Subject Areas.

Accounting & Finance.

Our Accounting and Finance courses are proudly developed with industry professionals and have secured our graduates work from Amazon, John Lewis, The Walt Disney Company, and more! Real world scenarios are combined with theory to prepare students for employment with an edge over their competitors.

Accreditations

Aerospace Engineering.

The University of Hertfordshire is proud of its heritage in the aerospace industry, having started as a technical college of the de Havilland Aircraft Company in the 1950s. Students of our aerospace engineering courses are treated to a wide range of facilities; including a flight simulator, wind-tunnels, and the latest software packages.

Accreditations

Architecture, Building & Planning.

With courses ranging from Civil Engineering to Architecture, our students are prepared for a variety of rewarding careers. Our civil engineering graduates have gone on to work placements with BMW (UK) Manufacturing Ltd, building on what they learn from industry proposed design projects. Interior Architecture and Design students have participated in live projects with commercial partners including Jamie Oliver's Fifteen, Smirnoff Nightlife Exchange, and St Albans Museums.

Accreditations

Art & Design.

Our Art & Design courses are designed to allow students' creativity to inform their learning. Through courses like MA Photography or BA (Hons) Model Design (Special Effects), our Art & Design students produce practical work informed by theoretical understanding of the history of their craft. Students regularly exhibit their work at our Degree Shows to industry professionals, and students have gone on to employment post-graduation as a result.

Accreditations

Automotive Engineering.

Our automotive engineering students learn with a hands-on approach. Students can get involved with building a single-seater race car in the UK Formula Student Competition - often taking them overseas to compete! Work opportunities are vast and exciting, with graduates going on to work for Mercedes-Benz Grand Prix Limited and McLaren Automotive.

Accreditations

Institution of
**MECHANICAL
ENGINEERS**

Biological Sciences.

Students in this field become aware of how biological sciences like Biochemistry and Molecular Biology affect our lives; from the discovery of new drugs to the industrialisation of laboratory processes. We offer a £50M Science Building for our students to develop their skills in, complete with state-of-the-art laboratories.

Accreditations

Business & Management.

Our students are taught by a range of industry-hardened staff with a wealth of knowledge to impart. Strengthen your knowledge of how to combine business, finance, management and more to best position you for a rewarding career. Graduates from this field leave with a significant business advantage, with many going on to work for the likes of Jaguar Land Rover, Amazon UK, and the Royal Bank of Scotland.

Accreditations

Civil Engineering.

We have a reputation for innovation in teaching and learning, and our students' achievements best demonstrate this as employment prospects for civil engineers are strong - both in the UK and overseas! Students will also benefit from use of laboratory facilities and staff expertise at BRE (formerly Building Research Establishment).

Accreditations

Computer Science.

Our students are at the cutting edge of the Computer Science field, with several of our courses offering work placement opportunities where student initiative enhances their experience with hands-on, industry practice. Half the research outputs in Computer Science at the University of Hertfordshire have been rated as world-leading or internationally excellent in the Research Excellence Framework (REF) 2014.

Accreditations

Digital Animation.

From the latest blockbusters to television broadcasts, our graduates have contributed to the most exciting visual effects work around the world today. We have worked with high profile organisations and companies such as the BBC, The Mill, Red Vision and many others. Students develop their own styles and skills, shepherded by industry professionals, adding to the talent at such companies as Industrial Light and Magic. We're also one of the top universities in the world for Games Design.

Accreditations

Education & Teacher Training.

Our courses allow students to develop beyond just teaching roles to rewarding careers in research and doctoral studies. Students get to grasp with policy and how they can influence it at primary, secondary, and higher levels of education. Students will build on and deepen their knowledge in relation to child development.

Electrical & Electronic Engineering.

With access to high-tech laboratories, students on these courses get to grips with subject areas from robotics to electronic power control. Graduates have gone on to work for such companies as Leonardo, Mitsubishi Electric, and Martin-Baker Aircraft Company.

English Language, Linguistics & Foreign Languages.

Our School of Humanities offers a wide variety of English courses that allow students to study traditional and contemporary works that speak directly to their everyday lives. Our English Literature degrees allow for combination with Creative Writing, Journalism, Film, and even the addition of another foreign language (such as French, German, or Spanish) to enhance your use of the English language with a global perspective.

Event Management & Tourism.

Practical application of theory is invaluable in enhancing student experience, and our Event Management & Tourism courses are no exception. With work placement options available on courses in this field, students understand from in-work environments how important management and tourism are. Graduates have gone on to work for international hotel chains such as The Ritz Carlton and Sheraton Hotels.

Accreditations

Fashion.

Our fashion courses give students a firm grasp of the fashion industry, as well as preparing them for practical application of their skills in merchandising, design, and production management roles. Postgraduate students also benefit from contributions from visiting fashion and design professionals, as well as involvement with our international exhibitions programme.

Film & Television.

Students take a practical approach to filmmaking, making up to three films a year. With access to the University's ever-expanding loan store, students back up their theoretical understanding of film with practical training on cameras, lights, and grip equipment. Students also benefit from the University's own purpose-built television studio for experience with live broadcasts and studio production.

Accreditations

Geography & Environment.

With the world changing rapidly, it's never been a better time to study one of our Geography and Environment courses. From studying how new, sustainable, and resilient urban spaces are created to investigating the human impact on natural environments. Our graduates are highly sought after in a wide range of professions within local government, town and country planning, and recreational and habitat management.

Accreditations

Health Professions & Social Work.

Our health courses are highly sought after, preparing graduates for careers in a variety of health sectors. Students can excel in the treatment of skin diseases through our Clinical Dermatology degrees, or develop how to service communities and families through Social Work courses. Many of these courses have ties to professional health bodies as well as the National Health Service.

Accreditations

History, English Literature & Creative Writing.

Understanding history better our insight for the future, and our students are well-trained with studies that relate historical fact to modern reality - from campaigns for freedom and equality, all the way to Hamilton and Trump. At postgraduate level, students gain access to heritage organisations through our renowned Heritage Hub and award-winning Oral History Team.

Journalism, Media & Communications.

How we relate to the world around us is ever-changing, and our Humanities degrees help students to grasp culture, communication, and interpretation with academics who've worked for the likes of the BBC and the Guardian. Our graduates have an excellent record of securing roles in a range of industries including teaching, the media, publishing and information management.

Law & Criminology.

Our law students have access to an incredible on-campus mock courtroom - so authentic that it's been used for British television productions! Students hone their skills in the court room in front of their peers and tutors. 93.8% of Hertfordshire Law School graduates are in employment or further study within six months of graduating. Whether you follow a path within the public sector, into international business, civil society, academia or even research, your degree will stand you in good stead!

Accreditations

Marketing Communications & Advertising.

Our undergraduate Marketing students have the chance to work on live industry projects using real data, working with businesses and charities across the UK. Work placements further graduate understanding of advertising with opportunities with the likes of Disney. Our postgraduate students are positioned as future business leaders for successful marketing careers.

Accreditations

Mathematics & Physics.

With state-of-the-art teaching facilities, including our planetarium and our Bayfordbury Observatory, students of this School gain an intimate understanding of physics and its practical application. Recent maths graduates have gone on to exciting careers in actuarial, finance, statistics and data science, IT, business analysis, teaching and many more.

Mechanical Engineering & Mechatronics.

At both undergraduate and postgraduate level, our engineering students are given the best opportunities, with undergraduates having completed placements with Bosch, Network Rail, Transport for London, and Aston Martin. Postgraduates combined technical with managerial studies, giving them the edge when it comes to the competitive engineering jobs market.

Accreditations

Nursing & Midwifery.

Our nursing students are trained to perfection to best serve their communities. Whether that's through Mental Health Nursing, wherein students are challenged to establish therapeutic relationships with patients, or in Adult Nursing, which sees students apply classroom teachings to clinical settings, our graduates go on to rewarding careers. In fact, 100% of our Adult Nursing graduates went on to employment or further study within 6 months according to the latest national Destination of Leavers from Higher Education (DLHE) survey.

Accreditations

NMC Nursing &
Midwifery
Council

Philosophy, Politics & Economics.

This diverse range of courses prepares students for employment with consideration of ethics and economics. Our economics degrees prepare students to apply their theory in real-world scenarios, getting to grips with how economics inform the formation of governments. Meanwhile, our Philosophy and Ethics degrees are taught by active researchers, priming students to understand how people's beliefs and belief systems shape our very way of life.

Pharmaceutical Sciences.

Students are taught scientific principles through practical, laboratory-based learning, preparing them for lab-based careers in the pharmaceutical sector. Graduates of our pharmaceutical courses will be fully equipped to enter the pharmaceutical and biotechnology sectors in a variety of disciplines, including formulation science, analytical chemistry, medicinal chemistry, and regulatory affairs.

Accreditations

General
Pharmaceutical
Council

Sound, Music & Production.

Our sound and music students are provided with the very latest technology to support their learning. From our large recording studio, two labs with dual monitor Apple Intel, three monitoring spaces for surround sound, and to our Foley studio for sound design work, students gain invaluable practical skills to give them the edge when it comes to employment. Graduates are ideally positioned to act in positions between various music technologies and composers/producers, as well as careers in audio engineering, and music PR.

Accreditations

JAMES
JOINT AUDIO MEDIA
EDUCATION SUPPORT

Psychology.

Our Psychology courses open the door to this fascinating field. Our degrees are accredited by the likes of the British Psychological society, and undergraduate students explore our psychological development from childhood and how it differs dramatically between individuals. Postgraduate Psychology degrees can see students go abroad to complete their investigative projects, providing global understanding in preparation for careers in consultancy, specialisms, or research.

Accreditations

The Association for Business Psychology

Sport.

Our sports-based degrees provide superb teaching of the importance of high-performance sport, as well as courses that explore the impacts on sports participation. Along with the University's stunning Hertfordshire Sports Village, complete with facilities for a variety of sports, our students benefit from our student mentoring scheme whereby first year students access support from postgraduate, final year, and second year students.

herts.ac.uk/courses

How to apply

Once you have decided that the University of Hertfordshire is the right institution for you, you can read through our International Guide and our website for full details how to apply.

You can make your application via our approved representatives or you are able to complete our application form which can be found on our website: herts.ac.uk/international

Our admission tutors review each application on a case by case basis. With your application form you'll need to send us the following documents:

- An academic reference
- A personal statement, outlining why you wish to study in the UK, at Hertfordshire and why you wish to do the course you've chosen and how this matches your career aspirations
- A scan of your passport photo page
- A scan of all of your academic qualifications
- A scan of your English language qualification

Please refer to our website for further guidance visit: go.herts.ac.uk/int-before-you-apply
