 AMST 353

Primary Cross-listing

Settler sciences and technologies deployed by Europeans colonizing Turtle Island (what settlers called North America) were introduced as weapons of Indigenous termination. From medical violation, to anthropological theft, and industrial pollution, settler technoscience objectified and appropriated Indigenous people and lands, and attempted to displace Indigenous knowledge in the pursuit of settler supremacy. Indigenous bodies were cast as victims, objects and sometimes the tools of this project. And yet, as tools and objects, Indigenous peoples took up settler technoscience in a multitude of ways that failed (both purposefully and not) to adhere to the colonizing mission, incorporating Indigenous knowledges and orientations, subverting settler science as a source of authority, and positioning science as a site of Indigenous sovereignty. The practice of taking up science as a tool of decolonization has become explicit in recent decades as expressly Native sciences now shape tribal funding, college education, and negotiations with international governing bodies. This course will trace the history of Native science across different nations and disciplines from the antebellum period when settler sciences were taking shape in civilian institutions to the present when Native science is professionalizing and being codified. We will read primary sources and scientific treatises by Indigenous leaders, activists, and scientists alongside secondary sources in Indigenous science and technology studies (STS), history, and postcolonial and queer theory.

Requirements/Evaluation: attendance and class participation, two 4-page research papers, and a final creative project (TBD with instructor) or 8- to 10-page paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: American Studies majors and Science and Technology Studies concentrators

Expected Class Size: 13

Grading: no pass/fail option, no fifth course option

AMST 355 (F) Creating Whiteness: Racial Taxonomies in 'American' Art, 1650-1900

Cross-listings: AMST 355 ARTH 515

Secondary Cross-listing

"What is race?" "How is a race created?" "What are the racial histories and subsequent political implications of 'American' art?" These are the central questions of our exploration. Drawing on two centuries of making in the Americas--from 17th century casta paintings of New Spain to the pictorialist photographs of Fred Holland Day--this object-based seminar for graduate students (and undergraduates with instructor's approval) draws upon area collections (including WCMA and The Clark Art Institute) to make the argument that racial ideologies have always been sutured to definitions of an American canon. Our approach is the case study: devoting one or two class meetings to the exploration of eight specific moments/artists in order to engage with the intersectional ideologies of personal and collective identity, e.g., self and the Divine; portraiture and the nation, armed conflict, and the constructed mutabilities of gender and sexuality. Additional artists and topics include: the Stuart family's images of George Washington and Thomas Jefferson; advances in photographic technology vis-a-vis the amputated bodies of Civil War veterans; gender fluidity in John Singer Sargent; and the equation of homoeroticism and black bodies in pictorialism. Designed to provide breadth and specific moments of depth, we will be covering processes of making across multiple mediums and time periods. An elementary reading knowledge of French, Latin, Portuguese, and/or Spanish will not go amiss.

Requirements/Evaluation: research paper, presentations

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students

AMST 359 (S) Spirits of Rebellion: The L.A. Rebellion Filmmakers

Cross-listings: AFR 351 AMST 359 ENGL 357

Primary Cross-listing

When Beyoncé unveiled the *Lemonade* visual album in 2016, her production captured the artistic spirit and gave new life to an earlier work: Julie Dash's *Daughters of the Dust* (1991), a luminous film about three generations of the Gullah people and the first motion picture by a Black woman to obtain wide theatrical release in the United States. Many, however, are unaware of the decades-long cinematic movement to which Dash belongs. In this course, we will devote our critical inquiry to the creative output of the L.A. Rebellion, a group of Black cinematic artists trained at the UCLA Film and Television School between the 1960s and 1990s. Our visual journey will take us through a diverse set of filmmakers like Charles Burnett, Ben Caldwell, Barbara McCullough, Julie Dash, Zeinabu irene Davis, Haile Gerima, Alile Sharon Larkin, Billy Woodberry, among many, many others, and how they sought to not only redefine the Black image on-screen but also reimagine the infinite possibilities of Blackness. We will pay close attention to the heterogeneity of genres, styles, and techniques that they put into practice from narrative to neorealism to documentary to avant-garde/experimental to African and African American musical and storytelling traditions. We will explore the various social and political issues that were represented by their films including: racial and class oppression, woman of color feminisms, Black Power, Afrocentrism, anti-colonialism and decolonization, police brutality and mass incarceration, radical social movements and coalition building, and the importance of community-based art and film practices. Finally, we will touch upon some of the recent works that have been inspired by the L.A. Rebellion, including the aforementioned *Lemonade* and Barry Jenkins' *Moonlight* (2016). Our viewership will be supplemented with readings in Black social and cultural criticism.

Requirements/Evaluation: attendance and participation; weekly online journal responses (1-2 pages); midterm essay (5-7 pages); final project

AMST 360 (F) The Atlantic World: Connections, Crossings, and Confluences (DPE)

Cross-listings: AMST 360 HIST 361

Secondary Cross-listing

Early Americans inhabited an interconnected world through which people, beliefs, and objects circulated. This course explores the "Atlantic World" as both a place and a concept: an ocean surrounded by diverse communities and empires, and an imagined space of shared or competing affiliations. Moving from the tenth century to the nineteenth, it examines ecological, cultural, political, economic, intellectual, and religious exchanges among Native Americans, Europeans and colonizers, and Africans and African Americans. It introduces both conceptual dimensions of this Atlantic paradigm and case studies that investigate its human subtleties, with the goal of examining early American history through a transnational lens. The course will take up the stories of Wabanaki mariners and Norse/Viking expansionists; Pocahontas, a trio of Inuit people, and myriad other Indigenous travelers to Europe; West African survivors of the Middle Passage and their enslaved descendants who pushed for survival and recognition of their humanity overseas; New England religious dissidents, intellectuals, and profiteers from Caribbean slavery; Touissant L'Ouverture and the reverberations of the Haitian Revolution; and whaling ship crews who pursued cetaceans ever farther out at sea, among other topics. The course also delves into new methodologies for telling histories that have been unevenly presented or seemingly silenced in traditional documentary archives, probing ways that oral traditions, songs, archaeology, material culture, and other forms of expression and representation can help recast the nature and meanings of these connected spaces and histories. Additionally, it provides an opportunity to engage with original materials pertaining to Atlantic World histories in the Williams College Archives/Special Collections and Art Museum.

Class Format: will alternate with seminar-type discussion of readings

Requirements/Evaluation: active participation in class discussion, several short essays based on readings and discussion topics, museum/archives exercise, final essay

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: sophomore, junior, and senior History majors

AMST 376 (F) Landscapes in American Literature

Cross-listings: AMST 376 ENGL 376 STS 377

Secondary Cross-listing

This course examines representations of American landscapes in selected texts from the British colonial era to the present. Critical approaches will include narrative theory, formalism, eco-criticism, and science and technology studies. The central questions are: (1) How do authors adapt narrative and poetic forms to the representation of particular landscapes? (2) How do literary landscape representations change when new technologies arise for traversing and transforming them? (3) What effects can literary landscapes have on the landscapes we live in? Landscapes include settlements, cities, wildernesses, "frontiers," suburbia, and infrastructural scenes. Relevant technologies include the postal service, the railroad, the telegraph and telephone, the automobile, commercial aviation, and Skype. Texts may include: letters of Columbus, American Indian creation stories, early American religious texts, captivity narratives, slave narratives, and poems, short stories, and novels from the 17th to the 21st centuries, as different from one another as Dickinson's "Nature-sometimes sears a Sapling-" and Annie Proulx's *Brokeback Mountain*.

Requirements/Evaluation: discussion participation; five brief response papers (~2 pages); a mid-semester essay (~5 pages); a final essay (12- to 15-pages)

AMST 379 (F) American Pragmatism

Cross-listings: AMST 379 PHIL 379

Secondary Cross-listing

Along with jazz, pragmatism stands as the greatest uniquely American contribution to world culture. As the music wails in the background, we will study the classic pragmatists: William James, C. S. Peirce, and John Dewey. We will continue with the contemporary inheritors of the tradition: Cornel West, Richard Rorty, and Hilary Putnam. Although it has influenced both analytic and continental philosophy, pragmatism is a powerful third philosophical movement. Always asking what practical difference would it make, our authors investigate the central questions and disputes of philosophy, from epistemology and metaphysics to ethics and religion. Rather than seeing philosophy as an esoteric discipline, the pragmatic philosophers (with the possible exception of Peirce) see philosophy as integral to our culture and see themselves as public intellectuals.

Requirements/Evaluation: final paper, several short assignments

AMST 382 (S) Transnational Asian/American Film and Video

Cross-listings: COMP 382 AMST 382

Primary Cross-listing

In this course, we will examine transnational Asian/American film and video through the frameworks of film and visual studies, cultural studies, and critical media literacy. We will traverse communal, national, and transnational lines with a heterogeneity of forms and genres, including narrative, documentary, experimental, short film, music video, public access television, and YouTube. We will attend to multiple modes of critical analysis: (1) the conditions of power and visibility being mediated by sites of representation, (2) the networks and platforms helping to make these sites possible, and (3) the materials, meanings, and acts being generated by them. We will also interrogate: How are Asian, American, and/or Asian American representation being produced, performed, embodied, circulated, and consumed? What are the social, political, economic, and cultural forces at play in a given historical context? What artistic and political strategies are at play in the complex nexus of producers, directors, actors, distributors, and viewers? And what are the possibilities, limits, and stakes for different strategies of invention and intervention, activism and resistance? We will consider films from the United States as well as the inter-Asian context. Students will produce a creative media project at the end of the semester.

Requirements/Evaluation: attendance and participation; weekly online journal entries (1-2 pages); midterm paper (5-7 pages); final creative project

AMST 384 (F) Selected Topics in Asian American Studies (DPE)

Cross-listings: AMST 384 HIST 384 ASST 384

Secondary Cross-listing

Assuming some previous knowledge of Asian American history, this course will examine a number of specific topics in Asian American Studies. Using historical sources, monographs, graphic memoirs, novels, and films, potential topics include Asians of mixed race, Orientalism, adoption, food culture,

the "model minority," legal studies, Asian Americans and the environment, and the impact of war on Asian American history.

Requirements/Evaluation: papers

Prerequisites: none; open to all

Enrollment Limit: 25

Enrollment Preferences: seniors first, then anyone

Expected Class Size: 20

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 384 (D2) HIST 384 (D2) ASST 384 (D2)

Difference, Power, and Equity Notes: This class is focused on race, immigration, gender relations, and labor issues; all of which can be seen through the lens of power dynamics and inequality.

AMST 403 (S) New Asian American, African American, Native American, and Latina/o Writing

Cross-listings: AMST 403 AFR 333 LATS 403

Primary Cross-listing

The most exciting and forward-thinking writing in the English language today is being done by formally experimental writers of color. Their texts push the boundaries of aesthetic form while simultaneously engaging questions of culture, politics, and history. This course argues not only for the centrality of minority experimental work to English literature but a fundamental rethinking of English literary studies so as to confront the field's imbedded assumptions about race, a legacy of British colonialism, and to make the idea of the aesthetic more open to ideas generated in critical race studies, diaspora studies, American studies, and those fields that grapple more directly with history and politics. In the critical realms of English, work by minority writers is often relegated to its own segregated spaces, categorized by ethnic identity, or tokenized as "add-ons" to more "central" or "fundamental" categories of literature (such as Modernism, poetics, the avant-garde). Recent work by Asian American, African American, Native American and Latino/a writers challenges our assumptions and preconceptions about ethnic literature, American literature, English literature, formal experimentation, genre categorization, and so on. This writing forces us to examine our received notions about literature, literary methodologies, and race. Close reading need not be opposed to critical analyses of ideologies. Formal experimentation need not be opposed to racial identity nor should it

be divorced from history and politics, even, or especially, a radical politics.

Requirements/Evaluation: one shorter paper (7-8 pp.), one final paper or creative project (10-12 pp.), two short response papers, a presentation, and participation

Prerequisites: none but those with some previous experience with literature and/or literary analysis might be helpful

AMST 405 (S) Critical Indigenous Theory (DPE)

Intellectual decolonization is not a bounded project. On one hand, it demands a vocabulary of difference and refusal that rejects colonial theories and epistemologies. On the other, it demands that we interrogate our own intellectual and cultural traditions and trauma. Critical Indigenous theory is a tool in those projects, as it offers a corrective and an opening up of both dominant critical theory traditions that violently erase Indigenous bodies and political realities and of Indigenous theory that can essentialize difference and replicate oppressive dynamics in our communities. Critical Indigenous theory seeks to understand the structures and relations of power in settler colonialism, nested sovereignty, and culturally specific Indigenous philosophical traditions, like Indigenous studies more broadly, but also questions the key concepts that define Indigenous studies: tradition, sovereignty, authenticity, identity, race, gender, and sexuality. In this course, we will read major works in critical Indigenous theory that address indigeneity as it relates to race, postcolonial theory, feminist and two-spirit critique, alternative political engagement with the settler colonial state, and questions of "colonial unknowing." We will work on cultivating the reading practices needed to parse dense theoretical texts, and over the course of the semester you will develop a research project on a topic of your choosing that will allow you to take critical Indigenous theories and employ them as analytic tools and lenses.

Requirements/Evaluation: attendance and participation, one discussion prospectus, and a 20-page research paper

Prerequisites: junior or senior status and some background in American Studies, Native American Studies, or Critical Theory or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Students will be invited to think deeply about the intersections of race, gender, colonialism, sexuality, and epistemology, and develop skills necessary to identify the theoretical basis of decolonial activism.

AMST 408 (F) Envisioning Urban Life: Objects, Subjects, and Everyday People

Cross-listings: AMST 408 LATS 408

Secondary Cross-listing

What is the relationship between real life in urban communities and the multiple ways in which they are imagined? What does it mean to be "urban," to live in an "urban community," or to be the product of an "urban environment"? Who do we think the people are who populate these spaces? This

course takes a critical look at specific populations, periods, and problems that have come to dominate and characterize our conceptions of the quality, form, and function of U.S. urban life. A few of the topics we may cover include historical accounts of the varied ways in which poverty and "urban culture" have been studied; race, class, and housing; the spatial practices of urban youth and the urban elderly; and gendered perspectives on social mobility and community activism. Finally, this course will explore how diverse social actors negotiate responses to their socio-spatial and economic circumstances, and, in the process, help envision and create different dimensions of the urban experience.

Requirements/Evaluation: class participation, a short essay, a series of writing exercises, and a semester-long final project

Prerequisites: prior courses in AMST, LATS, or permission of instructor; not open to first year students

Enrollment Limit: 14

Enrollment Preferences: senior Latina/o Studies concentrators and senior American Studies majors

AMST 410 (F) Black Literary and Cultural Theories

Cross-listings: ENGL 410 AFR 410 AFR 354 COMP 410 AMST 410

Primary Cross-listing

This course will examine the writings of black twentieth- and twenty-first-century Anglophone and Francophone literary and cultural theorists in the African diaspora. We will begin with Sojourner Truth and W.E.B. Du Bois and end with current debates between the "Afro-Pessimists" and "Afro-Optimists." We will be reading writers from the United States, Britain, Africa, the Caribbean, and Europe, moving through the writings of the Harlem Renaissance, Négritude, Pan-Africanism, the Black Arts movement and Black Panthers, the Black Atlantic, and black feminism and queer studies. We will come to see that there is no easy separation between questions of politics (e.g., anti-colonialist, anti-racist, anti-capitalist) and those of aesthetics and poetics.

Class Format: seminar

Requirements/Evaluation: midterm, participation (attendance, discussions, GLOW posts), short paper (4-5 pp.), two response papers (2-3 pp. papers), final project (10-12 pp.: analytical paper)

Prerequisites: none

AMST 411 (F) Transnationalism and Difference: Comparative Perspectives

Cross-listings: LATS 409 AMST 411 WGSS 409

Secondary Cross-listing

In the age of satellite television, e-mail, and mobile applications such as WhatsApp and Skype, transnational living has rapidly emerged as the norm as opposed to the exception. However, what does it really mean to "be transnational"? How are the lived experiences of transnational individuals and

communities shaped by categories of difference such as gender, ethno-racial identity, sexuality, and class? What impacts do the growing number of transnational citizens and residents in the U.S. have on our understanding of "American" identity in the local, national, and global contexts? In this interdisciplinary, comparative course we will analyze recent theories regarding the origins and impacts of transnationalism. Particular attention will be paid throughout the semester to the interplay of gender, ethno-racial identity, sexuality, and class in connection with everyday transnational dynamics. The broad range of case studies examined includes China, Colombia, the Dominican Republic, Haiti, Mexico, the Philippines, Puerto Rico, and Middle East.

Requirements/Evaluation: student participation, an original 12-15 page research paper conducted in stages, and peer editing

Prerequisites: LATS 105, WGSS 101 or AMST 201; junior or senior standing

AMST 440 (S) Racial Capitalism (DPE)

Cross-listings: AMST 440 AFR 342

Primary Cross-listing

This class will interrogate the ways in which capitalist economies have "always and everywhere" relied upon forms of racist domination and exclusion. Although the United States will be in the foreground, the subject requires an international perspective by its very nature. We will consider the ways in which the violent expropriation of land from the indigenous peoples of the Americas, paired with chattel slavery and other coercive forms of labor, made possible the rise of a capitalist world economy centered in Europe during the early modern period. We will then explore ways racial divisions have undermined the potential for unified movements of poor and working people to challenge the prerogatives of wealthy citizens, and served to excuse imperial violence waged in the name of securing resources and "opening markets". Ideas about gender and sexuality always undergird racial imaginaries, so we will study, for instance, the ways rhetoric about "welfare queens" has impacted public assistance programs, and claims about the embodiment of Asian women play into the international division of labor. We will also be attentive to the means - from interracial unionism to national liberation struggles - by which subjects of racial capitalism have resisted its dehumanizing effects. This is a reading intensive course that will challenge students to synthesize historical knowledge with concepts drawn from scholars working in the traditions of Marxist, decolonial, and materialist feminist thought, including: Angela Davis, Cedric Robinson, Anibal Quijano, Chandra Mohanty, David Roediger, Stuart Hall, Ruth Wilson Gilmore, and Silvia Federici

Class Format: seminar

Requirements/Evaluation: attendance and participation; a written mid-term exam; one in-class presentation; research paper proposal; 12-16 page research paper

Prerequisites: previous course work in race and ethnicity, critical studies in neoliberalism or political economy, or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: American Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AMST 455 (S) The Afterlives of Objects: Telling American Histories through Material Culture and Museums (DPE)

Cross-listings: AMST 455 HIST 455

Secondary Cross-listing

Material culture studies examine relationships between people and objects. Tangible artifacts like furniture, clothing, ceramics, tools, and buildings give insight into communities' identities, aspirations, and struggles. This course approaches American histories through objects, and considers how interdisciplinary methodologies can reveal alternative understandings of the past. The course traces changing theories and practices of preservation, curation, and display; shifting conceptions of "heritage" among diverse peoples; and ethical challenges posed by Native American and African American items held in museums, particularly in relation to repatriation considerations. The course involves a staged set of class visits to work with collections at the Williams College Archives/Special Collections and Art Museum as well as local/regional repositories and historic sites. While the scope of the course is continental and at times transoceanic, it includes substantial focus on the Northeast/New England and the material assemblages and landscapes that shape western Massachusetts. Students will build familiarity with appropriate techniques for handling objects, cultivate skills for developing and carrying out an original research project, and explore diverse modes of analysis and expression for telling the stories of objects and their associated communities.

Requirements/Evaluation: active participation in class discussion and museum visits, in-class presentation about one week's readings, research project prospectus, research project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: junior and senior History and American Studies majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

AMST 462 (F) Art of California: Pacific Standard Time

Cross-listings: ARTH 562 ARTH 462 LATS 462 AMST 462

Secondary Cross-listing

In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history. In fall 2017, a new Getty PST initiative focused on Latin American and Latino art will commence and this class will consider these exhibitions as well.

Requirements/Evaluation: several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester

AMST 478 (S) Cold War Landscapes

Cross-listings: HIST 478 AMST 478 ENVI 478

Secondary Cross-listing

The Cold War between the United States and the Soviet Union set in motion dramatic changes to the natural and built environments of many nations between 1945 and 1991. Nuclear test and missile launch sites, naval installations, military production operations, and border securitizations are just a few of the most obvious ways in which the stand-off between the two countries altered rural and urban landscapes around the world. But one can also see the Cold War as setting in motion less immediately direct but nonetheless profound changes to the way that many people saw and planned for the environments around them, as evidenced, for instance, by the rise of the American suburb, the reconstruction of postwar Europe, and agricultural and industrial initiatives in many developing nations. We will begin this seminar by exploring several distinct "Cold War landscapes" in the United States, then move on to examining others in Europe and the Soviet Union. We will spend the final weeks of the semester discussing examples from other parts of the world. Our approach to our topics will be interdisciplinary throughout the semester, and students are welcome to write their research papers on any geographical area of the world.

Requirements/Evaluation: class participation, weekly critical writing, and a final 20- to 25-page research paper

Prerequisites: none

Enrollment Limit: 15

AMST 490 (S) The Suburbs

Cross-listings: AMST 490 ENVI 491 HIST 491

Secondary Cross-listing

The suburbs transformed the United States. At the broadest level, they profoundly altered spatial residential geography (especially in terms of race), consumer expectations and behavior, governmental policies, cultural norms and assumptions, societal connections, and Americans' relationship to nature. More specifically, the different waves of post-World War II suburban development have both reflected large-scale shifts in how power and money have operated in the American political economy; and set in motion deep-seated changes in electoral politics, in Americans' understandings of

how their income should be used, and in how the built landscape should be re-imagined. This tutorial will explore the rich historical literature that has emerged over the last twenty years to provide students with a history of the suburbs, to see the suburbs as more than simply collections of houses that drew individual homeowners who wanted to leave urban areas. We will focus most of our attention on the period from 1945 through the 1980s. Some of the questions we will consider will include: how did the first wave of suburban development bring together postwar racial and Cold War ideologies? Is it possible, as one historian has argued, that suburbs actually created the environmental movement of the 1960s? And how have historians understood the role that suburbs played in America's conservative political turn, leading to the election of Ronald Reagan?

Requirements/Evaluation: typical tutorial format; every other week, students will write and present orally a 5- to 7-page essay on the assigned readings; on alternate weeks, students will write a 2-page critique

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History majors and students with previous coursework in History

AMST 12 (W) Podcasting: Writing and Producing for the Ear

Anyone can make a podcast. But is it a podcast worth listening to? Or is it just another hot take recorded poorly in a closet? This hands-on course, taught by former National Public Radio correspondent Elizabeth Arnold, will introduce you to the art of writing and producing audio through the creation of your own podcast. Audio is compelling because of the power of sound to tell a story, the expressiveness of the human voice and the intimacy of the medium. Classes will cover the basics: from how to write for the ear to multi-track mixing. Students will learn to record, edit and critique their own short audio stories and develop the first episode of a podcast for broadcast. The in-class portion of the course will focus on interviewing and production skills, along with critiques of outside-of-class audio assignments. Assignments will include listening to a range of audio stories and podcasts. With student consent, final projects may be submitted for broadcast. Adjunct Instructor Bio: Elizabeth Arnold is a former National Public Radio (NPR) White House and Congressional correspondent. For more than twenty years, she covered politics and the environment in the U.S. China and Russia. She currently teaches journalism at the University of Alaska and reports on climate change in the Arctic.

Requirements/Evaluation: grade will be based on both weekly audio story assignments and a final project which is the first episode of a podcast, suitable for broadcast; the final project must also include a storyboard and outline of content for the continuation of the series

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: if necessary, preference will be given based on expressed interest in the course

Grading: pass/fail only

AMST 14 (W) Race, Education, and Pop Culture

Cross-listings: AMST 14 SPEC 14

Primary Cross-listing

This course will explore the educational experience of Black students as portrayed in popular culture and compare that to the K-12 and higher education literature that documents and examines the lived experiences of Black students. How accurately do we see the experience of Black students represented in popular culture? What choices or biases might be reflected in these depictions? What might the consumption of these media have on the ways in which people build narratives around the experiences of Black students throughout the American educational system? Potential topics include the experience of students at historically Black colleges and universities (*A Different World, School Daze, The Quad*), experiences in gifted and talented education (*Smart Guy, Akeelah and the Bee, Finding Forrester*), experiences at predominately White institutions (*Higher Learning, Grown-ish, Dear White People*), experiences as student-athletes (*Love and Basketball, Coach Carter*), and experiences in public and public charter schools (*Lean on Mean, The Steve Harvey Show, Dangerous Minds, On My Block, Boston Public, Waiting for Superman, The Lottery*). Students will be expected to choose some popular culture medium and explore how it connects to the literature in a final paper of 10 -12 pages and contribute actively to classroom discussions. Adjunct Instructor Bio: Christopher Sewell is an Associate Dean of the College at Williams College in Williamstown, Massachusetts. His scholarship focuses on studying the experiences of gifted students of color, how schooling and policies around gifted and talented education affect students of color long-term experiences, the ways in which LGBTQ+ gifted students negotiate their academic, racial and sexual identities, and the experiences of Black students at Predominantly White Institutions.

Requirements/Evaluation: 10-page paper

AMST 15 (W) Contemporary American Songwriting

Cross-listings: MUS 15 AMST 15

Secondary Cross-listing

This course will focus on learning how to write and perform songs in classical contemporary style. Song styles that will be addressed include pop, rock, blues, country, folk and jazz. Topics addressed will include the evolution of song structure, how to create a lyric that communicates, vocal and instrument presentation, recording and performing techniques, publicity for events, and today's music industry. This class will culminate in a public performance of material written during the course. To successfully pass this course, students are required to create, edit, perform and possibly record two original songs in one of the above mentioned genres. These songs must be conceived during the course period (previously written material is not usable.) Students will be guided to create both music and lyrics. They may also be required to participate in a co-write session. One of these songs will be presented during the final performance, preferably by the student. Attendance at classes, feedback sessions, and final presentation is mandatory. Please note: this class meets every day. A short writing assignment will be passed in on the last day of class. Adjunct Instructor Bio:

Singer/Songwriter Bernice Lewis has been teaching her Winter Study Course on performing and songwriting since 1995. She is also a published poet, a producer, and a sought after coach. She holds an M.Ed from the University of Massachusetts in Amherst.

Requirements/Evaluation: final performance and a 2- to 3-page paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: at the discretion of the instructor

- Peter Just, Professor of Anthropology
- Joel Lee, Assistant Professor of Anthropology; on leave Fall 2019
- James A. Manigault-Bryant, Professor of Africana Studies and Faculty Affiliate in Anthropology and Sociology and Religion; affiliated with: Religion Department, Anthropology and Sociology; on leave 2019-2020
- Christopher W. Marcisz, Visiting Lecturer in Anthropology
- Gregory C. Mitchell, Associate Professor of Women's, Gender and Sexuality Studies and Faculty Affiliate in Anthropology/Sociology, Chair of Women's, Gender, and Sexuality Studies; affiliated with: Anthropology and Sociology; on leave 2019-2020
- James L. Nolan, Chair and Washington Gladden 1859 Professor of Sociology
- Marketa Rulikova, Visiting Assistant Professor of Sociology
- Olga Shevchenko, Professor of Sociology; on leave 2019-2020
- Grant Shoffstall, Visiting Assistant Professor of Sociology
- Christina E. Simko, Assistant Professor of Sociology
- Ben Snyder, Assistant Professor of Sociology

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens' habits of mind, worldviews, and values to broader audiences.

Anthropology critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. **Archaeology** extends this analysis to social formations of the historical and prehistorical past. **Sociology** studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

MAJORS

The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated "ANSO."

Requirements

For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

Core Courses

Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

Anthropology

ANTH 101 How to Be Human

Sociology

SOC 101 Invitation to Sociology

Joint Courses

ANSO 205 Ways of Knowing

ANSO 305 Social Theory

ANSO 402 Senior Seminar

Elective Courses

Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

STATISTICS AND DATA ANALYSIS

In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION

Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student's departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY

Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until **AFTER** they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. We credit two, and in special cases three courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

ANSO 205 (S) Ways of Knowing

An applied exploration of how one makes sense of the social world through fieldwork. Some of the key questions of the course are: What are the philosophical and epistemological underpinnings of social inquiry? How does one frame intellectual problems and go about collecting, sifting, and assessing field materials? What are the uses and limits of statistical data? What is the importance of history to sociological and anthropological research? How can one use archival and other documentary materials to enrich ethnographic research? What are the empirical limits to interpretation? What is the relationship between empirical data and the generation of social theory? How does the social organization of social research affect one's inquiry? What are the typical ethical dilemmas of fieldwork and of other kinds of social research? How do researchers' personal biographies and values shape their work? In the first half of the course, we will approach these problems concretely rather than abstractly through a series of case studies, drawing upon the field experiences of departmental faculty and guest speakers from different professional backgrounds. The second half of the course will be dedicated to a hands-on training in field methods, in which the students will design and undertake their own pilot field projects.

Requirements/Evaluation: full-participation in the seminar, several short papers, an independent ethnographic project and a final research proposal

Prerequisites: ANTH 101 or SOC 101 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

ANSO 305 (F) Social Theory

An introduction to social theory in anthropology and sociology, with strong emphasis on enduring themes that cut across disciplinary divides. What is modern about modern social theory? How do social thinkers construe "society" and "culture," and have these constructions withstood challenges over time? What role does human agency play in the unfolding of social life, and where does that sense of agency come from in the first place? What are the forces that animate social interaction on the level of individuals, social groups and complex units like nation-states? What are the possibilities and limits of systematic approaches to the study of human social experience? The course emphasizes major differences between interpretive frameworks as well as the common elements that contribute to a deeper understanding of the social world.

Requirements/Evaluation: full participation in the seminar, regular reading response memos, and three papers

Prerequisites: ANTH 101 or SOC 101 or ANSO 205 or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

ANSO 402 (S) Senior Seminar

This capstone seminar combines intensive discussion and individual research. Half of the course will be dedicated to the discussion of current debates central to the concerns of both anthropology and sociology, such as the ethics of conducting fieldwork, humanitarianism and relief, global public health, poverty and the city, and environmental conservation. Among the topics discussed, the ethical dilemmas of conducting ethnography will be a common theme. The second half of the course will be devoted to independent individual original projects which should have a major ethnographic component. At the end of the course, students will present their projects to the seminar.

Requirements/Evaluation: full participation, major research project and paper (30 pages), class presentation; weekly short responses

Prerequisites: only senior majors in Anthropology and Sociology, or permission of instructor

Enrollment Limit: none

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Winter Study -----

ANSO 11 (W) Introduction to Indian Cuisine

India is a diverse country. The ingredients and dishes cooked in the Northern part of India vary immensely from those cooked in the South and coastal regions. This course will begin with an introduction into the origin and use of spices in Indian cooking and then go into a hands-on demonstration of some popular dishes from the above regions of India. The focus will be to learn to cook healthy vegetarian food, but we will also be making the popular chicken tikka masala. The class will meet for 6 hours each week (January 7, 8, 14, 15, 28, and 29, plus compulsory field trip). There will be assigned readings and a compulsory 3-day trip to New York (January 20-22) where we visit restaurants and spice markets in the boroughs of Manhattan and Queens to further your understanding of the diversity within the Indian cuisine. The trip will feature cooking demonstrations at various restaurants, including one with the chef from the Pierre. The course will require students to create a food blog, post photographs, and make a number of blog entries about the Indian cuisine. Final evaluation will be based on a cooking project as well as the quality of blog entries. Adjunct Instructor Bio: Ramaa Reddy Raghavan is a freelance broadcast and print journalist who is passionate about food and travel. She is a graduate of the Columbia School of Journalism. Her work has been published in Huffington Post, NBC, WHYY, BBC, NPR, and PRI's The World.

Requirements/Evaluation: final project or presentation and blog entries

Prerequisites: interest in food and cooking

Enrollment Limit: 8

Enrollment Preferences: students will be selected on a written 350 word piece as to why they want to be in the class

Grading: pass/fail only

Materials/Lab Fee: \$420

ANSO 15 (W) An Introduction to Spatial Science and GIS

Cross-listings: SPEC 15 ANSO 15

Primary Cross-listing

Space and place are so ubiquitous in our lived experience that we often fail to take their significance into account when directing and designing scientific research. How do spatial relations (presence/absence, proximity, preference/avoidance) shape natural and cultural phenomena? How do space and place reflect cultural perceptions and practices? How are landscapes and environments engineered to shape individual and social behavior? This intensive course explores the fundamentals of spatial theory and methods, with an emphasis on technical skill, data evaluation, and research design. Through readings, lectures, discussions, and exercises you will be encouraged to think spatially and to apply spatial thinking to your areas of interest. Priority for enrolling in this course will be given to Div II students who may need GIS (mapping & spatial analysis) for an independent study or senior thesis. Students who have not taken GEOS 214 have enrollment preference in this course; this course is not a prerequisite for GEOS 214 and students who take this course may also take GEOS 214.

Requirements/Evaluation: combination of class participation, short essays on assigned readings, successful completion of class exercises, and a 10-page research design paper

Prerequisites: none

Enrollment Limit: 24

Enrollment Preferences: Priority will be given to Div II students who may need GIS (mapping & spatial analysis) for an independent study or senior thesis; students who have not taken GEOS 214 have preference in this course; this is not a prerequisite for GEOS 214

Grading: pass/fail only

This course is cross-listed and the prefixes carry the following divisional credit:

SPEC 15 ANSO 15

Winter 2020

LEC Section: 01 Cancelled

ANSO 16 (W) Jacques Ellul's *The Technological Society*

The work of the late French historian and sociologist Jacques Ellul (1912-1994) suffers from nothing less than a tragic paradox. On the one side, there is arguably no one whose sociohistorical analyses have done more to explicate the relationship between technology and the most pressing issues of our day. On the other side, despite the profundity and contemporary relevance of Ellul's work, it has been widely misinterpreted, dismissed as both "pessimistic" and "technologically deterministic." This course invites students to carry out a close reading of Ellul's most (in)famous study--*The Technological Society* (1964). We will situate this text relative to the circumstances in which Ellul lived and worked, and in relation to his two principle influences: Karl Marx and Søren Kierkegaard. Together, we will then work our way through the text's key themes: Ellul's distinction between technology and *technique* and the latter's distinctly modern characteristics; technique and economy; technique and the state; and finally, human techniques (e.g. therapy, medicine, management, education, propaganda, sport). In the course of proceeding as such, students will be asked to consider, critique, and elaborate Ellul's ideas in light of contemporary technological developments.

Requirements/Evaluation: several short papers and class presentations

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: students will be asked to submit a brief statement of interest

Grading: pass/fail only

Materials/Lab Fee: approximately \$14 for books

Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

STATISTICS AND DATA ANALYSIS

In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION

Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student's departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY

Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until AFTER they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. We credit two, and in special cases three courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

ANTH 101 (F)(S) How to Be Human (DPE)

Is there such a thing as "human nature"? Why have human societies developed such a bewildering range of customs to deal with problems common to people everywhere? This course addresses these questions by introducing students to the comparative study of human social life and culture. Topics surveyed in the course include economics, language and thought, kinship and marriage, law and politics, and the wide variations in human belief systems, including religions. The course also considers the ways that anthropology, a discipline that was until recently practiced almost exclusively by Westerners, approaches other societies in search of insights on our own customs and values. Ethnographic descriptions of both "simple" tribal societies and complex modern ones are a prominent part of the readings. This course explores differences and similarities between cultures and societies and ways in which they have interacted and responded to one another in the past.

Class Format: discussion of case studies and ethnographic films

Requirements/Evaluation: two short essays, a final examination and class participation

Prerequisites: first-year students and sophomores

Enrollment Limit: 30

Enrollment Preferences: first-year students; sophomores may enroll if there is room

Expected Class Size: 30

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: The course is an introduction to cultural anthropology and deals extensively with race, ethnicity, religion, gender, etc., as cultural constructs creating social difference, hierarchies of power, and the creation of inequities in communities and societies. Readings in ethnography, social theory, and sociology are designed to give students a deeper appreciation of all these issues.

ANTH 134 (S) Leaving the World Behind: The Literature of Reclusion (DPE) (WS)

Cross-listings: CHIN 134 REL 134 ANTH 134 COMP 134

Secondary Cross-listing

Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion—living a life of seclusion from society—in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state—to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: experiential component

Requirements/Evaluation: tutorial papers, responses, and an individual project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 134 (D1) REL 134 (D2) ANTH 134 (D1) COMP 134 (D1)

Writing Skills Notes: Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. Papers will receive substantial writing-based feedback from both the instructor and partner.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the shaping of social differences and dynamics of unequal power. Acts of reclusion are often ways that individuals can challenge the dominance of the state and other structures of authority indirectly. Modes of reclusion can differ substantially depending on the social standing of the recluse. These are issues that we will examine in the course.

ANTH 138 (S) Spectacular Sex

Cross-listings: WGSS 138 ANTH 138

Secondary Cross-listing

From Beyoncé's Super Bowl halftime show to Donald Trump's presidential campaign, spectacles captivate us. Spectacles may be live shows, media events, or even everyday performances ranging from interactive advertisements to viral video sensations. But what are the uses of spectacle? Why are some compelling while others fall flat? How do spectacles control society or maintain social norms? And, importantly for our purposes, how does spectacle shape gender in society? Or from another angle, how does sexuality infuse spectacle? This tutorial introduces students to theories of spectacle ranging from the ancient Greeks to Marxist-inspired thinkers in the 20th century. In particular, we will examine how feminist thinkers have contributed to this literature and how theories of spectacle relate to questions of gender and sexuality. Our weekly readings focus on pairings of theoretical readings with writing on popular cultural examples and case studies. Some possible topics include sporting events, charity ad campaigns, music videos, political events, and social media.

Requirements/Evaluation: weekly response papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students; a statement of interest will be solicited from pre-registrants

ANTH 210 (S) The Challenge of ISIS

Cross-listings: HIST 210 ANTH 210 GBST 210 ARAB 210 REL 240

Primary Cross-listing

What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahidin and Taliban, and al-Qaeda, the course will go on to investigate how ISIS derives important aspects of its ideology and organization from these earlier movements and how it deviates from them. We will look at unique aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.

Class Format: lecture

Requirements/Evaluation: blogs (4 main blog posts, responses to at least 3-4 other blogs each week) (30%); analytic paper or class history paper (35%); 2 midterms (35%)

Prerequisites: none

Enrollment Limit: 40

Expected Class Size: 40

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 212 (F) Foundations of China

Cross-listings: ANTH 212 REL 218 HIST 214 GBST 212 CHIN 214

Secondary Cross-listing

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation: short writing assignments (approximately 750 words each), quizzes, a mid-term, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

ANTH 214 (F) The Rise and Fall of Civilizations

Cross-listings: ANTH 214 ENVI 224

Primary Cross-listing

Over the centuries, philosophers and historians have asked how societies evolved from simple hunter-gatherer bands to complex urban civilizations. Human prehistory and history have shown the repeated cycles of the rise, expansion and collapse of early civilizations in both the Old and New World. What do the similarities and differences in the development of these first civilizations tell us about the nature of societal change, civilization and the state, and human society itself? The course will examine these issues through an introductory survey of the earliest civilizations in Mesopotamia, Egypt, India, Mesoamerica and South America. Classical and modern theories on the nature, origin, and development of the state will be reviewed in light of the archaeological evidence.

Class Format: class discussion

Requirements/Evaluation: midterm, final exam, paper, two quizzes

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

ANTH 215 (F) Performance Ethnography (DPE)

Cross-listings: DANC 214 GBST 215 THEA 215 AMST 214 ANTH 215

Secondary Cross-listing

The course aims to explore the theory, practice, and ethics of ethnographic research with a focus on dance, movement, and performance. Traditionally considered to be a method of research in anthropology, ethnography is the descriptive and analytical study of a particular community through fieldwork, where the researcher immerses herself in the culture of the people that she researches. In this course students will be introduced to (i) critical theory that grounds ethnography as a research methodology, (ii) readings in ethnographic studies of dance and performance practices from different parts of the world, and (iii) field research in the local community for their own ethnographic projects. This is primarily a discussion-based seminar course and may include fieldwork, attendance at live performances, film screenings, workshop with guest artists etc. No previous dance or performance experience is assumed or required.

Class Format: community-based field work

Requirements/Evaluation: class participation, reading responses, fieldwork and field notes, short papers, and final essay

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course focuses on ethnographic research with an emphasis on the ethics of doing ethnography in field sites and making performances based on that research. In fieldwork and performance work, there is a difference in social, cultural, and political (broadly conceived) power between researcher and interlocutors. In the course, students' critical analytical skills are developed for them to be self-reflective about these power differentials and to address issues of social inequality.

ANTH 216 (S) Urbanism in the Ancient World

Cross-listings: GBST 216 ANTH 216

Primary Cross-listing

This is a course on cities in the ancient world, which will examine four major ancient urban centers (Nineveh and Nimrud, Iraq; Teotihuacan, Mexico; and Angkor, Cambodia) and end with a sustained, in-depth exploration of urbanism in prehispanic Maya civilization. As more and more people move into cities across the world, human societies are becoming forever transformed. This transformation into an urban globalized world has ancient roots at the beginning of the first civilizations in Euroasia and the Americas. We will delve into the nature of the urban transformation by first exploring sociological and anthropological definitions of urbanism, and recent studies of modern urbanism. We will look at Nineveh, Nimrud, Teotihuacan, and Angkor to consider how ancient urbanism was distinct from modern cities, while at the same time, ancient urbanites had to deal with similar issues as residents of modern cities. We will then examine in more depth the cities of prehispanic Maya civilization, answering such questions as: how different were Maya cities from other premodern ones? Is there one type of Maya city or many? How different was life in Maya cities from life in Maya villages? What were the power structures of Maya cities? How common were immigrants and slaves in these ancient cities?

Requirements/Evaluation: 5-page papers every other week, oral responses on alternate weeks; tutorial attendance is required

ANTH 222 (F) Heroes, Saints and Celebrity

Cross-listings: ANTH 222 REL 273

Primary Cross-listing

This course examines the ways in which cultures select, ritually celebrate, institutionally harness, and ultimately devour people designated as 'extraordinary'. We will begin by considering cultural archetypes and theories of the hero and how heroism has been understood in different eras and cultural contexts. Using Weber's theory of charisma as a foundation, we will look at a number of specific case studies to evaluate the relationship between individual creativity and action and the demands of social conformity and control. Finally, we will examine how charisma is commoditized in the form of the celebrity in contemporary American culture.

Requirements/Evaluation: class participation, two short response papers, research paper, final exam

Prerequisites: none

ANTH 223 (S) Ethnic Minorities in China: Past and Present (DPE)

Cross-listings: ANTH 223 CHIN 223

Secondary Cross-listing

According to the most recent census conducted in China in 2010, of the 1.3 billion population of China, more than 110 million (8.49%) were ethnic minorities (shaoshu minzu). Most of the minority groups reside in autonomous regions and districts, which constitute 64% of China's total acreage. This course introduces students to the multiethnic aspect of China's past and present. We will address topics such as the minority-group identification project; the definition of minzu (ethnic group); government policy toward and the current situation of the fifty-five official ethnic minority groups; historical sino-centric views about "foreigners" and "barbarians"; ideas of "diversity", "unity", and "sinicization"; and the roles that "barbarians" have played in China's long history. We will examine how social differences and hierarchy are shaped and discuss various ways of achieving equity for ethnic minorities. Throughout the course, the teaching techniques of role-play and debates will be adopted to encourage students to compare ethnic minority issues in China with similar issues in the United States. Students are also encouraged to come up with real-world solutions and recommendations for policy-making at the government and community levels for China and the United States.

Class Format: discussion

Requirements/Evaluation: class attendance, active in-class participation, presentations, two short (5-page) response papers, one 24-hr take-home mid-term, and one final paper (10-12 pages)

Prerequisites: none, open to all students; no knowledge of Chinese language required

Enrollment Limit: 20

Enrollment Preferences: current and prospective majors in the Department of Asian Studies, then to first-years

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: books and reading packet

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 223 (D2) CHIN 223 (D2)

Difference, Power, and Equity Notes: We will explore various meanings of "diversity" and "being ethnic" in the Chinese context and compare them with students' own experiences through class discussions. Students are also required to write one short response paper on their personal encounter with the concept of "race" or "ethnicity." For the final research paper, students are required to identify one problem among all the ethnic minority issues in the Chinese context and write a policy recommendation to make real-world changes.

ANTH 224 (S) Culture and Morality

Cross-listings: REL 225 ANTH 224

Primary Cross-listing

Moral judgments differ across cultures, within cultures, and across time. How do we account for this variation, and what does it tell us about human nature and the nature of moral reasoning? This course examines practical and theoretical orientations for the descriptive study of morality. We will read about and analyze moral life in a range of cultural and historical settings, from Africa and Oceania to North America and the Upper Amazon. As an object of academic inquiry, morality has historically been resistant to classification under any one discipline, recognized at various times to be the exclusive province of philosophy, psychology, religion, and so on; so we will draw on works from across a range of fields in order to better understand morality and its relationship with other significant dimensions of human social life (political economy, religion, gender, etc.). Specific topics will include:

the relationship between morality and freedom; the apparent intractability of moral disagreements; the role of intuition and emotion in moral reasoning; and the influence of power and hierarchy on moral judgment.

Requirements/Evaluation: a midterm project and a final paper

ANTH 225 (S) Fact/Fiction/Film

This course examines the potential of moving images to reveal aspects of culture normally obscured by the written word. We will consider both the theory and practice of documentary film from its inception around 1900 to the present, paying particular attention to the way documentary filmmakers have approached the representation of social reality in Western and non-Western cultural settings. Questions that we will consider include: What is the relationship between written text and image, or between image and story? What is the role of film in anthropology? What counts as a document?

Class Format: team-taught, through a mixture of lectures and discussions

Requirements/Evaluation: regular attendance at film screenings and active class participation, a 5-page paper on an assigned topic, a 12- to 15-page final paper, and a self-scheduled take-home final

Prerequisites: none

Enrollment Limit: 30

ANTH 226 (F) Spiritual But Not Religious

Cross-listings: ANTH 226 REL 226

Secondary Cross-listing

Today, more than one in five people in the United States identify as "none" when asked about their religious affiliation. Yet that does not mean that religious sentiment or spirituality is on the decline. On the contrary, talk of "spirituality" is more pervasive than ever in popular discourse. Increasingly Americans claim that they are "spiritual but not religious" or that they prefer "individual religion" over "organized religion." This course seeks to understand and investigate this phenomenon. What is the lived experience of being "spiritual but not religious"? What counts as spirituality? Is there a meaningful distinction between spirituality and religion? What does this distinction assume about the nature of organized religion? What is the history that led us to this ideology of individualized spirituality? And what are the social and political implications of this trend? We will explore these questions and study this phenomenon through an engagement with ethnography (the qualitative research method generally described as "participant-observation"). Over the course of the semester, students will be expected to conduct an ethnographic research project within local communities in Williams College and Williamstown. Alongside our central readings on spirituality, we will also be studying some background in the theory and practice of this methodology. Throughout the semester, students will work together on developing the practical skills necessary to conduct an ethnographic project, and will be gradually executing their own individual projects. This will include: designing a feasible project and research

question, selecting research sites and interlocutors, taking field-notes and conducting interviews, and finally analyzing data and writing an ethnographic essay.

Requirements/Evaluation: regular reading responses; semester-long research project with frequent small assignments building up to the final product (15- to 20-page paper)

ANTH 227 (F) Language and Society: What Does Your Speech Say About You?

Cross-listings: ANTH 227 ARAB 227

Secondary Cross-listing

Sociolinguistics is the study of how aspects of society influence the way language is used by the society members. In this course, we will examine the inter-relationships between the way language is used in various social contexts affecting that usage. How and why do languages change? How does language reflect a person's identity? How does language intersect with power relations among individuals within a society? Does language vary according to gender? How are language varieties formed, and what determines their status within speech communities? How and why do speakers code-switch among different varieties? These are some key questions that we will examine in this class, drawing on readings that focus on different languages.

Requirements/Evaluation: active class participation, response essays, assignments, article presentation, variation paper, final exam

Prerequisites: none

ANTH 228 (F) Jihad

Most studies of the global jihad movement focus on ideology, operations, and strategy. Numerous studies have also focused on the individual psychology of those who join jihad groups. Often ignored are the cultural dimensions of Islamic jihad. This course examines both the "global" culture of jihad--those cultural elements of the movement that are common across national and linguistic borders--and the particular ways in which jihadi groups reflect and respond to the local cultures in which they operate. Among the topics to be considered are the ways in which jihad adherents use ritual, poetry, graphic imagery, dress and grooming codes, music, film, social media, dream interpretation, and mythology to fix their place in the world and advance their political and social agendas. The course will also examine the role of violence in creating a distinctive and exclusionary social milieu within jihad groups and in defining the relationship between these groups and the societies that surround and, in some cases, support them. Of particular interest for the course will be the ways in which cultural elements of jihadi groups and the jihadi "lifestyle" are mobilized to attract new recruits to the jihadi movement.

Requirements/Evaluation: class participation, four short and informal blog posts (1-page each), two longer response papers (2- to 3-pages each), one research paper (12- to 15-pages)

Prerequisites: none

ANTH 232 (F)(S) Town and Gown: Investigating the Relationship of College and Community

Team-taught by an anthropologist and a journalist, this course investigates the relationship between Williams College and the surrounding communities of Northern Berkshire County via ethnographic/journalistic research conducted by students. The course will look at several case studies centered on "town-gown" relations in different eras and locations in order to contextualize and provide comparative material for understanding the relationship of Williams to its neighboring communities. Among the topics to be considered and possibly investigated will be the social and economic effects of colleges on local communities, the role of alcohol and athletics in town/gown relations, and how the increasing corporatization of academic institutions has changed the nature of town-gown interactions and the place and role of institutions of higher education in their communities. The focus of the course will be on student research, and a large percentage of class time will be devoted to learning the basic techniques of ethnographic and journalistic research, including interviewing, oral historical research, survey research, and participant-observation. Each student will conduct a major research project of their own devising, which will culminate in an investigative report and a public presentation.

Requirements/Evaluation: class participation, research exercises, major ethnographic research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Anthropology and Sociology majors

ANTH 233 (S) Spiritual Crossroads: Religious Life in Southeast Asia

Cross-listings: ASST 233 REL 253 ANTH 233

Primary Cross-listing

No region of the world presents a richer tapestry of religious beliefs, practices, and institutions than Southeast Asia. Buddhism, Hinduism, Christianity and Islam are all to be found and all of them interpenetrate and contend with each other and with a deep undergirding of animism, shamanism, and mystical folk belief systems. This course will survey these religious traditions through time and space, looking in particular at the growing tension between religion and the state as fundamentalism and religious militancy have spread into the region in recent times. All of Southeast Asia will be covered, but particular attention will be devoted to Indonesia, where religious blending and the growth of new fundamentalism are both especially marked.

Requirements/Evaluation: midterm, short essays, term paper

Prerequisites: none; open to non-majors

ANTH 235 (F) Refugees and Migrants

An overflow of refugees to the EU and alarmist electoral campaign rhetoric in the U.S. have intensified the issue of international migration around the world. Right- and left-wing politicians and their constituents, human rights activists and state officials, journalists and NGOs discuss, argue, and mull over causes and consequences of population change, strategies of migration management, and predicaments of social integration. In this course, we will examine the emerging conditions of international migration. Specifically, we will focus on how contemporary welfare and labor regimes, claims on citizenship rights, immigration rules, public deliberations, and interethnic and racial experience shape the movements of people and affect their lives by controlling their bodies, subjectivities, social networks, health, and labor. We will draw on domestic and international case studies as we examine a controversy surrounding the Arizona immigration law, DACA debates, challenges of a migration crisis in EU, rural-to-urban migration in India, and a complexity of refugee flows in the Caucasus and the Middle East. We will briefly engage with the subtleties of migration estimation, such as the politics of population censuses, and will analyze consequences of immigration on host populations.

Requirements/Evaluation: one midterm, two short policy memos, one research paper

Prerequisites: none

Enrollment Limit: none

ANTH 240 (S) Work as a Cultural System (DPE)

"You know my reputation," sang Billy Joe Shaver, "I am everything I do." In many ways we are *homo faber*, the species that *makes* its world and we are defined by what we make, by the work we do. This course will undertake a broad survey of work as cultural systems across time and space. How do societies define work, how do they organize it? Who controls the processes of work, who controls the product of work? When is work an act of pure creation and when is it stultifying labor? How is work enabled and how is it compensated? What defines the difference between work and leisure and how are they valued? How does control over access to work, the organization of work, and the appropriation of its products determine difference, power, and equity in a society? These questions will guide an examination of work drawing on works of philosophy, history, ethnography, literature, and film examining people at work ranging from hunter-gatherers to tin miners, from slaves to corporate managers, from merchant mariners in the age of sail to physicians struggling to adapt to computerized medical records.

Requirements/Evaluation: students will compose several response papers, a take-home midterm exam and a final research paper of 15-20 pages

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Access to work, control over the work process, control over the fruits of labor, and compensation for work, are a principal means for creating and maintaining social difference, power, and equity. It is impossible to seriously study the nature of work without discussing these topics. By placing the universal experience of work in a broad spatial and temporal context students will discover an enhanced analytical ability to critically understand their own experiences of work and those of others.

ANTH 242 (S) The Country and the City in the Classical World

Cross-listings: CLAS 242 ENVI 242 ANTH 242

Secondary Cross-listing

A growing urban-rural divide is defining political discourse around the world. The interrelation and tension between "city" and "countryside" are not new, however, but date back to the time when cities first began. How do cities occupy and transform, interact with and displace rural landscapes? What are the values, stereotypes, and ideals--as well as artistic, literary, and architectural forms--associated with the city and the countryside? What role does one play in the political, social, and economic life of the other? With a focus on ancient Greece and, especially, Rome, this course will combine archaeological evidence and contemporary scholarship with primary sources ranging from Hesiod, Theocritus, Vergil, and Propertius to Cato the Elder, Varro, Vitruvius, and Pliny the Elder, to examine an array of topics including land surveying and colonization; agrarian legislation; the urban food supply; rustic religion in the city; urban parks and gardens; and the concept of the pastoral. Together, we will explore the city and the countryside - not just as places, but also as states of mind. All readings are in translation.

Requirements/Evaluation: informed participation, two short papers (2-5 pages), final paper (8-10 pages)

Prerequisites: none, although prior knowledge of the ancient world will be useful

ANTH 243 (F) Reimagining Rivers

Cross-listings: ANTH 243 ENVI 243

Secondary Cross-listing

Rivers are the circulatory systems of civilization, yet for much of modern history they have been treated as little more than sewers, roads, and sources of power. Today they are in crisis. Rivers and the people who rely on them face a multitude of problems, including climate change, pollution, unsustainable agriculture, and ill-conceived dams. These problems will threaten human rights, public health, political stability, and cultural identities far into the future unless we learn to manage rivers more justly and sustainably. Can we reimagine rivers before it is too late? This course will pursue this question by examining the social, cultural, and political dimensions of conflict over rivers in the twentieth and twenty-first centuries. Combining approaches from a wide range of social science and humanities disciplines and focusing on case studies in Asia, Africa, Europe, and the Americas, it will explore a diverse array of sources: film, fiction, ethnography, history, journalism, legal texts, and more.

Requirements/Evaluation: three 5- to 7-page papers and several short response papers

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Environmental Studies majors and concentrators

ANTH 246 (F)(S) India's Identities: Nation, Community, & Individual

Cross-listings: ASST 246 ANTH 246 WGSS 246 REL 246

Secondary Cross-listing

This tutorial considers India's legacy as a booming Asian democracy that is built upon deep and enduring divisions. Why is India's growing population so often described in terms of multiple identities or fragmenting oppositions—including religion, gender, caste, and class? What are the historic roots and recollections of key moments of structural violence in modern Indian history that produce ongoing social conflict as well as social fluidity? We pay particular attention to key historic moments such as Partition, and key communal riots in Gujarat, Hyderabad, and Delhi as well as regions of India such as Jammu & Kashmir in order to understand the struggle for individual subjectivity and identity within a landscape of stark social hierarchies. We will cover climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. Our readings include ethnographic, sociological, historical analyses as well as fiction, oral history, and popular media sources that attempt to portray India's diverse and fragmented society.

Class Format: meetings weekly, weekly writing, and discussion

Requirements/Evaluation: weekly writing assignments and tutorial attendance every week

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: majors in Anthropology and Sociology, Religion, Asian Studies, or Women's, Gender & Sexuality Studies

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ANTH 255 (S) Buddhism: Ideas and Practices

Cross-listings: ANTH 255 REL 255 ASST 255

Secondary Cross-listing

This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

Class Format: discussion

Requirements/Evaluation: full attendance and active participation; two essays

Prerequisites: none

Not offered current academic year

ANTH 256 (F) Buddhism, Sex, & Gender: #MeToo Then and Now (DPE)

Cross-listings: ANTH 256 REL 256 ASST 256 WGSS 256

Secondary Cross-listing

This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history. We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha's inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decries harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and 'she devils' alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue an intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy--gender, sexuality, race, and class--that Buddhism has attempted to transcend. We begin by considering three women in the Buddha's life--his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)--as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen in Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

Requirements/Evaluation: class discussion, reading responses (3-4 pages), writing chat, final research paper (12 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Religion, Asian Studies, Women's, Gender and Sexuality majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ANTH 256 (D2) REL 256 (D2) ASST 256 (D2) WGSS 256 (D2)

Difference, Power, and Equity Notes: The course fulfills DPE because it seeks to theorize the role of difference (gender, sex, class, and race) and intersectionality within Buddhist texts, practices, and institutions. It considers how Buddhist practices and institutions both deconstruct and reproduce social inequality.

ANTH 262 (S) Language and Power

"A language is a dialect with an army and a navy." This (originally Yiddish) aphorism points to ways in which language, often imagined to be a neutral or apolitical medium of communication, proves in practice to be a social domain fully implicated in the operations of power. How do we create community - and social exclusion - by the way that we talk? What role does speech play in the accumulation of cultural capital? How are racism and colonialism sustained by language practices, and how can speech transform the world? This introduction to linguistic anthropology draws together classic works of linguistic and semiotic theory with studies of the politics of actual speech grounded in rich and particular cultural and historical

contexts, from witchcraft accusations in rural France to American presidential elections. Students will gain familiarity with key concepts (speech acts, performatives, code-switching, language ideology), themes and debates in the social scientific study of language. Assignments include regular postings of 1-page critical response papers and an ethnographic project analyzing a series of speech events in the Williams or Berkshire County community.

Requirements/Evaluation: regular postings of critical response papers and an ethnographic final project

Prerequisites: none

Enrollment Limit: 20

ANTH 269 (F)(S) Mindsight: Mindfulness and Medicine (DPE) (WS)

Cross-listings: REL 269 STS 269 ANTH 269 ASST 269

Primary Cross-listing

This course offers a social analysis and historical genealogy of meditation and mindfulness from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals and clinics, schools & communities where it has been used to improve health outcomes, education outcomes, and other social outcomes. Throughout, we are interested in the scientific evidence that have tried to show how meditation and mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were introduced and developed by the Buddha and continue to be taught and practiced today in contemporary settings, before turning to the rapid rise of scientific research on mindfulness in recent decades. How and why has research on mindfulness and meditation exploded since 2000 and how does this relate to better understandings of human emotions, human behavior, and human development? We critically examine the use and misuse of modern technologies and models developed by clinical psychiatry and biomedicine to better understand the relationship between the human brain, behavior, and emotions. We ask how meditation and mindfulness has been used to improve the training of doctors & teachers, as well as patient/provider encounters. Throughout, we are interested in how applied research and interventions of mindfulness training with medical training, schools, and other social domains has been used to generate a 'science of personal transformation' that is trying to harness the adaptability of human minds, brains, & behaviors. Students will be expected to engage in mindfulness practices during the semester.

Class Format: weekly tutorial, context-based learning, experiential learning

Requirements/Evaluation: weekly tutorial papers and discussion

Prerequisites: a course on Buddhism is preferred but not required

Enrollment Limit: 10

Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

REL 269 (D2) STS 269 (D2) ANTH 269 (D2) ASST 269 (D2)

Writing Skills Notes: This class will involve weekly tutorial essays of 1200 or 600 words, written feedback on every essay, and a mid-semester 'writing chat' with the instructor to improve patterns in writing.

Difference, Power, and Equity Notes: This class fulfills the Difference, Power, and Equity requirement because it will explore the ways that mindfulness can alleviate pervasive and population wide health issues in the US including rising rates of hypertension, anxiety, and mental health issues that are exacerbated by stress related to social inequality and structural violence. It explores and critiques the ways that mindfulness has been marketed as an elite and non-inclusive practice within the US.

ANTH 281 (S) The Seeds of Divinity: Exploring Precolumbian Art & Civilization in a Museum Exhibit

Cross-listings: REL 280 ARTH 281 ANTH 281

Primary Cross-listing

For all ancient civilizations, the gods were a powerful force, affecting all aspects of human lives and dominating ancient art. This course will explore concepts of divinity in five civilizations in Precolumbian Central America: Aztec, Maya, Zapotec, Teotihuacan, and Nayarit. The course examines how the broad concept of divinity is materialized in everyday life. We will query how the human body is used as the prism through which concepts about humanity, the human soul and the supernatural are perceived and depicted in the art of these civilizations. This is a project based course, and each student will study one or more art objects from these five civilizations, and consider how these objects could be presented in a museum exhibit.

Requirements/Evaluation: active class participation; three short papers; 15-page research paper and presentation

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: ANTH, SOC and ARTH majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ANTH 287 (S) Propaganda

We live in the age of mass persuasion. From commercial ads to political campaigns, from mass media "news"-both fake and real-to large scale movements for social change, we are constantly bombarded by powerful messages that aim to capture, hold, and impact our attention and direct our actions. Drawing on symbolic socio-linguistic analysis, we will examine the institutional and technical apparatus of modern propaganda and will discuss the role of intellectuals, "attention merchants," and receptive audiences in creating the propaganda machine. We will pay special attention to campaigns that aim to overthrow social structures, or to ensure their maintenance and functioning. We will engage with explicit messages received via propagandistic media and implicit directives that aim to silence, obfuscate, and erase. Theoretical discussions will be complemented with intense, in-depth investigations of case studies of persuasive techniques in the Nazi Ministry of Propaganda, Cold war culture wars, Middle Eastern and Post-Soviet regimes, U.S. and Russian electoral and political campaigns. As we explore the overwhelming diversity of persuasive techniques of contemporary propaganda apparatus, we will turn our attention to various ways through which it impacts and molds our individual selves: from organizing dreams and desires to shaping autobiographies. We will conclude the course by creating our own examples of persuasive mass communication.

Requirements/Evaluation: one midterm, one group research project, three short papers

Prerequisites: none

Enrollment Limit: none

ANTH 297 (F) Theorizing Magic

Cross-listings: COMP 289 ANTH 297 REL 297

Secondary Cross-listing

This is a course about magic. It is not about stage magic, sleight of hand, or the art of pulling rabbits out of hats. You will learn no card tricks. But instead we will learn about those people who believed in the reality of certain powers; from the ability to summon good or evil spirits, transform base metals into gold, predict the future, or manipulate matter by thought alone. The problem of how to theorize magic has long been a cause of concern for the natural and social sciences. Many a sociologist and anthropologist has imagined that belief in magic should have vanished with modernity (despite much evidence to the contrary). Meanwhile, philosophers of science have been long fascinated with the demarcation problem-figuring out grounds by which to distinguish legitimate sciences (like astronomy) from their magical or pseudoscientific cousins (like astrology). We will trace these discussions and problematize them by looking at the beliefs of self-defined witches and magicians. This should put us in a position to interrogate the construction of concepts of magic, science, and religion and show how the boundaries between these categories emerged historically. Topics to be discussed will include: the rationality of magic, the fine lines separating magic, science and religion, the persecution of witches, and the role notions of magic and superstition played in European modernization and colonization projects. The tutorial sessions will be customized to student interests, but texts will likely include selections from primary works in translation, such as Cornelius Agrippa's *Occult Philosophy*, Giordano Bruno's *On Magic*, Aleister Crowley's *Magick Liber Aba*, as well as selections from secondary literature, perhaps including Marcel Mauss, *A General Theory of Magic*, Max Weber, "Science as Vocation," Tanya Luhmann, *Persuasions of the Witches' Craft*, Thomas Kuhn, *The Structure of Scientific Revolutions*, Larry Laudan, "The Demise of the Demarcation Problem," E.E. Evans-Pritchard, *Witchcraft and Oracles*, and *Magic among the Azande*, and/or Kelly Hayes, *Holy Harlots: Femininity, Sexuality and Black Magic in Brazil*.

Requirements/Evaluation: weekly writing assignments and tutorial attendance every week

ANTH 299 (S) The Body in Power

Cross-listings: ANTH 299 REL 274

Primary Cross-listing

The thesis of this course is that ritual plays a crucial role not only in legitimizing and mobilizing political power, but also in determining whether people decide to act in defense of or dissent against the status quo. In the first part of the semester, we focus on the ways in which different cultures construct categories of inclusion and exclusion, safe and dangerous, while also creating rituals for ensuring the preservation of the dominant social order against all that is transgressive and undermining to those in power. Of particular importance to our discussion will be consideration of how the body is ritually mobilized as an instrument of persuasion and control. On this foundation, we move to an examination of how political rituals are used to undermine established orthodoxies, mobilize popular dissent, and bring down those on top. Among the topics to be discussed are the role of martyrdom and beheadings in the rise of the Islamic State, the use of symbols and ritual interventions in framing both sides of the abortion debate, and the expanding importance of social media in protests movements around the world. The final unit of the course will consider a current controversy (e.g., police violence against African-American men) in light of the concepts discussed during the semester.

Requirements/Evaluation: class participation, three short response papers, and one 10- to 12-page research paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: open to first years

Expected Class Size: 19

ANTH 301 (F) Sexual Economies (DPE)

Cross-listings: WGSS 301 AMST 334 ANTH 301

Secondary Cross-listing

This course examines various forms of sexual labor around the world in order to better understand how gendered and sexual performances are used in a variety of cultures and contexts for material benefit. Our topics include "traditional" forms of sex work such as street prostitution, pornography, and escorting as well as other forms of sexualized performances for benefit such as stripping or camming. We also discuss current issues and debates about discourses of "sex trafficking." Course readings come from a range of fields, but focus most heavily on anthropology, sociology, American studies, and gender studies. The readings for this class will frequently foreground the lived experiences of sex workers from a variety of nations, races, classes, religions, and backgrounds in order to explore the broader social implications of our subject matter. The format is largely discussion-based, with short lectures supplementing the reading with summaries of current scholarly and activist debates. We will have either guest speakers or a field trip to hear from people working in various commercial sex sectors.

Requirements/Evaluation: midterm essay exam, final research paper, research proposal/annotated bibliography

Prerequisites: none, though WGSS 101 and/or 202 may be helpful, but not required

Enrollment Limit: 20

Enrollment Preferences: based on statement of interest

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 301 (D2) AMST 334 (D2) ANTH 301 (D2)

Difference, Power, and Equity Notes: We pay particular attention to the intersecting questions of race, sexuality, gender, and class as we explore the political economy of commercial sex. The course teaches students to examine the underlying political and economic structures that create systems of privilege and power, thereby complicating questions and assumptions about sexual consent, coercion, agency, and empowerment with particular attention to race and gender in comparative transnational contexts.

Not offered current academic year

ANTH 322 (F) Trash

Cross-listings: GBST 322 ANTH 322 ENVI 322

Primary Cross-listing

What is waste? What is filth? Why do titles or categories of sanitation workers--"garbage man," for instance--bear such charged social and sometimes moral significance in many societies? In this seminar we will critically examine the production of waste and its role in the production of value, meaning, hierarchy, and the environment. Readings will be of three types. First we will consider theoretical inquiries into the relations between filth and culture. Second, we will examine studies of the political and environmental consequences of systems of waste management historically and in the present, with a focus on South Asia and the United States. Third, we will read ethnographies of sanitation labor and social hierarchy with the same regional focus - work on Dhaka and Delhi, Chicago and New York. There is also a fieldwork component to this class. In groups, students will conduct ethnographic micro-studies of elements of the systems of waste production and management in Berkshire County (e.g., cafeterias, retail outlets, homes, dorms, recycling facilities, sewage treatment plants). Students will post field notes to a class blog, and each group will present its findings in the form of a short film, multimedia presentation, or paper.

Class Format: discussion

Requirements/Evaluation: regular posting of critical response papers and an ethnographic final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors and juniors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ANTH 323 (F) Democracy and Citizenship in the Age of Multiculturalism (DPE)

Democracy (and its particular implementation in the United States) is regularly taken as an unconditional ideal for the rest of the world. In this class, we will analyze democracy as a culturally and historically specific form of social relations and meanings. We will carefully examine a broad range of phenomena that pertain to democracy--for instance, cultural notions of participation in public life in Post-Socialist Germany or categorization of citizens in contemporary India, attachment to homeland among migrant workers in Russia or transnational rhetoric of Chinese bloggers. By so doing, we will study local meanings, circulating discourses, multiple contestations, and changing forms of power in regimes that are heralded as democratic. Our focus on citizenship (broadly defined)--i.e., a recognized right to be different while being accepted as a part of a national community--will bring to light complex issues in the relationship between the state and its subjects. We will discuss how men and women, the abled and the disabled, the migrants and the natives identify with their statuses and define their place in state structures. Anthropological studies of citizenship and diversity of forms of belonging and identification in democratic states will enable us to understand cleavages of power inequality and conceptual predicaments of social fairness in the contemporary world. Ethnographic studies from around the world will be used to provide specific examples of the ability and failure of democratic regimes to govern their varied populations.

Requirements/Evaluation: one long research paper, three book reports, and seminar discussions

Prerequisites: ANTH 101 or SOC 101 or by permission of the instructor

Enrollment Limit: none

Enrollment Preferences: juniors and seniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: Through an in-depth examination of case-studies of citizen exclusion and inclusion around the world, the course will foster students' critical engagement with a concept of democracy. Special attention will be paid to a differential access to power on a basis of gender, disability, migration status, and ideological constructions of difference.

Not offered current academic year

ANTH 328 (F) Emotions and the Self

Everyone everywhere experiences emotions, and everyone everywhere is faced with the task of conceptualizing a self-hood and its place in the social world. This course analyzes a variety of recent attempts in the social sciences to come to grips with topics that have long been avoided: the nature of the interior experience and an epistemological framework for its cross-cultural comparison. Exploring the borderlands between anthropology, sociology, and psychology, we will bring the tools of ethnographic analysis to bear on central pan-human concepts: emotions and the self. By examining these phenomena as they occur in other cultures, we will be better placed to apprehend and challenge the implicit (and often unconsciously held) assumptions about emotions and the self in our own culture, both in daily life and in academic psychological theory. What are emotions? Are they things--neuro-physiological states--or ideas--sociocultural constructions? How are they to be described; compared? What is the self? How are selves constructed and constituted? How do various cultures respond to categories of emotion and self, and how can we develop a sense of the relationship between self and emotion?

Requirements/Evaluation: typical for that of a tutorial

Prerequisites: none; open to first-year students with instructor's consent

Enrollment Limit: 10

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ANTH 330 (F) The Documentary Project: Ethnography and the Visual Narrative

The goals of ethnography and documentary work overlap. Both strive to communicate a compelling sense of people's lives, and to connect them to broader struggles and issues faced by others. Further, ethnography as a method emphasizes a close and sustained interaction, or "engagement" between the practitioner and her subjects. In this class, students will have the opportunity to practice both engagement and compelling presentation, by working throughout the semester on planning and executing a documentary project. The course will emphasize the use of visual narratives accompanied by text and audio drawn from interviews. Students will practice different types of documentation, and consider techniques for approaching, imaging and interviewing subjects. The practical aspects of developing a project, gaining access, working in unfamiliar environments and editing both visual and audio material will be reviewed. Conceptual topics will include myths about "truth" and "objectivity" in visual media, tensions between the goals of the documentarian and her responsibilities to her subjects, and differences between the documentary and ethnographic point of view. Acceptance into the class requires technical competence in photography or videography (as evidenced by prior coursework or portfolio), and a demonstrated ability to work independently and to commit to a long-term project. Participants should expect to spend significant time working off campus.

Requirements/Evaluation: develop and execute a semester length documentary project under instructor guidance; produce and edit weekly visual and audio content; participate in class critiques

Prerequisites: SOC 236 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

ANTH 334 (S) Imagining Joseph

Cross-listings: COMP 334 REL 334 ANTH 334 JWST 334

Primary Cross-listing

Beloved son, rival brother, faithful servant, dreamer, seer, object of desire, lover, husband, bureaucrat, Joseph is one of the most fully-limned and compelling figures in the Jewish, Christian, and Muslim scriptural traditions. The story of Joseph unfolds over fourteen chapters in the Hebrew Bible, and is the subject of the fourth longest sura in the Qur'an. Through millennia, the story of Joseph has inspired a wealth of interpretations, commentary, apocrypha, re-tellings, and back-story, including an apocryphal book of scripture about Joseph and his wife, Asenath, Sufi poetry about Joseph and Zuleikha (Potiphar's wife), a trilogy by the 20th century German novelist Thomas Mann, a musical by Andrew Lloyd Weber, and many expressions in Western visual art. The course will explore these various expressions, looking to them for the ways in which Joseph has captured the imaginations of peoples and cultures across time and space. The course will be organized as a collaborative seminar in which the class will read the foundational scriptures together, followed by thematic discussions to which students will contribute insights from their own readings of particular peripheral texts. Students will learn the pleasures of close and intense exegetical reading in approaching the Hebrew Bible and Qur'an, as well as the more expansive pleasures of linking post-scriptural expressions together.

Requirements/Evaluation: 3- to 5-page weekly response papers; 15-page final paper; class participation

ANTH 337 (S) Race, Sex & Gender in Brazil (DPE)

Cross-listings: WGSS 337 ANTH 337

Secondary Cross-listing

The course introduces students to anthropological literature of Brazil as well as Brazilian novels and films. Its focus is on understanding the history and contemporary culture of Brazil through attention to racial justice, including the country's unique history and legacies of slavery in comparative context. It also examines questions of gender, including the history of feminism in Brazil and current debates related women's equality such as Brazil's abortion laws, domestic violence, sexual tourism, and job opportunities for women. Lastly, we also examine LGBT history in Brazil and dive into writing about queer culture there. NOTE: The seminar will include a mandatory spring break trip to Rio de Janeiro, during which time students will visit important historical sites, museums, and relevant cultural attractions. They will also meet collectively with faculty members from several universities and NGOs to learn about the research and projects our Brazilian hosts are engaged in. Students also have their own individual exploratory research projects there related to social justice, which are integral to the seminar. These form the basis of their final research paper. Students should also be aware of the physical demands of the trip, which include extensive walking, some hiking, and exposure to summer heat and the elements in the Atlantic Rainforest. Thanks to the Global Initiatives Venture Fund, the cost of the trip is covered for all students enrolled.

Requirements/Evaluation: research paper and its various components, participation

Prerequisites: none

Enrollment Limit: 7

Enrollment Preferences: students are required to attend an info session and submit an application that includes a statement of interest, finalists will need to complete an interview

Expected Class Size: 7

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: the cost of the spring break trip is included (i.e., airfare, most meals, lodging, etc.), but costs related to incidental expenses (e.g., souvenirs, drinks), passports, vaccinations, etc. are not and will vary by student

ANTH 341 (S) Caste, Race, Hierarchy

Cross-listings: ANTH 341 AFR 341 ASST 341 GBST 341

Primary Cross-listing

Caste in India looms large in global social thought as a kind of benchmark against which hierarchical social systems across the world are measured. This prominence has much to do with British colonial ideologies of rule, but it also has a deeper and different history: the Buddha compared caste to Greek slavery, early modern Jesuits related it to the system of European estates, and since the nineteenth century, anti-caste radicals from Dalit, or "untouchable," backgrounds have drawn a sustained comparison between the forms of oppression they face and those with which African Americans contend in the United States. Reciprocally, thinkers from W.E.B. DuBois to Toni Morrison have deployed the category of caste in their writings on race. What can the study of caste in postcolonial South Asia contribute to global debates over the persistence of "traditional" forms of social hierarchy? What are the stakes of bringing caste and race into the same conversation, and what are the implications of refusing to do so? In this seminar we will acquire a thorough grounding in the anthropological literature on caste and then investigate the politics of the caste-race comparison over the last hundred years. Assignments include weekly postings of 1-page critical response papers and either a research paper or an interview-based, ethnographic final project examining "caste" in one's own community.

Class Format: seminar

Requirements/Evaluation: weekly postings of 1-page critical response papers and research paper or ethnographic final project

ANTH 371 (F) Medicine, Pathology, and Power: An Ethnographic View (DPE)

Cross-listings: WGSS 371 ANTH 371 STS 370

Primary Cross-listing

How do medical anthropologists examine and interpret health, disease, and illness today, in order to elucidate the biosocial determinants of health and health-seeking behaviors? We are particularly interested in how medical anthropologists employ ethnographic techniques including interviewing, surveys, and observant participation/participant observation--also known as 'deep hanging out.' Through experiential inquiries, we investigate the systemic health inequalities that are produced by socio-economic hierarchies, while paying particular attention to the most marginalized and vulnerable groups. Through the semester, students pursue their own individual, fieldwork-based projects on campus with students & staff. Our goal is a better understanding of the limits and strengths of ethnographic inquiry as we explore the challenges of collaborative research into health and inequality in a local world structured by diverse forces, actors, and motives. We consider how medical anthropologists: tell stories that describe and influence the ways that patients and providers respond to a dialogic quest for health and well-being within a world structured by social inequality and suffering; interpret the biological, socio-cultural, and behavioural determinants of health at individual and population levels and seeks to mitigate the ways that health inequities are produced by social inequality and unequal access to health resources; understand biomedicine and other medical systems as scientific and cultural discourses that project their own rationalities and biases even as they try to improve health outcomes.

Requirements/Evaluation: four fieldnotes, weekly class discussion and writing exercises, final presentation on ethnographic project

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Sociology, Women's, Gender and Sexuality Studies majors; Public Health, Science and Technology Studies concentrators

This seminar examines recent and canonical work in queer anthropology, exploring how different cultures construct sexual and gender identities and subjectivities, and what happens when dominant paradigms such as the Euro-American LGBT model become enmeshed in globalization, late capitalism, and consumerism. We begin with a series of case studies highlighting alternative gender and sexual formations in various cultures around the world, emphasizing how these seemingly "authentic" local categories are themselves the products of historical shifts, colonial relations, and political economy. We also examine how these categories overlap, conflict with, subvert, or syncretize with the increasingly global category of "gay." In addition to reading queer ethnographies, we will also learn the methods required for doing ethnography ourselves, including interviewing techniques, participant observation, writing thick description, data analysis, and editing.

Requirements/Evaluation: ethnographic writing assignments (e.g., interviews, field notes, essays, etc.)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Women's, Gender and Sexuality Studies majors and others with substantial background in Women's, Gender and Sexuality Studies or Anthropology and Sociology Studies; statements of interest will be solicited

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Unit Notes: WGSS junior/senior seminar

Winter Study -----**ANTH 15 (W) Photographic Literacy and Personal Vision**

Cross-listings: SOC 15 ANTH 15

Primary Cross-listing

When you look at a photograph, what is it really saying? How can you make a photograph that says what you want to say? This course is about seeing with emotion and literacy, and making photographs that reflect your own personal voice and vision. This is not a course on technical photography--this is about breaking down the barrier between your ideas and your camera. Students will conceptualize and photograph a project of their own choosing. Whether a narrative documentary project or a more abstract exploration of form, students are expected to photograph on their own outside of class for at least five hours a week. Students must own or borrow a digital camera. Williams has a stock of excellent cameras available for loan. Mondays and Fridays we'll be looking at amazing historical and contemporary photographic work to cover a broad range of what is possible with the medium and discussing what the current conversations and controversies are within the practice. We'll be looking at slides, screens, photobooks and gallery shows to get a sense of how photographs function differently depending on how they're shown. The work we discuss is always adapted to reflect students' interests. On Wednesdays we critique each others' work--we look at students' top images for the week and try to reconcile them against the project's conceptual basis. We have a focused discussion about each student's work for 20-30 minutes, and how to make each project better. After critiques I'll be sending everyone photographic references to use for inspiration depending on your subject matter and aesthetic approach. At the end of the course the class will design and produce a campus exhibition of their photography. This event will serve as a synthesis of all the knowledge students gained while working together to make each others' projects stronger. No photography experience is necessary! Anyone is ready to start reading photographs critically, and establish a concept-driven workflow that will serve you well as long as you take pictures. Adjunct Instructor Bio: Ben Brody is an award-winning photographer working on long-form projects related to the American wars in Iraq and Afghanistan, and their aftermath. Themes of generational trauma, propaganda, and tragic comedy recur in his visual approach. His new book, *Attention Servicemember*, published by Red Hook Editions, will be available this fall.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: instructor will determine selection

Grading: pass/fail only

This course is cross-listed and the prefixes carry the following divisional credit:

SOC 15 ANTH 15

Winter 2020

ANTH 16 (W) Unsettling Environments: Conservation, Care, and Indigeneity in the Anthropocene

Cross-listings: ANTH 16 ENVI 17

Primary Cross-listing

How might we think of killing animals as a form of care? How do narratives of ecological decline associated with the Anthropocene and climate change potentially exclude Indigenous perspectives? In this course, we will think critically about themes related to resource use and extraction, human-animal relations, and settler colonialism. We will unsettle dominant conceptions of conservation, call into question management models that marginalize Indigenous peoples and ways of being in the world, and explore how ways of relating to the more-than-human shape Indigenous and non-Indigenous responses to climate change and environmental degradation. Drawing upon theoretical works and ethnographic investigations within anthropology and American Indian and Indigenous Studies, as well as poetry and fiction, including the works of Indigenous and settler scholars and writers, we will examine how theorizations of and relations with animals, plants, and landscapes shape conservationist logics, resource management models, and understandings of what it means to "care" for land and the multiple beings that animate it. This course involves six hours of in-class work and an average of 20 hours of outside-of-class work weekly. The course will rely heavily on student preparation for class and student participation in small- and large-group discussions in class. This is an introductory course, and assessments will be weighted more towards students' understandings of broader themes and questions rather than proficiency in any one school of theory or ethnographic locale. Students will earn their grades as follows: with one-sentence summaries and prepared questions for twelve of the assigned readings (once for each class meeting); as co-discussants for one class meeting; with one short take-home essay exam (750-1000 words); and with a final paper (roughly 3000 words) drawing upon ideas and comparative examples encountered in the course to analyze a current episode or event. Adjunct Bio: William Voinot-Baron is a PhD candidate in cultural anthropology at the University of Wisconsin-Madison. His dissertation is an ethnographic examination of the ways in which salmon are central to both understandings and practices of care in an Alaska Native (Yupiaq) village in southwest Alaska, and the consequences of State of Alaska and federal fishing regulations for tribal sovereignty and well-being. He holds an M.A. in Anthropology from Columbia University and an A.B. in Anthropology and Environmental Studies from Bowdoin College

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: seniority; students may be asked to send the instructor and email explaining why they are interested in the course

Grading: pass/fail only

- Olga Shevchenko, Professor of Sociology; on leave 2019-2020
- Grant Shoffstall, Visiting Assistant Professor of Sociology
- Christina E. Simko, Assistant Professor of Sociology
- Ben Snyder, Assistant Professor of Sociology

The disciplines of anthropology and sociology aim to teach students how to enter into the social/cultural worlds of others, how to grasp those worlds from the viewpoints of their inhabitants, and how to articulate those denizens' habits of mind, worldviews, and values to broader audiences.

Anthropology critically analyzes social forms and practices in all their local and global diversity, illuminating the cultural grounding of the ideologies, narratives, and structures in which we are all implicated. **Archaeology** extends this analysis to social formations of the historical and prehistorical past. **Sociology** studies the nature and trajectories of modernity, examining the intricacies of industrial and post-industrial societies and the dilemmas that confront individuals in modern social systems. These disciplines introduce students to classical and contemporary theories that illuminate the contours and contradictions of social experience. The Anthropology & Sociology program promotes a critical engagement with these theories while at the same time bringing evidence and case studies into conversation with theory.

The Department emphasizes qualitative fieldwork in its many forms. We teach students how to formulate, frame, and address intellectual problems. We also teach students the empirical methods widely used in anthropology, sociology, and other related disciplines, including, but not limited to ethnography, participant observation, interviewing, discourse and visual analysis, archival research, oral history, and archaeological methods.

Because the program emphasizes critical thinking skills to assess social claims made by others, and the application of anthropological and sociological skills to present day concerns, undergraduate training in Anthropology or Sociology has proven invaluable to majors pursuing a range of careers, including public policy, diplomacy, international development, marketing, social media development, K-12 education, journalism, medicine, and law.

MAJORS

The department offers separate majors in both Anthropology and Sociology, with a broad and diverse array of courses in both disciplines. The department is committed, however, to the unity of the social sciences. To this end, Anthropology and Sociology offer joint core courses in methodology and theory, as well as several elective courses in common. All joint courses are designated "ANSO."

Requirements

For the degree in Anthropology or Sociology, students must complete a minimum of nine courses as outlined below:

Core Courses

Majors in both disciplines must take a sequence of four core courses. Three of these are joint (ANSO) courses. The sequences are:

Anthropology

ANTH 101 How to Be Human

Sociology

SOC 101 Invitation to Sociology

Joint Courses

ANSO 205 Ways of Knowing

ANSO 305 Social Theory

ANSO 402 Senior Seminar

Elective Courses

Majors in Anthropology or Sociology must take five elective courses from the course listings of their respective disciplines or from the joint ANSO listings. Two of the courses chosen are normally at the 300 level or above. In close consultation with their departmental advisors, students may take some selected courses from other disciplines to fulfill major requirements in either Anthropology or Sociology.

Majors in each wing of the department are allowed to count up to two courses in the other wing towards fulfillment of their major requirements.

STATISTICS AND DATA ANALYSIS

In addition to the nine total courses required for the major, it is recommended that Anthropology and Sociology majors take Statistics 101 or a comparable course in statistics and data analysis.

AREA STUDIES CONCENTRATION

Students who wish to combine a major in Anthropology or Sociology with an Area Studies concentration are encouraged to do so. Courses taken to satisfy an Area Studies requirement may be counted toward the major with prior approval of a student's departmental advisor. The only exception to this rule is the Area Studies senior seminar, which cannot ordinarily be counted toward the Anthropology or Sociology degree.

LANGUAGE STUDY, STUDY ABROAD, AND WINTER STUDY

Departmental advisors will help interested students integrate a major with study abroad, foreign language study, or field research during the winter study period. The department encourages Williams students to take advantage of established foreign study programs in Egypt, Japan, India, Hong Kong, and other countries. Because some foreign study programs do not offer courses that can be counted toward the Anthropology or Sociology degrees, however, sophomores planning to study abroad in junior year must consult with the departmental advisor before declaring a major.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). We welcome discussions of curricular plans for those major who travel abroad in their junior year. However, typically, students don't have access to all the salient information until **AFTER** they have taken the course.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. The syllabus and readings/assignment information is required in cases when the course title and description are not sufficient to ascertain whether a course should count towards the major. We also request information on course hours.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. We credit two, and in special cases three courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. The expectation is for an intellectually rigorous semester-long course with a paper/exam component.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. ANSO 205, ANSO 305 and ANSO 402 are almost always taken in the department.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. ANSO 305 is offered in the fall and ANSO 205 and ANSO 402 only in the spring. We advise our majors to be aware if they plan to spend all or part of their junior year abroad.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

In one case, a student had assumed that he could take the equivalent of ANSO 205 abroad, and was disappointed to discover that was not the case. He ended up taking ANSO 205 his senior year.

THE DEGREE WITH HONORS IN ANTHROPOLOGY OR SOCIOLOGY

Honors and highest honors are normally awarded for the completion of a year-long research project that has resulted in an original thesis of high quality. Students wishing to write an honors thesis should engage a member of the department faculty as a Thesis Advisor as soon as possible and must submit a proposal for the thesis for department approval no later than the end of spring reading period of the junior year. If the proposal is approved, they will be permitted to register for Anthropology and Sociology 493-W31-494, during which they will write and defend a thesis. If their overall work in the major continues to be of high quality and the thesis is deemed of a similar quality, they may be awarded honors or highest honors in Anthropology or Sociology.

SOC 101 (F)(S) Invitation to Sociology

An introduction to sociological analysis. The course focuses on the relationship of individual men and women to the social world and introduces students to systematic institutional analysis. Students will explore the intersection of biography, history, culture, and social structure as seen in the work of classical and contemporary social thinkers, including Marx, Durkheim, Weber, Veblen, Simmel, and Goffman. Special consideration will be given to the social and cultural problems of capitalism, rationality and irrationality in modern institutions and organizations, the psychological dilemmas facing the individual in modern society, and the problem of social order and conflict.

SOC 201 (S) Science, Technology, and Human Values

Cross-listings: HSCI 101 STS 101 SOC 201

Secondary Cross-listing

This course offers an introduction to science and technology studies, or STS. A radically interdisciplinary field of inquiry, the roots of STS stretch through the philosophy, history, and sociology/anthropology of science and technology. Students will become acquainted with major STS schools, methodological strategies and research trajectories through intensive reading and analysis of classical and contemporary works in the field.

Considerable attention will be devoted to exploring the nature of science and technology, their relationships to and interactions with one another, society and the natural world, and the influences these interactions exert in shaping what humans value. A fundamental goal of the course is to cultivate awareness and understanding of the social organization of technology and scientific knowledge production, and the technoscientific structuring of modern social life broadly. The course as such is aimed at attracting from all divisions those students who are intellectually adventurous and inclined to think critically about the place and prominence of science and technology in the modern world.

Requirements/Evaluation: two or three short exercises, two papers (3-5 pages and 5-7 pages), and two hour exams

SOC 210 (S) Networks of Power: Technology in Human Affairs

Cross-listings: SCST 210 STS 210 SOC 210

Primary Cross-listing

Do we control our technologies, or do our technologies control us? This course will explore different philosophies of technological progress, particularly the constructivist and determinist theories, by examining major technological innovations that shaped society over the past century, including electrification, automobiles and the highway system, radio and television broadcasting, and the internet and social media. Each of these innovations entailed the construction of a complex network designed to serve a mix of public and business interests, and each resulted in wide-ranging and often unforeseen changes to people's lives. Guided by pertinent readings in the history and philosophy of technology, we will look critically at the forms and consequences of technological change, seeking answers to a series of complex and important questions: Is the course of technological progress an inevitable byproduct of scientific and engineering advances, or is it contingent on social and political circumstances and choices? Does technological change reinforce the social and political status quo or challenge it? Are technological and social progress synonymous, or is there a tension between the two? One of the goals of the course will be to provide students with a more informed and critical perspective on the technological upheavals that continue to shape society today.

Requirements/Evaluation: attendance and participation, two 5-page writing assignments, 15- to 20-page seminar paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

SOC 211 (F) Race and the Environment

Cross-listings: ENVI 211 SOC 211 AMST 211 AFR 211

Secondary Cross-listing

In contemporary societies, race remains an enduring impediment to the achievement of equality. Generally understood as a socially meaningful way

of classifying human bodies hierarchically, race manifests itself in a number of arenas, including personal experience, economic production and distribution, and political organization. In this course, we will explore how race emerges in local and global environmental issues, like pollution and climate change. We will begin with a review of some of the landmark texts in Environmental Studies that address "environmental racism," like Robert Bullard's *Dumping in Dixie* and David Pellow's *Garbage Wars*. We will examine how and to what extent polluting facilities like landfills, oil refineries, and sewage treatment plants are disproportionately located in communities of color; we will also pay attention to how specific corporations create the underlying rationale for plotting industrial sites. After outlining some of the core issues raised in this scholarship, we will turn to cultural productions--like literature, film, and music--to understand how people of color respond to environmental injustice and imagine the natural world.

Class Format: discussion

Requirements/Evaluation: class participation, 2-3 short papers (5-7 pages), and a self-scheduled final

SOC 212 (F) Understanding Social Media

Over just the last twenty years--beginning with Napster and MySpace and continuing through Facebook and Twitter, Snapchat and Instagram--the rise of social media has had a profound influence on the way we live. It has given a new rhythm to our daily routines, shaped the way we inform ourselves and converse with others, and transformed media and entertainment, politics and public discourse, and many other aspects of culture. This seminar course will undertake a broad and critical examination of social media, looking at it from historical, economic, legal, social, and phenomenological perspectives. The topics addressed will include social media's effects on self-image and self-formation, its influence on protest movements and political campaigns, its use as a conduit for news and propaganda, and the way commercial interests and technical characteristics have shaped its design and use. Through pertinent readings and lively discussions, and drawing on students' own experiences with social media, the course will illuminate social media's benefits and drawbacks while providing a foundation for thinking about possible legal, regulatory, and personal responses to this far-reaching and still unfolding social phenomenon.

Requirements/Evaluation: attendance and participation, two 5-page writing assignments, final exam

SOC 216 (F) The City

Modern humans have moved to the city, a site with concentrated powers of various kinds, this move has effected irreversible change in human life. We will examine these forces through readings in urban theories as well as ethnographic studies. We will address themes such as the organization of urban life, the political economy of cities, housing and homelessness, and urban planning. The city is also the chief site of cultural production and meaning, and our scope of interest will range from studying subcultures, to reading graffiti, to analyzing monuments. Bearing in mind the inexorable

social change of past decades, we will reconsider some classical thought on urban life in the context of postmodern discourse, conceptualize the post-industrial and global city, and conclude with an examination of the problems faced by cities in developing countries. This course is designed to provide students with a comprehensive introduction to urban studies. Students will become familiarized with both classical and modern urban theories, and in reading ethnographies they will have an opportunity to understand some fundamental methodological approaches to the study of the city.

Requirements/Evaluation: response papers, mid term exam and final research paper

SOC 218 (S) Law and Modern Society

This class is designed to introduce students to the field of law and society. The course begins with an overview of the various theoretical perspectives on the subject, including Durkheimian, Marxist, Foucauldian, and Weberian analyses of law and society; as well as the work of those following in the different theoretical schools established by these scholars. Informed by the theoretical overview, the next part of the course considers empirical research in selected areas of law, including tort law, criminal trial procedures, abortion and divorce law, "community justice," and the adjudication of drug offenses. Recognizing that understandings of our own legal practices are enlightened through comparisons to other legal systems, the second half of the course is primarily historical/comparative in focus. In this section, through an exploration of several case studies, American legal processes and habits are compared with related legal practices in such places as England, Scotland, Ireland, Australia, Germany, Norway, and Canada.

SOC 221 (S) Money and Intimacy

Can money buy love and care? The course will consider this taboo question from a sociological perspective. We will look into how relevant this question has been over the course of history, what forces have contributed to the shift in thinking about it, and, most importantly, how sociological research helps us understand its current ramifications. We will discuss a wide range of aspects of family life: the relationship between arranged marriage and romantic relationship, the role of inheritance in family and social life, the distribution of resources in the context of modern family forms (most notably remarriages), and the outsourcing of care for dependents. Intimacy bears different value and content in these changing contexts. The course will further look into the changing character of new economy where "people's skills" are ever more required from employees (emotional labor) and where intimacy, care, and/or sex constitute purchasable commodities. A reflection on the growth of new technologies will complicate some of the discussed concepts and notions, but throughout a common denominator of our discussion will be the role of social inequality.

Requirements/Evaluation: classroom participation and a final research paper

SOC 228 (F) The Panopticon: Surveillance, Power, and Inequality (DPE)

Cross-listings: SOC 228 STS 229

Primary Cross-listing

Surveillance is built into the very fabric of modern life. From CCTV cameras, to supermarket loyalty cards, to the massive gathering of personal data on social media sites, people participate in today's "surveillance societies" just by doing everyday activities. This course uses the metaphor of the "Panopticon" as a doorway to engagement with traditional and new forms of surveillance. First described by philosopher and social theorist Jeremy Bentham, the Panopticon is a physical structure that enables one observer to see all inhabitants without those inhabitants knowing if they are being observed. In *Discipline and Punish*, Michel Foucault famously expanded thinking on the Panopticon as a metaphor for the "disciplinary" power that lies at the heart of inequality in modern society. Since Bentham and Foucault's time, however, surveillance technologies have changed significantly. To what extent does the concept of the Panopticon give us purchase on today's surveillance societies? How does watching people with new digital and algorithmic surveillance technologies shape the exercise of power and, in turn, (re)produce forms of inequality? Are these technologies always bad? Can they be used for good? Topics include: the historical origins and expansion of surveillance in modern societies, the emerging total surveillance state in Baltimore City, the U.S. military drone program, surveillance in the workplace, and whether social media is turning us all into self-surveillance addicts.

Requirements/Evaluation: discussion participation, six reading responses (1- to 2-page papers), Facebook data essay (3-5 pages), final paper (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

SOC 228 (D2) STS 229 (D2)

Difference, Power, and Equity Notes: This course explores how power is distributed unequally through the mechanism of surveillance technologies, particularly in regard to racial and class differences. Among other topics, it will consider the concrete case of surveillance in Baltimore City and the question of if and when surveillance is appropriate there given the city's current crisis of gun murders. Students will discuss whether and how to conduct surveillance in a context shaped by deep racial segregation and class inequality.

Fall 2019

SEM Section: 01 MR 2:35 pm - 3:50 pm Ben Snyder

SOC 230 (F) Memory and Forgetting

On the surface, remembering generally confronts us as a deeply personal act. What is more private than nostalgic reverie or the secrets of a dark and painful past? Yet even "individual" memories take shape through social frameworks, and we also remember "collectively" through shared myths, narratives, traditions, and the like. This course will explore the social dimensions of memory and remembering as well as their inevitable counterpart--forgetting. How do social frameworks inform our individual understandings of the past and shape our sense of selfhood? How and why are figures from the past cast as heroes or villains? How do collectivities celebrate past glories, and how do they deal with shameful or embarrassing episodes? How do economic and political power relations shape struggles over the past? In an increasingly global society, can we speak of "cosmopolitan" or "transcultural" forms of memory? Topics will include self-identity, memoirs, and oral history; memorials, museums, and monuments; reputations, commemorations, and collective trauma; silence, denial, and forgetting; and transitional justice, official apologies, and reparations.

Requirements/Evaluation: active class participation, four response papers (2 pages each), an autobiographical essay (4-5 pages), and a final

research paper (8-10 pages) with class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D2)

Fall 2019

SEM Section: 01 MR 1:10 pm - 2:25 pm Christina E. Simko

SOC 234 (S) How Emotions Work

What could be more personal and unique than one's own emotions? Over the last century, sociologists, anthropologists, historians, and social psychologists have challenged this taken for granted view of emotion, revealing just how much context, institutional structures, and history shape feeling. Emotion does not just emerge from an individual's brain and body; it is also a product of intersubjective dynamics outside the individual. In this deeply interdisciplinary course, students explore how societies shape emotion. Beginning with psychological research on the brain/body connection, we build a capacious model for how social context, norms, and institutions interact with individual psychology to produce both conscious and unconscious forms of feeling. As the course progresses, we zoom further out from the individual level and unpack emotional dynamics at the national, cross-cultural, and civilizational levels. Along the way, we take a deeper look at specific emotions, including love, shame, sympathy, sadness, and happiness. The course concludes by focusing on a pressing social problem--the seemingly global crisis of mental illness on college and university campuses. What is causing this crisis? What can we do to address this issue right here in our community?

Requirements/Evaluation: participation, reflective essay (3-5 pages), emotion map activity, open space meeting, policy memo (1-2 pages), final paper (8-10 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

SOC 236 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237 ARTH 237 SOC 236 AMST 236

Primary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

SOC 240 (F) Performing Masculinity in Global Popular Culture

Cross-listings: WGSS 240 THEA 241 SOC 240 AMST 241 LATS 241

Secondary Cross-listing

This course examines popular cultural contexts, asking what it means to be a man in contemporary societies. We focus on the manufacture and marketing of masculinity in advertising, fashion, TV/film, theater, popular music, and the shifting contours of masculinity in everyday life, asking: how does political economy change the ideal shape, appearance, and performance of men? How have products - ranging from beer to deodorant to cigarettes -- had their use value articulated in gendered ways? Why must masculinity be the purview of "males" at all; how can we change discourses to better include performances of female masculinities, butch-identified women, and trans* men? We will pay particular attention to racialized, queer, and subaltern masculinities. Some of our case studies include: the short half-life of the boy band in the US and in Asia (e.g., J/K-Pop), hip hop masculinities at home and abroad, and the curious blend of chastity and homoeroticism that constitutes masculinity in the contemporary vampire genre. Through these and other examples, we learn to recognize masculinity as a performance shaped by the political economy of a given culture. The course includes a field trip to a drag performance in Northampton.

Requirements/Evaluation: masculinity journal, mid-term essay, visual analyses of pop culture artifact, choice of final essay or 12 page final paper

Prerequisites: none

SOC 241 (S) Meritocracy

Cross-listings: PSCI 241 SOC 241

Secondary Cross-listing

Although an infinitesimal number of Americans have degrees from Harvard or Yale Universities, 33% of the top decision makers in the second Obama administration did. So do eight of the country's nine sitting Supreme Court Justices. Is this a positive sign that the United States is governed by its most talented and capable members who have risen through hard work and equal opportunity? Or a negative one pointing to the power of a corrupt and self-selecting elite? This course explores the theme of meritocracy --- rule by the intellectually talented --- in comparative perspective. We will look at both old and new arguments regarding the proper role and definition of merit in political society as well as take the measure of meritocracy in present-day Singapore, France, and the United States. The course concludes with a focus on the current debate over American meritocracy and inequality.

Requirements/Evaluation: two papers, take-home final exam, class participation

SOC 244 (S) What They Saw in America

Cross-listings: AMST 244 SOC 244 HIST 366

Primary Cross-listing

This course traces the travels and writings of four important observers of the United States: Alexis de Tocqueville, Max Weber, G.K. Chesterton, and Sayyid Qutb. The course will consider their respective journeys: Where did they go? With whom did they talk? What did they see? The historical scope and varying national origins of the observers provide a unique and useful outsider's view of America--one that sheds light on persisting qualities of American national character and gives insight into the nature and substance of international attitudes toward the United States over time. The course will analyze the common themes found in the visitors' respective writings about America and will pay particular attention to their insights on religion, democracy, agrarianism, capitalism, and race. This course is part of the Williams College program at the Berkshire County Jail and House of Corrections and will be held at the jail. Transportation will be provided by the college. The class will be composed equally of Williams students and inmates, and one goal of the course will be to encourage students from different backgrounds to think together about issues of common human concern. * Please note atypical class hour Monday, 4:45-8:30 pm.

Requirements/Evaluation: several short response pieces; a final paper of 10-15 pages

Prerequisites: none

SOC 248 (F) Altering States: Post-Soviet Paradoxes of Identity and Difference (DPE)

Cross-listings: RUSS 248 GBST 247 SOC 248

Primary Cross-listing

Critics and apologists of Soviet-style socialism alike agree that the Soviet ideology was deeply egalitarian. Putting aside for a moment the very reasonable doubts about how justified this perception actually was, it is still worth asking, how did people who lived in the world in which differences in rank, class, gender or ethnicity were not supposed to matter, make sense of their postsocialist condition, one in which new forms of difference emerged, and old ones assumed greater prominence? And how do these encounters with difference impact current events, such as the Russia-Ukraine conflict or the persistent tensions between East and West Germans? This tutorial will examine new dilemmas through ethnographic studies and documentary films that aim to capture in real time the process of articulating and grappling with newly discovered divides. We will focus especially closely on Russia, but will also read studies on East Germany, Hungary, Bulgaria, Poland and Ukraine. This course fulfills the DPE requirement by exploring comparatively the ways in which people in different countries made sense of the social, cultural and political heterogeneity of the postsocialist condition.

Requirements/Evaluation: 5-page paper every other week, comments on the partner's paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Anthropology, Sociology, and Russian majors

Difference, Power, and Equity Notes: Students will learn to identify and interrogate processes of social differentiation and exclusion as they take place across Russia and Eastern Europe. We will also train ourselves to identify parallels, as well as differences, between responses to the social and economic uncertainty ushered by the fall of socialism, and the discontents triggered by similar conditions closer to home.

Not offered current academic year

SOC 252 (F) Moral Life in the Modern World

Cross-listings: SOC 252 REL 286

Primary Cross-listing

This interdisciplinary seminar attempts to locate and examine modern moral life (i.e., the ethical dimension of modern culture) in its broader historical and cultural context. The aim of the course is less to analyze and debate the theoretical moralities of philosophers and theologians, than it is to interpret and attempt to understand the lived moralities that people actually practice and carry out; that shape conduct and selfhood in the modern world. Part I of the course will provide a guided introduction to a range of contested issues in the study of ethics and morality: moralism, moral relativism, and the nature of modern moral discourse; moral truth, and value freedom; the differences between normative and descriptive ethical inquiry; "thick" and "thin" moral concepts, and the historically variable relationships between lived moralities, theoretical moralities, and moral customs. In Part II we will work through a series of case studies that take up the following issues: moral life in corporate, urban, and suburban contexts; media, moralism, and moral panics; business ethics; race and racism; depersonalization, war and genocide. The course will furthermore examine ethics and morality "in," "through," and "of" literature, as students will select, read, and critique a work of fiction.

Requirements/Evaluation: weekly discussion précis, film screenings, two book review essays, class presentations, and a take-home midterm

SOC 264 (S) Transnational Activism: Practice, Problems, Ethics (DPE)

Cross-listings: SOC 264 WGSS 263

Secondary Cross-listing

The world's got problems. These problems don't respect national boundaries. This class looks at how activists have engaged across borders and with transnational institutions in order to address transnational problems like class inequality, sexism, homophobia, climate change, and more. It asks: what are the different forms that transnational activism takes and how have transnational activists advanced their goals? Why and how have transnational activists' efforts failed? What are the practical and ethical difficulties associated with transnational activism? What does ethical transnational activism look like, and can it also be effective? While focusing especially on the role of transnational activism in combating sex and gender-based inequities, we will also engage with activism that targets the other axes of oppression with which sex and gender-based oppressions are

inextricably entwined.

Requirements/Evaluation: class attendance/participation; critical profile of transnational activist; essay or project proposal, final essay or project

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: Women's, Gender, and Sexuality Studies majors and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

SOC 291 (S) Religion and the American Environmental Imagination

Cross-listings: REL 291 SOC 291 ENVI 291

Secondary Cross-listing

This course examines the relationship between religious and environmental thought in modern America. Exploring a broad range of practices and beliefs, we will examine the religious (and anti-religious) roots of contemporary environmental discourse. Rather than survey the environmental teachings of organized religious groups, our focus throughout will be on ambiguous, eclectic, and fascinating traditions of "eco-spirituality" and popular "nature religion." Where do these traditions come from? What is their relationship to science, to secularism, to politics, and to the search for environmental justice? Starting with the Transcendentalist movement of the 19th century, we will trace a roughly chronological line to the present, taking long detours into several modern religious trends and movements, including the revitalization and contestation of Native American religions, Wicca and neo-pagan ecofeminism, and evangelical Creation Care. Focusing on the writings of activists and radicals from a variety of religious backgrounds, our overarching question throughout the semester is one of the most critical we face in modern environmental thought: what is the relationship between spirituality and the just, sustainable society?

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

SOC 301 (F) Social Construction (DPE)

Cross-listings: SCST 301 COMP 315 REL 301 STS 301 SOC 301 WGSS 302

Secondary Cross-listing

"Social construction" can often seem like the great collegial insight. By now, you've all heard that categories such as race, gender, and sexuality are in

some sense not part of nature, but instead are created and maintained socially or culturally. The idea of social construction has been vital to critical race theory and queer theory, and, in this course, we will push ourselves into philosophy of science to see whether or not these same insights apply to everything. If we know that "Whiteness," "heterosexuality," and "masculinity," for instance, are all socially constructed, we will ask if the same is true of "electrons," "money," "the solar system," and "climate change." Can it be that all of our reality is socially constructed? Or does social construction have limits? If so, what are they? We will also ask more fundamental questions, such as: What does it mean to say something is socially constructed? How does social construction relate to claims that an aspect of the world is "real" or "not real?" Is social construction a theory about language, power, culture, societies, human perceptions, or the limits of science? What kind of political, ethical, ontological, or epistemological work do theories of social construction do? We will begin with different accounts of the social construction of race, gender, and sexuality. In the second part of the course, we will dig deeper into philosophical debates about social construction as such. Then we will explore constructionism about natural science. In the last part of the course, we will change gears and explore look at cutting-edge work in the theory of social science aimed at explaining the construction and ontology of social worlds. The class will culminate in a project in which students will put their social construction theories into practice.

Requirements/Evaluation: regular attendance and participation, short weekly reflection papers, a 10-page research paper, and final project

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion majors, then majors from cross-listed departments

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

SOC 303 (S) Cultures of Climate Change

Cross-listings: ENVI 303 SOC 303

Secondary Cross-listing

This course asks why people think and talk about climate change in such very different ways. Climate change is a physical phenomenon that can be observed, quantified, and measured. But it is also an idea, and as such it is subject to the vagaries of cultural interpretation. Despite scientific agreement about its existence and its causes, many people do not see climate change as a serious problem, or as a problem at all. Many others see it as the most serious problem our species has ever faced. What are the sources of this disparity? Why can't we agree about climate change? How does something as complex and confusing as climate change become a "problem" in the first place? This course will explore a broad array of factors, from religion to race, class to colonialism. It will focus especially closely on the communication of scientific knowledge, risk perception, and environmental ethics, and it will apply a range of theories from the social sciences and humanities to a set of concrete case studies.

Requirements/Evaluation: a 15- to 18-page research paper and several shorter writing assignments

Prerequisites: ENVI 101 or permission of instructor

SOC 314 (F) The Social Ecology of Racial and Gender Inequity (DPE)

Cross-listings: WGSS 314 SOC 314

Secondary Cross-listing

Why the political furor over monuments? What would a feminist city look like? Does racial justice require integration? This course trains your focus on space and place, asking you to take a socioecological perspective on race, gender, and other axes of privilege and marginalization. In it, we examine how ideas about race, gender and more shape space as well as how the design of space reinforces social constructs and power relations. After examining specific regions (the city, the suburb, the country) and their relation to one another, we examine specific sites (public transport, public toilets, libraries, houses). The course enables students to better understand the tenacity of inequity by drawing attention to its spatial dimension while at the same time introducing students to -- and providing students tools to engage in -- spatial interventions designed to disrupt vicious social-spatial cycles.

Requirements/Evaluation: attendance, class facilitation, problem identification report, two presentations, reflection

Prerequisites: WGSS/SOC Majors

Enrollment Limit: none

Enrollment Preferences: Women's, Gender, and Sexuality Studies majors

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

This course is cross-listed and the prefixes carry the following divisional credit:

WGSS 314 (D2) SOC 314 (D2)

Difference, Power, and Equity Notes: This course introduces students to a socioecological approach, giving them a lens which can help them understand how important axes of difference--race and gender--are socially constructed as well as the stubborn persistence of racial and gender power differentials. Students in this course will be required to apply this lens to their own experience, as well as to discuss difficult questions about different obstacles and potential paths to greater equity in social relations.

Attributes: WGSS Racial Sexual + Cultural Diversity Courses

Fall 2019

SEM Section: 01 TF 2:35 pm - 3:50 pm Greta F. Snyder

SOC 315 (F) Culture, Consumption and Modernity

How do lifestyles, fashions and trends appear and evolve? Are we authors of our own taste? What structures our choices of goods and activities? What is it that gives meaning to objects and makes them desirable? Are there non-consumer societies in the modern world? How has globalization changed the ways people consume in different parts of the globe? This course will explore consumption and consumer practices as products of modernity and will analyze the political, cultural and social agendas that have transformed consumption over time. Politics of consumption (the way in which seemingly free and independent consumption choices aggregate into the existing system of global capitalism) will be treated alongside its symbolic element: the role of consumer practices in creating and articulating identities, building relationships and creating solidarities. We will look at fashion, advertising, arts and shopping in places as varied as nineteenth-century France, socialist Russia, and in contemporary United States, tracing both the mechanisms that structure patterns of consumption, and the consequences that these patterns have for the larger social order.

Requirements/Evaluation: full participation, ten journal entries and a 15-page term paper that will go through a draft and revision stage

Prerequisites: none; open to first year students

SOC 324 (S) Memory and Identity (DPE)

Our sense of self is inextricably tied to our understanding of our past, both as individuals and as members of society. This sense of origins, however, is far from natural; it itself has its origins in the debates and politics of the time, and evolves under an array of influences. This course analyzes discourses of collective and individual identity and the mechanisms involved in the formulation of the individuals' sense of their place in the world. Topics include: media of memory, politics of commemoration, nostalgia and selective forgetting, narratives of trauma and of a "golden age," the invention of tradition, and battles over remembrance and heritage, such as the struggles over the proper way to face the difficult past around the world, with a particular emphasis on the United States and on the memory wars in the post-Soviet space.

Requirements/Evaluation: extensive class participation, several short papers, and a final research project with class presentation

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology and Sociology majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement because it explores the diversity of the ways in which communities imagine and engage with their past, and puts struggles over memory in the context of groups' struggles for power and visibility.

Not offered current academic year

SOC 326 (S) Being Mortal

One of the defining features of the human condition is our awareness of our own mortality. How do we cope with this awareness? How does it influence our social institutions? We will begin by exploring how social theorists such as Emile Durkheim, Max Weber, Ernest Becker, and Peter Berger grappled with mortality and its significance for human social life. We will then turn to the social institutions that structure our confrontation with mortality today. How, why, and with what consequences has death been sequestered in modern Western societies and set aside from the social world of the living? What rites and rituals remain for coping with death and dying, and how do our cultural assumptions influence the experiences of grief, loss, and mourning? How does modern medicine, which is oriented toward cure but must ultimately confront the inescapable realities of aging and death, deal with mortality? How have hospice, palliative care, and debates over physician-assisted suicide changed the landscape in recent years? How do societies cope with collective losses in the aftermath of wars, disasters, and atrocities? Our focus will be on the United States, but we will also consider cross-cultural comparisons.

Requirements/Evaluation: three 6- to 7-page papers; an in-class presentation; thoughtful and consistent participation in class discussion

SOC 328 (F) American Social Dramas

Cross-listings: AMST 328 SOC 328 COMP 325 THEA 328

Primary Cross-listing

As Shakespeare wrote memorably in *As You Like It*, "All the world's a stage, and all the men and women merely players." Sociologists have heeded Shakespeare's wisdom, arguing that social and political events are "performances" that take shape in accordance with familiar cultural scripts, and

indeed that social actors implicitly interpret real-world events using plot structures from literary and dramatic genres such as romance, irony, comedy, and tragedy. We will explore this thesis through the lens of contemporary American political events, including the Clinton-Lewinsky scandal, September 11, Hurricane Katrina, the 2012 presidential election, and current debates over Confederate symbolism. We will also pay careful attention to the unfolding drama associated with the 2016 presidential election. How do social performances and struggles to "control the narrative" shape the meanings and outcomes of political events? Are they merely "spectacles," or wellsprings for genuine civic participation? What role do political comedy, satire, and social media play in shaping the trajectory of contemporary events? Major authors will include Victor Turner, Clifford Geertz, J.L. Austin, Erving Goffman, and Jeffrey Alexander. Throughout the semester, each student will develop a significant project on a political event of their choosing.

Class Format: seminar

Requirements/Evaluation: active participation, five 2-page response papers, a 12-page paper that will go through draft and revision stage, and a presentation

SOC 329 (F) Work and Future of Capitalism

What does it mean to work? How does capitalism shape the way we work? What might work look like in the future? In this three-part course, students engage with global capitalism's past, present, and future, asking analytic and normative questions about work and the trajectory of capitalism. The first part of the course examines the historical origins of capitalism and leading theories about what capitalism is and how it stratifies the world into social classes. A central theme in part one will be how capitalist labor relations shape meaning and subjectivity, particularly the experience of dignity. In part two, we examine recent and emerging trends in capitalist labor, such as global commodity chains, the death of the career, the rise of the "gig" economy, platform capitalism, and even the seemingly inevitable end of work itself as entire occupations become automated by machine learning. A key question will be how these transformations exacerbate and/or alleviate longstanding inequalities from capitalism's 19th century past. Through a series of essays, culminating in a final paper, the course concludes by asking students to imagine what work might look like in the next century. Should we continue to work at all? What kinds of productive activity should we value, and how would we go about restructuring (or even overturning) capitalism to allow them to flourish?

Requirements/Evaluation: participation, three utopia essays (3-5 pages), paper workshop, final paper (10-12 pages)

Prerequisites: none

Enrollment Preferences: Anthropology and Sociology majors

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

Fall 2019

SEM Section: 01 W 1:10 pm - 3:50 pm Ben Snyder

SOC 332 (F) Life and Death in Modernity

Death is a biological fact. Death is also one of the few universal parameters in and through which social worlds and individual lives are created. Death, in other words, is a primary source of the material and symbolic activities through which humans work to construct, legitimate, and maintain social realities. To attend to "ways of death", then, is to attend simultaneously, if only indirectly, to "ways of life"--the hopes and fears, the ways and wants of a people. In this course we will ask: How, why, and with what manner of consequence has it come to be that, under late-western modernity, the aged, the sick, the dying, the bereaved, and indeed death itself, are routinely "set aside", hidden from view and thus awareness, institutionally sequestered from those of us among the living? We will attend to the historical emergence of the institutional forms that perpetrate this sequestration, and show

how they have become tightly articulated with one another: hospitals, nursing homes, hospice centers, funeral homes, cemeteries. We will furthermore examine the peculiar bodies of expert knowledge that have arisen in tandem with these institutional forms, among them gerontology, thanatology, and bereavement therapy, showing how they have conspired in the (bio)medicalization of aging, death, and grief. Other topics to be explored include the commodification and consumption of health and well-being; the emergence of anti-aging medicine and "popular" rationalities of human life extension; cryonic suspension, zombies, and the paranormal.

Class Format: seminar

Requirements/Evaluation: weekly journal entries, film screenings, take-home midterm, class presentations, and a final 12- to 15-page paper to be decided in consultation with the instructor

SOC 338 (F) Transhumanism: Religion, Technoscience, Obsolescence

Cross-listings: STS 338 HSCI 338 REL 338 SOC 338

Primary Cross-listing

This interdisciplinary seminar invites students to pursue sociohistorical analysis and sustained critical discussion of the so-called "transhumanist movement" and its overriding aim: the transformation and eventual transcendence of human biological constitution; the realization, through highly speculative technoscientific means, of an enhanced or even "postbiological" existence, the so-called "posthuman condition," "Humanity 2.0." Through close readings of historical documents, transhumanist texts, scholarship on transhumanism, and relevant works of science-fiction film and literature, we will position the movement as an empirical conduit through which to explore the sociohistorical conditions under which transhumanist ideas have emerged, circulated, and taken up residence. To this end, we will consider transhumanism's ties to some of the most objectionable aspects of modern technology and late capitalism; eugenics, the commodification of health, and massive investments pharmaceuticals, anti-aging medicine, and so-called "GNR" technologies (i.e. genetics, nanotechnology, and artificial intelligence and robotics); the movement's affinities with neoliberalism and Euro-American (cyber) libertarian politics; and what some have pointed to as transhumanism's racialized subtext of whiteness. We will furthermore devote considerable attention to the technological singularity, artificial intelligence, the figure of the cyborg, mind-uploading, space colonization, and cryonic suspension, all of which, like transhumanism broadly, suggest that science and technology have in some sense come to operate as powerful channeling agents for the very sorts of magical beliefs, practices, and forms of expectation and association that theorists of secularization expected modernity to displace. Lastly, throughout the course of the seminar we will take transhumanism as a provocation to think broadly and seriously about embodiment, culture, and ways of being human.

Requirements/Evaluation: attendance and participation, informal weekly writing, 15- to 20-page seminar paper

SOC 350 (S) Max Weber & Critical Theory or Rationalization & Its Discontents

Cross-listings: COMP 349 SOC 350 REL 350

Secondary Cross-listing

We live in an age characterized by unprecedented technological and scientific progress--we have unraveled the building blocks of life, witnessed the birth of stars at the edge of the galaxy, and harnessed the power of the atom--and yet modern life often appears fundamentally meaningless and lacking in ultimate value--we work, we eat, we excrete, we die, perhaps in the interim shuffling paperwork, sucking up to our boss, and asking ourselves, "What kind of dining set defines me as a person?" Few thinkers have explored the roots of this modern ennui as thoroughly as Max Weber, a German sociologist often regarded as the single most important social theorist of the twentieth century. Weber wanted to know why it was European civilization in particular that gave birth to the grand trifecta of rationality, science, and capitalism and how we have become enslaved by the very things that were supposed to have set us free. Weber's key innovation was to trace the grand trajectory of Western "rationalization"--the historical attempt to produce a world in which "one can, in principle, master all things by calculation." Further, he demonstrated how this rationalization produced not just mastery over nature, but also "the disenchantment of the world" - value fragmentation, hyper-specialization, bureaucracy, and ultimately the "iron cage" of modernity. The first part of this course will follow in Weber's footsteps by studying his theory of rationalization and by exploring it in different social spheres, such as the economy, the law, the professions, and the secularization of religion. The second half of the course will look at Weber's legacy in Critical Theory. It will show how thinkers such as Theodor Adorno, Georges Bataille, Jürgen Habermas, Max Horkheimer, Michael Löwy, and Alasdair MacIntyre suggested various lines of flight from the iron cage of modernity.

Class Format: seminar

Requirements/Evaluation: attendance and participation, weekly critical reflections, 5- to 6-page midterm paper, 10- to 15-page final essay

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: preference will be given to REL, ANSO and COMP majors

SOC 362 (F) Story, Self, and Society

Cross-listings: COMP 362 SOC 362

Primary Cross-listing

From The Moth to StoryCorps to Williams College's own Storytime, stories are ubiquitous in contemporary society. Indeed, sociologists have argued that social life is itself "storied"--that we locate ourselves within familiar narrative structures, using them to "construct" identities and "tell" our lives. Stories, in this view, are not only the stuff of literature, but also the very fabric of social life: the foundation for individual and collective identities. This tutorial will grapple with the role of stories and storytelling in modern social life. What role do stories play in constituting personal identity? What cultural templates structure the stories we tell? Why are memoirs so popular, and how can we explain the more recent resurgence of interest in oral forms of storytelling? Specific topics will include illness narratives, confessional culture, digital stories, oral history, and memoir. As a capstone exercise, each student will construct a narrative analysis focused on a memoir that we will select collectively. The course will conclude with a final seminar meeting during which each student will tell a story of their own, and we will work together to consider how the theories we have encountered throughout the semester might illuminate our own narratives.

Requirements/Evaluation: 5-page paper every other week; comments on the partner's paper in alternate weeks

Prerequisites: none

Enrollment Limit: 10

Primary Cross-listing

In this seminar students will pursue sociohistorical analyses of Cold War American culture(s) by attending to key points of intersection between politics, aesthetics, and major technoscientific developments during this period. Part I will focus principally on the emergence of the computer and its role in shaping American infrastructure and styles of thought aimed at Soviet "containment." We will trace the historical threads connecting MIT's "Whirlwind" computer project and the SAGE continental air defense system; nuclear wargaming at the RAND Corporation and the aesthetics of "thinking the unthinkable"; the science of cybernetics and the prospect of automation; and ultimately the role of computation, intermedia, and systems logic in perpetrating the atrocities of the Vietnam War. Part II will take up the Cold War space race--from Luna 2, Sputnik I, and Yuri Gagarin to Projects Mercury, Gemini, and the Apollo moon landing. Within this context we will also consider the Club of Rome's Limits to Growth report; plans backed by NASA for the industrialization and colonization of outer space; and the place of science-fiction as a Cold War aesthetic (print, televisual, cinematic). Part III, finally, will explore key moments of conflict, resistance, appropriation, and unintended consequences of Cold War technoscientific developments, among them antipsychiatry and environmentalism; Project Cybersyn, an infrastructural casualty of the U.S./CIA-backed Chilean coup of 1973; the New Left, the American counterculture, new social movements, and the countercultural roots of new media and neoliberalism.

Requirements/Evaluation: two 5-page book review essays, weekly 1-page papers, midterm essay exam, final essay exam

SOC 368 (F) Technology and Modern Society

Cross-listings: SOC 368 ENVI 368

Primary Cross-listing

With widespread use of new social media, controversial developments in such bio-technical practices as the cloning of mammals, rapid advances in various forms of telecommunication, and the increasing sophistication of technological weaponry in the military, the triumph of technology remains a defining feature of modern life. For the most part, modern humans remain unflinchingly confident in the possibilities technology holds for continuing to improve the human condition. Indisputably, technology has benefited human life in innumerable ways. However, as with other features of modernity, technology has also had significant, albeit largely unanticipated, social consequences. Working within a sociological paradigm, this course will focus on the less often examined latent functions of technology in modern society. It will consider, for example, the social effects of technology on community life, on privacy, and on how people learn, think, understand the world, communicate, and organize themselves. The course will also examine the effects of technology on medicine, education, criminal law, and agriculture and will consider such counter-cultural reactions to technology as the Luddite movement in early nineteenth century England, Amish agrarian practices, and the CSA (community supported agriculture) movement.

Requirements/Evaluation: two short papers, a midterm exam, and a final exam

Cross-listings: STS 371 SOC 371 SCST 371 HSCI 371

Primary Cross-listing

Medicalization: those processes by which previously *non*-medical problems, once defined as ethical-religious, legal or social (e.g. drug and alcohol addition, shyness, obesity), are brought within the purview of medical science and redefined as medical problems, usually in terms of "illness" or "disorder." Part I: The history of the medicalization thesis; medicalization as a technical process; modern medicine as a form of social control; critiques of the medicalization thesis. Part II: From medicalization to biomedicalization; from the management of human life to the transformation of "life itself" by way of post-World War II technoscientific interventions aimed at "optimizing" human vitality. Empirical cases for consideration will be drawn from those technoscientific developments having made possible the work of optimization that defines biomedicalization: molecular biology, pharmacogenomics, biotechnologies, imaging techniques, robotics, and transplant medicine, among others. Finally, a consideration of how processes of biomedical optimization have produced new ways of seeing, knowing, and imagining human bodies, such that biology is increasingly less representative of "destiny" than it is of possibility. The course will to this end conclude with a survey of emerging issues in speculative technoscience and the ethics and politics of human enhancement.

Class Format: lecture

Requirements/Evaluation: weekly discussion précis, science-fiction book review essay, class presentations, and a take-home midterm

SOC 372 (S) Time and Temporality

Duration, rhythm, speed, pace, trajectory, sequence, articulation, busyness, boredom, flow--time is one of the most fundamental categories of our experience of reality. Since the founding of the discipline, sociologists have been interested in how time, while seemingly given and natural, is deeply influenced by history and society. This two-part course will introduce students to the sociological analysis of time and temporality. In part one, students will explore the emergence of the so-called "modern western temporal order"--the sense of time that many people take for granted as the way things are. We will excavate the historical roots of schedules, clocks, calendars, and time zones; examine how capitalism and colonial conquest disseminated particular notions of time around the globe; and discuss leading theories of how constructions of time change through history and vary among communities. In part two, we will focus on one of the most frequently lamented and celebrated qualities of modern temporality: acceleration. Is the world speeding up? Why do so many people feel always pressed for time? What are the promises and limits of speed, acceleration, and ceaseless change for building a robust democratic society?

Requirements/Evaluation: participation, time diary analysis (3-5 pages), final paper (10-12 pages)

Prerequisites: none

SOC 386 (F) Going Nuclear: American Culture in the Atomic Age

Cross-listings: SOC 386 HIST 387

Primary Cross-listing

Following the first use of nuclear weapons against Japan at the end of World War II, atomic science has fueled Americans' fears, hopes, nightmares, and fantasies. This course will examine various aspects of American nuclear culture in the early-Cold War period. It will consider topics ranging from the Manhattan Project to delivery of the bombs for combat, scientists' movements to abolish atomic weapons and expand peaceful atomic energy production, and the destructive consequences of the bomb's initial use and subsequent testing. The class will also investigate the role of the nuclear arms race in the Cold War, the development of civil defense and bomb shelter culture in the United States, and dystopian fiction about the nuclear apocalypse. Employing both historical and sociological perspectives, we will explore the interactions between science, diplomacy, politics, and culture in the nuclear age.

Class Format: discussion

Winter Study -----

SOC 11 (W) Excavating the Purple Bubble

Cross-listings: HIST 11 SOC 11

Primary Cross-listing

People often describe Williams College as an "intense" place--a "purple bubble" with its own peculiar micro-culture. This bubble can be stressful, exhausting, and work-obsessed, but also bursting with creative energy and a determination to change the world, not to mention creating experiences and relationships that become deeply nostalgic and lead to a lasting connection. How have these characteristic structures of feeling been built over time? In this course, we will attempt to build a picture of how the emotional cultures of Williams have evolved by excavating their histories. From the powerful emotions triggered by transitional moments in the College's history, such as feelings of inclusion and exclusion by women and people of color, to the everyday emotions of friendship, romance, and work stress, students will analyze materials from the college archives, the archive of the Record, and other sources of institutional memory to uncover the social history of emotions at Williams. Depending on enrollments, students will divide into research clusters focusing on particular topics, which might include: stress and work-obsession, turning points and change, wonder and discovery, nostalgias, staff morale, mental illness and wellness discourse, among other possible topics. Students will spend time in class discussing readings and curating a small collection of archival materials to be presented at the end of the course. Outside class, students will spend time in the archives. As a theoretical and methodological guide, we will draw primarily on scholarship from the sociology and history of emotion, including Norbert Elias, Cas Wouters, Raymond Williams, William Reddy, and Barbara Rosenswein.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: anthropology, sociology and history majors, followed by students' expression of interest

SOC 15 (W) Photographic Literacy and Personal Vision

Cross-listings: SOC 15 ANTH 15

Secondary Cross-listing

When you look at a photograph, what is it really saying? How can you make a photograph that says what you want to say? This course is about seeing with emotion and literacy, and making photographs that reflect your own personal voice and vision. This is not a course on technical photography--this is about breaking down the barrier between your ideas and your camera. Students will conceptualize and photograph a project of their own choosing. Whether a narrative documentary project or a more abstract exploration of form, students are expected to photograph on their own outside of class for at least five hours a week. Students must own or borrow a digital camera. Williams has a stock of excellent cameras available for loan. Mondays and Fridays we'll be looking at amazing historical and contemporary photographic work to cover a broad range of what is possible with the medium and discussing what the current conversations and controversies are within the practice. We'll be looking at slides, screens, photobooks and gallery shows to get a sense of how photographs function differently depending on how they're shown. The work we discuss is always adapted to reflect students' interests. On Wednesdays we critique each others' work--we look at students' top images for the week and try to reconcile them against the project's conceptual basis. We have a focused discussion about each student's work for 20-30 minutes, and how to make each project better. After critiques I'll be sending everyone photographic references to use for inspiration depending on your subject matter and aesthetic approach. At the end of the course the class will design and produce a campus exhibition of their photography. This event will serve as a synthesis of all the knowledge students gained while working together to make each others' projects stronger. No photography experience is necessary! Anyone is ready to start reading photographs critically, and establish a concept-driven workflow that will serve you well as long as you take pictures. Adjunct Instructor Bio: Ben Brody is an award-winning photographer working on long-form projects related to the American wars in Iraq and Afghanistan, and their aftermath. Themes of generational trauma, propaganda, and tragic comedy recur in his visual approach. His new book, *Attention Servicemember*, published by Red Hook Editions, will be available this fall.

Requirements/Evaluation: final project or presentation

ARABIC STUDIES

(Div I, with some exceptions as noted in course descriptions)

Chair: Professor Magnus Bernhardsson

- Magnús T. Bernhardsson, Chair of Arabic Studies, Brown Professor of History and Faculty Affiliate in Leadership Studies and Religion; affiliated with: Leadership Studies Program, Arabic Studies Department, Religion Department
- Radwa M. El Barouni, Visiting Lecturer in Arabic Studies
- Brahim El Guabli, Assistant Professor of Arabic Studies
- Amal Egeiq, Assistant Professor of Comparative Literature; affiliated with: Comparative Literature Program; on leave 2019-2020
- Lama Nassif, Assistant Professor of Comparative Literature; affiliated with: Comparative Literature Program; on leave Fall 2019

Middle Eastern and Maghrebi Studies is a vibrant, growing, and important field in the United States and around the world. Students wishing to enter this rich and varied discipline can begin with a major in Arabic Studies at Williams. The major is designed to give students a foundation in the Arabic language and to provide the opportunity for interdisciplinary and multidisciplinary study of Arab, Islamic, North African and Middle Eastern literatures, art, film, history, religion and politics.

THE MAJOR IN ARABIC STUDIES

Students wishing to major in Arabic Studies must complete ten courses, including the following six courses:

ARAB 101-102 Elementary Arabic

ARAB 201 Intermediate Arabic I

ARAB 202 Intermediate Arabic II

ARAB 301 Advanced Arabic I

ARAB 302 Advanced Arabic II

Students must also take at least one 400-level ARAB course, in addition to three other courses in Arabic and Middle Eastern Studies in Arabic Studies or affiliated units. At least one of these courses should be from the arenas of language and the arts (DIV I) and at least one from politics, religion, economics, history, etc. (DIV II). Students should consult with the Department to confirm that electives are authorized.

Students who place into more advanced language courses may substitute additional courses, *adding up to a total of at least nine courses*.

Up to four courses from approved study abroad programs may be counted toward the major.

THE CERTIFICATE IN ARABIC

The Certificate in Arabic demonstrates that a student has acquired a working foundation in the language. The sequence of eight language and culture courses is designed to supplement a student's major at Williams by enabling the student to expand their knowledge in a related field.

Required Courses

ARAB 101

ARAB 102

ARAB 201

ARAB 202

ARAB 301

ARAB 302

At least one elective course, either in Arabic literature, arts, or culture, or in Arabic history, religion, politics, economics, etc.

Students must earn a cumulative grade average of B or higher in the sequence of seven courses.

Students who enter Williams with previous training in Arabic may be exempted from up to two of the required seven courses. Thus, in order to earn a certificate, a student must take no fewer than five courses (including three language courses) after enrolling at Williams.

THE DEGREE WITH HONORS IN ARABIC STUDIES

Prerequisites

Honors candidates in Arabic are required to have maintained a GPA of 3.5 in the major to qualify for submitting a thesis proposal. In addition, candidates must demonstrate a strong interest in a specific topic for which an appropriate faculty advisor will be available in the senior year.

Timing

Students wishing to pursue a thesis in Arabic are strongly urged to secure an advisor by the end of the week after Spring Break in their junior year. By May 15th of their junior year, candidates must submit to the Program Advisory Committee a one- to two-page proposal and a preliminary bibliography. The Advisory Committee will inform candidates by June 1 whether they may proceed with the thesis and advise them about any changes that should be made in the focus or scope of the project. The summer before the senior year will be spent compiling a more detailed bibliography and preparing for the process of writing the thesis.

In their senior year, candidates will devote two semesters and the winter study period to their theses (ARAB 493-W31-ARAB 494). By the end of the Fall semester, students will normally have undertaken substantial research and produced the draft of at least the first half of the project. At this point students should also have a clear sense of the work remaining for completion of the thesis. In the course of the Fall semester, students will also have chosen and met with a second reader for the project, who will provide additional guidance and read the final thesis. By the end of Winter Study, students should have completed a draft of the entire project. At that time, the Comparative Literature Advisory Committee, together with the advisor, will determine whether the project may continue as an Honors Thesis, or whether its first portions (ARAB 493-W) will be graded as Independent Studies.

The second semester of independent thesis work will be spent revising as necessary. The completed thesis in its final form will be due one week before the last day of classes. At the end of the Spring term, the student will make a public presentation of the final project, to which members of the Advisory Committee will be specially invited.

Characteristics of the Thesis, Evaluation, and Major Credit

The topic of the thesis must have to do with some aspect of Arabic language, culture, history, politics, etc. and will be worked out between the thesis writer and her/his advisor. It is also possible to write a thesis that consists of an original translation of a significant text or texts; in this case, a theoretical apparatus must accompany the translation. The complete thesis must be at least 50 and at most 75 pages in length, excluding the bibliography.

The advisor will assign the grades for the thesis courses (ARAB 493-W-494); the Advisory Committee will determine whether a candidate will receive Honors, Highest Honors, or no honors.

For students who pursue an honors thesis, the total number of courses required for the major-including the thesis course (ARAB 493-W-494)-is 10, i.e., one of the thesis courses may substitute for one elective.

STUDY ABROAD

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments. We may need specific information (assigned readings) to determine whether the course counts for Div I or II major credit.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, four.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No. Students can receive credit toward the major's language requirements from for-credit summer language programs like Middlebury, etc. These count toward the 4-course maximum.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Make sure you have the needed number of Div I and Div II courses for the major. Know the difference.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

It has happened, but we try to be as flexible as possible.

ARAB 101 (F) Elementary Arabic

This is the first course in the year-long Beginning Arabic sequence. It will help you establish a foundation of communicative competence and understanding of the Arabic language and culture. The course adopts an integrated-skills approach with a focus on "formal Arabic" (or so-called Modern Standard Arabic), the language of formal writing and speech in Arab countries, while simultaneously familiarizing you with one variety of spoken Arabic. The course focuses on day-to-day situations and familiar topics.

Class Format: five hours a week

Requirements/Evaluation: tests, daily homework, active class participation, a skit, a culture portfolio, and engagement in a variety of co-curricular activities

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: students considering a major in Arabic Studies

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Unit Notes: students registered for ARAB 101 and 102 are required to attend and pass the sustaining program during the Winter Study period; credit is granted only if both semesters (ARAB 101 and 102) are taken

Distributions: (D1)

Fall 2019

LEC Section: 01 M-F 10:00 am - 10:50 am Radwa M. El Barouni

ARAB 102 (S) Elementary Arabic

This is the second course in the Beginning Arabic sequence. It builds on the foundation of Arabic competence that you established in Arabic 101, and will continue to develop your competence in Modern Standard Arabic and one variety of spoken Arabic. The course will continue to focus on day-to-day situations and familiar topics from the immediate environment while expanding the range of topics and authentic materials, and broadening the scope of linguistically-based and culturally-based tasks and course expectations.

Class Format: five hours a week

Requirements/Evaluation: tests, daily homework, active class participation, a presentation, a writing portfolio, and engagement in a variety of co-curricular activities

Prerequisites: ARAB 101

Enrollment Limit: 18

Enrollment Preferences: students considering a major in Arabic Studies

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Unit Notes: students registered for ARAB 101 and 102 are required to attend and pass the sustaining program during the winter study period; credit is granted only if both semesters (ARAB 101 and 102) are taken

Distributions: (D1)

Spring 2020

ARAB 111 (F) Movers and Shakers in the Middle East

Cross-listings: HIST 111 ARAB 111 LEAD 150

Secondary Cross-listing

This course examines the careers, ideas, and impact of leading politicians, religious leaders, intellectuals, and artists in the Middle East in the twentieth century. Utilizing biographical studies and the general literature on the political and cultural history of the period, this course will analyze how these individuals achieved prominence in Middle Eastern society and how they addressed the pertinent problems of their day, such as war and peace, relations with Western powers, the role of religion in society, and the status of women. A range of significant individuals will be studied, including Gamal Abd al-Nasser, Mustafa Kemal Ataturk, Ayatollah Khomeini, Muhammad Mussadiq, Umm Khulthum, Sayyid Qutb, Anwar Sadat, Naghuib Mahfouz, and Huda Shaarawi.

Requirements/Evaluation: class participation, short essays, and a final paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 15-19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 201 (F) Intermediate Arabic I (WS)

In this course we will continue to study the Modern Standard Arabic and one variety of spoken Arabic. Upon successful completion of this course, students will be able to hold conversations in Arabic with some fluency on a variety of topics while developing an increased vocabulary and cultural appreciation of Arabic-speaking countries.

Class Format: the class meets four hours a week with the fourth hour a conversation section

Requirements/Evaluation: quizzes, tests, homework, and active class participation

Prerequisites: ARAB 101-102 or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2019

LEC Section: 01 MWF 11:00 am - 11:50 am Radwa M. El Barouni

ARAB 202 (S) Intermediate Arabic II

As a continuation of ARAB 201, this course will expose students to Modern Standard Arabic and one variety of spoken Arabic while increasing their cultural literacy in Arab civilization. Our main textbook will be *Al-Kitaab fii Ta'allum al-'Arabiyya Part II* but outside materials from diverse media such as television and newspapers will also be included. *Class will be conducted in Arabic.*

Class Format: class meets four hours a week with the fourth hour a conversation section

Requirements/Evaluation: quizzes, homework, and active class participation

Prerequisites: ARAB 201 or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARAB 207 (F) The Modern Middle East (DPE)

Cross-listings: HIST 207 ARAB 207 GBST 101 REL 239 LEAD 207 JWST 217

Secondary Cross-listing

This survey course addresses the main economic, religious, political and cultural trends in the modern Middle East. Topics to be covered include the cultural diversity of the Middle East, relations with Great Powers, the impact of imperialism, the challenge of modernity, the creation of nation states and nationalist ideologies, the discovery of oil, radical religious groups, and war and peace. Throughout the course these significant changes will be evaluated in light of their impact on the lives of a variety of individuals in the region and especially how they have grappled differently with increasing Western political and economic domination.

Requirements/Evaluation: participation, two short papers, quizzes, midterm, and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History & Arabic majors, and Jewish studies concentrators; completion of course admission survey if overenrolled

Expected Class Size: 30-40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

HIST 207 (D2) ARAB 207 (D2) GBST 101 (D2) REL 239 (D2) LEAD 207 (D2) JWST 217 (D2)

Difference, Power, and Equity Notes: This course introduces students to the incredible diversity of the Middle East. It will explore how people of different backgrounds and in different situations have responded in diverse ways to the problems of the day. Students will acquire the critical tools to assess a number of interpretations of the past and how to understand and appreciate the many narratives in the Middle East today that have profound political and cultural implications.

ARAB 209 (S) Saharan Imaginations (DPE)

Cross-listings: ENVI 208 ARAB 209 COMP 234

Primary Cross-listing

Literary representations of the Sahara challenge facile assumptions about this undertheorized place. Literature furnishes a unique opportunity to gain more awareness of the organization of life in the desert and the ways in which its inhabitants have found harmony between their humanity and the Sahara's biodiversity. This course offers students the opportunity to engage in close readings of novels through the theme of the Sahara and Saharan space. Reading through the ethics of human mobility and actions in the desert will help students to understand how myth, memory, history, coloniality/postcoloniality, and a strong sense of ethics are deeply intertwined in the Sahara sub-genre of Maghrebi and Middle Eastern literature. Whether grappling with transcontinental issues of climate change, biodiversity cannibalization or overexploitation of natural resources, the Saharan

novel invites us to think critically about the politics of space and place as well as mobility and spatial control as they relate to this supposedly dead nature. Students will be initiated to the ecocritical dimension of Maghrebi and Arabic literature and the discourses underlying it through the prism of the Sahara.

Requirements/Evaluation: active participation, short presentation, short weekly responses on GLOW, midterm exam, and final paper

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ENVI 208 (D1) ARAB 209 (D1) COMP 234 (D1)

Difference, Power, and Equity Notes: Students will gain critical awareness of the imbrication of power, hegemony, economic injustice, and colonial policies in the disruption of indigenous conceptions of the Saharan space. Students will also be able to question representations of the Sahara as a dead or empty space by engaging with locally produced alternative conceptualizations of place. Finally, students will produce written assignments that address issues of power and environmental discrimination.

Not offered current academic year

ARAB 210 (S) The Challenge of ISIS

Cross-listings: HIST 210 ANTH 210 GBST 210 ARAB 210 REL 240

Secondary Cross-listing

What is ISIS and what does it want? Using historical and anthropological sources and perspectives, the course considers the origins, ideology and organization of the Islamic State. Beginning with an examination of early radical movements, including the Muslim Brotherhood, the Afghan mujahidin and Taliban, and al-Qaeda, the course will go on to investigate how ISIS derives important aspects of its ideology and organization from these earlier movements and how it deviates from them. We will look at unique aspects of the movement, such as its use of social media, its extensive destruction of ancient historical sites, its staging of spectacles of violence, and its recruitment of Muslims from Europe and North America. We will also examine the ideological constitution of the movement, including its attitude toward and treatment of non-Muslims, its conceptualization of itself as a modern incarnation of the original Islamic caliphate, the ways in which it justifies its use of violence, and its apocalyptic vision of the present-day as End Time. Finally, we will evaluate current responses to ISIS, in the West and among Muslims in the Middle East and elsewhere, in terms of their effectiveness and strategic coherence.

Class Format: lecture

Requirements/Evaluation: blogs (4 main blog posts, responses to at least 3-4 other blogs each week) (30%); analytic paper or class history paper (35%); 2 midterms (35%)

Prerequisites: none

Enrollment Limit: 40

Expected Class Size: 40

ARAB 211 (S) Understanding 9/11 and the War in Iraq (DPE)

Cross-listings: HIST 211 ARAB 211

Secondary Cross-listing

What were some of the causes of 9/11/2001 and what were some of the consequences? Why and how did the United States invade Iraq in 2003 and what impact did the subsequent occupation of that country have on the rest of the Middle East? In this course on recent political and cultural international history, that will also consider this history in film and popular culture, the monumental ramifications of the "War on Terror" will be considered and how this framework has shaped the 21st century. In the first part of the course, US-Middle Eastern relations will be explored and the eventual emergence of al-Qaeda in the late 1990s. Then the terrorist attacks on American soil on 9/11 will be studied and the ensuing wars on Afghanistan and Iraq. Particular attention will be on the prelude to the Iraq War, especially how that war was justified and rationalized, and the eventual occupation of Iraq. The myriad Iraqi responses will be studied along with American military experience. Finally, the course will evaluate the significance of the first decade of the 21st century and how these events continue to reverberate today.

Requirements/Evaluation: short online writings and papers and a final project

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: History and Arabic Studies majors

ARAB 212 (S) Distant Encounters: East Meets West in the Art of the European Middle Ages (WS)

Cross-listings: REL 210 ARAB 212 ARTH 212

Secondary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey). When these sites became less accessible with the spread of Islam in the seventh century, Europeans sought to recreate the sites at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Together, through open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

Requirements/Evaluation: participation in discussion; five 5-7-page tutorial papers (one of which will be revised as a final writing assignment); five 1-2-page response papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: First- and second-year students, but open to all

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

ARAB 222 (S) Photography in/of the Middle East (DPE)

Cross-listings: ARAB 222 ARTH 222

Secondary Cross-listing

Photography has been globally disseminated and locally inflected since its invention. In the Middle East, the powers and pleasures of the medium have been valued by colonial forces, indigenous populations, photojournalists and artists; the resulting images merit aesthetic and art historical appreciation even as they grant visual access to the social and political dynamics operative in diverse cultural contexts. We will explore photographic practices in various zones of the Middle East--e.g., the Holy Land, Turkey, Egypt and the Persian sphere--by attending to individual photographers and case studies. This tightly focused approach will support, in turn, a consideration of the agency and power of images more generally--what work do photographs do? Who resists and who benefits? The goal will be to appreciate diverse styles and perspectives that underlie renderings of the Middle East.

Class Format: discussion

Requirements/Evaluation: midterm, Glow posts, term project

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15-20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 222 (D1) ARTH 222 (D1)

Difference, Power, and Equity Notes: Photographs are tricky. Whose experiences and values do they really represent--those who are depicted? Those who wield the camera? Or, those who view images that are so easily reproduced and widely shared? How does identity figure? Religious conviction? Political affiliation? And how are these variables encoded in the material evidence? Appreciating the myriad powers of images requires multiple skills--from close-looking to interdisciplinary analysis--useful in contemporary visual culture.

ARAB 224 (S) Second Language Learning: The Learner, the Classroom, and the Social World

Learning a second language is one of the most exhilarating, rewarding, and eye-opening experiences of a life-time. Millions of people around the globe embark on a journey of exploration of target languages and cultures while reflecting on the self and home culture(s) in the process. This course introduces you to core issues related to the learning of a second language. What are the processes involved in learning a second language? What does it mean to know another language? Is second language learning similar to first language learning? Why are some language learners more successful than others? What individual variables do learners bring to the learning process? How can classrooms facilitate second language learning? How do learners perceive teachers' feedback? How does the specific socio-cultural context impact language learning? How does learning about the target culture feed into language learning? How does the learner's identity evolve in the process of second language learning? These are some key second language learning questions that we will examine in this class. Readings are drawn from studies on the learning of different languages.

Class Format: lecture

Requirements/Evaluation: active class participation, assignments, article presentation and leading a class discussion, language learner interview, a research paper

Prerequisites: none

Enrollment Limit: none

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ARAB 227 (F) Language and Society: What Does Your Speech Say About You?

Cross-listings: ANTH 227 ARAB 227

Primary Cross-listing

Sociolinguistics is the study of how aspects of society influence the way language is used by the society members. In this course, we will examine the inter-relationships between the way language is used in various social contexts affecting that usage. How and why do languages change? How does language reflect a person's identity? How does language intersect with power relations among individuals within a society? Does language vary according to gender? How are language varieties formed, and what determines their status within speech communities? How and why do speakers code-switch among different varieties? These are some key questions that we will examine in this class, drawing on readings that focus on different languages.

Requirements/Evaluation: active class participation, response essays, assignments, article presentation, variation paper, final exam

Prerequisites: none

ARAB 230 (F) Who was Muhammad?

Cross-listings: REL 230 GBST 230 ARAB 230

Secondary Cross-listing

Considered the Messenger of God, Muhammad is a central character of the Islamic tradition and has been the object of love and devotion for centuries. Recent outbursts sparked by controversial cartoons depicting Muhammad have made clear that he remains a revered and controversial figure even today. This course takes a critical historical perspective to the biographies of Muhammad, the founder of Islam. Rather than focus on the "facts" of his life, we will think about the ways in which historical context, political interests, and shifting conceptions of religion have influenced the way in which Muhammad has been imagined and remembered. We will also consider the ways in which Muslim and non-Muslims biographies of Muhammad are intertwined and interdependent, often developing in tandem with one another. By exploring Muslim and non-Muslim, pre-modern and modern accounts of Muhammad's life, we will think about the many ways in which Muhammad's life has been told and re-told over the centuries. In this course we will consider some of the following depictions of Muhammad: Muhammad as the object of ritual devotion; Muhammad as statesman and military leader; Muhammad's polygynous marriages and his young wife, Aisha; Muhammad as social reformer and revolutionary. Course readings will include pre-modern biographies (in translation) as well as contemporary Muslim and non-Muslim biographies.

Class Format: seminar

Requirements/Evaluation: reading responses, 3 short essays (3-4 pages double-spaced), and final exam

ARAB 234 (F) What is Islam? (DPE)

Cross-listings: ARAB 234 GBST 234 REL 234 HIST 208

Secondary Cross-listing

This course introduces students to Islam as a varied and contested historical tradition. The course will trace the historical development of Islam, focusing on religious and intellectual thought, political developments, and the practices and lived lives of Muslims. We will begin with situating the rise of Islam within the context of late antiquity, followed by an examination of the life of Muhammad, and the rise of Muslim empires. These developments will form the framework through which we investigate the theological, philosophical, legal, mystical, and literary writings of Muslims from the classical to the early modern periods of Islamic history. The main aim of the course is to develop a framework for understanding the historical developments through which Muslims have constructed ideas about normativity, authority, and orthodoxy in debates around Islam. Sources will include pre-modern

historical and religious texts (in translation).

Requirements/Evaluation: reading responses, two essays, final exam

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Religion majors (or those considering Religion as a major), then Arabic Studies and History majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ARAB 236 (S) Reading the Qur'an

Cross-listings: ARAB 236 COMP 213 GBST 236 REL 236

Secondary Cross-listing

In the nearly 1500 years of Islamic history, the Qur'an has been a central source of spiritual insight, ethical and legal guidance, sacred stories, and theological principles. Considered the divine word of God, the Qur'an is central to devotional life. This course will explore the Qur'an as a text that is always in a state of production. We will focus significantly on close readings of the text of the Qur'an, in addition to pre-modern and modern Qur'anic exegesis. The course will begin with a historical account of the revelation and collection of the Qur'an, placing the form and content of the text in the context of 7th century Arab society and the life of the Prophet. We will then study Qur'anic commentaries to discuss how Muslims have drawn theological, legal, philosophical, and mystical meaning from the Qur'an. We will pose some of the following questions: What do the different exegetical methods tell us about the intertextual nature of the Qur'an? How have these shifting notions affected the meaning made from Qur'anic verses and passages? What role do interpretive communities play in determining what the Qur'an says? Lastly, through an exploration of the art of Qur'an recitation, calligraphy, and Qur'an manuscripts, we will explore the ways in which the Qur'an is also an object of devotion in Muslim life.

Requirements/Evaluation: class participation, weekly reading responses, 3- to 4-page midterm paper, and a final project with a media component and a 4- to 6-page analytical essay

ARAB 242 (S) Women, Gender, and Sexuality in Islam (DPE)

Cross-listings: ARAB 242 REL 242 WGSS 242

Secondary Cross-listing

The figure of the Muslim woman is an object of intense scrutiny in Western society. Claims that Muslim women are oppressed and the incompatibility of Islam and feminism abound. This course will consider women and gender roles in the Islamic tradition and how Muslim women have interpreted and

negotiated these discourses. We will explore questions of masculinity, femininity, and sexuality across various historical periods as well as through contemporary Muslim feminist scholarship and literature (including film and novels). We will begin with insights into the politics of representing Muslim women, exploring how Muslim women are depicted in popular culture and media and ask the crucial question: do Muslim women need saving? We will then explore: how Muslim women have claimed religious authority through scriptural interpretation; how they have negotiated their position in Islamic law both historically and in contemporary Muslim societies; and the lives of pious women in Sufism--the mystical tradition of Islam. We will conclude with Muslim feminist scholarship and recent works on Islamic masculinities. Throughout the course, emphasis will be placed on the diversity of interpretations in Islam around women, gender, and sexuality and on Muslim women's own articulations about their religious identity and experiences. Some of the topics covered in this course include: marriage and divorce, slavery, modesty and veiling, and homosexuality.

Requirements/Evaluation: weekly discussion post, midterm essay, and final paper (6-8 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion, Women's, Gender and Sexuality Studies and Arabic majors

Expected Class Size: 14

ARAB 243 (F) Islamic Law: Past and Present

Cross-listings: WGSS 243 ARAB 243 HIST 302 REL 243

Secondary Cross-listing

From fear of the Shari'a to its implementation in so called "Islamic countries," Islamic law is perhaps best associated with draconian punishments and the oppression of women. Islamic law is ever present in our public discourse today and yet little is known about it. This course is designed to give students a foundation in the substantive teachings of Islamic law. Islamic law stretches back over 1400 years and is grounded in the Quran, the life example of the Prophet Muhammad, and juridical discourse. Teetering between legal and ethical discourse, the Shari'a moves between what we normally consider law as well as ethics and etiquette. The course will explore four key aspects of the law: its historical development, its ethical and legal content, the law in practice, and the transformation of Islamic law through colonialism and into the contemporary. Specific areas we will cover include: ritual piety, family and personal status law, criminal law, and dietary rules.

Requirements/Evaluation: weekly responses, four 2- to 3-page essays

ARAB 249 (F) Trauma and Memory in Maghrebi and Middle Eastern Literatures (DPE) (WS)

Cross-listings: ARAB 249 COMP 249

Primary Cross-listing

Arabic literature produced in the Maghreb and the Middle East has always engaged with the socio-political concerns of different Arab societies. Whether caused by the colonial state(s) or by post-independence leadership, trauma has been a central theme in Maghrebi and Middle Eastern literature for a long time. Using a combination of memoirs, films, and fictional works, this course aims to raise students' critical awareness and aesthetic appreciation of literary representations of the multiple traumas inflicted on people and societies in the Maghreb and the Middle East. The different novels and films assigned in this course will be read against seminal literature on memory and trauma studies to answer the following questions: how does Arabic literature remember? In what ways does Arabic literature engage with the past sequelae of colonialism, dictatorship, war, and displacement? How do Arabic novelists and memoirists dialogue with memory and trauma theory even though Arabic scholarship has given short shrift to trauma and memory ethics and aesthetics? What events or experiences are pivotal to collective and individual traumas represented in Maghrebi and Middle Eastern literature(s)?

Requirements/Evaluation: regular posts on Glow, two five-page papers, one ten-page final paper, one presentation, and participation in class

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 249 (D1) COMP 249 (D1)

Writing Skills Notes: Students in the course will write: 1) 400-word weekly, focused responses on Glow; 2) a book review (600 words); 3) two five-page papers as mid-terms; 4) one ten-page paper as a final paper for the course. Students are required to present an outline of their papers before submitting a draft paper. Students will receive detailed and consistent feedback on the writing. Students are required to incorporate the feedback to improve their drafts before they become final.

Difference, Power, and Equity Notes: Students in this course will learn how to identify and analyze gender, class, and power-related aspects of traumatic memory. The different readings assigned in this course will help students develop critical skills to examine how various forms of power and social inequality play out in memories of war, political detention, forcible disappearance, and social ostracism in the Maghreb and the Middle East.

Fall 2019

SEM Section: 01 TR 9:55 am - 11:10 am Brahim El Guabli

ARAB 257 (F) Iran, Islam, and the Last Great Revolution

Cross-listings: PSCI 257 ARAB 257

Secondary Cross-listing

The title and inspiration for this course comes from Robin Wright's book *The Last Great Revolution*. Wright argues that the 1979 Revolution in Iran completes the promise of the Modern Era, "launched in the West" but "adopted by or adapted to all other parts of the world." The overthrow of 2500 years of monarchy "paved the way for using Islam to push for empowerment." It is this empowerment, of nations and of ordinary individuals, that stands as the signal quality of modernity. The notion that post revolutionary Iran offers an alternative path to modernity is hardly conventional wisdom in the United States or Europe, where images of men draped in religious passion and women in forbidding black chadors are as common as the belief that the 1979 Revolution set Iran spinning back thirteen centuries in time. If westerners do not view Iran as entirely anti-modern, then at best they see it as a country filled with "paradoxes" and "puzzles," one in which indie rock bands play underground, figuratively and literally beneath the feet of retrograde religious fanatics, or unveiled women attend all-night parties only to slip back into proper hejab the next morning. The class will ask you to consider why these assumptions exist, whether they are the symptoms of a western civilization "clashing" with the east, and if they are exclusive to the United States or Europe. Does there also exist an "orientalism in reverse," a negative gaze of Iranians towards the west and towards their fellow, "backwards" citizens?

ARAB 259 (S) Bilad al-Sudan and Beyond: Arts of the Afro-Islamic World

Cross-listings: ARAB 259 ARTH 259 AFR 259

Secondary Cross-listing

From the Swahili stone houses of East Africa to the massive earth and timber mosques of the Sahel, the story of Islam in Africa is one of cultural and spiritual hybridity expressed through material form. In this course, students will explore how artistic forms and traditions in Africa have functioned as vehicles of access and integration for Islam, enabling it to assimilate itself with numerous African contexts towards becoming the dominant religious force on the continent. In addition, students will investigate how the forms, functions, and meanings of Afro-Islamic objects across the continent reflect not just one African Islam, but many different iterations, each shaped by the specific frameworks of its cultural context. The contemporary component of the course will examine how modernity in the form of globalization, technology, and Westernization has affected Afro-Islamic artistic traditions, and how these shifts reflect larger evolutions within understandings of Islam in Africa in the contemporary period.

Requirements/Evaluation: three reading response papers (2 pages each), class journal, a mid-term exam, and a final exam

Prerequisites: none, although an introductory course in art history or Islamic studies would be useful

Enrollment Limit: 25

Enrollment Preferences: students who have declared a major in Art History or Africana Studies

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 278 (F) The Golden Road to Samarqand

Cross-listings: ARAB 278 ARTH 278

Secondary Cross-listing

The region stretching from present day Iran to India figures prominently in contemporary global culture but it also has a rich and complex history--an amalgamation of Persian, Turkish and Islamic influences. Home to Genghis Khan and Timur (Tamerlane), Akbar the Great and Shah Jahan, it has generated some of the most renowned monuments (e.g. the Taj Mahal and the blue tiled mosques of Isfahan) and refined manuscript painting ever known. We will cover a broad swath of time--from the 10th to the 20th century--concentrating on important centers of artistic production such as Timurid Central Asia and Mughal India. Students will have the opportunity to study original works of art in the college museum collections.

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on class participation, a short paper, a midterm and a final

Prerequisites: none

Enrollment Limit: 20

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

ARAB 301 (F) Advanced Arabic 1 (DPE) (WS)

A continuation of Intermediate Arabic, ARAB 301 aims to expand students' listening, reading, writing, and speaking skills in Arabic. The course will also stimulate students' intellectual curiosity about the Arabic-speaking regions and enhance their cultural competence. Using al-Kitaad as well as a variety of authentic written and audiovisual materials to immerse students in Arabic language and culture, the course will allow students to achieve an advanced grammatical, cultural and oral proficiency in Modern Standard Arabic. The course will also encourage students to engage critically with a wide variety of topics in Arabic language as they enrich their knowledge of the different aspects of Arabic language and culture. Students at this stage will also be assisted to generate more complex written and oral assignments entirely in Arabic.

Requirements/Evaluation: active class participation, completion of all written assignments, quizzes, a midterm, and a final exam

Prerequisites: ARAB 202

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be writing multiple drafts in Arabic; the weekly written work expected from students is 800 words in Arabic language, students will also be doing translations from Arabic into English or vice-versa; and all written work from students will be evaluated, and students will receive feedback to rework it. Students will receive detailed and consistent feedback about their writing in Arabic language.

Difference, Power, and Equity Notes: Students will understand the relations of power between the different varieties of Arabic language. Students will grasp the gendered aspects of Arabic language and understand how it relates to English. Through their engagement with Arabic texts and audiovisual materials, students will deconstruct cultural and sociopolitical issues that are directly related to the environment, society, politics, and power.

Fall 2019

LEC Section: 01 MR 1:10 pm - 2:25 pm Brahim El Guabli

ARAB 302 (S) Advanced Arabic 2 (DPE) (WS)

A continuation of Advanced Arabic 1, ARAB 302 aims to reinforce students' listening, reading, writing, and speaking skills in Arabic through a deeper engagement with authentic materials in Modern Standard Arabic. Built around a plethora of texts and audiovisual materials, the course seeks to assist students to develop their language and critical thinking skills in Arabic. Situated at the intersection of language learning and content teaching, this course will prepare students for more scholarly engagement with and in MSA in the fourth year. Like ARAB 301, the course will be conducted entirely in Arabic.

Requirements/Evaluation: quizzes, exams, presentations, papers, midterm examinations, and projects

Prerequisites: ARAB 301 or equivalent

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 6

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be writing multiple drafts in Arabic; the weekly written work expected from students is 800 words in Arabic language; students will also be doing translations from Arabic into English or vice-versa; and all written work from students will be evaluated, and students will receive feedback to rework it. Students will receive detailed and consistent feedback about their writing in Arabic language.

Difference, Power, and Equity Notes: Students will learn about gender relations and power dynamics in the Arabic-speaking region; students will produce projects that address language politics, colonialism, sexism, feminism, and environmental losses in the Maghreb and the Middle East; and students will acquire the language necessary to discuss diverse topics related to power, gender, and the environment, such as recycling, new economies, and changing gender roles in society.

ARAB 308 (S) The Nile (DPE)

Cross-listings: ARAB 308 HIST 308

Secondary Cross-listing

For millennia, the Nile River has sustained civilizations in eastern and northern Africa. It is the only reason that Egyptians have been able to live in the Sahara Desert. It was at the banks of this river that some of the most significant human structures were built and some of the most beautiful artworks conceived. The Nile provided the silt and hence the alluvial soils on which all the great Egyptian empires were founded. Yet now in the 21st century, the Nile River is at a historical turning point. The water level and quality is dwindling while at the same time the number of people who rely on the river is ever increasing. This course will consider the history of the Nile and the peoples and cultures it has sustained. After a brief overview of the role of the river in ancient Egypt, we will explore the modern political and cultural history of the Nile. Who lives along this river and what kind of cultures have developed in the Nile valley? We will evaluate the numerous attempts to manage and control the Nile and the continuous efforts to utilize the river for human development such as agriculture and the tourism industry. At the end of the semester we will consider the relationship of the mega city Cairo with the Nile and whether the tensions among Nile riparian states will lead to "water wars" in East Africa and the Middle East.

Requirements/Evaluation: short papers and final project/paper

Prerequisites: none, though background in Middle East history is preferable

Enrollment Limit: 19

Enrollment Preferences: History and Arabic Studies majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 308 (D2) HIST 308 (D2)

Difference, Power, and Equity Notes: The course fulfills the DPE requirement because it evaluates the differing experiences of the Nile among different cultural groups. It will evaluate how the central government is constantly trying to change how people use their water and therefore over-determine how people interact with their natural environment.

ARAB 322 (S) Islam in Spain

Cross-listings: RLSP 322 ARAB 322

Secondary Cross-listing

The presence of Islam--in all its diverse manifestations--is not new to Europe, least of all to Spain. In this course we will focus for the most part on the medieval and early modern periods, and study several works--primarily of literature, though we will supplement with other texts--in which Muslims and Islam have been portrayed in the Iberian Peninsula. We will cover a wide range of perspectives that include Christian and Muslim writers as well as converts on both sides. While the bulk of the course is focused on the period prior to 1700 CE, we will devote the final few weeks of class to the study of Islam in contemporary Spain using fiction, legal debates, and issues related to immigration. *Conducted in Spanish*

Class Format: seminar

Requirements/Evaluation: two short papers, oral presentations, one final project

Prerequisites: any RLSP 200-level class, or results of the Williams College Placement Exam, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Spanish majors, Arabic Studies majors

ARAB 329 (F)(S) Against the Grain: The Counternarratives of Historical Fiction in the Arab World (DPE) (WS)

In 2011, a few months after the large scale protests in Egypt that led to Mubarak's forced abdication of power, a story circulated in social media that was then picked up by traditional media about the fabrication of a key image that goes back to the 1973 war. Every October on the annual anniversary of the war, pictures reappeared in the media, commemorating the event. A widespread one was one of Mubarak, then a major general in the army and commander of the air force, standing right next to al-Sadat looking lost in thought, while everyone else is focused on al-Sadat as he explains routes and war plans on the maps in front of them. The image had been photoshopped. Sa'd al-Shathl' who was chief of staff during the 1973 war was "airbrushed out of history" to be replaced by Mubarak in the photo, allowing for an altered historical narrative about each man's respective role and importance. Because of such incidents, the difficulty or impossibility of accessing "official" archives and the control of historical narratives by the state, historical fiction as a genre is of added significance in the Arab world. In this course, we will be examining eight works of Arabic historical fiction in translation, transregionally from the late nineteenth century to the present, with a focus more on the last few decades. Historical fiction will be examined both as *epistémê* and as *technê* to explore its associated aesthetics and incorporation of different archives, documents and forms. We will be exploring the possibility of considering historical fiction as an alternative archive that opens up new definitions and forms of experiences, community and subjectivity instead of the traditional narrative of the nation-state. Alongside the novels that will vary from a whodunnit in contemporary Lebanon (*The Mehlis Report* by Rabee Jaber) to a work that is about the fall of Granada in 15th century Spain (*Granada* by Radwa Ashour), we will be reading theoretical texts alongside the novels.

Requirements/Evaluation: participation and engagement with material in class: 30%; four 5 page papers: 20%; presentations/debates: 15%; midterm term project: 15%; end of term paper: 20%

Prerequisites: statement of interest

Enrollment Limit: 19

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Four 5-page papers long papers evenly spaced through the semester, a mid-term project and a research paper 10 pages long.

Difference, Power, and Equity Notes: The course aims to engage with how historical narratives have traditionally privileged those who have power, and thus see literary texts as an alternative archive that allows for counter narratives that show an array of experiences and redefinition of subjectivity and community outside of the traditional paradigm of the nation state and which allows the dismantling of the monolithic presentation of historical narratives in and of the Arab world.

ARAB 331 (F) Popular Culture in the Arab World: Youth, Populism, and Politics (DPE)

Cross-listings: ARAB 331 COMP 332

Primary Cross-listing

Since the uprisings in the Arab world in 2011 and the counter-revolutions that followed, much attention has been paid to the significant role of the "popular" in creating social and political transformations. The voice of the youth and "the street," in particular, emerged as massive sources and sites for political mobilization. But, are these categories identical? Does youth culture equal popular culture? This survey course is designed to provide students with an introduction to the different layers that constitute popular culture in the Arab world since the decolonization of Arab states in the 1950s. Questions that we will ask include: What constitutes "popular culture" in the Arab world? How is it different than folk culture, mass culture, or "high" culture? Who are the key players in the creation and dissemination of "popular" culture? Besides globalization, for example, what other social, political and economic dynamics engulf the definition of the "popular"? What are modes of self-fashioning and representation of Arab identity that characterize this culture? To answer these questions we will examine original sources (with English translation) that include a graphic novel, political cartoon and graffiti, documentaries, TV shows, soap operas, video clips, music, comedy, blogs, news and social media. A selection of essays from anthropology, Arab culture studies, political science, journalism, and online videos will be used to provide historical and critical context for the material discussed in class.

Requirements/Evaluation: active class participation, two shorter papers (3-4 pages), two film reviews and critical reflections (1-page), a performance, and a longer final paper (7-10 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: students majoring in or considering a major in Arabic Studies

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARAB 331 (D1) COMP 332 (D1)

Difference, Power, and Equity Notes: As the course description explains, this course engages the concept of the popular through a critical examination of difference, power, and equality in the context of national revolt against colonialism, dictatorship, and socioeconomic injustice in the Arab world since the 1950s. The content will focus on addressing how voices from the margins, particularly the youth, the urban poor, and women, articulated a political language of popular resistance against the dual hegemony of state and colony.

Not offered current academic year

ARAB 332 (F) Islam and Feminism

Cross-listings: REL 332 ARAB 332 WGSS 334

Secondary Cross-listing

This course examines the relationship between feminism and Islam, focusing particularly on Islamic feminist scholarship. We will take a genealogical approach to our study of Islamic feminism tracing the different discourses that have informed and shaped the field. The first part of the course will begin with a critical examination of orientalist and colonial representations of Muslim women as oppressed and in need of liberation. We will then explore Muslim responses to such critiques that were entwined with nationalist and independence movements. This historical backdrop is critical to understanding why the question of women and their rights and roles become crucial to Muslim self-understanding and Islamic reform. The second part of the course will focus on major intellectuals and thinkers who have influenced Islamic feminism. Finally, the last part of our course will explore the breadth of Islamic feminist literature, covering the following themes: 1) feminist readings of scripture; 2) feminist critiques of Islamic law; and 3) feminist theology.

Requirements/Evaluation: weekly responses, four 2- to 3-page essays

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Religion, Arabic Studies, Women's, Gender and Sexuality Studies, History majors

ARAB 346 (S) Revolutions and Counter-Revolutions: Narratives from the Arab World, Latin America and the Caribbean (DPE)

Cross-listings: COMP 346 ARAB 346

Secondary Cross-listing

This course offers a South-South comparative reading of revolutions and counter-revolutions in the second half of the 20th century in the Arab World, Latin America and the Caribbean. Throughout we will read novels and watch films that focus on histories of social movements, post-independence revolutions, indigenous autonomies, dictatorship, and counter-revolutions with the aim to investigate narratives of people power vs. absolute power, insurgency vs. neocolonialism, utopias and dystopias. A comparative and critical reading of these texts will introduce you to the complex histories of national liberation, state terrorism and democratic imagination in two geographies in the Global South that share similar struggles against Euro-American imperialism. These texts will also familiarize you with an alternative, yet foundational, canon of Arabic, Latin American and Caribbean literatures and cinema, particularly from the post-Sixties generation in the Arab world and the post-Boom Latin American generation. Although this course is conceptualized as a South-South comparative reading of revolution and counter-revolution, it does not adhere to strict geographical parallels between the Arab World, Latin America and the Caribbean. It is mapped, however, according to major critical questions and thematic tropes that inform this topic. For example, how do contemporary Iraqi and Chilean writers and filmmakers write an aesthetic of evil in narratives that investigate the legacy of prolonged dictatorship? How do national novels in Mexico and Palestine depict parallel movements of indigenous resistance and anti-capitalist struggles? What motifs of dystopia are illustrated in narratives about post-revolution civil wars in Argentina and Syria? What histories of popular nationalism and socialism are revealed in feminist memoirs from Egypt and Cuba from the 1960s and 1970s?

Requirements/Evaluation: active class participation, two short papers (3-4 pages), two film reviews (1-page), two critical reflections (1-page), a performance, and a final paper (7-10 pages)

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

COMP 346 (D1) ARAB 346 (D1)

Difference, Power, and Equity Notes: This course will explore difference, power, and equality through a comparative reading of narratives of dissent and revolt. The novels examines the effects of class, race, ethnicity, gender and sexuality on social and economic inequalities that ultimately have mobilized revolutions in the Arab world, Latin America, and the Caribbean since the 1960s. Reading narratives of socialist revolutions from the Global

South, students will hone skills to address global injustices and neoliberalism.

Not offered current academic year

ARAB 363 (S) Where are all the Jews? (DPE) (WS)

Cross-listings: JWST 268 ARAB 363 COMP 363 REL 268 HIST 311

Primary Cross-listing

Until four decades ago, many Maghrebi and Middle Eastern cities and villages teemed with Jewish populations. However, the creation of the Alliance Israelite Universelle's schools (1830s), the establishment of the State of Israel in 1948, the decolonization process in the Maghreb and the Middle East, and the Arab defeat in the Six-Day War accelerated the departure of Arab and Berber Jews from their homelands to other destinations, including France, Israel, Canada, the United States, and different Latin American countries. Arab and Berber Jews' departure from their ancestral lands left a socioeconomic and cultural void that Maghrebi and Middle Eastern cultural production has finally started to address, albeit shyly. The course will help students understand the depth of Jewish life in the Maghreb and the Middle East, and interrogate the local and global factors that led to their sudden disappearance from both social and cultural memories for a long time. Reading fiction, autobiographies, historiographical works, ethnographies, and anthropological texts alongside films and documentaries, the students will understand how literature and film have become a locus in which historiographical amnesia about Arab/Berber Jews is actively contested by recreating a bygone world, which, until fairly recently, both Jews and Muslims occupied and negotiated successfully for millennia. Reading against both conflict and nostalgia as the primary determinants of Jewish-Muslim relations, the course will help students think about multiple ways in which Jews and Muslims formed communities of citizens despite their differences and disagreements.

Requirements/Evaluation: 400-word weekly, focused responses on Glow; a book review (600 words); two five-page papers as mid-terms; one ten-page final paper; one presentation

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

JWST 268 (D1) ARAB 363 (D1) COMP 363 (D1) REL 268 (D1) HIST 311 (D2)

Writing Skills Notes: Students are required to present an outline of their papers before submitting a draft paper. The professor will give feedback on each written work to improve students' writing skills. Students are required to incorporate the feedback to improve their drafts before they become final. Students will receive detailed and consistent feedback about their writing in Arabic language. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Students in this course will understand the historical process that lead to the disappearance of Arab/Berber Jews. Students also will work out alternative ways to grasp Jewish-Muslim relations beyond nostalgia and conflict. Finally, students enrolled in the course will grapple with and try to disentangle the complexity of Jewish-Muslim citizenship in both pre-colonial and postcolonial contexts.

ARAB 368 (F) Arab Women Writers: Remapping Urban Narratives

Cross-listings: COMP 368 WGSS 368 ARAB 368

Primary Cross-listing

In "The Lover of Blue Writing above the Sea," (1995) a poem written to console a lover after the death of his beloved, Syrian poet, Ghada al-Samman, pens: "If you are sad and burn the edge of my book/I shall come to you/like the genie in my grandmother's Damascene stories..." As these lines imply, the fantastic grandmother's Damascene stories have the power to equally amend broken hearts and restore memories of loss. In this course, we will adopt "the grandmother's Damascene stories" as a conceptual metaphor that guides our line inquiry into the intersection of Arab women's narrative and the city. We will read novels and short stories by Arab women writers about cities and capitals in the Arab world and the diaspora. The goal of this course is not only to familiarize students with prominent Arab women novelists, such as Hoda Barakat, Radwa Ashur, Liana Badr, Raja'a Alem, Alia

Mamdouh, and Ahlam Mosteghanemi, among others, but also to introduce them to the literary and visual cartography of Beirut, Granada (via Cairo), Ramallah, Mecca, Baghdad, and Constantine, respectively. We will also read short stories about other cities in the world, such as New York, Paris, London, Buenos Aires and Tokyo among other world metropolises. Questions we will address include: How does the city appear as a protagonist? How do Arab women novelists represent nationhood, modernity, memory, love, war, sexuality and religion, among other themes, in their construction of urban narratives? How do these narratives map an Arab feminist metropolis? How do Arab women writers represent cities beyond the Arab world? To answer these questions, we will also look at Arab women's blogs and watch films that focus on the city as a site for spatial articulation of national histories, popular revolutions, and feminist public spheres.

Requirements/Evaluation: active class participation, several short response papers, three short papers (3-5 pages), a final performance project, and a final paper (7-10 pages)

ARAB 369 (S) Indigenous Narratives: From the Fourth World to the Global South

Cross-listings: GBST 369 COMP 369 HIST 306 ARAB 369

Secondary Cross-listing

In the late 20th century, world literature has witnessed a "boom" in indigenous literature. Many critics and historians describe this global re-emergence of the subaltern and the indigenous in terms of literary justice fostered by post-colonial studies and the adoption of the Declaration of the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities, by the UN General Assembly on December 18, 1992. In this course, we will investigate this "indigenous boom" by reading novels and short stories from the Americas, the Middle East and North Africa from the 1970s to the present. Through these trans-regional and trans-historical peregrinations, our principal goal will be to examine and compare narratives about conquest, settler colonialism, colonial nationalism, indigeneity, sovereignty, indigenous epistemology and philosophy. At the same time, we will consider the following questions: How did pioneering indigenous women writers, such as the Laguna Pueblo Leslie Marmon Silko in the US and the Mayan playwrights of La Fomma in Chiapas, Mexico lead the feminist front of the indigenous literary renaissance? How did Palestinian folktales, Tashelhiyt Berber tales in Morocco, and Mayan dream narratives in Mexico and Guatemala produce narratives of decolonial history? What does the aesthetics of magical realism in Arabic, Quechua and Spanish, respectively, as evident in the works of the Kurdish writer Salim Barakat (Syria) and the mestizo writer José María Arguedas (Peru) tell us about the intersection of race, ethnicity, and indigenous epistemology? Ultimately, our goal is to trace how these texts contributed to global indigenous literature and the trans-historical and trans-geographical connections between them.

Requirements/Evaluation: active class participation, several short response assignments (2-3 pages each), final performance project, and final paper (5- to 7-pages)

ARAB 401 (S) Topics in Advanced Arabic I: Contemporary Arab Cinema

The Arab world is a fascinating region with rich traditions and vibrant societies. Through an exploration of contemporary Arab cinema, this course will introduce you to issues in modern Arab societies that represent the diversity of the region as well as the shared concerns and challenges. We will analyze select movies and texts, exploring how Arab filmmakers represent social, political, and economic change and realities in their societies. Some topics include nationalism and national identity, gender identities, civil wars, religion, social justice, and the recent revolts. The course will be conducted in Arabic, and we will employ linguistic and paralinguistic analyses of the movies as a means to explore modern Arab thought and cultures.

ARAB 411 (F) Happy Holidays! A Comparative History of Commemorations and Festivals

Cross-listings: HIST 411 REL 321 ARAB 411

Secondary Cross-listing

What do our holidays tell us about ourselves and our societies? This seminar in religious, political and cultural history is in two parts. In the first half, we will explore the major holidays and festivals that emerged in the Middle East among the three monotheistic religions (Judaism, Christianity, and Islam). It will examine how certain events became ritualized and then spread to different parts of the globe and were adapted to specific cultural situations. We will consider the role of myth and commemoration and how various religious holidays are celebrated in different ways around the world. The second part of the seminar focuses on secular holidays with particular attention to the Modern Middle East. Which events are commemorated and how and what are the political implications of these celebrations?

Requirements/Evaluation: several short response papers and a 20- to 25-page final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: seniors, especially History and Arabic Studies majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D2)

ARAB 412 Advanced Readings in Contemporary Arabic Literature

This course, taught in Arabic, aims at providing students with a deeper understanding of contemporary Arab literature. By navigating different literary moments, foci and genres, the course will offer a panoramic view of the contemporary literary map of the region. While the course will focus on some mainstream writers such as the Egyptian Naguib Mahfouz and the Sudanese Tayyib Salih, it will also feature stateless and non-canonical writers such as Alaa Al-Sarky and young poets using 'amiyya' or colloquial Arabic as their main tool of expression. We will read short stories, excerpts from novels, literary critiques, interviews with authors, examples of classical and lyrical poetry, as well as watch a number of movies based on literary adaptations. Through examining representative literary texts from various parts of the Arab region, students will not only broaden their awareness of the socio-political and cultural dynamics emanating from these works, but will also improve their linguistic and stylistic knowledge of Arabic at more sophisticated levels.

Requirements/Evaluation: active participation in class, reading responses, presentations, blogs, quizzes, final paper

Prerequisites: ARAB 302 or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 10

Grading:

Distributions: (D1)

ARAB 415 (S) Beyond Headlines: Surveying the Arab Landscape through Arabic Media

How does Arabic media represent the Arab landscape? This course will explore Arabic media as a window to the understanding of modern Arab thought and culture. It will discuss Arabic media as a vehicle through which issues of political, historical, social, and economic significance in the Arab world are discussed, debated, and analyzed. Some issues include political and social freedoms, inter-Arab relations, national identity, recent revolts, gender identities, the Arabic language in a changing world, and technology in the age of globalization. The course will explore these issues as represented in the language of print, internet, television, movies, and social media, and we will employ linguistic and paralinguistic analysis of these resources.

Requirements/Evaluation: active participation in class, assignments, blogs, quizzes, presentation, final project

Prerequisites: ARAB 302

Enrollment Limit: 12

Enrollment Preferences: Arabic majors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Attributes: FMST Core Courses

Not offered current academic year

ARAB 416 (S) Arabic Short Stories: Societies, Cultural narratives & Literary aesthetics

In this course we will explore the literary languages of Arabic and as well as various political and socio-economic issues via a selection of short stories that hail from geographically diverse authors. Being attentive to detailed readings of the text, their context, and the environment within which the author composed the text in question, we will weave our way through these short stories, developing the four language skills in addition to cultural competency. Although the course will avoid the monolithic approach of reading these stories as a social document that is a reflection or mirror of their societies, and will be equally concerned with the aesthetics of the Arabic literary narratives, the socio-economic and political issues discussed in the stories will be of relevance to the broader realms of Middle Eastern studies writ large. Tradition vs. modernity, the individual in opposition to the state, and gender issues are just some of the themes that will be discussed. In addition to the short stories provided, the class will engage in complimentary activities and material, like links to open source online videos and articles to expand on our knowledge of specific Arabic cultural and sociological phenomena. In addition to the short stories, there will be a short list of novels from which each member in the class will choose according to their interests. Reading the novel will be a term long project and will entail one-on-one meetings every two weeks with the instructor and will be tailored according to individual needs.

Requirements/Evaluation: preparation and active participation, response questions and vocabulary building homework, short 2-page essays, midterm video, and end of term paper (5-7 pages)

Prerequisites: ARAB 302 or by permission of the instructor

Enrollment Limit: 12

Enrollment Preferences: Arabic Studies students

Expected Class Size: 4

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Spring 2020

SEM Section: 01 Cancelled

ARAB 420 (F) Current Events from the Maghreb and the Middle East

Students in this course will engage with authentic materials from Arabic media, covering the Maghreb and the Middle East. Using original content from newspapers, magazines, websites, TV channels, podcasts, and specialized news outlets, the course will take students from intermediate high to advanced high level. Through their active engagement with the course materials, students will acquire a very diverse vocabulary, strengthen their mastery of Arabic grammar, and perform advanced linguistic skills in Modern Standard Arabic (MSA). Moreover, students in this course will be able to produce substantial narratives about complicated and abstract topics, argue for or against an idea, and discuss a variety of topics in MSA. In addition to enhancing students' listening, speaking, reading and writing skills, close, critical attention will be paid to deepening students' cultural competence.

Students are expected to give three presentations through the course of the semester, write weekly response papers in Arabic, participate in a collective project, and produce a final paper about a topic of their choosing in consultation with the instructor.

Requirements/Evaluation: active participation, three presentations, collaborative project, final paper

Prerequisites: ARAB 302 or permission of the Instructor

Enrollment Limit: 15

Enrollment Preferences: Arabic Studies majors and certificate students

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

ARAB 427 Revolutions & Revolutionaries in the Arab World's Modern History (DPE) (WS)

What is the difference between a [Thawrah] (revolution), an [Inqil'b Sha'ab] (popular led-coup) and an [Intif'ah] (uprising)? Was the 2011 "Arab Spring" the first time that people in the Arab world had revolted against their governments? Were the 1977 bread "riots" in Egypt an [Intif'ah] or revolution that was quelled promptly? How does the 1958 coup in Iraq compare to the coup there five years later in 1963 or other coups across the Arab world? What were the role of the Amazigh in North Africa in rebelling against colonialism? In this course, we will be looking transnationally at the different revolutions, uprisings and coups that have taken place in the Arab world in its modern history. Through a variety of medium, the course will explore the socio-political and economic factors that resulted in these instances in history and the effects thereof. We will also be looking at the cultural production that flourished after revolutions, coups and uprisings from the blatantly propagandist to the nuanced and subversive! The course will be entirely in Arabic and aims to take participants from intermediate high to the advanced-mid/high level according to ACTFL standards. The course will be engaging with and developing, on a weekly basis all five language skills: reading, writing, listening, speaking and cultural proficiency and will focus on the language functions that are required at this level. This writing intensive course will consist of multiple forms of evaluation such as participation, debates, presentations, a mid-term video project and an end of year writing project.

Class Format: flipped classroom

Requirements/Evaluation: writing assignments, participation, debates, presentations, a mid-term video project, and an end of year writing project

Prerequisites: having done three years of Arabic language and preferably time abroad

Enrollment Limit: 10

Enrollment Preferences: seniors

Expected Class Size: 6

Grading:

Distributions: (D1) (DPE) (WS)

Writing Skills Notes: Students will be expected to write 5-6 essays during the term, each of which consists of two drafts, in addition to a 5-page end of term paper. The focus in the essays in addition to knowledge of the subject matter, will be syntax, style, cohesion, development of arguments, and collocations. Prompt and detailed feedback will be given for both drafts to ensure improvement.

Difference, Power, and Equity Notes: The course will include material about multiple countries and their peoples in the Arab world while also being attentive to minorities and their status.

Not offered current academic year

ARAB 480 (F) Interpretations of the Israeli Palestinian Conflict (DPE)

Cross-listings: GBST 480 ARAB 480 JWST 480 HIST 480

Secondary Cross-listing

This tutorial addresses the powerful, competing, and bitterly contested historical narratives that underpin the Israeli-Palestinian conflict. Both Israelis and Palestinians appeal to history to legitimize their territorial claims and to justify contemporary action. Special attention will be paid to the interpretations of key historical moments, especially the 1948 and 1967 wars, and on the contrasting views of some of the core issues of the conflict (Jerusalem, refugees, settlements, terrorism).

Requirements/Evaluation: 5- to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

Prerequisites: none, though some academic experience with Middle East materials is preferred

Enrollment Limit: 10

Enrollment Preferences: History majors and Arabic Studies majors and Jewish Studies concentrators

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Winter Study -----

ARAB 10 (W) Cooking Moroccan Food From Couscous to Tea

Students enrolled in this course will learn about the history of Moroccan cuisine and its uses in activism before engaging in cooking Moroccan dishes themselves. From couscous to mint tea, Moroccan cuisine's history encompasses colonial legacies, state-building efforts, and histories of importation of spices and ingredients from exotic places. State legitimacy and social prominence required the royal court, governors, and wealthy individuals to

present their guests with the most exquisite dishes to mark their status and entrench their prominence in their communities. Historically, Moroccan Sultans and governors contributed to the creation of a distinct Moroccan cuisine with its set of rituals and traditions that are still observed in the official arenas today. However, the last twenty years have witnessed the emergence of a strong civil society alongside women's organizations whose investment in revenue-generating projects as a way to empower women has transformed Moroccan cuisine. In this context, cuisine has become a site of liberation, democratization, and search of equality in the Morocco. Moreover, these transformative projects draw on culinary memory to effectuate change within continuity in a country that has been in transition for a while. The first week of the course will be dedicated to the discussion of Moroccan cuisine and the ways in which cuisine relates to state policies and civil society's activism. The second and the third weeks will be organized in the form of workshops to train students to cook Moroccan tajine, tea, lamsmen, baghrir, omelettes, couscous, cookies, soups, and other dishes. All students are required to participate actively in the culinary workshop throughout the duration of the winter study course.

Requirements/Evaluation: final project or presentation

ARAB 11 (W) How Does Language Vary in Society? The Fascinating Case of Arabic

How Does Language Vary in Society? The Fascinating Case of Arabic Description: Sociolinguistics is the study of how aspects of society influence how language is used by the society members, and how the very act of language use constructs those societies and positions speakers in them. This course will provide an introduction to questions of interest to sociolinguists. These include: 1) How and why do languages change? How do different speech communities use language? 3) In what ways does language reflect a person's identity? 4) In what ways does language construct a person's identity? 5) How does language intersect with power? This course will address these questions with a focus on a unique case study: Arabic. Arabic is a classical example of a diglossic language. Two varieties with marked differences and specific functional distributions co-exist in Arabic speech communities: Modern Standard Arabic (MSA), a variety with a higher sociopolitical status as the symbol of pan-Arabism and the official language of twenty three Arab countries, and colloquial Arabic (CA), the symbol of local identities. CA itself varies widely along geographical, religious, gender, age, and socio-economic lines within and between Arab countries. Arabic speakers mix between MSA and CA and shift their language use within a mosaic of language variation that would fascinate all those interested in the study of sociolinguistics. Readings, movies, and audiovisual materials in this course will provide a glimpse of this sociolinguistic scene. Knowledge of Arabic is not required to take this course. Students are expected to actively engage in class discussions based on course materials, and will write a 10-page final paper based on a sociolinguistic project.

Requirements/Evaluation: 10-page paper

Prerequisites: none; knowledge of Arabic is not required to take this course

Enrollment Limit: 20

Enrollment Preferences: interest in linguistics and/or Arabic

Grading: pass/fail only

Materials/Lab Fee: approximately \$50 for books

- Carolyn J. Wargula, Visiting Assistant Professor of Art

The Department offers students different paths to explore the vital connection between visuality and creativity. With courses of study in the History of Art and the Practice of Studio Art (or a combination of History and Studio), the Major is designed to train students to develop the technical, conceptual, critical, and historical tools they need to engage the visual world.

ADVISING

Majors are expected to discuss their choice of courses and path through the major with their advisor or another professor in the department. Official departmental advisors for each route through the major (listed here below) are available to field general questions concerning curriculum, requirements, and planning to study away.

Art History Faculty Advisor: Guy Hedreen

Art Studio Faculty Advisor: Amy Podmore

History and Studio Faculty Advisor: Ben Benedict

ART HISTORY

The history of art is different from other historical disciplines in that it is founded on direct visual confrontation with objects that are both concretely present and yet documents of the past. We emphasize analysis of images, objects, and built environments as the basis for critical thought and visual literacy. In addition to formal and iconographic analysis, we use the work of other disciplines to understand visual images, such as social history, perceptual psychology, engineering, psychoanalysis, cultural studies, and archaeology. Because of its concentration on visual experience, the Art History major increases one's ability to observe and to use those observations as analytical tools for understanding history and culture.

Major Requirements

The Art History major requires a minimum of nine courses:

Any three of the following four courses: ARTH 101, ARTH 102, ARTH 103, and ARTH 104

Any ARTS (studio) course.

Any two courses in Art History concerned with the following: one course in art history concerned with a period prior to 1800 and one course in art history concerned with post 1800.

ARTH 301 Methods of Art History

One 400-level Seminar or 500-level Graduate Seminar (in addition this course may be used to satisfy the pre-1800 or post-1800 requirement).

One additional course, at any level.

The faculty encourages students to construct a major with historical depth and cultural breadth. The numbered sequence of courses is intended to develop knowledge and skills appropriate to students' level of experience, ultimately supporting original, independent work at the 400-level.

100-LEVEL COURSES require no experience in the subject. They are introductions to the field that develop students' skills in visual analysis, interpretation, and written expression and argumentation.

200-LEVEL COURSES are introductions to specific fields within art history, but normally open to students with no experience in art history. Often, there is a significant lecture component to the courses.

300-LEVEL COURSES focus more closely on specific art-historical problems, or present material in a tutorial format. The goal of these courses is to build skills needed for independent research and sustained analytical writing. Generally, there is a higher expectation of student participation or initiative, and longer and/or more frequent writing assignments. In the 300 level, students learn to work with and evaluate different types of sources, research tools, historical perspectives, and methodological approaches.

400-LEVEL COURSES are intensive discussion-oriented seminars that emphasize critical analysis and build toward student-initiated, independent work (oral presentations and sustained, analytical research papers). Advanced majors who have taken ARTH 301 are encouraged to work at the 400 or 500 level, and papers produced in these courses are normally the basis for the senior thesis.

HISTORY AND STUDIO

This route offers students the opportunity to propose a course of study that investigates a particular medium or a particular issue bridging both wings of the department. Examples of past History and Studio projects include topics related to architecture, curating, and performance, but are not limited to these.

In many cases, it is better to choose an Art History or Studio Art route, taking additional courses in the other wing, as desired. The History and Studio route is offered as a third option and requires approval.

The application for the History and Studio route must include both a written statement and a list of proposed courses. It must be approved by an advisor from both Art History and Studio Art and be submitted to the department's administrative assistant before registering for the major.

History and Studio students whose projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ArTS 418) with permission of the instructor and to participate in the senior Studio exhibition. Those seniors with a History emphasis can apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Thesis Seminar (ArTH 494) which culminate in a thesis and thesis presentation. Or, a student may propose a senior independent study.

Major Requirements

The History and Studio major requires a minimum of nine courses:

Any TWO of the following four courses: ARTH 101, 102, 103, or 104

ARTS 100-level course

ARTS 200-level course

ARTH 301 Methods OR ARTS 319 Junior Seminar

ARTH 400-level OR 500-level course

ARTS 300-level course OR (with permission)

ARTS 418 Senior Seminar

ARTH elective

ARTS elective

One advisor from Art History and one from Studio Art must sign off each semester before a student may register for classes.

THE DEGREE WITH HONORS IN ART

Students who wish to become candidates for the degree with honors must show prior evidence of superior performance in the major as well as research capabilities to carry out the proposed project.

Art History

To graduate with honors in art history, students are to enroll in the Senior Thesis Seminar (ARTH 494) during the Spring semester of their senior year, where they will develop an original research paper (completed in a prior course, a travel research project, or an independent study). To be admitted to the seminar, students must submit their original research paper to the Art Department's Administrative Assistant in Lawrence no later than the end of the reading period of the Fall semester. The paper must be properly formatted and include both illustrations and bibliography. It must additionally include a thesis project proposal of 500-700 words.

Students must also secure an academic advisor for their project and complete the advising Agreement Form (available from the Art Department's Administrative Assistant) by the end of the reading period of the Fall semester. This form serves to verify: a) your advisor's support of your project, and b) your advisor's approval of your plans for Winter Study. Students should plan to dedicate Winter Study to work on their thesis project and, to this end, they should enroll in ARTH 31 immediately after (but not before) notification of admission into ARTH 494. (To avoid problems should they not be admitted to ARTH 494, students should pre-register in another Winter Study course). Because faculty are not usually available during this period, it is very important for students to plan, together with their advisors, a work schedule for Winter Study with concrete goals. Admission to the Senior Thesis Seminar will be determined by the instructor of the seminar, in consultation with the Art Department faculty. The important criteria for admission are: 1) the quality, originality, and potential of the research paper on which the thesis project will be based; 2) the availability of a suitable advisor for the project, and the commitment of that advisor to supervise the work during the Spring term; 3) strong past performance in the art history route to the Major; 4) completion of ARTH 301 by the time of the application (exceptions to this rule must be granted beforehand by the chair of the Department).

In early January, the instructor will notify students of their admission to the Thesis Seminar. Since enrollment is by invitation only, students should pre-register for four classes in the Spring semester. If invited to join the seminar, students should then drop one of those courses and add the Thesis Seminar during drop-add period. The Thesis Seminar is to be taken in addition to the nine required courses for the art history route to the Major. Once in the seminar, students will revise, refine, and expand on previous research and produce a paper of approximately 25 pages. At the end of the semester, they will present a shortened version of the paper to the faculty and public at the Williams College Museum of Art.

Students who have identified a thesis topic and secured an advisor may apply early (in the Spring semester of their junior year) in order to pursue—in relation to their thesis project—summer research opportunities and/or a faculty-sponsored independent study in the following Fall semester. The procedure and criteria for students applying early are the same as those outlined above. (That is, students applying early would likewise take the Winter Study and Spring courses). Materials for early application (the same as outlined above) would be due by 5:00 pm on the Thursday preceding Spring Break.

History and Studio

The route to honors is a combination of the art studio and art history routes to honors. At the beginning of senior year, a candidate for honors in History and Studio makes a proposal to two faculty members, one faculty advisor from each wing of the department. If both advisors agree to supervise the project, the candidate enrolls in an independent study and works through the Fall semester and Winter Study. The progress of the project is assessed by both advisors at the end of Winter Study; if the project is not well enough developed, the advisors may end it at that time. If the project is allowed to move forward, the student enrolls either in Senior Seminar (ARTS 418, for which they will need permission of the instructor), if the project is primarily a matter of making art, or in an Honors Independent Study, if it is primarily a writing project. The final project is submitted to the two advisors, who will determine whether or not it will receive honors.

STUDY ABROAD

The Art Department encourages students to travel during Winter Study, and to study abroad for a semester during the junior year. Students planning on studying abroad must: consult a departmental advisor, leave a copy of their Study Away Petition on file in the Department, and consider the required junior seminars (ARTH 301 and ARTS 319) that prepare students for the independent research and/or independent artistic production

which is the focus of the senior year.

Art History

Art History majors must take ARTH 301 in their junior year unless they are planning to study abroad for a full year or unless there is only one section of 301 offered; in that case, they may take the required class in their senior year (and should consider taking the course as a second-semester sophomore). The Department does not pre-approve courses for the art history major, but will offer provisional credit for courses that appear to satisfy requirements for the major. Art history majors may satisfy no more than 3 requirements abroad (the ARTS requirement may be satisfied abroad only if the student is away for the full academic year. Student may not receive credit for 400-level work while abroad). Art history students should be aware that in many programs course selection is limited and is not known before one commits to the program. It may happen that none of the art history courses offered during the semester abroad satisfy distribution requirements for the major.

History and Studio

History and Studio majors must plan accordingly for their elected junior seminar. For art history courses taken abroad, history and Studio majors can seek provisional credit for courses that appear to satisfy requirements for the major. No provisional credit is possible for studio courses; students must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 2 major requirements may be satisfied per semester while abroad (one in studio, one in history), with no more than 3 courses total. History and Studio majors cannot satisfy ARTS 319 or any 400-level courses abroad.

ARTH 101 (F) Art Through Time

A team-taught introduction to the art and architecture of Europe from the ancient Mediterranean through the Middle Ages to the Renaissance in Italy. This course celebrates the glory of works of art as physical objects, to be viewed and contemplated, to be sure, but also often to be worshiped, worn, touched (even licked), held, exhibited, bought and sold, passed through or around, and lived in. To help students begin to appreciate how these works of art might have been understood by those who originally made and used them, the course sets its objects of study within a number of revealing historical contexts, from the social and the political to the philosophical and the art historical. To give students time with original works of art, our discussion-centered conferences use the wealth of art resources in Williamstown: the Clark Art Institute, the buildings and sculpture of the Williams College Campus, and the Williams College Museum of Art.

ARTH 103 (S) Asian Art Survey: From the Land of the Buddha to the World of the Geisha (DPE)

Cross-listings: ASST 103 ARTH 103

Primary Cross-listing

Moving chronologically and thematically, this course surveys the history of Asian art from the Bronze Age to the globalizing art worlds in the present day with particular emphasis on India, China, and Japan. Its contextual approach helps students gain insight into the aesthetic, religious, and political ideas and cultural meanings conveyed by the works of art. It also provides students with the vocabulary, analytical techniques, and patterns of thinking needed for advanced art history courses. Topics include visualizing imperial power; temple architecture and rituals; sexual symbolism in Buddhist and Hindu art; nature or landscape painting as moral and political rhetoric; literati theory and practice in art; modes of visual narration; politicizing Zen Buddhism and its related practices in Japan's samurai culture; and the sex industry and kabuki theater and their art in Edo Japan. While each class session will explore unique and region-specific cultural formations and artistic developments, a strong emphasis will be also placed on the interconnectedness, through trade; movement of objects; pilgrimage; and diplomacy and war, not only among these three distinctively different Asian cultures, but their respective interactions with the West (Key words: Chinoiserie, Japonisme, Company painting, perspective picture). The methodology used is intended to dispute the idea of a single, stable identity of "Asia," "Asian art," or "Asian culture" that has dominated the Western narratives throughout history, and to call attention to the variety of cultures and cultural encounters at different times in history that contributed to what we currently think of as "India and its art and culture," "China and its art and culture," and "Japan and its art and culture." (Persian, Mesopotamian, and European influences on Indian art and its culture, for example.)

Class Format: limited number of class discussion, some classes may be conducted at WCMA

Requirements/Evaluation: four required textbooks; three quizzes; one response paper 3-4 pages; two writing assignments 4-6 pages; class attendance

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: Art History majors

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASST 103 (D1) ARTH 103 (D1)

Writing Skills Notes: One reading response paper (3-4 pages); first writing assignment (4-5 pages); and second writing assignment (5-6 pages). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Topics discussed in class encourage students to confront and reflect on the operations of difference, power, and equity within and among Asian cultures. Examples include the relationships between political power, ritual, and the creation and use of artworks; style as a function of social class (elite arts, popular arts, professional court style vs. literati amateur style, etc.); the sex trade and its portrayal in popular Japanese prints; the modernization or Westernization of Asian societies.

ARTH 104 (F) Materials, Meanings, and Messages in the Arts of Africa (DPE)

Cross-listings: AFR 105 ARTH 104

Primary Cross-listing

This course introduces students to the wealth, power, and diversity of expressive forms that have characterized the arts of Africa and its Diaspora from prehistory to the present. Pulling extensively from the collections at the Williams College Museum of Art and other campus resources, students will not only experience firsthand the wide array of objects that have been produced within this vast geography, but will also come to recognize how multiple senses including sight, sound, smell, and touch play a key role in understanding how these objects work within their respective contexts. As tools of political control, social protest, divine manifestation, and spiritual intervention, these objects and their associated performances also challenge what we might typically consider art in the Western tradition and as such students will be pushed to think beyond such terms in their examinations of these rich creative traditions.

Requirements/Evaluation: three 2-page response papers, class journal on WCMA objects lab, midterm exam and final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Art History and African Studies majors

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 105 (D2) ARTH 104 (D1)

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of the differences between concepts of art in African and Western traditions, and how this difference has formed the foundation for hierarchies of power within the art world that have long disenfranchised and disempowered artists from the continent. This course highlights this historical platform in order to renovate established biases and assumptions about these objects that position them as 'primitive' or 'exotic' constructs.

ARTH 105 (F) Historical Research in Dance and Performance Studies

Cross-listings: DANC 103 ARTH 105

Secondary Cross-listing

This course is an introduction to the historical context of dance forms prevalent in the US and analysis of movement-based performances. While readings and viewings will focus on the socio-historical background of dance genres practiced at Williams and beyond, an important element of the course will be the practice of documenting, interpreting, and writing about performances as historical and cultural mediums. The course will enable students interested in dance, theatrical and visual arts (including advertising and marketing) to hone their skills in the practice of analyzing still and

moving images, while also offering students of history and art history the opportunity to develop competency in historical research. This is primarily a discussion-based seminar course, and may include attendance at live performances in the area, film screenings, field trips, and workshops with guest artists. Material will be introduced at introductory level. No previous dance experience is assumed or required. Learning objectives: to understand the social and political contexts for various performance genres; to explore interdisciplinary and embodied modes of engaging with movement; to develop the ability to document, analyze, and write about dance as a historical and cultural text.

Class Format: this is primarily a discussion-based seminar course, and may include attendance at live performances in the area, film screenings, field trips, and workshops with guest artists

Requirements/Evaluation: one research-based essay, 2 short written assignments, 2 group presentations

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: first-years and sophomores

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 203 (F) Chicana/o Film and Video

Cross-listings: ARTH 203 WGSS 203 LATS 203 AMST 205

Secondary Cross-listing

Hollywood cinema has long been fascinated with the border between the United States and Mexico. This course will examine representations of the U.S.-Mexico border, Mexican Americans, and Chicana/os in both Hollywood film and independent media. We will consider how positions on nationalism, race, gender, identity, migration, and history are represented and negotiated through film. We will begin by analyzing Hollywood "border" and gang films before approaching Chicana/o-produced features, independent narratives, and experimental work. This course will explore issues of film and ideology, genre and representation, nationalist resistance and feminist critiques, queer theory and the performative aspects of identity. Through a focus on Chicana/o representation, the course explores a wide spectrum of film history (from the silent era to the present) and considers numerous genres.

Class Format: film screenings will be scheduled as a lab

Requirements/Evaluation: one short paper, mid-term exam, final exam and take home essays

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 20

Grading: yes pass/fail option, yes fifth course option

ARTH 207 (F) "Out of Africa": Cinematic Por(Be)trayals of a Continent (DPE) (WS)

Cross-listings: AFR 207 ARTH 207

Primary Cross-listing

This tutorial provides a focused study of the politics / poetics of visualization and identification associated with film and cinema about Africa from past to present. From colonial-era propaganda newsreels about Africa's 'fighting men' to contemporary white-savior narratives that exploit current socio-political ruptures on the continent for epic effect, films about Africa produced by a primarily Western cinematic regime have proven themselves to be highly effective apparatuses for framing "Africa" as a concept to be summoned time and time again to tell different stories for different audiences, and in doing so privilege particular viewpoints and imaginaries. This tutorial will provide a space for robust discussion and debate about the various representative tropes, conceptualizations, and visualizations that have been used to shape the contours of "Africa" as understood by a primarily Western audience from past to present, and how these same tropes in many ways have come to define the nature of the relationship between film / cinema and the continent over the history of their engagement. In doing so, it will also address how strategic displays and narratives deployed by cinematic productions often support specific power dynamics that locate an idea of "Africa" within paradigms of specific cultural and political understanding. In zeroing in on how such films promote targeted realities for people and places within the continent, this tutorial will address how "Africa" in Western film and cinematic traditions is positioned within a particular framework of understanding that is more often than not irrevocably tethered to a Western imaginary.

Requirements/Evaluation: targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History majors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 207 (D2) ARTH 207 (D1)

Writing Skills Notes: This course fulfills Writing Skills requirements through its focus on the development of writing proficiency in terms of writing mechanics, syntax, and organization. It is also designed to help students craft a general approach to formulating a well-articulated, compelling argument. Students will receive extensive feedback on bi-monthly writing assignments from both the instructor and their peers as well as a comprehensive mid-semester critique from the instructor.

Difference, Power, and Equity Notes: This course fulfills DPE requirements through its exploration of issues of 'authentic' representation as they have been applied to representations of "Africa" displayed within the contexts of Western film and cinema. Through discussions of cultural capital and the politics of representation, students analyze how a general African 'identity' has been dictated by Western film culture and how this hegemony is currently being disrupted by an emergent generation of African artists and filmmakers.

ARTH 210 (F) Intro to Latin American and Latina/o Art: Contradictions & Continuities, Postcolonial to the Present (DPE)

This course introduces students to the breadth and richness of the visual arts in Latin American and U.S. Latina/o art. The course begins in the late 19th and early 20th centuries, when artists and writers first began formulating the notion of an art "native" to Latin America, and continues through the ever-expanding cultural expressions developed throughout the 20th and 21st centuries. Through a contextual approach, we will pay particular attention to Latin American artists' shifting relationships to race, class, and gender issues, their affiliations with political and revolutionary ideals, and their critical stance vis-à-vis the European avant-gardes. Similarly, we will analyze the emergence and development of Latina/o artistic practices in the postwar U.S., tracing these artists' own exploration of race, class, and gender dynamics. This class introduces Latin American and Latina/o artistic practices and scholarship to enable students to develop a critical understanding of the historical specificity of diverse movements, their relation to canonical definitions of modern and contemporary art, and their relevance to issues of colonialism, nationalism, revolutionary politics, and globalization. We will consider a vast array of genres--from painting and sculpture to printmaking, photography, conceptual, installation, and performance art--and will draw from artist statements, manifestos, and secondary interpretive texts to consider both the impetus behind these dynamic artworks and their lasting legacies.

Requirements/Evaluation: midterm exam and non-cumulative final exam, weekly short reading responses, attendance, and active participation

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills DPE requirements through historical, visual, and thematic analyses that explore the cultural biases and geopolitical forces that have restricted the exposure of Latin American and Latina/o art in the canon of Western art history. The course also centers on contextualizing Latin American and Latina/o artistic practices and analyzing them in relation to race, gender, and class dynamics, and to issues of colonialism, nationalism, revolutionary politics, and globalization.

ARTH 211 (F) Art and Experience in Ancient Rome

Cross-listings: ARTH 211 CLAS 210 ARTH 210

Secondary Cross-listing

To see and be seen--it could be argued that this was the very definition of Roman culture. Much like today, spectacle and the dissemination of images lay at the heart of political and social life. The visual arts were crucial both to how the Romans rehearsed their identity and goals as a community, and to how individual Romans communicated their achievements and values. In this course, lectures on the art and architecture of ancient Rome (ca. 300 B.C.-A.D. 400) will provide the backdrop for an investigation into the role visual culture played in the lives of all Romans, including slaves and former slaves, women and children. Special topics will include the funeral and funerary portraiture; the military triumph and monuments of victory; the house as a site of memory; the use of images on coins; participation in religious celebrations; displays of war booty and prisoners of war; experience and audience at the racetrack and in the amphitheater; the spectacle of food and dining; and the Roman street as both contested space and a place for art. Readings will include a combination of primary and secondary sources. *All readings are in translation.*

Requirements/Evaluation: attendance and preparation, a mid-term, a final, and a medium-length paper

ARTH 212 (S) Distant Encounters: East Meets West in the Art of the European Middle Ages (WS)

Cross-listings: REL 210 ARAB 212 ARTH 212

Primary Cross-listing

In this tutorial, students will investigate the rich artistic consequences -- in architecture, manuscript illumination, mosaic, sculpture, panel painting, fresco, metalwork, and other minor arts -- of European contact with the Eastern Mediterranean between approximately 300 and 1450 CE. From the beginnings of Christianity, pilgrims from Europe made the long journey to sacred sites in the Holy Land (extending across parts of present-day Egypt, Israel, Syria, and Turkey). When these sites became less accessible with the spread of Islam in the seventh century, Europeans sought to recreate the sites at home. Later, from 1095 onward, Christian Europeans attempted to reclaim and hold the Holy Land from non-Christians by force, through an ill-fated series of five major and several lesser "crusades." Over the centuries, before, during, and after the Crusades, exposure to the peoples, ideas, and cultures of the Eastern Mediterranean also came through trade and through the travel and settlement of non-Europeans in Europe itself, particularly in Spain, Sicily, and Venice. Together, through open discussion, we will explore artistic production within each of these different cross-cultural contexts of East-West encounter. In the process, we will reflect on how art could function as a conduit for the exchange of ideas in the Middle Ages, and how it could be used both to negotiate and to intensify cultural difference.

Requirements/Evaluation: participation in discussion; five 5-7-page tutorial papers (one of which will be revised as a final writing assignment); five 1-2-page response papers

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: First- and second-year students, but open to all

ARTH 213 (S) The Human Figure in the Ancient Mediterranean

Cross-listings: ARTH 213 CLAS 213

Primary Cross-listing

From the earliest representations in the third millennium BCE until the end of the Roman period in the fifth century CE the human body remained the foremost choice of subject for artists, patrons, critics, and the public in the ancient Mediterranean world. This course will consider cultural ideas about the body in antiquity, and trace their repercussions in the modern era. Over the course of the semester we will concentrate on 12 case studies, each representing a specific concept from an area of the Mediterranean. Topics include the "shining bodies" of bare-chested potentates in Egypt and the ancient Near East, statues that give the dead voice, the perfection and humanity of the bodies of the gods, ancient Greek science and the nude goddess, the pathos of Hellenistic athletes, and the interpretative challenge of the ambiguous and sensuous marble forms of the Barberini Faun or the Sleeping Hermaphrodite, both found in Roman contexts. We'll consider the cross-influences of ideas about gender, class, race and the body coded in public and private art. Reading material will include ancient literature in translation as well as contemporary critical essays. Evaluation will be based on participation in discussion and group presentations, in-class writing assignments, short response papers, and a final 8-page research paper. Engaged library research of original paper topics will be supported throughout the semester.

Requirements/Evaluation: participation in discussion and group presentations, in-class writing assignments, short response papers, a final 8-page research paper.

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: open to any student, majors and non-majors, with interests in the ancient world; no experience with art history required; first-years and sophomores are encouraged

ARTH 221 (F) History of Photography

This lecture course will examine the history of photography from its beginnings in the 1830s to the present, from the first grainy black and white images to the work of contemporary artists using cutting-edge photographic technologies. We will examine photographs used for documentary, scientific, and aesthetic purposes, and we will trace the medium's emergence and acceptance as a fine art. We will also explore photography's physical and conceptual characteristics as a medium, paying particular attention to its uniquely intimate and frequently contested relationship to "the real." By the end of the course, students will have a broad understanding of photography as a unique medium within the history of art and knowledge of the theoretical frameworks that developed alongside that history.

Requirements/Evaluation: two short papers, mid-term, and final exam

ARTH 222 (S) Photography in/of the Middle East (DPE)

Cross-listings: ARAB 222 ARTH 222

Primary Cross-listing

Photography has been globally disseminated and locally inflected since its invention. In the Middle East, the powers and pleasures of the medium have been valued by colonial forces, indigenous populations, photojournalists and artists; the resulting images merit aesthetic and art historical appreciation even as they grant visual access to the social and political dynamics operative in diverse cultural contexts. We will explore photographic practices in various zones of the Middle East--e.g., the Holy Land, Turkey, Egypt and the Persian sphere--by attending to individual photographers and case studies. This tightly focused approach will support, in turn, a consideration of the agency and power of images more generally--what work do photographs do? Who resists and who benefits? The goal will be to appreciate diverse styles and perspectives that underlie renderings of the Middle East.

Class Format: discussion

Requirements/Evaluation: midterm, Glow posts, term project

ARTH 223 (S) Comic Lives: Graphic Novels & Dangerous Histories of the African Diaspora

Cross-listings: AMST 323 COMP 322 ENGL 356 ARTH 223 AFR 323

Secondary Cross-listing

This course explores how the graphic novel has been an effective, provocative and at times controversial medium for representing racialized histories. Drawing on graphic novels such as Jeremy Love's *Bayou* and Ho Che Anderson's *King: A Comic Biography*, this course illustrates and critiques multiple ways the graphic novel commingles word and image to create more sensorial access into ethnic traumas, challenges and interventions in critical moments of resistance throughout history. Students will practice analyzing graphic novels and comic strips, with the help of critical essays, reviews and film; the chosen texts will center on Africana cultures, prompting students to consider how the graphic novel may act as a useful alternate history for marginalized peoples. During the course, students will keep a journal with images, themes and reflections and will use Comic Life software and ipads to create their own graphic short stories based on historical and/or autobiographical narratives.

Requirements/Evaluation: class participation, weekly written responses, student-led facilitation, one 3-page graphic analysis, one 6- to 8-page essay, and a final project (producing a graphic short story with Comic Life)

Prerequisites: none

Enrollment Limit: 19

ARTH 228 (S) Velázquez, Goya, and Picasso

Cross-listings: ARTH 228 RLSP 228

Secondary Cross-listing

This course will provide an introduction to three major Spanish painters--Velázquez, Goya, and Picasso--who lived and worked, respectively, in the 17th, 18th, 19th and 20th centuries. Though these painters are world famous, they are rarely studied comparatively, and in the context of their Spanish artistic roots. The syllabus will cover the historical and social contexts in which they started working, and how they followed, and departed from, artistic conventions of the time. Through specific paintings, we will consider the historical evolution of the artists' relationship to their patrons and subjects, from the elite status of Velázquez within the royal court, to Goya's dramatic rise with the reigns of Charles III, and Charles IV, and his subsequent exile to France. Picasso was free of royal patronage and also lived in France, yet despite this freedom he remained deeply connected to the themes and

concerns of his Spanish artistic predecessors. In addition to key paintings including Velázquez's "Las Meninas" and other royal portraits, Goya's "Maja Desnuda" and his series "The Disasters of War," Picasso's "Guernica," and his own 20th century reinterpretation of "Las Meninas," we will focus on the artists' shared subjects of portraits and war, and consider the following issues: How does the role of the Spanish artist change over the periods covered? How did the artist exercise his freedom whilst under the scrutiny of the court and the Catholic Church? How were these painters' lives and work shaped by key historical events such as the Inquisition, Napoleon's invasion of Spain, or the Spanish Civil War? How does the work of art evolve in its role from private royal commission to public display in museums open to all? We will read short literary pieces from each period, primary materials such as letters and other documents, and historical and critical works. All readings will be in English. Knowledge of Spanish is encouraged, but not required.

Requirements/Evaluation: 3- to 5-page weekly assignment

ARTH 230 (F) From Alexander to Cleopatra: Remodeling the Mediterranean World

Cross-listings: CLAS 230 ARTH 230

Secondary Cross-listing

The period between Alexander the Great (323 B.C.) and Cleopatra (30 B.C.), like our own, was characterized by internationalism, migration, wide-ranging cultural values and religious practices, and ethnically diverse urban populations. Large numbers of non-Greeks came under the control of newly established Hellenistic kingdoms, while in the west Rome's emergence as a superpower offered both new opportunity and danger. The Hellenistic world was a place of vibrant change in the spheres of art, architecture, urban planning, and public spectacle. In this course, we will consider the art and archaeology of this period in their political, social, and religious contexts, focusing on the visual language of power and royalty; developments in painting, sculpture, mosaics, and monumental architecture; interactions between Greeks and non-Greeks; and the impact of Greek culture in Rome.

Requirements/Evaluation: class participation, quizzes, midterm, final exam, and one medium-length paper

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: students with an interest in the ancient Mediterranean world and in the history of western art and architecture

Expected Class Size: 35

ARTH 231 (S) Art, Life, and Death: Locating Women in Italian Renaissance Art (WS)

Cross-listings: WGSS 231 ARTH 231

Primary Cross-listing

Renaissance art is the stuff of blockbuster museum exhibitions, mass tourist pilgrimage, and record auction prices. From our modern vantage point,

the cultural accomplishment of the 15th and 16th centuries in Italy clearly has the ability to astound. Calling to mind the inimitable imagination of Botticelli, the scientific genius of Leonardo, or the superhuman creativity of Michelangelo brings into focus an inspiring narrative of individual accomplishment, innovation, and progress (ideals we easily understand and may well share). This is an important story we still tell of human achievement. This tutorial explores a critical question: where are the women in this narrative? Women were not typically artists, so how might we bring their roles, force, and power into focus? To do this, we will turn away from the grand historical narrative we so easily recognize and enter a more foreign world: a realm of everyday experience in which art-never created for its own sake-was powerful, and mattered to people. Art shaped realities and mediated the fundamental questions and of life and death, from power, sexuality, love, desire, and self-definition, to mortality and communion with divinity When we approach Renaissance art on its own terms, our picture expands to include women, their lives, and what they themselves wanted to see. In addition to secondary scholarship, we will pay close attention to primary sources (including images themselves), giving students ample change to forge original arguments: one of the central goals of the tutorial.

Class Format: some tutorial meetings will be conducted at local museums

Requirements/Evaluation: engaged reading and conversation; five 5-page tutorial papers (with revisions to one of these as final project); five 1- to 2-page responses to partner's tutorial papers

Prerequisites: first-year and sophomore students (this class is open to students with no experience in art history)

Enrollment Limit: 10

Enrollment Preferences: a statement of interest will be requested in the event the course is over-enrolled

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 232 (S) Renaissance Rome: Renovating the Eternal City

George Eliot called Rome "the city of visible history," a place with the power to bring "the past of a whole hemisphere" right before our eyes. The magnetic visual power of Rome did not just occur naturally, however; it is a product of a bold urban project first envisioned by Renaissance popes and brought into being by the artists and architects they hired. During the fifteenth and sixteenth centuries, Rome was transformed from a shrinking and neglected medieval town into a thriving center of artistic energy and invention. Beginning with the papacy's return to the city in 1417, we will focus on the historical, ideological, and artistic forces behind this period of renovation and restoration that reshaped the urban and artistic fabric of the city. We will study the particularly Roman foundations for the period known as the High Renaissance, then, approaching art historical touchstones by Michelangelo, Raphael, and Bramante as works grounded in a uniquely Roman sense of time and historical destiny. We will conclude with a selective look at Baroque works by Caravaggio, Bernini and Borromini, examining their their powerful innovations and effects as a continuation of the Renaissance *renovation* of the eternal city.

Class Format: discussion

Requirements/Evaluation: ungraded mapping assignments and short written assignments, 7- to 10-page research paper, midterm and final examinations

Prerequisites: none; open to Art majors as well as non-majors

Enrollment Limit: 30

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

ARTH 237 (S) Making Things Visible: Adventures in Documentary Work

Cross-listings: ENGL 237 ARTH 237 SOC 236 AMST 236

Secondary Cross-listing

Photography, like ethnography, is an art of looking carefully and taking notice. This course will explore the overlaps between documentary photography and field methods of social science, concentrating particularly on the genre in which the two intersect: the photo essay. The students will learn methods of visual narrative and storytelling, using techniques of interviewing, still photography, and video. Concurrently, we will explore a number of examples of investigative work that blend word and image. We will ask questions about the changing practices and expectations associated with the documentarian's role, and the evolving media in which such work can be presented. Lastly, we will discuss ethical questions that haunt documentary work, including issues of responsibility and politics of representation, as well as the perennial question of whether "objective representation" is even possible or desirable. Experience in photography and/or video is not required, but students will be expected to master basic technical skills in image acquisition and audio editing taught in a separate lab section. Students should also be prepared to interact extensively with people in the community and spend a significant time off campus doing fieldwork.

Requirements/Evaluation: full participation in discussions, weekly photographic assignments, a research journal, field materials, and an independent final project; in addition to substantial readings, students should be prepared to spend a significant time out of the classroom doing field work

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Anthropology and Sociology majors

ARTH 238 (S) Greek Art and the Gods

Cross-listings: CLAS 248 REL 216 ARTH 238

Primary Cross-listing

In the *Iliad*, when the god Apollo is visualized, it is as a man, angry in his heart, coming down from the peaks of Olympos, bow and quiver on his shoulders, the arrows clanging as the god moves, "like the coming of night," to bring dogs, horses, and men to their deaths. By the end of the Classical period, one statue of the archer god depicted him as a boy teasing a lizard. In this course, we will examine the development of the images the Greek gods and goddesses, from their superhuman engagement in the heroic world of epic, to their sometimes sublime artistic presence, complex religious function, and transformation into metaphors in aesthetic and philosophical thought. The course will cover the basic stylistic, iconographical, narrative, and ritual aspects of the gods and goddesses in ancient Greek culture. The course will address in detail influential artistic monuments, literary forms, and social phenomena, including the sculptures of Olympia and the Parthenon; divine corporeality in poetry; the theology of mortal-immortal relations; the cultural functions of visual representations of gods, and the continued interest in the gods long after the end of antiquity. Readings assignments will include selections from Homer, Hesiod, Sappho, Aeschylus, Euripides, Plato, Walter Burkert, Jean-Pierre Vernant, Nikolaus Himmelmann, Erika Simon, and Friedrich Nietzsche.

Class Format: discussion

Requirements/Evaluation: short writing assignments, midterm exam, final exam, final paper

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: preference will be given to pre-registered Art-History majors needing to fulfill the pre-1800 requirement; otherwise, the course is open to any interested student

ARTH 239 (F) Social Media in the Nineteenth Century: Prints and Pictorial Persuasion (WS)

This tutorial surveys the public lives of printed pictures in Europe between 1789 and 1914. Though the history of print extends well beyond these chronological limits, the so-called "long nineteenth century" witnessed the invention of new printmaking technologies. Larger audiences could now stay abreast of the period's revolutions, wars, and breakthroughs both in science and in fashion. Designed for students who have no prior experience studying art history, the course will begin with an overview of printmaking techniques before moving on to focused case studies that include pornographic political engravings made during the French Revolution, etchings created by the Spanish artist Francisco de Goya, and the manipulation of self and space made possible by early photography. We will analyze how these works were produced in multiples, circulated by publishers and dealers, and consumed by viewers across Europe. Readings in cultural theory, intellectual history, the history of technology, and art history will help students develop their own interdisciplinary approach to the print. Together we will ask: what makes this medium social? How is cultural critique made visible? What can print cultures teach us about today's practices of engaging with images digitally?

Requirements/Evaluation: alternating weekly essays (4-5 pages) and responses (2 pages) as well as discussion; three group meetings in WCMA, the Clark, and Chapin Library

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first- and second-year students

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: In this course, students will write a minimum of 20 pages broken up over several shorter analytical essays. Moreover, they will also write brief responses to their partners' essays in which they consider the craft of writing and composition. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

ARTH 240 (F) Histories, Communities, and Collections

What can the College's collections of documents, artifacts, art objects, natural history specimens, and rare books--whether housed in the Special Collections of the Library, Archives, or at the Williams College Museum of Art (WCMA)--teach us about our institutional past? How do we put that past into dialogue with our present? Planned specifically to engage with the WCMA's *The Field is the World*, an exhibition that investigates two invisible histories contained within collections here on campus, this course will approach the questions of histories, communities, and collections in two ways. First, in lectures we will survey the history of collecting in Europe and the United States from the eighteenth century up to critical reinterpretations by contemporary artists and consider how collecting was often tied to other endeavors like establishing national institutions, researching human variety, representing colonial expansion, or documenting missionary efforts. Second, in interactive sessions we will meet with curators, librarians, and guest speakers to look at objects first hand and to discuss the relationship between collecting and scholarship. Over the course of the semester we will examine the historical models of knowledge production and audience engendered by collections and their display. Moreover, we will work together to formulate new models of interpretation that address overlooked histories and engage with the current interests of our campus community.

Class Format: two 75-minute meetings per week; one in lecture format, the other in discussion format

Requirements/Evaluation: participation in interactive sessions, weekly written responses, one 3- to 4-page essay, one 8- to 10-page final project (proposal for an exhibition or a recontextualization)

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: for interactive sessions at WCMA and the Library space will be limited

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTH 243 (F) Chemical Intimacies (DPE)

Cross-listings: SCST 233 WGSS 233 STS 233 ARTH 243 ENGL 243

Secondary Cross-listing

This is a research seminar that understands human-chemical entanglement in relationship to environment, sexuality, geography, ecology, and capacity. It doubles as a research class in which students choose a project of chemical intimacy to investigate as their own through the course of the semester. In the first half, we will together read and discuss forms of human-chemical entanglement, whether a matter of industrial pollution, pharmaceutical use, habitual intoxication, gendered self-care or enhancement, or built environment; the goal is to achieve a broad sensibility for the concept as well as a familiarity with thinking biochemically and biopolitically about living bodies, while consistently registering questions of race, gender, class, sexuality, disability, and more. In the second half, each participant will choose and research a historically and geopolitically specific scenario of chemical entanglement, while 1) considering the political, legal, cultural, and labor contexts of the case; 2) exploring relationships between "actual" and "represented" (protest slogans or visual productions in the case of environmental justice activism, for example); 3) examining other research questions germane to their site of interest and their chosen discipline of study. We will take one field trip to a local site.

Requirements/Evaluation: individual research project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Women's, Gender and Sexuality Studies majors, Art History majors, English majors, Environmental Studies majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE)

Not offered current academic year

ARTH 244 (S) City, Anti-City, and Utopia: Town Planning from 1500 to 1800

The Italian Renaissance gave us our modern conception of the ideal city, whose geometrically regular form was both symbol and instrument of a perfectly ordered society. This alluring notion has preoccupied artists and theorists from Michelangelo and Thomas More to Albrecht Dürer and Christopher Wren; it achieved tangible form in such new capitals as St. Petersburg and Washington, D.C. But the West has remained characteristically ambivalent about the city, especially in the United States, an ambivalence reflected in persistent attempts to decentralize the city (Frank Lloyd Wright), to beautify it (the City Beautiful Movement), reshape it (Urban Renewal) or abandon it (suburbanization). This course looks at the roots of those movements, and the development of urban and anti-urban thought from the Renaissance to the Industrial Revolution. Topics include Renaissance fortification design, the colonial cities of the New World, the picturesquely landscaped English garden, and the separatist societies that sought to create communal utopias in the wilderness.

Requirements/Evaluation: one paper (10-20 pages) and a simple design project, weekly study questions and a final exam (weighted respectively at

30, 20, 20, and 30% of the grade)

Prerequisites: none

Enrollment Limit: 45

Enrollment Preferences: Art majors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: ARTH pre-1800 Courses

Not offered current academic year

ARTH 246 (F) Do You See What I See?!

We are all citizens of global visual culture, subject to a daily assault of images, artifacts, information and experiences. What we see and how we make meaning from it all depends on many variables--who we are, where we are and what we choose to look at. It also depends on what tools we bring to bear. This class is an opportunity to assemble a useful tool kit for the challenging visual environments of the 21st century. Image study will be central as we wander freely in space and time, but the goal is not to master a body of canonical examples. Rather, we will consider different ways of seeing, and practice transferable skills of viewing diverse materials. The approach will be comparative and interrogative; case studies will range from coinage to painting, from advertising to monumental sculpture. Along the way, we will consider what "art" is, what a visual culture is, and how different visual cultures might overlap in the global arena. Students will look, sketch and write throughout the semester, thereby exploring the entire spectrum of visuality from production to reception.

Class Format: discussion

Requirements/Evaluation: short writing assignments and class presentations

Prerequisites: none

Enrollment Limit: 19

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ARTH 249 (S) Introduction to Visual Cultures of Contact (DPE)

This introductory lecture course will survey the visual and material products of European contact with Asia, Oceania, Africa, and the Americas between 1500 and 1900. This period witnessed the establishment and loss of Spanish, English, and French colonies, a proliferation of exploratory voyages, and the abolition of the transatlantic slave trade. Some of our objects of study will be European in origin from well-known artists including Rubens, Velasquez, Reynolds, and Gauguin. In many cases we will be asking questions about circulation--whether we are looking at Tupi featherwork from Brazil brought to Europe, Flemish prints adapted by artists in Central and South America, or tattoos on the bodies of people traveling to and from Tahiti. Against the backdrop of these context-specific case studies, students will be asked to consider contact, colonialism, exchange, and appropriation more conceptually.

Requirements/Evaluation: midterm exam, final exam, five 1-page assignments, research paper (7-9 pages)

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: Art majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement in its investigation of the constructions of difference precipitated by intercultural contact and in its discussion of critical readings that will help students analyze the histories of difference and power. Students will not only learn about the past, but also work together to come up with methodological approaches that speak to the continuing effects of these histories.

ARTH 259 (S) Bilad al-Sudan and Beyond: Arts of the Afro-Islamic World

Cross-listings: ARAB 259 ARTH 259 AFR 259

Primary Cross-listing

From the Swahili stone houses of East Africa to the massive earth and timber mosques of the Sahel, the story of Islam in Africa is one of cultural and spiritual hybridity expressed through material form. In this course, students will explore how artistic forms and traditions in Africa have functioned as vehicles of access and integration for Islam, enabling it to assimilate itself with numerous African contexts towards becoming the dominant religious force on the continent. In addition, students will investigate how the forms, functions, and meanings of Afro-Islamic objects across the continent reflect not just one African Islam, but many different iterations, each shaped by the specific frameworks of its cultural context. The contemporary component of the course will examine how modernity in the form of globalization, technology, and Westernization has affected Afro-Islamic artistic traditions, and how these shifts reflect larger evolutions within understandings of Islam in Africa in the contemporary period.

Requirements/Evaluation: three reading response papers (2 pages each), class journal, a mid-term exam, and a final exam

Prerequisites: none, although an introductory course in art history or Islamic studies would be useful

Enrollment Limit: 25

Enrollment Preferences: students who have declared a major in Art History or Africana Studies

ARTH 262 (S) Modern Architecture

A century ago, the Modern Movement promised the most sweeping cultural transformation since the Renaissance. Architecture was only one lobe of a comprehensive movement that embraced literature and painting, music and theater, all aspiring to the same radical emancipation from traditional form and structures of authority. What happened? How and why did modern architecture abandon its utopian vision. Students will explore the major developments in Western architecture from 1900 to the present, and become familiar with its major figures: Wright, Gropius, Mies van der Rohe, Le Corbusier, Aalto, Kahn, Venturi, Gehry, Koolhaas, and Hadid. Students will learn a variety of skills: design a 1000-square foot vacation house; present to the class an analysis of a building; and organize a small exhibition of architectural treatises in the Chapin Library.

Requirements/Evaluation: two hour tests and a design project including drawings and a written statement

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: juniors and sophomores

ARTH 273 (S) The Arts of the Book in Asia**Cross-listings:** ARTH 273 ASST 273**Primary Cross-listing**

From palm leaf manuscripts to scrolls to Islamic codices, books have long served as vehicles of religious, cultural and artistic exchange in Asia. Owing both to their portability and status as finely crafted art objects, books have transmitted ideas across the continent, spreading courtly styles of painting

from China to India, esoteric Buddhist teachings from Kashmir to Tibet and Mongolia, as well as the Quranic arts of calligraphy and illumination from Islamic South Asia to Southeast Asia. This course will survey the interwoven history of book arts as it developed and disseminated across different regions of Asia. The course will also introduce students to the major art forms of the book, such as painting, calligraphy and illumination. The aim of the survey is to understand the book as object while also investigating its content and its larger cultural significance. A number of class meetings will take place in the Williams College Museum of Art where students will have the opportunity to study original artworks from the collection.

Requirements/Evaluation: 2 quizzes, 2 short response papers, a final project/paper based on museum objects, 1-hour in-class final exam

Prerequisites: none

ARTH 274 (S) Chinese Calligraphy: Theory and Practice

Cross-listings: ARTH 274 ARTS 274 ASST 274

Primary Cross-listing

Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and those whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos "beauty" + graphe "writing"). This course can be taken as an Art History, a Studio Art, or Asian Studies course.

Class Format: studio instruction

ARTH 281 (S) The Seeds of Divinity: Exploring Precolumbian Art & Civilization in a Museum Exhibit

Cross-listings: REL 280 ARTH 281 ANTH 281

Secondary Cross-listing

For all ancient civilizations, the gods were a powerful force, affecting all aspects of human lives and dominating ancient art. This course will explore concepts of divinity in five civilizations in Precolumbian Central America: Aztec, Maya, Zapotec, Teotihuacan, and Nayarit. The course examines how the broad concept of divinity is materialized in everyday life. We will query how the human body is used as the prism through which concepts about humanity, the human soul and the supernatural are perceived and depicted in the art of these civilizations. This is a project based course, and each student will study one or more art objects from these five civilizations, and consider how these objects could be presented in a museum exhibit.

ARTH 284 (F) The Postwar Avant-Gardes

Artistic discourse in the Western hemisphere dramatically changed course in the wake of the Second World War. The mass trauma inflicted by the war prompted artists and critics throughout the region to reassess the role and potential of art in society. But the war's displacement of communities also displaced the centers for artistic activity, and avant-garde practices soon expanded vigorously throughout the Americas. Through comparative studies, this course will analyze the artistic avant-gardes that emerged simultaneously in the United States and Latin America after 1945. We will place these myriad practices in dialogue, to elucidate the complexity, richness, and vitality of artistic practices in the postwar era.

Requirements/Evaluation: midterm exam, final exam, one short 2-page writing assignment, one 6- to 8-page research paper

Prerequisites: none

ARTH 301 (F)(S) Methods of Art History (WS)

This course on the methods and historiography of art history offers art-history majors an overview of the discipline since the late 18th century. The course surveys influential definitions of the discipline, the evolving tasks it has set itself, and the methods it has developed for implementing and executing them. Works of art will inevitably enter into our discussions, but the main objects of study will be texts about art as well as texts about methods for an historical study of art. Topics include: style and periodization; iconography, narratology, and phenomenology; the social functions of images and the social history of art; art and the material world; art, gender, and sexuality; and art as a global phenomenon.

Class Format: discussion

Requirements/Evaluation: six 1,000-word analytical essays plus one 2,000-word writing project

Prerequisites: any 100-level ARTH course or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Art History majors and required of them

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students submit one 1,000-word essay every other week, for a total of six short essays. In addition, they submit a 2,000 writing project at the end of term. The purpose of the essays is to analyze the arguments and rhetoric of influential art-historical scholarship and criticism. The subject of the course, then, is how to write as an art historian. We discuss not only the content of the essays we read and write but also the form, both outside of class in office hours and also in class.

ARTH 303 (S) Museums: History and Practice

Cross-listings: LEAD 301 ARTH 303 ARTH 501

Secondary Cross-listing

Art museums not only express the political, economic and cultural values of their period of formation, but the evolution of those values that have resulted in the institutions of our time. The seminar will focus on museums past and present internationally as it also considers the future of museums, doing so as it examines governance and management policies and practices, the role of architecture and installation in interpretation and experience, guidelines in the accessioning and deaccessioning works of art, and issues associated with the repatriation and restitution of cultural property. The course will consider current trends in exhibition, public education and other programming in art museums that range in size and type from the "encyclopedic" or "universal" to newly established contemporary arts institutions and alternative spaces. Class discussions will have a special focus on how museums strive to balance their scholarly and artistic roles with their civic and social responsibilities doing so while maintaining financial stability in the increasingly market-driven, metric-conscious, not-for-profit environment of our time.

Requirements/Evaluation: oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

Prerequisites: undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

Enrollment Limit: 10

Enrollment Preferences: graduate students, then senior art history majors, then other undergraduates

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the seminar requirement for the undergraduate Art History major

Distributions: (D1)

ARTH 305 (F) Queer Art, Queer Archives

Focusing on a number of recent museum exhibitions dedicated to queer art and artists in the U.S. and abroad, this course critically examines the emergence of queer art histories. How are queer art histories being written and presented? And how is queer art being collected and preserved? We will explore these questions (and others) through the lens of the archive and the research and collecting practices associated with archives. As a class, we will critically examine the role, limits, and possibilities of archives in art historical research, curatorial practice, and museum exhibitions. Course readings will consider various historical, theoretical, and methodological approaches to the archive and curatorial practice. We will also consider artists' archives and what has been described as an "archival impulse" in contemporary art. This course is being developed in conjunction with Williams College Museum of Art's presentation of the traveling exhibition Axis Mundo: Queer Networks in Chicano L.A., the first historical exhibition on queer Latinx art. Select assignments and student presentations will encourage first-hand experience with artworks in the exhibition.

Requirements/Evaluation: multiple short writing and bibliographic exercises; regular oral presentations; research paper (18-20 pages) written in stages and revised and expanded over the semester

Prerequisites: ARTH 102 or permission of instructor; GRADART exempt from ARTH 102 prerequisite

Enrollment Limit: none

Enrollment Preferences: senior majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTH 308 (S) African Art and the Western Museum (DPE) (WS)

Cross-listings: AFR 369 ARTH 308

Primary Cross-listing

This tutorial provides a focused study of the issues associated with the exhibition of African objects within Western institutions from the formative period of the practice in the early 19th century to the modern era. Covering topics ranging from early collection and display methodologies to exhibition-based practice in the contemporary digital era, this tutorial will provide an opportunity for robust discussion about the interactions that have occurred between the arts of Africa and the Western museum over the lengthy history of their engagement. Students will investigate the nature of the cross-cultural dialogues taking place and the politics of display at work in regional museum spaces that display African art towards fleshing out how exhibitions function through the strategic organization and display of objects. In other words, students will explore how the dialogues created between objects and individuals often speak to the voices and agendas that collide, collaborate, and even compete with each other within the environment of the museum.

Requirements/Evaluation: field trips to area museums, targeted writing assignments 5-7 pages in length, and peer response papers (two of each type per month)

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Art History and African Studies Majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

AFR 369 (D2) ARTH 308 (D1)

Writing Skills Notes: Targeted bi-monthly writing assignments (5-7 pages in length) and bi-monthly peer response papers (2 pages in length). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Explores issues of 'authentic' representation as it applies to African artifacts displayed within the contexts of Western art museums. Through discussions of cultural capital, rights of seeing, and the politics of representation, students analyze how the meaning of African 'art' has been dictated by a Western museum culture and how one can disrupt this hegemony through strategic exhibition and display practices.

ARTH 314 (F) Emperors of Heaven and Earth: Mughal Power and Art in India, 1525-1707

Cross-listings: ARTH 314 HIST 314 ASST 314

Secondary Cross-listing

The Mughal dynasty ruled over most of northern India from the 16th to the 19th centuries. The Mughal Empire was the grandest and longest to rule the Indian subcontinent--much larger than any European empire in the early modern world--and it continued to have a lasting impact on South Asia. Mughals established a centralized administration with a vast complex of personnel, money and information networks. Styling themselves as 'Emperors of Heaven and Earth', the Mughal kings were also globally viewed as political innovators and unprecedented patrons of art. Their visual practices were as much a part of their imperial ideologies as their administrative and military measures. This co-taught course combines the disciplines of Art History and History to explore the intricate workings of Mughal politics and ideologies. The first of its kind to bring an interdisciplinary approach to teaching

South Asia at Williams, the course asks: How did the Mughals sustain their empire for three centuries? How did they use art and politics to rule over diverse and largely non-Muslim populations? How did these Muslim imperial patrons merge Persian and Central Asian cultural values with preexisting Indian forms of administrative and artistic expression? How does Mughal culture continue to shape the South Asian imagination today? Readings will include a variety of visual and literary texts. We will delve deep into the world of biographies, travel accounts, poetry, architecture and a plethora of artworks. Students will take a hands-on approach to Mughal painting through several visits to the WCMA and a dedicated Object Lab. The primary aim of this co-taught course is to introduce students to a multifaceted picture of one of the greatest empires in pre-colonial world history. Another goal is to familiarize them with a wide range of visual and written primary sources and develop a vocabulary for 'reading' these.

Requirements/Evaluation: class participation and weekly responses to readings, 4-5 short papers and a final paper

Prerequisites: students who have previously taken HIST312 will not be permitted to take this course; no other prerequisites

Enrollment Limit: none

Enrollment Preferences: graduating seniors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ARTH 327 (F) Acquiring Art: Selecting and Purchasing Objects For WCMA

Cross-listings: ECON 227 ARTH 327 ARTH 527

Primary Cross-listing

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Requirements/Evaluation: three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy

Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Fall 2019

ARTH 330 (S) Michelangelo: Biography, Mythology, and the History of Art

One might argue that Michelangelo's enduring fame, and his preeminence in the European art historical canon, is as much a product of his artistic persona as his artistic achievement. Indeed, the classic image of the artist as a brooding, tortured genius of unstoppable creative force finds its roots in the Italian Renaissance, and specifically in the fascinating biography--and mythology--of Michelangelo. With a life and career more fully documented than those of any western artist to precede him, Michelangelo provides the foundations for a triangulation of person-persona-artistic production that has a modern ring. But what are the limits of our knowledge, and what are the boundaries of interpretation? And how might we approach the study of an artistic self when that self is, also, a work of art? In this course, students will become well-acquainted with the life and work of Michelangelo, giving critical attention to the connection between the artist and his work. We will investigate, in particular, the practice of interpreting his work according to his philosophical outlook, political convictions, religious beliefs, sexual desire, and more. While this course will bring us deep into the life and work of a single artist, one of its goals is to generate ideas about the very act of biographically-based art historical interpretation. How can thinking carefully about Michelangelo reshape our own thinking about art historical practice?

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on the quality and improvement of written work (5 weekly papers and 5 response papers, and a final written exercise addressing major themes of the tutorial), and oral dialogue

Prerequisites: one ARTH course of any level; open to sophomores, juniors, and seniors

Enrollment Limit: 10

Enrollment Preferences: none

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ARTH 332 (F) Abstraction in Action: Global Modern and Contemporary Art (WS)

Abstraction, be it gestural or geometrical, was a protagonist in the story of global modernisms and continues to be a powerful visual language in contemporary art. The term "abstraction" may first appear straightforward, but its associations are quite complex: in varying historical contexts, abstraction has signaled formalist rupture, cultural co-optation, revolutionary politics, as well as racial, feminist, and queer critique. This object-oriented course will delve deeply into non-representation in global modern and contemporary art; we will supplement our careful study of artworks with primary documents, as well as with canonical theoretical frameworks and the reassessments that have sought to complicate these. This seminar is organized into two weekly sessions--a lecture and a discussion--to introduce key concepts and issues and to allow for ample group dialogue on these. Ultimately, the course seeks to revise and expand the cartographies and ontologies of abstraction in the 20th and 21st centuries. As such, it welcomes students with an interest in modern and contemporary art, yet does not require previous coursework in either.

Class Format: biweekly seminar, with one lecture session and one discussion session

Requirements/Evaluation: participation, weekly assignments, final 12- to 15-page paper written in stages throughout the semester

Prerequisites: must have previously taken one Art History course in any area

Enrollment Limit: 19

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (WS)

Writing Skills Notes: Students will complete short written assignments and will prepare a final paper in three stages throughout the semester. Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Fall 2019

ARTH 335 (S) Uncovering Williams

Cross-listings: ARTH 335 AMST 335

Secondary Cross-listing

Sparked by current controversies around visual representations at Williams, this course--a joint effort of the Williams College Museum of Art and the American Studies Program--interrogates the history of the college and its relationship to land, people, architecture, and artifacts. Students in this course will examine the visual and material culture of Williams and the land it occupies to uncover how the long and complex history of the college reverberates in the spaces and places students, faculty, and staff traverse daily. We take seriously that objects and environments are not neutral nor are the atmospheres that they reflect and produce. Our interdisciplinary approach draws from the methods and theories of American studies, art history, material culture studies, critical race theory, gender studies, and eco-criticism. Topics of discussion may include: the foundation of the college and displacement of native populations; buildings, objects, and monuments linked to Williams' evangelical history and the role of missionaries in American imperialism; the symbolic meaning of the varied architectural styles at the college; and the visibility/invisibility of the college's relationship to slavery and Abolitionism.

Requirements/Evaluation: participation (discussion, GLOW posts), 2-3 short papers, one 5- to 6-page midterm paper, and a 10- to 12-page final project (either a research paper or a substantial arts-type project) and bibliography

Prerequisites: sophomore standing or permission of the instructor

Enrollment Limit: 19

Enrollment Preferences: AMST majors

ARTH 337 (S) Visual Politics

Cross-listings: ARTH 337 PSCI 337

Secondary Cross-listing

Even casual observers know that appearances matter politically and that the saturation of politics by visual technologies, media, and images has reached unprecedented levels. Yet the visual dimensions of political life are at best peripheral topics in contemporary political science and political theory. This seminar explores how our understanding of politics and political theory might change if visibility were made central to our inquiries. Treating the visual as a site of power and struggle, order and change, we will examine not only how political institutions and conflicts shape what images people see and how they make sense of them but also how the political field itself is visually constructed. Through these explorations, which will consider a wide variety of visual artifacts and practices (from 17th century paintings to the optical systems of military drones and contemporary forms of surveillance), we will also take up fundamental theoretical questions about the place of the senses in political life. Readings may include excerpts from ancient and modern theorists, but our primary focus will be contemporary and will bring political theory into conversation with other fields, particularly art history and visual studies but also film and media studies, psychoanalysis, cognitive science, and STS. Possible authors include Arendt, Bal, Belting, Benjamin, Browne, Buck-Morss, Butler, Clark, Connolly, Crary, Deleuze, Fanon, Foucault, Freedberg, Garland-Thompson, Hobbes, Kittler, Machiavelli, Mercer, Mitchell, Mulvey, Plato, Rancière, Sartre, Virilio, Warburg, and Zeki.

Requirements/Evaluation: regular, engaged class participation, several Glow posts, and three 7- to 8-page papers

Prerequisites: at least one prior course in political theory, cultural theory, visual studies, or art history; or permission of instructor

Enrollment Limit: 19

Enrollment Preferences: Political Science and Art History majors (including students in the grad program); then qualified students from all disciplines welcome, space permitting

Expected Class Size: 19

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTH 338 (S) The Romantic Revolution: Art and Experience in 19th-Century Europe

This course explores major moments in nineteenth-century European painting and sculpture in relation to sweeping transformations across multiple dimensions of human experience, including aesthetics, philosophy, psychology, politics, and beyond. Key artists include Friedrich, Delacroix Blake, Turner, Courbet, and many others. In each case we will interrogate their work across multiple art historical and intellectual perspectives, at once with a view to unveiling larger developments, but also to make the case for works of art as powerful bearers of meaning, and shapers of experience, in and of themselves. Assignments keyed to introducing students to a range of art historical methods and modes of argument and interpretation.

Class Format: combination lecture and discussion

Requirements/Evaluation: two research papers approximately 10 pages each; final exam; additional short reports

Prerequisites: none

Enrollment Limit: 25

ARTH 342 (S) Monuments and Miniatures: Architecture and Painting in India (WS)

Cross-listings: ASST 342 ARTH 342

Primary Cross-listing

This tutorial is designed to provide an in-depth comparative study of two of the most important cultural expressions in the history of the Indian Subcontinent: Architecture and Painting. From sprawling pleasure gardens and palaces to iconic tomb complexes and temples, the built environment has served various cultural, religious and communal functions in India. Intimate in scale, and made primarily for an elite audience, miniature painting has also performed a key role in preserving and transmitting cultural values over time and space. Despite obvious differences in scale and scope, architectural monuments and miniature paintings produced for manuscripts and albums reflect similar creative impulses. They are also often linked through their relationship to text, and can be interpreted through contemporaneous literature. In the tutorial, students will be asked to make careful analyses of the iconography, symbolism and historical frameworks of monumental architecture and miniature painting in India. Original literature in translation and recent scholarly essays will help provide the framework for considering the artworks from the perspective of their patrons, creators and audiences. We will also consider the shifting roles and meanings of these artworks through the ages. For example, what was the original symbolism of the Taj Mahal, and how has it become a highly contested, political space in contemporary India? How did grand picture albums from the seventeenth century, made for some of the most powerful emperors in global history, function as tools for political self-fashioning? And what do their modern reception as part of Western museum collections tell us about the transformation of India during the British colonial period?

Requirements/Evaluation: bi-weekly writing assignments 5-7 pages in length, short peer response papers, field trips to local museums

Prerequisites: none, open to all students

Enrollment Limit: 10

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

ARTH 344 (F) Pacific-New England Material Histories (DPE)

Cross-listings: AMST 344 ARTH 344

Primary Cross-listing

This course looks at the indigenous, colonial, maritime, and missionary histories that connect New England to island nations in the Pacific in the eighteenth and nineteenth centuries. Rather than thinking of Hawai'i and Massachusetts merely as opposite ends of United States colonial expansion, we will focus on the heterogeneous cast of historical actors—from queens to whalers—who interacted in these places and generated new forms in architecture, painting, printmaking, the decorative arts, textiles, and publishing. Particular attention will be paid to the politics of Hawaiian visual culture and the histories of Williams alumni in Hawai'i, but the readings, discussions, and student papers will not be limited exclusively to those subjects. Our time together will be split between lecture and class discussion, with some meetings devoted to archival research and object-based case studies in collections on campus. As a group, we will establish a corpus of objects and conceptual frameworks for analyzing what "Pacific-New England" means and how that might challenge our existing assumptions about regional art histories. Finally, we will experiment as a class with the best ways to convey what we've learned through our collective inquiry—whether in different forms of writing or by workshopping more creative approaches.

Requirements/Evaluation: participation in discussion, two short papers, final research project, and presentation; note: one required field trip, scheduled in consultation with the students

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

ARTH 348 (S) Women, Men and Other Animals (DPE)

Cross-listings: ARTH 348 ENGL 348 WGSS 348 SCST 348 STS 348

Secondary Cross-listing

In this seminar, we will together learn to be "animal critics." We will explore ways in which human groups and interests, particularly in the United States, have both attached and divorced themselves from other animals, considering such axes as gender, race, ability, and sexuality as key definitional foils for human engagements with animality. What are the "uses" of "animals" for "us," and precisely who is this "us"? How and when are some willing to see themselves as animal—indeed, under what political conditions do they embrace it? What is the history of unique, often asymmetric, interdependencies between human animals and nonhuman animals? How do actual lives of humans and non-human animals merge and clash with the rhetorics and visualities of human animality? We will examine both "everyday" animality and the forms of animality that stand out only today in retrospect, in their exceptionality, or upon reflecting on structures of privilege. We will build a critical animal studies vocabulary from a range of readings in science, philosophy, art, feminism, indigenous studies, critical race, geography, fiction, film, rhetoric, history, activist movements, disability studies, postcolonial studies, and examine both visual and narrative cultural production.

ARTH 358 (S) Latinx Installation and Site-Specific Art

Cross-listings: ARTH 358 LATS 358

Secondary Cross-listing

This course will explore the various forms of installation and site-specific artworks created by Latinx artists for both museums and public space. We will examine the ways in which Latinx artists have used space as a material in the production of artworks and how this impacts the works' meanings and the viewer's experience. Within the context of U.S. Latinx culture and history, we will connect notions of space with ideas about cultural citizenship, civil rights, and social justice. A variety of art forms will be studied, from traditional to experimental, including murals, sculpture, performance, video, and several multimedia, interactive, or participatory projects. While establishing a historical lineage and theoretical frameworks for analyzing this growing genre, we will pay particular attention to how these works engage urban space and often challenge the institutional assumptions of museums and curatorial practice. Likewise, we will examine the important debates associated with various public art and museum installation controversies.

Class Format: discussion

ARTH 363 Space into Place: Composing Modernity through Maps and Landscape Paintings, 1500-1900

Colonial expansion and growing trade networks created new needs for picturing the globe in early modern Europe. In other words, globalization required a world broken down into concrete units that could be known and recognized. The artistic and the cartographic were two fundamental modes of representing space. What we might learn by bringing landscape paintings and maps together in dialogue? What are the aesthetic expectations of each genre? How were subject, scale, perspective, and proportion determined and by whom? Moving beyond a binary opposition of science versus art, we will study conventions and changes in mapmaking and landscape painting from the sixteenth to nineteenth centuries to analyze shifting conceptions of national identity, modernity, and the relation of humans to nature. Course lectures and an interdisciplinary array of readings will provide historical and conceptual support for object-based discussions in the Williams College Museum of Art, the Chapin Rare Book Library, and at the Clark Art Institute.

Class Format: this course will meet twice per week, the first meeting will be in the format of a lecture, the second will be a seminar-style discussion

Requirements/Evaluation: two short papers (4-5 pages), one longer final paper (10-12 pages), presentations, and participation in discussion

ARTH 367 (F) Documentary Fictions

Cross-listings: ARTH 367 ENGL 367

Secondary Cross-listing

The first movies excited viewers not by telling stories, but by reproducing the world: a dancer's billowing skirts, the sight of Niagara Falls, the arrival of a train at the station--such vignettes felt viscerally real. Our fascination with documentaries derives, in large part, from the way seemingly transparent images are woven into narratives full of hidden assumptions. Every viewer of the Zapruder film sees the same thing: President Kennedy, struck by a bullet, lurches forward. But what that might mean--whether it points toward a lone gunman or a conspiracy, toward the Soviet Union or the CIA--still remains uncertain. We'll explore the tensions between image and story, evidence and context, in films ranging from Fred Ott's "Sneeze" (1894) to Josh Oppenheimer's *The Act of Killing* (2012), concluding with a look at the effects of contemporary image technologies on our sense of personal and national identity. Readings for the course will be drawn from narrative theory, epistemology, and cultural theory, as framed by writers including Trinh Minh-ha, Christian Metz, and Bill Nichols.

Requirements/Evaluation: four written and multimedia exercises (1-2 pages each), two essays (six and twelve pages), and a willingness to experiment with formats

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam, or permission of the instructor

Enrollment Limit: 25

Enrollment Preferences: English majors; Art and Comparative Literature majors; students with experience making video

ARTH 376 (S) Zen Buddhist Visual Culture: The Path to Nirvana

Cross-listings: ASST 376 ARTH 376 REL 252

Primary Cross-listing

This course is about the ways in which images are produced, viewed, and used in the Zen Buddhist tradition. It explores the various ways in which visual culture is a key part of Zen Buddhist teaching in China and Japan. In this class we will look at both high art and popular expressions of Zen Buddhist visual culture. Topics of interest include: 1) Buddhist image making and icon worship; 2) Gardens; 3) tearooms, tea ceremony and tea bowls; 4) The Zen temples Ryoan-ji, Daisen-in, and Daitoku-ji; 5) The political function of Zen and its art in Japan's samurai culture; 6) The popular Zen Buddhist cult of Bodhisattva Avalokiteshvara and his gender transformation; and 7) Daruma (Bodhidharma) imagery in popular culture. This course is a CRAAS (critical reasoning and analytical skills) course. The class format also offers students opportunities to practice public speaking and writing

skills.

Class Format: class discussion

Requirements/Evaluation: class discussions and participation; oral presentations, short papers; and a research paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: sophomores, juniors, and seniors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 400 (F) Clark Visiting Professor Seminar: writing TO art

Cross-listings: ARTH 400 ARTH 500

Secondary Cross-listing

In this seminar, we will think about writing TO art and for it, rather than merely about it; but first, we will think about how we think. I intend that we read essays and stories that confront the ways in which we think. That might sound abstract, but in fact it is rather concrete: we bring to works of art our predilections or tastes, psychologies, politics, habits of mind, in short, our subjectivity. We are not blank slates, art is not, either. Art is layered with its own history, and histories, criticisms, reactions, rejections, movements. Art is not static. How do we writers move with art, confront our reactions, and ask why we have them. To me, one of the most important aspects in writing is judging one's own reactions, for instance, in the choice of words. To that end, that of confronting our thinking, we will read, among other things: Adorno's "Coming to Terms with the Past;" Joan Scott's "The Evidence of Experience;" Kafka's "Josephine the Mouse Singer and the Mouse People," and "The Hunger Artist;" Freud's "Notes on War and Death," and Craig Owens', "On Speaking to Others" and "Feminism and Post-Modernism." We will also read some of my anti-art art criticism, or what I call stories written in relationship to art. Some of these employ fictions, some not. We will read a few of my "Madame Realism" pieces, as well as essays on Warhol and some other contemporary artists. We will do some writing. We will visit with or be visited by critics and/or artists. We will look at art in galleries, and write about what we have seen.

Requirements/Evaluation: writing assignments, participation

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: graduate students get preference; places for 8 undergraduate and 8 graduate students assured

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

ARTH 403 (S) Clark Visiting Professor Seminar: Ethics of Abstraction

Cross-listings: ARTH 403 ARTH 503 ARTH 400 ARTH 500

Secondary Cross-listing

The course will interrogate abstraction as a strategy in 20th and 21st century art around the globe, and its manifold implications for political projects of being, seeing, and knowing together. We will look at how various artists turn to non-representation as a means for thinking differently about issues as divergent as flatness, vision, progress, decay, identity, violence, solidarity, negation, and protest. How might we read acts of judgment performed by

abstract artists, i.e., separating what is alien from that which is intrinsic, as ethically activated? How do we account for the ways abstraction has figured centrally not only in modernist art histories, but also in economic and political theories (as in the abstraction of use into exchange value)? How, too, have representation and figuration (as ostensible opposites of abstraction) been positioned as ethical tactics? We will take an object-oriented approach that foregrounds the complexity of movement between "thing" and abstract "effect," examining divergent valences from postwar abstract painting up to contemporary abstraction as it supports coded meanings, eccentricities, and alternative (feminist, queer, marginal, racialized) formations.

Requirements/Evaluation: research paper, class presentations

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students; places for 8 undergraduate and 8 graduate students assured

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTH 404 (F) The Enemies of Impressionism, 1870-1900

This class explores European and international painting and sculpture of the last quarter of the nineteenth-century, particularly the work of artists once famous in their day but whose reputations collapsed with the rise of Impressionism and Modernism. Once dismissed as trivializing, sensationalizing, politically suspect, kitsch, and simply "bad"-- much of this art has attracted new attention and enthusiasm in recent years. Focus on aesthetic theory, narrative, cinema, and -- most of all -- viewer experience. Artists include Gérôme, Bouguereau, Alma-Tadema, and many others.

Requirements/Evaluation: readings and research paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: none

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ARTH 405 (F) Seminar in Architectural Criticism

How does one judge a building? According to its structural efficiency or its aesthetic qualities? Its social responsibility--or just its pizzazz? Depending on the building, and the critic, any of these questions might be pertinent, or impertinent. This seminar explores architectural criticism, that curious genre between literature and architecture, and looks at its history, nature and function. We will read and discuss classic reviews by historical and contemporary critics as John Ruskin, Mariana van Rensselaer, Lewis Mumford, Ada Louise Huxtable and Herbert Muschamp. Insights gained from these discussions will be applied by students to writing their own reviews, which will likewise be discussed in class. Early assignments will concentrate on mechanics: how to describe a building vividly and accurately, how to balance description and interpretation judiciously, how to compare. Subsequent ones will be more synthetic, encouraging students to write bold, lively and critical essays. The ultimate goal is to develop a distinctive and effective voice, and to gain a better understanding of the nature of criticism in general.

Requirements/Evaluation: students will write and revise six papers (5-7 pages) during the semester

Prerequisites: any 100 level ARTH course or permission of instructor

Enrollment Limit: 11

Enrollment Preferences: junior Art History majors

Expected Class Size: 11

Grading: yes pass/fail option, yes fifth course option

ARTH 408 (F) Modernism in Brazil (DPE)

Cross-listings: ARTH 408 COMP 408

Primary Cross-listing

"Modernism" in art: when we think about it, we may not readily think of Brazil. But Brazil was in fact a vibrant battleground of ideas around what it was to be innovative, modern, and avant-garde. Between 1920 and 1945, artists, poets, and critics in the metropolises of São Paulo and Rio de Janeiro actively debated on the creation, and potential, of a uniquely Brazilian modernist aesthetic that would stand on par with the European avant-gardes. But what did "Brazilianness" mean to these intellectuals? What role did gender and race relations--indigeneity in particular--play in the construction of this aesthetic? How did the necessities and demands of the national context shape these modernist practices? This seminar will take a deep dive in this fascinatingly contradictory moment in Brazil, a chapter that would become a fundamental reference to Brazilian artists in the 1960s and even to this day. In addition to detailed analyses of artworks, we will read manifestos, novels, and criticism from this period, and the most up to date secondary interpretive texts.

Requirements/Evaluation: participation, short presentations, four 2-page writing assignments, final 12-page research paper

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: none

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 408 (D1) COMP 408 (D1)

Difference, Power, and Equity Notes: This course fulfills DPE requirements through textual, visual, and historical analyses that explore the cultural biases and geopolitical forces that have restricted the exposure of Brazilian modernism in Western art history. The course also centers on contextualizing the artistic practices of Brazilian modernism and analyzing them in relation to race, gender, and class dynamics, and to issues of colonialism, nationalism, and revolutionary politics.

Not offered current academic year

ARTH 412 (S) The Politics of Aesthetics: Collaboration and Participation in Contemporary Art

The social turn is a hallmark of contemporary art, as artists since the 1960s turned from the art object toward dynamic exchanges with the public, from sole author to collaborative engagement. This seminar provides a theoretical framework to historicize as well as to critically analyze the promise and pitfalls of collaborative works, of favoring active participants over passive spectators, and of the meteoric rise of what is now commonly known as "social practice" art. A wide range of case studies from around the world will also allow us to delve into the intersections and productive tensions between aesthetics and politics, or between art and life.

Requirements/Evaluation: discussion questions, weekly presentations on either a text or an artist, three response papers, final 12- to 15-page paper

Prerequisites: must have previously taken an Art History course

Enrollment Limit: 10

Enrollment Preferences: none

Expected Class Size: 7

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

ARTH 416 (S) Senior Seminar: The Art of Minor Resistance: Advanced Readings in Race, Gender, Performance

Cross-listings: THEA 416 COMP 404 WGSS 416 ARTH 416

Secondary Cross-listing

This seminar will study stagings and aesthetic theories of dissent in feminist, queer, anti-colonial, and anti-racist performance. An attunement to performance and to the minor is also a turn toward minoritarian knowledges and lifeworlds. Of interest will be modes of sensing and relating that are not often legible as political--including aesthetics of opacity, quiet, disaffection, aloofness, and inscrutability--but could be understood as critiques of political recognition. Performance is a capacious rubric in this class that will include performance art, social media, photography, music videos, poetry, street protest, and everyday life. Students will learn to describe, interpret, and theorize performance through discussion, writing, and creative form.

Requirements/Evaluation: in-class discussion, partner presentation, weekly reading responses, final project

Prerequisites: WGSS 101

Enrollment Limit: 15

Enrollment Preferences: WGSS majors, students with previous performance studies coursework

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

ARTH 420 (S) Architecture and Sustainability in a Global World

Cross-listings: GBST 420 ARTH 420 ENVI 420 EXPR 420

Primary Cross-listing

What does it mean to create a sustainable built environment? What do such environments look like? Do they look the same for different people across different times and spaces? This course takes these questions as starting points in exploring the concept of architectural sustainability, defined as "minimizing the negative impact of built form on the surrounding landscape," and how this concept can be interpreted not only from an environmental point of view, but from cultural, political, and social perspectives as well. Over the course of the class, students will explore different conceptualizations of sustainability and how these conceptualizations take form in built environments in response to the cultural identities, political agendas, social norms, gender roles, and religious values circulating in society at any given moment. Students will also travel to South Africa during Spring Break to participate in a township sustainability project. In recognizing the relationship between the way things are constructed (technique of assembly, technology, materials, process) and the deeper meanings behind the structural languages deployed, students will come to understand sustainability as a fundamentally context-specific ideal, and its manifestation within the architectural environment as a mode of producing dialogues about the anticipated futures of both cultural and architectural worlds.

Class Format: with travel component

Requirements/Evaluation: response papers on class readings (2 pages), leading class discussions, spring break trip to South Africa, and final project/paper (15-20 pages) and presentation

Prerequisites: none, although a course in art/architectural history would be advantageous; registered students will also be required to submit an online application provided by the instructor before enrollment in the course is confirmed

Enrollment Limit: 6

Enrollment Preferences: Art History majors, Environmental Studies majors

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: travel funds will be provided by a Class of 1963 Sustainability development grant

Distributions: (D1)

ARTH 422 (S) Art, Architecture, and Poetry: Islamic Devotional Culture in South Asia

Cross-listings: REL 422 COMP 422 ARTH 422

Primary Cross-listing

How have scholars interpreted and classified terms such as "Islamic art" and "Muslim culture," and how have these classifications affected the interpretation of the arts in South Asia? There are different points of view regarding what constitutes as "Islamic" art and culture. Is an imperial wine cup with "God is Great" inscribed on it an "Islamic" object? How is an erotic epic narrating the romance of a Hindu prince understood as embodying the principles of Muslim devotion? This interdisciplinary seminar, focusing on South Asian Muslim devotional culture as articulated through the material culture, the arts of the book, architecture, and poetry, will navigate these questions from two perspectives. The first is to understand how Muslim devotional cultural expression in South Asia circumscribes and interprets itself. The second viewpoint is that of scholarship and the various interpretive voices that have framed the field over the last century.

Requirements/Evaluation: class participation, 2-page response papers on class readings, leading class discussion, final 15-20-page research paper

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Art Majors, and then to students of any major interested in art and culture of Islam

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTH 424 (S) Heaven's Gate: The Romanesque Sculpted Portal and the Creation of Sacred Space Through Art

Cross-listings: ARTH 523 ARTH 424

Primary Cross-listing

During the course of the eleventh century, the designers of European churches fashioned a new architectural language that we now label "Romanesque." One of the most innovative and dramatic aspects of this new language was its assimilation of monumental sculpture, absent in Europe since the fifth century. The focus of attention in this regard was the portal, which marked the threshold between the profane realm of the outside world and the sacred space of the church. Often characterized as the "marquee of the Middle Ages," the Romanesque sculpted portal, with its startling juxtaposition of the spiritual and the physical, of ecstatic visions of the heavenly realm and writhing, biting monsters, constitutes one of the true high-points of creativity in medieval art. Through the lens of modern scholarship, this seminar will investigate the antecedents and origins of the Romanesque sculpted portal and examine in detail its most renowned manifestations. Emphasis will be placed on understanding these often complex sculptural schemes within their original functional and material contexts, especially in terms of how they helped to create the sacred space of the church behind. Students will then have the opportunity to develop their own research projects, informed by what we have learned in the seminar, but focused on an example of sacred threshold art of their own choosing.

Requirements/Evaluation: class discussion/participation, oral presentation, and a 15- to 20-page research paper

ARTH 430 (F) Aesthetics and Human Variety: European Representations of Oceania

Using European representations of the inhabitants of Oceania as the primary materials of our investigation, this seminar will explore the connections to be made among theories of beauty, practices of art making, and the construction of race as a scientific concept in the second half of the eighteenth century and the beginning of the nineteenth century. In Europe, this was a period that gave rise to aesthetics as a branch of philosophy, to several theories of the origins of human difference, to debates over the abolition of slavery, and to no fewer than fifteen expeditions to the Pacific Ocean. This course will investigate the crucial role that pictures played in all of these developments. Though students will not be required to write their research papers on pictures of Oceania, they should consider the central questions of the course: What purposes do the various conceptions of race serve? What are the aesthetic assumptions made by theorists of race? How do models of making art influence European ideas about foreigners? How do the pictures of foreign peoples impact the construction of race?

Requirements/Evaluation: class discussion, weekly reading responses, an oral presentation, and a 15- to 20-page research paper

Prerequisites: none

Enrollment Limit: 15

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ARTH 434 (S) Renaissance Time

Time defines the Renaissance, whether framed as the "rebirth" of the past or the foundation of the present. Either way, past historians molded this period with time as their medium, fixing the Renaissance at the dynamic center of history. Flowing from historiographic foundations, this course will follow diverse art historical streams of Renaissance time to the present. How do Renaissance images play along by pointing to times outside of their frames? What are the implications for the historical worlds-the contexts-we build around objects in order to understand them? How do we navigate the role our own perspectives, interests, and desires play in the form we give to the past? How has time shaped the historic hegemonies of geographic place, and how might we re-deploy temporal strategies to dislodge them? This is a Renaissance course that explores topics fundamental to the broader history of art, and one that ranges widely in focus from the theoretical to the concrete. We will base our discussions both on class readings and on object-based assignments in local museums designed to explore the living relationships we forge with the art of cultures long since gone. Accordingly, students will spend (lots of) time with Renaissance works at the Clark Art Institute, and work with/at WCMA to shape new narratives that bridge past and present while honoring them both.

Class Format: component of museum-based coursework

Requirements/Evaluation: class discussions and written preparation (students have a range of choices); two brief essays based on museum assignments (one with wall label); and a 10- to 15-page research paper

Prerequisites: one 100-level Art History course and any other Art History course, or permission of instructor

ARTH 435 (F) The Medieval Object

Cross-listings: ARTH 535 ARTH 435

Primary Cross-listing

After years of focusing on theory, scholars of medieval art have returned to an examination of physical objects. Distinctly strange and even monstrous, such small material things as reliquaries, liturgical vessels, game pieces, and textiles transgress the traditional categories of art, some made from precious materials and others of such base substances as bones and dirt. Even books were treated as tangible things, not only to be read as texts, but also to be looked at, paraded, and displayed with the Eucharist. Collected in church treasuries during the Middle Ages, exchanged, and reconfigured, medieval objects served simultaneously as earthly assets and spiritual investments. The seminar will focus on the making, function, and collecting of medieval objects. Each student will participate in weekly discussions stimulated by the instructor's presentations and selected readings. Students will also conduct research on an object available for study, will present an analysis of it for discussion by the class, and submit a 15- to 20-page term paper taking into account any comments and criticisms.

Class Format: three hours per week

Requirements/Evaluation: class participation, oral presentation, 15- to 20-page research paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors and Art History graduate students; 16 (8 undergrad, 8 graduate)

ARTH 438 (S) Ambrotypes to Instagram: Photography and the Human Portrait

"A portrait! What could be more simple and more complex, more obvious and more profound?" exclaimed the nineteenth-century poet and critic Charles Baudelaire. With the invention of photography in the first half of the nineteenth century and with the digital revolution of the twentieth, portraiture arguably became more simple and more complex, more obvious and more profound. In this seminar, we will explore this complicated and fascinating history. Photographic portraits are fine art and vernacular culture. They serve private and public functions. They help to fashion the self and construct group identity. They disguise and disclose the truth. In the classroom, galleries, and archives, we will investigate the problems of likeness and semblance, veracity and credibility. We will delve into the conflict between representations of individuals and representations of types, and we will attend to the complicated, sometimes fraught, relationship between photographer and subject, even when they are one and the same.

Requirements/Evaluation: class participation, short essays, individual presentations, and a final research paper

ARTH 440 (F) Contemporary Exhibitions: Los Angeles and Latin America (DPE)

Cross-listings: ARTH 440 LATS 440

Primary Cross-listing

This seminar examines connections between Latinx and Latin American art through a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time: LA/LA that opened in 2017. While the chronological span for the overall project reaches from Pre-Colombian art to present, we will focus on modern and contemporary art after the 1960s and consider key themes of art and activism, borders and diaspora, globalism and modernism, and popular culture and science fiction in the visual arts. Diverse in scope, these shows explored important developments in the arts of the Americas from the late-20th and 21st centuries, including, abstraction, Chicano muralism, Conceptual art, craft, feminist art, Kinetic art, Modernist design and architecture, social practice, and queer activism. Students will pursue individual research projects directly related to the art exhibitions we study, and examine photography, performance, painting, sculpture (including installation and participatory art), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history.

Requirements/Evaluation: several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages

Prerequisites: ARTH 102 (graduate students are exempt from the prerequisite)

Enrollment Limit: 15

Enrollment Preferences: senior Art majors and senior Latina/o Studies concentrators

ARTH 442 (F) Richardson, Sullivan, Wright: The Roots of American Modernism

Should a building express the facts of its program and materials--directly and without sentimentality? Or should a building be a physical manifestation of the personality and ego of its creator? These demands--one of radical objectivity, and one of radical subjectivity--seem to be mutually exclusive, yet together they form the basis for modern architecture at the start of the 20th century. The architectural lineage of Louis Sullivan, H. H. Richardson, and Frank Lloyd Wright is distinguished by the high degree of tension between the competing demands of factuality and selfhood. This seminar explores the theoretical roots of their architecture, its philosophical sources in transcendentalism, Unitarianism, German romanticism; and treating such aspects as decorative arts, architectural education and theory, and architectural autobiography.

Requirements/Evaluation: one hour presentation, 20-page paper

Prerequisites: any 100-level ARTH course or consent of instructor

Enrollment Limit: 11

Enrollment Preferences: senior Art majors and graduate students

ARTH 466 (S) Hellenistic Art and the Beginning of Art History

Cross-listings: ARTH 466 CLAS 466

Primary Cross-listing

In the wake of Alexander the Great's extension of the borders of the classical world all the way to the banks of the Indus River in the fourth century BCE, the small city-states of the Greek peninsula were replaced by far flung kingdoms as important centers of power and culture. Vastly increased trade and the movement of individuals between Greece, Egypt, and the Near and Middle East encouraged a new internationalism marked by a cross-cultural hybridization of religion, and innovations in philosophy, medicine, literature and art. This cosmopolitan attitude brought about a revolution in artistic ideas and forms centered on the social and ethnic diversity of human experience. Royal patrons, and wealthy private citizens including an increasing number of women, commissioned artworks for cities, sanctuaries, tombs, palaces, and estates on a scale rarely seen before. With the rise of Rome in the west, plundered artworks of earlier periods soon became the desired objects of wealthy collectors, and commissions in the Hellenistic style continued well into the Roman period. In this course we'll look closely at influential works of art in bronze, marble, fresco, and mosaic, and consider their archaeological, social and political contexts. We'll discuss the changing status of artists as patronage shifts to include the private as well as the public realm, and research the broader philosophical, religious, literary and cultural forces that encouraged artistic innovations of the fourth century BCE through first century CE. Reading material includes ancient literature in translation, recent surveys of Hellenistic art, and recent critical essays.

Requirements/Evaluation: students will lead discussions based on selected readings; a 5- to 7-page midterm paper and 20 minute oral report will form the basis for an 18- to 20-page research paper

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art majors, and then to students of any major interested in art and thought in the ancient Mediterranean world, with permission of instructor

ARTH 468 (S) Practicum in Curating: Visual Art for a Garden

Cross-listings: WGSS 468 ARTH 468

Primary Cross-listing

This course aims to develop the wide range of skills needed to realize an art exhibition in a botanical garden (specifically Marie Selby Botanical Gardens in Sarasota where the instructor is Curator at Large. The course responds to her charge to exhibit artists with 100% name recognition for the first five years of Selby's new "Living Museum" initiative which puts works of art in dialogue with botanicals. In the wake of shows devoted to Marc Chagall (2017), Andy Warhol (2018) and Paul Gauguin (forthcoming, 2019), each student will research and choose a non-male and/or non-white artist of some renown and construct an exhibition of works that might be possible to borrow. Course work includes 1) research on the artist and the concept, the focal works of art, auxiliary objects that do not require climate control (e.g. photographs and other works on paper), social history and other methodological frameworks 2) writing requests e.g., loans, rights; and 3) preparations for several of the following: press release, wall texts, wall labels, audio guide, and programming for the exhibition. The final project includes a 10-page synthetic research paper, written for a general audience, about the artist and their use of flowers as well as the projected installation of the climate-controlled gallery. Students may have the opportunity to participate in a WSP in situ in which they will experience all sectors of the museum, glass house, and gardens.

Class Format: this is a practicum so while it meets 3 hours/week as a seminar does, it is hands on in a different way (e.g., co-peer and one-on-one reviewing by me in class)

Requirements/Evaluation: in-class presentations of research (weekly or bi-weekly), a substantive annotated bibliography, several short writing assignments (e.g. letters, queries, reviews), reading and critiques of others' work, in-class presentation of two drafts of the final paper and installation

Prerequisites: at least one 100-level course in ARTH

Enrollment Limit: 10

Enrollment Preferences: junior and senior art majors, especially those who have had either methods or a senior seminar and/or those with strong research, writing, and design skills

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: field trip expenses that may not be funded by the department (not to exceed \$100)

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 470 (S) Image-making, Orientalism and Visual Culture (DPE)

Images enjoy extraordinary power in the spaces between self and other, human and divine. They play myriad roles--witness, surrogate, instigator, supplicant--and travel freely across political, religious and cultural boundaries. This course is about three regions--United States, France and the Persian sphere--and the images that mediate and document their interactions. Along the way, we will address important issues like iconoclasm and aniconism, common types like veiled women and pious men, and asymmetrical relationships like Orientalism. The peculiar nature of portraiture will be a prominent theme.

Class Format: seminar

Requirements/Evaluation: class participation, term project

Prerequisites: any ARTH class or permission of the instructor

Enrollment Limit: 15

Enrollment Preferences: Art majors

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE)

Difference, Power, and Equity Notes: This course fulfills the DPE requirement in its emphasis on comparative cultures and its effort to promote understanding of stereotypes, differences, and contextualized meanings in diverse settings. Images operate between and among individuals and communities, reflecting differences of identity, power, and perspective. This course is an opportunity to articulate how such differences are visually manifest in painting and photography across political and cultural boundaries.

Not offered current academic year

ARTH 472 (F) Timelines

Art is really time-consuming--to make, to view, to use, to understand. We enshrine it, excavate it, curate it, deploy it and sometimes we deliberately destroy it. We are always telling stories about the stuff. We seem to think that we control these many fabled things, though they meddle endlessly in the spaces between self and other, human and divine. Great art can be inspiring, enabling people to transcend time, or it can be traumatizing, making time stop altogether. Or both! To explore such powers, we will begin in the 19th century, when commonplace notions of past and present wobbled seriously with the invention of photography and the avid pursuit of archaeology. Thereafter, we will operate across time and space, with particular reference to the Middle East, where art has figured in many religions and also many conflicts. There will be no single story-line, but rather a series of case studies and hands-on projects; we will consider materials ranging from iconic paintings and sacred spaces to calendar art and photojournalism. Along the way, creativity and iconoclasm will be recurring themes. Choose this class if you are curious about the agency and power that art wields in our lives.

Class Format: will include making, breaking, and writing as well as discussion of assigned readings

Requirements/Evaluation: regular attendance and active class participation, Glow Posts, term project

Prerequisites: one studio or art history class

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

ARTH 474 (S) Brazilian Art in the 20th Century: Aesthetics, Internationalism, Utopia

In 1924 the modernist poet Oswald de Andrade radically called for Brazilians to engage in cultural "anthropophagy"--to cannibalize from European modernist ideas and synthesize these with local aesthetic and cultural values. Toward the mid-20th century, the narrative of Brazilian art was marked by the desire on part of artists and intellectuals to problematize its place in Latin America, and vis-à-vis the European avant-gardes. They did so with a strong utopian perspective, developing aesthetic strategies to confront and transcend Brazil's underdevelopment. Yet ideas around nationalism, internationalism, and utopia shifted dramatically when a military dictatorship came to power between 1964 and 1985. How did artists and intellectuals rethink the role of aesthetics in such critical sociopolitical conditions? How did these terms shift again after Brazil returned to democracy, and soon aggressively entered an increasingly globalized economic system? Our seminar will delve into these complex relationships for a comprehensive understanding of the development of modern and contemporary Brazilian art. This is a Writing Intensive course, and there are no prerequisites to enroll.

Requirements/Evaluation: weekly presentations, two review exercises, four 5-page papers

ARTH 494 (S) Thesis Seminar

To graduate with honors in art history, students are to enroll in the Senior Honors Seminar during the Spring semester of their senior year, where they will develop an original research paper based on prior research. Under the guidance of the instructor, students will present and defend their own work in both written and oral form, as well as respond to, and critique, the work of their peers. As students work toward transforming their existing paper into an honors' thesis, they will also be trained in skills necessary to analyze an argument effectively, and strategies of constructive critique.

Requirements/Evaluation: once in the seminar, students will revise, refine and expand on previous research and produce a paper of approximately 25 pages and present a shortened version of the paper to the faculty and public at the Williams College Museum of Art

Prerequisites: for requirements of entry into the course, please see "The Degree with Honors in Art, Art History"

Enrollment Limit: 8

Enrollment Preferences: permission of instructor required

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the Art History seminar requirement

ARTH 500 (F) Clark Visiting Professor Seminar: writing TO art

Cross-listings: ARTH 400 ARTH 500

Primary Cross-listing

In this seminar, we will think about writing TO art and for it, rather than merely about it; but first, we will think about how we think. I intend that we read essays and stories that confront the ways in which we think. That might sound abstract, but in fact it is rather concrete: we bring to works of art our predilections or tastes, psychologies, politics, habits of mind, in short, our subjectivity. We are not blank slates, art is not, either. Art is layered with its own history, and histories, criticisms, reactions, rejections, movements. Art is not static. How do we writers move with art, confront our reactions, and ask why we have them. To me, one of the most important aspects in writing is judging one's own reactions, for instance, in the choice of words. To that end, that of confronting our thinking, we will read, among other things: Adorno's "Coming to Terms with the Past;" Joan Scott's "The Evidence of

Experience;" Kafka's "Josephine the Mouse Singer and the Mouse People," and "The Hunger Artist;" Freud's "Notes on War and Death," and Craig Owens', "On Speaking to Others" and "Feminism and Post-Modernism." We will also read some of my anti-art art criticism, or what I call stories written in relationship to art. Some of these employ fictions, some not. We will read a few of my "Madame Realism" pieces, as well as essays on Warhol and some other contemporary artists. We will do some writing. We will visit with or be visited by critics and/or artists. We will look at art in galleries, and write about what we have seen.

Requirements/Evaluation: writing assignments, participation

Prerequisites: none

ARTH 501 (S) Museums: History and Practice

Cross-listings: LEAD 301 ARTH 303 ARTH 501

Primary Cross-listing

Art museums not only express the political, economic and cultural values of their period of formation, but the evolution of those values that have resulted in the institutions of our time. The seminar will focus on museums past and present internationally as it also considers the future of museums, doing so as it examines governance and management policies and practices, the role of architecture and installation in interpretation and experience, guidelines in the accessioning and deaccessioning works of art, and issues associated with the repatriation and restitution of cultural property. The course will consider current trends in exhibition, public education and other programming in art museums that range in size and type from the "encyclopedic" or "universal" to newly established contemporary arts institutions and alternative spaces. Class discussions will have a special focus on how museums strive to balance their scholarly and artistic roles with their civic and social responsibilities doing so while maintaining financial stability in the increasingly market-driven, metric-conscious, not-for-profit environment of our time.

Requirements/Evaluation: oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

Prerequisites: undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

Enrollment Limit: 10

Enrollment Preferences: graduate students, then senior art history majors, then other undergraduates

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

ARTH 503 (S) Clark Visiting Professor Seminar: Ethics of Abstraction

Cross-listings: ARTH 403 ARTH 503 ARTH 400 ARTH 500

Primary Cross-listing

The course will interrogate abstraction as a strategy in 20th and 21st century art around the globe, and its manifold implications for political projects of being, seeing, and knowing together. We will look at how various artists turn to non-representation as a means for thinking differently about issues as divergent as flatness, vision, progress, decay, identity, violence, solidarity, negation, and protest. How might we read acts of judgment performed by abstract artists, i.e., separating what is alien from that which is intrinsic, as ethically activated? How do we account for the ways abstraction has figured centrally not only in modernist art histories, but also in economic and political theories (as in the abstraction of use into exchange value)? How, too, have representation and figuration (as ostensible opposites of abstraction) been positioned as ethical tactics? We will take an object-oriented approach that foregrounds the complexity of movement between "thing" and abstract "effect," examining divergent valences from postwar abstract painting up to contemporary abstraction as it supports coded meanings, eccentricities, and alternative (feminist, queer, marginal, racialized) formations.

Requirements/Evaluation: research paper, class presentations

ARTH 506 (S) An Expository Writing Workshop

A common and depressing consequence of too much education is how our writing tends to devolve, as the task of saying what we mean is complicated by new anxieties: trying to impress our potential employers, intimidate our competition, claim our place in an intellectual community, and generally avoid looking like fools. In many professions, bad prose tends to proliferate like some disgusting disease, as scholars, trying above all to avoid mistakes, become tentative, obscurantist, addicted to jargon, and desperate to imitate other bad writers. In this course we will try to relearn the basic skills of effective communication and adapt them to new and complicated purposes. In class we will go over weekly or bi-weekly writing assignments, but we will also look at the essays you are writing for your other courses, to give them an outward form that will best display their inner braininess. Among other things, I am a fiction writer, and part of my intention is to borrow the techniques of storytelling to dramatize your ideas

successfully.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: limited to and required of first-year students in the Graduate Program in the History of Art

ARTH 508 (S) Art and Conservation: An Inquiry into History, Methods, and Materials

This course is designed to acquaint students with observation and examination techniques for works of art, artifacts, and decorative arts objects; give them an understanding of the history of artist materials and methods; and familiarize them with the ethics and procedures of conservation. This is not a conservation training course but is structured to provide a broader awareness for those who are planning careers involving work with cultural objects. Sessions will be held at the Williamstown Art Conservation Center, Williams College, the Clark Art Institute, and the Governor Nelson A. Rockefeller Empire State Plaza Art Collection in Albany. Examination questions may be formulated from exhibitions at these locations. Six exams will be given. Exam scores will be weighed in proportion to the number of sessions covered by the exam (e.g., the paintings exam, derived from six sessions of the course, will count as 25% of the final grade).

Class Format: slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

Requirements/Evaluation: attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Graduate Program students, then students in art history or studio art

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

ARTH 510 (F) Approaches to Drawing from Connoisseurship to Conceptualism

This course will consider the art of drawing as a pedagogical tool and cultural practice from the sixteenth to the twentieth century. Creative and commercial forces over four centuries have fostered different types of and reasons for production: presentation drawings in sixteenth century Italy, an increased market for drawings in seventeenth century Holland, a fashion for powdery pastels in eighteenth century France, and the critical promotion of drawing as a form of autographic thinking in the nineteenth century. Drawing has enjoyed a resurgence in the last fifty years as Minimalism and Conceptualism have pushed the medium's boundaries. Equal consideration will be given to the history of collecting and to materials from the invention of the Conté crayon to the deteriorating effects of acidic paper. The seminar will coincide with a major loan exhibition at the Clark of over one hundred drawings from the Renaissance through contemporary: Drawing in Depth: Master Drawings from the Thaw Collection. The class will be held in the Manton Study Center for Works on Paper and the Clark galleries with visits to the Williams College Museum of Art.

Requirements/Evaluation: involved class participation, several short presentations, one short paper, and a final paper approximately 20 pages

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Graduate Program students and then to senior Art History majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ARTH 512 (F) Why Look at Animals? Some Contemporary Positions

This seminar, named for a 1977 essay by the art critic John Berger, considers a recent tendency in contemporary art to see nonhuman animals less as objects for human delectation-to be owned, eaten, or symbolized with-than as subjects, endowed with specific forms of intelligence, agency, and/or cross-species kinship. We will take as case studies the work of artists such as Francis Alÿs, Xu Bing, Sue Coe, Coco Fusco, Pierre Huyghe, Jochen Lempert, Chris Marker, and Lin May Saeed, among others. Readings will come in part from the rapidly growing, multidisciplinary field of animal studies. In the process, we will consider concepts such as animacy; animal ethics; animalization; the anthropocene; biopolitics; and posthumanism. This seminar anticipates two exhibitions concerning animals at the Clark in Summer 2020.

Requirements/Evaluation: active class participation, presentations, writing assignments

ARTH 515 (F) Creating Whiteness: Racial Taxonomies in 'American' Art, 1650-1900

Cross-listings: AMST 355 ARTH 515

Primary Cross-listing

"What is race?" "How is a race created?" "What are the racial histories and subsequent political implications of 'American' art?" These are the central questions of our exploration. Drawing on two centuries of making in the Americas--from 17th century casta paintings of New Spain to the pictorialist photographs of Fred Holland Day--this object-based seminar for graduate students (and undergraduates with instructor's approval) draws upon area collections (including WCMA and The Clark Art Institute) to make the argument that racial ideologies have always been sutured to definitions of an American canon. Our approach is the case study: devoting one or two class meetings to the exploration of eight specific moments/artists in order to engage with the intersectional ideologies of personal and collective identity, e.g., self and the Divine; portraiture and the nation, armed conflict, and the constructed mutabilities of gender and sexuality. Additional artists and topics include: the Stuart family's images of George Washington and Thomas Jefferson; advances in photographic technology vis-a-vis the amputated bodies of Civil War veterans; gender fluidity in John Singer Sargent; and the equation of homoeroticism and black bodies in pictorialism. Designed to provide breadth and specific moments of depth, we will be covering processes of making across multiple mediums and time periods. An elementary reading knowledge of French, Latin, Portuguese, and/or Spanish will not go amiss.

Requirements/Evaluation: research paper, presentations

ARTH 519 (S) Architectural Theory and Modernity, 1750-1968

Why do buildings need words, or do they? For most of the world and most of history, buildings are made without the benefit of formal architectural thought. But at various times, ideas about the aesthetics of buildings, their cultural and philosophical meaning, and their underlying principles, have been matters of great public interest. And architectural theory--in the form of treatises, manifestos, and critical reviews--has exercised an enormous effect on building. This theory can be prescriptive, presenting categorical rules for making good buildings; it can be descriptive, looking at how buildings perform in the real world; and it can be radical, seeking to change the essence and definition of architecture. Theory seemed very important to architects twenty years ago, but no longer. Why is that? We will investigate. Students will give short presentations on key theorists, such as Vitruvius, Alberti, Palladio, Laugier, Boullée, A. W. N. Pugin, Viollet-le-Duc, Gottfried Semper, Le Corbusier, and Robert Venturi. The semester will conclude with a 15- to 20-page seminar paper, based on comments and discussion following a classroom presentation.

ARTH 521 (S) Islam and the Image in Indian Painting, c.1450-c.1750

This seminar will explore Indian painting made for Muslim patrons from the medieval period to the early modern era. The course considers how paintings produced for an elite Indo-Muslim audience can be situated within the frameworks of "Islamic art," a loaded historiographical term that has been questioned in recent times. The seminar will also address some of the major problems that continue to haunt Indian art scholarship. For most of its history, the academic study of Indian painting has seldom considered contemporaneous literary voices that shed light on the motivations behind artworks. Furthermore, the historiography, deeply entrenched in its colonial and orientalist roots, has largely isolated images from their supporting texts—a curious oversight in light of the fact that miniature painting is primarily an art of the book. These biases have affected the way museums have collected, displayed and interpreted miniature paintings. Western museums continue to place paintings made for books and albums in their "South Asian" collections while textual manuscripts and calligraphic specimens made for the same Muslim audiences—even at times bound in the same albums—are categorized as "Islamic art." What does this isolation of text from image imply about prevailing views of Islamic art? In order to understand the various intended functions of miniature painting and its possible role as an "Islamic" art, the seminar will explore ways to conceptually reintegrate images and texts belonging to key manuscripts and albums that were dispersed during the colonial and post-colonial periods. To better understand the cultural, historical and religious context surrounding artworks students will read primary literature ranging from autobiography to devotional poetry, often written by the very patrons and subjects of the paintings to be discussed.

ARTH 523 (S) Heaven's Gate: The Romanesque Sculpted Portal and the Creation of Sacred Space Through Art

Cross-listings: ARTH 523 ARTH 424

Secondary Cross-listing

During the course of the eleventh century, the designers of European churches fashioned a new architectural language that we now label "Romanesque." One of the most innovative and dramatic aspects of this new language was its assimilation of monumental sculpture, absent in Europe since the fifth century. The focus of attention in this regard was the portal, which marked the threshold between the profane realm of the outside world and the sacred space of the church. Often characterized as the "marquee of the Middle Ages," the Romanesque sculpted portal, with its startling juxtaposition of the spiritual and the physical, of ecstatic visions of the heavenly realm and writhing, biting monsters, constitutes one of the true high-points of creativity in medieval art. Through the lens of modern scholarship, this seminar will investigate the antecedents and origins of the Romanesque sculpted portal and examine in detail its most renowned manifestations. Emphasis will be placed on understanding these often complex sculptural schemes within their original functional and material contexts, especially in terms of how they helped to create the sacred space of the church behind. Students will then have the opportunity to develop their own research projects, informed by what we have learned in the seminar, but focused on an example of sacred threshold art of their own choosing.

Requirements/Evaluation: class discussion/participation, oral presentation, and a 15- to 20-page research paper

Prerequisites: permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Art majors and graduate students

ARTH 524 (F) The Watchful Object

What is implied by an object that "watches"? Is it sentient? Animate? Through what apparatus does it gain the power to perceive and in turn generate some type of action? Watchful objects--sometimes known problematically as 'fetishes,' 'idols,' and 'totems'--have existed in numerous material cultures in Africa over time and have often been saddled with titles and labels that largely reflect colonial-era notions of primitivism linked with non-Western objects, spaces, and peoples. Even today, many of these objects are still inappropriately connected to systems of the occult rather than being recognized as crucial cogs in the socio-political, cultural, and spiritual mechanics of lived experience on the continent both past and in some cases present. The purpose of this seminar, thus, is to unpack the multiple identities that these objects have experienced as a way of understanding 1.) the circumstances and situations that catalyzed their production; and 2.) how their various material and metaphorical components function as power-producing elements that enable these forms to become 'watchful' presences in society that operate in accordance with their 'observations' of the human condition. This course will also address how the psychological agency of many of these material traditions has prompted their inclusion and absorption within contemporary artistic practices as well, often in the form of productions and performances that provoke unsettling and often transformative experiences in viewers.

Requirements/Evaluation: in-class presentations, class discussion, and a final research project

Prerequisites: none

ARTH 527 (F) Acquiring Art: Selecting and Purchasing Objects For WCMA

Cross-listings: ECON 227 ARTH 327 ARTH 527

Secondary Cross-listing

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Requirements/Evaluation: three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy

Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

ARTH 530 (S) Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern

Cross-listings: CLAS 236 ARTH 530

Primary Cross-listing

Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallarmé, "L'Après midi d'une faun," Aby Warburg, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Requirements/Evaluation: attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: first year graduate students, then second year graduate students, then advanced undergraduates

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTH 535 (F) The Medieval Object

Cross-listings: ARTH 535 ARTH 435

Secondary Cross-listing

After years of focusing on theory, scholars of medieval art have returned to an examination of physical objects. Distinctly strange and even monstrous, such small material things as reliquaries, liturgical vessels, game pieces, and textiles transgress the traditional categories of art, some made from precious materials and others of such base substances as bones and dirt. Even books were treated as tangible things, not only to be read as texts, but also to be looked at, paraded, and displayed with the Eucharist. Collected in church treasuries during the Middle Ages, exchanged, and reconfigured, medieval objects served simultaneously as earthly assets and spiritual investments. The seminar will focus on the making, function, and collecting of medieval objects. Each student will participate in weekly discussions stimulated by the instructor's presentations and selected readings. Students will also conduct research on an object available for study, will present an analysis of it for discussion by the class, and submit a 15- to 20-page term paper taking into account any comments and criticisms.

Class Format: three hours per week

Requirements/Evaluation: class participation, oral presentation, 15- to 20-page research paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors and Art History graduate students; 16 (8 undergrad, 8 graduate)

Expected Class Size: 14

Grading: no pass/fail option, yes fifth course option

ARTH 536 (S) Charles and Maurice Prendergrast in WCMA Collections

This seminar will investigate the careers of Maurice and Charles Prendergast, who occupy curious positions in American art. Students will work closely with the art and archival collections of the Prendergasts at WCMA, which is the largest repository of their work in the world. Maurice's Post-Impressionism placed him at the forefront of American modernism in the first decades of the twentieth century, culminating with his inclusion in the infamous Armory Show of 1913. Charles, a leading frame maker before adapting techniques of his craft to create incised panels, intersects with the Arts & Crafts Movement, Symbolism, and vernacular material culture. While the brothers are firmly canonical, they are often regarded as isolated from major formal and iconographic concerns of their peers. Scholarship, much of it produced at WCMA, has often focused on their subject matter. Participants in this class will consider new material and theoretical approaches to the brothers' work that may (or may not) prove productive in resituating their place in American art.

ARTH 540 (F) In Vinculus Invictus: Portraits in Prison

Among all the portraits produced during the modern period, some have been painted or, more recently, photographed in prison. Portraits in prison exist at a crossroad of politics, law, and identity; they offer a great opportunity to think about art and society. Artists themselves have made self-portraits during their own imprisonments, or sometimes a portrait of one of their fellow prisoners. More often it was the prisoners or their relatives who commissioned an artistic record of their detention. The idea of commemorating such a moment, or to evoke it as a claim to fame, seems surprising at best, outrageous and provocative at worst. But there has been, since the 16th century, an enduring tradition of portraiture in prison with its masterpieces and its pantheon, a tradition that fits into the wider pictorial attention to the prison itself. With the French Revolution, the nature of prison changed. It became a tragic symbol of political "debates." Within a few years, a terrifying series of portraits appeared that would nurture Western political thought and visual culture until now. Since the 18th century, these portraits have become more concerned with ideas that stretch beyond the individual and into the realm of social justice, mass incarceration, and the prison-industrialization complex.

ARTH 541 (F) Aesthetics After Evolutionary Biology: Darwin, Nietzsche, Freud

This interdisciplinary seminar examines the rise of evolutionary biology, a new explanatory paradigm that solidified in Europe in the middle of the nineteenth century, and its ramifications in art and aesthetic theory in the late nineteenth and early twentieth centuries. We will consider how natural histories of creation, and corresponding reclassifications of the human as a species category, went hand in hand with a reconceptualization of the aesthetic faculties, and the processes of art's production and reception. A core component of this seminar will be the close study of key texts by Charles Darwin, and two thinkers who were among the most radical in extending his key insights into the domain of aesthetic theory--the psychoanalyst Sigmund Freud, and the philosopher Friedrich Nietzsche. These primary texts will provide points of departure for studying the work of a number of innovative practitioners working across a range of media, among them the composer Richard Wagner, the Neo-Impressionist painter Georges Seurat, the architect Adolf Loos, the choreographer Vaslav Nijinsky, and the art historian Aby Warburg. Methodologically a major aim of this seminar is to think together critically about the nature of art's relations to other domains of cultural production such as science or philosophy, and to interrogate what it means, both practically and epistemologically, to pursue "interdisciplinarity" as a strategy for art history.

ARTH 542 (F) Insubordinate Bodies: The Body in Conceptual Art in Latin America, 1960-1980

The use of the body--be it the artist's or those of willing and unwilling participants--is among art's most significant developments internationally since the 1960s. In Latin America between the 1960s and 1980s, activating the body not only was a strong conceptual strategy to escape object-based practices; it was also a potent way for artists to disobey and confront forms of violence and control exerted by repressive regimes. But the body too was a forceful medium by which artists could subvert heteronormative frameworks, through the visualization and performance of feminist critiques and queer identities. This seminar will explore the role of the body in Latin American conceptual art through localized case studies, elucidating the body's particular strength as a vehicle for political and institutional critique, as well as its potential to unlock alternate narratives of conceptual practices in the region.

ARTH 543 (F) Color, High and Low

Why should color in prints be controversial? For most of the nineteenth century--even as technical advances encouraged a flowering of color in woodcut, intaglio, and especially lithographic production--entrenched voices in the art establishment continued to insist on printmaking as an art of black and white. Drawing upon a wide variety of examples from the Clark's collection, this course will explore the range of associations that attached to

color prints, along a broad spectrum from highbrow preciousness and subtlety to lowbrow commercialism and bad taste. Color lithography was a particular lightning rod for controversy: although chromatic experiments in this medium enabled striking aesthetic innovations, the extreme complexity of the process also meant that the designer of a print became farther and farther removed from its actual production. This was just as true for the delicate and exquisite suites produced in limited editions by Pierre Bonnard, Edouard Vuillard, and Maurice Denis as it was for the large-scale, brightly-colored lithographic posters of Jules Chéret and Henri de Toulouse-Lautrec, used to advertise popular urban entertainments. Alongside the close examination of original works of art, a set of critical and theoretical readings will help us navigate the paradoxes of printed color. Apart from the standard requirements, including a research paper and class presentation, students will have an option to participate in a summer 2020 exhibition based on the course findings. This course will take place in the Manton Study Center for Works on Paper at the Clark.

ARTH 544 (S) Women Artists in Paris, 1850-1900

In this seminar, we will examine the historically undervalued contributions of women in the art of the later nineteenth century. During this period, leading artists from around the world, including many women, were drawn to the academies, museums, salons, and studios of Paris. While women were largely excluded from formal training, many nonetheless navigated the complex systems of artistic production. We will focus on this multinational group of talented women (including Marie Bashkirtseff, Rosa Bonheur, Anna Ancher, Mary Cassatt), and we will assess their work against contemporary sociopolitical thought and aesthetic theories. Readings will draw upon early critical reviews of public exhibitions, biographical materials, studies of pedagogical and institutional practices, and social histories of art. In and through these materials, we will explore the marginalizing narrative that was created for women artists in Paris, and, most importantly, we will reconstruct an alternative history through our discussions and class presentations.

ARTH 545 Architectural Theory in Crisis

Why do buildings need words, or do they? For most of the world and most of history, buildings are made without the benefit of formal architectural thought. But at various times, ideas about the aesthetics of buildings, their cultural and philosophical meaning, and their underlying principles, have been matters of great public interest. And architectural theory--in the form of treatises, manifestos, and critical reviews--has exercised an enormous effect on building. This theory can be prescriptive, presenting categorical rules for making good buildings; it can be descriptive, looking at how buildings perform in the real world; and it can be radical, seeking to change the essence and definition of architecture. Theory seemed very important to architects twenty years ago, but that is not the case today. Why? We will investigate. Students will give short presentations on key theorists, such as Vitruvius, Alberti, Palladio, Laugier, Boullée, A. W. N. Pugin, Viollet-le-Duc, Gottfried Semper, Le Corbusier, and Robert Venturi. The semester will conclude with a 20-page seminar paper, based on comments and discussion following a classroom presentation.

ARTH 546 (F) *Texere: The Material Philosophy of Print and Textile, ca. 1500-1900*

It is a commonplace in the literature on textiles that the words for both text and textile derive from the Latin *texere*: to weave. As this etymological root indicates, the action of making cloth provides the metaphoric structure by which we conceive of language from the threading of thought to the weaving of prose and poetry. In the recent theoretical writings of Tim Ingold, among others, the processes of weaving-textility-offer a model against which to conceive of the dominant hylomorphic conception of matter and form as a process of imprint. Instead, textiles illustrate a world that is created through forces in motion, never imprinting, but moving against and within one another. This seminar will use these questions as the starting point to examine the interaction between printed matter (embodying a hylomorphic process) and textile (a material challenge to hylomorphism). The Clark Art Library contains a preeminent collection of textile material, and this seminar will dive into the Mary Ann Beinecke collection to examine histories of gender and labor, figuration and ornament, mobility and place, and finally, form and matter. The case studies will range from sixteenth-century needlepoint model books to twentieth-century kimono design.

ARTH 547 (S) *The Studio, The Bedroom, & the Tomb: Artists and Artistic Biographies in the 19th Century&Beyond*

How was the vocation of the artist thematized in the European cultural imagination in the Romantic age and its aftermath? Even more, how did artists themselves articulate, experience, and reproduce that sense of vocation?--What were its mythologies and poetics, at once as they were circulated in visual culture, but also as they were lived, experienced, and reproduced by artists themselves? We will explore such question across three historically, psychologically, and tropologically configured "sites": the artist's studio, the artist's desire, and the artist's death. Readings by Freud, Balzac, Kris and Kurtz, along with scholarship largely centered on the visual arts of the 18th and 19th centuries. With instructor permission, students may undertake research projects in any field of the history of art.

ARTH 548 (S) *Landscape, Theory, Ideology*

To use the term "landscape" is to imply and assume a subject position. Unlike the categories of "nature," "wilderness," "vista," or "ecology," a landscape is something invented and experienced (or observed, or represented, or cultivated) solely by human agents. The term "landscape" is variously deployed in the service of a range of political and philosophical positions. This seminar explores "landscape" as a fruitful agitation in critical theory and aesthetic discourse over the past thirty years. The course will interact with the artists and photographic works on view in the exhibition, Landmarks, a 150-year survey of landscape photography in WCMA's collection. We will examine i) how landscape as medium and as genre moves from literature to painting to photography; ii) how to read and employ contemporary theory in the service of artwork from bygone eras; and iii) we will ask who exercises the agency and privilege to name, to invent, to denote a space or a view as worthy of sight.

ARTH 549 (F) Art, Biology, Beauty

This interdisciplinary seminar is offered in conjunction with the upcoming RAP Colloquium scheduled for March 2020, "Beauty, Sexuality, Selection: Darwinian Revolutions in Aesthetics." (Seminar participants will be expected to attend.) Our theme will be Charles Darwin's controversial theory of "sexual selection" as both a historical idea of aesthetic response and beauty, and as a theoretical concept that is back in play in current evolutionary thinking. Readings will be drawn from ancient philosophy, current science, art history, the history of science, and other fields, to engage the following questions: how did the existence of difference in the organic world--gender difference broadly but also more specifically racial difference in the human species--motivate Darwin's theory of an "aesthetic evolution" driven by animal and human perception of visual beauty? How did philosophical aesthetics contribute to Darwin's biological theory of beauty, and how did Darwin's biological theory of beauty unsettle the discipline of philosophical aesthetics? In which ways did the arts and visual cultures of Europe and elsewhere shape Darwin's aesthetic assumptions? How did, and how does, the concept of sexual selection destabilize the concept of "art" as a human cultural activity? How might "sexual selection" complicate historical and current delineations drawn between nature and culture, between the innate and the arbitrary?

ARTH 550 (S) The History, Theory, and Problem of Connoisseurship

The museum and market have long relied upon the "talent" of a chosen few "connoisseurs," whose abilities (i.e. "the expert eye")-shrouded in mythology and vaguery-have profoundly influenced the interpretation of objects. This seminar will interrogate the problematic construct of connoisseurship in the market (Duveen), in the museum (Pope-Hennessy), and in the academy (Berenson). Through readings about the history and theory of the practice from the sixteenth century to the modern day, we will reassess the meaning, and validity, of connoisseurship in visual culture. And, through conversations about authorship, working methods, and artistic intent, we will question what we learn from close looking. This seminar will include case studies using objects in the Clark's permanent collection, focusing on in-depth discussions of materials, techniques, attribution, quality, and the burgeoning field of conservation science. Students will be asked to conduct their own rigorous object-based research.

ARTH 554 (S) The Matrix and the Market: Printmaking and Photography in the Nineteenth Century

During the last half of the 19th century, technical, commercial, and aesthetic approaches to printmaking and photography experienced dramatic paradigm shifts. Etching, for example, simultaneously functioned as a reproductive medium and one that carried experimental, vanguard associations. Practitioners of lithography strove to distance themselves from denigrating commercialism and raise the medium's status to a respected art form. Photography, in turn, negotiated the boundaries between "documentary" and "artistic." This seminar will address the complex issues that swirled around printmaking and photographic matrices, critical responses to the various processes, artist-driven initiatives, and the formative role of the art market and book trade in shaping popular opinion. We will consider these topics across political and geographic borders from Europe to the United States, reading both primary and secondary sources. The class will be held in the new Manton Study Center for Works on paper with visits to Chapin library and the Williams College Museum of Art likely.

Class Format: seminar

Requirements/Evaluation: students will be responsible for readings and involved class discussion; several short and one long presentation; and a final paper (20-25 pages)

ARTH 562 (F) Art of California: Pacific Standard Time

Cross-listings: ARTH 562 ARTH 462 LATS 462 AMST 462

Secondary Cross-listing

In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history. In fall 2017, a new Getty PST initiative focused on Latin American and Latino art will commence and this class will consider these exhibitions as well.

Requirements/Evaluation: several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester

Prerequisites: ARTH 102

ARTH 567 (F) What is Art Criticism? Current Debates, Past Precedents

Taking as its point of departure recent debates concerning a purported "crisis" of art-criticism, this seminar considers traditions of writing about the work of living artists in modernity. We will begin with current literature and then pivot back to the eighteenth century, tracing a sequence of episodes in art criticism's evolution as a genre by looking at key works of art as mediated by their first critics. Emphasis will be placed on close readings of primary historical texts as prompts for thinking through the following broad questions, among others: What is critique, and what is art criticism? Is the art critic a judge, a historian, a partisan, a participant, or an artist in her own right? How do forms of distribution impact the content of art criticism, and how does art criticism impact the form and content of art? What is the relationship, if any, between taste, assessment of value, and interpretation of meaning? Artists considered include, among others, Boucher, Friedrich, Whistler, Seurat, Pollock, Piper.

Class Format: seminar

Requirements/Evaluation: two short writing assignments, twenty page final paper

Grading: no pass/fail option, yes fifth course option

ARTH 573 (S) Modern and Contemporary Art from the Middle East and North Africa

This is an exciting time for art from the Middle East and North Africa. Contemporary artists are exhibiting in international shows and biennales, and the global art market has responded to collector interest and crowned its favorites. The visibility and celebration of these artists, however, does not take into account the larger historical arena of cultural production and artistic practice from which they emerge. In terms of the discipline of art history, the field of modern painting and contemporary visual practice in the region is in its first generation of formation and definition. Drawing on very recent scholarship in art history and visual anthropology, we will explore the "history" of modern and contemporary art in the Middle East and North Africa (from the 1920s-the present). We will pay particular attention to how key terms and categories such as: modern, contemporary, Islamic, and Arab, have been constructed, deployed and debated by artists, institutions and scholars in the field. We will explore the role of museums, art schools, archives and biennales in the region, the creation of art publics and communities, and how the international market has responded to contemporary

production. And perhaps most importantly, we will study work by artists that identify with the region and engage and complicate constructions of race, gender, religion, environment, autonomy and community.

Class Format: seminar

Requirements/Evaluation: short response essays and a culminating research paper

Enrollment Preferences: graduate program students and then senior Art History and Arabic Studies majors

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

ARTH 575 (F) Regression as Modern Fantasy: Archaism, Primitivism, Prehistory

This course analyzes the implications of European modernity's engagement with cultural artifacts it wanted to classify beneath the prefix "pre." We take as our object an aesthetic strategy employed with increasing frequency by modern artists in Europe after 1800: the self-conscious mobilization of visual forms thought to telegraph priority to later advancements, whether historically or developmentally. Our inquiry, beginning with the German Nazarenes and extending into the early twentieth century around the moment of WW1, foregrounds such strategies as key to grasping new notions of temporality and geography that emerged in European modernity. We will inquire into the historical and intellectual contexts that sustained chronological and cultural primitivisms, including the history of colonialism, discoveries of Paleolithic cave art, and the emergence of the modern disciplines of archeology, anthropology, ethnography, child psychology, and psychoanalysis. Alongside close visual scrutiny of some of modernism's most canonical and problematic objects, including key works by Picasso and Gauguin, we will examine the literature that proliferated in this period devoted to the art of peoples deemed "primitive," including the Greeks in the pre-classical period, non-Western peoples, and children.

ARTH 586 (F) Japanese Popular Visual Culture

Cross-listings: ARTH 286 ARTH 586 ASST 186 COMP 186

Secondary Cross-listing

The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (*ukiyo-e*, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Okazaki), and animation (Oshii, Miyazaki, Kon). We will focus on developing visual reading skills to come up with original interpretations of these works, and on comparing different media to make them shed light on one another.

Class Format: discussion

ARTH 587 (S) Crash! The Car Accident as Myth and Metaphor in American Art and Visual Culture

A year after MoMA elevated machinery to high art in 1934, Grant Wood painted *Death on The Ridge Road* (Williams College Museum of Art), a depiction of the deadly side of the streamlined modern machines that Alfred Barr might have presented at MoMA. A generation later, Andy Warhol's *Death and Disasters* series multiplied gruesome images of crushed cars and bodies to numbing effect. During the ensuing years, both Jackson Pollock and David Smith (among others) became traffic fatalities. Roughly bookended by the Great Depression and the 1960s, but also considering works of art and visual materials before and after those parameters, this seminar will explore the stakes of car crash imagery for American artists and culture. Readings may include topics in trauma studies, automotive technology, physics, posthumanism, law, and object oriented ontology as well as grounding participants in American art and history of the middle third of the twentieth century. Participants in the course will also have the opportunity to help shape the content, themes, and narrative of an exhibition on car accidents in American art being organized by WCMA.

Requirements/Evaluation: oral presentations and written assignments

ARTH 10 (W) Inventing Joan of Arc: The History of a Hero(ine) in Pictures and Film

Cross-listings: WGSS 10 ARTH 10

Primary Cross-listing

Joan of Arc (known during her own lifetime most commonly as Jeanne "la Pucelle," or Joan "the Maid") was one of the most dynamic and yet enigmatic personalities of the European Middle Ages. Born into a peasant family in the French border province of Lorraine in 1412, she gained control of an army, won brilliant military victories, crowned a king, and was burnt at the stake as a heretic, all before her twentieth birthday. Triply marginalized by gender, age, and socio-economic status, she nonetheless managed to shake the Church and State establishments to their very core. But who was Joan of Arc? Nationalist martyr? Pioneer feminist? Champion of the people? Instrument of God's grace? Victim of post-traumatic stress disorder? Exemplary transgender warrior? Over the centuries since her death, artists--and not just politicians and scholars--have attempted to answer this question, creating myriad visions of la Pucelle under the influence of an ever-changing lens of contemporary tastes and concerns. Through readings and discussion, this course will survey the history of representations of Joan of Arc in painting, prints, sculpture, and film, from the time of her death to the present.

Requirements/Evaluation: 10-page project or comparable creative project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: statement of interest

Grading: pass/fail only

Materials/Lab Fee: \$10 and cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 11 (W) Looking at Contemporary Documentary Photography

Cross-listings: ARTH 11 GERM 11 COMP 11

Secondary Cross-listing

This course explores the evolution of modern documentary photography. We will start with a look back to the work of Lewis Hine, August Sander, Dorothea Lange, Walker Evan and the Magnum Agency photographers. We will then jump to mid 20th century work of Robert Frank's *The Americans*, and how Frank's singular vision deeply shaped the next generation of photographers working the American streets and landscape. Diane Arbus, Vivian Maier, Bruce Davidson, Lee Freidlander, William Klein, Danny Lyon, Gary Winogrand are some of the photographers whose work we will get to know well. Discussions will include the new wave of independent and Magnum photojournalists (Phillip Jones Griffiths, Josef Koudleka, Susan Meiselas, Gilles Peress, James Nachtwey, Alex Webb, Ron Haviv and Tyler Hicks) and the wars from Vietnam to Bosnia to Iraq and Syria they cover as well as the personal visions they explore. Insight into the diverse currents of documentary photography will be covered through the work of Bill Burke, Larry Clark, Larry Fink, Nan Goldin, Emmet Gowin, Sally Mann, Mary Ellen Mark, Nicholas Nixon, Richard Misrach, Joel Sternfeld, Birney Imes, Regan Louie, Edward Burtynsky, Laura Letinsky and Simon Norfolk. Our last classes will be an exploration of social media and the proliferation of diverse voices emerging in documentary photography. The class will meet three mornings a week for two hours. Slide presentations will occupy half

of the first meetings and give way to discussion of issues in documentary photography. Each student will be required to make a brief presentation to the class on a documentary topic of their choice. A final paper expanding on this documentary topic will be due at the end of the course. Students will be evaluated on their classroom presentation, general participation and their written work. A field trip to New York will let us see first hand works from the collections at MoMA, etc. Adjunct Instructor Bio: Kevin Bubriski's fine art photographs are in the permanent collections of the Museum of Modern Art, Metropolitan Museum of Art, San Francisco Museum of Modern Art, and Bibliotheque Nationale, Paris. Kevin has received Guggenheim, Fulbright and NEA fellowships. Bubriski has published eleven books of photography including *Nepal 1975-2011* published by Peabody Museum Press of Harvard University in 2014 and *Legacy in Stone: Syria Before War* in 2019 with powerhouse Books in New York.

ARTH 15 (W) Introduction to Indian Drawing Techniques

Cross-listings: ARTH 15 ARTS 15

Secondary Cross-listing

The jewel-like world of Indian painting is famous for its stylized naturalism and mastery of line. This course will introduce students to the technique and imagery of this art form. The course is designed as a workshop in which students will learn to use traditional materials and techniques. The class will focus on the practice of copying and taking inspiration from original masterworks of Indian art housed in the Williams College of Museum of Art (WCMA). By engaging with a non-western practice, the aim of the course is to expose students to a pluralistic engagement with art and art history. In addition to learning the basics of drawing and painting techniques, students will also learn paper and pigment preparation. The workshop will focus on the *siah qalam* brush and ink rendering technique, the backbone for the more advanced techniques of *neemrang* and *gadrang*, which pertain to color application. Working with original artworks will help students situate the hands-on study of Indian painting practice alongside exemplary historical examples. Students will have the opportunity to exhibit their final projects at Spencer Hall.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: response to one question: why is it important for you to take this course?

ARTH 16 (W) Sensing Place

Cross-listings: ENVI 16 ARTH 16

Primary Cross-listing

Bridging art history and environmental humanities, this course will explore how the experience of landscape, a term that privileges the visual, is

impacted not only by sight but by sound, touch, smell, and even taste. We will look at the way artists have translated embodied experiences of landscape into paint and other media as we ask what is lost or gained, just as we will consider what the taste of tea or oysters might tell us about the history and present environment of the places they come from. By looking at how artists and writers have theorized and experienced landscapes in the past, we will explore how those histories inform how and what we sense today. We will ask: how is the environment experienced (and narrated) through our bodies? How do human interactions with nature produce a "sense" of ownership and domination? Is something more symbiotic possible? To answer these questions, we will look at works of art in the collections of WCMA and The Clark, read work by historical and contemporary writers, and engage in experiential learning that activates all senses, including hiking, tasting, and making. Evaluation will be based on participation, including weekly journal reflections, and the completion of a 10-page written assignment that will combine creative reflection and research. Attendance and active participation in class discussions will also be required. We will typically meet three times a week for three-hour sessions, with some additional required field trips. Adjunct Instructor Bio: Elliot Krasnopoler is a Doctoral Candidate in the History of Art at Bryn Mawr College, where he is completing a dissertation about the intersections of contemporary art, landscape, and time. He holds an M.A. in Art History from Williams College, and a B.F.A. in Photography from the Rochester Institute of Technology. He lives in North Adams, MA, and is an avid hiker, tea enthusiast, and mineral collector.

Requirements/Evaluation: 10-page paper

ARTH 19 (W) The Restless Collection

Cross-listings: INTR 19 LEAD 19 ARTS 19 ARTH 19

Secondary Cross-listing

The Restless Collection, led by San Francisco-based independent curator Jordan Stein with curatorial staff from the Williams College Museum of Art (WCMA), investigates the WCMA permanent collection and other regional art collections as resources for the Williams College community and beyond. With an eye toward the coming Presidential election and ideas of resistance, agitation, and power, students will conduct both a broad survey of the WCMA collection and in-depth case studies of several artworks. The course's final project includes generating a speculative exhibition proposal against the backdrop of the current political moment. Fundamental questions include: How is an art collection assembled, let alone maintained and mediated? How is a collection evidence of a certain philosophy or proof of a particular position? Should collecting habits change in times of significant political disquiet? What is an exhibition and who governs the terms of its engagement? How has the form been activated not only by curators, but also by artists as a poem, proposal, or declaration? Through reading, dialogue, and hands-on learning, we develop strategies for how to dust off, contextualize, and re-contextualize complex collection artworks in public art galleries by employing "the exhibition" as a vehicle for ideas. The course further offers the chance to collaborate with WMCA and WC staff, including representatives from various departments, including archives, curatorial, collections, engagement, digital media, installation/preparation, and more. Potential site visits include Hancock Shaker Village, Bennington Museum, Williamstown Historical Society, and other special meetings. Adjunct Instructor Bio: Jordan Stein is an independent curator and collaborator with an interest in expanded models and methods of exhibition-making, over-looked and under-sung histories of art, and linking the past and present through the varied presentation of critical objects, non-objects, and ideas. He has organized exhibitions in a variety of institutions and scales, including the Berkeley Art Museum and Pacific Film Archive, Artists Space (New York), Matthew Marks Gallery (New York), the Renaissance Society (Chicago), The Glass House (New Canaan, CT), and San Francisco City Hall. He is a co-founder of the interdisciplinary collaborative group Will Brown, which realized over three dozen exhibitions and programs in their Mission District storefront from 2012-2015 before working parasitically with other organizations. He founded Cushion Works, a just-in-time gallery on the second floor of an active cushion-making workshop, in 2017. With Will Brown, he is the author of Bruce Conner: Brass Handles, and with Jason Fulford is the editor of Where to Score, a collection of hippie-era classified advertisements. Please see <http://jordanstein.com/> for more information.

ARTH 23 (W) STEAM Sandboxes: Public Pedagogy and Transformative Learning

Cross-listings: ARTH 23 PSYC 23 ARTS 23

Secondary Cross-listing

Where, when, and how do children learn outside of school? What is STEAM education, and who has access to it? Why does creative youth development matter in our society? Creative problem solving--the flexibility, persistence, and openness to generate and apply novel solutions to problems--is essential for success in school, the workplace, and beyond. The Bay Area Discovery Museum (BADM) has developed a pedagogical framework for educators to build children's creative problem-solving skills through intentional experiences. We will use this framework to guide our exploration of informal learning environments, including museums, libraries, and other out-of-school places, investigating how children--and adults in their lives--access learning in STEAM content areas, especially the sciences and the arts. In addition to class meeting time, we plan to take two or three day-long field trips to local and regional museums and other educational sites. Alongside our research in the field and discussions in class, students will create a journal in the medium of their choice (written, visual, aural) to document and reflect on their learning. Students will also work individually or collaboratively to design a prototype for a STEAM exhibition, event, song, podcast, video, or project of their choosing that they will present at the end of the session. We welcome anyone with an interest in contributing to the field of education, making, creating, and innovating! This course is not limited to students with backgrounds in psychology, the sciences, or art. Class is scheduled for M and W afternoons with mandatory all- and partial-day field trips scheduled during Weeks 1-3. Dates of the field trips are TBD, and may fall either on Tuesdays, Wednesdays, or Thursdays. Helen Hadani, Director of Research at BADM, and Molly Polk, from the Center for Learning in Action, will co-teach this course. Adjunct Instructor Bio: Molly was the founding education coordinator and curator for Kidspace at MASS MoCA and has taught children of all ages in informal learning environments, including museum galleries and dance studios, ski trails and forest floors, food pantries and assisted living centers. She works with Williams students who teach and mentor K-6 students at Brayton and Greylock Schools in North Adams. Her research areas of interest include student-driven learning and equity of access in K-12 public education. Adjunct Instructor Bio: Helen Hadani is the Director of Research at the Center for Childhood Creativity (CCC)--the research and advisory division of the Bay Area Discovery Museum (BADM)--and authors publications that synthesize scientific findings on children's learning and cognition for parents and educators.

Requirements/Evaluation: final project (individual or collaborative) in a medium of choice, accompanied by an informal presentation; as part of the process in developing their final projects, students will work together to provide feedback to each other prior to presenting their work; a rubric based on the CREATE framework will be available for students to use as a guideline for their projects as they consider pedagogical approaches, design features, and the learning outcomes for young people

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who have relevant experience through course- or fieldwork in Psychology and/or education will be given priority

Grading: pass/fail only

Materials/Lab Fee: \$35

- Kenny Rivero, Visiting Assistant Professor of Art
- Pallavi Sen, Assistant Professor of Art
- Stefanie Solum, Professor of Art
- Carolyn J. Wargula, Visiting Assistant Professor of Art

The Department offers students different paths to explore the vital connection between visuality and creativity. With courses of study in the History of Art and the Practice of Studio Art (or a combination of History and Studio), the Major is designed to train students to develop the technical, conceptual, critical, and historical tools they need to engage the visual world.

ADVISING

Majors are expected to discuss their choice of courses and path through the major with their advisor or another professor in the department. Official departmental advisors for each route through the major (listed here below) are available to field general questions concerning curriculum, requirements, and planning to study away.

Art History Faculty Advisor: Guy Hedreen

Art Studio Faculty Advisor: Amy Podmore

History and Studio Faculty Advisor: Ben Benedict

ART STUDIO

The Studio division of the art major has been structured to develop students' perceptions and imaginations as they investigate a variety of visual media and to foster the development of a critical understanding of making art to support creative interests.

Major Requirements

The Studio Art major requires a minimum of nine courses:

ARTS 100 Drawing I

One art history course (preferably taken by the end of the junior year)

A combination of at least three 100 and 200-level courses in three different media (ARTS 100 and tutorials do not satisfy this requirement)

ARTS 319 Junior Seminar

One 300-level ARTS course

One elected ARTS course

ARTS 418 Senior Seminar

The numbered sequence of courses in the Studio Art major is intended to develop knowledge and skills appropriate to students' levels of experience, ultimately supporting original, independent work at the 400-level. ARTS 100 is an introduction to the principles of drawing and design, which are the foundation of visual expression. An art history course not only increases visual knowledge of other periods and cultures, but also provides exposure to the methods of visual analysis. 100 and 200-level ARTS courses introduce the relation between form and content and serve as introductions to a variety of media including architecture, painting, performance, photography, printmaking, sculpture, and video. 300-level courses place greater emphasis on the application of visual skills to thematic concerns, and to the development of the student's individual vision. The capstone to the major, ARTS 418, provides a comprehensive, professional exhibition experience. Students not only define, research, and create an original body of work, but are also engaged in all aspects of producing an exhibition at the Williams College Museum of Art.

The faculty encourages students to begin exploring studio art in the first year so that they can fully explore a variety of media in preparation for independent work in the junior and senior year. A successful route through the major might look like this:

First year: two classes at the 100 and/or 200 level in different media and an art history class. We encourage students to explore media with which they are unfamiliar, as doing so provides a good base and allows for more flexibility later on. While there is only one art history class required for the major, we encourage students to take advantage of the rich art history offerings throughout their four years of study.

Second year: at least two 100 and/or 200 level courses.

Third year: Junior seminar, a 200- or 300-level course and a possible second art history class.

Fourth year: one 300-level course, ARTS 418, and other courses chosen to support your individual interests.

HISTORY AND STUDIO

This route offers students the opportunity to propose a course of study that investigates a particular medium or a particular issue bridging both wings of the department. Examples of past History and Studio projects include topics related to architecture, curating, and performance, but are not limited to these.

In many cases, it is better to choose an Art History or Studio Art route, taking additional courses in the other wing, as desired. The History and Studio route is offered as a third option and requires approval.

The application for the History and Studio route must include both a written statement and a list of proposed courses. It must be approved by an advisor from both Art History and Studio Art and be submitted to the department's administrative assistant before registering for the major.

History and Studio students whose projects have a Studio emphasis have the opportunity to take the Senior Tutorial (ArtS 418) with permission of the instructor and to participate in the senior Studio exhibition. Those seniors with a History emphasis can apply to write a thesis and, if accepted, will be admitted to the required Winter Study and Senior Thesis Seminar (ArTH 494) which culminate in a thesis and thesis presentation. Or, a student may propose a senior independent study.

Major Requirements

The History and Studio major requires a minimum of nine courses:

Any TWO of the following four courses: ARTH 101, 102, 103, or 104

ARTS 100-level course

ARTS 200-level course

ARTH 301 Methods OR ARTS 319 Junior Seminar

ARTH 400-level OR 500-level course

ARTS 300-level course OR (with permission) ARTS 418 Senior Seminar

ARTH elective

ARTS elective

One advisor from Art History and one from Studio Art must sign off each semester before a student may register for classes.

THE DEGREE WITH HONORS IN ART

Students who wish to become candidates for the degree with honors must show prior evidence of superior performance in the major as well as research capabilities to carry out the proposed project.

Art Studio

Studio art concentrators who wish to be candidates for honors are required to take an extra studio course, of their choosing, for a total of ten courses. One of the ten courses must be the 400-level Senior Seminar (ARTS 418). Students must also take the Honors Independent Study course (ARTS 31) during Winter Study of their senior year. Studio faculty will provide feedback on the progress of the honors project at the beginning of the Spring semester.

Honors candidates enrolled in the Senior Seminar must demonstrate prior experience in the media chosen for the honors work. This proof may consist of one or more 200-level courses in the medium, course work at the 300 level, and/or a portfolio demonstrating the student's proficiency in the media chosen for the honors project. This work must be presented to the instructor of the Senior Tutorial at the start of the Spring semester. At the end of the Spring semester of senior year, honors candidates will orally defend their work in the senior exhibition at WCMA. The entire studio faculty will attend each defense. Based on the work and the oral defense, the studio faculty (as a whole) will designate honors, high honors or no honors.

History and Studio

The History and Studio route to honors is an integral combination of Studio Art and Art History. Fall semester of senior year, a candidate for honors in History and Studio makes a project proposal to two faculty members, one from each wing of the department. If both advisors agree to supervise the project, the candidate enrolls in either the Studio or the History required Winter Study course or an independent Winter Study. At the end of Winter Study the progress of the project is assessed by the advisors. In the spring semester, the student enrolls either in the Senior Seminar (ArtS 418 with the permission of the instructor), or in the Senior Thesis Seminar (Arth 494 with the permission of the instructor), or in an Honors Independent Study. If the project is exhibited in the senior Studio exhibition it is judged by the art faculty, (including the two advisors for the project), along with the other exhibiting honors candidates.

Otherwise, the final project is submitted to the two faculty advisors and, in the case of History, also to the instructor of the Senior Thesis Seminar, who will determine whether or not it will receive honors.

STUDY ABROAD

The Art Department encourages students to travel during Winter Study, and to study abroad for a semester during the junior year. Students planning on studying abroad must: consult a departmental advisor, leave a copy of their Study Away Petition on file in the Department, and consider the required junior seminars (ARTH 301 and ARTS 319) that prepare students for the independent research and/or independent artistic production which is the focus of the senior year.

Art Studio

Studio Art Majors must take the required Junior Seminar (ARTS 319) in the fall semester of their junior year, unless they are planning to study abroad for a full year, or unless they have permission of the chair of the department (in these cases, they may take the required class in their sophomore or senior year). The Department does not grant pre-approval or provisional credit for study abroad courses; studio majors must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the case that original work is not available). No more than 1 requirement for the major can be taken per semester abroad (2 if one of the courses is in art history). Courses must be in fine arts fields to qualify for major credit. ARTS 319 and ARTS 418 cannot be fulfilled abroad.

History and Studio

History and Studio majors must plan accordingly for their elected junior seminar. For art history courses taken abroad, history and studio majors can seek provisional credit for courses that appear to satisfy requirements for the major. No provisional credit is possible for studio courses; students must submit their portfolios for review, and will receive credit only if the work completed abroad is deemed roughly equivalent in quality and quantity to coursework at the College (students should contact the Departmental advisor in studio for the portfolio review, and digital photographs are fine in the

case that original work is not available). No more than 2 major requirements may be satisfied per semester while abroad (one in studio, one in history), with no more than 3 courses total. History and studio majors cannot satisfy ARTS 319 or any 400-level courses abroad.

ARTS 100 (F) Drawing I

In childhood everyone draws. Like language drawing is a basic human tool to observe and interpret the world as well as to make comment and find agency within it. As an introduction to art making, this course will provide basic design and conceptual skills to engage feeling, develop content and communicate with others. Divided into sections on line, composition, proportion, value and space, the course is designed for those with no previous experience in drawing, but it is flexible enough to challenge experienced students. New concepts are introduced each week in slide talks and developed in workshops and through homework assignments.

Requirements/Evaluation: successful application of new skills, development of concept, participation in class, effort, timeliness and attendance

Prerequisites: none

Enrollment Limit: 18

Expected Class Size: 18

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: TBD lab fee charged to term bill

Distributions: (D1)

Fall 2019

STU Section: 03 M 1:10 pm - 3:50 pm William B. Binnie

ARTS 100 (S) Drawing I

Drawing can provide a vehicle for encountering and interpreting your experiences. This course will heighten your awareness of the visual world, teach basic drawing skills, and demonstrate how drawing operates as a form of visual exchange. A variety of materials will be covered as you explore the 2-dimensional concepts of line, form, proportion, gesture, spatial depth, and value. Towards the latter part of the semester, more emphasis will be placed on the use of drawing as idea, and you will have the opportunity to express yourself through the visual language of drawing.

Requirements/Evaluation: the quality and quantity of work produced, depth and quality of investigative process, participation in critiques, and attendance

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Art Majors (declared); students who have previously enrolled but have been dropped from the course, first-year and sophomore students

Expected Class Size: 18

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: TBD lab fee charged to term bill

Distributions: (D1)

Spring 2020

STU Section: 03 Cancelled

ARTS 100 (S) Drawing I

This course is designed to introduce the fundamentals of drawing. A significant portion of class time will be devoted to learning some of the basics of drawing, such as line, gesture, composition, and value. Acquiring technical skill is an important goal of this class, and intensive weekly assignments are a significant part of that process.

Requirements/Evaluation: quality of work produced as well as successful completion of all assignments and attendance

Prerequisites: none

Enrollment Limit: 18

Expected Class Size: 18

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: TBD lab fee charged to term bill

Distributions: (D1)

Spring 2020

STU Section: 01 T 9:00 am - 11:40 am Thursday Org Mtg 8:00 pm - 8:25 pm Laylah Ali

STU Section: 02 T 1:10 pm - 3:50 pm Thursday Org Mtg 8:00 pm - 8:25 pm Laylah Ali

ARTS 100 (F) Drawing I

This course is designed to introduce students to perceptual, experiential and analytical moments associated with the language of drawing, and to do so in ways that offer the opportunity to see the world with greater clarity, and with a broader understanding of art and the visual language. This course provides technical skills associated with observational drawing, experiential moments with a variety of materials, and the opportunity for self expression and the communication of ideas. Each studio class blends drawing practices and exercises designed to further one's understanding of the language of drawing, and more broadly, offers a foundation for further study in the visual arts.

Requirements/Evaluation: individual critiques, a mid-term critique, a final portfolio submission, attendance, effort and participation

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: Art Majors (declared); students who have previously enrolled but have been dropped from the course, first-year and sophomore students

Expected Class Size: 18

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: TBD lab fee charged to term bill

Distributions: (D1)

Fall 2019

STU Section: 01 M 7:00 pm - 9:40 pm Frank Jackson

ARTS 100 (F) Drawing I

An immersive introduction to all forms of paper based mark-making. Cycling through traditional and then experimental approaches of rendering a form/figure/idea, participants will develop a sensitivity to light, texture, composition, material, and most importantly, LINE! The emphasis will be on acquiring strong technical skills through intensive work in class and outside of it.

Requirements/Evaluation: weekly assignments, mid-term project, final projects, attendance and participation, generous presence

Prerequisites: none

Enrollment Limit: 17

Enrollment Preferences: Art/Art History majors

Expected Class Size: 17

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

STU Section: 02 W 1:10 pm - 3:50 pm Pallavi Sen

ARTS 101 (F) Revolutionary Film History and Short Film Screenwriting

Revolutionary film is found mostly outside the mainstream movie system: the Genre flick, the B-movie, the Queer film, the Blacklisted film, the banned film, the independent filmmaker, the female director, the director of color, the Skid-Row studio, the documentary. This course draws from principles that the personal is political, political metaphor for artistic subterfuge is primary and that revolutionary filmmakers are involved in a vast range of methods to create their work. This course will introduce you to key moments of groundbreaking, innovative and unruly cinema visions throughout history as well as contemporary critical art practice. From this basic foundation the student also will conceive, format and write 2-3 short film scripts either to be feasible productions or as pure fantasy visions. You will be encouraged on how to lead your thoughts with images and shape an active meaning in film. You will absorb how to think and feel boldly, to spring ideas directly from your pre-consciousness and your current political thought. You do not need filmmaking experience to enroll. This course will examine the work of Spike Lee, Nancy Savoca, David Cronenberg, The Maysles Brothers, The Wachowski Siblings, Claudia Weill, Pedro Almodovar, Robert Altman, Sam Fuller, Neil Jordan, Andrew Bujalski and Jordan Peele. We will also read and discuss critical studies including readings by Margo Jefferson, James Baldwin, Sidney Lumet, J. Hoberman, Laura Mulvey, Jose Munoz, Fran Lebowitz, Moyra Davey, and others.

Class Format: workshop and screenings

Requirements/Evaluation: class attendance, film screenings, short film screenwriting

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: juniors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: lab fee TBD will be added to the student's term bill

Distributions: (D1)

ARTS 102 (F) In the Room Together: An Introduction to Dance, Theatre, and Live Performance

Cross-listings: ARTS 102 DANC 102 THEA 102

Secondary Cross-listing

This course offers an introduction to the time-based art of performance, focusing on the embodied and social act of collaboration. Students will explore through a rotating studio and seminar-based format methods for creating and approaching art across a range of time-based media (dance, theatre, performance art, social media, spoken-word poetry), providing a foundation for the expression of ideas through performance. Over the term, students will develop, workshop and perform site-specific pieces, culminating in a final public presentation to the community. Through independent research projects, writing and class discussion, students will study makers whose work unsettles the boundaries of dance, theatre, and performance, such as: Anne Bogart, Bill T. Jones, Pina Bausch, Meredith Monk, Lin Manuel-Miranda, E. Patrick Johnson, Young Jean Lee, and Beyoncé. Evaluation will be based on an assessment of the student's work, participation, commitment, practice, curiosity, creativity, and collaboration with peers. Students will be required to attend '62 Center Series programming as may be required to attend other performance events as well. This course is open to students at all levels of experience and is a gateway and requirement to the major in Theatre.

Requirements/Evaluation: assignments will include writing reflections, showings of works in progress, oral presentations, a final performance, and a 5- to 7-page curatorial paper

Prerequisites: none

Enrollment Limit: 18

Enrollment Preferences: students considering the major or already majoring in Theatre

Expected Class Size: 18

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course serves as the gateway to the major in Theatre and is a prerequisite for several courses in the Theatre major

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 102 (D1) DANC 102 (D1) THEA 102 (D1)

Not offered current academic year

ARTS 107 (S) Creating Games (QFR)

Cross-listings: ARTS 107 CSCI 107

Secondary Cross-listing

The game is unique as the only broadly-successful interactive art form. Games communicate the experience of embodying a role by manipulating the player's own decisions, abstraction, and discrete planning. Those three elements are the essence of computation, which makes computer science theory integral to game design. Video games also co-opt programming and computer graphics as new tools for the modern artist. As a result, games are collaborative interdisciplinary constructs that use computation as a medium for creative expression. Students analyze and extend contemporary video and board games using the methodology of science and the language of the arts. They explore how computational concepts like recursion, state, and complexity apply to interactive experiences. They then synthesize new game elements using mathematics, programming and both digital and traditional art tools. Emphasis is on the theory of design in modern European board games. Topics covered include experiment design, gameplay balance, minimax, color theory, pathfinding, game theory, composition, and computability.

Class Format: lecture and studio

Requirements/Evaluation: participation, studio work, and quizzes

Prerequisites: none; no programming or game experience is assumed

Enrollment Limit: 24

Enrollment Preferences: first-year students

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: not open to students who completed a Computer Science course numbered 136 or above; does not count toward the Art Major

Materials/Lab Fee: \$25 lab fee charged to term bill

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 107 (D3) CSCI 107 (D3)

Attributes: FMST Core Courses

Not offered current academic year

ARTS 114 (F) Art into Activism

This introductory studio art class will examine how art has been and can be engaged with activist and political causes. Can art be created from social or political ideas? Is all political art merely propaganda? What makes a work "political"? What does artistic work that is topical, informed, and critical look like? In addition to looking at various works by contemporary artists and used in political movements, we will be working on weekly assignments that will introduce students to 2-D image making, video, and performance. This class is a hands-on studio class which will require hours outside the class working on projects.

Requirements/Evaluation: projects, assignments, class participation, attendance

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: first-years and sophomores

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ARTS 116 (F) Monotypes

Spontaneous and delightfully unpredictable, the monotype is a style of printmaking that creates exactly one image by applying ink onto a flat surface,

and transferring it to paper using pressure - by hand or a through a printing press. It is neither drawing nor painting, it is both! In this class students will use the monotype to heighten their sensitivity to line, colour, tone, texture, transparency, pressure, ink viscosity, and overall composition. They will also explore techniques like tracing, stencilling, chine-collé, reductive + additive mark making, and hand rubbing, while acquainting themselves with the history of the medium -- its practitioners, and its scope. No prior experience in drawing or painting required, though it is quite welcome.

Requirements/Evaluation: quality of work, investment towards studio time, active presence in discussions and critique, attendance

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Arts majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

ARTS 118 (F) Video Introduction and Theory

Video is an introduction to the moving image as a fine arts medium. The course will involve hands-on production as well as contemporary screenings and readings that demonstrate elements of the medium. The course will look at basics of directing actors, sound design, exhibition context, on-line distribution, documentary, high and low production values, cultural appropriation, screenwriting, and film analysis. The course will introduce shooting and editing skills, including preproduction skills such as storyboarding and scheduling, production skills such as directing, shot organization, shot composition, shot lists, lighting, sound recording and postproduction editing skills in a range of styles. We will focus on film production as a feasible practice, set safety and a conduit towards personal expression. Some of the artist work we will examine will include Dee Rees, John Krokidas, Rick Alverson, Jonathan Caouette, Jennie Livingston, Christopher Nolan and David Byrne, among others.

Class Format: hands-on production, film screenings, film analysis

Requirements/Evaluation: class participation, video production

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: juniors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: \$150 lab fee on term bill

Distributions: (D1)

ARTS 120 (S) Introduction to Performance Art

Cross-listings: ARTS 120 THEA 120

Primary Cross-listing

Historically, artists have turned to performance art during times of collective trauma to observe, analyze, and deconstruct established systems of power. This course will explore the legacy, theory, and practice of this radical and subversive genre. Equal parts studio and seminar students will engage in open dialogue based on assigned readings, screenings, and museum/gallery visits. Starting with the emergence of Dadaism during World War I, and exploration of works by artists that will include: Adrian Piper, David Hammons, Lynda Montano, Chris Burden, Clifford Owens, and Anna Mendieta, students will gain an understanding of the mechanisms of performance: The body as object, The Gaze (the dynamics of viewing/being viewed), active and inactive participants, and breaking the fourth wall. This class is open to all students that are willing to embrace the awkwardness of their humanity and the vulnerabilities of our collective bodies.

Class Format: combined studio/seminar

Requirements/Evaluation: completion of 4 assigned projects, assigned readings, active class participation, creation of an independent final project, attend scheduled lectures, museum/gallery trips

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art Studio majors, first-years, sophomores

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: \$100 lab fee charged to term bill

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 122 (F)(S) Photography, Identity and the Absence of Representation

This introductory level course offers an in-depth exploration of the camera and image by utilizing photographic digital technology. Emphasis is placed on the camera's relationship to the body and constructions of identity. Students will develop a fundamental control of photographic processes through technical exercises, experimentation, and field and studio experience. Students will learn how to use DSLR cameras, editing and digital printing techniques to create a personal body of work that examines the medium's role in representing (or not representing) identities. Additionally, lecture presentations and thorough critique will foster theoretical and visual literacy for the analysis of works. How is photography implicated in the construction and performance of identity? How does it complicate national, cultural, gender, race and sexual identity.

Class Format: this class will take place in the classroom as well as in the studio and outdoors; there will be 1-2 field trips

Requirements/Evaluation: students midterm and final critique of their body of work and accompanying artist statement

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: Art majors who have not yet taken an introductory photography class

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Materials/Lab Fee: \$250 standard lab fee charged to term bill

Distributions: (D1)

ARTS 128 (S) Introductory Video

In this course we explore how the proliferation of video has transformed the way we relate our own image, and that of others. Video has become a platform for hypervisibility. In an era of selfies, live-streaming, state sanctioned violence (and its digital record), how might we use video as a tool of empathy and accountability? We will pursue answers to these questions through the act of making. In this introductory level course students will gain facility in Adobe Premiere and other post-production tools in the Adobe Creative Suite. Students will explore camera technique, lighting, and how to work with appropriated footage. We will look at early and contemporary video works in order to situate the work being made in class. Video Art will also be contextualized within vernacular applications of video. Through regular technical exercises, readings, and group critiques, students will learn how to use video as critical tool in their practice.

Class Format: studio

Requirements/Evaluation: evaluation will be based on discussion participation and the technical and conceptual strength of the projects, with consideration given to individual development

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: students majoring in Studio Arts

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: \$150.00 fee charged to term bill

Distributions: (D1)

ARTS 129 (S) Institutional Critique (DPE)

Cross-listings: ARTS 129 THEA 129

Primary Cross-listing

This introductory course will investigate the performance potential of the radical art making methodology known as Institutional Critique. Influenced by Situationalism, and the Fluxus movement, Institutional Critique emerged as a way for artists to respond to the art worlds elitism, monopoly on culture, and dependency on Capitalism. Through collaborative performance based projects and readings students will explore the possibility of art to critically intervene in the hegemonic order and insight change within power relationships. We will also explore related movements such as Socially Engaged Practice, a term that describes art that is participatory and focuses as people as the medium. Artists covered will include: Thomas Hirshhorn, Tim Rollins, and Andrea Fraser. You do not need any prior experience just a willingness to use the power of voice and body.

Requirements/Evaluation: three collaborative projects, final independent project, readings, active participation, museum gallery visits, quality of work

Prerequisites: none

Enrollment Limit: 18

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: \$125 lab fee

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 129 (D1) THEA 129 (D1)

Difference, Power, and Equity Notes: Through a diverse selection of essays, visual art, and contact with prominent voices operating at the intersection of theory and practice students will examine how the concentration of power in the United States and Europe has contributed to inequities within educational, legislative and artistic institutions. Students will then transfer what they've learned to a research based visual practice that prioritizes social discourse.

Not offered current academic year

ARTS 130 (S) Material Issues

What kind of maker should one be, after reading the latest climate report? The tendency to build, design, love, and collect objects - in our shelves and in our museums and in our landfills - is central to the human story. We have (serious) material issues! This class looks at individuals that hold ecology and what the environment asks of us close to their heart and their making, moving beyond 'green' as metaphor. We will study creative practices that work in partnership with land, with forests, agriculture, radically sustainable materials, food and food cultures. Through the semester, we will alter how we consume and what we consume, we will learn to repair, learn to divest, and learn how to make our own: Food! Clothes! Quilts! Containers! Pigments! _____! Our projects will be cross cultural, interdisciplinary, slow, working at the pace of seasons, working with what is already present in our homes, in our neighbourhoods. Through guided assignments and discussions, students will draft a personal and collective manifesto detailing their relationship to material and climate change, and develop a final project, in any format, that engages with it. We will work with our hands often, and well.

Requirements/Evaluation: active and thoughtful participation in class, sensitive and dedicated approach towards assignments

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: Art majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ARTS 132 (F) Sculpture: The Human Form in Contemporary Art

The figure has an intrinsic relationship to us and our lives and has provided artists with creative challenges throughout time. This course uses the human form as the subject to introduce students to the three-dimensional world of sculpture. It combines the traditional study of figure modeling in clay, with a more contemporary approach to how the figure is used in art today. The first part of the semester has you working from observation while learning how to realistically construct the human figure in the third dimension. You will work in clay, gaining skills in modeling, anatomy, the study of proportion, gesture, texture, negative and positive space and balance and gravity. We begin aiming for realism and move towards abstraction. The second part of the term will provide the opportunity to explore a more open and contemporary approach to how sculpture utilizes the figure to express meaning, explore materials and employ form. You will be introduced to a variety of skills, materials and concepts as you learn to work in the round making a form interesting from all views. Ultimately you will begin to explore and develop the ability to communicate your ideas in a visual manner as well as comment on the human condition.

Requirements/Evaluation: graded on your ability to speak powerfully in this language; grading also takes into account: effort, attitude, creativity, studio responsibility

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: Art Studio majors have priority

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: \$175 to be charged to term bill

Distributions: (D1)

Fall 2019

STU Section: 01 R 1:10 pm - 3:50 pm Amy D. Podmore

ARTS 200 (F) Project: Costume-Design, Performance, and Beyond

Cross-listings: ARTS 200 THEA 305

Secondary Cross-listing

This course is an intensive study of costume design. Costume designers are always aware of the world around them. They look, listen, reflect, and record. They use inspiration, research, imagination, and innovation for their creations. They simultaneously observe the smallest detail while also picturing the larger world surrounding the pieces they develop. The course focuses on the designer's process, which entails in part: script analysis, collaboration, research, color theory, basic design principles, rendering techniques, fabric research, organizational skills, and presentation of designs.

Requirements/Evaluation: multiple design assignments including a detailed final design project, costume labs, image and research files, costume sketchbook, short papers, committed participation, and attendance; students are required to attend two to three Theatre department or approved performances during the semester; students will also be expected to partake in intelligent critiques of fellow classmates' design work

Prerequisites: successful completion of any 200-level course in any of the fine or performing arts or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Theater and Art Studio, sophomores and juniors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy any requirements for the Art major

Materials/Lab Fee: \$100 lab fee charged to term bill

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

STU Section: 01 R 1:10 pm - 3:50 pm Deborah A. Brothers

ARTS 201 (S) Worldbuilding: Design for the Theater

Cross-listings: ARTS 201 THEA 201

Secondary Cross-listing

This course examines designers' creative processes as they work to imagine the fictional worlds of theatrical productions. Over a series of practical projects in multiple design disciplines, we will develop techniques for eliciting an initial creative response to a text; developing that response into a point-of-view; communicating that point-of-view with collaborators; and solving the practical needs of the production. Particular emphasis is placed on how design elements synthesize with each other (and with the imagined work of the actors and director) to form the larger intellectual, emotional, and physical context of the production as a whole. Students will adopt various creative roles over a series of projects, giving exposure to the working processes of designers specifically, and that of all collaborators in a theatrical production more generally. Methodologies for critical feedback, as well as presentation skills and techniques, will be taught as crucial elements of the artistic and collaborative process.

Requirements/Evaluation: committed participation in class discussion and feedback; and the thoughtful, timely completion of four design projects plus a month-long final

Prerequisites: THEA 101 or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: Theatre majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course is a prerequisite for all upper-level design and directing courses; this course does not count toward the Art major

Materials/Lab Fee: \$125 for materials and copying charged to term bill

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 215 (F) Sustainabuilding (verb)

Sustainability considerations figure prominently (and always have) in good building design. This architectural design studio will include instruction, research, and reading about current design and energy strategies. These lessons will be applied in two or more design problems. Drawings and models will be critiqued in class reviews with outside critics.

Requirements/Evaluation: quality of design and presentation

Prerequisites: none but ARTS 220 and/or ENVI 108 are recommended; permission of instructor is required; preregistration does not guarantee admission to the course

Enrollment Limit: 15

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: TBD lab fee charged to term bill

Distributions: (D1)

Not offered current academic year

ARTS 220 (S) Architectural Design I

Instruction in design with an introduction to architectural theory. Five simple design problems will explore form and meaning in architecture. Each problem will require drawings/model and will be critiqued in a class review with outside critics.

Requirements/Evaluation: quality of design, with improvement taken into account

Prerequisites: ARTS 100; ARTH 101-102 strongly suggested; permission of instructor is required; registration does not guarantee admission to the course

Enrollment Limit: 15

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: TBD lab fee charged to term bill

Distributions: (D1)

STU Section: 01 F 1:10 pm - 3:50 pm Ben Benedict

ARTS 224 (F) Interdisciplinary Approaches

Cross-listings: ARTS 224 THEA 224

Primary Cross-listing

In this studio course students will acquire the ability to think conceptually across artistic mediums by working in an interdisciplinary manner. Projects will investigate ideas of the artists body in contemporary art, memory, socio-political specificities, time, and abstraction. Students will be introduced to and create work with the 35mm film camera, the black & white darkroom, digital video, performance methods, and interactive installation. Students will gain additional hands on experience by engaging with invited artists, visiting museum exhibitions, and meeting with curators. Artists covered will include: David Hammons, Bruce Nauman, William Cordova, Taryn Simmon, Singa Ningudi, and Jennie C. Jones. No prior experience necessary.

Requirements/Evaluation: completion of three assigned project and independent final project, active class engagement during critique, quality of work, and development of technical skill

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: none, if over-enrolled Art Studio majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: \$250 lab fee charged to term bill

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 226 (F)(S) Hyperobjects and the Mundane

Through the photographic medium and the latest Do-It-Yourself trends, this intermediate photography class will explore object-oriented ontology and the notion of "Hyperobjects," or objects that transcend the local by massively spanning time and space. This class will use DIY techniques and mundane objects and materials as a tool to build models, sculptures and installations that will later on be photographed in the studio and outdoors. The creation of these 3D spaces, virtual or public, propose replications and low-budget prototypes resembling miniature versions of Hyperobjects in

transient spaces. Using science-fiction references and mythology we will attempt to document and/or create a space that is invisible or has not yet been experienced by the world. What does ecological philosophy currently look like, and (how) will it translate after the end of the world through the remaining photographic image and media? This class will search for, invent, and document Hyperobjects - entities of vast temporal/spatial dimensions that defeat traditional ideas of what a thing, object or photograph is.

Class Format: this class will include time in the outdoors as well as context-based learning through field trips

Requirements/Evaluation: individual and collaborative assignments and accompanying writing components

Prerequisites: Introduction to Photography

Enrollment Limit: none

Enrollment Preferences: Art majors (juniors or seniors)

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: \$250 standard lab fee charged to term bill

Distributions: (D1)

STU Section: 01 T 9:00 am - 11:50 am Thursday Org Mtg 8:30 pm - 8:55 pm Johanna Breiding

ARTS 228 (F) The Art of Almost Nothing

In this studio tutorial class, students will create studio art projects by using materials that are mainly not bought but found, repurposed, and/or overlooked and ubiquitous. In this time of extreme material production and consumption, with a great deal being thrown out and unrecoverable, how can we make intentional, creative meaning from what is around us? This class is concerned with impacts on the environment but also with how consumer culture has wielded profound influence in the current production of studio art. How can we engage with our major concerns--aesthetic, topical, critical--and use what is around us mindfully and creatively with desired impact? Some of the artists we will look at: William Pope L., Ana Mendieta, David Hammons, Tania Bruguera, and the Yes Men. This class is a hands-on studio class with weekly assignments.

Class Format: studio class, 3 hours per week

Requirements/Evaluation: projects, assignments, class participation, attendance

Prerequisites: one previous studio art class at Williams

Enrollment Limit: 14

Enrollment Preferences: first and second-year students

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: TBD

Distributions: (D1)

Not offered current academic year

ARTS 230 (S) Drawing II

This intermediate drawing course focuses on technique, style and content. Class sessions will focus on representing the human figure in representational and abstract styles, including cubism and abstract expressionism. Homework projects will focus on developing individual concepts and personal expression. Exercises will include traditional materials on paper as well as non-traditional methods and exercises. The course culminates with an independent project of work in series.

Requirements/Evaluation: the quality of work produced, participation in class discussions and critiques, successful completion of all assignments and attendance

Prerequisites: ARTS 100

Enrollment Limit: 15

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: TBD lab fee charged to term bill

Distributions: (D1)

ARTS 236 (S) LINOCUT!

A subset of relief printmaking, linocuts are images made by carving the surface of soft linoleum blocks. Relying almost completely on our hands, we will learn to work with a variety of cutting tools, controlling their speed and pressure to create bold, clear imagery. The course will include introductions to various methods in lino printing including stencilling, collaging, reduction printing, while also familiarising students with the fundamentals of printmaking inks and papers - how to use them, choose them, modify them. We will also look at the history of the block print, its application in the textile industry, and its present day interdisciplinary potential. Students will work towards creating a diverse portfolio that demonstrates fluency across various techniques, using them individually or in combination.

Requirements/Evaluation: quality of work, investment towards studio time, active presence in discussions and critique, attendance

Prerequisites: Drawing 100

Enrollment Limit: 12

Enrollment Preferences: Arts Majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Spring 2020

STU Section: 01 M 10:00 am - 12:50 pm Thursday Org Mtg 8:00 pm - 8:25 pm Pallavi Sen

ARTS 241 (F) Painting

The variables of oil painting are so numerous that the permutations are endless. As an introduction to basic variables like color, brushwork, surface, form and light, this course is the beginning of what may be a life long, creative adventure through the medium of paint. Most assignments are done from direct observation of the human figure, the landscape and objects. Museum visits and slide presentations are an important part of the class.

Class Format: workshop

Requirements/Evaluation: weekly assignments

Prerequisites: ARTS 100

Enrollment Limit: 15

Enrollment Preferences: majors, sophomores, juniors, seniors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: approximately \$375 lab fee charged to term bill

Distributions: (D1)

Fall 2019

STU Section: 01 T 1:10 pm - 3:50 pm William B. Binnie

ARTS 241 (S) Introduction to Oil Painting

This course is designed to introduce the fundamentals of oil painting. A significant portion of class time will be devoted to learning some of the basics of painting, such as the manipulation of color, value, surface, and texture. We will learn how to prepare paper and canvas supports as well as exploring the properties of several mediums (what the paint is mixed with to allow for application and drying). This course is focused on giving students access to a range of introductory techniques that they can explore during the semester. We will also spend time looking at each other's work and

giving feedback and suggestions as well as studying the work of established artists. Evaluation will be based on evidence of each student's progress, as shown by the weekly assignments; attendance and participation in class discussions.

Requirements/Evaluation: based on evidence of each student's progress, as shown by the weekly assignments; attendance and participation in class discussions

Prerequisites: ARTS 100

Enrollment Limit: 14

Enrollment Preferences: Art majors, sophomores

Expected Class Size: 14

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTS 250 (S) Devised Performance: The Art of Embodied Inquiry

Cross-listings: ARTS 250 THEA 350

Secondary Cross-listing

This studio course offers students hands-on experience in devising new performance work as an ensemble. Looking to the work of practitioners and collectives like Jerzy Grotowski, El Teatro Campesino, Tectonic Theater Project, Pina Bausch, Belarus Free Theatre, Nrityagram, and SITI Company, we will challenge ourselves to really probe what live performance is capable of. How might we think of performance as a research methodology? As a lifestyle? As a form of political action? This class will function as a laboratory, forming its own unique structure for developing and realizing a live performance. The course provides an opportunity to navigate the complex dynamics present in collaborative creation. Guest classes with practitioners will offer a fuller range of skills for the student ensemble to utilize during the devising process. Work-in-progress presentations spaced regularly throughout the semester will allow the ensemble to receive feedback from small, invited audiences, as well as the opportunity to apply that critique to an ongoing creative process. At the end of the semester the accumulated work will have a public presentation in a workshop format.

Requirements/Evaluation: participation, individual presentations, contribution to group work, self-evaluation; students will contribute to the creation and presentation, by the group as a whole, of a newly devised performance piece

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Theatre majors and Art majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 250 (D1) THEA 350 (D1)

Not offered current academic year

ARTS 260 (S) Objects in Video, Video as Object

In a world where the screen is often taken for granted, how might we begin to dissect the ways video has transformed visual perception? This course will focus on video installation and how video is transformed by its physical context. We will examine how videos shift our relationship to objects in space. Students will experiment with lighting and set building, paying particular attention to how surfaces are transformed by the lens. We will also explore projection mapping, built installation, and the peculiarities of the screen. We will look at works by artists who have emphasized the physicality or immateriality of video through installation and web-based art. We will read a variety of texts, charting the shifting role video has played in contemporary society. Through weekly assignments and regular critiques, we will begin to unpack how the videos we make contact with daily can shift our relationship with our own bodies and our surrounding environment.

Class Format: studio

Requirements/Evaluation: discussion, participation, and the technical and conceptual strength of the projects, with consideration given to individual

development

Prerequisites: 100 level video course

Enrollment Limit: 12

Enrollment Preferences: current and prospective Art majors

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Materials/Lab Fee: \$125

Distributions: (D1)

ARTS 271 (F) Sonic Art

Cross-listings: ARTS 271 MUS 271

Secondary Cross-listing

The course explores sound art through research and hands-on creative projects. Students will create original sound works, working collaboratively with partners from complementary disciplines. Precedents for sound installation, sonic pavilions, sound performance and artist-made instruments will be reviewed. Example works include texts on an ancient Greek Chythonic cult, instruments created by contemporary Brazilian transdisciplinary artists, the collaborative group Experiments in Art and Technology (E.A.T.) as well as works by artists showing at Mass MoCa and Documenta 14.

Requirements/Evaluation: presentation of students mini projects (20%), four artistic projects (20%)

Prerequisites: none

Enrollment Limit: 8

Enrollment Preferences: students with either Studio Art or Music experience

Expected Class Size: 8

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Fall 2019

SEM Section: 01 Cancelled

ARTS 273 (F) Sound Art, Public Music

Cross-listings: MUS 175 ARTS 273

Secondary Cross-listing

Western music performance traditionally occurs within contained spaces in which "performer" and "audience" adhere to designated locations and follow tacit scripts: seats/stage; applause/bows, etc. In recent years, traditional boundaries and scripts of performance and reception have moved into public spaces--from sound art installations to ambient music, from interactive sound sculpture to radio art to social media driven flash mobs. This course studies the work of pioneers in public music and sound art including Alvin Lucier, Bill Fontana, John Cage, Hildegard Westerkamp, Brian Eno and John Luther Adams, among others. The course will alternate between study and analysis of particular artistic strategies and the creation of site-specific works on and around the Williams campus.

Requirements/Evaluation: class participation, three short (2- to 4-page) essays, a response journal and the creation of four public music works

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: juniors and seniors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Unit Notes: ARTS elective

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ARTS 274 (S) Chinese Calligraphy: Theory and Practice

Cross-listings: ARTH 274 ARTS 274 ASST 274

Secondary Cross-listing

Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and those whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos "beauty" + graphe "writing"). This course can be taken as an Art History, a Studio Art, or Asian Studies course.

Class Format: studio instruction

Requirements/Evaluation: weekly assignments, a midterm, one short paper, oral presentations, participation in class discussion, a final project (artistic or scholarly), class attendance, film screening

Prerequisites: none

Enrollment Limit: 12

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: this course can count toward the Art History or Studio major

Materials/Lab Fee: TBD lab fee charged to term bill

ARTS 275 (S) Sculpture

This course is an exploration of the media and processes of sculpture, with the ultimate goal being visual fluency and the successful expression of your ideas. The focus will be on the development of technical and analytical skills as they relate to the interplay of form, content, and materials. You will be introduced to a variety of techniques and processes associated with the making of sculpture, including, but not limited to, woodworking, welding and building forms out of cardboard. The field of sculpture has expanded to encompass wide-ranging approaches towards manipulating form and space, thus a wide variety of media exploration is encouraged.

Requirements/Evaluation: the quality of the work produced as well as participation in critiques, and attendance

Prerequisites: any ARTS 100-level course or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Art Majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTS 302 (S) Landscape and Language

Cross-listings: ARTS 302 ENGL 302

Secondary Cross-listing

Colloquially, the word "landscape" refers to pictures or scenes of the land, from farms to forest to wilderness. But more broadly, landscape evokes the complex, dynamic, and ever-shifting relationship between "nature" and our experience of it. Landscape and Language is a seminar that considers the tools we use to represent and narrate our relationship to the natural world. Together, we will investigate how such cultural conventions as travel, perspective, nature, and ecology influence the ways we see and understand place. Drawing from discourses of literature, architecture, art history, contemporary art, and ecocriticism, our goal is to develop a deeper critical understanding of and engagement with landscape (as a collective of readers and as individual investigators). Texts for this course will include an art historical exploration of the relationship between landscape, power, and imperialism by W.J.T. Mitchell, an ethnographic investigation of nearly obsolete place names by Robert MacFarlane, poems by historical and contemporary poets like Jean Toomer, Terrance Hayes, and Lucille Clifton, and contemporary visual art by Helen Mirra and Xaviera Simmons, among others.

Class Format: seminar

Requirements/Evaluation: weekly discussion in an online forum; two short response papers, and a final research paper or creative project (10-12 pages or equivalent) investigating a specific landscape

Prerequisites: a 100-level ENGL course, or a score of 5 on the AP English Literature exam, or a score of 6 or 7 on the Higher Level IB English exam

Enrollment Limit: 25

Enrollment Preferences: English majors

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

ARTS 302 (D1) ENGL 302 (D1)

Not offered current academic year

ARTS 319 (F) Junior Seminar

The Junior Seminar is an intensive studio based class designed to provide art majors the opportunity to strengthen their ability to communicate clearly through the visual language by offering an overview of current themes and issues within the art world and beyond. The class is structured around regular studio projects that are designed to help further each student's skill set and broaden their knowledge of contemporary art and its role in society, and, to offer critical and analytic experiences that deepen the students understanding of the role of art in the world.

Class Format: seminar and studio workshop

Requirements/Evaluation: quality of work produced, participation in class discussions and critiques, successful completion of all assignments, and attendance

Prerequisites: three studio courses required for the major, or permission of instructor

Enrollment Preferences: enrollment is limited to Studio Art majors (or permission of instructor)

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Studio Art and Art History and Practice majors are required to take this course in the junior year unless studying abroad during the fall semester

Materials/Lab Fee: TBD lab fee charged to term bill

Distributions: (D1)

STU Section: 01 W 1:10 pm - 3:50 pm Allana M. Clarke

ARTS 323 (F) Colour Function

This tutorial places colour as a central consideration in our object making. Experiments and discussions will include development of dyes and inks, foraging for colours, understanding palettes and their relationship to 'the tasteful' and 'the garish', 'beautiful' and 'the unpleasant', colour blocking, monochromes, culture and colour, and the relationship between a variety of pigments, their medium of suspension, and the material they stain or sit directly on top of, unstable. In this way, we will work with a large selection of media and the assignments will be both foundational and highly experimental; you are creating a hundred new colours within a strict grid--you are mixing two new colours through light and projection alone, with no guides. The course is open to anyone who has taken advanced classes in printmaking + drawing, sculpture, and photography.

Class Format: the class will meet in tutorial pairs once a week and collectively whenever there is a skill workshop

Requirements/Evaluation: weekly assignments and final project; participation, generosity towards studio and studio members; attendance

Prerequisites: any 200-level art studio class or submit a portfolio for consideration

Enrollment Limit: 10

Enrollment Preferences: Art Studio majors

ARTS 337 (S) This Is An Experiment!

Keeping printmaking as our source and primary method, this class will use the possibilities within the discipline to create layered, expansive, and highly experimental surfaces. Students will work with a variety of printmaking techniques, and build on their existing knowledge of etching, relief, lithography, and screen printing. They will take risks with inks and their viscosity, the scale of their printing blocks, the temperamental nature of their

material, the variety of methods on a single print, and consider outcomes that go beyond images on paper. Prior printmaking experience is strongly recommended. Students will be evaluated on their progress towards building a print based body of work.

Requirements/Evaluation: active and thoughtful participation, time and thought dedicated to their studio practice/project, completion of assignments

Prerequisites: any printmaking class

Enrollment Limit: 12

Enrollment Preferences: Art majors

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ARTS 338 (S) Persona (DPE)

Cross-listings: ARTS 338 THEA 338

Primary Cross-listing

Like novelists, visual artists create fictional characters to tell stories. Conceptual artist Adrian Piper, sculptor Joseph Beuys, and collective The Yes Men have crafted personas to confront systems of power and societally constructed notions of normalcy. Students will explore the work of such artists through readings, class lecture and assignments. The reading list includes excerpts from Maggie Nelson's *The art of Cruelty* and Cherise Smith's *Enacting Others*. The first half of the course will focus on guided assignments developed by the instructor, the second half will be an independent study culminating in the construction of your own fictional persona. Students will use a variety of methods in the development of a persona including writing and photography, and may employ other methods including painting, sculpture, and digital media.

Requirements/Evaluation: timely completion of 4 assigned projects, assigned readings, active class participation, creation of an independent final project, attend lectures and class trips

Prerequisites: some experience with studio art courses, art history courses, performance experience, or consent of the instructor

Enrollment Limit: 10

Enrollment Preferences: majors, seniors, juniors, sophomores

Expected Class Size: 10

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 338 (D1) THEA 338 (D1)

Difference, Power, and Equity Notes: Through a critical investigation of the closed systems of signification that relate to the body: race, class, gender, and sexual orientation students will employ interdisciplinary methods of making to consider how these signifiers dictate the bodies that become Othered, concepts of hyper-visibility/invisibility, inclusion/exclusion, authorship, and ideas of authenticity.

ARTS 385 (S) The Sculptural Costume and It's Performance Potential

Cross-listings: ARTS 385 THEA 385

Primary Cross-listing

A team-taught studio art / theatre course designed to explore the rich territory of the wearable sculpture and its generative role in art and performance. From ritual costumes, to Carnival, to Dada performance, to Bauhaus dance, to Helio Oiticica's *Parangole*, and Nick Cave's sound-suits, there has been a rich tradition where sculpture and costumes merge. Students will study artists who have bridged distinctions between the theatrical costume and the sculptural object as well as produce hybrid objects that explore the range of possibilities within this collaborative practice. The students will produce object-costumes involving a wide variety of media, from recycled materials to new technologies, while striving to develop their individual artistic voices.

Requirements/Evaluation: the quality of work produced, the depth and quality of the content and process, participation in critiques, and attendance

Prerequisites: successful completion of any 200-level course in art studio or performing arts, or permission of the instructor

Enrollment Limit: 14

Enrollment Preferences: Art and Theater majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: \$125

Distributions: (D1)

ARTS 418 (S) Senior Seminar

In this capstone class for studio art majors, students define, research, create and present an original body of work which will be exhibited in the Williams College Museum of art. We will focus on strengthening ideas, developing formal skills and practicing critical analysis. Students may work in any medium in which they have developed a high degree of proficiency. The class will meet in large and small groups throughout the semester for critique and discussion and also have assigned readings, films, and/or lectures.

Class Format: intensive studio art class

Requirements/Evaluation: attendance, class participation, completion of all assignments, the quality of the portfolio at midterm and of the final portfolio, successful presentation of the project in the museum context

Prerequisites: you must be a senior Art Studio major with all requirements fulfilled by the end of this term

Enrollment Limit: none

Enrollment Preferences: Studio Art major; permission of instructor is required for History and Practice majors

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

Materials/Lab Fee: no lab fee, students are responsible for purchasing supplies

Winter Study -----

ARTS 10 (W) Relief Printmaking--The Woodcut

This course will explore relief printmaking through the lens of the woodcut. Wood is sculptural--soft, hard, porous, inconsistent, it has knots and grain. Cedar cuts like butter while mahogany seems impossible to penetrate. We will learn how to capitalize on these inconsistencies by working *with* the material to realize unique prints. We will explore an array of cutting strategies as we apply them to various types of wood. Students will learn how to use the press, register prints, and how to make a small edition. The course will begin with translating drawing into a print with one matrix, leading students to make a color reduction print and a multi-block print. We will look at these techniques from a historical lens, its relevance to the textile industry and its applications in anti-establishment Latin American image culture. We will read texts that address the conceptual implications of mechanical production by Renee Green, Luis Camnitzer, and Franz Kafka. Through discussions and critiques, we will examine this practice from a variety of cultural, conceptual, and historical standpoints, both within the conventions of printmaking as well as in its experimental applications. The class will meet for three hours on Thursday and Friday. Students will be expected to complete work outside of class to present the following week. There is a \$70 lab fee per student that covers materials and travel allowance. We will take one field trip to The Clark Institute, where we will look at historical woodcuts in the Manton Study Center for Works on Paper. Adjunct Instructor Bio: Chris Domenick is an interdisciplinary artist living and working in Western, MA.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: juniors and seniors will be given priority

Grading: pass/fail only

Materials/Lab Fee: \$70

Winter 2020

LEC Section: 01 RF 1:00 pm - 3:50 pm Chris Domenick

ARTS 13 (W) Creative Portraiture in the Darkroom

Cross-listings: ARTS 13 RLFR 13

Secondary Cross-listing

In this course, we will revisit the boundaries between self-portraiture and portraiture. Working in pairs, students will both practice being a model and a photographer: they will pose as a model for their classmates and assist a classmate in creating a self-portrait. In addition, using as a point of departure Hippolyte Bayard's photograph Self-Portrait as a Drowned Man, one of the first self-portraits in the history of photography, students will learn how to use the view camera (a large format camera used during the invention of photography in 1839 and still in use today). We will also study the characteristics of film photography, specifically, light, chemicals, sensitive media, and negative and use them as tools to make creative portraits in the darkroom. By the end of the course, students will have learned to shoot with a 4 x 5 view camera and have practiced with manipulations in the darkroom in order to create unique portraits. Each student will exhibit their work as a triptych in an exhibition. Be aware that this class requires an average of 15 weekly lab or studio hours outside of regular classes and sometimes during the weekend. Adjunct Instructor Bio: Documentary photographer Daniel Goudrouffe, who describes himself as a photographer-author, creates compelling visual narratives about the complexity of life in the Caribbean and its diaspora. His archive of the contemporary Caribbean equally enables a public reckoning with the impact of slavery and colonialism in the region. In 2017, his images were showcased at Les Photaumnales in Beauvais, France and at the Biennale Internationale des

Rencontres Photographiques de Guyane.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: knowledge of black and white analog photography is preferred, but not required

Enrollment Limit: 10

Enrollment Preferences: Art major and minors then random

Grading: pass/fail only

Materials/Lab Fee: \$120

ARTS 14 (W) Introduction to Ceramic Sculpture

This course will provide students with a foundation in the ceramic process, its history, and its evolving role in contemporary art. We will explore a variety of construction methods, hand building techniques, glazing, and firing. Through lectures, demonstrations, and group discussion, we will think critically about the role of this ancient material in both fine art and everyday life. Emphasis will be placed upon experimentation; conventions will be learned and disrupted. Students will develop a personal language in the material, exhibiting an independent project at the end of the term. Work will be evaluated both conceptually and technically during a final group critique. Regular attendance and active participation are essential. We will meet twice a week in three-hour sessions. Students are expected to spend a significant amount of time outside of class working independently.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference will be given to seniors

Grading: pass/fail only

Materials/Lab Fee: \$125

ARTS 15 (W) Introduction to Indian Drawing Techniques

Cross-listings: ARTH 15 ARTS 15

Primary Cross-listing

The jewel-like world of Indian painting is famous for its stylized naturalism and mastery of line. This course will introduce students to the technique and imagery of this art form. The course is designed as a workshop in which students will learn to use traditional materials and techniques. The class will focus on the practice of copying and taking inspiration from original masterworks of Indian art housed in the Williams College of Museum of Art (WCMA). By engaging with a non-western practice, the aim of the course is to expose students to a pluralistic engagement with art and art history. In addition to learning the basics of drawing and painting techniques, students will also learn paper and pigment preparation. The workshop will focus on the *siah qalam* brush and ink rendering technique, the backbone for the more advanced techniques of *neemrang* and *gadrang*, which pertain to color application. Working with original artworks will help students situate the hands-on study of Indian painting practice alongside exemplary historical examples. Students will have the opportunity to exhibit their final projects at Spencer Hall.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: response to one question: why is it important for you to take this course?

Grading: pass/fail only

Winter 2020

LEC Section: 01 Cancelled

ARTS 16 (W) Glass and Glassblowing

Cross-listings: ARTS 16 CHEM 16

Secondary Cross-listing

This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do flameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students. Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time.

Requirements/Evaluation: class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference is given to juniors, sophomores, and those who express the most and earliest interest and enthusiasm by email to Professor Thoman

Grading: pass/fail only

Materials/Lab Fee: \$75

ARTS 18 (W) Can I Ask You Something?

Cross-listings: ARTS 18 ENGL 18

Secondary Cross-listing

"Can I Ask You Something?" takes students on an exploration of the ways personal narrative can become fuel for making art. For their project, each student will begin by interviewing a meaningful person in their lives (this can be a family member, a mentor, a friend, or even someone you have never met and have been dying to talk to!) and recording the interview in video or audio form. The interviews will revolve around questions which are personally meaningful and urgent to each student, for example, but not limited to: identity and its relationship to the body; the politics of everyday life, family dynamics and the way they affect one's identity and worldview. These recorded interviews will then become the fuel for artworks ranging in media from video, performance and dance to sculpture, photography, drawing, and audio collage. Each student's trajectory will be completely unique and informed by their own curiosity, the art-making techniques they wish to learn, and the topics explored in their interviews. In addition, we will learn about contemporary artists who have used interviews and personal narratives as the inspiration and jumping-off point for their work. Adjunct Instructor Bio: Gabriela Vainsencher is a Brooklyn-based visual artist who makes videos, site-specific installations, drawings, and sculptures. Vainsencher was Williams College's Levitt fellow in 2009, and since then she has taught a winter study class in 2012-2018. She is also a curator and an art critic. Vainsencher's recent exhibitions include a solo exhibition at A.I.R. Gallery in New York and a two-person show at the MuMA museum in Le Havre, France. She is also a Bronx Museum AIM Fellow for 2019-20.

Requirements/Evaluation: final project or presentation

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: preference will be given to students who write the instructor about why they are interested in the class

Grading: pass/fail only

Materials/Lab Fee: \$40

Winter 2020

LEC Section: 01 MR 10:00 am - 12:50 pm Gabriela Vainsencher

ARTS 19 (W) The Restless Collection

Cross-listings: INTR 19 LEAD 19 ARTS 19 ARTH 19

Primary Cross-listing

The Restless Collection, led by San Francisco-based independent curator Jordan Stein with curatorial staff from the Williams College Museum of Art (WCMA), investigates the WCMA permanent collection and other regional art collections as resources for the Williams College community and beyond. With an eye toward the coming Presidential election and ideas of resistance, agitation, and power, students will conduct both a broad survey of the WCMA collection and in-depth case studies of several artworks. The course's final project includes generating a speculative exhibition proposal against the backdrop of the current political moment. Fundamental questions include: How is an art collection assembled, let alone maintained and mediated? How is a collection evidence of a certain philosophy or proof of a particular position? Should collecting habits change in times of significant political disquiet? What is an exhibition and who governs the terms of its engagement? How has the form been activated not only by curators, but also by artists as a poem, proposal, or declaration? Through reading, dialogue, and hands-on learning, we develop strategies for how to dust off, contextualize, and re-contextualize complex collection artworks in public art galleries by employing "the exhibition" as a vehicle for ideas. The course further offers the chance to collaborate with WMCA and WC staff, including representatives from various departments, including archives, curatorial, collections, engagement, digital media, installation/preparation, and more. Potential site visits include Hancock Shaker Village, Bennington Museum, Williamstown Historical Society, and other special meetings. Adjunct Instructor Bio: Jordan Stein is an independent curator and collaborator with an interest in expanded models and methods of exhibition-making, over-looked and under-sung histories of art, and linking the past and present through the varied presentation of critical objects, non-objects, and ideas. He has organized exhibitions in a variety of institutions and scales, including the Berkeley Art Museum and Pacific Film Archive, Artists Space (New York), Matthew Marks Gallery (New York), the Renaissance Society (Chicago),

The Glass House (New Canaan, CT), and San Francisco City Hall. He is a co-founder of the interdisciplinary collaborative group Will Brown, which realized over three dozen exhibitions and programs in their Mission District storefront from 2012-2015 before working parasitically with other organizations. He founded Cushion Works, a just-in-time gallery on the second floor of an active cushion-making workshop, in 2017. With Will Brown, he is the author of Bruce Conner: Brass Handles, and with Jason Fulford is the editor of Where to Score, a collection of hippie-era classified advertisements. Please see <http://jordanstein.com/> for more information.

Class Format: workshop/seminar

Requirements/Evaluation: exhibition proposal

Prerequisites: keen interest in museums, art collections and culture

Enrollment Limit: 8

Enrollment Preferences: random selection

Grading: pass/fail only

This course is cross-listed and the prefixes carry the following divisional credit:

ARTS 23 (W) STEAM Sandboxes: Public Pedagogy and Transformative Learning

Cross-listings: ARTH 23 PSYC 23 ARTS 23

Secondary Cross-listing

Where, when, and how do children learn outside of school? What is STEAM education, and who has access to it? Why does creative youth development matter in our society? Creative problem solving--the flexibility, persistence, and openness to generate and apply novel solutions to problems--is essential for success in school, the workplace, and beyond. The Bay Area Discovery Museum (BADM) has developed a pedagogical framework for educators to build children's creative problem-solving skills through intentional experiences. We will use this framework to guide our exploration of informal learning environments, including museums, libraries, and other out-of-school places, investigating how children--and adults in their lives--access learning in STEAM content areas, especially the sciences and the arts. In addition to class meeting time, we plan to take two or three day-long field trips to local and regional museums and other educational sites. Alongside our research in the field and discussions in class, students will create a journal in the medium of their choice (written, visual, aural) to document and reflect on their learning. Students will also work individually or collaboratively to design a prototype for a STEAM exhibition, event, song, podcast, video, or project of their choosing that they will present at the end of the session. We welcome anyone with an interest in contributing to the field of education, making, creating, and innovating! This course is not limited to students with backgrounds in psychology, the sciences, or art. Class is scheduled for M and W afternoons with mandatory all- and partial-day field trips scheduled during Weeks 1-3. Dates of the field trips are TBD, and may fall either on Tuesdays, Wednesdays, or Thursdays. Helen Hadani, Director of Research at BADM, and Molly Polk, from the Center for Learning in Action, will co-teach this course. Adjunct Instructor Bio: Molly was the founding education coordinator and curator for Kidspace at MASS MoCA and has taught children of all ages in informal learning environments, including museum galleries and dance studios, ski trails and forest floors, food pantries and assisted living centers. She works with Williams students who teach and mentor K-6 students at Brayton and Greylock Schools in North Adams. Her research areas of interest include student-driven learning and equity of access in K-12 public education. Adjunct Instructor Bio: Helen Hadani is the Director of Research at the Center for Childhood Creativity (CCC)--the research and advisory division of the Bay Area Discovery Museum (BADM)--and authors publications that synthesize scientific findings on children's learning and cognition for parents and educators.

Requirements/Evaluation: final project (individual or collaborative) in a medium of choice, accompanied by an informal presentation; as part of the process in developing their final projects, students will work together to provide feedback to each other prior to presenting their work; a rubric based on the CREATE framework will be available for students to use as a guideline for their projects as they consider pedagogical approaches, design features, and the learning outcomes for young people

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: students who have relevant experience through course- or fieldwork in Psychology and/or education will be given priority

Grading: pass/fail only

Materials/Lab Fee: \$35

- Victoria Brooks, Visiting Lecturer in the Graduate Program in Art History
- Michael Conforti, Lecturer in the Graduate Program in Art History; affiliated with: Art Department
- Marc Gotlieb, Director of the Graduate Program in Art History and Class of 1955 Memorial Professor of Art; affiliated with: Art Department
- Olesya Ivantsova, Visiting Lecturer in the Graduate Program in Art History
- Murad K. Mumtaz, Assistant Professor of Art; affiliated with: Graduate Program-Art History
- Paul C. Park, Senior Lecturer in English; affiliated with: Graduate Program-Art History

MASTER OF ARTS IN ART HISTORY

Requirements

To qualify for the Master of Arts degree in art history, candidates complete a minimum of twelve courses for graduate credit plus two winter study periods, the latter comprising an international Study Trip in the first year (normally in January) (ARTH 51) and preparation of a Draft Qualifying Paper in the second (ARTH 52). Students must also demonstrate reading proficiency in two foreign languages, one of them German (for more specific information on the language requirements, see below, after the listing for ARTH 597/598). At the end of the second year, all students present a shortened version of the Qualifying Paper in the annual Graduate Symposium.

At least eight of the twelve courses must be graduate seminars. Included among them are four required of all students: ARTH 504, "Methods of Art History," to be taken during the first semester; ARTH 506, "Graduate Art History Writing Workshop" and ARTH 507, "Object Workshop," to be taken in the second; and ARTH 509, "Graduate Student Symposium," to be taken in the fourth.

Students must also fulfill a distribution requirement by undertaking coursework in three of six areas:

East Asian, Indian, Islamic art

Ancient Near Eastern, Egyptian, Greek, and Roman art

Early Christian, Byzantine, and Western Medieval art to 1400

Western art, 1400 to 1780

Western art, 1780 to present

Arts of Africa, Oceania, and the Americas (Pre-Hispanic or Native American cultures)

Students may petition the Director to apply a thematic or non-period specific course toward the distribution requirement by demonstrating substantial work in an appropriate area.

Undergraduate Courses and Private Tutorials

With permission from the Director and the individual instructors, students may take up to four undergraduate courses for graduate credit, with the understanding that research papers submitted in such courses meet a standard commensurate with those prepared for graduate seminars.

In addition to regularly offered seminars and classes, students may arrange up to two private tutorials (ARTH 595/596) by submitting petitions to the Director describing the substance of their projects, including bibliography, and the nature of the work they will submit for evaluation. The petitions must be co-signed in advance by both the students and their faculty supervisors.

Of the minimum requirement of twelve courses, the combined number of private tutorials and undergraduate courses applied to the degree may not exceed four.

The Qualifying Paper

The Qualifying Paper is normally a revision of a seminar or private tutorial paper produced in one of the previous three semesters, expanded and refined over the second Winter Study term and a portion of the fourth semester. Students submit the topic of the Qualifying Paper in writing to the Director by the final day of exams of their third semester. Before this, students must obtain their original faculty supervisor's agreement to be engaged in the Qualifying Paper process.

On the first Friday of their fourth semester, students submit drafts of their Qualifying Paper, including illustrations, to three faculty readers (generally the original faculty supervisor, the Director, and the Post-Doctoral Teaching Fellow). Although a draft, this version of the paper should be brought to a high level of completion.

Early in the fourth semester, students and their readers meet together to discuss the drafts. Within six weeks of these discussions (at a date determined by the Director), students submit their Qualifying Papers. Qualifying Papers should not exceed 8,000 words, including footnotes and bibliography.

The Graduate Symposium

All second-year students speak in the Symposium, presenting 20-minute talks developed from their Qualifying Papers. Each student has an ad hoc committee to give advice in preparing these presentations (ad hoc committees comprise, but are not limited to, the Director, one additional faculty mentor, one first-year graduate student, and one second-year graduate student). Preparations include at least three practice sessions for each student. Speakers present the first and third of these run-throughs to the ad hoc committee, the second to the other second-year students in a workshop scheduled by the Director.

Grades and Academic Standing

The Program uses the following grading system:

A+ = truly exceptional (4.33)

A = outstanding (4.00)

A- = excellent (3.67)

B+ = good (3.33)

B = satisfactory (3.00)

B- = barely adequate (2.67)

C = inadequate (0)

E = failing (0)

Courses in which students receive a grade below B- do not receive graduate credit.

Letter grades are used in all seminars except ARTH 507, 509, and 563. These and the Winter Study courses (ARTH 51 and 52) are Pass/Fail. Grades in language courses are converted to Pass/Fail on the Williams transcript and are not calculated in the GPA. The Director reviews students' records at the end of the first year; those with GPAs of 3.00 or lower may be asked to resign from the Program.

Course instructors set the deadlines for coursework. If students seek and receive extensions that result in semester grades of Incomplete, they must hand in their work by the instructor's revised deadline, which will be no later than the second Monday of the next semester's classes. Extensions beyond this date will be solely at the discretion of the Director (in consultation with the instructor).

Students who resign from the Program may, after a period of at least one year, petition to the Director for re-admission. Such a petition must include evidence that deficiencies have been remedied and that the student is capable of completing the course of study without further interruption.

The M.A. requirements are designed for completion in two consecutive academic years in residence. There is no credit for coursework done prior to matriculation in the Program. The Program is full-time, requires students to live in Williamstown or its vicinity, and does not normally admit students on a part-time basis.

Language Courses

The Graduate Program's degree requirements include reading competence in two languages (other than English) of scholarly and academic relevance to the history of art. One of the two languages must be German. Many students select French as the second although, with permission of the Director, other languages may serve. The Program offers dedicated courses in reading French and German for art history. Other language classes at Williams are listed in the course catalog, although the coordination of undergraduate and graduate schedules can be challenging.

Incoming students' language preparation is assessed through exams administered at the outset of the semester. In French and German, scores attained on SAT II reading examinations determine placement within the two-semester language course sequence.

French: If students attain a minimum score of 700 on the French placement exam, they are exempted from further coursework in that language. With a score between 500 and 700, they are placed into the graduate course of readings in art history, French 512. With a score below 500, they enroll in the introductory course, French 511. In the case of a second language other than French, arrangements will be made on an individual basis.

German: With a score below 450, students enroll in the introductory course, German 515. Students who score between 450 and 500 are placed into German 516. With scores between 500 and 700, students enroll in the advanced reading course, German 513. Students attaining a minimum

score of 700 on the German placement exam are exempted from further coursework in that language.

ARTH 500 (F) Clark Visiting Professor Seminar: writing TO art

Cross-listings: ARTH 400 ARTH 500

Primary Cross-listing

In this seminar, we will think about writing TO art and for it, rather than merely about it; but first, we will think about how we think. I intend that we read essays and stories that confront the ways in which we think. That might sound abstract, but in fact it is rather concrete: we bring to works of art our predilections or tastes, psychologies, politics, habits of mind, in short, our subjectivity. We are not blank slates, art is not, either. Art is layered with its own history, and histories, criticisms, reactions, rejections, movements. Art is not static. How do we writers move with art, confront our reactions, and ask why we have them. To me, one of the most important aspects in writing is judging one's own reactions, for instance, in the choice of words. To that end, that of confronting our thinking, we will read, among other things: Adorno's "Coming to Terms with the Past;" Joan Scott's "The Evidence of Experience;" Kafka's "Josephine the Mouse Singer and the Mouse People," and "The Hunger Artist;" Freud's "Notes on War and Death," and Craig Owens', "On Speaking to Others" and "Feminism and Post-Modernism." We will also read some of my anti-art art criticism, or what I call stories written in relationship to art. Some of these employ fictions, some not. We will read a few of my "Madame Realism" pieces, as well as essays on Warhol and some other contemporary artists. We will do some writing. We will visit with or be visited by critics and/or artists. We will look at art in galleries, and write about what we have seen.

Requirements/Evaluation: writing assignments, participation

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: graduate students get preference; places for 8 undergraduate and 8 graduate students assured

Expected Class Size: 16

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ARTH 501 (S) Museums: History and Practice

Cross-listings: LEAD 301 ARTH 303 ARTH 501

Primary Cross-listing

Art museums not only express the political, economic and cultural values of their period of formation, but the evolution of those values that have resulted in the institutions of our time. The seminar will focus on museums past and present internationally as it also considers the future of museums, doing so as it examines governance and management policies and practices, the role of architecture and installation in interpretation and experience, guidelines in the accessioning and deaccessioning works of art, and issues associated with the repatriation and restitution of cultural property. The course will consider current trends in exhibition, public education and other programming in art museums that range in size and type from the "encyclopedic" or "universal" to newly established contemporary arts institutions and alternative spaces. Class discussions will have a special focus on how museums strive to balance their scholarly and artistic roles with their civic and social responsibilities doing so while maintaining financial stability in the increasingly market-driven, metric-conscious, not-for-profit environment of our time.

Requirements/Evaluation: oral presentations and discussion in class and one seminar paper (with class presentation) at the end of the semester

Prerequisites: undergraduates should email michael.conforti@williams.edu to schedule a discussion before registering for the course

Enrollment Limit: 10

Enrollment Preferences: graduate students, then senior art history majors, then other undergraduates

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the seminar requirement for the undergraduate Art History major

ARTH 503 (S) Clark Visiting Professor Seminar: Ethics of Abstraction

Cross-listings: ARTH 403 ARTH 503 ARTH 400 ARTH 500

Primary Cross-listing

The course will interrogate abstraction as a strategy in 20th and 21st century art around the globe, and its manifold implications for political projects of being, seeing, and knowing together. We will look at how various artists turn to non-representation as a means for thinking differently about issues as divergent as flatness, vision, progress, decay, identity, violence, solidarity, negation, and protest. How might we read acts of judgment performed by abstract artists, i.e., separating what is alien from that which is intrinsic, as ethically activated? How do we account for the ways abstraction has figured centrally not only in modernist art histories, but also in economic and political theories (as in the abstraction of use into exchange value)? How, too, have representation and figuration (as ostensible opposites of abstraction) been positioned as ethical tactics? We will take an object-oriented approach that foregrounds the complexity of movement between "thing" and abstract "effect," examining divergent valences from postwar abstract painting up to contemporary abstraction as it supports coded meanings, eccentricities, and alternative (feminist, queer, marginal, racialized) formations.

Requirements/Evaluation: research paper, class presentations

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students; places for 8 undergraduate and 8 graduate students assured

Fall 2019

SEM Section: 01 R 1:10 pm - 3:50 pm Marc Gotlieb

ARTH 506 (S) An Expository Writing Workshop

A common and depressing consequence of too much education is how our writing tends to devolve, as the task of saying what we mean is complicated by new anxieties: trying to impress our potential employers, intimidate our competition, claim our place in an intellectual community, and generally avoid looking like fools. In many professions, bad prose tends to proliferate like some disgusting disease, as scholars, trying above all to avoid mistakes, become tentative, obscurantist, addicted to jargon, and desperate to imitate other bad writers. In this course we will try to relearn the basic skills of effective communication and adapt them to new and complicated purposes. In class we will go over weekly or bi-weekly writing assignments, but we will also look at the essays you are writing for your other courses, to give them an outward form that will best display their inner braininess. Among other things, I am a fiction writer, and part of my intention is to borrow the techniques of storytelling to dramatize your ideas successfully.

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: limited to and required of first-year students in the Graduate Program in the History of Art

Expected Class Size: 14

ARTH 508 (S) Art and Conservation: An Inquiry into History, Methods, and Materials

This course is designed to acquaint students with observation and examination techniques for works of art, artifacts, and decorative arts objects; give them an understanding of the history of artist materials and methods; and familiarize them with the ethics and procedures of conservation. This is not a conservation training course but is structured to provide a broader awareness for those who are planning careers involving work with cultural objects. Sessions will be held at the Williamstown Art Conservation Center, Williams College, the Clark Art Institute, and the Governor Nelson A. Rockefeller Empire State Plaza Art Collection in Albany. Examination questions may be formulated from exhibitions at these locations. Six exams will be given. Exam scores will be weighed in proportion to the number of sessions covered by the exam (e.g., the paintings exam, derived from six sessions of the course, will count as 25% of the final grade).

Class Format: slide presentations, lectures, gallery talks, hands-on opportunities, technical examinations, and group discussions

Requirements/Evaluation: attendance is required at all sessions; the course grade is based on exams given throughout the semester; there is no final exam

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Graduate Program students, then students in art history or studio art

Expected Class Size: 14

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

SEM Section: 01 TBA Marc Gotlieb, Emmelyn Butterfield-Rosen

ARTH 510 (F) Approaches to Drawing from Connoisseurship to Conceptualism

This course will consider the art of drawing as a pedagogical tool and cultural practice from the sixteenth to the twentieth century. Creative and commercial forces over four centuries have fostered different types of and reasons for production: presentation drawings in sixteenth century Italy, an increased market for drawings in seventeenth century Holland, a fashion for powdery pastels in eighteenth century France, and the critical promotion of drawing as a form of autographic thinking in the nineteenth century. Drawing has enjoyed a resurgence in the last fifty years as Minimalism and Conceptualism have pushed the medium's boundaries. Equal consideration will be given to the history of collecting and to materials from the invention of the Conté crayon to the deteriorating effects of acidic paper. The seminar will coincide with a major loan exhibition at the Clark of over one hundred drawings from the Renaissance through contemporary: Drawing in Depth: Master Drawings from the Thaw Collection. The class will be held in the Manton Study Center for Works on Paper and the Clark galleries with visits to the Williams College Museum of Art.

Requirements/Evaluation: involved class participation, several short presentations, one short paper, and a final paper approximately 20 pages

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: Graduate Program students and then to senior Art History majors

Expected Class Size: 8

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

ARTH 512 (F) Why Look at Animals? Some Contemporary Positions

This seminar, named for a 1977 essay by the art critic John Berger, considers a recent tendency in contemporary art to see nonhuman animals less as objects for human delectation—to be owned, eaten, or symbolized with—than as subjects, endowed with specific forms of intelligence, agency, and/or cross-species kinship. We will take as case studies the work of artists such as Francis Alÿs, Xu Bing, Sue Coe, Coco Fusco, Pierre Huyghe, Jochen Lempert, Chris Marker, and Lin May Saeed, among others. Readings will come in part from the rapidly growing, multidisciplinary field of animal studies. In the process, we will consider concepts such as animacy; animal ethics; animalization; the anthropocene; biopolitics; and posthumanism. This seminar anticipates two exhibitions concerning animals at the Clark in Summer 2020.

Requirements/Evaluation: active class participation, presentations, writing assignments

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: MA students, then advanced Art History undergraduates

ARTH 515 (F) Creating Whiteness: Racial Taxonomies in 'American' Art, 1650-1900

Cross-listings: AMST 355 ARTH 515

Primary Cross-listing

"What is race?" "How is a race created?" "What are the racial histories and subsequent political implications of 'American' art?" These are the central questions of our exploration. Drawing on two centuries of making in the Americas—from 17th century casta paintings of New Spain to the pictorialist photographs of Fred Holland Day—this object-based seminar for graduate students (and undergraduates with instructor's approval) draws upon area collections (including WCMA and The Clark Art Institute) to make the argument that racial ideologies have always been sutured to definitions of an American canon. Our approach is the case study: devoting one or two class meetings to the exploration of eight specific moments/artists in order to engage with the intersectional ideologies of personal and collective identity, e.g., self and the Divine; portraiture and the nation, armed conflict, and the constructed mutabilities of gender and sexuality. Additional artists and topics include: the Stuart family's images of George Washington and Thomas Jefferson; advances in photographic technology vis-a-vis the amputated bodies of Civil War veterans; gender fluidity in John Singer Sargent; and the equation of homoeroticism and black bodies in pictorialism. Designed to provide breadth and specific moments of depth, we will be covering processes of making across multiple mediums and time periods. An elementary reading knowledge of French, Latin, Portuguese, and/or Spanish will not go amiss.

Requirements/Evaluation: research paper, presentations

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students

Not offered current academic year

ARTH 519 (S) Architectural Theory and Modernity, 1750-1968

Why do buildings need words, or do they? For most of the world and most of history, buildings are made without the benefit of formal architectural thought. But at various times, ideas about the aesthetics of buildings, their cultural and philosophical meaning, and their underlying principles, have been matters of great public interest. And architectural theory—in the form of treatises, manifestos, and critical reviews—has exercised an enormous

effect on building. This theory can be prescriptive, presenting categorical rules for making good buildings; it can be descriptive, looking at how buildings perform in the real world; and it can be radical, seeking to change the essence and definition of architecture. Theory seemed very important to architects twenty years ago, but no longer. Why is that? We will investigate. Students will give short presentations on key theorists, such as Vitruvius, Alberti, Palladio, Laugier, Boullée, A. W. N. Pugin, Viollet-le-Duc, Gottfried Semper, Le Corbusier, and Robert Venturi. The semester will conclude with a 15- to 20-page seminar paper, based on comments and discussion following a classroom presentation.

Requirements/Evaluation: class participation, writing assignments

ARTH 521 (S) Islam and the Image in Indian Painting, c.1450-c.1750

This seminar will explore Indian painting made for Muslim patrons from the medieval period to the early modern era. The course considers how paintings produced for an elite Indo-Muslim audience can be situated within the frameworks of "Islamic art," a loaded historiographical term that has been questioned in recent times. The seminar will also address some of the major problems that continue to haunt Indian art scholarship. For most of its history, the academic study of Indian painting has seldom considered contemporaneous literary voices that shed light on the motivations behind artworks. Furthermore, the historiography, deeply entrenched in its colonial and orientalist roots, has largely isolated images from their supporting texts—a curious oversight in light of the fact that miniature painting is primarily an art of the book. These biases have affected the way museums have collected, displayed and interpreted miniature paintings. Western museums continue to place paintings made for books and albums in their "South Asian" collections while textual manuscripts and calligraphic specimens made for the same Muslim audiences—even at times bound in the same albums—are categorized as "Islamic art." What does this isolation of text from image imply about prevailing views of Islamic art? In order to understand the various intended functions of miniature painting and its possible role as an "Islamic" art, the seminar will explore ways to conceptually reintegrate images and texts belonging to key manuscripts and albums that were dispersed during the colonial and post-colonial periods. To better understand the cultural, historical and religious context surrounding artworks students will read primary literature ranging from autobiography to devotional poetry, often written by the very patrons and subjects of the paintings to be discussed.

ARTH 523 (S) Heaven's Gate: The Romanesque Sculpted Portal and the Creation of Sacred Space Through Art

Cross-listings: ARTH 523 ARTH 424

Secondary Cross-listing

During the course of the eleventh century, the designers of European churches fashioned a new architectural language that we now label "Romanesque." One of the most innovative and dramatic aspects of this new language was its assimilation of monumental sculpture, absent in Europe since the fifth century. The focus of attention in this regard was the portal, which marked the threshold between the profane realm of the outside world

and the sacred space of the church. Often characterized as the "marquee of the Middle Ages," the Romanesque sculpted portal, with its startling juxtaposition of the spiritual and the physical, of ecstatic visions of the heavenly realm and writhing, biting monsters, constitutes one of the true high-points of creativity in medieval art. Through the lens of modern scholarship, this seminar will investigate the antecedents and origins of the Romanesque sculpted portal and examine in detail its most renowned manifestations. Emphasis will be placed on understanding these often complex sculptural schemes within their original functional and material contexts, especially in terms of how they helped to create the sacred space of the church behind. Students will then have the opportunity to develop their own research projects, informed by what we have learned in the seminar, but focused on an example of sacred threshold art of their own choosing.

ARTH 524 (F) The Watchful Object

What is implied by an object that "watches"? Is it sentient? Animate? Through what apparatus does it gain the power to perceive and in turn generate some type of action? Watchful objects--sometimes known problematically as 'fetishes,' 'idols,' and 'totems'--have existed in numerous material cultures in Africa over time and have often been saddled with titles and labels that largely reflect colonial-era notions of primitivism linked with non-Western objects, spaces, and peoples. Even today, many of these objects are still inappropriately connected to systems of the occult rather than being recognized as crucial cogs in the socio-political, cultural, and spiritual mechanics of lived experience on the continent both past and in some cases present. The purpose of this seminar, thus, is to unpack the multiple identities that these objects have experienced as a way of understanding 1.) the circumstances and situations that catalyzed their production; and 2.) how their various material and metaphorical components function as power-producing elements that enable these forms to become 'watchful' presences in society that operate in accordance with their 'observations' of the human condition. This course will also address how the psychological agency of many of these material traditions has prompted their inclusion and absorption within contemporary artistic practices as well, often in the form of productions and performances that provoke unsettling and often transformative experiences in viewers.

Requirements/Evaluation: in-class presentations, class discussion, and a final research project

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: second-year graduate students, then first-year graduate students, then advanced undergraduate students

ARTH 527 (F) Acquiring Art: Selecting and Purchasing Objects For WCMA

Cross-listings: ECON 227 ARTH 327 ARTH 527

Secondary Cross-listing

How do museums acquire art? Factors considered in selecting objects include: the museum's existing collection, its mission, the availability of suitable objects, evaluation of the art historical importance of potential purchases, and the available budget. How can objects be identified and obtained at the

most reasonable cost? How do auctions work and what strategies are best for purchasing works at auction? Is it more economical to purchase art at auction or to work with dealers or (for contemporary works) directly with artists? Do museums consider value in the same way as private collectors? What role does an object's history and condition play in the evaluation process? In this course students will work as teams to identify and propose objects for addition to the collection of the Williams College Museum of Art (WCMA). A significant budget will be made available for the acquisition. We will discuss approaches for identification, acquisition and evaluation of objects. Student teams will be responsible for identifying a set of objects that would make appropriate additions to the WCMA collection, and a strategy for acquiring one or more of those objects. Working with the advice of WCMA curatorial staff, one or more of these objects will be acquired using the agreed strategy, and the object will become part of the WCMA permanent collection. Graduate students will participate in all aspects of the class but may be required to undertake different assignments.

Requirements/Evaluation: three papers of 10-15 pages each and class participation; student teams will make proposals for objects; each student will be required to submit three papers, dealing with the objects, the likely cost, and the best strategy

Prerequisites: ECON 110 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: senior majors in Art History, Economics and Political Economy; graduate students will be admitted only by permission of instructors

ARTH 530 (S) Demigods: Nature, Social Theory, and Visual Imagination in Art and Literature, Ancient to Modern

Cross-listings: CLAS 236 ARTH 530

Primary Cross-listing

Embodied in satyrs, centaurs, nymphs, and other demigods is a vision of an alternative evolutionary and cultural history. In it, humans and animals live together. The distinction between nature and culture is not meaningful. Male and female are equal. The industrial revolution never happens. This course traces the history of demigods from its origins in ancient Greek art and poetry until today. We pay special attention to three points: the relationship between mythology of demigods and ancient political theory about primitive life; evolving conceptions of the environment, and the capacity of the visual arts to create mythology that has a limited literary counterpart. The first half of the course examines the origins and character of the demigods, in works of ancient art, e.g. the François vase and the Parthenon, as well as ancient texts, including Hesiod's Theogony and Ovid's Metamorphoses. We examine relevant cultural practices, intellectual history, and conceptions of nature, in texts such as Euripides and Lucretius. The second half of the course investigates the post-classical survival of demigods. We consider the "rediscovery" of demigods in the work of Renaissance artists such as Botticelli, Michelangelo, Dürer, and Titian. We consider in detail the important role played by demigods in the formation of Modernism in art and literature. Key texts include Schiller, "Naive and sentimental poetry," Nietzsche, Birth of Tragedy, Mallarmé, "L'Après midi d'une faun," Aby Warburg, and Stoppard's Arcadia. Problems include the relationship between nymphs and prostitutes in Manet, and the meaning of fauns and the Minotaur in Picasso. We conclude with demigods in popular culture such as the Narnia chronicles or Hunger Games.

Requirements/Evaluation: attendance, participation in discussion, one short presentation on a demigod in ancient art, one longer presentation on demigods in early modern, modern, or contemporary art, and a 20-page research paper

Prerequisites: none

ARTH 535 (F) The Medieval Object

Cross-listings: ARTH 535 ARTH 435

Secondary Cross-listing

After years of focusing on theory, scholars of medieval art have returned to an examination of physical objects. Distinctly strange and even monstrous, such small material things as reliquaries, liturgical vessels, game pieces, and textiles transgress the traditional categories of art, some made from precious materials and others of such base substances as bones and dirt. Even books were treated as tangible things, not only to be read as texts, but also to be looked at, paraded, and displayed with the Eucharist. Collected in church treasuries during the Middle Ages, exchanged, and reconfigured, medieval objects served simultaneously as earthly assets and spiritual investments. The seminar will focus on the making, function, and collecting of medieval objects. Each student will participate in weekly discussions stimulated by the instructor's presentations and selected readings. Students will also conduct research on an object available for study, will present an analysis of it for discussion by the class, and submit a 15- to 20-page term paper taking into account any comments and criticisms.

Class Format: three hours per week

Requirements/Evaluation: class participation, oral presentation, 15- to 20-page research paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: Art majors and Art History graduate students; 16 (8 undergrad, 8 graduate)

ARTH 536 (S) Charles and Maurice Prendergrast in WCMA Collections

This seminar will investigate the careers of Maurice and Charles Prendergast, who occupy curious positions in American art. Students will work closely with the art and archival collections of the Prendergasts at WCMA, which is the largest repository of their work in the world. Maurice's Post-Impressionism placed him at the forefront of American modernism in the first decades of the twentieth century, culminating with his inclusion in the infamous Armory Show of 1913. Charles, a leading frame maker before adapting techniques of his craft to create incised panels, intersects with the Arts & Crafts Movement, Symbolism, and vernacular material culture. While the brothers are firmly canonical, they are often regarded as isolated from major formal and iconographic concerns of their peers. Scholarship, much of it produced at WCMA, has often focused on their subject matter. Participants in this class will consider new material and theoretical approaches to the brothers' work that may (or may not) prove productive in resituating their place in American art.

ARTH 540 (F) In Vinculus Invictus: Portraits in Prison

Among all the portraits produced during the modern period, some have been painted or, more recently, photographed in prison. Portraits in prison exist at a crossroad of politics, law, and identity; they offer a great opportunity to think about art and society. Artists themselves have made self-portraits during their own imprisonments, or sometimes a portrait of one of their fellow prisoners. More often it was the prisoners or their relatives who commissioned an artistic record of their detention. The idea of commemorating such a moment, or to evoke it as a claim to fame, seems surprising at best, outrageous and provocative at worst. But there has been, since the 16th century, an enduring tradition of portraiture in prison with its masterpieces and its pantheon, a tradition that fits into the wider pictorial attention to the prison itself. With the French Revolution, the nature of prison changed. It became a tragic symbol of political "debates." Within a few years, a terrifying series of portraits appeared that would nurture Western political thought and visual culture until now. Since the 18th century, these portraits have become more concerned with ideas that stretch beyond the individual and into the realm of social justice, mass incarceration, and the prison-industrialization complex.

ARTH 541 (F) Aesthetics After Evolutionary Biology: Darwin, Nietzsche, Freud

This interdisciplinary seminar examines the rise of evolutionary biology, a new explanatory paradigm that solidified in Europe in the middle of the nineteenth century, and its ramifications in art and aesthetic theory in the late nineteenth and early twentieth centuries. We will consider how natural histories of creation, and corresponding reclassifications of the human as a species category, went hand in hand with a reconceptualization of the aesthetic faculties, and the processes of art's production and reception. A core component of this seminar will be the close study of key texts by Charles Darwin, and two thinkers who were among the most radical in extending his key insights into the domain of aesthetic theory--the psychoanalyst Sigmund Freud, and the philosopher Friedrich Nietzsche. These primary texts will provide points of departure for studying the work of a number of innovative practitioners working across a range of media, among them the composer Richard Wagner, the Neo-Impressionist painter Georges Seurat, the architect Adolf Loos, the choreographer Vaslav Nijinsky, and the art historian Aby Warburg. Methodologically a major aim of this seminar is to think together critically about the nature of art's relations to other domains of cultural production such as science or philosophy, and to interrogate what it means, both practically and epistemologically, to pursue "interdisciplinarity" as a strategy for art history.

ARTH 542 (F) Insubordinate Bodies: The Body in Conceptual Art in Latin America, 1960-1980

The use of the body--be it the artist's or those of willing and unwilling participants--is among art's most significant developments internationally since the 1960s. In Latin America between the 1960s and 1980s, activating the body not only was a strong conceptual strategy to escape object-based practices; it was also a potent way for artists to disobey and confront forms of violence and control exerted by repressive regimes. But the body too

was a forceful medium by which artists could subvert heteronormative frameworks, through the visualization and performance of feminist critiques and queer identities. This seminar will explore the role of the body in Latin American conceptual art through localized case studies, elucidating the body's particular strength as a vehicle for political and institutional critique, as well as its potential to unlock alternate narratives of conceptual practices in the region.

ARTH 543 (F) Color, High and Low

Why should color in prints be controversial? For most of the nineteenth century—even as technical advances encouraged a flowering of color in woodcut, intaglio, and especially lithographic production—entrenched voices in the art establishment continued to insist on printmaking as an art of black and white. Drawing upon a wide variety of examples from the Clark's collection, this course will explore the range of associations that attached to color prints, along a broad spectrum from highbrow preciousness and subtlety to lowbrow commercialism and bad taste. Color lithography was a particular lightning rod for controversy: although chromatic experiments in this medium enabled striking aesthetic innovations, the extreme complexity of the process also meant that the designer of a print became farther and farther removed from its actual production. This was just as true for the delicate and exquisite suites produced in limited editions by Pierre Bonnard, Edouard Vuillard, and Maurice Denis as it was for the large-scale, brightly-colored lithographic posters of Jules Chéret and Henri de Toulouse-Lautrec, used to advertise popular urban entertainments. Alongside the close examination of original works of art, a set of critical and theoretical readings will help us navigate the paradoxes of printed color. Apart from the standard requirements, including a research paper and class presentation, students will have an option to participate in a summer 2020 exhibition based on the course findings. This course will take place in the Manton Study Center for Works on Paper at the Clark.

ARTH 544 (S) Women Artists in Paris, 1850-1900

In this seminar, we will examine the historically undervalued contributions of women in the art of the later nineteenth century. During this period, leading artists from around the world, including many women, were drawn to the academies, museums, salons, and studios of Paris. While women were largely excluded from formal training, many nonetheless navigated the complex systems of artistic production. We will focus on this multinational group of talented women (including Marie Bashkirtseff, Rosa Bonheur, Anna Ancher, Mary Cassatt), and we will assess their work against contemporary sociopolitical thought and aesthetic theories. Readings will draw upon early critical reviews of public exhibitions, biographical materials, studies of pedagogical and institutional practices, and social histories of art. In and through these materials, we will explore the marginalizing narrative that was created for women artists in Paris, and, most importantly, we will reconstruct an alternative history through our discussions and class presentations.

ARTH 545 Architectural Theory in Crisis

Why do buildings need words, or do they? For most of the world and most of history, buildings are made without the benefit of formal architectural thought. But at various times, ideas about the aesthetics of buildings, their cultural and philosophical meaning, and their underlying principles, have been matters of great public interest. And architectural theory--in the form of treatises, manifestos, and critical reviews--has exercised an enormous effect on building. This theory can be prescriptive, presenting categorical rules for making good buildings; it can be descriptive, looking at how buildings perform in the real world; and it can be radical, seeking to change the essence and definition of architecture. Theory seemed very important to architects twenty years ago, but that is not the case today. Why? We will investigate. Students will give short presentations on key theorists, such as Vitruvius, Alberti, Palladio, Laugier, Boullée, A. W. N. Pugin, Viollet-le-Duc, Gottfried Semper, Le Corbusier, and Robert Venturi. The semester will conclude with a 20-page seminar paper, based on comments and discussion following a classroom presentation.

ARTH 546 (F) Texere: The Material Philosophy of Print and Textile, ca. 1500-1900

It is a commonplace in the literature on textiles that the words for both text and textile derive from the Latin *texere*: to weave. As this etymological root indicates, the action of making cloth provides the metaphoric structure by which we conceive of language from the threading of thought to the weaving of prose and poetry. In the recent theoretical writings of Tim Ingold, among others, the processes of weaving-textility-offer a model against which to conceive of the dominant hylomorphic conception of matter and form as a process of imprint. Instead, textiles illustrate a world that is created through forces in motion, never imprinting, but moving against and within one another. This seminar will use these questions as the starting point to examine the interaction between printed matter (embodying a hylomorphic process) and textile (a material challenge to hylomorphism). The Clark Art Library contains a preeminent collection of textile material, and this seminar will dive into the Mary Ann Beinecke collection to examine histories of gender and labor, figuration and ornament, mobility and place, and finally, form and matter. The case studies will range from sixteenth-century needlepoint model books to twentieth-century kimono design.

ARTH 547 (S) The Studio, The Bedroom, & the Tomb: Artists and Artistic Biographies in the 19th Century&Beyond

How was the vocation of the artist thematized in the European cultural imagination in the Romantic age and its aftermath? Even more, how did artists themselves articulate, experience, and reproduce that sense of vocation?--What were its mythologies and poetics, at once as they were circulated in visual culture, but also as they were lived, experienced, and reproduced by artists themselves? We will explore such question across three historically, psychologically, and tropologically configured "sites": the artist's studio, the artist's desire, and the artist's death. Readings by Freud, Balzac, Kris and Kurtz, along with scholarship largely centered on the visual arts of the 18th and 19th centuries. With instructor permission, students may undertake research projects in any field of the history of art.

Requirements/Evaluation: presentations, research paper

ARTH 548 (S) Landscape, Theory, Ideology

To use the term "landscape" is to imply and assume a subject position. Unlike the categories of "nature," "wilderness," "vista," or "ecology," a landscape is something invented and experienced (or observed, or represented, or cultivated) solely by human agents. The term "landscape" is variously deployed in the service of a range of political and philosophical positions. This seminar explores "landscape" as a fruitful agitation in critical theory and aesthetic discourse over the past thirty years. The course will interact with the artists and photographic works on view in the exhibition, Landmarks, a 150-year survey of landscape photography in WCMA's collection. We will examine i) how landscape as medium and as genre moves from literature to painting to photography; ii) how to read and employ contemporary theory in the service of artwork from bygone eras; and iii) we will ask who exercises the agency and privilege to name, to invent, to denote a space or a view as worthy of sight.

ARTH 549 (F) Art, Biology, Beauty

This interdisciplinary seminar is offered in conjunction with the upcoming RAP Colloquium scheduled for March 2020, "Beauty, Sexuality, Selection: Darwinian Revolutions in Aesthetics." (Seminar participants will be expected to attend.) Our theme will be Charles Darwin's controversial theory of "sexual selection" as both a historical idea of aesthetic response and beauty, and as a theoretical concept that is back in play in current evolutionary thinking. Readings will be drawn from ancient philosophy, current science, art history, the history of science, and other fields, to engage the following questions: how did the existence of difference in the organic world--gender difference broadly but also more specifically racial difference in the human species--motivate Darwin's theory of an "aesthetic evolution" driven by animal and human perception of visual beauty? How did philosophical aesthetics contribute to Darwin's biological theory of beauty, and how did Darwin's biological theory of beauty unsettle the discipline of philosophical aesthetics? In which ways did the arts and visual cultures of Europe and elsewhere shape Darwin's aesthetic assumptions? How did, and how does, the concept of sexual selection destabilize the concept of "art" as a human cultural activity? How might "sexual selection" complicate historical and current delineations drawn between nature and culture, between the innate and the arbitrary?

ARTH 550 (S) The History, Theory, and Problem of Connoisseurship

The museum and market have long relied upon the "talent" of a chosen few "connoisseurs," whose abilities (i.e. "the expert eye")-shrouded in mythology and vaguery-have profoundly influenced the interpretation of objects. This seminar will interrogate the problematic construct of connoisseurship in the market (Duveen), in the museum (Pope-Hennessy), and in the academy (Berenson). Through readings about the history and theory of the practice from the sixteenth century to the modern day, we will reassess the meaning, and validity, of connoisseurship in visual culture. And, through conversations about authorship, working methods, and artistic intent, we will question what we learn from close looking. This seminar will include case studies using objects in the Clark's permanent collection, focusing on in-depth discussions of materials, techniques, attribution, quality, and the burgeoning field of conservation science. Students will be asked to conduct their own rigorous object-based research.

ARTH 554 (S) The Matrix and the Market: Printmaking and Photography in the Nineteenth Century

During the last half of the 19th century, technical, commercial, and aesthetic approaches to printmaking and photography experienced dramatic paradigm shifts. Etching, for example, simultaneously functioned as a reproductive medium and one that carried experimental, vanguard associations. Practitioners of lithography strove to distance themselves from denigrating commercialism and raise the medium's status to a respected art form. Photography, in turn, negotiated the boundaries between "documentary" and "artistic." This seminar will address the complex issues that swirled around printmaking and photographic matrices, critical responses to the various processes, artist-driven initiatives, and the formative role of the art market and book trade in shaping popular opinion. We will consider these topics across political and geographic borders from Europe to the United States, reading both primary and secondary sources. The class will be held in the new Manton Study Center for Works on paper with visits to Chapin library and the Williams College Museum of Art likely.

Class Format: seminar

Requirements/Evaluation: students will be responsible for readings and involved class discussion; several short and one long presentation; and a final paper (20-25 pages)

ARTH 562 (F) Art of California: Pacific Standard Time

Cross-listings: ARTH 562 ARTH 462 LATS 462 AMST 462

Secondary Cross-listing

In this course, we will study the visual arts and culture of California after 1960 and consider the region's place in modern art history. We will focus on a series of recent exhibitions organized as part of a Getty initiative entitled Pacific Standard Time. Diverse in scope, these shows explored important developments in postwar art in California, including feminist art, African American assemblage, Chicano collectives, Modernist architecture, craft, and queer activism. In this seminar, we will pursue research projects directly related to the art exhibitions we study, and examine southern California conceptualism, photography, performance, painting, sculpture (including assemblage and installation), and video by artists both canonical and lesser known. Student projects will analyze the critical responses to the exhibitions, while also exploring the roles of archives, art criticism, and curatorial practice in contemporary art history. In fall 2017, a new Getty PST initiative focused on Latin American and Latino art will commence and this class will consider these exhibitions as well.

Requirements/Evaluation: several short writing and research assignments, oral presentations, class participation, and a final research paper of 16-20 pages written in stages over the course of the semester

ARTH 567 (F) What is Art Criticism? Current Debates, Past Precedents

Taking as its point of departure recent debates concerning a purported "crisis" of art-criticism, this seminar considers traditions of writing about the work of living artists in modernity. We will begin with current literature and then pivot back to the eighteenth century, tracing a sequence of episodes in art criticism's evolution as a genre by looking at key works of art as mediated by their first critics. Emphasis will be placed on close readings of primary historical texts as prompts for thinking through the following broad questions, among others: What is critique, and what is art criticism? Is the art critic a

judge, a historian, a partisan, a participant, or an artist in her own right? How do forms of distribution impact the content of art criticism, and how does art criticism impact the form and content of art? What is the relationship, if any, between taste, assessment of value, and interpretation of meaning? Artists considered include, among others, Boucher, Friedrich, Whistler, Seurat, Pollock, Piper.

Class Format: seminar

Requirements/Evaluation: two short writing assignments, twenty page final paper

ARTH 573 (S) Modern and Contemporary Art from the Middle East and North Africa

This is an exciting time for art from the Middle East and North Africa. Contemporary artists are exhibiting in international shows and biennales, and the global art market has responded to collector interest and crowned its favorites. The visibility and celebration of these artists, however, does not take into account the larger historical arena of cultural production and artistic practice from which they emerge. In terms of the discipline of art history, the field of modern painting and contemporary visual practice in the region is in its first generation of formation and definition. Drawing on very recent scholarship in art history and visual anthropology, we will explore the "history" of modern and contemporary art in the Middle East and North Africa (from the 1920s-the present). We will pay particular attention to how key terms and categories such as: modern, contemporary, Islamic, and Arab, have been constructed, deployed and debated by artists, institutions and scholars in the field. We will explore the role of museums, art schools, archives and biennales in the region, the creation of art publics and communities, and how the international market has responded to contemporary production. And perhaps most importantly, we will study work by artists that identify with the region and engage and complicate constructions of race, gender, religion, environment, autonomy and community.

Class Format: seminar

Requirements/Evaluation: short response essays and a culminating research paper

Enrollment Preferences: graduate program students and then senior Art History and Arabic Studies majors

ARTH 575 (F) Regression as Modern Fantasy: Archaism, Primitivism, Prehistory

This course analyzes the implications of European modernity's engagement with cultural artifacts it wanted to classify beneath the prefix "pre." We take as our object an aesthetic strategy employed with increasing frequency by modern artists in Europe after 1800: the self-conscious mobilization of visual forms thought to telegraph priority to later advancements, whether historically or developmentally. Our inquiry, beginning with the German Nazarenes and extending into the early twentieth century around the moment of WW1, foregrounds such strategies as key to grasping new notions of temporality and geography that emerged in European modernity. We will inquire into the historical and intellectual contexts that sustained chronological and cultural primitivisms, including the history of colonialism, discoveries of Paleolithic cave art, and the emergence of the modern disciplines of archeology, anthropology, ethnography, child psychology, and psychoanalysis. Alongside close visual scrutiny of some of modernism's most canonical and problematic objects, including key works by Picasso and Gauguin, we will examine the literature that proliferated in this period devoted to the art of peoples deemed "primitive," including the Greeks in the pre-classical period, non-Western peoples, and children.

Requirements/Evaluation: seminar presentations, research paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: graduate students, then advanced undergraduate students

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

ARTH 586 (F) Japanese Popular Visual Culture

Cross-listings: ARTH 286 ARTH 586 ASST 186 COMP 186

Secondary Cross-listing

The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (*ukiyo-e*, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Okazaki), and animation (Oshii, Miyazaki, Kon). We will focus on developing visual reading skills to come up with original interpretations of these works, and on comparing different media to make them shed light on one another.

Class Format: discussion

Requirements/Evaluation: attendance, participation, two 5-page papers, final exam

Prerequisites: none

Enrollment Limit: 35

Enrollment Preferences: students majoring or considering a major in a related discipline

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

ARTH 587 (S) Crash! The Car Accident as Myth and Metaphor in American Art and Visual Culture

A year after MoMA elevated machinery to high art in 1934, Grant Wood painted *Death on The Ridge Road* (Williams College Museum of Art), a depiction of the deadly side of the streamlined modern machines that Alfred Barr might have presented at MoMA. A generation later, Andy Warhol's *Death and Disasters* series multiplied gruesome images of crushed cars and bodies to numbing effect. During the ensuing years, both Jackson Pollock and David Smith (among others) became traffic fatalities. Roughly bookended by the Great Depression and the 1960s, but also considering works of art and visual materials before and after those parameters, this seminar will explore the stakes of car crash imagery for American artists and culture. Readings may include topics in trauma studies, automotive technology, physics, posthumanism, law, and object oriented ontology as well as grounding participants in American art and history of the middle third of the twentieth century. Participants in the course will also have the opportunity to help shape the content, themes, and narrative of an exhibition on car accidents in American art being organized by WCMA.

Requirements/Evaluation: oral presentations and written assignments

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: graduate students, then advanced undergraduate Art History majors

ASIAN AMERICAN STUDIES

Asian American Studies is an interdisciplinary field of study that examines the histories, literatures, cultures and lived experiences of people of Asian descent living in the United States and diasporically in other countries of the Americas. This field of study holds an important role in exploring not only the Asian American experience as framed within the larger intellectual inquiries of race and ethnicity in national and global contexts but also issues of transnationality and diaspora. Knowledge in this field is critical in understanding the U.S. society, history, literature, religion, etc. The critical lens of Asian American studies is also helpful for thinking through many other fields and topics such as colonialism, capitalism, imperialism, immigration, globalization, as well as less overtly racially marked topics such as aesthetics and political theory.

Williams College is yet to build an Asian American Studies concentration or program. Before that happens, students interested in Asian American Studies can take the following courses related to Asian American Studies located in several different academic units.

Fall 2019

AMST 125 Introduction to Asian American Studies (Kim)

AMST 223 Eating Empire: Asian/Pacific Islander/American Foodways and Culture (Kim)

AMST 243 Asian/American and Black Literary and Cultural Thought (Wang)

HIST 384 Selected Topics in Asian American Studies (Wong)

HIST 468 Race, Empire, and the Birth of the American Century (Wong)

WGSS 316 Feeling Queer and Asian (Huang)

Spring 2020

AMST 128 Reading Asian American Literature (Kim)

AMST 382 Transnational Asian/American Film and Video (Kim)

AMST 403 New Asian American, African American, Native American and Latina/o Writing (Wang)

DANC 216 Asian-American Identities in Motion (Tarah)

HIST 381 The Legal History of Asian America (Wong)

MUS 279 American Pop Orientalism (Sheppard)

In addition to the above courses, students are strongly encouraged to take courses on [Race, Ethnicity, and Diaspora in American Studies](#). Students interested in various disciplines about Asia can take courses in [Asian Studies](#).

As of March 2019 when the Course Catalog was finalized, the CPC Asian American Studies Working Group has completed its final report and submitted its recommendations to the senior administration. Based on this report, the Curricular Planning Committee (CPC) and the Committee on Appointments and Promotions (CAP) are actively engaging in discussions about various options regarding possible pathways toward establishing an Asian American Studies program, a concentration, or both at Williams. In the meantime, students interested in pursuing a concentration in Asian American Studies should consult with [Professor Dorothy Wang](#) (American Studies) or [Professor Vivian Huang](#) (Women's, Gender and Sexuality Studies).

ASIAN STUDIES

(Div I & II, see explanation below)

Chair: Professor George Crane

- Cecilia Chang, Frederick Latimer Wells Professor of Chinese
- Man He, Assistant Professor of Chinese
- Shinko Kagaya, Professor of Japanese; on leave Spring 2020
- Cornelius C. Kubler, Stanfield Professor of Asian Studies; on leave 2019-2020
- Christopher M. B. Nugent, Professor of Chinese, Chair of Comparative Literature Program
- Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese
- Li Yu, Professor of Chinese

Affiliated Faculty:

- Christopher Bolton, Professor of Comparative Literature and Japanese Literature
- George Crane, Chair of Asian Studies and the Edward S. Greenbaum 1910 Professor of Political Science
- George Dreyfus, Jackson Professor of Religion
- Ju-Yu Scarlett Jang, Professor of Art
- Jason Josephson Storm, Professor of Religion
- Peter Just, Professor of Anthropology
- Aparna Kapadia, Associate Professor of History
- Eiko Maruko Siniawer, Professor of History
- Anne Reinhardt, Chair and Professor of History
- W. Anthony Sheppard, Marylin & Arthur Levitt Professor of Music
- Scott Wong, Charles R. Keller Professor of History

Visitors:

- Susanne Ryuyin Kerekes, Gaius Charles Bolin Fellow in Religion and Asian Studies
- Eun Young Seong, Visiting Assistant Professor of Japanese
- Nana Takeda, Visiting Lecturer in Japanese
- Chen Wang, Visiting Assistant Professor of Chinese

Mission Statement and Learning Objectives

The mission of the Department of Asian Studies is to help as many students as possible—both majors and non-majors—develop practical proficiency in Asian languages and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of one or more of the disciplines represented within Asian Studies (including anthropology, art history, economics, history, linguistics, literature, music, political science, religion, and sociology), so that they may realize their fullest intellectual and personal potential and be able to make useful contributions to society. The department offers three distinct major tracks: Asian Studies, Chinese, and Japanese.

Learning Objectives for the Asian Studies Major

Asian Studies is a multi-disciplinary and interdisciplinary major track that combines the humanities and social sciences with language study. It aims to help students develop practical proficiency in an Asian language and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of Asia through a particular disciplinary lens. Beyond training in the discipline they choose for their three-course disciplinary qualification, students have the opportunity to explore a range of other disciplinary approaches and perspectives.

Majors in Asian Studies will:

- Attain a practical proficiency in an Asian language (either Chinese or Japanese currently offered by the department, or Hindi or Korean, offered by the Critical Language Program of the Center for Foreign Languages, Literatures, and Cultures)
- Gain awareness and understanding of a particular country or region in Asia through training in one of the disciplines represented in the Department of Asian Studies (anthropology, art history, economics, history, linguistics, literature, music, political science, religion, or sociology).
- Have an opportunity to explore a range of disciplinary approaches and perspectives in addition to their primary disciplinary focus and apply a range of research methodologies with a focus on interdisciplinarity.
- Develop close reading, analytical writing, and critical thinking skills by engaging in cross-linguistic, cross-cultural, and comparative historical analysis.
- Gain a comparative perspective on issues affecting Asia as a region.
- Develop global awareness and engagement through identification of the values, perspectives, and practices of Asian societies, both past and present.

THE MAJOR

We offer courses in English in the field of Asian Studies as well as courses in Chinese and Japanese language, literature, and culture. Three distinct majors are offered: a major in Chinese; a major in Japanese; and an interdisciplinary Asian Studies major which allows students to choose from a wide range of courses in the anthropology, art, economics, history, languages, linguistics, literatures, music, politics, religion, and sociology of China, Taiwan, Japan, and other Asian countries. An increasing number of courses on South Asia are also offered (e.g. ASST 117, ASST 221, ASST 244, ASST 246T, ASST 248, ASST 252, ASST 256, ASST 391, ASST 415, ASST 424, ASST 431, ASST 488). Students interested in taking Korean or Hindi may take these languages through the Critical Language Program administered by the Center for Foreign Languages, Literatures, and Cultures. Students with questions about the Asian Studies majors or about Asian Studies course offerings should consult the chair. Please note: Courses with ASST prefix carry Division II credit unless otherwise noted and courses with CHIN and JAPN prefixes carry Division I credit unless otherwise noted.

All students wishing to major in the Department of Asian Studies are required to take and pass a total of eleven courses, as follows:

One course that explicitly compares at least two countries in Asia, such as ASST 103, ASST 126, ASST 233, ASST 245, ASST 248, ASST 250, ASST 256, ASST 271, ASST 391, ASST 414, ASST 424, ASST 431, JAPN 258. Or students may take instead a course on a country that is different from their country of primary focus.

Four semesters of Chinese or Japanese language (including no more than two 100-level courses).

In addition to completing (1) and (2) above, all majors choose either an Area Studies track, leading to a major in Asian Studies; or a Language Studies track, leading to a major in Chinese or Japanese.

The requirements for Asian Studies are indicated below:

Asian Studies Major

Three-course qualification in one of the disciplines represented within Asian Studies (anthropology/sociology, art history, economics, history, linguistics, literature, music, political science, religion). The qualification, to be determined through consultation between students and their advisor, normally includes an introductory course and more advanced courses. At least two of these three courses must be on Asia.

Three approved electives, which may include further language work.

STUDY ABROAD

Students intending to major in Asian Studies are encouraged to study in Asia during one or both semesters of their junior year. Williams faculty serve on the boards of several study abroad programs in China and Japan. Opportunities to study in India, Indonesia, Korea, Taiwan, Thailand, and other Asian countries are also available. Prospective Asian Studies majors who are planning to study abroad should discuss their plans with their advisor as far in advance as possible. Up to eight courses taken overseas may be counted toward graduation, and up to four courses taken off campus may be counted toward the major.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). For programs that we are familiar with, we usually pre-approve credits.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken

while on study away?

Course title and description, complete syllabus including readings/assignments, and exams or other written work.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, maximum of four courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Approved courses only.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Not in particular. Students are always strongly encouraged to consult with the department faculty ahead of time to plan on what courses to take during study-away and what courses to take up return.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

There have been cases where students decided to take different courses after they arrived at the program and those courses did not meet our requirements.

THE DEGREE WITH HONORS

Students interested in writing an honors thesis in Asian Studies should submit a proposal to the department chair before they pre-register for senior courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. Admission to the honors thesis program will normally be limited to students who have maintained at least a B+ average in their courses for the major.

Students admitted to the program should register for ASST 493-W31-494. They will be expected to turn in the final draft of their thesis shortly after spring break and to discuss their results formally with their faculty graders. Their final grades in the three courses listed above and the award of Honors, Highest Honors, or no honors will be determined by the quality of the thesis and the student's performance in the oral defense.

THE ASIAN STUDIES ENDOWMENT

The Linen summer grants for study abroad, the Linen visiting professorships, and several other programmatic activities in the department are supported by an endowment for Asian Studies established by family and friends in memory of James A. Linen III, Class of 1934, Trustee of the College from 1948 to 1953 and from 1963 to 1982.

ASST 103 (S) Asian Art Survey: From the Land of the Buddha to the World of the Geisha (DPE)

Cross-listings: ASST 103 ARTH 103

Secondary Cross-listing

Moving chronologically and thematically, this course surveys the history of Asian art from the Bronze Age to the globalizing art worlds in the present day with particular emphasis on India, China, and Japan. Its contextual approach helps students gain insight into the aesthetic, religious, and political ideas and cultural meanings conveyed by the works of art. It also provides students with the vocabulary, analytical techniques, and patterns of thinking needed for advanced art history courses. Topics include visualizing imperial power; temple architecture and rituals; sexual symbolism in Buddhist and Hindu art; nature or landscape painting as moral and political rhetoric; literati theory and practice in art; modes of visual narration; politicizing Zen Buddhism and its related practices in Japan's samurai culture; and the sex industry and kabuki theater and their art in Edo Japan. While each class session will explore unique and region-specific cultural formations and artistic developments, a strong emphasis will be also placed on the interconnectedness, through trade; movement of objects; pilgrimage; and diplomacy and war, not only among these three distinctively different Asian cultures, but their respective interactions with the West (Key words: Chinoiserie, Japonisme, Company painting, perspective picture). The methodology used is intended to dispute the idea of a single, stable identity of "Asia," "Asian art," or "Asian culture" that has dominated the Western narratives throughout history, and to call attention to the variety of cultures and cultural encounters at different times in history that contributed to what we currently think of as "India and its art and culture," "China and its art and culture," and "Japan and its art and culture." (Persian, Mesopotamian, and European influences on Indian art and its culture, for example.)

Class Format: limited number of class discussion, some classes may be conducted at WCMA

Requirements/Evaluation: four required textbooks; three quizzes; one response paper 3-4 pages; two writing assignments 4-6 pages; class attendance

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: Art History majors

Expected Class Size: 25

Grading: no pass/fail option, yes fifth course option

Distributions: (D1) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

ASST 103 (D1) ARTH 103 (D1)

Writing Skills Notes: One reading response paper (3-4 pages); first writing assignment (4-5 pages); and second writing assignment (5-6 pages). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

Difference, Power, and Equity Notes: Topics discussed in class encourage students to confront and reflect on the operations of difference, power, and equity within and among Asian cultures. Examples include the relationships between political power, ritual, and the creation and use of artworks; style as a function of social class (elite arts, popular arts, professional court style vs. literati amateur style, etc.); the sex trade and its portrayal in popular Japanese prints; the modernization or Westernization of Asian societies.

ASST 115 (F) The World of the Mongol Empire (WS)

Cross-listings: HIST 115 ASST 115

Secondary Cross-listing

By the middle of the thirteenth century, Mongol armies led by Genghis Khan had conquered an enormous swath of territory, extending from China westward to Eastern Europe and the Middle East. Further expanded by Genghis's descendants, the Mongol Empire incorporated a vast range of different peoples and cultures, enhancing communications, trade, and exchange among them. In this course we will examine the "world order" of the Mongol Empire from its origins on the Asian steppe through its expansion, consolidation, and disintegration, as well as its legacies. From a wide range of primary and secondary sources, including literature, chronicles, and traveler's accounts, we will investigate the diverse experiences of the Mongol world in places such as China, Russia, Persia, and Central Asia.

Requirements/Evaluation: active participation in discussion, several short papers, and a final research paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-year students and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 15-19

Grading: yes pass/fail option, no fifth course option

ASST 117 (S) Bombay/Mumbai: Making of a Modern Metropolis (WS)

Cross-listings: GBST 117 HIST 117 ASST 117

Secondary Cross-listing

Bombay or Mumbai is India's foremost urban center and is well known today as a truly global city. It is the heart of India's commercial life comparable in vibrancy and multiculturalism with the world's emerging cities like Shanghai, Hong Kong and Sao Paulo. What are the historical elements that contributed to the making of India's most modern and global metropolis? What are the antecedents of the modernity, the vibrant culture, dark underbelly and economic diversity that characterize Bombay today? What does the history of Bombay tell us about modernity in India and the emerging countries of the third world in general? This seminar will help students to answer these questions through historical materials on Bombay as well a wide range of multimedia sources including cinema, photography and literature. With a focus on the 19th and 20th centuries, we will explore themes like the commercial culture of a colonial port city, the modern public sphere, theatre and film, labor migration, public health and prostitution to understand what went into the making of this modern metropolis. The primary objective of this course is to introduce students to a wide range of historical sources and ways of interpreting them. The other objective is facilitating their understanding of the history of modern India through the history of its most important city.

Requirements/Evaluation: assessment will be based on class participation and weekly responses to readings, 2-3 short papers, leading to an oral presentation and final paper

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 19

Enrollment Preferences: first-years, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 15-19

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASST 121 (F) The Two Koreas (WS)

Cross-listings: ASST 121 HIST 121

Secondary Cross-listing

The two Koreas--North and South--were born in the aftermath of World War II, when the United States and the Soviet Union arbitrarily divided the peninsula into two zones of occupation at the 38th parallel. Today, over six decades later, the split endures as what has been called "the Cold War's last divide." This tutorial examines the history of the two Koreas from their creation in 1945 to the present. We will explore the historical and ideological origins of the division; how tensions between North and South led to the outbreak of the Korean War; why the paths of the two Koreas have differed so markedly; how each country has been shaped by its political leaders and their ideologies; and what recent developments in North Korea, including its nuclear program, have meant for relations on the peninsula and beyond. Course material will include primary and secondary sources of various kinds, including political documents, intellectual treatises, films, and short stories.

Requirements/Evaluation: students will meet with the instructor in pairs for an hour each week; a student either will write and present orally a 5- to 7-page essay on the assigned readings or will be responsible for offering an oral critique of their partner's work

Prerequisites: first-year or sophomore standing; juniors or seniors with permission of instructor

Enrollment Limit: 10

Enrollment Preferences: first-year students, and then sophomores who have not previously taken a 100-level seminar

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASST 121 (D2) HIST 121 (D2)

Writing Skills Notes: In this tutorial, students receive substantial feedback from the professor (and from their partner) both in the sessions and in written comments about all aspects of their writing--argumentation, structure, mechanics. Such feedback is offered on five papers (of 5-7 pages in length) that they write over the course of the semester; they can also elect to receive comments on their final, synthetic paper (12-15 pages in length). Significant guidance is also given on the paper-writing process.

Attributes: GBST East Asian Studies Electives HIST Group B Electives - Asia

Not offered current academic year

ASST 122 (S) Old Shanghai, New Shanghai

Cross-listings: ASST 122 CHIN 422

Secondary Cross-listing

Once nicknamed as "Paris of the East," Shanghai, now a megacity with a population of 25 million, is the industrial, commercial and financial center of contemporary China. Shanghai is often depicted as a metropolis that marked the beginning of China's modernity and urban culture. People from other regions in China see Shanghai as a city full of opportunities, but characterize its people as astute and shrewd, cocky and unwelcoming. Foreigners, however, find the city appealing and its people open-minded. Jews fleeing Nazi persecutions during WWII, found Shanghai to be a "paradise of ghetto" that provided the only haven of survival. For local people, there have always been two Shanghai: an old one and a new one. They are proud of the new Shanghai but constantly nostalgic about the old one. This tutorial examines the multifaceted city of Shanghai and its people from historical and cultural perspectives. We will look at the city's history (from the late nineteenth century to present day), its local language and culture, and everyday life of the people (including migrants and foreigners) living in it. The central ideas we will explore are "modernity" and "regional identity." We will investigate how these theoretical constructs play out in the making of the city of Shanghai and the formation of its unique local identity. Course readings include historical and cultural studies as well as documentaries in English about Shanghai, and primary sources in Chinese in a wide range of genres including fiction, essays, and films (English translation of the primary sources are available for students taking the course in English). *The course is conducted in either Chinese or English.* Students wishing to take the course in English should register under ASST 122T and students wishing to take the course in Chinese should register under CHIN 422T. Students will come away with a critical understanding about China's regional cultures and one of its most important metropolitan cities. Chinese language learners will be able to improve their reading and writing skills in Chinese through this course. The course has a required field trip to a Chinese restaurant on a Saturday or Sunday, depending on all students' schedules.

Requirements/Evaluation: each tutorial pair will meet with the instructor for one hour per week, during which time we will discuss a 5-page paper that one of the partners has submitted

Prerequisites: none for students taking ASST 122; CHIN 402 or permission of the instructor for students taking CHIN 422

Enrollment Limit: 10

Enrollment Preferences: current or prospective Asian Studies, Chinese, or Japanese majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: students wishing to take the course in English should register under ASST 122 and students wishing to take the course in Chinese should register under CHIN 422

ASST 186 (F) Japanese Popular Visual Culture

Cross-listings: ARTH 286 ARTH 586 ASST 186 COMP 186

Secondary Cross-listing

The phrase "Japanese popular culture" often calls to mind comics and animation, but Japan's earliest visual pop culture dates back to the 17th century and the development of arts like kabuki theater and woodblock prints that could be produced for a mass audience. This course traces Japanese popular culture through a range of visual media: kabuki and puppet theater, premodern and postmodern visual art (*ukiyo-e*, Superflat), classic film (Ozu, Mizoguchi, Kurosawa), manga/comics (Tezuka, Otomo, Okazaki), and animation (Oshii, Miyazaki, Kon). We will focus on developing visual reading skills to come up with original interpretations of these works, and on comparing different media to make them shed light on one another.

Class Format: discussion

Requirements/Evaluation: attendance, participation, two 5-page papers, final exam

Prerequisites: none

ASST 207 (F) An Exploration of Japanese Language and Culture

Cross-listings: ASST 207 JAPN 407

Secondary Cross-listing

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

Requirements/Evaluation: attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207 will meet once a week; JAPN 407 will meet twice a week

Prerequisites: none for ASST 207; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407

Enrollment Limit: 10

Enrollment Preferences: current or prospective Japanese, Chinese, and Asian Studies majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: students wishing to take the course in English should register under ASST 207 and students wishing to take the course in Japanese should register under JAPN 407

China expanded from scattered Neolithic settlements to become one of the world's most complex and sophisticated civilizations. During this process, it experienced dramatic transformation as well as remarkable institutional and cultural continuities. This course will examine Chinese history from prehistoric times to the "early modern" seventeenth century. It will address topics such as the creation and transformation of dynastic authority, the reinterpretation of Confucian thought, the transmission of Buddhism, the conquest of China proper by "barbarian" peoples, the composition of elites, and change in daily life, popular culture and China's place in the East Asian and world systems.

China's presence continues to grow in our world today, but contemporary China also evinces complex contradictions: a market economy promoted by a nominally Communist government, extremes of urban wealth and rural poverty, increasing participation in the international community and intensifying nationalist rhetoric. This course examines China's historical engagement with the modern world to offer perspective on its current conditions. We will begin with the Qing (1644-1911) conquest of China and consolidation of a multi-ethnic empire, and investigate China's encounters with Western and Japanese imperialism, the rise of Chinese nationalism, Republican and Communist revolutions, and the often turbulent history of the People's Republic. Throughout, we will examine themes of social, economic, intellectual, and cultural change through predominantly primary source reading and analysis.

Over a century of constant warfare came to an end in the late 1500s, ushering in more than two hundred years of relative peace in a Japan that was ruled by a military government. This course will take up the extraordinary changes and enduring continuities of the period between the establishment of the Tokugawa government in the early 1600s and its eventual collapse in 1868, an era characterized by societal order and tensions, economic growth and stagnation, the development of cities and towns, the flourishing of urban culture, the spread of new and different ideas, and the decline of the samurai. We will focus on the political, social, and cultural history of early modern Japan, including topics such as the establishment of the Tokugawa order, the nature of the political system, foreign relations, urbanization, popular culture, material culture, the quality of life, the legal order, gender and sexuality, and the fall of the Tokugawa government. Assigned materials will include government documents, intellectual treatises, autobiographies, literature, and films.

Stunning revolutions, the construction and collapse of an empire, the waging of wars, devastating defeat and occupation by a foreign power, and postwar economic ups and downs have marked Japan's modern experience. This course will explore how various Japanese from politicians and intellectuals to factory workers and farmers have understood, instigated, and lived the upheavals of the past century and a half. We will ask why a modernizing revolution emerged out of the ashes of the early modern order; how Japan's encounters with "the West" have shaped the country's political and cultural life; what democracy and its failures have wrought; how world war was experienced and what legacies it left in its wake; how national identity has been constructed and reconstructed; and how postwar Japan has struggled with the successes and costs of affluence. Materials will include anthropological studies, government documents, intellectual tracts, fiction, films, and oral histories.

Requirements/Evaluation: class participation, response papers, two short papers (5 pages), and a self-scheduled final exam or research paper

Cross-listings: HIST 219 JAPN 219 ASST 219 COMP 229

Secondary Cross-listing

This course will introduce students to the history, literature, and artistic culture of premodern Japan, from the time of the first recorded histories in the 800s through the abolition of the samurai class in the late 1800s. We will focus on the politics and aesthetic culture of the ruling elites in each period, from the heyday of the imperial court through the rise and eventual decline of the samurai warrior and the growth of Edo (Tokyo), with its new mode of early modern government and new forms of literature, theater, and art. Team taught by faculty from History and Comparative Literature, the course will examine historical texts alongside works drawn from literature, visual culture, and performing arts, and will ask students to consider how these different kinds of texts can shed light on one another. What is the difference between reading history and reading literature, or is it even meaningful to distinguish the two?

Class Format: lecture/discussion

ASST 220 (S) Being Korean in Japan

Cross-listings: ASST 220 JAPN 220

Secondary Cross-listing

Who are Zainichi Koreans (Koreans in Japan)? How are they different from Koreans in Korea or in the United States? Contemporary Korean TV dramas and films have depicted Koreans as attractive and successful people appealing to Hallyu (Korean Wave) fans around the world. However, Zainichi Koreans, who are the largest ethnic minority in Japan, have been frequently portrayed as abusive husbands/fathers, pitiful wives/mothers, or juvenile delinquents in both Japanese and Korean cinema and literature. Through close readings of films, novels, and short essays, we will explore little-known yet significant representations of Zainichi Koreans by focusing on Japanese and Korean historical contexts. By doing so, we will discover new aspects of transnational exchange not only between Japanese and Koreans, but also between South and North Koreans in Japan. All class materials will be available in English translation or with English subtitles.

Secondary Cross-listing

This course focuses on the history of South Asia with the aim of providing an overview of the political and social landscape of the region from the end of the Mughal Empire through British colonial rule and the Partition of India and Pakistan. We will explore a range of themes including the rise of colonialism, nationalism, religion, caste, gender relations, and the emergence of modern social and political institutions on the subcontinent. In addition to reading key texts and historical primary sources on the specific themes, we will also work with a variety of multimedia sources including films, short stories and website content. One objective of this course is to introduce students to the different political and social processes that led to the creation of India, Pakistan and Bangladesh; another is to teach students to think critically about the significance of history and history writing in the making of the subcontinent.

This course is an introduction to the history of India and South Asia from prehistoric times to the emergence of early modernity. During these centuries, the subcontinent emerged as one of the most diverse and complex regions of the world, as it continues to be even today. The course will cover the period between the rise of the Indus Valley civilization to the end of the Mughal Empire and will address topics such as the "discovery of India", the coming of the "Aryans", society and culture in the great epics like the *Ramayana*, the beginnings of Jain and Buddhist thought, politics and patronage under Islamic polities, the formation of Mughal imperial authority through art, architecture and literature, among others. Through the study of social processes, the course will focus on the diversity and connectedness that have defined the subcontinent throughout its history. It will also consider the role of history in the region and how a number of events from the past continue to inform its present.

Or, "From 'Shark Tank' to 'Monk Cave': Business and Socially Engaged Buddhism". Television shows like Shark Tank, featuring a panel of potential investors who consider propositions from aspiring entrepreneurs, evinces that popular culture values only the making of profit. In such a capitalistic world, who are the "winners" and "losers"? What impact does a business/product have beyond its intended consumer benefits? What is the Buddhist response to business and commerce and its overall effects on individuals, society, and ecology? This course will challenge students to research, analyze, and devise resolutions for real world issues, by having students employ Buddhist solutions informed by concepts such as compassion, interconnectedness, and Socially Engaged Buddhism. Students will scrutinize the related concept of "structural violence". We will look at examples from Bhutan's "Gross Domestic Happiness", Thailand's "Sufficiency Economy", China's state-led religious charities under the name of "Humanistic Buddhism", as well as the ordination of trees. This course hopes to prepare students to be critical, rather than merely passive, world citizens, especially in the realm of business, and to be more conscious and aware of their everyday life choices and its impact on every aspect of society.

ASST 244 (S) Mind and Persons in Indian Thought

Cross-listings: REL 244 ASST 244

Secondary Cross-listing

In this course, we follow the conversation among Indian philosophers concerning the self and the nature of consciousness. We start with some of the Hindu views about the self and the mind and consider their ethical implications. We then consider a range of Buddhist critiques of these views, focusing more particularly on the Madhyamaka philosophy, which radicalizes the critique of the self into a global anti-realist and skeptical stance. We also examine the Yogacara school, which offers a process view of reality focusing on the analysis of experience. We conclude by considering some of the later Hindu holistic views of the self as responses to the Buddhist critique. In this way we come to realize that far from being the irrational foil of "the West," Indian tradition is a rich resource for thinking through some of the central ideas that have challenged philosophers in both traditions.

Cross-listings: ASST 246 ANTH 246 WGSS 246 REL 246

Secondary Cross-listing

This tutorial considers India's legacy as a booming Asian democracy that is built upon deep and enduring divisions. Why is India's growing population so often described in terms of multiple identities or fragmenting oppositions---including religion, gender, caste, and class? What are the historic roots and recollections of key moments of structural violence in modern Indian history that produce ongoing social conflict as well as social fluidity? We pay particular attention to key historic moments such as Partition, and key communal riots in Gujarat, Hyderabad, and Delhi as well as regions of India such as Jammu & Kashmir in order to understand the struggle for individual subjectivity and identity within a landscape of stark social hierarchies. We will cover climate emergencies, resource scarcities, and ongoing struggles for power and status across very different parts of India. Our readings include ethnographic, sociological, historical analyses as well as fiction, oral history, and popular media sources that attempt to portray India's diverse and fragmented society.

Class Format: meetings weekly, weekly writing, and discussion

Requirements/Evaluation: weekly writing assignments and tutorial attendance every week

ASST 250 (F) Scholars, Saints and Immortals: Virtue Ethics in East Asia

Cross-listings: ASST 250 REL 250

Secondary Cross-listing

In East Asian cultures, as in the United States, popular conceptions of morality typically take their shape, not from explicit rules, but from *moral paragons*--stylized figures that are said to embody a distinctive cluster of virtues. For example, American Christians invoke not only Jesus, but also a pantheon of "secular saints" as diverse as Martin Luther King Jr. and General Patton, George Washington and Cesar Chavez. This course will explore the cultural functions of moral paragons and philosophies of virtue in East Asia by introducing students to examples from Chinese and Japanese history, ranging from Confucian articulations of the ideal scholar-bureaucrat to Buddhist conceptions of the Bodhisattva to Taoist immortals. It will also address the history of ethical thought in East Asia, focusing particular attention on conceptions of "Virtue Ethics." This approach has come to be seen

by some contemporary analytic philosophers as a way out of the impasse produced by ethical relativism and the loss of theological rationales for moral action. Readings will include Euro-American philosophers such as Nietzsche and MacIntyre as well as primary texts in translation by Chuang-tzu, Confucius, Shantideva and others.

ASST 253 (S) Love and Death in Modern Japanese Literature

Cross-listings: ASST 253 COMP 255

Secondary Cross-listing

One thing that surprises many first-time readers of modern Japanese fiction is its striking similarity to Western fiction. But equally surprising are the intriguing differences that lie concealed within that sameness. This course investigates Japanese culture and compares it with our own by reading Japanese fiction about two universal human experiences--love and death--and asking what inflections Japanese writers give these ideas in their work. The course begins with tales of doomed lovers that were popular in the eighteenth-century kabuki and puppet theaters, and that still feature prominently in Japanese popular culture, from comics to TV dramas. From there we move on to novels and films that examine a range of other relationships between love and death, including parental love and sacrifice, martyrdom and love of country, sex and the occult, and romance at an advanced age. We will read novels and short stories by canonical modern authors like Tanizaki, Kawabata, and Mishima as well as more contemporary fiction by writers like Murakami Haruki; we will also look at some visual literature, including puppet theater, comics, animation, and Japanese New Wave film. *The class and the readings are in English.*

ASST 255 (S) Buddhism: Ideas and Practices

Cross-listings: ANTH 255 REL 255 ASST 255

Secondary Cross-listing

This course introduces students to Buddhism by examining its ideas and practices as they have taken place in actual social contexts rather than as disembodied textual objects. After examining the main ideas and narratives of the tradition, we turn our attention to Thailand where we examine how these ideas and narratives have shaped a whole range of practices, from meditation to shamanistic rituals. We then consider the transformations that Buddhism is undergoing in contemporary society, examining the rise of meditation movement, the changing role of monks and laity, the resurgence of the nun order, the rise of Buddhist social activism and the development of new Buddhist social philosophies. We ask questions such as: How can Buddhism adapt to a modern global consumerist society? What are the transformations involved in this process and the role that Buddhism can play in such a global society? Should Buddhists take advantage of the opportunities of this new global culture or should they adopt a critical stance toward its consumerist values?

ASST 256 (F) Buddhism, Sex, & Gender: #MeToo Then and Now (DPE)

Cross-listings: ANTH 256 REL 256 ASST 256 WGSS 256

Secondary Cross-listing

This course considers the feminist voices that have been part and parcel of Buddhist practices, texts, and institutions for most of its 2500-year history.

We will conduct a historical genealogy of Buddhist voices that illustrate the fluid and disruptive role of sex, gender, caste, and class in relation to individual behavior and social relations. How did the Buddha's inner revolution produce a set of practices that both reject and reinforce existing binaries and social hierarchies of sex and gender, and with what effects? We will trace a feminist voice that decries harassment, assault, and systemic sexism within Buddhist communities from the first female disciples (Theri) of the Buddha to the current #MeToo era of embattled toxic masculinity. Along the way, we explore a literary canon that contains misogyny and 'she devils' alongside a rich tapestry of female divinities, transgender fluidity, and female liberation. We pursue an intersectional analysis of Buddhist traditions and texts by considering the multiple forms of social hierarchy--gender, sexuality, race, and class--that Buddhism has attempted to transcend. We begin by considering three women in the Buddha's life--his mother (Maya), his stepmother/aunt (Gotami), and his wife (Yashodhara)--as well as the tales of the first enlightened Buddhist women whose topics include prostitution, patriarchy, sexism, and pathetic husbands, as well as their own decaying bodies and beauty. Our next theme is the myriad ways that gender is both produced and deconstructed in Buddhist discourses on enlightenment and the human body. Our final theme considers a range of monastic memoirs, including a Buddhist black nun who left Harvard to take ordination in Thailand, and a Dutchman who studied Zen in Japan. We close by examining the current debates in the U.S. and Asia that seek to combat systemic racism, sexism, and casteism in Buddhist traditions.

Requirements/Evaluation: class discussion, reading responses (3-4 pages), writing chat, final research paper (12 pages)

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Anthropology, Religion, Asian Studies, Women's, Gender and Sexuality majors

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

ASST 266 (S) Confession and Deception in Japanese Literature

Cross-listings: ASST 266 COMP 266

Secondary Cross-listing

Situated at the origins of Japanese literature are the beautiful and revealing diaries of ladies in waiting at the tenth-and eleventh-century court. Yet one of the most famous of these women turned out to be a man. For the next thousand years, Japanese literary tradition would place a premium on confessional writing, but the distortions and concealments of these narrators (and the authors hiding behind them) would always prove at least as interesting as the revelations. This course examines several centuries of Japanese literature to ask whether you can ever put your true self into writing; along the way I will ask you what you reveal, conceal, discover, or reinvent about yourself when you write about literature for a class like this. Texts will range from classical and medieval court literature by Sei Shônagon and Lady Nijô, through autobiographical and confessional novels by Sôseki, Tanizaki, Mishima, and Abe Kôbô, to documentary and subculture films like *The New God* and *Kamikaze Girls*. The class and the readings are in English; no familiarity with Japanese language or culture is required.

Requirements/Evaluation: attendance and participation, a few short response assignments, one test, two 5-page papers, and an ungraded creative project

Prerequisites: none; no familiarity with Japanese language or culture is required

Enrollment Limit: 25

Enrollment Preferences: students majoring or considering a major in Comparative Literature

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

ASST 269 (F)(S) Mindsight: Mindfulness and Medicine (DPE) (WS)

Cross-listings: REL 269 STS 269 ANTH 269 ASST 269

Secondary Cross-listing

This course offers a social analysis and historical genealogy of meditation and mindfulness from its roots as a Buddhist practice through its modern applications in a variety of social settings including hospitals and clinics, schools & communities where it has been used to improve health outcomes, education outcomes, and other social outcomes. Throughout, we are interested in the scientific evidence that have tried to show how meditation and mindfulness can alter human experience, behavior, and well-being. We begin by considering how mindfulness and meditation practices were introduced and developed by the Buddha and continue to be taught and practiced today in contemporary settings, before turning to the rapid rise of scientific research on mindfulness in recent decades. How and why has research on mindfulness and meditation exploded since 2000 and how does this relate to better understandings of human emotions, human behavior, and human development? We critically examine the use and misuse of modern technologies and models developed by clinical psychiatry and biomedicine to better understand the relationship between the human brain, behavior, and emotions. We ask how meditation and mindfulness has been used to improve the training of doctors & teachers, as well as patient/provider encounters. Throughout, we are interested in how applied research and interventions of mindfulness training with medical training, schools, and other social domains has been used to generate a 'science of personal transformation' that is trying to harness the adaptability of human minds, brains, & behaviors. Students will be expected to engage in mindfulness practices during the semester.

Class Format: weekly tutorial, context-based learning, experiential learning

Requirements/Evaluation: weekly tutorial papers and discussion

Prerequisites: a course on Buddhism is preferred but not required

Enrollment Limit: 10

Enrollment Preferences: ANTH, SOC, REL, ASST majors; PHLH, STS concentrators; seniors and juniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D2) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

ASST 270 (S) Visual Arts of Japan

Cross-listings: ASST 270 ARTH 270

Secondary Cross-listing

This course is a survey of traditional Japanese painting, sculpture, architecture, woodblock prints, and decorative arts. Special attention will be paid to the developments in artistic style and subject matter in the contexts of contemporary cultural phenomena. Through visual analysis students learn the aesthetic, religious, and political ideals and cultural meanings conveyed in the works of art. Course highlights include the transmission of Buddhism and its art to Japan; Zen Buddhism and its art (dry gardens; temples; and tea ceremony related art forms) in the context of samurai culture; the sex industry and kabuki theater, their art, and censorship; and the Western influences on Japanese art and culture and vice versa, (Japanese woodblock prints' impact on Impressionist and Post-Impressionist paintings, for example).

Requirements/Evaluation: three 30- to 40-minute quizzes, two short papers, film screening, class attendance

ASST 271 (F) Erotic, Grotesque, Sublime: Ghosts and Monsters in East Asian Religion and Popular Culture

Cross-listings: COMP 279 REL 271 WGSS 279 ASST 271

Secondary Cross-listing

"Ghosts and monsters" (Chinese yaoguai, Japanese yokai, Korean yogie) have long figured prominently in East Asian cultural history. In medieval East Asian chronicles, wrathful demons attacked the imperial palace, ghosts haunted abandoned temples, and shape-shifting foxes infiltrated the bedrooms of royal concubines. These creatures persisted into the modern era when nineteenth century tabloids reported the existence of demon-foxes, giant serpents, and vengeful spirits. In the latter half of the nineteenth century, monsters began crossing over into the realm of fiction, and Japanese, Chinese, and Korean popular novels and films continue to crawl with images of traditional dark beasts. The opening contention of this course is that ghosts and monsters signify deviancies from "the normal" as it is constructed in a given culture and time period--they often come to represent transgressions of nature, gender, sexuality, race, morality, or to subvert distinctions such as those between human and animal, man and woman, animate and inanimate, present and past, or living and dead. This course will analyze East Asian ghosts and monsters in their historical cultural context, thinking about how they come to embody particular cultural fears and desires. We will use a range of East Asian materials in translation--including folktales, medieval bestiaries, short stories, and films, alongside a heavy dose of theory including works by feminist scholars Julia Kristeva, Ilka Quindeau, Susan Sontag and various others who attempt to understand the monstrous and the uncanny. Students will undertake an extended research project on a ghost or monster of their choice and locate it in its broader cultural context. Doing so should put us in a position to explore central themes, such as the connection between the grotesque and the erotic, the cultural performance of gender, the social construction of illness, the trauma of memory, the commodification of the supernatural, and the boundaries of the human.

Class Format: seminar

ASST 272 (F) Art of the Noble Path: Buddhist Material Culture Across Asia**Cross-listings:** REL 272 ARTH 272 ASST 272**Secondary Cross-listing**

Buddhism has spread throughout Asia and beyond since its emergence in India in the 5th century BCE, providing a shared philosophical and cosmological framework for diverse cultures. Artistic expression, regional politics and cultural landscapes have been shaped by its remarkable influence. With patrons ranging from powerful monarchs and monks to merchants and tradespeople, Buddhist art has historically reflected the religion's social inclusivity. This course will survey the architecture, painting and material culture of Buddhism in Asia, tracing its influence in diverse media, from rock-cut architecture to Zen painting. A close reading of primary texts, such as architectural inscriptions in India, manuscripts from Tibet, and travelogues of Chinese pilgrims, will provide greater context for the artworks.

Requirements/Evaluation: 3 fifteen-minute quizzes, 1 three to five-page paper, 1 eight to ten-page paper, a midterm, and a final exam**Prerequisites:** none**Enrollment Limit:** 25**Expected Class Size:** 25**Grading:** yes pass/fail option, yes fifth course option**Distributions:** (D1)**This course is cross-listed and the prefixes carry the following divisional credit:**

ASST 273 (S) The Arts of the Book in Asia**Cross-listings:** ARTH 273 ASST 273**Secondary Cross-listing**

From palm leaf manuscripts to scrolls to Islamic codices, books have long served as vehicles of religious, cultural and artistic exchange in Asia. Owing both to their portability and status as finely crafted art objects, books have transmitted ideas across the continent, spreading courtly styles of painting from China to India, esoteric Buddhist teachings from Kashmir to Tibet and Mongolia, as well as the Quranic arts of calligraphy and illumination from Islamic South Asia to Southeast Asia. This course will survey the interwoven history of book arts as it developed and disseminated across different regions of Asia. The course will also introduce students to the major art forms of the book, such as painting, calligraphy and illumination. The aim of the survey is to understand the book as object while also investigating its content and its larger cultural significance. A number of class meetings will take place in the Williams College Museum of Art where students will have the opportunity to study original artworks from the collection.

Requirements/Evaluation: 2 quizzes, 2 short response papers, a final project/paper based on museum objects, 1-hour in-class final exam**Prerequisites:** none**Enrollment Limit:** 25**Enrollment Preferences:** preference will be given to Art Majors, and then to students of any major interested in art and culture of Asia**Expected Class Size:** 20**Grading:** yes pass/fail option, yes fifth course option**Distributions:** (D1)**This course is cross-listed and the prefixes carry the following divisional credit:**

Beginning in the fourth century, Chinese calligraphy has remained one of the highest art forms in China and in East Asia generally, practiced by the

literati, or highly erudite scholars. This course has two components: art history and studio practice. The first offers students an opportunity to acquire an understanding of theoretical and aesthetic principles of Chinese calligraphy. It also examines the religious, social, and political functions of Chinese calligraphy in ancient and contemporary China. Students will also have an opportunity to investigate contemporary artists, both Eastern and Western, whose works are either inspired or influenced by Chinese calligraphy, and those whose works are akin to Chinese calligraphy in their abstraction. Studio practice allows students to apply theories to creating beautiful writing, or calligraphy (from Greek kallos "beauty" + graphe "writing"). This course can be taken as an Art History, a Studio Art, or Asian Studies course.

Class Format: studio instruction

ASST 278 (S) Buddhist Material Culture: Objects of Practice and Merit (DPE)

Cross-listings: ASST 278 REL 278

Secondary Cross-listing

What is material culture? What is considered Buddhist material culture? If Buddhism is a tradition that encourages non-attachment, then what is meant by "Buddhist material culture"? Shouldn't Buddhists be "free" from material things? Is it necessary for a Buddhist to be free from material things or rather that material things should be free from Buddhists? This course will introduce students to a material culture approach to the study of religion, which acknowledges the agency of not only humans but also the agency of objects/things/stuff, and it emphasizes relationships and networks between people and things. The course will begin with basic foundational theories that make up the burgeoning field of "material culture" within Religious Studies. We focus on various relationships: "internal" (our body and senses in relation to things) and "external" (things themselves, and their connections to other things). We will learn about these relationships by looking closely at Buddhist "stuff" and investigating what such relationships can tell us about Buddhism. Things act upon us, and we (re)act upon them. They shape identity, create meaning, and maintain relationships. We will learn that things are never just things. They help us better understand what people do in Buddhism, not just what people believe. In a nutshell, this course is about the "social life of [Buddhist] things". For students without a background in Buddhism, this course will introduce them to Buddhism as lived in China, Korea, Japan, Tibet, and particularly Southeast Asia.

Requirements/Evaluation: attendance and active participation: 15%; short writing assignments, 8 total (1 page): 25%; midterm exam (in-class): 25%; group presentation of object: 35%

Prerequisites: none

Enrollment Limit: 19

Enrollment Preferences: Religion and Asian Studies majors

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D2) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

Difference, Power, and Equity Notes: The material world of contemporary Buddhism is often condemned for "adulterating" "real" Buddhism because it does not fit stereotypical buzzwords like tranquil, austere, non-commercial. Yet, materiality is essential to Asian Buddhist practitioners, who are the 90%. Students will hone skills to seek the unseen by tracing networks of a New Materialism approach, which can reveal relationships that demonstrate power struggle and inequality, even within a "loving-kindness" tradition like Buddhism.

ASST 312 (F) The Mughal Empire: Power, Art, and Religion in India

Cross-listings: HIST 312 ASST 312 REL 312 GBST 312

Secondary Cross-listing

Established in the early 1500s, the Mughal Empire was one of the grandest and the longest to rule the Indian subcontinent for over three hundred years. Commanding unprecedented resources and administering a population of 100 to 150 million at its zenith--much larger than any European empire in the early modern world--the Mughals established a centralized administration, with a vast complex of personnel, money, and information networks. Mughal emperors were also political and cultural innovators of global repute. Moreover, while the Mughal dynasty was brought to an end with British colonial rule over India in 1857, the Mughal administrative structures and cultural influences continued to have a lasting impact on the British and later Indian states that followed. Centered around the intersection of the themes of power, patronage of art and architecture and religion, this course will ask: What factors contributed to the durability of the Mughal Empire for three centuries? How did global trade and innovations in taxation contribute to its wealth and stability? How did this dynasty of Muslim monarchs rule over diverse, and largely non-Muslim populations? How did they combine Persian cultural elements with regional ones to establish an empire that was truly Indian in nature? How were the Mughals viewed in their contemporary world of gunpowder empires like the Safavids of Persia and the Ottomans of Turkey? Readings will include the best of the recent scholarship on this vastly influential empire and a rich collection of primary sources, including emperor's memoirs, accounts of European travelers, and racy biographies, which will allow students make their own analysis. They will also have the opportunity to interpret paintings (some of which are held in the WCMA collections) and architecture. They will also discuss how the Mughals are remembered in South Asian film and music.

ASST 314 (F) Emperors of Heaven and Earth: Mughal Power and Art in India, 1525-1707

Cross-listings: ARTH 314 HIST 314 ASST 314

Secondary Cross-listing

The Mughal dynasty ruled over most of northern India from the 16th to the 19th centuries. The Mughal Empire was the grandest and longest to rule the Indian subcontinent--much larger than any European empire in the early modern world--and it continued to have a lasting impact on South Asia. Mughals established a centralized administration with a vast complex of personnel, money and information networks. Styling themselves as 'Emperors of Heaven and Earth', the Mughal kings were also globally viewed as political innovators and unprecedented patrons of art. Their visual practices were as much a part of their imperial ideologies as their administrative and military measures. This co-taught course combines the disciplines of Art History and History to explore the intricate workings of Mughal politics and ideologies. The first of its kind to bring an interdisciplinary approach to teaching South Asia at Williams, the course asks: How did the Mughals sustain their empire for three centuries? How did they use art and politics to rule over diverse and largely non-Muslim populations? How did these Muslim imperial patrons merge Persian and Central Asian cultural values with preexisting Indian forms of administrative and artistic expression? How does Mughal culture continue to shape the South Asian imagination today? Readings will include a variety of visual and literary texts. We will delve deep into the world of biographies, travel accounts, poetry, architecture and a plethora of artworks. Students will take a hands-on approach to Mughal painting through several visits to the WCMA and a dedicated Object Lab. The primary aim of this co-taught course is to introduce students to a multifaceted picture of one of the greatest empires in pre-colonial world history. Another goal is to familiarize them with a wide range of visual and written primary sources and develop a vocabulary for 'reading' these.

Requirements/Evaluation: class participation and weekly responses to readings, 4-5 short papers and a final paper

ASST 341 (S) Caste, Race, Hierarchy

Cross-listings: ANTH 341 AFR 341 ASST 341 GBST 341

Secondary Cross-listing

Caste in India looms large in global social thought as a kind of benchmark against which hierarchical social systems across the world are measured. This prominence has much to do with British colonial ideologies of rule, but it also has a deeper and different history: the Buddha compared caste to Greek slavery, early modern Jesuits related it to the system of European estates, and since the nineteenth century, anti-caste radicals from Dalit, or "untouchable," backgrounds have drawn a sustained comparison between the forms of oppression they face and those with which African Americans contend in the United States. Reciprocally, thinkers from W.E.B. DuBois to Toni Morrison have deployed the category of caste in their writings on race. What can the study of caste in postcolonial South Asia contribute to global debates over the persistence of "traditional" forms of social hierarchy? What are the stakes of bringing caste and race into the same conversation, and what are the implications of refusing to do so? In this seminar we will acquire a thorough grounding in the anthropological literature on caste and then investigate the politics of the caste-race comparison over the last hundred years. Assignments include weekly postings of 1-page critical response papers and either a research paper or an interview-based, ethnographic final project examining "caste" in one's own community.

Class Format: seminar

Requirements/Evaluation: weekly postings of 1-page critical response papers and research paper or ethnographic final project

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: seniors, juniors, majors in ANSO, AFR, or ASST

Expected Class Size: 15

Grading: no pass/fail option, no fifth course option

ASST 342 (S) Monuments and Miniatures: Architecture and Painting in India (WS)

Cross-listings: ASST 342 ARTH 342

Secondary Cross-listing

This tutorial is designed to provide an in-depth comparative study of two of the most important cultural expressions in the history of the Indian Subcontinent: Architecture and Painting. From sprawling pleasure gardens and palaces to iconic tomb complexes and temples, the built environment has served various cultural, religious and communal functions in India. Intimate in scale, and made primarily for an elite audience, miniature painting has also performed a key role in preserving and transmitting cultural values over time and space. Despite obvious differences in scale and scope, architectural monuments and miniature paintings produced for manuscripts and albums reflect similar creative impulses. They are also often linked through their relationship to text, and can be interpreted through contemporaneous literature. In the tutorial, students will be asked to make careful analyses of the iconography, symbolism and historical frameworks of monumental architecture and miniature painting in India. Original literature in translation and recent scholarly essays will help provide the framework for considering the artworks from the perspective of their patrons, creators and audiences. We will also consider the shifting roles and meanings of these artworks through the ages. For example, what was the original symbolism of the Taj Mahal, and how has it become a highly contested, political space in contemporary India? How did grand picture albums from the seventeenth century, made for some of the most powerful emperors in global history, function as tools for political self-fashioning? And what do their modern reception as part of Western museum collections tell us about the transformation of India during the British colonial period?

Requirements/Evaluation: bi-weekly writing assignments 5-7 pages in length, short peer response papers, field trips to local museums

Prerequisites: none, open to all students

Enrollment Limit: 10

ASST 376 (S) Zen Buddhist Visual Culture: The Path to Nirvana

Cross-listings: ASST 376 ARTH 376 REL 252

Secondary Cross-listing

This course is about the ways in which images are produced, viewed, and used in the Zen Buddhist tradition. It explores the various ways in which visual culture is a key part of Zen Buddhist teaching in China and Japan. In this class we will look at both high art and popular expressions of Zen Buddhist visual culture. Topics of interest include: 1) Buddhist image making and icon worship; 2) Gardens; 3) tearooms, tea ceremony and tea bowls; 4) The Zen temples Ryoan-ji, Daisen-in, and Daitoku-ji; 5) The political function of Zen and its art in Japan's samurai culture; 6) The popular Zen Buddhist cult of Bodhisattva Avalokiteshvara and his gender transformation; and 7) Daruma (Bodhidharma) imagery in popular culture. This course is a CRAAS (critical reasoning and analytical skills) course. The class format also offers students opportunities to practice public speaking and writing skills.

Class Format: class discussion

Requirements/Evaluation: class discussions and participation; oral presentations, short papers; and a research paper

ASST 389 (S) The Vietnam Wars

Cross-listings: HIST 389 LEAD 389 ASST 389

Secondary Cross-listing

This course explores Vietnam's twentieth century wars, including an anti-colonial war against France (1946-1954), a massive Cold War conflict involving the United States (1965-1973), and postcolonial confrontations with China and Cambodia in the late-1970s. Course materials will focus primarily on Vietnam's domestic politics and its relations with other countries. Lectures, readings, films, and discussions will explore the process by which Vietnam's anti-colonial struggle became one of the central conflicts of the Cold War, and examine the ramifications of that fact for all parties involved. The impact of these wars can hardly be overstated, as they affected the trajectory of French decolonization, altered America's domestic politics and foreign policy, invigorated anti-colonial movements across the Third World, and left Vietnam isolated in the international community. Students will read a number of scholarly texts, primary sources, memoirs, and novels to explore everything from high-level international diplomacy to personal experiences of conflict and dramatic social change wrought by decolonization and decades of warfare.

Requirements/Evaluation: class participation, several short papers, and a 10- to 12-page final paper

Prerequisites: none; open to all

Enrollment Limit: 25

Enrollment Preferences: History and Asian Studies majors

ASST 391 (S) When India was the World: Trade, Travel and History in the Indian Ocean

Cross-listings: GBST 391 ASST 391 HIST 391

Secondary Cross-listing

What do Ibrahim Ben Yiju, a Jewish merchant from 11th century Yemen, Ibn Batutah, a Muslim scholar from 15th century Morocco and Captain Kidd, a 17th century English pirate have in common? All three men travelled and lived in the Indian Ocean region! This course explores the history of one of the world's oldest maritime highways that has connected the diverse cultures of Asia, Africa and Europe for millennia, thus making it a vital element in the birth of globalization. Moving away from conventional land-centric histories, we will focus instead on understanding the human past through oceanic interactions. South Asian ports and port cities remained the fulcrum of the Indian Ocean world throughout its history; traders, travellers, nobles, scholars, pilgrims and pirates from all over the world travelled to the Indian coast in search of adventure, spices, knowledge and wealth. Thus we will primarily focus on India's role in the Indian Ocean roughly from the rise of Islam in the seventh century CE through the expansion of various European communities in the region and the subsequent rise of the global economy and colonialism in the nineteenth century. Rather than following a strict temporal chronology we will concentrate on themes such as travel and adventure; trade and exchange; trust and friendship; religion and society; pilgrimage; piracy; the culture of port cities; and food across time.

Requirements/Evaluation: class participation and weekly responses to readings, 2-3 short papers, an oral presentation and final paper

ASST 413 (S) History of Taiwan (WS)

Cross-listings: ASST 413 HIST 481

Secondary Cross-listing

Almost all discussions of contemporary Taiwan reference the fierce debate over its sovereignty and international status: is the island of Taiwan an independent nation, or an "inalienable part" of the much larger and more powerful People's Republic of China? Part of the argument for Taiwan's separate nationhood derives from its claim to a unique history different from that of the P.R.C.. In this tutorial course, we will look closely at the distinctive aspects of Taiwan's history that underlie this claim, including its aboriginal populations, maritime history, experience of Japanese colonialism, settlement by mainland Chinese after World War II, role in the Cold War, and the development of a Taiwanese ethnic and political identity in the postwar period. The goal of the course is neither to debate nor resolve the "Taiwan question", but to explore the history and historical arguments that inform it.

Requirements/Evaluation: weekly papers and critiques

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: History or Asian Studies majors

ASST 488 (S) Gandhi: Nationalism, Philosophy, and Legacy

Cross-listings: GBST 488 HIST 488 REL 388 ASST 488

Secondary Cross-listing

This course studies the work and ideas of M.K. Gandhi (1869-1948, one of the most influential thinkers of the non-western world. Gandhi is well known today for his philosophy of non-violent resistance and its application in India's freedom struggle as well as his influence on the work of leaders like Martin Luther King and Nelson Mandela. Hailed as the 'father of the Indian nation', however, Gandhi is not only known for his political ideas but also for his deep engagement with aspect of everyday human behavior and morality: truth, vegetarianism, sex and celibacy, to name just a few of his obsessions which contributed to making his broader philosophy. It is this commitment to a morally pure life that earned him the title of 'Mahatma' or Great Soul in India. The tutorial will focus on three key aspects of Gandhi: his ideas of peaceful protest as means of social and political change, his contemplations on moral philosophy, and on his legacy in modern India and the world. Students will read a combination of Gandhi's own writings as well as journal articles, monographs and films. The course will probe questions such as: What was the nature of Gandhian nationalism? Did it help to integrate the Indian nation? How, if at all, was shaped by Gandhi's engagements with moral philosophy and human behavior? Was Gandhi truly a Great Soul, a saint or a shrewd politician? In what ways is Gandhi received and remembered by the Indian nation today? How does understanding a figure like Gandhi facilitate our understanding of modern nationalism, citizenship and political action?

Class Format: students will meet with the instructor each week for one hour sessions in pairs

Requirements/Evaluation: five to 7-page essays or 2-page critiques due each week and a final report (3-4 pages) at the end of the semester

ASST 12 (W) The East is Red? Socialism in Asia

Cross-listings: PSCI 11 ASST 12 HIST 12

Primary Cross-listing

This course provides a historical and political overview of socialism in Asia from the 1910s to the present. It examines the spread and influence of Marxism in Asia, the policies of socialist states and movements in relation to decolonization, the Cold War, and the Sino-Soviet split, and the marriage between market reforms and ostensibly socialist governments in the present day. In addition to looking at the socialist governments of China, North Korea, Vietnam, and Cambodia, we will examine cases of "unsuccessful" socialist parties in Japan, Indonesia, and India. Class materials include memoirs of survival by non-state actors, the writings of socialist leaders (Mao Zedong, Ho Chi Minh, M.N. Roy, etc), and cultural constructions such as revolutionary theatre, songs, and contemporary films. Questions that will be addressed include: Why did Marxism, a Eurocentric theory of revolution intended for advanced capitalist societies, find such resonance in Asia? How was Marxism adapted for an Asian environment? Twenty-five years after the fall of communism, why have Asian socialist states remained in power? And in the scales of history, how should we judge the effects of socialism in Asia? Evaluation will be based on two in-class presentations and a final research paper. Attendance and participation will also be taken into account. We will meet three times a week for two-hour sessions. Adjunct Bio: John Knight has a Ph.D in East Asian History with a focus on Modern China. He graduated in 2017 from The Ohio State University. He has previously taught East Asian and World History at the Rhode Island School of Design, Ohio State University, Capital University, and Seton Hall.

Requirements/Evaluation: 10-page paper

Prerequisites: none

Enrollment Limit: 20

Enrollment Preferences: preference will be given to students majoring in Asian Studies, History, or Political Science

ASST 14 (W) Martial Arts in Movies and Real Life

Movies that feature martial arts action rarely win Oscars or get much critical attention. Nevertheless, the best of these films can inspire extraordinary devotion amongst fans, spark bitter feuds regarding which martial arts star would win in a fight, and are often the reason new students arrive at the door of a martial arts school and begin a journey which changes their lives forever. A case can also be made that, by providing an experience of extraordinary and cathartic violence, they help individuals and society regulate their less civilized impulses. They are also a lot more fun to watch when you know something about martial arts--and the only legitimate way to know something about martial arts is to experience them first hand, rather than only on screen. This course blends two hours of daily training with twice-weekly screenings of some of the best martial arts films ever made. The Martial Arts training (10am-Noon each weekday morning in Currier Ballroom) will mostly be in the Japanese art of Aikido, a synthesis of the Samurai arts of Kenjutsu (swordsmanship) and Jujutsu (grappling). Training will improve each student's strength, balance, posture, and flexibility. Everyone will also learn how to throw friends twice their size across the room. 25% of training time will be devoted to sword, staff, and dagger techniques. Joining us for several sessions will be Stage Combat Instructor and fight choreographer Alexei Syssoyeva, who will oversee students choreographing their own fight sequence, using stage combat techniques (i.e. the skills required to make it look like a real fight when it isn't). Additional relevant experiences, such as meditation practice and outdoor misogi will be woven into the course as schedules and weather permit. The films: *7 Samurai*, *Last Samurai*, *Uzumasa Limelight*, *Enter the Dragon*, *Crouching Tiger Hidden Dragon*, *Robin Hood (Errol Flynn version)*, *Brotherhood of the Wolf*, *Kill Bill (volume 1)*.

Adjunct Instructor Bio: Robert Kent '84 spent 3 years in Kyoto, Japan earning his Sho Dan (first degree black belt), directly after majoring in both Philosophy and Religion at Williams. He currently holds a Yon Dan rank (Fourth degree black belt), having studied for 21 years at Aikido West in Redwood City under Frank Doran Shihan. He earned a Masters degree in Philosophy at Claremont Graduate School in 1993, writing his thesis on the Ethics of Authenticity.

Requirements/Evaluation: 10-page paper

Prerequisites: same physician's approval on file as the school requires to participate on sports teams; students do not have to be especially athletic, and in Aikido women train as equals with men

Enrollment Limit: 20

Enrollment Preferences: selection via questionnaire

Grading: pass/fail only

Materials/Lab Fee: \$175

ASST 15 (W) Contemporary Indian Society

Cross-listings: ASST 15 HIST 15

Secondary Cross-listing

With a population of nearly 1.4 billion, India is one of the fastest growing regions of Asia and the world. It is also the largest and most diverse country in South Asia. What are some of the most important social and political concerns in India today? How do Indians think of questions of culture and identity in a globally connected world? What are the interests and aspirations of India's youth? How are forces of nationalism and divisive politics defining Indian society today? In this course, we will explore these questions through the most recent non-fiction books on Indian history and society. We will also watch a number of documentaries that address some of these questions. The objective of the course is to engage students in lively discussion and debates about these issues that shape India today.

Requirements/Evaluation: participation in discussions, student-led discussions in addition to a 10-page paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: short written application

Grading: pass/fail only

Materials/Lab Fee: cost of books

CHINESE

(Div I & II, see explanation below)

Chair: Professor George Crane

- Cecilia Chang, Frederick Latimer Wells Professor of Chinese
- Man He, Assistant Professor of Chinese
- Shinko Kagaya, Professor of Japanese; on leave Spring 2020
- Cornelius C. Kubler, Stanfield Professor of Asian Studies; on leave 2019-2020
- Christopher M. B. Nugent, Professor of Chinese, Chair of Comparative Literature Program
- Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese
- Li Yu, Professor of Chinese

Affiliated Faculty:

- Christopher Bolton, Professor of Comparative Literature and Japanese Literature
- George Crane, Chair of Asian Studies and the Edward S. Greenbaum 1910 Professor of Political Science
- George Dreyfus, Jackson Professor of Religion
- Ju-Yu Scarlett Jang, Professor of Art
- Jason Josephson Storm, Professor of Religion
- Peter Just, Professor of Anthropology
- Aparna Kapadia, Associate Professor of History
- Eiko Maruko Siniawer, Professor of History
- Anne Reinhardt, Chair and Professor of History
- W. Anthony Sheppard, Marilyn & Arthur Levitt Professor of Music
- Scott Wong, Charles R. Keller Professor of History

Visitors:

- Susanne Ryuyin Kerekes, Gaius Charles Bolin Fellow in Religion and Asian Studies
- Eun Young Seong, Visiting Assistant Professor of Japanese
- Nana Takeda, Visiting Lecturer in Japanese
- Chen Wang, Visiting Assistant Professor of Chinese

Mission Statement and Learning Objectives

The mission of the Department of Asian Studies is to help as many students as possible—both majors and non-majors—develop practical proficiency in Asian languages and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of one or more of the disciplines represented within Asian Studies (including anthropology, art history, economics, history, linguistics, literature, music, political science, religion, and sociology), so that they may realize their fullest intellectual and personal potential and be able to make useful contributions to society. The department offers three distinct major tracks: Asian Studies, Chinese, and Japanese.

Learning Objectives for the Chinese Major

Consisting of a core language curriculum and a variety of courses in the various disciplines represented in the department, the Chinese major track enables students to achieve proficiency in aural comprehension, speaking, reading, and writing in Mandarin Chinese, as well as to understand the cultural traditions and diversity of the Chinese-speaking regions in the world. Majors in Chinese are expected to function as responsible global

citizens, able to use the Chinese language to interact and collaborate in their community and the globalized world, while remaining keenly aware and respectful of varying cultural beliefs, norms, and sensitivities.

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate-High level in writing based on the ACTFL proficiency guidelines.
- Understand the basic grammar and vocabulary of Classical Chinese.
- Master intercultural skills to competently navigate a wide range of social and cultural contexts.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Acquire research, problem-solving, and critical thinking skills by engaging in cross-linguistic, cross-cultural, and comparative historical analysis.
- Engage critically with important aspects of the historical and cultural developments and trends in China's diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

We offer courses in English in the field of Asian Studies as well as courses in Chinese and Japanese language, literature, and culture. Three distinct majors are offered: a major in Chinese; a major in Japanese; and an interdisciplinary Asian Studies major which allows students to choose from a wide range of courses in the anthropology, art, economics, history, languages, linguistics, literatures, music, politics, religion, and sociology of China, Taiwan, Japan, and other Asian countries. An increasing number of courses on South Asia are also offered (e.g. ASST 117, ASST 221, ASST 244, ASST 246T, ASST 248, ASST 252, ASST 256, ASST 391, ASST 415, ASST 424, ASST 431, ASST 488). Students interested in taking Korean or Hindi may take these languages through the Critical Language Program administered by the Center for Foreign Languages, Literatures, and Cultures. Students with questions about the Asian Studies majors or about Asian Studies course offerings should consult the chair. Please note: Courses with ASST prefix carry Division II credit unless otherwise noted and courses with CHIN and JAPN prefixes carry Division I credit unless otherwise noted.

All students wishing to major in the Department of Asian Studies are required to take and pass a total of eleven courses, as follows:

One course that explicitly compares at least two countries in Asia, such as ASST 103, ASST 126, ASST 233, ASST 245, ASST 248, ASST 250, ASST 256, ASST 271, ASST 391, ASST 414, ASST 424, ASST 431, JAPN 258. Or students may take instead a course on a country that is different from their country of primary focus.

Four semesters of Chinese or Japanese language (including no more than two 100-level courses).

In addition to completing (1) and (2) above, all majors choose either an Area Studies track, leading to a major in Asian Studies; or a Language Studies track, leading to a major in Chinese or Japanese.

The requirements for Chinese are indicated below:

Chinese Major

- Four additional semesters of Chinese language (300-level or higher).
- One semester of Classical Chinese.
- One approved course in Chinese literature, linguistics, or culture.

STUDY ABROAD

Students intending to major in Asian Studies are encouraged to study in Asia during one or both semesters of their junior year. Williams faculty serve on the boards of several study abroad programs in China and Japan. Opportunities to study in India, Indonesia, Korea, Taiwan, Thailand, and other Asian countries are also available. Prospective Asian Studies majors who are planning to study abroad should discuss their plans with their advisor as far in advance as possible. Up to eight courses taken overseas may be counted toward graduation, and up to four courses taken off campus may be counted toward the major.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). For programs that we are familiar with, we usually pre-approve credits.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus including readings/assignments, and exams or other written work.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, maximum of four courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Approved courses only.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Not in particular. Students are always strongly encouraged to consult with the department faculty ahead of time to plan on what courses to take during study-away and what courses to take up return.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

There have been cases where students decided to take different courses after they arrived at the program and those courses did not meet our requirements.

THE DEGREE WITH HONORS

Students interested in writing an honors thesis in Chinese should submit a proposal to the department chair before they pre-register for senior courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. Admission to the honors thesis program will normally be limited to students who have maintained at least a B+ average in their courses for the major.

Students admitted to the program should register for CHIN 493-W31-494. They will be expected to turn in the final draft of their thesis shortly after spring break and to discuss their results formally with their faculty graders. Their final grades in the three courses listed above and the award of Honors, Highest Honors, or no honors will be determined by the quality of the thesis and the student's performance in the oral defense.

THE ASIAN STUDIES ENDOWMENT

The Linen summer grants for study abroad, the Linen visiting professorships, and several other programmatic activities in the department are supported by an endowment for Asian Studies established by family and friends in memory of James A. Linen III, Class of 1934, Trustee of the College from 1948 to 1953 and from 1963 to 1982.

CHIN 101 (F) Basic Chinese

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing at about the 200-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively.

Class Format: (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral reading, questions and discussion in Chinese, translation and explanation in English

Requirements/Evaluation: classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

CHIN 102 (S) Basic Chinese

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing in both the simplified and the traditional script at about the 500-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively.

Class Format: (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral reading, questions and discussion in Chinese, translation and explanation in English

Requirements/Evaluation: classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: CHIN 101 or equivalent

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Unit Notes: students registered for CHIN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (CHIN 101 and 102) are taken

CHIN 131 (S) Basic Cantonese

An introduction to Standard Cantonese, a major regional language of southern China which is spoken by over 70 million people in Hong Kong, Macao, Guangdong, and Guangxi as well as by many overseas Chinese in Southeast Asia, Hawaii, and North America. Due to the pervasive influence of Hong Kong as well as the economic transformation of Guangdong Province, the prestige of Cantonese within China has been rising steadily over the past few decades. Our focus in this course will be on developing basic listening and speaking skills, though some attention will also be paid to written Cantonese, including the special characters which have been used for centuries to write colloquial Cantonese and which have become even more widely used in Hong Kong since 1997. Since students will ordinarily possess prior proficiency in Mandarin, a closely related language, they should be able to attain in one semester approximately the same proficiency level that is attained in the first two semesters of Mandarin.

Class Format: dialog performance, drills, communicative exercises, oral reading, questions and discussion

Requirements/Evaluation: evaluation is based on classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: CHIN 202 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: Chinese and Asian Studies majors who have no prior background in Cantonese

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

CHIN 134 (S) Leaving the World Behind: The Literature of Reclusion (DPE) (WS)

Cross-listings: CHIN 134 REL 134 ANTH 134 COMP 134

Primary Cross-listing

Living in a time of political and social turmoil, Confucius told his followers: "When the realm has the Way, show yourself; when it lacks the way, hide." Reclusion here is a moral choice, justified by the ethical decline of the state. But it could also be a mortal necessity in a period in which government service was a distinctly hazardous pursuit. In other contexts becoming a hermit could instead be figured as aesthetic stance meant to preserve one's artistic integrity against the dominant claims of society. This course looks at the literature of reclusion—living a life of seclusion from society—in a range of different cultures and periods, from ancient China to contemporary America. With sources that include poems, essays, novels, and films, we will investigate a set of issues surrounding radical seclusion. What different forms does reclusion take? Can one be a hermit without being completely separated from society? What is the relationship between hermits and the state—to what extent does one depend on the other? What are the philosophical and moral implications of eremitism? Is separating oneself from human society an inherently immoral act? What is the relationship between reclusion and technology in the contemporary world? What is the nature of solitude and can it be experienced in a group (for example, in contemporary "intentional communities")? While most of our work will focus on textual analysis, there will be an experiential component to the course as well. Each student will design and implement their own experiment in (short-term) eremitism.

Class Format: experiential component

Requirements/Evaluation: tutorial papers, responses, and an individual project

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: first-year students, Chinese majors, Religion majors, Anthropology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D1) (DPE) (WS)

This course is cross-listed and the prefixes carry the following divisional credit:

CHIN 134 (D1) REL 134 (D2) ANTH 134 (D1) COMP 134 (D1)

Writing Skills Notes: Students will write a 5- to 7-page paper every other week for a total of five papers. On weeks in which they are not writing, they will critique their partner's paper. Papers will receive substantial writing-based feedback from both the instructor and partner.

Difference, Power, and Equity Notes: This course provides students with the opportunity to analyze the shaping of social differences and dynamics of unequal power. Acts of reclusion are often ways that individuals can challenge the dominance of the state and other structures of authority indirectly. Modes of reclusion can differ substantially depending on the social standing of the recluse. These are issues that we will examine in the course.

CHIN 140 (F) Introduction to Traditional Chinese Literature

Cross-listings: CHIN 140 COMP 140

Primary Cross-listing

With a written record stretching over 3000 years, China's literary cultures are some of the richest and most varied in human history. Their influence continues to be felt not only in modern China, but also throughout much of the world. This course examines the origins and development of the different literatures of China from their earliest stages up until the end of the imperial system in 1911. We will read texts ranging from the *Analects* of Confucius to the medieval poetry of the Tang dynasty, from Buddhist sutras to plays about prostitutes and singing girls. An invulnerable monkey god may make an appearance to sow chaos as well. He's difficult to pin down. Some important themes will include: the role of the individual versus that of the community, responses to catastrophe and disorder, the fantastic, the articulation of the self through literature, and ways of dealing with historical and literary legacies. All readings are in English translation.

Requirements/Evaluation: five short writing assignments (2 pages each), one paper (6-7-pages), and a final exam

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15

CHIN 152 (S) Introduction to Taiwanese/Southern Min Language and Culture

This course, which includes a required, fully-funded two-week field trip to Taipei, Quemoy (Jinmen), and Xiamen over Spring Break, constitutes an introduction to Taiwanese, the majority language of Taiwan, which is essentially the same as the native language of Xiamen, China and environs. Different varieties of this language, which is also known as Amoy, Hokkien, Fukienese, and Southern Min are spoken by about 50 million people in Taiwan, southern Fujian, the Philippines, Indonesia, Malaysia, and Singapore. Suppressed in Taiwan by the Japanese from 1895-1945 and by the KMT Chinese government from 1945 through the 1970s, Taiwanese--in both its spoken and written forms--has been experiencing a fascinating revival in recent decades. The most divergent of all the major Chinese "dialects," this language is of special linguistic interest because it has preserved a number of features of Old Chinese. Our focus will be on developing basic listening and speaking skills, though we will also study some of the special characters used to write Taiwanese. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Since students in the course will ordinarily possess prior proficiency in Mandarin, a related language, we should be able to cover in one semester about as much as is covered in the first two semesters of Mandarin. Classes will include dialog performance, drills, communicative exercises, and oral reading and discussion of written Taiwanese. Required Spring Break field trip to Taiwan and China, funded by the Global Initiatives Fund.

Requirements/Evaluation: classroom performance, homework, quizzes, tests, a journal and term paper based on the field trip, and an oral and written final exam; Spring Break field trip to Taiwan and China, funded by the Global Initiatives Fund

CHIN 214 (F) Foundations of China

Cross-listings: ANTH 212 REL 218 HIST 214 GBST 212 CHIN 214

Primary Cross-listing

This course examines the foundational period of Chinese civilization, from the earliest evidence of human activity in the geographical region we now call China, through the end of the Han dynasty in the early third-century CE. This is the period that saw the creation and spread of the Chinese script (a writing system that would be the dominant one in East Asia for thousands of years), the teachings of Confucius (whose ideas continue to play a role in the lives of billions of people today), the construction of the Great Wall (which is not, as it turns out, visible from space), and the creation of the imperial bureaucratic system (that was, in essence, the progenitor of the modern bureaucratic state). We will proceed chronologically but focus on a set of thematic topics, including language and writing, religion and philosophy, art and architecture, politics and economics, and science and technology. While this course is entitled "Foundations of China," we will take a critical perspective on narratives, both Chinese and Western, that see Chinese history as an unbroken history of a single "civilization."

Requirements/Evaluation: short writing assignments (approximately 750 words each), quizzes, a mid-term, and a final exam

Prerequisites: none

Enrollment Limit: 40

Enrollment Preferences: Chinese majors, History majors, Religion majors, and Anthropology majors

CHIN 223 (S) Ethnic Minorities in China: Past and Present (DPE)

Cross-listings: ANTH 223 CHIN 223

Primary Cross-listing

According to the most recent census conducted in China in 2010, of the 1.3 billion population of China, more than 110 million (8.49%) were ethnic minorities (shaoshu minzu). Most of the minority groups reside in autonomous regions and districts, which constitute 64% of China's total acreage. This course introduces students to the multiethnic aspect of China's past and present. We will address topics such as the minority-group identification project; the definition of minzu (ethnic group); government policy toward and the current situation of the fifty-five official ethnic minority groups; historical sino-centric views about "foreigners" and "barbarians"; ideas of "diversity", "unity", and "sinicization"; and the roles that "barbarians" have played in China's long history. We will examine how social differences and hierarchy are shaped and discuss various ways of achieving equity for ethnic minorities. Throughout the course, the teaching techniques of role-play and debates will be adopted to encourage students to compare ethnic minority issues in China with similar issues in the United States. Students are also encouraged to come up with real-world solutions and recommendations for policy-making at the government and community levels for China and the United States.

Class Format: discussion

Requirements/Evaluation: class attendance, active in-class participation, presentations, two short (5-page) response papers, one 24-hr take-home mid-term, and one final paper (10-12 pages)

Prerequisites: none, open to all students; no knowledge of Chinese language required

Enrollment Limit: 20

Enrollment Preferences: current and prospective majors in the Department of Asian Studies, then to first-years

Expected Class Size: 15

Grading: no pass/fail option, yes fifth course option

Materials/Lab Fee: books and reading packet

Distributions: (D2) (DPE)

CHIN 224 (F) Enlightenment, Revolution, and Modernity: Literature and Intellectual Culture of Modern China

Cross-listings: CHIN 224 COMP 219

Primary Cross-listing

This course introduces modern China through literature, culture, and critical thought, covering the last decade of the 19th century, the first half of the 20th century, and a few years after the founding of the People's Republic of China. We will read important examples of fictions, essays, and poems by modern Chinese thinkers and writers. We will engage with film, theatrical performances, and other forms of popular culture from the late Qing Dynasty to the years before the Cultural Revolution. We will also read works that were created at the peripheries of history such as cross-cultural diasporic Chinese writings beyond the geographical limits of China. Delving into issues of revolution, war, enlightenment, and modernization, we will gain insights through close readings of these works about the fundamental questions that were faced by modern China and Chinese people. The first three decades of the 20th century witnessed the great achievements of canonical modern writers as well as eruption of multiple historical movements. They also saw the emergence of a modernized popular culture, new social classes, and awakening gender activists in the urban spaces. The next twenty years underwent a revolutionary turn to be more concerned with nationalist issues under the impact of war. While a singular revolutionary literature ensued in mainland China after 1949, literary and cultural modernism as a form of resistance in the context of Cold War started to develop in the sinophone regions other than mainland China such as Taiwan and Hong Kong. In this class, all readings are in English. Complementary readings in

original Chinese texts are not required but welcomed.

Class Format: discussion

CHIN 225 (F) The Fantastic in Chinese Literature

Cross-listings: CHIN 225 COMP 225

Primary Cross-listing

From the famous human/butterfly metamorphosis in the Daoist text Zhuangzi to contemporary writer Liu Cixin's award-winning "Three Bodies Problem," the "fantastic" has always been part of Chinese literature that pushes the boundary of human imagination. Readers and writers create fantastic beasts (though not always know where to find them), pass down incredible tales, assign meanings to unexplainable phenomena, and reject--sometimes embrace--stories that could potentially subvert their established framework of knowledge. Meanwhile, the "fantastic" is also historically and culturally contingent. What one considers "fantastic" reveals as much about the things gazed upon as about the perceiving subject--his or her values, judgment, anxiety, identity, and cultural burden. Using "fantastic" literature as a critical lens, this course takes a thematic approach to the masterpieces of Chinese literature from the first millennium BCE up until twenty-first century China. We will read texts ranging from Buddhist miracle tales to the avant-garde novel about cannibalism, from medieval ghost stories to the creation of communist superheroes during the Cultural Revolution. The topics that we will explore include shifting human/non-human boundaries, representations of the foreign land (also the "underworld"), the aestheticization of female ghosts, utopia and dystopia, and the fantastic as social criticism and national allegory. All materials and discussions are in English.

CHIN 226 (S) Chinese Film and Its Significant Others

Cross-listings: COMP 296 CHIN 226

Primary Cross-listing

From the "wows" that the first short films invoked at a Shanghai teahouse in 1896 to the \$527 million (or 3.4 billion RMB) grossed at the box-office by a 3D fantasy in 2016, Chinese films have struck a responsive chord among domestic and foreign audiences. In this survey course, we will explore the evolving relationships between Chinese films and five "significant others" that are central to film and film-making. Roughly following a chronological

order, this course will examine 1) the effect of new technological developments (such as photography, sound, color, special FX) on film; 2) the tension between film and traditional modes of public entertainment (such as operas and shadow plays); 3) film's social role to affirm and contest gender, national, and class identities; 4) the need to garner differing sources of financial support (state funding, cultural entrepreneurs, and transnational capital); and 5) the circulation of Chinese films in the global market. Class materials include various genre films (melodrama, horror, martial arts, comedy, etc.), directors' notes, contemporary reviews, and scholarship in China and media studies. All materials and discussions are in English.

Requirements/Evaluation: attendance and participation, short response papers (1- 2-pages each), one final project

CHIN 227 (S) Made in China or Making "China"?: Twentieth-Century Chinese Performative Culture

Cross-listings: CHIN 227 THEA 227 COMP 227

Primary Cross-listing

This course explores the ways in which twentieth-century Chinese performative culture fashioned our contemporary understanding of "China." Starting with Chinese hybrid theatres staged in the US, Japan, and semicolonial Shanghai in the early 1900s and ending with the 2008 Beijing Olympic Opening Ceremonies, this course examines performative works drawn from the breadth of an expanded 20th century; including film, spoken drama, intercultural reproductions of Peking and *Kun* Operas, revolutionary and avant-garde theatre, Chinese Rock concerts, and global mass mediated performances. Emphasis will be placed on how performances (encompassing the performance onstage and the performance-making backstage) placed "China" on the global stage; and shaped racial, gender, and national identities among play-makers and audiences. We will also explore how Chinese operas were reinvented as "traditional culture" and a "national essence" in the early 20th century; and how agents of Chinese performance, as makers of imaginary worlds, serve as both assets and threats to real-life arbiters of power. The class will be structured around the themes of "Inventing Tradition on the World Stage," "Acting the Right Part," and "Performing the Nation." Students will learn to engage performances as cultural texts embedded in national and global histories. By gaining knowledge about major playwrights, directors, artists, networks, and ideas, students will also become fluent in the landscape of performance culture in China. All class materials and discussions are in English.

Class Format: lecture/discussion

Requirements/Evaluation: regular in-class participation, three short papers (3-5 pages), and one final project

CHIN 237 (F) Present Past: The Politics of Memory in Contemporary Chinese Literatures and Films

Cross-listings: CHIN 237 COMP 297

Primary Cross-listing

What happens when memories, already slippery, are further massaged by literary and cinematic narrative strategies? How is the historical "past" remembered, forgotten, and subverted in a literary "presence"? This tutorial explores the politics of memory in contemporary literatures and films from the People's Republic of China (post-socialist era, 1978), Taiwan (post-martial law, 1987), and Hong Kong (postcolonial era, 1997). We will look at how literary and cinematic works in each of these "post" societies represent state-sponsored narratives of remembrance, dissidents' collective amnesia, and at the popular level, a playful yet cynical flirtation with politics. With close- and distant- readings of textualized and visualized memories, we will examine themes of nation and locality, public and private, amnesia and nostalgia, and home and diaspora in the PRC, Taiwan, and Hong Kong from the late 1980s until to today. Course readings include "root-seeking", "new realist", "avant-garde" and "hooligan" novels, examples from the Taiwanese small theater movement, and the transnational cinemas made by the fifth, sixth, and second new wave filmmakers from these three "post" societies.

Requirements/Evaluation: attendance and participation, five short papers, five short critiques of a partner's paper, one final project

CHIN 252 (F) Bridging Theory and Practice: Learning and Teaching Chinese as a Second Language

This course introduces students to the principles of second language acquisition (SLA), a field of study that investigates how people learn a foreign language and provides a basis for understanding research related to foreign language learning and teaching. Theoretical issues to be covered include what it means to know a language, how one becomes proficient in a foreign language, factors that affect the learning process, and the role of one's native language. We will also examine what SLA research has discovered about teaching grammar, pronunciation, vocabulary, and writing. The goal is to explore ways in which SLA theories can be applied to facilitate acquisition of Chinese in terms of learning strategies and curriculum design. This course will be useful to both students who want to improve their own learning of Chinese and those who plan to teach or conduct research on Chinese. *All readings in English with some examples in Chinese.*

CHIN 253 (F) "Disease" in Modern Chinese Literature and Culture

Cross-listings: WGSS 255 CHIN 253 COMP 254

Primary Cross-listing

From early modern anxieties about China's status as the "sick man of Asia" to contemporary concerns regarding the prospect of transnational pandemics, "diseases" and their related stories have played a critical role in making and contesting individual psychologies and Chinese modernity in the 20th and 21st centuries. Actual diseases, from tuberculosis to AIDS, constitute not only social realities that trouble political and popular minds in

their own right; but further provide powerful metaphors for exploring issues of human rights, national identity, and transnational circulation. This course examines how Chinese literature in the 20th and 21st centuries writes and visualizes "disease"--a universal human experience that is nevertheless heavily bounded by culture and history. Specifically, we examine the cultural and social meaning of "disease"; the relationship between diseases on the one hand, and the politics of body, gender, and class on the other; we ask how infectious (sexual) disease, and mental illness are defined, represented, and understood in both male and female writers' analytical essays and fictional writings in the 20th century; we examine how metaphorical "diseases," such as infectious cannibalism and fin-de-siècle "virus," are imagined and interpreted by key culture figures ranging from the founding father of modern literature (Lu Xun), to the winner of the 2012 Nobel Prize in Literature (Mo Yan), to the "Second New Wave" film director of Taiwanese Cinema (Tsai Ming-liang); and we explore how Freud's psychoanalysis and post-Freudian psychotherapy are "practiced" in literature circulated in both print and internet cultures. Throughout the course, we will focus on the interplay between literature canons (fictions, essays, and dramas) and popular media and genres: blockbuster cinemas and art house films, popular novels, photographs and posters, etc.

CHIN 272 (S) The History and Mythology of Chinese Scripts

Cross-listings: STS 272 COMP 272 CHIN 272

Primary Cross-listing

Written scripts using what are most often called "Chinese characters" have an attested history of over 3000 years and have been used all over the world to represent a range of different languages. In this course we will examine the history and development of Chinese characters from their earliest extant examples on sacrificial animal bones to their often amusingly misguided use for contemporary tattoos. We will look at historical evidence and mythology, carefully constructed grammatological studies and wild orientalist imaginings. Some topics will include: comparisons between the development of Chinese characters and other written scripts, the relationship between Chinese characters and the languages of China, the use of Chinese characters to write non-Chinese languages, Chinese characters in art and calligraphy, theories of connections between Chinese characters and Chinese philosophy and literature, issues of education and literacy, and the future of Chinese characters in the digital age.

CHIN 312 (F) Introduction to Classical Chinese

This course is an introduction to the grammar and basic vocabulary of Classical Chinese, the standard written language of China from around the seventh century BCE through the 1920s (and for many centuries an important written language in Japan, Korea, and Vietnam as well). Aspects of Classical Chinese continue to play a role in both written (e.g., in newspaper, academic, and legal writing) and in spoken (e.g., proverbs and aphorisms) modern Chinese. Our work in this course will be based on reading, translating, and discussing philosophical, political, literary, and historical anecdotes from the Spring and Autumn (770-481 BCE) through the Han (206 BCE-220 CE) periods, as they served as the foundation for the language. We will conduct discussions of grammatical and philological issues primarily in English and most of our translation work will be from Classical Chinese into English. We will, however, frequently discuss the points of intersection between Classical and Modern Chinese. Students are required to have completed CHIN 202 or the equivalent. Students who have extensive reading knowledge of Chinese characters through other languages (such as Japanese) may also take this course with the instructor's permission.

Requirements/Evaluation: classroom performance, homework, quizzes, tests, and a final exam

Prerequisites: CHIN 202 or extensive reading knowledge of Chinese characters through other languages

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

CHIN 413 (S) Intermediate Classical Chinese: Ideas of Authority in Classical Chinese Literature

This course builds on the foundation established in Introduction to Classical Chinese (CHIN 412) by examining longer and more complicated texts from the Warring States (403-221 BCE) and Han (206 BCE-220 CE) periods. While our focus will be on careful linguistic analysis and translation, we will also discuss these texts in terms of their philosophical ideas, rhetorical methods, and cultural and historical contexts. The works we will read include some of the foundational texts of Chinese philosophical and political thought, including the Confucian *Analects*, the *Mencius*, and the *Zhuangzi*. While this course is a continuation of Chinese 312, students with prior work in Classical Chinese (through study abroad, attending high school in a Chinese speaking region, etc.) are welcome as well.

Requirements/Evaluation: classroom performance, homework, quizzes, tests, and a final exam

Prerequisites: CHIN 312 or prior coursework in Classical Chinese

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

CHIN 420 (S) Masterpieces in Modern Chinese Literature

"To modernize the *Chinese* people, it has to start from the modernization of the genre 'novel'." Liang Qichao, the famous Chinese intellectual in the early twentieth century, envisioned a collapsing China to be salvaged by, first, its modernized literature. Indeed, throughout China's long century of struggle, exploration, and transformation, literature has been playing a crucial role in negotiating (the consequence of) modernity, fueling revolution, investigating human interiority, constructing national identity, and coping with trauma and diaspora. This course introduces students to the masterpieces in modern Chinese literature and their representations of critical events in twentieth-century Chinese history. In this course, we will focus on the genre "novel" and pay close attention to the language and literary devices that the authors use for storytelling, characterization, and self-representation. The class is organized by themes, such as, for example, modernity, revolution, diaspora, root-seeking, trauma, science fiction and so on. Through class discussions, writing assignments, and oral presentation on the final project, this course will further develop students' language proficiency, especially reading ability and effective communication in a formal setting. This course also trains students to be a critical reader who will be able to not only analyze the key moments and literary masterworks of modern China but also reflect on the complexity of Chinese culture vis-à-vis its tradition and the global context. The course is conducted in Mandarin.

Class Format: discussion

Requirements/Evaluation: participation, presentations, quizzes, discussion questions posting, 3 writing assignments, final project

Prerequisites: CHIN 402 or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

CHIN 422 (S) Old Shanghai, New Shanghai

Cross-listings: ASST 122 CHIN 422

Primary Cross-listing

Once nicknamed as "Paris of the East," Shanghai, now a megacity with a population of 25 million, is the industrial, commercial and financial center of

contemporary China. Shanghai is often depicted as a metropolis that marked the beginning of China's modernity and urban culture. People from other regions in China see Shanghai as a city full of opportunities, but characterize its people as astute and shrewd, cocky and unwelcoming. Foreigners, however, find the city appealing and its people open-minded. Jews fleeing Nazi persecutions during WWII, found Shanghai to be a "paradise of ghetto" that provided the only haven of survival. For local people, there have always been two Shanghai: an old one and a new one. They are proud of the new Shanghai but constantly nostalgic about the old one. This tutorial examines the multifaceted city of Shanghai and its people from historical and cultural perspectives. We will look at the city's history (from the late nineteenth century to present day), its local language and culture, and everyday life of the people (including migrants and foreigners) living in it. The central ideas we will explore are "modernity" and "regional identity." We will investigate how these theoretical constructs play out in the making of the city of Shanghai and the formation of its unique local identity. Course readings include historical and cultural studies as well as documentaries in English about Shanghai, and primary sources in Chinese in a wide range of genres including fiction, essays, and films (English translation of the primary sources are available for students taking the course in English). *The course is conducted in either Chinese or English.* Students wishing to take the course in English should register under ASST 122T and students wishing to take the course in Chinese should register under CHIN 422T. Students will come away with a critical understanding about China's regional cultures and one of its most important metropolitan cities. Chinese language learners will be able to improve their reading and writing skills in Chinese through this course. The course has a required field trip to a Chinese restaurant on a Saturday or Sunday, depending on all students' schedules.

Requirements/Evaluation: each tutorial pair will meet with the instructor for one hour per week, during which time we will discuss a 5-page paper that one of the partners has submitted

Prerequisites: none for students taking ASST 122; CHIN 402 or permission of the instructor for students taking CHIN 422

Enrollment Limit: 10

Enrollment Preferences: current or prospective Asian Studies, Chinese, or Japanese majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: students wishing to take the course in English should register under ASST 122 and students wishing to take the course in Chinese should register under CHIN 422

Materials/Lab Fee: \$100

Distributions: (D1)

Not offered current academic year

CHIN 423 (F) A Century of Romance: Emotional Life in Modern Chinese Literature and Visual Culture

The modernization of the Chinese nation is accompanied by revolutionary changes in Chinese people's understanding of their domestic world. Through readings of literary and visual productions, this course introduces students to the modern Chinese conceptualizations of sexuality, love, and family life at varying historical stages. With emotional feelings and experiences at its thematic center, the course is mainly organized by genre and form, the purpose of which is twofold: one, to help students understand comprehensively how the private life of modern Chinese has been intertwined with the grand history of a nation-state; two, to develop students' language proficiency through the study of different literary genres and visual forms. We will read literary and visual representations of, for instance, the transforming family structures in the revolutionary years, romantic experiences during the socialist construction, and gender relations in the reform era. We will, through exercises of translation, interpretation, and creative imitation, get ourselves more familiar with genres including but not limited to poems, short stories, correspondence, diaries, critical essays, song lyrics, play scripts, etc. The course is conducted in Mandarin, but some bilingual materials are also involved for translation and interpretation purposes.

Requirements/Evaluation: oral presentation; translation project; short piece of creative writing.

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: Chinese majors

CHIN 424 (S) Navigating across Cities: Space, Materials, and (Wo)Men in the Sinophone World

This course focuses on the theme of urban modernity in Sinophone world, namely, Chinese-speaking districts and regions including but not limited to PRC China. Through the lens of literary and multi-media productions such as fictional writings, films, TV programs, newspaper reports and columns, stage performance, and art exhibitions that are created among various Chinese-speaking communities in and about the urban settings---Beijing, Shanghai, Chengdu, Hong Kong, Taipei, cities in other Asian countries as well as those in the United States---this course expects to discuss the representations of space, materials, and people that are connected to and by such a language called "Chinese" in its broadest, most complicated, and, in some cases, controversial sense. What is Chinese(s)? What is Chinese culture(s)? What roles does Chinese language play in urban productions? How is space and material experienced through a particular language and language culture? These are some of the questions we will explore in the course. The classes are conducted with a combination of seminars, semi-tutorial writing workshops, oral presentations, and field trips (contingent upon available events). All materials for discussion are in Chinese.

Class Format: all materials for discussion are in Chinese

Requirements/Evaluation: several papers; oral presentation

SEM Section: 01 MF 9:55 am - 11:10 am Chen Wang

CHIN 425 (F) Becoming Taiwan: Social, Cultural, and Economic Discourses of Modern Day Taiwan

A small island in East Asia and home to 23 million people, Taiwan is the largest economy that is not a member of the United Nations. From 1949, when the Nationalist Party (KMT) retreated to Taiwan after the Chinese Civil War, to becoming one of the Four Asian Tigers in the latter half of the 20th century, Taiwan has developed into a multifaceted society through an array of social/cultural/economic changes associated with industrialization, globalization and identity formation. In this course, we will examine some of the signal examples of these experiences that define the Taiwan society that it is today through literary works and films, as well as journalistic and academic articles. By way of group discussions and individual projects, students will acquire domain-specific vocabulary and develop abilities to analyze and discuss in Mandarin complex ideas related to the aforementioned issues. Using a semi-tutorial format and collaborating with a graduate program in Chinese pedagogy in Taiwan, this course is designed to provide opportunities for Williams students to engage in direct conversation with a language partner on course assignments and for the MA students in Taiwan to gain practical training in helping non-native speakers of Mandarin Chinese develop linguistic proficiency at the levels of Advanced Low to the Advanced Mid based on the ACTFL proficiency guidelines.

Class Format: semi-tutorial format, students will meet as a large group periodically for linguistic development and two to three people groups regularly for discussions

Requirements/Evaluation: quizzes, presentations, posting of discussion questions, two position papers (3-5 pages) and one final paper (5-7 pages)

Prerequisites: CHIN 402 or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: seniors and Chinese majors; email the instructor

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D1)

Not offered current academic year

CHIN 431 (S) Introduction to Chinese Linguistics

Is Chinese--whose nouns "lack" number and whose verbs have no tense--a monosyllabic, "primitive" language? Are the Chinese characters a system of logical symbols or "ideographs," which indicate meaning directly without regard to sound? Could (and should) the characters be done away with and alphabetized? Are Cantonese, Hakka, and Taiwanese dialects or languages? And what is the relationship between Chinese, Japanese, Korean, and Vietnamese? These are some of the questions we will be taking up in this one-semester introduction to the scientific study of the Chinese language. Topics to be covered include: the phonological, syntactical, and lexical structure of Modern Standard Chinese; the Chinese writing system; the modern Chinese dialects; the history of the Chinese language; sociolinguistic aspects of Chinese; and language and politics in various Chinese-speaking societies. *Readings in English and Chinese, with class discussion in Mandarin*

Class Format: lecture/discussion

Requirements/Evaluation: evaluation will be based on classroom performance, homework, two short papers, and one longer paper

Prerequisites: CHIN 302 or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: current or prospective Chinese or Asian Studies majors

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Winter Study -----**CHIN 14 (W) Loyalty and Righteousness: Female Knight Errants in the Chinese Tradition**

Cross-listings: CHIN 14 HIST 14

Primary Cross-listing

The aura of the Chinese knight-errant's alternative universe (jianghu, lit. rivers and lakes) has never waned thanks to the thriving literature of Chinese martial arts. Recognized as the oldest genre of Chinese popular fiction still being written today, the martial arts novel constructs a fascinating human sociality where chivalry and altruism govern, stateless subjects wander, and heroic grace unfolds. This course will examine the literary, artistic, and social imagination of this jianghu in selected modern martial arts novels written by Jin Yong (aka Louis Cha Leung-yung) and Gu Long. It also compares Jin Yong's oeuvre, endorsed by die-hard fans, with the breathtaking yet controversial C(H)ollywood martial arts extravaganzas that have been released in the current millennium. Students will inquire into the themes of righteousness and law, self and state, martial arts and medicine, body and gender, and the martial arts world and postcolonial history; as well as traditional philosophical concepts of yin and yang, and "between the people" (minjian) and "all under heaven" (tianxia). Finally, we will explore the genre's aestheticism via literary and visual constructions in the cultural text.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: students will be asked to write an essay to explain their interest and rationale for this course

Grading: pass/fail only

ASIAN STUDIES
JAPANESE
(Div I & II, see explanation below)

Chair: Professor George Crane

- Cecilia Chang, Frederick Latimer Wells Professor of Chinese
- Man He, Assistant Professor of Chinese
- Shinko Kagaya, Professor of Japanese; on leave Spring 2020
- Cornelius C. Kubler, Stanfield Professor of Asian Studies; on leave 2019-2020
- Christopher M. B. Nugent, Professor of Chinese, Chair of Comparative Literature Program
- Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese
- Li Yu, Professor of Chinese

Affiliated Faculty:

- Christopher Bolton, Professor of Comparative Literature and Japanese Literature
- George Crane, Chair of Asian Studies and the Edward S. Greenbaum 1910 Professor of Political Science
- George Dreyfus, Jackson Professor of Religion
- Ju-Yu Scarlett Jang, Professor of Art
- Jason Josephson Storm, Professor of Religion
- Peter Just, Professor of Anthropology
- Aparna Kapadia, Associate Professor of History
- Eiko Maruko Siniawer, Professor of History
- Anne Reinhardt, Chair and Professor of History
- W. Anthony Sheppard, Marylin & Arthur Levitt Professor of Music
- Scott Wong, Charles R. Keller Professor of History

Visitors:

- Susanne Ryuyin Kerekes, Gaius Charles Bolin Fellow in Religion and Asian Studies
- Eun Young Seong, Visiting Assistant Professor of Japanese
- Nana Takeda, Visiting Lecturer in Japanese
- Chen Wang, Visiting Assistant Professor of Chinese

Mission Statement and Learning Objectives

The mission of the Department of Asian Studies is to help as many students as possible—both majors and non-majors—develop practical proficiency in Asian languages and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of one or more of the disciplines represented within Asian Studies (including anthropology, art history, economics, history, linguistics, literature, music, political science, religion, and sociology), so that they may realize their fullest intellectual and personal potential and be able to make useful contributions to society. The department offers three distinct major tracks: Asian Studies, Chinese, and Japanese.

Learning Objectives for the Japanese Major

The Japanese major consists of a core language curriculum and a variety of interdisciplinary courses offered in the Asian Studies Department. In the Japanese language courses, students attain linguistic and cultural proficiency from the elementary through the advanced level. The interdisciplinary courses are designed to deepen students' understanding of and familiarity with diversity and dynamicity in Japanese culture.

Students who complete the requirements for a major in Japanese will be able to:

- Demonstrate linguistic competency/proficiency in comprehending, speaking, reading, and writing in Japanese at the ACTFL intermediate-high to advanced levels.
- Critically read and analyze a variety of Japanese primary sources for academic and professional purposes
- Conduct research by engaging in cross-linguistic, cross-cultural, and comparative historical analysis with problem-solving and critical thinking skills.
- Critically engage with Japanese culture, past and present, recognizing its diversity and vibrancy.
- Navigate a wide range of social and cultural contexts by communicating effectively and appropriately with people of other cultures in their local and global communities.
- Continue their engagement with Japanese language and culture as lifelong learners and users of Japanese.

THE MAJOR

We offer courses in English in the field of Asian Studies as well as courses in Chinese and Japanese language, literature, and culture. Three distinct majors are offered: a major in Chinese; a major in Japanese; and an interdisciplinary Asian Studies major which allows students to choose from a wide range of courses in the anthropology, art, economics, history, languages, linguistics, literatures, music, politics, religion, and sociology of China, Taiwan, Japan, and other Asian countries. An increasing number of courses on South Asia are also offered (e.g. ASST 117, ASST 221, ASST 244, ASST 246T, ASST 248, ASST 252, ASST 256, ASST 391, ASST 415, ASST 424, ASST 431, ASST 488). Students interested in taking Korean or Hindi may take these languages through the Critical Language Program administered by the Center for Foreign Languages, Literatures, and Cultures. Students with questions about the Asian Studies majors or about Asian Studies course offerings should consult the chair. Please note: Courses with ASST prefix carry Division II credit unless otherwise noted and courses with CHIN and JAPN prefixes carry Division I credit unless otherwise noted.

All students wishing to major in the Department of Asian Studies are required to take and pass a total of eleven courses, as follows:

One course that explicitly compares at least two countries in Asia, such as ASST 103, ASST 126, ASST 233, ASST 245, ASST 248, ASST 250, ASST 256, ASST 271, ASST 391, ASST 414, ASST 424, ASST 431, JAPN 258. Or students may take instead a course on a country that is different from their country of primary focus.

Four semesters of Chinese or Japanese language (including no more than two 100-level courses).

In addition to completing (1) and (2) above, all majors choose either an Area Studies track, leading to a major in Asian Studies; or a Language Studies track, leading to a major in Chinese or Japanese.

The requirements for Japanese are indicated below:

Japanese Major

Four additional semesters of Japanese language (300-level or higher).

One approved course in Japanese language (400-level), literature or culture.

One approved elective on Japan.

STUDY ABROAD

Students intending to major in Asian Studies are encouraged to study in Asia during one or both semesters of their junior year. Williams faculty serve on the boards of several study abroad programs in China and Japan. Opportunities to study in India, Indonesia, Korea, Taiwan, Thailand, and other Asian countries are also available. Prospective Asian Studies majors who are planning to study abroad should discuss their plans with their advisor as far in advance as possible. Up to eight courses taken overseas may be counted toward graduation, and up to four courses taken off campus may be counted toward the major.

FAQ

Students MUST contact departments/programs BEFORE assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). For programs that we are familiar with, we usually pre-approve credits.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus including readings/assignments, and exams or other written work.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, maximum of four courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Approved courses only.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Not in particular. Students are always strongly encouraged to consult with the department faculty ahead of time to plan on what courses to take during study-away and what courses to take up return.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

There have been cases where students decided to take different courses after they arrived at the program and those courses did not meet our requirements.

THE DEGREE WITH HONORS

Students interested in writing an honors thesis in Japanese should submit a proposal to the department chair before they pre-register for senior courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. Admission to the honors thesis program will normally be limited to students who have maintained at least a B+ average in their courses for the major.

Students admitted to the program should register for JAPN 493-W31-494. They will be expected to turn in the final draft of their thesis shortly after spring break and to discuss their results formally with their faculty graders. Their final grades in the three courses listed above and the award of Honors, Highest Honors, or no honors will be determined by the quality of the thesis and the student's performance in the oral defense.

THE ASIAN STUDIES ENDOWMENT

The Linen summer grants for study abroad, the Linen visiting professorships, and several other programmatic activities in the department are supported by an endowment for Asian Studies established by family and friends in memory of James A. Linen III, Class of 1934, Trustee of the College from 1948 to 1953 and from 1963 to 1982.

JAPN 101 (F) Elementary Japanese

An introduction to modern spoken and written Japanese, the course aims to instill proficiency in Japanese by developing four necessary skills of speaking, listening, reading, and writing to successfully interact with native speakers. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Audio, video and computer--assisted learning materials will be used extensively. Classes consist of a combination of "act" classes, conducted exclusively in Japanese, where students use the language in various types of drills and communicative activities, and "fact" classes, conducted in Japanese and English, where students learn about the language and culture.

Class Format: fact classes, three hours per week; act classes three hours per week

Requirements/Evaluation: daily classroom performance, homework, quizzes, a midterm, and a final exam

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students registered for JAPN 101-102 are required to attend and pass the sustaining program during the Winter Study period; credit granted only if both semesters (JAPN 101 and 102) are taken

JAPN 131 (F) Introduction to Japanese Linguistics

This course is an introduction to the basic ideas and methodology of linguistics. We learn how to formally analyze the patterns of speech sounds (phonetics and phonology), word formation (morphology), sentence structures (syntax), and meanings (semantics and pragmatics). Other topics, such as first language acquisition and language variations, may be discussed as needed. Although we use Japanese as the primary target data throughout the course, we occasionally look at data from other languages for further application of linguistic methodology and for the better understanding of cross-linguistic variations and underlying universality across languages. Classes are conducted in English.

Requirements/Evaluation: class discussion, reading assignments (as preparation for class), written assignments (exercises), mid-term and final exam

Prerequisites: no background knowledge of Japanese or linguistics is required; open to all students who are interested in Japanese language or language in general

Enrollment Limit: 25

Enrollment Preferences: first-year and sophomore students

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Attributes: Linguistics

Not offered current academic year

JAPN 201 (F) Intermediate Japanese

This course is a continuation of First-Year Japanese 101-102, further developing the four skills of speaking, listening, reading, and writing. The same general methodology will be used. Upon completing the course, students will have been introduced to most of the major structural patterns of contemporary Japanese and will be able to read simple expository prose.

Class Format: fact classes, three hours per week; act classes three hours per week

Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam

Prerequisites: JAPN 101-102 or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2019

LEC Section: 01 TR 9:55 am - 11:10 am Shinko Kagaya

JAPN 220 (S) Being Korean in Japan

Cross-listings: ASST 220 JAPN 220

Primary Cross-listing

Who are Zainichi Koreans (Koreans in Japan)? How are they different from Koreans in Korea or in the United States? Contemporary Korean TV dramas and films have depicted Koreans as attractive and successful people appealing to Hallyu (Korean Wave) fans around the world. However, Zainichi Koreans, who are the largest ethnic minority in Japan, have been frequently portrayed as abusive husbands/fathers, pitiful wives/mothers, or juvenile delinquents in both Japanese and Korean cinema and literature. Through close readings of films, novels, and short essays, we will explore little-known yet significant representations of Zainichi Koreans by focusing on Japanese and Korean historical contexts. By doing so, we will discover new aspects of transnational exchange not only between Japanese and Koreans, but also between South and North Koreans in Japan. All class materials will be available in English translation or with English subtitles.

Requirements/Evaluation: attendance/participation; short written responses; midterm exam; group presentation; final essay

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Spring 2020

LEC Section: 01 MR 2:35 pm - 3:50 pm Eun Young Seong

JAPN 223 (S) Japanese Food Culture in a Global Context

Cross-listings: JAPN 223 COMP 223

Primary Cross-listing

The burgeoning popularity of Japanese food on a global scale has resulted in a surge of new research, literature, and films. Conversely, the effects of globalization have transformed the dining experience within Japan to be ever more multiethnic. This interdisciplinary course explores the complex relationship between food and culture in Japan, and the emergence of Japanese cuisine as a global phenomenon, referring to a variety of materials and practices. Topics to be addressed include modernization, nation-building, militarization, globalization, the environment, and popular culture.

Requirements/Evaluation: active class participation, three response papers, two small projects (including descriptions and class presentations), and one research paper and presentation

Prerequisites: none

Enrollment Limit: 20

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

JAPN 223 (D1) COMP 223 (D1)

Not offered current academic year

JAPN 258 (S) Language and Literacy Development

Cross-listings: JAPN 258 PSYC 258

Primary Cross-listing

Language is uniquely a human function and fundamental to one's participation in society. Children learn to talk in the first three years of life at an impressive speed. However, in order to successfully participate in academic and social life, it is critical for one to develop literacy skills. Learning to read is a multifaceted process that involves various cognitive resources. This course is an introduction to language development and literacy acquisition in first language and in a cross-linguistic environment including Japanese, Chinese and English. Linguistic concepts such as phonology, syntax and morphology will be introduced as we discuss the acquisition processes. Questions to be addressed include: How does a child develop oral language from birth? How does a child learn the meaning of words? How is learning to talk and read similar or different across various languages? How is learning to read different from learning to speak? How "natural" is it to learn to read?

Requirements/Evaluation: active participation in the class discussion, weekly reaction paper, quiz, final paper

Prerequisites: none

Enrollment Limit: 25

Enrollment Preferences: Japanese, Chinese, Asian Studies, and Psychology majors

Expected Class Size: 25

Grading: yes pass/fail option, yes fifth course option

Unit Notes: Psychology majors, this course counts as a 200-level elective in psychology but does not count as one of the three 200-level courses for the major; for Asian Studies, Chinese, and Japanese majors, this course counts as a comparative requirement course

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

JAPN 258 (D1) PSYC 258 (D1)

Attributes: Linguistics

Not offered current academic year

JAPN 260 (F) Japanese Theatre and its Contemporary Context

Cross-listings: JAPN 260 COMP 262 THEA 262

Primary Cross-listing

Japan's rich and varied performance traditions, old and new, born of different historical settings, coexist to this day and compete for the attention of audiences, domestically and abroad. The forms to be considered (nohgaku, kabuki, bunraku, shingeki, butoh, and Takarazuka all female revue among others) are all dynamic. Each has transformed itself in response to evolving social conditions. This course examines these performance traditions, considers how each reflects the social, cultural, and political context of its birth, and poses the question, "of what relevance is each to a contemporary audience?" Some of the other questions we will explore are: How have these performing traditions transformed themselves throughout history, including after 3.11? What do we mean by traditional? contemporary? How are traditional and contemporary performance genres interacting with each other? How have the central themes of these works evolved? *All readings and discussion will be in English.*

Class Format: discussion

Requirements/Evaluation: active class participation, presentations, written journals, two short papers, and one longer paper

Prerequisites: none; open to all

Enrollment Limit: 20

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

JAPN 260 (D1) COMP 262 (D1) THEA 262 (D1)

Attributes: GBST East Asian Studies Electives

Not offered current academic year

JAPN 274 (F) Confronting Japan

Cross-listings: COMP 274 JAPN 274

Primary Cross-listing

This tutorial looks into confrontations, within Japan and across its borders, how such confrontations are perceived, handled and narrated, and what they tell us about Japanese society. Through literature and other media, we will probe domestic issues, such as gender/economic disparities, aging, minorities, suicide, reclusion and post 3-11 recovery, and international issues, related to Japan's shifting roles within East Asia and beyond. Discussions will untangle the conflicting perspectives, and elaborate the thoughts and feelings of the various contestants. All readings and discussions will be in English. Some course materials will also be available in Japanese, for those interested.

Requirements/Evaluation: 4- to 5-page papers and 2-page critiques (in alternating weeks), and one final report at the culmination of the course

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: Japanese majors

Expected Class Size: 10

Grading: yes pass/fail option, no fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

JAPN 276 (S) Premodern Japanese Literature and Performance

Cross-listings: JAPN 276 COMP 278

Primary Cross-listing

Some of Japan's performance traditions, which developed in different historical settings, have survived to this day and continue to coexist and compete for the attention of audiences both domestically and abroad. This course examines the Japanese literature of three major periods in Japan's history, focusing on how literary and performance traditions have been interrelated in the unfolding of Japanese literary history. We will begin by looking into the Heian period (794-1185), when the work of female authors occupied center stage and some of the canonical texts of the Japanese literary and cultural tradition were born. Next we will consider the medieval period (1185-1600), which saw the rise of the samurai class and the consequent shift in the domain of artistic creation. Then we will look at the Edo period (1600-1867), when a new bourgeois culture flourished and audiences were greatly transformed. We will also explore the continuing force of premodern literary traditions in contemporary performing arts. *All readings and discussions will be in English.*

Class Format: lecture/discussion

Requirements/Evaluation: active class participation, presentations, written journals, two essay questions, one paper, and attendance of live performance events

Prerequisites: none; open to all

Enrollment Limit: 20

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

JAPN 276 (D1) COMP 278 (D1)

Attributes: GBST East Asian Studies Electives

JAPN 301 (F) Upper-Intermediate Japanese

This course is a continuation of Japanese 201 and 202. Students will further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention.

Class Format: three 75-minute classes

Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam

Prerequisites: JAPN 202 or permission of instructor

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 10

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Fall 2019

LEC Section: 01 MWF 8:30 am - 9:45 am Eun Young Seong

JAPN 302 (S) Upper-Intermediate Japanese

This course is a continuation of Japanese 301. Students will, further develop the four skills of speaking, listening, reading, and writing, while consolidating the foundations built in Elementary and Intermediate Japanese. The same general methodology will be used. In this course, students begin to emphasize vocabulary building through the study of situationally oriented materials stressing communicative competence. The reading of expository prose in both semi-authentic and authentic materials of intermediate difficulty will also receive some extensive attention.

Class Format: three 75-minute classes

Requirements/Evaluation: daily performance, homework, quizzes, a midterm, and a final exam

Spring 2020

JAPN 406 (F) Advanced Japanese: JLPT 1, 2 or 3

This course is for advanced students, especially for those who would aim to pass Level 1, 2, or 3 of the Japanese Language Proficiency Test (JLPT) offered by the Japan Foundation and Japan Educational Exchanges and Services. JLPT not only measures examinees' skill level, but has been used as a form of qualification, and also often for employment screening and evaluation. Students will work on all five areas of chōkai (listening comprehension), dokkai (reading comprehension), bunpō (grammar), goi (vocabulary) and kanji, based on their skill level.

Requirements/Evaluation: daily preparation and in-class performance, a weekly journal, and taking the JLPT exam suited to your level in December

Prerequisites: any one of Japanese 300- or 400-level courses or permission of instructor

Enrollment Limit: 5

Expected Class Size: 4

Grading: yes pass/fail option, yes fifth course option

Distributions: (D1)

Not offered current academic year

JAPN 407 (F) An Exploration of Japanese Language and Culture

Cross-listings: ASST 207 JAPN 407

Primary Cross-listing

Language is the primary means for human beings to lead social lives and it expresses, embodies and symbolizes cultural and social reality. This tutorial will examine the intertwining ways in which the Japanese language reflects the patterns of life and intrinsic beliefs of Japanese, while exploring how this linguistic code may influence and shape the ways Japanese think. We will look into the following topics: polite language and the variety of personal pronouns in order to examine how the hierarchical structure of Japanese society is reflected in them. Also, we will explore women's speech, youth and queer Japanese to discuss social and gender identities and the role of linguistic stereotypes in manga, anime and TV dramas as well as the "easy Japanese movement," which depicts the shift from a monolingual to multilingual Japanese society. And finally, our examination will investigate the semantic and cultural losses that occur in translations from Japanese prose to English prose. The course is conducted in either Japanese or English with materials drawn from linguistics and sociocultural studies both in Japanese and English. Students wishing to take the course in English should register under ASST 207T and students wishing to take the course in Japanese should register under JAPN 407T. Japanese language learners will not only develop analytical and critical thinking, but will gain more advanced Japanese skills such as reading to understand the logic of arguments, exponent narrative, and academic presentations and writing.

Requirements/Evaluation: attendance and participation, 5 short papers, 5 critiques, and one final project; ASST 207 will meet once a week; JAPN 407 will meet twice a week

Prerequisites: none for ASST 207; a 400-level Japanese language course, advanced level Japanese proficiency or permission of instructor for JAPN 407

Enrollment Limit: 10

Enrollment Preferences: current or prospective Japanese, Chinese, and Asian Studies majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: students wishing to take the course in English should register under ASST 207 and students wishing to take the course in Japanese should register under JAPN 407

Distributions: (D1)

This course is cross-listed and the prefixes carry the following divisional credit:

ASST 207 (D1) JAPN 407 (D1)

Attributes: Linguistics

Not offered current academic year

JAPN 493 (F) Senior Thesis: Japanese

Japanese senior thesis; this is part of a full-year thesis (493-494).

Grading: yes pass/fail option, yes fifth course option

Winter Study -----

JAPN 31 (W) Senior Thesis: Japanese

To be taken by all students who are candidates for honors in Japanese.

Class Format: independent study

Grading: pass/fail only

Winter 2020

HON Section: 01 TBA George T. Crane

JAPN 88 (W) Japanese Sustaining Program

Students registered for JAPN 101-102 are required to attend and pass the Japanese Sustaining Program. However, students are also required to register for a regular Winter Study course. Once the regular Winter Study registration process is complete, the Registrar's Office will automatically enroll you in the Sustaining Program. Check your class schedule to confirm enrollment.

Requirements/Evaluation: regular attendance and active participation

Prerequisites: Japanese 101

Grading: pass/fail option only

Materials/Lab Fee: one Xerox packet

Winter 2020

LAB Section: 01 MWR 9:00 am - 9:50 am Nana Takeda

JAPN 99 (W) Independent Study: Japanese

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Winter 2020

IND Section: 01 TBA George T. Crane

ASTRONOMY (Div III)

Chair: Professor Jay Pasachoff

- Kevin Flaherty, Lecturer in Astronomy and Hopkins Observatory Supervisor; affiliated with: Physics Department
- Anne Jaskot, Assistant Professor of Astronomy and Associate of the Hopkins Observatory; affiliated with: Physics Department
- Jay M. Pasachoff, Chair and Field Memorial Professor of Astronomy

How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. The Astronomy Department offers courses for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astrophysics major (administered jointly with the Physics Department) and the Astronomy major are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Astronomy Department home page can be found at astronomy.williams.edu

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Astronomy and Physics Departments to determine their most appropriate route through the major. An essential ingredient in such students' undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics

Physics 201 Electricity and Magnetism

Physics 202 Waves and Optics

Physics/Mathematics 210 Mathematical Methods for Scientists

Physics 301 Introductory Quantum Physics

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus

Three 400-level astronomy courses OR two 400-level astronomy courses and one of the following:

Astronomy 211 Astronomical Observing and Data Analysis

Physics 302 Statistical Physics

Physics 402T Applications of Quantum Mechanics

Physics 405T Electromagnetic Theory

Physics 411T Classical Mechanics;

Physics 418 Gravity

The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

THE DEGREE WITH HONORS IN ASTROPHYSICS

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the departments will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The departments will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chairs as early as possible.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)

Two 400-level Astronomy courses

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics

Mathematics 140 Calculus II

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. Students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.

THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astronomy 493) and the winter study project (Astronomy 031). At the end of the winter study period, the department will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

STUDY ABROAD

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. PHYS 301, a required course for the Astrophysics major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

For the new era of "multimessenger astronomy": What makes a star shine? For how long will the Sun keep shining and what will happen to it then? What are black holes and how can they form? How and what have we found out about the recently discovered "chirps" from gravitational radiation resulting from two giant black holes merging and, with additional signals in the spectrum, from the merger of two neutron stars? What do we learn about the Sun from total solar eclipses? Astronomy 101, a non-major, general introduction to the part of contemporary astronomy that includes how stars form and how they end their existence, will provide answers to these questions and more. The course gives special attention to the exciting discoveries of the past few years. Topics include modern astronomical instruments such as the Hubble Space Telescope, the Chandra X-ray Observatory, the Kepler, K2 and TESS missions to discover planets around other stars, the latest huge telescopes and some results from them; how astronomers interpret the light received from distant celestial objects; the Sun as a typical star (and how its future will affect ours); and our modern understanding of how stars work and how they change with time. We will also discuss how pulsars and black holes result from the evolution of normal, massive stars and how supermassive black holes lurk at the center of galaxies and quasars. We will discuss the discovery of thousands of "exoplanets" around stars other than the Sun. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of and on the same level as Astronomy 102 (solar system) and 104 (galaxies and cosmology), and students who have taken those courses are welcome. Observing sessions will include use of the 24-inch telescope and other telescopes for nighttime observations of stars, star clusters, planets and their moons, nebulae, and galaxies, as well as use of other telescopes for daytime observations of the Sun.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

ASTR 102 (S) Our Solar System and Others

What makes Earth different from all the other planets? What has NASA's Curiosity on Mars found about Mars's past running water and suitability for life? How has knowledge about Pluto been transformed by NASA's 2015 flyby and the associated ground-based studies with which Williams College faculty and students participate? Will asteroids or comets collide with the Earth again? What is a solar eclipse like? What do we learn from the rare transits of Mercury and of Venus that Williams faculty and students have studied? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system, will provide answers to these questions and more. We will cover the historical development of humanity's understanding of the solar system, examining contributions by Aristotle, Ptolemy, Copernicus, Galileo, Newton, Einstein, and others. We will discuss the discovery of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and by the Hubble Space Telescope and the Kepler/K2/TESS missions. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 48

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

ASTR 104 (S) The Milky Way Galaxy and the Universe Beyond

It has been less than a century since the Sun was discovered not to be at the center of the Milky Way Galaxy, and the Milky Way Galaxy was determined to be only one of countless "island universes" in space. A host of technological advances is enabling us to understand even more clearly our place in the universe and how the universe began. For example, the recently discovered "chirp" from gravitational radiation (reported in 2016) resulting from two giant black holes merging, and the "chirp" from two neutron stars merging, also producing light, radio and x-ray radiation, has opened a whole different way of observing the Universe from the traditional use of light and other forms of electromagnetic radiation. We are now therefore in the new era of multimessenger of astronomy. Further, the Hubble Space Telescope and the Chandra X-ray Observatory bring exceptionally clear images over a wider range of the spectrum; their images are aiding astronomers to better understand the past and future of the Universe, and new infrared images are expected with the launch of the James Webb Space Telescope. Observations with those and other new telescopes on the ground and in space help to confirm and enlarge our understanding of the Big Bang. In addition, study of the early Universe (most recently from the Planck spacecraft) and large-scale mapping programs such as the Sloan Digital Sky Survey and the Dark Energy Survey are giving clues into how the Universe's currently observed structure arose. Astronomy 104, a non-major, general introduction to part of contemporary astronomy comprising the study of galaxies and the Universe, explores the answers to questions like: What is the Milky Way?; Why are quasars so luminous?; Is the Universe made largely of "dark matter" and "dark energy"?; What determines the ultimate fate of the Universe? How have studies of Cepheid variables and distant supernovae with the Hubble Space Telescope determine that the Universe is 13.8 billion years old and indicated that the Universe's expansion is accelerating? How significant is the current discrepancy between the age and expansion rate of the Universe as measured from supernova observations as opposed to measurements from the cosmic background radiation? We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 and 102, and students who have taken those courses are welcome.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration

Requirements/Evaluation: two hour tests, a final exam, lab reports, and an observing portfolio

Prerequisites: none; not open to students who have taken or are taking ASTR 330

Enrollment Limit: 48

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

Not offered current academic year

ASTR 111 (F) Introduction to Astrophysics (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and

evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

Class Format: discussion, observing sessions, and five labs per semester

Requirements/Evaluation: weekly problem sets, two hour tests, a final exam, lab reports, and an observing portfolio

Prerequisites: a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

Enrollment Limit: 28

Enrollment Preferences: potential Astronomy majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

Fall 2019

LEC Section: 01 TR 11:20 am - 12:35 pm Anne Jaskot

LAB Section: 02 M 1:00 pm - 4:00 pm Kevin Flaherty

LAB Section: 03 R 1:00 pm - 4:00 pm Kevin Flaherty

ASTR 207 (F) Extraterrestrial Life in the Galaxy: A Sure Thing, or a Snowball's Chance?

A focused investigation of the possibility of life arising elsewhere in our Galaxy, and the chances of our detecting it. In this course, pairs of students will explore the astronomical and biochemical requirements for the development of Earth-like life. We will consider the conditions on other planets within our solar system as well as on newly-discovered planets circling other stars. We will also analyze the famous "Drake Equation," which calculates the expected number of extraterrestrial civilizations, and attempt to evaluate its components. Finally, we will examine current efforts to detect signals from intelligent alien civilizations and contemplate humanity's reactions to a positive detection.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on the student's papers, responses to the partner's papers, and evidence of growth in understanding over the semester; as well as improvement in speaking and writing

Prerequisites: ASTR 111 or BIOL 101-102, CHEM 101-102, or GEOS 101 or equivalent science preparation; instructor's permission required

Enrollment Limit: 10

Enrollment Preferences: if overenrolled, preference given to students who have had ASTR 111

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Not offered current academic year

ASTR 211 (S) Astronomical Observing and Data Analysis (QFR)

How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24" telescope and from data archives.

Class Format: discussion, computer lab work, and observing

Requirements/Evaluation: weekly problem sets, lab work, and observing projects

Prerequisites: MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required

Enrollment Limit: 14

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.

Spring 2020

LEC Section: 01 MR 1:10 pm - 2:25 pm Anne Jaskot, Kevin Flaherty

LAB Section: 02 M 7:00 pm - 9:40 pm Anne Jaskot, Kevin Flaherty

ASTR 217 (S) Planets and Moons

Cross-listings: ASTR 217 GEOS 217

Secondary Cross-listing

This course will examine the history and geology of the solar system. No two planets are exactly alike, and as we acquire more data and higher-resolution images, our sense of wonder grows. However, we can't hike around and hammer rocks on Venus or Titan, so we have to infer composition, form, texture and process from remotely-captured images and sparse chemical and spectral data. We will consider the origin of the solar system, the formation and evolution of planetary bodies, and the role of impacts, volcanism, tectonics and geomorphology in shaping them. We will summarize basic geological concepts of stratigraphy, structure and chronology and show how they can be applied off-world. We will review solar system exploration, and will include planetary data in lab exercises.

Requirements/Evaluation: one mid-term and one final exam, lab exercises, class participation

Prerequisites: any 100-level GEOS or any 100-level ASTR course, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Geosciences majors, Astronomy/Astrophysics majors, and sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ASTR 217 (D3) GEOS 217 (D3)

Attributes: GEOS Group C Electives - Solid Earth

ASTR 240 (F) Great Astronomers and Their Original Publications

Cross-listings: STS 240 LEAD 240 HSCI 240 ASTR 240 SCST 240

Primary Cross-listing

We study many of the greatest names in the history of astronomy, consider their biographies, assess their leadership roles in advancing science, and examine and handle the first editions of their books and other publications. Our study includes, in addition to a Shakespeare First Folio (with its astronomical mentions) and a page from the Gutenberg Bible, original books such as: 16th-century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th--century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); 21st-century: Wendy Freedman (Universe's expansion rate, 2000s). We will also read biographies and recent novels

dealing with some of the above astronomers. With the collaboration of the Chapin Librarian, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest. The course is a repeat of the successful course first given during the 2014-15 academic year's Year of the Book, honoring the new Sawyer Library and the expansion of the Chapin Library of Rare Books.

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: if overenrolled, preference by written paragraph of explanation of why student wants to take the course

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

ASTR 330 (S) The Nature of the Universe

This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves from the merging of two massive stellar black holes more than a billion light-years away, galaxies and quasars, and formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a *multiverse*.

Class Format: discussion three hours per week

Requirements/Evaluation: two hour tests, a small observing portfolio, occasional quizzes, and a final exam

Prerequisites: none; open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors

Enrollment Limit: 48

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors

Distributions: (D3)

Not offered current academic year

ASTR 336 (S) Science, Pseudoscience, and the Two Cultures

Cross-listings: ASTR 336 LEAD 336 HSCI 336

Primary Cross-listing

A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent "Science Wars" over the validity of scientific ideas. We will consider the fundamental originators of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy. We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in *Fads and Fallacies in the Name of Science*, and using such recent journals as *The Skeptical Inquirer* and *The Scientific Review of Alternative Medicine*, we consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We discuss vaccination

policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt, sugar, and fat in health. We consider the search for extraterrestrial intelligence (SETI) and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination programs and other consequences of superstition. We will discuss conspiracy theories such as those about the Kennedy assassination, in view of the 2017 release of many documents from the time and the recent book by Alexandra Zapruder, the granddaughter of the person whose on-the-spot movie documented the fatal shot. We also consider a range of dramas that are based on scientific themes, such as Tom Stoppard's *Arcadia* and Michael Frayn's *Copenhagen*.

Requirements/Evaluation: biweekly 5-page papers, participation in discussions, and a 15-page final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: juniors and seniors and to those with backgrounds in science, history of science, or philosophy

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: non-major course; does not count toward ASPH, ASTR or PHYS major

ASTR 402 (S) Between the Stars: The Interstellar Medium (QFR)

The matter between the stars--the interstellar medium--manifests itself in many interesting and unexpected ways, and, as the detritus of stars, its properties and behavior hold clues to the history and future evolution of both stars and the galaxies that contain them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject with varying ferocity as they evolve, to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. The existence of life on Earth is eloquent evidence of this chemical enrichment. In this course we will study the interstellar medium in its various forms. We will learn about many of the physical mechanisms that produce the radiation we observe from diffuse matter, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. This course is observing-intensive. Throughout the semester students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium using the equipment on our observing deck.

Class Format: plus a 1-hour weekly lecture, computer lab work and observing projects

Requirements/Evaluation: tutorial presentations and weekly problem sets, an hour exam and observing projects

Prerequisites: PHYS 201 or permission of instructor

Enrollment Limit: 10

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

ASTR 404 (S) Unsolved Problems in Galaxy Evolution

Cross-listings: ASTR 404

Primary Cross-listing

In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.

Requirements/Evaluation: student's papers, responses to the partner's papers, and problem sets

Prerequisites: ASTR 111 and PHYS 142 or 151 or permission of instructor

Enrollment Limit: 10

ASTR 410 (S) Compact Stellar Remnants: White Dwarfs, Neutron Stars and Black Holes

A star is a very interesting, very complicated physical object. Properties of stars and their evolutionary paths depend on an intricate interplay of different physical phenomena with gravity, nuclear interactions, radiation processes and even quantum and relativistic effects playing important roles. Using basic physics we will construct simple models of stars and discuss their evolution, concentrating on the key physical processes that play the dominant role at different evolutionary stages. We will discuss late stages of stellar evolution and concentrate on the basic properties of three possible remnants: white dwarfs, neutron stars and black holes. Radio and X-ray pulsars, supernovae including Type Ia and Gamma Ray Bursts will be discussed as well as observational confirmation of existence of black holes. We will explore extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences. We will also discuss the recent exciting detection of gravitational waves by the LIGO/VIRGO laser interferometric detectors.

Class Format: discussion three hours per week

Requirements/Evaluation: classroom participation, homework assignments, a midterm exam and a final exam

Prerequisites: PHYS 201 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

ASTR 412 (F) Heliophysics

Cross-listings: ASTR 412 PHYS 412

Primary Cross-listing

We study all aspects of the Sun, our nearest star. This semester follows the total solar eclipses of August 21, 2017, whose totality crossed the U.S. from coast to coast, and the July 2, 2019, total solar eclipse that crossed Chile and Argentina. In addition to discussing our observations of these eclipses and what has been learned about the solar atmosphere from eclipse research, we discuss the solar interior (including the Nobel-prize-winning solar neutrino experiment and helioseismology), the photosphere, the chromosphere, the corona, and the solar wind. We discuss the Sun as an example of stars in general. We discuss both theoretical aspects and observational techniques, including work at recent total solar eclipses. We discuss results from current spacecraft, including the Solar and Heliospheric Observatory (SOHO), the Solar Dynamics Observatory, the Sun Watcher (SWAP), and Hinode (Sunrise), and the new GOES/UVSI (Solar Ultraviolet Imager) run by an alumnus as well as additional Total Solar Irradiance measurements from ACRIMSAT and SORCE. We will discuss the role of solar observations in confirming Einstein's General Theory of Relativity with the bending of light at the 1919, 1922, and 2017 total solar eclipses as well as gravitational redshift measurements in solar spectral lines, extending our discussion to the recent "chirp" of gravitational radiation reported from several colliding black holes and neutron stars observed with the Laser Interferometer Gravitational-wave Observatory (LIGO). We hope to observe the transit of Mercury across the face of the Sun on November 11, 2019, during the semester; we also discuss our data analysis of recent transits of Mercury we observed from the ground and from space (most recently in May 2016). We will highlight the 2004 and 2012 transits of Venus across the face of the Sun as observed from Earth, the first such transits of Venus since 1882, as well as our work in observing transits of Venus from Jupiter with the Hubble.

Requirements/Evaluation: biweekly tutorial presentations; biweekly response to colleagues' presentations

Prerequisites: ASTR 111 or a 200-level Physics course; or permission of the instructor

Enrollment Limit: 10

ASTR 16 (W) An Infinity of Worlds: Planets and the Search for Life

Less than a generation ago, we wondered, as we had for millions of years before, whether there were any other planets at all. Now, we are privileged to be in the first generation of humans to know that many of the points of light dusting our night sky are host to orbiting worlds, some of which may be like our Earth. In this course, we will explore the techniques that are being used to discover these new worlds. We will make our own contributions to this great age of discovery, by using remotely-operated telescopes in Australia to gather data on new planets. This course, meant for non-majors, will deal with the science of planet hunting, the astounding diversity of planets known to exist, the emerging science of astrobiology, and the enduring question of "are we alone?" through works of science fiction and cutting-edge research. Majors may take this course with additional reading and assignments. Adjunct Bio: Rob Wittenmyer '98 is Professor of Astrophysics at the University of Southern Queensland in Australia. He is a veteran planet hunter with more than 20 published planet discoveries, and is the Chief Investigator of the Minerva-Australis observatory which is NASA's key Southern ground support for the Transiting Exoplanet Survey Satellite.

Requirements/Evaluation: 10-page paper

Prerequisites: none; majors may take this course with additional reading and assignments

Enrollment Limit: 20

Enrollment Preferences: preference will be given to first years and sophomores

Grading: pass/fail only

Materials/Lab Fee: approximately \$30 for books

Winter 2020

ASTR 20 (W) France under the Nazis 1940-45: Democracy Abandoned, Antisemitism Unleashed

Cross-listings: ASTR 20 HIST 20

Primary Cross-listing

France was Europe's cultural avatar in the 17th century, father of the Rights of Man in the 18th century, Art Capital of the World in the 19th Century, and essential in the 20th to victory in World War I. How did it find itself subservient to the dictates of a foreign ruling power in 1940 and helpless to prevent the usurpation of its democracy? How did France fail to protect the very rights of man that it had long-struggled to establish and achieve? In this course we will examine what happened politically and socially during the Vichy regime of 1940 to 1945. And when Germany's hegemony was upended in 1945 with the victory of the Allies in World War II, how did the French explain to those allies, and to themselves, how France had achieved its salvation? To explain all this, we will examine break-through historical studies from the 1970s, novels written at the time of the occupation and popular today, films of the era and beyond, as well as examples of analyses of French and foreign thinkers following the war and continuing into this century. Classes will meet twice a week for 2-3 hours. Students will be responsible for daily reading of secondary sources in the reading packets. They will view on Glow films from the Vichy era and beyond and be asked to analyze and share their impressions. Each student will be assigned a novel set in Vichy times; they will prepare a concise report for the group and 5-page paper explaining how the novel confirmed or countered their impressions of the era. Adjunct Instructor Bio: Ms. Bowden graduated magna cum laude from Vassar College, studying European history there, and subsequently at Columbia University. She has taught history at independent schools in New York and in the Queen's College graduate Education division.

Requirements/Evaluation: active class participation re readings and film topics, 5-page paper assessing assigned novel, thoughtful synopsis for fellow students

Prerequisites: none, though knowledge of French enriches the experience

Enrollment Limit: 12

Grading: pass/fail only

Materials/Lab Fee: \$36 plus cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

ASTR 20 HIST 20

Winter 2020

ASTRONOMY (Div III)

Chair: Professor Jay Pasachoff

- Kevin Flaherty, Lecturer in Astronomy and Hopkins Observatory Supervisor; affiliated with: Physics Department
- Anne Jaskot, Assistant Professor of Astronomy and Associate of the Hopkins Observatory; affiliated with: Physics Department
- Jay M. Pasachoff, Chair and Field Memorial Professor of Astronomy

How long will the Sun shine? How do we discover Earth-like planets among the many exoplanets circling other stars? How did the universe begin and how has it evolved over its 13.8-billion-year history? How do we detect not only light but also gravitational waves from afar? Astronomy is the science that asks and tries to answer questions like these. We have come a long way toward understanding what makes the sky appear as it does and how the Universe behaves. The Astronomy Department offers courses for anyone who is interested in learning about the Universe, and who would like to be able to follow new astronomical discoveries as they are made. All courses in Astronomy satisfy the Division III requirement. The Astrophysics major (administered jointly with the Physics Department) and the Astronomy major are described below.

The beginning astronomy courses are offered on two levels. Astronomy 101, 102, 104, and 330-range courses are intended primarily for non-science majors and have no prerequisite. Astronomy 111 is designed for students with some exposure to physics. It has a prerequisite of one year of high school physics or permission of the instructor, and a co-requisite of Mathematics 140 or equivalent background in calculus.

Most of the astronomy courses take advantage of our observational and computational facilities including a 24-inch computer-controlled telescope with sensitive electronic detectors, and our own computer network for image processing and data analysis. The Astronomy Department home page can be found at astronomy.williams.edu

ASTROPHYSICS MAJOR

The Astrophysics major is designed for students who want a rigorous introduction to the field, and includes not only those who plan graduate study in astronomy, astrophysics, or a closely related area, but also those interested in a wide variety of careers. Astrophysics alumni are not only astronomers but also computer scientists, geologists, teachers, doctors, lawyers, business school professors, and so on. In recent years, many astrophysics majors have had a second major in fields as wide ranging as mathematics, computer science, geosciences, economics, English, and art history. This major emphasizes the description of the Universe and its constituents in terms of physical processes. Potential Astrophysics majors should consult early with members of the Astronomy and Physics Departments to determine their most appropriate route through the major. An essential ingredient in such students' undergraduate training is experience in physics and mathematics. Therefore, the major normally will begin in the first year a student is at Williams with Physics 131, 141, or 151 and Mathematics 140 or 150 or 151 in the fall. Students with very good background placing them out of Physics 142 and out of Mathematics 140 may choose to take Physics 201 and Mathematics 150 or 151 instead. Astronomy 111 will often be taken in the fall of the sophomore year; however, many students take it in the fall of their first year at Williams, along with physics and math. Students who might place out of physics courses should read the section on placement under Physics; those who place out of Physics 131 or 141 into Physics 142 or 151 should particularly consider taking Astronomy 111 in the fall of their first year.

In addition to the major courses described below, other courses in geosciences, mathematics, and computer science may also be appropriate.

Major Requirements for Astrophysics

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics OR Physics 151 Seminar on Modern Physics

Physics 201 Electricity and Magnetism

Physics 202 Waves and Optics

Physics/Mathematics 210 Mathematical Methods for Scientists

Physics 301 Introductory Quantum Physics

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus

Three 400-level astronomy courses OR two 400-level astronomy courses and one of the following:

Astronomy 211 Astronomical Observing and Data Analysis

Physics 302 Statistical Physics

Physics 402T Applications of Quantum Mechanics

Physics 405T Electromagnetic Theory

Physics 411T Classical Mechanics;

Physics 418 Gravity

The total number of courses required for the Astrophysics major, an interdisciplinary major, is eleven. Students entering with Advanced Placement in physics and/or mathematics may obtain credit toward the major for the equivalent of Physics 141 and/or Mathematics 140 and/or 150 or 151 taken elsewhere, but at least 8 courses in astronomy, physics, and mathematics must be taken at Williams. There are some aspects of astrophysics that are closely related to chemistry or geosciences. In recognition of this relation, certain advanced courses in those departments can be accepted for credit toward the Astrophysics major on a two-for-one basis. It is not possible to double major in Astrophysics and Physics.

THE DEGREE WITH HONORS IN ASTROPHYSICS

The honors degree in Astrophysics will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy or Physics. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Students doing theses will normally choose a topic and an advisor early in the second semester of their junior year and usually begin their thesis work during the summer. During the senior year, those students whose proposals have been approved will elect two courses and a winter study project in addition to the minimum requirements for the major. Preparation for the thesis will occupy at least one course (Astrophysics 493) and the winter study project (Astrophysics 031). At the end of the winter study period, the departments will decide, in consultation with each student, whether to admit that student to honors candidacy. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The departments will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chairs as early as possible.

ASTRONOMY MAJOR

The Astronomy major is designed for students with an interest in learning about many aspects of modern astronomy, but who do not choose to take the most advanced physics and math courses of the astrophysics major. It is also appropriate as a second major for students concentrating in another field; in particular, combining an Astronomy major with a related major like Geoscience or Computer Science has been a fruitful path for some of our students. The Astronomy major emphasizes understanding the observed properties of the physical systems that comprise the known Universe, from the Sun and solar system, to the evolution of stars and star clusters, to the Milky Way Galaxy, to external galaxies and clusters of galaxies. Because some knowledge of physics and calculus is necessary to understand many astronomical phenomena, the Astronomy major requires the first two semesters each of the physics and calculus that are also required of Physics majors and Astrophysics majors.

There are several possible routes through the Astronomy major, depending on preparation and interest. Students considering a major in Astronomy should consult with members of the department early and often. A first-year student, if unsure about choosing between Astronomy and Astrophysics, may wish to take not only Astronomy 111 but also Physics 131, 141, or 151 and Mathematics 140 (if necessary) in the fall. Students who might place out of physics courses should read the section on placement under Physics.

Major Requirements for Astronomy

Astronomy 111 Introduction to Astrophysics OR Astronomy 101 Stars: From Suns to Black Holes and either Astronomy 102 The Solar System—Our Planetary Home OR Astronomy 104 The Milky Way Galaxy and the Universe Beyond

Two 200-level Astronomy courses (or additional 400-level Astronomy courses as substitutes)

Two 400-level Astronomy courses

Physics 131 Particles and Waves OR Physics 141 Particles and Waves—Enriched OR equivalent placement

Physics 142 Foundations of Modern Physics or Physics 151 Seminar on Modern Physics

Mathematics 140 Calculus II

Mathematics 150 Multivariable Calculus OR Mathematics 151 Multivariable Calculus OR equivalent placement

The total number of courses required for the Astronomy major is nine. Students entering with Advanced Placement in physics and/or math may obtain credit toward the major for the equivalent of Physics 142 and/or Mathematics 150 or 151 taken elsewhere. There are some aspects of astronomy that are closely related to chemistry or geosciences. In recognition of this, certain advanced courses in those departments can be accepted for credit toward the Astronomy major.

THE DEGREE WITH HONORS IN ASTRONOMY

The honors degree in Astronomy will be awarded on the basis of a senior thesis presenting the results of an original observational, experimental, or theoretical investigation carried out by the student under the direction of a faculty member in Astronomy. There are no specific grade requirements (other than College-wide requirements for remaining in good academic standing) for entry into the thesis research program; however, a student wishing to do a thesis should have demonstrated both ability and motivation for independent work in previous courses and in any earlier research involvement. Both a written thesis and an oral presentation to faculty and fellow students are required. The degree with honors will be awarded to those who meet these requirements with distinction. The degree with highest honors will be awarded to those who fulfill the requirements with unusually high distinction.

The department will be flexible with regard to the number and timing of courses devoted to thesis research within the general guidelines of two courses and a winter study project over and above the minimum major requirements and the written and oral presentations, especially in cases of students with advanced standing and/or summer research experience. Students considering unusual requests are urged to consult with potential advisors or the department chair as early as possible.

STUDY ABROAD

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, and complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

No.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. PHYS 301, a required course for the Astrophysics major, is only taught in the fall, and is difficult to replicate abroad, especially regarding the lab component.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date.

For the new era of "multimessenger astronomy": What makes a star shine? For how long will the Sun keep shining and what will happen to it then? What are black holes and how can they form? How and what have we found out about the recently discovered "chirps" from gravitational radiation resulting from two giant black holes merging and, with additional signals in the spectrum, from the merger of two neutron stars? What do we learn about the Sun from total solar eclipses? Astronomy 101, a non-major, general introduction to the part of contemporary astronomy that includes how stars form and how they end their existence, will provide answers to these questions and more. The course gives special attention to the exciting discoveries of the past few years. Topics include modern astronomical instruments such as the Hubble Space Telescope, the Chandra X-ray Observatory, the Kepler, K2 and TESS missions to discover planets around other stars, the latest huge telescopes and some results from them; how astronomers interpret the light received from distant celestial objects; the Sun as a typical star (and how its future will affect ours); and our modern understanding of how stars work and how they change with time. We will also discuss how pulsars and black holes result from the evolution of normal, massive stars and how supermassive black holes lurk at the center of galaxies and quasars. We will discuss the discovery of thousands of "exoplanets" around stars other than the Sun. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of and on the same level as Astronomy 102 (solar system) and 104 (galaxies and cosmology), and students who have taken those courses are welcome. Observing sessions will include use of the 24-inch telescope and other telescopes for nighttime observations of stars, star clusters, planets and their moons, nebulae, and galaxies, as well as use of other telescopes for daytime observations of the Sun.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 30

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

LAB Section: 04 W 1:00 pm - 2:30 pm Kevin Flaherty

LAB Section: 05 W 2:30 pm - 4:00 pm Kevin Flaherty

ASTR 102 (S) Our Solar System and Others

What makes Earth different from all the other planets? What has NASA's Curiosity on Mars found about Mars's past running water and suitability for life? How has knowledge about Pluto been transformed by NASA's 2015 flyby and the associated ground-based studies with which Williams College faculty and students participate? Will asteroids or comets collide with the Earth again? What is a solar eclipse like? What do we learn from the rare transits of Mercury and of Venus that Williams faculty and students have studied? Astronomy 102, a non-major, general introduction to the part of contemporary astronomy that comprises the study of the solar system, will provide answers to these questions and more. We will cover the historical development of humanity's understanding of the solar system, examining contributions by Aristotle, Ptolemy, Copernicus, Galileo, Newton, Einstein, and others. We will discuss the discovery of over 4000 exoplanets around stars other than the Sun. The course gives special attention to exciting discoveries of the past few years by space probes and by the Hubble Space Telescope and the Kepler/K2/TESS missions. We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 (stars and stellar evolution) and 104 (galaxies and cosmology), and students who have taken those courses are welcome.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration

Requirements/Evaluation: two hour tests, a final exam, an observing portfolio, and lab reports

Prerequisites: none

Enrollment Limit: 48

Expected Class Size: 20

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

LAB Section: 05 W 2:30 pm - 4:00 pm Kevin Flaherty

ASTR 104 (S) The Milky Way Galaxy and the Universe Beyond

It has been less than a century since the Sun was discovered not to be at the center of the Milky Way Galaxy, and the Milky Way Galaxy was determined to be only one of countless "island universes" in space. A host of technological advances is enabling us to understand even more clearly our place in the universe and how the universe began. For example, the recently discovered "chirp" from gravitational radiation (reported in 2016) resulting from two giant black holes merging, and the "chirp" from two neutron stars merging, also producing light, radio and x-ray radiation, has opened a whole different way of observing the Universe from the traditional use of light and other forms of electromagnetic radiation. We are now therefore in the new era of multimessenger of astronomy. Further, the Hubble Space Telescope and the Chandra X-ray Observatory bring exceptionally clear images over a wider range of the spectrum; their images are aiding astronomers to better understand the past and future of the Universe, and new infrared images are expected with the launch of the James Webb Space Telescope. Observations with those and other new telescopes on the ground and in space help to confirm and enlarge our understanding of the Big Bang. In addition, study of the early Universe (most recently from the Planck spacecraft) and large-scale mapping programs such as the Sloan Digital Sky Survey and the Dark Energy Survey are giving clues into how the Universe's currently observed structure arose. Astronomy 104, a non-major, general introduction to part of contemporary astronomy comprising the study of galaxies and the Universe, explores the answers to questions like: What is the Milky Way?; Why are quasars so luminous?; Is the Universe made largely of "dark matter" and "dark energy"?; What determines the ultimate fate of the Universe? How have studies of Cepheid variables and distant supernovae with the Hubble Space Telescope determine that the Universe is 13.8 billion years old and indicated that the Universe's expansion is accelerating? How significant is the current discrepancy between the age and expansion rate of the Universe as measured from supernova observations as opposed to measurements from the cosmic background radiation? We regularly discuss the latest news briefs and developments in astronomy and relate them to the topics covered in the course. This course is independent of, and on the same level as Astronomy 101 and 102, and students who have taken those courses are welcome.

Class Format: lecture (three hours per week), observing sessions (scattered throughout the semester), afternoon labs (five times per semester), and a planetarium demonstration

Requirements/Evaluation: two hour tests, a final exam, lab reports, and an observing portfolio

Prerequisites: none; not open to students who have taken or are taking ASTR 330

Enrollment Limit: 48

Expected Class Size: 15

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course

Distributions: (D3)

Not offered current academic year

ASTR 111 (F) Introduction to Astrophysics (QFR)

The science of astronomy spans vast scales of space and time, from individual atoms to entire galaxies and from the universe's beginning to the future fate of our Sun. In this course, we will survey some of the main ideas in modern astrophysics, with an emphasis on the physics of stars and galaxies. ASTR 111 is the first course in the Astrophysics and Astronomy major sequences. It is also appropriate for students planning to major in one of the other sciences or mathematics and for others who would like a quantitative introduction that emphasizes the relationship of contemporary physics to astronomy. Topics include gravity and orbits, radiation laws and stellar spectra, physical characteristics of the Sun and other stars, star formation and

evolution, black holes, galaxies, the expanding universe, and the Big Bang. Students will also use telescopes to observe stars, nebulae, planets, and galaxies and to make daytime observations of the Sun.

Class Format: discussion, observing sessions, and five labs per semester

Requirements/Evaluation: weekly problem sets, two hour tests, a final exam, lab reports, and an observing portfolio

Prerequisites: a year of high school Physics, concurrent college Physics, or permission of instructor, and MATH 140 or equivalent

Enrollment Limit: 28

Enrollment Preferences: potential Astronomy majors

Expected Class Size: 15

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: The course requires regular problem sets and quantitative assignments. The course will emphasize how physical equations explain the observed properties of the universe.

Fall 2019

LEC Section: 01 TR 11:20 am - 12:35 pm Anne Jaskot

LAB Section: 02 M 1:00 pm - 4:00 pm Kevin Flaherty

LAB Section: 03 R 1:00 pm - 4:00 pm Kevin Flaherty

ASTR 207 (F) Extraterrestrial Life in the Galaxy: A Sure Thing, or a Snowball's Chance?

A focused investigation of the possibility of life arising elsewhere in our Galaxy, and the chances of our detecting it. In this course, pairs of students will explore the astronomical and biochemical requirements for the development of Earth-like life. We will consider the conditions on other planets within our solar system as well as on newly-discovered planets circling other stars. We will also analyze the famous "Drake Equation," which calculates the expected number of extraterrestrial civilizations, and attempt to evaluate its components. Finally, we will examine current efforts to detect signals from intelligent alien civilizations and contemplate humanity's reactions to a positive detection.

Class Format: tutorial

Requirements/Evaluation: evaluation will be based on the student's papers, responses to the partner's papers, and evidence of growth in understanding over the semester; as well as improvement in speaking and writing

Prerequisites: ASTR 111 or BIOL 101-102, CHEM 101-102, or GEOS 101 or equivalent science preparation; instructor's permission required

Enrollment Limit: 10

Enrollment Preferences: if overenrolled, preference given to students who have had ASTR 111

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Not offered current academic year

ASTR 211 (S) Astronomical Observing and Data Analysis (QFR)

How do astronomers make scientific measurements for objects that are light-years away from Earth? This course will introduce the basics of telescopes and observations and will give students hands-on training in the techniques astronomers use to obtain, process, and analyze scientific data. We will discuss observation planning, CCD detectors, signal statistics, image processing, and photometric and spectroscopic observations. We will begin by focusing on ground-based optical observations and will move on to non-optical observations, both electromagnetic (e.g., radio waves, X-rays) and non-electromagnetic (e.g., gravitational waves, neutrinos). Throughout the course, students will use computational techniques to work with real astronomical data, taken with our 24" telescope and from data archives.

Class Format: discussion, computer lab work, and observing

Requirements/Evaluation: weekly problem sets, lab work, and observing projects

Prerequisites: MATH 150 or 151; prior experience with Unix and computer programming is helpful, but not required

Enrollment Limit: 14

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: The course requires regular problem sets. Labs require computer programming and statistical and graphical analyses of data.

Spring 2020

LEC Section: 01 MR 1:10 pm - 2:25 pm Anne Jaskot, Kevin Flaherty

LAB Section: 02 M 7:00 pm - 9:40 pm Anne Jaskot, Kevin Flaherty

ASTR 217 (S) Planets and Moons

Cross-listings: ASTR 217 GEOS 217

Secondary Cross-listing

This course will examine the history and geology of the solar system. No two planets are exactly alike, and as we acquire more data and higher-resolution images, our sense of wonder grows. However, we can't hike around and hammer rocks on Venus or Titan, so we have to infer composition, form, texture and process from remotely-captured images and sparse chemical and spectral data. We will consider the origin of the solar system, the formation and evolution of planetary bodies, and the role of impacts, volcanism, tectonics and geomorphology in shaping them. We will summarize basic geological concepts of stratigraphy, structure and chronology and show how they can be applied off-world. We will review solar system exploration, and will include planetary data in lab exercises.

Requirements/Evaluation: one mid-term and one final exam, lab exercises, class participation

Prerequisites: any 100-level GEOS or any 100-level ASTR course, or permission of instructor

Enrollment Limit: 20

Enrollment Preferences: Geosciences majors, Astronomy/Astrophysics majors, and sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

ASTR 217 (D3) GEOS 217 (D3)

Attributes: GEOS Group C Electives - Solid Earth

Spring 2020

LEC Section: 01 MWF 10:00 am - 10:50 am Rónadh Cox

LAB Section: 02 W 1:00 pm - 4:00 pm Rónadh Cox

ASTR 240 (F) Great Astronomers and Their Original Publications

Cross-listings: STS 240 LEAD 240 HSCI 240 ASTR 240 SCST 240

Primary Cross-listing

We study many of the greatest names in the history of astronomy, consider their biographies, assess their leadership roles in advancing science, and examine and handle the first editions of their books and other publications. Our study includes, in addition to a Shakespeare First Folio (with its astronomical mentions) and a page from the Gutenberg Bible, original books such as: 16th-century, Nicolaus Copernicus (heliocentric universe); Tycho Brahe (best pre-telescopic observations); 17th-century, Galileo (discoveries with his first astronomical telescope, 1610; sunspots, 1613; *Dialogo*, 1632); Johannes Kepler (laws of planetary motion, 1609, 1619); Johannes Hevelius and Elisabeth Hevelius (atlases of the Moon and of stars, 1647, and 1687); Isaac Newton (laws of universal gravitation and of motion, 1687); 18th-century, Edmond Halley (*Miscellanea curiosa*, eclipse maps, 1715, 1724); John Flamsteed and Margaret Flamsteed (*Atlas Coelestis*, 1729); William Herschel and Caroline Herschel (1781, 1798). In more recent centuries, the original works are articles: 20th--century: Albert Einstein (special relativity, 1905; general relativity, 1916); Marie Curie (radioactivity); Cecilia Payne-Gaposchkin (hydrogen dominating stars, 1929), Edwin Hubble (Hubble's law, 1929); Vera Rubin (dark matter, 1970s); Jocelyn Bell Burnell (pulsar discovery, 1968); 21st-century: Wendy Freedman (Universe's expansion rate, 2000s). We will also read biographies and recent novels

dealing with some of the above astronomers. With the collaboration of the Chapin Librarian, we will meet regularly in the Chapin Library of Rare Books and also have a session at the library of the Clark Art Institute to see its rare books of astronomical interest. The course is a repeat of the successful course first given during the 2014-15 academic year's Year of the Book, honoring the new Sawyer Library and the expansion of the Chapin Library of Rare Books.

Requirements/Evaluation: class participation, two 5-page intermediate papers, and a final 15-page paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: if overenrolled, preference by written paragraph of explanation of why student wants to take the course

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

STS 240 (D3) LEAD 240 (D3) HSCI 240 (D2) ASTR 240 (D3) SCST 240 (D2)

Attributes: LEAD Facets or Domains of Leadership

Not offered current academic year

ASTR 330 (S) The Nature of the Universe

This course is a journey through space and time from the first fractions of a second after the Big Bang to the ultimate fate of the Universe billions of years into the future. Topics include the Big Bang and its remnant cosmic background radiation, cosmic inflation, conditions during the first three minutes, creation of the elements, stellar and galactic black holes, relativity, the detection of gravitational waves from the merging of two massive stellar black holes more than a billion light-years away, galaxies and quasars, and formation of the large-scale structure of the Universe. We will explore current ideas about the fate of our Universe, including the acceleration of its expansion, and its implications for the end of time. Finally, we will consider the fantastic but serious theoretical proposal that ours is but one of countless universes existing within a *multiverse*.

Class Format: discussion three hours per week

Requirements/Evaluation: two hour tests, a small observing portfolio, occasional quizzes, and a final exam

Prerequisites: none; open only to juniors and seniors; closed to students who have taken or are taking ASTR 104, and closed to ASTR, ASPH, and PHYS majors

Enrollment Limit: 48

Expected Class Size: 25

Grading: yes pass/fail option, no fifth course option

Unit Notes: non-major course; course in the 33X sequence are meant as general education courses for students in all majors

Distributions: (D3)

Not offered current academic year

ASTR 336 (S) Science, Pseudoscience, and the Two Cultures

Cross-listings: ASTR 336 LEAD 336 HSCI 336

Primary Cross-listing

A famous dichotomy between the sciences and the humanities, and public understanding of them, was laid down by C. P. Snow and has been widely discussed, with ignorance of the second law of thermodynamics compared with ignorance of Shakespeare. In this seminar, we will consider several aspects of science and scientific culture, including how scientific thinking challenges the claims of pseudoscience. We will consider C. P. Snow and his critics as well as the ideas about the Copernican Revolution and other paradigms invented by Thomas Kuhn. We will discuss the recent "Science Wars" over the validity of scientific ideas. We will consider the fundamental originators of modern science, including Tycho, Kepler, Galileo, and Newton, viewing their original works in the Chapin Library of rare books and comparing their interests in science with what we now call pseudoscience, like alchemy. We will review the history and psychology of astrology and other pseudosciences. Building on the work of Martin Gardner in *Fads and Fallacies in the Name of Science*, and using such recent journals as *The Skeptical Inquirer* and *The Scientific Review of Alternative Medicine*, we consider from a scientific point of view what is now called complementary or alternative medicine, including both older versions such as chiropractic and newer nonscientific practices. We will discuss the current global-climate-change deniers and their effects on policy. We discuss vaccination

policy. We consider such topics as GM (genetically modified) foods, the safety and regulation of dietary supplements, and the validity of government and other recommendations relevant to the roles of dietary salt, sugar, and fat in health. We consider the search for extraterrestrial intelligence (SETI) and reports of UFO's and aliens. We consider the possible effects that superstitious beliefs have on the general public's cooperation in vaccination programs and other consequences of superstition. We will discuss conspiracy theories such as those about the Kennedy assassination, in view of the 2017 release of many documents from the time and the recent book by Alexandra Zapruder, the granddaughter of the person whose on-the-spot movie documented the fatal shot. We also consider a range of dramas that are based on scientific themes, such as Tom Stoppard's *Arcadia* and Michael Frayn's *Copenhagen*.

Requirements/Evaluation: biweekly 5-page papers, participation in discussions, and a 15-page final paper

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: juniors and seniors and to those with backgrounds in science, history of science, or philosophy

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

ASTR 402 (S) Between the Stars: The Interstellar Medium (QFR)

The matter between the stars--the interstellar medium--manifests itself in many interesting and unexpected ways, and, as the detritus of stars, its properties and behavior hold clues to the history and future evolution of both stars and the galaxies that contain them. Stars are accompanied by diffuse matter all through their lifetimes, from their birthplaces in dense molecular clouds, to the stellar winds they eject with varying ferocity as they evolve, to their final fates as they shed their outer layers, whether as planetary nebulae or dazzling supernovae. As these processes go on, they enrich the interstellar medium with the products of the stars' nuclear fusion. The existence of life on Earth is eloquent evidence of this chemical enrichment. In this course we will study the interstellar medium in its various forms. We will learn about many of the physical mechanisms that produce the radiation we observe from diffuse matter, including radiative ionization and recombination, collisional excitation of "forbidden" lines, collisional ionization, and synchrotron radiation. Applying our understanding of these processes, we will analyze the physical conditions and chemical compositions of a variety of nebulae. This course is observing-intensive. Throughout the semester students will work in small groups to design, carry out, analyze, and critique their own observations of the interstellar medium using the equipment on our observing deck.

Class Format: plus a 1-hour weekly lecture, computer lab work and observing projects

Requirements/Evaluation: tutorial presentations and weekly problem sets, an hour exam and observing projects

Prerequisites: PHYS 201 or permission of instructor

Enrollment Limit: 10

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Not offered current academic year

ASTR 404 (S) Unsolved Problems in Galaxy Evolution

Cross-listings: ASTR 404

Primary Cross-listing

In this tutorial, we will learn about galaxies and their evolution by focusing on some of the key mysteries astronomers are trying to solve. Questions may include: How do galaxies turn their gas supply into stars? Is there a universal initial mass function for star formation? What is the origin of multiple stellar populations in globular clusters? Why do some galaxies cease star formation? Which galaxies reionized the universe? We will discuss the nature of each unsolved problem, debate the theories proposed to answer it, and consider how future progress might be made.

Requirements/Evaluation: student's papers, responses to the partner's papers, and problem sets

Prerequisites: ASTR 111 and PHYS 142 or 151 or permission of instructor

Enrollment Limit: 10

Expected Class Size: 6

Grading: no pass/fail option, no fifth course option

ASTR 410 (S) Compact Stellar Remnants: White Dwarfs, Neutron Stars and Black Holes

A star is a very interesting, very complicated physical object. Properties of stars and their evolutionary paths depend on an intricate interplay of different physical phenomena with gravity, nuclear interactions, radiation processes and even quantum and relativistic effects playing important roles. Using basic physics we will construct simple models of stars and discuss their evolution, concentrating on the key physical processes that play the dominant role at different evolutionary stages. We will discuss late stages of stellar evolution and concentrate on the basic properties of three possible remnants: white dwarfs, neutron stars and black holes. Radio and X-ray pulsars, supernovae including Type Ia and Gamma Ray Bursts will be discussed as well as observational confirmation of existence of black holes. We will explore extreme conditions existing near neutron stars and black holes and discuss their astrophysical consequences. We will also discuss the recent exciting detection of gravitational waves by the LIGO/VIRGO laser interferometric detectors.

Class Format: discussion three hours per week

Requirements/Evaluation: classroom participation, homework assignments, a midterm exam and a final exam

Prerequisites: PHYS 201 or permission of instructor

Enrollment Limit: 19

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Not offered current academic year

ASTR 412 (F) Heliophysics

Cross-listings: ASTR 412 PHYS 412

Primary Cross-listing

We study all aspects of the Sun, our nearest star. This semester follows the total solar eclipses of August 21, 2017, whose totality crossed the U.S. from coast to coast, and the July 2, 2019, total solar eclipse that crossed Chile and Argentina. In addition to discussing our observations of these eclipses and what has been learned about the solar atmosphere from eclipse research, we discuss the solar interior (including the Nobel-prize-winning solar neutrino experiment and helioseismology), the photosphere, the chromosphere, the corona, and the solar wind. We discuss the Sun as an example of stars in general. We discuss both theoretical aspects and observational techniques, including work at recent total solar eclipses. We discuss results from current spacecraft, including the Solar and Heliospheric Observatory (SOHO), the Solar Dynamics Observatory, the Sun Watcher (SWAP), and Hinode (Sunrise), and the new GOES/UVSI (Solar Ultraviolet Imager) run by an alumnus as well as additional Total Solar Irradiance measurements from ACRIMSAT and SORCE. We will discuss the role of solar observations in confirming Einstein's General Theory of Relativity with the bending of light at the 1919, 1922, and 2017 total solar eclipses as well as gravitational redshift measurements in solar spectral lines, extending our discussion to the recent "chirp" of gravitational radiation reported from several colliding black holes and neutron stars observed with the Laser Interferometer Gravitational-wave Observatory (LIGO). We hope to observe the transit of Mercury across the face of the Sun on November 11, 2019, during the semester; we also discuss our data analysis of recent transits of Mercury we observed from the ground and from space (most recently in May 2016). We will highlight the 2004 and 2012 transits of Venus across the face of the Sun as observed from Earth, the first such transits of Venus since 1882, as well as our work in observing transits of Venus from Jupiter with the Hubble.

Requirements/Evaluation: biweekly tutorial presentations; biweekly response to colleagues' presentations

Prerequisites: ASTR 111 or a 200-level Physics course; or permission of the instructor

Enrollment Limit: 10

Expected Class Size: 10

ASTR 16 (W) An Infinity of Worlds: Planets and the Search for Life

Less than a generation ago, we wondered, as we had for millions of years before, whether there were any other planets at all. Now, we are privileged to be in the first generation of humans to know that many of the points of light dusting our night sky are host to orbiting worlds, some of which may be like our Earth. In this course, we will explore the techniques that are being used to discover these new worlds. We will make our own contributions to this great age of discovery, by using remotely-operated telescopes in Australia to gather data on new planets. This course, meant for non-majors, will deal with the science of planet hunting, the astounding diversity of planets known to exist, the emerging science of astrobiology, and the enduring question of "are we alone?" through works of science fiction and cutting-edge research. Majors may take this course with additional reading and assignments. Adjunct Bio: Rob Wittenmyer '98 is Professor of Astrophysics at the University of Southern Queensland in Australia. He is a veteran planet hunter with more than 20 published planet discoveries, and is the Chief Investigator of the Minerva-Australis observatory which is NASA's key Southern ground support for the Transiting Exoplanet Survey Satellite.

Requirements/Evaluation: 10-page paper

Prerequisites: none; majors may take this course with additional reading and assignments

Enrollment Limit: 20

Enrollment Preferences: preference will be given to first years and sophomores

Grading: pass/fail only

Materials/Lab Fee: approximately \$30 for books

Winter 2020

ASTR 20 (W) France under the Nazis 1940-45: Democracy Abandoned, Antisemitism Unleashed

Cross-listings: ASTR 20 HIST 20

Primary Cross-listing

France was Europe's cultural avatar in the 17th century, father of the Rights of Man in the 18th century, Art Capital of the World in the 19th Century, and essential in the 20th to victory in World War I. How did it find itself subservient to the dictates of a foreign ruling power in 1940 and helpless to prevent the usurpation of its democracy? How did France fail to protect the very rights of man that it had long-struggled to establish and achieve? In this course we will examine what happened politically and socially during the Vichy regime of 1940 to 1945. And when Germany's hegemony was upended in 1945 with the victory of the Allies in World War II, how did the French explain to those allies, and to themselves, how France had achieved its salvation? To explain all this, we will examine break-through historical studies from the 1970s, novels written at the time of the occupation and popular today, films of the era and beyond, as well as examples of analyses of French and foreign thinkers following the war and continuing into this century. Classes will meet twice a week for 2-3 hours. Students will be responsible for daily reading of secondary sources in the reading packets. They will view on Glow films from the Vichy era and beyond and be asked to analyze and share their impressions. Each student will be assigned a novel set in Vichy times; they will prepare a concise report for the group and 5-page paper explaining how the novel confirmed or countered their impressions of the era. Adjunct Instructor Bio: Ms. Bowden graduated magna cum laude from Vassar College, studying European history there, and subsequently at Columbia University. She has taught history at independent schools in New York and in the Queen's College graduate Education division.

Requirements/Evaluation: active class participation re readings and film topics, 5-page paper assessing assigned novel, thoughtful synopsis for fellow students

Prerequisites: none, though knowledge of French enriches the experience

Enrollment Limit: 12

Grading: pass/fail only

Materials/Lab Fee: \$36 plus cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

BIOCHEMISTRY AND MOLECULAR BIOLOGY (Div III)

Chair: Professor Luana Maroja

Advisory Committee

- Lois M. Banta, Chair and Professor of Biology
- Pei-Wen Chen, Assistant Professor of Biology; on leave 2019-2020
- Amy Gehring, Professor of Chemistry
- Katie M. Hart, Assistant Professor of Chemistry; on leave Fall 2019
- Tim J. Lebestky, Associate Professor of Biology, Chair of Neuroscience Program
- David W. Loehlin, Assistant Professor of Biology
- Daniel V. Lynch, Philip and Dorothy Schein Professor of Biology
- Luana S. Maroja, Associate Professor of Biology, Chair of Biochemistry Program
- David P. Richardson, William R. Kenan, Jr. Professor of Chemistry; on leave Fall 2019
- Robert M. Savage, Professor of Biology
- Steven J. Swoap, Professor of Biology
- Claire S. Ting, Professor of Biology
- Damian Turner, Assistant Professor of Biology

Biochemistry and molecular biology are dynamic fields that lie at the forefront of science. Through elucidation of the structure and function of biologically important molecules (such as nucleic acids, lipids, proteins, and carbohydrates) these disciplines have provided important insights and advances in the fields of molecular engineering (recombinant DNA technology, "intelligent" drug design, "in vitro evolution"), genomics and proteomics, signal transduction, immunology, developmental biology, and evolution.

The Biochemistry and Molecular Biology Program is designed to provide students with an opportunity to explore living systems in molecular terms. Biochemistry and molecular biology are at the interface between the chemical and biological methods of looking at nature; therefore, the program draws heavily from these disciplines. While chemistry is concerned with the relationship between molecular structure and reactions, and biology focuses on cells and organisms, biochemistry and molecular biology probe the details of the structures and interactions of molecules in living systems in order to provide the foundation for a better understanding of biological molecules both individually and as members of more complex structures.

PROGRAM

While aspects of biochemistry and molecular biology can be very diverse, a common set of chemical and biological principles underlie the more advanced topics. With this in mind, the program has been structured to provide the necessary background in chemistry and biology and the opportunity to study the many facets of the modern areas of the biochemical sciences. Students interested in the Biochemistry and Molecular Biology Program should plan their course selection carefully. Since it is expected that Biochemistry 321 and 322 would be taken in the junior year, students are advised to take the prerequisites for those courses in both chemistry and biology during their first two years at Williams. While the program is open to all students, it is expected that it will appeal primarily to majors in biology and chemistry because of the number of courses required in those fields. In addition to taking the required courses, students planning to complete the Biochemistry and Molecular Biology Program are strongly encouraged to elect courses in mathematics and physics.

The following interdepartmental courses serve as the core of the Biochemistry and Molecular Biology Program. BIMO 321 and 322 provide a comprehensive introduction to biochemistry. BIMO 401, the capstone course for the concentration, provides students the opportunity to examine the current scientific literature in a wide variety of BIMO-related research areas.

To complete the concentration in Biochemistry and Molecular Biology, a student must complete all of the required courses listed below, take at least one elective in biology and one elective in chemistry from the list below, and attend at least eight Biology and/or Chemistry Department colloquia. Since the Chemistry Department counts two biology courses and the Biology Department counts two chemistry courses toward the majors (each of which can be completed with only eight other courses), a student majoring in either chemistry or biology would have to take only two or three additional courses to complete the program.

Colloquium Requirement

Concentrators must attend at least eight Biology and/or Chemistry Department colloquia. The Biology and Chemistry Departments hold colloquia on Friday afternoons during the fall and spring semesters. Scientists from other academic or research institutions are invited to present their research to students and faculty. There are approximately a dozen colloquia offered each semester among which BIMO concentrators may choose. Attendance at the honors student research presentations and the Biology/BIMO Alumni Reunion poster session also count toward the colloquium requirement. Concentrators may receive credit for colloquia attended during any of their semesters at Williams College.

BIMO 321 (F)(S) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: CHEM 321 BIMO 321 BIOL 321

Primary Cross-listing

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of

biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 16/lab

Grading: no pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

BIMO 401 (S) Topics in Biochemistry and Molecular Biology (WS)

This seminar course involves critical reading, analysis, and discussion of papers from the current biochemistry and molecular biology literature. Specific topics vary from year to year but are chosen to illustrate the importance of a wide range of both biological and chemical approaches to addressing important questions in the biochemical and molecular biological fields. To facilitate discussion, students will prepare written critiques analyzing the data and conclusions of the chosen literature.

Class Format: three hours per week

Requirements/Evaluation: class presentations and discussions, frequent short papers, and a final paper

Prerequisites: BIOL 202 and BIMO 321

Enrollment Limit: 12

Enrollment Preferences: those completing the BIMO program; open to others with permission of instructor

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (WS)

Writing Skills Notes: The critical analysis of published papers in the biochem literature, as expressed in clear and succinct writing, is a key learning goal for the course. The students write seven literature critiques (typically 5-6 pages long) throughout the semester. While the specific topic each week differs, the parameters of the assignment are the same each time, allowing students to progressively improve their writing. I provide extensive written feedback on each critique, returned before the next due date.

Winter Study -----

BIMO 99 (W) Independent Study: Biochemistry and Molecular Biology

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

BIOINFORMATICS, GENOMICS, AND PROTEOMICS (Div III)

Advisory Committee

- Daniel P. Aalberts, Professor of Physics
- Duane A. Bailey, Professor of Computer Science; on leave 2019-2020
- Lois M. Banta, Chair and Professor of Biology
- Julie C. Blackwood, Associate Professor of Mathematics
- Pei-Wen Chen, Assistant Professor of Biology; on leave 2019-2020
- Richard D. De Veaux, Chair & C. Carlisle and Margaret Tippit Professor of Statistics
- Joan Edwards, Samuel Fessenden Clarke Professor of Biology
- Amy Gehring, Professor of Chemistry
- Katie M. Hart, Assistant Professor of Chemistry; on leave Fall 2019
- Bernhard Klingenberg, Professor of Statistics; on leave 2019-2020
- David W. Loehlin, Assistant Professor of Biology
- Daniel V. Lynch, Philip and Dorothy Schein Professor of Biology
- Luana S. Maroja, Associate Professor of Biology, Chair of Biochemistry Program
- Martha Marvin, Lecturer in Neuroscience
- Manuel A. Morales, Professor of Biology
- Anna M. Plantinga, Assistant Professor of Statistics
- Robert M. Savage, Professor of Biology
- Claire S. Ting, Professor of Biology

Bioinformatics, genomics, and proteomics are rapidly advancing fields that integrate the tools and knowledge from biology, chemistry, computer science, mathematics, physics, and statistics in research at the intersection of the biological and informational sciences. Inspired by the enormous amount of biological data that are being generated from the sequencing of genomes, these new fields will help us pose and answer biological questions that have long been considered too complex to address. Research in genomics, proteomics, and bioinformatics will also significantly impact society affecting medicine, culture, economics, and politics.

The Bioinformatics, Genomics, and Proteomics curriculum involves faculty from the Biology, Chemistry, Computer Science, Mathematics/Statistics, and Physics departments and was designed to provide students with an understanding of these revolutionary new areas of investigation. The introductory level courses, Computation and Biology and Statistics for Biologists are accessible to all students interested in gaining familiarity with the power of genomic analysis. Students interested in graduate work in bioinformatics, genomics, and proteomics should take the core courses and five of the recommended courses. Interested students are also encouraged to participate in independent research with members of the advisory faculty as they explore the development of these new fields.

BIGP Core Courses

BIOL 319 (F) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)

Cross-listings: BIOL 319 CSCI 319 MATH 319 PHYS 319 CHEM 319

Primary Cross-listing

What can computational biology teach us about cancer? In this capstone experience for the Genomics, Proteomics, and Bioinformatics program,

computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, phylogenetics, and recombinant DNA techniques to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the MAPK signal transduction pathway in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIGP Recommended Courses

BIOL 202 (F) Genetics (QFR)

Genetics, classically defined as the study of heredity, has evolved into a discipline whose limits are continually expanded by innovative molecular technologies. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. The laboratory part of the course provides an experimental introduction to modern genetic analysis. Laboratory experiments include linkage analysis, bacterial transformation with plasmids and DNA restriction mapping.

Class Format: six hours per week

Requirements/Evaluation: bi-weekly problem sets, weekly laboratory exercises and laboratory reports, and examinations

Prerequisites: BIOL 101 and 102

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 84

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

BIOL 305 (S) Evolution (QFR)

This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and the emergence of diversity). Topics include micro-evolutionary models, natural selection and adaptation, sexual selection, speciation, the inference of evolutionary history among others.

Requirements/Evaluation: independent research project, problem sets, participation in discussions and exams

Prerequisites: BIOL 202

Enrollment Limit: 24

Enrollment Preferences: Seniors and biology majors

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

BIOL 430 (S) Genome Sciences: At the Cutting Edge (WS)

Research in genomics has integrated and revolutionized the field of biology, including areas of medicine, plant biology, microbiology, and evolutionary biology. Moreover, recent developments in "metagenomics" (genomic studies of entire communities of microorganisms in natural environments, such as the mammalian gut and the deep sea) and "metatranscriptomics" (studies of genome wide changes in expression and mRNA levels in natural communities of organisms) have generated unprecedented knowledge about the genomic potential of a community and the in situ biological activity of different ecological niches. In this course we will explore how research in these and related areas, including proteomics, have advanced our fundamental understanding of (1) organisms in the three domains of life, and their interactions and evolutionary relationships; (2) biological systems and environments, such as the human body, extreme environments, and the oceans; (3) strategies for solving global challenges in medicine, agriculture, energy resources, and environmental sciences. During the course, students will meet each week for one hour with a tutorial partner and the instructor. Every other week, students will present a written and oral critical analysis of the assigned research articles. On alternate weeks, students will question/critique the work of their colleague.

Requirements/Evaluation: five (4-5 page) papers, tutorial presentations, and the student's effectiveness as a critic

Prerequisites: BIOL 202

Enrollment Limit: 10

Enrollment Preferences: open to juniors and seniors; senior Biology majors who have not taken a 400-level course

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: BIMO, BIGP; does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (WS)

Writing Skills Notes: Weekly written assignments consisting of four-page critique papers (five total during a semester) and two-page response papers (five total during a semester). Students will receive from the instructor timely comments on their writing skills, with suggestions for improvement.

CSCI 134 (F)(S) Introduction to Computer Science (QFR)

This course introduces students to the science of computation by exploring the representation and manipulation of data and algorithms. We organize and transform information in order to solve problems using algorithms written in a modern object-oriented language. Topics include organization of data using objects and classes, and the description of processes using conditional control, iteration, methods and classes. We also begin the study of abstraction, self-reference, reuse, and performance analysis. While the choice of programming language and application area will vary in different offerings, the skills students develop will transfer equally well to more advanced study in many areas. In particular, this course is designed to provide the programming skills needed for further study in computer science and is expected to satisfy introductory programming requirements in other departments.

Requirements/Evaluation: weekly assignments, programming projects, and examinations

Prerequisites: none, except for the standard prerequisites for a (QFR) course; previous programming experience is not required

Enrollment Limit: 90(18/lab)

Enrollment Preferences: if the course is over-enrolled, enrollment will be determined by lottery

Expected Class Size: 90

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students with prior experience with object-oriented programming should discuss appropriate course placement with members of the department

CSCI 136 (F)(S) Data Structures and Advanced Programming (QFR)

This course builds on the programming skills acquired in Computer Science 134. It couples work on program design, analysis, and verification with an introduction to the study of data structures. Data structures capture common ways in which to store and manipulate data, and they are important in the construction of sophisticated computer programs. Students are introduced to some of the most important and frequently used data structures: lists, stacks, queues, trees, hash tables, graphs, and files. Students will be expected to write several programs, ranging from very short programs to more elaborate systems. Emphasis will be placed on the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.

Requirements/Evaluation: programming assignments, homework and/or examinations

Prerequisites: CSCI 134 or equivalent; fulfilling the Discrete Mathematics Proficiency requirement is recommended, but not required

Enrollment Limit: 60(15/lab)

Enrollment Preferences: if the course is over-enrolled, enrollment will be determined by lottery

Expected Class Size: 60

CSCI 256 (F)(S) Algorithm Design and Analysis (QFR)

This course investigates methods for designing efficient and reliable algorithms. By carefully analyzing the structure of a problem within a mathematical framework, it is often possible to dramatically decrease the computational resources needed to find a solution. In addition, analysis provides a method for verifying the correctness of an algorithm and accurately estimating its running time and space requirements. We will study several algorithm design strategies that build on data structures and programming techniques introduced in Computer Science 136. These include induction, divide-and-conquer, dynamic programming, and greedy algorithms. Additional topics of study include algorithms on graphs and strategies for handling potentially intractable problems.

Requirements/Evaluation: problem sets and programming assignments, and midterm and final examinations

Prerequisites: CSCI 136 and fulfillment of the Discrete Mathematics Proficiency requirement

Enrollment Limit: 24

Enrollment Preferences: current or expected Computer Science majors

STAT 101 (F)(S) Elementary Statistics and Data Analysis (QFR)

It is impossible to be an informed citizen in the world today without an understanding of data and information. Whether opinion polls, unemployment rates, salary differences between men and women, the efficacy of vaccines or consumer webdata, we need to be able to separate the signal from the noise. We will learn the statistical methods used to analyze and interpret data from a wide variety of sources. The goal of the course is to help reach conclusions and make informed decisions based on data.

Requirements/Evaluation: quizzes and exams

Prerequisites: MATH 102 (or demonstrated proficiency on a diagnostic test)

Enrollment Limit: 50

Expected Class Size: 40

Grading: no pass/fail option, no fifth course option

Unit Notes: students with calculus background and social science interest should consider STAT 161; students with MATH 150 should enroll in STAT 201; students with a 5 on AP Stats should enroll in STAT 202; students with a 4 on AP Stat should consult the department

STAT 201 (F)(S) Statistics and Data Analysis (QFR)

Statistics can be viewed as the art and science of turning data into information. Real world decision-making, whether in business or science is often based on data and the perceived information it contains. Sherlock Holmes, when prematurely asked the merits of a case by Dr. Watson, snapped back, "Data, data, data! I can't make bricks without clay." In this course, we will study the basic methods by which statisticians attempt to extract information from data. These will include many of the standard tools of statistical inference such as hypothesis testing, confidence intervals, and linear regression as well as exploratory and graphical data analysis techniques. This is an accelerated introductory statistics course that involves computational programming and incorporates modern statistical techniques.

Requirements/Evaluation: quizzes and exams

Prerequisites: MATH 150 or equivalent; not open to students who have completed STAT 101 or STAT 161 or equivalent

Enrollment Limit: 40

Expected Class Size: 40

Grading: yes pass/fail option, yes fifth course option

Unit Notes: students with a 5 on AP Stats should enroll in STAT 202; students with a 4 on AP Stats should consult the department; students with MATH 130/140 background should consider STAT 161; students with no calc. should consider STAT 101

BIMO 321 (F)(S) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: CHEM 321 BIMO 321 BIOL 321

Primary Cross-listing

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three hours per week and laboratory, four hours per week

CHEM 321 (F)(S) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: CHEM 321 BIMO 321 BIOL 321

Secondary Cross-listing

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 16/lab

Grading: no pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

CHEM 322 (S) Biochemistry II: Metabolism (QFR)

Cross-listings: BIOL 322 CHEM 322 BIMO 322

Secondary Cross-listing

This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: lecture three hours per week and laboratory three hours per week

Requirements/Evaluation: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of the

Prerequisites: BIOL 101 and CHEM 251/255 or permission of instructor

Enrollment Limit: 64

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

PHYS 302 (S) Stat Mechanics & Thermodynamics (QFR)

Macroscopic objects are made up of huge numbers of fundamental particles interacting in simple ways--obeying the Schrödinger equation, Newton's and Coulomb's Laws--and these objects can be described by macroscopic properties like temperature, pressure, magnetization, heat capacity, conductivity, etc. In this course we will develop the tools of statistical physics, which will allow us to predict the cooperative phenomena that emerge in large ensembles of interacting particles. We will apply those tools to a wide variety of physical questions, including the behavior of gases, polymers, heat engines, biological and astrophysical systems, magnets, and electrons in solids.

Class Format: lecture/discussion three hours per week and laboratory three hours per week

Requirements/Evaluation: weekly problem sets, exams, and labs, all of which have a substantial quantitative component

Prerequisites: required: PHYS 201, PHYS/MATH 210 or MATH 209; recommended: PHYS 202, PHYS 301

Enrollment Limit: 10 per lab

Expected Class Size: 10 per lab

Grading: yes pass/fail option, yes fifth course option

STAT 410 (F) Statistical Genetics (QFR)

Genetic studies explore patterns of genetic variation in populations and the effect of genes on diseases or traits. This course provides an introduction to statistical and computational methods for genetic studies. Topics will include Mendelian traits (such as single nucleotide polymorphisms), genome-wide association studies, pathway-based analysis, and methods for population genetics. Students will be introduced to some of the major computational tools for genetic analysis, including PLINK and R/Bioconductor. The necessary background in genetics and biology will be provided alongside the statistical and computational methods.

Requirements/Evaluation: project work, homework, exams, and contribution to discussion

Prerequisites: STAT 346 and STAT 360, or permission of instructor

Enrollment Limit: 14

Enrollment Preferences: Statistics majors, juniors and seniors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: This is a statistics class with a focus on mathematical, computational, and data analysis skills as well as appropriate practical application of analysis methods.

- Vincent van der Vinne, Visiting Assistant Professor of Biology
- Heather Williams, William Dwight Whitney Professor of Biology

The Biology curriculum has been designed to provide students with a broad base for understanding principles governing life processes at all levels, from biochemistry and cell biology to physiology to ecology and behavior. Courses emphasize fundamentals common to all sub-disciplines including the coupling of structure to function, the transfer of energy in living systems, communication, and the molding of diversity by the evolutionary process. In upper-level courses and in independent and honors research, students have the opportunity to investigate areas at the frontiers of modern biology.

Although the Biology major is specifically designed to provide a balanced curriculum in the broader context of the liberal arts, it is also excellent preparation for graduate studies in the life sciences and in the health professions.

MAJOR REQUIREMENTS

In order to make the major accessible to students with diverse interests, required courses are kept to a minimum. The Biology major is satisfied by nine courses, as follows:

Biology 101 The Cell

Biology 102 The Organism

Biology 202 Genetics

Any two 300-level courses, each of which must have a laboratory associated with it

Any one 400-level course other than 493-494

Any other three courses or any other two courses and two semesters of Organic Chemistry

Note: Independent study courses and AMS 311 (Same as Biology 231) do not fulfill the 300-level or 400-level course requirements. WIOX 316 Biology: Evolution, in the Williams Oxford Program qualifies for major credit at the 200-level.

Distribution Requirement

In order to ensure that majors broaden their knowledge of biology, one of the elective courses for the major must include an upper-level course covering biological processes at levels of organization above the cell. Courses that satisfy this distribution requirement are indicated in the individual course description.

COURSE SELECTION AND PLACEMENT

It is preferable for students who plan to major in biology, or think they may be interested in doing so, to take Biology 101, 102 during their first year at Williams. It is also possible to begin the Biology major during the sophomore year, although students should understand that it may require taking two or more biology courses during several semesters.

Students interested in biology, whether or not they intend to major in it, are encouraged to take Biology 101, 102. It is also possible, with permission of the instructor, to take Biology 203 Ecology, Biology 204 Animal Behavior and Biology 220 Field Botany without prerequisite. Other 100-level biology courses are designed specifically for students who do not intend to take additional upper-level courses in biology. All of these courses satisfy the Division III distribution requirement.

Beginning students should normally enroll in Biology 101 and 102. Students with unusually strong backgrounds in biology, such as those with outstanding performance on the College Board Biology Advanced Placement Test, may be permitted to elect a sophomore-level course in lieu of Biology 101 and/or Biology 102 upon successful completion of a departmental qualifying exam, administered during First Days.

COURSES RELATED TO THE BIOLOGY MAJOR

Students planning to pursue their interest in biology and related fields after completing their undergraduate degrees are strongly encouraged to take one year of chemistry, at least one semester of mathematics (a course in statistics is recommended), and one semester of physics. Students may wish to check the requirements for graduate admission at relevant universities, and are also encouraged to consult with the Biology Department's graduate school advisor about prerequisites for admission to graduate programs.

BIOCHEMISTRY AND MOLECULAR BIOLOGY

Students interested in Biochemistry and Molecular Biology (BIMO) should consult the general statement under Biochemistry and Molecular Biology.

BIOINFORMATICS, GENOMICS AND PROTEOMICS

Students interested in Bioinformatics, Genomics and Proteomics (BiGP) should consult the general statement under Bioinformatics, Genomics and Proteomics. Biology majors interested in this field are strongly encouraged to enroll in Integrative Bioinformatics, Genomics, and Proteomics (Biology 319).

NEUROSCIENCE

Students interested in Neuroscience (NSCI) should consult the general statement under Neuroscience.

PUBLIC HEALTH

Students interested in Public Health (PH) should consult the general statement under Public Health.

ENVIRONMENTAL STUDIES

Students interested in Environmental Studies (ENVI) should consult with Biology faculty members associated with the program and the general statement under Environmental Studies.

THE DEGREE WITH HONORS IN BIOLOGY

In order to be recommended for the degree with honors, a Biology major is normally expected to have completed the equivalent of two semesters and a winter study (031) of independent research culminating in a thesis which demonstrates outstanding achievement of an original and innovative nature. Although the presentation of a thesis and associated oral presentation in the fall and poster defense in the spring are required for consideration for a degree with honors, their completion should not be interpreted as a guarantee of a degree with honors. The principal considerations in admitting a student to the program of independent honors research will be mastery of fundamental material and skills, ability to pursue independent study successfully, and demonstrated interest and motivation. Students interested in participating in the honors program should consult with the department early in the spring semester of the junior year; approval must be received before spring registration in the junior year. The number of Biology Department faculty available to mentor research students and the number of students each can accommodate in her/his lab vary from year to year.

Although the department will make every effort to provide an opportunity for students to conduct Honors research, you should be aware that it may not be possible to assign all applicants to a laboratory.

The minimum course requirements for a degree with honors in Biology are Biology 101, Biology 102, Biology 202, two 300-level biology courses (each of which must have a laboratory associated with it), one 400-level biology course, Biology 493, Biology 494, WSP 031, and any other two courses in biology (or any other one course and two semesters of Organic Chemistry). Note: A student who has a double major cannot count any course twice. For example, if a student is a Biology and Chemistry major, Organic Chemistry can only be counted in one of the two majors.

In addition to the normal honors route, which includes two semesters (Biology 493-494) and a winter study of research (WSP 031) during senior year, students have the option, subject to the approval of their thesis advisor, to begin the honors research during winter study junior year or during the second semester junior year. In general, thesis students who start during WSP or spring semester of their junior year are working on a project that requires winter or spring field work. Students beginning honors in winter study of junior year would take Biology 494 in the spring of their junior year followed by Biology 493 in the fall of their senior year; students beginning honors during the second semester of junior year would take Biology 494 that semester, followed by Biology 493 in the fall of senior year and winter study research in the winter of the senior year.

STUDY ABROAD

Students planning on majoring in Biology are strongly advised to take Biology 202 before going abroad, since Biology 202 is required for the major and is a prerequisite for many upper-level courses; a Genetics course taken while studying away cannot substitute for Biology 202. Biology majors studying abroad may receive credit toward the major for at most two 200-level electives; the departmental distribution requirement can be satisfied through an appropriate course taken during study abroad. Students should meet with the Department's study abroad advisor to discuss study abroad options.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in many cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. We usually want to see a syllabus.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, ideally complete syllabus including readings/assignments.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes. Only two of the nine major course credits can be taken somewhere other than Williams.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. Courses taken for major credit anywhere other than Williams will only count as 200-level credit, regardless of the level or format of the course.

Are there specific major requirements that cannot be fulfilled while on study away?

Yes. BIOL 202 Genetics, 300-level lab courses, and 400-level senior seminar.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. Genetics is only offered in the fall. Those late to the major need to be aware of this as Genetics is a prerequisite for most upper division courses.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

Courses that are focused on clinical areas of study, and courses in environmental studies that focus on policy or sociology rather than biology, would not be granted credit in biology.

CREDIT FOR COURSES AT OTHER INSTITUTIONS

Students who enroll in study away programs may receive credit for up to two 200-level electives towards the biology major. Courses must be pre-approved by the Biology Department Study Away Advisor.

Students wishing to satisfy prerequisites for courses offered by the Biology Department with courses taken at other institutions should consult, in person, with a member of the Biology Department, prior to registering for the course that requires a prerequisite. Such consultations will include a review of the course syllabi and the transcripts of the relevant previous college work, and students should bring these materials with them.

RESEARCH AND THESIS COURSES

Individual research projects must be approved by the department. Application should be made to the department prior to spring registration.

Note: Senior thesis and independent study courses do not count as 300-level or 400-level course requirements for the major. Only one research course (i.e., BIOL 297, BIOL 298, BIOL 493, or BIOL 494) may be counted towards the major requirements.

BIOL 100 (W) Biology Through the Media Intensive

Biology Through The Media explores the foundational concepts examined in the Department's introductory series (Biology 101 and Biology 102) by using the 'greatest hits' of stories that have made their way into the news outlets, television and film media. The first section of the course investigates cell structure and function in terms of energy needs and how information is conveyed in a cell. The last half the course will focus upon the developmental and evolutionary processes that have given rise to the diversity of life. This is a qualitative-focused, non-majors course and, as such, the students are not expected to have any background in biology. As this class counts as both a semester course and winter study course, the students are expected to attend class and to spend a significant time on the course. The students should dedicate approximately 50 hours per week to this class. The number of topics we will cover is numerous and wide-ranging and will be done so at a faster rate than what is observed during a regular semester. Each afternoon, the TAs and myself will be available to support student learning of the material.

Class Format: about 70 contact hours, plus 6 hours for quizzes and exams

Requirements/Evaluation: Problem sets will be assigned daily; the students are expected to spend a significant amount of time on the homework problems each afternoon and to hand in their assigned work. Grades: evaluation will be based on problem sets, quizzes and exams. Honor code guidelines: quizzes, exams and the write-up of the problems sets must be completed by the student alone, however, students may work together on the problems sets.

Prerequisites: permission of a dean

Enrollment Limit: 18

Enrollment Preferences: students who need to make up a deficiency

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both BIOL 100 and BIOL 41.

Distributions: (D3)

Winter 2020

LEC Section: 01 M-F 10:00 am - 11:50 am M-F 1:00 pm - 3:50 pm Robert M. Savage

BIOL 101 (F) The Cell

This course investigates cell structure and function as a consequence of evolutionary processes, and it stresses the dynamic properties of living systems. Topics include an introduction to biological molecules and enzyme action, membrane structure and function, energy exchange and design of metabolic systems, expression of genetic information, cell signaling, cell trafficking, the cell cycle, and cancer. Student-designed laboratory experiments and discussions based on primary biology literature will highlight how biological knowledge is created and understood.

Class Format: lecture, 3 hours per week and laboratory/discussion, 3 hours per week

Requirements/Evaluation: hour tests, a final exam, lab reports, discussion assignments, and discussion participation

Prerequisites: none

Enrollment Limit: 96/Lecture

Enrollment Preferences: first-year students

BIOL 133 (F) Biology of Exercise and Nutrition

This class, intended for the non-scientist, focuses on the impact of exercise and nutrition on the human body. We will discuss topics such as how different types of training influence exercise performance; the changes that occur in the cardiovascular system during an exercise routine; the inherent limits of the body to perform aerobic and anaerobic tasks; and the long-term health consequences of a lifetime of activity or inactivity. We will also examine how nutrition and metabolism affect body composition. For example, we will rigorously and scientifically scrutinize the use of "fad" diets as a means to lose weight.

Class Format: three hours per week

Requirements/Evaluation: exams and bi-weekly laboratory exercises and laboratory report

Prerequisites: none

Enrollment Limit: 90

Enrollment Preferences: seniors, juniors, sophomores, then first-year students

Expected Class Size: 90

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3)

Attributes: PHLH Biomedical Determinants of Health

Not offered current academic year

BIOL 134 (F) The Tropics: Biology and Social Issues (DPE)

Cross-listings: BIOL 134 ENVI 134

Primary Cross-listing

Intended for the non-scientist, this course explores the biological dimensions of social issues in tropical societies, and focuses specifically on the peoples of tropical regions in Africa, Asia, Latin America, Oceania, and the Caribbean. Tropical issues have become prominent on a global scale, and many social issues in the tropics are inextricably bound to human ecology, evolution, and physiology. The course highlights differences between the tropics and areas at higher latitudes. It begins with a survey of the tropical environment of humans, including major climatic and habitat features. The next section focuses on human population biology, and emphasizes demography and the role of disease particularly malaria and AIDS. The final part of the course covers the place of human societies in local and global ecosystems including the challenges of tropical food production, the importance of organic diversity, and the interaction of humans with their supporting ecological environment. This course fulfills the DPE requirement. Through lectures, debates and readings, students confront social issues and policies from the perspective of biologists. This builds a framework for lifelong exploration of human diversity in terms of difference, power and equity.

Class Format: debate

Requirements/Evaluation: two hour exams, a short paper, panel preparation, and a final exam

Prerequisites: none

Enrollment Limit: 60

Enrollment Preferences: seniors, juniors, sophomores, and first-year students, in that order

Expected Class Size: 60

Grading: no pass/fail option, no fifth course option

Unit Notes: does not count for major credit in Biology; does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (DPE)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 134 (D3) ENVI 134 (D3)

Difference, Power, and Equity Notes: This course highlights differences between the tropics and areas at higher latitudes. For each section we focus on difference--different natural habitats and biodiversity, different patterns of population growth, different human disease profiles, different types of agriculture and impacts of climate change. For each section we focus on differences in power and the inequities of resource distribution. We then debate potential policies to ameliorate these inequities.

BIOL 202 (F) Genetics (QFR)

Genetics, classically defined as the study of heredity, has evolved into a discipline whose limits are continually expanded by innovative molecular technologies. This course covers the experimental basis for our current understanding of the inheritance, structures, and functions of genes. It introduces approaches used by contemporary geneticists and molecular biologists to explore questions in areas of biology ranging from evolution to medicine. The laboratory part of the course provides an experimental introduction to modern genetic analysis. Laboratory experiments include linkage analysis, bacterial transformation with plasmids and DNA restriction mapping.

Class Format: six hours per week

BIOL 204 (S) Animal Behavior

Making sense of what we see while watching animals closely is both an enthralling pastime and a discipline that draws on many aspects of biology. Explanations can be found on many levels: evolutionary theory tells us why certain patterns have come to exist, molecular biology can help us understand how those patterns are implemented, neuroscience gives insights as to how the world appears to the behaving animal, endocrinology provides information on how suites of behaviors are regulated. The first part of the course focuses upon how descriptive studies provide the basis for formulating questions about behavior as well as the statistical methods used to evaluate the answers to these questions. We then consider the behavior of individuals, both as it is mediated by biological mechanisms and as it appears from an evolutionary perspective. The second half of the course is primarily concerned with the behaviors of groups of animals from a wide variety of vertebrate and invertebrate species, concentrating upon the stimuli, responses, and internal mechanisms that maintain social systems and on the selection pressures that drive animals toward a particular social system.

Class Format: six hours per week

Requirements/Evaluation: examinations, lab reports, and a research paper

Prerequisites: BIOL 102, or PSYC 101, or permission of instructor

Enrollment Limit: 32

Enrollment Preferences: Biology majors and Neuroscience concentrators

Expected Class Size: 32

Grading: yes pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

BIOL 205 (S) Physiology

This lecture-based course examines principles, patterns, and mechanisms of biological function from the level of cells and tissues to the whole organism. The themes of the course include structure and function, mechanisms of regulation, control and integration, and adaptation to the

environment. Examples of these themes are taken from a wide variety of organisms with a focus on vertebrates. Laboratories provide practical experience in measurement and experimental elucidation of physiological phenomena and functional analysis of gross structure.

Requirements/Evaluation: hour exams, laboratory reports, and a final exam

Prerequisites: BIOL 101 and 102; open to first-year students with permission of the Biology department

Enrollment Limit: 72

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 72

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3)

BIOL 210 (S) Mathematical Biology (QFR)

Cross-listings: MATH 310 BIOL 210

Secondary Cross-listing

This course will provide an introduction to the many ways in which mathematics can be used to understand, analyze, and predict biological dynamics. We will learn how to construct mathematical models that capture essential properties of biological processes while maintaining analytic tractability. Analytic techniques, such as stability and bifurcation analysis, will be introduced in the context of both continuous and discrete time models. Additionally, students will couple these analytic tools with numerical simulation to gain a more global picture of the biological dynamics. Possible biological applications include, but are not limited to, single and multi-species population dynamics, neural and biological oscillators, tumor cell growth, and infectious disease dynamics.

Requirements/Evaluation: problem sets, weekly meetings, final project and paper

Prerequisites: MATH 250, MATH 209 or 309, permission of instructor

Enrollment Limit: 10

Enrollment Preferences: if over-enrolled, will have students submit reasons for taking class; preference to those with interest in both subjects

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

MATH 310 (D3) BIOL 210 (D3)

Quantative/Formal Reasoning Notes: The course will introduce methods for developing and analyzing mathematical models.

Attributes: PHLH Methods in Public Health

Not offered current academic year

BIOL 211 (S) Paleobiology

Cross-listings: BIOL 211 GEOS 212

Secondary Cross-listing

The fossil record is a direct window into the history of life on Earth and contains a wealth of information on evolution, biodiversity, and climate change. This course investigates the record of ancient life forms, from single-celled algae to snails to dinosaurs. In addition to the intellectual discovery of

fossils as organic relics and the ways in which fossils have been used to support conflicting views on nature, geologic time, and evolution, we will cover a range of topics central to modern paleobiology. These include: how the fossil record informs our understanding of evolutionary processes including speciation; the causes and consequences of mass extinctions; how fossils help us tell time and reconstruct the Earth's climactic and tectonic history; statistical analysis of the fossil record to reconstruct biodiversity through time; analysis of fossil morphology to recreate the biomechanics of extinct organisms; and using fossil communities to reconstruct past ecosystems. Laboratory exercises will take advantage of Williams' fossil collections as well as published datasets to provide a broad understanding of fossils and the methods we use to study the history of life on Earth, including using the programming language R (no previous experience is required). We will also view a diversity of fossils in their geologic and paleo-environmental context on our field trip to Eastern New York. This course is in the Sediments and Life group for the Geosciences major.

Class Format: field trip to the the Paleozoic of New York State

Requirements/Evaluation: lab assignments, short quizzes and writing assignments, and a final exam

Prerequisites: any 100-level GEOS course or BIOL 102, 203 or 205

Enrollment Limit: 15

Enrollment Preferences: sophomore and junior GEOS majors

Expected Class Size: 12

BIOL 213 (F) Sensory Biology

Cross-listings: BIOL 213 NSCI 213

Primary Cross-listing

What properties of the physical world do organisms sense, and which ones do they ignore? How do they convert physical or chemical energy to a signal within a cell? We will look for answers to these questions by investigating the molecular and cellular mechanisms of sensory transduction--and how these mechanisms define the types of information that the nervous system extracts and encodes. We will also ask how natural selection shapes the type of sensory information that animals extract from the world. Some of the examples we will consider are: bat echolocation (hair cells in the ear), detecting visual motion (amacrine cells in the retina), the constant reshaping of the mammalian olfactory system (chemical mapping of odors), what makes a touch stimulus noxious (in worms and mice), enhanced color vision (in birds, bees, and shrimp), and differences in the way males and females sense odors (pheromones and the vomeronasal organ). Laboratory exercises will cover a range of techniques, including electrophysiological recording, the role of mutations in single genes, and behavioral assays.

Class Format: six hours per week

Requirements/Evaluation: take-home exams, problem sets, lab reports, and class participation

Prerequisites: BIOL 101

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Neuroscience concentrators

BIOL 219 (S) Dangerous Exposures: Environment, Immunity, and Infectious Disease

Global reports of emerging infectious diseases and old diseases with new pathogenic properties incite fears for personal safety as well as national security. The specter of a contagious pandemic has captured the public imagination through the mass news media, movies, and even popular online and board games. In this tutorial course, we will explore the ecology and evolution of several recently emergent diseases such as Ebola hemorrhagic fever, dengue, and AIDS. Topics to be considered include transmission dynamics, epidemiological modeling of vaccination strategies, and wildlife reservoirs that contribute to human virus exposure. We will examine progress in preventing the parasitic disease malaria and why such diseases have proven so refractory. We will also discuss the science behind the recent development of the vaccine against the human papillomavirus, which causes cervical cancer, and the intriguing and highly unusual transmissible cancers in dogs and Tasmanian devils. Finally, we will think about the contributions of inadequate diagnostic capacities world-wide and broader issues of resource shortages in driving the global emergence of drug resistance in tuberculosis and other diseases. One common theme in each of these case studies will be the interplay between the host immune response and the evolution of the pathogen. Although the primary focus of the course is on biology rather than policy, each week's readings will have implications for public health and/or conservation biology.

Requirements/Evaluation: six 4- to 5-page papers; tutorial presentations, and the student's progress towards intellectual independence and creativity as a presenter and a respondent

Prerequisites: BIOL 101 and 102

Enrollment Limit: 10

Enrollment Preferences: sophomores who have taken BIOL 202, students interested in public health

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

BIOL 220 (S) Field Botany and Plant Natural History

Cross-listings: ENVI 220 BIOL 220

Primary Cross-listing

This field-lecture course covers the evolutionary and ecological relationships among plant groups represented in our local and regional flora. Lectures focus on the evolution of the land plants, the most recent and revolutionary developments in plant systematics and phylogeny, characteristics of plant families, the cultural and economic uses of plants and how plants have shaped our world. The labs cover field identification, natural history and the ecology of local species.

Class Format: both field and indoor laboratories

Requirements/Evaluation: based on two hour exams, field quizzes, a final project, and a final exam

Prerequisites: none

Enrollment Limit: 30

Enrollment Preferences: Biology majors, and Environmental Studies majors & concentrators

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Materials/Lab Fee: there is a charge for the lab manual; the sketchbook and hand lens can be self-provided or purchased from the department

BIOL 222 (S) Essentials of Biochemistry (QFR)

This course will explore the biochemistry of cellular processes and contextualize these processes in healthy and diseased states. Lecture topics in this one semester course will include the structure and function of proteins (enzymes and non-enzymatic proteins), lipids, and carbohydrates. Lectures will also survey the major metabolic pathways (carbohydrates, lipids, and amino acids) with particular attention to enzyme regulation and the integration of metabolism in different tissues and under different metabolic conditions. In the discussion/laboratory component of the course a combination of primary literature, hypothesis-driven exercises, problem solving, and bench work will be used to illustrate how particular techniques and experimental approaches are used in biochemical fields.

Requirements/Evaluation: regular quizzes, final exam, writing assignments (including problem sets), and lab assignments

Prerequisites: BIOL 101 and CHEM 156; not open to students who have taken BIOL 321 or BIOL 322

Enrollment Limit: 24

Enrollment Preferences: seniors who need to fulfill the biochemistry requirement for premedical school

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major; cannot be counted towards the biology major in addition to either BIOL 321 or BIOL 322; cannot be counted towards the BIMO concentration

Distributions: (D3) (QFR)

Quantative/Formal Reasoning Notes: The laboratory program is quantitative covering data analyses, numerical transformations, graphical displays.

BIOL 225 (F) Sustainable Food & Agriculture

Cross-listings: BIOL 225 ENVI 225

Primary Cross-listing

A tutorial course investigating patterns, processes, and stability in human-dominated, food production systems. The course will examine sustainable food and agriculture from an ecological perspective. Topics will include: changes in diversity, concentration, and scale, flows of energy, circulation (or not) of fertilizer nutrients, carbon balances in soils, and stability of food production, processing, and distribution ecosystems. A day-long field experience will take place on a local farm.

Requirements/Evaluation: writing assignments, tutorial presentation, performance in the role of paper critic, and course participation

Prerequisites: BIOL 102 or ENVI 102

Enrollment Limit: 10

Enrollment Preferences: open to sophomores, juniors, and seniors, with preference given to sophomores over juniors and seniors

Expected Class Size: 8

Grading: no pass/fail option, no fifth course option

BIOL 234 (S) Biology of our Sexes: The Genetic and Epigenetic Regulation of Sex Determination

Many physical and behavioral characteristics that are associated with male and female anatomy, physiology, and behavior are initially the products of molecular choices arising from the action of our chromosomes in early development. The embryonic assignment of sex can also lead to intersex or hermaphroditic outcomes in many different organisms with extraordinary and illuminating biological effects. We will explore the molecular mechanisms and evolutionary basis of sex determination in both plants and animals, as well as the physical and behavioral expression of sex by the organism discussed, and experiments that create and characterize traits and behavior of mosaic/intersex organisms. Additionally, the epigenetic regulation of the X chromosome in mammals has a canonical role in our understanding of sex determination, but whole genome studies and investigations of autosomes and the Y chromosome have raised new layers of complexity for understanding the molecular basis of human sex and sexuality.

Requirements/Evaluation: six 5-page papers; six 1-page response papers; tutorial presentations; discussion skills/investment

Prerequisites: BIOL 202 (Genetics), or permission of instructor

Enrollment Limit: 10

Enrollment Preferences: sophomores and juniors, with preference to Biology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

BIOL 302 (F) Communities and Ecosystems (QFR)

Cross-listings: ENVI 312 BIOL 302

Primary Cross-listing

An advanced ecology course that examines how species interact with each other and their environment and how communities are assembled. This course emphasizes phenomena that emerge in complex ecological systems, building on the fundamental concepts of population biology, community ecology, and ecosystem science. This foundation will be used to understand specific topics relevant to conservation including invasibility and the functional significance of diversity for ecosystem stability and processes. Lectures and labs will explore how to characterize the emergent properties of communities and ecosystems, and how theoretical, comparative, and experimental approaches are used to understand their structure and function. The lab component of this course will emphasize hypothesis-oriented field experiments as well as "big-data" analyses using existing data sets. The laboratory component of the course will culminate with a self-designed independent or group project.

Class Format: six hours per week

Requirements/Evaluation: lab reports, a midterm exam, a term project presentation, and a final project paper

Prerequisites: BIOL/ENVI 203 or 220

Enrollment Limit: 28

Enrollment Preferences: Biology majors and Environmental Studies majors and concentrators

Expected Class Size: 24

Grading: yes pass/fail option, yes fifth course option

BIOL 305 (S) Evolution (QFR)

This course offers a critical analysis of contemporary concepts in biological evolution. We focus on the relation of evolutionary mechanisms (e.g., selection, drift, and migration) to long term evolutionary patterns (e.g., evolutionary innovations, origin of major groups, and the emergence of diversity). Topics include micro-evolutionary models, natural selection and adaptation, sexual selection, speciation, the inference of evolutionary history among others.

Requirements/Evaluation: independent research project, problem sets, participation in discussions and exams

Prerequisites: BIOL 202

Enrollment Limit: 24

Enrollment Preferences: Seniors and biology majors

BIOL 308 (F) Integrative Plant Biology: Fundamentals and New Frontiers

Plants are one of the most successful groups of organisms on Earth and have a profound impact on all life. Successful use of plants in addressing global problems and understanding their role in natural ecosystems depends on fundamental knowledge of the molecular mechanisms by which they grow, develop, and respond to their environment. This course will examine the molecular physiology of plants using an integrative approach that considers plants as dynamic, functional units in their environment. Major emphasis will be on understanding fundamental plant processes, such as photosynthesis, growth and development, water transport, hormone physiology, and flowering, from the molecular to the organismal level. Environmental effects on these processes will be addressed in topics including photomorphogenesis, stress physiology, mineral nutrition, and plant-microbe interactions. Discussions of original research papers will examine the mechanisms plants use to perform these processes and explore advances in the genetic engineering of plants for agricultural, environmental, and medical purposes. Laboratory activities stress modern approaches and techniques used in investigating plant physiological processes.

Class Format: six hours per week

Requirements/Evaluation: lab reports, a term paper, and exams

BIOL 310 (F) Neural Development and Plasticity

Cross-listings: BIOL 310 NSCI 310

Primary Cross-listing

Development can be seen as a tradeoff between genetically-determined processes and environmental stimuli. The tension between these two inputs is particularly apparent in the developing nervous system, where many events must be predetermined, and where plasticity, or altered outcomes in response to environmental conditions, is also essential. Plasticity is reduced as development and differentiation proceed, and the potential for regeneration after injury or disease in adults is limited; however some exceptions to this rule exist, and recent data suggest that the nervous system is not hard-wired as previously thought. In this course we will discuss the mechanisms governing nervous system development, from relatively simple nervous systems such as that of the fruitfly, to the more complicated nervous systems of humans, examining the roles played by genetically specified programs and non-genetic influences.

Class Format: lecture

Requirements/Evaluation: exams

Prerequisites: BIOL 212 (same as PSYC 212 or NSCI 201) and BIOL 202 (or permission of instructor)

Enrollment Limit: 24

BIOL 311 (F) Neural Systems and Circuits

Cross-listings: BIOL 311 NSCI 311

Primary Cross-listing

This course will examine the functional organization of the vertebrate brain, emphasizing both neuroanatomy and neurophysiology. How do specific populations of neurons and their connections analyze sensory information, form perceptions of the external and internal environment, make cognitive decisions, and execute movements? How does the brain produce feelings of reward/motivation and aversion/pain? How does the brain regulate homeostatic functions such as sleep, food intake, and thirst? We will explore these questions using a holistic, integrative approach, considering molecular/cellular mechanisms, physiological characterizations of neurons, and connectivity among brain systems. Laboratory sessions will provide experience in examining macroscopic and microscopic neural structures, as well as performing experiments to elucidate the structure and function of neural systems using classical and cutting-edge techniques.

Class Format: six hours per week

Requirements/Evaluation: class participation, hour exams, and a final exam

BIOL 315 (S) Microbiology: Diversity, Cellular Physiology, and Interactions

Bioterrorism and the alarming spread of antibiotic resistant bacteria are but two of the reasons for the resurgence of interest in the biology of microorganisms. This course will examine microbes from the perspectives of cell structure and function, genomics, and evolution. A central theme will be the adaptation of bacteria as they evolve to fill specific ecological niches, with an emphasis on microbe: host interactions that lead to pathogenesis. We will consider communication among bacteria as well as between bacteria and their environment. Topics include: microbial development, population dynamics, metagenomics, bioremediation, plant and animal defenses against infection, and bacterial strategies to subvert the immune system. In the lab, major projects will focus on the mammalian gut microbiome and the isolation and characterization of bacteria from natural environments. The lab experience will culminate in multi-week independent investigations. Readings will be comprised primarily of articles from the primary literature.

Class Format: lectures three hours a week and laboratory three hours a week

Requirements/Evaluation: three exams/writing assignments, responses to thought questions on readings, a lab report/notebook, and an oral presentation

Prerequisites: BIOL 202

Enrollment Limit: 24

Enrollment Preferences: senior and then junior Biology majors

BIOL 319 (F) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)

Cross-listings: BIOL 319 CSCI 319 MATH 319 PHYS 319 CHEM 319

Primary Cross-listing

What can computational biology teach us about cancer? In this capstone experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, phylogenetics, and recombinant DNA techniques to reconstruct the evolution of gene families by focusing on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the MAPK signal transduction pathway in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells.

Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

BIOL 321 (F)(S) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: CHEM 321 BIMO 321 BIOL 321

Secondary Cross-listing

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

Expected Class Size: 16/lab

Grading: no pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Cross-listings: BIOL 322 CHEM 322 BIMO 322

Secondary Cross-listing

This lecture course provides an in-depth presentation of the complex metabolic reactions which are central to life. Emphasis is placed on the biological flow of energy including alternative modes of energy generation (aerobic, anaerobic, photosynthetic); the regulation and integration of the metabolic pathways including compartmentalization and the transport of metabolites; and biochemical reaction mechanisms including the structures and mechanisms of coenzymes. This comprehensive study also includes the biosynthesis and catabolism of small molecules (carbohydrates, lipids, amino acids, and nucleotides). Laboratory experiments introduce the principles and procedures used to study enzymatic reactions, bioenergetics, and metabolic pathways.

Class Format: lecture three hours per week and laboratory three hours per week

Requirements/Evaluation: several exams and performance in the laboratories including lab reports that emphasize conceptual and quantitative and/or graphic analysis of the

BIOL 326 (F) Cellular Assembly and Movement

This course will focus on how multi-protein complexes are assembled to control key cellular processes in eukaryotic systems: 1) protein sorting and trafficking, 2) establishment and maintenance of cell architecture, and 3) mitosis, cell migration and tissue morphogenesis that require coordination of the membrane transport and cytoskeleton. The course will highlight involvement of these processes in pathological conditions. Laboratories will use mammalian tissue culture as a model system to study cellular functions. Important techniques in cell biology will be introduced in the first half of the semester; in the second half of the term, students will conduct a multi-week independent project. Textbook readings will be supplemented with primary literature.

Class Format: lectures, three hours a week and laboratory, three hours a week; the laboratory projects will require additional time outside of class hours

Requirements/Evaluation: three exams, in-class discussion of papers, lab reports, an oral presentation and research paper based on an independent lab research project

Prerequisites: BIOL 202

Enrollment Limit: 24

Enrollment Preferences: senior and junior Biology majors

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Not offered current academic year

BIOL 329 (F) Conservation Biology (QFR)

Cross-listings: BIOL 329 ENVI 339

Primary Cross-listing

Conservation biology is an interdisciplinary field that develops scientific and technical means for the protection, maintenance, and restoration of diversity at all levels of biological organization. This course provides an overview of the discipline including the causes and consequences of biodiversity loss as well as approaches and strategies used to combat biodiversity threats such as climate change, habitat fragmentation, and invasive species. Particular emphasis is placed on the ecological dimension of conservation and the application of biological principles (derived from physiological and behavioral ecology, population genetics, population ecology, community ecology, and systematics) to the conservation of biodiversity. The course combines lectures, readings, in-class discussion, and a laboratory that includes both field and lab projects.

Class Format: lecture and discussion three hours per week and lab three hours per week

Requirements/Evaluation: lab assignments, two exams, and discussion participation

Prerequisites: BIOL 203, or BIOL 202, or permission of instructor

Enrollment Limit: 24

Enrollment Preferences: Biology majors, seniors, and juniors

Expected Class Size: 24

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distribution requirement for the Biology major

Distributions: (D3) (QFR)

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 329 (D3) ENVI 339 (D3)

Quantative/Formal Reasoning Notes: This course uses quantitative and statistical analyses in both the laboratory and lecture portion of the course. In lectures mathematical models will be covered to understand conservation dynamics. In lab, students will collect and analyze data and present results in graphical and statistical forms.

Attributes: ENVI Natural World Electives

Not offered current academic year

BIOL 330 (S) Genomes: Structure, Function, Evolution

Biologists have only recently learned to read the complete genome sequence of organisms. Figuring out how to interpret these "texts" is now the focus of much of contemporary research in molecular biology and genetics. This course will concentrate on the origin, function, and evolution of central features of eukaryotic genomes, including gene structure, genome size, repeated sequences, and the complexity of gene regulation. Students will develop the ability to evaluate the contribution of neutral and adaptive processes in shaping genome complexity through: (1) critical evaluation of the primary research literature, (2) investigation of genome structural variation using wet-lab approaches and publically available genomic data, and (3) an original research project.

Class Format: lectures three hours a week and laboratory three hours a week; the laboratory projects will require occasional time outside of class hours

Requirements/Evaluation: three exams, written responses and in-class discussion of papers, two laboratory reports, and oral presentation of an independent laboratory project

Prerequisites: BIOL 202

Enrollment Limit: 24

Enrollment Preferences: Biology majors

Expected Class Size: 24

BIOL 402 (S) Rapid Evolution in Ecology

Darwin believed that evolution was a slow process. Until recently, the impact of evolutionary changes on short-term ecological studies was considered to be minimal. However, empirical documentation of rapid, directly observed evolution has changed this view and has led to an increased focus on the joint dynamics of evolution and ecology including community genetics, niche construction, and evolutionary rescue. In this course, we first focus on the literature presenting the evidence for rapid evolutionary change in natural and experimental populations. Then, we explore the consequences of rapid evolutionary change for our understanding of population, community, and ecosystem ecology including the impacts that evolutionary changes have for conservation efforts and predicting the response of organisms to global environmental and climate change.

Requirements/Evaluation: participation in discussions, several short papers and presentations

Prerequisites: BIOL 202

BIOL 409 (F) Cultural Evolution in Biological Systems

The evolution of genetically transmitted traits has been the subject of extensive study since the "modern synthesis" combined Darwin's and Mendel's ideas--later enriched by molecular approaches to developmental biology. More recently, the study of evolution has been extended to traits that are transmitted via social learning. The cultural evolution that occurs in such behavioral traits has many parallels with evolution based on genes: errors and innovation correspond to genetic mutations, immigration may bring in new forms of the behavior, and population bottlenecks can result in loss of behavioral traits. However, there is also a crucial difference between genetic and social transmission of traits: social learners can potentially acquire traits from many members of their population, including unrelated individuals. This difference has many implications, including the acceleration of the evolutionary time scale. We will explore the ways socially learned behaviors evolve, using systems such as tool use (primates, crows), vocal learning (songbirds, orcas), and social organization (baboons). Among the topics we will consider are the role of neutral models and random processes, how neural constraints guide social learning, how social status influences the choice of tutors, and how competition and sexual selection drive changes in learned behavior. We will also consider how these processes interact and how they generate differences as well as parallels between cultural and genetic evolution.

Requirements/Evaluation: five 4- to 5-page papers; five 1-2 page response papers; tutorial presentations; contribution to the intellectual enterprise

Prerequisites: BIOL 305 or BIOL 204

Enrollment Limit: 10

Enrollment Preferences: senior Biology majors

Expected Class Size: 10

Grading: no pass/fail option, no fifth course option

Unit Notes: satisfies the distributional requirement for the Biology major

Distributions: (D3)

Attributes: Linguistics

BIOL 410 (S) Nanomachines in Living Systems

Through reading and discussing the primary literature, this course will explore how nanometer-sized biological molecules like proteins perform functions that require integration of information and transmission of force at much larger scales, microns and above. These nanoscale proteins will be considered as nanomachines that can transform a chemical energy into a mechanical one. We will focus on the cytoskeleton, which gives cells their shape, organizes the internal parts of cells and provides mechanical support for essential cellular processes like cell division and movement. An emphasis will be placed on how the biochemical properties of actin, actin-binding proteins and motors are used to generate mechanical force necessary for the respective biological function. Topics will include some controversial and emerging hypotheses in the field: sliding versus depolymerizing hypotheses for constriction of the contractile ring in cytokinesis, roles of cytoskeleton in pathogen entry and propagation, organelle dynamics, polarity establishment in cell migration, immunological synapse and neuronal function.

Class Format: discussion, three hours per week

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL 202; open to juniors and seniors

Enrollment Limit: 24

Enrollment Preferences: senior Biology majors who have not taken a 400-level course, then juniors

BIOL 412 (S) Neural and Hormonal Basis of Hunger

Cross-listings: NSCI 342 BIOL 412

Primary Cross-listing

Hunger and satiety are highly regulated behavioral states that maintain energy homeostasis in animals. This course will focus on readings from the primary literature to track numerous recent advances in how the brain and endocrine systems regulate appetite. Topics include how organ systems communicate with the brain to regulate appetite, how different populations of neurons in the brain interact to regulate appetite, how brain systems that regulate appetite affect other behaviors, and how the neural and hormonal basis of hunger compare with brain systems that regulate other homeostatic systems such as thirst. By tracing the advances in appetite regulation within the past decade, we will also trace the advent of cutting-edge molecular, genetic, and optical-based tools that are transforming multiple fields within physiology and neuroscience. Students in this class will have the opportunity to improve skills in written and oral scientific presentation.

Requirements/Evaluation: written assignments, oral presentations, and participation

Prerequisites: BIOL 205 or BIOL/PSYC 212, or permission of instructor

Enrollment Limit: 12

Enrollment Preferences: seniors who have not taken a 400-level course

BIOL 413 (F) Global Change Ecology

Cross-listings: BIOL 413 ENVI 423

Primary Cross-listing

Plants and animals are increasingly faced with rapid environmental change driven by human activities across the globe. How do they cope with challenges imposed by climate change, altered nutrient cycling, biological invasions, and increased urbanization? What are the impacts of organismal responses at the population and community level? This course uses an integrative approach to understand the impacts of global change at multiple levels of biological organization in both aquatic and terrestrial environments. We examine how global-scale environmental changes affect the distribution and abundance of species and alter community organization. We also consider the physiological and behavioural mechanisms underlying species responses and the role of acclimation versus adaptation in coping with rapid environmental change. Finally, we learn the analytical tools used to predict future responses to global change. Class discussions will focus on readings drawn from the primary literature.

Class Format: two 75-minute discussion sessions each week

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL 203 or BIOL 305, or permission of instructor

BIOL 414 (S) Life at Extremes: Molecular Mechanisms

All organisms face variability in their environments, and the molecular and cellular responses to stresses induced by environmental change often illuminate otherwise hidden facets of normal physiology. Moreover, many organisms have evolved unique molecular mechanisms, such as novel cellular compounds or macromolecular structural modifications, which contribute to their ability to survive continuous exposure to extreme conditions, such as high temperatures or low pH. This course will examine how chaperonins, proteases, and heat- and cold-shock proteins are regulated in response to changes in the external environment. We will then consider how these and other molecular mechanisms function to stabilize DNA and proteins- and, ultimately, cells and organisms. Other extreme environments, such as hydrothermal vents on the ocean floor, snow fields, hypersaline lakes, the intertidal zone, and acid springs provide further examples of cellular and molecular responses to extreme conditions. Biotechnological applications of these molecular mechanisms in areas such as protein engineering will also be considered. Class discussions will focus upon readings from the primary literature.

BIOL 417 (F) Translational Immunology: From Bench to Bedside

Recent advances in the field of immunology have led to the development of new approaches to prevent and treat diseases that affect millions of people worldwide. Drugs that modulate the body's natural immune response have become powerful tools in treating the world's major diseases--infection, autoimmunity and cancer. This course will use readings from the primary literature to explore central themes involved in translating basic research to new clinical and therapeutic approaches. Topics will include vaccine development, transplantation immunology, autoimmunity and cancer immunotherapy.

BIOL 418 (F)(S) Signal Transduction to Cancer

Division of normal cells is a highly regulated process based on input from both intrinsic and extrinsic signals. The cell's response to its environment affects all aspects of cell behavior: proliferation, death, differentiation and migration. The goal of the course is to understand the molecular mechanisms of signal transduction that guide normal cell behavior and how disruptions in this process can lead to cancer. We will focus on the Hedgehog-Gli signaling pathway that is activated in 30% of all known cancers. Genetic studies will serve as an introduction to the components of the pathway, followed by an examination of the molecular mechanisms of signal reception, transduction of intracellular information, scaffolding and transcriptional targets. The final section of the course will investigate how high throughput screens, medicinal chemistry studies and mouse models are used to identify small molecular inhibitors of pathway components. We will consider the effectiveness of these inhibitors in pharmacological studies, clinical trials and potential cancer treatments.

Requirements/Evaluation: four papers

BIOL 419 (S) Secrets of Enzymes: Fidelity, Promiscuity, and Disease

Living organisms have spent the past 4 billion years evolving proteins and enzymes that perform basic cellular functions to support life. Over time, duplications and mutations of these enzymes have led to novel reactions, pathways, and chemistries. To gain an appreciation for these molecular catalysts, we will start by considering how enzymes are synthesized, how errors are introduced and corrected, and how proteins are degraded. We will then analyze the effects of beneficial errors on the evolution of new function and the effects of undesirable errors in human disease. The final section of this course will focus on how enzymes such as CRISPR/Cas9 act as 'molecular scissors' to cut DNA and how these enzymes can be used to correct errors. We will explore the implications of this field in active areas of biomedical research, including antibiotic resistance and personalized medicine. Discussions and writing assignments will focus on reading and critiquing the scientific literature.

Class Format: discussion three hours per week

BIOL 421 (F) Thermoregulation: From Molecules to Organisms

Thermal physiology involves the study of molecular events, organ systems, and organism-environmental interactions that are involved with heat production and temperature maintenance. The area of thermal physiology has been around for over 100 years. However, only in the last 5-7 years has the science progressed to understanding basic fundamental mechanisms for generating and regulating heat production. This tutorial will focus on four questions: 1) how do organisms generate heat? 2) how do organisms sense the temperature in the environment? 3) how do organisms integrate information about the environment (temperature, humidity, time of day, etc.) with internal information (deep body temperature, energy stores, etc.) to regulate their metabolic production of heat? 4) how do animals make "the decision" to enter a state of torpor?

Requirements/Evaluation: five 4- to 5-page papers; five 1- to 2-page response papers; tutorial presentations; contribution to the intellectual enterprise

BIOL 422 (F) Ecology of Sustainable Agriculture

A seminar/field course investigating patterns, processes, and concepts of stability in human-dominated, food production ecosystems. As a capstone course, the course will draw upon the experiences that students have had in biology and environmental studies courses. Topics will include: the relationships among diversity, ecosystem function, sustainability, resilience, and stability of food production, distribution systems, nutrient pools and processing in human dominated ecosystems. Two extensive field trips will be taken to agricultural operations in the region. Each student will present a seminar on a topic requiring extensive reading of primary resources and is responsible for leading the discussion that ensues. Reading question paper assignments will be due prior to the seminar. Criticism paper assignments will be made at approximately bi-weekly intervals and due two days after the seminar to which they relate.

Class Format: two 75 minute sessions per week

Requirements/Evaluation: writing assignments, seminar presentation, and course participation

Prerequisites: BIOL/ENVI 203 or BIOL 302 or permission of instructor

BIOL 430 (S) Genome Sciences: At the Cutting Edge (WS)

Research in genomics has integrated and revolutionized the field of biology, including areas of medicine, plant biology, microbiology, and evolutionary biology. Moreover, recent developments in "metagenomics" (genomic studies of entire communities of microorganisms in natural environments, such as the mammalian gut and the deep sea) and "metatranscriptomics" (studies of genome wide changes in expression and mRNA levels in natural communities of organisms) have generated unprecedented knowledge about the genomic potential of a community and the in situ biological activity of different ecological niches. In this course we will explore how research in these and related areas, including proteomics, have advanced our fundamental understanding of (1) organisms in the three domains of life, and their interactions and evolutionary relationships; (2) biological systems and environments, such as the human body, extreme environments, and the oceans; (3) strategies for solving global challenges in medicine, agriculture, energy resources, and environmental sciences. During the course, students will meet each week for one hour with a tutorial partner and the instructor. Every other week, students will present a written and oral critical analysis of the assigned research articles. On alternate weeks, students will question/critique the work of their colleague.

Requirements/Evaluation: five (4-5 page) papers, tutorial presentations, and the student's effectiveness as a critic

Prerequisites: BIOL 202

Enrollment Limit: 10

Enrollment Preferences: open to juniors and seniors; senior Biology majors who have not taken a 400-level course

BIOL 432 (F) Evolutionary Genetics

The synthesis of evolutionary processes with the mechanistic understanding of genetics has lent insight into many mysteries of life. The goal of this course is to explore the interface between evolution and genetics to make sense of fundamental biological processes. For example, why do we expect that male and female offspring occur in 50:50 ratios? How and why do unusual sex-ratios occur? Other topics include: conflict among genes, evolution of allelic dominance, adaptation at the molecular level, and genetics of speciation. Class discussion and written assignments will emphasize critical evaluation and synthesis of the scientific literature.

Requirements/Evaluation: class participation and several short papers

Prerequisites: BIOL 202; open to juniors and seniors

Enrollment Limit: 12

Enrollment Preferences: seniors who have not taken a 400 level course, then juniors and Biology majors

Winter Study -----

BIOL 11 (W) Teaching 3rd Grade about Zebrafish--BioEYES

BioEYES brings tropical fish to 3rd-grade classrooms in Williamstown, North Adams, and Lanesborough Elementary schools, in a science teaching workshop. Elementary school students will breed fish at the school, then study their development and pigmentation during one week. Williams students will adapt BioEYES lesson plans to the science curriculum for the schools we visit, work with classroom teachers to introduce concepts in genetics and development, help the 3rd-grade students in the classroom, and assess elementary student learning. No zebrafish experience is necessary; during the first week, students will learn to set up fish matings and learn about embryonic development and the genetics of fish pigmentation as well as practice teaching the 3rd-grade BioEYES lesson plans with hands-on experiments using living animals. In the subsequent three weeks, students will present lessons at the schools and review assessment data. Adjunct Instructor Bio: Jennifer Swoap, Associate Director at The Center for Learning in Action, is a former third-grade teacher. She currently coordinates Williams Elementary Outreach, where Williams students teach and mentor K-6 students at area elementary schools. Adjunct Instructor Bio: Renee Schiek currently serves as the liaison between Lanesborough Elementary School and the Williams Elementary Outreach, where Williams students teach hands-on science lessons at area elementary schools. She is a frequent substitute at Lanesborough ES and holds a degree in mechanical engineering.

Requirements/Evaluation: final project or presentation; review of pre- and post-survey assessments

Prerequisites: none

Enrollment Limit: 14

Enrollment Preferences: preference to seniors

Grading: pass/fail only

Attributes: EXPE Experiential Education Courses

Winter 2020

LEC Section: 01 M-F 10:00 am - 2:50 pm Jennifer C. Swoap, Renee Schiek

BIOL 13 (W) Introduction to Animal Tracking

This course is an introduction to the ancient art and science of animal tracking, and its use for ecological inventory. Participants will deepen their skills as naturalists, their awareness of the natural world, and discover that even the greens at Williams College are abundant with wildlife. Students will have field time in class at Hopkins Forest as well as through independent study at a convenient outdoor location of each student's choosing. Basic concepts of animal tracking, its history and use by indigenous people throughout the world will be discussed through video and slide show. Students are required to create journals and site maps of Hopkins and their personal study areas, including all major features of the landscape, flora and fauna activity. Students will be expected to visit their study spots everyday for a minimum of 1 hour of tracking journaling and data collection. The course will meet twice a week for 4-5 hour sessions, primarily in the field. One field trip to a nearby state forest is scheduled for the fourth or fifth class meeting day. This day may extend to 4:00. Students are expected to have appropriate outdoor gear for winter. Adjunct Bio: Dan Yacobellis is a local naturalist and wildlife tracker who has explored forest and field for more than 20 years. He teaches courses on wilderness skills and tracking at nature education centers in Massachusetts and New York as well as his own independent programs.

Requirements/Evaluation: attendance, participation, a final presentation of their study sites, maps and journals, a field test and a 3-page research paper

Prerequisites: none

Enrollment Limit: 16

Enrollment Preferences: preference given to seniors

Grading: pass/fail only

Materials/Lab Fee: approximately \$75 for books

Attributes: EXPE Experiential Education Courses

Winter 2020

LEC Section: 01 TR 10:00 am - 2:50 pm Dan Yacobellis

BIOL 14 (W) Ethical Issues in Surgical Care

The ethical issues faced by surgeons have never been more challenging than they are today. As patients have become more sophisticated consumers of medical care, there has been a shift from paternalism to a more participatory model in medical decision-making. We will explore the ethical aspects of the surgeon-patient relationship, as well as the impact of surgical innovations and rapid advances in medical and pharmaceutical discoveries. By examining clinical cases, we will explore the role of legal health care documents on surgical decision-making (Do Not Resuscitate orders, Advanced Treatment Directives, Living Will). We will discuss issues with informed consent, disclosure of errors, conflicts of interest, relationships with industry, experimental procedures, and rationalizing the cost of newer treatments. We will discuss the ethical issues and innovative advances in training surgeons. I will include invited speakers in person or by webchat. This course is designed for both interactive discussions and the development of critical writing skills. We will meet twice a week for 3 hours per day (Mon. and Tues. 10-11:30, 1-2:30). Students will be expected to write a 1-page paper after the first meeting about what they hope to learn from the course and to list topics that they would like to discuss. We will discuss Dr. Atul Gawande's book *Being Mortal*. Students will research and write three 4-page papers (one per week), excerpts of which will be discussed in class the following week. Adjunct Bio: Robert Eyre, M.D. is an Associate Professor of Surgery (Urology) at Harvard Medical School. He has had an active academic and clinical practice in Boston for 39 years, teaching medical students and surgical residents. He has served on the editorial boards of numerous peer-reviewed scientific journals in addition to authoring many articles and book chapters in the fields of urology and surgery.

Requirements/Evaluation: class participation and three 4-page papers

Prerequisites: open to all students with preference for junior and senior pre-meds

Enrollment Limit: 12

Enrollment Preferences: open to all students with preference for junior and senior pre-meds

Grading: pass/fail only

Materials/Lab Fee: approximately \$12 for books

Winter 2020

LEC Section: 01 MT 10:00 am - 2:50 pm Robert C. Eyre

BIOL 21 (W) Science Beyond Williams

Science Beyond Williams allows upperclassman to pursue scientific research off-campus at a non-profit organization, government agency, medical school, or research university. In consultation with faculty, the student will find a mentor in whose lab s/he will work in WSP and a Williams faculty member who will offer guidance before and during WSP.

Class Format: WSP Project

Requirements/Evaluation: 10-page paper and post-WSP public presentation to a relevant department or program on the goals and accomplishments of the project

Prerequisites: two semesters of relevant course work in science and/or mathematics

Enrollment Limit: 10

Grading: pass/fail only

Winter 2020

INT Section: 01 TBA Lois M. Banta

BIOL 22 (W) Introduction to Biological Research

An experimental research project will be carried out under the supervision of the Biology Department. It is expected that the student will spend 20 hours per week in the lab at a minimum, and a 10-page written report is required. This experience is intended for, but not limited to, first-year students and sophomores, and requires the permission of the instructor.

Class Format: Independent study

Prerequisites: none

Enrollment Limit: POI

Grading: pass/fail only

Winter 2020

LEC Section: 01 TBA Lois M. Banta

BIOL 25 (W) Tropical Marine Conservation

Cross-listings: BIOL 25 ENVI 25

Primary Cross-listing

Tropical marine ecosystems such as coral reefs and mangrove forests are biodiversity 'hotspots'; they are home to an astounding variety of marine organisms, provide critical support for the livelihoods and food sources of millions of people, but are also highly vulnerable to human impacts such as climate change and overfishing. This winter study travel course will offer a unique combination of classroom, laboratory, and hands-on experiences in the scientific study, management, and restoration of tropical marine ecosystems using the Bahamian island of Eleuthera as a case study. Eleuthera is rich in marine diversity but still in the process of implementing management policies and practices for its many fisheries. As such, it presents a unique opportunity for students to experience conservation-in-action. Students will gain an understanding of the structure, function, and major threats facing tropical marine ecosystems. They will develop practical skills in conducting field surveys of tropical marine species and in implementing management and restoration strategies on the Island. They will also engage with the local community to understand the social and economic impacts of marine conservation policy and to explore alternative sustainable development strategies for subsistence fisheries that rely on these marine ecosystems. Students are expected to participate in 2 days travel and 13 days of research on the Island. The daily schedule will include field research and independent study. Students are expected to devote time each day to researching and writing a final paper that integrates their field studies, interviews, and policy research. Students will also use this time to prepare and deliver an oral slide presentation on their research the last two days of the trip. After return to Williamstown, students will be given 5 days to finish writing their final papers.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: BIOL 203 or ENVI 101 or MAST 311 or BIOL 413/ENVI 423 or permission of instructor

Enrollment Limit: 8

Enrollment Preferences: preference will be given to juniors and seniors

Grading: pass/fail only

Materials/Lab Fee: cost of books

This course is cross-listed and the prefixes carry the following divisional credit:

BIOL 25 ENVI 25

Attributes: TRVL Winter Study Travel Course

Winter 2020

TVL Section: 01 TBA Sonya K. Auer, Sarah Gardner

BIOL 31 (W) Senior Thesis: Biology

To be taken by students registered for Biology 493, 494.

Class Format: independent study

Grading: pass/fail only

Winter 2020

HON Section: 01 TBA Lois M. Banta

BIOL 41 (W) Biology Through the Media Intensive

Biology Through The Media explores the foundational concepts examined in the Department's introductory series (Biology 101 and Biology 102) by using the 'greatest hits' of stories that have made their way into the news outlets, television and film media. The first section of the course investigates cell structure and function in terms of energy needs and how information is conveyed in a cell. The last half the course will focus upon the developmental and evolutionary processes that have given rise to the diversity of life. This is a qualitative-focused, non-majors course and, as such, the students are not expected to have any background in biology. As this class counts as both a semester course and winter study course, the students are expected to attend class and to spend a significant time on the course. The students should dedicate approximately 50 hours per week to this class. The number of topics we will cover is numerous and wide-ranging and will be done so at a faster rate than what is observed during a regular semester. Each afternoon, the TAs and myself will be available to support student learning of the material.

Class Format: about 70 contact hours, plus 6 hours for quizzes and exams

Requirements/Evaluation: Problem sets will be assigned daily; the students are expected to spend a significant amount of time on the homework problems each afternoon and to hand in their assigned work. Grades: evaluation will be based on problem sets, quizzes and exams. Honor code guidelines: quizzes, exams and the write-up of the problems sets must be completed by the student alone, however, students may work together on the problems sets.

Prerequisites: permission of a dean

Enrollment Limit: 18

Enrollment Preferences: students who need to make up a deficiency

Grading: pass/fail only

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both BIOL 100 and BIOL 41.

Winter 2020

LEC Section: 01 M-F 10:00 am - 11:50 am M-F 1:00 pm - 3:50 pm Robert M. Savage

BIOL 99 (W) Independent Study: Biology

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Winter 2020

IND Section: 01 TBA Lois M. Banta

CHEMISTRY (Div III)

Chair: Professor Sarah Goh

- Anthony J. Carrasquillo, Assistant Professor of Chemistry
- Amy Gehring, Professor of Chemistry
- Christopher Goh, Associate Professor of Chemistry, Faculty Fellow of the Davis Center and the Office of Institutional Diversity and Equity; affiliated with: The Davis Center, VP-InstDivrstyEquity&Inclusion
- Sarah L. Goh, Chair and Professor of Chemistry
- Kerry-Ann Green, Assistant Professor of Chemistry
- Katie M. Hart, Assistant Professor of Chemistry; on leave Fall 2019
- Jenna MacIntire, Lecturer in Chemistry
- Amnon G Ortoll-Bloch, Postdoctoral Fellow in Chemistry
- Lee Y. Park, William R. Kenan, Jr. Professor of Chemistry
- Enrique Peacock-López, Halford R Clark Professor of Natural Sciences
- Bob Rawle, Assistant Professor of Chemistry
- David P. Richardson, William R. Kenan, Jr. Professor of Chemistry; on leave Fall 2019
- Jennifer K. Rosenthal, Instructor in Chemistry
- Thomas E. Smith, Professor of Chemistry
- Laura R. Strauch, Lecturer in Chemistry
- John W. Thoman, J. Hodge Markgraf Professor of Chemistry
- Ben W. Thuronyi, Assistant Professor of Chemistry
- Amanda K. Turek, Assistant Professor of Chemistry

MAJOR

Through a variety of individual courses and sequential programs, the department provides an opportunity for students to explore the nature and significance of chemistry, an area of important achievement in our quest for knowledge about ourselves and the world around us. The student of chemistry is able to become aware of the special viewpoint of chemists, the general nature of chemical investigation, some of its important results, how these results are expressed, and something of their significance within the fields of science and in the area of human endeavor as a whole. The Chemistry major provides excellent preparation for graduate study in chemistry, biochemistry, chemical engineering, environmental science, materials science, medicine, and the medical sciences.

A major in chemistry can be achieved in several ways, preferably beginning in the student's first year at Williams, but also beginning in the sophomore year. Building on a foundation in general chemistry, organic chemistry, and physical chemistry, a student elects additional advanced courses to complete a major that is consistent with their background in other sciences, interests, and goals. A student's program might emphasize biochemistry, organic chemistry, physical chemistry, or inorganic chemistry, with additional courses available in analytical chemistry, environmental science, and materials science. Students considering a major in chemistry should consult with a member of the department as early as possible in order to plan a program which best suits their interests and abilities and which makes full use of their previous preparation.

All students begin their study in the department with either Chemistry 151, 153, or 155. Placement at the introductory level is based upon performance on the departmental placement test results and consultation with the chair; results of the College Board Advanced Placement Test or the International Baccalaureate Exam are also taken into account. The first year is completed with Chemistry 156. In the second year at the introductory level, students take Chemistry 251 (or 255) and Chemistry 256 (those students who complete 155 are exempted from 256). Completion of a Chemistry major requires either nine semester chemistry courses or eight semester chemistry courses plus two approved courses from among the following: Biology 101; Computer Science 134; Mathematics 130, 140, 150, 151; Physics 131, 141; or any courses in these departments for which the approved courses are prerequisites. CHEM 155 counts for two courses toward the major, but a single course toward graduation credit. Starting at the 300 level, at least three of the courses taken must have a laboratory component, and at least one must be selected from Chemistry 361, 366, 364, or 367. (The

specific course elected, in consultation with the chair or major advisor, will depend on the student's future plans.) In addition, the department has a number of "Independent Research Courses" which, while they do not count toward completion of the major, provide a unique opportunity to pursue an independent research project under the direction of a faculty member.

Foundational Courses

First Year

Fall: 151,153 or 155 Gateway courses

Spring: 156 Organic Chemistry: Introductory Level

Second Year

Fall: 251 (or 255) Organic Chemistry: Intermediate Level

Spring: 256 Advanced Chemical Concepts (or 300-level if completed 155)

Elective Courses

319 Integrative Bioinformatics, Genomics, and Proteomics Lab

321 Biochemistry I-Structure and Function of Biological Molecules

322 Biochemistry II-Metabolism

324 Enzyme Kinetics and Reaction Mechanisms

326 Chemical Biology: Discoveries at the Interface

335 Inorganic/Organometallic Chemistry

336 Materials Chemistry

338 Bioinorganic Chemistry: Metals in Living Systems

341 Toxicology and Cancer

342 Synthetic Organic Chemistry

343 Medicinal Chemistry

344 Physical Organic Chemistry

348 Polymer Chemistry

361 Quantum Chemistry and Chemical Dynamics

364 Instrumental Methods of Analysis

366 Thermodynamics and Statistical Mechanics

367 Biophysical Chemistry

368T Computational Chemistry and Molecular Spectroscopy

Independent Research Courses

393-W31-394 Junior Research and Thesis

397, 398 Independent Study, for Juniors

493-W31-494 Senior Research and Thesis

497, 498 Independent Study, for Seniors

For the purpose of assisting students in selecting a program consistent with their interests and possible continuation of their studies at the graduate level, the following groupings of electives and faculty advisors are suggested. However, a case can be made for selecting courses from the different groups.

Biochemistry: Chemistry 321, Chemistry 322, Chemistry 324, Chemistry 326, Chemistry 341, Chemistry 364, Chemistry 367. Students interested in biochemistry should consult with Professors Gehring, Hart, Rawle, or Thuronyi.

Organic Chemistry: Chemistry 341, Chemistry 342, Chemistry 343, Chemistry 344, Chemistry 348, Chemistry 364, Chemistry 361, Chemistry 366. Students interested in organic chemistry should consult with Professors S. Goh, Richardson, Smith, Thuronyi, or Turek.

Physical and Inorganic Chemistry: Chemistry 335, Chemistry 336, Chemistry 338, Chemistry 361, Chemistry 364, Chemistry 366, Chemistry 368T. Students interested in physical chemistry should consult with Professors Peacock-López, or Thoman. Students interested in inorganic chemistry should consult with Professors C. Goh or Park. Students interested in materials science should consult with Professors C. Goh or Park.

While any accepted route through the major would permit a student to proceed to graduate study in chemistry, four electives should be considered a minimum, and at least a semester of research is strongly recommended.

The department's curriculum is approved by the American Chemical Society (A.C.S.), a professional body of academic, industrial, and research chemists. The A.C.S. suggests the following courses for someone considering graduate study or work in chemistry or a related area: 151 (153 or 155), 156, 251 (255), 256, 321, 335, 364, 361 (366 or 367) and at least 4 courses (two of which must have a laboratory component) from our remaining upper level electives: 319, 322, 324, 326, 336, 338, 341, 342, 343, 344, 348, 361, 366, 367, 368T, 493, 494, 497, 498, BIMO 401. In addition, students are strongly encouraged (though not required) to pursue independent research in some form. Students completing these requirements can be designated Certified A.C.S. Majors.

BIOCHEMISTRY AND MOLECULAR BIOLOGY (BIMO)

Students interested in Biochemistry and Molecular Biology should consult with the general statement under the Biochemistry and Molecular Biology Program (BIMO) in the Courses of Instruction. Students interested in completing the BIMO program are also encouraged to complete the biochemistry courses within the chemistry major by taking 321, 322, 324, and 367 in addition to the first and second year required courses.

BIOINFORMATICS, GENOMICS, AND PROTEOMICS (BiGP)

Students interested in Bioinformatics, Genomics, and Proteomics should consult the general statement under Bioinformatics, Genomics, and Proteomics in the Courses of Instruction. Students interested in these areas are also encouraged to complete the biochemistry courses within the chemistry major by taking 319, 321, 322, 324 and 367 in addition to the first and second year required courses.

MATERIALS SCIENCE

Students interested in Materials Science are encouraged to elect courses from the Materials Science program offered jointly with the Physics Department, and should consult that listing.

THE DEGREE WITH HONORS IN CHEMISTRY

The degree with honors in Chemistry provides students with an opportunity to undertake an independent research project under the supervision of a faculty member, and to report on the nature of the work in two short oral presentations and in a written thesis.

Chemistry majors who are candidates for the degree with honors take the following in addition to a major outlined above:

Chemistry 493-W31-494 Senior Research and Thesis

The principal considerations in admitting a student to a program of independent research are mastery of fundamental materials and skills, ability to pursue independent study successfully, and demonstrated student interest and motivation. In addition, to enroll in these courses leading to a degree with honors, a student must have at least a B- average in all chemistry courses or the permission of the chair. At the end of the first semester of the senior year, the department reviews the student's progress and determines whether the student is a candidate for a degree with honors. The designation of a degree with honors in Chemistry or a degree with highest honors in Chemistry is based primarily on a departmental evaluation of the accomplishments in these courses and on the quality of the thesis. Completion of the research project in a satisfactory manner and preparation of a well-written thesis usually results in a degree with honors. In cases where a student has demonstrated unusual commitment and initiative resulting in an outstanding thesis based on original results, combined with a strong record in all of their chemistry courses, the department may elect to award a degree with highest honors in Chemistry.

EXCHANGE AND TRANSFER STUDENTS

Students from other institutions wishing to register for courses in chemistry involving college-level prerequisites should do so in person with a member of the Chemistry Department. Registration should take place by appointment during the spring semester prior to the academic year in which courses are to be taken. Students are requested to have with them transcripts of the relevant previous college work.

COURSES FOR NON-MAJORS WITH NO PREREQUISITES

Students with principal interests outside of the sciences may extend a secondary school foundation in chemistry by electing a basic two-semester introductory course of a general nature or they may elect semester courses designed for non-majors. All courses in chemistry satisfy the divisional distribution requirement.

STUDY ABROAD

Students who wish to complete a chemistry major (or chemistry requirements for pre-medical study) as well as to study abroad during their junior year are encouraged to begin taking chemistry in their first semester at Williams, and should consult with members of the department as early as

possible.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes, in some cases, if appropriate course information is available in advance (e.g. syllabi and/or course descriptions), though students should be sure to contact the department. We can give provisional approval in some cases if enough detail is available, but we always ask to see the details after the course is completed before signing off on the major credit.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus, including readings/assignments, and complete description of laboratory program. The biggest question is whether or not there is a lab component of the course and whether it is sufficient to fulfill the equivalent lab experience of Williams courses.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

No official restrictions, but we advise our students to take the majority of their chemistry courses at Williams.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Yes. We have several special requirements. Only one non-lab class can be used toward the upper-level major requirements. This is usually the restriction that causes difficulty with study abroad—where appropriate lab courses may not be available. One of the lab courses must also meet our departmental “quantitative requirement.” In principle, this could be met by a course taken abroad, but we would likely be more conservative in authorizing this equivalency.

Are there specific major requirements that cannot be fulfilled while on study away?

No. In principle, all major requirements could be filled abroad, but laboratory programs abroad are not always sufficiently rigorous to meet our standards. We look for at least 40 hours of wet-lab time for the lab component. Importantly, this cannot be work in a professor's research lab, but must be “exercises” giving our students practice with standard techniques and methods of analysis.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Yes. The lab requirements that I've mentioned above are the main complicating factors. Also our first two years of (“introductory”) chemistry courses are taught in an unconventional way. If a student had not yet completed all four of those courses before studying abroad, they would need to be aware of special timing that might complicate things. For our first two years of instruction, we teach one semester of introductory chemistry followed by two semesters of organic chemistry, and top things off with a final semester of a course that is somewhat specific to Williams. There are ways to take “equivalent” courses elsewhere, but we would need to work very closely with the student to ensure that all of the pieces fit together appropriately.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

None to date, but there may have been times when the lab component of a course was not sufficient and we were only able to assign major credit for a non-lab course instead of a course-with-a-lab.

CHEM 100 (W) It's a Material World-What's It Made Of?-Intensive

We'll talk about how underlying atomic and molecular scale structure gives rise to physical properties that you already have an intuitive sense for: things like hardness, softness, elasticity, color, brittleness, conductivity, transparency... Once we understand how these properties arise, we can start thinking about how and why we use certain materials for particular applications and consider the historical and societal changes that result from choosing or developing new materials for those specific applications. What kinds of materials (or innovations in the skills or techniques used to produce them) have been valued over time? What has been the impact of these technological advances? From there, we can start to think about how to design new materials with new kinds of properties or combinations of properties. We'll look at old materials as well as new, and venture a bit into the modern world of materials, which involves design and characterization of meso and nanoscale structures. We'll take a little time to do some lab experiments as well, to give you a peek at some strategies used in nanofabrication, as well a chance to use some of the kinds of instrumentation used in studying nanoscale materials. Because this course is designed to count for **both** a regular full semester credit as well as a winter study credit, it will necessarily be a fairly intense experience. We're going to be moving through material pretty quickly, and it'll be hard for you to tackle the problems that you'll need to on your own at this pace in addition to doing the readings and going over class notes. So rather than structure the course to be 3 hours

of uninterrupted class time/day followed by many hours of trying to do the rest of the work on your own, the course will be structured in order to provide a lot of help along the way. We'll be meeting together for more hours each day, and we'll use the extra time to do a lot of problem solving work together, as this is really the best way to work through material, as well as to do a lot of demos that will illustrate what we're talking about. There will be a great deal of support available from course TAs, who will help with the problem solving during the day, as well as be available some evenings for additional help on problem sets, as well as preparation for exams. We'll also break up the classwork with a few days of lab experiments, which will be a chance to try out some new techniques used in nanoscale fabrication, and get a feel for some of the challenges in studying things at this scale. There won't be any lab reports or separate homework associated with the labs that we do, though it's possible that there may be some questions on problem sets or exams that are associated with things you'll have encountered in lab. This course will be a non-majors level introduction to materials chemistry, with no chemistry background required.

Requirements/Evaluation: a series of problem sets, two exams, and a final

Prerequisites: permission of a dean

Enrollment Limit: 15

Enrollment Preferences: students who need to make up a deficiency

Grading: no pass/fail option, no fifth course option

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both CHEM 100 and CHEM 41.

Distributions: (D3)

Winter 2020

SEM Section: 01 M-F 9:00 am - 12:00 pm M-F 1:00 pm - 4:00 pm Lee Y. Park

CHEM 113 (F) Chemistry and Crime: From Sherlock Holmes to Modern Forensic Science

In this course, designed for students who do not plan to major in the natural sciences, we use a case-oriented approach to explore selected topics of forensic science. These include: (1) the scientific and technological foundation for the examination of physical, chemical, and biological items of evidence, and (2) the scope of expert qualifications and testimony, the legal status of scientific techniques, and the admissibility of the results in evidence. The analysis of trace evidence, including glass, soil, gunpowder residues and bullet fragments, and inorganic and heavy metal poisons are discussed through an understanding of the basic concepts of chemistry and analytical chemistry. Forensic toxicology and pharmacology are applied to the analysis of alcohol, poisons, and drugs based upon the principles of organic chemistry and biochemistry. The characterization of blood and other body fluids necessitate an understanding of serology and molecular genetics. The cases which stimulate the exploration of these areas include: the John and Robert Kennedy assassinations, the Jeffrey MacDonald case (*Fatal Vision*), the Wayne Williams case, the deaths of celebrities Marilyn Monroe, John Belushi, and Janis Joplin, the authenticity of the Shroud of Turin, the Casey Anthony case, the Tylenol poisonings, and the identity of Anastasia. Interactive demonstration sessions provide an appreciation of scientific experimentation in general and the work of a crime lab in particular. It includes an analysis of evidence and provides an opportunity to learn forensic techniques such as chromatography (for ink, drug, and fire accelerant analysis), spectroscopy (for alcohol and drug analysis), and electrophoresis (for DNA fingerprinting).

Class Format: three times per week

Requirements/Evaluation: problem sets and/or quizzes, hour tests, a final exam, and papers

Prerequisites: none; designed for the non-science major who does not intend to pursue a career in the natural sciences; not open to students who have taken CHEM 151, 153, 155, 156/251, or 256

Enrollment Limit: 30

Enrollment Preferences: seniors and juniors

Expected Class Size: 30

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

Not offered current academic year

CHEM 115 (F) AIDS: The Disease and Search for a Cure

Since the discovery of the human immunodeficiency virus (HIV-1) in 1983, modern techniques of molecular biology have revealed much about its structure and life cycle. The intensity of the scientific investigation directed at HIV-1 is unprecedented in history. We now know more about this virus

than any other known pathogen. However, the early optimism concerning the prospects for an effective AIDS vaccine has now waned and HIV strains that are resistant to drug therapies are common. We are now three decades into the AIDS pandemic and the World Health Organization estimates that there are more than 34 million HIV-infected persons worldwide. After an introduction to chemical structure, we examine the molecular biology of the HIV virus, the molecular targets of anti-HIV drugs, and the prospects for a cure. We look at how HIV-1 interacts with the human immune system and discuss prospects for developing an effective HIV vaccine.

Class Format: three hours per week

Requirements/Evaluation: problem sets, a midterm, quizzes, a final exam, and a presentation/discussion

Prerequisites: none; designed for the non-science major who does not intend to pursue a career in the natural sciences

Enrollment Limit: 45

Expected Class Size: 45

Grading: yes pass/fail option, yes fifth course option

Distributions: (D3)

Attributes: PHLH Biomedical Determinants of Health

Not offered current academic year

CHEM 151 (F) Introductory Chemistry (QFR)

This course provides an introduction to chemistry for those students with little or no high school chemistry. Students will be introduced to concepts fundamental to studying matter at the molecular level. Principal topics include introductions to the nature of atoms and molecules, stoichiometry, solubility rules and equilibria, gas laws, chemical equilibrium, acid-base reactions, periodic relationships, chemical bonding, molecular structure, intermolecular forces, oxidation-reduction reactions, and related applications. Laboratory work comprises a system of qualitative analysis and quantitative techniques. The course provides preparation for further study of organic chemistry, biochemistry, physical and inorganic chemistry and is intended for students who are anticipating professional study in chemistry, in related sciences, or in one of the health professions, as well as for those students who are interested in exploring the fundamental ideas of chemistry as part of their general education.

Class Format: lecture, three times per week and laboratory, four hours per week

Requirements/Evaluation: frequent electronic and quantitative written weekly problem set assignments, laboratory work and reports, quizzes, two tests, and a final exam

Prerequisites: Students are required to take the Chemistry Placement Test prior to registering for the course; incoming first-year students are required to meet with a faculty member during First Days. Test information can be found at chemistry.williams.edu/placement.

Enrollment Limit: 16/lab

Enrollment Preferences: first-year students; students who have studied chemistry for one or more years are directed to CHEM 153 or 155

Expected Class Size: 48

Grading: no pass/fail option, no fifth course option

Unit Notes: CHEM 151 may be taken concurrently with MATH 102--see under Mathematics; CHEM 151 or its equivalent is a prerequisite to CHEM 156; one of CHEM 151 or 153 or 155 required for the BIMO concentration

Distributions: (D3) (QFR)

Attributes: BIMO Required Courses

CHEM 153 (F) Concepts of Chemistry (QFR)

This course broadens and deepens the foundation in chemistry of students who have had typically one year of chemistry at the high school level. Most students begin study of chemistry at Williams with this course. Familiarity with stoichiometry, basic concepts of equilibria, and the model of an atom is expected. Principal topics for this course include kinetic theory of gases, modern atomic theory, molecular structure and bonding, states of matter,

chemical equilibrium (acid-base and solubility), and an introduction to atomic and molecular spectroscopies. Laboratory work includes synthesis, qualitative and quantitative chemical analysis, and molecular modeling. The course is of interest to students who anticipate professional study in chemistry, related sciences, or one of the health professions, as well as to those who want to explore the fundamental ideas of chemistry as part of their general education.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: quantitative weekly problem set assignments, laboratory work and reports, hour tests, and a final exam

Prerequisites: students are required to take the online Chemistry Placement Test (chemistry.williams.edu/placement) prior to registering for the course (and incoming first year students are required to meet with a faculty member during First Days)

Enrollment Limit: 16/lab

Enrollment Preferences: incoming first year students also must meet with a faculty member during First Days

Expected Class Size: 70

Grading: no pass/fail option, no fifth course option

Unit Notes: one of CHEM 151 or 153 or 155 required for the BIMO concentration

Distributions: (D3) (QFR)

Attributes: BIMO Required Courses

Fall 2019

LAB Section: 06 T 1:00 pm - 5:00 pm Jennifer K. Rosenthal

CHEM 155 (F) Principles of Modern Chemistry (QFR)

This course is designed for students with strong preparation in secondary school chemistry, including a laboratory experience, such as provided by an Advanced Placement chemistry course (or equivalent) with a corresponding score of 5 of the AP Chemistry Exam (or a 7 on the IB Exam, or equivalent). Topics include chemical thermodynamics, kinetics, structure and bonding, coordination chemistry, electrochemistry and spectroscopy and their application to fields such as materials science, industrial, environmental, biological, and medicinal chemistry. Laboratory work includes synthesis, characterization, and reactivity of coordination complexes, electrochemical analysis, materials chemistry, qualitative analysis, and molecular modeling. This course is of interest for students who are anticipating professional study in chemistry, related sciences, or one of the health professions, as well as for students who want to explore the fundamental ideas of chemistry as part of their general education.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: weekly problem sets, laboratory work and reports, an hour test, and a final exam

Prerequisites: students planning to enroll are required to take the Chemistry Placement Survey prior to registering; incoming first year students are required to meet with faculty during First Days; for more information go to <http://chemistry.williams.edu/placement/>

Enrollment Limit: 16/lab

Enrollment Preferences: CHEM 151 is an introductory course for students with no or little chemistry background. Students who have studied chemistry for one or more years are directed to CHEM 153 or 155

Expected Class Size: 36

Grading: no pass/fail option, no fifth course option

Unit Notes: CHEM 151 may be taken concurrently with MATH 102--see under Mathematics; CHEM 151 or its equivalent is a prerequisite to CHEM 156; one of CHEM 151 or 153 or 155 required for the BIMO concentration

CHEM 156 (S) Organic Chemistry: Introductory Level (QFR)

This course provides the necessary background in organic chemistry for students who are planning advanced study or a career in chemistry, the biological sciences, or the health professions. It initiates the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. The fundamentals of molecular modeling as applied to organic molecules are presented. Specific topics include basic organic structure and bonding, isomerism, stereochemistry, molecular energetics, the theory and interpretation of infrared and nuclear magnetic spectroscopy, substitution and elimination reactions, and the addition reactions of alkenes and alkynes. The coordinated laboratory work includes purification and separation techniques, structure-reactivity studies, organic synthesis, IR and NMR spectroscopy, and the identification of unknown compounds.

Class Format: lecture three hours per week and laboratory four hours per week

Requirements/Evaluation: quantitative problem sets, laboratory performance, including written lab reports, three midterm exams, and a final exam

Prerequisites: CHEM 151 or 153 or 155 or placement exam or permission of instructor

Enrollment Limit: 16/lab

Expected Class Size: 120

Grading: no pass/fail option, no fifth course option

Distributions: (D3) (QFR)

CHEM 158 Roses are Red, Violets are Blue: The Origins, Perception, and Impact of Color

Have you ever been tickled pink? Felt blue? Seen red?, Been green with envy? The course will consider color, starting with the physical and chemical origins of color (the electromagnetic spectrum, the absorption and emission of electromagnetic radiation, refraction, diffraction, incandescence, fluorescence, phosphorescence, iridescence). We will develop an understanding of chemical bonding and how that influences color. We will cover how we measure and describe color from a scientific perspective as well as how we can generate materials and devices with different color properties (liquid crystal displays, light emitting diodes for instance). From there we will discuss pigments used in works of art and textiles over time, the characteristics that make certain pigments suitable for particular applications. If we have time, we will touch on the historical and cultural impacts and meanings of different pigments and hues, the biological perception of color, and some color theory.

Requirements/Evaluation: exams, problem sets, as well as a final paper; there may also be some brief laboratory exercises

Prerequisites: non-science students; students who have taken any introductory chemistry or physics courses are ineligible

Enrollment Limit: 36

Expected Class Size: 36

Grading:

Distributions: (D3)

Not offered current academic year

CHEM 251 (F) Organic Chemistry: Intermediate Level

This course is a continuation of Chemistry 156 and it concludes the systematic study of the common classes of organic compounds with emphasis on theories of structure and reactivity. Specific topics include radical chemistry, an introduction to mass spectrometry and ultraviolet spectroscopy, the theory and chemical reactivity of conjugated and aromatic systems, the concepts of kinetic and thermodynamic control, an extensive treatment of the chemistry of the carbonyl group, alcohols, ethers, polyfunctional compounds, the concept of selectivity, the fundamentals of organic synthesis, an introduction to carbohydrates, carboxylic acids and derivatives, acyl substitution reactions, amines, and an introduction to amino acids, peptides, and proteins. The coordinated laboratory work includes application of the techniques learned in the introductory level laboratory, along with new functional group analyses, to the separation and identification of several unknown samples. Skills in analyzing NMR, IR, and MS data are practiced and further refined.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: midterm exams, problem sets, laboratory performance, including written lab reports, and a final exam

Prerequisites: CHEM 156 or permission of instructor

Enrollment Limit: 16/lab

Expected Class Size: 100

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Attributes: BIMO Required Courses

CHEM 255 (F) Organic Chemistry: Intermediate Level--Special Laboratory Section

This course is a continuation of CHEM 156 and contains the same material as CHEM 251 except for the laboratory program described below: The aim of this advanced laboratory section is to enrich and enhance the laboratory experiences of motivated students of recognized ability by providing a laboratory program that more closely resembles the unpredictable nature and immediacy of true chemical research. Students synthesize, isolate, and characterize (using a range of modern physical and spectroscopic techniques) a family of unknown materials in a series of experiments constituting an integrated, semester-long investigation. A flexible format is employed in which the students are responsible for helping to plan the course of their laboratory work based upon discussions with the instructor about the previous week's experimental results. Students are drawn from CHEM 156 with placement based upon student selection and nomination by the CHEM 156 instructor. Participants attend their regular CHEM 251 lecture but attend the special laboratory section instead of a CHEM 251 laboratory section.

Class Format: lecture, three hours per week and laboratory, four hours per week; weekly one-hour discussion

Requirements/Evaluation: the requirements for the CHEM 251 lecture and performance in this special laboratory section including written laboratory reports and participation in discussions

Prerequisites: permission of instructor

Enrollment Limit: 12

Enrollment Preferences: sophomores

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Unit Notes: course was developed under a grant from the Ford Foundation

Distributions: (D3)

CHEM 256 (S) Advanced Chemical Concepts

This course treats an array of topics in modern chemistry, emphasizing broad concepts that connect and weave through the various subdisciplines of the field--biochemistry, inorganic chemistry, organic chemistry, and physical chemistry. It provides necessary background in chemical science for students who are planning advanced study or a career in chemistry, biological science, geoscience, environmental science, or a health profession. Topics include coordination complexes, thermodynamics, electrochemistry, kinetics, and nuclear chemistry. Laboratory work includes experiments involving synthesis, characterization, and reactivity studies of coordination and organic complexes, spectroscopic analyses, thermodynamics, electrochemistry, kinetics, and nuclear chemistry.

Class Format: lecture three hours per week and laboratory four hours per week

Requirements/Evaluation: homework assignments, laboratory work, quizzes, midterm exam and a final exam

Prerequisites: CHEM 251/255, or permission of instructor

Enrollment Limit: 16 lab

Expected Class Size: 100

Grading: no pass/fail option, yes fifth course option

Unit Notes: for the BIMO concentration, CHEM 256 not required if CHEM 155 was taken

Distributions: (D3)

Attributes: BIMO Required Courses

CHEM 319 (F) Integrative Bioinformatics, Genomics, and Proteomics Lab (QFR)

Cross-listings: BIOL 319 CSCI 319 MATH 319 PHYS 319 CHEM 319

Secondary Cross-listing

What can computational biology teach us about cancer? In this capstone experience for the Genomics, Proteomics, and Bioinformatics program, computational analysis and wet-lab investigations will inform each other, as students majoring in biology, chemistry, computer science, mathematics/statistics, and physics contribute their own expertise to explore how ever-growing gene and protein data-sets can provide key insights into human disease. In this course, we will take advantage of one well-studied system, the highly conserved Ras-related family of proteins, which play a central role in numerous fundamental processes within the cell. The course will integrate bioinformatics and molecular biology, using database searching, alignments and pattern matching, phylogenetics, and recombinant DNA techniques to reconstruct the evolution of gene families by focusing

on the gene duplication events and gene rearrangements that have occurred over the course of eukaryotic speciation. By utilizing high through-put approaches to investigate genes involved in the MAPK signal transduction pathway in human colon cancer cell lines, students will uncover regulatory mechanisms that are aberrantly altered by siRNA knockdown of putative regulatory components. This functional genomic strategy will be coupled with independent projects using phosphorylation-state specific antisera to test our hypotheses. Proteomic analysis will introduce the students to de novo structural prediction and threading algorithms, as well as data-mining approaches and Bayesian modeling of protein network dynamics in single cells. Flow cytometry and mass spectrometry will be used to study networks of interacting proteins in colon tumor cells.

Class Format: two afternoons of lab, with one hour of lecture, per week

Requirements/Evaluation: lab participation, several short homework assignments, one lab report, a programming project, and a grant proposal

Prerequisites: BIOL 202; students who have not taken BIOL 202 but have taken BIOL 101 and CSCI 315 or PHYS 315, may enroll with permission of instructor. No prior computer programming experience is required.

Enrollment Limit: 12

Enrollment Preferences: seniors, then juniors, then sophomores

Expected Class Size: 12

Grading: yes pass/fail option, yes fifth course option

Unit Notes: does not satisfy the distribution requirement for the Biology major

Distributions: (D3) (QFR)

CHEM 321 (F)(S) Biochemistry I: Structure and Function of Biological Molecules (QFR)

Cross-listings: CHEM 321 BIMO 321 BIOL 321

Secondary Cross-listing

This course introduces the basic concepts of biochemistry with an emphasis on the structure and function of biological macromolecules. Specifically, the structure of proteins and nucleic acids are examined in detail in order to determine how their chemical properties and their biological behavior result from those structures. Other topics covered include catalysis, enzyme kinetics, mechanism and regulation; the molecular organization of biomembranes; and the flow of information from nucleic acids to proteins. In addition, the principles and applications of the methods used to characterize macromolecules in solution and the interactions between macromolecules are discussed. The laboratory provides a hands-on opportunity to study macromolecules and to learn the fundamental experimental techniques of biochemistry including electrophoresis, chromatography, and principles of enzymatic assays.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: quizzes, a midterm exam, a final exam, problem sets and performance in the laboratories including lab reports

Prerequisites: BIOL 101 and CHEM 251/255 and CHEM 155/256

Enrollment Limit: 16/lab

Enrollment Preferences: junior and senior Biology and Chemistry majors and BIMO concentrators

CHEM 324 (S) Enzyme Kinetics and Reaction Mechanisms

Enzymes are complex biological molecules capable of catalyzing chemical reactions with very high efficiency, stereo-selectivity and specificity. The study of enzymatically-catalyzed reactions gives insight into the study of organic reaction mechanisms in general, and into the topic of catalysis especially. This course explores the methods and frameworks for determining enzymatic reaction mechanisms. These methods are based on a firm foundation of organic reaction mechanisms and chemical kinetics. We will investigate the major types of biochemical reactions, focusing on their catalytic mechanisms and how those mechanisms can be elucidated. We will lay the foundation for this mechanistic consideration with discussion of transition state theory, structure-reactivity relationships, steady state and pre-steady kinetics, use of isotopes, genetic modification, and other tools for probing enzymatic reactions. We will also examine the catalytic roles of a variety of vitamins and cofactors.

Class Format: three hours per week

Requirements/Evaluation: problem sets, quizzes, a midterm exam, a paper, and a final exam

CHEM 326 (F) Chemical and Synthetic Biology

Chemistry provides invaluable tools for investigating and manipulating biological systems. Recent advances increasingly allow us to exploit the complex technological capabilities evolved by living things. This course will survey the highly interdisciplinary and interconnected fields of chemical and synthetic biology. These disciplines bring chemical tools and frameworks to bear on living systems and address problems in basic science, medicine, chemical production, biotechnology and more. Chemical biology uses precise molecular-level manipulations to influence living systems from the bottom up, often by introducing components that are completely foreign to nature. Synthetic biology takes advantage of existing molecular technology and adopts an engineering mindset to reprogram living systems. Both fields are quite new, rapidly evolving, and full of promise--as well as hype! In this course, we will aim to: 1) develop our own conceptions of chemical and synthetic biology and their interplay; 2) learn the fundamental techniques for using chemistry to manipulate biology; and 3) critically assess the progress, shortcomings and challenges for these areas. Our format will include student-driven presentation and discussion of primary literature case studies along with instructor-presented content. Topics we may cover include bioconjugation, chemical synthesis of biomacromolecules, synthetic organisms, metabolic engineering, directed evolution, and comprehensive reworking of the central dogma.

Class Format: three hours per week

Requirements/Evaluation: presentations, class participation, problem sets, short papers, and a final research project

Prerequisites: CHEM/BIOL/BIMO 321

Enrollment Limit: 20

Expected Class Size: 20

Grading: no pass/fail option, no fifth course option

CHEM 335 (F) Inorganic/Organometallic Chemistry

This course covers fundamental aspects of the chemistry of transition metals and main group elements and highlights how these properties are key to understanding the roles of these elements in a range of applications, from the catalysis of synthetic organic transformations, the functions of enzymatic processes, the production of commodity chemicals such as plastics, to the actions of metal-based drugs such as cis-platin. The course introduces concepts of symmetry and group theory, and applies them in a systematic approach to the study of the structure, bonding, and spectroscopy of coordination and inorganic compounds. The course also covers the kinetics and mechanism of selected inorganic and organometallic reactions. Through exploration of primary literature and review articles we will discuss recent developments and applications in inorganic chemistry, such as finding molecular solutions to the capture of solar energy, to cancer treatments and to optimizing industrial-scale reactions.

Class Format: three hours per week

Requirements/Evaluation: problem sets, exams, presentations, and group-based literature reviews

Prerequisites: CHEM 155 or 256 and 251/255

Enrollment Limit: 19

Expected Class Size: 19

CHEM 336 (S) Materials Chemistry

Materials Science focuses on the study of bulk physical properties such as hardness, electrical conductivity, optical behavior, and elasticity. Materials chemists bridge the gap between traditional synthetic chemists and materials scientists, by working to understand the relationships between bulk physical properties, length scale (mesoscale, nanoscale), and molecular structure. This course will cover a variety of different types of materials and their properties including solids (insulators, semiconductors, conductors, superconductors, magnetic materials), soft materials (polymers, gels, liquid crystals), nanoscale structures, and organic electronics. We'll examine some of the latest developments in materials chemistry, including new strategies for the synthesis and preparation of materials on different length scales, as well as a variety of potential applications of emerging technologies.

Class Format: three hours per week

Requirements/Evaluation: problem sets, reviews of research articles, hour exams, and a final exam

Prerequisites: CHEM 155 or 256 and 251/255

CHEM 338 (S) Bioinorganic Chemistry: Metals in Living Systems

Bioinorganic chemistry is an interdisciplinary field that examines the role of metals in living systems. Metals are key components of a wide range of processes, including oxygen transport and activation, catalytic reactions such as photosynthesis and nitrogen-fixation, and electron-transfer processes. Metals perform regulatory roles and stabilize the structures of proteins. In medical applications, the metals are central to many diagnostic and therapeutic tools. To understand the role metals in these biological processes, we will cover principles of coordination chemistry: topics such as structure and bonding, spectroscopic methods, electrochemistry, kinetics and reaction mechanisms. Building on this fundamental understanding of the nature of metals, students explore topics of current interest in the field.

Class Format: lecture and tutorial-style meetings, 3 hours per week

Requirements/Evaluation: evaluation based on problem sets, two exams, tutorial participation, a class presentation, and a final project

Prerequisites: CHEM 155 or CHEM 256 and 251/255

Enrollment Limit: 10

CHEM 341 (S) Toxicology and Cancer

Cross-listings: ENVI 341 CHEM 341

Primary Cross-listing

What is a poison and what makes it poisonous? Paracelcus commented in 1537: "What is not a poison? All things are poisons (and nothing is without poison). The dose alone keeps a thing from being a poison." Is the picture really this bleak; is modern technology-based society truly swimming in a sea of toxic materials? How are the nature and severity of toxicity established, measured and expressed? Do all toxic materials exert their effect in the same manner, or can materials be poisonous in a variety of different ways? Are the safety levels set by regulatory agencies low enough for a range of common toxic materials, such as mercury, lead, and certain pesticides? How are poisons metabolized and how do they lead to the development of cancer? What is cancer and what does it take to cause it? What biochemical defense mechanisms exist to counteract the effects of poisons?

This course attempts to answer these questions by surveying the fundamentals of modern chemical toxicology and the induction and progression of cancer. Topics will range from description and quantitation of the toxic response, including risk assessment, to the basic mechanisms underlying toxicity, mutagenesis, carcinogenesis, and DNA repair.

Class Format: three times per week

Requirements/Evaluation: two hour tests, a class presentation and paper, participation in discussion sessions, a self-exploration of the current toxicological literature, and a final exam

Prerequisites: CHEM 156; may be taken concurrently with CHEM 251/255; a basic understanding of organic chemistry

Enrollment Limit: 30

Expected Class Size: 24

Grading: no pass/fail option, yes fifth course option

Distributions: (D3)

This course is cross-listed and the prefixes carry the following divisional credit:

Not offered current academic year

CHEM 342 (S) Synthetic Organic Chemistry

The origins of organic chemistry are to be found in the chemistry of living things and the emphasis of this course is on the chemistry of naturally-occurring compounds. This course presents the logic and practice of chemical total synthesis while stressing the structures, properties and preparations of terpenes, polyketides and alkaloids. Modern synthetic reactions are surveyed with an emphasis on the stereochemical and mechanistic themes that underlie them. To meet the requirements for the semester's final project, each student chooses an article from the recent synthetic literature and then analyzes the logic and strategy involved in the published work in a final paper. A summary of this paper is also presented to the class in a short seminar. Laboratory sessions introduce students to techniques for synthesis and purification of natural products and their synthetic precursors.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: problem sets, midterm exams, laboratory work, a final project, and class participation

Prerequisites: CHEM 256 or permission of instructor

Enrollment Limit: 12

Expected Class Size: 12

Grading: no pass/fail option, no fifth course option

Distributions: (D3)

Attributes: BIMO Interdepartmental Electives

Not offered current academic year

CHEM 344 (S) Physical Organic Chemistry

The structure of a molecule is inherently linked to its reactivity, and these correlations form the basis for understanding organic reaction mechanisms.

This course advances the understanding from previous organic courses through a detailed examination of the concepts that underlie these structure/reactivity relationships, including molecular strain and stability, acid/base chemistry, steric and electronic effects, and aromaticity. These concepts will also be explored in the context of specific classes of reaction mechanisms. Classical and modern experimental and theoretical tools used to elucidate reaction mechanisms will also be presented, including reaction kinetics, isotope effects, and linear free energy relationships. By studying the primary literature, we will see how these experiments have been applied to the elucidation of reaction mechanism, while also learning to design a set of experiments for study of mechanisms of contemporary interest.

Requirements/Evaluation: problem sets, midterm exams, laboratory work, and class participation

Prerequisites: CHEM 251/255

Enrollment Limit: 19

Enrollment Preferences: Chemistry majors

Expected Class Size: 19

CHEM 348 (F) Polymer Chemistry

From synthetic to natural macromolecules, we encounter polymers everywhere and everyday. This course explores the multitude of synthetic techniques available and discusses how structure defines function. Topics include condensation and chain (anionic, cationic, radical) polymerizations, dendrimers, controlling molecular weight, ring opening, and biopolymer syntheses. Fundamentals of composition and physical properties of polymers, and methods of characterization are also covered.

Class Format: three hours per week

Requirements/Evaluation: problem sets, participation, two exams, and a final project

Prerequisites: CHEM 251/255

Enrollment Limit: 19

Enrollment Preferences: Chemistry majors

Expected Class Size: 19

Grading: yes pass/fail option, yes fifth course option

CHEM 361 (F) Quantum Chemistry and Chemical Dynamics

This course provides an introduction to quantum mechanics which serves as the basis for understanding atomic and molecular structure as well as spectroscopic methods. This leads to a discussion of chemical kinetics and molecular reaction dynamics in the gas phase and in solution. Computational chemistry methods are used to illustrate chemical concepts, to interpret experimental data, and to extend hypotheses. Applications of these principles are chosen from contemporary research fields, including polymer chemistry, photochemistry, atmospheric chemistry, and solid and liquid state chemistry. Quantitative laboratory experiments and consultation with the scientific literature provide the background necessary for carrying out an independent theoretical or experimental project.

Class Format: lecture, three hours per week and laboratory, four hours per week

Requirements/Evaluation: class participation, problem sets, exams, laboratory work, and an independent project

Prerequisites: CHEM 155 or 256

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 12

Grading: no pass/fail option, yes fifth course option

LAB Section: 02 T 1:00 pm - 5:00 pm John W. Thoman

CHEM 364 (S) Instrumental Methods of Analysis

Cross-listings: ENVI 364 CHEM 364

Primary Cross-listing

This course provides the student an understanding of the applicability of current laboratory instrumentation both to the elucidation of fundamental chemical phenomena and to the measurement of certain atomic and molecular parameters. Student will gain knowledge and understanding of the theory and practical use of a variety of instrumental techniques; including, but not limited to, chromatography, mass spectrometry, thermal methods, electroanalytical techniques, atomic and molecular absorption and emission spectroscopy, X-ray diffraction, and optical and electron microscopies, with examples drawn from the current literature. Analytical chemical and instrumental techniques will be developed in the lecture and extensively applied within the laboratory. These skills are useful in a wide variety of scientific areas. Through exploration of primary literature and review articles we will discuss recent developments in instrumental methods and advances in the approaches used to address modern analytical questions.

Class Format: lecture three hours per week and laboratory four hours per week

Requirements/Evaluation: class participation, 2 exams, problem sets, oral presentations and discussions of selected topics, and an independent project

Prerequisites: CHEM 155 or 256 and 251/255; may be taken concurrently with CHEM 256 with permission of instructor

Enrollment Limit: 9 per lab

Expected Class Size: 9 per lab

Grading: no pass/fail option, no fifth course option

CHEM 366 (S) Thermodynamics and Statistical Mechanics

The thermodynamic laws provide us with our most powerful and general scientific principles for predicting the direction of spontaneous change in physical, chemical, and biological systems. This course develops the concepts of energy, entropy, free energy, temperature, heat, work, and chemical potential within the framework of classical and statistical thermodynamics. The principles developed are applied to a variety of problems: chemical reactions, phase changes, energy technology, industrial processes, and environmental science. Laboratory experiments provide quantitative and practical demonstrations of the theory of real and ideal systems studied in class.

Class Format: lecture three hours per week and laboratory, four hours per week; discussion one hour per week

Requirements/Evaluation: class participation, oral presentations, problem sets, laboratory work, and an independent project.

Prerequisites: CHEM 155 or 256, and basic knowledge of applied integral and differential calculus

Enrollment Limit: none

Enrollment Preferences: none

CHEM 367 (S) Biophysical Chemistry

This course is designed to provide a working knowledge of basic physical chemistry to students primarily interested in the biochemical, biological, or medical professions. Topics of physical chemistry are presented from the viewpoint of their application to biochemical problems. Three major areas of biophysical chemistry are discussed: 1) the conformation of biological macromolecules and the forces that stabilize them; 2) techniques for the study of biological structure and function including spectroscopic, hydrodynamic, electrophoretic, and chromatographic; 3) the behavior of biological macromolecules including ligand interaction and conformational transitions.

Class Format: lecture three hours per week and laboratory four hours per week

Requirements/Evaluation: problem sets and/or quizzes, laboratory work, hour tests, and a final exam

Prerequisites: CHEM 155 or 256 and 251/255, and MATH 140 or equivalent

Enrollment Limit: 9 per lab

Enrollment Preferences: junior and senior Chemistry majors

Expected Class Size: 9 per lab

CHEM 368 (S) Computational Chemistry and Molecular Spectroscopy (QFR)

This course provides an introduction to the principles of computational quantum mechanics and their application to problems of chemical interest such as chemical bonding, chemical reactivity, and molecular spectroscopy. Emphasis is placed upon modern electronic structure calculations, their fundamentals, practical considerations, interpretation, and applications to current research questions. Under guidance in the laboratory session and through independent work, students will use computational methods to explore assigned weekly research problems. The research results will be presented to and discussed with the tutorial partner at the end of each week.

Requirements/Evaluation: tutorial participation, presentations, and submitted papers

Prerequisites: CHEM 361 or equivalent background in Physics

Enrollment Limit: 10

Winter Study -----

CHEM 12 (W) Embodying Creativity

Are you writing a thesis? Are you planning your life after graduation? Are you learning a new skill or trying to solve a problem? All these tasks can benefit from creativity. This course is based on the premise that we are all innately creative and can access this part of ourselves by connecting to our bodies through movement and the perceptual senses. By embodying our creative nature, we also develop more confidence in facing the unknown, resiliency in handling conflict, and empowerment in our decisions. Class time will be spent primarily on experiential learning in a dance studio-setting, where we will practice individual and partner techniques geared towards cultivating mindful awareness and bodily presence. Exercises include free writing, blind contour drawing, and Authentic Movement. We will also draw from post-modern experiments from the 1960's and 70's in New York City, concepts in expressive art therapy, and principles in Eastern body-mind healing modalities to establish a framework with which to contextualize our practices. You will then take what you learn in class to support your own creative project outside of class. Required text is Elizabeth Gilbert's *Big Magic*. We will also use readings from Twyla Tharp's *The Creative Habit*, Julia Cameron's *The Artist's Way*, Mabel Todd's *The Thinking Body*, Barbara Dilley's *This Very Moment*, Jon Kabat-Zinn's *Full Catastrophe Living*, Greg Johanson and Ron Kurtz's *Grace Unfolding*, and selected works by Joseph Campbell. Evaluation will be based on class participation, completion of assignments, midpoint feedback, final 10-page paper or creative project/presentation that demonstrates a level of engagement with class material. We will meet 2 times per week for 3 hours. One minimum individual

meeting with the instructor will be scheduled during the course to focus on each student's project. If you have any questions about this course, feel free to contact the instructor at tlhu210@gmail.com. Adjunct Instructor Bio: Tracy Hu is a fourth-year medical student at the University of Texas Medical Branch studying to become a Family Medicine physician. After graduating from Williams in 2013, she investigated the mind-body connection through extensive training in massage, contact improvisation, and meditative practices. She is interested in how modern medicine can benefit from a multidisciplinary approach to understanding disease and promoting wellness on both an individual and community level.

Requirements/Evaluation: 10-page paper or equivalent creative project/presentation demonstrating understanding, application, and integration of class material including but not limited to visual arts piece, performance, writing portfolio, interpretive presentation, etc.

Prerequisites: open to all students; no previous creative work or dance experience required

Enrollment Limit: 10

Enrollment Preferences: statement of interest (a little bit about yourself and your interest in the course)

Grading: pass/fail only

Materials/Lab Fee: approximately \$14 for books

Winter 2020

LEC Section: 01 TR 10:00 am - 12:50 pm Tracy L. Hu

CHEM 13 (W) Ultimate Wellness: Concepts for a Happy Healthy Life

This course provides an opportunity to drastically improve your life by introducing concepts that can start making a difference in the way you feel today! We will approach nutrition, lifestyle, and happiness from a holistic perspective. Students will learn how to tune out mixed media messages and look within to find ultimate health and wellness. Topics include: Ayurveda, preventative medicine, mindfulness and meditation, food intolerance awareness, healthy eating and meal planning, deconstructing cravings and overcoming sugar addiction, and finding your happiness. Evaluation will be based on completion of assignments, class participation, reflective 5-page paper, creative project, and final presentation that demonstrates a level of personal growth. After signing up for this course please email Nicole at nicole@zentreewellness.com with a brief statement describing your interest in the course and what you hope to achieve in it. In the event of over-subscription, these statements will be used in the selection process. We will meet twice a week for three-hour sessions as a group. The course will include two individual sessions--an initial health assessment plus an additional session designed to personalize the course and assist the student in applying the learned techniques. Books required for this class may include: *Integrative Nutrition: Feed Your Hunger For Health and Happiness* by Joshua Rosenthal, *Food Rules: An Eaters Manual* by Michael Pollan, *Mind Over Medicine: Scientific Proof That You Can Heal Yourself* by Lissa Rankin, and *The Mindful Twenty-Something* by Holly Rogers. Adjunct Instructor Bio: Nicole Anagnos is health coach and director at Zen Tree Wellness in Williamstown. She is co-founder of the organic skin care company, Klz Organic Beauty. She also holds a master's degree in education.

Requirements/Evaluation: short paper and final project or presentation

Prerequisites: none

Enrollment Limit: 15

Enrollment Preferences: email statement of interest to nicole@zentreewellness.com

Grading: pass/fail only

Materials/Lab Fee: approximately \$75 for books

Attributes: EXPE Experiential Education Courses

CHEM 15 (W) The Work of the Supreme Court: A Simulation

Cross-listings: CHEM 15 JLST 15

Secondary Cross-listing

The objective of this course is to provide students with an understanding of the personal, theoretical, and institutional characteristics that impact the decision making process of the nation's highest court. At the beginning of the course, the students will be provided with briefs, relevant decisions and other materials for a case currently pending before the court. Where possible, cases will be selected that address constitutional issues that also have a

political and/or historical significance. Past examples include the constitutionality of provisions in the Affordable Care Act, rights of prisoners held in Guantanamo, the extent of First Amendment rights of students, and the applicability of the State Secrets doctrine to the country's extraordinary rendition program. Four students (two on each side) will be assigned to prepare and present oral arguments to the "Court", which will consist of the other eight students, each playing the role of a Supreme Court Justice. An instructor will act as the Chief Justice to coordinate the student Justices and keep them on focus. After the oral argument, the "Court" will confer and prepare majority and minority opinions, which will be announced in "open court" at the conclusion of the term. Adjunct Instructor Bio: Robert Groban is a former Assistant U.S. Attorney, SDNY, and current partner in Berry Appleman & Leiden LLP. Adjunct Instructor Bio: Thomas Sweeney retired former litigator with Hogan & Hartson and Hogan Lovells.

Requirements/Evaluation: short paper and final project or presentation; oral argument, or written court opinions

Prerequisites: none

Enrollment Limit: 12

Enrollment Preferences: seniority

Grading: pass/fail only

Materials/Lab Fee: \$10 and approximately \$45 for books

This course is cross-listed and the prefixes carry the following divisional credit:

CHEM 15 JLST 15

Winter 2020

LEC Section: 01 Cancelled

CHEM 16 (W) Glass and Glassblowing

Cross-listings: ARTS 16 CHEM 16

Primary Cross-listing

This course provides an introduction to both a theoretical consideration of the glassy state of matter and the practical manipulation of glass. We do frameworking with hand torches for at least 12 hours per week. While no previous experience is required, students with patience, good hand-eye coordination, and creative imagination will find the course most rewarding. The class is open to both artistically and scientifically oriented students. Note: if you are required to participate in a sustaining language program during Winter Study, this course meets at the same time.

Requirements/Evaluation: class participation, exhibition of glass projects, a 10-page paper, and a presentation to the class

Prerequisites: none

Enrollment Limit: 10

Enrollment Preferences: preference is given to juniors, sophomores, and those who express the most and earliest interest and enthusiasm by email to Professor Thoman

Grading: pass/fail only

Materials/Lab Fee: \$75

This course is cross-listed and the prefixes carry the following divisional credit:

CHEM 18 (W) Introduction to Research in Biochemistry

An independent experimental project in biochemistry is carried out in collaboration with a member of the Department with expertise in biochemistry. Biochemistry is a branch of chemistry that deals with the molecular details of living systems including the interaction of biologically important molecules. In the Chemistry Department, studies are underway to investigate the structure/function relationship of proteins, the interaction between proteins and RNA and DNA, the molecular basis of bacterial gene regulation, the lipid composition of model membranes, and the molecular underpinnings of viral infection.

Requirements/Evaluation: a 10-page written report is required

Prerequisites: completion of CHEM 151/3/5 and permission of the instructor and department; interested students must consult with the faculty instructor

Enrollment Limit: 4

Enrollment Preferences: expression of student interest

Grading: pass/fail only

Winter 2020

LEC Section: 01 M-F 10:00 am - 3:50 pm Amy Gehring, Bob Rawle

CHEM 20 (W) Introduction to Research in Inorganic Chemistry

Students in this course will carry out an independent research project in collaboration with a member of the Department with expertise in inorganic chemistry. Representative projects include the synthesis and study of polymers to encapsulate heavy metals with an eye to environmental remediation and the synthesis of coordination complexes as models of enzymes and as catalysts for the oxidation of organic compounds. The interdisciplinary nature of the project will expose students to a range of inorganic and organic synthetic protocols and analytical and spectroscopic techniques for the characterization of new materials and the monitoring of catalysis. In addition to lab work, participants will engage in an exploration of careers in chemistry and a discussion of topics of interest to chemists, such as ethics and creating a diverse workforce.

Requirements/Evaluation: a 10-page written report is required

Prerequisites: completion of CHEM 151/3/5 and permission of the instructor and department; interested students must consult with the faculty instructor

Enrollment Limit: 4

Enrollment Preferences: expression of student interest

Grading: pass/fail only

Materials/Lab Fee: \$0

Winter 2020

LEC Section: 01 M-F 10:00 am - 3:50 pm Christopher Goh

CHEM 23 (W) Introduction to Research in Organic Chemistry

An independent experimental project in organic chemistry is carried out in collaboration with a member of the Department. Representative projects include: Controlled synthesis of block copolymers as self-assembled nanocarriers. Students involved in this work will learn techniques involved in organic synthesis, including analysis by NMR, IR, and SEC.

Requirements/Evaluation: a 10-page written report is required

Prerequisites: completion of CHEM 151/3/5 and permission of the instructor and department; interested students must consult with the faculty instructor

Enrollment Limit: POI

Enrollment Preferences: expression of student interest

Grading: pass/fail only

Winter 2020

LEC Section: 01 M-F 10:00 am - 3:50 pm Sarah L. Goh

CHEM 24 (W) Introduction to Research in Physical Chemistry

An independent experimental project in physical chemistry is carried out in collaboration with a member of the Department with expertise in physical chemistry. Current research projects in the Department include computer modeling of non-linear, chaotic chemical and biochemical systems, molecular modeling of water clusters, laser spectroscopy of chlorofluorocarbon substitutes, and observing the dynamics in glasses using single

molecule spectroscopy and molecular dynamics simulations.

Requirements/Evaluation: a 10-page written report is required

Prerequisites: completion of CHEM 151/3/5 and permission of the instructor and department; interested students must consult with the faculty instructor

Enrollment Limit: POI

Enrollment Preferences: expression of student interest

Grading: pass/fail only

Winter 2020

LEC Section: 01 M-F 10:00 am - 12:50 pm Enrique Peacock-López

CHEM 31 (W) Senior Research and Thesis: Chemistry

To be taken by students registered for Chemistry 493, 494.

Class Format: independent study

Grading: pass/fail only

Winter 2020

HON Section: 01 TBA Sarah L. Goh

CHEM 41 (W) It's a Material World-What's It Made Of?-Intensive

We'll talk about how underlying atomic and molecular scale structure gives rise to physical properties that you already have an intuitive sense for: things like hardness, softness, elasticity, color, brittleness, conductivity, transparency... Once we understand how these properties arise, we can start thinking about how and why we use certain materials for particular applications and consider the historical and societal changes that result from choosing or developing new materials for those specific applications. What kinds of materials (or innovations in the skills or techniques used to produce them) have been valued over time? What has been the impact of these technological advances? From there, we can start to think about how to design new materials with new kinds of properties or combinations of properties. We'll look at old materials as well as new, and venture a bit into the modern world of materials, which involves design and characterization of meso and nanoscale structures. We'll take a little time to do some lab experiments as well, to give you a peek at some strategies used in nanofabrication, as well a chance to use some of the kinds of instrumentation used in studying nanoscale materials. Because this course is designed to count for **both** a regular full semester credit as well as a winter study credit, it will necessarily be a fairly intense experience. We're going to be moving through material pretty quickly, and it'll be hard for you to tackle the problems that you'll need to on your own at this pace in addition to doing the readings and going over class notes. So rather than structure the course to be 3 hours of uninterrupted class time/day followed by many hours of trying to do the rest of the work on your own, the course will be structured in order to provide a lot of help along the way. We'll be meeting together for more hours each day, and we'll use the extra time to do a lot of problem solving work together, as this is really the best way to work through material, as well as to do a lot of demos that will illustrate what we're talking about. There will be a great deal of support available from course TAs, who will help with the problem solving during the day, as well as be available some evenings for additional help on problem sets, as well as preparation for exams. We'll also break up the classwork with a few days of lab experiments, which will be a chance to try out some new techniques used in nanoscale fabrication, and get a feel for some of the challenges in studying things at this scale. There won't be any lab reports or separate homework associated with the labs that we do, though it's possible that there may be some questions on problem sets or exams that are associated with things you'll have encountered in lab. This course will be a non-majors level introduction to materials chemistry, with no chemistry background required.

Requirements/Evaluation: a series of problem sets, two exams, and a final

Prerequisites: permission of a dean

Enrollment Limit: 15

Enrollment Preferences: students who need to make up a deficiency

Grading: pass/fail only

Unit Notes: This course is designed to count for both full semester and Winter Study credit. Once a dean approves enrollment, the Registrar's Office will register students in both CHEM 100 and CHEM 41.

Winter 2020

LEC Section: 01 M-F 9:00 am - 12:00 pm M-F 1:00 pm - 4:00 pm Lee Y. Park

CHEM 99 (W) Independent Study: Chemistry

Open to upperclass students. Students interested in doing an independent project (99) during Winter Study must make prior arrangements with a faculty sponsor. The student and professor then complete the independent study proposal form available online. The deadline is typically in late September. Proposals are reviewed by the pertinent department and the Winter Study Committee. Students will be notified if their proposal is approved prior to the Winter Study registration period.

Class Format: independent study

Grading: pass/fail only

Winter 2020

IND Section: 01 TBA Sarah L. Goh

ASIAN STUDIES

CHINESE

(Div I & II, see explanation below)

Chair: Professor George Crane

- Cecilia Chang, Frederick Latimer Wells Professor of Chinese
- Man He, Assistant Professor of Chinese
- Shinko Kagaya, Professor of Japanese; on leave Spring 2020
- Cornelius C. Kubler, Stanfield Professor of Asian Studies; on leave 2019-2020
- Christopher M. B. Nugent, Professor of Chinese, Chair of Comparative Literature Program
- Kasumi Yamamoto, Frank M. Gagliardi Professor of Japanese
- Li Yu, Professor of Chinese

Affiliated Faculty:

- Christopher Bolton, Professor of Comparative Literature and Japanese Literature
- George Crane, Chair of Asian Studies and the Edward S. Greenbaum 1910 Professor of Political Science
- George Dreyfus, Jackson Professor of Religion
- Ju-Yu Scarlett Jang, Professor of Art
- Jason Josephson Storm, Professor of Religion
- Peter Just, Professor of Anthropology
- Aparna Kapadia, Associate Professor of History
- Eiko Maruko Siniawer, Professor of History
- Anne Reinhardt, Chair and Professor of History
- W. Anthony Sheppard, Marilyn & Arthur Levitt Professor of Music
- Scott Wong, Charles R. Keller Professor of History

Visitors:

- Susanne Ryuyin Kerekes, Gaius Charles Bolin Fellow in Religion and Asian Studies
- Eun Young Seong, Visiting Assistant Professor of Japanese
- Nana Takeda, Visiting Lecturer in Japanese
- Chen Wang, Visiting Assistant Professor of Chinese

Mission Statement and Learning Objectives

The mission of the Department of Asian Studies is to help as many students as possible—both majors and non-majors—develop practical proficiency in Asian languages and, in the tradition of the liberal arts, acquire a meaningful understanding of important facets of one or more of the disciplines represented within Asian Studies (including anthropology, art history, economics, history, linguistics, literature, music, political science, religion, and sociology), so that they may realize their fullest intellectual and personal potential and be able to make useful contributions to society. The department offers three distinct major tracks: Asian Studies, Chinese, and Japanese.

Learning Objectives for the Chinese Major

Consisting of a core language curriculum and a variety of courses in the various disciplines represented in the department, the Chinese major track enables students to achieve proficiency in aural comprehension, speaking, reading, and writing in Mandarin Chinese, as well as to understand the cultural traditions and diversity of the Chinese-speaking regions in the world. Majors in Chinese are expected to function as responsible global

citizens, able to use the Chinese language to interact and collaborate in their community and the globalized world, while remaining keenly aware and respectful of varying cultural beliefs, norms, and sensitivities.

Students who complete the requirements for a major in Chinese will be able to:

- Attain the Advanced level in speaking, listening and reading, and Intermediate-High level in writing based on the ACTFL proficiency guidelines.
- Understand the basic grammar and vocabulary of Classical Chinese.
- Master intercultural skills to competently navigate a wide range of social and cultural contexts.
- Critically read and analyze a variety of Chinese-language primary sources for academic and professional purposes.
- Acquire research, problem-solving, and critical thinking skills by engaging in cross-linguistic, cross-cultural, and comparative historical analysis.
- Engage critically with important aspects of the historical and cultural developments and trends in China's diverse and complex past and present.
- Acquire the skills to enable them to continue their engagement with the target language and culture as lifelong learners and users of Chinese.

THE MAJOR

We offer courses in English in the field of Asian Studies as well as courses in Chinese and Japanese language, literature, and culture. Three distinct majors are offered: a major in Chinese; a major in Japanese; and an interdisciplinary Asian Studies major which allows students to choose from a wide range of courses in the anthropology, art, economics, history, languages, linguistics, literatures, music, politics, religion, and sociology of China, Taiwan, Japan, and other Asian countries. An increasing number of courses on South Asia are also offered (e.g. ASST 117, ASST 221, ASST 244, ASST 246T, ASST 248, ASST 252, ASST 256, ASST 391, ASST 415, ASST 424, ASST 431, ASST 488). Students interested in taking Korean or Hindi may take these languages through the Critical Language Program administered by the Center for Foreign Languages, Literatures, and Cultures. Students with questions about the Asian Studies majors or about Asian Studies course offerings should consult the chair. Please note: Courses with ASST prefix carry Division II credit unless otherwise noted and courses with CHIN and JAPN prefixes carry Division I credit unless otherwise noted.

All students wishing to major in the Department of Asian Studies are required to take and pass a total of eleven courses, as follows:

One course that explicitly compares at least two countries in Asia, such as ASST 103, ASST 126, ASST 233, ASST 245, ASST 248, ASST 250, ASST 256, ASST 271, ASST 391, ASST 414, ASST 424, ASST 431, JAPN 258. Or students may take instead a course on a country that is different from their country of primary focus.

Four semesters of Chinese or Japanese language (including no more than two 100-level courses).

In addition to completing (1) and (2) above, all majors choose either an Area Studies track, leading to a major in Asian Studies; or a Language Studies track, leading to a major in Chinese or Japanese.

The requirements for Chinese are indicated below:

Chinese Major

- Four additional semesters of Chinese language (300-level or higher).
- One semester of Classical Chinese.
- One approved course in Chinese literature, linguistics, or culture.

STUDY ABROAD

Students intending to major in Asian Studies are encouraged to study in Asia during one or both semesters of their junior year. Williams faculty serve on the boards of several study abroad programs in China and Japan. Opportunities to study in India, Indonesia, Korea, Taiwan, Thailand, and other Asian countries are also available. Prospective Asian Studies majors who are planning to study abroad should discuss their plans with their advisor as far in advance as possible. Up to eight courses taken overseas may be counted toward graduation, and up to four courses taken off campus may be counted toward the major.

FAQ

Students **MUST** contact departments/programs **BEFORE** assuming study away credit will be granted toward the major or concentration.

Can your department or program typically pre-approve courses for major/concentration credit?

Yes. In some cases, provisional approval can be granted (students should be sure to contact the department for details). For programs that we are familiar with, we usually pre-approve credits.

What criteria will typically be used/required to determine whether a student may receive major/concentration credit for a course taken while on study away?

Course title and description, complete syllabus including readings/assignments, and exams or other written work.

Does your department/program place restrictions on the number of major/concentration credits that a student might earn through study away?

Yes, maximum of four courses.

Does your department/program place restrictions on the types of courses that can be awarded credit towards your major?

Approved courses only.

Are there specific major requirements that cannot be fulfilled while on study away?

No.

Are there specific major requirements in your department/program that students should be particularly aware of when weighing study away options? (Some examples might include a required course that is always taught in one semester, laboratory requirements.)

Not in particular. Students are always strongly encouraged to consult with the department faculty ahead of time to plan on what courses to take during study-away and what courses to take up return.

Give examples in which students thought or assumed that courses taken away would count toward the major or concentration and then learned they wouldn't:

There have been cases where students decided to take different courses after they arrived at the program and those courses did not meet our requirements.

THE DEGREE WITH HONORS

Students interested in writing an honors thesis in Chinese should submit a proposal to the department chair before they pre-register for senior courses in the spring of their junior year. The proposal should include a statement of the topic, a general description of the types of materials available for study and how the study will be carried out, and the name of the faculty member who will serve as advisor. Admission to the honors thesis program will normally be limited to students who have maintained at least a B+ average in their courses for the major.

Students admitted to the program should register for CHIN 493-W31-494. They will be expected to turn in the final draft of their thesis shortly after spring break and to discuss their results formally with their faculty graders. Their final grades in the three courses listed above and the award of Honors, Highest Honors, or no honors will be determined by the quality of the thesis and the student's performance in the oral defense.

THE ASIAN STUDIES ENDOWMENT

The Linen summer grants for study abroad, the Linen visiting professorships, and several other programmatic activities in the department are supported by an endowment for Asian Studies established by family and friends in memory of James A. Linen III, Class of 1934, Trustee of the College from 1948 to 1953 and from 1963 to 1982.

CHIN 101 (F) Basic Chinese

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing at about the 200-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively.

Class Format: (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral reading, questions and discussion in Chinese, translation and explanation in English

Requirements/Evaluation: classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: none

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Unit Notes: students registered for CHIN 101-102 are required to attend and pass the sustaining program during the Winter Study period; credit

granted only if both semesters (CHIN 101 and 102) are taken

Distributions: (D1)

Fall 2019

LEC Section: 01 TR 9:55 am - 11:10 am Cecilia Chang

CON Section: 02 MWF 9:00 am - 9:50 am Cecilia Chang

CON Section: 03 MWF 10:00 am - 10:50 am Cecilia Chang

CHIN 102 (S) Basic Chinese

An introduction to Mandarin, the language with the largest number of native speakers in the world, which is the national language of China and Taiwan, and one of the official languages of Singapore. Course objectives are for the student to develop simple, practical conversational skills and acquire basic proficiency in reading and writing in both the simplified and the traditional script at about the 500-character level. The relationship between language and culture and the sociolinguistically appropriate use of language will be stressed throughout. Both audio and video materials will be employed extensively.

Class Format: (for spoken classes) dialog performance, drills, communicative exercises; (for written classes) oral reading, questions and discussion in Chinese, translation and explanation in English

Requirements/Evaluation: classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: CHIN 101 or equivalent

Enrollment Limit: none

Enrollment Preferences: none

Expected Class Size: 12

Grading: yes pass/fail option, no fifth course option

Unit Notes: students registered for CHIN 101-102 are required to attend and pass the sustaining program during the winter study period; credit granted only if both semesters (CHIN 101 and 102) are taken

Distributions: (D1)

Spring 2020

CON Section: 02 MWF 9:00 am - 9:50 am Cecilia Chang

CON Section: 03 MWF 10:00 am - 10:50 am Cecilia Chang

CHIN 131 (S) Basic Cantonese

An introduction to Standard Cantonese, a major regional language of southern China which is spoken by over 70 million people in Hong Kong, Macao, Guangdong, and Guangxi as well as by many overseas Chinese in Southeast Asia, Hawaii, and North America. Due to the pervasive influence of Hong Kong as well as the economic transformation of Guangdong Province, the prestige of Cantonese within China has been rising steadily over the past few decades. Our focus in this course will be on developing basic listening and speaking skills, though some attention will also be paid to written Cantonese, including the special characters which have been used for centuries to write colloquial Cantonese and which have become even more widely used in Hong Kong since 1997. Since students will ordinarily possess prior proficiency in Mandarin, a closely related language, they should be able to attain in one semester approximately the same proficiency level that is attained in the first two semesters of Mandarin.

Class Format: dialog performance, drills, communicative exercises, oral reading, questions and discussion

Requirements/Evaluation: evaluation is based on classroom performance, homework, quizzes, unit tests, and an oral and written final exam

Prerequisites: CHIN 202 or permission of instructor

Enrollment Limit: 12
